return frequency is advanced to thrice weekly in late September. The DH 86 *Canberra* is struck by an eagle during a Dalby and Roma flight on October 1, but is able to continue.

Twelve days later, the same aircraft is seriously damaged when its under carriage collapses following a Brisbane landing. On October 30, the Ceylon terminus is extended to Karachi and on November 26, a Lockheed Model 18 Lodestar, piloted by W. G. Campbell with 13 others aboard, crashes into a hill following takeoff from Port Moresby; there are no survivors.

QEA's boardings are down this year to 11,117.

Piloted by F. A. Reeve, the S23 *Coolangatta* enters a storm near Newcastle on January 10, 1944 and without warning drops hundreds of feet, causing a number of passengers to strike their heads in the turbulence on the roof of the cabin; three are badly hurt. The S33 *Clifton*, piloted by H. B. Hussey, is destroyed as the result of a bad landing at Rose Bay on January 18; the planing surface of the hull collapses, but only one crew member is hurt. A Lockheed Model 18 Lodestar is seriously damaged on January 28 when it hits a tree stump while taxiing at Brisbane.

Sporting red kangaroos beneath their cockpit windows and the words "Qantas Empire Airways Kangaroo Service" as part of the livery, three Consolidated Liberator C.III's (C-87 Liberator Express or LB-30s) are acquired from BOAC during the spring to supplement the PBY-5As on the Ceylon service. The premier aircraft, under the command of **British Overseas Airways Corporation (BOAC)** Capt. O. P. Jones, arrives at Perth on June 3.

The civil Liberator flies on to the RAAF base at Tocumwal, New South Wales, where a Qantas crew receives flight familiarization. With Jones as command pilot, the first 16-hr. 30-min. return Liberator flight, Perth and Learmouth to Ratmalana, departs Australia in secret on June 17. Flight 4Q-1 proceeds over a 3,077-mile route that cuts the Catalina time by 10 hours. For the time being, Liberator roundtrips from Australia's northwest coast to Ceylon will take off every 10 days and every passenger will receive a colorful certificate awarding membership in "The Elevated Order of the Longest Hop." Late in the month, the 100th Indian Ocean Catalina flight is completed.

The DH 86 *Melbourne* is damaged during a takeoff run from Blackall on July 9, while, a second LB-30 Liberator arrives at Perth on August 14, allowing the Ceylon service to be increased to one flight weekly. Three weeks later, the new airliner is damaged in a landing at Perth's Guildford Airport, when its nosewheel assembly collapses and the aircraft slides nose-down for 195 yards. The company is first allowed to advertise its Indian Ocean services in September, all previous flights having been made in secret.

On October 9, the DH 86 *Canberra* runs off the Darwin runway in a strong wind after landing and strikes a ditch; although no one aboard is injured, the plane must be written off. Piloted by L. J. Brain, the S23 *Coolangatta* with seven aboard fails takeoff from Rose Bay on October 11; the flying boat stalls 10–12 ft. off the water, hits hard, and its hull fails (one dead).

Also in October, the assets, routes, and three DH 86s of **W. R. Carpenter and Co. (Pty.), Ltd.** are acquired; a Lockheed L-14H2 is also received, but is badly damaged in a landing accident at Mascot on November 13. Seven days later on November 20, the LB-30 damaged earlier is returned to service wearing a new nosewheel assembly courtesy of the U.S. 90th Bomb Group (H). Capt. Gordon Taylor flies the Catalina *Frigate Bird* from Mexico to Perth. Enplanements for the year soar to 23,511.

A Lockheed L-14 is seriously damaged in a landing accident at Mascot on January 18, 1945. On February 27, the S23 *Coriolanus* is badly damaged during Rose Bay shipping operations when the flying boat collides with a tractor. On April 2–3, DH 86s reopen the old "Bird of Paradise" W. R. Carpenter and Co. routes suspended in 1943, Sydney–Port Moresby and Lae via Brisbane, Rockhampton, Townsville, and Cairns. The joint **British Overseas Airways Corporation (BOAC)/QEA** England–Australia Aerial Express Service is now established. The **British Overseas Airways Corporation (BOAC)** Avro 691 Lancasterian 1,

which departs Hurn on May 31, is taken over by a QEA crew at Karachi and flown on to Sydney, arriving on June 2, the same day return flights commence. Frequency on the Lancastrian route becomes twice weekly on July 15 and Australia–U.K. flight time is cut to 63 hrs. The 271st and last Ceylon–Perth PBY-5A flight is completed on July 18. Each of the 648 passengers who have flown this route on any of the 271 flights since July 1943 have received certificates of membership in the "Rare and Secret Order of the Double Sunrise," signifying more than 24 hours of continuous flight.

Liberators now replace Catalinas on the Ceylon run because, as a condition of the Lend-Lease Agreement with the U.S., the five Catalinas, once withdrawn, must be scuttled at sea.

The war with Japan ends on August 15 and on August 20 the 200th civil Liberator return flight is made from northwest Australia to Ceylon. The S23 *Coriolanus* makes the first postwar Australian civil flight Sydney–Singapore on October 4–8, returning on October 12–17 with 34 released Australian POWs.

Due to a lack of ocean shipping at Fiji, the *Coriolanus*, at government request, commences Sydney–Suva via Noumea and Brisbane passenger flights on November 19. A new LB-30 Liberator is received on November 29 and on November 30, commercial passenger service begins on the Australia–U.K. Lancastrian route. The same day, Sydney replaces Perth as terminus for the Ceylon Liberator run. The first three Douglas DC-3s are received in December and on December 12, a third LB-30, leased from **British Overseas Airways Corporation (BOAC)**, enters service.

The year's overseas boardings fall to 18,657.

With Cocos Island as a refueling stop, Learmouth, on January 18, 1946, is replaced by Perth as a stop for both the Liberator and Lancastrian services. The flight time of the England–Australia Aerial Express Service is now reduced to 54 hrs. 15 min. (elapsed time, 67 hrs. 15 min.). Another LB-30 Liberator is received on March 14 from the British flag carrier and service on the Lancastrian Kangaroo Route is suspended on March 24 following the loss of a **British Overseas Airways Corporation (BOAC)** machine in the Indian Ocean the previous day.

The final Indian Ocean Liberator service is flown on April 5. The next day, the Kangaroo Route is altered to operate via Singapore; on April 7, QEA launches twice-weekly Liberator Sydney–Singapore flights designed to connect with the **British Overseas Airways Corporation (BOAC)** flying boat service to the U.K. On April 8, the wartime "Double Sunrise" Australia–Ceylon route is officially closed.

On May 12, **British Overseas Airways Corporation (BOAC)** and QEA begin full partnership over the Australia–England Lancastrian route that had previously been divided between the two carriers at Karachi. The same day, the first postwar joint BOAC/QEA U.K.–Australia flying boat service is opened Sydney–Poole; overlapping the Liberator flights, the five-and-half-day multistop operation is flown by **British Overseas Airways Corporation (BOAC)**'s S25 Hythes.

The last QEA Liberator departs Sydney for Singapore on August 28 on the final flight by the type on the England–Australia Aerial Express Service. Since their introduction in 1944, the LB-30s have made 327 Indian Ocean crossings, including 254 from Perth. Weekly Brisbane–Manila C-47 courier flights commence in September on behalf of the RAAF, employing military aircraft with civilian crews.

In October, a A£5.5-million order is placed for four Lockheed L-749 Constellations. Experimental DH 84 New Guinea domestic charter flights begin from Lae in November. In December, the Australian parliament passes a bill authorizing the buyout of **British Overseas Airways Corporation (BOAC)** interest in QEA. Simultaneously, three more DC-3s are received.

The overseas airline's enplanements for the year are 26,764.

The Sydney–Lae DC-3 route is extended to Rabaul on January 16, 1947 and on January 22, the L-14H2 is destroyed in a nonfatal takeoff accident at Schofields; another DC-3 is also acquired in January. At the beginning of February, Sydney designer Gert Sellheim creates a winged kangaroo logo to coincide with the introduction of long-haul L-749 Constellation services.

During March, two CAC CA-6 Wackett Trainers are acquired. On March 31, the Commonwealth government purchases the **British Overseas Airways Corporation (BOAC)** interest in QEA, following on June 30 with the buyout of **QANTAS (Queensland and Northern Territories Aerial Services [Pty.], Ltd.)** and its shares; Qantas Empire Airways, Ltd. is now the nation's fully state-owned flag carrier.

Also during June, regularly scheduled services are inaugurated to various Papua and New Guinea internal destinations, replacing the charter flights maintained since the previous November.

A DH 84 is destroyed after crashing into trees along the Wampit River on July 14; three injuries reported. An Avro 691 is also acquired in July and on August 9 a Grumman Widgeon is damaged during a poor landing at Kariava. A Consolidated Vultee PB2B-2 Catalina is acquired on August 17.

In September, an Avro 683 Lancastrian is received along with a second Catalina and a third on October 7. Christened *Ross Smith*, *Lawrence Hargrave*, *Harry Harber*, and *Charles Kingsford-Smith*, the first four L-749As, meanwhile, arrive at Sydney on October 4, 8, and 11, respectively, the latter two on the latter day. Every-two-weeks Lancastrian return Sydney–Norfolk Island flights commence on October 14; later in the month, orders are placed for DC-4s.

A Consolidated PB2B-2 Sydney–Lord Howe Island proving flight is made on November 20 with the first of seven such modified PBY-5A flying boats to enter service. Also in November, another Catalina and another Lancastrian join the fleet.

The L-749A *Charles Kingsford-Smith* inaugurates Sydney–London via Karachi through service over the Kangaroo Route on December 1; the next day, the Lancastrians operating the route are relegated to cargo and mail flights. The *Charles Kingsford-Smith*, incidentally, is the first Qantas aircraft to carry the Winged Kangaroo logo; the giant marsupial will eventually be placed into a circle.

On December 9, irregular Sydney–Lord Howe Island Catalina services start and seven days later, Lancastrians, under contract to the RAAF, take over the Sydney–Bofu, Japan, weekly courier service. On December 18–20, the S23 *Coriolanus* completes its last service, Noumea–Sydney, and is then retired in a special ceremony.

Since beginning the Fiji service in 1945, the last QEA flying boat has put in 8,500 flight hours over 2,523,641 revenue miles.

Bookings through March 31, 1948 (the last year for such record keeping) are 31,048.

On January 2, 1948, the frequency of the Japan courier service is increased to twice weekly and the S33 *Coriolanus* is disposed of on January 8. Two days later, a DH 83 strikes a fence at Burketown after abandoning takeoff in high winds; although no injuries are reported, the aircraft is badly damaged. A third Lancastrian is placed into service in late January and on February 12, the Lockheed Model 10A *Inlander*, having lost its starboard engine, is forced to crash-land just south of Charleville; two people are injured and the plane must be written off.

On April 6, Iwakuni replaces Bofu as the Japan terminus, followed by Tokyo on October 15. Meanwhile, three more DC-3s arrive in April followed by three others in May; in June, a Lancastrian sets a commercial flight record when it skips the Manila stop and flies the 3,500-mile Darwin–Iwakuni route direct in 17 hrs. 11 min.

Also during June, a Lancastrian is able to conduct a 42-hr. proving flight from Sydney to Johannesburg via Mauritius. During the summer, the Sydney–Lae “Bird of Paradise” route is extended to Madang and on October 14, every-two-weeks Sydney–Espiritu Santo via Noumea and Vila, PB2B-2 Catalina service is inaugurated.

Between November 14–20, an 8,644-mile Lancastrian proving flight is flown Sydney–Johannesburg via Perth, Cocos Island, and Mauritius in 41 hrs. 52 min.; the November 12–December 1 return flight marks the first direct link to Australia from Africa. Meanwhile, a DH 84 is seriously damaged at Cloncurry on November 21 and another is destroyed by fire at Canobie on November 24. A third Catalina is received on December 13 and the fourth Catalina is received on December 31. The first to be named, it receives the moniker *Island Chieftain*.

April to December bookings are 26,049.

An Avro Anson 652A joins the fleet on February 4, 1949 and between February 1 and 18, the first three Douglas DC-4s are received and christened *Pacific Trader*, *Hong Kong Trader*, and *Malayana Trader*. One of these makes a charter proving flight to Hong Kong on March 15. On April 2, the carrier turns over its responsibility to **Trans-Australian Airlines (Pty.), Ltd. (TAA)** for scheduled and flying doctor services in the Northern Territory and West Queensland. Piloted by J. G. Morton and J. A. Furze on a training mission, a Lancastrian fails to stop after landing at Dubbo on April 7 and crashes; although is destroyed when fire breaks out, both men escape.

The DC-4 *Philippine Trader* arrives on May 6 and the newly received Avro Anson is destroyed during a nonfatal takeoff crash at Kerowagi on May 10. Three PB2B-2 Catalinas are stationed at Port Moresby in May for operations along the New Guinea coast. On June 23–24, one of these, unattended at Lord Howe Island, breaks away from its mooring buoy and runs aground; it is so badly damaged that it must be written off. Regularly scheduled DC-4 Sydney–Hong Kong via Darwin and Labuan flights commence on June 26.

The DC-4 *New Guinea Trader* arrives on July 9, followed by the Catalina *Island Patrol* on July 29. Another Catalina is lost at Rose Bay on August 27; it will be determined that a purposefully planted bomb has caused the explosion that destroys the ship. A Lancastrian is seriously damaged in a landing accident at Mascot on September 15; the next day, the DC-4 *Philippine Trader* is damaged while undergoing maintenance at Hong Kong. A DH 83 Fox Moth is retired on October 3 following a crash landing at Tarpin and the sixth and final PB2B-2 Catalina, the *Island Warrior*, is delivered on November 25. The fifth L-749A Constellation, christened *Bert Hinkler*, is delivered to Sydney on December 30.

The year's bookings accelerate to 57,382.

The *Bert Hinkler* enters service on January 17, 1950 and the Tokyo service becomes a civil operation on March 3, as commercial passengers are allowed to embark. Ten days later, DC-4s begin to supplement DC-3s on the Sydney–Port Moresby and Lae “Bird of Paradise” service. The first two Short S25 Sandringham flying boats, *Pacific Chieftain* and *Pacific Warrior*, are received on April 13 and 28, respectively. On April 25, DC-4s launch a direct route to Manila and on May 2, the two new Shorts S25 Sandringhams replace PB2B-2 Catalinas on the Noumea and Suva run.

Beginning in June, sleeper berths and berth windows are removed from the company's L-749s in favor of luggage racks. The first Australian-built, production-model DHA-3 Drover is delivered on September 13 and is placed on the internal New Guinea routes. Two more L-749s are purchased from **Air India, Ltd.**

Enplanements for the year soar to 74,616 as Fergus McMaster, the company's first chairman, dies.

On March 15, 1951, Capt. Gordon Taylor's PBY *Frigate Bird II* departs Sydney on the first leg of a survey flight to Valparaiso, Chile, via Easter Island. The Sandringham *Pacific Warrior* is seriously damaged during its landing run at Rose Bay on April 4. Another Drover is received on April 9 and on April 13 a Lancastrian is destroyed in a nonfatal landing accident at Singapore. The sixth and last L-749A Constellation *Horace Brimsmead* is delivered on April 27. During the summer, orders are placed for three Lockheed L-1049Cs.

While taxiing prior to takeoff from Vila, New Hebrides, on June 10, the S25 *Pacific Warrior*, newly back in service, strikes a coral reef and is holed below the waterline; although no one is injured, the craft is lost. The S25 *Pacific Explorer* arrives on July 15 and on July 16 a DH 3A, carrying seven persons and a shipment of gold, crashes at sea south of the mouth of the Markham River, near Lae, New Guinea; there are no survivors. The Sandringham *Pacific Chieftain* is seriously damaged in a bad landing at Rose Bay on September 3 while a DH 84 is destroyed in a crash just short of New Guinea's Karanka airfield on September 21 (one dead).

A third Drover is received on September 28 and the S25 Sandringham *Pacific Voyager* also enters service during September. A fourth Drover

arrives on November 1 and DC-3 Lae–Naur–Tarawa services begin on November 8 via Embi and Honiara. The same day, the DC-4 *Philippine Trader* is damaged in a landing accident at Mascot. A DH 84 with three aboard overflies its landing field at Yarmanda on December 13 and crashes into the hills beyond; there are no survivors. Another DH 84 is must be written off following a nonfatal landing accident at Menyamyia on December 24.

Bookings for the year jump to 94,543.

Although no one aboard is injured, the Sandringham *Pacific Voyager* is badly damaged during a takeoff accident from Rose Bay on January 31, 1952. The last of five DH 83 Fox Moths, originally introduced by QANTAS (Queensland and Northern Territories Aerial Service [Pty.], Ltd.) in 1934, is retired on April 30 and the fifth and last DH A3 Drover is received on July 30.

In cooperation with South African Airways (Pty.), Ltd. (SAA), the Charles Kingsford-Smith departs Sydney on September 1, on the first leg of the new once-every-two-weeks South African Wallaby Route; flying via Melbourne, Perth, Cocos Island, and Mauritius, the L-749 arrives at Johannesburg 39 hrs. later on September 2. Later in the day, First Officer T. E. Poole, while assisting in aircraft dispatch procedures, walks into the No. 3 propeller of the DC-4 *Malayan Trader* at Anderson Field on Guam and is killed. Also on September 2, the DC-4 *New Guinea Trader* launches a Singapore–Cocos Island via Djakarta connecting service, flying on via Perth to arrive at Sydney on September 6. A Drover is damaged during a nonfatal takeoff accident at Mackay on September 11.

Beirut and Frankfurt are added on October 16 as stops on the L-749 London service. Divers, on November 21, recover the gold shipment lost off New Guinea the previous July.

The year's enplanements remain level at 94,431.

On arrival at Darwin on February 8, 1953, it is found that the outer port wing panel of the DC-4 *Pacific Trader* has been extensively damaged as the result of a low pressure area within the No. 1 main gas tank.

The last three DH 84 Dragons are withdrawn between March 9 and May 14, while orders are placed in April for six more L-1049Cs. DC-3 Lae–Hollandia service begins on September 7. On November 14, the L-749 *Harry Hawker* initiates a Bangkok stop on the Kangaroo Route to London. A DC-3 is seriously damaged in a nonfatal landing accident at Yandina on December 8.

Bookings for the year soar to 106,585.

In February–March 1954, Queen Elizabeth II and Prince Philip tour Australia; Qantas operates four Royal Flights covering some 3,900 miles. An L-749 crashes at Singapore on March 13 (33 dead). The assets of British Commonwealth Pacific Air Lines, Ltd. (BCPAL) are acquired on March 17 and late in the month the PB2B-2 Catalina *Island Warrior* is withdrawn.

Tourist-class service begins on the Australia–U.K. Kangaroo Route on April 3. The first L-1049C is delivered to Sydney on April 15 and is christened *Southern Constellation*. It is followed by the *Southern Sky*, which is delivered on April 28.

The new Super Connies begin twice-weekly Sydney–San Francisco and Vancouver via Fiji, Canton, and Honolulu service on May 15 over the old British Commonwealth Pacific Air Lines, Ltd. (BCPAL) route, which is now relabeled *The Southern Cross* route. The third L-1049C arrives on May 24 and is named *Southern Sun*; another Super Connie, the *Southern Star*, comes to Sydney from America on July 5.

The last L-749A delivered is the first sold when the *Horace Brinsmead* passes to British Overseas Airways Corporation (BOAC) on July 23. Also in July, the carrier assumes a 50% interest in Fiji Airways, Ltd. and sells to it a pair of DHA-3s. The second L-1049C, *Southern Sky*, begins service on the Kangaroo Route to London on August 2 and is joined shortly thereafter by a third L-1049C, *Southern Sun*.

Super Constellations replace L-749As on the Indian Ocean route to Johannesburg on November 5 and on November 30, L-749s replace DC-4s on the Tokyo run. Four de Havilland DHC-2 Beavers are acquired on December 7 and the S25 Sandringham *Pacific Chieftain* is withdrawn on

December 10. Late in the year, W. Hudson Fysh is knighted, effective New Year's Day. During the year, the last three DH A3 Drovers are withdrawn.

Boardings for the 12 months accelerate to 118,495.

The L-1049C *Southern Mist* and the L-1049E *Southern Breeze* arrive on January 18 and 31, 1955, respectively, while the L-749As, the *Ross Smith* and *Lawrence Hargrave*, are sold to British Overseas Airways Corporation (BOAC) on February 15 and 26. The DC-4 *Australian Trader* enters service on March 3 and the two L-1049Cs are delivered to Sydney on March 4 and 8 respectively. Christened *Southern Mist* and *Southern Horizon*, the two L-1049Cs replace L-749As on the Tokyo via Manila service on May 3. On June 1, the S25 Sandringham *Pacific Warrior* begins the last roundtrip by her type in Qantas livery to Espiritu Santo and Suva; returning to Sydney three days later, she is retired.

DC-4 Sydney–Noumea and Fiji flights commence on June 17; the Sandringhams *Pacific Explorer* and *Pacific Voyager* are withdrawn on June 23 and July 5, respectively. On August 10, Perth is added as a stop on the Kangaroo Route. The L-749A *Harry Harber* is sold to Aerovias Guest, S.A. on October 8 while the *Southern Wind*, the first of two L-1049Gs acquired when their delivery positions were surrendered by Northwest Airlines, is delivered on October 20.

The third L-1049C, *Southern Wave*, arrives on October 25; the L-749A Charles Kingsford-Smith also goes to Aerovias Guest, on November 2. L-1049Cs replace L-749s on the Johannesburg Wallaby run on November 5 as Darwin replaces Perth as a stop on that route. The last L-1049C of the year, *Southern Dawn*, is delivered on November 26. Cocos Island–Perth DC-3 mail operations are begun on November 23.

Enplanements are up to 134,904.

On March 2, 1956, newly delivered L-1049Cs are placed on the Kangaroo Route to London; journey time is cut by 29 hrs. 30 min. by eliminating stops at Bangkok and Djakarta. In April, DC-4 flights to Japan cease operations beyond Hong Kong and the DC-4 *Pacific Trader* is retired on May 31.

In preparation for the upcoming Olympic Games, Qantas flies the Olympic flame 8,600 miles from Athens–Darwin, the longest flight ever made with it and the first time it had crossed the equator into the southern hemisphere. The XVIth Olympiad, held at Melbourne, results in record traffic for the carrier; over 70 special flights are scheduled and on more than 12 occasions, the entire Super Constellation fleet is in the air at the same time (incidentally demonstrating the airline's excellent E & M).

On September 6, an A\$18.8-million order is placed for seven Boeing B-707-138s, a special version of the Dash-120 shortened by 10 ft.; Qantas is the first non-U.S. airline to order the Boeing jetliner. The Australian flag carrier is also launch customer for the L-1049H, the first of which, *Southern Spray*, makes its maiden flight on September 20. It arrives on October 18, followed by the *Southern Tide* on November 20. The year's bookings balloon to 161,243.

The *Southern Sky* inaugurates weekly Sydney–Hong Kong L-1049C service on January 6, 1957. A pilots' strike grounds the airline from April 11 to April 20. On June 10, Athens is added as a stop on the London Kangaroo Route. During the summer, float-equipped de Havilland Canada DHC-3 Otters are placed in service along the coast of Papua. On July 20, the company opens a New York office in preparation for new services to Europe via the U.S. An L-1049C completes the first nonstop Honolulu to Sydney flight on October 28, the same day the L-1049G *Southern Aurora* is delivered. The final Constellation delivery is made on November 21 when the L-1049G *Southern Zephyr* arrives at Sydney from California.

Enplanements grow to 167,350.

On January 14, 1958, two L-1049Gs take off from Melbourne to inaugurate the world's first commercial round-the-world service through North America. A similar Pan American World Airways (1) service begun the year before is barred by the CAB from crossing the U.S. and Canada. Separating at Sydney, the *Southern Zephyr* flies west along the Sydney–London Kangaroo Route through the Middle East, the *Southern Aurora* flying east across the Pacific to San Francisco, New York, and

London. Soon, eight round-the-world services are being run weekly, four all-Qantas and four flown in cooperation with **British Overseas Airways Corporation (BOAC)**. The company's first B-707-138, the *City of Canberra*, is rolled out at Boeing's Renton, Washington, plant on February 16.

Following the death of its founder, Harold Gatty, 100% ownership of **Fiji Airways, Ltd.** is purchased on March 24. Four Lockheed L-188C Electra turboprops are ordered from the U.S. on April 1 for regional services.

On September 10, the DC-4 *New Guinea Trader* is leased to **Malaya Airlines, Ltd.** On November 11, the last two Consolidated PB2B-2 Catalinas, *Island Chieftain* and *Island Patrol*, are retired at Port Moresby. The *Southern Zephyr* incurs structural wing damage as the result of a nonfatal heavy landing just short of the runway at Nadi, Fiji, on November 14. By December, the route network measures 72,725 unduplicated miles.

The four DHC-2 Beavers are withdrawn during the year and boardings for the 12 months are 175,838, including 5,000 taken over the prestigious North Atlantic sector.

L-1049Cs replace DC-4s on the Sydney–Port Moresby “Bird of Paradise” route on January 23, 1959; however, DC-4s are left to handle the Port Moresby–Lae traffic. The first B-707-138 is held up by technical modification and the second is, in fact, delivered to Sydney via Honolulu on July 2. Christened *City of Sydney*, the Boeing, the first commercial jetliner to delivered to an Australian airline and the first Stratoliner ordered by a non-U.S. carrier, arrives in a record 16 hrs. 10 min. Company officials and the media welcome the aircraft at the new A\$12-million Qantas jetliner base.

Released from Renton, the initial *City of Canberra*, renamed *City of Melbourne* for its transpacific flight, is delivered in mid-month and then renamed *City of Canberra*. It is followed in by the real *City of Melbourne*. The *City of Canberra* is placed in service on July 29 on the San Francisco route. The fourth through seventh B-707-138s, *City of Brisbane*, *City of Perth*, *City of Adelaide*, and *City of Hobart*, are delivered in August and September, respectively. The *City of Canberra* makes the Honolulu to San Francisco run on August 30 in a record 4 hrs. 9 min. The next day, the frequency of the L-1049C Tokyo service is increased to twice weekly and the Hong Kong service to thrice weekly.

On September 5, the *City of Melbourne* departs Sydney for London via the Southern Cross route to San Francisco and hence via New York. Also in September, a 29% interest is taken in **Malayan Airlines, Ltd.**, with the DC-4 *New Guinea Trader* remaining on charter to it. Three more B-707-138s are delivered in October. At this point, Qantas begins to sell of its Super Constellation fleet; first to go are the last received, the L-1049Gs *Southern Aurora* and *Southern Zephyr*, on October 14 and 25, respectively.

Meanwhile, just after departure from San Francisco for New York on October 15, the *Southern Aurora* suffers the loss of engine No. 4; an emergency landing is made at Lovelock Field, Nevada, and although the propeller spins off upon touchdown, no injuries are reported. The plane is subsequently sold back to Lockheed. The next day, the DC-4 *Philippine Trader* is withdrawn.

On October 27, the *City of Perth* departs Sydney for London over the Kangaroo Route; two days later, the aircraft leaves the British Capital for Sydney via Frankfurt, Rome, Cairo, Karachi, Calcutta, Bangkok, Singapore, Darwin, and Brisbane, completing the carrier's first round-the-world jetliner service on October 31. Meanwhile, two days earlier, the DC-4 *Australian Trader* is retired.

In November, a second weekly Sydney–Singapore and Singapore–London return frequency, employing an L-1049G over the first leg and a leased **British Overseas Airways Corporation (BOAC)** Comet 4 for the longer London run. Also that month, a Sydney–London L-1049H all-cargo service is started and two more Super Constellations, the *Southern Breeze* and the *Southern Sky*, are withdrawn. Sydney–Noumea DC-4 service is suspended on December 1 and three days later, a tripartite pact is signed with **British Overseas Airways Corporation (BOAC)** and **Air India, Ltd.** for integrated service over the Europe–Australia route.

Also on the first day of the month, the Super Constellation *Southern Sun* is retired. Within days, the first two L-188Cs are delivered and christened *Pacific Electra* and *Pacific Explorer*; they are placed into service on the Sydney to Hong Kong via Port Moresby and Manila route on December 18 and is also employed to stretch that service on to Tokyo, beginning on December 21.

As the year closes, orders are placed for four B-707-138Bs; equipped with new Pratt & Whitney engines, they will be known as “V-jets,” from the Latin *vannus* (fan).

Boardings leap to 201,051, including 6,000 carried over the North Atlantic.

Coequal ownership is taken on January 1, 1960 with **British Overseas Airways Corporation (BOAC)** and **Tasman Empire Airways, Ltd.** in a reconstituted **Fiji Airways, Ltd.**; Qantas assumes management responsibility. The next day, the Super Constellation *Southern Star* is sold; it is followed out of service by the *Southern Moon* on March 2 and the *Southern Dawn* on March 15.

Also during the first quarter, the Electras briefly operate a weekly 10-stop route from Sydney to London and return. L-1049Es reopen the every-two-week Sydney to Noumea route on March 18 and at month's end orders are placed for six more B-707-138Bs.

The air pool with **British Overseas Airways Corporation (BOAC)** and **Air India, Ltd.** comes into effect on April 1. The last two L-188Cs, the *Pacific Endeavor* and *Pacific Enterprise*, are readied for service during the month.

The new L-188Cs replace L-1049Cs on the Noumea run on May 13 and in June an L-1049E is leased to **Malayan Airlines, Ltd.** for use on its service from Singapore to Hong Kong. Following award of the Australia to New Guinea routes to TAA and **Ansett-A.N.A. (Pty.), Ltd.**, Qantas retires from those services on July 7 and they are restarted by the domestic carriers two days later.

When an engine fails during her takeoff roll from Plaisance Airport on Mauritius on August 24, the L-1049G *Southern Wind* with 12 crew and 38 passengers, is unable to stop and crashes into a gully at the end of the runway. Although there are no fatalities, 22 are injured before rescue and the plane is consumed in flames.

Sold to Lockheed after an accident the year before, the L-1049G *Southern Aurora* is leased back as a replacement and is christened *Southern Prodigal*. On September 1, **Trans-Australian Airlines (Pty.), Ltd. (TAA)** takes over the flag line's interior Papua and New Guinea operations.

Overall enplanements for the year dip to 193,876; however, North Atlantic bookings advance to 12,000.

The Qantas fleet in 1961 comprises 7 B-707-138s, 4 L-188s, 3 L-1049Gs, 2 L-1049Es, 1 L-1049C, 2 L-1049Hs, 2 DC-4s, and 1 DC-3. The DC-4 *Hong Kong Trader* is retired on January 13 and is followed out of service by the DC-4 *Pacific Trader* during July. The first of four B-707-138Bs, the *City of Darwin*, is received on August 6. It is the first aircraft to fly nonstop from Honolulu to Charles Kingsford-Smith Airport; the elapsed time for the 5,185 mile voyage is 9 hrs. 45 min. The entire group is in service or ready for service by year's end. Frequencies are inaugurated to Christchurch, Auckland, and Wellington, New Zealand. In terms of passenger miles flown, Qantas is now the world's 26th largest airline.

The DC-3 and L-1049C fleets are retired in 1962. B-707-138Bs are placed on the Hong Kong and Tokyo runs and the L-188s, which they succeed, are employed on the New Zealand operations and replace L-1049Cs on the Sydney–Johannesburg Wallaby route. Elsewhere, North Atlantic bookings jump to 13,000. On July 24, the Super Constellations *Southern Spray* and *Southern Tide* are withdrawn and sold to **Air New Mexico**.

The last Super Constellations, *Southern Mist*, *Southern Horizon*, *Southern Wind*, *Southern Constellation*, and *Southern Sea*, are retired in 1963 and a recruiting drive is undertaken for 400 additional pilots. In December, orders are placed for three (later six) B-707-338Cs.

A total of 203,466 passengers are carried on the year.

The last DC-3 to be acquired joins the fleet in January 1964, while a February 12–16 pilots' strike ends in the company's favor. A Fiesta

Route is opened in November, Sydney–Mexico City–London; new stops added along this way include Tahiti, Acapulco, Mexico City, Nassau, and Bermuda. Direct London–Mexico City (the world's only such direct frequency) and Australia–Mexico City links are pioneered. Passengers en route to Australia and the Far East from London are now offered a stop at Hong Kong. Two more B-707-138Bs are delivered and four B-707-338Cs are ordered.

Passenger boardings soar 39% to 333,550.

The employee population stands at 9,085 in 1965. The first of four B-707-338Cs, *City of Parramatta*, is delivered at Sydney on February 9. A month later, on March 9, the *City of Townsville* arrives at Sydney from San Francisco after history's first nonstop transpacific flight of 14 hrs. 32 min.

The L-188C *Pacific Endeavor* is sold to **Air New Zealand, Ltd.** in April. At year's end, the fleet includes 15 Boeings, 2 DC-3s, 2 DC-4s, and 3 L-188Cs.

During the year, Chairman Fysh sees published the first of three volumes of memoirs, which also tell his company's history, *QANTAS Rising: The Autobiography of the Flying Fish* (Sydney: Angus & Robertson). Covering the period through 1934, the book will be followed by two more. The second, covering 1934–1945, is *Qantas at War* (Sydney: Angus & Robertson, 1968), while the third is entitled *Wings to the World: The Story of Qantas, 1945–1966* (Sydney: Angus & Robertson, 1970).

Passenger boardings this year jump 24% to 382,217 and freight traffic rises 32%.

With the government having borrowed aircraft to ferry troops on behalf of RAAF Transport Command to Saigon, South Vietnam, the company is forced to cancel 16 London flights beginning on March 24, 1966.

Frequencies on the Fiesta Route via Mexico City to London are increased in summer, new service is offered to Vienna and Frankfurt and the improvement of airports allows B-707-138B or B-707-338C service to Kuala Lumpur, Colombo, Auckland, and Christchurch. Two additional B-707-338Cs join the fleet and two L-188s are sold.

Pilots strike the carrier between November 20 and December 29. Almost unnoticed outside of Australia, company cofounder Sir Hudson Fysh retires from the chairmanship. Also in December, the deluxe 450-room Wentworth Hotel is opened next to company headquarters in Sydney.

A total of 368,000 passengers are carried as the strike causes a traffic dip.

Airline employment in 1967 is 10,297. The fleet now totals 28 aircraft: 12 B-707-338Cs, 9 B-707-138Bs, 1 Lockheed L-188, 2 DC-4s, 2 DC-3s, and 2 HS 125s. Orders are outstanding for 9 B-707-338Cs. On August 1, the carrier's name is changed to **Qantas Airways (Pty.), Ltd.** and the company and its aircraft receive a new logo and livery.

QANTAS NEW ZEALAND, LTD.: New Zealand (2000–2001). **Ansett New Zealand, Ltd.** is sold by News, Ltd. in March 2000 to a New Zealand investors group, ZaZu, Ltd., headed by the airline's CEO Kevin Doddrell and Clavell Capital executive David Belcher. Doddrell remains CEO of the reborn enterprise, which retains all of the assets and aircraft of its predecessor entity. In early June, the carrier is renamed Tasman Pacific Airlines of New Zealand, Ltd.

Shortly thereafter, the renamed entity is awarded the first ever Qantas franchise and is rechristened **Qantas New Zealand, Ltd.** on June 26. The transformation of the airline is accompanied with new signage, featuring the red and white livery in terminals, offices, and travel outlet. The reservations system is hosted in the Qantas Universal Business Environment (QUBE), while airport, reservations, and customer service staff join pilots and cabin crews in wearing the Qantas uniform.

Two of the carrier's fleet of eight British Aerospace Bae 146-300s are repainted in Qantas franchise colors during the summer as preparations continue to be made for the initiation of scheduled services. Launch day for the new look must be pushed back several times due to a shortage of pilots.

With New Zealand Prime Minister Helen Clark on hand to meet the arrival, the first flight is completed from Wellington to Auckland on the morning of September 4. By now, 6 of 14 aircraft in the fleet have been repainted. Commuter flights to and from Wellington, previously flown

by **Rex Aviation, Ltd.**, are operated by that carrier under the marketing name Tasman Pacific Connection.

On December 10, the union representing the carrier's flight attendants protest the airline's corporate uniform policy and its strict guidelines for dress and grooming for both men and women. Make-up rules, in particular, demonstrate an "old-fashioned, stereotypical view of women."

The remaining six 146-300s have all been received their new livery by Christmas.

Unhappily, after months of battling difficult trading conditions, including rising fuel prices and a drop in the valuation of the New Zealand dollar, the company's parent will be unable to make an immediate April 2001 payment on two month's of landing fees at Wellington Airport. The airline will be forced out of business on April 20; **Qantas Airways (Pty.), Ltd.** will quickly withdraw the use of its name as thousands of passengers are stranded, thereby forcing **Air New Zealand, Ltd.** to lay on extra flights to accommodate them.

QATAR AIRWAYS: Almana Tower, Airport Road, P.O. Box 22550, Doha, Qatar; Phone 974 430 707; Fax 974 352 433; <http://www.qatarairways.com/qar>; Code QR; Year Founded 1994. Qatar Airways is established at Doha on October 20, 1993 to offer scheduled passenger services to regional and European destinations, targeting the large community of British and Indian expatriates. Ownership is 75% private, although the government of Qatar, which holds the remaining 25%, reserves the right to designate its own flag carrier. Initial capitalization is \$6.8 million.

Organizer Sheikh Hamad Ali Jabour Al-Thani, a member of the royal family and a former pilot and board member of **Gulf Air Company, G.S.C.** and **Emirates Airlines, Ltd.**, is appointed managing director. He is provided with a fleet of 2 leased Airbus Industrie A310-222s and a Boeing 737-291A, the latter subleased from **Air Atlanta Icelandic, H.F.** Arrangements for maintenance of the fleet are completed with **Kuwait Airways Corporation.**

Revenue services are inaugurated on January 20, 1994, to three cities in the Persian Gulf area: Amman, Cairo, and Khartoum.

In June, weekly services are inaugurated to London (LGW), as well as to Colombo and Bombay. Plans are made to obtain 4 wide-body and 3 narrow-body aircraft over the next 18 months. Late in the fall, flights commence to Munich, Vienna, and Athens and plans are made to purchase both B-727s and B-747 Jumbos.

On December 15, Qatar Airways becomes the 25th foreign company to resume flights to Beirut since the end of 1975–1990 Lebanese civil war. Announcing the change, Managing Director Al-Thani informs reporters that his company will operate weekly flights between Doha and Beirut with hopes that the frequency will increase soon.

Enplanements for the year are 124,000.

Airline employment stands at 400 in 1995. The fleet is altered to include 1 each B-727-2M7A, B-727-264A, and B-727-294A. In addition, 2 B-747SR-81s, first flown by **ANA (All Nippon Airways Company, Ltd.)**, are purchased in August. The company's 6 aircraft transport a total of 212,000 passengers, a huge 71% increase.

Bangkok and Hong Kong join the route network in 1996. Other destinations visited also include Abu Dhabi, Cairo, Dubai, Khartoum, Kuwait, London, Madras, Manila, Muscat, Osaka, Sharjah, Taipei, Tokyo, and Trivandrum. Many of these points are served only once a week and there are several undesirable multipoint frequencies.

A new management team, headed by former Civil Aviation Department official Akbar Al-Baker, is put in place during October. Plans are made for a restructuring program. Daniel Naoumovitch, an **American Airlines** marketing executive, is appointed general manager of sales and marketing, with former **CityFlyer Express, Ltd.** executive Keith Luxton as general manager-technical.

Enplanements for the year total 448,000.

Service to Calcutta and Dhaka ends in January 1997. New Chairman Al Baker initiates a massive \$15-million makeover in April. In the months that follow, the airline is transformed from a low-fare, no-frills

airline catering to migrant workers into a full-fare service that can appeal to upscale travelers.

The first step in the revamp program results in a rationalization of the route network, with service suspended to Madras, Athens, Tunis, and Istanbul; plans for the inauguration of flights to Frankfurt, Moscow, and Tehran are shelved for now. Thrice-weekly roundtrips to Jeddah and Dhahran commence in May. Flights are also begun to Karachi four times a week.

Replacement of the ex-Japanese B-747SR-81s with a pair of Airbus A300B4-622Rs leased from Ansett Worldwide allows greater scheduling flexibility and cost-savings. For example, following arrival of the first aircraft, the previous twice-weekly Jumbojet service from Doha to London (LGW) via Cairo becomes in May a daily nonstop return flight from Doha to London (LHR).

Unhappily, the carrier cannot find a buyer for the Boeing giants. They will be initially leased out for the Muslim Hadj pilgrimage and then wet-leased, one each to **Tunis Air** and **Saudi Arabian Airlines**.

The second A300B4-622R, to which new interiors, corporate image, and logo are fitted, supplements the B-727s on regional routes. Alcohol is now served on the London (LHR) route, which doubles patronage in the five months after May, and on other services, except those in the Gulf region. In August, an agreement is signed for a new automated, networked system for reservations and check-in and for revenue accounting services.

For lack of patronage, the route to Muscat is closed in September. When the B-727s go out-of-country for their "C" checks during October, a B-757-2M6ER is leased from **Royal Brunei Airlines** for two months. It is employed to reenter the Dhaka market with nonstop roundtrips.

At the beginning of November, a code-sharing agreement is signed with **British Midland Airways, Ltd.** Under the August agreement, the carrier now moves to the Babs reservations system of **British Airways, Ltd. (2)** as well as its Bombay-based Jade revenue-accounting system. Also in November, the carrier becomes the official airline of the Mena Economic Conference.

A third A300B4-622R is delivered in December and is employed to offer a third weekly frequency to Manila and twice-weekly services from Doha to Jakarta via Bangkok. During the month, a cargo agreement is signed with Aramex.

Enplanements for the year increase 46% to 630,000.

Flights continue apace in **1998**. A strategic alliance and code-sharing agreement is signed with **Deutsche Lufthansa, A.G.** on May 23. Dual-designator A300B4-622R flights are offered over a twice-weekly route to Munich starting on June 15. With the introduction of the summer schedule during the month, one additional weekly flight is offered to Amman, Beirut, Karachi, and Kuwait.

Twice-weekly A300B4-622R roundtrips from Doha to Peshawar begin on July 2. To replace its three-ship B-727 fleet, Qatar, on July 9, signs a letter of intent with Airbus Industrie for the purchase of 11 A320s to be delivered beginning in 2001. In addition, four (later five) A320-232s will be leased from Singapore Aircraft Leasing starting in the first quarter of 1999.

Qatar, which operates thrice-weekly services to Kathmandu, agrees to provide free lift for an 86-kg. shipment of donated gym equipment from the U.K. to Nepal. At the same time, A300B4-622Rs replace B-727s on the route.

The takeoff from Dhaka of Flight 345, an A300B4-622R with 10 crew and 224 passengers is aborted on August 19 due to a fire in the undercarriage caused by a large bird that has flown into the wheels of the Airbus. All of the passengers are evacuated without serious injury and the blaze is extinguished. Still, international flight operations from the airport are suspended for 12 hours.

Also during August, the airline accommodates the six-man Himalayan expedition team of Sir Christian Bonington on a route from London to Kathmandu via Doha. One of the world's most famous climbers, Bonington will assault 6,950-m.-high Sepu Kangri in late September.

During September, the thrice-weekly A300B4-622R roundtrips from Doha to Kathmandu are increased to four-per-week. Qatar returns the Himalayan team of mountaineer Bonington to London at the end of October.

Passenger boardings jump 35.5% to 850,000, while 2.87 million FTKs are also operated.

By the beginning of **1999**, airline employment has been cut by 11.8% to 693. Thrice-weekly A300B4-622R roundtrips are inaugurated on January 2 from Doha to Lahore, Pakistan.

On March 1, the airline receives the first of five A320-232s that it has leased from Singapore Aircraft Leasing Enterprises. The remaining three will be delivered before the end of April. The new aircraft is immediately assigned to the Pakistan services.

Officials from Qatar Airways meet with their counterparts from **Emirates Airlines**, **Gulf Air Company G.S.C.**, **Kuwait Airways Corporation**, **Oman Airways**, and **Saudi Arabian Airlines** at Kuwait City on May 15 to plan a united body to compete against the growing number of major world airline alliances. The CEOs, who also agree to meet quarterly, discuss ways to coordinate and develop additional revenues, cut expenses, and invest jointly in support services.

The last of five new A320-232s to be delivered on the year is accepted on October 28. The code-sharing agreement with **Deutsche Lufthansa, A.G.** is enhanced on November 1 to include Vienna, Zurich, and Manchester, England.

Thrice-weekly A300B4-622R roundtrip frequencies to Bangkok are initiated on April 18, **2000**, the same day twice-weekly A300B4-622R return flights (discontinued in 1998) are resumed to Manila. Twice-daily Airbus return flights commence on April 24 between Doha to Bahrain.

On September 14, an Iraqi man hijacks an A320-232 with 144 passengers and orders it flown to Saudi Arabia. On the ground at Hael, the pirate surrenders to Saudi police and his captives are all released unharmed.

The thrice-weekly roundtrips offered to Karachi, Lahore, and Peshawar from Doha are increased by two in mid-July. A lone A319-133CJ (Airbus bizjet) is delivered on November 12.

Thrice-weekly A300B4-622R return flights commence on December 14 between Doha and Muscat.

On December 22, arrangements are completed for the purchase an A300-600R previously operated by **Korean Air (Korean Airlines-KAL)** and the lease of an A320-231 recently flown by defunct Irish carrier **Transaer International Airlines, Ltd.**

THE QUALIFLYER GROUP. QUASSAR (QUASSAR DE MEXICO, S.A. de C.V.): Mexico (1992–1995). Quassar is organized in the fall of **1992** to offer both passenger and cargo charter operations. A Boeing 727-27C is acquired, along with two B-727-76s. The three commence flights in early **1993**, with the latter two specializing in service from Mexico City to the national resort communities.

In fiscal difficulty, the company shuts down briefly in January **1994** and sells its freighter to the Puebla-based new entrant **Azteca**. Passenger-only nonscheduled frequencies resume in March and are operated for a year.

QUEBEC AIRWAYS, LTD.: Canada (1941–1949). Quebec Airways, Ltd. is formed at Quebec City in the fall of **1941** to offer weekday Beech 18 shuttle service to Montreal via Trois Rivières. Revenue flights begin on December 22. The operation is short-lived as on January 30, **1942**, the carrier is one of 10 merged to form **Canadian Pacific Air Lines, Ltd.**

The company is allowed to continue operations as a CPAL subsidiary during the remainder of the decade and is even outfitted with several

Douglas DC-3s. In 1948, the major begins to transfer a number of its scheduled flights, operated on both sides of the St. Lawrence River, to the Gaspé Peninsula-based Rimouski Airlines, Ltd. Among the destinations given over are Matane, Mont-Joli, Forestville, Baie Comeau, and Sept-Îles.

Heralding the real beginning of a wave of civil crime that will be associated with the world airline industry in the years ahead, the carrier is subjected, in its last months, to the one event for which it is remembered: a love-triangle, murder-for-hire.

En route from Montreal to Baie Comeau on September 9, 1949, a DC-3 with 4 crew and 19 passengers explodes in midair over the town of St. Joachim, Quebec. The plane crashes onto a hilltop near the community of Sault-Au-Cochon, on the N side of the St. Lawrence River some 40 mi. NE of Quebec City, killing all aboard, including 3 Kennecott Copper executives. Investigators quickly establish that a blast occurred in the forward baggage compartment.

Having obtained proof from the destroyed aircraft of a dynamite bomb in a package placed on the aircraft, police arrest J. Albert Guay, husband of a woman passenger, on September 23 and he is arraigned the next day.

A murder trial for Guay is ordered on October 6. The son of one of the Kennecott Copper executives on board the plane, R. J. Parker, stages a hold-up on November 20, but is captured by police. In prison, the boy admits he needed the stolen funds to finance his trip to Quebec in an effort to kill Guay and avenge his father's death. Meanwhile, Mrs. A. Marie Pitre (Guay's paramour) and her brother Genereux Ruest are arrested as accomplices in the bomb planting.

Quebec Airways, Ltd. is submerged into its parent before the end of the year.

In January 1950, Guay, Pitre, and Ruest go on trial. For the intended murder of the former's wife and the additional deaths of 22 others, Guay and Pitre are condemned to death on March 14. For making the bomb Guay placed aboard the doomed airliner, Ruest is also sentenced to the gallows, on December 13.

Guay is hanged on January 11, 1951, but the execution of his accomplices is delayed through the remainder of the year and into 1952. On April 10 of the latter year, Ruest and Pitre appeal separately to the Supreme Court. Ruest's appeal of his sentence is dismissed on May 12 and allowed to stand and the court, by a 3-2 June 28 decision, also allows Pitre's conviction to stand. Ruest is executed on July 25 and Pitre on January 8, 1953.

QUEBEC AVIATION, LTD.: Canada (1970-1985). Established at Quebec City Airport, this third-level commuter is initially known as **Air Brazeau, Ltd.** On November 1, 1978, Corporation de Gestion La Verendrye, a transportation conglomerate, purchases the operation, together with **Le Tapis Rouge Aero Services, Ltd.** and the original Quebec Aviation Company, Ltd. and merges them together under the name Quebec Aviation, Ltd.

Graduating from 4 Piper PA-31-310 Navajos, 3 Cessna 310s, 2 Piper PA-34 Senecas, and 2 Cessna 337s, Quebec Aviation obtains 2 Beech 99s in 1980. From bases at Montreal and Quebec City, these provide scheduled passenger and cargo services to Chibougamau, Gatineau/Hull, Saguenay, Fredericton, and St. Leonard. Contract service and charter flights are also arranged.

Another Beech joins the fleet in 1981. President Leo Vanasse now oversees a workforce of 75. Enplanements reach 10,028 and double in 1982 to 21,784. International flights begin in 1983 with Quebec City to Boston daily service. A Fairchild-Swearingen Metro II is acquired in 1984. In December 1985, the operation is purchased by **Propair, Ltd.** and merged.

QUEBECAIR, LTD.: Canada (1953-1987): In 1953, Gaspé Peninsula-based **Rimouski Airlines, Ltd.** and competing **Gulf Aviation, Ltd.** merge to form Quebecair, Ltd. The initial fleet comprises 2 de Havilland Canada DHC-2 Beavers and 5 Douglas DC-3s, which are introduced

when the route systems are integrated. One DC-3 is withdrawn; however, a Beech 18 joins the fleet in 1954. Charters are also maintained, especially in connection with construction activity on the Mid-Canada and DEW Lines.

DEW Line flights continue in 1955 and scheduled service is launched to Quebec City and to the iron-mining center Schefferville, Labrador. The fleet is expanded by the addition of 2 DC-4s, 3 DC-3s, and 2 Consolidated PBY-5A Cansos. A new DC-3 is badly damaged in a landing accident on December 9; it will be rebuilt.

In 1956, the carrier is authorized to service additional points throughout Quebec province. On January 17, a DC-3 with 3 crew and 15 passengers is destroyed at Oreway Lake, Labrador (4 dead). Four more DC-3s are purchased (1 is sold) and the fleet now comprises 1 Beech 18, 6 DC-3s, 2 Cansos, and 3 DHC-2s.

The network is extended westward in 1957 to Montreal, Rouyn, and Noranda. Two of the three Beavers are sold in May. Also that month, the DC-4s are sold to **Maritime Central Airways, Ltd.**, which in turn sells the carrier a Curtiss C-46A in November. Orders are placed for three Fairchild F-27A Friendships.

On July 13, 1958 a Rimouski Airport hangar fire destroys five of the carrier's DC-3s. Quebecair becomes the first Canadian regional carrier equipped with turboprop aircraft when its initial Fairchild is received in August and enters revenue service on October 27, just after receipt of the second. Meanwhile, the final Beaver is sold in September.

Orders are placed in 1959 for two Convair CV-540s. Routes are opened to Gagnon and Riviera-du-Loup. A Curtiss C-46A is sold in January 1960. The Convairs are delivered by Canadair, Ltd. in the early summer and on August 24 commence five-times-per-week Montreal-Quebec City-Sept. Îles-Wabush-Knob Lake services.

Frequencies are initiated from Rouyn to Noranda and Schefferville and to Manicouagan and Saguenay in 1961. In June, a DC-3 is sold to **Eastern Provincial Airways, Ltd. (EPA)**. Having elected to operate only one turboprop type, the company returns its Convairs to Canadair in October. Murray Bay flights begin in early 1962 and in February 1963 the last PBY-5A is sold to EPA.

Enplanements in 1964 total 54,329. The employee population stands at 385 in 1965. In April, Matane-based **Matane Air Services, Ltd.** is purchased; the next month, **Northern Wings, Ltd.**, plus its Northern Wings Helicopters, Ltd. subsidiary, is acquired. All three purchases continue to operate, for the time being, under their previous identities.

Following these takeovers, Quebecair's fleet features 28 aircraft of 9 types: 4 DHC-2s, 1 Beech 18, 1 C-46, 9 DC-3s, 3 F-27As, 3 Lockheed Model 10As, 2 DHC-3s, and 3 Bell Model 47 helicopters. Orders are outstanding for two additional Bells and an F-27A. Integrated scheduling and operations commence on November 1, with Quebecair assuming responsibility for operating larger aircraft.

The year's passenger boardings, systemwide, increase to 160,759.

The three subsidiaries are fully merged in March 1966 and by early spring the two Bells and one F-27A are received. The route network now includes 23 points: Montreal, Quebec City, Murray Bay/Charlevoix, Rivière-du-Loup, Rimouski, Mont-Joli, Matane, Saguenay, Forestville, Baie Comeau/Hauterive, Manicouagan, Sept-Îles, Gagnon, Wabush/Labrador City, Schefferville, Rivière-au-Tonnerre, Mingan, Havie St. Pierre, Port Menier, Gaspé, Natashquan, Harington Harbor, and Blanc Sablon. Orders are placed for three DHC-6s.

Bookings climb to 180,000.

Airline employment reaches 410 in 1967. With the acquisition of the pioneer carrier **Air Fecteau Transport Aérien, Ltd.**, which is allowed to operate as the separate entity **Air Fecteau, Ltd.**, the fleet grows to 53 aircraft. New additions since 1966 include one F-27A, 10 DHC-2s, two Cessna 185s, and five Cessna 180s. Orders are placed for a BAC 1-11-402 and a BAC 1-11-304. Passenger traffic balloons significantly with 223,697 passengers carried.

The small operators **Air Gaspé, Ltd.** and **Montreal Air Leasing, Ltd.** are purchased in 1968. The former, based at Sept-Îles, is allowed to continue operations under its previous identity. Three DHC-6-100s are

purchased to operate the short-haul routes recently acquired through mergers and a Boeing 707 order is cancelled.

Along with its DC-3 and Lockheed Model 18 Lodestar, the bankrupt **Royal Air, Ltd.**, based at Montreal, is acquired in January 1969. The former **British Eagle International Airways, Ltd.** BAC 1-11-304s *Salute* and *Supreme* are both delivered on April 15 and begin service at month's end between the network's larger cities. On April 25, the company is granted an emergency license to link Montreal, Toronto, and Ottawa on the routes of **Air Canada, Ltd.**, which is grounded by a strike.

Two DC-3s are withdrawn during the year, one each in May and September and in December an F-27A is withdrawn.

The route network in 1970 contains 50 stops. A DC-3 and two Twin Otters are sold during the year. A total of 79 million revenue passenger miles are flown on the year. Another BAC 1-11 is ordered in 1971 and new charter flights are introduced. Both the last Twin Otter and the final DC-3 are now withdrawn.

Enplanements reach 263,940.

The workforce in 1972 is 473.

L. M. Stanford, a 21-year-old Canadian youth, seizes a stewardess at gunpoint and commandeers the BAC 1-11-402 with 62 passengers during a flight between Wabush, Newfoundland, and Montreal, on December 14. After forcing the jetliner to land at Ottawa and Montreal, he allows all but four crewmen to deplane at the latter point before ordering the aircraft back to Ottawa. At the Canadian capital, the young pirate yields to a plea from his father to free his hostages and surrender to police. Stanford will be tried and sentenced to 20 years in prison.

Passenger boardings for the year accelerate by 17% to 318,000.

The third BAC 1-11, a Dash-402 formerly operated by **Philippines Air Lines (PAL)**, enters service in April 1973 as a new Quebec City–Val d'Or route is opened. Orders are placed for one Boeing 727-25 and two B-707-123Bs. The operation of a Lockheed L-382B Hercules is undertaken on behalf of the James Bay Energy Corporation, Ltd.

Passenger boardings rise 30% to 327,540.

The employee population in 1974 is 722. The B-727-25, formerly operated by **Eastern Air Lines** in the U.S., arrives in July and enters service in August. A new aircraft livery is now unveiled. The two onetime **American Airlines** B-707-123Bs arrive in late December and join the BACs in providing charter flights from Toronto, Montreal, and Quebec City.

Passenger bookings swell 11.8% to 461,000.

Airline employment is 854 in 1975. The two larger Boeing jetliners commence charter flights to Europe, the Caribbean, Hawaii, Mexico, and North Africa. The last C-46A is sold in June.

Cargo traffic grows 34.4% and passenger boardings leap 21.1% to 559,217.

In 1976 the workforce is increased 2% to 871. New routes are opened to Fort Chimo and Chibougamau. A contract is received to operate five CV-580s on behalf of the James Bay Development Project. The aircraft, all purchased from **North Central Airlines**, arrive and are placed into service between April and November.

The **Air Gaspé, Ltd.** HS 748 is sold, as that subsidiary becomes a part of **Regionair, Ltd.**, a commuter partnership established to operate the various subsidiary companies purchased earlier.

Passenger bookings advance 2.4% to 572,501, but freight declines by 3%.

Quebec City–Hull flights begin in 1977. An Air Plus Service is introduced, linking **Regionair, Ltd.** services to scheduled Quebecair flights.

Enplanements total 823,966.

The employee population is 1,039 in 1978. Early in the year, Lionel Chevrier becomes chairman and Alfred Hemmet, CEO of the trucking conglomerate **Expeditex, Ltd.** becomes president. Orders are placed for two B-737-200s.

Traffic climbs 5.4% as 871,420 passengers are flown.

The forward landing gear of chartered B-707-123B with 9 crew and 162 passengers is smashed as the result of a heavy landing and subsequent 2,000-ft. skid at Vieux Fort, St. Lucia, on February 19, 1979; there are no fatalities.

Expeditex, Ltd. President Hemmet now acquires majority interest. After taking off from Quebec City on March 29, the left engine of Flight 255, an F-27A with 4 crew and 21 passengers, catches fire; unable to complete a return to base, the Fokker crashes into a hill less than a mile from the runway (17 dead).

Much equipment alteration occurs in November. The B-727-25 is withdrawn along with the last B-707-123B; the former will be sold to **Westburn Aviation, Ltd.** in January and the latter is now sold to **United African Airlines**. A B-737-2Q9 and a B-737-2Q8 are leased (one for this season and the next two winter seasons, and one for six months) from **Trans-European Airways, S.A. (TEA)** to take up the slack on scheduled routes and provide additional charter capacity.

Passenger bookings decline to 617,045, but freight is up 4.3% to 2.7 million FTKs.

Following the January 1980 sale of the B-727-25, two purchased B-737-296s arrive in May and June. The TEA B-737 is returned in June. Between September–November, frequencies from Montreal and Quebec City to Miami and Fort Lauderdale are increased from one per week to as many as six.

Enplanements thus rise to 664,880. However, expenses, led by fuel cost increases, skyrocket.

A new Montreal–Toronto route concession is received in January 1981 with the first of two B-737-2L9s to be delivered during the year arriving in April. The last three F-27As are withdrawn during the year, one each in May, June, and October. All will be sold to **Horizon Air (Horizon Air Industries)**. Also beginning in May, two Beech 99s and six HS 748s are acquired and in June, direct Toronto–Montreal services start.

The subsidiary **Vacances-Quebecair, Ltd.** is created to operate advance-booking charters to Florida, Puerto Rico, and Barbados. A new paint scheme is introduced. **Air La Sarra, Ltd.** and the former subsidiary **Air Fecteau, Ltd.** combine to form Senneterre, Quebec-based **PropAir, Ltd.**, which, together with Ste. Foy-based **Quebec Aviation, Ltd.** (now all renamed **Regionair, Ltd.**), enter into agreements with Quebecair, Ltd. to provide commuter service over the regional's low-density routes.

All of these changes in the midst of recession cause significant fiscal reversal. In midyear, the Quebec government purchases 22% shareholding (for C\$15 million) in order to block a takeover bid by **Nordair, Ltd.** Both of the BAC 1-11-304s and the Dash-402s are withdrawn on October 31 and placed in storage to await sale. The second B-737-2L9 joins the fleet in December.

Passenger boardings overall climb 4.4% to 695,397, but cargo is off by 19.5% to 2.5 million FTKs.

A new livery is introduced for the aircraft of the **Regionair, Ltd.** fleet in January 1982. Quebec City to Boston flights begin in May. As a result of continuing financial loss, the **Trans-European Airways, S.A.** leased B-737s are returned while two owned aircraft are chartered to **Britannia Airways, Ltd.** for a year. The decision is taken not to sell the retired BAC 1-11s but to refurbish them for renewed service. Repainted and upgraded, all three are rejoin the fleet on April 25. In addition, a BAC-11-204 is chartered from **USAir** in May.

In August, a BAC 1-11-204AF is leased for three months from **US-Air**. In September, a B-737-2L9 is sold to **Air Nauru**. Two ex- **Austral Airlines (Austral Lineas Aereas, S.A.)** BAC 1-11-420ELs are purchased in October and December. Also in October, a former **Maersk Air, A.S.** B-737-2L9 is purchased and delivered, but does not enter immediate service.

Rather than accept the federal government's plan to purchase and employ Quebecair, Ltd. as the basis of a new regional airline, the provincial government in December arranges for two loans (C\$12 million total) that will be used to keep the carrier afloat.

Anticipated in light of the world economic situation, passenger boardings decline 25.2% during the year to 520,119, and freight is down by 22% to 1.8 million FTKs. The year's loss totals C\$22 million.

Airline employment is cut 38.2% in 1983 to 1,140. In April, two B-737-296s and a B-737-2L9 are leased, long-term, to **Pan American**

World Airways (1). The repainted and refurbished ex-**Maersk Air, A.S.** B-737-29L is placed into service in May. After only three months of service, it is withdrawn and sold to **Air Nauru**. To replace it, a B-737-2M8 is leased from **Trans-European Airways, S.A.** in August.

Meanwhile, in May and July, two CV-580s used on the James Bay contract are withdrawn. Also in July and after several years of subsidy, the Parti Quebecois provincial government, through its Societe Quebecois des Transports department, assumes control.

Freight transport for the year drops by 5.6% and passenger boardings fall another 3.4% to 405,774. The loss of C \$16 million is significant.

The workforce is reduced in **1984** to only 905. During the first quarter, the two BAC 1-11-304s are sold to the new Welsh charter carrier **Airways International (Cymru), Ltd.**

To complement and enhance its short- and medium-haul charter business, Quebecair, Ltd., in April, elects to enter into the long-haul inclusive-tour field in association with Fiesta Travel, Ltd. and leases a DC-8-63 with which to operate the flights. The **Regionair, Ltd.** subsidiary and its Beech 99s are fully merged, being eventually reorganized into the commuter airline **Quebecair Inter, Ltd.** and equipped with Fairchild Metro IIs.

New regional routes are opened (including four-times-per-day Montreal-Toronto service) and a second DC-8-63 is chartered in December. Two BAC 1-11-304s are sold during the year, one each in March and November, and a former **Wien Air Alaska** B-737-2L9 joins the fleet in November.

Still, enplanements fall by half, down to 245,000, and the financial picture grows even darker as another C \$5 million is lost.

The employment population for Canada's last remaining regional other than **Pacific Western Airlines, Ltd.** grows by 75% in **1985** and the three B-737s leased to **Pan American World Airways (1)** rejoin the fleet as expansion continues. In March, two dormant **Air Canada, Ltd.** routes to the U.S. (Montreal-Boston and Quebec City-Newark) are assumed on a twice-daily basis. The last three BAC 1-11s are withdrawn in May and sold to **Okada Air, Ltd.** in Nigeria.

The Gagnon route is closed in June; however, a service is initiated from Montreal to Rouyn via Val d'Or. Also in June, the company elects to try the all-cargo marketplace and leases a DC-8-54F from **Arrow Air**. When the travel agency Jetlink Holidays folds in mid-September, many charters booked aboard the carrier's DC-8s are lost. As the result of heavy and costly competition on the Montreal-Toronto route, frequency between the two cities is cut back late in the year to twice daily. By year's end, the provincial government's investment in the carrier is approaching C\$100 million.

To stem the flow of red ink, the provincial government now attempts to purchase fiscally sound **Nordair, Ltd.**, into which it would merge Quebecair to form a giant regional. In December, **CP Air, Ltd.** obtains 60% control of the former, but cannot complete a merger upon the Quebec government's refusal to sell its 35% interest.

On the bright side, passenger boardings now skyrocket to 597,582 and freight is up by 8.6%. Financial loss, however, continues to be heavy.

Heavy and successful charter operations continue during the winter. In March **1986**, a C\$100-million, 5-year arrangement is signed with Toronto's Conquest Tours for the operation of transatlantic charters to Europe. In May, President Jacques Leger steps down, to be replaced by Andre Lizotte. The new Liberal government of Premier Robert Bourassa seeks, via privatization, to lessen the financial drain on the province being caused by the carrier. Following negotiations, the Societe Quebecoise des Transports agrees to cover Quebecair, Ltd.'s 1985-1986 expenses, including severance pay, through September. It also agrees to sell its 35% interest in **Nordair, Ltd.** for C\$35 million. On July 31, the Nordair subsidiary **Nordair Metro** purchases Quebecair for C\$20 million.

Nordair is backed by **Canadian Pacific Airlines, Ltd. (CPA)** and the acquisition will allow the latter to complete its acquisition of the former, a move previously stalled by Quebecair, Ltd.'s refusal to sell its 35% shareholding. **Nordair Metro** President Michael Leblanc now becomes

Quebecair CEO as well. Although the **Quebecair Inter, Ltd.** commuter is allowed to continue operations, the charter division is closed down and the two DC-8-63s are sold to **Nationair, Ltd.** with the charter carrier agreeing to hire portions of their crews and other Quebecair, Ltd. personnel. Following the sale, about 300 Quebecair, Ltd. employees are laid off and four B-737-200s are immediately sold to **CPA, Ltd.** by **Nordair, Ltd.**, which provides its subsidiary's new partner with two of its older B-737s, one each Dash-296 and Dash-2L9.

The two BAe 748s are also withdrawn and put up for sale and a new Quebecair, Ltd. management team is assembled (including several "old hands") as the carrier assumes a new posture as a local-service carrier. In addition to two CV-580s purchased in late spring, three more join the fleet in October and November. Several B-737-200 services are replaced in December by CV-580 runs, as schedule, reservation, equipment, and personnel integration is begun and continued apace.

The fleet in January **1987** comprises 2 B-737s and 2 CV-580s. A B-737-296 is sold to **Braathens SAFE, A.S.** in March and is replaced by two ex-Braathens Fokker F.28-1000s. In September, the carrier is reformed and renamed **Inter-Canadian Airlines, Ltd.** The B-737-2L9 is sold to **Express One International** in November.

Quebecair Inter, Ltd. is sold to Nordic Helicopters, Ltd. and is reformed as **Propair, Inc.**

QUEBECAIR INTER, LTD.: Canada (1984-1987). **Air La Sarra, Ltd.** and the subsidiary **Air Fecteau, Ltd.** are combined by **Quebecair, Ltd.** in **1981** to form the larger subsidiary, **Propair, Ltd.**, basing it at Rouyn. The fleet is comprised of the merger partner's aircraft, including 13 de Havilland Canada DHC-2 Beavers, 13 DHC-3 Otters, 2 DHC-4 Caribou, and several Cessna 207s. A contract is reached with the parent for the operation of commuter services over **Quebecair, Ltd.**'s low-density routes, such as **Quebecair Inter, Ltd.**

In December **1985**, **Quebec Aviation, Ltd.** is purchased and merged. The two Caribou are now sold and, beginning in early **1986**, the company links its base to new destinations, including Montreal, Chibougamau, Bagotville, Ottawa, Nordanda, Val d'Or, Sherbrook, and Quebec City. An inherited route from Quebec City to Murray Bay is subcontracted to **Les Ailes de Charlevoix, Ltd.**

Operations continue with little change until June **1987** when the carrier is sold to Nordic Helicopters, Ltd. and is reborn as **Propair, Inc.**

QUEEN CHARLOTTE AIRLINES, LTD. (QCA): Canada (1946-1955). This small feeder is formed on May 28, **1946** when the aviation division of Vancouver-based Spilsbury and Hepburn, Ltd., is split off and incorporated. Founder James Spilsbury is president. In his autobiography, penned with the assistance of Howard White, Spilsbury will tell the story of his company, *The Accidental Airline: Spilsbury's QCA* (Madeira Park, B.C.: Harbour Press, 1988).

Having assembled a fleet of Supermarine Stranraer and Consolidated PBV-5A flying boats and Avro Ansons, scheduled flight activities commence in May **1947** over a coastal route north of Vancouver.

Operations continue apace in **1948-1950** as several Douglas DC-3s are added. En route from Muchalat Arm to Tofino on August 4, **1951**, an Anson is lost (seven dead) and on October 17 a PBV-5A crashes into Mount Benson, near Nanaimo, British Columbia (17 dead).

During the spring of **1953**, service is extended from Prince Rupert to Ketchikan, Alaska. A rivalry for service is begun with smaller **Pacific Western Airlines, Ltd.** and the company undertakes contracts during early **1955** in support of the construction of the Canadian DEW Line. A subcontract is let with the U.S. all-cargo carrier **The Flying Tiger Line**, which will complete the service with its larger transports.

Led by Tiger official M. E. "Doc" Powell, 11 Curtiss C-46As and Douglas C-54s arrive in late spring.

A DC-3 with 3 crew and 15 passengers is lost at Port Hardy on June 23 (14 dead).

Pacific Western Airlines, Ltd., in a move foreshadowing its December 1986 take over of **Canadian Pacific Airlines, Ltd. (CPA)**, acquires

the larger QCA in July. **The Flying Tiger Line** contract is honored until the DEW Line is completed in July 1957.

QUEENSLAND AIR NAVIGATION COMPANY (PTY.), LTD.: Australia (1930–1931). Queensland Air is formed at Brisbane in March 1930 and equipped with an Avro 10. On April 2, a twice-weekly contract mail and passenger service is inaugurated from Brisbane to Townsville via Maryborough, Rockhampton, and Mackay. A second Avro 10 is acquired and on August 12 thrice-weekly flights begin from Brisbane to Grafton.

Financial reversals cause the company to cease flying in January 1931.

QUEENSLAND FLYING SERVICES (PTY.), LTD.: Australia (1947–1950). This air charter operator is formed at Brisbane in the summer of 1947. Employing an Avro Anson, it begins a single route to Toowoomba on August 6. Unable to succeed financially, the operator shuts down on February 25, 1950.

QUEENSLAND-MOUNT COOK AIRWAYS, LTD.: New Zealand (1936–1939). Rudolph Wigley, still active in New Zealand with his Mount Cook Motor Company 14 years after the collapse of his **New Zealand Aerial Transport Co., Ltd.**, together with his son Harry forms **Queensland-Mount Cook Airways, Ltd.** in early 1936 to fly tourist traffic over the South Island. The Wigeleys' venture flourishes during 1937–1938 with only one WACO biplane.

When Harry enters the RNZAF in September 1939, the carrier is forced to sell its WACO and cease operations. Harry will return to the aerial tourist business in 1953.

QUEENSLAND PACIFIC AIRLINES (PTY.), LTD.: Australia (1989–1990). QPA is established at Brisbane Airport in 1989 to offer scheduled regional passenger and cargo services. General Manager M. Jervis acquires 4 Mohawk 298s and these are employed to inaugurate revenue services to Bundaberg and Gladstone.

Operations continue apace until early 1990 when the carrier, unable to achieve viability, is forced out of business. It is succeeded by **South-ern Pacific Regional Airlines (Pty.), Ltd.**

QUEST AIRLINES: United States (1988). This small regional is established at Long Beach, California, in the spring of 1988 to offer commuter flights with a fleet of 3 Dornier 228-212s. It only takes a short period of operation for the company's owners to realize they will not achieve viability.

Consequently, Quest Airlines halts service, returns the Dorniers to their manufacturer, and liquidates. The company assets are purchased and reformed during midyear into **California Air Shuttle**.

QUEST CARGO INTERNATIONAL P.O. Box 660880, 5000 N.W. 36th Street, Suite 307, Miami, Florida 33266, United States; Phone (305) 870-1800; Fax (305) 871-4222; <http://www.questcargo.com>; Year Founded 2000. On July 14, **Miami Air International** sells an 82% controlling interest to a group of Houston investors, including the freight forwarder Eagle Global Logistics (23%), for \$20 million. In announcing the arrangement, Miami President Ross Fischer, who retains a 10% stake while other managers hold 8%, indicates that his B-727s will be converted into cargo planes, while Next Generation B-737-800s are to be leased to handle passenger services. It is anticipated that the 450-person workforce will be increased.

Arrangements are completed the same day for the lease of three Next Generation B-737-81Qs from **Sabre Airways, Ltd.** of the U.K. The first two will enter service with Miami Air in November and December, with a third arriving the following summer. The subsidiary Quest Cargo International is simultaneously established by the carrier and Eagle Global Logistics to operate the B-727s, which are now being converted into freighters.

Loisita, the first B-727-225A to be converted into a freighter, rolls out of the shop on September 8. By this time, Quest has opened a homepage

on the Internet and is ready to begin all-cargo services. A second hush-kitted B-727, a Dash-231AF, now arrives.

At the end of October, Eagle Global Logistics enters into a new strategic all-cargo alliance with **LANChile Airlines, S.A.**, as well as the freight lines it controls, **Fast Air Chile, S.A.**, **MasAir (Aerotransportes Mas de Cargo, S.A. de C.V.)**, and **Florida West International Airways**.

QUESTAIR (PTY.), LTD.: Perth Airport, Fauntleroy Rd., Perth, Western Australia, 6105, Australia; Phone 61 (9) 479 1744; Fax 61 (9) 479 1745; Year Founded 1992. Questair is established at Perth in 1992 to offer roundtrip flights to Telfer. Thirteen-per-week frequencies are inaugurated with an Israel Aircraft Company 1124A Westwind II and a Cessna 310.

Operations continue apace in 1993–1994, with frequencies added to Port Hedland with a second Westwind II.

A total of 16 weekly roundtrips is mounted between destinations during the remainder of the decade.

QUICK AIRWAYS, B.V.: Machlaan 10d, Eelde Airport, Groningen, NL-9761, The Netherlands; Phone 31 (0) 50 309 43 41; Fax 31 (0) 50 309 17 94; <http://www.quickairways.nl>; Year Founded 1984. Privately owned **Fast Airways Holland, B.V.** is reformed in January 1984 and renamed. In addition to European executive charter flights, the six-employee carrier, based at Eelde Airport at Groningen, undertakes scheduled weekday flights to Rotterdam with its single Piper PA-31-350 Navajo Chieftain.

Traffic justifies fleet expansion and in 1986, Managing Director G. Huizinga adds a second Navajo Chieftain, followed by a third in 1987. There are neither fleet nor route changes during the next six years. In 1994, one Navajo Chieftain is replaced by a Mitsubishi Mu-28.

In 1995–2000, a close association is formed with **Rijnmond Air Services, B.V.**, based at Rotterdam. Quick continues to fly its single scheduled route and to operate ad hoc passenger and cargo flights to 10 European airports.

QUISQUEYAMA (AEROVIAS NACIONALES QUISQUEYAMA, S.A.): Dominican Republic (1962–1980). This carrier is formed in 1962 to offer services throughout the Caribbean with a fleet of 2 Lockheed L-1049Cs and an L-049. The word "Nacionales" is dropped from the title in 1963. Services continue as a Boeing 707-320 is purchased from Yugoslavia around 1968.

Financial difficulties caused by high fuel and labor expenses and significant traffic declines force the airline to shut its doors in 1980 after selling its last aircraft, a Super Constellation, to **Aerotours Dominicano, S.A.**

QUISQUIYA, LTD.: Haiti (1948–1951). James O. Plinton, an African-American, former employee of **Transcontinental and Western Air Lines (TWA)**, and World War II flight instructor, forms this company at Port-au-Prince in March 1948. Acquiring a Boeing 247D and a Lockheed L-18 Lodestar, Plinton begins nonscheduled all-cargo charters to Miami and to the country's island neighbors, gaining fame as the first to serve the Turks and Caicos Islands.

Operations continue until fiscal difficulties force the company out of business in the fall of 1951.

RACE CARGO AIRLINES, LTD.: Ghana (1986–1995). Formed in Accra in 1986 as successor to short-lived Rainbow Cargo Airlines, Ltd., Race employs leased Boeing 707F Stratofreighters and Douglas DC-8-55s to fly all-cargo charters from Africa to Europe and back.

In late 1991, the company receives the first freight aircraft to wear a Race logo, a B-707-379C chartered from Coventry, England-based **Phoenix Aviation, Ltd.** It flies from Accra to London (STN) via Ostend. A second, owned aircraft, a B-707-347C, is acquired from **Air Tchad, S.A.** in 1992.

Both Stratofreighters are in full service in 1993; however, after 1994, the airline leases its aircraft to other concerns. Airline employment stands at 28 in 1997–1999 and Christopher Anderson is managing director.

Managing Director Christopher Anderson oversees a workforce of 28 in 1993 and both Stratofreighters are in full service. Unable to maintain economic viability, the company leases its aircraft to other concerns in 1994 and then shuts down in early 1995.

RADIOPRIBOR-TATARSKOE: Russia (1994–1996). This ad hoc passenger and charter operation is set up at Kazan, Tatarstan in 1994. R. Khalimov is named general director and he begins revenue flights with an unspecified number of Antonov An-26s and Yakovlev Yak-40s. Flights cease two years later.

RAF-AVIA AIRLINES, A.S.: 34 Dumes St., Riga, LV-1005, Latvia; Phone 2-391779; Fax 7-339045; Code MTL; Year Founded 1991. Kouri Khmelevski establishes RAF-Avia Airlines at Riga in February 1991 to transport spare parts for the RAF minibus manufacturing concern. Employing an Antonov An-26B, the nation's first private airline begins flying in May.

With a decline in demand for spare parts, the company in 1994 switches to the provision of public international and regional cargo charters. Many flights are made on behalf of **DHL Worldwide Express**, as the company also diversifies into such aviation activities as leasing, technical support for smaller aeronautical concerns, and management consulting services.

The carrier becomes a joint-stock company in 1996 with Juris Hmelevskij as president. Two more An-26Bs are procured and the company begins an emphasis on humanitarian and medical relief flights, as well as small group charters and the transport of livestock. Revenues reach \$1.2 million.

Flights continue during the remainder of the decade, during which years the fleet is increased by the addition of another An-26B and an An-72. A total of 80 workers are employed at the beginning of 2000.

RAI COMMUTER AIRLINE: United States (1981–1983). Herbert D. Roederer's Roederer Aviation is reformed and renamed in 1981. Employing his fleet of 1 each Cessna 414, Cessna 402, Cessna 210, and Cessna 177, the third-level operator maintains scheduled intrastate passenger and cargo services linking his St. Louis base with Springfield, Kansas City, Jefferson City, Columbia, and Lake of the Ozarks.

Unable to withstand the recession, Roederer is forced to shut his doors in 1983.

RAILWAY AIR SERVICES, LTD.: United Kingdom (1934–1947). Looking for a way in which to initiate domestic air operations, **Imperial Airways, Ltd.** officials convince those of Great Western Railway in early 1933 to take an interest in providing, and to some extent controlling, competing domestic flying service. On April 11, a chartered **Imperial Airways, Ltd.** Westland Wessex, in GWR livery and piloted by Capt. Gordon P. Olley, makes a demonstration flight from Cardiff to Plymouth. The following day, the service is offered to the public twice daily.

The Plymouth–Cardiff route is extended to Birmingham on May 22 and the frequency of the service is reduced to once daily. Operations are suspended on October 1 for the winter; in the almost six months of flying, 714 passengers are transported and the trial Imperial service convinces the nation's rail leaders to invest in air service.

The U.K.'s four principal railroads join fifty-fifty with **Imperial Airways, Ltd.** to form and register RAS at London on March 21, 1934. Initial capitalization is £50,000 and one director each is appointed from the state airline plus Great Western Railway (GWR), London, Midland and Scottish Railway (LMSR), London and North Eastern Railway (LNER), and Southern Railway (SR). Sir Harold Hartley of LMSR is named chairman. On May 1, **Spartan Air Lines, Ltd.**, working in ticketing association with Southern Railway, officially launches RAS operations when it begins its seasonal service from London (Croydon)–Isle of Wight.

The first RAS aircraft, a de Havilland DH 84 Dragon 2 painted in the company's distinctive silver, red and green livery, is delivered at London (Croydon) in late April. It is employed to initiate the first company service with an owned aircraft daily over the old Great Western Railway Cardiff–Plymouth route, with an extension to Liverpool, on May 3.

On July 30, summer Dragon flights are launched from Birmingham–Isle of Man via Bristol and Southampton. Another Dragon 2 is purchased in early August and in preparation for the start-up of new mail routes, two De Havilland DH 86s are now simultaneously acquired and christened *Mercury* and *Delphinus*. August 20 is the announced day for opening the Royal Mail Route from Glasgow–Belfast–Manchester–Birmingham–London, as well as a Post Office- requested mail and parcel shuttle from Belfast–Manchester via the Isle of Man.

Bad weather limits operations by the company's Wessex, two DH 86s, and three DH 84s on kick-off day; however, a full schedule is undertaken on August 21, including the addition of mail to the Liverpool–Plymouth and Birmingham–Isle of Man frequencies. On November 1, Liverpool is substituted for Birmingham and Manchester on the London–Glasgow service.

Passenger boardings for the first eight months total 2,237.

Two DH 89 Dragon Rapides are purchased in March 1935 and christened *City of Bristol* and *City of Birmingham*. A Manx Airway section is formed on April 15 and in agreement with The Isle of Man Steam Packet Co., Ltd., begins flying from Manchester to the Isle of Man via Blackpool. On May 18, the first two DH 89 Dragon Rapides enter service. On May 27, these are employed to start twice-daily summer service from Liverpool to Shoreham via Birmingham, Bristol, Southampton, and Portsmouth; the same day, the DH 84s *City of Cardiff* and *City of Plymouth* initiate twice-daily summer flights from Nottingham–Plymouth via Birmingham, Cardiff, and Denbury.

Two new Manx Airway routes out of Liverpool are launched on May 31: to Isle of Man via Blackpool and directly to Manchester. These routes complement a new Manchester–Isle of Man frequency begun the same day via Liverpool and Blackpool. Also during May and early June, two more Dragon 2s join the fleet. An unnamed DH 84 is lost in a crash at Ronaldsway on July 1 and a few days later the very first Dragon 2 is sold. Sunday Dragon Rapide excursion flights are offered between Brighton and Le Touquet on July 28 and August 4; however, only 11 passengers are carried and the service is suspended.

The first and only DH 84 Dragon 1 is acquired in late August. The winter schedule is begun on September 14 over the London–Glasgow route, with Birmingham becoming an on-demand stop, with contract mail added as of December 2. Meanwhile, an unnamed DH 84 is lost in a crash at Fairsnape Fell on October 26 and a Dragon 2 is sold in December.

The year's bookings reach 13,293.

Between March and May 1936, six DH 89s join the fleet and are christened *Star of Lancashire*, *Star of Mona*, *Star of Yorkshire*, *Star of Ulster*, *Star of Renfrew*, and *Star of Scotia*. On May 25, South and West of England routes are reopened; some alterations are made. Simultaneously, the Manx Airway section opens three new routes from Yeadon: to Manchester, Isle of Man via Manchester and Liverpool, and Isle of Man via Manchester and Blackpool, as well as a frequency from Isle of Man to Glasgow.

On July 5, the same division begins two summer frequencies from the Isle of Man to Belfast and to Carlisle. Simultaneously, RAS launches Sundays only flights from Cardiff–Shoreham via Weston-super-Mare, Bristol, Southampton, and Ryde. Cardiff to Weston-super-Mare hourly shuttles are initiated on August 21. On September 10, an experimental Glasgow–Perth DH 86 proving flight is undertaken; two days later, the Cardiff to Weston-super-Mare shuttle ends.

On September 21, the Manx Airway section withdraws services to and from Yeadon. The mail contract for the London–Liverpool–Belfast–Glasgow route is secured for a second time on December 2.

Enplanements for the year are 22,076.

The Dragon 2 *City of Plymouth* is sold in March 1937. The Manx Airway section restarts Isle of Man flights from Glasgow, Carlisle, and

Belfast on May 10. The Liverpool–Glasgow via Blackpool, Isle of Man, and Belfast service flown by **Northern and Scottish Airways, Ltd.** is taken over on May 21. Exeter is added as an on demand destination on the Bristol–Plymouth route as of June 1.

The Dragon 2 *Star of Cheshire* is sold in early September. On September 26, the Manx Airways services to and from the Isle of Man are transferred to the new **Isle of Man Air Services, Ltd.**, along with five R.A.S. DH 89s: *Star of Lancashire*, *Star of Mona*, *Star of Yorkshire*, *Star of Ulster*, and *Star of Renfrew*. The new entrant is partially controlled by RAS owner London, Midland and Scottish Railway.

A total of 25,523 passengers are carried during the year.

On March 6, 1938, a DH 84 is rechristened *Island Maid* and the next day is employed to launch local Shoreham–Southampton via Ryde service. Direct Liverpool–Glasgow flights start on May 2 and on May 23 routes are stretched Manchester–Liverpool and Shoreham–Bournemouth via Ryde, the latter in place of an earlier Shoreham–Southampton service. The DH 89 *Star of Scotia* is withdrawn on July 3, but is replaced by another, christened *Juno*.

Alternating on different days with **Channel Air Ferries, Ltd.**, company Dragon Rapides initiate Bristol–Cardiff–Plymouth flights on August 8. West and South of England operations cease on September 11. In accordance with the Air Navigation Order of September 16, the new Air Transport Licensing Board (ATLB) on October 21 grants the carrier route certification to fly from Glasgow to Belfast via London (Croydon). The only Dragon 1 is sold in December.

Enplanements fall to 7,082.

In January 1939, the Dragon 2 *City of Cardiff* is sold. The DH 89s *City of Birmingham* and *City of Bristol* are sold in February and March, respectively. Four-times-per-day Liverpool–London via Manchester services begin on May 22. The U.K. declares war on Germany on September 3 and all civil flying ceases. Simultaneously, all company aircraft are dispatched to Exeter to begin participation in the government's National Air Communications. Bookings for the year are down to 5,313.

On May 5, 1940, RAS is one of seven companies to sign an agreement with the SSA forming the **Associated Airways Joint Committee** (AAJC) for the wartime operation of domestic air services. The next day, the prewar Liverpool–Glasgow via Belfast route is reopened. Between May 22 and June 2, the airline, as an AAJC member, suspends operations and sends its aircraft to participate in the evacuation of British Expeditionary Force troops from France.

Services are suspended again between June 15 and 24 as additional rescue flights to France are made; two DH 86s, the *Neptune* and *Venus*, and two DH 89s are abandoned at Bordeaux on June 18. The Liverpool–Belfast–Glasgow service is restarted on June 27. Two new DH 86s are bought in August.

Bookings on the route for the year equal 4,271.

Service is maintained in 1941–1943 and boardings for the three years are, respectively: 11,843 (1941), 16,043 (1942), and 20,094 (1943).

Two DH 89As are acquired in October 1944, followed by a third in December. Meanwhile, a company DH 86B, piloted outbound by Capt. C. W. S. Clark and inbound by Capt. D. C. Harrison, initiates London (Croydon)–Belfast via Liverpool flights on November 13. This is the first aerial service flown from and to the British capital by a domestic airline since the beginning of World War II.

The year's bookings fall to 17,117.

In order to connect with the transatlantic service of **Trans-Canada Air Lines, Ltd.**, the company, in cooperation with **Scottish Airways, Ltd.**, begins Glasgow (Renfrew) to London (Croydon) service on April 9, 1945, via Prestwick—the Canadian terminus—and Liverpool. V-E Day is celebrated on May 8.

Two DH 89As are purchased in October and an Avro 19 is leased for a month from A. V. Roe and Company; in November, another DH 89A and four Avro 19s join the fleet. On December 3, nonstop London (Croydon) to Belfast services are started with Avro 19s, the first new airplane type introduced on any postwar British internal route.

Passenger boardings for the year are 29,716.

Three new Douglas DC-3s are delivered in March 1946 followed by six Avro 19s during the second quarter. Avro 19s inaugurate nonstop London (Croydon)–Glasgow (Renfrew) flights on April 15, the first direct, scheduled service between the two cities. The new DC-3s are introduced on May 20 on two new routes from Glasgow (Renfrew): to Belfast and to London (Croydon). In early July, four additional Avro 19s join the fleet and Avro 19 London (Croydon)–Belfast via Manchester services are launched on July 29.

British European Airways Corporation (BEA) is formed on August 1. Later in the month, an all-cargo Junkers Ju-52/3m is purchased, while three Avro 19s are sold. Employing DC-3s/DH 89As in cooperation with **Scottish Airways, Ltd.** and under contract to BEA, flights begin north and south from London (Northolt)–Aberdeen via Glasgow (Renfrew) and Prestwick, on November 18.

Meanwhile on the same day, the first 3 of 11 ex-Luftwaffe Ju-52/3ms are converted into Jupiters by Short & Harland, Ltd. at Belfast and leased from the state carrier. These start BEA civil operations under RAS management. The two unnamed DH 86s purchased in 1940 are sold in October and one of the new DC-3s is destroyed in a landing crash at South Ruislip on December 19.

Enplanements for the final year are 45,163.

Operations continue apace as 1947 begins. On January 26, a Junkers Ju-52/3m Jupiter is badly damaged in an accident at Renfrew, Scotland, and is written off. On February 1, the carrier is one of the wartime **Associated Airways Joint Committee** members merged into **British European Airways Corporation (BEA)**.

RAINBOW CARGO AIRLINES, LTD. See **RAINBOW EXPRESS, LTD.**

RAINBOW EXPRESS, LTD.: Ghana (1989–1994). REL, successor to Accra-based Rainbow Cargo Airlines, Ltd. (1981–1986), is formed at Accra in early 1989 to offer all-cargo services with a single Boeing 707-351C. A total of 7.17 million FTKs is operated.

Recession and world economic and political problems following Iraq's August 2, 1990 invasion of Kuwait lead to a 68.9% cargo drop on the year to 4.25 million FTKs.

Following the carrier's recovery from the Gulf war in 1991, single-plane operations continue and in 1992 a B-707-347C is leased. In 1993, the B-707-351C is withdrawn. Operations cease in 1994.

RAINBOWAIR: United States (1973–1974). Rainbowair, previously operated as a charter carrier from Bridgeport, Connecticut, to Cape Cod and the Islands, is transferred to Keene, New Hampshire, in 1973 and reformed into a scheduled commuter airline. Employing Cessna 402s, Rainbowair inaugurates daily roundtrips linking its new base with Hartford and Boston. It also provides frequencies between Nashua and Boston.

Unable to withstand the high cost of fuel, the company goes out of business in 1974.

RAJ AIRWAYS, LTD. See **RAJAIR, LTD.**

RAJAIR, LTD.: 27B Panchratna, Ground Floor, Opera House, Mama Parmanand Marg, Bombay, 400004, India; Phone 91 (22) 363-4413; Fax 91 (22) 363-4577; Year Founded 1993. Privately owned RAL is established by Lalit Sheth, its chairman, on December 5, 1993 to operate scheduled services to religious centers with a pair of Fokker 50s leased from Ansett Worldwide Aviation Services. Capitalized at \$2.7 million, the company is unable to achieve viability and ceases operations on June 25, 1994 in order to reorganize and refinance.

P. Rajarathinam purchases majority shareholding and plans are made to acquire a fleet of 3 Dornier 328-110s in addition to the 2 Fokker 50s and to resume operations as a feeder on 17 commuter routes.

Under the marketing name Rajair, flights begin again in September 1995, although the number of destinations visited is less than half those

expected. From its Bombay hub, the company, offers services to Ahmedabad, Chandigarh, Pune, Kulu, Hyderabad, Tirupati, and Jaipur.

Orders are placed for two additional Dornier 328-110s in **1996**, one of which is delivered this year and the other in **1997**. Service continues.

RAM AIR, LTD.: Canada (1971–1985). Established at Inuvik in the Northwest Territories in **1971**, Ram Air initially operates only charter flights. In the summer of **1981**, it is decided by company officials to offer scheduled passenger and cargo frequencies and these are duly begun on November 16 over a route to Aklavik.

In **1982**, flights are inaugurated over an expanded route to Fort McPherson, Tuktoyaktuk, and the Yukon town of Old Crow.

A total of 11,575 passengers board the carrier's Piper PA-34 Seneca, Aero Commander 680FL, Cessna 185, and two Cessna 207s.

Enplanements begin to drop in **1983**, down to 11,554, and by **1985** the company is out of business.

RAM AIR FREIGHT: P.O. Box 80123, Raleigh, North Carolina 27623, United States; Phone (919) 840-0448; Fax (919) 840-9218; Year Founded 1993. Jon Heuman sets up RAF at Raleigh/Durham in **1993** to provide local all-cargo and courier services. Revenue flights commence and continue with a fleet of 5 Beech 58 Barons.

RAM AIRWAYS: United States (1973–1974). Ram Airways is set up at Carson City, Nevada, in July **1973** to offer scheduled passenger and cargo commuter flights to San Francisco via Reno and Lake Tahoe. Revenue flights commence with de Havilland DH 104 Doves and Piper PA-31-310 Navajos and continue for a year.

In mid-**1974**, the company is merged with **Valley Airlines** to form **Pacific Northwest Airways**.

RAMP 66: United States (1991–1994). Ramp 66 is set up at Grand Strand Airport at Myrtle Beach, South Carolina, in **1991** to provide local and regional all-cargo services and courier flights. Revenue operations commence and continue for 3 years with a fleet that includes 7 Cessna 402Cs, 3 Beech Barons, 3 Cessna 172s, and 2 Beech Bonanzas.

RAMSA (RED AEREA MEXICANA, S.A. de C.V.): Mexico (1943–1947). Following his departure from **LAMSA (Lineas Aereas Mexicanas, S.A. de C.V.)** in October **1943**, Gordon Barry elects to set up Mexico's first all-cargo airline at Mexico City. As an all-freight operator, RAMSA is not a threat to any of the passenger carriers, and hence is allowed to build a route network from Mexico City northward to Zihuantenejo via Arcelia and southward to Tapachula via Oaxaca and Gutierrez.

Employing a Curtiss Condor II and a Lockheed Vega, the company survives primarily on war-related contracts and ceases operations in **1947**.

RAMSEY AIRWAYS, LTD.: Canada (1992–1994). Robert Merrilees sets up his Ramsey Airways at Sudbury, Ontario, in **1992** to provide scheduled and nonscheduled services linking his base with communities in the local area. Employing 10 workers, his fleet features 1 de Havilland Canada DHC-3 Otter and 2 Cessna 180s. Services continue until **1994**.

RANSA (RUTAS AEREAS NACIONALES, S.A.): Venezuela (1948–1964). Carlos Chavez of Venezuela and U.S. citizen Everett Jones put up capitalization of B 500,000 and found RANSA at Caracas in September **1948**. With 3 Douglas C-47s (ex-military DC-3s) and 3 Curtiss C-46s, the all-cargo carrier begins nonscheduled charter flights to Miami, both direct and via the Netherlands Antilles. Although officially based at Caracas, the company conducts all of its operations from Miami.

Frequencies increase to such a point of regularity in **1949–1951** that the American CAB launches an investigation of them in **1952**. The review is heightened by three operational accidents during these years.

A Curtiss C-46D with three crew is lost at Miami Airport on June 3, **1949**; although the plane must be written off, there are no fatalities.

A C-47 crash-lands at El Lorza, Venezuela, on June 30, **1950**; although the aircraft must be written off, there are again no fatalities.

A C-46D crashes into the sea off Miami on December 21, **1952**; there is no information on casualties.

In March **1953**, capitalization is increased to B 2.5 million, with Carlos Chavez holding 85% of the shares. In December, the concern is one of three from Venezuela to receive a U.S. foreign air carrier permit for all-cargo flights; as a result, the 1952 frequency investigation is terminated.

Operations to Florida are now enhanced and the fleet is increased during **1954–1959** to comprise 2 DC-3s and 19 C-46s. Charging RANSA with running guns into the country, government authorities order the company to cease operations in June **1960**.

Owner Chavez is accused of participation in a plot to assassinate Venezuelan President Betencourt; by the time the charge is proven false, the Ministry of Communications has taken control of RANSA. Under government direction, the daily services to Miami, Jamaica, and the Antilles are resumed in August and thereafter maintained. The fleet is upgraded by the addition of 2 DC-6As and 13 C-46s.

During **1961–1962**, three old Boeing 307 Stratocruisers are purchased. The passenger interiors are stripped out and the interiors are converted into cavernous freighters. The trio is christened *Andreina Maria*, *Carlos*, and *Princess Everetta Maria II* and become regular visitors to Mexico City, the carrier's existing Caribbean destinations, and Miami.

A fourth Stratocruiser is acquired in August **1963** for conversion into a freighter. That work is not finished, however, before the company suddenly collapses in early **1964**.

RANSOME AIRLINES: United States (1964–1986). In October **1964**, Mr. and Mrs. J. Dawson Ransome form Ransome Aircraft Leasing at North Philadelphia Airport to supply one small, single-engine aircraft to the Giles & Ransome Company, a construction equipment distribution concern. In July **1966**, Ransome Air is formed as a division of the latter.

Employing a nine-passenger Volpar Turboliner (a Beech 18 equipped with Garrett-AiResearch TPE331-1 turboprop engines) named *Flagship Trenton*, the new commuter inaugurates eight-times-per-day scheduled roundtrip service between North Philadelphia and Washington, D.C. (DCA) on March 2, **1967**. A second Turboliner joins the fleet shortly thereafter and services are inaugurated to Richmond, Norfolk, and Raleigh/Durham.

Beginning in April **1968**, a pair of 15-passenger stretched Turboliners is acquired.

A total of 6,318 passengers are hauled during the first full year. Overexpanded south of the nation's capital, the company is losing money.

After two years as an independent, financially troubled Ransome Airlines becomes associated with **Allegheny Airlines (1)** in June **1969**, providing a Part 135 Turboliner replacement service from North Philadelphia to Trenton, New Jersey. In November, the turboprop Beech 18s replace **Allegheny Airlines (1)** on the important route to Washington, D.C. from Philadelphia.

Some 15 months later in August **1970**, the carrier begins operations as a full-fledged partner in the "Allegheny Commuter" network and soon earns an initial profit.

Allegheny service continues apace in **1971** and in need of larger equipment, Ransome requests permission from the CAB to operate larger equipment. The number of annual passenger boardings reaches 200,000.

In January **1972**, the government grants the requested equipment permission (in fact, an exemption) to operate French turboprops that weigh more than Part 135 permits. A fleet of eight Aerospatiale (Nord) 262s and a stock of spares are purchased from **Allegheny Airlines (1)** in May for \$3.2 million.

The New London (Connecticut) market is entered in October **1973** and in **1974** enplanements reach 205,058.

Airline employment in **1975** stands at 153. New scheduled service is inaugurated between Newark and Trenton and Princeton. In September,

the carrier celebrates the boarding of its one-millionth (cumulative) passenger.

The company's seven French-built Nord 262s and lone Twin Otter, in a freshly applied new livery, transport a total of 288,814 passengers, a firm 29% increase. Freight, on the other hand, declines 21.9% to 2.5 million FTKs.

The number of employees is increased by 15% in 1976 to 182. An eighth Nord is acquired in January. The one-millionth passenger (cumulative) is boarded in early October.

Customer bookings accelerate 17% to 337,875.

The tenth anniversary is celebrated in March 1977. With routes to five northeastern airports already, Ransome begins a Philadelphia–New York (JFK) route in October.

For the year, a total of 374,461 passengers are boarded.

Trenton to JFK service begins on April 30, 1978 and when President Carter signs the Airline Deregulation Act in October, Ransome, in terms of boardings, is the country's largest commuter airline.

Bookings climb again, up 16.3% to 447,186.

The workforce is increased by 57.8% in 1979 to 355 and Ransome orders 2 new de Havilland Canada DHC-7-102s for his line. The carrier further extends its routes and now serves all three of New York's principal airports, Sullivan County Airport in the Catskill Mountains, MacArthur Field on Long Island, Trenton, Princeton, Hartford, Providence, Boston, Washington, D.C., and Philadelphia. Late in the year, the first DASH-7 is placed on the Philadelphia–Washington, D.C. route.

The company enjoys a 38.8% boost in boardings to 616,205 and revenues accelerate 58.1% to \$20.61 million.

The employee population grows again in 1980, rising 20.9% to 428. Under the CAB's new classification scheme, Ransome Airlines officially becomes the "large regional" all by now know it to be. The fleet now comprises 7 Nord 262s, 4 Mohawk 298s, 4 DASH-7s, and 1 Cessna Citation 500. Orders are placed for 6 Avions de Transport Regional ATR42s.

In January, the company receives the 1979 "Regional Airline of the Year" award from *Air Transport World* magazine.

On November 20 and in cooperation with the FAA, Ransome begins employing a DASH-7 equipped with the world's first commercial microwave landing system (MLS). A **British Airways, Ltd. (2)** Concorde reports a near miss with a Nord 262 25 miles east of New York (JFK) on December 1.

Passenger boardings rise 30.7% for the privately held airline to 805,363, which now snatches the title of "largest commuter" away from **PRINAIR (Puerto Rico International Airlines)**.

Service is started to Washington, D.C. (IAD) in the spring of 1981 and to Trenton and Princeton on December 1. Destinations now visited also include Boston, Hartford, Providence, New London, Long Island, New York, Newark, Philadelphia, and Washington, D.C. (DCA). At midnight on November 30–December 1, a DASH-7 makes the first approach to New York (JFK) employing three-dimensional area navigation (R-NAV) equipment.

The addition of three more DASH-7s can not overcome the problems of general recession and the summer PATCO air traffic controllers' strike. As a result, the company experiences a 9.2% drop in bookings to 731,270, but freight traffic receives a 17.5% boost to 823,705 pounds.

The country's largest commuter airline, Ransome celebrates its fifteenth anniversary in 1982 by departing from its 12-year membership in the "Allegheny Commuter" network on June 1. It now contracts with **Delta Air Lines** for operation of its ground-reservation services and strikes out into the deregulated skies under its own colors.

Still the country's largest regional, the airline introduces direct service between JFK and Dulles Airports and adds another DHC-7 to expand its routes to Baltimore, Boston, and Hartford. Service is expanded from MacArthur Airport at Bohemia, Long Island, on August 12 to include Trenton, Hartford, Washington, D.C. (DCA), Baltimore, and Providence. Unsuccessful, the Dulles–JFK route is suspended on December 3.

In the midst of these changes, passenger boardings fall again, dropping by 8.6% to 544,437.

The ninth Canadian DASH-7 turboprop is acquired in 1983 and while retaining four Aerospatiale 298 Mohawks acquired earlier, Ransome disposes of its remaining Nord 262s. Service is extended by the 360-employee large regional to Worcester, Massachusetts.

The number of travelers enplaned continues to fall, down another 6.8% to 540,759. Once the leader, Ransome is now the 10th largest regional airline.

The time comes to once again affiliate with a major and in May 1984 Ransome becomes part of the new "Delta Connection" commuter network. In the code-sharing arrangement with the major, the feeder is able to employ Delta's "DL" reservations code, is assigned special Delta flight numbers, and obtains many other considerations it had during the "Allegheny Commuter" period. Meanwhile, flights are initiated to the New York capital at Albany and to Burlington, Vermont.

As a result of these developments, a 4.8% rise in passenger traffic occurs on the year, to 566,754 passengers flown.

In February 1985, Ransome inaugurates operations to Boston and Hyannis, Massachusetts, and on May 30 a portion of the failing operation of financially beleaguered **Susquehanna Airlines** is acquired.

The new arrangement gives the Philadelphia-based carrier operating rights between New York City and Binghamton, which it begins to exercise on June 24, employing a Beech 99 also obtained from Susquehanna. In July, the carrier purchases four additional Aerospatiale 298 Mohawks from **USAir**. Orders are placed for six SAAB SF340s.

Passenger boardings increase 7.5% to 609,022.

On June 1, 1986, the company, to the surprise of the airline industry, is purchased by **Pan American World Airlines (1)** to feed the major's international flights. Shedding its "Delta Connection" affiliation, the carrier undertakes revenue services on June 1 as **Pan Am Ransome Express**. The Ransome name will be dropped once integration of personnel and services is completed.

RAPID AIR: 5500 44th St., Kent County International Airport, Grand Rapids, Michigan 49588, United States; Phone (616) 957-5050; Fax (616) 957-2151; Year Founded 1946. Rapid is established as the FBO at Kent County Airport in 1946. Over the next 50 years the company, in addition to the usual maintenance, flight school, and avionics support activities associated with a fixed base operation, also undertakes a wide variety of domestic executive and passenger and cargo charters.

In 2000, Loretta Vantine-Norton is president. She employs 4 pilots who operate a piston-engine fleet of 4 Cessna 310s, 3 C-172 Skyhawks, and 1 each C-402A and C-414 Chancellor.

RAPID AIR LINES: United States (1928). Established at Rapid City in the spring of 1928, Rapid is equipped on May 28 with a single Ford Tri-Motor, the 4-AT-20, christened *Wamblee Ohanko* (Swift Eagle). Pilot Clyde W. Ice inaugurates passenger flights to Watertown and offers sight-seeing trips over the Black Hills.

Although plans are made to create an international airline with routes from Canada to Panama, the entire operation lasts only one month, July–August, before fiscal reality sets in and the carrier fails.

Rhonda Coy Sedgwick remembers the aviator and his dreams in her *Sky Trails: The Life of Clyde W. Ice* (Newcastle, Wyo.: Quarter Circle A Enterprises, 1990).

RAPID AIR TRANSPORT: United States (1930–1933). Rapid is established at Omaha by Walter F. Halley in the spring of 1930 to offer scheduled, multistop passenger service to Kansas City via St. Joseph. Employing a Ryan B-1 Brougham and a Bellanca CH-300 Pacemaker, the company inaugurates flights on March 31.

Operations continue in 1931–1932 in association with **Braniff Airways**. In February of the latter year, a Lockheed Model 5C Vegas is acquired from W. A. Hansley of Detroit and is christened *Aksarben Comet*.

In December 1933, the company is purchased and operated as a division of another independent, **Hanford Tri-State Airlines**, where the story continues.

RAPSA (RUTAS AEREAS PANAMENAS, S.A.): Panama (1944–1972). Although incorporated on December 23, 1944, RAPSA, one of the last operators of the Boeing 247D, does not begin to enjoy great success until the period after September 1958 when a Douglas DC-4 joins its large fleet of DC-3s.

Early in the 1960s, a Lockheed L-1049H Super Constellation is leased from Compania Interamericana Export-Import, S.A. and is flown on its behalf. Operations continue apace and in October 1964 a Martin 2-0-2, first flown by **California Central Airlines**, is acquired.

Just after takeoff from Panama City for Miami on March 30, 1968, the Connie crashes, killing its three-man crew. Cia Interamericana Export-Import, S.A. leases another used Super Constellation from Miami-based International Aerodyne.

Operations continue apace in 1969–1972.

En route from David to Bocas del Toro on January 9, 1970, a C-47A with three crew and five passengers is taken over by one of the customers, who orders the aircraft flown to Cuba. Returning to its point of origin, the plane is held on the ground by military police. A guardsman climbs aboard through a cockpit window and shoots the hijacker dead.

Rising costs, which first forces removal of the Martinliner, in the end causes the company to shut its doors during the latter year.

RARITAN VALLEY AIR: United States (1966–1968). RVA is organized at Manville, New Jersey, in the early spring of 1966 to provide scheduled air taxi shuttles to New York (LGA). Employing a Piper PA-23 Aztec, daily roundtrips commence on June 8 and are maintained until the company ceases operations in 1968.

RAS (RUTAS AEREAS DE COLOMBIA, S.A.): Colombia (1955–1962). Wishing to establish both a South American network and fifth freedom entrance into Colombia, **KLM (Royal Dutch Airlines, N.V.)** joins with the Colombian all-cargo airline **SAM (Sociedad Aeronautica de Medellin, S.A.)** in January 1955 to form a new international carrier, RAS. Within a year, SAM is authorized to inaugurate domestic passenger services to a variety of destinations, including Providencia and San Andres, thereby providing an internal link for the joint enterprise.

Following Brazil and Colombia agreement on a new bilateral air transport agreement, RAS begins scheduled Bogota to Rio de Janeiro frequencies in July 1958. DC-4s are brought in by the Dutch partner and on December 28, El Transamericano service is inaugurated over the route.

The partnership continues to thrive during 1959 and in early 1960 it takes over SAM's domestic passenger network. São Paulo is added as a Brazilian terminus on December 5.

The **KLM (Royal Dutch Airlines, N.V.)** network plan appears to be achieved in October 1961 when flights are started from Bogota to Curaçao. At this point, however, major competition is started by **AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.)**, which places extreme service and financial pressure on SAM's domestic system.

The stress of competing proves a financial drain on the joint carrier's income, distressing both the Colombian and Dutch partners. Additionally, traffic on the Brazilian routes proves weak. As a result of these reversals, RAS is terminated in August 1962.

RAS FLUGGESELLSCHAFT, mBH.: Parsevaistrasse 7a, Dusseldorf, D-40468, Germany; Phone 49 (211) 941-8610; Fax 49 (211) 941-8606; <http://www.ras-flug.de>; Code RW; Year Founded 1996. Rheinland Air Service, GmbH. is reformed at Dusseldorf on December 19, 1996 as the commuter subsidiary of **LTU International Airways, GmbH.** Johannes Turzer is appointed managing director and is allowed to retain a workforce of 19. Two Shorts 360-300s are put into scheduled service the same day and continue to link the company base with Efurt, Westerland/Sylt, Saarbrücken, and Berlin (Tempelhof Airport).

On June 18, 1997, new fares are offered on the carrier's daily services to Westerland/Sylt and weekday-only flights to Efurt.

Flights continue in 1998–1999. During the first quarter of the latter year, two more Shorts 360-300s are chartered for a two-year period from Fortis Jet Prop.

After SAirGroup transfers control and part of the equity in parent **LTU International Airways, GmbH.** to Rewe Touristik, GmbH. in September 2000, LTU is forced to review its core business activities with a view to returning to profitability. In mid-October, RAS is sold to Wings Factor of Moenchengladbach, which destination is now added to the carrier's Shorts network.

RASMARK JET CHARTER: El Paso International Airport, El Paso, Texas 79925, United States; Phone (915) 772-4616; Fax (915) 779-5387; Year Founded 1984. Rasmak is set up at El Paso in 1984 to offer passenger and cargo charters to destinations throughout North and South America, plus Central America. Revenue operations duly begin and by 1998–2000 the fleet includes 2 Learjet 25Bs and 1 each Learjet 25C, Learjet 24B, Learjet 24D, and Dassault Falcon 20.

RATIOFLUG, GmbH.: Germany (1982–1998). This German regional all-freight charter operation, which also undertakes contract service flights, is established at Cologne in 1982. Werner Netck is named managing director and frequencies are inaugurated to Basel, Bergamo, and Paris (Orly). Services continue apace for the remainder of the decade.

In 1990, the fleet comprises 1 Dornier 228-201, 1 Dash-202, 3 Fokker F.27-600s, 1 Learjet 35A, and 1 Learjet 55. One of the Fokker's is leased from Denmark's **Alkair Flight Operation, A.S.** The company now becomes a wholly owned subsidiary of Ratioflug Holdings. A second Dornier 228-202 is added in 1991 as well as a fourth Fokker F.27-600, leased from **Jersey European Airways, Ltd.** and which is operated on behalf of **Federal Express (FedEx).**

The second Dornier and fourth Fokker are withdrawn in 1992; however, a second Gates Learjet 55 is obtained. Airline employment is 57 in 1993. Two Cessna 404 Titans and a Beech Super King Air 200 are purchased, but withdrawn at year's end.

The total fleet in 1994 includes 2 each Learjet 55s and F.27-600s, and 1 each Learjet 35A and Dornier 228-201.

Flights continue in 1995–1997, during which years Mrs. Sonja Netek becomes joint managing director. In an unsuccessful effort to enhance income, the carrier leases an Airbus Industrie A300B2-1C, previously operated by **Air Inter, S.A.**, with which to operate inclusive tours to the Mediterranean during the winter charter season. The company shuts its doors in January 1998.

RAVEN AIR: United States (1987–1989). Raven Air is set up at Anchorage, Alaska, in the fall of 1987 to offer scheduled passenger and cargo flights to Seldovia and Port Graham. Employing Cessna light-planes, Raven inaugurates revenue services in November. Operations continue until the end of the decade.

RAY PETERSON FLYING SERVICE. See **NORTHERN CONSOLIDATED AIRLINES**

RAYTHEON AIRCRAFT SERVICES: 7240 Hayvenhurst Ave., Van Nuys, California 91406, United States; Phone (818) 756-2100; Fax (818) 786-3917; Year Founded 1991. Raytheon is set up as an FBO at Van Nuys Airport in 1991. Additionally, other full service support facilities are opened at Birmingham, Alabama, and at Atlanta, Indianapolis, Wichita, and Farmingdale. These locations also engage in significant charter business and rapid growth is experienced through 2000.

At Van Nuys, the company employs 24 pilots and undertakes executive and small group passenger charters to destinations from Canada to Central America. Charter Director Ladd Caine oversees the scheduling from California of 2 Beech Super King Air 200s and 4 King Air 90s, plus 1 Super King Air 300 and 1 Beech 2000 Starship.

Charter Director Kimberlu Stein in Alabama is in charge of sending 40 pilots to Western Hemisphere points and a few other destinations

worldwide; they fly 2 each Beech 400A Beechjets and 2 Super King Air 300s, plus 1 each King Air 90 and Beech 58 Baron.

Ed Watson at Fulton County Airport in Atlanta oversees the work of 13 pilots and their flights with 2 Starships, 1 Super King Air 200, and 1 King Air 90. Bill Dolan is Flight Department Manager at Republic Airport in Farmingdale, New York, and he schedules 4 Beech 1900Cs. Dean Meyer fills the same position at Wichita and his 3 pilots operate 1 Beech 1900 and 3 Beech 1300s. At Indianapolis, Manager Gene White provides services with 1 Starship, 2 Beech 400A Beechjets, and 1 Super King Air 300.

RDS AVIA: Ulitsa Akademicheskaya 26, Volgograd, 4000001, Russia; Phone 7 (8442) 448842; Year Founded 1994. An investment opportunity, RDS Avia is established by the RDS Investment and Pension Company at Volgograd in 1994. A. G. Tur is appointed general director and he begins all-cargo revenue flights with 2 each Antonov An-26s and An-74s.

Services continue in 1995–2000, during which years another An-74 is acquired and a second hub is opened at Stavropol.

READING AIRLINES: United States (1947–1968). In the spring of 1947, Reading, Pennsylvania, FBO operator Alfred Bertolet forms an air transport division of his year-old Reading Aviation Service to begin flights to Allentown, Philadelphia, and Newark, the latter serving New York City. Initially operated as a charter service, RAS forms an airline division and begins to offer regularly scheduled Part 298 Beech 18 roundtrip flights on August 1, 1957, linking Reading with Newark.

Reading Airlines, one of the nation's first third-level or commuter carriers, replaces its Beech 18s with three de Havilland DH 104 Doves in August 1960. These are employed to inaugurate daily scheduled frequencies to Allentown, Wilkes-Barre, Buffalo, and Lancaster.

Service to New York (JFK) begins in 1965, followed by Philadelphia in the spring of 1967. During these years, the fleet is upgraded by the addition of Beech 99s and DH 114 Heron 2s. Orders are placed for a trio of de Havilland Canada DHC-6-100 Twin Otters.

The first two Twin Otters arrive during the first quarter of 1968 and in May Reading Airlines merges with **Suburban Air Taxi** of Red Bank, New Jersey, to form **Suburban Airlines**.

REAL, S.A. (TRANSPORTES AEREOS REDES ESTADUAIS AEREAS, S.A.): Brazil (1945–1961). In November 1945, former **TACA (Transportes Aereos Centros Americanos, S.A.)** pilot Linneu Gomez purchases three military surplus Douglas C-47s and on the 30th of the month receives government authority to organize and operate an airline. In association with Mammana Neto, who had tried—and failed—to launch a carrier in 1943, Gomez sets up REAL at São Paulo in December; initial capitalization is three million cruzeiros.

São Paulo–Rio de Janeiro service is inaugurated on February 7, 1946, with extensions in April to Curitiba. The frequency is increased to daily on June 26. Three Bristol 170s are ordered and the two eventually arrive by October 1, entering service 16 days later.

A route is opened to Londrina on May 15, 1947 and on November 10 the Curitiba service is stretched to Porto Alegre. A Bristol 170 is damaged later in the year (spar failure) and both aircraft are withdrawn, leaving a fleet comprising 13 DC-3s.

In late winter 1948, a route is opened to Rio Preto. On March 17, the small competitor **LAW (Linhas Aereas Wright, S.A.)** is purchased and together with its Rio–Santos route, is merged.

Negotiations are begun in early 1949 for the acquisition of **LAN (Linhas Aereas Natal, S.A.)**, then flying a ten-point network inland of São Paulo–Rio de Janeiro, including services to Belo Horizonte and Corumbá. Two fatal crashes are suffered in December. On December 1, a DC-3 with 22 aboard crashes during a rainstorm at Ribeirão (20 dead) while another Douglas transport disappears on a Rio–Victoria flight on December 26.

LAN (Linhas Aereas Natal, S.A.) is acquired by REAL in May 1950. The competitor's routes and 4 DC-3s are absorbed, with the latter

bringing the carrier's fleet of Douglas transports to 20. Service is started to Iguassu.

Twenty-eight die on July 12, 1951 when a C-46 crashes near Aracaju. At a cost of 34 million cruzeiros, **LATB (Linha Aerea Transcontinental Brasileira, S.A.)** is purchased in August. The acquisition provides routes to most of northeast Brazil, including Portaleza, Recife, Macio, Aracaju, Salvador, Paulo Alfonso, Victoria de Conquista, Araxá, Varginha, and Paragussu, as well as additional DC-3s and C-47s. REAL's capitalization is now increased to 70 million cruzeiros.

A DC-3 with 10 passengers is lost at Ubatuba, Brazil, on August 17; there are no survivors. Paraguayan government permission is received on December 10 for a new route into that nation.

Following the arrival of the first Douglas DC-4, formerly the **Chicago and Southern Air Lines City of New Orleans**, the company begins international service in January 1952, São Paulo–Asunción via Curitiba and Iguassu Falls.

A DC-3, with 18 passengers strikes high ground at San Francisco do Paula, Brazil, on October 14 (14 dead).

In 1953, orders are placed for four Convair CV-340s.

After suffering an engine failure on April 10, a DC-3 with 4 crew and 26 passengers attempts to make an emergency landing, but stalls out and crashes at Anchieta Island, Brazil (26 dead).

On February 4, 1954, a stop is added at Encarnación, Paraguay. With board approval given on May 24, Linneu Gomez, on September 10, purchases 80% control of **Empresa de Transportes Aerovias Brazil, S.A.**, a TACA subsidiary and major operator of independent and domestic routes.

The Aerovias Brazil subsidiary **AERONORTE (Empresa de Transportes Aereos Norte do Brazil, S.A.)** is also taken over, but is allowed to continue operations under its own name. The REAL fleet now includes 58 DC-3s, 3 DC-4s, 4 C-47s, and 6 CV-340s. The first 2 of the CV-340s are delivered on July 8. Cabotage rights within Paraguay are authorized on November 15.

Gomez in February 1955 amalgamates his carriers into the Consorcio **REAL-Aerovias Brazil, S.A.** The enlarged airline now launches flights from Corumbá–Asunción via Concepción, Iguassu Falls, and Encarnación, while continuing to operate the Miami service inherited from Aerovias Brazil.

While executing a missed approach procedure, the pilot of a DC-3 with 2 other crew and 18 passengers, strikes a pole and crashes at Vitoria da Conquista, Brazil, on March 6; 5 people are killed.

A large domestic operator built up through the successive purchase and merger of seven smaller carriers, **TAN (Transportes Aereos Nacional, S.A.)** is now ripe for acquisition. On August 2, 1956, REAL acquires 85% of its shares, although it, too, is allowed to continue operations as an autonomous part of the Gomez consortium. The fleet, through this takeover, grows to comprise 86 DC-3s and 6 CV-340s. Routes are now extended to every Brazilian state and daily frequencies are increased on the more important segments: Rio–São Paulo (16), Rio–Belo Horizonte (12), São Paulo–Curitiba (7), São Paulo–Londrina and Belo Horizonte (3). On September 15, a multistop São Paulo–Chicago route is opened.

A DC-3 with 26 aboard smashes into a mountain near Anchieta Island on April 10, 1957; there are no survivors. Ordered by TAN earlier, six CV-440s are delivered between March and September.

REAL opens the first route between Rio de Janeiro and the new federal capital at Brasília on May 3. Meanwhile, at the end of May, four Lockheed L-1049H Super Constellations are ordered.

While on final approach to Montevideo following a September 18 flight from Porto Alegre, a CV-440 with 5 crew and 30 passengers undershoots the runway and collides with an earthen bank, causing the Convair to skid (1 dead); the aircraft is subsequently written off.

The former **Chicago and Southern Air Lines** Douglas DC-4 *City of New Orleans*, with 4 crew and 30 passengers, is lost in an accident off Praia de Balaia, Brazil, on November 4; there are no fatalities.

Also in November, Gomez acquires 50% interest in **SADIA**. At year's end, the fleet includes 89 DC-3s, 10 DC-4s, and 10 C-46s.

The Super Connies are received beginning in February 1958. In circumstances unknown, a DC-3 with four crew is lost at Maringa, Brazil, on August 27.

Aerovias Brazil, the consortium's designated international division, will employ the new aircraft to open additional U.S. routes, beginning with Rio de Janeiro–Los Angeles service on November 19, 1959 via Manaus, Bogota, and Mexico City. The fleet is increased that year by two Aero Commanders and orders (never filled) are placed for four CV-990s, three Lockheed L-188 Electras, and five DC-6Bs.

On February 25, 1960, a DC-3 with 4 crew and 22 passengers crashes into a USN R-6D-1 (military DC-6) with 38 passengers over Guanabara Bay, Rio de Janeiro, Brazil; there are 3 survivors from the military aircraft.

On May 2, Brasilia is added as a stop on the Los Angeles route, which is itself extended on July 9 to Tokyo via Honolulu and Wake Island. This is the first direct air service to become available between Brazil and Japan.

Meanwhile, on June 24, a CV-340 with 5 crew and 49 passengers en route from Brasilia to Rio de Janeiro, suddenly crashes into Guanabara Bay; there are no survivors.

A chartered C-46A with 2 crew and 13 passengers crashes in the jungle at Cachimbo, Brazil, on December 7; there are no survivors.

In terms of passenger kilometers flown, REAL now ranks as the ninth largest airline in Latin America.

The withdrawn **SAS (Scandinavian Airlines System)** DC-6B *Hjalmar Viking* is purchased in February 1961. A DC-3 freighter with three crew crashes while on initial approach to Ponta Crossa, Brazil, on March 15; there are no survivors.

In deep financial trouble due to over extension, Gomez is forced to cease Chicago service in the early spring. Aerovias Brazil, and the company's four Super Constellations, are sold to **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** on May 2 in a desperate but unsuccessful effort to halt the cash-flow hemorrhage.

A C-46A is destroyed as the result of a bad landing at Brasilia on June 21; there are no injuries.

On August 16, **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** acquires 90% of the shares in REAL, S.A. and on August 22 a pair of Douglas DC-6Bs arrives from the American carrier **Northwest Airlines**. REAL is subsequently absorbed into its new parent, passing from the scene after a meteoric rise and fall.

REALWEST AIRLINES: United States (1979–1980). Set up by Wayne Turner as **Turner Aviation Service** at Fargo, North Dakota, in early 1979, this small regional is quickly renamed. Employing Cessna 404s, it inaugurates scheduled daily passenger and cargo flights linking its base with Devil's Lake, Minot, Williston, Bismarck, Dickinson, Bowman, and Rapid City. Operations cease on June 11, 1980.

REBEL AIR (PTY.), LTD.: Australia (1978–1988). RAL is formed at Sydney Airport in 1978 to offer passenger and cargo charters and air tour services with an initial fleet of three Douglas DC-3s. Among the more popular air tour services is an eight-day visit to the "Outback," featuring stops at Ayers Rock and Alice Springs in the Northern Territory, Birdsville in Queensland, Coober Pdy in South Australia, and Broken Hill in New South Wales.

In 1985, flights are begun to Queensland's Great Barrier Reef and to the Northern Territory capital of Darwin.

The fleet is upgraded by the addition of de Havilland Canada DHC-6 Twin Otters in 1986–1987, but operations cease in 1988.

RED BANK AIR TAXI. See **AIR TAXI COMPANY**

RED BARON AIRLINES (1): United States (1969–1970). The first RBA is set up at St. Paul, Minnesota, in 1969 to provide scheduled daily passenger and cargo roundtrips linking the company's base with Detroit Lakes, Roseau, Park Rapids, and Owatonna. Beech 18 and Cessna 402 services are duly inaugurated and late in the year, **Command Air** is purchased and integrated.

Early in 1970, flights are initiated to Duluth and Hibbing, but the enlarged company cannot maintain its viability beyond June.

RED BARON AIRLINES (2): United States (1981–1982). The former **Roberson Air** is purchased by Rudolph P. Scheerer in June 1981 and renamed. President Scheerer maintains scheduled passenger and cargo services linking his base at West Palm Beach, Florida, with Jacksonville, Tallahassee, and Gainesville employing a fleet of 4 Piper PA-31-350 Navajo Chieftains.

Unable to weather the recession, the carrier closes its doors in 1982.

RED BARON EXPRESS: 4023 W. Waters Ave., No. 14, Tampa, Florida 33614, United States; Phone (813) 888-7339; Fax (813) 888-7338; <http://www.redbaronexpress.com>; Year Founded 1982. RBE is established at Tampa in 1982 to provide air freight delivery service to large and small communities around the state of Florida. Revenue flights begin and continue with a fleet of small, single-engine Cessnas. Later in the decade, the company adds its own ground messenger capabilities that allows it to not only fly goods, but to pick up and deliver them to homes and businesses.

In 1996, Red Baron acquires Pilot County Airport, making it the only Florida-based delivery company with its own fully operational fixed base operation (FBO) facilities. By the end of the decade, Next Flight Out (same day service), Express Air Shuttle (same day service), and Night Owl Express (overnight service) is offered from Tampa to Pensacola, Tallahassee, Jacksonville, Gainesville, Orlando, Fort Myers, Boca Raton, Fort Lauderdale, Naples, Marathon, Key West, and Miami.

RED CARPET FLYING SERVICE (RED CARPET AIRLINE): United States (1978–1981). Red Carpet Flying Service, doing business as Red Carpet Airline, is established at Clearwater, Florida, in 1978 to offer nonscheduled daily roundtrip passenger and cargo services to Key West and Grand Cayman and Cayman Brac in the Cayman Islands.

Employing 1 Douglas DC-3 and 2 Convair CV-440 Metropolitans, the company inaugurates revenue flights, maintaining them until November 15, 1981, at which point it is reformed and renamed **Aerosun International Airlines**.

RED DODGE AVIATION: United States (1969–1973). A subsidiary of **Flying W Airways**, Red Dodge is formed at Anchorage in 1969 to operate Lockheed L-100 Hercules freighters in support of the Alaskan oil industry. Although the parent shuts down in 1970, its child continues operations through 1973.

REDCOAT AIR CARGO, LTD.: United Kingdom (1976–1980). Michael S. Owen, Kevin McPhillips, Harry Green, and Lynn C. Wilson form this all-cargo carrier at London (CTN) in May 1976 to offer split cargo charters to points in West Africa. In addition, the founder/owners establish the aircraft engineering subsidiary Redcoat Aviation Services, Ltd.

The partners now win a contract to operate the commercial activities of **Gemini Air Transport, Ltd.**, established at Accra, Ghana, in 1974, but since dormant. Under terms of the agreement, Gemini will provide the aircraft and London-based Redcoat the crews and expertise.

Scheduled revenue flight operations commence in June with a single Gemini Bristol Britannia 253C that operates a weekly roundtrip all-cargo flight from Accra to London (LTN) via a refueling stop at Valencia, Spain. Ad hoc charters are undertaken throughout Europe, Africa, and the Mideast. Even after Redcoat, in spring 1977, acquires an operating certificate for flights under their own name, it will continue to manage Gemini's Britannia (and will do so right up until the time of its own failure in 1982).

A Bristol 175 Britannia 312F is acquired by Redcoat and is named *Christian* after the Owens's son. It begins revenue operations in May. Shortly thereafter, a Britannia 253C is purchased; it is named *Amy* after Kevin McPhillips's daughter. Together, the two turboprops undertake a variety of scheduled flights from London (LTN) to Accra and around the West African coast to Liberia, Sierra Leone, and Gambia. A trooping

contract is won from the U.K. Ministry of Defence and pays the airline to make weekly roundtrips between RAF Lynham and the Central American country of Belize.

As the decade approaches its end, the *Christian* is retired and replaced with another Britannia 253C. The new addition is christened *Amy* and the previous unit is renamed *Christian*. With a great energy crisis at hand, Redcoat joins with Airship Industries, Ltd. in a project designed to determine whether a riding cargo airship might be more cost effective than a fixed-wing aircraft. Sketches are made for a large airship to be known as the R-40 *Skyship*.

Flight 103, the *Christian*, with five crew and three passengers, takes off from Boston for London on February 16, 1980 in snow, fog, and moderate to severe icing in precipitation. The freighter, hoping to complete the final leg of a flight from Belize, reaches an altitude of 1,700 ft. and then rapidly descends into a wooded area near Billerica, Massachusetts, where it crashes (six dead).

During the summer, a swing-tail Canadair CL-44D, previously operated by IAS Cargo Airlines, Ltd., is obtained and in ceremonies at Lasham Airfield, is christened *James*, in honor of the son of Lynn Wilson. The *James* and the *Amy* soldier on for another two years. Unable to maintain economic viability, Redcoat shuts its doors in 1982.

REDTAIL AVIATION: Moab Airport, Moab, Utah, United States; Phone 435 259-7421; Fax 435 259-4032; <http://www.so-utah.com/archcany/redtail>; Year Founded 1990. Redtail is established as an FBO by Bonnie Lindgren and her husband at Moab in 1990. Over the next 10 years, a second FBO is started at Green River and daily cargo flights to local destinations are undertaken with a fleet of small Cessnas.

Bonnie and pilot Lavar Wells become better known, however, for their tour and sight-seeing flights over and to points throughout southern Utah. Among the better known natural attractions often visited are Canyonlands National Park, Arches National Park, Capitol Reef National Park, Glen Canyon National Park, and Monument Valley Tribal Park. Hoping to begin scheduled flights, a Beech Super King Air 200 is ordered late in 1997.

At the beginning of 1998, the company is awarded an Essential Air Service contract by the Department of Transportation for the operation of daily scheduled roundtrip passenger service between Moab and Salt Lake City. On September 24, Redtail is sold to Phoenix-based Express Air. The FBO/cargo operation continues under the Redtail banner, while all future scheduled flights are offered as **Sunrise Airlines**.

The takeover, according to a September 24 *Tribune Business News* feature, is to be completed by November 1.

By the end of the decade, the company is offering over 1,500 flights per year that transport in excess of 5,300 passengers.

The Redtail fleet at the beginning of 2000 includes 10 aircraft, a mix of Cessna 182s, 206s, and 207As, plus a single C-172. The bankruptcy of **Sunrise Airlines** on November 3 has no impact on the Redtail operation.

REDWING AIRWAYS: Route #6, Kirksville, Missouri 63501, United States; Phone (816) 665-6607; Fax (816) 665-6061; Code RX; Year Founded 1980. James R. Kelsey establishes Redwing Airways at Kirksville Regional Airport in Missouri in 1980. Both charter and scheduled services are offered; the former are undertaken throughout the region and the latter to Kansas City, which becomes the carrier's hub. Operations are maintained throughout the decade.

In 1990, Kelsey's company transports 1,200 charter passengers and 3,600 travelers on scheduled flights. The total rises to 1,300 nonscheduled and 4,200 regularly scheduled in 1991.

Charter numbers are not released in 1992; however, enplanements to Kansas City rise to 4,500. In 1993–1994, there are 12 employees and a fleet of two Beech B80 Queen Airs and a Cessna 401. Operations continue apace in 1995.

The fleet in 1996 includes 1 each Cessna 320 and 401 and the 2 Queen Airs. A total of 2,687 scheduled passengers are flown.

Customer bookings fall 16.9% in 1997 to 2,233.

Business improves significantly during 1998 as passenger boardings jump 19.5% to 3,000.

Just as quickly, the good times turn slightly around the wrong way in 1999, as customer bookings fall 3.2% to 2,900.

REED AIRLINE: United States (1931–1934). Former World War I mechanic and FBO operator Joe Reed establishes his airline at Lawton, Oklahoma, in the summer of 1931 to offer scheduled, multistop passenger service to Wichita Falls. A Travel Air 6000B is employed to inaugurate daily roundtrip service on September 1.

Unlike many small operators in the Depression, Reed, now associated with **Braniff Airways**, does not have a mail subsidy, but manages to enjoy sufficient success to purchase a second Travel Air and a Buhl CA-6 Airedan. Operations continue in 1932–1933 and finally cease on April 30, 1934.

REEF WORLD AIRLINES AIR WHITSUNDAY (PTY.), LTD. See AIR WHITSUNDAY (PTY), LTD.

REEVE AIRWAYS: United States (1932–1947). Following an airmail piloting career for **Pan American–Grace Airways (PANAGRA)** in South America, Robert C. “Bob” Reeve relocates to Alaska where he launches Reeve Airways at Valdez, on August 25, 1932. The enterprise initially employs an Eaglerock biplane leased from local businessman Owen Meals, to fly contract supply services to the mining town of Chisana.

With the proceeds earned, Reeves travels to Fairbanks in the spring of 1933 where he purchases (partially on credit) a Fairchild 51 cabin monoplane. Returning to Valdez, he agrees to undertake the supply of the Big Four Mine, owned by Clarence Poy, which is located 30 miles from Valdez and some 6,000 ft. up on the Brevier Glacier. Over 30 tons are transported during the first month at 5¢ per pound.

In 1936, Reeve obtains a larger aircraft, a Fairchild 71. The 2-plane charter carrier flies a variety of ad hoc passenger and cargo flights around Valdez during the next 3 years (including over 2,000 landings on glaciers). During this time, he transports in excess of 500 tons of supplies.

Disaster strikes in 1939. The Fairchild 71 is wrecked in a spring windstorm, forcing Reeve to invest much time in its repair. During the summer, the hangar in which he houses the monoplane, together with the aircraft itself, burn up in a fire. Finally, the new Civil Aeronautics Authority (CAA) informs him that, because he has been largely inactive since spring, he has not staked a sufficient claim to “grandfather rights” on air routes earlier flown. Going broke, Reeve and his family relocate to Fairbanks in 1940 where he resumes nonscheduled work on behalf of Noel Wien.

In April 1941, the pioneer airman accepts a contract from the CAA to explore Alaska's interior for a series of airfields. During the summer, Reeve hauls supplies on behalf of the Morrison-Knudsen Company for the construction of a new airfield at Northway, 100 mi. N of Fairbanks. His own airplane is at first employed; later, a Boeing 80A is acquired by M-K from **United Air Lines**. Painted bright yellow, it is christened *The Yellow Peril*. The two aircraft haul 300 workers and 1,100 tons of supplies and materials to the construction site by mid-November.

During World War II, Reeve flies charter flights, without instruments or navigational aids, to the Aleutian Islands with a red Fairchild 71 and the Boeing 80A, now painted black. In November 1942, a contract is signed with the Alaska Communications System for personnel transport on surveys about the territory. On a trip to Cold Bay with radar equipment and technicians in 1943, the Fairchild 71 crash-lands in fog and must be written off. During these years, Reeve conceives the idea of an airline for those far-flung Bering Sea islands.

After purchasing a war-surplus Douglas C-47 (military DC-3) in February 1946, he begins irregular service in April between Fairbanks and Seattle. In 53 days, Reeve and 2 other pilots complete 26 roundtrips and earn \$96,000, sufficient to pay for their Douglas transport and acquire 3 more. Under pressure from the CAB, the route is given up later in the year.

Reeve now files an application with the CAB seeking route authority for a scheduled service from Anchorage to Attu. Meanwhile, M-K gives Reeve *The Yellow Peril* in lieu of a debt payment. C-47 charter flights are inaugurated over the 1,783-mile route to Attu, as well as to other Territory of Alaska destinations. On March 24, 1947, the pilot-owner incorporates his assets as **Reeve Aleutian Airways**.

REEVE ALEUTIAN AIRWAYS: United States (1947–2001). On March 24, 1947, pilot-owner Robert C. “Bob” Reeve incorporates his assets and changes the name of his firm from **Reeve Airways** to **Reeve Aleutian Airways** in celebration of his market area. Employing 4 war-surplus Douglas C-47s (military DC-3s), the carrier begins flying an island-hopping 1,783-mile route from Anchorage to Attu that is certified by the CAB on April 8, 1948. Meanwhile, back in January, a Grumman G-21 Goose is acquired. During the year, a Beech T-50 and a Lockheed Model 10B Electra are also found, but are traded for a pair of Sikorsky S-43 amphibians (one purchased from **Hawaiian Air Lines**). These aircraft can be used to land at coastal communities and Cold Bay that do not have an airport.

A number of former military bases are given over to company maintenance beginning in 1949. The aircraft FBO/maintenance firm Pacific Airmotive is purchased in 1950, together with that company’s facilities at Merrill Field, Anchorage. Reeve acquires additional Douglas transports and a Post Office airmail contract. Surplus bomb releases from junked military bombers are installed aboard company DC-3s and employed to release mail bundles in the Pribilof Islands. On July 12, two Sikorsky S-43s are purchased from bankrupt **Los Angeles Air Service**.

During 1951, Reeve suffers two heart attacks, forcing him to take the next year off for recuperation. The old terminal once shared by **Pacific Northern Airlines** and **Alaska Airlines** at Merrill Field is, meanwhile, taken over for the same purpose in 1952. In 1956, Reeve becomes the last airline to leave Merrill Field for the new Anchorage International Airport.

In early 1957, the twenty-fifth anniversary year, the company acquires a DC-4 from defunct **20th Century Airlines**; painted red, white, and blue, it is placed in service from Anchorage to Attu on March 12 via Kodiak, Cold Bay, Adak, Amchitka, and Shemya. The carrier now leaves government subsidy and two surplus Curtiss C-46 Commandos are acquired from **Cordova Airlines**, which provide transport to workers building the DEW Line.

The last Sikorsky S-43 is traded in for a Grumman G-21 Goose on March 3, 1958; it will pass to **Avalon Air Transport**. A C-46F crashlands at Driftwood Bay on May 31; the plane is a total wreck, but both crewmen are safe.

Another DC-4 is acquired in July, but it crashes on Great Sirkin Island in September. A replacement C-46, purchased from Boreas Corporation, also arrives in July.

A third DC-4 arrives in 1959, along with another C-46. Unhappily, the newest Douglas transport, with 5 crew and 11 passengers, crashes on an Aleutian peak at Great Sitkin Island on September 25 while en route from Anchorage to Adak; there are no survivors.

In 1960, the old Boeing 80A *The Yellow Peril*, in storage for 14 years, is withdrawn; it will be reclaimed, restored, and transferred to the Museum of Flight in Seattle.

A DC-6, once the queen of the **Olympic Airways, S.A.** fleet and the personal property of Aristotle Onassis, is purchased from **Alaska Airlines** in January 1962. It is placed into service on February 10. A DC-4 is sold to **Alaska Airlines** in December. Two more follow, one each in 1963 and 1964. Following the great earthquake in March of the latter year, the company’s downtown Anchorage ticket office burns down in November. Still, enplanements for the year are 20,765 and revenues total \$4.3 million.

Airline employment in 1965 stands at 145 and the fleet includes 12 aircraft: 3 C-46s, 1 DC-3A, 2 DC-6Bs, 1 DC-6A, 3 C-54s, and 2 Grumman G-21A Geese. In May, a DC-3 with five aboard is lost in a ground loop takeoff crash at Nikolski.

The C-54s are also sold as passenger boardings jump to 22,889.

A C-46 is purchased in January 1966 and it enters service in June. Meanwhile, another Commando is damaged in a February accident at Homer. Piloted by Hank Orth, a DC-6 flies Annabelle, an elephant and the first acquisition of the Alaska Zoo, from Nome to her Anchorage home.

Enplanements for the year are 23,000.

A new Anchorage office building is occupied in 1967. As the year ends, the workforce totals 162 and the fleet includes 12 aircraft: 3 DC-3s, 4 C-46s, 3 DC-6s, and 2 Grumman G-21As. Orders are outstanding for a Lockheed L-188 Electra and a pair of Beech 99s.

Peninsula Airways (1) contracts with Reeve to provide contract flights linking King Salmon with Egegik, Ugashik, Pilot Point, South Naknek, and Levelock. Piper and Cessna lightplanes are employed. Over the next decade, Convair CV-580s and de Havilland Canada DHC-6 Twin Otters are occasionally leased from the partner.

Customer bookings ascend to 27,320 and a total of 3.43 million freight ton-miles are flown.

Following a credit check, Bob Reeve is able to purchase, via California Airmotive, a Lockheed L-188C Electra from **Air New Zealand, Ltd.** in January 1968. The big turboprop enters service on May 2 and is initially employed to fulfill a government contract for the transport of nuclear test personnel from Anchorage to Amchitka Island. Later, it will also operate along the route from Anchorage to Adak via Cold Bay.

At decade’s end, the fleet comprises the L-188, 3 DC-6s, 2 DC-3s, 3 C-47s, and 2 G-21s. The workforce is now down to 131.

Enplanements for 1969 total 33,000 and 2.67 million freight ton-miles are flown. Operating income is \$5.67 million.

Beginning in the spring of 1970, **Peninsula Airways (1)** launches regular service between King Salmon and the Pribilof Island communities of St. Paul and St. George. Charters are undertaken with Grumman Super Widgeons wet-leased from Reeve to Dutch Harbor, Atka, and Adak.

In September, a second Electra, an L-188PF, is purchased by Reeve from **Western Airlines**.

Customer bookings for the year are 34,000 and a total of 2.17 million freight-ton miles are flown. The workforce is 153.

Coming in on a service from Anchorage to Nondalton on February 10, 1971, Flight 012, a C-46D with two crew, noses up upon touchdown, at which point the entire nose section breaks off; although the Curtiss must be written off, there are no fatalities.

This year’s enplanements are 36,034.

Another ex-Western L-188PF arrives in June 1972. A Grumman G-21 Goose is acquired from **Alaska Coastal Airlines**. It replaces a Goose written off at False Pass earlier in the month. Reeve Aleutian now begins to phase its DC-6s out of passenger service. The company’s first brand new airliners are purchased in June: two Nihon YS-11As with spares for \$4.2 million. The first enters service on November 28.

At the end of this significant growth year, airline employment is 154. Passenger boardings accelerate 16.2% to 43,000 and cargo is up by 12.4%.

Twelve new employees are hired in 1973. The second YS-11A enters service shortly after its receipt in January. Customer bookings jump 14% to 49,000, but freight traffic is off by 12.8%.

Airline employment in 1974 is 230. The C-46 purchased in 1966 is sold to **Fairbanks Air Service** in early spring. Another one is lost with an L-188PF in a November 6 fire that destroys Reeve’s Anchorage hangar.

Enplanements accelerate 4.1% to 51,000 and the number of FTKs flown jumps 10.2% to 3.21 million.

The workforce shrinks to 189 in 1975. The burned-out Curtiss is replaced in the spring with a unit purchased from the Japanese carrier **Toa Domestic Airlines Company, Ltd.** Later in the year, a DC-3 is sold to **Northern Air Cargo**.

Passenger boardings decline 7.8% to 47,000 while cargo is down by 21.9%.

The number of employees is increased by 14.8% in 1976 to 217. A new \$2-million administration facility and maintenance hangar is occupied at Anchorage in May, replacing the one destroyed by fire in November 1974.

Customer bookings jump 14.9% to 54,000 while cargo declines by 10.2% to 2.25 million FTKs.

Two Grumman Goose amphibians are sold to **Peninsula Airways** on February 1, 1977. These are employed to expand the subcontract to all of Reeve's bush points throughout the Alaskan Peninsula and Aleutian Islands. To assist in the performance of this task, Peninsula sets up an operating base at Cold Bay, complete with offices, hangars, and employee housing. These contract and charter services will be maintained through 1979.

A former **Eastern Air Lines** L-188A Electra, obtained by lease-purchase, is placed into service on July 27. Four months later, at the end of October, the new L-188A is sold to American Jet Industries as partial trade for another.

The L-188PF, once flown by **Air New Zealand, Ltd.**, arrives from AJI in March 1978. Following passage of the Airline Deregulation Act in October, President Richard D. Reeve approaches the CAB for authority to fly down to Seattle and Tacoma, a market abandoned under pressure from that agency 32 years earlier. The three DC-6s and another DC-3 are sold to **Northern Air Cargo** owner Bobby Sholton.

Enplanements for the year total 55,209, revenues are \$12.1 million, and the net profit is \$534,400.

The workforce in 1979 stands at 204. Approval is duly received for a Seattle run and an Electra legally departs Cold Bay for Washington State on April 2.

The first 9 months of this new route help boost the carrier's overall passenger traffic 28.3% to 77,000. Many are pleased to see financial growth as well. Revenues are up 28% to \$16.9 million and, in a far cry from 1940, a net profit of \$835,000, up 36%, is banked.

The employee population climbs by 3% in 1980 to 210. A fourth YS-11A is purchased from Gabon and arrives at Anchorage in May after making the company's longest flight, 6,012 nautical miles. Under terms of the CAB's new airline classification scheme, the company is rated as a "large regional." All of this good news cannot, however, erase the sadness when the first and only chief pilot, W. R. "Bill" Borland, dies of a heart attack on February 11 and founder/chairman Bob Reeve passes away in his sleep on August 25 at the age of 78.

Reeve Aleutian flies 82,000 passengers (up 6.5%) on the year and posts a net profit of \$1.58 million on total revenues of \$21.7 million.

The roundtrip Cold Bay-Seattle frequencies reach three per week early in 1981. During the year, Beth Day publishes a biography of the founder, *Glacier Pilot: The Story of Bob Reeve and the Flyers Who Pioneered Alaska's Skies in Single-Engine Planes* (Sausalito, Calif.: Comstock Editions).

Although passenger traffic dips 7.3% to 77,240, the Anchorage-based pioneer still records revenues of \$23.6 million, an operating gain of \$2.1 million, and a net profit of \$1.3 million.

A YS-11A is involved in an accident at King Salmon, Alaska, on February 16, 1982, and for lack of traffic, nonstop Cold Bay to Seattle and Tacoma flights are suspended in the spring. Nevertheless, the company happily celebrates and promotes its Golden Anniversary.

Passenger boardings and freight traffic both fall. The former declines 14.5% to 66,041 while the latter dips 2.9% to 4.4 million pounds. On revenues of \$23.4 million, profits are earned: \$406,000 (operating) and \$607,000 (net). Both figures are down from the previous year.

Nonstop Cold Bay to Seattle and Tacoma flights are resumed with Electras on May 16, 1983.

Headed for Seattle from Cold Bay with 15 passengers aboard on June 8, an Electra suffers a propeller failure on its No. 2 engine. It also has a jammed throttle and landing gear, but makes a safe emergency landing at Anchorage after circling the airport to burn off fuel; no injuries are reported, but the aircraft is badly damaged.

While the Electra is repaired, an L-188C is purchased from **Zantop International Airlines** in September. During the fall, the company com-

pletes two years of airlift from Anchorage to St. Paul Island in support of oil exploration in the Bering Sea's Navarin Basin.

Traffic also declines this year, down 17% to 53,250, but with the acquisition from **Wien Air Alaska** in December of two Boeing 727-22QCs (christened *RCR* and *Tilly* after Mr. and Mrs. Bob Reeve), the company enters the jet era.

Employment grows by 1.7% in 1984 to 305. The Zantop acquisition is withdrawn as soon as the Electra damaged in June is returned to duty; the retired plane will be used for spare parts during the remainder of the decade. The *RCR* enters service on April 2 and helps to reverse three years of downward traffic drift.

The number of enplanements rises 7.1% during these 12 months to 55,600. Cargo, meanwhile, accelerates back up to 3.3 million pounds. Expenses outrun revenues and as a result there are losses: \$1.5 million (operating) and \$213,000 (net).

B-727-22QCs replace Electras on the nonstop Cold Bay to Tacoma and Seattle service on May 12, 1985. Converted to freighter status, the *Tilly* flies contract mail service in December during the U.S. Post Office's backlogged Christmas season.

Passenger boardings climb 8.9% to 61,000 and freight races upward by 16.2% to 8.4 million pounds. Revenues total \$25 million, an 18.8% boost, while low costs allow an operating profit of \$712,000 and net gain of \$455,000.

The fleet in 1986 includes the *RCR* and *Tilly*, 3 YS-11As, and 2 L-188A Electras. In February, one of the latter is flown nonstop from Cold Bay to Honolulu, where it undertakes a three-month interisland freight contract on behalf of **Aloha Airlines**. Following its return from Hawaii, the Electra is leased to **Northwest Territorial Airways, Ltd.** in September. For lack of traffic, the nonstop Cold Bay to Tacoma and Seattle flights are ended.

Customer bookings decline 16% to 51,000 and revenues fall an equal 16% to \$21 million.

The 300-employee small regional suffers another bad traffic year in 1987.

Passenger boardings fall 11.3% to 47,000, while freight declines 17.4% to 6.06 million pounds. Revenues reach \$21 million and costs are held low, allowing profits of \$590,000 (operating) and \$976,000 (net).

The workforce is cut by 14% to 228 in 1988. At the end of January, a Lockheed Electra is leased to **Aloha Airlines** for interisland air freight operations.

Customer bookings decline again, dropping 6.4% to 44,000. Cargo, on the other hand, balloons 72.2% to 3.23 FTKs. Revenues are off a slight 0.4% to \$21.8 million, but expenses are up by 4.4%. As a result, there is a \$441,000 operating loss. The net profit falls to \$760,000.

Airline employment grows by 31.6% in 1989 to 300 and the fleet now includes the *RCR* and *Tilly*, 3 Electras, and 3 YS-11As.

In April, Reeve is one of five Alaskan air carriers subpoenaed by the DOJ to provide information in an investigation of possible antitrust violations in the airline industry. Together with **Peninsula Airways (1)**, **Frontier Flying Service**, **Ryan Air Service**, and **Alaska Airlines**, Reeve is required to supply documents dating back to January 1, 1984 to a May 9 grand jury session or forward them directly to Washington. Although the airline subpoenas do not name a target, the May 6 issue of the *Anchorage Daily News* reports the subject is **MarkAir**.

Passenger boardings bottom out and, in fact, increase by 40% to 61,610. Freight continues to move along, climbing to 4.5 million FTKs. Revenues increase by 30% to \$28.43 million, expenses jump 12.8% to \$25.17 million, and operating income is \$3.26 million. Net gain swells to \$3.25 million.

There are no changes in 1990 in either employment or fleet. In July, the company becomes the 15th member of the **Alaska Airlines** Mileage Plan frequent flyer program.

After Iraq invades Kuwait at the beginning of August, the USAF notifies Reeve on August 7 that under the Civil Reserve Air Fleet (CRAF) program, two of its L-188Fs may be asked to aid in Operation Desert

Shield, the U.S. troop buildup in Saudi Arabia. Reeve and **Northern Air Cargo** are the only two Alaskan airlines involved in the program.

Customer bookings fall by 7%, to 56,715 and cargo plunges 50.4% to 5.03 million FTKs. Revenues, however, advance by 4.1% to \$29.6 million and costs allow an operating profit of \$1 million and net gain of \$2.76 million.

Company employment grows by 6.7% in 1991 to 320. On May 21, President Reeve joins state officials at an Anchorage travel fair for Japanese tour agents and press to announce the inauguration of thrice-weekly scheduled Anchorage to Chitose service for the following year. A test charter, arranged by Pacific Tours and Reeve, will be operated in late July.

The first-of-a-kind charter flight between Chitose and Anchorage, set for July 22, must be cancelled on July 21 because Reeve has been unable to arrange for a refueling stop at the sensitive USAF base in Shemya. Passengers for North America are rebooked roundtrip on a **Japan Air Lines Company, Ltd. (2)** service to Anchorage and on a **Continental Airlines** service to Seattle.

Passengers booked from Seattle to Anchorage are flown north by a Reeve B-727-22C. JAL and Continental return the tourists to Japan upon the completion of their visits. The embarrassing incident leads President Reeve to cancel any second trial flights.

Recession now comes to the Alaskan regional. After October, Reeve is able to remain out of the fare war that breaks out between **Alaska Airlines** and **MarkAir**. It does, however, affiliate itself with Alaska's computer network.

Passenger boardings fall 6.6% to 53,252 and the decline in freight is not reported. Revenues drop 10.1% to \$26.61 million while expenses climb 7.5% to \$30.74 million. The operating loss is \$4.12 million and the net loss is \$1.45 million.

The payroll is cut 25% in 1992 to 240. In January, the carrier, together with **Peninsula Airways** and **ERA Aviation**, begin to coordinate their schedules and to exchange passengers with **Alaska Airlines** jetliners serving Anchorage. Reeve now ferries **Alaska Airlines** passengers to Dutch Harbor and other Aleutian chain towns.

Customer bookings rebound, climbing 13% to 61,000. Cargo, on the other hand, plunges 47.6% to 3.25 million FTKs and revenues slide to \$24.8 million. The operating loss increases by \$5.6 million while the net loss deepens by \$2.7 million.

In 1993, Chairman Janice Reeve and President Richard Reeve oversee a workforce of 303 and operate the same fleet as in 1989. Plans are announced for the sale of the YS-11A-600 fleet.

Destinations served include Cold Bay, Port Heiden, San Point, Adak, Attu, Pribilof Islands, Shemya, and Unalaska/Dutch Harbor.

On August 30, the \$7.6-million contract to fly servicemen and cargo from Elmendorf AFB at Anchorage to installations at Adak, Shemya, Galena, and King Salmon is won by **Alaska Airlines**. Loss of the arrangement will have a significant impact on Reeve's annual traffic figures.

Frequencies to Sand Point are increased to six per day on October 30.

Another tough year is suffered as this time passenger enplanements join freight in decline. Boardings fall 9% to 55,515 passengers flown while cargo drops 3.3% to 3.14 million FTKs. Revenues are off by 1.7% to \$24.42 million, but expenses hit \$27.73 million. The operating loss is cut to \$1.96 million and the net loss improves to \$2.2 million.

Airline employment is increased by 5.6% in 1994 to 320 and the fleet now includes the 2 B-727-22Cs, 3 YS-11A-600s, and 1 each L-188AF, L-188C, and L-188CF. Five-times-a-week service to St. Paul is inaugurated on January 1.

In late May, an effort to pioneer a new international air route connecting cities near the Arctic Circle is launched. A B-727-22C carrying an FAA inspector, a Russian navigator, and a multinational group of politicians and entrepreneurs headed by Alaskan Governor Walter J. Hickel, undertakes a 27 1/2-hr. circumpolar expedition. Flying east, the Boeing visits a total of 15 airports above the 58th parallel in Russia, Finland, Sweden, Norway, Iceland, Greenland, and Canada.

The U.S. military withdrawal from Adak during the year brings concerns for the future.

Customer bookings for the year as a whole decline another 16.4% to 46,000, while cargo slips 0.8% to 3.11 million FTKs. Revenues drop 13.4% to \$21.15 million and although the percentage of rise is down 11.4%, expenses are \$24.56 million. The operating loss moves to \$3.41 million, while the net loss is down to \$521,000.

The workforce grows 31.3% in 1995 to 240. Concerns over the continuing withdrawal of the U.S. military from Alaska are forgotten in April when **MarkAir** leaves the state for Denver.

Reeve, on May 30, adds scheduled twice-daily (except Sunday) B-727-22C return services of its own to Bethel and King Salmon, replacing those previously offered by **MarkAir**. Electras are also employed on the route.

On June 7, an L-188 with 5 crew and 17 passengers develops flap problems while on approach to its landing at Anchorage. Although assistance is requested, a safe emergency landing is completed and no injuries are reported.

By September, the carrier's passenger volume has soared by 43%.

When Electras stop flying in Indonesia toward year's end, Reeve becomes the last major commercial operator of the L-188.

Enplanements increase 47.8% to 68,000; however, freight declines 18.1% to 2.55 million FTKs. Once more there are losses: \$2.86 million (operating) and \$1.51 million (net).

There is no change in the workforce during 1996 and the fleet now includes 3 Electras and 2 B-727-22Cs.

Some 25 minutes out on an April 24 flight from Anchorage, an Electra with 5 crew and 17 passengers loses its main hydraulic system. The aircraft returns to Anchorage and makes a safe emergency landing; no injuries are reported.

As the result of downsizing at Adak Naval Air Station, B-727 service to Adak is reduced to weekly on June 1; on July 1, it is halted altogether.

A new code-sharing agreement between Reeve and **Alaska Airlines** begins on September 22. The marketing agreement is designed to coordinate flights and schedules to and from Cold Bay, Dutch Harbor, Port Heiden, St. Paul, and Sand Point.

Passenger boardings this year soar another 25% to 85,000 but cargo drops again, by 8.6%, to 2.33 million FTKs.

Although operating income is up 6.7% to \$27.25 million, costs rise 6.8% to \$30.34 million. The operating loss deepens to \$3.08 million and a \$1.93-million net loss is suffered.

The employee population is increased by 31.3% in 1997 to 315.

A company B-727-22C transports Alaskan governor Tony Knowles and a trade mission to Sakhalin in April to assist Alaska companies prepare for the development of Sakhalin's oil and gas resources.

In cooperation with Circumpolar Expeditions, weekly return charter flights are initiated on May 10 from Anchorage to Petropavlovsk-Kamchatsky and Yuzhno-Sakhalinsk. The flights represent the first scheduled charter air service for passengers and cargo between Alaska and Yuzhno-Sakhalinsk.

Alaskan state legislators undertake a joint business and government trade mission to Siberia aboard a Reeve charter on September 27. The weekly flights into the Russian Far East are suspended on December 1.

Customer bookings this year decline by 11.8% to 75,000, but freight skyrocketed 80.9% to 4.21 million FTKs.

Operating revenues increase 8.7% to \$29.63 million, but expenses grow 5.9% to \$32.14 million. The operating loss declines to \$2.51 million, while the net loss increases to \$2.71 million, later adjusted to \$1.66 million.

Destinations visited from Anchorage in 1998 include Adak, Bethel, Cold Bay, Dillingham, Dutch Harbor, King Salmon, Port Heiden, Sand Point, and St. Paul Island. Charters to Seattle and Siberia continue to be flown, as are flights for hunters and fishermen. Weekly charters to the Russian Far East resume in early May.

In September, the carrier announces that because of high maintenance costs, it will withdraw its three Lockheed Electras by the end of the upcoming first quarter.

It is announced on December 11 that the company will launch scheduled twice-weekly roundtrips from Anchorage to Petropavlovsk-Kamchatsky and Yuzhno-Sakhalinsk. When introduced, the new service will replace the current charter flights.

During the 12 months, passenger boardings increase by 6.7% to 80,000, while cargo traffic increases 67.1% to 3.95 million FTKs. Revenues climb 5.5% to \$31.27 million, but costs total \$32.99 million. The operating loss improves to \$1.71 million, while the net loss does the same, dropping to \$1.31 million.

Although a grand retirement ceremony has been planned for the last L-188 operation on March 31, 1999, the decision is taken not to withdraw the turboprops after all. The new scheduled service to the Russian Far East begins in the spring.

President Dick Reeve warns the FAA on December 7 of possible retaliatory actions from Russia on January 1 when new U.S. noise abatement rules will force **Aeroflot Russian International Airlines (ARIA)** to stop flying its smoky Ilyushin Il-62Ms beyond Alaska to Seattle. An obvious response would be to curtail Reeve and **Alaskan Airlines** services into the Russian Far East.

Customer bookings dip 3.8% during the year to 77,000, while cargo is down 4.8% to 7,337,000 FTKs. Revenues are off by 26% to \$23,135,000, while expenses fall 27.1% to \$24,048,000. The company's losses improve to \$913,000 (operating) and \$325,000 (net).

Airline employment at the beginning of 2000 stands at 350, an 11.1% increase over the previous 12 months. The company declares Chapter XI bankruptcy on December 6 and halts all scheduled operations. Both **Alaska Airlines** and **Peninsula Airways** agree to accept tickets from Reeve passengers booked through December 8.

Charter and contract service flights are continued as the pioneer reorganizes. At this point, having sold an L-188C to a Canadian source, it retains one Electra and two B-727-22Cs. Both are reported parked at Anchorage at the end of the year, one missing many pieces. For the year as a whole, passenger boardings fall another 13% to 67,000.

Unable to continue, the Aleutian pioneer will close its doors on March 31, 2001.

REEVES AIR: United States (1980–1988). The charter and contract service operator Reeves Aviation is established by the brothers Douglas and William "Bill" Reeves at Honolulu in 1980. Nonscheduled Cessna 402 flight-seeing tours are offered. Two years later, in 1982, a scheduled division, Reeves Air, is set up and employing a fleet of 4 Cessna 402Cs, begins passenger and cargo flights linking the company base with Kahului and Kaunakakai. Frequencies to Lanai are introduced in 1983.

Operations cease in May 1987 when the FAA grounds the carrier, claiming FAR maintenance violations involving its three Cessnas. The company does not resume operations in 1988 and the FAA lifts its operating certificate.

REGAL AIR: 4506 Lakeshore Dr., Anchorage, Alaska 99502, United States; Phone 907 243-8535; Fax 907 345-8036; Year Founded 1978. Regal is established at a Lake Hood base in 1978 to offer charter and flight-seeing services. In 2000, President Craig Elg operates a fleet that includes 2 de Havilland Canada DHC-2 Beavers and 1 each Cessna 185F Skywagon and C-206 Stationaire.

REGENT AIR: 10356 Airport Road, Hangar 1, Truckee, California 96161, United States; Phone (530) 582-1102; Fax (530) 582-0103; <http://www.guides.com/acg/regent>; Year Founded 1984. Jerry Canavan establishes this FBO at Truckee-Tahoe Airport in northern California in 1984. Over the next 12 years, he also undertakes executive and small group passenger charters to various points in the Pacific Northwest, as well as to Las Vegas and Reno.

Three pilots are employed in 1998–2000 and the company operates 2 Beech King Air 90s and 1 Beech A36TC Turbo Bonanza.

REGENT AIR CORPORATION: United States (1983–1986). Regent is formed at Los Angeles in 1982 by Clifford and Stuart Perlman, owners of Caesars World casino, as **FirstAir Corporation**; the new Regent Air name is adopted early in 1983 to avoid confusion with the Canadian scheduled operations of **Bradley Air Services, Ltd.** The corporate mission, however, remains the same: to provide luxury scheduled service to New York. It is built upon the assets and certificate of **Ocean Airways** and an operating contract with IASCO.

Employing three Boeing 727-100s, the airline charges a minimum of \$810 one way and provides daily service in either direction, with extra flights on peak days. With Chairman Clifford Perlman aboard, revenue flights are inaugurated on October 14 from Los Angeles to Newark (serving New York via **PEOPLExpress**).

A carton of several hundred small jars of jam and marmalade falls from a transcontinental B-727-100 on April 23, 1984 and shatters the windshield of an automobile on the New Jersey Turnpike; the driver suffers minor cuts. FAA inspectors later determine that the company's catering service had left the carton on the doors of the aircraft's landing gear.

In midyear, Clifford and Stuart Perlman acquire the company outright. The DOT now launches an investigation of their backgrounds. Meanwhile, Regent is forced to charter its operation to International Air Service Company and loses \$21.5 million on revenues of \$12 million.

The IASCO charter ends on March 3, 1985 and the company suspends services until the DOT grants it a temporary three-month exemption on March 15 to continue flights while its inquiry continues. The carrier devises a plan to put distance between itself and its founders, the Perlmans.

The financially troubled luxury airline appoints J. Roger Faherty chairman/CEO and, on June 10, consequently receives DOT approval to operate as a scheduled carrier. Approved coast-to-coast luxury service resumes in late June and plans are made to initiate the same type of operations from eastern U.S. cities to Europe. Late in the year, the carrier is sold to Regent Tours International.

Orders are placed, via Citicorp, for a B-747-200 with which to inaugurate two-class flights from Los Angeles to Honolulu. Unfortunately, the financial base for this expansion is not present and the luxury-service experiment is ended on March 2, 1986.

REGENT AVIATION: St. Paul Downtown Airport, St. Paul, Minnesota 55107, United States; Phone (612) 227-7801; Fax (612) 224-1982; Year Founded 1985. Regent is founded as an FBO at St. Paul's Holman Field in 1985. It also undertakes nonscheduled flight operations and is the closest charter operator to the downtown area of Minneapolis/St. Paul. A wide variety of executive and small group passenger charters are flown throughout the U.S. and Canada.

In 1998–2000, Operations Director Tod Veitenheimer employs 8 pilots, who fly 2 each Cessna 550 Citation IIs and Beech Super King Air 200s, 1 King Air 100, and 1 Cessna 340.

REGIE AERIENNE INTERINSULAIRE, S.A. (RAI): French Polynesia (1953–1958). The French colonial government of Oceania purchases struggling **Air Tahiti, S.A. (1)** in 1950 in order to maintain the private company's airmail route from Papette to Aitutaki in the Cook Islands. In addition to the former carrier's Grumman G-73 Mallard, RAI acquires a Consolidated PB5-5A Catalina.

This small carrier is merged in 1951 with **Societe Francaise de Transports Aeriens du Pacific Sud, S.A.**

Operations continue apace between the takeover and 1957 and the route network grows to 160 miles and includes scheduled stops at Bora Bora, Huahine, and Raiatea (Utuora). Charter services are also flown from the Society Islands to Tuamatus, the Gambier Islands, and the Australis. During these years, the company briefly operates a Shorts Sandringham flying boat on the route from Bora Bora to Tahiti, while the Mallard is sold to a company in the U.S.

Early in 1958, the company is reformed as **Reseau Aerien Interinsulaire, S.A.**, a subsidiary of **Compagnie de Transports Aeriens Intercontinentaux, S.A. (TAI)** and the shipping concern **Messageries Maritimes**.

REGIE AIR AFRIQUE, S.A.: France (1925–1937). When the **Societe Air Afrique, S.A. (SAF)** is formed in 1925, its major ambition is establishment of air service from metropolitan France through to Madagascar. To this end, Commandant Dagnaux, who had participated as a lieutenant in the French Air Service Sahara flight of 1920, is given the mission of proving a route to and from the island possession.

Flying a Breguet XIX, Dagnaux and his mechanic depart Paris (LBG) on November 28, 1926 and after several adventures reach Luebo on December 21; after an 18-day weather delay, the pair proceed without incident, arriving at Tananarive on February 10, 1927. The 24-stage, 7,753-mile flight—smooth on the way out—ends in disaster. At Chicoua on July 20, the Breguet is destroyed in a crash and the mechanic is killed.

The proving flight, nevertheless, convinces officials in France and Belgium that a cooperative venture can bring them both commercial aerial penetration into Africa, Brussels, and Paris–Lake Chad. SAF now takes up the challenge of providing that access in a commercially viable undertaking.

Prior to the initiation of regular service, other proving flight are undertaken. An Air Afrique Farman 190 departs Paris on January 29, 1929 and makes it to and from Lake Chad without incident. The next three Farman 190 trial missions are designed to push the mail route through to Madagascar. The first departs Paris (LBG) on October 17 but terrible navigation problems leave the enterprise unfinished when the plane crashes near Reggane on April 22, 1930. The second undertaking begins on October 28; the F-190 reaches Madagascar in eight days and returns in eight and the program is a complete success.

The third Farman leaves on December 13 and is lost in a storm 200 miles from Brazzaville on March 14, 1930, almost two weeks before the loss of the first survey plane.

During the next three years, numerous French pilots make proving flights to Madagascar and in early 1934 two pilots of **Compagnie Transafricaine d'Aviation, S.A.**, as SAF is now known, are ordered to plot a safe Sahara route from Algiers to Brazzaville. The mission, begun on March 18, is accomplished without difficulty. On May 11, the government founds **Regie Air Afrique** and equips it with new Bloch 120s. On September 7 these initiate regularly scheduled mail flights to the French Congo from Algiers via Niamey, on the Niger, and Chad's Fort Lamy. The first Bloch 120, christened *Scorpion*, now enters service.

Passenger service is inaugurated on the Algiers to Brazzaville service on April 27, 1935. In May, two new Potez 56s are placed into service on **Regie Air Afrique** services from Oran to Algiers, from Algiers to Tunis via Bone, and from Constantine to Bone.

In November, in cooperation with **Sabena Belgian World Airlines, S.A.**, the enterprise is extended every two weeks to the city of Elisabethville in the Belgian Congo. Here a connection is made with **Service de la Navigation Aerienne de Madagascar, S.A.** that takes the mail on to Tananarive with two new Bloch 120s, the *Ville de Paris* and *Ville de Tananarive*, recently supplied by the French government.

Five Caudron C-440 *Goelands* (Seagulls) acquired late the previous year are placed into service early in 1936 over domestic Algerian routes and on feeder frequencies between Gao and Bamako. Four of the aircraft are named: *Tourbillon*, *Sirocco*, *Cyclone*, and *Harmattan*.

On May 27, direct mail service from metropolitan France to Madagascar is inaugurated by **Regie Air Afrique, S.A.** and **Regie Malagache, S.A.** in cooperation with **Air France**; passengers are accommodated after November 1.

On September 1, 1937, the company is combined with the services **Regie Malagache, S.A.** and **Lignes Aeriennes Nord Africaines, S.A.** to form **Air Afrique, S.A. (1)**.

REGIE MALAGACHE, S.A.: France/Madagascar (1936–1937). In response to a petition from colonial governor Gen. Cayla to the French Air Ministry in Paris, this small carrier is formed in the spring of 1934 as **Service de la Navigation Aerienne de Madagascar, S.A.** to offer service from Madagascar to France.

Two SPCAs are sent out to Madagascar from France, along with pilots Rene Lefebvre and Jean Assoland. The initial mission will be to fly airmail from Tananarive, Madagascar, to the **Imperial Airways, Ltd.** stop at Broken Hill, Rhodesia. Flying via Mozambique, the company begins weekly roundtrip service on July 29.

Two Bloch 120s replace the SPCAs at the beginning of 1935. They are employed to stretch the company's route from Broken Hill to Elisabethville, where a connection is made with **Sabena Belgian World Airlines, S.A.**

On Madagascar, roundtrip domestic passenger and cargo service is launched by the SPCAs over routes from Tananarive to Maroantsetra via Majunga and Diego Suarez, and from Tananarive to Ihosy via Morondava, Tulear, and Fort Dauphin.

The company name is changed to **Regie Malagache, S.A.** late in the year.

Enplanements during the 12 months total just 35; however, 1,692 pounds of cargo and 14,920 pounds of mail are also transported.

On May 27, 1936, regularly scheduled Elisabethville airmail flights, in cooperation with **Sabena Belgian World Airlines, S.A.**, begin across the Belgian Congo to Algiers and Marseilles.

Traffic statistics are reported through the year's first half and show passenger bookings of 182; additionally, 9,320 pounds of cargo and 7,700 pounds of mail are flown.

In cooperation with **Air France** and **Regie Air Afrique, S.A.**, weekly passenger service is inaugurated on November 1 from Tananarive to Marseilles. The flights require 6 1/2 days each way.

On September 1, 1937, the international route from Tananarive is handed over to the new **Air Afrique, S.A. (1)** and the carrier is again reformed, becoming the island feeder airline **Service de l'Aeronautique Civile, S.A. (SAC)**.

REGINA CARGO AIRLINES: United States (1949–1960). RGA is established at Miami Springs, Florida, in the spring of 1949 to operate all-cargo contract flights throughout the U.S. A Curtiss C-46 Commando is leased from the USAF and together with several Douglas C-47s, allows the company to launch revenue flights in June. Services are maintained without incident until July 27, 1950, when the Commando, with two crew, suffers engine failure and crashes while attempting to land at Teterboro, New Jersey (one dead). An investigation will find that the plane was 5,000 pounds overweight at takeoff.

A chartered DC-3 with 2 crew and 19 passengers is lost at Vail, Washington, on September 1, 1953, while making a CFR flight in IMC conditions; there are no survivors.

Regina continues flying only the Douglas transports until February 1955, when it acquires another Commando. It is joined by another Curtiss in April 1956. Flights continue without additional change until January 1960, when Regina becomes **Imperial Airlines (1)**.

REGION, S.A. See FLANDRE AIR, S.A.; PROTEUS AIR SYSTEM, S.A.; REGIONAL AIRLINES, S.A.

REGION AIR (PTY.), LTD. (1): Singapore (1988–1991). The first Region Air is established at Singapore on April 5, 1988 to offer regional flights to Asian and Australian destinations. Gerard de Vaz is named managing director. The following year is spent firming up organization and arrangements and in leasing an Airbus Industrie A300-322.

Revenue flights commence in 1990. Although traffic figures are not provided, the 11-employee company indicates that revenues of \$414,417 are earned. With expenses of \$262,849, the operating profit is \$151,568. The recession causes operations to cease in 1991.

REGION AIR (PTY.), LTD. (2): 06-01 Hpl House, 50 Cuscaden Road, 1024, Singapore; Phone 65 235 6277; Fax 65 736 1662; Code 7S; Year Founded 1994. A second Region Air is established at Singapore in the summer and fall of 1994. Equipped with a single de Havilland Canada DHC-8-300, Managing Director Gerard de Vaz, who had overseen the predecessor company, is placed in charge. The 45-employee company inaugurates scheduled services to destinations in Thailand and Vietnam in December.

In 1995, Region Air begins to provide ad hoc charters for larger carriers. Five Airbus Industrie A320-231s are acquired and are wet-leased to **Vietnam Airlines, Oman Air, and China Air Lines, Ltd.** The Vietnam contract ends and one Airbus is withdrawn in 1996–2000. The Oman and CAL business is retained and new agreements are signed with a number of regional and Mideast carriers.

REGIONAIR, LTD. (1): United Kingdom (1988–1991). Regionair, Ltd. is established at London (Southend) in early 1988 to provide scheduled passenger flights to Rotterdam. Employing a single Embraer EMB-110 Bandeirante, the new entrant launches flights in March and by year's end has flown almost 8,000 passengers.

Operations continue apace in 1989. When Navigations, plc, the parent of Southend-based **National Commuter Airways, Ltd.** enters administrative receivership on October 20, Regionair, Ltd. is one of several carriers that help to maintain its schedule and also make a bid to take it over.

The workforce is increased in 1990 to 140 and the fleet is increased by the addition of 1 each Fokker F27 and Dornier 228-212. Enplanements for the first 5 months, for which statistics are reported, total 3,863. In May, the administrators Touche Ross are brought in to operate the carrier.

NCA is acquired by the David Martin Group for £570,000 in July; however, the arrangement and costs place a very heavy burden on the company's coffers. Unable to maintain its viability in a recessionary economy, Regionair, Ltd. ceases operations in January 1991 after its owners elect to withdraw funding and begin a different carrier that will operate from Teesside.

REGIONAIR, LTD. (2). See **QUEBECAIR, LTD.**

REGIONAL AIR, LTD.: Nairobi Cargo Centre, Jomo Kenyatta International Airport, P.O. Box 30357, Nairobi, Kenya; Phone (254-2) 824741; Fax (254-2) 824735; http://www.regionalair.net; Year Founded 2000. Regional Air is established at Nairobi in January 2000 as a subsidiary of **Air Kenya Aviation, Ltd.** Arrangements are completed for the acquisition of two leased Boeing 737-33As, first operated by **VASP Brazilian Airlines (Viacao Aerea Sao Paulo, S.A.)** in 1989. Offices are opened at Kampala, Djibouti, Harare, Asmara, Johannesburg, and Bujumbura.

The first chartered Boeing emerges from the paint shop at Bournemouth, England, on June 12, wearing an all-white fuselage color scheme with a blue stripe; a red and blue "swirl"-type logo adorns the tail. Revenue operations commence in July, with **Kenya Airways, Ltd.** the main competitor.

REGIONAL AIR LINES, S.A.: BP 12618, Aeroport Mohamed V, Casablanca, Morocco; Phone 212 (2) 538 020; Fax 212 (2) 538 411; Code FN; Year Founded 1996. Morocco's first private commuter operator, RAL is established at Casablanca's Mohamed V Airport in January 1996 as a joint venture of the Moroccan firms of Group Benjelloun and Group Holmarcom. Mehdi Alaoui is appointed president and orders are placed in March and April for four Beech 1900Ds.

During the second quarter of 1997, the company hires 20 Moroccan pilots under the instruction of an American flight manager and two American maintenance technicians. Morocco's nascent airline takes delivery of its first two of four Beech 1900Ds on July 3. Once the aircraft have completed certification requirements and route proving, they inaugurate scheduled services to Marrakech, Agadir, Fes, Rabat, and Tangier.

Traffic and financial figures are not available even as the outstanding airliners arrive and operations continue into 1998–1999.

In January 2000, approval is sought for the inauguration of a new route to Seville, Spain.

A letter of intent is signed with Embraer on October 5 for five ERJ-135s, plus five options. The first of the small regional jets will be delivered early in 2001.

REGIONAL AIR SERVICES, LTD. See **AIR KENYA AVIATION, LTD.**

REGIONAL AIRLINES (PTY.), LTD.: South Africa (1992–1993). Under the leadership of Lee R. Thompson, RA is established at Livingstone in 1992 to offer scheduled and charter domestic passenger and cargo services. Revenue flights commence employing a Douglas DC-3 and two Convair CV-580s. Destinations visited include Bulawayo, Kariba, Phalaborwa, Pietersburg, and Umtata.

Unable to achieve economic viability, the company shuts its doors in 1993.

REGIONAL AIRLINES, S.A.: France (1992–2001). On January 1, 1992, the French regionals **Air Exel France, S.A., Air Vendee, S.A., and Airlec, S.A.** are merged at Nantes to create this larger carrier. **Air Vendee, S.A.** holds 79% control with Airlec 21%. Jean-Paul Dubreuil, president of **Air Vendee, S.A.**, becomes president and general manager of the new entrant. The inaugural fleet comprises 1 British Aerospace BAe Jetstream 31s, 5 Fairchild Metro IIIs, 3 Metro IIs, and 5 SAAB 340Bs. Orders are placed for 5 (later s6) more BAe Jetstream 31s.

The original inherited route network includes markets at Le Havre, Nantes, Rouen, Brussels, Bordeaux, Nantes, Barcelona, London (LGW), Lyon, Nantes, Clermont, Ferrand, Geneva, and Amsterdam. During the year, services are started to Rennes, Caen, Frankfurt, Milan, Malpensa, Toulouse, Dijon, Angoulême, Limoges, and Paris (ORY).

A total of 120,000 passengers are flown and revenues are FFr 111.13 million. Expenses total FFr 117.84 million and the operating loss is FFr 6.7 million.

Airline employment in 1993 is 150. Delivery of the additional Jetstream 31s begins in March and the new turboprops are placed into service on a new route from Nantes to Geneva via Clermont Ferrand. Code-sharing begins with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** during the spring when Regional begins flying to Madrid nonstop from Bordeaux, Lyon, Marseilles, Nantes, Nice, and Rennes. Other flights are to Barcelona from Bordeaux, Lyon, Nantes, Pau, Rennes, and Toulouse, to the Portuguese city of Porto nonstop from Bordeaux, and one stop via Madrid.

A leased Avions de Transport Regional ATR42-320 begins flying over the company's longest route, Lyon–Madrid, and the last of the new BAe Jetstream 31s arrives on June 30.

While assisting in the repatriation of the survivors of a motorbus accident, a Metro III with 3 crew and 16 passengers is forced to abort its takeoff from Troyes Airport for England's Biggin Hill Airport on September 19; although the aircraft is damaged, there are no fatalities.

Passenger boardings accelerate 25% to 145,000 and there is a net profit of \$600,000.

Several new routes are opened in 1994 as the company receives three more SAAB 340Bs and an eighth Jetstream 31, plus two more leased ATRs. As **Air France, TAT European Airlines, S.A., Air Littoral, S.A., and Brit Air, S.A.** shed thinner scheduled routes, these are continuously picked up by RA. The new aircraft, as with those earlier owned, also perform charter flights.

Daily roundtrip Jetstream 31 service is inaugurated on April 1 from Nantes and Le Havre via Bordeaux to Manchester, England.

Also in April, the carrier joins with the Spanish air taxi Gestair, S.A. (51% majority shareholder) to establish a Spanish subsidiary **RLA (Regional Lineas Aereas, S.A.)**. Although \$205,000 capitalization is provided, the new subsidiary is prevented from launching service by the

faster acquisition by **Air Nostrum, S.A.** of a coveted route from Vitoria to Bilbao. The firm will remain a paper enterprise for some time. Instead, a code-sharing agreement is reached with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** for French-Spanish services.

On December 1, a \$70-million order is placed for three SAAB 2000s and three Embraer EMB-145s. By year's end, a total of 110 flights per day are offered to 30 cities in 8 nations. Enplanements reach 235,000, but the net gain drops to \$128,000.

The workforce is increased by 25.5% to 340 in 1995. During the first quarter, twice-daily roundtrips are inaugurated from Toulouse to Madrid. When **Air France** abandons its Bordeaux-to-Geneva route in March, the carrier takes it over; it is operated with French aircraft under a block-space, code-sharing agreement with **Crossair, Ltd.** The under-traveled Manchester-Lille and Nantes-Manchester services are withdrawn.

The first SAAB 2000 is delivered in May and is employed to launch a new dual-designator services with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** from Lyon to Madrid and Barcelona on June 1.

On July 6, one of the company's new SAAB 2000s with 35 passengers flies the 520-nm. route from Lyon to Madrid in a record 1 hr. 15 min. The second SAAB 2000 arrives in August and begins flying from Nice and Marseilles to Barcelona. The three ATRs are withdrawn.

When the Air France-Air Inter Express program is established during the year, RA becomes a code-sharing partner, agreeing in exchange for subsidy to repaint some of its aircraft and to fly medium- and low-density domestic or regional routes for the Air France Groupe.

Passenger boardings jump 43.2% to 335,000.

Airline employment grows another 22.1% in 1996 to 415 and the leased fleet includes 9 J-31s, 8 SAAB 340Bs, 2 SAAB 2000s, and 1 ATR42-320 chartered from **TAT European Airlines, S.A.**

A mini-hub is established at Le Havre. SAABs and J-31s from Nantes and Rouen pass through it en route to Brussels and Amsterdam.

During the spring, the Spanish line **RLA (Regional Lineas Aereas, S.A.)** is given a SAAB 340B and is able to inaugurate a single route from Porto to Toulouse via Madrid. Customer bookings through July are up 19% to 196,000.

On October 7, a memorandum of understanding is signed with **Deutsche BA Luftfahrtgesellschaft, GmbH.** for the sale of its turbo-prop international and domestic operations originating from Bremen, Stuttgart, and Friedrichshafen to the French company. Regional Airlines makes plans to establish a separate German subsidiary, **Deutsche Regional Airlines, S.A.**, which is to be activated when the arrangement is consummated in November. Unhappily, German aviation authorities will balk at the creation of this subsidiary and the entire scheme is scrapped.

On October 17, the carrier is introduced on the secondary market of the Paris Stock Exchange and is thus the first French regional airline to offer a public share flotation. An 11% stake in the company valued at FFr 300 million is placed, bringing in FFr 56.16 million in new capitalization.

Enplanements total 280,476 and there is a \$3.61-million net profit on operating income of \$113 million.

The employee population is increased by 90 workers in 1997 and the first Embraer EMB-145 Amazon is delivered in February. It will be followed by five more plus nine SAAB 2000s; meanwhile, two J-31s and a SAAB 340B are withdrawn, while another SAAB 340B remains out with **RLA (Regional Lineas Aereas, S.A.)**. Plans are made to retire additional SAAB 340Bs, all of the Jetstreams, and three SAAB 2000s over the next two years as five more EMB-145s are delivered.

During and beyond the first quarter the company enters into a number of marketing alliances: a code-share and block-seat arrangement with **SAS (Scandinavian Airlines System)** on a route from Lyon to Copenhagen; a dual-designator pact with **Swissair, A.G.** from Toulouse to Zurich; a code-share with **KLM (Royal Dutch Airlines, N.V.)** from Marseilles to Amsterdam and from Clermont-Ferrand to Amsterdam; a block-seat arrangement with **Air France** from Lyon and Nice to Stuttgart; and a block-seat arrangement with **Sabena Belgian World Airlines, S.A.** from Nantes to Brussels.

Europe-wide deregulation occurs on April 1 and Regional begins to fly its new German network. In mid-April, a domestic code-sharing agreement is signed with **Proteus Air System, S.A.** and on April 30 the company begins dual-designator flights from Rouen and Clermont-Ferrand. Another is signed with **Air Normandie, S.A.**

During the summer, new services are inaugurated to Poitiers, Rouen, Strasbourg, and Toulon. On September 1, three newly leased EMB-120 Brasilias, formerly operated by **Air Littoral, S.A.**, are employed to inaugurate a new service from Poitiers to Nice via Clermont-Ferrand.

On September 25, the company signs a feeder contract with **Air Liberte, S.A.** The two will share codes on seven domestic routes: Saint-Brieuc to Paris (ORY), Brest to Bordeaux, Lille to Bourdeaux, Marseilles to Lyon, Metz to Bourdeaux, and Toulouse to Lyon.

The German routes are significantly altered with the coming of the fall schedule. Service from Friedrichshafen to Dusseldorf is stopped, but is immediately assumed by competing **Lufthansa CityLine, GmbH.** Flights from Zurich to Bremen and from Geneva to Stuttgart are transferred to its **Crossair, Ltd.** partner and only the routes from Stuttgart to Lyon, Nice, Munster, and Venice are retained. On October 26, twice-daily SAAB 2000 service is launched from Toulouse to Dusseldorf via Clermont-Ferrand.

On November 17, the carrier begins thrice-daily SAAB 340B dual-designator flights on behalf of **KLM (Royal Dutch Airlines, N.V.)** from Strasbourg-Amsterdam.

By year's end, the carrier, which has enjoyed a 170% growth rate since its founding, is the only carrier in the world to operate both the SAAB 2000 (11) and EMB-145 (3). Plans are made to begin work in January on a new FFr 20-million terminal at its base, the first ever privately built by a French regional carrier, to inaugurate services to Montpellier in the spring and to broaden business-class services.

Customer bookings shoot up 55.9% to 636,000. Revenues increase 50% to \$144.83 million. Still, the net gain slips to \$3.56 million.

Service continues apace in 1998. On September 25, a \$150-million order is placed with Embraer for five ERJ-135s and five more ERJ-145s, the first of which will be delivered in October 1999.

Enplanements for the year jump 25.8% to reach 800,000 and revenues of 168 million euros (\$193 million) are generated.

The fleet at the beginning of 1999 includes 8 SAAB 2000s and 6 ERJ-145s. A code-sharing and marketing agreement is signed with **Deutsche Lufthansa, A.G.** on February 25. When it takes effect on March 28, Regional becomes the latest "Team Lufthansa" carrier.

Plans are also announced for the enhancement of the Paris (CDG) hub, with additional frequencies to German cities, as well as daily return flights to Frankfurt. Regional's customers are able to participate in the German major's Miles & More frequent flyer program and to take advantage of its ground handling network, quality assistance services, and connections to partners in the "Star Alliance."

On April 26, Regional agrees to purchase a 34% stake in the commuter line **Flandre Air, S.A.** Both companies have complementary route networks and nearly identical fleets. Regional also works out a joint-venture agreement with the maintenance, repair, and overhaul (MRO) provider LAB for the creation of an Embraer spare parts pool.

Also in April, a SAAB 2000 is given a colorful livery designed to draw attention to *L'Alsace, Terre d'Election* (Alsace, Land of Choice).

Passenger boardings accelerate 17.1% to 937,000. Revenues of \$166.46 million are generated.

Airline employment at the beginning of 2000 stands at 684, a 1.6% increase over the previous 12 months.

It is announced on January 20 that 70% majority shareholding in the carrier will be taken by **Air France**.

An ATR42-520, previously operated by **SATA (Societe Antillaise de Transportes Aeriens, S.A.-Air Guadeloupe)** is received in an all-white color scheme on April 3.

An ATR42-320 is leased by **Danish Air Transport, A.S.** from **Cimber Air, A.S.** on July 1 and employed to operate replacement flights to Geneva on behalf of Regional.

"Air France Express" SAAB 2000 return service begins on September 11 from Bordeaux to London (LCY) via Clermont-Ferrand. Flights operate twice daily during the week and daily on weekends. An ERJ-145 is rolled out on October 2 wearing **Air France** colors with "Air France by Regional Airlines" titles.

Dual-designator service with **KLM (Royal Dutch Airlines, N.V.)** ends on October 29.

At the end of November, it is announced that **Air France** will merge **Flandre Air, S.A., Proteus Air System, S.A.,** and Regional Airlines by mid-2001 into a unified large regional airline. The as-yet-unnamed carrier will operate 80 aircraft to approximately 400 domestic and European destinations and may earn as much as \$325 million in annual revenues.

On March 19, 2001, *Aviation Week and Space Technology* will reveal that the name of the new entity, into which all three will be combined on April 1, is Region, S.A.

REGIONAL LINEAS AEREAS, S.A. See **RLA (REGIONAL LINEAS AEREAS, S.A.)**

REGIONALFLUG, GmbH. See **RFG (REGIONAL FLUG, GmbH.)**

REGIONNAIR, LTD.: CP 29, Chevery, Quebec G0G 1G0, Canada; Phone 418 787 2001; Fax 418 787 2004; Code RH; Year Founded 1992. Regionnaire is established by President/CEO Guy Marcoux at Chevery in 1992 to offer scheduled passenger flights around Quebec Province, with emphasis on communities along the lower North Shore of the St. Lawrence River. Revenue flights begin and continue with a fleet that grows to include 2 Beech 1900Cs and 1 each Beech 1900D and de Havilland Canada DHC-6-200 Twin Otter.

Destinations visited in 2000 include Blanc Sablon, Gethsemani, Havre St. Pierre, Kegaska, La Tabathere, Montreal, Nastashquan, Pakuashipi, Quebec City, Schefferville, Sept-Iles, Tete-a-La Baleine, and Wabush.

REGULJAIR I SKELLEFTEA, A.B.: Sweden (1997–2000). Reguljair i Skelleftea, A.B. is established at Skelleftea, Sweden, on July 12, 1997 to provide service to Umea, Vaasa, and Sundsvall. Employing a single Embraer EMB-110P-1 Bandeirante, revenue flights are launched by Managing Director Ut Gronlund's new concern on September 24 and continued into the new millennium.

On March 30, 2000, the route between Vaasa, Finland, and Umea, Sweden, is discontinued. In serious economic trouble, the company declares bankruptcy on July 19 and ceases operations.

REINDEER AIR SERVICE, LTD. See **KENN BOREK AIR, LTD.**

RELIANT AIRLINES: Box 827, Willow Run Airport, Ypsilanti, Michigan 49198; United States; Phone (313) 483-3266; Fax (313) 483-5544; <http://www.reliantairlines.com>; Code RLT; Year Founded 1983. In 1983, two years after Zantop International Airlines becomes a wholly owned subsidiary of The Aviation Group, Reese C. Zantop learns that **Federal Express (FedEx)** has parked its fleet of Dassault Falcon 20s and put it up for sale. Taking advantage of this opportunity, he establishes Reliant at Willow Run Airport to offer all-cargo charter and courier services to destinations in Europe and the Americas. The new entrant is incorporated in April 1984. The first former FedEx Falcon 20 arrives on May 10 and is employed to launch revenue flights one month later. With a workforce of just three people, Reliant becomes the only charter cargo operator employing the cargo-door Falcon.

Additional Falcon 20s are acquired over the next three years. Many are given names in honor of Zantop family members (wife *Lindsay*), employees or colleagues, including *Art Parker*, *John Roper*, and *Althea Hollis*. With six aircraft, by 1987 Reliant is the largest operator of the modified Falcon freighter. During the next 10 years, Reliant becomes so successful that another hub is established at Memphis. By the middle 1990s, it has become a specialist in the transport of hazardous materials and explosives.

Reliant becomes an employee-owned company in 1996 through the purchase of founder Zantop's majority stake. Although overshadowed by the Employee Stock Ownership Plan of giant **United Airlines**, Reliant's plan proves more stable in the long run.

While landing in heavy rain at Blue Grass Airport, Lexington, Kentucky, on August 13, 1997, after a service from Oklahoma City, a Dassault Falcon 20A with two crew is hit by a downdraft that forces it to touch down 13 ft. short of the runway. The freighter is substantially damaged, but no injuries are reported.

In 1998, President Zantop flies 8 cargo Falcon 20s and 1 passenger Falcon 10 from Michigan and 5 Falcon 20s from Tennessee. The Falcon fleet is supplemented in October when a Douglas DC-9-15F, first flown by **Continental Airlines**, is delivered in the carrier's basic blue and white color scheme. Cargo traffic skyrockets 456.9% in 1999 to 8,342,000 FTKs.

The workforce at the beginning of 2000 stands at 140. It is announced on July 24 that two more DC-9-15Fs will soon be acquired. A DC-9-15F is purchased from **Kitty Hawk Air Cargo** on November 28. It arrives at Willow Run wearing Kitty Hawk colors and Reliant titles.

REMEX AIRLINES: Russia (1997–1999). Skytrump Aviation Services, Ltd. is renamed on February 1, 1997. Its mission to provide international and domestic passenger and cargo charter service remains unchanged. Konstantin G. Vartanov remains director general and by now he oversees a staff of 80. The Skytrump fleet of 4 Ilyushin Il-76Ts and 3 Yakovlev Yak-42Ds is fully engaged on the summer schedule by April 1.

Passenger and freight charters are operated from Moscow to various national and CIS points, including Tbilisi, Baku, Ashkhabat, Almaty, Bishkek, Novosibirsk, Irkutsk, Senake, Kogalym, Usinsk, Khabarovsk, and Yazhno-Sakhalinsk. Ad hoc long-haul flights are also made to over 50 destinations in Africa, China, and Europe.

Working with the travel company Klassik Line, executive and public passenger charters are also flown to those destinations, as well as holiday points in Greece, Spain, and Turkey. Flights continue in 1998. Under the chairmanship of Vladimir Moseenkoiv, REMEX is renamed **ATC RUSS** in early 1999.

RENAN AIRWAYS, S.A.: Old Airport Building, Floor 2, Chisinau, Moldova; Phone 52-61-28; Fax 52-29-84; <http://www.renan.mold-pac.md>; Year Founded 1994. Privately owned Renan Airways is registered in the State Registration House of the Republic of Moldova's Ministry of Justice on September 14, 1994. Andre Grosul is director general and plans are put into place to operate worldwide all-cargo charters. The company is registered with ICAO on November 7.

Revenue flights begin in early 1995 and continue with a mixed fleet of Antonov An-12s, An-32s, An-72s, and An-74s. A major UN contract is received in 1996 for the operation of humanitarian airlifts to Sierra Leone under the "World Food Program." It also begins a close association with the Paris-Dakar endurance race, providing lift for various teams.

The fleet increases to 10 ships in 1997 with the addition of 1 each Ilyushin Il-18 and Yakovlev Yak-40. The new ships are employed to inaugurate passenger charters to points in Europe, Africa, and the Mideast.

Flights continue in 1998–2000.

RENNIES EXPRESS AIR SERVICES (PTY.), LTD.: P.O. Box 39, Cape Town International Airport, 7525, South Africa; Phone 27 (21) 934-0810; Fax 27 (21) 934-7434; Code FLN; Year Founded 1993. Under the direction of E. Kingwill, Rennies Group (Pty.), Ltd., a parcel delivery company, sets up an air cargo division in 1993 after it takes advantage of the opportunity to purchase a fleet of 9 Piaggio P-166 Albattrosses from the South African Air Force.

Operations Manager P. Meyer acquires a workforce of 41 and revenue flights commence linking the company's Cape Town base with Durban, East London, George, Harare, Johannesburg, and Port Elizabeth.

Services continue apace in 1994–2000, during which years the company also acquires a Boeing 727-200F freighter.

RENO AIR: United States (1992–1999). Joseph Lorenzo establishes Reno Air at that Nevada city's Reno–Cannon International Airport in April 1992 to provide scheduled services to six destinations in Nevada, California, Oregon, and Washington State. A total of \$6 million is raised through an initial public offering of stock and options; the Nasdaq stock symbol employed is RENO. A workforce of 500 is assembled, together with a leased fleet of 2 McDonnell Douglas MD-82s and 3 MD-83s. The aircraft are painted in green and white livery with snow-capped mountain peaks painted on their tails.

Early in June, Chairman/CEO Lorenzo resigns (though retaining his board/ownership positions) and is succeeded as chairman by Lee M. Hydemann and by new president/CEO, former **Midway Airlines (1)** official Jeffrey Erickson. Former **Midway Airlines (1)** Vice President-Operations Robert W. Reding, a onetime Douglas DC-9 pilot, assumes the same post with Reno.

Thrice-daily MD-82 revenue flights commence on July 1 from Reno to Los Angeles and Seattle. During the fall, the in-house tour department QQuick Escapes is formed to seek leisure passengers.

Traffic figures are not revealed, but a \$1.7 million operating loss is reported on total revenues of \$27.1 million.

Airline employment increases 120% in 1993 to 1,100 and the all-chartered fleet now includes 9 MD-83s and 8 MD-82s, with 6 of the latter leased from **SAS (Scandinavian Airlines System)**. Destinations served by the publicly owned company include Portland, Seattle, Los Angeles, San Diego, San Francisco, and Ontario, California. Thrice-daily nonstops begin on April 1 from Reno and Tahoe to Minneapolis (MSP), while twice-daily nonstops commence on April 29 between Reno/Tahoe, and Kansas City.

Northwest Airlines' plans for three new routes into Reno's territory are thwarted by smart marketing and political pressure. After Reno complains to the DOT of the major's predatory practices, Secretary Federico Pena on April 30 directly warns Northwest that any direct competition on the West Coast with the fledgling company will be examined by the DOJ under antitrust laws. Northwest cancels its expansion plans.

A third daily flight between Kansas City and Reno/Tahoe is kicked off on May 13. Other markets also added are San Jose, Tucson, Las Vegas, Phoenix, and Burbank.

Tentative agreement is reached with **American Airlines** on May 12 under which Reno will sublease at least two gates at the major's San Jose, California, hub and be taken into AA's frequent flyer program. When the pact is implemented, Reno will also benefit from finance and capital arrangements and coordinated advertising and promotions.

For lack of traffic, service from Reno to Kansas City and to Minneapolis (MSP) is dropped on June 3. However, seven days later, twice-daily roundtrip nonstops are inaugurated from San Francisco to both Portland and Seattle.

On July 15, Reno begins flying from San Jose to San Diego, Los Angeles, Portland, Seattle, and Reno/Tahoe while, on August 1, nonstop roundtrips are begun from San Jose to Ontario, California. Due to repeated bad weather and traffic delays, operations in San Francisco are discontinued on December 1. The same day, the company discontinues flights between San Jose and Reno/Tahoe to better utilize aircraft on new frequencies from Burbank to Reno/Tahoe.

Also on December 1, three new destinations from Reno/Tahoe and San Jose: Las Vegas, Tucson, and Phoenix. Additionally, new flights are offered from Tucson to Las Vegas and Reno/Tahoe.

Enplanements for the first full year total 1,866,067 and revenues increase to \$124.64 million. Costs, unfortunately, jump to \$131.97 million and cause the operating loss to deepen to \$7.33 million. Net loss is \$7.34 million.

The workforce grows 9% in 1994 to 1,200 and in early spring President Erickson becomes president/CEO of **Trans World Airlines (TWA)**. Chairman Hydemann becomes CEO on April 1, with Vice President-Operations Reding moving up to become president/chief operating officer. Operations continue apace and at year's end the DOT elevates the carrier to "national" status.

For the second full year, the company transports 3,369,446, a huge 80.6% increase. Revenues surge 56.8% to \$196 million, but expenses climb 58.3% to \$210 million. As a result, losses of \$13.85 million pre-tax and \$13.99 million net are suffered.

Airline employment stands at 1,632 in 1995, a 10% increase. The route system is shaken up. Dropped are Redmond, South Lake Tahoe, Ontario, and Phoenix while Vancouver, Palm Springs, and Albuquerque are added.

Following the withdrawal of **MarkAir** from Alaska in April, an experimental daily red-eye return flight is initiated on May 18 from Seattle to Anchorage. The service proves so popular that a second flight is added on July 1, with both offered year-round.

Ticketless travel, under the brand name EZ Trip, is introduced in August.

Also in August, the company sells \$25 million worth of 9% convertible notes with a due date of September 30, 2002. The transaction brings in cash proceeds of \$23.75 million. President Reding adds the CEO title in September.

Enplanements surge ahead by 17.4% to 3,954,578 and operating income jumps 31.2% to \$256.5 million. Costs are up only 20.8% to \$252.89 million and profits, the first since scheduled service began in July 1992, are realized. Operating gain is \$3.6 million and a \$1.95-million net profit is widely reported.

The workforce is increased by 6.4% in 1996 to 1,736. Two MD-90-30s with orange-colored Orange County Flyer titles are acquired in late March and employed to start service on April 4 to San Jose and John Wayne County Airport, both in California.

Also on April 4, with CEO Reding in the left seat, an MD-82 with 139 passengers aboard inaugurates scheduled services to Fairbanks, Alaska. Two additional flights are added between Seattle and Anchorage and nonstop Portland to Seattle service is reinstated.

An agreement is now reached allowing company tickets to be obtained via Ticketmaster. On June 6, daily nonstop roundtrips are started between Denver and Reno/Tahoe, with continuing service to Los Angeles.

A marketing agreement is signed with Fresno-based **Air 21** in July; the pact will be short-lived due to the failure of the California carrier. When Reno native Patty Sheehan wins the LPGA Nabisco Dinah Shore golf tournament at Mission Hills Country Club at Palm Springs, California, Reno Air, a sponsor of the event, names an MD-82 in her honor.

During the summer, the company continues its long-term sponsorship and assistance to a number of semi-professional athletic teams: Reno Rattlers and Everett Bigfoot (soccer); Reno Chukars, Las Vegas Stars, Tucson Toros, and Colorado Springs Skysox (baseball); and San Jose Rhinos, Anaheim Bullfrogs, and San Diego Barracudas (Roller Hockey International).

Due to passenger demand, a second daily nonstop frequency is added on August 1 from Denver to Reno/Tahoe, with continuing service to San Jose. A new daily nonstop roundtrip is initiated the same day between Colorado Springs and Albuquerque; simultaneously, an 11th daily roundtrip begins from Los Angeles to San Jose and a 4th daily roundtrip from San Jose to Reno/Tahoe. The third MD-90-30 arrives the same day; christened *Silicon Valley Flyer*, it also displays its World Wide Web address as part of its markings.

Also in August, ground is broken on a new maintenance hangar and parts facility at Reno–Tahoe International Airport; the new facility will be opened in December.

Service to San Francisco is resumed on October 1. Two weeks later to the day, code-sharing flights commence with the American Eagle affiliate Wings West Airlines. Services under the arrangement are flown from Los Angeles to nine California cities and to Las Vegas. Fare wars during the fourth quarter cause a \$6.3-million loss in that period.

Late in the year, a code-sharing alliance is signed with **Hawaiian Airlines (HAL)**. Under its terms, HAL passengers may connect at Los Angeles with Reno Air flights to Tucson, Albuquerque, Reno/Tahoe, and San Jose. The pact also allows frequent flyers to choose their miles from the AAdvantage program of **American Airlines** or HAL's Gold Plus.

In November, charters are launched to Gulfport, Mississippi. Bad winter weather and a price war with **Southwest Airlines (2)** leaves the company with a \$6.3-million loss for the fourth quarter.

Customer bookings jump 30.5% to 5,161,009 and 2.34 million FTKs are operated, an astounding 78.7% increase. Overall, operating income still accelerates 36% to \$348.66 million, while expenses are up 37.1% to \$236.65. The operating profit is \$2.01 million and the net gain is up to \$2.03 million.

The employee population is reduced 2.1% in 1997 to 2,285. Significant difficulties are encountered with the company's change over to the SABRE computerized reservations system.

Less than 100 m. into its climb away from Detroit on a March 14 service to Reno, an MD-87 with 106 passengers suffers compressor stalls in both engines due to ice ingestion. Fortunately, the cockpit crew is able to level the jetliner out, ascend to 900 m., and make a safe emergency landing.

Under a three-year revenue guarantee agreement with the Harrison County Jet Service Task Force and leaders of the Gulfport/Biloxi community, daily roundtrip MD-82 flights are inaugurated on April 2 from Gulfport to Tampa, St. Petersburg and Orlando.

Two days later, twice-daily MD-82 roundtrips commence from Gulfport to Atlanta. Having taken off from a parallel San Jose runway, a Cessna 172 nearly midairs an MD-83 that has just lifted off with 111 passengers for an April 4 service to Las Vegas. The distance between the 2 aircraft is reported as 50 m., but both planes escape disaster and no injuries are reported.

On April 16, Reno files suit against **Northwest Airlines** for allegedly cutting airfares to force Reno out of the Minneapolis/St. Paul market four years earlier. By summer, the carrier has received all six of its new MD-90-30s.

Just after takeoff from Las Vegas on a June 17 service to Colorado Springs, an MD-83 with 140 passengers suffers the failure of its left engine; a safe emergency is made back at the point of origin and there are no injuries.

A new QQuick Miles frequent flyer program is unveiled on July 15. The company begins serving Java Coast coffee on all flights as of August 11.

Daily nonstop service is inaugurated on September 16 between Oklahoma City and Las Vegas; the introductory fare is \$89 one-way. An additional roundtrip between Reno and Las Vegas is simultaneously added. The Oklahoma City-Las Vegas route is doubled on September 19.

An MD-83 is purchased on October 1. An election is held for pilot union representation; of the 293 flyers eligible to vote, 178 choose ALPA.

In November, the Oklahoma City to Las Vegas route is extended on to Los Angeles.

Twelve days later, a code-sharing agreement is signed with **Qantas Airways (Pty.), Ltd.**

Passenger boardings jump 7.2% to 5,530,454 while cargo climbs 16.3% to 2.72 million FTKs. Operating revenues swell 9.7% to 383.94 million, while expenses rise 13.6% to \$394.57. Consequently, the previous year's operating gain becomes a \$10.05-million operating loss. The positive net gain of the year before is turned into an \$11.52-million net loss.

When it takes effect on January 6, 1998, the **Qantas Airways (Pty.), Ltd.** pact provides dual-designator service on routes from 23 Reno markets to Los Angeles and on to Sydney.

Daily return service is inaugurated on February 26 between Reno/Tahoe and Atlanta. Fares begin at \$149 one way.

As a direct result of poor fourth quarter results, it is announced on March 11 that the fleet will be reduced by two aircraft and that the spring schedule will be aimed at rationalizing the route schedule.

Beginning on March 15, members of the carrier's QQuick Miles frequent flyer club are able to earn miles at Budget Rent-a-Car.

Also as a result of the bad fiscal showing, the board of directors on March 18 determines that a change in leadership is required. Chairman

Hydeman steps down to become chairman of the board's executive committee. Retired **United Airlines** Senior Vice President Joseph R. O'Gorman succeeds Robert Reding as chairman/CEO/president, effective April 1; Reding moves to Calgary to become president/CEO of **Canadian Regional Airlines, Ltd.**

The same day, Bev Gear is named senior vice president-operations, while Vicki Bretthauer becomes vice president-administration. O'Gorman immediately announces cost-cutting measures and a restructuring program that includes the retirement of 2 older jetliners, the layoff of 150-200 workers, and suspension of service to 3 cities.

The route rationalization begins the same day chairman/CEO/president O'Gorman officially takes office, with the suspension of services to Albuquerque, New Mexico, and Ontario, California. Flights to Detroit end on May 4.

O'Gorman's retrenchment continues in May as it is announced that a total of 330 workers, 15% of the employee population, will be terminated. The company's revenue accounting process will be outsourced. On the plus side, emphasis is placed on enhancing the hub at San Jose, California.

On June 1, service from Gulfport/Biloxi, Mississippi, to Atlanta and to Tampa/St. Petersburg is discontinued. Ten days later, thrice-weekday flights are started from San Jose to Portland and Seattle.

With the inauguration of the summer schedule on June 11, a number of routes are enhanced. The summer daily nonstop return flights are resumed between Reno and Anchorage. Frequencies from Reno to Chicago (ORD), San Diego, and Orange County increase from three to four daily roundtrips, while the number of daily return flights between Los Angeles and Las Vegas grows from three to five.

At the same time, services from the company's built-up San Jose hub are increased. Flights from that point to San Diego and Los Angeles are increased from six roundtrips to seven and from seven to eight roundtrips, respectively. Simultaneously, thrice-weekday services are introduced to Portland and Seattle.

Twice-daily nonstops are inaugurated between Orange County and Seattle on September 15. Additionally, a daily nonstop is added between Los Angeles and Colorado Springs, complementing the carrier's four one-stop services.

Four daily roundtrips commence on October 1 between San Jose and Burbank. San Jose is now the company's largest hub and to demonstrate its involvement in the community, the airline implements an essay contest in the middle schools. The 20 winners fly Reno's first flight to Burbank and are hosted by Universal Studios Hollywood for the day.

It is announced on October 10 that as of December 10, the Reno reservations facility will be incorporated into the Las Vegas reservations operation.

A strategic marketing agreement is signed with **Canadian Airlines International, Ltd.** on October 23. Beginning on November 22, Reno will place its "QQ" designator on CAI flights from Vancouver to San Jose and San Diego.

A definitive merger agreement is signed with **American Airlines** on November 19; the Texas-based major will acquire Reno for a total cash consideration of \$124 million. The Reno board of directors recommends that stockholders agree to accept American's offer of \$7.75 per common share and \$27.50 per share of 9% Series A Cumulative Convertible Exchangeable Preferred Stock. Reno will not be operated as a separate subsidiary, but will be integrated into American's operations as soon as all necessary authorities are received and employee and fleet integration issues are decided.

Given that there is virtually no overlap on the routes served by the two carriers, American believes that the acquisition will give customers the benefits of a more comprehensive travel network, particularly on the U.S. West Coast, and will enhance the network of "OneWorld" partners. Arrangements with those partners, particularly **Canadian Airlines International, Ltd.** and **Qantas Airways (Pty.), Ltd.** will stand.

The required waiting period required by law expires at 12:01 a.m. on December 9 and the federal antitrust review having been cleared, the

acquisition by **American Airlines** is approved. Certain integration decisions remain and the entire process is expected to take between 12 and 18 months.

During the 12 months, customer bookings drop 4.02% to 5.36 million, while freight traffic accelerates 20.67% to 3.28 million FTKs. Revenues slid 0.9% to \$384.81 million, while costs are down 3.8% to \$383.05 million. The operating profit is \$1.76 million, while the net loss is improved to \$1.45 million.

Airline employment has been cut by 12.7% by the beginning of 1999.

Discussions between **American Airlines** and its pilots over the issue of integrating Reno's pilots turn bitter. A major work slowdown begins at American on February 6 and will, over the next week, ground over 6,000 flights before it is finally ended by order of a federal judge.

Meanwhile, recently retired **American Airlines** Senior Vice President-Field Services Donald O'Hare succeeds Joseph O'Gorman as Reno's president on February 9. The same day, Reno pilots, who have not been permitted to participate in the discussion between American and its pilots, voice their concern over plans by their new colleagues to place them at the bottom of all seniority lists.

Roundtrip service between Los Angeles and San Francisco is enhanced on March 1. Five flights are added in each direction, while the three current flights are re-timed in order to offer service every two hours throughout the business day.

Service between San Francisco and Los Angeles is increased again on April 19, with one daily roundtrip added between the two cities, bringing the total of daily flights to nine. One daily roundtrip is added between Los Angeles and San Jose, bringing the total to eight.

Although San Jose has a curfew from 11:30 p.m. to 6:30 a.m. Pacific Time, airlines are allowed to fly in during those hours if they are delayed due to mechanical, weather, or ATC problems. The *San Jose Mercury News* reports on April 27 that the city attorney's office has sent letters to six carriers threatening to sue or ban them from the airport and citing numerous violations of the curfew. The company's committing these "blatant violations" include, in addition to Reno, **Mexicana Airlines, S.A. de C.V., Northwest Airlines, American Airlines, Southwest Airlines (2), and United Airlines.**

Daily MD-87 return service is discontinued on May 1 between Reno and Vancouver and between Las Vegas and Tucson. Acting in cooperation with **American Airlines**, the company simultaneously steps up its California services.

Employing both MD-80s and MD-90-30s, an additional daily return service is started between Los Angeles and San Jose, bringing the total number of weekday flights to nine roundtrips. In addition, five new roundtrips are instituted between Orange County and San Francisco. Simultaneously, service between Seattle and Anchorage is doubled from one daily roundtrip to two.

As a result of the ongoing evaluation of aircraft in the Reno fleet, **American Airlines**, on May 6, orders three more B-737-823s that will replace three of Reno's leased MD-80s.

A third daily roundtrip is added on May 21 from Seattle to Anchorage. On June 22, it is announced that the QQuick Miles frequent flyer program will end on December 31, after which points will be redeemable through the AAdvantage program.

The 18-year American veteran Rex Toltschin is appointed Reno's general manager on June 24; he will oversee the final integration of the company into American.

The operations of Reno Air are folded into American on August 31, adding more than 150 nonstop daily flights to the major's West Coast route network. On this day, Reno employees begin wearing American uniforms, the carrier's jetliners belong to American's fleet, all Reno flights become American flights, and all airport signage is changed from Reno to American. Repainting of the Reno fleet will begin in January.

Passenger boardings during these 8 months of operation plunge 39.1% to 3,266,000, while freight falls 53.5% to 1.52 million FTKs. Revenues are off 35.6% to \$247.69 million, while expenses are down an

almost equal 35.5% to \$247 million. The operating profit falls to just \$690,000, while the net loss improves to \$103,000.

RENOWN AVIATION: 3940 Mitchell Road, Santa Maria, California, 93455, United States; Phone (805) 934-2484; Fax (805) 934-2007; Code RA; Year Founded 1980. Larry Sullivan establishes Renown as an FBO at Santa Maria, California, in August 1980. Two years later, the decision is taken to begin scheduled freight services to domestic and regional markets. Revenue flights commence in October 1982 with 1 CV-240, 3 CV-340s, 2 CV-440s, and 3 CV-580s.

Operations quietly continue over the next decade. With the end of recession in 1994-1995, the company, now a subsidiary of James B. Quayley's JBQ Enterprises, increases its fleet through the addition for a year of a chartered Lockheed L-188C Electra, first flown by **Ansett Australia (Pty.), Ltd.** An L-188AF first operated by **National Airlines** and an L-188CF flown by **Northwest Airlines** are also leased.

Capt. Terry Cedar is president in 1996-1997 and in addition to the Convairs, he continues to fly one of the largest Convair fleets still in commercial service: 4 each CV-240s and CV-580s and 2 each CV-340s and CV-440s. The ex-Ansett Electra, which has been employed to fly for the USN between North Island NAS and the California Channel Islands, is returned and replaced by a former **Eastern Air Lines** L-188A, which is operated on the same duty.

Traffic figures are reported for the first time during the latter year and show enplanements of 84,000. Financial figures are also released and show losses: \$1.47 million (operating) and \$1.23 million (net).

Employment in 1998 stands at 102. The two L-188 freighters are wet-leased to **Channel Express Air Service, Ltd.** in the U.K.

During the 12 months, passenger boardings slide 20.2% to 67,000, while freight traffic plunges 45% to 3.05 million FTKs.

Revenues advance 10.6% to \$8.92 million, but expenses, though down 1.3%, still total \$9.41 million. The operating profit is \$490,000, while a net loss of \$141,000 is also suffered.

Passenger boardings plunge 79.2% in 1999 to 15,000.

RENT-A-CHARTER, S.A.: Torre La Noria-Ph, Ofic 3, San Roman Paseo E, Eraso, Las Mercedes, Caracas, 1060, Venezuela; Phone 58 (2) 92-9532; Fax 58 (2) 91-0352; Year Founded 1985. Carmelo Trimarchi establishes this concern at Caracas in 1985 to provide executive and small group passenger charters, many in support of the energy industry. By 1998-2000, the founder employs 12 pilots who fly 1 each British Aerospace BAe (HS) 125-400 Hawker, Beech 400 Beechjet, Cessna 500 Citation I, Grumman 690 Turbo Commander, and Swearingen Metro.

RENTAVION, C.A.: Venezuela (1993-1995). With a base at Aeropuerto de Higuerote, Rentavion is formed in 1992. Scheduled, third-level passenger and freight services begin to Caracas in early 1993 with a pair of Douglas DC-3s and a Martin 4-0-4, the latter employed exclusively for cargo operations. Services continue until 1995.

REPUBLIC AIRLINES: United States (1979-1986). Republic is born as a national-sized carrier on July 1, 1979 when the two independents, Minneapolis-based **North Central Airlines** and Atlanta-based **Southern Airways**, merge. Combined corporate headquarters are established at Minneapolis where management is comprised mostly of former NCA executives. The combined workforce totals 9,000 and the fleet includes 103 aircraft, the majority being Douglas DC-9-31s. To help publicize new name, a number of airliners are given a quick relettering and the new corporate logo, although the famous "Herman" goose emblem remains on aircraft tails.

Orders are placed for 14 McDonnell Douglas DC-9-80s (MD-80s). A DC-9-31 swerves off the runway on December 1 after landing at Flint, Michigan, to avoid colliding with a taxiing lightplane.

During the remainder of the first year, the publicly owned new entrant, operating over old routes and new, transports 12,156,000 customers and

records an operating profit of \$28 million; the net profit is \$13.1 million. Its future appears bright, even though a heavy debt-load is acquired with market-pegged interest rates.

During 1980, the employee population increases by 63.6% to 14,693. In January, the carrier receives the 1979 "Airline of the Year" award from *Air Transport World* magazine.

Republic Airlines adds 31 new nonstop services to its U.S. and Canadian route network as well as new markets in the California communities of Ontario, Burbank, San Jose, Oakland, and Orange County.

Five unhappy, recently arrived Cuban refugees take over a Miami to Orlando DC-9-10 Flight 228, a DC-9-31 with 116 passengers, on August 16 and order it to Havana. The Castro government will imprison the pirates.

On October 1, the routes, assets, and debts of **Hughes Airwest** are acquired for \$38 million. The former local service airline is, pending its integration, relabeled **Republic West**.

The airline experiences an 8.8% traffic boost to 13.2 million passengers carried and FTKs flown rises a minor 0.6% to 20.42 million. These figures are exclusive of the 5.5 million passengers and 12 million FTK flown by Hughes and Republic West during the year.

The costs of the new merger, recession, and corporate restructuring leads to a \$38.3-million loss on revenues of \$917 million. The loss figure is only \$300,000 higher than the purchase price of **Hughes Airwest**. Increased in both size and revenues, Republic joins the ranks of the "majors," under the CAB's new classification scheme.

Although 1981 begins well enough, is not a good year. In early spring, services from Las Vegas and Phoenix to Edmonton and from Phoenix to Milwaukee and San Francisco are added. The PATCO air traffic controllers' strike in the summer forces suspension of service to 27 stops, and causes a severe cash flow problem.

Consequently, the carrier is only able to accept 3 of the 14 MD-80s and must negotiate a delivery delay with the manufacturer. Other aircraft received during the year include a DC-9-51, five B-727-2S7As from Boeing and three others coming in from leases. One B-727-2S7A, a DC-9-10, and four Convair CV-580s are sold and one B-727-2S7A is traded to McDonnell Douglas with some cash for two DC-9-31s.

On September 9, a DC-9-10 with 84 aboard comes within 15 feet of colliding with a small plane over Fort Lauderdale; no injuries are reported.

During the year, the workforce is increased a scant 0.8% to 14,595. All employees are given stock in lieu of a month's pay, compensation is cut by 10%, and raises are postponed. Passenger boardings drop 3.3% to 16,841,000, but freight traffic accelerates a welcome 15.1% to 42.59 million ton-kilometers. Revenues are \$1.45 billion and expenses are \$1.43 billion; they give an operating profit of \$16.5 million. Interest expenses, however, conspire to bring a net loss of \$46.3 million. Debt remains high: \$756 million; of that total, \$404.5 million is cast in a revolving credit plan at a 16.25% interest rate.

The payroll grows a slight 1.4% in 1982 to 14,400. During the year, arrangements are made to lengthen the delivery period for 11 ordered MD-80s. On the financial front, long-term debt payments also gain extension as \$75 million in debentures are sold. Three MD-82s arrive in December and are employed to start a pattern of nonstop service over somewhat longer segments between mini-hubs.

Enplanements climb 7.3% during the 12 months to 18.1 million, while cargo growth improves even more, jumping 31.6% to 56.04 million FTKs. Operating income accelerates 5.67% to \$1.53 billion as expenses are held to \$1.49 billion, leaving an operating profit of \$37.25 million. Continuing gigantic interest payments on a huge debt bring another net loss, \$39.9 million.

The employee population is reduced 2.8% in 1983 to 14,100. In an effort to obtain relief, management is able to arrange, early in the year, for a nine-month pay freeze and a 15% reduction in wages.

After touchdown in a snowstorm at Brainerd, Minnesota, on January 9, a CV-580 with 31 passengers veers to the right on the runway and its right propeller strikes a 3-ft.-high snowbank between the edge of the runway and the runway edge lights. The No. 1 blade separates from the

propeller and enters the cabin, fatally wounding a woman passenger and injuring another.

In a first quarter effort to attract additional traffic, the hubs at Memphis, Phoenix, Detroit, and Minneapolis (MSP) are strengthened. Executives of the Pillsbury Company complete a neighborly barter deal with Republic on March 1 wherein a surplus Pillsbury plant in Chicago is exchanged for more than \$1 million in Republic tickets, usable at will.

The next day, in a move to prevent these tickets from falling into the hands of black marketers, the carrier begins requiring holders of such vouchers to present positive identification matching the name on the ticket before they are honored. On March 7, Republic reports overwhelming bookings between Valdosta and Dotan, Alabama, because of an oversight that allows travelers to claim more than \$600 worth of free tickets by taking the \$54 Valdosta-Dothan flight.

As the result of the flight crew's failure to switch fuel tank pumps as required by their checklist, the wing tanks of a DC-9-31 with 145 aboard run dry during an April 3 flight from Minneapolis (MSP) to San Diego. Consequently, the jetliner drops some 4 miles (20,000-plus feet) before the engines are restarted, allowing the Douglas to be safely landed at Las Vegas without injuries to anyone aboard. The officers involved are suspended.

En route from Fresno to Phoenix on May 28 with 81 aboard, a DC-9-10, which had not taken on fuel at its previous stop, makes a safe emergency landing at Luke AFB, near Phoenix, after reporting itself out of fuel; a check shows only four gallons available. The flight crew's error in judgement in believing sufficient fuel was aboard costs the men their jobs.

Four DC-9-10s are now sold as a seventh MD-80 joins the fleet. As the result of negotiations with McDonnell Douglas, orders for six additional MD-80s are cancelled as an eighth MD-82 is accepted—and immediately leased back to the builder for 18 months. An MD-82 lands safely in San Diego on July 29 after a power lag in an engine forces the pilot to return to the airport.

As a DC-9-31 takes off in a flight from Las Vegas to Memphis on August 7, the tires blow out, knocking a six-inch hole in the wing. After first circling for an hour to dump fuel, the plane lands safely; no injuries are reported to any of the 102 people aboard.

While landing at Sioux Falls, South Dakota, on the evening of November 6, a CV-580 with 3 crew and 32 passengers collides with a 2-lb. bird, which smashes through the windshield. Hit in the face by the bird and flying glass, the captain is incapacitated; the copilot takes over and completes touchdown without further incident.

Rasul Alie Shakir is arrested after commandeering Flight 277, an MD-82 with 41 passengers, and diverting it to Chicago from a November 21 service from Detroit to Kalamazoo, threatening to set off a bomb. He will be tried and sentenced to eight years in prison.

As the result of fare wars and higher labor costs, fiscal difficulties continue. In December, a Partnership Plan is unveiled that allows employees stock ownership and profit-sharing benefits in exchange for a continuation of the wage cuts and wage freeze for three more years.

Passenger boardings dip 1.3% to 17,787,000, but freight jumps 22.5% to 116.33 million FTKs. Overall income declines 1.25% to \$1.51 billion as expenses jump 3.28% to \$1.54 billion. Republic Airlines posts its fourth straight net loss, a record \$111.03 million (for a total of \$222 million since 1980), but the \$30.88-million operating loss is the first suffered during this timeframe. As the cumulative debt climbs to \$797 million, investors and others wonder if the carrier might soon go under.

Employment falls 5.6% in 1984 to 13,400, all of whom will commit to the Partnership Plan. Daniel F. May becomes chairman/CEO in April and Stephen M. Wolf, former president of **Continental Airlines**, arrives as the carrier's new president. Aggressive measures are taken thereafter to prevent the company from crashing into a sea of red ink. New union contracts are negotiated with employees and in the largest route realignment since the company was formed, service to 23 markets is suspended, although eight new destinations are added.

Emphasis is placed on more effective scheduling, and flights are increased at the three major hubs—Detroit, Minneapolis (MSP), and Memphis. Aircraft color schemes are altered and the long-famous "Her-

man" goose logo is retired from aircraft tails. Innovative marketing programs are undertaken, and the airline's frequent flyer plan is expanded in a partnership with **Pan American World Airways (1)**.

Malfunctioning air conditioning units force two jetliners to make emergency landings on the same day, May 19: a DC-9-31, shortly after takeoff from Memphis and a B-727-2S7A, en route from Memphis to Denver, which diverts to Cincinnati. Once the B-727-2S7A, with its 138 passengers, is on the ground, its captain receives what turns out to be a false warning of an engine fire and orders the aircraft evacuated via chutes. Thirteen people are injured in the process, one seriously.

Only three of six company unions reach agreement with management on June 1 for an extension of their 15% wage concessions. Negotiations continue for a month, but on July 2 it is announced that agreement has been reached on wage, productivity, and an employee stock ownership plan. In an effort to improve its feed, Republic purchases 9% interest in the Michigan-based regional **Simmons Airlines**.

Although passenger boardings drop another 14.2% on the year to 15,257,000, freight rises 18.9% to 138.36 million FTKs. These various measures not only prevent a Chapter XI bankruptcy filing, but actually bring a financial about-face. Revenues increase 2.4% to \$1.56 billion, and expenses drop 6.2% to \$1.45 billion. A record \$100-million operating revenue is realized; in the best performance in company history, after-tax earnings of \$29.5 million are posted. Even the debt is reduced, somewhat.

The payroll grows 13.4% in 1985 to 15,200. Republic, as the nation's 7th largest airline, is serving 110 cities in 34 states and its 100,000-mile transcontinental route system extends southward from Canada to the Cayman Islands in the Caribbean. Over 1,040 departures are made daily. To help service its connections, the carrier leases three B-737-202As from bankrupt **Wien Air Alaska**. Simultaneously, **Simmons Airlines**, the carrier's RepubLink commuter partner, begins feeding the major at its Detroit hub.

Flights to Pittsburgh commence on April 1, followed on April 28 by the addition of flights to 8 new markets with over 100 new daily flights are added to the schedule. The first-time destinations include Erie, Syracuse, Albany, New York (JFK), Louisville, Shreveport, Little Rock, and Appleton, Wisconsin, the latter served with CV-580s from Detroit. Nonstop service is introduced on May 3 from Detroit to White Plains, New York.

The fleet, during the summer, stands at 160 airliners, primarily Douglas DC-9s, Boeing 727s, and Convair CV-580s. Orders are placed for six B-757-2S7s, three of which arrive by year's end. Also during the summer, President Wolf begins a series of merger discussions with Steven Rothmeier, CEO of **Northwest Airlines**. These stall as Northwest briefly courts a marriage with **Delta Air Lines**, but resume when the attempt to join a larger carrier fails. By fall, a route realignment is completed, based on hubs at Memphis, Detroit, and Minneapolis (MSP). Plans are laid for another commuter affiliate, **Phoenix Express**, to operate at Memphis as **Republic Express**.

Customer bookings increase 14.5% to 17,465,000 and cargo grows by 23.4% to 170.73 million FTKs. Revenues ascend 12.1% to \$1.73 billion, costs climb 8.3% to \$1.56 billion, and operating profit jumps to \$166.33 million. A six-fold turnaround that impresses even critics is shown by the record \$177-million net profit.

On January 24, 1986, President Wolf, soon to resign, announces that Republic, still financially troubled, will be acquired by **Northwest Airlines**. The \$884-million dollar merger will make the company the nation's fifth, later third, largest carrier. Applications are presented to the DOT for approval; however, the move is opposed by the antitrust division of the DOJ, which fears restraint of trade. DOT authorizes the integration on July 31. The carrier's six Rolls Royce-powered B-757-2S7s, incompatible with Northwest's all Pratt & Whitney fleet, are returned to Boeing, which later sells them to **America West Airlines**.

Traffic and financial figures are available for the first three quarters, after which they are submerged into those of the new owners. From January to October 1 when the merger is completed, passenger boardings accelerate 14.1% to 14,716,000 and freight is up 9.7% to 47.55 million

FTKs. During the same nine-month period, revenues are up 6.6% to \$478.24 million, costs are up only 3.9% to \$413.62 million, and the operating profit is \$64.62 million. Net profit slides \$7 million to \$31.21 million, but still allows the enterprise to be closed out on a high note.

REPUBLIC EXPRESS AIRLINES: United States (1985-1986). The Atlanta-based holding company Phoenix Airline Services, acquired by ex-**Eastern Metro Express** Chief Operating Officer Michael J. Brady, signs a 10-year contract with **Republic Airlines** in March 1985 to provide feeder service through the latter's Memphis hub. Employing three leased British Aerospace BAe Jetstream 31s, the new Republic Express Airlines launches service on May 31 from west Tennessee to the Mississippi communities of Muscle Shoals and Tuscaloosa. Flights begin in June to Columbus, Greenville, and Meridian.

The company's first SAAB-Fairchild SF340 is received and initiates Memphis-Jackson flights on July 15. Frequencies are opened to Monroe, in Louisiana, during August and the fleet continues to grow during the summer and fall to a total of 19 British-made turboprops plus 6 SAAB SF340s.

Memphis-Minneapolis (MSP) flights begin during the holidays while enplanements for the year total 137,345.

The fleet is increased in 1986 by the addition of two more SF340s and five Jetstream 31s. When Republic Chairman Wolf announces in January that the major is being purchased by **Northwest Airlines**, the arrangement also includes Republic Express. During the next six months, as takeover permission is sought from the DOT, REA transports in excess of 370,000 passengers.

On July 31, the regional carrier is renamed **Express Airlines One** and as a Northwest Airlink partner, continues its mission to provide feed to the Memphis and Minneapolis (MSP) hubs.

REPUBLIC HELICOPTERS. See **COURT HELICOPTERS, LTD.**

RESEAU AERIEN FRANCAISE. See **AIR FRANCE**

RESEAU AERIEN INTERINSULAIRE, S.A. (RAI): French Polynesia (1958-1970). In January 1958, this carrier is acquired and reformed by the large French independent airline **Compagnie de Transports Aeriens Intercontinentaux, S.A. (TAI)**, working with its partner, the shipping concern Messageries Maritimes. Operations are continued from Papeete with **Regie Aerienne Interinsulaire, S.A.'s** Grumman G-73 Mallard and Consolidated PBV-5A Catalina over a 160-mile route, with stops at Bora Bora, Huahine, and Raiatea. One of the latter, with 15 aboard, crashes near Raiatea on February 19; there are no survivors.

The first important development is the spring purchase of Sir Gordon Taylor's Short Sandringham 7 flying boat *Frigate Bird III*. It is delivered to Tahiti on June 30 and enters service on the route from Bora Bora to Papeete. TAI extends its Paris to Noumea service to the Society Islands, with the huge four-engine aircraft, beginning on October 22, providing the final connection for what is the world's longest air route—12,000 miles.

The present Papeete-Faa'a Airport opens on October 16, 1960 as the only commercial airfield in all of French Polynesia. At this point, RAI switches its service away from Bora Bora and the flying boat is placed on lesser routes. The subsidiary passes to **UTA French Airlines** upon its formation from TAI and **Union Aeromarine de Transports (UAT)** in 1963.

In the fall of 1964, **Air Polynesie, S.A.**, a private company, begins flying from Tahiti to Moorea with a Grumman Goose; however, this new concern and its service is acquired by RAI during the summer of 1965. Operations continue apace, largely without change. Airports are, however, constructed at Rangiroa, Raiatea, and Moorea and the fleet is increased by the lease of two Douglas DC-4s from UTA and the purchase of a de Havilland Canada DHC-6 Twin Otter and a Britten-Norman BN-2 Islander.

On January 1, 1970, RAI is renamed **Air Polynesie, S.A.**

RESEAU AERIEN MILITAIRE FRANCAISE. *See* **AIR FRANCE**

RESEAU POSTALE. *See* **AIR BLEU, S.A.**

RESORT AIR: United States (1982–1989). Resort Air is founded by B. F. West at St. Louis on November 5, 1982 to provide scheduled third-level passenger and cargo services. An air carrier operating certificate is received from the FAA on April 11, 1983. Employing a fleet of 4 Fairchild-Swearingen Metro IIs, the carrier inaugurates feeder flights, largely in the tour market, to the Missouri communities of Columbia, Joplin, Lake of the Ozarks, and Springfield, plus Carbondale in Illinois.

On April 25, 1985, the company signs a code-sharing agreement with **Trans World Airlines (TWA)** and agrees to become a “TWExpress” commuter partner.

Three additional Metro IIs arrive at the company’s St. Louis hub during the summer wearing the modified red and white livery of the major. On August 5, Resort Air begins to feed St. Louis from seven cities in Missouri and Illinois. While working for a Chicago bank owed much money by the carrier, Hulas Kanodia begins to invest, becoming a silent partner.

Traffic figures are released for the first time and show enplanements of 85,214.

Airline employment rises 60% in 1986 to 200 and the first of 12 ordered Metro IIIs arrive in the spring. After purchasing the carrier from Koppler Enterprises on September 22, majority shareholders Jim Slemons and William Bell ask fellow investor Hulas Kanodia to serve as president. The **Trans World Airlines (TWA)** affiliate operator is now reorganized into two divisions: *TWExpress* and *Resort Commuter*. Reclassified as a large regional, the company enjoys significant success as its enplanements skyrocket 147.1% to 210,000.

The payroll is increased another 15.2% in 1987 to 228. By spring, the fleet has been enlarged by the addition of all 12 Metro IIIs. Orders are placed for three (later five) Avions de Transport Regional ATR42-300s. Four more new Metroliners will be received later in the year to replace the last four Metro IIs. Also during the spring, scheduled service is inaugurated to Chicago (ORD) from Terre Haute and Springfield.

Passenger boardings increase again, rising 53.9% to 316,882.

By early 1988 the Metro fleet has been increased to 16 machines. In June, the carrier receives a DOT 401 operating certificate and in September is awarded Part 121 certification by the FAA, authority that is needed to operate ATRs.

The “TWExpress” division flies a total of 332,940 passengers on the year, a 5.2% increase.

The first two of five ordered ATR42-300s are received in spring 1989 and one Metro is replaced. To better reflect its growth and to support the long-term goals of TWA, the company is renamed **Trans-States Airlines** in June. At this point, the Resort Commuter division is folded into the newly renamed carrier.

RESORT AIRLINES (1): United States (1945–1961). Clinton Davidson incorporates Resort Airlines (1) in September 1945 to promote the idea of inclusive air tours to New York’s Adirondack vacation areas. This concept becomes the forerunner of today’s package tours. Initially, air transport, connecting ground carriage and hotel accommodations are included for places such as Lake Placid and Saranac Lake.

Service is opened between Westchester County Airport and Saranac Lake on June 29, 1946. The first U.S. package tour is offered on June 17, with a 15-day national tour from Westchester County Airport. Additional Adirondack services are opened on June 22, 1947 and special tours are offered from New York City to the Great Lakes and Rocky Mountains beginning on June 13, 1948.

The carrier also seeks permission to operate to the Caribbean and applies to the CAB for a permit. That body initially rejects the company’s petition, but is forced, by decision of President Truman, to grant certification in June 1949. Resort will be allowed to operate its tours from a New York City base to Miami, Chicago, Washington, D.C. and points in

Canada and the Caribbean. In 1950, as Resort’s war-surplus, passenger-appointed Curtiss C-46s fly their new routes, the irregular carrier **Nationwide Air Transport Service** is purchased.

During a May 22, 1953 ferry flight, a C-46F with two crew is lost at Des Moines; there are no survivors.

A C-46F with 3 crew and 38 passengers en route from Camp Kilmer to Fort Knox under charter to the USAF, crash-lands at Standiford Field, Kentucky, on September 28 (24 dead). The fleet is upgraded in October when three Douglas DC-4s are acquired. The carrier withdraws from its other routes on November 12 to concentrate on Caribbean cruises.

A C-46F is lost in an accident at Chattanooga on January 22, 1954; although the plane must be written off, there are no fatalities. Resort Airlines (1) is ahead of its time and its tour packages, while somewhat popular, are not overwhelmingly so. As a result of financial reversals, Davidson’s company ceases operations in September 1955.

Nonscheduled charter flights are resumed, primarily for the U.S. military, in 1956 with two Lockheed L-1049H Constellations purchased under a DOD contract and in February 1957, the CAB renews the supplemental’s certificate. On March 15, it is named a codefendant in a \$19-million lawsuit on behalf of the 1953 Standiford Field victims; Resort accepts its share of the liability and settles out of court.

Tours are flown to the Caribbean once again between June and September 1959, but are unsuccessful. On November 24, an L-1049H is lost in a nonfatal accident. It is now decided to cease operations and the carrier is gradually closed down during the first half of 1960.

Through carefully planned and managed equipment sales and leases, including that of the last L-1049H to **World Airways**, investors do not go bankrupt; indeed, they are able to depart the scene on July 1, 1961 with some \$3 million when the books are finally closed.

RESORT AIRLINES (2): United States (1982–1986). The second Resort Airlines is established at Martin State Airport at Baltimore, Maryland, in 1982 to provide weekday passenger services to Dover in Delaware, Atlantic City, Ocean City, and Washington, D.C. (DCA). Daily roundtrips are duly inaugurated with a pair of Piper PA-31-310 Navajos and are sustained until 1986.

RESORT AIRLINES (PTY.), LTD. *See* **AUSTRALIAN REGIONAL AIRLINES QUEENSLAND (PTY.), LTD.**

RESORT AIRWAYS: United States (1965–1967). Resort is formed at Honolulu in the spring of 1965 to offer Aero Commander 680 flights to Kannapali. Revenue services begin on May 5 and are maintained until the little carrier is purchased by **Hawaiian Air Tour Service** in 1967.

RESORT COMMUTER AIRLINES (1): United States (1975–1980). **Resort Air Service** is established at Southern Pines Airport at New Bern, North Carolina, in early 1975, with an airline operating division known as **Resort Commuter Airlines (1)**. President George Parker’s carrier, “Carolina’s Wings to the Future,” inaugurates scheduled third-level passenger and cargo flights on March 16, linking the company’s base with Washington, D.C. (DCA), Raleigh/Durham, and the Virginia cities of Danville and Richmond.

Employing a fleet that comes to include Piper PA-23 Aztecs, PA-31-350 Navajo Chieftains, PA-32 Cherokee Sixes, Beech Bonanzas and King Air 100s, daily roundtrip services are maintained during the remainder of the decade and new markets are opened at Charlotte, Pinehurst, Rocky Mount, Newport News, and Washington, D.C. (IAD).

Late in 1980, the carrier, in order to better reflect its geographical service pattern, is renamed **Mid-South Commuter Airlines**.

RESORT COMMUTER AIRLINES (2): United States (1985–1990). Resort Commuter Airlines (2) is established at Los Angeles (LAX) in late 1985, beginning scheduled services with a pair of Cessna 402s on

December 2 over an Orange County routing to Palm Springs, Los Angeles (LAX), and Mexican destinations. Jack Furry is chairman with Mark Morro as vice chairman/president.

Operations continue apace in 1986 and in December the carrier becomes a code-sharing partner of **Trans World Airlines (TWA)**. "TWExpress" flights commence in January 1987 with three de Havilland DHC-6-300 Twin Otters feeding Los Angeles (LAX) from Oxnard, Orange County, Santa Barbara, Palomar/Carlsbad, Bakersfield, Inyokern, and Palmdale.

In January 1988, stockholder Jim Slemens acquires 70% interest in the cash-starved regional, becoming chairman; former **AirCal** Vice President William Bell is named president. The company becomes a "Pan Am Express" partner of **Pan American World Airways (1)** on November 1. Operations continue apace in 1989 and the regional encounters additional financial difficulties and must file for Chapter XI bankruptcy on November 22, the day of the last flight.

With assets of only \$525,000 and liabilities of \$17.1 million, RCA cannot recover and in February 1990 converts to Chapter VII liquidation.

RESORT COMMUTER AIRLINES (3): United States (1988–1994). Following their purchase of the St. Louis-based "TWExpress" code-sharing partner **Resort Air** in early 1988, majority shareholders Jim Slemens and William Bell oversee the reorganization of the carrier into two divisions: "TWExpress" and Resort Commuter Airlines (3). Employing five Convair CV-580s wet-leased from **Air Resorts**, the new RCA-3 subsidiary commences services to Phoenix and Baja California via Los Angeles and San Diego. Traffic figures are not released.

Operations continue apace during the remainder of the decade and into the 1990s. In 1993, the fleet includes 3 leased CV-580s and 1 Super CV-580. Unable to maintain viability in a time of general airline recession, the company disappears in 1994.

RESORTS INTERNATIONAL AIRLINES: United States (1984–1988). A subsidiary of casino, hotel, and real estate conglomerate Resorts International, Inc., RIA is created during the summer of 1984 to provide helicopter flights from New York City's West 30th St. Heliport (NYC) and Atlantic City, New Jersey. Back in 1982, Resorts International had briefly operated a DC-9-10 to Atlantic City from New York (LGA), but the service was too lightly employed to be sustained.

Columbus O'Donnell, special assistant to Resorts Chairman James Crosby, is given the job of setting up this convenient transport mode for casino gamblers. Initially, a contract is signed with West Chester, Pennsylvania-based **Keystone Helicopters** to operate a pair of Sikorsky S-76s purchased by Resorts in 1983. Late in that year, Crosby elects to establish his own airline and O'Donnell employs Matthew Zuccaro as general manager.

Following negotiations, three of **Greenlandair/Gronlandsfly, A.S.**'s eight Sikorsky S-61Ns are purchased for \$1.5 million each. These are repainted in a rainbow color scheme consisting of colored bands of indigo blue, fire engine red, sky blue, and psychedelic lime green. With interiors designed by Valerian Rybas, the S-61Ns begin a scheduled New York City to Atlantic City shuttle on September 1. One Sikorsky is employed to fly the shuttle, one for backup, and one for charters.

During the first six months of 1985, a service is offered from NYC to Brainard Field at Hartford, Connecticut, but lack of traffic leads the company to abandon the service. A second new offering, from NYC's Battery Park heliport, must also be abandoned for the same reason. Twice-daily and sustained flights are inaugurated from Teterboro Airport on September 6.

Charter flights are undertaken for football fans, "flight-seeing" tours over NYC for wealthy customers celebrating birthdays and, on behalf of the U.S. Department of the Interior, for foreign dignitaries and UN officials needing NYC-area lift.

Operations continue apace in 1986–1987 and during these years, the airports at Morristown, New Jersey, and Westchester County, New York,

join the route network. New York real estate tycoon Donald Trump now enters the picture, becoming chairman of Resorts International in 1988. The carrier is at first renamed **Trump's Resort Air**; however, that title is quickly changed to the simple **Trump Air**.

REUNION AIR SERVICES, S.A.: Reunion (1975–1989). This subsidiary of **Air France** is established at St. Denis on Reunion Island in the Indian Ocean on January 1, 1975. Actual start-up operations are delayed until August 8, 1977. With Gerard Etheve as general manager and a workforce of 20, the airline inaugurates scheduled passenger flights linking Aerodrome de Gillot with the Comoro Islands destination of Mayotte.

Charter flights are also undertaken to the Comoros, as well as to Madagascar and Mauritius. Within 3 years, the fleet grows to include 1 Hawker Siddeley HS 748, 1 Piper PA-31-350 Navajo Chieftain, 1 Piper PA-31-310 Navajo, and 1 Aerospatiale SA.315B Lama helicopter. Operations continue apace and by 1981 enplanements total 30,400.

The employee population is increased by 10.5% in 1982 to 42 as another Chieftain joins the fleet. Passenger boardings jump 35.4% to 13,000. During the 1980s, the French rotary-wing operator **Heli-Union** obtains shareholding and outfits the company with four helicopters: two Aerospatiale Lamas and two Aerospatiale Alouettes.

In 1989, the company is reformed as **Air Reunion, S.A.**

REX AVIATION (NZ), LTD.: P.O. Box 14107, Kilbirnie, Wellington, 36030, New Zealand; Phone 64 (4) 387-2907; Fax 64 (4) 387-2414; Code N2; Year Founded 1989. Rex Aviation, Ltd. is established in 1989 as a Tranzair commuter affiliate of **Ansett New Zealand, Ltd.**, offering connecting services across Cook Strait. General Manager John Lanham also oversees the inauguration of local flights with a fleet of Piper PA-31-250 Navajo Chieftains.

Rex Aviation begins Tranzair roundtrips in October 1991 between Wellington and Blenheim.

In the late fall of 1995, the carrier takes over the **Northern Air, Ltd.** Tranzair link between Whangarei and Auckland.

The Tranzair commuter brand is replaced on February 29, 1996, by a new Ansett New Zealand Regional service. Rex Aviation takes over the Whakatane to Auckland route previously flown by Bell Air, Ltd. Indeed, it now provides all Ansett New Zealand Regional flights with a fleet of 5 Embraer EMB-110P-1 Bandeirantes.

In October 1997, General Manager Lanham's concern, operating as Ansett New Zealand Regional, ceases services to Whakatane. The Bandeirantes are relocated to the Auckland-Whangarei sector, replacing the Piper PA-31-350 Navajo Chieftains that had operated the route previously.

Service is maintained in 1998–1999. In June of the latter year, Rex becomes a wholly owned subsidiary of **Ansett New Zealand, Ltd.** and all aircraft are repainted in modified ANZ colors.

Parent **Ansett New Zealand, Ltd.** is sold by News, Ltd. in March 2000 to a New Zealand investors group headed by the airline's CEO Kevin Doddrell and Clavell Capital executive David Belcher. In early June, the carrier is renamed Tasman Pacific Airlines of New Zealand, Ltd.; shortly thereafter, the renamed entity is awarded the first ever **Qantas Airways (Pty.), Ltd.** franchise and is rechristened **Qantas New Zealand, Ltd.** on June 26. At this point, Rex, which has been wearing ANZ colors and an ANZ banner on its Jetstream 32s, begins to use the marketing name Tasman Pacific Connection.

RFG REGIONALFLUG, GmbH. (GERMAN REGIONAL AIRLINE): Germany (1975–1993). Dr. Albrecht Knauf and Reinhard Santner form RFG-Reise und Industrieflug, GmbH. (Private and Business Flying, Ltd.) at Dortmund in 1975 to provide Cessna 404 Titan charter flights for specialists of the German computer firm Nixdorf. Initial capitalization is DM 5 million and ownership is split between the two men on an 85 to 15 basis, respectively, with Santner assuming the post of general manager.

The initial scheduled service, flown by the Titan, is inaugurated thrice-weekly over a route Dortmund–Munich in April 1979. In 1980–1981, seasonal services are introduced from Dortmund to five German North Sea resorts.

With a new airport completed and a de Havilland Canada DHC-6 Twin Otter newly delivered, twice-daily scheduled operations are inaugurated Paderborn–Munich and Frankfurt in the spring of 1982. Summer holiday flights are also started to five German North Sea resort islands.

The route network is extended in 1984 by twice-daily flights Dortmund–Stuttgart in May and Paderborn–Stuttgart in September. Fairchild Metros begin to join the fleet and a three-month test (eventually unsuccessful) of the Dornier 228-100 begins in November.

Daily Paderborn–London (LGW) services begin on April 1, 1985 as do weekend Dortmund–Innsbruck operations. The services to Britain, RFG's first foreign destination, are made as part of the **British Caledonian Airways, Ltd. (BCAL)** commuter network. Also in April, the company name is changed to RFG Regionalflug, GmbH. (Regional Flight, Ltd.), with the English-language subtitle German Regional Airline. An order is placed for two Avions de Transport Regional ATR42-300s and the company joins the START computerized reservations system of **Deutsche Lufthansa, A.G.**

On January 7, 1986, the Dortmund–Munich route is extended on a daily basis to Klagenfurt, Austria. During the summer, Dortmund–Frankfurt feeder flights begin on behalf of Deutsche Lufthansa. Managing Director Reinhard Santner's fleet now includes 1 Beech Super King Air 200, 1 Cessna 441 Conquest, 1 Dornier 228-200, and 1 Fairchild Metro III. The first ATR42-300 is delivered in August 1987, along with a Cessna 404 Titan and five Metro IIIs.

Enplanements for the year total 80,000.

The second ATR42-300 arrives in April 1988 and is placed in service to the major markets of Dortmund, Frankfurt, Munich, and Stuttgart. During the summer, Stuttgart to Lyon service is initiated and in the fall, ATR42-300 roundtrip flights begin to Malta. As a result, enplanements in 1989 climb to 137,800. A \$150,000 operating profit is generated.

Company employment swells 25.7% in 1990 to 330 and the fleet is altered; gone are the Cessnas, replaced by two additional ATR42-300s. Twice-weekly service is inaugurated in September from Dortmund to Dresden.

Passenger boardings leap upward by 33.1% to 193,000 and revenues ascend 33.3% to \$32 million. Operating profit grows to \$1.7 million.

Two more ATR42s join the fleet in 1991. In 1992, the Fairchild is replaced by two more ATR42-300s and an ATR72. The carrier is merged with **NFD (Nurnberger Flugdienst, GmbH.)** on January 1, 1993 to form **Eurowings NFD + RFG, GmbH.**

RHEINLAND AIR SERVICE, GmbH.: Germany (1971–1996). RAS is organized at Krefeld in 1971 to provide local, nonscheduled, third-level, all-cargo services. Operations continue with little change over the next decade and in 1985 the company begins flying to both domestic and regional destinations. Through the end of the decade, flight equipment consists of a Cessna 404, 421, and 425.

In 1991, two Shorts 360-300Fs are acquired. Operations continue with success in 1992 and in 1993 President Jurgen Ossman's fleet is increased by the addition of a third Shorts freighter and a Cessna 425 Conquest I. Airline employment stands at 80 as operations continue into 1994–1996. On December 19 of the latter year, the company is purchased by **LTU International Airways, GmbH.** and reformed into its commuter subsidiary **RAS Fluggesellschaft, mbH.**

RHEINTALFLUG-ROLF SEEWALD GESELLSCHAFT, mbH.: Bahnhofstrasse 10A, Seegalerie, Bregenz, A-6900, Austria; Phone 43 (5574) 48800; Fax 43 (5574) 488008; <http://www2.vol.at/Rheintalflug>; Code WE; Year Founded 1973. Rheintalflug is established at Hohenems in Vorarlberg province during 1973 to provide single-engine air taxi services. Shareholding is divided between founder Rolf Seewald and members of his family, who form Seewald,

GmbH. In 1978, the fleet is enhanced by the addition of a Cessna 414A Chancellor.

In early 1984, founder Seewald, with himself as president and his wife, Renate Moser, as vice president, reforms his company into an airline and makes ready to operate it with a small fleet of twin-engine planes: 2 Cessna 414A Chancellors, 2 Piper PA-28 Cherokees, and 1 Piper PA-32 Cherokee Six. Scheduled services are undertaken, beginning in May, linking the carrier's base with Vienna.

In 1985–1987, two Gulfstream Aero Commander 900s are acquired and flights begin to Parcels Viennen and Brussels. Friedrichshafen is added to the growing route network in the summer of 1988. Enplanements for the year total 10,000.

An order is placed early in 1989 for a de Havilland Canada DHC-8-100. It arrives in early fall and beginning in October is placed on the Vienna to Friedrichshafen route.

Operations continue apace in 1990 as the carrier negotiates shareholding and replacement services with **Austrian Airlines, A.G.** The flag carrier acquires 49% shareholding in December as the regional agrees to begin flying a route under its "OS" designator during the early part of the following year.

The Aero Commanders are replaced in April 1991 with a second de Havilland Canada DHC-8-300. In the spring, twice-daily, weekday scheduled Graz to Zurich replacement service is introduced on behalf of **Austrian Airlines, A.G.**

Two more of the Canadian turboprops are obtained in 1992. President Seewald's 75-employee company airline now flies replacement services on behalf of the flag carrier to Frankfurt, Graz, Linz, and Zurich as well as its own Altenrhein to Vienna route. Throughout the year, discussions are held with Austrian concerning its possible purchase of 51% majority shareholding.

Operations continue apace in the tenth anniversary year of 1993. In February, **Austrian Airlines, A.G.** announces that it has decided to pass on a possible acquisition of majority interest in Rheintalflug, suggesting that it is, in fact, in its interest to keep the efficient regional independent and operating replacement services on its behalf.

During the decade of service, over 210,000 passengers have been transported. Revenues during 1994, however, decline 7% to \$14.92 million.

Flights continue largely without change in 1995–1996. Passenger boardings during 1996 surge 56.3% to 75,000.

The workforce is increased by 5.6% in 1997 to 95. Early in the spring, a DHC-8-400 is ordered (with an option on a second) for the Altenrhein route; delivery is scheduled for the year 2000. A number of replacement flights are undertaken under contract to **Deutsche Lufthansa, A.G.** On behalf of the German national airline, thrice-weekday roundtrips are initiated between Friedrichshafen and Berlin, with twice-daily return service on Saturdays and daily on Sundays. Enplanements reach 101,000.

Company employment totals 120 in 1998. The arrangement with the German major is formalized on April 1 as Rheintalflug signs the papers to become a member of the "Team Lufthansa" regional network. All three of the carrier's DASH-8s are repainted in the partnership color scheme and operate for **Deutsche Lufthansa, A.G.** from Friedrichshafen to Cologne, Berlin, and Hamburg and from Munster/Osnabruck to Stuttgart. Enplanements for the year surge to 143,000 and revenues total \$21.7 million.

In 1999, orders are placed for an Embraer ERJ-145 Amazon as "Team Lufthansa" flights continue. Dual designator service with **Austrian Airlines, A.G.** continues to also be operated five times daily from St. Gallen/Altenrhein to Vienna. The carrier's new Embraer ERJ-145 arrives at Altenrhein on the evening of December 19.

Enplanements for the year total 200,000. Revenues of \$27 million are generated and expenses are \$26.1 million. There is an operating profit of \$900,000 and net gain of \$2.9 million.

Airline employment at the beginning of 2000 stands at 140, a 16.7% increase over the previous 12 months.

The ERJ-145 is christened *Vorarlberg unter Land* (after the carrier's home province in western Austria) by Ilga Sausgruber, wife of the gov-

error, in a special January 10 ceremony. The next day, founder Seewald personally pilots the inaugural flight to Vienna. Following workup, the new jetliner enters service in late March between Vienna and Altenrhein. It is announced on March 29 that the last DHC-8-100 will be retired by the end of April.

Orders for another two ERJ-145s are placed on July 27 and August 4, respectively. When these join the fleet, they wear "Team Lufthansa" colors. At the same time, the DHC-8Q-400 order is deferred.

The second ERJ-145 arrives at the end of October; christened *Stadt Vienna*, it operates the Vienna–Altenrhein route, freeing up the *Vorarlberg under Land* to offer a second roundtrip from Friedrichshafen to Berlin and two new return flights from Friedrichshafen to Hamburg. Bürgermeister Markus Linhart christens the third ERJ-145 *Stadt Bregenz* during special ceremonies on November 24. It quickly replaces the DHC-8-300 flown between Friedrichshafen and Frankfurt.

Enplanements for the year total 250,000 and revenues of \$28.3 million are generated. In February of the new year, it will be announced that the regional is to be purchased by Austrian Airlines Group for an undisclosed sum.

RHINE-AIR, A.G.: Switzerland (1979–1982). Basel-based **Air-Sea Service, A.G.** is reformed on April 1, 1979 and renamed. Ernst Ballmer becomes chairman/managing director with Fred Hofer as director of operations. The 20-employee, third-level company possesses an inaugural fleet of 2 Nord 262s, 1 Britten-Norman BN-2 Islander, and 1 Piper PA-31 Navajo. Destinations served include Munich and Geneva.

Enplanements skyrocket 138.8% to 5,524.

Operations continue apace in 1980 and in 1981 an Australian-made GAF Nomad N.24A, a Cessna 340, and a Mooney M20J join the fleet. Despite the changeover, the carrier is soon in financial difficulty due to over expansion, higher fuel costs, and especially the world recession. It is unable to fly beyond 1982.

RHOADES AVIATION: 4770 Ray Boll Blvd., Columbus, Indiana 47203, United States; Phone (812) 372-1819; Fax (812) 378-2708; <http://www.rhoades-aviation.com>; Year Founded 1976. Rhoades is established at Columbus, Indiana, in 1976 to provide FBO, flight training, and charter activities. Over the next 24 years, the concern becomes a well-known all-cargo carrier, employing a mixed fleet of Convair CV-240s and Douglas DC-3s.

Freight flights are made to and in Mexico on behalf of the automobile, retail, and computer industries. Rhoades aircraft are also found throughout the Caribbean, operating ad hoc charters to St. Thomas, St. Croix, the Dominican Republic, and Haiti. Cargo services are also provided on behalf of various shippers in the U.S. and Canada. Express and passenger charters are offered employing Cessna 310s, 402Cs, and 421s.

Humanitarian service in Africa has long been a hallmark of Rhoades activity. Upwards of 200 hours a week are flown weekly under contract to the UN, International Red Cross, and Christian relief organizations.

Company employment at the beginning of 2000 stands at 50 and estimated sales of between \$5 million and \$9.9 million are now generated. On June 22, two each Convair CV-600F and CV-640Fs, previously operated by **Kitty Hawk Air Cargo**, are obtained.

RHODESIA AIR SERVICE, LTD.: Southern Rhodesia (1961–1966). RAS is established at Salisbury in late 1961 to operate passenger charters to Central African destinations. Revenue flights commence in early 1962 with a pair of Douglas DC-3s. One of the Douglas transports crashes at Salisbury and the second is lost over Katanga. Late in the year, a DC-4 is acquired.

During the spring of 1963 the company receives authority to operate every-two-weeks charters to Mauritius. The DC-4 begins these, but soon breaks down in need of expensive engine repairs.

During the fall, RAS is authorized to provide scheduled services from Salisbury to Mauritius via Santa Carolina, Hippo Valley, and Fort Victoria. The DC-3 lost in Katanga the previous year is returned in December.

£100,000 pounds in debt, the company declares bankruptcy in January 1964. Just when it appears that RAS will be liquidated, **Autair International Airways, Ltd.** from the U.K. and Salisbury-based **Skyways, Ltd.** come forward to offer a rescue plan and subsequently, working capital.

The Salisbury to Mauritius license is passed to **Central African Airways Corporation** in 1965. Unwilling to sustain the money-losing carrier further, its British investors pull the fiscal plug in 1966 and shut it down. Its routes and two DC-3s are sold, for the most part, to CAAC.

RHODESIA UNITED AIR CARRIERS, LTD.: Southern Rhodesia (1960–1968). A number of small Southern Rhodesia air operators are merged at Salisbury in December 1960 to form this larger enterprise. Concerns taken over include **Air Carriers, Ltd.**, **Commercial Air Services (Rhodesia), Ltd.**, Victoria Falls Airways, Ltd., Fishair, Ltd., Flights, Ltd., and the assets of **Hunting-Clan African Airways, Ltd.**

Capitalization of £100,000 is provided by **Central African Airways Corporation**, **British United Airways, Ltd.**, and United Transport Overseas, Ltd. Sir Thomas Chegidden is named chairman and bases are established at Salisbury, Bulawayo, and Victoria Falls.

Charter and flight-seeing services are provided by the combined fleet of the merger partners, the largest units of which are a pair of Piper PA-23 Apaches and a Cessna 310.

While on a positioning flight, a chartered Douglas DC-3 with three crew crashes while on final approach to Salisbury Airport on November 22, 1961 (two dead).

Slightly two years after start-up, United Transport Overseas, Ltd. takes over all shareholding in February 1963. C. Boyd-White becomes chairman and the fleet is improved by the addition of three Beech 55 Barons, a PA-23 Aztec, and a de Havilland DH 104 Dove.

Airline employment stands at 30 in 1964 as a second C-310 is acquired. En route from Luabo to Salisbury on April 1, 1965, a Baron carrying six passengers crashes near Vila de Sena, 200 mi. N of Beira; there are no survivors.

Flights, largely providing tourists with sight-seeing junkets to see big game, continue in 1966. The two C-310s are sold early in 1967 and the company shuts its doors at the beginning of the following year.

RHODESIAN AERIAL TOURS, LTD.: Southern Rhodesia (1922). Maj. A. M. Miller establishes this pioneering concern in Bulawayo in early 1922 to provide nonscheduled air transport of people and goods. Rhodesia's first commercial air concern, RAT begins services in May with an Avro 504K, christened *Matabele*, and flown by Miller.

The *Matabele* rejects takeoff from Rusape on August 13 and is badly damaged. Miller elects not to repair the aircraft, liquidating the company instead. The pilot now migrates to South Africa, where he will play a role in the formation of **Union Airways (Pty.), Ltd.**

RHODESIAN AND NYASALAND AIRWAYS, LTD. (RANA): Rhodesia/Nyasaland (1933–1940). RANA is formed at Bulawayo on October 12, 1933 by the merger of the small competitors **Rhodesian Aviation Company, Ltd. (RAC)** and **Christowitz Air Services, Ltd.** Rhodesia Railways General Manager H. Chapman, former chairman of RAC, is named RANA chairman. Other board members include Col. T. Ellis Robins (later Lord Robins), general manager of the British South Africa Company, and Garth Trace, Southern Africa regional manager for **Imperial Airways, Ltd.** Capitalization of £25,000 is provided by the trustees of the Beit Railway and also by **Imperial Airways, Ltd.**

Shareholding is divided between Beit (13,000), Imperial (8,000), and Rhodesian Aviation Company's former executives (2,477).

The former RAC Salisbury to Johannesburg route via Gatooma, Que Que, Gwelo, and Bulawayo, continues to be flown with four de Havilland DH 80A Puss Moths.

The weekly Blantyre to Salisbury route flown by Christowitz is assumed on March 8, 1934, and operated with two former Christowitz Puss Moths. Seconded over from **Imperial Airways, Ltd.**, Capt. M. H.

Phillips completes the first RANA roundtrip on March 9. A total of 3,639 letters are carried on the flight from Blantyre to Salisbury (including 626 from South Africa or South West Africa); at Salisbury, they are loaded aboard an Imperial plane that reaches Cape Town on March 10. The first return flight to Blantyre carries 500 letters from South Africa and 131 from London.

In April, a Westland Wessex is leased from **Imperial Airways, Ltd.** Weekly Blantyre to Ndola Fox Moth, later Wessex, service is initiated on May 5 via Salisbury, Bulawayo, Livingstone, Lusaka, and Broken Hill. Bulawayo is dropped as a stop on the Johannesburg route on May 19.

Company headquarters are transferred to Salisbury during the summer. A DH 85 Leopard Moth is placed in service during October.

A total of 1,925 passengers have been transported by year's end.

In July 1935, the carrier signs an agreement with the Menica Trading Company of Beira, under which that community will be linked to the **Imperial Airways, Ltd.** African route. RANA, on August 1, launches two thrice-weekly services to Beira from Salisbury and the other from Blantyre, this latter actually starting on August 5. The inaugural return flights over the new routes are undertaken on August 3 and August 6, respectively.

The Wessex is replaced by a DH 89 in November. Enplanements this year, despite the new routes, decline to 2,319.

The first DH 90 Dragonfly is received in August 1936, but customer bookings for the year decline again, falling to 2,103.

Roundtrip frequencies on the Salisbury to Johannesburg are increased to six times a week on February 1, 1937.

When the Empire Air Mail Programme is introduced in June, RANA is given feeder responsibilities over these routes: Beira–Blantyre, Beira–Bulawayo via Salisbury, and Beira–Blantyre via Salisbury. Twice-weekly Beira–Lusaka flights via Salisbury and Blantyre commence on June 30 followed by weekly Beira–Johannesburg service on July 1 via Salisbury, Bulawayo, and Petersburg; both routes are designed to connect with **Imperial Airways, Ltd.** flights stopping at Beira.

Capitalization is increased to £70,000 in October and enplanements for the year climb back up to 2,570.

Capitalization grows again in January 1938, rising by £30,000; 48,295 £1 shares are outstanding.

Dragon Rapide service from Salisbury to Johannesburg is introduced on February 1, 1938 via Gatooma, Que Que, Gwelo, Bulawayo, Petersburg. Twice-weekly Dragonfly flights from Blantyre–Fort Jameson via Lilongwe commence on May 23.

Lusaka–Fort Jameson direct weekly roundtrip service is begun on August 10 and in September, twice-weekly Salisbury–Beira via Umtali return frequencies are undertaken.

In terms of passenger boardings, the year is the kindest yet as 3,448 passengers are carried.

The first DH 84 Dragon is received in January 1939. The fleet now also includes 4 Dragon Rapides, 3 Leopard Moths, and 2 Dragonflies. World War II begins for Rhodesia on September 3.

Passenger bookings reach their zenith this year, rising to 3,579.

On February 1, 1940, the company is purchased by the government of Southern Rhodesia and transformed into an air force communications squadron under the title **Southern Rhodesian Air Services**. The company is officially liquidated on July 8, 1946.

RHODESIAN AVIATION COMPANY, LTD.: Rhodesia (1929–1933). Capitalized at £7,500, RAC is formed at Bulawayo, Southern Rhodesia, on April 17, 1929 under subsidy from the government of Southern Rhodesia and the trustees of Sir Alfred Beit's Beit Railway and led by Capt. Benjamin Roxburgh-Smith. A six-member board of directors is established with Francois Issels as chairman and Roxburgh-Smith as managing director/chief pilot.

The de Havilland aircraft distributorship is taken over from **Rhodesian Aviation Syndicate, Ltd. (RAS)**. Technical advice is provided by **Cobham-Blackburn Air Lines, Ltd.**, which had earlier concluded arrangements with the RAS and now also agrees to provide aircraft.

When the expected Blackburn Bluebird biplane is late in delivery, RAC acquires an Avro Avian in June. A second Avian arrives at Bulawayo in November as D. S. "Pat" Judson becomes the assistant chief pilot. Regularly scheduled weekly roundtrips are started to Salisbury. Investors are able to cover the year's £395 loss.

Alan Cobham travels to company headquarters in January 1930 to discuss future plans with the board. Roxburgh-Smith is notified in early February of the arrival of the crated Bluebird at Cape Town; traveling down to that South African seaport, he supervises its assembly and flies it up to Bulawayo, arriving on February 15.

The year's most important charter customer is C. J. Christowitz, who is flown from Salisbury to Limbe in Nyasaland. Not only is he the first passenger flown to that point, but he will later start his own pioneering service there.

Imperial Airways, Ltd. assumes all **Cobham-Blackburn Air Lines, Ltd.** interests in Africa in early 1931. The British state carrier immediately withdraws subsidy, leaving the small airline to flounder. Fortunately, both the Beit Railway and the Rhodesian government continue to provide aid.

Upon his permanent return to England in May, Roxburgh-Smith is succeeded as managing director by Pat Judson. The sale of an unspecified number of shares brings in sufficient funds to purchase two de Havilland DHA 80 Puss Moths that are assigned to the weekly Bulawayo–Salisbury route. While on a training flight with a student pilot, the Puss Moth transporting Managing Director Judson crashes on November 20; both men are killed.

The fleet is grounded for two weeks for safety checks, while Michael Hawkings-Pearce is brought on as the new managing director. A total of 400 passengers are flown on the year.

Sir Alfred Beit establishes the Beit Trust on February 10, 1932, for the improvement of air transport on the Imperial route; he capitalizes it at £50,000. **Airwork, Ltd.** executive H. Nigel Norman is asked to come and conduct a survey after which he might advise the Trust on the development of an air network.

A total of 1,229 passengers are flown on the year.

Stockholders of RAC meet in a special called session in January 1933 to consider a buyout proposal from **Imperial Airways, Ltd.** received late the previous year. The decision is taken not to sell.

A DH 83 Fox Moth is acquired in the late spring of 1933 and is used by Managing Director Hawkings-Pearce to personally start weekly passenger and cargo roundtrips on July 27 from Salisbury to Johannesburg, via Gatooma, Que Que, Gwelo, and Bulawayo.

By summer, **Airwork, Ltd.** executive Norman has completed his aerial survey and prepared a set of recommendations. Chief among the latter is the establishment of a single state-supported feeder to replace the independents now operating in the region.

As a result of the Norman Report, the board votes on August 4 to turn over assets to a new concern about to be formed with Beit and government backing. On October 12, RAC is merged with rival **Christowitz Air Services, Ltd.** to form **Rhodesian and Nyasaland Airways, Ltd.** Prior to its dissolution, RAC has flown 1,250 passengers on the year.

RHODESIAN AVIATION SYNDICATE, LTD.: Southern Rhodesia (1927–1929). One day in the summer of 1927, Capt. J. Douglas "Dug-gie" Mail shows up at Bulawayo from Natal with a crated, war-surplus de Havilland DH 6B. He has come to join with B. M. Cairns, owner of the Motor and Cycle and Supply company, to set up a flying service.

Mail and Cairns meet with prominent local citizens. Receiving local support, as well as the financial backing of Filabusi mine owner Harry L. Stewart, the two men to set up RAS. Other members of the syndicate include A. G. Hay, A. S. Redrup, and barrister John Coghlan.

Having meanwhile assembled his de Havilland, which is christened *Baby Tank*, Mail begins the company's operations with a flight from the local racetrack on August 14. The new concern will be contracted to fly a number of charters.

On September 20, the Duc de Nemours hires Mail to transport him to Plumtree, 60 mi. SW of Bulawayo. Insufficiently powered, the plane

makes a forced landing while en route, forcing the pilot and his passenger to walk most of the way back to town. The *Baby Tank* is carted back to Bulawayo, but not repaired.

Director Hay, meanwhile, is in London on business. He is notified of the de Havilland's demise and asked to acquire another aircraft. Meeting with Sir Geoffrey de Havilland, Hay arranges for RAS to be his first distributor in Southern Africa. A DH Moth is shipped down to Durban, where Capt. Mail uncrates and assembles it, flying it back to Bulawayo on December 30. On the last day of the year, the plane is christened *Bulawayo*.

The first charter operated by the *Bulawayo* occurs on January 11, 1928, when a gentleman buys passage to his brother's ranch in the Wankie District. A month later, Mail flies down to Salisbury to give aerial demonstrations and provide flight-seeing opportunities for local citizens.

Capt. Mail leaves RAS at the end of February to accept another post and is replaced by a Capt. Wright. En route to Salisbury with a Maj. Newman on March 4, Wright flies the *Bulawayo* into a tree; although the aircraft must be written off, neither Wright nor Newman are hurt, though Wright decamps. RAS is left without either a plane or a pilot.

Pioneering British airman Alan Cobham, fortunately, happens to be in the area in late March and hears of the RAS predicament. He meets with the company's principals and later, through the efforts of Francois Issels in England, is persuaded to take over the concern in February 1929 as part of a larger undertaking.

RIAIR, A.S.: 1 Melluzu St., Riga, LV-1067, Latvia; Phone 371 (2) 424 283; Fax 371 (2) 860 189; <http://www.riga-airlines.com>; Code GV; Year Founded 1994. Riga Airlines (Rigas Aeronavijas, A.S.) goes bankrupt during the summer of 1994. President M. Karklins's company is immediately reborn as RiAir, complete with new a new corporate identity and aircraft livery. In September, code-sharing flights begin with **Transaero Airlines** on its routes from Moscow to Riga to London (LGW) and Paris. A B-737-2C9A is chartered from Transaero in December.

Airline employment stands at 46 in 1995 as the new Russian Boeing enters service in January wearing dual Transaero/RIAIR markings. The Riga-Moscow route is flown as a monopoly and competing **Air Baltic, A.S.** is prevented from serving Moscow.

Enplanements total 67,751 and revenues reach \$3.61 million. Still, there is a \$73,000 operating loss.

The US-made jetliner is able to help the company increase its customer bookings in 1996 to 86,654.

Flights continue in 1997. In December, **Transaero Airlines** purchases a 30% stake. Passenger boardings this year slide to 68,949.

Service is maintained in 1998. Late in the year, a homepage is opened on the Internet's World Wide Web. Customer bookings fall 32.8% to 40,000.

Airline employment in 1999 stands at 46. By year's end, the company is flying 3 **Transaero Airlines** "Baby Boeings."

RICH INTERNATIONAL AIRWAYS: United States (1970-1997). Jean Rich establishes a carrier named for himself in late 1970 beginning all-cargo operations from his Miami base with a Beech 18 in January 1971. Three Curtiss C-46A freighters are acquired during the next four years as tramp freighter flights continue to destinations throughout the southeast, especially Atlanta.

En route from St. Petersburg, Florida, with a cargo of 9,000 pounds of dynamite on August 8, 1975, the crew of a C-46F discovers, when both engines stop, that the plane has not been refilled. A successful ditching is carried out in the sea .5 mi. NW of Aguadilla; both men are rescued.

In July 1976, Rich receives CAB certification as a supplemental and is renamed Rich International. All-cargo flights are authorized and some started in 1977-1978 between Miami and Atlanta and destinations in Canada, Mexico, Central America, and the Caribbean.

By 1979, the fleet has been increased to include not only the 2 surviving Curtiss Commandos, but also 4 Douglas DC-6As and 1 DC-8-

33F. An engine failure causes the crew of a C-46A to ditch their aircraft off the Bahamas on September 12; there are no fatalities.

For the year, 9.53 million FTKs are hauled, a figure that plunges by 26.5% in recessionary 1980 to 7.53 million. Still, profits are earned: \$380,000 (operating) and \$40,000 (net).

Three former USAF C-118As are purchased in 1981 and converted to civil DC-6A standard.

Cargo hauled increases to 11 million FTKs while the workforce is increased to 50. Revenues advance 8.4% to \$6.38 million while costs, although up by 8.8%, are kept in check at \$5.99 million. The operating profit is \$393,000 and net gain is less than that of the year before, \$15,000.

In early 1982, Rich is authorized to inaugurate passenger group charter flights. Two DC-8-55CFs are acquired and these are employed to launch passenger flights in July from both Florida and New York to Europe, the Caribbean, and Hawaii.

A total of 26,000 passengers and 3.6 million FTKs are operated during the remainder of the year.

Overextended with debts near \$4 million and fighting the effects of the recession, Rich enters Chapter XI bankruptcy in June 1983, while continuing operations. Bookings climb 180.8% to 76,000.

On April 16, 1984, the FAA, after a safety audit, briefly suspends the 100-employee carrier's operating permits, claiming "hundreds of safety violations" as a result of poor maintenance and bookkeeping. When these difficulties are resolved, the certificates are reinstated in mid-May and flights are resumed.

In the fall, the federal bankruptcy court approves a refinancing plan, whereby George Batchelor's Batchelor Enterprises, parent of **Arrow Air**, contributes \$1 million in loan capitalization. The arrangement grants Batchelor the right to acquire up to 50% shareholding at a time of his choosing.

Passenger enplanements fall 24.9% to 135,000 and the year's losses are \$608,643 (operating) and \$1.1 million (net).

The payroll is increased by 21.2% in 1985 to 63 and the fleet now includes 3 DC-8-62s and 1 DC-6AF.

Still attempting to resurface from bankruptcy, the carrier's passenger boardings fall 52.6% to 64,054. On the other hand, freight is down only 8.4% to 155.5 million FTKs. Revenues decline 17.4% to \$12 million, but costs are down 29.1%. This happy inequality leads to an operating profit of \$1.28 million and net gain of \$1.06 million.

The employee population swells to 127 in 1986 as the Miami-based charter operator resumes its upward progress. A government fine, levied because company pilots have either not received appropriate training or have exceeded their flight time limitations, does not delay progress.

Customer bookings increase 58.1% to 101,577.

Passenger boardings zoom upward in 1987 by 34.9% to 143,856. Still, the year is not profitable as losses of \$466,000 (operating) and \$1.28 million (net) are suffered. Among the costs is another government fine—\$30,000—once again due to excessive pilot flight times.

The workforce is cut by 9.4% in 1988 to 116.

Passenger boardings rise 2% to 105,452, but revenues fall 20% to \$18.2 million. Although the operating loss jumps to \$759,000, there is a net gain of \$1.8 million.

Airline employment grows 29.3% in 1989 to 150, but passenger boardings fall 14.5% to 90,260. Revenues dip 6.3% to \$17.08 million, expenses decline 19.5% to \$15.28 million, and operating income of \$1.8 million is realized. Net profit dips to \$1.32 million.

Neither fleet nor employee count is changed in 1990. One of the DC-8-62s is employed during the fall to begin a new transatlantic package service on behalf of the Swiss tour operator Ferien-Service.

The federal government again fines the airline after inspectors learn that pilots have not received required training, check pilots have not maintained appropriate records, and pertinent information has been omitted from required reports.

The traffic free fall continues. Customer bookings plunge 60.5% to 30,000 and revenues drop 41.3% to \$10.03 million. Fortunately, expenses

are down 36.4% to \$9.72 million and allow an operating profit of \$311,042. A net loss of \$510,836 is, however, suffered.

Company employment is cut by 33.3% in **1991** to 100 and the fleet now includes 2 DC-8-62s.

Passenger boardings skyrocket 150% to 75,304 and revenues zoom upward a spectacular 153.8% to \$25.47 million. Expenses rise by an even greater percentage, 159.3%, to \$25.21 and allow an operating profit of \$258,093. Net gain reaches \$810,375.

Fifty new employees are hired in **1992** and the fleet is more than doubled by the addition of a DC-8-63 and three Lockheed L-1011 TriStar 1s, the latter from the assets of **Eastern Air Lines**.

As a consequence, customer bookings surge 128% to 171,000. Revenues hit \$40.2 million, but expenses are more and an operating loss of \$126,396 is taken. There is a net profit of \$741,823.

In **1993**, Rich President William Meenan oversees a workforce of 253. The fleet comprises the 3 ex-EAL Lockheed L-1011 TriStar 1s, 2 DC-8-62s, and 1 each DC-8-63 and L-1011-500. The latter is newly acquired, but previously operated by the German charter operator **LTU (Lufttransport Unternehmen, KG.)**. In addition to a scheduled route between New York and Georgetown, Guyana, the carrier continues to operate worldwide civilian and military charters from Miami to Brazil, Argentina, and Lisbon and from Orlando to Glasgow, Belfast, and London (LGW).

Passenger boardings increase another 112.7% to 363,678 and revenues swell 19.4% to \$47.97 million. Expenses are up 21.1% to \$48.8 million and the operating loss climbs to \$830,488. There is an \$874,000 net loss.

In early **1994**, Rich receives government authority to inaugurate combination passenger and cargo scheduled services and these are duly launched between Miami and New York. All of the aircraft involved wear a new, more up-to-date livery.

For the year, customer bookings increase 58.2% to 576,000. Operating revenue jumps 67% to \$98.83 million while expenses surge 61% to \$95.26 million. The operating surplus is \$3.57 million and there is a \$1.11-million net gain.

The workforce stands at 250 in **1995**, a 25% increase. When **Hawaiian Airlines (HAL)** replaces its L-1011-50 with a former **American Airlines** DC-10-10, the displaced TriStar is sold to Rich.

A major contract is entered into with Fort Lauderdale-based Adventure Tours to fly skiers to Colorado.

Enplanements skyrocket 77.7% to 1.01 million. Still, costs exceed income and there are losses: \$17.78 million (operating) and \$995,000 (net).

There is no change in the employee population during **1996** and early in the year, Rich is elevated to the rank of "national" carrier by the DOT. Dissatisfied, Adventure Tours refuses to renew its contract for the upcoming ski season.

In the wake of the May **Valujet Airlines** disaster, Rich, like **Mesa Air Group**, runs afoul of FAA inspectors. Following a spot check, the FAA in June attempts to fine Rich \$2.6 million for maintenance problems relating to bogus aircraft parts. The company contests the fine and the issue is left hanging.

During a two-day safety audit in August a large number of errors and safety violations are cited, including violations in pilot training, handling of hazardous materials, unqualified individuals performing inspections, failure to submit required reports and maintain required records. Additionally, a number of maintenance deficiencies are noted, including a startling revelation that all engine installations since January have been made in violation of federal regulations.

For these and an L-1011 engine incident earlier, the FAA issues an emergency order suspending the charter operator's license on September 2 and issues the carrier two fines, one for \$95,000 and the other for \$2.6 million—a repeat of the June order.

Hundreds of charter passengers are left stranded, including a large number flown in and out of Ontario to Hawaii on behalf of the San Jose-based tour company Sun Trips International. Rich is forced to file for Chapter XI bankruptcy protection in November.

Customer bookings decline 4.1% to 970,000, but operating revenues inch up 1.9% to \$154.88 million. Expenses increase 9.7% to \$186.23 million and the operating loss quadruples to \$17.78 million. The net loss is \$4.29 million.

Rich is once again sanctioned by FAA inspectors in January **1997**, just as it is preparing to resume operations and is shut down once more. Although an accommodation with the safety inspectors is reached in February, another DOT office refuses to provide the necessary economic authority to resume flying, requiring Rich to meet further conditions. Unable and unwilling to proceed, officials and creditors convert Chapter XII bankruptcy to Chapter VII liquidation. All remaining company inventory and aircraft are auctioned off in July.

RICHARDS AVIATION: United States (1980–1994). Richards is established to provide scheduled weekday all-cargo flights linking the company's base at Memphis with Corinth, Mississippi. Revenue flights, together with charter and contract service operations, are inaugurated in **1980** with a Piper PA-34 Seneca and a Gates Learjet 35.

Services continue and, in **1993** and T. Michie Hill is president.

The company shuts its doors in **1994**.

RICHMOR AVIATION: United States (1991–1995). Richmor is established at Hudson, New York, in late summer **1991** to offer scheduled regional flights to 10 cities with a fleet of 3 Convair CV-580s and 2 Mohawk 298s. A contract is signed with **Trans World Airlines (TWA)** and "TWExpress" service is inaugurated in October.

The fleet in **1993** includes 5 CV-580s and 3 Nords. The fourth Mohawk 298 arrives in **1994**. Unable to maintain economic viability, the company shuts down in **1995**.

RICO TAXI AEREO, S.A.: Manaus, Brazil; Year Founded 1971. Rico is set up at Manaus in **1971** to provide nonscheduled passenger and charter flights and contract services throughout the nation's Amazon basin. Services are started and maintained with a fleet initially comprising 12 Douglas DC-3s, 8 Piper Navajos, 2 Britten-Norman BN-2 Islanders, 3 Beech 18s, 2 Piper Aztecs, and 2 Cessna 310s.

Flights continue apace and in **1997–1998** the fleet includes 4 Embraer EMB-110 Bandeirantes.

RIDDLE AIRLINES: United States (1945–1963). John P. Riddle flies contract flights between Brazil and Florida during World War II. In May **1945**, he incorporates at Coral Gables under Florida laws with the purpose of expanding his wartime activity into a permanent airline operation. In late summer, passenger and freight services are inaugurated between New York City and Puerto Rico, but the passenger portion of the carrier's U.S.–San Juan activity is, by CAB ruling, abandoned in August **1947**.

Riddle is awarded temporary authority on January 26, **1951** to fly freight to Puerto Rico and in **1955** the CAB grants a domestic certificate allowing scheduled cargo service on routes to Florida from New York, Boston, Detroit, and Chicago.

On December 17, a C-46A flying mail from New York to Miami crashes at Hollywood, South Carolina, near Charleston, killing its two-man crew.

Curtiss C-46 freight flights are started on the new network on January 20, **1956**. New York to San Juan all-cargo frequencies begin on February 10. On June 29, it drops its service to Norfolk, Virginia, which is assumed the next day by **Transocean Air Lines (TAL)**. Employing a newly received Douglas DC-4F, scheduled roundtrip freight services from New York to Atlanta begin on November 15.

As is the situation for most of the U.S. all-cargo carriers, Riddle flies from one financial crisis to another during the **1950s**, accepting both civilian and military contracts and strengthening its fleet whenever possible. By **1958**, the company's equipment includes not only 34 Comandos, but 2 Douglas DC-4s as well.

In **1959**, Riddle's authority to San Juan is reissued and the carrier is launch customer for the British-made Armstrong-Whitworth AW650 Ar-

gosity 100. A C-46A with two crew is lost at Alma, Georgia, on March 30; there are no survivors.

The company begins to receive the first of seven Argosy freighters in December 1960, placing it on its Logair contract with the USAF Military Air Transport Service (MATS).

On March 15, 1961, a DC-7CF completes a record 6,307-mile non-stop commercial flight from Tokyo to Chicago in 20 hrs. 30 min. On July 8, the company receives a \$7.5-million MATS contract for outsize-cargo services, which flights are handled by the new British aircraft. Five days later, a C-46 crashes at Albany, Georgia, and one of the two crewmen is seriously injured.

Despite the reliability of the new Argosy transports and renewal of its domestic certificate in January 1962, Riddle Airlines is in deep financial trouble. On January 16, a C-46F is involved in an accident at Limestone, Maine. Another is lost in a bad landing at Panama City, Florida, on May 24 and a third is damaged in a nonfatal accident at San Juan, Puerto Rico, on June 5.

In mid-June, all services are suspended and in July the Argosies are sold back to their manufacturer. Indeed, they will not leave the U.S., as five will be picked up by **Overseas National Airways** and two by **Zan-top Air Transport**.

The company is now reorganized under an entirely new management team and returns to work in July. On August 17, the year's hard luck flying record resumes as a C-46, on a Miami training mission, crashes after a bounced landing. New York-Puerto Rico service is resumed with DC-7CFs in October and daily New York-Miami C-46 flights are restarted in December. For the second time in six months, a C-46 is lost in a training mission, this time at Macon, Georgia, on December 4.

Riddle's future looks brighter in 1963 when, in March, it secures a \$3.7-million loan enabling it to lease two DC-8Fs from Douglas, which also agrees to relax the payment schedule for the carrier's DC-7CFs. The right tire blows while a C-46 is taking off from Orlando on September 25, causing the aircraft to crash; neither crewman is hurt and the plane is later repaired. On November 29, Riddle is renamed **Airlift International**.

RIGA AIRLINES EXPRESS (RIGAS AERONAVIJAS, A.S.): Latvia (1993-1994). RAE is founded at the Latvian capital in the summer of 1993. The privately owned company is outfitted with a fleet that includes 1 Antonov An-26 and 1 SAAB 340A. In October, revenue flights are inaugurated to Amsterdam and Oslo, as Riga becomes the first Baltic airline to operate one of the Swedish turboprops.

Service to Berlin begins in the spring of 1994 and during the year, three An-24s join the fleet. Plans are made to acquire a Boeing 737-200 in the new year. Before these can be realized, the carrier goes bankrupt.

RIG-AIR, LTD.: United Kingdom (1969-1970). **Norfolk Airways, Ltd.** and **Anglian Air Charter, Ltd.** jointly form this small airline at Norwich Airport in summer 1969 to provide on-demand support for the increasing offshore oil exploration business. Initially, ad hoc flights are made with small planes chartered from the two founders. The first owned aircraft, a Douglas DC-3, is delivered in November.

In March 1970, the company fleet is enhanced by the addition of a BN-2A Islander and a Cessna 172. Charter work continues. In July, during the national dock strike, the two lightplanes fly a number of charters to France and Holland taking over stranded goods. Rig-Air joins Norfolk and Anglian in a July 22 merger that becomes **Air Anglia, Ltd.** in August.

RIJNMOND AIR SERVICES, B.V.: P.O. Box 12051, Rotterdam Airport, Rotterdam, NL-3004, The Netherlands; Phone 31 (10) 437-8122; Fax 31 (10) 437-1777; <http://www.quickairways.nl>; Code RAZ; Year Founded 1988. F. Stevens forms Rijnmond at Rotterdam in late 1988 to provide ad hoc charter services to various European and North African destinations. His initial fleet comprises 7 Piper PA-31-350 Navajo Chieftains. Three Chieftains are retired in 1989-1990 and replaced by two Mitsubishi MU-2B Marquises.

Operations continue in 1991-1994, during which years one more Chieftain is retired and Wiebe Bosma becomes CEO. Flights continue in 1995-1999. The fleet now includes 3 Chieftains, 1 Mu-2B, and 1 Swearingen SA-226. A close association, including a shared Web site on the Internet, is now formed with Eelde-based **Quick Airways, B.V.**

RIKOR AVIAKOMPANIA. See **KARAT JOINT STOCK COMPANY**

RIMOUSKI AIRLINES, LTD.: Canada (1946-1953). Le Syndicat d'Aviation de Rimouski is formed in 1946 to offer charter and contract service flights in the Gaspé Peninsula area of the St. Lawrence River near its Rimouski base. Operations begin with two Norduyn Norsemen Vs. The enterprise is renamed **Rimouski Airlines, Ltd.** in 1947 and a Beech 18 is acquired.

Several of the scheduled flights operated on both sides of the St. Lawrence by the **Canadian Pacific Air Lines, Ltd. (CPAL)** subsidiary **Quebec Airways, Ltd.** are assumed in 1948-1949. Among the small communities now served are Matane, Mont-Joli, Forestville, Baie Comeau, and Sept-Iles. On July 26 of the former year, a chartered Douglas DC-3, with 29 aboard crashes into a mountain on the Gaspé Peninsula; there are no survivors.

Scheduled services to additional points on the Gaspé Peninsula and throughout the St. Lawrence area are undertaken in 1950-1952. In 1953, Rimouski and competing **Gulf Aviation, Ltd.** merge to form **Quebecair, Ltd.**

RIO AIRWAYS: United States (1963-1987). Rio Airways is begun as a charter operator in 1963 to provide on-demand passenger and cargo services to destinations throughout the Rio Grande Valley of Texas. In August 1966, the company begins to operate a single Austin-Houston scheduled air taxi route with a Piper PA-31-350 Navajo Chieftain. In 1970, Killeen-based **Hood Airlines** purchases Rio.

The fleet of owner/operator Mark C. Connell in 1971 includes the Rio Piper plus a Douglas DC-3 and a Cessna 402.

A Beech 99A with 2 crew and 13 passengers is destroyed as the result of a bad landing at Killeen, Texas, on January 12; there are no fatalities.

With assistance from **Air South** president/CEO F. E. "Pete" Howe, then in the process of transferring to a similar post with **Hood Airlines**, Chairman Connell is able to acquire a new intrastate route from Dallas to Wichita Falls on November 15.

Howe's presidency begins on January 1, 1972 and on May 1, the merger of **Hood Airlines** into Rio is completed. The Hood name disappears and reborn operations of a strengthened Rio Airways begin.

On March 7, 1973, Rio inaugurates service from Dallas to Temple and this route is followed by the launch, on February 3, 1974, of frequencies to Waco. The fleet is altered as eight Beech 99s are placed into service.

Enplanements for the year total 122,318.

A strike at **Texas International Airlines** helps the commuter to boost its passenger enplanements by 28.87% to 172,047 during 1975.

The workforce is increased by 15% in 1976 to 182. Two de Havilland Canada DHC-6-300s are purchased as customer bookings jump 9.1% to 187,677.

A third Twin Otter joins the fleet early in 1977. After acquiring **Davis Airlines** in late November, the growing intrastate begins flying between Bryan and College Station and between Houston and Dallas on December 1.

The Texarkana market is entered on July 15, 1978. Passage of the Airline Deregulation Act now brings intense competition into the Texas airline industry. Rio is initially safe, feeding much of its traffic to **American Airlines**.

New frequencies are initiated to San Angelo on May 15, 1979. Other destinations launched include Lawton, Hot Springs, and Little Rock.

With much of its traffic being fed to **American Airlines**, Rio has made steady post-deregulation progress with enplanements now reaching an all-time high of 476,101.

The company fleet in **1980** numbers 10 Swearingen Metro IIs and 10 de Havilland Canada DHC-6-300 Twin Otters. Orders are placed for 6 DHC-8s. This year these airliners fly the first of 4 years' worth of declining traffic as the number of passengers carried drops to 443,218, down 6.9%.

Increased costs led by fuel prices, coupled with recession and the PATCO air traffic controllers' strike of summer **1981**, now spell significant problems for Rio. Service is started to Jonesboro, Arkansas, as an 11th Metroliner joins the fleet. ATC restrictions imposed by the strike cost Rio 60% of its Dallas slots and contribute to a decline in bookings for the year to 438,727.

The fleet begins **1982** comprising 11 Metro IIs and 10 Twin Otters. Four new DHC-7-102s are acquired and replace seven deleted Metroliners and four Twin Otters.

Enplanements continue to drop, declining to 408,447.

Flight equipment available in **1983** includes the 4 DASH-7s, 6 Twin Otters, and 3 Metro IIs. Upset with U.S. policy toward Iran, Iranian immigrant Hussein Shey Khlya hijacks Flight 252, a DHC-7 with 20 other passengers en route from Killen to Dallas (DFW) and diverts it to Nuevo Laredo, Mexico, on February 15. Following several hours of negotiations, Khlya frees his hostages and surrenders to police. He will receive a prison term of eight years.

Passenger boardings dip 1% to 404,469.

Rio, by spring **1984**, has shrunk back to its 1975 route system and is no longer profitable. On June 1, Rio joins the "Delta Connection" commuter network of **Delta Air Lines** and begins giving the bulk of its connecting traffic to that major at Dallas (DFW).

In the fall, the company disposes of its remaining Twin Otters and receives the first of five ordered Beech 1900s.

Affiliation with the Atlanta-based major gives the large commuter a 1% boost in passenger enplanements over the next 6 months, leading to a total of 408,798 for the year.

The remaining four Beech 1900s are received by March **1985** and in the spring, Rio takes on new markets (including its first interstate station, Lawton, Oklahoma) in direct competition with **American Airlines'** American Eagle partner **Metro Airlines (Metro Express II)**. The carrier is badly battered in the duel and undertakes merger discussions with **Atlantic Southeast Airlines (ASA)**, also a "Delta Connection" carrier.

The talks fail and Rio retrenches, cutting back services and selling off its four DASH-7s, which are replaced by three more Beech 1900s. The carrier fails to release its traffic figures, a certain indication of difficulty.

President Howe's company in **1986** maintains routes through Texas, Arkansas, and Oklahoma with 7 Beech 1900s. The downward plunge continues until owner Ted Connel sells the airline in October to a group of New York and Houston investors led by Hugh Seaborn, brother of Metro Airlines' CEO Jay Seaborn. On December 5, the Delta affiliation is lost, being transferred to **Atlantic Southeast Airlines (ASA)**, which begins flying out of Dallas (DFW) on December 15.

In January **1987**, a new code-sharing agreement is signed, this time with **Braniff, Inc.** At the same time, it is announced that a feeder arrangement has been worked out with **TranStar**, the subsidiary of **Southwest Airlines**. The Seaborn buyout is consummated at mid-month and on February 20, Allison of Pasco purchases 52% of the carrier for \$300,000, covering operating expenses, leases, and salaries.

The move comes too late. Despite, and perhaps because of, these many changes, Rio declares Chapter XI bankruptcy on February 27. Chairman Seaborn attempts to locate additional capital and resume operations, but he becomes embroiled in a dispute with Allison. This disputes his authority to take the bankruptcy action and his attempt at resumption of service is unsuccessful.

RIO GRANDE AIR: P.O. Box 1617, El Prado, New Mexico 87529, United States; Phone (505) 737-9790; <http://www.iflyrga.com>; Year Founded 2000. Rio Grande Air is established at the beginning of **2000** to offer scheduled passenger flights from Albuquerque Sunport. Employing a Cessna Grand Caravan, twice-daily return revenue flights

commence on February 1 to Taos and Durango. On February 12, twice-daily roundtrips from Albuquerque to Farmington.

The only commuter airline based in New Mexico continues operations without incident or headline during the remainder of the year.

RIO-SUL (EMPRESA RIO-SUL SERVICOS AEREOS REGION-ALS, S.A.): Av Rio Branco 85, 10th Floor, Rio de Janeiro, CEP 20 040-004, Brazil; Phone 55 (21) 263-4282; Fax 55 (21) 253-2044; <http://www.rio-sul.com>; Code SL; Year Founded 1976. On November 12, 1975, the federal government establishes the Sistema Integrado de Transportes Aereos Regional, a system calling for the formation of five regional airlines to provide third-level feeder service to outlying areas. A promise of subsidy is made, based on 3% surcharge on tickets sold on trunk routes.

Rio-Sul is formed at Rio de Janeiro on August 26, **1976** with **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** holding 51.67% majority interest; large blocks of shares are also held by the insurance companies Sul America Terrestres Maritimos e Acidentes and Atlantica Boa Vista.

Equipped with 4 Piper PA-31-310 Navajos and 1 Embraer EMB-110C, flight services Porto Alegre to Pelotas begin on September 8.

A significant expansion begins on January 1, **1977**. Rio launches flights from Rio de Janeiro to Campos, an oil-drilling center, and from Rio to Porto Alegre via São Jose dos Campos, home of automobile, defense, and Embraer plants.

Services are expanded over the next 3 years and a total of 27 cities are in the route network by the end of **1980**. The fleet is increased to include 11 more EMB-110s and 2 business jets for charters (a Gates Learjet and a Rockwell Sabreliner 60).

In **1981**, the company is flying to a variety of southeastern Brazilian destinations in the states of Santa Catarina, Rio Grande do Sul, and Parana, plus Rio de Janeiro and São Paulo.

Sul America Terrestres Maritimos e Acidentes sells its shareholding to Fundacao Rubem Berta and to Cruzeiro; thus the VARIG group gains 66% shareholding, with control over 95% of the voting shares.

Enplanements for the year total 113,659.

Dr. Humberto J. de Almeida Costa becomes president in **1982** as the fleet is increased by the addition in late April of the first of three Fokker F.27-200 Friendships to be received during the year. The new Dutch-built turboprop enters revenue service on May 17.

While on final approach to Florianopolis on May 22, an EMB-110P-1 with two crew and two passengers undershoots the runway by about a mile and crashes into a swamp; there are no fatalities.

Passenger boardings climb to 123,134.

In **1983-1985**, the number of stops climbs to an excess of 30 as airports and airfields in the states of Minas Gerais and Espirito Santo are added. The fleet now comprises 4 Friendships and 7 Bandeirantes; airline employment stands at 440.

After landing at Rio de Janeiro from an August 6, 1984 training flight, an F.27-200, with seven crew overruns the runway into Guanabara Bay; there are no fatalities.

Customer bookings grow steadily during these years, coming to total, respectively: 146,696; 150,887; and 163,302.

A total of 32 points are regularly visited in January **1986**. Flights between the nation's second and third largest cities, Rio de Janeiro and Belo Horizonte, commence on August 2. Simultaneously, the *Voo Direto ao Centro* (Flight to the Center) route is inaugurated from Rio de Janeiro to Curitiba via Belo Horizonte and São Paulo.

In October, the carrier receives the first Alberto Santos-Dumont Safety Award in recognition of its decade of accident-free service. The year's profit margin is \$170,000. Operations continue without report in **1987**.

In **1988**, President Costa's employee population grows to 468 as frequencies are increased and the fleet is upgraded in May of the latter year with the addition of an Embraer EMB-120 Brasilia, the first placed into service by a Brazilian airline.

Customer bookings accelerate 11.2% to 335,566.

By 1989, airline employment stands at 468 and the fleet also includes 2 additional F.27s, 1 less EMB-110, and 2 more EMB-120 Brasílias. In December, Rio-Sul becomes the second Brazilian regional after **TAM (Transportes Aereos Regionais, S.A.)** to begin an alternative Rio de Janeiro-São Paulo shuttle service. This is in competition with the air bridge operated by the nation's majors, **Transbrasil**, **VASP Brazilian Airlines (Viacao Aerea de Sao Paulo, S.A.)**, **VARIG Brazilian Airlines (Viacao Area Rio-Grandense, S.A.)**, and **Cruzeiro do Sul, S.A.** An investment of \$10 million allows the large commuter to offer six roundtrip flights per day.

Passenger boardings rise 12.5% to 179,238 and freight moves upward by 9.8% to 202,000 FTKs.

Company employment skyrockets 92.3% in 1990 to 900 as 4 Friendships are sold and replaced by 3 more EMB-120s. These are employed on the São Paulo-Rio de Janeiro air shuttle flights.

Enplanements for the year increase to 478,101.

Two Bandeirantes are sold in 1991 as another Brasília is acquired. Orders are placed for two Fokker 50s and arrangements are made to obtain jetliners.

The fleet is down to only 3 EMB-110s in 1992 as the number of Brasílias is increased to 11; the Fokker count remains the same.

When the Fokker 50s arrive in midyear, they replace F.27s. During October, President de Almeida Costa's carrier receives its first jet equipment, two leased Boeing 737-5Y0s.

The new jetliners enter service in early January 1993. Rio-Sul thus becomes the first South American operator of the Dash 500 version of the "Baby Boeing."

The undercarriage of an EMB-120RT with 1 pilot and 17 passengers fails upon landing at Rio de Janeiro on May 12; there are no fatalities.

During the first 11 months of the year, the 870-employee airline sees its enplanements skyrocket 76.9% to 599,000 and freight traffic climb 13.8% to 3.56 million FTKs. During November, the company inaugurates daily B-737-5Y0 roundtrips between Rio de Janeiro and São Paulo, competing with other airlines in the shuttle market.

Airline employment is increased by 26.4% in 1994 to 1,100 and 2 more chartered B-737-5Y0s are acquired. Late in the year, plans are completed for the \$7-million purchase of competing regional **Nordeste (Linhas Aereas Regionais, S.A.)**, which will be merged by the following March, and for the initiation of revenue flights from São Paulo to Salvador. The company also agrees to take over Nordeste's order for three Fokker 50s.

For the full year, passenger boardings increase by 44.7% to 957,550 while cargo advances 51% to 6.06 million FTKs. Revenues reach \$168.63 million.

There is no change in the workforce during 1995. Early in the first quarter, a B-737-5Y0 inaugurates daily return service from São Paulo to Salvador. The Nordeste merger is completed in March; the combined carrier's complement of 450 pilots will come to fly more than 200 daily departures.

Traffic figures are reported through the same period and show enplanements up a dramatic 70.9% to 243,952. Cargo increases during the same period by 106.6% to 1.15 million FTKs. Operating income jumps 26.9% for the year to \$231 million.

Fifty additional employees are hired in 1996 as the Fokker 50s enter service.

Customer bookings accelerate for the whole year to 1,745,496 and 106.5 million FTKs are operated. Revenues increase to \$289.55 million and allow a net gain of \$42.1 million.

The employee population increases 52.7% in 1997 to 1,757. Destinations visited from hubs at Rio de Janeiro, São Paulo, and Porto Alegre include Araguaína, Belo Horizonte, Brasília, Campinas, Campos, Cas-cavel, Caxias Do Sul, Chapeco, Crisciuma, Curitiba, Florianópolis, Goiania, Iguassu Falls, Imperatriz, Joinville, Lages, Livramento, Londrina, Maringa, Navegantes, Passo Fundo, Pelotas, Ponta Grossa, Recife, Ribeirao Preto, Rio Grande, Santa Maria, Santo Angelo, São Jose Dos Campos, São Jose Do Rio Preto, Uberlândia, Uruguaiiana, and Vitoria.

In May, the VARIG subsidiary orders 10 EMB RJ-145 Amazons and 10 EMB-120 Brasílias. The first Amazon, known as Jet Class by Rio, is delivered in August, making Rio-Sul the first—and only—national company to acquire the first jetliner designed and built in Brazil. As the Amazons enter service, they fly over numerous main routes from Rio de Janeiro, including those to Belo Horizonte, Vitoria, Campinas, Brasília, Porto Alegre, and Joinville.

Traffic figures are reported through November and show enplanements up 16.6% to 2,035,000. Cargo is also up, by 10.3%, to 8.2 million FTKs.

The Brazilian Department of Civil Aviation (DAC) indicates on December 30 that it will begin to institute domestic airfare deregulation in January.

Prior to internal air force opposition that slows the process, DAC deregulation continues in January 1998. As part of the liberalization, the government decrees that the monopoly the company shares with its parent, plus **Transbrasil, S.A. (Linhas Aereas)** and **VASP Brazilian Airlines (Viacao Aerea de Sao Paulo, S.A.)** on the Rio de Janeiro to São Paulo air bridge, must end.

Simultaneously, trunk lines are granted permission to compete with regional carriers on services between the downtown city-pairs of São Paulo and Brasília or Belo Horizonte and Rio de Janeiro and Belo Horizonte or Brasília. Further, airlines will be allowed to offer discounts of up to 65% on internal flights and any carrier will be allowed to fly charters on any route, with certain conditions. The move will have the desired end of increasing new business, but it will also set off a devastating fare war.

In February, a B-737-5Q8 arrives under charter from ILFC. A second follows in April.

In June, **VARIG Brazilian Airlines (Viacao Area Rio-Grandense, S.A.)** announces that it will drop out of the joint Rio de Janeiro-São Paulo air bridge shuttle and will, in cooperation with Rio-Sul, offer its own competition against its former partners, **Transbrasil, S.A. (Linhas Aereas)** and **VASP Brazilian Airlines (Viacao Aerea de Sao Paulo, S.A.)**.

The new linked air bridge flights commence in July. The World Cup now leads to a significant reduction in the number of Brazilians traveling, as they prefer to remain home and watch the month of matches from France on television.

During late summer, a major shakeup at the parent airline is begun. The change is due largely to a report that a \$168-million loss has been incurred during the year's first half. In September, the livery of Rio-Sul aircraft is changed; the planes become identical to those operated by the parent company in all but titles.

On September 1, twice-daily EJ145 roundtrips are initiated between Rio de Janeiro and São Paulo.

The Brazilian DAC scraps its last regulations over passenger airline fares on December 30, a year to the day after it had launched domestic deregulation. DAC does, however, indicate that it will remain vigilant to abuse, including dumping, cartels, monopolies, and predatory pricing. As domestic competition stiffens, additional alliances with foreign airlines are expected.

Passenger boardings increase 54.1% to 3.13 million, while cargo jumps up 37% to 11.29 million FTKs.

Between November 1 and 3, the company takes delivery of 3 more ERJ-145s; it now operates a total of 14.

Passenger boardings surge 13.8% to 3,570,000, while freight traffic rises 12.9% to 12.74 million FTKs. Revenues fall 15.9% to \$349.12 million while costs drop 14.7% to \$349.8 million. The \$682,000 operating loss is exceeded by a net loss of \$18.99 million.

Airline employment at the beginning of 2000 stands at 2,250, a 28.1% increase over the previous 12 months. The "classic" B-737 fleet still includes 1 each Dash-3Y0 and Dash-33A, plus 4 Dash-5Y0s, 4 Dash-53As, 5 Dash-5Q8s, and 1 Dash-58A. A total of 402 workers are employed at the beginning of the year.

During June, a restructuring of **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**, begun in the first quarter, continues. A new holding company, FRB-Par, is created for the VARIG business

group, with VPTA and VPSC becoming two of its three subsidiaries, with the original holding company, VARIG Brazil, named the third. The group's first charter organization, Rotatur, is incorporated, while the subsidiary carriers Rio-Sul and Nordeste (**Nordeste Linhas Aereas Regionais, S.A.**) are granted their independence from VARIG and are placed under the control of VPTA.

During the first nine months of the year, customer bookings advance by 10.7% to 2.9 million, while net profit, over the same period a year earlier, grows 4.7% to 27.4 million reals.

A B-737-53A is subchartered to **Air Nippon Company, Ltd.** on March 27. A total of 16 additional ERJ-145s are ordered on October 5.

Previously operated by **Virgin Express, Ltd.**, a B-737-341 is leased from **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** on November 13. On November 24, a B-737-59D previously operated by **British Midland Airways, Ltd.** is received under lease.

Delivery of the 16th ERJ-145 Amazon is accepted on December 4. As the year ends, the company is faced with a new competitor, Gol Transportes Aereos, S.A., which will launch B-737-700 service in January linking Congonhas Airport at Sao Paulo with Porto Alegre, Brasilia, Rio de Janeiro, Salvador, Belo Horizonte, and Florianopolis.

RIPSA (RUTAS INTERNACIONALES PERUANAS, S.A.): Peru (1961–1968). RIPSA is formed at Lima in March 1961 as an international all-cargo operation. During the next year, a fleet is assembled comprising two Curtiss C-46 Commandos and a Douglas DC-4.

Revenue flight operations commence in March 1962 over a route from Lima to Miami via Panama City. Operations continue apace in 1963–1964.

On August 4, 1965, a C-54D freighter with three crew and four passengers fails its takeoff from Panama City for a flight to Miami and crashes; there are no survivors.

In September 1966, a Lockheed L-749 freighter is purchased from **Paramount Airways, Ltd.** of the U.K.

Flights continue apace in 1967–1968. After the Constellation is caught smuggling illegal goods during a flight to Lima in the latter year, the Peruvian government lifts RIPSA's operating certificate.

RITCHIE AIR SERVICES, LTD. See **NEW ZEALAND TRANSPORT AND TRAVEL, LTD.**

RIVAIR FLYING SERVICE: 4400 Glen Curtis Drive, Suite 202, Dallas, Texas 75248, United States; Phone (918) 299-1234; Fax (918) 299-1235; Year Founded 1991. Walter Kostich sets up Rivair at Dallas (DAL) in 1991 to operate passenger cargo services to domestic and regional destinations. Revenue flights commence to destinations in the U.S., Canada, and Mexico.

In 1998–1999, the workforce includes 15 full-time and 5 part-time staff. The fleet, several of which units are now also based at Tulsa, Oklahoma, includes Learjet 24s and Cessna 421 Golden Eagles.

THE RIVER PLATE AVIATION COMPANY, LTD. See **CRPA (COMPANIA RIO PLATENSE DE AVIACION, S.A.)**

RIVERSIDE AIR SERVICE: 6741 Germende Drive, Riverside, California 92504, United States; Phone (909) 689-1160; Fax (909) 689-1380; <http://www.riversideairservice.com>; Year Founded 1959. Riverside Air Service is established at Riverside Airport in 1959 to provide FBO, aircraft repair, and flight instruction services. Over the next 41 years, the company also enters the air charter business, providing Cessna 172 and Grumman Gulfstream G1 passenger services to points initially throughout the West and then, nationwide.

By 1998–1999, the company operates from three facilities.

Yvette Bowman schedules the work of 10 pilots at Riverside Municipal Airport. They fly 2 Beech C24R Sierras, and 1 each Grumman G-1159 Gulfstream I, Piper PA-34 Seneca, Beech A36 Bonanza, and Eurocopter AS-355F Twinstar helicopter. The concern in 2000 generates estimated annual sales of between \$1 million and \$2.5 million.

Owner Joe Pagan personally heads the company's 11-person charter department at Houston (HOU). He oversees the schedule of 6 pilots who fly from the Texas base with 1 each Citation I and a Beech 18 freighter. Pagan also stations a single Citation I at Merida Airport in Mexico. These two branches generate almost as much in annual revenues as does the parent organization.

RLA (REGIONAL LINEAS AEREAS, S.A.): Calle Agueboi 7, Madrid, E-28042, Spain; Phone 34 (1) 329-0500; Fax 34 (1) 329-3323; <http://www.irinfo.es/aviacion/regional.html>; Code XG; Year Founded 1995. In April 1995, the French regional carrier **Regional Airlines, S.A.** joins with the Spanish air taxi **Gestair Executive Jet, S.A.** (51% majority shareholder) to establish this Spanish subsidiary at Madrid. Although \$205,000 capitalization is provided, the new subsidiary, led by President Jesus Macarron, is prevented from launching service by the faster acquisition by **Air Nostrum, S.A.** of a coveted route from Vitoria to Bilbao. The firm will remain a paper enterprise for some time. Instead, a code-sharing agreement is by reached by **Regional Airlines, S.A.** with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** for French-Spanish services.

During the spring of 1996, RLA is given a **Regional Airlines, S.A.** SAAB 340B and is able to inaugurate a single route from Porto to Toulouse via Madrid. It continues without change, remaining an embryonic operation into 1998.

A code-sharing agreement is signed with **PGA-Portugalia Airlines (Companhia Portuguesa de Transportes Aereos, S.A.)** in January 1999. Under its terms, the two are able to sell tickets on each other's new direct, twice-daily roundtrips between Lisbon and Casablanca. The service is operated with a Beech 1900D, newly acquired by RLA. The new partnership service will be flown thrice weekly beginning on October 29, 2000.

ROADWAY GLOBAL AIR: United States (1993–1995). A subsidiary of the giant trucking concern Roadway Services, Roadway Global Air is formed in summer 1993 to offer all-cargo services to 21 cities from a hub at Terre Haute, Indiana. Revenue services commence on September 21 with 2 former **Continental Airlines** Douglas DC-9-15RCs that have been converted into freighters.

Contracts are signed with **Kitty Hawk Air Cargo** and **Express One** and the new entrant begins to fly, on their behalf, 1 each Boeing 727-23F, B-727-25F, B-727-35F, B-727-81F, and B-727-82F. Traffic and financial figures are not separately released.

In February 1994, the fleet is expanded by the addition of a third DC-9-15RC; two leased Convair 600Fs and three CV-640Fs are also received.

Operations continue apace in 1995. During the third week of November, Roadway Services announces its intention to exit the air freight business and sell off RGA's assets.

ROAN AIR, LTD.: Zambia (1948–1999). Originally established as Northern Rhodesia Aviation Services, Ltd. in 1948, this operator exists only to operate charter services on behalf of the area's Copperbelt mining industry. In 1965, the company, a subsidiary of the Zambia Consolidated Copper Mines, Ltd., is reformed and renamed Mines Air Services, doing business as Roan Air, Ltd. In addition to its corporate business, the carrier now offers public charters from Lusaka to Ndola, Kitwe, Mfuwe, Livingstone/Victoria Falls, Kasaba Bay, and Chipata.

In April 1998, Mines Air Services is privatized through a management buyout. The reformed company is now known exclusively as Roan Air, Ltd. Scheduled services are introduced between Lusaka, Ndola, and Kitwe. Under the leadership of Gregory Havermahl, the company is purchased by Zambian ownership on September 2, 1999 and is renamed **Zambia Airways, Ltd.**

ROBERTSON AIR. See **RED BARON AIRLINES (2)**

ROBERTSON AIR LINES. See **ROBERTSON AIRPLANE SERVICE COMPANY**

ROBERTSON AIRCRAFT CORPORATION: United States (1921–1929). Brothers Frank and William Robertson, ex-military pilots, establish Robertson Aircraft Corporation at St. Louis, Missouri, in 1921. With financial investment from local businessmen, the two bid on Contract Air Mail (CAM) Route No. 2, St. Louis to Chicago, during the summer of 1925. After the U.S. Post Office makes the award on October 7, a total of \$30,000 is invested in establishing the carrier. Four de Havilland DH 4Bs are purchased and converted into DH 4M mailplanes; painted aluminum and red, the quartet receives numbers 109 to 112. Three Curtiss Orioles are also obtained.

Once the spring 1926 services of three pilots are obtained, plane no. 109 inaugurates scheduled mail service to Chicago via Springfield and Peoria on April 15. The pilot is Charles A. Lindbergh and this is the first of many routes he will open over the next decade. Flights continue throughout the remainder of the year.

Lindbergh encounters heavy fog while attempting to land DH 4M no. 112 at Chicago on September 16. When the plane runs out of gas, the pilot bails out over Ottawa, Illinois. Caught in snow and darkness in DH 4M no. 109 near Covell, Illinois, on November 3, Lindbergh is again forced to bail out. Subsidy payments received during the year are \$71,644.

DH 4M no. 110 is wrecked during January 1927. In February, Lindbergh details his survival experiences in a brief *U.S. Air Services* article, "Going Over the Side in a Parachute," (pp. 42–43).

RAC alumni Lindbergh wins world fame in May when he becomes the first to fly across the Atlantic alone. Caught in a storm over Ellsmore, Missouri, on June 28, pilot Leslie Smith crashes DH 4M no. 111 into a hill; his is the only death suffered by the company. Having lost all of its single-engine mailplanes, Robertson now acquires two new Ford 4-ATs, several Douglas M-4s, and a Travel Air 5000. By year's end, the St. Louis–Chicago route is fully lighted.

Famous after his transatlantic flight, Lindbergh returns to a hero's welcome at Robertson's facilities in late February 1928. He agrees to participate in a special February 20–21 St. Louis–Chicago mail flight using the Douglas mailplanes and the Travel Air. All of the company's pilots participate in the operation and "Lindy" flies with each a part of the distance: Philip R. Love, Thomas P. Nelson, Harlan E. "Bud" Gurney, E. L. Sloniger, and Leslie Smith. A total of 4,278 pounds are transported comprising 250,000 pieces, the letters among them being stamped "Lindbergh Again Flies the Air Mail."

On June 28, Leslie H. Smith is killed when his DH 4B is caught in a storm at Ellsmore, Missouri, and crashes. Also in June, plane no. 111, a DH 4B, is lost in a nonfatal crash. During the spring, negotiations are concluded with the Illinois Central Railroad for a ticket interchange. In addition to mail, the Fords (flown by Gurney and Sloniger) and Travel Air are employed to open passenger service on August 20; the \$40 one-way flight requires three hours flying time. On November 15, a new two-and-a-half hour nonstop passenger service is inaugurated across Missouri to Kansas City.

On December 31, 1929, the company is one of the first acquired by the new **Universal Aviation Corporation** (for \$300,000), which converts it into an operating subsidiary and where the remainder of its story is told. The Robertson Aircraft Corporation continues in a nonflying capacity and joins with Clement M. Keys to form the Curtiss-Robertson Company for the manufacturer of Curtiss Robins. Later, Robertson obtains CAM-28 St. Louis–Kansas City–Omaha and sells access to the first segment to U.A.C.

ROBERTSON AIRPLANE SERVICE COMPANY: United States (1930–1934). Following the sale of the air transport division of their Robertson Aircraft Corporation to **Universal Aviation Corporation**, Frank and William Robertson establish this subsidiary in the spring of 1930 to offer scheduled, multistop passenger service from St. Louis to New Orleans. The pair had previously operated the St. Louis-based Curtiss-Robertson Company for the manufacture of Curtiss Robin aircraft,

Equipping their carrier with a Ryan B-1 Brougham and three B-5s, the brothers inaugurate scheduled passenger services from St. Louis to New

Orleans on April 27 via Memphis, Tennessee, and Clarksdale, Greenwood, and Jackson, Mississippi.

Operations continue into 1931 as application is made for an airmail route and merger discussions are held with the New Orleans-based **Wedell-Williams Air Service Corporation**. Noting that the Robertsons did not qualify for airmail subsidy under terms of the McNary-Waters Act, Postmaster General Walter Fogler Brown awards all available routes in their area to **American Airways** on June 15.

Following this setback, passenger service and the on-again, off-again discussions with **Wedell-Williams Air Service Corporation** continue in 1932. Operations effectively end in December 1933, as the company has only carried 884 passengers and 12 pounds of air express in the previous 6 months.

When the government relets bids for the nation's airmail routes following the Air Mail Scandal and the Army's unsuccessful attempt to carry the mail in February and March 1934, the Robertsons make application for subsidy for CAM-8 Chicago–New Orleans and CAM-20 New Orleans–Houston.

Although CAM-20 is won, the Robertsons lose the Mississippi Valley CAM 8 to **Pacific Seaboard Airlines**, which underbids them by one cent per mile. The former **American Airlines** CAM-20 is inaugurated on July 25. **Wedell-Williams Air Service Corporation** acquires CAM-20 at the end of December when Frank Robertson becomes ill, forcing the brothers to leave the airline business.

ROBIN AIR LINES: United States (1951–1952). "One of history's unluckiest airlines" is the epitaph that might be applied to Robin Air Lines. Originally established as North Continent Air Lines in the summer of 1951, the company, based at New York, acquires a Curtiss C-46 Commando with which to operate passenger charters.

Hardly do flights begin when the aircraft makes a belly landing at Cobourg, Ontario, on December 20. Although no injuries are reported, the aircraft is badly damaged; unknown at the time, it will take longer to repair it than the company has left to fly.

A replacement Commando is leased on March 28, 1952. While on ILS approach to the airport at Burbank, the aircraft, piloted by Capt. Lewis R. Powell and operating as Flight 416W from Chicago via Phoenix with 4 other crew and 25 passengers, descends below minimum altitude and crashes at Whittier, California, on April 18 (29 dead). There will be no third aircraft sought as the company immediately goes bankrupt.

ROBINSON AIRLINES: United States (1945–1953). Beginning in early 1945, local Ithaca, New York, businessman C. S. Robinson employs a Fairchild F-24W to fly to Teterboro, New Jersey near New York City, site of his business. So many acquaintances seek transport that the entrepreneur elects to acquire a small Cessna and establish a charter operation, Robinson Aviation, Inc.

On April 6, an airline division is organized. A second Fairchild F-24W is purchased and two more pilots are hired, including Robert E. Peach, future executive vice president. Two Cessna T-50s join the fleet in the fall and a total of 900 passengers are carried on the year.

In 1946, capacity requirements force Robinson to sell his Fairchilds and Cessnas and replace them with four larger Beech 18s. In 1947, company officials plan to enlarge their carrier from a small intrastate shuttle to a regional airline and argue for this plan before the CAB.

To help convince the regulatory body of its viability, Robinson demonstrates support from various community segments, including a large investment from the Ithaca-based farm co-op Grange League Federation. Service is inaugurated between Westchester County Airport and upstate New York on November 4.

On February 28, 1948, the division is upgraded into an air transport company and is renamed Robinson Airlines. Edwin A. Link, inventor of the trainer named for him and a member of the board of directors, lends Robinson \$75,000 to help finance the acquisition of three Douglas DC-3s.

With its local service authority achieved from the government in February, the company is able to seek additional private investments (convertible debentures) totaling \$456,000 from prominent businessmen along the proposed route network to New York City. Much of this activity is led by Robert Peach, now general manager and executive vice president. Scheduled Douglas flights commence on September 18. Service from Albany to the southern tier is undertaken as of November 6.

During 1949, the fleet is increased to a total of 5 DC-3s and enplanements for the first full year of service are 43,000. Five more Douglas transports join the fleet in early 1950. Peach expands the route network, adding an east-west service connecting Buffalo and Albany and a north-south link to New York City from Watertown.

Service is inaugurated on August 29 from Newark to Utica and Rome, New York. En route from Utica to Newark on September 4, a DC-3 with 3 crew and 20 passengers, after losing engine parts 50 feet up after takeoff, crashes into trees near Oneida County Airport. No one survives and an entire family of five is among the victims.

Despite the tragedy, bookings continue to accelerate in 1951–1952 and on July 11 of the latter year, daily Albany to Buffalo service is begun. On January 1, 1953, Robinson is renamed **Mohawk Airlines (1)**.

ROCKFORD AIR CHARTER: United States (1964–1968). Organized at Rockford, Illinois, in the fall of 1964, RAC begins Cessna light-plane all-freight flights to Chicago on November 20. These nonscheduled all-cargo operations continue until the spring of 1968.

ROCKHAMPTON AERIAL SERVICES (PTY.), LTD.: Australia (1931–1936). RASL is formed at Rockhampton, Queensland, in the fall of 1931. Equipped with de Havilland DH 50As, the carrier begins twice-weekly Brisbane–Rockhampton services on October 2. This route is maintained through 1932–1933.

On February 18, 1934, a weekly, subsidized frequency is started from Rockhampton to Mount Coolon. Traffic declines in the face of depression in 1935 and on September 14, 1936, the company is purchased by **Airlines of Australia (Pty.), Ltd.**

ROCKY MOUNTAIN AIRWAYS: United States (1966–1991). Among the largest regional airlines to operate from Denver, Rocky Mountain is formed there by Gordon F. Autry on May 13, 1966 as **Vail Airways**. Major stockholder Autry becomes president and scheduled service is begun with an Aero Commander 680 over a Denver–Eagle–Aspen route.

In late 1968, the company is reorganized and renamed in honor of the most prominent feature of local geography. During the remainder of the decade and into the middle 1970s, services are undertaken to these additional destinations: Colorado Springs, Steamboat Springs, Winterpark–Granby, Craig, and Leadville. At 9,927 feet above sea level, the latter is the highest airport in the U.S.

Only one crash is suffered, but it is fatal. On January 22, 1970, the Aero Commander 680 with eight aboard crashes during its approach to Aspen, killing all of the passengers and crew. The fleet comes to comprise five de Havilland Canada DHC-6-300 Twin Otters. Orders are placed for three DHC-7s.

By 1974, enplanements are 107,015. Airline employment in 1975 stands at 146. Passenger boardings climb a hopeful 6.6% to 114,454.

The fleet in 1976 includes 2 DHC-6-300s, 2 Beech King Air 90s, and 2 Aero Commander 680s.

Freight traffic grows by 48% and customer bookings increase 7.3% to 124,742. Enplanements in 1977 climb to 130,515.

On February 3, 1978, President Autry's carrier fulfills its role as launch customer by placing the world's first production de Havilland Canada DHC-7-102 ("DASH-7") into service. In October, Denver-based **Intermountain Airways** is purchased and merged. During the fall, after passage of the Airline Deregulation Act, service is launched to Farmington and Albuquerque in New Mexico.

Just after takeoff from Steamboat Springs on December 4, Flight 217, a DHC-6-300 with 2 crew and 20 passengers, encounters severe icing conditions. The turboprop attempts to turn back, but crashes into the 10,000-ft. level of a mountain 8 mi. ENE of the point of origin (2 dead). The 20 survivors, including an 8-month-old boy and his mother, are saved by rescuers the next day during a blizzard.

Passenger boardings skyrocket 45.6% during the 12 months to 239,917. Freight traffic also advances, by 23.3%, to 675,244 pounds.

The two outstanding DASH-7s join the fleet in 1979. In January, the company receives the 1978 "Regional Airline of the Year" award from *Air Transport World* magazine.

Frequencies are undertaken to Alamosa, Cheyenne, and the company's private Vail Stolport, seven miles west of that community. A Twin Otter with 16 aboard makes a forced landing at Cheyenne, Wyoming, on February 28; a number of injuries are reported.

As the result of economic and snow conditions at ski markets, enplanements decline 0.6% to 238,000. Freight, on the other hand, skyrockets 156% to 1.72 million pounds.

By 1980, this intrastate commuter has been reclassified as a "large regional" under the CAB's new classification scheme and is flying its unexpanded, resort-oriented route system with 3 DHC-7-102s and 2 DHC-6-300 Twin Otters.

Despite a particularly bad Colorado winter, the carrier's traffic accelerates 24.8%; 297,788 passengers are carried on the year, along with 1.7 million ton-kilometers of freight. The employee population is, accordingly, increased by 2.7% to 232.

Recession and the PATCO air traffic controllers' strike in summer 1981 and its subsequent ATC restrictions, combined with a lack of snow at some key ski resorts, lead to a severe decline (45.2%) in bookings to 143,999. This translates into a net loss of \$498,794 on revenues of \$12 million.

Rocky Mountain rebounds strongly in 1982. The payroll is increased 10% to 242, as service is initiated to Pueblo. A fourth DASH-7 is acquired.

Passenger traffic jumps 25.3% to 349,000 passengers transported; cargo jumps 26.5% to 43,000 pounds. Operating revenues incline upward by 28% to \$15.4 million, leaving a net profit of \$498,794.

The workforce grows another 40.9% in 1983 to 341 and the fleet is enhanced by the addition of two additional DASH-7s. Flights into Rock Spring and Grand Junction begin. Routes are also inaugurated to Casper, Wyoming, and Scottsbluff, Nebraska, as the carrier becomes an interstate airline.

A joint marketing agreement is signed with **United Airlines** early in the year providing feed to the major at Denver.

Enplanements are up by 14.3% to 398,624, while freight grows 22.6% to 702,000 pounds. Revenues increase 7% to \$16.5 million, but the costs of expansion and fleet improvement bring a net loss of \$755,000.

Operating revenues increase 48% to \$24.4 million in 1984, primarily as a result of a 33% boost in the number of enplaned travelers to 481,619, coupled with an 11% increase in the average fare collected. Cargo climbs 11.9% to 785,262 pounds. Unhappily, Rocky Mountain's attempt to grow out of its dependence upon seasonal resort traffic is proving very expensive.

Indeed, costs leap 45% to \$23.9 million and a \$913,000 net loss is recorded. In an effort to cut expenses, services to Grand Junction and Scott Springs are discontinued in October and the released capacity is redeployed to the ski markets of Aspen, Avon, Vail, and Steamboat Springs.

After the failure of **Frontier Commuter** in early 1985, Rocky Mountain moves to assume several of its abandoned Essential Air Services (EAS) routes. In addition to a frequency from Denver to Scotts Bluff, two DASH-7s are detailed in February to begin two eastbound and two westbound daily frequencies from Omaha and Denver via Grand Island, North Platte, and Lincoln, Nebraska.

This move is not immediately rewarding as the year's passenger traffic suffers a downturn of 10.8% to 429,720 passengers flown. Revenues

advance to \$25.5 million, but costs are up again, and the net loss is \$956,000.

Airline employment is cut 0.6% in **1986** to 329 and the fleet includes 5 DASH-7s and 3 Twin Otters. In the spring, the FAA conducts a "special emphasis evaluation" and this development hurts company income. Almost as soon as the carrier becomes a "Continental Express" partner of **Continental Airlines** in May, it encounters difficulties.

Trusting that Texas Air Corporation (TAC) will take it over for \$3 million, President Autry must first resolve an earlier arrangement with **Aspen Airways**, which had advanced the airline \$1.2 million for three DASH-7s and certain profitable routes.

Now operating as an affiliate of **PEOPLExpress** following that national's takeover of **Frontier Airlines (1)**, Rocky Mountain feeds the no-frill pioneer at Denver. In October, Aspen withdraws its objection to the RMA sale. Longtime **Eastern Air Lines** official Donald Martin becomes president in December; only Vice President-Sales and Service Dennis Heap is retained from the previous management team.

Customer bookings fall again, down 12.3% to 376,711. The fiscal loss is again significant, although exact figures are not made available.

In February **1987**, the large regional is among the prizes won by TAC when it merges **PEOPLExpress**. President Martin is retained as president of the "Continental Express" affiliate for Denver. In order to bolster the feed arrangement, a fleet improvement program is undertaken and orders are placed for 6 DHC-8s and 10 Beech 1900s.

In July, the routes of "Continental Express" carrier **Trans-Colorado Airlines** are shifted to Rocky Mountain, along with six wet-leased Fairchild Metro IIIs and, later in the fall, a chartered Convair CV-580. The first Beech 1900 is delivered in mid-December.

Passenger boardings for the year increase by 33.3% to 501,975.

One of the Trans-Colorado wet-leased Metro IIIs is lost in a January **1988** accident near Durango. By spring, the company is making over 700 weekly departures from Denver to Aspen, Vail, Steamboat Springs, Gunnison, Durango, Telluride, and Jackson Hole. Additional Colorado destinations include Pueblo, Alamosa, Montrose, Colorado Springs, and Cortez while flights are made to the Wyoming communities of Riverton, Casper, Cheyenne, and Rock Springs. Rapid City and Pierre, South Dakota, and Scotts Bluff and North Platte, Nebraska are also served.

Former **Henson Aviation** President Donald C. Smith is named president in July and the DHC-7-102s and Metro IIIs are replaced in August by the last Beech 1900s to join the fleet. The carrier introduces one-stop shopping for winter ski programs by initiating all-inclusive packages to some 20 ski resorts in Colorado, Montana, Idaho, Wyoming, New Mexico, Utah, Colorado, California, and Canada.

Enplanements for the year total 697,238.

In May **1989**, the 590-employee carrier is merged with **Britt Airways** under the operating title of **Jet Link**. "Continental Express" service continues to be offered to 23 cities from the Denver hub with a fleet that now includes 8 Avions de Transport Regional ATR42-200s, 5 Dash-7s, and 13 Beech 1900s.

Traffic figures are now made public again and show that bookings have increased by 12.2% to 794,120.

Once a large independent regional, Rocky Mountain in **1990** has become the smallest of the "Continental Express" carriers, operating a fleet of 3 DHC-7-102s, 2 ATR42-300s, 10 Beech 1900s, and 3 Twin Otters.

In the process of feeding its parent's Denver hub, the carrier transports a total of 981,822 passengers, a 23.6% boost over the previous year.

In **1991**, Rocky Mountain and **Britt Airways** are absorbed into Continental, officially becoming **Continental Express**. Rocky Mountain becomes the new regional's western division.

RODAIR (PTY.), LTD.: South Africa (1962–1968). Rodair is established at Bloemfontein in **1962** as the air transport division of John Roderick & Co. (Pty.), Ltd. The company is a Piper distributor and initiates domestic charters with a fleet from that manufacturer that includes 1 each J-3 Cub, PA-11 Colt, PA-18 Super Cub, PA-28 Cherokee, and PA-310 Twin Commanche.

In **1964**, John Roderick & Co. acquires East London-based **Collondale Air Service (Pty.), Ltd.**, operating it as a subsidiary and allowing it to keep its previous name. CAS brings a PA-32 Cherokee Six, a Cessna 175, and a C-206 with which to operate its own charters.

Boet Choetsee is named managing director in **1966** and in **1967** he transfers Rodair's PA-11 to Collondale. Flights by both carriers continue for about another year.

ROEDERER AVIATION. See **RAI COMMUTER AIRLINE**

ROGERS HEAVY LIFT HELICOPTERS: P.O. Box 4, Clovis, California 93613, United States; Phone (209) 299-5248; Year Founded 1994. RHLH is established by Robin M. Rogers at Clovis on July 1, **1994** as a subsidiary of Fresno-based **Rogers Helicopters**. Outfitted with four (later five) ex-military Sikorsky CH-54A Flying Cranes, the company is employed in heli-logging, construction, and most importantly, aerial fire fighting. The 41-employee company will, over the next 4 years, receive contracts for work throughout the Western U.S. and Canada, Alaska, and Mexico.

In the spring of **1998**, upwards of 277 large fires break out in the Chiapas area of Mexico, which is the scene of a continuing armed revolt. High winds help to spread the blazes and, as in Brunei, immense clouds of smoke from this "Rio Blanco Fire" spread northward, even being reported on several U.S. evening television news programs. Upon a request from the Mexican government and members of the Texas congressional delegation, the U.S. Agency for International Development (AID) provides a \$5-million grant to cover the cost of sending American aerial fire-fighting aircraft to southern Mexico.

In mid-May, SEMARNAP, the Mexican Federal Natural Resources Department, joins AID in contracting with **Erickson Air Crane** for the deployment of an S-64 to assist with the fire's suppression.

The agencies also sign agreements with Rogers Heavy Lift Helicopters for the use of one of its five Sikorsky CH-54As. The Rogers Sikorsky is on the scene by the end of the month and will continue to operate from bases near Cintalapa and Zanatepec for the next month.

ROGERS HELICOPTERS: 5484 E. Perimeter Road, Fresno, California 93727, United States; Phone (209) 292-5248; Fax (209) 292-5240; <http://www.rogershelicopters.com>; Year Founded 1962. A veteran flyer for other helicopter companies and pilot of a Consolidated PBX Catalina waterbomber for a year, Harry Rogers borrows \$40,000 with which to incorporate his own company at Clovis, California, in **1962**.

Over the next 36 years, the family-owned rotary-wing concern undertakes a large number of miscellaneous activities all over the Western U.S. Among these are crop dusting and aerial seeding along the California coast and in the San Joaquin Valley; the transport of guano from caves in the Grand Canyon; a 10-year support commitment to the Helms Creek-Wishon Hydroelectric project; aerial photography; power line survey and pole lift; fire fighting; and search and rescue flights. The subsidiary **Rogers Heavy Lift Helicopters** is established under the direction of Robin Rogers in **1994**. It is equipped with four (later five) ex-military Sikorsky CH-54As that will be employed largely in heli-logging and fire-fighting activities.

Wanda L. Rogers is Rogers Helicopters president in **1998** and oversees a fleet that includes 2 each Bell 212s, Bell 222s, Eurocopter AS355F1 Twin Stars, 3 each A350D A-Stars and Bell 206L LongRangers; and 1 each Eurocopter BO-105, Sikorsky UH-1B Huey, and Bell 206B JetRanger. Two fixed-wing aircraft are also flown, a Cessna 210T and a Beech King Air 100.

In the spring, upwards of 277 large fires break out in the Chiapas area of Mexico, which is the scene of a continuing armed revolt. High winds help to spread the blazes and, as in Brunei, immense clouds of smoke from this "Rio Blanco Fire" spread northward, even being reported on several U.S. evening television news programs. Under contract to a local air charter operator, Rogers dispatches one each Bell 206B JetRanger and a Bell 212 to assist with fire fighting.

Upon a request from the Mexican government and members of the Texas congressional delegation, the U.S. AID provides a \$5-million grant to cover the cost of sending American aerial fire-fighting aircraft to southern Mexico.

The Rogers aircraft, together with those of its **Rogers Heavy Lift Helicopters** subsidiary, will be based near Cintalapa and Zanatepec through June. During this time, Rogers will also send down its second Bell 212.

ROLAND AIR, GmbH. (ROA): Germany (1980–1991). Roland is established at Bremen to offer seasonal scheduled services linking Neuenland Airport with Langeoog and Heligoland in the Frisian Islands. A fleet comprising 1 Britten-Norman BN-2 Islander, 2 Cessna 207s, and 1 Cessna 172 inaugurate flights during the summer of 1980.

During the next four years, frequencies are initiated to Borkum, Juist, Norderney, and Wangerooge. A Piper PA-34 Seneca is added in 1984. Managing Director Franz J. Lennefer acquires another Seneca and a second Islander in 1986. In 1987, a Cessna 202C is acquired. Although the Frisian Islands route network does not change in 1988, the fleet is upgraded by the addition of a BN-2A Trislander. Flights to Dusseldorf begin in 1990. The carrier, caught in financial difficulty caused by recession, stops flying in 1991.

ROMAVIA ROMANIAN AIRLINES, S.A.: 1 Blvd. Cantemir B1-B2, P.O. Box 53/76, Bucharest, R-75121, Romania; Phone 40 (1) 330-1086; Fax 40 (1) 330-1049; Code WQ; Year Founded 1991. Romavia, the second state-authorized airline, is established at Bucharest by the Ministry of National Defence on April 3, 1991 to provide state VIP flights, as well as scheduled and charter passenger and cargo services, to domestic and regional destinations. Adrian Golenu is appointed director general, with Aurel Stanciu as managing director.

Revenue flights commence in early June from both the capital and Constanta with 3 locally manufactured British Aerospace (Rombac) 111-561RCs and a mixture of Soviet and U.S. equipment: 1 Boeing 707-3K1C, 2 Ilyushin Il-18Ds, 3 former **TAROM Romanian Airlines, S.A.** Antonov An-26s, and 3 An-24Vs.

Returning from a test flight from Bucharest on January 10, 1992, the B-707-3K1C with 13 crew, lands hard in a left wing low attitude. The No. 1 and 2 engines hit the runway, with the wing beyond the No. 1 engine breaking off. Although the aircraft is damaged beyond repair, there are no fatalities.

Two more ex-TAROM An-26s are placed into service during 1993 as options are taken on two McDonnell Douglas MD-83s and an MD-11.

Operations continue apace in 1994, with a fleet that includes 2 each An-24Bs and Il-18Ds, 2 Mil Mi-8 helicopters, 5 An-26s, and 3 Rombac 111-561RCs, 2 of which are leased to **Aero Asia**. Destinations visited include Billund, Copenhagen, Karachi, London, St. Petersburg, and Sofia.

An An-24B with 4 crew and 41 passengers fails its takeoff from Verona, Italy, on December 13, 1995, and crashes in flames just outside the airport perimeter; there are no survivors.

Flights continue during the remainder of the decade and services are started to such Mideast destinations as Qatar and the UAE. The company acquires a pair of U.S.-built helicopters: a Bell 222SP, which is flown for Columna Bank, and a Bell 407 operated on behalf of AMA Industries.

A total of 280 workers are employed at the beginning of 2000.

RONSON AVIATION: Trenton-Mercer Airport, Trenton, New Jersey 08628, United States; Phone (609) 771-9500; Fax (609) 771-4366; Year Founded 1995. Ronson is set up at Trenton-Mercer Airport by L. V. Aronson II in 1995 to operate scheduled commuter flights to Newark and other New Jersey communities. Revenue flights begin with a pair of Beech 99s. A Beech Super King Air 200 is also employed in 1996–2000.

ROOTS AIR LTD. See **SKYSERVICE AIRLINES, LTD.**

RORAIMA AIRWAYS, LTD.: Georgetown Ogle Airport, Georgetown, Guyana; Phone 592 (2) 59648; Fax 592 (2) 59646; http://www.

roraimaairways.com; Code ROR; Year Founded 1992. Roraima is established by Capt. Gerald Gouveia and his wife, Capt. Debra Gouveia, at Georgetown in August 1992 to offer domestic flights to points within Guyana. Employing a fleet of 2 Britten-Norman BN-2 Islanders and 1 Cessna 402B, revenue flights are started in support of the operations of the Omai Gold Mines, Ltd. and the Golden Star Resources, Ltd. Contract geotechnical survey support, aerial surveys, aerial photography, and medical evacuation services follow in 1993.

Managing Director Gerald Gouveia, a former Army Air Corps chief pilot, is joined by another former Army Air Corp chief pilot, Capt. Owen Sandiford, in 1994, becoming Roraima's chief pilot and director of helicopter operations. He also flies the newly acquired Bell 206L LongRanger helicopter. In 1995, a ground handling and general sales agency division is set up at Cheddi Jagan International Airport, Timehri.

Various kinds of services continue to be flown in 1996–1999. During these years, flights are also begun to Eterinbang, Lethem, Mabaruma, and Skeldon. In addition to contract services on behalf of the Omai Gold Mines and Gold Star Resources, Roraima also supports the activities of the Roraima Mining Co., Ltd., Texaco (West Indies), GT&T, Demerara Timbers, Ltd., the Guyana Defence Force, the Guyana Police Force, the U.S. Embassy, and the Guyana Ministry of Health.

A joint-venture agreement is signed by Managing Director Gouveia and Vice President Capt. Eugenio Molina Anaya of **RUTACA (Rutas Aereas, C.A.)** on July 19, 2000 providing for twice-weekly, dual-designator roundtrips between Cheddi Jagan International Airport to Puerto Ordaz, Caracas, Venezuela. The government of Guyana approves the route application in early September, clearing the way for the initiation of the new services. Employing a single Embraer EMB-120 Bandeirante, RUTACA opens the route on September 28. Roraima, for its part, provides ground handling and sales.

ROSCOE TURNER AERONAUTICAL CORPORATION. See **TURNER AIRLINES**

ROSE AVIATION: United States (1968–1969). Based at Hawthorne, California, Rose begins scheduled Piper PA-23 Apache and Aero Commander 500B passenger and commuter flights over local routes on October 6, 1968. The service is maintained for less than a year.

ROSENBAUM AVIATION: United States (1978–1990). Rosenbaum is established at Ypsilanti, Michigan, in 1978 to provide jet freighter contract and leasing services. Employing 1 Douglas DC-8-61CF, 1 DC-8-20F, 5 DC-8-30Fs, plus 1 DC-6BF, the company undertakes flights from bases at Medford, Oregon, and Detroit, many on behalf of **Emery Worldwide**.

The DC-6BF is destroyed in a hangar explosion at Willow Run Airport on July 17.

A total of 2.1 million FTKs are flown in 1980. That figure plunges 88.4% in 1981, down to 244,000 FTKs. Operations are suspended at year's end.

Services are resumed in 1982 exclusively on behalf of **Emery Worldwide**. As the flights are all provided under contract, separate traffic figures are not reported, but are included with those of **Emery Worldwide**. Sources report, independently, that the DC-8s are flown, with full loads, for approximately 6,000 hours.

Operations, still without firm data, continue apace in 1983–1984 as the fleet is upgraded to include five hush-kitted DC-8-73Fs.

The 150-employee company operates a total of 159 million FTKs in 1985.

Rosenbaum returns in 1986 to its earlier practice of not reporting traffic figures. The fleet, however, is increased and now features 5 DC-8-73Fs and 10 DC-8-63s.

FTKs operated total 662.71 million.

The figure for the 235-employee carrier climbs 14.1% in 1987 to 771.48 million FTKs. Revenues reach \$37 million and costs allow a \$13.6-million operating profit. Net gain is \$8.2 million.

Airline employment increases by a huge 106.6% in **1988** to 486 and the fleet now includes 7 DC-8-73Fs, 14 DC-8-63Fs, and 5 DC-8-62Fs.

Cargo advances by another 37.3% to 1.04 billion FTKs and revenues ascend 24.8% to \$46.3 million. With costs held down, operating income moves to \$13.81 million and the net profit is \$8.23 million.

Traffic remains virtually level in **1989**, growing only 0.9% to 1.06 billion FTKs. As a result of this performance, the number of workers is reduced by 5.3% to 460.

On the other hand, revenues zoom upward by 21.6% to \$56.26 million. Costs rise 17.9% to \$38.26 million and allow an operating profit of \$18 million. Net profit climbs to \$12.76 million.

The payroll is cut another 34.8% in **1990** to 300 and the DC-8-62Fs are withdrawn.

Cargo declines again, dropping 7.3% to 1.04 billion FTKs. Revenues again ascend, by 45.1%, to \$81.66 million, expenses rise 91.3% to \$73.21 million, and operating income drops to \$8.44 million. The net profit of a year earlier is turned into a \$1.92-million loss. Purchased by new ownership, the company is renamed **Flagship Express**.

ROSS AVIATION: P.O. Box 9124, Albuquerque, New Mexico 87119, United States; Phone (505) 845-4091; Fax (505) 845-6715; Code ZD; Year Founded 1953. Established at Albuquerque, New Mexico in **1953**, Ross is now a specialized carrier, the prime function of which is to offer services for the U.S. government's nuclear scientists. Initially, the company conducts pilot training for the U.S. Army at Fort Rucker, Alabama.

The fleet is upgraded over the years from Douglas DC-3s and Beech 18s in the **1950s** and **1960s** to turboprops in the **1970s** and later. In **1970**, Ross wins the U.S. Department of Energy contract to operate its airplanes away from **Carco**. Scheduled services are introduced in **1975** linking the company's base with Los Alamos, site of the Los Alamos Scientific Laboratory.

Undertaking its operations under appropriate government regulations, all nonscheduled flights over other than its single announced scheduled route will remain secret. During the first 20 years, only one fatal crash is recorded. On May 19, **1972**, a Beech B-80 Queen Air crashes at Albuquerque, killing all nine aboard. The first jetliners, two DC-9-15s, are purchased from **Emerald Air** and **Air Florida** in **1979**.

By **1981**, the carrier, which also undertakes charters for the U.S. Department of the Interior, owns a fleet that comprises 2 Douglas DC-9-15s, 1 Fokker F.27F, 2 Fairchild Hiller FH-227Bs, 3 de Havilland Canada DHC-6-200 Twin Otters, and 2 Piper PA-23 Aztecs. In **1982-1983**, the Fokker is replaced by a Beech Super King Air 200.

A DHC-7-102 is acquired in **1986** as the Fairchild is withdrawn. President Lewis Pierce acquires a Piper PA-31-350 Navajo Chieftain in **1987**. Traffic over the scheduled route to Los Alamos still fluctuates with the conferences, programs, and other activities at the national laboratory.

Continuing to operate charters for the Departments of Energy and Interior, Ross in **1988** operates a fleet of 13 aircraft: 2 DC-9-15s, 2 FH-227Bs, 4 DHC-7-102s, 1 Beech King Air 200, 2 Twin Otters, and 2 DC-6s. The aircraft sport a variety of paint schemes, carry no aircraft name, and the larger units operate under the public-aircraft regulations that apply to government-owned airplanes.

A total of 32,608 passengers are flown on the Los Alamos route, a decline of 12.3%.

Customer bookings on the Los Alamos run fall another 8.7% in **1989** to 29,759. Consequently, the fleet servicing that route is reduced to 3 DASH-7s and 1 Twin Otter. The DOE contract, periodically won for almost two decades, is secured again during the year, along with a \$175-million payout.

Passenger traffic declines for the Part 121 carrier by 9.3% in **1990** to 27,005 passengers flown.

Passenger boardings on the Los Alamos service drop again in **1991**, down by 35.3% to 17,594.

Company employment is reduced by 5.4% in **1992** to 156. Two DASH-7s are replaced by another Twin Otter, a Learjet 35, and a Beech Super King Air 200.

Customer bookings fall another 5.1% to 18,777 and cargo declines 18.6% to 143,000 FTKs.

The payroll is cut another 5.8% in **1993** and the fleet includes 3 leased DC-9-15RCs, 2 chartered DHC-6-300s, and 1 DHC-7-102.

Enplanements halt their free fall and climb 13.4% to 21,290. Freight also rises, by 28.3%, to 543,000 FTKs. Revenues skyrocket 120.8% to \$1.66 million.

There is no change in equipment during **1994** as the twenty-fifth anniversary year is celebrated. A total of 22,110 passengers are flown over the Albuquerque to Los Alamos DOE contract route, a 3% increase.

The DOE's contract airline stops flying to Los Alamos National Laboratory on September 30, **1995**. A total of 10,500 passengers are carried prior to the suspension of the company's unique scheduled service.

Ross now returns to the operation of charter services on behalf of private enterprise. The fleet of President Pierce is not changed during the remainder of the decade.

ROSS-THOMPSON AIRCRAFT COMPANY (PTY.), LTD.: South Africa (1921-1944). Formed at the end of the previous year by two former military flyers, C. G. Ross and C. R. Thompson, Ross-Thompson attempts to pick up in **1921** where the pioneering **South African Aerial Transport (Pty.), Ltd.** left off. Employing a pair of Avro 504Ks purchased from the assets of that failed concern, the two operate air charter services throughout Natal and the Transvaal. Flight-seeing and barnstorming demonstrations are also provided at community celebrations, fairs, and holidays.

Flights end in **1924**, at which point Maj. Ross joins the South African Air Force, Thompson finds employment with a Johannesburg concern, and the two Avros are sold.

ROSSAIR (PTY.), LTD.: Australia (1975-1994). Rossair (Pty.), Ltd. is started as a general aviation company at Adelaide's Parafield Airport in South Australia in May **1975**. Small planes provide flight training and passenger and cargo air taxi flights. Employing a Cessna 402 and a Cessna 310, scheduled commuter services are inaugurated in **1979** between Adelaide and Mount Gambier in association with **Airlines of South Australia (Pty.), Ltd.**, the Ansett subsidiary.

By the middle **1980s**, the route network has been increased through the addition of stops at Ceduna, Port Lincoln, Streaky Bay, and Whyalla. The fleet, too, is increased as three more Cessna 402s are purchased. Unable to maintain its viability, the regional ceases scheduled flying in **1986**.

Charter and contract service flights, however, continue and in **1993**, General Manager Jim Hunt's 85-employee company operates a fleet of 2 Cessna 402s, 3 Cessna 414s, and 1 Cessna 441.

Operations cease in **1994**.

ROSSAIR EXECUTIVE AIR CHARTER (PTY.), LTD.: Lanseria Airport, Lanseria, 1748, South Africa; Phone 27 (11) 659-2980; Fax 27 (11) 659-1389; <http://africa.cis.co.za:81/buy/ad/iam/rossair1.html>; Year Founded 1956. Rossair is established at Lanseria Airport in **1956** to provide executive and small group passenger flights throughout the nation, including flight-seeing to big game preserves.

By **1998**, Rachel Muir is operations director and schedules the work of 11 pilots. The fleet includes 1 Canadair 600 Challenger and 2 Cessna 560 Citation Vs. In addition to the bizjets, the company also operates 4 Beech Super King Air 200s, 2 Beech 1900Cs, 1 King Air 90, and 1 Cessna 208 Caravan I.

Having suffered crushing financial losses, the Air Lesotho subsidiary is shut down in February **1999**.

Flying under contract to **DHL Worldwide Express**, the Cessna 208 Caravan I with a pilot and three passengers fails its takeoff from Jomo Kenyatta International Airport on a November 26 service to Dar es Salaam. The plane crashes back onto the runway and catches fire; there are no survivors.

The first of their kind to be converted from passenger to freighter configuration, two Avions de Transport Regional ATR42-320Fs are

delivered, one each in September and December 2000. The two are operated by affiliate Rossair Contracts (Pty.), Ltd. across Africa on behalf of their owner, **DHL Worldwide Express**. The new cargo planes and their service are profiled in "Conversion Factors," *Regional Airline World* (December 2000).

ROSSIYA AIR COMPANY: 2 Pervaya Reisovaya, Vnukovo Airport, Moscow, 103027, Russia; Phone 7 (095) 436-8135; Fax 7 (095) 436-2328; Code R4; Year Founded 1992. To earn the funding needed to cover its costs, Rossiya (Russia) Air Company, the government executive unit of **Aeroflot Russian International Airlines (ARIA)**, set up as a separate division at Moscow's Vnukovo Airport in 1992. It is to provide charter passenger and cargo services throughout the Russian Federation, other nations in the CIS, Europe, and Asia. Alexander A. Larin is general director and he begins flights with a fleet that includes 10 Ilyushin Il-62Ms, 20 each Tupolev Tu-154M, Tu-134s, and Yakovlev Yak-40s, 3 Il-18s, and 7 Mil Mi-8 helicopters. Orders are placed for 2 Antonov An-124-100s and enplanements total 318,354.

Despite the national economic downturn, Rossiya, unlike many of its fellow start-up Russian carriers, is able to increase its traffic during 1993. Passenger boardings grow 3% to 328,200 while freight rises 12.7% to 107.7 million FTKs.

During 1994, in a joint venture with **HeavyLift Cargo Airlines, Ltd.** of the U.K., the company places a pair of Antonov An-124s into service on executive support flights. In addition, two of the new Tu-204s join the fleet, which now also includes 11 Il-62s, 2 Il-18s, 8 Yak-40s, 11 Tu-154s, and 14 Tu-134s.

Customer bookings swell 4.6% to 342,500, but cargo drops 13% to 94 million FTKs.

Holiday charter operations begin late in 1995. For the year, enplanements fall 12.8% to 816,600, but freight skyrockets 109.2% to 27.4 million FTKs.

Flights continue without fanfare in 1996-1998. Enplanements during the latter year total just 239,000.

Rossiia is much in the news early in 1999.

Just after landing at Moscow on February 10, the tail of the ARIA Rossiya Il-96 returning President Yeltsin from the funeral of King Hussein at Amman, Jordan, strikes the wing of the **Alitalia, S.p.A.** MD-82, which has just brought Italian Prime Minister Massimo D'Alema to the Russian capital for talks. No injuries are reported aboard either aircraft, although the Italian plane sustains a cracked fuselage and is thus damaged to a point where an aircraft will be sent to replace it.

After an investigation determines that Rossiya's ground services had improperly directed Italian Prime Minister D'Alema's transport on February 8, Prime Minister Primakov on February 18 personally fires that division's manager, Vladimir Kachnov.

As the European diplomatic situation with regard to the Yugoslav question darkens, Prime Minister Primakov is en route to the U.S. on March 23 for discussions with President Clinton on other matters. Just after refueling in Iceland, the Primakov learns from Vice President Al Gore that NATO will begin a military campaign, Operation Allied Force, the next day; the Russian leader orders his Rossiya Il-96M to return to Moscow.

At the direction of President Yeltsin and accompanied by Foreign Minister Igor Ivano, Defense Minister Igor Sergeyev, and other top-level delegates, Prime Minister Primakov, aboard a Rossiya Il-96, flies to Belgrade on March 30 for discussions with Yugoslav President Slobodan Milosevic. There is some hope that Russia, a traditional Serbian ally, might be able to bring a resolution of the Kosovo crisis. Six hours later, the Russians return home, their peace mission a failure.

Rossiia will remain occupied over the next ten weeks transporting Russian officials throughout Europe in a search for a diplomatic conclusion to the Kosovo crisis. Combat ends on June 11.

Flights in support of the Russian government continue apace during the remainder of the year. Two specialized Antonov An-124-100s acquired in 1995 to provide cargo support for state trips by President Boris Yeltsin, are sold to the **Antonov Design Bureau** subsidiary Antonov

Airlines, the Russian partner of **Air Foyle, Ltd.**

Nickolai Shipil replaces Yuri Lengaro as director general of the VIP carrier on May 17, 2000. Shipil, who is close to Russian President Vladimir Putin, had previously been employed at **Pulkovo Airlines**.

During the summer, **MATK RusAvia** contracts with a capital tour operator to fly travelers to Thailand, Indonesia, and other Southeast Asian points in nine flights late in the fourth quarter. Unhappily, the company does not have sufficient aircraft or funds to complete its obligation, leaving hundreds of people stranded. The civil aviation department of the Russian Ministry of Transport (GSGA) arranges for the return of the defunct line's customers. Special flights are operated under contract by **Aeroflot Russian International Airlines (ARIA)**, **Domodedovo Airlines**, **Pulkovo Airlines**, and Rossiya Air Company. GSGA then suspends the operating certificate of **MATK RusAvia**.

Biweekly return charters are inaugurated on October 28 between Moscow and Tel Aviv.

A Rossiya Tu-154M, en route from Moscow to Ankara, also on October 28, carrying Prime Minister Mikhail Kasyanov, is forced to make an emergency landing at the Turkish capital after an onboard fire alarm is activated.

In March 2001, it will be announced that Rossiya Air Company had joined in an alliance on December 29 with St. Petersburg-based **Pulkovo Airlines**, Kazan-based Aviation Production Association (KAPo), and the St. Petersburg International Bank. The new pact will reportedly sponsor an intensified timetable for production of the new Tu-214 at the Kazan plant, while Rossiya will coordinate its fleet with Pulkovo for commercial purposes. Sales and ticketing for the two airlines will be handled by Pulkovo.

ROSVERTOL A/O: Russia (1993-1996). Established at Rostov-on-Don in the spring of 1993, Rosvertol, the operating arm of the Rostov helicopter plant that builds Mil helicopters, names H. V. Nagibin as its new general director. He assembles a fleet of Antonov An-12s and Mil Mi-26s with which to launch ad hoc freight and aerial support charters.

While on approach to Tyumen's Roshino Airport on a charter from Khabarovsk on September 25, an An-12 crashes short of the runway. With insufficient fuel reserves, the aircraft's crew had decided to push on rather than pay the landing costs of diverting to another airfield.

Operations continue apace in 1994-1995.

ROSWELL AIRLINES: United States (1976-1981). Callens Flying Service owner Dick Callens establishes a scheduled airline division of his charter company at Roswell, New Mexico, in 1976. Employing a Piper PA-34 Seneca, regularly scheduled commuter flights are inaugurated to Ruidoso via Albuquerque and Artesia. Operations continue apace until June 1981.

ROTA AIR, A.O.: Ataturk Airport, Konakli Sokak Villa Ocak, No. 3/2, Florya, Istanbul, 34810, Turkey. Established as an FBO at Istanbul in 1995, Rota also operates executive and small group passenger charters. Under the direction of General Manager Capt. Bulent Karasoy, the company's 3 pilots fly 1 each Cessna 560 Citation V and a C-650 Citation VII.

ROTTERDAM AIRLINES, B.V. (RAL): The Netherlands (1977-1984). Organized in early 1977 at Zestienhoven Airport, Rotterdam, this charter operation is owned by the city's travel agents, Christoffel. Employing leased Fokker F.28s, the company initiates nonscheduled flights to various European destinations, including London (LGW).

Late in 1983, the carrier leases a B-737-200, christening it the *Delfshaven*, and uses it to inaugurate scheduled services to London (LGW), following this early in 1984 with a frequency from Rotterdam to Innsbruck. Having chosen a time of recession in which to expand, the carrier is unable to generate sufficient traffic to cover costs and suspends services. Although company officials announce plans to reorganize and restart operations with leased DC-8s, these are not realized.

ROTTNEST AIRBUS (PTY.), LTD.: Fauntleroy Airport, Perth, Western Australia, 6105, Australia; Phone 61 (9) 478-1322; Fax 61 (9) 277-4198; Code DW; Year Founded 1985. Rottnest Airlines (Pty.), Ltd. is formed by Allied Aviation, Ltd. at Perth Airport in January 1985 to offer low-cost scheduled services to Rottnest Island in competition with those already provided by **Skywest Airlines (Pty.), Ltd.** Equipped with a Britten-Norman BN-2 Islander, five-to-nine-times-per-day services commence at the end of February. The fleet in 1986 grows to include 2 Islanders and 1 Beech B-58 Baron. On September 1, a Sikorsky S-61 is acquired and is employed to begin Island Hopper Chopper Service on September 20.

On April 2, 1987, the carrier is purchased by Havsin (Pty.), Ltd.; Bernie Baldwin is general manager with Francis Anthony appointed managing director. The S-61 scheduled helicopter service ends on April 30 and two Bell 206B JetRangers replace the Sikorsky, offering over-water charter services. A new Pilatus-Britten-Norman PBN-2 is placed in service in August.

In 1988–1992, the route is maintained and the fleet is upgraded to include 2 new PBN-2s, 2 Beech B-55 Barons, and 1 Piper PA-31-350 Navajo Chieftain.

Operations continue in 1993, at which time the fleet includes 2 Beech 55s, 1 Islander, and 1 Navajo Chieftain. A new corporate identity, **Rottnest Airbus (Pty.), Ltd.**, is chosen along with appropriate new aircraft livery.

A total of 35 weekly frequencies between Rottnest Island and Perth are flown during the remainder of the decade.

ROUSSEAU AVIATION, S.A.: France (1963–1973). Rousseau Aviation is set up in 1963 to offer scheduled passenger and cargo services from Paris (ORY) with a small fleet of DC-3s. Flights continue during the remainder of the decade, many as replacement operations on behalf of **Air Inter (Lignes Aeriennes Interieures, S.A.)**.

By 1970, the fleet has been increased to include a number of Hawker Siddeley HS-748s and 8 Nord 262 Fregates. The latter type are employed to offer return service to London (LGW) and other points. In 1973, Rousseau becomes a part of **TAT (Touraine Air Transport, S.A.)**.

ROYAL AIR: United States (1978–1980). Less than a month after President Carter signs the Airline Deregulation Act in October 1978, Royal Air is established at Kansas City, Missouri, to undertake Essential Air Service (EAS) flights to Columbia, Manhattan, Topeka, and Emporia. Employing several small Cessnas and an Embraer EMB-110 Bandeirante, Royal inaugurates daily roundtrips on November 15, maintaining them until January 1980.

ROYAL AIR, LTD. See QUEBECAIR, LTD.

ROYAL AIR BURUNDI, S.A.: Burundi (1963), RAB is established at the capital city of Usumbura in the spring of 1963 to serve as flag carrier for the new state, once part of the Belgian protectorate of Rwanda-Urundi. A Lockheed L-049 is leased from **Trans World Airlines (TWA)** and is employed to begin services to Rome, Paris, and Brussels. The new carrier is unable to achieve viability and folds during the summer; its single plane is returned to the U.S.

ROYAL AIR CAMBODGE, S.A. (RAC) (1): Cambodia (1956–1970). The first Royal Air Cambodge, S.A. (RAC) is formed at Phnom Penh on June 14, 1956. Shareholding is divided between the royal government of Prince Sihanouk (38%), **Air France** (34%), and private investors (28%). Several Douglas DC-3s are donated by the French flag carrier; the transports are given a livery that includes a logo depicting the *apsara*, a celestial nymph shown on the walls of Angkor Wat. Scheduled DC-3 services are inaugurated by the new concern on October 20 to Siem Reap, serving Angkor Wat, plus Saigon and Bangkok. Flights to Hong Kong commence on July 2, 1957, but become irregular the following year before ceasing.

An arrangement is entered into with **Air France** in January 1959; under its terms, a wet-leased Lockheed L-1049G Super Constellation re-

sumes services on February 11 from Phnom Penh to Hong Kong. Flights continue largely without change in 1960.

A block-space agreement is signed with **Air France** in January 1961; French B-707-338s replace the wet leased Super Connie on the Hong Kong run. Political difficulties between Cambodia and Thailand lead to a suspension of Bangkok service on October 12. Following the political upheavals of this and the previous year, traffic falls, before leveling.

After purchasing a DC-4, RAC-1 begins service to Vientiane, Laos, in August 1962. A year later, on August 24, 1963, the four-engine Douglas transport begins flying to Singapore. Several scheduled frequencies are now increased and Siemreap tourists now begin flying to Hong Kong and Singapore more often. Further plans to expand are made, but must progress slowly as Southeast Asia explodes into the Second Indochina War.

Bookings in 1964 total 24,572 and revenues are \$1.92 million.

Airline employment in 1965 stands at 258 and the fleet comprises 1 each DC-3, DC-4, and wet-leased **Air France** Boeing 707-138B. A DC-6 is purchased in January and is employed to begin a new service from Phnom Penh to Canton via Hanoi. As conflict spreads, the company is forced to suspend its new North Vietnamese route in June, along with flights to Vientiane. The politically neutral RAC is, however, able to continue flying to China even as fighting in neighboring South Vietnam becomes more intense during the remainder of the year and into 1966.

A DC-6B and a Fokker F.27 Friendship are acquired in 1967, along with a Britten-Norman BN-2 Islander. The following year, Chairman Mao presents Prince Sihanouk with a Soviet-made Ilyushin Il-14.

The highlight of the carrier's last years is the acquisition from **Air France** in January 1969 of a Sud Est SE-210 Caravelle III. It is employed to offer *Apsara* Service from Phnom Penh to Singapore and Hong Kong.

In March 1970, Prince Sihanouk is deposed and the name of the carrier is shortened to **Air Cambodge, S.A.**

ROYAL AIR CAMBODGE, S.A. (RAC) (2): 24 Karamuon Sar Ave., 206A Norodom Blvd., Phnom Penh, Cambodia; Phone 855 (23) 428 830; Fax 855 (23) 428 803; <http://www.royal-air-cambodge.net>; <http://www.iac.co.jp/kpnarin/royalair.htm>; Code VJ; Year Founded 1994. Following peaceful UN-supervised elections in December 1993, the new government of the Kingdom of Cambodia enters into discussions with **Singapore Airlines, Ltd.** concerning the possibility of reestablishing a national airline. Government officials want to promote tourism into Cambodia, home of one of the world's architectural wonders, Angkor Wat. SIA initially agrees to take a 40% stake and provide management and technical support.

As the result of a coup attempt during the first week of July 1994, SIA Managing Director Cheong Choong Kong withdraws from the arrangement on July 11. **Malaysia Helicopter Services, Ltd.**, parent of **Malaysia Airlines, Ltd. (MAS)**, now enters the picture to take over the SIA stake and support agreements.

Royal Air Cambodge is officially established on December 7 as successor to **Kampuchea Airlines (1)**. Executives of Thai-owned **Cambodia International Airlines** are ordered, on December 22, to shut down within two days.

A \$10-million management contract is signed, with operational control and training passing to the airline experts at MAS, on December 24 ceremonies presided over by Cambodian Prime Minister Prince Norodom Ranarddh. The three Avions de Transport Aerien ATR72-202s that KA has had under lease are returned to **TAT European Airlines, S.A.**

Vichit Ith is named chairman/CEO and begins to recruit a workforce of 497 (300 actually come on staff). One each Boeing 737-4H6 and B-737-4Y0 are leased from **Malaysia Airlines, Ltd.** Both are painted with the company logo of the *nagaraja* or royal serpent, which represents both fertility and protection in Cambodian mythology.

The aircraft are employed, beginning on January 2, 1995, to inaugurate scheduled and charter regional and domestic passenger and cargo services; the first service is operated to Kuala Lumpur by the B-747-4H6, which has been christened *Angkor Wat*

From its Phnom Penh base, the carrier now also visits the domestic cities of Battambang, Koh Kong, Mondulhiri, Rattanakiri, Siem Reap, Sihanoukville, and Stung Treng as well as the international points of Guangzhou, Ho Chi Minh City, Hong Kong, Kuala Lumpur, and Singapore.

On March 3, Thai aviation officials briefly detain the inaugural flight from Phnom Penh after it arrives at Bangkok. It is claimed that the aircraft, leased from **Malaysia Airlines, Ltd.**, does not have proper clearance. After an hour, the aircraft is released. Cambodia's ambassador to Thailand, Roland Eng, who has been called to the scene, states that the problem is not related to his country's recent cancellation of landing rights for **Cambodia International Airlines** and **Siam Kampuchea**.

Services thereafter are conducted normally to all points and enplanements for the year total 320,000.

The government of Cambodia, in the persons of its two prime ministers, express their displeasure with RAC during the first quarter of **1996**. Both gentlemen are extremely displeased with the number of flights offered and the quality of the airline's service. Unless RAC is able to add additional flights, tourism will, they believe, be severely hampered, making it necessary to adopt an "open-skies" aviation policy. Executives at the airline and at MAS get the message and scurry to make improvements.

Three new Aero International (Regional) ATR72-202s are now acquired, including the final unit, delivered in October, which is equipped with a protection kit designed to enhance operations from unpaved runways. Frequencies to Siem Reap, home of Angkor Wat, are increased to seven per day while the turboprops begin to handle some flights from Phnom Penh to Bangkok.

For its part, the government begins to redevelop Phnom Penh International Airport, breaking ground for a new terminal with capacity to handle 1.2 million passengers each year.

Twice-weekly roundtrip service to Guangzhou begins on November 2.

Airline employment in **1997** stands at 530. It is reported that in April, a Cambodian "businessman" Teng Bunma, shows extreme displeasure with an ATR72-202 flight to Phnom Penh. Having learned that RAC had misplaced his luggage and that it was not aboard the aircraft, he borrows a pistol from a bodyguard and shoots out the offending aircraft's tires. His stature as a VIP prevents his arrest.

In early July, Hun Sen, Cambodia's second prime minister, overthrows the coalition government of the first prime minister, Prince Norodom Ranariddh, and his Funcinpec Party. Heavy fighting ensues, much of it along the road to and within the perimeter of Phnom Penh's Pochentong Airport. The airport itself will be badly damaged—its VOR beacon is put out of service and looters steal or destroy equipment from or at the ATC tower and passenger terminal.

Despite the chaos that causes all of the international carriers, except **Thai Airways International, Ltd. (THAI)** to halt services, RAC continues to operate its scheduled jet flights for a period from the airport to Hong Kong, Bangkok, Singapore, Kuala Lumpur, Guangzhou, and Ho Chi Minh City. Many passengers, including all seconded MAS staff and Chairman Ith, fly out of the country aboard RAC's Boeings to Ho Chi Minh City, where they book flights elsewhere aboard other airlines. Chief Operating Officer David Chew is left in charge.

The company's ATR72-200s maintain limited domestic services to Siem Reap and Battambang. By July 23, the Boeings are grounded at Kuala Lumpur and the new government of Hun Sen's Cambodian People's Party announces plans to end the airline and form a new one.

That new operation bears a familiar name, **Kampuchea Airlines (2)**. It comes to life at the end of the month and makes its inaugural flights on August 15–16 with a leased Lockheed L-1011 TriStar 1. When its new CEO Yin Chan is asked about RAC in an interview with Malaysia's *The Business Times* on August 16, admission comes that the matter of the former airline "is a very sensitive issue." Leaving it to the government to determine RAC's fate, Chan indicates that, as far as he knows, "RAC is free to maintain operations."

RAC does not end, but it is no longer regarded as a monopoly, "The National Airline of Cambodia." Instead, the government's new policy is

interpreted as an "open skies" manifesto, which allows not only the existence of the new KA-2, but RAC as well. It is at this point that the Asian economic crisis begins. The company returns to MAS the B-737-4Y0 it has had for several years and also withdraws from its Phnom Penh-to-Hong Kong route.

Now marketed as "The Cambodian Airline," RAC makes some attempts at expansion in **1998**. Following the downturn in business for **Lao Aviation**, the Cambodian line opens a new service between Phnom Penh and Vientiane. A new regional route is also started from Siem Reap to Bangkok four times a week.

Although Sihanoukville disappears from the scheduled domestic network (it remains a charter stop), ATR72-202 local-service frequencies are maintained to Battambang, Krong Koh Kong, Mondulhiri, Ratanakiri, Sisophon, and Stung Treng. Plans are made to begin flights into Pailin, as soon as the government completes work on a new airfield at Touk Thlar, site of a former French landing strip.

The Asian economic crisis has a significant impact on traffic into the country during the second half of the year. In addition, the national election and uncertainties surrounding it cause some visitors to stay away. RAC participates in the election process by hauling printed materials required by the National Election Committee to Phnom Penh on special ATR72-202 charters from India.

Service is maintained during the remainder of the year and into **1999**. Airline employment at the beginning of **2000** stands at 485. The major Western airliners are a B-737-284C and B-737-4H6.

On May 19, weekly roundtrip service, code-shared with **Shanghai Airlines Company, Ltd.**, is inaugurated between Phnom Penh and Shanghai.

In August, Prime Minister Hun Sen fires the airline's managers and places Senior Minister Sok An in charge. The company will now be reorganized, ostensibly to improve safety.

The airline will be sued by ATR on February 17, **2001** for failing to maintain its aircraft or to make required lease payments.

ROYAL AIR FREIGHT: 2141 Airport Road, Waterford, Michigan 48327, United States; Phone (248) 666-3070; Fax (248) 666-4719; Year Founded 1961. RAF is set up at Oakland–Pontiac Airport in **1961** as an FBO. Over the next 30-plus years, Royal operates on a low-key basis, introducing both passenger and cargo charter services as Royal Air Charter. Destinations throughout the U.S. are visited, along with markets in Canada and Mexico.

By **2000**, President William Kostich operates a large and varied fleet. Employed for passenger services are 1 Learjet 24B, 5 Cessna 310Rs, and 1 C-402C. Freight and couriers are flown by 5 Embraer EMB-110B Bandeirantes, 3 Mitsubishi Mu-2Bs, and 1 each Learjet 23, Learjet 24, Learjet 24A, Learjet 25, Beech 18, and Piper PA-31-350 Navajo Chieftain.

ROYAL AIR INTER (LIGNES INTERIEURES MAROCAINES): Morocco (1970–1985). RAI is organized at Casablanca's Aeroport Casablanca-Anfa early in **1970** to take over the nation's domestic air transport from **Royal Air Maroc**, the new entrant's majority owner. Scheduled operations commence on April 2 with two Fokker F.27-600s and link Casablanca with Agadir, Marrakesh, Rabat, Fez, Tangier, Tetouan, Oujda, Al Hoceima, and Ouarzazale. International flights are made from Tangier to Gibraltar and Malaga and from Oujda to Oran.

Services are maintained throughout the remainder of the decade, and by the early **1980s** frequencies are also offered to Dakhla, El Aaiun, and Smara in the Western Sahara as well as Al Hoceima and Tan Tan in Morocco.

Although the fleet is not altered during these years, greater reliance is now placed upon the Boeings of RAM. As a result, it is decided to fold the local service carrier into **Royal Air Maroc** during **1985**.

ROYAL AIR LAOS, S.A.: Laos (1961–1975). Following the creation of Prince Souvanna Phouma's new coalition government at Vientiane in May **1961**, the previous Laotian carrier, Air Laos, S.A. is replaced by a new company, Royal Air Laos, S.A.

Domestic service is resumed with Douglas DC-3s acquired from the assets of the previous operation. A DC-4 is purchased in 1962 and is employed to restart routes to Bangkok and Saigon; a DC-6 arrives in 1963.

An attempt to extend the Bangkok route to Hong Kong is stalled in 1964 when **Cathay Pacific Airways (Pty.), Ltd.** offers objections. Finally, an arrangement is worked out whereby RAL, at the beginning of 1965, is able to fly the route on behalf of the crown colony's major. Flights continue in 1966–1967 to the foreign destinations named, plus nine domestic destinations.

En route from Vientiane on February 24, 1968, a DC-3 with 3 crew and 34 passengers crashes into the Mkong River; there are no survivors.

Tragedies occur in each of the following two years. On December 23, 1969, a DC-3 goes down near Luang Prabang (six dead) while a Beaver hits a mountain, near Vientiane, on January 2, 1970 (two dead).

Although no crashes occur in 1971, tragedy strikes twice within a week in early 1972. On February 4, a wet-leased DC-6 crashes near Tegal, Java (six dead). While en route from Saigon to Vientiane via Savannakhet on February 11, a C-54A with 6 crew and 17 passengers simply disappears into the Laotian mountains. No wreckage is found, no survivors ever turn up, and reports suggest the plane has been shot down.

As the conflict winds toward conclusion and **Societe Aigle Azur, S.A.** is no longer able to provide international services, the Laotian flag carrier's operations become very intermittent.

In May, a Lockheed L-188A is leased from **Trans Australia Airlines (Pty.), Ltd.** for a year; it is christened *Tiao Anou* and enters service over the carrier's long-haul routes.

An order is placed in 1973 for a Sud Est Caravelle and a second TAA Electra is chartered to provide service until the French jetliner can arrive. Enplanements for the year total 138,860.

RAL is revitalized in 1974. The workforce rises to 420 and the 2 remaining DC-3s are supplemented by 3 DC-4s and the carrier's first jetliner, a Sud-Est SE-210 Caravelle III, leased from **Air France**. Service is maintained, renewed, or upgraded to Bangkok, Saigon, Chiangmai, Phnom Penh, and Hong Kong. The two chartered Electras are returned to Australia.

Hanoi now also becomes a destination as a new marketing and publicity campaign is launched in the U.S.

A Curtiss C-46D is lost 75 mi. NNE of Vientiane on October 15.

Despite the increase in owned capacity during the year, passenger boardings, in light of the war, decline 6% to 131,000, while freight is down by 16% to 1.01 million FTKs.

In February 1975, service is inaugurated to Kuala Lumpur and Canton. A non-pilot takes off in a Vickers Viscount 806, with three other passengers, from Phnom Penh on March 15 and crashes; there are no survivors. Two DC-3s and four DC-4s are damaged beyond repair by a storm that strikes Vientiane on March 24.

A Communist rocket attack destroys a C-54A on the ground at Phnom Penh on April 10. Flights between Vientiane and Saigon are suspended the same day due to the escalation of the conflict. Finally, with the Communist victory, the carrier ceases operations at the end of April.

On December 3, the Pathet Lao forms the Lao People's Democratic Republic and RAL is closed down.

ROYAL AIR MAROC (MOROCCAN INTERNATIONAL AIRLINES): **Aeroport de Casablanca-Anfa, Casablanca, Morocco; Phone 212 (2) 912000; Fax 212 (2) 912087; <http://www.royalair-maroc.com>; Code AT; Year Founded 1953.** On June 28, 1953, **Societe Air Atlas, S.A.** and **Air Maroc (Societe Avia Maroc Ligne Aerienne, S.A.)** are merged by the French Line steamship company to form the **Compagnie Cherifienne de Transports Aeriens, S.A. (CCTA)**, familiarly known as **Air Maroc (Compagnie Cherifienne de Transport Aeriens, S.A.)**. Employing Douglas DC-3s and DC-4s and operating over the routes of its merger constituent during the remainder of the year and over the next two years, CCTA offers domestic services, as well as flights to Paris, Geneva, and Frankfurt.

France grants Morocco its independence on March 2, 1956, with the northern territories of Spanish Morocco gaining freedom in April.

Following independence, the Air Maroc (**Compagnie Cherifienne de Transport Aeriens, S.A.**) is reformed on June 28, 1957. Royal Air Maroc is owned 55% by the government of the Kingdom of Morocco, 30% by **Air France**, and 5% by **Aviacion & Comercio, S.A. (AVI-ACO)**.

Almost immediately, the new company, employing the propeller equipment of the merger partners, begins flying Muslim Hadj pilgrims to Mecca. This dedicated charter program will occur every year hence.

RAM places its first Lockheed L-749A Constellation into service by year's end.

In June 1958, Sud-Est SE-210 Caravelle Is are ordered. Orderly retirement of the DC-4s is begun, following the July 2 inauguration of long-haul European services by four Lockheed L-749As leased from **Air France**. Flights from Oran to Oujda, suspended on May 14, are reopened on July 5 and a route is started to Gibraltar late in the year.

Planning is begun during 1959 for the introduction of jet service. Meanwhile, **Air France**, under contract, begins to fly a service from Oujda to Toulouse employing an L-1049G Super Constellation.

A second Caravelle is ordered in February 1960. The first Sud-Est SE-210 Caravelle IA is delivered on July 19 and is placed on the route to Europe and Paris at month's end.

Enplanements for the year are 164,706.

SE-210 service is launched southward from Rabat to Bamako in July 1961. The second Caravelle IA is delivered and a third is ordered. In 1962, the fleet comprises 2 DC-3s, 4 L-749s, and 2 Caravelle IAs.

More European destinations are added in 1963–1965 as Amsterdam, Athens, Barcelona, Bastia, Bordeaux, Brussels, Dusseldorf, Frankfurt, London, Geneva, Lisbon, Lyon, Marseilles, Madrid, Nice, Strasbourg, Toulouse, Vienna, and Zurich join the route network.

The three-unit Caravelle fleet is upgraded from Series IA to Series III specification. It is also increased by the addition of three more L-749As, two of which are converted into freighters.

Orders are placed for four more Caravelles in 1966. During 1968, the company shareholding is redistributed. The Kingdom of Morocco increases its majority stake (64%), with others holding lesser shares: Air France (21%), Compagnie General Transatlantique (7.6%), AVIACO (5%), and private interests (2.4%). Orders are placed for Boeing 727s in 1969.

On initial approach to Agadir on April 1, 1970, an SE-210 Caravelle III with 6 crew and 76 passengers en route to Paris crashes near Berrechid from a height of 500 ft. The fuselage breaks apart, leaving 61 dead.

The subsidiary **Royal Air Inter** is created to take over a number of domestic routes with Fokker F.27-600s beginning on April 2. The first B-727-2D6 is placed in service on May 15 over regional services.

During 1971–1973, the fleet grows to include 5 Caravelle IIIs and the Boeing 727-2D6; the route system now includes over 15,000 unduplicated miles.

Leased from **Sobelair, S.A.**, an SE-210 VIN with 7 crew and 99 passengers en route from Paris to Casablanca via Tangier on December 22 of the latter year, strikes Mount Mellaline while on approach to Tangier in darkness; there are no survivors.

The workforce totals 1,954 in 1974. Orders are placed for three B-737-100s as three B-727-2B6s join the fleet and a request is made of **Air France** for a leased B-707-328B Stratoliner.

Enplanements reach 538,077.

B-707-328B service to New York begins on April 1, 1975, the same month the last DC-3 is retired. Late in the second quarter, weekly Stratoliner services are launched to the Canary Islands.

A B-707-321C chartered from **Alia (Royal Jordanian Airlines)** to transport Moroccan workers from France for summer vacations, crashes into a mountainside near Imzizen, 30 mi. NE of Agadir, during its landing approach to the latter city on August 3; there are no survivors. A replacement aircraft, a B-707-351C, is purchased from the U.S. carrier **Northwest Airlines** on December 29.

Operations continue apace in **1976** as a second **Northwest Airlines** B-707-351C is acquired on March 17. At the request of the Moroccan government, traffic rights to South American nations are sought; however, Brazil is the only nation on that continent to accede. A weekly service to Rio de Janeiro is opened.

Reacting to an anonymous tip concerning the imminent hijacking of a company aircraft, FBI agents arrest Mohammed Fadel Musaid and Ali Elmawri after uncovering six automatic handguns and ammunition in their baggage as they are about to board an aircraft at New York (JFK) on August 10, **1977**. Although the two men are indicted, the charges of attempted air piracy are dismissed in court on October 29 on the grounds of insufficient evidence.

Also during the year, the B-707-328 *Chateau de Pan* is purchased from **Air France**. Four Caravelle IIIs are retired.

A B-747-2B6B combi (BC) is acquired on September 29, **1978** and is initially employed to make Hadj flights from Rabat to Jeddah in October. It is placed into scheduled service in December over the company's routes from Casablanca to Paris, Montreal, and New York.

Additional services and frequencies are started during **1979-1983**, including extra routes throughout North Africa and the Middle East, West Africa and the Canary Islands. The weekly nonstop flight to Rio de Janeiro, having been found unprofitable, is suspended. The fleet is altered and enhanced as the Caravelles and B-737-2B6s are retired and replaced by four additional B-727-2B6As and six B-737-3B6s. A B-747-133 is annually chartered from **Air Canada, Ltd.** to transport Hadj pilgrims to Saudi Arabia.

A B-727-2B6A with 100 aboard is commandeered during a May 27, 1982 flight from Athens to Casablanca, the second leg of a service originating at Damascus. Demanding that Morocco improve its morality by observing strict Islamic tenants, the pirate forces the crew to fly to Tunis where he surrenders.

Enplanements during the latter year total 1.25 million and despite an operating profit of \$3 million, a \$3-million net loss is suffered, reflecting the weakening of the Moroccan currency.

Chief of the Ministry of Transport's Air Directorate, Mohamed Mekouar, becomes president/CEO in February **1984**. In November, service is reintroduced to Rio de Janeiro.

Enplanements for the year reach 1,278,438 and an operating profit of \$10.6 million is reported on revenues of \$186 million.

The workforce is increased 4.9% in **1985** to 4,103. President Mekouar is elected president of IATA for the succeeding year.

The B-747SP-44 *Majuba* is leased from **South African Airways (Pty.), Ltd.** on March 15. In addition to the North American service, the Special Performance Jumbojet is operated on a weekly service from Casablanca to Rio de Janeiro. Domestic fares are increased by 30% in September, but local service continues to lose money. **Royal Air Inter** now serves 10 domestic cities with a fleet of 2 F.27-600s, supplemented by RAM's B-727-2B6As and B-737-2B6s. To avoid further losses by the subsidiary, it is now folded back into the main line.

Passenger boardings climb 14.6% during the year to 1,497,000 (including 44,540 flown on roundtrips from Morocco to New York and Montreal) and cargo traffic accelerates 9.3% to 42.16 million FTKs. On revenues of \$226.7 million, expenses are \$206.9 million and the operating profit is \$20.1 million. Over \$30 million in trading debts are owed to the carrier by the Moroccan government, along with \$7 million in subsidies for the years 1976 and 1979-1981.

In February **1986**, two sophisticated B-757-2B6s are ordered to replace the two aging B-707-351Cs. The carrier is the first in Africa or the Middle East to order the 757, which will be acquired under a \$95-million, 15-year lease arranged by Chemical Financing Services, a subsidiary of the Chemical Bank. The first sets a record for its type by traveling the 5,653 delivery miles from Seattle to Morocco nonstop in July. It is almost immediately placed on pilgrimage flights between Morocco and Jeddah, Saudi Arabia. Following Israeli Prime Minister Peres' visit, RAM loses its traffic rights into Damascus.

When the second B-757-2B6 arrives in August, a B-707-351C is switched to all-cargo service. After its lease is completed, the SAA B-747SP-44 *Majuba* is purchased on September 4.

Customer bookings ascend 1.6% to a record 1,520,735.

The workforce is increased 3.2% in **1987** to 4,764 as the carrier's thirtieth anniversary is celebrated. At this point, the B-747-2B6BC is placed largely on charter operations, including a weekly flight to Helsinki, while the B-747SP-44 takes over the scheduled Jumbojet service.

Passenger boardings leap upward by 11.8% to 1,699,774 and freight climbs 13.9% to 53.98 million FTKs.

A marketing alliance is entered into with **Iberia Spanish Airlines (2) (Lineas Areas de Espana, S.A.)** in March **1988**. Under its terms, the carriers agree to offer joint services on routes from Marrakech to Madrid and from Casablanca to Malaga and Barcelona. Tangier will later be added to the mix.

Early in the spring, service is initiated to Copenhagen, Basel/Mulhouse, Nouakchott in Mauritania, and Bamako in Mali. Four B-737s are ordered in October, but traffic figures for the year are not provided.

The first of three leased Avions de Transport Regional ATR42-320s is delivered on March 24, **1989** and are placed on domestic routes; two more are received in April and May, respectively. In August, the previous year's B-737 order is modified, requiring that the last two aircraft be B-737-5B6s. Again, traffic data is not available.

During a scheduled domestic service on September 19, an ATR42-320 with 10 passengers is taken over by a lone assailant, who forces its to divert to Gran Canaria in the Spanish Canary Islands. There the air pirate surrenders, seeking political asylum.

Royal Air Maroc becomes a partner in the Amadeus reservations system in March **1990** and establishes the subsidiary Amadeus Maroc to market the computerized system to Moroccan travel agencies.

Figures are made available for the year's first half and show enplanements of 715,617, along with freight traffic of 32.3 million FTKs.

In July, the carrier is ordered by the government to reduce its freight tariffs for various commodities as a way of increasing exports; the company, in return, receives a fuel tax reduction and a Ministry of Agriculture subsidy.

Operations continue apace in **1991** and when the initial B-737-5B6 arrives in January, RAM becomes the first airline in Africa to operate the subtype. Two more are delivered at year's end.

The fleet in **1992** includes 3 leased ATR42-320s, 2 B-707-351Cs, 2 B-727-2B6s, 6 B-727-2B6As, 4 B-737-2B6As, 2 B-737-2B6CAs, 3 B-737-4B6s, 3 B-737-5B6s, 1 B-737-53A, 1 B-747-2B6B/C, 1 B-747SP-44, and 2 leased B-757-2B6s.

During the fall, service is inaugurated from Casablanca to Chicago and Los Angeles, as continuations of the transatlantic route to New York.

In **1993**, Chairman/Director General Mohammed Mekouar over-sees a workforce of 5,361. One B-727-2B6 and six B-727-2B6As are withdrawn and replaced by four B-737-2B6CAs. Orders are placed on January 18 for 12 B-737s worth \$525 million. A major restructuring program is put into place designed to save \$50 million over three years.

Markets now served from Casablanca are located in Morocco, North and West Africa, the Mideast, Europe, and, in the Western Hemisphere, New York, Montreal, and Rio de Janeiro; the annual advertising budget approaches \$6 million. The carrier's maintenance base at Casablanca's Mohammed V Airport receives a \$36-million upgrade. In November, pooled flights commence with **Gulf Air** over routes from Casablanca to the Gulf States.

Enplanements for the year are 2,070,000. A net \$1.33-million profit is reported.

The employee population is reduced by 61 in **1994**. RAM is the first airline in Africa to operate the B-737-400 after its first Dash-4B6, received in March, enters service on April 1. Two more B-737-4B6s arrive in May, at which point the B-747SP-44 is sold.

France remains the company's largest market; service from Tangier, Fez, Marrakech, and Agadir is maintained to Paris, Bordeaux, Toulouse, Marseilles, Nice, Lyons, Strasbourg, and Bastia. Point-to-point charter flights bring tourists from Nantes, Lille, and Mulhouse.

B-737-2B6CA weekly roundtrips begin from Tangier to Maastricht on June 30.

On August 21, ATR42-320 pilot Younee Khayati, who cannot be halted in a cockpit struggle with copilot Sofia Figuigu (RAM's first female Moroccan airline pilot), commits suicide/murder. He pilots Flight 630, with its 2 other crew and 40 passengers, into the ground near Tzuonine, some 35 km. N of its point of origin at Agadir, 10 minutes into a flight to Casablanca. There are no survivors and among the dead is the defense minister's brother, Sheikh Ali al-Mahmoud al-Jabir al-Sabah.

The company's pilot union will challenge the findings of murder/suicide, claiming that the pilot had been totally in control of himself prior to departure. A strike by company employees forces the company to suspend a number of flights, leading to costly losses.

The former **South African Airways (Pty.), Ltd.** B-747SP-44 *Majuba* is sold to **Corsair, S.A.** on October 13.

Passenger boardings increase by a slight 1% to 2.3 million and revenues total \$446 million; there is a net loss of \$5 million.

The owned fleet in **1995** includes 4 each Boeing 737-2B6As and B-727-2B6As, 2 each B-737-2B6CAs, B-737-4B6, and B-737-5B6s, and 1 B-747-2B6BC. In addition, 2 leased B-737-4B6s, B-757-2B6s, and 2 ATR42-300s, 3 B-737-5B6s, and 1 B-747-428 are operated. The relationship with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** is terminated.

Mohammed Hassad becomes chairman/CEO and a major cost-cutting and restructuring program is begun. Traffic figures are not released.

Airline employment stands at 5,223 in **1996** and a joint purchasing agreement is signed with **Air Algerie, S.A.** A B-737-2B6A is sold in March.

Designed by SABRE Decision Technologies, a frequent flyer program, Safar Flyer, is introduced.

Discussions are held concerning the possibility of code-sharing on various routes, including one to Algiers. A joint insurance agreement is worked out with **Air Mauritanie, S.A.**, **Tunisair, S.A.**, and **Jamahiriya Libyan Arab Airlines**. In October, orders are placed for nine Next Generation B-737-800s.

A total of 1,928,533 passengers are transported.

The workforce is reduced in **1997** to 4,967. At the beginning of the year, the company receives a corporate makeover. Fifteen administrative units are reduced to five major departments: commercial and marketing, finances, quality control, fleet scheduling, and strategy.

A major alliance is entered into with **Air France** in April. In addition to coordinated frequent flyer and maintenance programs, joint purchasing, and cooperative airport handling, code-sharing flights are planned for the routes from Casablanca to Lyon and Strasbourg. Plans are made to begin coordinated frequencies to Paris in 1998.

Customer bookings leap upward by 12.4% to 2,654,394 while freight grows 4.7% to 493.83 million FTKs. A net \$25.5-million profit is reported.

Airline employment stands at 5,361 in **1998** and the fleet, 68% of which is Stage III certified, includes 25 airplanes: 2 each B-727-2D6As and B-757-2D6s, 19 B-737s, and 2 B-747s.

Before the French dual-designator service can get off the ground, another code-share partnership is entered into with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** in February. Both share their codes on roundtrips from Casablanca to Barcelona and Malaga.

On March 6, another memorandum of understanding is initialed with **Air France**. The pact provides for schedule coordination, harmonization of route networks, and mutual overhaul and maintenance assistance.

A strategic alliance is signed with **Trans World Airlines (TWA)** on July 8. Under its terms, the two companies will to share codes on their services between Morocco and the U.S. beginning on October 25.

The first of nine Next Generation B-737-8B6s is delivered on July 14, making RAM the first non-U.S. airline with regularly scheduled pas-

senger service to receive the new model. The delivery flight departs for Casablanca the next day with a cargo of 5,000 pounds of medical supplies from Northwest Medical Teams of Portland, Oregon. The shipment will be distributed to three different hospitals in Morocco.

A little late, the first phase of the new marketing agreement with **Trans World Airlines (TWA)** starts on November 5. Customers of the American carrier may now book segments from the entire TWA system and connect to Casablanca on a code-shared return flight, operated thrice weekly by RAM, between New York (JFK) and Morocco.

On November 16, the company announces that it will inaugurate twice-weekly service to Gaza's new airport just as soon as the Israeli government allows the airport in the Palestinian self-ruled area to open. A company aircraft is on hand to join the celebration when that even occurs on November 24.

A contract is signed with **Saudi Arabian Airlines** on December 21 under which it will transport, on behalf of RAM, up to 15,000 pilgrims to the Holy Land on direct flights between Casablanca and Jeddah during the next Hadj season in the spring of 1999.

Customer bookings climb 17.1% to 3.1 million, while cargo traffic surges 43.2% to 607.03 million FTKs. Revenues total \$475.48 million and costs are \$411.31 million, leaving an operating profit of \$64.16 million and a net gain of \$21.52 million.

Just after landing at London (LHR) on a January 31, **1999** RAM service from Casablanca, two passengers are arrested by airport police, who come aboard their flight in response to a report, radioed ahead, that a female flight attendant has been groped. The men are later released after receiving a formal warning for common assault.

An order is placed with Boeing on February 15 for seven B-737-7D6s to be delivered through 2001. The first two Next Generation aircraft are to arrive by this July.

After the UN lifts its air restrictions against Libya on April 5, RAM makes plans to resume services.

With the timetable advanced, RAM receives its premier B-737-7D6 on April 23. In ceremonies at Seattle prior to the delivery flight, Chairman Hassad notes that his company is the first airline in the Mediterranean region to order and receive the advanced-technology jetliner. The new aircraft will carry 120 passengers—12 in Zenith (business) class and 108 economy class.

Employing a B-737-4B6, twice-weekly flights to Tripoli and Benghazi resume on April 26.

A homepage is opened on the World Wide Web on June 24.

In November, the government of Morocco invites bids from local and foreign investment firms and banks for the valuation of RAM. This latest step toward privatization could lead to the sale of a 40% stake.

Although traffic figures are not revealed, it is announced that a \$14.27-million net gain has been achieved.

An agreement is signed with **Air Senegal (Societe National de Transports Aerien, S.A.)** on February 15, **2000**, under which the Moroccan airline takes a 51% (\$10 million) stake in the company's newly created long-haul division, Air Senegal International. The minority stake is held by the Senegalese government. The new subsidiary's managing director, Mohamed Zouhair El Aoufir, indicates that RAM will provide a Boeing 737-200 with which to begin operations.

As a result of the Boeing strike, delivery of two Next Generation B-737-7B6s and a Next Generation B-737-8B6 is delayed until April 11. The carrier's 6 B-737-2B6As, 7 Dash-4B6s, 6 Dash-5B6s, plus 2 previously received Next Generation B-737-7B6s and 4 Dash-8B6s meanwhile soldier on alongside 1 each B-747-2B6B and B-747-428 and 2 B-757-2B6s.

A marketing and code-sharing agreement is signed with **Delta Air Lines** on June 28. Under its terms, RAM places its code on Delta services from New York (JFK) to Atlanta, Boston, Chicago (ORD), Los Angeles (LAX), Miami, San Francisco, Tampa, and Washington, D.C. (DCA). Delta places its code on RAM frequencies from Casablanca to New York (JFK), Agadir, Marrakech, and Tangiers.

On July 3, after a suspension of flights for nearly eight years, the com-

pany resumes return service from Casablanca to Tripoli, flying twice weekly with a B-737-4B6.

A code-sharing agreement is signed with **TunisAir, S.A.** on August 7. Under its terms, RAM flies TunisAir passengers from Casablanca to New York (JFK) and points in Europe, while TunisAir is permitted to transport RAM customers throughout the Mideast and Eastern Europe. The two companies also link their frequent flyer programs.

On October 3, CEO Mohamed Hassad informs the *North Africa Journal* that because the airline no longer has as high a priority for sale as other state-owned enterprises, RAM's privatization has been postponed for between 12 and 18 months.

The thrice-weekly return flight schedule to Barcelona is increased to four times a week on October 29. Simultaneously, twice-weekly roundtrips are started from Marrakech to Milan.

Inauguration of services by Air Senegal International is delayed until February. On December 4, a de Havilland Canada DHC-8-Q300 is ordered for the new regional, which will employ it on domestic routes within Senegal as well as on regional flights to Gambia, Mauritania, Capo Verde, and Mali.

ROYAL AIRLINES, LTD.: Canada (1979–2001). Royal Airlines is founded by Michael Le Blanc at Quebec (YUL) on August 3, 1979 as the inclusive-tour carrier of its parent, Groupe Royal Aviation, owner of Royal Vacations. As a result of the energy crisis and resulting world airline depression, plans to operate the carrier are put on hold. Meanwhile, Conifair, Ltd., a small-scale charter operation, is formed to provide non-scheduled tree-spraying services, as well as transporting hunters. It will become well known for its forest fire-fighting activities and structural maintenance business. By the start of the new millennium, will be viewed by Royal as an important profit center.

Finally, plans are made in late 1991 to initiate revenue services the following spring. On January 6, 1992, the Royal Airlines division is activated. Chairman/President/CEO Michael Le Blanc recruits a workforce of 450 and purchases 1 Boeing 727-212A and 2 B-727-217As previously operated by **Dan Air, Ltd./Dan Air Services**. After receipt of the first trijet, flights commence on April 29 between Toronto and Vancouver. The second jetliner enters service from Montreal on November 5, while the third Boeing starts flying from Toronto on December 15.

Over the next five years, the company builds up its main hubs at Montreal (Dorval and Mirabel Airports), Toronto, and Vancouver and undertakes charter and nonscheduled flights to Calgary, Edmonton, Ottawa, Regina, and Saskatoon. It also begins flying to the U.S. cities of Las Vegas, Newark, and Phoenix and in the winter, to Florida, the Caribbean, Mexico, and South America.

During this period, the fleet continues to grow. In early 1993, arrangements are completed for the acquisition of a former **Air Canada, Ltd.** Lockheed L-1011-100 TriStar. It is delivered on April 30 and is employed to fly summer inclusive tours from Montreal to Europe. The first two leased aircraft arrive at the Toronto base on September 17, one each B-727-264A and B-727-277A. Together with Sunquest Vacations, Royal shares ownership of a second ex-**Air Canada, Ltd.** TriStar, which is delivered to Montreal on September 27. The TriStars and two Boeing trijets are booked by Sunquest Vacations.

In November, the company files a preliminary prospectus for an initial public offering. Canada's largest tour operator, Canadian Holidays, which is also a subsidiary of **Canadian Airlines International, Ltd.**, simultaneously becomes a client.

Another B-727-217A is purchased in 1994. It flies "sunbird" tourists out of Quebec City to warmer locales to the south. With the beginning of the summer schedule at the end of March, the Lockheeds are heavily engaged on charter flights from Montreal to London (LGW), Glasgow, and Manchester. In June, experimental winglets are added to the company's B-727-212A. A seventh B-727-200 is purchased on June 21 and is employed for backup until it begins regular service from Ottawa in December.

Two B-727-217As are sold in 1995 and in an effort to cut costs and

gain entrance to the European holiday scene, two Airbus Industrie A320-212s are leased.

The remaining B-727-217A is involved in an incident on May 11. Operating as Flight 4529, it lands short at St. John's, Newfoundland, and overruns the end of Runway 11 by 300 feet. No evacuation is initiated and no injuries are reported.

Although traffic figures are never released, the carrier does announce in September that it has made profits so far on the year: C\$13.8 million (operating) and C\$612,000 (net).

The A320s are returned to their lessor at the beginning of 1996 and replaced by two A310-304s, also leased. Through September, operating income declines by 3.7% to C\$104.2 million and the previous year's gains now turn downward. Operating gain is C\$12.6 million and only a net C\$172,000 profit can be recorded.

The Royal fleet in 1997 includes 7 B-727s, 2 L-1011s, and 2 A310-304s.

Flight attendants aboard Flight 861, an A310-212 charter from Puerta Vallarta to Vancouver, are harassed throughout the 4 1/2-hr. flight on March 9 by 11 drunken men. The pilot radios ahead and all of the offenders, described as "bikers," are taken in hand by RCMP. All will be required to face indictment in Richmond provincial court.

A major C\$19-million charter agreement is signed on March 19 with Nouvelles Frontieres, the most important tour operator in France. Under its terms, Royal will operate the tour company's flights from May to October between Montreal and Nantes, Bordeaux, Toulouse, Marseilles, Nice, and Strasbourg.

One of the "Flights for Life" charity services that planners have scheduled for May 6 is cancelled on April 29. Instead, Royal works with the Salvation Army to gather a load of clothing, sleeping bags, and blankets to send to Winnipeg flood victims.

On April 30, pop singer Celine Dion is at the departure gate at Toronto for the kickoff of the first of five "Flights for Life," which the airline is helping to sponsor. The charity flights to 10 cities during the first 2 weeks of May are designed to raise money for the fight against cystic fibrosis.

On May 1, A310-304 summer service is inaugurated from Vancouver and Toronto to Glasgow, Manchester, and London (LGW) four times per week. The same frequency is also introduced from Glasgow to Toronto and thrice-weekly service is inaugurated from Manchester and London (LGW) to Toronto.

A third A310-212 is purchased from Airbus Industrie Financial Services on May 6; upon its delivery a week later, it will be the aircraft tapped to launch the Nouvelles Frontieres summer services to France.

Weekly roundtrips commence on June 23 from Vancouver via Winnipeg to London (LGW). Two days later, another weekly frequency commences from Toronto to Birmingham via Manchester.

On August 19, the assets of **CanAir Cargo, Ltd.** related to its transcontinental air cargo network, is acquired, including two B-737-2E1Fs and one each B-737-2A9C and B-737-242C. Nine Convair CV-580s are also acquired; one is out of service, the two leased units are returned, and the six remaining are sold. CanAir president Daniel Goliger joins Royal as senior vice president-cargo.

Once the little Boeings are quickly repainted, they provide nightly Royal Cargo courier and cargo service from coast to coast, landing in St. John's, Moncton, Halifax, Montreal, Toronto, Hamilton, Winnipeg, Regina, Saskatoon, Edmonton, Calgary, and Vancouver. One of the convertible aircraft will be configured every weekend to a passenger aircraft with a capacity of 120 charter customers for use by Royal Airlines on short-haul flights.

All of the owned B-727-200s are sold to newly formed, Miami-based CLA Canada on September 2 for C\$31.5 million, which represents a gain of C\$11 million. The aircraft are leased back and will be briefly employed as freighters. Thereafter the planes will be turned over to CLA (two in late September, two more in May 1998, and two in November 1998) for disposal.

Plans are announced in September for the retirement of the TriStars

by late fall. They will be replaced with a fourth A310-300 during the summer of 1998.

On October 17, formation of a new Royal Express subsidiary is announced; plans call for it to inaugurate scheduled flights from Montreal (YUL), Toronto, Calgary, and Vancouver to Orlando and Fort Lauderdale on March 30.

Traffic figures are again not released. However, the company indicates that operating revenues of C\$131 million are generated and there are profits: C\$16.5 million (operating) and C\$5.7 million (net).

Flights continue in 1998. It is reported on January 4 that the company has joined with a local Chilean investor to establish the new charter operator **Chileinter, S.A.** The new company leases one of Royal's L-1011-100s, with a second scheduled to join the new entrant at Santiago within three months.

On February 20, Royal announces an expansion of its summer tour program to Europe, including additional nonstops and new service into London (STN). A total of 43 weekly flights (33 nonstop) will be offered from Halifax, Montreal, Toronto, Winnipeg, Calgary, Edmonton, and Vancouver to Berlin, Frankfurt, Munich, London (STN), Manchester, Glasgow, Birmingham, Belfast, Paris, Porto, Lisbon, Lyon, and Toulouse. Four A310-304s will help provide necessary capacity.

The process undertaken to obtain the necessary authorizations proves more time-consuming than expected and thus it is not possible for the new Royal Express subsidiary to begin service on March 30.

During its takeoff roll from Fort Lauderdale on a March 30 service to Toronto, Flight 311, a B-727-212 with 7 crew and 175 passengers, suffers an uncontained engine failure of its No. 2 engine. Takeoff is rejected and the plane is stopped on the runway; all aboard are evacuated, during which 11 people are injured, 2 seriously.

During April, **Chileinter, S.A.** begins to operate TriStar passenger charters to Caribbean destinations on behalf of the Argentine all-cargo carrier **STAF Airlines (Servicios de Transportes Aereos Fueguinos, S.A.)**.

Contract negotiations begin on May 1 between management and the carrier's 160 pilots, which are represented by their own in-house bargaining unit.

On May 11, Royal enters into a 10-year preferred business relationship with Canada's only national tour operator, Signature Vacations, previously the client of **Canada 3000, Ltd.** Signature, in turn, purchases the Royal subsidiary Royal Vacations. As Signature's carrier, Royal Airlines becomes the primary transport for Canadian vacationers visiting the continental U.S. (principally Florida), Mexico, Latin America, and the Caribbean. It is anticipated that this new arrangement will triple Royal's business with Signature to C\$200 million annually.

Royal Express finally obtains its operator's certificate from Transport Canada on August 14. B-727-200A roundtrip charters are initiated by the new subsidiary on August 24 from Montreal, Toronto, Calgary, and Vancouver to Orlando and Fort Lauderdale.

In an effort to rescue people stranded by the September 2 pilots' strike, **Air Canada, Ltd.** wet-leases aircraft from Royal Aviation and three other domestic carriers to move people over the next week stuck in the midst of journeys.

While en route from Toronto to Glasgow on September 4, an engine oil warning light flashes aboard a leased B-757-236 piloted by Capt. David Muralt with 200 passengers aboard. Muralt immediately receives authority to divert his aircraft to the Canadian Forces Base at Goose Bay, Labrador.

Chileinter, S.A. is purchased outright by **STAF Airlines (Servicios de Transportes Fueguinos, S.A.)** on September 20.

The last two B-727-200s sold to CLA Canada in September 1997 are turned over during November. The carrier's pilots, on November 30, unanimously vote to accept the company's offer contained in a new two-year labor contract. Accomplishment of this arrangement is announced to the public on December 4.

This year's revenues reach C\$150.08 million, but net gain slides to C\$2.01 million.

Flights continue in 1999. In an effort to boost the performance of

Royal Air Cargo, that division now undergoes a comprehensive restructuring. Other cost-saving measures that are also implemented include the cancellation of unprofitable flights to Germany and the discontinuance of Royal LeClub, a subsidiary specializing in hotel site management.

In response to an urgent request from the UN High Commissioner for Refugees, the Canadian government, on May 1, quickly obtains enabling legislation permitting it to airlift in up to 5,000 Kosovo Albanian refugees and provide them with temporary housing for 3 to 6 months. The same sorts of appeals have been made to Britain, Australia, and the U.S.

Immigration officials are already working in Macedonia identifying potential transfers, while a contract is signed with Royal Airlines to undertake flights on a daily basis between Skopje and facilities established at CFB Trenton, Ontario, and CFB Greenwood, Nova Scotia.

A company A310-304 is the first plane assigned to the multinational airlift of refugees to countries outside of Europe, transporting 248 ethnic Albanians (mostly women, children, and elderly) to CFB Trenton on May 4.

With the arrival of 261 additional passengers on May 9, the carrier has now brought in 1,556 Kosovars, almost a third of Canada's quota. As quoted in the *Toronto Star* on May 10, Lt. Gen. Ray Henault, deputy chief of defense staff, indicates that Canadian officials and refugees alike are very satisfied with the ongoing smoothness of the airlift and settlement process.

In October, a struggle begins for control of **Canadian Airlines, Ltd.** The battle is won by **Air Canada, Ltd.** in early December and will have immense impact on the future of Royal Airlines, which will change its local status from dedicated charter airline to scheduled domestic carrier.

The fleet at the beginning of 2000 includes not only 4 A310-304s and 3 B-757-236s, but also 2 each B-737-242Cs, B-737-2E1As, and 1 B-7537-2A9C. The workforce totals 1,500.

For the quarter ending January 31, the company reports that its operating loss has improved to C\$3.8 million, a 27% gain over the same period a year earlier. The turnaround is directly attributed to the company's decision not to lease three B-757s for the winter charter season.

In February, **Winnport Logistics, Ltd.**, having received its Canadian operators certificate, inaugurates scheduled overnight B-727-25F all cargo service on behalf of the Royal Air Cargo division between Calgary, Edmonton, Hamilton, and Vancouver.

On March 1, Royal opens its homepage on the Internet's World Wide Web. To help provide a measure of competition in the wake of **Air Canada, Ltd.**'s acquisition of **Canadian Airlines, Ltd.**, Canadian Transport Minister David Collenette, on March 27, authorizes Royal to begin flying seasonal scheduled service to the United Kingdom and France. Almost immediately, Royal launches spring and summer B-757-236 scheduled flights from Winnipeg, Calgary, Edmonton, Toronto, and Montreal to the U.K. cities of London (LGW), Bristol, Glasgow, Birmingham, and Manchester. It also begins flying from Toronto and Montreal to Paris (CDG).

On April 15, the company begins to compete head-on with **Air Canada, Ltd.** on scheduled national routes. Fares, discounted 50%–75% below those of the national airline are debuted on 15 daily roundtrips. Destinations regularly visited include Toronto, Montreal, Ottawa, Winnipeg, Halifax, and Vancouver. A B-757-236 is leased to **Transavia Holland, N.V.** for three months, beginning on April 26.

On August 21, management and company flight attendants enter into collective bargaining for the first time.

On September 11, the number of daily domestic return services from Toronto is significantly enhanced, including those to Halifax from 2 to 4, to Montreal from 4 to 7, to Ottawa from 2 to 5, and to Winnipeg from 2 to 3. New roundtrips are launched to Vancouver from Ottawa and Toronto and to Halifax from Montreal. The number of daily roundtrips now totals 31.

A massive discount sale is held on 100,000 seats booked between September 16 and 24. Fares on domestic scheduled flights and international flights to Florida, Europe, and Hawaii are all included, with an average savings of 41% on domestic travel. Passengers may use their savings on domestic flights offered between September 16 and

April 30 and on international services operated between September 16 and October 31.

The early success of the new domestic scheduled services and a dramatic improvement in the performance of Royal Cargo allows the carrier to stage a strong fiscal turnaround in its first-quarter earnings reported on September 20.

Painted in the "old" colors of the U.S. major, a B-737-201A is leased from **USAirways** on October 12; it arrives wearing Royal titles and tail logo. Two more of the type will also be chartered from **US Airways** and will be delivered between October 27 and 31. The small aircraft, with significantly lower trip costs, provide tour operators with enhanced flexibility in scheduling charter flights to smaller southern destinations.

At a luncheon meeting with Halifax business leaders on October 19, Chairman/CEO Le Blanc announces on October 19 that 60 new jobs will soon be created to support the establishment of a new Halifax pilot base for the 24 new pilots, plus 36 flight attendants and support staff, to be hired before year's end. He also announces the November initiation of two new daily nonstops from Halifax to Toronto, with connections to Winnipeg and Vancouver. Further, it is revealed that the company's domestic infrastructure will be leveraged in order to help it expand its summer schedule of flights to Europe.

A former **Southwest Airlines** B-737-2H4 is purchased on November 3.

With the newly arrived aircraft, daily roundtrip frequencies between Toronto to Halifax are boosted from four to six on November 6. Simultaneously, the number of daily return flights from Toronto to Montreal is increased to eight.

Royal Plus service is started on December 1. The business-class product offers executives enhanced service and more legroom, for an added fee of between C\$40 and C\$120. For the year as a whole, approximately 2 million passengers are transported.

On January 29, 2001, **Canada 3000, Ltd.** will make a takeover offer of C\$84 million; both its board and Royal's have already approved the arrangement, which will require government approval. Royal stockholders are to be offered 1 share of Canada 3000 common stock for every 2.5 shares of Royal common tenders and the expected acquisition of two-thirds of the equity will result in the creation of the nation's second largest passenger airline. It will be reported at the end of March that the arrangement has met full approval all around and that the merger of Royal, along with **CanJet Airlines, Ltd.**, into Canada 3000 will be completed by May 1.

ROYAL AIRWAYS: United States (1928–1929). Established at Chicago in the summer of 1928, Royal begins scheduled passenger flights to Madison, Wisconsin, on July 19. Without a mail contract, the carrier is unable to generate sufficient revenue traffic to remain in business beyond February 1929.

ROYAL AIRWAYS, LTD. See **MODILUFT**

ROYAL AMERICAN AIRWAYS: United States (1980–1994). Royal American is created as a division of Tucson-based **Go Air** in 1980 to operate charter and contract service flights with a former Continental Airlines Vickers Ciscount 812, linking Las Vegas with Grand Canyon, Arizona. Between May 19 and June 15, 1981, a Viscount 765D is operated from Fayetteville, Arkansas, to Dallas (DFW), plus Joplin and Kansas City.

During 1982, the company also operates a scheduled service between Tucson, San Diego, and Las Vegas; it ends just before the new year. With the addition of two more Viscounts, the carrier provides wet-leased scheduled passenger service from Miami to St. Petersburg on behalf of **Atlantic Gulf Airlines** during the fourth quarter of 1983. Thereafter, Royal American also provides contract passenger charters in Florida and to the Bahamas.

During the late 1980s the carrier is reformed and transferred to Reno, Nevada, where it becomes a partnership shared between Silver Wings Holidays of Vancouver, Canada, and Idaho-based **Empire Airlines**. Empire provides flight crews and support and employs RAA's two British

Aerospace BAe 146-200s, beginning with the delivery of the first former **WestAir** plane in September 1992 to undertake charter and inclusive-tour flights. Destinations visited include Canadian cities, Las Vegas, Los Angeles, Palm Springs, Phoenix, and Reno. The second BAe 146-200 arrives in December.

Operations continue through the remainder of the year and 1993. Royal American is forced to close down in early 1994 due to the national recession.

ROYAL AVIATION, LTD. See **ROYAL AIRLINES, LTD.**

ROYAL BHUTAN AIRLINES. See **DRUK AIR**

ROYAL BRUNEI AIRLINES: P.O. Box 737, Bandar Seri Begawan, Negara Brunei Darussalam, 1907, Brunei; Phone 673 (2) 240 500; Fax 673 (2) 244 737; <http://www.brunecair.com>; Code BI; Year Founded 1974. With technical assistance and personnel provided by the **British Airways, Ltd.** (2) subsidiary British Airways Associated Companies, Ltd., this new government-controlled national airline is formed at Brunei City on November 18, 1974. Revenue flights begin with the carrier's single wet-leased Boeing 737-2M6 on May 14, 1975 over a lone Brunei City to Singapore route via Jesselton on British North Borneo. Flights to Kuching and Hong Kong begin next day.

A second B-737-2M6 is acquired in 1976 to consolidate the network begun the previous year and with which to open new routes. Weekly or twice-weekly service is started to Manila on April 3 and to Bangkok on December 9.

In May and June 1978, routes are opened to Kota Kinabalu and Kuching, Malaysia.

Enplanements during the 12 months total 90,754. Revenues for Chairman Yang Teramat Berhormat Pehin Orang Kaya Laila Setia Bakti Diraja Dato Laila Utama Awang Isa bin Pehin Datu Perdana Menteri Dato Laila Utama Awang Taji Ibrahim's carrier reach \$7,420,000 and airline employment totals 218.

The workforce is increased 29.1% in 1979 to 368.

Passenger boardings jump 12.4% to 103,600 while freight traffic soars 34.9%. Despite the fuel crisis, revenues climb 30% to \$10.6 million. A B-737-2M6C is ordered.

Airline employment grows by 25% in 1980 to 400 as the Boeing combi joins the fleet.

Cargo increases 36.7% to 3.32 million FTKs and passenger traffic rises 3.4% to 107,100.

The employee population grows by 22.5% in 1981 to 490.

Passenger bookings swell 18% to 126,400, while freight climbs 21% to 4.01 million FTKs. Revenues total \$27.5 million.

The employee population in 1982 is 520, a 0.1% increase. One Hawker Siddeley HS 748 is placed in service on local routes.

Cargo is up 21.1% to 468,000 FTKs and enplanements advance 22.1% to 154,118.

The payroll is increased 15.4% to 600 in 1983. Service is inaugurated to Kuala Lumpur in May and in cooperation with **Malaysian Airlines System, Ltd. (MAS)**, joint service is simultaneously inaugurated from Kuala Lumpur to Bahrain and Cairo. Flights to Darwin commence in June and to Jakarta in December.

Passenger boardings advance 5.5% to 173,499, while freight climbs 6% to 5.14 million FTKs. Orders are placed in 1984 for two B-757-200s. Enplanements total 197,408, but cargo falls 10.1% to 4.62 million FTKs.

The workforce grows to 629 in 1985 as Pengiran Tengah Metassim becomes CEO/managing director. In cooperation with **Singapore Airlines, Ltd.**, thrice-weekly joint service is initiated in April from Brunei to Bangkok, employing Royal Brunei's B-737-2M6. Passenger traffic figures are boosted 8% to 199,000 passengers flown, but cargo declines 5% to 4.41 million FTKs.

In January 1986, joint services are started with **Cathay Pacific Airways (Pty.), Ltd.** to Hong Kong. The fleet is enlarged by the addition of

two B-757-2M6ERs delivered this year, the first arriving on May 6; both are employed on charter flights to Sydney.

In July, new livery of dark yellow under white is adopted. Late in the year, \$110 million is invested in the carrier by the government to help cover the costs of the new aircraft.

Customer bookings increase 4% to 206,600 while freight recovers and moves ahead by 1% to 4.48 million FTKs.

The payroll grows by 8.5% in 1987 to 893. In January, the new Boeings initiate twice-weekly roundtrips from Bandar Seri Begawan to Taipei. Complete with a \$300,000 B-757 cabin mock-up, a new engineering workshop and training center is opened in Brunei in July.

Passenger boardings ascend 9% to 247,000 while cargo is up 6% to 4.85 million FTKs.

Airline employment is increased another 5.3% in 1988 to 1,000 and the fleet now includes 2 B-757-2M6ERs, 1 B-737-2M6, and 1 B-737-2M6C. Twice-weekly scheduled service is inaugurated in late fall to Dubai, U.A.E.

Passenger boardings leap up 14.1% to 248,325 and cargo 23.5% to 5.97 million FTKs.

The workforce inches up by 1.5% in 1989 to an even 1,000 as the fleet is increased by addition of a third B-757-2M6ER that is placed on the new service to Dubai. The two B-737-2M6s purchased in the early 1970s are withdrawn and the one remaining is reconfigured to a single-class, seating 112.

Supported by SRI International, a complete management study is completed during late winter as the airline's portion of the ABACUS reservations system comes on-line. In the fall, a B-757-2M6ER is chartered, crew and all, by **Australian Airlines (Pty.), Ltd.** to help provide domestic capacity during eight weeks of the national industry-wide pilots' strike.

Customer bookings surge another 6.9% to 268,164 and cargo does better, moving ahead by 27.5% to 8.38 million FTKs.

Company employment is increased by 20% in 1990 to 1,200 and the carrier's paid-up capital now totals about \$40.5 million (U.S.). The carrier inaugurates flights to Frankfurt via Bangkok and Dubai in May, followed by service to London (LGW) via Singapore and Dubai. The carrier also serves 10 points in Southeast Asia, Dubai, and Darwin in Australia with a fleet of Dornier 228-220s.

In addition, a U.S. general sales agent is appointed. The first of three chartered B-767-33AERs arrives on June 9 after having completed the longest delivery flight by a twin-engine commercial airliner—9,252 mi. from Seattle in 18 hrs. 29 min. In November, twice-weekly B-757-2M6ER is inaugurated to London (LGW).

Passenger boardings climb 11.8% to 304,169 and freight ascends 17.4% to 9.85 million FTKs.

Managing Director Pengiran Haji Tengah Metassim's fleet in 1991 includes 1 B-727-2U5A, 3 each B-757-2M6ERs, and 3 each B-767-33AERs. With the beginning of the new schedule at the end of March, service is initiated to Perth, Jeddah, and Bali. Twice-weekly B-767-33AER roundtrips are inaugurated to London (LHR) via Singapore and Dubai, on May 7.

Airline employment stands at 1,400 in 1992. Applications are made to provide scheduled services to Zurich, Cairo, Bali, and Bahrain. Meanwhile, charter flights are made to Nigata and Nagoya in Japan and Santa Barbara, California. A relief mission is flown to the former Yugoslavia, 13 charters are undertaken to Mecca, and Brunei-based Gurkha soldiers are taken to and from their homes in Nepal.

Enplanements total 461,000 and freight is up 74.3% to 34.66 million FTKs.

In 1993, Chairman HRH Prince Haji Jefri Bolkish and Managing Director Metassim oversee a workforce of 1,449, down 15% from the previous year. The B-727-2U5A is withdrawn and one B-757-2M6ER is leased to **Myanmar International Airways, Ltd.** in Burma. Scheduled flights begin to Beijing, Zurich, Cairo, and Bahrain during the summer and charters are undertaken to Mecca.

Frankfurt frequencies become thrice weekly during the same period. An A340-212 arrives for use by the Sultan as his personal aircraft when

required. Although it is given a VIP interior, it nevertheless wears the colors of the national airline.

All of this expansion has a significant impact upon traffic figures. Passenger boardings balloon 30.7% to 604,129 while cargo rises a huge 87.3% to 64.81 million FTKs.

Airline employment is increased by 11% in 1994 to 1,608. Orders are placed in January for two Fokker 50s, the first of which is delivered in May. In May and June, regional services are expanded to Miri, Labuan, Kota Kinabalu, and Kuching. B-767-33AER service to Brisbane is introduced, while weekly return frequencies to London (LHR) are doubled to four.

Cost and revenue sharing with **Dragonair, Ltd.** begins in September over a route from Bandar Seri Begawan to Hong Kong. Also during the month, RBI takes a 10% equity stake in Singapore Airlines, Ltd.'s Pan Asia Pacific Aviation Services maintenance joint venture concern, which is being established at Hong Kong's Chek Lap Kok Airport.

The second Fokker 50 is delivered in November and plans are made to introduce scheduled services to Amsterdam and Ho Chi Minh City during the new year. In December, weekly roundtrips begin to Balikpapan, Kalimantan, while twice-weekly return service also begins to Osaka.

Chief among the cost-cutting measures put in place in 1995 is a 19.2% staff reduction, which lowers the employee count to 1,300. A weekly return service to Calcutta is launched in November.

Passenger boardings rise 19% to 916,199 while cargo moves ahead by 16% to 109.82 million FTKs.

The reduction in force is reversed in 1996 as the workforce grows by 7.4% to 1,880. The fleet now includes 2 B-757-2M6ERs, 7 B-767-33AERs, 3 Dornier 228-220s, and 2 Fokker 50s. An eighth B-737-33AER is subleased to **Vietnam Airlines**.

In April, a code-sharing agreement is signed with **British Midland Airways, Ltd.** Under its terms, RBA passengers arriving at London (LHR) from Bandar Seri Begawan, Singapore, and Dubai are able to seamlessly pass on to BMA flights to its U.K. hubs at Belfast, Edinburgh, Glasgow, Leeds/Bradford, and Teesside. Twice-weekly roundtrips are started to Bintulu, Sarawak, on July 3.

Flights to Dubai are suspended on September 10; however, twice-weekly B-767-33AER roundtrips commence on September 12 between London and Brunei via Abu Dhabi and Yangon in Myanmar. The Yangon stop marks the first time in 20 years that a company aircraft has visited the city. To upgrade its regional services, the carrier, in November, replaces its Fokker 50s with a pair of Fokker 100s.

Daily services from Bandar Seri Begawan to London (LHR) commence on December 1 with the introduction of a direct flight via Abu Dhabi. Other Heathrow Airport services are routed twice weekly each through either Singapore and Dubai or Abu Dhabi or via Dubai. Connecting service from Yangon to Brisbane begins in late December.

Enplanements for the year soar 14.2% to 1,046,093, but freight dips 1.9% to 108.07 million FTKs.

Airline employment grows another 3% in 1997 to 1,936. New uniforms are introduced by customer service personnel during the first quarter.

Discussions begin with **Garuda Indonesia** early in the spring concerning a possible code-sharing agreement. The Asian currency crisis of the fall and Garuda's figurative nosedive will force the talks to be adjourned. Still, twice-weekly roundtrips to Surabaya are introduced.

In midyear, a B-767-300ER simulator from Thomson Training & Simulation, Ltd. is placed into a newly opened training complex.

On initial approach to the oil town of Miri after a September 6 service from Labuan and Bandar Seri Begawan, Flight 238, a Dornier 228-212 leased from Malaysia's Merpati Intan with 2 crew and 8 passengers, collides with 500-m.-high Lambir Hill. The wreckage is not found until the next day and there are no survivors.

During the fall, service begins to Surabaya. When the B-727s of **Qatar Airways** go out of the country for their certification checks during October, the Gulf-based airline leases a B-757-2M6ER from Royal

Brunei Airlines for two months. It is employed to allow Qatar to reenter the Dhaka market with nonstop roundtrips.

The same fiscal crisis that hits Indonesia causes a traffic decline for Royal Brunei. The board of directors is now restructured and a new chairman is named.

Passenger boardings dip 0.9% to 1,036,500; however, freight climbs 8.7% to 117.44 million FTKs.

Flights continue without fanfare in **1998**. Customer bookings inch up to 1.04 million, but cargo traffic does much better, growing 17.1% to 327.72 million FTKs.

Little is heard of the airline in the West until it becomes involved in a meat controversy in early **1999**.

In late January, various Australian agencies inform the airline that, due to an outbreak of the blue tongue virus, sheep cannot be exported from Darwin over the wet seasons. In February, the airline sponsors the Baiduri World Badminton Finals, the sport's annual championship series.

In March, the Australian Quarantine Inspection Service reports that sheep exports to Brunei may be resumed between June 1 and October 31.

The controversy, which is fully covered in the May 26 issue of the *Borneo Bulletin*, grows in late April when reports on what has become known as the "meat controversy" begin to appear in the press. The Australian High Commission denies a claim that its government has placed a temporary ban on sheep exports due to blue tongue disease.

The matter takes on an entirely different flavor when, in mid-May, reports mention that RBA Executive Director Sheikh Jamaluddin has not only acknowledged a shortage of halal lamb chops, but has blamed it on the strict religious regulation on imports imposed by the country's Halal Committee.

On May 21, the board of directors of Royal Brunei officially disassociates the carrier from what are termed the director's personal views. It sincerely pledges to the Sultan and public the national airline's continued support for the exercise and enforcement of the relevant regulations according to the Syariah.

At the beginning of April **2000**, a B-767-33AER is subchartered to **Air Algerie, S.A.** for its long-haul international services. The last two Fokker 100s are retired in mid-May. A B-767-33AER is chartered to **Vietnam Airlines** on September 30. It wears full Royal Brunei livery with **Vietnam Airlines** titles.

The airline introduces a fourth weekly B-767-333AER return service between Brisbane and Brunei on October 31. A ceremony is held at the new Brisbane office, attended by Executive Director Pg Ali bin Pg Haji Ahmad and Australian Deputy Prime Minister James Elder.

On November 1, Chairman Dato Mohd Alimin Abd Wahab informs *The Borneo Bulletin* that his carrier will be adding Airbus Industrie A319s to the fleet in **2003**. A third weekly B-767-33AER roundtrip from Perth to Brunei begins on November 3.

In a ceremony presided over by Chairman Dato Mohd Alimin Abd Wahab, the company, on November 9, opens a new office at Brisbane. At the 26th Anniversary Gala Night held at the International Convention Center on November 18, the chairman reviews the airline's progress, noting its importance to the domestic economy. As reported in the November 20 issue of *The Borneo Bulletin*, 55 staff members receive special awards for 25 years of service.

ROYAL CARIBBEAN INTERNATIONAL: United States (1989–1991). Like its larger competitor Carnival Cruise Lines, the holiday steamship concern Royal Caribbean also begins to offer scheduled air service in **1989**, albeit on a much smaller scale. Employing two Australian-built GAF Nomad N-24As, the company flies passengers between the islands of the Caribbean on a service calculated to link customers with cruise ship departures. Discussions are held with **Trans World Airlines (TWA)** concerning the possibility of a "TWExpress" partnership.

Hopes to become a TWA affiliate evaporate in **1990** and the operator shuts its doors in early **1991**.

ROYAL DUTCH INDIES AIRLINE COMPANY. See **KONIN-**

KLIJKE NEDERLANDSCH-INDISCHELUCHTVAART MAATSCHAPPIJ, N.V. (KNILM)

ROYAL EXPRESS. See **ROYAL AIRLINES, LTD.**

ROYAL HAWAIIAN AIR SERVICE: United States (1965–1986). Royal Hawaiian is founded by Woodson Woods and Johnny Peacock as an FBO, flying school, and charter operation at Kona on April 13, **1965**; Robert Haws is named CEO. Nonscheduled local air taxi service flights are also provided around the "Big Island" and on to Honolulu with a fleet of Cessna 310s and 402s.

Scheduled operations are begun in **1966**, and will allow the company to later claim for itself the title of Hawaii's oldest commuter airline. Three years later, in **1969**, **Royal Hawaiian Airways**, a subsidiary of the Delaware-based Lumber Industries, purchases the carrier from its original owners, the Peacock-Woods Corporation, and give it the new name.

ROYAL HAWAIIAN AIRWAYS: United States (1965–1986). **Royal Hawaiian Air Service** is originally established in April **1965** as a subsidiary of the Peacock-Woods Corporation to provide air taxi flights from a base at Kona. Scheduled flights commence in **1966**. The operation is purchased in **1969** by a subsidiary of the Delaware-based Lumber Industries and renamed. Cessna 310 and 402 and de Havilland Canada DHC-6-100 Twin Otter flight-seeing services continue.

During the early **1970s**, the number of daily flight schedules is increased as over 40 flight numbers are added, including service to and from Honolulu, Molokai, Kalaupapa, Lanai, Kahului, Kaanapali, Upolu, Hana, Kona, Kamuela, and Hilo. The company's sight-seeing vacations attract worldwide recognition and by **1974** bookings reach 128,546. The two Twin Otters have by now been retired.

Airline employment in **1975** stands at 97. The company's 11 Cessna 402s board a total of 139,723 passengers, an 8% increase.

The number of employees is increased by 17% in **1976** to 112 and another Cessna 402 is purchased. Customer bookings balloon 18% to 164,962. Enplanements in **1977** are 185,727.

Another Cessna 402 is delivered in early **1978**. Customer bookings increase again, by 12.8% to 209,555. The workforce in **1979** stands at 135 and enplanements climb by 2.2% to 214,080.

Airline employment in **1980** is 143 and President Robert D. Haws's fleet is expanded to 14 Cessna 402s.

Traffic for the year increases 4.1% as 223,000 passengers are carried. The company is reclassified as a "large regional" under terms of the CAB's new airline classification scheme.

The entrance of **Mid-Pacific Airlines** into the interisland market in **1981** sends Royal Hawaiian into a headlong dive.

Passenger boardings are off 18.5%, down to 181,771 and the carrier reels back into the ranks of the "small regionals." The only highlights of the year are the boarding of the 1.5-millionth passenger and the addition of a 15th Cessna 402.

A 3% traffic increase is recorded in **1982** with 187,252 passengers carried. Orders are placed for two de Havilland Canada DHC-6-300s. Royal Hawaiian is able to climb back into the "large regional" category in **1983** and remain there in **1984**. During the former year, boardings accelerate 13.3% to 212,173 and in the latter year the privately held carrier's 15 402s and 2 new DHC-6-300s carry 202,451 customers, a dip of 4.6%.

The fleet in **1985** includes 14 Cessna 402s and 2 DHC-6-300s. In November, commuter flights are inaugurated linking Guam, Rota, Tinian, and Saipan.

Customer bookings rise a very slight 0.7% to 203,801.

In January **1986**, the Kaanapali-Mahi hub airport is sold to land developers. The move is fatal for RHAS as the field has long produced most of the large regional's business and another site is not available. Operations continue until May 22, when the facility is closed; a total of

57,628 passengers are flown during the last five months.

At this point, owner Robert Haws, without the necessity of declaring bankruptcy, liquidates the airline.

ROYAL JORDANIAN AIRLINES: P.O. Box 302, Amman, Jordan; Phone 962 (6) 679 178; Fax 962 (6) 672 527; <http://www.rja.com.jo>; Code RJ; Year Founded 1986. In an effort to change direction, broaden appeal, and reduce its traffic downturn, **Alia (Royal Jordanian Airlines)** is renamed at the end of 1986. As 1987 dawns, the 4,582-employee carrier is into a massive change in corporate identity that includes adoption of a new gold crown insignia, new gray and white aircraft liveries, additional on-board amenities, and first-class sleeperette seats. Sharjah joins the route network and two A310-304s are added to the fleet, beginning in April.

Daily services to Amman from the U.S. are accelerated during the summer, with daily service being added from New York (JFK) and thrice-weekly flights from Chicago and Los Angeles. Additionally, plans are underway for privatization. In August, the management team assisting **Sierra Leone Airlines** is withdrawn and in September the Boeing 747-2D3B *Prince Hamzad* is sold for onward lease to **British Caledonian Airways, Ltd.**

Passenger boardings climb 4.1% to 1,199,100 and freight is up by 18% to 206,000 FTKs. Revenues advance 12.2% to \$305.8 million and the operating loss is improved to \$11.4 million. There is, however, a net gain of \$3.67 million.

Airline employment climbs 5.3% in 1988 to 5,126 as the carrier's twenty-fifth birthday, albeit under two names, is celebrated. Unable to pay for assistance, **Sudan Airways, Ltd.** is forced, in February, to cancel its cooperative agreement with the Jordanian airline. Twice-weekly L-1011-500 Amman to Miami service commences on May 3. In June and July, service is initiated to New Delhi and Calcutta and the Miami schedule is revised to allow for twice-weekly flights to the Florida stop from Amman via Vienna.

On July 1, the carrier becomes the first Mideast airline to ban smoking on all of its short-haul flights, notably those between Amman and Aqaba and Damascus. In November, the company enters into a block-space agreement with **Air Canada, Ltd.** under which the Mideast carrier allocates seats to the Canadians on its new route from Amman to Montreal and later, to Toronto.

A third A310-304 is delivered and the company starts the process of privatization.

Customer bookings swell 4.1% to 1,225,934 and cargo jumps 8.2% to 201.53 million FTKs. Revenues ascend 7.6% to \$216.8 million and the operating loss is cut to \$3.1 million. Net income dips to \$3.39 million.

The payroll is cut by 4.9% in 1989 to 4,876 and the last B-747-2D3BC, *Prince Ali*, is sold. During the spring, the technical base at Amman begins doing certification checks on four **Air France** A310s. Twice-weekly nonstop flights begin in August from Amman to Kuala Lumpur via Singapore. Service is also inaugurated to Ankara, Jakarta, and Colombo. In November, President/CEO Ali Ghandour is removed and replaced by his deputy, Husam Abu Ghazaleh.

Still, passenger boardings slide 1.8% to 1,203,776. Freight, however, inches its way up by 2.4% to 206.45 million FTKs.

Company employment remains unchanged in 1990. The first A320-211 is delivered in April and is christened *Cairo*. Also during the fourth month, joint services begin with **Tarom (Transporturile Aeriene Romane)** on a route between Amman and Bucharest.

During the spring, a cooperative agreement is signed with **Saudia (Saudi Arabian Airlines)** and under it, 12 pilots and 4 flight engineers are seconded to the Saudi carrier in May. Also in May, a contract is signed with the Caribbean carrier **Seagreen Air Transport** for B-707 maintenance.

In June, **Garuda Indonesia** leases an L-1011 for three months to operate flights from Jakarta, Bali, and Hong Kong. During July, plans are made by President/CEO Ghazaleh's carrier to convert several TriStars into freighters. At the same time, construction is begun on a new main-

tenance hangar at Amman.

The crisis in the Gulf that erupts following Iraq's August invasion of Kuwait has a strong impact upon the airline. With Jordan providing support to its aggressive neighbor at the same time as Allied forces are gathering in Saudi Arabia in Operation Desert Shield, the company sees a steady downturn, operating from its homeland only through November.

Prohibitively high insurance premiums now force the airline to move most of its fleet to a temporary hub at Vienna. The service to Amman from Austria is operated by B-727-2B6As, which are not allowed to stay overnight at Amman, but must work out of Larnaca, Cyprus; the cost is, in insurance alone, \$30,000 per plane per day. To help offset costs, the airline undertakes charter flights for the International Organization for Migration, taking refugees to the Philippines and Bangladesh. Services to Chicago are suspended.

During the year's first 11 months, Royal Jordanian transports a total of 910,367 passengers, a decline of 19.1% from the previous year. Freight traffic, however, grows by 8.6% to 205.95 million FTKs.

The payroll is increased to 5,000 in 1991. Twelve charter flights are made between Amman and Hanoi January 2-8, transporting 2,860 passengers. Early in the year, paying travelers are assessed insurance surcharges of up to \$400 per ticket. Routes to Chicago, Los Angeles, and Miami must be closed, in addition to the previously ended Kuwait and Baghdad runs. Jordan's support for Iraq during the UN's Operation Desert Storm in February brings a traffic decline of 85.3% over the same period a year earlier.

At the end of the war, King Hussein recommends that Royal Jordanian be privatized as quickly as possible; the airline, meanwhile, begins a cost-cutting program designed to end financial difficulties. Staff reductions and aircraft delivery deferrals occur, coupled with the lease of an L-1011 to **Sudan Airways, Ltd.** A second weekly flight to New York is initiated on March 19 and by midyear the company is able to resume service to all points of its pre-Gulf crisis route network. It even increases frequencies to New York to six a week, while also restarting the flights to Beirut that were suspended years earlier.

Still, as might be expected, a significant downturn occurs in overall traffic statistics. Customer bookings decline another 25.4% to 646,890 and cargo plunges 31.8% to 126.89 million FTKs. Income exceeds expenses and there is an operating profit of \$30.2 million. Unhappily, there is also a net loss of \$56.7 million.

The employee population falls 1.3% in 1992 to 4,717. The company recovers from the Gulf crisis and resumes services to Athens. In May, Amman-New York B-707F frequencies are doubled from one to two per week. New frequencies are initiated to Aden, Jakarta, and Berlin.

Passenger boardings increase 38% to 1,129,315 while freight advances 6.9% to 193.06 million FTKs. Revenues swell 19.7% to \$378.1 million and allow an operating surplus of \$48.4 million. There is a net loss of \$16.5 million.

In 1993, President/CEO Mahmoud Jamal Balqez oversees a workforce of 5,000, up 6% from the previous year. The leased fleet now includes 4 A310-304s, 2 A320-211s, 5 L-1011-500 TriStars, 2 B-727-2D3As, and 1 each B-707-324C, B-707-365C, and B-707-384C. Service is resumed to Chicago in June and in July a contract is signed with **Alyemda Yemen Airlines** to maintain that carrier's two A310-204s.

Customer bookings jump 7.2% to 1,188,799 while cargo swells 23.7% to 217.8 million FTKs. Revenues total \$407.48 million and expenses are sufficiently low to allow an operating profit of \$52.13 million and a net profit of \$1.32 million.

While there are no changes in the employee base during 1994, initial steps toward privatization now begin. During a Washington summit between King Hussein and Israel's Prime Minister Yitzhak Rabin in late July, Jordan and Israel agree in principle to give each other over-flight rights. In the first test of the new policy, the monarch personally pilots a company L-1011-500, escorted by Israeli fighter planes, over Tel Aviv on August 3.

Meanwhile, since its creation in 1963, the carrier has lost, by July, a total of 134 million dinars and its debt stands at JD 579 million against

assets of JD 534 million. The company's capital will be increased from JD 22 million (\$32 million) to JD 57 million when the government settles part of the foreign debt, for an equivalent amount of U.S. dollars, defining the expenditure as a capital investment in the airline. About JD 100 million owed to local banks and the Jordanian Petrol Refinery Corp. are rescheduled.

Traffic figures are released through June and show passenger boardings up by 5.8% to 686,000, but freight down by 0.6% to 119.54 million FTKs. With the rest of the year also down, revenues decline 4.4% to \$310.31 million, while expenses swell 3.9% to \$369.92 million. The operating gain drops to \$20.38 million and there is a huge \$44.12-million net loss.

Again in 1995, no changes are made in the employee base. Late in the year, arrangements are made to lease a pair of Airbus A310-302s from **Air Algerie (Societe Nationale de Transport et Travail Aeriens, S.A.)**.

Traffic figures once more are given only for the first 6 months and show enplanements up 2.4% to 588,000. Cargo is down 9.4% during the same period to 93.83 million FTKs.

The workforce grows 8.8% in 1996 to 5,438. The feeder subsidiary **Royal Wings** is established on January 1 and begins revenue services on February 10 with a single de Havilland Canada DHC-8-300. Destinations visited on behalf of the parent include Aqaba, Haifa, Sharm el Sheikh, and Tel Aviv.

Tel Aviv's Rehov Shalom Aleichem takes on a festive air on April 8, as a Jordanian folklore group entertains local residents and visiting tourists with a selection of music and dancing to mark the opening of the first Royal Jordanian office there. Nader Dehabi, president and chief executive officer of the Jordanian airline, whose subsidiary **Royal Wings** made its maiden commercial flight to Israel a few days earlier, stresses that Royal Jordanian is interested in cooperation, rather than competition with **El Al Israel Airlines, Ltd.** Employing the leased Algerian Airbus, the company inaugurates daily commercial air service between Jordan and Israel on May 25 in association with **El Al Israel Airlines, Ltd.**

Customer bookings rise 2.5% on the year to 1,302,375. Although a small \$3.51-million operating profit is enjoyed, a large \$48.75-million net loss must also be absorbed.

The employee population is cut 8.3% in 1997 to 5,128. A government committee, chaired by the prime minister, is established in early spring to look into the possibilities of restructuring and privatizing the airline. At the end of the year, five L-1011-500s are sold to **American Trans-Air (ATA)**.

Weekly Saturday roundtrips from Chicago to Amman via Detroit and Amsterdam commence on May 31; the Detroit stop will continue through September 6. Meanwhile, the five-times-a-week departures from New York for Amman are advanced in frequency to daily.

After a seven-year lapse, service from Amman to Kuwait City is resumed on July 9 with twice-weekly roundtrip flights.

According to the August 8 issue of Jordan's *Al-Aswag* newspaper, the number of passengers carried by Royal Jordanian from Amman to Tel Aviv during the first 6 months of the current year totals 9,066, with an aircraft occupancy rate of 52%.

A code-sharing agreement is begun with **Trans World Airlines (TWA)** in November. Under its terms, the American major is able to place its two-letter designator on Royal Jordanian flights from New York to Amsterdam and Amman. With this agreement, TWA has become the only U.S. airline offering direct service between New York, Holland and Jordan.

On the year as a whole, passenger boardings accelerate 4.2% to 1,353,427, while freight, on the other hand, falls 8.6% to 271.02 million FTKs. Operating revenues advance 1.9% to \$396.37 million, while expenses are \$384.49 million. The operating profit improves to \$11.88 million (later reduced to \$8.85 million), while the net gain is \$ 67.07 million.

On January 26, 1998, **Trans World Airlines (TWA)** seeks to expand its dual-designator service with Royal Jordanian. The proposed growth will allow TWA to add codes on Royal Jordanian flights from Amman to Manama in Bahrain, Karachi, Calcutta, and New Delhi. Royal Jor-

danian will be able to add its codes to TWA flights from New York to Cleveland, New Orleans, St. Louis, and San Francisco.

Employing A310-302s, the company, on June 16, resumes direct return service to Tehran, twice weekly.

Also in June, a letter of intent is signed with **American Trans-Air** for the sale of five L-1011-500s, plus a stock of spare parts. The jetliners will be integrated into the fleet of the U.S. charter carrier over the next 18 months.

A block-seat, code-sharing pact with **Air Canada, Ltd.** takes effect on July 2. The Canadian company purchases space on the Jordanian company's four weekly roundtrips between London (LHR) and Amman, while Royal Jordanian sells seats on Air Canada flights from London (LHR) to Montreal and Toronto.

A formal purchase agreement with **American Trans Air** is signed on August 4 for the five TriStars; the first is now scheduled to be placed into service by the American operator in early December.

It is announced on October 27 that the carrier will begin twice-weekly nonstop return flights on January 17 from Amman to Chicago (ORD) via Shannon, Ireland. The company's current stop at Amsterdam will be eliminated.

The conclusion of the year and the beginning of the next is, for employees of the airline around the world, just as emotional for them as for the citizens of Jordan as a whole. King Hussein, who had been taken to the Mayo Clinic in Rochester, Minnesota, aboard a company aircraft, has spent the year battling lymphatic cancer. As the year ends, it appears the monarch, who has often piloted Royal Jordanian jetliners, may be sufficiently recovered to return home.

Customer bookings during the 12 months decline by 12.3% to 1.18 million, while cargo traffic drops 19.1% to 216.21 million FTKs. Revenues are off 21.5% to \$348.49 million, while costs also drop, by 25.7%, to \$323.26 million. Although a \$25.23-million operating profit is gained, the net profit plummets to just \$7.01 million.

On January 19, 1999, an L-1011 flies King Hussein and his royal party back to Queen Alia International Airport at the edge of Amman, from which he and they ride through the city in triumph.

After naming his eldest son, Abdullah, as his successor on January 22, King Hussein and Queen Noor suddenly fly back to Minnesota aboard the same Lockheed that had brought them to Amman days earlier. The ruler must undergo an emergency bone marrow transplant operation in hopes of reversing his suddenly rampant disease. The procedure, performed on February 2, is not successful and Hussein orders himself flown back to Jordan on February 4 so that he might die at home. King Hussein passes away on February 7.

Despite the death of King Hussein, company offices in Tel Aviv remain open for business. A book of condolences is, however, placed out where visitors can register their comments daily through February 12.

On March 15, the carrier and **Air Canada, Ltd.** announce plans to extend their successful dual designator service between Canada and Amman from March 28 until October 30.

The new service with **Air Canada, Ltd.** begins as advertised on March 28 and features five flights a week from Toronto and Montreal to Amman via London (LHR). Under the agreement, Air Canada offers customers originating from Canada economy-class seats on Royal Jordanian flights from London (LHR) to Amman. Conversely, Royal Jordanian customers have access to Hospitality Class seats on Air Canada flights from London (LHR) to Montreal and Toronto. Coordinated schedules ensure fast, convenient, same-terminal connections at Heathrow Airport.

Following the lifting of the UN embargo on air travel to Libya at the end of March, Royal Jordanian resumes flights to Tripoli and Benghazi on April 20.

Passenger boardings jump 5.5% to 1,252,000. Revenues of just under \$360 million are generated and a net gain of \$34 million is reported.

Airline employment stands at 3,500 at the beginning of 2000, down from 5,500 at the start of 1994.

A weekly dedicated roundtrip B-707F freight service is inaugurated on January 7 from Amman to Montreal (YMQ).

During the first quarter, significant progress is made toward cutting costs. Unprofitable routes to Canada and Iran are dropped and offices at Paris and Geneva are combined, as are those in Abu Dhabi and Dubai and those in Calcutta, New Delhi, and Bombay.

The March 30 issue of the *Al-Itihad* newspaper reports that the Israeli government has begun subsidizing up to 50% of the cost of tour packages for those Israeli citizens wishing to visit various approved Arab countries, particularly Qatar and Oman, in cooperation with selected foreign tourist agencies. Royal Jordanian and **El Al Israel Airlines, Ltd.** immediately begin to compete for this new Jewish business, with the latter cutting its tariffs by up to a third.

It is reported that, as of April 30, the carrier's debt has dropped from over \$1 billion in 1995–1999 to just \$150 million. Managing Director Nader A-Dhahabi also discloses that, following 10 consecutive years of loss, his airline earned a net profit of \$36 million for the first quarter. A-Dhahabi's figures are contained in a May 1 interview that will finally be printed by *Al-Quds* on November 13. In the same interview, the managing director reveals that the decision to privatize the company taken the previous year has yet to receive parliamentary approval. The carrier has, however, accepted a study on recommended structural reorganization prior to privatization commissioned from Andersen Consulting.

In accordance with the Andersen study, plans have been laid for the sale or conversion into independent government corporations of five noncore airline divisions, including training, catering, engine overhaul, engineering maintenance, and the duty-free shops at Amman's Queen Alia International Airport.

Desperate to reach Germany, Syrian Mahmoud Rizq Deeb yanks a grenade and a pistol from the carry-on bags of his 2 young children on board Flight 435, an A320-212 with 12 crew and 84 passengers en route from Amman to Damascus on July 5. Some 20 minutes into the service, on which Deeb's brother is also a passenger, the man walks out of economy class into first class, screams at a flight attendant, and sprays the ceiling with gunfire. Deeb moves toward the cockpit and rolls a grenade down the aisle, which explodes, wounding 15 people; the man is unable to reach the flight crew before he is shot and killed by security guards. Although the grenade explosion blows a hole in the floor of the aircraft, it does not prevent a safe emergency landing back at the point of origin.

The duty-free shops at Amman's Queen Alia International Airport are sold to a Spanish operator in August. Also in August, the Jordanian Parliament approves an annulment of the 1963 law forming Royal Jordanian as a public corporation. The new act allows the carrier to be transformed into a private concern wholly owned by the government, the first stage required for eventual privatization.

Two A310-203s are wet-leased to **Jamahiriya Libyan Arab Airlines** in early October.

A company aircraft transports Jordanian Prime Minister Ali Abu Ragheb to Baghdad on November 1, the first trip into Iraq by any Arab official of his rank since 1990. The trip is condemned in certain Western circles, but applauded throughout the Arab world.

Flight 604, an A320-200 en route from Amman to Abu Dhabi, is forced to make an emergency landing in Kasim, at Buraida Airport, Saudi Arabia, on November 6 due to a bomb threat. At the same time, another threat causes Flight 606, a A320-212 flying from Amman to Doha, to return to its point of origin. Former Royal Jordanian pilot Fakhri Ahmad Mahoud Humaiti is arrested by police and charged in the incidents.

Charter flights that have not operated for over a decade are restarted on November 30 between Amman and Baghdad. Airline officials are careful to point out that these flights do not represent a resumption of "scheduled" services, but are for humanitarian purposes. The A310-304, which had departed the Jordanian capital with UN approval and 19 passengers, returns from Iraq on December 1 bringing 20 riders. The adventure is reported for the BBC by reporter Barbara Plett, who is on the flight, and is archived on the news organization's Web site.

ROYAL NEPAL AIRLINES CORPORATION: P.O. Box 401, RNAC Building, Katipath, Kathmandu, 711000, Nepal; Phone 977 (1) 220757; Fax 977 (1) 225348; <http://www.royalnepal.com>; Code RA; Year Founded 1958. When an **Indian Airlines Corporation** contract expires in 1958, the Kingdom of Nepal and several private investors form this small national carrier on July 1 to take over domestic service. The act establishing the company gives it three major goals: (1) manage air transport services within and outside the Kingdom of Nepal in a safe, efficient, economical, and proper manner; (2) ensure maximum profitability as well as provide air services at economical fares as far as possible; (3) diversify air services. A single Douglas DC-3 is made available and the initial workforce totals 97. Flights commence on July 3 from Katmandu's Tribhuvan Airport to four domestic destinations.

Under terms of a new **Indian Airlines Corporation** regional contract, routes are extended from Kathmandu to New Delhi, Calcutta, and Patna in 1959. The government of Nepal assumes full ownership on October 12. In 1960, sufficient Nepalese personnel are available to assume most flight and ground positions. In January, the company assumes the international route to Patna.

A DC-3 with four crew fails takeoff from Bairihawa, Nepal, on November 5 and crashes; there are no survivors.

During 1961–1963, the fleet grows to include 12 aircraft and the work force rises to 434. Services to Delhi and Calcutta begin during the former year. A DC-3 with four crew and six passengers disappears on a flight to New Delhi on August 1, 1962; the wreckage is found near Tulachan Dhuri the next day and there are no survivors. A new hangar is built at Katmandu during the latter year.

Enplanements in 1964 total 100,000 and revenues are \$1.46 million.

In 1965–1967, the employee population rises to 720 and the fleet is strengthened through the addition of a Fokker F.27-100 Friendship and a STOL-capable de Havilland Canada DHC-6-100. The carrier begins to receive aid from the UN Development Fund (UNDP), administered by ICAO, for the training of personnel and the buildup of infrastructure.

Domestic services increase 36% in 1968 and international 17% for a systemwide total of 167,599 boardings. Helicopter service is inaugurated into remote areas. Revenues total \$1.46 million.

A new headquarters is opened at Kathmandu in 1969. While flying over a cloud-covered 7,300-ft. ridge on July 12, a DC-3 with 4 crew and 31 passengers collides with a tree at Hitauda, Nepal; the wreckage is found the next day and there are no survivors.

Reflecting the conflict of differing political influences on the country, the fleet during 1970 comes to feature several Russian aircraft, as well as 2 Hawker Siddeley HS 748s (known as Avro 748s), 6 DC-3s, and 1 Fokker F.27-100.

While on final approach to Delhi from Kathmandu on January 25, an F.27-200 with 5 crew and 18 passengers encounter bad weather and turbulence that result in a crash short of the runway (1 dead).

A technical and management contract is signed with **Air France** on July 13; the arrangement will eventually allow the carrier to inaugurate international services.

With the two Avro 748s operating the major domestic services, the company acquires several more DHC-6 Twin Otters and two Pilatus PC-6 Porters with which to inaugurate flights to such mountainous destinations as Lukla and Syangboche. DHC-6 flights commence in August, followed by the Porters in November.

Operations continue apace in 1971–1972, with management provided by **Air France** under a three-year contract. The first jetliner, a B-727-1F8, arrives via the French major in June of the latter year and in a September 10 ceremony, Nepalese religious leaders slaughter goats and sprinkle their blood in the cockpit for good luck. The Boeing, christened *Yeti*, pioneers a route to New Delhi five days later. A DC-3 with 31 aboard crashes in the Katmandu Valley on September 13 of the latter year; there are no survivors.

On June 10, 1973, three armed men hijack a Twin Otter en route from Biratnagar to Katmandu and after forcing the aircraft to land at

Forbesganj, India, escape with \$400,000 in Nepalese bank funds that were being shipped.

The **Air France** contract is completed on October 31.

During **1974-1976**, airline employment grows to 922. Chairman/Managing Director B. B. Pradhan's fleet is expanded and improved as the DC-3s and F.27 are retired in favor of a Boeing 727-1F8 purchased new, a B-727-116C acquired from **LanChile Airlines, S.A.**, two more Avro 748-B2s, nine additional DHC-6-300s, and two Pilatus Porters. The latter begin a special new domestic service on October 31, 1975 to 10 communities above the 6,000-ft. level.

Employing an Aerospatiale AS.332 Puma, the company inaugurates rotary-wing flights on January 31, **1977**, to Tiger Tops National Park south of Kathmandu. Direct trijet service from Kathmandu to Colombo, Sri Lanka, begins on March 16; the route is the company's first significant international aerial highway. A technical, management, and marketing agreement is now signed with **Deutsche Lufthansa, A.G.** As part of the deal, RNAC, in the fall, is able to begin pooled service, aboard German aircraft, to Frankfurt.

The domestic network is increased during **1978-1982** to 37 points in 11 districts and pooled international routes are opened to Bangkok, Colombo, Dhaka, Hong Kong, Karachi, and Rangoon. The Hong Kong route allows transport for the large number of Gurkha soldiers based there with the British army. Management and technical assistance continues to be provided by **Deutsche Lufthansa, A.G.**, now joined by **Aer Lingus Irish Airlines, Ltd.**

Enplanements total 163,473 in **1983**. The workforce grows 1.8% in **1984** to 1,858. Service is extended to Singapore and Dubai.

Badly off course in foul weather on December 22, a DHC-6-300 with 3 crew and 20 passengers crashes near Bhojpur, Nepal (15 dead).

Customer bookings for the year dip 6.3% to 153,784. Service during the latter year is extended to Singapore and Dubai and the workforce grows 1.8% to 1,858.

The fleet in **1985** includes 3 B-727-100s, 3 Avro 748-B2s, 9 DHC-6-300s, and 2 Pilatus Porters. In March, B. R. Singh succeeds B. B. Pradhan as managing director.

Another DHC-6-300 is added in **1986** and orders are placed for two B-757-200s; the \$110-million request is Nepal's biggest ever trade contract. One will be purchased with a commercial loan and the other through a lease-purchase deal; both arrangements are handled by France's Credit Lyonnais.

While landing at Safebagar on May 3, a DHC-6-300 turboprop with 3 crew and 15 passengers is destroyed when it encounters windshear 100 ft. over the runway; there are no fatalities.

Flights continue apace in **1987**, with the first B-757-2F8 delivered in October. With fuel costs in land-locked Nepal averaging \$10 per gallon due Indian-imposed border restrictions, jetliners on shorter foreign routes load maximum fuel before leaving regional destinations for Kathmandu. Upon reaching the Nepalese capital, surplus fuel is unloaded for use by the fleet's turboprops on domestic flights and the jetliners are left with only sufficient fuel to reach the first foreign airport on their next scheduled route. Under an arrangement with **Deutsche Lufthansa, A.G.**, a two-year, pooled route is launched between Nepal and Frankfurt.

The first traffic figures in three years are released this year and show overall bookings of 330,551.

UNDP funding for the **1988** totals \$1.5 million. The fleet now includes 1 B-757-2F8, 2 B-727s, 3 Avro 748-B2s, 8 Twin Otters, and 3 Pilatus Porters. B-727-100 charter service is extended, with a large number of flights to Nagoya, Japan; a series of "mountain flights" are introduced, with frequencies of up to three per day depending upon the season, over the Himalayas. The sight-seeing aircraft make left and right circuits over such famous peaks as Everest and Annapurna, allowing good views for passengers and shots for photographers.

Employing a B-707 leased from **CAAC (General Administration of Civil Aviation of China)**, the company flies 44 passengers on its inaugural shared charter service from Kathmandu to Lhasa, Tibet, on April 4. The Nepalese flag carrier undertakes the 50-min. return route every

Wednesday and the Chinese carrier each Saturday. These flights will continue to be provided annually from April to October, although Royal Nepal will substitute its B-727-1F8.

On June 11, customs officials at Kathmandu confiscate an illegal shipment of gold worth more than Rs 100 million from a chartered company aircraft. The British Gurkhas cargo flight had arrived with the undeclared booty in boxes weighing 194 kilos and 570 grams, respectively.

The second Boeing 757-2F8C arrives in September; it is the first B-757 combi built and is christened *Gandaki*.

The 1,879-employee airline enjoys enplanements of 597,745, a 16% increase.

The workforce is increased to 2,500 in **1989** and the fleet now includes the 2 newly delivered B-757-2F8s plus 10 Twin Otters, 3 Avro 748-2Bs (1 in service), and 2 Pilatus Porters. The year's big event is the inauguration of Boeing service to London in September, as an extension of the Frankfurt route. Also, an agreement is signed with **Royal Brunei Airlines** for the technical support of the carrier's B-757s.

During the year, the company is reorganized into separate international and domestic divisions, with the latter headed by Deputy Managing Director G. R. Rajbahak. Pooled B-707-3J6C flights operated with **Air China International Corporation** between Kathmandu and Lhasa are suspended in November.

Enplanements for the year total 610,000, a 2.1% increase, and revenues are \$54.3 million. Profits are generated: \$17 million (operating) and \$2.06 million (net).

In **1990**, airline employment at Managing Director Singh's carrier totals 2,500 and the route network includes 38 domestic destinations and 10 foreign destinations in Europe, Asia, and the Middle East. Joint services with **Air China International Corporation** between Nepal and Lhasa are resumed in March. Flights begin to Paris.

The fleet in **1991** includes 1 each B-727-1F8, B-727-116C, B-757-2F8, and B-757-2F8C, 8 DHC-6-300s, 2 Harbin Yu-12Hs, 2 Avro 748-2As, and 2 748-2AFs.

Following an unstabilized approach to Lukla from a June 9 Kathmandu service, a DHC-6-300 with 3 crew and 14 passengers crashes on the runway; although the aircraft is damaged beyond repair, there are no fatalities.

A total of 644,509 passengers are carried on the year and revenues reach \$110 million.

In **1992**, the Harbins and Avro 748-2Bs are placed out of service, the latter temporarily. Charter flights to Japan now average 12 to 15-per-year while service to Europe is weekly, a single route from Nepal to London via Dubai, Frankfurt, and Paris.

During its takeoff run from Jumla on July 5, a DHC-6-300 with three crew veers right and runs off the runway and into the perimeter fence; although the aircraft is damaged beyond repair, there are no fatalities.

A DC-8-72 is leased during October while the B-757-2F8C is away at Brunei for its 16,000-hr. maintenance check. Late in the year, a new Twin Otter hangar is opened at Nepalgunj, in the western part of the country. The government now announces a policy of domestic liberalization that will allow the formation of new airlines.

Managing director Pradeep Raj Pandey oversees a workforce of 2,200 in **1993** and increases his fleet by the addition of a B-757-2F8C and a leased Airbus Industrie A310-304, the latter arriving at Kathmandu in December. Destinations visited from Kathmandu now include, in addition to 37 domestic stops: Bangkok, Hong Kong, Singapore, Calcutta, Delhi, Bombay, London, Paris, and Frankfurt.

Operations continue apace in **1994** and following the opening of Osaka's new international airport (KIX) in September, twice-weekly flights are inaugurated to Japan.

Flight 133, a DHC-6-300 with 3 crew and 21 passengers, fails its takeoff from Kathmandu on January 17, **1995**, for a service, hits the perimeter fence, and plunges into a field (2 dead).

Many of the domestic stops are lost to competing **Necon Air, Ltd.** and **Nepal Airways, Ltd.** and two of the Avro 748s are withdrawn. Smoking is banned on the airline's Kathmandu-Bangkok-Singapore flights. Addition-

ally, it is forbidden on all domestic services and to flights into India.

Flights continue in **1996** with the company increasingly emphasizing its international services. New routes are inaugurated to Shanghai and Osaka. At the request of the World Health Organization, the carrier prohibits smoking on its Frankfurt to London and Frankfurt to Paris European segments.

Just after landing on the rain-soaked grass airstrip at Meghauli following an April 25 service from Kathmandu, an HS 748-2B with 4 crew and 27 passengers, runs off the runway into drainage ditches, losing its nose landing gear. There are no fatalities.

Destinations visited in **1997–1998** include Bangkok, Bombay, Calcutta, Delhi, Dubai, Frankfurt, Hong Kong, London, Osaka, Shanghai, Singapore, and 30 local points.

A one-year ACMI wet-lease contract is signed with **China Southwest Airlines Company, Ltd.** on March 8, **1999**. Under its terms, China Southwest will fly a B-757-2Z0 on behalf of the Nepalese on routes from Kathmandu to Singapore, Hong Kong, New Delhi, and London.

Protesting the Chinese contract, company pilots go out on strike on March 14, grounding the airline. The flyers demand that the carrier cancel its foreign deal and purchase an aircraft to be flown by local crews.

The Home Ministry, indicating that air transport is an "essential service" that comes under the regulations of the nation's essential services law, orders the pilot strike halted eight days later. Royal Nepal Managing Director Singh requires his pilots to return to their cockpits or forfeit their jobs.

Service continues in **2000**.

During its descent into Dhangarhi in rain and poor visibility on July 27 service from Bajang, a Twin Otter with 3 crew and 22 passengers hits a row of pine trees on high ground 4,300 ft. up in the Dharampani Hills, 450 mi. W of Katmandu near the remote village of Jogbudha, catches fire and crashes. There are no survivors.

A problem often reported during the years at Katmandu's Tribhuvan Airport continues into the fall—huge vultures attracted to the garbage dumps around the field. After two accidents involving the giant birds occur within 24 hours during the second week of October, authorities on October 20 order the airport closed indefinitely while hunters are recruited to shoot as many vultures as possible. Although many birds are destroyed, the refuse piles remain.

Twice-weekly B-757-2F8 roundtrip service is inaugurated on October 29 between Kathmandu and Bangalore, India. The airline is authorized by the Indian government to transport 6,000 people a week between the 2 cities. Speaking in Bangalore on November 3, RNA Chairman Hari Bhakta Shrestha indicates that he will seek an upgrade to 10,000 a week.

As the year ends, Royal Nepal operates not only within Nepal but offers 12 weekly roundtrips from Kathmandu to Delhi, 3 to Bombay, and 2 each to Calcutta and Bangalore. Plans are in place for the initiation of new direct return service from Kathmandu to Ahmedabad early in **2001**.

ROYAL PHNOM PENH AIRWAYS COMPANY, LTD.: No. 209, 19th Street, Phnom Penh, 12206, Cambodia; Phone (855) 23 216 487 Fax (855) 23 217 420; <http://www.babysosoft.com/kohkong/phnom-mair.html>; Year Founded 1999. Royal Phnom Penh Airways Company, Ltd. is established as a tourist airline on October 29, **1999** by Prince Norodom Chakrapong, son of King Norodom Sihanouk. The owner is also chairman/CEO. He had previously served as deputy prime minister, civil aviation minister, and CEO of **Kampuchea Airlines (1)**.

During the spring of **2000**, two Antonov An-24Bs are leased from **Nizhegorad Airlines (Nizhegorodskie Avialinii)**. A complement of Russian pilots and flight engineers redundant to the bankrupt Russian carrier are seconded out as well.

The first of the new aircraft is employed to inaugurate daily return service for the airline's namesake city to Siem Reap and Battambang. When the second An-24 becomes available, thrice-weekly flights are offered to Stung Treng, Koh Kong, and Sihanoukville, with special flights to Mondulakiri on Mondays and Rattanakiri on Sundays. The company employs three flight crews, two Cambodian and one Russian.

In July, plans are announced for the initiation of a new international

return service from Bangkok to Siem Reap via Phnom Penh on October 15. It is also hoped that weekly flights from Phnom Penh to Ho Chi Minh City can be started by the end of January.

During the fall, work begins on a company-owned airport at Poi Pet District in Banteay Meanchey Province on the border between Cambodia and Thailand.

The inauguration of the roundtrip route to Thailand is delayed until December 28; employing a Yakovlev Yak-42D, the airline begins the service thrice weekly. It is anticipated that weekly roundtrips to Ho Chi Minh City will commence in mid-January.

ROYAL SWAZI AIRWAYS CORPORATION, LTD.: Swaziland (1990–1999). Royal Swazi National Airways Corporation, Ltd. is reformed in **1990** and renamed. Ownership is divided between King Mswati III's trust, Tibiye Taka Ngwane, and the Swaziland government.

Operations continue from Matsapa Airport at Manzini with a single Fokker F.28-3000 to Johannesburg, Lusaka, Harare, Maputo, and Nairobi. Enplanements total 742,560.

Airline employment in **1991** stands at 150. Passenger boardings decline 2% to 728,000 and freight falls 10% to 10.3 million FTKs.

Operations continue apace during **1992–1994** as a Fokker 100 enters service in November 1993. Chairman Prince Ghabeni Dlamini and CEO Prince Matatazela initiate new markets at Dar es Salaam, Gaborone, Maputo, and Maseru. Frequencies operated to Johannesburg end within a year.

A lone assailant, attempting to take over the F.28-3000 at Johannesburg on July 4, 1993, is shot dead by security police.

Flights continue in **1995–1998** and airline employment grows to total 155. The F-100 is leased to **LAM Mozambique Airlines, S.A.** in October 1996.

On January 25, **1999**, **SA Air Link (Pty.), Ltd.** purchases 43% of Royal Swazi and reportedly passes word to **LAM Mozambique Airlines, S.A.** that it wishes the Swazi Fokker 100 returned by March. Now LAM will be down to just one Boeing 737-2D1A with which to operate its domestic and regional flights.

As late as March 22, LAM denies continuing reports that Royal Swazi has recalled the Fokker.

On April 12, this carrier is renamed **Swaziland Airline, Ltd.**

ROYAL SWAZI NATIONAL AIRWAYS CORPORATION, LTD.: Swaziland (1978–1990). This government-controlled carrier is formed in January **1978** as successor to **Swazi Air, Ltd. (2)**, which has ceased trading. Chairman/Managing Director J. T. Morrison's 31-employee company possesses a fleet of 2 Vickers Viscount 800s and 1 Viscount 700. Revenue flights commence on August 1 over a route from Manzini to Johannesburg and Durban.

During **1979–1986**, the international route network is built up to include additional stops at Antananarivo, Dar Es Salaam, Gaborone, Harare, Lusaka, Mahe, Manzini, and Nairobi. Airline employment averages 150 and the fleet grows to include 1 each Boeing 737-200, Fokker F.28-3000, and Fairchild Metro.

Enplanements average 25,000–30,000 per year.

Operations continue apace in **1987–1989**; however, by the latter year General Manager G. J. Paris operates only the Fokker Fellowship on routes from Manzini to Johannesburg, Lusaka, Maputo, Nairobi, and Harare. The company is reformed in **1990** and renamed **Royal Swazi Airways Corporation, Ltd.**

ROYAL TONGAN AIRLINES, LTD.: Private Bag 9, Fatafehi Road, Royco Building, Nuku'alofa, Tonga; Phone 676 23 414; Fax 676 24 056; <http://www.kalianet.to/rta>; Code WR; Year Founded 1991. In May **1991**, 70-employee **Friendly Islands Airways, Ltd.** becomes Royal Tongan Airlines, Ltd. C. Kaltenborg V. Stachau is named general manager and the fleet comprises Friendly's 2 de Havilland Canada DHC-6-300 Twin Otters. The predecessor's interisland services are maintained linking Tongatapu, Vava'u, Ha'apia, and 'Eua. International

services to Auckland are started in July employing a Boeing 737-419 wet-leased from **Air New Zealand, Ltd.** Neil Cox is appointed general manager in **1992**.

Operations continue as do fiscal losses, which in **1993** total \$453,000, both operating and net. Geoffrey W. Bowmaker becomes managing director in **1994** and orders are placed for two British Aerospace BAe (HS) 748-B2s.

Revenues ascend 56.8% to \$7.26 million, while operating expenses climb 47.6% to \$7.5 million. Consequently, there is an operating loss of \$240,000 and a net loss of the same amount.

In January **1995**, Royal Tongan joins with **Air Pacific, Ltd.** in the joint lease of a B-737-33A, which is employed to inaugurate a dual-designator service between Tonga and Fiji. In May, the Royal Tongan Boeing brings a new service from Tonga via Auckland to Sydney.

During the spring, **Polynesian Airlines, Ltd.** replaces a leased **Air Canada, Ltd.** Boeing with a B-767-269 chartered from **Kuwait Airways Corporation, Ltd.** Part of the cost and a shared route are born by Royal Tongan, and as a result, the aircraft wears that company's markings as well.

Two new partnerships begin with larger carriers in April **1996**. The first, with **Air New Zealand, Ltd.**, provides for code-sharing services between Tongatapu and Auckland. At the same time, the company begins to share its code with **Ansett Australia (Pty.), Ltd.** on its trans-Tasman routes.

A code-sharing agreement signed a month earlier begins with **Polynesian Airlines, Ltd.** on October 28, **1997**. Under its terms, Polynesian's current weekly service from Apia to Melbourne via Wellington is extended by way of Tonga.

Flights continue in **1998-1999**.

James Bradford is general manager at the beginning of **2000** and his workforce totals 122. In mid-May, an ex-**Bahamasair, Ltd.** Shorts 360-200 is brought in to replace the HS 748 previously employed on Tongan Island services.

This airline will be grounded (temporarily, as it will turn out) on March 12, **2001** when the Tongan transport secretary finds unqualified management in charge.

ROYAL WEST AIRLINES: United States (1986-1988). Originally planned four years earlier as a low-cost Colorado Springs-based regional, RWA is actually established at Los Angeles in the spring of **1986** to provide scheduled passenger flights to Las Vegas and Reno in Nevada. Revenue services commence on June 26 with three British Aerospace BAe 146-200s; however, the initial route operated is from Los Angeles and Burbank to Ontario and Las Vegas. Weekend flights from the California communities to the Colorado ski resorts begins in the fall and continues into the winter. Still, a cash flow problem emerges quickly and with nothing to point to, the privately held carrier exercises its right not to release any traffic or financial reporting.

Scheduled flights cease on February 27, **1987** and merger negotiations are begun with Phoenix-based **StatesWest Airlines**. As these proceed, RWA offers charter and replacement services. When the discussions fail, the company is forced into Chapter XI bankruptcy. While plans for reorganization are undertaken, charter flights are operated with two of the British-made jetliners on behalf of an Elko, Nevada, casino.

In late December, a BAe is wet-leased to **Sunworld International Airways**, which employs it to operate a daily roundtrip from its new Reno hub to San Diego via Las Vegas and Ontario, California.

Unable to resume airline operations, the company enters Chapter VII liquidation in early **1988**.

ROYAL WEST AIRWAYS: United States (1981-1982). RWA is set up at Las Vegas, Nevada, during the spring of **1981** to provide scheduled Douglas DC-3 flights to the Grand Canyon and Burbank, California. Lack of traffic brought on because of ATC restrictions resulting from the summer PATCO air traffic controllers' strike conspires with recessionary influences to force the company out of business in early **1982**.

ROYAL WINGS AIRLINES, LTD.: P.O. Box 341018, Amman, 1134, Jordan; Phone 962 (2) 875 206; Fax 962 (2) 875 658; <http://www.royalwings.com.jo>; Code RJ; Year Founded 1996. RW is set up at Amman on January 1, **1996** as a subsidiary of **Royal Jordanian Airlines** to provide both scheduled and charter passenger services to domestic and regional destinations. Company formation profits from the close interest and strong support of HRH Prince Faisal Bin Al-Hussein. Basel Jardaneth is chairman with Ahid Quntar as president and general manager; the workforce totals 29 and a single de Havilland Canada DHC-8-300 is acquired.

Revenue feeder flights commence twice daily on February 10 linking the concern's base with Aqaba, Sharm el Sheikh, and Haifa. Charters are also undertaken not only to the scheduled points, but to Alexandria, Antalya, Aswan, Heraklion, Hurdaga, Luxor, Ras El Nakab, Rhodes, and St. Catherine as well.

Flights continue in **1997** and a second DHC-8-300 is acquired at the end of January. This de Havilland is employed to launch six-times-per-week flights to Tel Aviv, beginning on April 7. Plans are made to add Larnaca, Cairo, and Al Arish to the expanding network.

In order that the carrier might have a business division, Arab Winds, Ltd. is taken over in January **1998** and merged. Its activities are continued under Royal Wings management. Taking advantage of the growing Middle East peace, the company now expands its regional scheduled services. Hurghada and Sharm el-Sheikh become its most popular charter destinations. On December 11, a company DHC-8-300 launches twice-weekly roundtrips from Amman into the newly opened airport at Gaza. This after the company participates in celebrations opening the new Palestinian airport a few weeks earlier.

Both charter and scheduled flights continue in **1999**. The Red Sea resorts at Larnaca, Antalya, and Rhodes are regularly visited with tourists. Employing a pair of Mil Mi-8s, a new helicopter service is introduced in October. The Russian-built helicopters transport visitors to Petra and Wadi Rum, as well as various desert historic sites. Replacement flights to Tel Aviv, Gaza, Aqaba, and Haifa are often made on behalf of **Royal Jordanian Airlines**. On December 30, General Manager Ahed Quntar reports that passenger boardings for the first 10 months of the year are just 97,000, down 60,000 from the equivalent 1998 figure. Revenues of \$1.4 million are generated for the year as a whole, up \$400,000 over the previous year.

At the beginning of **2000**, scheduled service is maintained to Aqaba, Tel Aviv, and Gaza, while charters are operated to a growing number of destinations, including Cyprus, Sharm al-Sheikh, and Damascus. The carrier's helicopters are also available for use in emergency situations. The Palestinian unrest in the fall of has an impact on the scheduling of services to Israel and Gaza.

ROYALAIR: 1575 W. Commercial Blvd., Hangar 3B, Fort Lauderdale, Florida, 33309, United States; Phone (954) 771-8805; Fax (954) 771-8006; Year Founded 1996. Royalair is established at Fort Lauderdale Executive Airport in **1996** to operate executive and small group passenger charters throughout the Eastern U.S. Revenue operations begin and continue with a single British Aerospace BAe (HS) 125-700 Hawker; another Hawker is stationed at Mount Holly, New Jersey.

ROYALE AIRLINES: United States (1969-1989). Royale Airways is founded by D. Y. Smith Jr. at Shreveport Regional Airport in Louisiana on July 18, **1969** to offer services to destinations in Louisiana, Texas, and Mississippi. Scheduled passenger flights begin on April 27, **1970**, linking the company's base with New Orleans via Fort Polk and Lafayette. During the next five years, President Smith's 6 Beech 99s also begin flying to Lake Charles and Houston.

In **1975**, enplanements total 76,806. The workforce is increased by 20% in **1976** to 60. Three more Beech 99s are acquired and stations are opened at Monroe and Baton Rouge.

Passenger boardings drop 16% to 54,862.

Passenger enplanements in **1977** total 81,000.

Passenger traffic climbs by 19% in **1978** to 96,049; additionally,

340,122 pounds of freight are also carried. During these years, flights are initiated to New Orleans, Gulfport, and Dallas.

Bookings increase by 25% in **1979** to 120,000 and the fleet now comprises 1 Shorts 330 and 4 Beech 99s. Orders are placed for nine Embraer EMB-110P1 Bandeirantes.

The employee population grows by 8.3% in **1980** to 170. Founder Smith is elected board chairman, with Ralph U. Whitten now becoming president. Four of the requested Brazilian-made turboprops enter service through the year.

Passenger boardings increase by 23.6% to 148,852 and 243,000 pounds of freight, a 48.5% increase. Revenues skyrocket 80% to \$6.4 million, but even with costs booming upward 84.2%, they are kept in check at \$5.7 million. As a result, the operating profit climbs 51.3% to \$698,897.

Norman K. McInnis becomes company president in **1981**. He oversees a fleet of 4 Beech 99s and 6 Bandeirantes. A seventh EMB-110P1 is added late in the year.

Customer bookings climb 10.9% to 165,055 while cargo jumps 22.6% to 297,919 pounds. The net profit is \$1.26 million.

Airline employment rises 22.1% in **1982** to 271 and the fleet now comprises 2 Shorts 330s, 6 Embraer EMB-110P1s, and 7 Beech 99s. Service to Memphis, Tennessee, begins during the first quarter. A new maintenance base is occupied at New Orleans, where a corporate Grumman Gulfstream 1 is converted to 24-seat G1-C commuter configuration.

Enplanements climb 27.9% to 211,167, as freight increases 45.8% to 184,000 pounds. Due to the recession, profits fall to \$3.89 million (operating) and \$1.033 million (net).

Airline employment in **1983** is 385, a boost of 54%. A second reconfigured Gulfstream G-1C joins the fleet during the spring, followed by two others by Christmas. Meanwhile, flights begin to five Texas locations and in September, Royale becomes a Continental Commuter partner, coordinating flights as "Continental Express" so as to feed **Continental Airlines** at Houston.

Passenger boardings accelerate to 223,496 and cargo jumps 18% to 649,000 pounds. Revenues advance 20.1% to \$15.5 million and expenses, although up by 25%, are \$13.45 million. As a result, the operating profit is \$2.05 million and net gain is \$1.02 million.

The payroll is boosted 54.7% in **1984** to 464 as Robert E. Phillips is promoted to president/CEO. The carrier now enters the jet age by acquiring a Douglas DC-9-15 for nonstop "Continental Express" service between Brownsville and Houston. Five more Gulfstream G-1Cs also join the fleet, allowing retirement of one of its 11 Bandeirantes and the 4 remaining Beech 99s.

Flights begin to Jackson, Mississippi, and Pensacola. The DC-9 is retired in December and its Texas route is returned to the turboprops.

Enplanements ascend 79.6% to 400,302 and freight balloons 105% to 1.33 million pounds. Revenues jump 50.8% to \$23.4 million and costs, although up by 56.2%, are held at \$21 million. Profits climb slightly, up to \$2.35 million (operating) and \$1.31 million (net).

Airline employment grows another 30.8% in **1985** to 607 as the carrier acquires the Clear Lake City, Texas, assets of **Metro Airlines**, including six de Havilland DHC-6-300 Twin Otters. John A. Fasolino is named the enlarged regional's new president and oversees a reduction in unprofitable routes.

Passenger boardings climb 3.5% to 414,261, but cargo is down 3% to 880,000 pounds. Revenues ascend 36.1% to \$33.6 million and with costs held down, profits move upward to \$3.66 million (operating) and \$1.77 million (net).

The workforce is reduced by 26% in **1986** to 449 and the fleet includes 10 G-1Cs, 12 Bandeirantes, and 6 DHC-6s. As the economy of the company's energy-rich service area continues to deteriorate, Royale is forced to shut down its newly acquired Clear Lake City facilities and sell the six Twin Otters. Several marginal routes are also suspended.

As a result, passenger boardings fall 7% to 385,446. Revenues plunge 11.4% to \$29.2 million, expenses decline 8.9% to \$27.94 million, and

the operating profit slides to \$1.25 million. The previous year's net gain turns south into a \$961,801 net loss.

In early September **1987**, Royale loses its "Continental Express" code-sharing affiliation. As a result, the company, already shaky financially, is forced to file for Chapter XI bankruptcy on September 9. Once under protection of the court, eight EMB-110P1s are allowed to fly a limited Louisiana route network. In addition, a previous plan to inaugurate jetliner service is allowed to begin, as a Douglas DC-9-14 wet-leased from **Emerald Air** starts flying roundtrips between Shreveport and New Orleans on November 19.

Customer bookings plunge another 37.6% on the year to 240,549.

Although no figures are released, Royale continues to operate under court protection through **1988**, continuing to reduce its fleet. Throughout the year, negotiations, begun the previous year, are continued for a possible takeover by an **Emerald Air** subsidiary. By September 30, the regional flies just 1 EMB-110P1 and 2 G-1Cs. Jet service continues.

On January 31, **1989**, Royale grounds its turboprops, but continues to operate thrice-daily Shreveport to New Orleans flights with the Douglas DC-9-14 wet-leased from fellow bankrupt carrier **Emerald Air**.

The rental fee charged by **Emerald Air** allows it to gain control of Royale in early February; however, the federal bankruptcy court now steps in and orders the 19-year-old Royale liquidated. Emerald regains its Douglas jetliner and continues the New Orleans service under its own name.

RRC AIR SERVICE, S.C.: Ethiopia (1991–1994). RRC is established at Addis Ababa in **1987** to offer third-level passenger and cargo services to local and regional destinations. Revenue operations commence with 1 each Beech Super King Air 200 and de Havilland Canada DHC-6-300 Twin Otter.

The Twin Otter is destroyed in a crash 32 km. E of Fugnido on August 7, **1989**, under unknown circumstances. Flights continue with just the Beechcraft.

The Super King Air 200 is replaced by a second Twin Otter in **1992**. Operations continue apace in **1993**, but cease in **1994**.

RT AVIATION: Bogoslovski Perlulok 12/14, Moscow, 103104, Russia; Phone 7 (095) 209-2676; Fax 7 (095) 455-8282; Year Founded 1994. Y. Evgeni Zakharov, who also serves as general director, establishes RT (Russian Transport) Aviation at Moscow in **1994**. Ad hoc passenger charters are inaugurated with a single Yakovlev Yak-40.

In **1995**, the company mission is changed to that of a domestic and regional all-cargo carrier. The Yak is withdrawn and replaced with 1 each Antonov An-12, An-26, An-32, Ilyushin Il-18, and Il-76D.

Plans are made in **1997** to inaugurate international air charters. These flights have still not started as of the beginning of **2000**.

RUMPLER LUFTVERKEHR, GmbH. (1): Germany (1919–1922). The aircraft manufacturer Rumpler Flugzeugwerke begins a pioneering service between Augsburg and Berlin in March **1919**. This independent effort is brought to a close on March 8, **1920**, when Norddeutscher Lloyd purchases the operation and merges into its own new airline, **Lloyd Luftdienst, GmbH**.

RUMPLER LUFTVERKEHR, GmbH. (2): Germany (1922–1923). Rumpler Luftverkehr is reformed by Rumpler Flugzeugwerke at Munich in early **1922** to resume the pioneering work of 1919. When the manufacturing side of Rumpler's business is lost, Junkers Luftverkehr steps in on September 30 to provide technical assistance and a pair of F-13s, christened *Truthahn* and *Zeisig*. These are employed to inaugurate service from the carrier's base to Berlin and Augsburg via Nuremberg and Leipzig. At Munich, a connection is also possible with the Junkers Swiss affiliate **Ad Astra Aero, A.G.** As competition stiffens with the **Lloyd Luftdienst, GmbH**, **Junkers Luftverkehr, A.G.** reaches out to locate members for a countering confederation.

On May 14, **1923**, the **Trans-Europa Union** is formed; simultaneously, Junkers assumes 50% interest in RL-2, bringing it into the group.

RUSAVIA. *See* **MATK RUSAVIA**

RUSLAN AVIATION: Russia (1994–1998). Ruslan is established at Moscow in 1994 to operate ad hoc passenger charters to worldwide destinations. Doubling as general manager, owner V. P. Kutakov begins flying with a single Antonov An-24.

Flights continue without incident or headline. Unhappily, the company does not survive the Russian currency crisis.

RUSS AIR TRANSPORT COMPANY: 88/8 Volokolamskoe Highway, Moscow, Russia; Phone 7 (095) 491-9922; Fax 7 (095) 491-8638; <http://www.russair.net>; Code RUR; Year Founded 1999. The joint stock company Russ Air Transport is established at Moscow's Vnukovo Airport on August 24, 1999 to offer international and domestic all-cargo services. Victor N. Rybiakov is director general and he is equipped with a fleet of 4 Ilyushin Il-76TD freighters. The Russian government provides an air operator's certificate on November 1 and the ICAO three-letter code is received five days later.

Revenue flights commence on November 17 over a route from Moscow to Luxembourg to Tallin and back to Moscow. The first service to China is operated on December 2.

A host of new destinations are initially visited during the first quarter of 2000: UAE on January 19, Cairo and Yemen on January 25, Rwanda on January 27, India on February 28, Iran on April 3, and Belgium and Armenia on April 14.

Flights continue apace during the remainder of the year.

RUSSIAN INDEPENDENT AIRLINES (ROSSISKYAYA NEZAVISIMAYA AVIAKOMPANIYA RNA): Ostravtynayova 34, Building 2, Moscow, 117647, Russia; Phone 7 (095) 420-0300; Year Founded 1994. This rotary-wing operation is established at Moscow in 1994 to provide ad hoc air taxi, air ambulance, energy and communication support, and agricultural work. N. F. Sadovnikov is appointed general director and he begins revenue flights with an unspecified number of Mil Mi-8s and Mi-26s.

Low profile rotary-wing services are continued throughout the remainder of the decade.

RUSSKIY VITAYA AIR COMPANY (RUSSKIY VITAYA AVIAKOMPANIYA): Sheremetyevo Airport, Moscow, 103340, Russia; Phone 7 (095) 478-0551; Fax 7 (095) 578-1737; Year Founded 1993. Russkiy is founded at Moscow's Sheremetyevo Airport in 1993 to provide ad hoc international all-cargo services. Flights begin with a single Ilyushin Il-76. Gennadi Alexandrov is general director at the beginning of 1998.

By the end of the decade, Russkiy Vitaya is one of many small Russian cargo carriers operating infrequently, but reportedly remaining in business.

RUST'S FLYING SERVICE: 4525 Enstrom Circle, P.O. Box 190325, Anchorage, Alaska 99502, United States; Phone 907 243-1595; Fax 907 248-0552; <http://www.flyrusts.com>; Year Founded 1963. Rust's is set up at Anchorage in 1963 to offer charter and flight-seeing services to local and bush destinations. A base is also established at Talkeetna and highlights of the itinerary come to include tours to Mount McKinley and glacier landings, support of hunting and fishing trips, and bear and other wildlife viewing from the air.

By the end of the 1990s, Rust's is providing over 4,000 flights to more than 12,000 passengers annually.

In 2000, Operations Director Todd Rust oversees 11 full-time pilots who fly 4 Cessna 206 Stationaires, 3 de Havilland Canada DHC-2 Beavers, and 1 DHC-3 Otter. Many can be equipped with floats, wheels, or skis.

RUTACA (RUTAS AEREAS, C.A.): Edificio Taller Mares, Aeropuerto de Ciudad Bolívar, Ciudad Bolívar, Venezuela; Phone 58 (85) 24010; Fax 58 (85) 25955; Year Founded 1977. RUTACA is founded at

Ciudad Bolívar in 1977 to operate domestic cargo charters to various Venezuelan destinations, especially on behalf of local mining companies. The initial fleet comprises 2 Convair CV-340s and 7 Douglas DC-3s. During the remainder of the decade, passenger charters are also undertaken.

In 1981, destinations served include Canaima Falls, Puerto Ordaz, and Margarita. Aircraft employed include 2 Cessna 340s, 1 Cessna 185, 1 Cessna 206, 4 DC-3s, 1 Britten-Norman BN-2 Islander, and 1 Hiller UH-12C helicopter. One CV-340 is restored in 1985 and is supplemented by a CV-440.

Contract services are maintained for the remainder of the decade and into the 1990s. By 1992–1996, the previous fleet has been largely replaced. During a scheduled local service on June 15, 1992, an EMB-110P1 with 14 passengers is hijacked.

By 1992–1996, the previous fleet has been largely replaced. During a scheduled local service on June 15, 1992, an EMB-110P1, with 14 passengers, is hijacked.

On September 8, 1997, RUTACA becomes an international airline when it initiates daily EMB-110P1 roundtrips from Porlamar, Barcelona, and Maturín to Port of Spain, Trinidad. It also increasingly visits local tourist destinations within its home country. DC-3 flights are often made from Porlamar to Canaima via Ciudad Bolívar.

Flights continue during 1998–1999 and in the latter year the fleet of Managing Director Rose Marie de Mares comprises 13 Cessna 206/T206s, 6 Embraer EMB-110 Bandeirantes, 4 Douglas DC-3s, 1 de Havilland Canada DHC-2 Beaver, 1 Cessna 207A, and 2 Antonov An-2s. Orders remain outstanding for several Cessna 208 Caravans.

In addition to its domestic schedules, the carrier now operates six flights weekly to Trinidad and Tobago, four flights to Grenada, and regular charter to Aruba, Martinique, and Curaçao.

A joint-venture agreement is signed by Vice President Capt. Eugenio Molina Anaya of RUTACA and Managing Director Capt. Gerry Gouveia of **Roraima Airways, Ltd.** on July 19, 2000 providing for twice-weekly dual-designator roundtrips between Cheddi Jagan International Airport to Puerto Ordaz, Caracas, Venezuela. The government of Guyana approves the route application in early September, clearing the way for the initiation of the new services. Employing a single Embraer EMB-120 Bandeirante, RUTACA opens the route on September 28. Roraima, for its part, provides ground handling and sales.

Just after takeoff from Ciudad Bolívar on the final leg of a flight from Canaima to Porlamar, Flight 225, a DC-3 with 4 crew and 20 passengers, will crash into a residential area in the El Peru area on January 25, 2001, hit a large tree, and burst into flames. There will be no survivors.

RUTAS AEREAS, S.A. *See* **RUTACA (RUTAS AEREAS, S.A.)**

RUTAS AEREAS UNICA, S.A.: Bolivia (1964–1969). RAU is set up at Cochabamba in 1964 to operate nonscheduled all-cargo services. Revenue flights to La Paz and other points begin with a single Curtiss C-46 Commando. Two more Curtiss freighters are acquired in 1965–1966.

A C-46F is lost at San Ramon, Bolivia, on June 3, 1967; there are no fatalities. Flights continue in 1968, but the company goes out of business in 1969, passing the two surviving Commandos to **Servicios Aereos Curtiss, S.A.**

RUTAS INTERNACIONALES PERUANAS, S.A. *See* **RIPSA (RUTAS INTERNACIONALES PERUANAS, S.A.)**

RUTLAND AIRWAYS: United States (1975–1977). In late 1975, Albert Greenwood sells his Rutland, Vermont-based FBO and its charter subsidiary to Lawrence Healy, who is determined to begin a scheduled commuter service. Employing Cessna 402s, Healy inaugurates daily roundtrips to Boston via Keene on May 25, 1976.

Financial difficulties are soon encountered and on January 17, 1977, Rutland Airways is forced to shut its doors.

RWANDA AIRLINES, S.A.: P.O. Box 3246, Kigali, Rwanda; Phone 250 (77) 564; Fax 250 (77) 669; Code 9R; Year Founded 1998. **Rwandair Cargo (Societe Nationale des Transportes Aeriens du Rwanda, S.A)** is slated to be liquidated in January 1998 and replaced with a new Rwanda Airlines. Before this changeover can be completed, the civil war in the Democratic Republic of the Congo reignites on August 2. Rwanda and Uganda back rebels who are fighting to overthrow DRC President Laurent Kabila. Rwanda, through this and other carriers, actively provides supplies to the insurgents.

Rwanda Airlines, S.A., outfitted with 1 each BAC 1-11-200 and Let L-410UVP, begins scheduled services during the third week of November from Kigali to Goma, as well as between several towns in the rebel-held eastern Congo.

Service is enhanced over the new two years and frequencies are initiated to Bumjumbura, Gisenyi, Kamemba, and Nairobi.

RWANDAIR CARGO (SOCIETE NATIONALE DES TRANSPORTS AERIENS DU RWANDA, S.A.): Rwanda (1994-1998). The state carrier **Air Rwanda (Societe Nationale des Transportes Aeriens du Rwanda, S.A.)** is reformed in 1994 and renamed, although it is still familiarly known as Air Rwanda. Juvenal Uwilingiyimana is both chairman and general manager and oversees a workforce of 250. The fleet holds but 2 aircraft: a Boeing 707-320C and a de Havilland Canada DHC-6-300 Twin Otter.

Both domestic and regional passenger and cargo services are provided linking the company's Kigali base with Bujumbura in Burundi as well as Ostende, Dar es Salaam, Entebbe, and Kinshasa.

As the nation recovers from the bloody events of the last few years, the airline, in 1995, withdraws its Boeing from service and operates only the Twin Otter, flying it between Kigali, Entebbe, and Nairobi.

While the Canadian turboprop continues service in 1996 and into 1997, executives from the new multinational **Alliance Air (African Joint Air Service)** recommend a new approach. During the summer of the latter year, they enter into negotiations with the governments of Rwanda, Uganda, and Tanzania, as well as **South African Airways (Pty.), Ltd.**, for the establishment of a new carrier to replace Rwandair Cargo.

Agreement on establishment of the new concern is arranged with Rwandan Minister of Transport and Communication Charles Ntakirutika on August 7. Under its terms, shareholding in the new carrier, which will hopefully begin flying in October, is divided between the Rwandan government (51%) and Alliance Air (49%). Mrs. F. Nkera is named general manager and plans are made to reintroduce jet equipment from Kigali and to fly to a number of destinations.

The initial date for start-up comes and goes, with the inauguration of services delayed for a variety of reasons.

In early January 1998, six Rwandese are selected and dispatched to Johannesburg for flight crew training. Rwandair Cargo, S.A. is simultaneously slated to be liquidated and replaced with a new **Rwanda Airlines, S.A.**

Finally, after months of delay, **Alliance Air Express, S.A.** inaugurates services to Entebbe, Nairobi, and Johannesburg on March 1, employing one each Douglas DC-9-32 and Boeing 737-200 leased from **Alliance Air (African Joint Air Service)**.

Before the Rwandair Cargo changeover can be completed, the civil war in the Democratic Republic of the Congo reignites on August 2. Rwanda and Uganda back rebels who are fighting to overthrow DRC President Laurent Kabila. Rwanda, through this and other carriers, actively provides supplies to the insurgents.

Rwanda Airlines, S.A., outfitted with 1 each BAC 1-11-200 and a Let L-410UVP begins scheduled services during the third week of November.

RYAN AIR. See **RYANAIR, LTD.**

RYAN AIR SERVICE: United States (1979-1996). Longtime non-scheduled operator Wilfred Ryan changes the name of his **Unalakleet Air**

Taxi to Ryan Air Service in late 1979 just prior to his launch of scheduled passenger and cargo services to destinations in western and southern Alaska. Revenue flights begin in December linking the company's base with Anchorage, Iliamna, McGrath, Galena and other regional destinations. In 1980, a feeder agreement is signed with **Wien Air Alaska**.

In 1983, Ryan purchases and absorbs pioneer **Munz Northern Airlines** and begins a period of expansion. Employing a fleet of 2 Beech 99s, 2 Cessna 402s, 5 Cessna 207s, 4 Britten-Norman BN-2 Islanders, and 1 Piper PA-23 Aztec, the company establishes its major bases at Nome, Kotzebue, Unalakleet, Iliamna, and Anchorage.

From these locations, flights are undertaken to Ambler, Anchorage, Brevig Mission, Buckland, Deering, Elim, Galena, Gambell, Golovina, Iliamna, Kakhonak, Kiana, Kivalina, Kobuk, Kotzebue, Koyuk, McGrath, Noatak, Nome, Nondalton, Noorvik, Pedro Bay, Point Hope, Pope Vancy, Port Alsworth, Port Clarence, St. Michael, Savoonga, Selawik, Shaktoolik, Shismaref, Shungnak, Stebbins, Teller, Tin City, Unalakleet, Wales, and White Mountain. In October, a feeder agreement is signed with **Alaska Airlines**.

A Beech 1900 is acquired in 1984 as the feeder relationship ends with failed **Wien Air Alaska**. At this point, the company has 30 aircraft, 100 employees, and revenues of \$8.2 million.

While landing at Koyuk on February 7, 1985, a Cessna 207A freighter and its pilot strikes a snowmobile on the runway, killing the driver.

During the summer, the founder is profiled by Paul Laird in his "Nice Guy Finishes First," *Alaska Business Monthly* (July 1985): 28-32.

Caught in ice, rain, and snow while on approach to Napaskiak on December 15, a Cessna 207A with a pilot and three passengers, attempts to divert elsewhere; after applying power, the aircraft stalls and crashes. All aboard are seriously injured.

Operational difficulties continue to plague the carrier in 1986.

While en route from Nome on February 11 to transport a dentist and his assistant to area villages on behalf of the U.S. Health Service, a Cessna 207A crashes into a mountain at the 650-ft. level, scattering wreckage a distance of 493 ft. Both medical personnel and the pilot are killed.

Turning to avoid high voltage power lines at Saint Mary's on June 16, a Cessna 207A loses control and crashes, killing its pilot.

By 1987, President Robert Dodd has increased his fleet by the addition of one Beech 1900, three Cessna 208s, and a de Havilland Canada DHC-6-300 Twin Otter. One Beech 99 is withdrawn.

While on final approach to Homer on a November 23 service from Kodiak, Flight 103, a Beech 1900C with 2 crew and 19 passengers, suffers a sudden shift in its center of gravity, causing a loss of control. The turboprop descends steeply, strikes the airport perimeter fence, and slides to a stop on its belly. The aircraft is destroyed and 18 aboard die. The disaster causes the airline to become the subject of a FAA safety investigation.

As a result of the FAA check, Ryan voluntarily suspends operations on January 30, 1988 and files for Chapter XI bankruptcy, pointing to difficulties encountered as the result of overexpansion. This move causes code-sharing partner **Alaska Airlines** to drop its affiliation.

The FAA review clears Ryan to resume operations and another Beech 1900 is added, along with 10 Cessna 402s, just before it begins flying again in April. Founder Wilfred Ryan retires as the company is again briefly grounded until October 1.

In 1989, the Twin Otter and 1900s are withdrawn by new Chairman Ralph Stemp, along with seven Cessna 402s.

In April, RAS is one of five Alaskan air carriers subpoenaed by the DOJ to provide information in an investigation of possible antitrust violations in the airline industry.

Together with **Peninsula Airways, Frontier Flying Service, Reeve Aleutian Airways**, and **Alaska Airlines**, Ryan is required to supply documents dating back to January 1, 1984 to a May 9 grand jury session or forward them directly to Washington. Although the airline subpoenas do not name a target, the May 6 issue of the *Anchorage Daily News* reports the subject is **MarkAir**.

While on approach to Nome on August 7, Flight 2401, a Cessna 401

with just its pilot aboard, disappears. Four days later, wreckage is found 18 mi. W of the airport and the flyer is dead.

Operations in **1990** are conducted with 3 Cessna 402s and 9 Cessna 207Cs.

A total of 20,659 passengers are flown.

Two more Cessna 402s and two Cessna 207Cs arrive in **1991**.

Customer bookings decline to 16,045. On the other hand, a total of 7,943,000 pounds of mail is flown.

Airline employment in **1992** stands at 65 and passenger boardings jump 16% to 18,562. In **1993**, Chairman Stemp and President Michael McKinnon oversee a workforce of 65 and operate a fleet of 5 Cessna 402s and 11 Cessna 207Cs.

Customer bookings accelerate 9% to 20,183.

Operations continue apace in **1994** as passenger boardings increase 34% to 26,955. A total of 444,000 FTKs are operated.

Flights continue in **1995** and in **1996** the company is reformed into **Arctic Transportation Service**.

RYAN AIRLINES. See **LOS ANGELES-SAN DIEGO AIR LINE**

RYAN EUROPEAN AIRWAYS, LTD.: United Kingdom (1986–1990). Established at London (CTN) in February **1985**, **London European Airways, Ltd.**, under the leadership of Managing Director N. R. Harford, purchases **Euroflite, Ltd.** from McAlpine Aviation in June. Late in the year, flights begin to Brussels. Unable to swallow the **Euroflite, Ltd.** merger and taking big financial losses on its new service, LEA in April **1986** is forced to lay off its 50 employees and cease trading.

Late in the year, the company's assets are acquired by the independent Irish carrier **Ryanair, Ltd.** Reformed by Chairman Cathal Ryan as a sister airline, Harford's former airline will operate flights to the north of London and charters to Amsterdam and Brussels as **Ryan European Airways, Ltd.** for the next four years. The carrier flies a BAe (ROM-BAC) 1-11-561RC chartered from **Tarom (Transporturile Aeriene Romane)**.

In November **1990**, Ryan European receives back its previous London European Airways, Ltd. moniker. Operations continue with a British Aerospace BAe 111-518FG and a 111-476FM, the latter leased from **Ryanair, Ltd.**

RYAN INTERNATIONAL AIRLINES: 6810 West Kellogg, Wichita, Kansas, 67209-2218, United States; Phone (316) 942-0141; Fax (316) 942-7949; <http://www.ryanintl.com>; Code 11; Year Founded 1973. Ryan Aviation is established by Ronald D. Ryan at Wichita, Kansas, in **1973** as an FBO engaged in aviation maintenance, sales and service. In addition, an FAA Part 135 air transport division, established in 1968 as **DeBoer Aviation**, named for real estate developer Jack DeBoer, is also acquired. Beginning on March 3, Chief Pilot Ryan undertakes Learjet passenger and small group charter flights. Soon thereafter, partner DeBoer is bought out.

In **1978**, the company begins a 20-year association with **Emery Express** by flying seven Cessna Citation Is in Emery's experimental overnight express operation.

In **1981**, Emery seeks Ryan's assistance in choosing a larger aircraft and settles upon the B-727, purchasing a fleet of eight Dash-100Fs. Simultaneously, it signs a 3-year contract with Ryan to operate the trijets; the deal is dependant upon Ryan's upgrading to an FAA Part 121 certificate within just 90 days. The paperwork is quickly completed.

In **1982**, the company, having first sold **Emery Express** on the concept, approaches the CAB for authority to launch B-727-100 passenger charter flights to Las Vegas from eight domestic locations. After a year's wait, the carrier is certified in **1983** to offer domestic and regional international flights, especially inclusive-tour services.

As Ryan Aviation doing business as Ryan International Airlines, President Ryan acquires two B-727-151C passenger airliners and begins

flights, on behalf of Tom Wainwright's Flying Vacations, to the Caribbean from Philadelphia and other cities in the Northeast.

While the effort to provide passenger charters is getting under way, Ryan is approached by **UPS (United Parcel Service)**, which seeks a carrier to transport cargo on its behalf. A contract similar to that with **Emery Express** is signed.

A total of 92,000 passengers are flown on the year.

The recession causes Ryan to have a very bad **1984** as enplanements fall to 32,536.

Following the crash of an Arrow Air DC-8 in Newfoundland in **1985**, the U.S. government contracts with Ryan International to fly NTSB investigators, the press, and family members to the disaster scene. The passenger traffic situation is reversed as customer bookings increase a very welcome 80.4% to 166,000.

When **UPS (United Parcel Service)** elects to acquire the first purpose-built B-757Fs in early **1986**, Ryan is chosen to operate them. Shortly thereafter, UPS decides to fill its aviation requirements in-house and begins its own airline. Ryan assists with the transition.

In August, Ryan Aviation the FBO and Ryan International Airlines are sold to the Maryland-based PHH group for \$16.8 million. Ryan is required to "retire" from the aviation business for a period of three years. The cargo contracts with **Emery Worldwide** and **UPS (United Parcel Service)** are maintained; however, customer bookings fall again, down to 124,347. Profits move ahead to \$1.06 million (operating) and \$604,560 (net).

Airline employment grows by 28.3% in **1987** to 340 as the carrier begins to exit the passenger charter business to fly cargo exclusively for **UPS (United Parcel Service)**. The fleet now includes 8 B-727-100s and 8 B-727-100Fs. Company pilots begin to fly five UPS-owned B-757-24APFs in September.

Late in the year, **UPS (United Parcel Service)** informs its contract partners that it will provide its own airlift, beginning during the next year.

Freight traffic jumps 51.5% to 94.01 million FTKs while revenues swell 51.5% to \$16.9 million. Expenses climb an equal 51.5% to \$15.29 million and allow an operating profit of \$1.6 million. Net gain grows to \$916,000.

Following an accident early in **1988**, Ryan briefly suspends services. At this point, PHH elects to retire from the airline business and Ryan is contacted concerning the possibility of reacquiring the carrier.

Bookings in the final year of passenger flying total only 10,700.

In February **1989**, Ronald Ryan buys back the FBO and airline (including the FAA Part 121 certificate) and enjoys renewed success that brings a demand for additional capacity. **Emery Express**, which has meanwhile won a contract to fly express mail for the U.S. Postal Service, offers Ryan the opportunity to provide its lift. Again, there is an Emery-instigated hitch: eight DC-9Fs and nine B-727Fs must be transferred to Ryan's certificate within two weeks of contract signing. Again, the paperwork is successfully expedited.

At the end of December, financially troubled **Orion Air**, which is also under contract to Emery, is shut down by its owners, The Primark Corporation.

Emery in January **1990** purchases assets from Orion Air, leasing the aircraft acquired to Ryan. The Ryan fleet now includes 34 B-727s and 8 DC-9-10Fs, including one of each type from **Orion Air**. All are painted in the colors of the clients served. Traffic figures are maintained in confidence.

The **Orion Air** package had included assumption of that carrier's 10-year postal subcontract with **Emery Worldwide**, begun the previous April. Employing dedicated DC-9-10Fs and B-727-100Fs painted in U.S. Postal Service colors, Ryan flies overnight Express Mail from the semi-public agency's hub at Indianapolis.

Not having been deiced, Flight 590, a DC-9-15RC with two crew, stalls during its February 17, **1990** takeoff from Cleveland, rolls 90 degrees, and cartwheels down the runway; the freighter is destroyed and both of its flyers are killed.

Following Iraq's invasion of Kuwait and the deployment of Allied

forces to Saudi Arabia in Operation Desert Shield, Ryan takes over the Post Office's D-net operations, a daytime sort operation that it will operate for the duration of the Persian Gulf War. This year, statistics are again held in confidence.

Operations continue apace in **1991** as passenger charter flights resume. The fleet is upgraded by the addition of five former **United Airlines** B-727-22Fs, including one named *Judy Carmine* and another named *William F. Bolger*.

After its No. 3 engine suffers an uncontained failure, the takeoff of a B-727-22QC with three crew is aborted from Hartford-Bradley International Airport on May 3. Debris penetrates fuel, oil, and hydraulic lines, starting a fire that destroys the aircraft; there are no casualties.

The owned and provided fleet includes 33 aircraft in **1992** and a new South Pacific operation is inaugurated when a B-727-51C is based at Saipan to fly fish to Japan for the Ting Hong Oceanic Enterprise.

The airline now agrees to assist **Morris Air Services** (under contract) in the inauguration of its own airline operation. In March, an application is filed by Ryan with the DOT seeking authorization to resume charter and scheduled services with four DC-9-15RCs, including twice-daily roundtrips from Charlottesville, Virginia, to Newark.

In June, Ryan begins to operate **Morris Air Services** B-737s, which have been transferred to Ryan's certificate, but which are painted in MAS livery. It also provides Morris with pilot training, personnel recruitment, acquisition of a Part 121 certificate of its own, and transition from Ryan's certificate to its own.

A total of 449,000 charter passengers are flown, revenues are \$26.2 million, and a \$26.2-million operating profit is realized.

The workforce is cut 21.4% in **1993** to 473 and the fleet includes 6 B-727-51Cs, 5 B-727-22Cs, 4 DC-9-15RCs, 2 B-727-151Cs, and 1 each B-727-76F, B-727-77C, B-727-82C, B-727-172C, and 1 DC-9-15MC.

The entire 22-unit is flown on behalf of **Emery Worldwide**. In addition, two B-737-3A4s are subleased from **American Airlines** and one each B-737-3Q8 and B-737-3T5 are chartered from **Aer Lingus Irish Airlines, Ltd.** The **Morris Air Services** contract is concluded in January.

During the spring, a five-year contract is signed with the tour contractor Apple Vacations in hopes of boosting passenger charter operations. The new B-737s are, meanwhile, operated on passenger services over the new Virginia-New Jersey route.

On July 1, **Emery Worldwide** arranges with Ryan to operate its new U.S. mail award under a subcontract. Ryan, which has carried mail for Emery for nearly four years under an earlier subcontract, will, as a result of this new deal, be able to create 30 more jobs in Wichita by year's end.

The U.S. Postal Service's new logo is introduced in October, painted on the tail of an Emery B-727-51C. When the winter season begins on November 1, tour and charter flights on behalf of Apple Vacation are inaugurated from the northern U.S. to the Caribbean, Florida, and Mexico.

On the year, the overall number of customers boarded declines 81.3% to 83,140. Cargo swells 20.6% to 41.15 million FTKs. Revenues almost double to \$49 million and expenses are \$3 million less. As a result, a \$3-million operating profit is generated as is a \$3-million net gain.

Airline employment is increased by 4.6% in **1994** to 505 and in January, Ryan Aviation Corporation, the expanded but original FBO operation, is sold. Ryan's enterprise becomes simply Ryan International Airlines. The Apple Vacation charters cease on May 1.

When the attempt at scheduled service does not succeed, the chartered B-737-300s are all replaced with a single B-737-448 leased from **Aer Lingus Irish Airlines, Ltd.** The dry-lease use of foreign aircraft during their off seasons for passenger charters will become company policy as first a three-year and then a five-year contract is signed with the Irish line. Meanwhile, plans are made to grow freight traffic by purchasing for conversion a fleet of eight former **United Airlines** B-727-22Cs.

Employing Irish aircraft, the company renews its Apple Vacation services with the start of the new fall schedule on November 1.

Passenger bookings fall another 9.8% on the year to 73,053, but freight jumps 40.2% to 57.71 million FTKs. Revenues swell 4.6% to

\$53.03 million and expenses climb 8.9% to \$50.8 million. Consequently, pretax profit totals \$2.95 million.

The workforce is increased by 28.7% in **1995** to 650. On behalf of the National Fisheries Corporation, a company trijet, beginning on August 1, hauls freshly caught tuna to Guam from the islands of Palau, Pohnpei, Truk, and Yap. From there, it is forwarded to Japan.

On October 1, the company begins flying passenger charters for Gold Transportation, operating a leased **Aer Lingus Irish Airlines, Ltd.** B-737-448 from Atlantic City, New Jersey, to some 55 cities in the eastern U.S.

Passenger traffic suffers a drop of 20.5% to 58,000 enplanements. Cargo, on the other hand, increases 60.4% to 94.38 million FTKs. Revenues far exceed costs and there are profits: \$3.81 million (operating) and \$3.82 million (net).

There is no change in the employee population during **1996**. The Irish Boeing is retained.

In the wake of the May **Valujet Airlines** disaster, Ryan International, like many similar U.S. carriers, becomes the subject of intense safety scrutiny by the FAA. Some irregularities are found and the company is grounded for a time during the third quarter.

A contract is entered into with Star Tours to fly sports and celebrity tours. Among the teams and performers initially transported are the Chicago Bulls NBA basketball teams and the rock groups U-2 and the Rolling Stones. Lift is provided with two B-727-200s and two B-727-100s provided by the tour operator.

Still, customer bookings skyrocket 201.7% to 175,000 and 126.1 million FTKs are operated, a 33.6% increase. Difficulties do, however, have a financial impact as operating income dips 0.2% to \$55.54 million. Expenses total \$51.98 million and profits decline slightly; an operating gain of \$4.16 million is generated, along with a net profit of \$4.36 million.

The workforce is cut by 7.7% to 600 during **1997**.

During takeoff from Aruba for Cincinnati on January 18, the **Aer Lingus Irish Airlines, Ltd.** B-737-448 with 8 crew and 148 passengers, blows the No. 1 tire; the aircraft circles the airport for three hours dumping fuel before making a safe emergency landing. One passenger is seriously injured during the subsequent chute evacuation.

During the spring, the decision is taken to operate a significant number of passenger charters the following winter. Contracts are signed with the tour operators Apple Vacations and Trans Global Tours and four Airbus Industrie A320-214s are leased, painted in the colors of the travel concerns.

Flights commence from Minneapolis (MSP) and Chicago on October 1 to destinations in the southern U.S., Mexico, and the Caribbean.

Flight 607, a B-727-51C with two crew, collides with an airport shuttle bus while taxiing for takeoff from Denver on October 1; neither flyer is hurt nor are two passengers on the bus, although the driver receives minor injuries. The nose section of the airplane is destroyed while the left front portion of the bus is damaged and the windshield is knocked out. It is later reported that the bus driver did not see either an intersection stop sign or the approaching Boeing.

Although passenger boardings are up 29.7% to 227,000, freight dips 1.8% to 123.81 million FTKs. Operating revenues increase 8.7% to \$74.96 million, while expenses are up 9.1% to \$70.67 million. The operating gain improves to \$4.28 million, while the net profit rises to \$4.56 million.

During the first quarter of **1998**, the Apple Vacations contract is renewed. RIA is also awarded a charter contract from SunTrips to operate roundtrip flights from Los Angeles to various points in Mexico. The service had previously been operated by **Allergo Air, S.A. de C.V.** employing a wet-leased **Skyservice Airlines, Ltd.** A320-231. Until Ryan takes up the new arrangement, the Canadian Airbus wears "Skyservice USA" titles on its forward fuselage.

Employing a pair of DC-10-10s leased from **Airtours International Airlines, Ltd.**, Ryan, in May, begins to operate Hawaiian charters. One contract, from Los Angeles, is flown on behalf of Sunquest, while the second, from San Francisco, is operated for SunTrips.

In an election supervised by the NMB on August 20, 72% of the car-

rier's 306 pilots voted for union representation by ALPA, thereby becoming the 50th pilot group represented by that union.

At the beginning of the winter charter season in November, an A320-214 is leased from **Flying Colours Airlines, Ltd.** Wearing a pure white color scheme with a large apple painted on its tail, the Airbus is operated on behalf of Apple Vacations from cities in the northern U.S. to the Caribbean, Costa Rica, and Mexico.

Also in November and continuing into the spring of 1999, Ryan operates an extensive program of package tours on behalf of Trans Global Tours doing business as Trans Global Vacations. Ryan provides lift from Minneapolis (MSP) and the upper Midwest to Florida, Mexico, the Caribbean, and Las Vegas employing a pair of A320-231s leased from **Britannia Airways, Ltd.** and one each B-747-448 and B-747-4Y0 chartered from **Aer Lingus Irish Airlines, Ltd.** and **Pegasus Airlines, A.O.**, respectively. All of the planes wear gray upper and navy blue lower fuselages separated below the window lines with a yellow cheatline. Each forward fuselage wears Trans Global titles and the navy blue tails host the lessors' logos.

For all of 1998, customer bookings skyrocket 550.7% to 1,477,000.

Cargo traffic also is dramatically up, having ballooned 140.1% to 259.17 million FTKs. Revenues surge 126.7% to \$169.92 million, while expenses are held to \$162.72 million. Operating profit climbs to \$7.2 million, while the net gain reaches \$7.8 million.

Airline employment has been increased by 8.3% by the beginning of 1999 to 650. Jeffrey C. Crippen is promoted to the company's presidency in September.

At the beginning of the winter holiday schedule at the end of October, the company charters the B-737-448 *St. Caimin* from **Aer Lingus Irish Airlines, Ltd.** and operated on behalf of Apple Vacations. The "Baby Boeing" wears the Irish line's colors, with Apple Vacation titles (Ryan is not visibly mentioned). At the same time, three Airbus A320-231s are chartered from the new **JMC Airlines, Ltd.** to fly winter holiday flights from the upper Midwest to the Caribbean on behalf of Trans Global Vacations. A B-737-4Y0 subleased from **TAESA (Transportes Aereos Ejecutivos, S.A. de C.V.)** is also employed for the TGV program.

Just before Christmas, a former **Southwest Airlines** B-737-2H4 is acquired to fly gambling charters to Atlantic City; the aircraft is painted bright orange with a blue fleur-de-lis on its tail.

Customer bookings plunge 25.1% to 1,106,000, while freight drops 19.3% to 88.77 million FTKs. Revenues rise 4.5% to \$177.64 million, while expenses are up 5.6% to \$171.84 million. The operating profit falls to \$5.8 million, while the net gain is down to \$6.41 million.

Airline employment at the beginning of 2000 stands at 1,132, a 9.9% increase over the previous 12 months. The majority of the **Emery Worldwide** Boeing 727F fleet is now leased to Ryan. On its behalf, Ryan now operates a major U.S. Postal Service contract employing 5 Dash-51Cs, 1 Dash-51C, 5 Dash-22Cs, 1 each Dash 134C, Dash-76C, Dash-77C, Dash-82C, and 3 Dash-223F, all in USPS livery. In Emery Worldwide livery, Ryan flies 4 Dash-21Cs, 8 Dash-222Fs, and 3 Dash-225Fs. The company also operates 2 B-737-2H4As in its own colors, plus 1 chartered B-727-243A flown on behalf of the **Skyservice Airlines, Ltd.** subsidiary Sport Hawk International Airlines, Ltd.

The JMC aircraft are returned at the end of March, while the *St. Caimin* returns to **Aer Lingus Irish Airlines, Ltd.** in May. In late July, the two DC-10-10s operated on behalf of Skyservice USA are re-registered. One loses its Skyservice USA identity on October 5 when new SunTrips titles are applied at Manchester.

With the beginning of the winter schedule on October 29, one B-757-28A, one B-757-2Y0, three A320-214s, and one A320-231 are leased to Apple Vacations in the U.S. by **JMC Airlines, Ltd.**; they will be operated from Chicago (ORD) by Ryan International for the tour operator until March. A chartered **Futura International Airways, S.A.** B-737-4Y0 is also based at Philadelphia to operate twice-weekly charters via Baltimore (BWI) to Nassau. It is joined by an **Aer Lingus Irish Airlines, Ltd.** B-747-448.

Apple Vacations also obtains the services of a second Aer Lingus B-737-448 that flies from Baltimore (BWI) to the Caribbean beginning on December 17. At this time, the company also operates a DC-10-10, chartered from **Airtours International Airlines, Ltd.** on behalf of the tour operator Sun Trips.

Passenger boardings during these 12 months ascend 3.62% to 1,146,000. Cargo traffic plunges 41.64% to 51.8 million FTKs.

RYANAIR, LTD.: Dublin Airport, Dublin, Ireland; Phone 353 (1) 844-4489; Fax 353 (1) 844-4402; <http://www.ryanair.com>; Code FR; Year Founded 1985. With Ir£1 capitalization, privately owned Ryanair, Ltd. is formed at Dublin in May 1985 by Cathal, Declan, and Shane Ryan, the three sons of Dr. Anthony Ryan, chairman/CEO of Guinness Peat Aviation, Ltd., to offer scheduled commuter flights to the U.K.

Employing a single Embraer EMB-110P1 Bandeirante, weekday return service between Waterford Airport in southeast Ireland and London (LGW) is inaugurated on July 8 under the direction of Christy Ryan (no relation), who has the post of director of operations. During the remainder of the year, the company's 57 employees are able to provide for the transport of 5,000 passengers over its single route.

Although load factors are said to be satisfactory, income is insufficient to cover the tiny commuter's costs. Rather than close their doors in the traditional manner, the Ryans elect to upgrade their concern with new routes and equipment. They also believe they will be successful if they are able to lower fares, then averaging Ir£209 one-way from Dublin to London. To bring about the change and to create the first European airline to offer low fares on short-haul intra-European routes, GPA executive Eugene O'Neill is named CEO with Declan Ryan as chief operating officer.

Two British Aerospace BAe (HS) 748-B2s are purchased and inaugurate Ir£94.99 roundtrip frequencies from Dublin, Cork, and Shannon to London (CTN) on May 23, 1986. Traffic is so promising that a BAe 111-525FT is leased from **TAROM (Transporturile Aeriene Romane, S.A.)**; christened *The Spirit of Ireland*, it is placed on the service in October.

The British regional commuter **London European Airways, Ltd.** is acquired late in the year allowing service extensions to Knock, Amsterdam, and Brussels under the name **Ryan European Airways, Ltd.** Three more BAe 111-525FTs are acquired from **TAROM (Transporturile Aeriene Romane, S.A.)**, along with two BAe (ROMBAC) 1-11-561RCs. Orders are placed for two Avions de Transport Regional ATR42-300s. Charters are also offered to various European holiday destinations. Enplanements for the year total 82,000.

Airline employment at the beginning of 1987 stands at 120. The Irish independent, while still refusing to release statistics, takes delivery of its first ATR42-320 and expands its route network to 10 cities. Orders are placed for two Airbus A320-200s. Passenger boardings increase 83.2% to 681,904 and freight skyrockets 163.5% to 557,000 FTKs.

The workforce is increased by 14.5% in 1988 to 435 and the fleet now includes 6 BAC 1-11-500s, 2 BAe (HS) 748-B2s, 1 ATR42-320, and 1 Bandeirante.

Services continue without change, although another ATR42-320 is acquired and three BAC 1-11-500s are progressively retired. During the year, the **Aer Lingus Irish Airlines, Ltd.** routes from Dublin to Liverpool and Munich are taken over. In October, former **HeavyLift Cargo Airlines, Ltd.** President Patrick "P. J." McGoldrick is appointed CEO, with a mandate to turn around the financially troubled company.

Enplanements total 678,034, but Ryanair and Ryanair European together lose Ir£8 million.

Airline employment is increased by 22.3% in 1989 to 400 and orders are placed for two Airbus Industrie A320-211s. One of the BAe (HS) 748-B2s is retired and the fleet is expanded by the addition of a third ATR42-320.

McGoldrick reorganizes Ryanair, Ltd. into five individual companies: Dublin-based Ryanair, Ltd., **Ryanair European Airlines, Ltd.**, the former **London European Airlines, Ltd.** based at London (CTN), Ryanair Engineering, Ltd., Ryanair Fleet Management, Ltd., and Ryanair Tours

and Leisure, Ltd. The latter two endeavors are placed under the leadership of Decian and Cathal Ryan, respectively.

Munich joins the route system and several new services are initiated to the U.K., as well as to the new airport at Knock, developed by a Roman Catholic priest.

The year's passenger boardings climb 7.1% to 729,853 and freight is up a nearly equal 7% to 37.58 million FTKs. Still, Ryanair has lost Ir£20 million during its first four years.

Company employment is cut 18.2% in 1990 to 400 and all aircraft except the ATRs and BACs are retired; an ATR72-310 is ordered. The first A320-211 is delivered in February. Twice-daily flights are inaugurated in August from Dublin to London (STN). As the company continues to emphasize regional flights, its passenger traffic increases.

Through the first nine reported months, customer bookings ascend 7.4% to 625,859.

In November, the subsidiary **Ryan European Airways, Ltd.** resumes operations as **London European Airways, Ltd.** The fourth quarter is disastrous, largely because of the dramatic increase in fuel prices following Iraq's August 2 invasion of Kuwait and the subsequent recession in the U.K. The workforce must be cut by 9% (46 employees) and services are dropped on October 15 between Dublin and Coventry and from Knock to Manchester. Frequencies are reduced on routes from London to Shannon, Sligo, and Donegal and one ATR42-320 is leased out for the winter. With the Irish economy stagnant and no growth in passenger traffic, the Ryan family investment is in the red.

During January 1991, negotiations are completed with **British Northern Airways, Ltd.** to take over that fledgling's April delivery position for two ATR72-310s. The fleet in spring comprises three chartered ATR42-320s (with orders outstanding for four more), one of which is leased out to **Hamburg Airlines, GmbH.**, and six BAC 1-11-500s, two of which are chartered from the Romanian state carrier **TAROM (Transporturile Aeriene Romane, S.A.)**.

GPA magnate Dr. Ryan now dispatches his personal assistant, Michael O'Leary, to work with Managing Director Goldrick to create a restructuring and recovery plan. The two closely monitor the activities of the U.S. carrier **Southwest Airlines (2)** and decide to adapt its low-fare, no-frills philosophy to Europe, while meanwhile rationalizing the fleet and cutting costs.

The Irish government also agrees to assist the independent, ending all competition on Irish routes for the next three years. The company is now reorganized; Ryanair Holding, Ltd. becomes the corporate entity, with the airline Ryanair, Ltd. as its subsidiary.

When the recovery program begins implementation, Ryanair cuts out meal service, complementary newspapers, bans smoking, reduces cleaning, maintenance, and even in-flight magazine costs. The workforce is reduced to 350.

Despite the effect of the Gulf War on European transport early in the year, enplanments during these 12 months total 540,000 and a \$431,000 profit is generated, roughly 30 pence a passenger. After continuous downturn, this first-ever gain is a welcome relief.

Declan Ryan becomes managing director in 1992. The three ATR42-320s are returned to their lessor as the Irish line becomes an all-111 operator. The BACs are now painted in a new color scheme. Low-fare, no-frills services are now provided to Dublin, Liverpool, London (CTN and STN), Cork, Galway, Kerry, Knock, Waterford, and Shannon. A number of unprofitable routes are closed.

In March, the carrier signs a sales and marketing agreement with AMR Services Corporation, the marketing division of **American Airlines**. Under terms of the arrangement, the American major will promote the Irish carrier's London to Dublin service in the U.S.

Ryan also agrees to purchase SABRE reservations services from another American subsidiary.

On June 16, the carrier becomes the **American Airlines** feeder at London (STN) when the U.S. major begins daily service to that airport from Chicago (ORD).

Passenger boardings this year increase 46% to one million and profit reaches \$1.25 million.

Airline employment in 1993 stands at 440. The fleet, which now includes one each B-737-2E7A and B-737-212A, is increased by the addition of four B-737-204As leased from **Britannia Airways, Ltd.** In addition to charter and domestic and U.K. flights, scheduled services are introduced to Munich.

Traffic information is no longer provided; however, it is noted that the company enjoys identical \$3-million operating and net profits. When the European Commission approves an Irish government financial aid package for **Aer Lingus Irish Airlines, Ltd.** during the fourth quarter, Ryanair files suit to block it.

A multiyear contract is signed with FLS Aerospace, Ltd. in January 1994 for the heavy maintenance work required to be performed on its aircraft fleet. During the spring, a new aircraft livery is introduced and two more Britannia B-737-204As are chartered. Arrival of the small Boeings permits an orderly retirement of the BAC 1-11s. In May, frequencies are initiated to Manchester and Prestwick in competition with **Aer Lingus Irish Airlines, Ltd.**

Two B-737-2K2As, a B-737-2T5A, and a B-737-212A are leased from **Transavia Airlines, N.V.** in September.

On October 1, citing cost, the airline terminates its agreement with the SABRE reservations system.

The company's staff now exceeds 500 and they assist 1.5 million travelers to make their connections this year. Revenues advance by 8.2% to \$53.03 million while expenses shoot up 8.9% to \$50.08 million. There is an operating surplus of \$2.95 million and a net gain of the same figure.

In early 1995, company leaders attempt to persuade **British Airways, Ltd. (2)** to take a stake; the British flag carrier considers the plan, which would have it turn over a number of B-737-236s rather than cash. The arrangement falls through late in the year. Former **Continental Airlines** David Bonderman purchases 20% shareholding and the Ryan family reduces its stake to 62%, with the remaining 18% held by Mr. O'Leary.

At Dublin, seat selection is abandoned; free-seating speeds up boarding and only 12 check-in desks are required. In its tenth anniversary year, Ryanair becomes the largest passenger carrier (in terms of numbers) on the Dublin-London route and indeed the largest Irish carrier on every route it operates.

Although it continues to employ travel agents and to issue tickets, like the new London (CTN)-based **easyJet, Ltd.**, Ryanair also begins to emulate **Southwest Airlines (2)** and to sell certain amenities and souvenirs. Unlike easyJet, it does, not, however, sell peanuts (food is seen as messy, requiring too much time to clean aircraft). Rather, emphasis is placed on the selling of drinks. Ryanair will reap a pretax profit of Ir£1 per passenger on its flights, all of it coming from onboard sales.

In December, the company begins flying from London (STN) to Prestwick Airport in Scotland. As part of the advertising surrounding this service launch, two of the Boeings receive new color schemes that include a Scottish tartan scarf and a wide-toothed smile.

Passenger boardings this year total 2.3 million. As a result of accounting procedures, net profit will be restated from Ir£5 million to Ir£12 million.

Airline employment stands at 680 in 1996 and the all-"Baby Boeing" fleet includes 1 each B-737-2E7A, B-737-2T5A, B-737-212A, and 2 B-737-2K2As.

Having failed to gain access to BA equipment, Bonderman turns to **Deutsche Lufthansa, A.G.**, which readily agrees to the lease of 6, later 12, B-737-230As. As part of the arrangement, DLH receives a number of maintenance contracts for its Lufthansa Technik subsidiary.

During the fall, the company introduces the "logojet" concept of **Western Pacific Airlines (Westpac)** to Europe. A B-737-204A is given a special Jaguar promotional color scheme, finished in classic British racing green and silver with the outline of the automaker's big cat on the gray forward fuselage.

During the year and with an Ir£2.8 million (\$3.3 million) grant from the Irish government, Ryanair Direct is established as a telemarketing

company. The new concern quickly begins to redirect passengers to the call center from traditional travel agents.

Enplanements these 12 months rise to 3.3 million. Revenues advance 24% to Ir£136.4 million, while costs ascend by 25% to Ir£112.7 million. The operating gain jumps 23% to Ir£23.7 million, while net profit climbs 24% to Ir£26 million (\$38.9 million).

Full European Union air transport deregulation in 1997 will open the door for Ryanair to freely expand its services to the Continent, becoming the first low-fare airline to offer scheduled return services from Ireland and the U.K. Plans to increase the number of German Boeings in the fleet by five proceed; to promote St. Valentine's Day, a B-737-2T5 is painted with hearts, kissing lips, and cupids and is given titles as "The Love Plane." At the beginning of the second quarter, another "logojet" is unveiled; painted in a bold blue-and-orange livery not unlike that of the new British low-fare carrier **easyJet, Ltd.**, the color scheme promotes the U.K. tabloid newspaper *The Sun*, noted in the titles as "SuperSonic."

In the spring, a computerized planning and support package is purchased from **Crossair, Ltd.** On May 1, the company's "Baby Boeings" inaugurate thrice-daily service from Dublin to Beauvais Airport, north of Paris, and thrice-daily roundtrips from Dublin to Brussels South at Charleroi. A new twice-daily route is opened the same day between Kerry and Bristol.

Also in May, Ryanair is floated on the New York (Nasdaq) stock exchange, with an initial valuation of \$500 million. The public flotation brings in excess of Ir£64 million. With overall market valuation capitalization of Ir£300 million, Ryanair is converted into a public limited company. (As with **Aer Lingus Irish Airlines, Ltd.** and **British Airways, Ltd. (2)**, the company in this profile and elsewhere will be referred to as Ryanair, Ltd., rather than dividing it into pre- and post-public sections.)

At this point, a modest profit-sharing plan is introduced for the carrier's 700 employees, who are also permitted to become shareholders.

On June 12, daily Kerry to London (STN) service is launched, along with a twice-daily roundtrip route from London (STN) to Skavsta Airport, just south of Stockholm, and on to Oslo.

It is announced on July 25 that it will undercut, beginning at the end of October, the popular winter fares of **Aer Lingus Irish Airlines, Ltd.** from Dublin to Britain and the Continent. For example, roundtrip fares for two people from Ireland to Paris or Brussels is pegged at Ir£99, while a similar service from Dublin to London (STN) will cost customers just £79.

While taking off from London (STN) on a scheduled September 30 service to Dublin, a company B-737-200 comes within 200 ft. vertically and 0.91 nm. horizontal distance from an **Air U.K., Ltd.** jetliner that is descending into London (CTY) after a service from Edinburgh.

On November 15-16, the carrier puts on 32 extra flights from Dublin to Brussels to ferry soccer fans to and from Ireland's World Cup playoff match against Belgium. Over 5,000 fans are transported on the weekend.

Later, a B-737-230A joins the fleet from Germany, painted in the bright red and white corporate livery of sponsor Kilkenny, "the Cream of Irish Beer." The "logojet" enters service on November 29.

In December, **British Airways, Ltd. (2)** announces the creation of a new low-cost division it will operate from London (STN) beginning the following spring. Many expect Ryanair to be a principal competitor.

At the same time, up to 50 of the 63 ground handling staff join the Services, Industrial, Professional, and Technical Union (SIPTU) in hopes of forcing Ryanair to begin collective bargaining. On December 19, the members, who earn some Ir£2,400 per annum less than their counterparts at **Aer Lingus Irish Airlines, Ltd.**, vote for an industrial action, but agree to accommodate a company request for seven days in which to respond.

A "logojet" appears for the Christmas season wearing a Santa Claus smile and painted hat on and over the cockpit, with teddy bears, presents, and candy spilling down both sides of the fuselage.

As the year ends, Ryanair responds to SIPTU, rejecting talks with the union as representative of its workers. Ryanair, which has beaten off pre-

vious attempts by the Amalgamated Engineering and Electrical Union (AEEU) and Amalgamated Transport and General Workers Union (ATGWU) to represent workers, sees no benefit in negotiating with the nation's largest labor group.

A total of 4 million passengers are flown on the year and generates a net profit of Ir£30.2 million.

Having sought and been rebuffed in their efforts to obtain collective bargaining, 29 of the SIPTU-represented company baggage handlers inform the company on January 2, 1998, that they are halting work for three hours on every shift, beginning one week hence.

The company's first strike begins on January 9, with an average of 14-17 ground handlers stopping work for three hours each shift as promised seven days earlier. Senior company executives, led by CEO O'Leary himself, load baggage for passengers at Dublin Airport to ensure there is no disruption of services. O'Leary had met the first shift at 6 a.m. and attempted for an hour to persuade it to abandon the strike.

According to *The Irish Times*, the two sides differ regarding the effect of the strike on January 11 operations. Apparently, at least one flight from Dublin to London (STN) is cancelled while several others are delayed. CEO O'Leary had again met with baggage handlers on the line and appealed to them to abandon their actions. The three-hour work stoppages have no effect on flights on January 12.

The industrial action continues apace over the next two weeks; the union claims to have forced the cancellation of 98 flights, while Ryanair indicates that no services have been scrubbed because of the dispute. During these days, a number of informal approaches are made to Ryanair by the prime minister and the minister for enterprise, trade, and employment plus other sources, to agree to third-party intervention by the Labour Relations Commission or some other mutually acceptable group. Ryanair, which sees any such move as de facto recognition of the union, refuses. Meanwhile, on January 20, SIPTU is careful not to take any action that disrupts scheduled flights to Liverpool for the Liverpool versus Newcastle football match.

The issue of union recognition at Ryanair is discussed by executives of the Irish Congress of Trade Unions (ICTU) on January 21. As of January 23, both sides are continuing to present differing pictures of the strike. SIPTU indicates that 134 flights have been cancelled, while Ryanair repeats its assertion that all of its schedules and 95% of its staff are operating normally.

The Irish Labour Court begins an investigation into the union recognition dispute at Ryanair on January 30. CEO O'Leary sends a letter to the body outlining reasons for not appearing, while the SIPTU warns that a serious confrontation with the trade union movement is being risked by the airline. The ICTU advises Minister of State for Labour Affairs Tom Kitt that an urgent need exists for legislation that will allow the Labour Court to intervene and arbitrate the issues in exceptional cases like that at Ryanair.

The industrial action continues into February. On February 10, CEO O'Leary, breaking his silence on the strike, is a guest on the RTE Radio 1 radio show of Pat Kenny and gives separate interviews to newspaper reporters. After presenting his views on numbers involved, job action causes, and a belief that his carrier's baggage handlers are better off than those at **Servisair**, the baggage-handling company at Dublin Airport that provides services to third parties, O'Leary is challenged concerning the company's statements that all service is operating normally. Host Kenny notes the comments of customers calling-in to the contrary, while SIPTU, in reviewing the air leader's comments, indicates that there is clear evidence that over 220 scheduled flights have not operated since the strike's beginning.

Ryanair attempts to counterattack in the area of public relations on February 12 when it sends SIPTU leadership a copy of a letter alleging that baggage handlers working regular shifts at Ryanair have received telephoned threats of violence. These alleged threats are also reported to the police and media. The union denies that anyone involved in the dispute has made any physical threats.

By February 14, analysts are suggesting that the increasingly bitter

Ryanair strike is becoming a test case of the growing "Americanization" of Irish industry. More and more Irish companies now emulate business practices in the U.S., choosing to bypass labor unions and negotiate directly with their workers on pay and working conditions. Private sector union representation has fallen from 85% to 40% during the past 20 years.

The labor dispute continues during the remainder of the month, with members of parliament and the government drawn into the debate on whether or not the baggage handlers and their union should be recognized by the airline. Speeches are made in various forums, including the European Union in Brussels, and demonstrations are held.

As the job action deepens, CEO O'Leary threatens to move the whole airline to the U.K. The Irish parliament begins to debate a trade union recognition bill, which the government opposes on the grounds that it may lead to a deterioration in industrial relations in the state.

Upwards of 1,000 workers from across the country join 39 Ryanair baggage handlers in a Dublin march in support of demands on February 27.

On February 28, in freezing rain, 2,000 baggage handlers, trade union supporters, and politicians attend a Dublin Airport rally in support of union rights at the airline. There are also representatives from U.S. and U.K. unions, as well as the workers at **Air France**. Speakers call upon the government to act immediately to force Ryanair to accept union representation and negotiation. ICTU general secretary Peter Cassells pledges the support of 650,000 trade unionists, while criticizing a reported Ir£17 million in bonuses paid to CEO O'Leary.

Ryanair announces on March 1 that it has recruited its 1,000th employee and will create an additional 100 jobs over the coming months. Ryanair withdraws security clearance from the striking baggage handlers on March 6, claiming that the strikers are intimidating other airport workers. On March 7, strikers and their union representatives inform the media that Ryanair has been using private detectives to spy on their activities, taking names and photographs. Police sources confirm that such surveillance is occurring, while the company's public relations advisers, Murray Consultants, indicate that all such allegations are "totally untrue."

The now-personalized and bitter industrial action reaches its zenith. SIPTU members at **Aer Lingus Irish Airlines, Ltd.** and CityJet, Ltd., thousands of workers in total, vote not to cross the picket lines of Ryanair baggage handlers. The action forces the cancellation of almost all flights by Irish carriers and closes down Dublin Airport. Ironically, by March 8, many Ryanair services are operating smoothly, while the state carrier, from whence most of the supporting demonstrators originate, is all-but shut down. Thousands of passengers are inconvenienced and the troubles are extensively covered by the electronic media. In some presentations, Ryanair appears the villain of the piece; *This Week*, an RTE Radio 1 program interviews numerous inconvenienced passengers, the majority placing the strike blame on Ryanair, or even CEO O'Leary personally, rather than the pickets. Television news programs show images of Ryanair workers drinking cans of beer and taunting baggage handlers from their windows, while chanting SIPTU members scream "scabs" at replacement workers.

After five hours of tense emergency talks led by the prime minister and other top government officials, as well as opposition politicians and trade union leaders, both CEO O'Leary and the SIPTU agree to a five-point formula. This formula will ensure an orderly resumption of work by the baggage handlers, who are not to be fired, and structured talks to address their concerns.

In addition, both sides agree to cooperate with a special Government Inquiry Team established by the Minister for Enterprise and Employment Mary Harney to review the dispute. The panel will be led by former employers' leader Dan McAuley and former trade union leader Philip Flynn and will report its findings to the prime minister within a month or so. The inquiry team begins interviewing participants on March 9.

Also on March 9, an Ir£1.4-billion (\$2-billion) order is placed with Boeing for 25 Next Generation B-737-800s, plus 20 options. Financing is handled through a combination of internal cash resources and commercial borrowing, including a letter of commitment from the Dutch Bank ABN Amro that will cover 85% of the net purchase price.

This purchase represents the largest financial transaction ever made by an Irish public company. It is anticipated that the new aircraft will allow the company to compete on an even basis with the new **British Airways, Ltd. (2)** discount subsidiary GO, which is set to begin flying in May.

Continuing to maintain that the March 7-8 disruption at Dublin Airport is due to unlawful activity, Ryanair repeatedly refuses to refund out-of-pocket expenses as allegedly promised to its inconvenienced passengers those two days. The story of one of these claims, that of Belgian customer Ms. Annabelle Francois, is reported by *The Irish Times* on April 17. **Aer Lingus Irish Airlines, Ltd.** has, since the disruption, received over 1,000 claims and expects to pay in excess of Ir£1 million to settle them.

Service is inaugurated on May 7 from London (STN) to Venice, St. Etienne to Lyon, and Kristianstad to Malmo. With all of the pieces in place, GO launches services from London (STN) to Milan and Rome on May 22 with three B-737-200s. During the month, the company is included on the New York Nasdaq index.

While **easyJet, Ltd.** and **Debonair, Ltd.** attempt to limit GO via legal and regulatory means, an even stronger competitor threatens to take it on head-to-head in the marketplace. In a speech before the Aviation Club at London on June 1, CEO O'Leary pledges that Ryanair "will compete with lower fares rather than wait for the bureaucrats in Brussels to rescue us."

Flights to the Italian cities of Pisa and Rimini, plus Carcassonne to Toulouse in France, commence on June 4. At this point, the route network covers 28 destinations in 7 countries.

The company now introduces its latest "logojet," a B-737-204A that wears billboard-sized "Tipperary Crystal" titles along the side of its white-painted fuselage. A circular blue decal under the cockpit window proclaims the product to be "Ireland's Premier Crystal."

An initial public offering is made on the Irish Stock Exchange on July 10. The 21 million ordinary shares are oversubscribed 5 times and bring in Ir£48.4 million (\$65.82 million). The carrier is listed on the London Stock Exchange on July 13 for the first time and begins trading the next day. Market capitalization climbs to over Ir£1 billion. All of the funds generated will be employed, reports Chairman O'Leary, for the purchase of 25 Next Generation B-737-800s.

The report of the Government Inquiry Team, delivered to the minister for enterprise and employment a week earlier, is published in the July 16 issue of *The Irish Times*. In addition to reviewing events leading up to the early March disruptions at Dublin Airport, the document advocates that the government revisit and revise its policies for workers in essential industries and services.

The Government Inquiry Team specially criticizes Ryanair's refusal to cooperate with the inquiry and notes that, during the course of the hearings, the company has gone so far as to dismiss the employment of probationary baggage handlers involved in the job action. SIPTU is cited for instigating and encouraging the difficulties leading up to the Dublin Airport debacle. Airport and airline employees are accused of gross misconduct in employing their security clearance passes to demonstrate on the apron and obstruct flights, while airport fire crews are criticized for actually joining in the demonstrations. The panel goes on to recommend new procedures be put into place scrapping the current volunteer guidelines and legally requiring employers and trade unions to refer disputes to the Labour Court.

It is reported on July 20 that the Irish government has instructed both the airline and the SIPTU to "consider" the results of its inquiry into their first quarter dispute and asks the two sides to adopt a "constructive and positive approach" to future discussions.

On July 25, Ryanair, embarrassed again, is further involved in controversy as it contests the findings of the prime minister's inquiry. The Irish Productivity Center, which had carried out a comparative study of baggage handlers' pay at Dublin Airport for the Government Inquiry Team, reveals that the airline's claims that its pay scale is better than much of the competition is incorrect. The airline writes the IPC demanding that it "correct errors" or face a lawsuit in the High Court.

Ryanair, on July 28, proceeds to make its case in the High Court, indicating that the findings of both the Government Inquiry Team and the IPC are incorrect, but that it has been given no post-publication opportunity to offer correction. The revision is deemed necessary because the SIPTU has asked the airline to implement the inquiry's findings and boost pay. The High Court grants the carrier leave to challenge the findings.

Also during the month, the company announces a 60.9% pretax profit increase during the second quarter and officially becomes Europe's largest low-fare airline. In mid-August, **British Airways, Ltd. (2)** operates a seat sale designed to take passengers away from the discount carriers, including Ryanair. The Irish line's CEO O'Leary terms the BA effort "fairly limp."

Prompted by the BA challenge, O'Leary and several of his executives raise a huge promotional banner outside a BA flight shop in central London on September 3 to proclaim its own seat sale. "We want to show BA how a seat sale should be run," O'Leary tells Reuters, Ltd. For tickets purchased over the next 12 days for travel between late September and mid-December, 1 million seats across Ryanair's 26 European routes will cost from just Ir£16.99 (\$28.54) one way.

The suit by Ryanair concerning the 1993 state aid package for **Aer Lingus Irish Airlines, Ltd.** is lost in mid-September when the European Court of First Instance rules that Aer Lingus has, in fact, adhered to all of the conditions laid down by the European Commission for receipt of the \$259 million in assistance.

On September 30, company executives announce that the airline will cut back on flights out of Dublin and focus on its England and Scotland markets if additional terminal space in Ireland is not made available by December.

The aviation division of Stagecoach, Ltd., a concern that had built its reputation operating buses in Kenya, but which had purchased in May the company that controls Prestwick International Airport in Ayrshire, signs an agreement with Ryanair on October 1. The arrangement is part of a plan by the Irish carrier to diversify to U.K. regional airports from London (STN). Daily return service is inaugurated on October 2 from Dublin to Bristol and Teesside.

A strategic agreement is entered into with Hertz Rent-a-Car on October 10. The airline and rental firm create a preferential fly-drive program in 26 cities in 7 European nations.

During the remainder of the month and into November, discussions are held with more than 10 airports in Germany with an eye toward the launch of deep-discount service in that nation during 1999. Airport authorities in Spain, Finland, Denmark, and Austria are also approached.

During the fall, two more "logojets" are commissioned, one honoring the U.K. newspaper *News of the World* and the other the Irish mobile telephone company EirCell.

An Ir£200,000 publicity campaign is begun on November 10 designed to gain public support for the lowering of landing charges at Dublin Airport. The effort is in response to Aer Rianta's plan to phase out the Traffic Incentive Scheme (which had offered landing fee rebates) over the next five years. Once more Chairman O'Leary threatens to move his company to London (STN).

One-way service is inaugurated on November 19 from Glasgow to Paris (Beauvais Airport).

Speaking in Dublin a month later on December 18, Chief Financial Officer Michael Cawley indicates that Ryanair has plans to expand by a constant 25% every year into the future.

Passenger boardings during the 12 months grow by 5% to 5 million. Pretax profits for the year surge 20% to a record Ir£45.3 million (\$44.2 million).

On the afternoon of January 22, 1999, a tug towing a B-737 runs over baggage handler David Thomas, crushing his feet and breaking his left leg. Two days later, 22 baggage handlers call in sick to protest their working conditions.

It is announced on February 11 that in May, the carrier will add six new return destinations to its midweek schedule from London (STN). Hahn, which is located between Cologne/Bonn and Frankfurt (thrice-

weekly), the French communities of Dinard and Biarritz, plus Ancona, Italy (weekly), and Genoa and Turin in Italy (twice-weekly). The push is aimed against the **British Airways, Ltd. (2)** division GO, as well as **easyJet, Ltd.** and **Debonair Airways, Ltd.**

Ryanair rates well in the results of a new airline survey that is released by the U.K. Consumers' Association's *Holiday Which?* on March 9. The standing is based on responses from 20,000 airline travelers who were asked which airline they would recommend to a friend.

While working to complete a maintenance check on the engine of a B-737 on March 11, three aircraft maintenance technicians, meeting environmental noise regulations, test the power plant on a taxiway near 11 p.m. One of the men, Keith Chapman, loses his arm below the elbow after it is sucked into the engine.

Ralph Riegel of the *Irish Independent* surveys the on-going fare war between **Aer Lingus Irish Airlines, Ltd.** and Ryanair, Ltd. on March 15. With existing fares already as low as Ir£9.99 one way from Dublin to London (STN) or Ir£129 for a return for two to Paris, both airlines are preparing to step up their campaigns by fall. The airlines also undertake a fleet upgrade worth a combined Ir£715 million (\$1 billion). The two carriers are preparing to complete contracts with rival manufacturers Boeing and Airbus, which are, themselves, engaged in a price war covering the 38 new jetliners the 2 Irish airlines will be receiving.

Ryanair receives its first Next Generation B-737-8AS in ceremonies at The Boeing Company facility at Seattle, Washington, on March 19. The delivery flight is completed next day via Keflavik, Iceland.

At the end of the month, the latest "logojet" is introduced, a bright yellow B-737-204 that wears the titles of "Hertz Rent-a-Car."

Correspondent Padraig Yeates reports in the April 2 issue of *The Irish Times* that both the Health and Safety Authority and the Irish Aviation Authority have launched inquiries into the safety standards of the airline's maintenance and ground-handling operations. The very same day, the wingtip of an inbound B-737 slightly strikes a fuel tanker at Dublin Airport. Two fire trucks are called to the scene as a precaution, but no damage or injuries are reported. On April 8, the reporter reveals that this ground accident is also being checked.

Twice-daily roundtrips are inaugurated on May 4 between London (STN) and Derry in Northern Ireland. The weekday fare over the company's first route north of the border is £49.99 one way.

The *Irish Independent* reports the company's 1998 pretax gain on May 29. Simultaneously, it notes that Dr. Tony Ryan is reducing the family's shareholding to 17.1% by selling another 10.1% stake for Ir£118 million. Chairman O'Leary is likewise selling 1.5% of his equity (for Ir£10.8 million), but will still retain 10.8% shareholding.

On May 31, the U.S. aviation journal *Aviation Week & Space Technology* honors the Dublin-based line with its 1998 "Best Managed National Airline" award. After reviewing the company's achievements, AWST notes that Ryanair has become "the best-positioned low-fare carrier in deregulated Europe." Two new Next Generation B-737-8ASs are received in June, one each on the 16th and the 28th.

The 130 passengers aboard the company's 9:35 p.m. June 30 service from Dublin to London (STN) make history as the last passengers en route from an Irish airport to an airport in another EU nation who are able to buy duty-free goods.

The company aggressively expands its schedule on July 1, adding daily return service to Frankfurt/Hahn, Biarritz, Dinard, Ancona, Genoa, and Turin. The fourth Next Generation B-737-8AS is accepted on August 9.

On August 11, Ryanair announces that it will join **Virgin Atlantic Airways, Ltd.** and **LOT Polish Airlines, S.A.** in grounding aircraft at 4 p.m. on December 31. The year's final Next Generation B-737-8AS is delivered on September 24.

The feisty Irish carrier continues to battle airports over what it considers to be outrageous landing and other fees. Rows with the authorities at Kerry in Ireland and at Manchester and Liverpool, England, will cost it the loss of 400,000 passengers. The 250,000-300,000 loss at Manchester alone is keenly felt.

With the beginning of the winter season at the end of October flights between Dublin and London (LTN) are reduced to twice daily.

The eighth low-fare route of the year is inaugurated on November 4 when flights are started from London (STN) to Aarhus, Denmark. On December 2, a 10-year agreement is signed with Lufthansa Airmotive Ireland, Ltd. for the maintenance of the CFM56 engines that power its fleet of Next Generation B-737-8ASs.

At the end of the year, 60% of Ryanair's business originates in the U.K., 22% in Europe, and just 18% in Ireland. The company's on-time percentage improves from 74% this year to 80%, while complaints fall from 2.5 to 2.3 per 1,000 passengers.

Overall, customer boardings are up 13% to 5.6 million. The airline will boast that its customers have enjoyed over Ir£300 million worth of savings over the high fares being charged by its European flag carrier competitors.

Revenues for the year advance by 25% to E370.1, permitting an after-tax profit of E72.5 million (\$77.6 million). Citing the company's expansion and noting that it is a "capital intensive business," Ryanair fails to pay a dividend to its shareholders.

Airline employment at the beginning of 2000 stands at 1,300. The "classic" B-737 fleet includes 6 Dash-204As, 1 Dash-2E7A, 3 Dash-2K2As, 2 Dash-2T5As, and 9 Dash-230As. Also operated are 5 Next Generation B-737-8ASs. Europe's oldest low-fare airline, Ryanair is the only new entrant since European deregulation to grow to the size of its country's national airline, in this case **Aer Lingus Irish Airlines, Ltd.**

Ticketless travel is introduced in January as the carrier switches from the Galileo back to the SABRE reservations system it had employed years earlier, saving E6.3 million in the process. Also, during the second week of the month, the Internet homepage is established, with the goal of selling 20% of the carrier's fares online. Ryanair is named recipient of the 1999 "Market Development" award by *Air Transport World* magazine in February. These laurels follow upon the naming of the carrier as "Company of the Year" by the Irish business magazine *Business and Finance*.

At the beginning of February, the 300 cabin crew assigned to the company's Next Generation B-737-8ASs welcome passengers aboard in their chic new blue and yellow "French-style" uniforms.

While on a February 6 domestic service from Kabul to Mazar-e-Sharif, an **Ariana Afghan Airlines Company, Ltd.** B-727-228A with 128 passengers is taken over by armed gunmen, who order the jetliner flown on to landings in Uzbekistan, Kazakhstan, and Moscow. Passengers are released at each point, including 10 both at Kazakhstan and Moscow. On February 8, the aircraft is flown to London (STN) where negotiations open. The resulting confusion at the U.K.'s designated hijacking airport causes Ryanair to lose 42 flights.

During February, Ryanair's Web site generates 24 million "hits."

At the beginning of March, CEO O'Leary sells 5 million of his 36 million shares in the company, realizing £25 million. At the same time, another share placement generates an additional £77 million for fleet expansion. On March 3, a new five-year heavy maintenance contract is signed with FLS Aerospace, Ltd. Frequencies from Dublin to London (STN) are increased on March 24 from 4 daily roundtrips to 10. Daily return service is inaugurated on March 26 from Glasgow to Frankfurt/Hahn.

Total traffic to Dublin from the U.K. (by far the company's largest market) declines during the first quarter for the first time since the 1991 Gulf War. The downturn is blamed on the Irish government's continuing high cost monopoly over airports. To try and counteract this situation, Ryanair continues to build up its capacity out of London (STN).

On April 4, Ryanair files a protest with the EU Commission's Competition Authority over Aer Rianta's Ir£7.20 departure fee. The company complains that the state airport authority and Irish Minister of Public Enterprise have failed to honor a pledge to drop the charge if it began flying out of the "half empty" airport. Ryanair points out that its passengers are paying more to land or depart Shannon than it costs them in airfare (Ir£7) to fly to London.

New twice-daily roundtrips are introduced on April 13 from Shannon

to London (STN). By the end of April, Ryanair's Web site is accounting for 30% of the carrier's ticket sales, selling over 50,000 bookings every week. Several special Internet fares are offered, including Ir£1 return service from Glasgow to London (STN) and Ir£9 roundtrip from Dublin to London (STN).

Beginning on May 4, anyone with the surname Ryan is allowed to fly free (along with a friend) between Shannon and London (STN); the promotion, taken to counter a perceived slap from **Virgin Express, S.A.** that has a similar offer running until May 14 on its Shannon to London (LGW) service, will last until May 24. Twice-daily return frequencies from Shannon to Frankfurt/Hahn are initiated on May 18, the same day the number of roundtrips from Shannon to London (STN) is boosted from two to three. Two more Next Generation B-737-8ASs are now delivered, one each on May 24 and May 31.

New twice-daily roundtrips from London (STN) are introduced on June 6-7 to Brescia, Lubeck, Malmo, and Nimes, and daily to Lamezia, Perpignan, and Sardinia.

On June 13, the carrier files a complaint with the EU Commission charging **Deutsche Lufthansa, A.G.** with predatory pricing on the trunk route between Frankfurt and London (STN) over which both companies fly. The German major, it is noted, has not reduced its fares for similar, but unchallenged, flights from Frankfurt to either Heathrow or Gatwick Airports. A review is promised. Three more Next Generation B-737-8ASs are delivered in June, one each on the 9th, 13th, and 20th.

Ryanair is named best-managed company among nonstate-owned, national-sized airlines in the "2000 Index of Competitiveness" published by *Aviation Week and Space Technology* on July 10. The airline is now the largest European low-fare airline in every way, with a network of 45 routes across 11 countries.

Also in July, the First Choice tour concern's in-house carrier **Air 2000, Ltd.** becomes the first charter airline to mount a serious challenge to the low-cost carriers Ryanair, **easyJet, Ltd.**, and **GO**, the discount brand of **British Airways, Ltd. (2)**. **Air 2000, Ltd.**, which has flown scheduled service to Cyprus since 1994, now launches scheduled leisure flights from eight U.K. airports to Alicante, Faro, Lanzarote, Malaga, Palma, and Tenerife. Unlike the no-frills airlines, passengers are offered free drinks and in-flight entertainment.

On August 11, the airline attacks the government-owned airport authority, Aer Rianta, with which it has had previous difficulties, blaming it for a lack of growth in the number of tourists visiting Ireland from the U.K. At the end of the month, the Dublin High Court agrees to hear a case, later in the year, filed by the discount airline challenging the Ir£5-per-passenger departure tax now levied by Farrangore Airport in Kerry. With Ryanair having won an injunction suspending the charge until the trial, the airport will lose Ir£900,000 income.

On September 22, Ryanair rejects claims by IMPACT, the union claiming to represent its 240 pilots, that it is unfairly overworking air crews by raising the weekly limit on flight duty time from 50 hours a week to 55. The flyers, in serious negotiation with the airline over a new contract, are also unhappy over the company's demand that no-strike and staffing level clauses be inserted into any new document. The airline indicates a willingness to increase pilot pay by 16% over 5 years and to offer share options and allowances worth another 15%. IMPACT recommends that the carrier's flyers vote to strike and promises that, if a job action is taken, Ryanair will receive seven days' notice. The carrier's leadership ignores IMPACT, preferring to talk with cooler heads.

The next day, CEO O'Leary reveals that his company is in talks with 25 airports across Europe hoping to develop new routes next year. Among the new destinations that will be visited for the first time are Malmo, Perpignan, Nimes, and Hamburg. It is also noted that more than four in five tickets are now sold directly via either Ryanair's Web site or the telephone.

Orders are placed on September 26 for three additional Next Generation B-737-8ASs, with delivery scheduled between May and July 2002. By that time, Ryanair will be flying 44 Boeing 737s.

During the third week of October, the scrappy Irish line loses a cou-

ple of disputes placed against it with the U.K. Advertising Standards Authority (ASA). The ASA finds against Ryanair for misleading ads in a northwest England newspaper concerning a seat sale to 17 destinations when, in fact, the only flight available is to Dublin. In a second matter, a consumer had complained to the ASA that Ryanair was misleading its Internet customers by encouraging them to believe that they could obtain flights to Europe for just £5 plus tax when that was just not the case. ASA agrees with the petitioner.

On September 30, Ryanair wins a temporary court injunction blocking renovation work at Dublin Airport that would have disrupted its business. Had it not prevailed, the low-cost operator would have been forced by Aer Rianta to trim its check-in desks by one-third and move them to a severely congested area while work progressed.

Freak winds and flooding in the south of England and in northern France on October 30 force **Aer Lingus Irish Airlines, Ltd., British Midland Airways, Ltd., Air France**, and Ryanair to cancel a number of flights, stranding a number of passengers. The Irish independent finds it necessary to scrub 6 services affecting 600 passengers.

By the end of October, the situation between the carrier and its pilots' union has grown increasingly tense as the flyers begin strike balloting.

A sufficient number of Ryanair passengers remain stranded at Paris' Beauvais Airport on November 1 from the October 30 storms to justify the carrier sending a B-737-204 to fly them home to Dublin. On November 6, the carrier reports that its profits have grown by 49% after taxes in the 6 months since the end of March. The news causes company pilots, the next day, to vote 76-1 in favor of taking an industrial action over their pay and working conditions claim.

As part of **British Airways, Ltd. (2)**'s continuing rationalization of its short-haul operations, CEO Eddington announces at the beginning of the second week of November that the low-cost subsidiary GO will be sold. Although London (STN)-based rival, Ryanair, immediately indicates that it is not interested in purchasing the operation, GO's most bitter rival, **easyJet Airlines, Ltd.**, indicates that it would "at the right price."

The British major, during the first week of November, takes Ryanair before the London High Court on charges that it is waging an overly aggressive advertising campaign. **British Airways, Ltd. (2)** contends that the Irish line's notices spread malicious gossip, infringe its trademark, and unfairly compare Ryanair's cheapest tickets on any given route to BA's standard fares.

Reacting to a company attempt to unilaterally imposed increased working hours on its members, as well as no-strike and staffing level clauses, pilots from the Irish Air Line Pilots Association announce on November 17 that a 24-hour strike will occur on November 24. The job action is expected to ground most services flown by Irish airlines from Dublin and Shannon.

Displeased with the local airports "unreasonable conditions," the carrier suspends its daily return service from London (STN) to Lamezia, southern Italy, on November 21. Over 30,000 passengers have flown the route since its opening in July.

On November 23, the pilots' job action is called off as the result of new discussions between the airline and the Dublin Pilots Committee. The talks, in which IMPACT has not participated, have resulted in a new five-year contract proposal with guaranteed annual pay increases and other incentives for the Ryanair flyers. Trade unionists within the carrier indicate their pleasure with the new deal and the 240 pilots are encouraged to vote for ratification.

In an effort to tempt Christmas shoppers to travel from Manchester to Dublin, the carrier offers £1 one-way flights for the period between November 29 and December 14. A Ryanair spokesman indicates that the offer has been launched to mark the airline's transport of its two-millionth passenger over the route.

Former **Virgin Express, S.A.** Managing Director John Osborne is named group operations director at the end of November, effective January 1. Also on November 30, the BBC reports that most of the domestic carriers in the U.K. and Ireland are benefiting from a growing number of customers who have chosen to switch from rail to air travel. The changeover comes in the wake of widespread flooding early in the month, as well as a disastrous railroad crash at Hatfield. For Ryanair,

passenger numbers on its service from Stansted Airport to Prestwick, outside Glasgow, has accelerated 30% over October. To handle this growth, the airline has put on extra flights and employed larger aircraft and actually accommodates twice as many passengers on the route than in November 1999. Marketing Director Tim Jeans anticipates a retention of this traffic for some time to come.

On December 5, the London High Court dismisses a suit brought by **British Airways, Ltd. (2)**, finding that, while certain Ryanair phrasing is "vulgar abuse," the substance of the claims made by the discount airline in ads concerning BA fares on competing routes are true and not malicious falsehood. Ryanair, for its part, withdraws the advertisement because others have complained of its vulgarity to the ASA, where the airline had recently been stung by a finding against it in another case.

At home in Ireland, Ryanair is simultaneously faced with a legal defeat. The Irish High Court rules in favor of Aer Rianta in an I£459,885 (plus interest) suit brought by the state airport operator after Ryanair had refused to pay what it considered unreasonable 1997 and 1998 landing charges and passenger fees on the routes from Dublin to Paris and Brussels. Rather than settle right away, Ryanair promises to appeal.

Also, on December 7 and 11, respectively, the last two of the current 12-unit order for B-737-8ASs are delivered.

As the year ends, plans are unveiled for the establishment of a new \$100-million European hub at Charleroi Airport, S of Brussels, effective April 26, and for the inauguration of new routes on April 5 from London (STN) to Brussels, Charleroi, Goteborg, Stockholm, Salzburg, Esbjerg, and the Italian cities of Trieste and Pescara. Additionally, frequencies from Stansted Airport to Dublin, Shannon, and Glasgow will be increased.

Enplanements for the year approach 7 million.

In the throes of this rapid expansion, the company must also deal with personnel enhancement. After pilots vote on January 3, 2001 to accept a new five-year contract (with a 15% pay increase), Ryanair begins to undertake a major pilot recruiting campaign designed to man its new aircraft by increasing its crew to aircraft ratio of 5 to 7 to 6 to 2. It will soon advertise for experienced captains offering the potential within "the next few years" of £100,000 annual salaries on the basis of "productivity awards."

RYAZANAVIATRANS: Turlatovo Airport, Ryazan, Central Region, 391011, Russia; Phone 7 (0912) 349 155; Fax 7 (0912) 973 009 5; <http://www.aviatrans.ryazan.ru:8101>; Code RYZ; Year Founded 1995. Formerly the **Aeroflot Soviet Airlines** Ryazan division and then a part of **Central Districts Airlines**, Ryazanaviatrans is reformed into an independent joint-stock company on January 12, 1995. Domestic feeder and regional charter services will continue to be offered, both passenger and cargo, plus aerial work for the public, as well as construction and oil industry concerns.

Vladimir Cherkasov is director general and he undertakes revenue flights with a large mixed fleet that initially includes 12 Let L-401UVP, 3 Antonov An-24RVs, 50 An-2 biplanes, and 6 PZL-Swidnik Mi-2 helicopters. The company maintains bases at Turlatovo and Diagilevo and within a year has an operating balance of 3.2 million rubles (\$600,000).

Service is maintained during the remainder of the decade; however, the currency crisis of 1998-1999 has a severe impact upon the company.

By the start of 2000, only 4 Lets and 3 An-24s are flown. A new homepage is opened on the Internet. It is employed by new director general Vladimir Vorobiov to solicit investments from foreign businessmen and airlines.

Thrice-weekly An-24RV roundtrips are inaugurated on August 2 from Moscow's Domodedovo Airport to the Black Sea resort community of Gelendzhik.

RYNES AIRLINES: United States (1974-1975). Rynes is set up at Chicago's Meigs Field in 1974 to provide scheduled commuter roundtrips to Gary, Indiana. Operations continue into 1975.

RYUKYU AIR COMMUTER COMPANY, LTD.: 306-1 Kagamizu, Naha, Okinawa, 901 01, Japan; Phone 81 (98) 858-9646; Fax 81 (98) 858-6560; Code R66; Year Founded 1990.

A wholly owned subsidiary of **Japan TransOcean Air, Ltd.**, RAC is established at Naha Air Terminal at Okinawa's Naha City in 1990 to provide scheduled flights to Kerama and the Aguni Islands. President Masayoshi Asato and Managing Director Tetsuji Tamanaha's initial fleet comprises 2 Pilatus-Britten-Norman BN-2 Islanders.

In 1991, four more Twin Otters are chartered from **Japan TransOcean Air, Ltd.** These help to ensure a regular feed for the larger carrier at Naha. Operations continue apace in 1992-1995.

In February 1996, three de Havilland Canada DHC-8-100s are ordered. Ryukyu is the first Japanese customer for the aircraft type.

The first Dash-8s arrive in early 1997 and begin to replace the South-west Twin Otters. Scheduled and charter flights to resort destinations in the Ryukyu Islands continue.

Service is maintained in 1998. During the first quarter of 1999, a \$12.5-million order is placed with Bombardier Aerospace for a DHC-8Q-100.

A total of 32 workers are employed at the beginning of 2000.

RZHEVKA AIR ENTERPRISE: Azhevka Airport, Kuvalevu, Leningrad, Region, 188679, Russia; Phone 7 (812) 527-3600; Fax 7 (812) 527-3982; Code RZV; Year Founded 1992. The Rzhnevka division of the now-defunct **Aeroflot Soviet Airlines** is reformed into a joint stock company in 1992 to continue the delivery of regional and domestic passenger and cargo charters. Valeri Tiukin is director general and he begins revenue flights with an all-Antonov fleet of 2 each An-24s and An-26s, 5 An-30s, and 7 An-2 biplanes. Rotary-wing work is also performed with a small fleet of Mil helicopters.

Service is maintained during the remainder of the decade. At the beginning of 2000, the fleet includes 2 An-26s and the original 5 An-30s.

SA AIRLINK (PTY.), LTD.: P.O. Box 7529, Bonaero Park, 1622, South Africa; Phone 27 (11) 973-2941 Fax 27 (11) 973-2501; <http://www.sairlink>; Code 4Z; Year Founded 1995. Three-year-old **Airlink Airline (Pty.), Ltd.** receives a corporate makeover in 1995 when it enters into a marketing and feeder arrangement with **South African Airways (Pty.), Ltd.** Shareholding remains divided between the joint managing directors, Barrie J. Webb and Roger A. Foster, plus Osprey Aviation Holdings. Richard Charter is chairman and the workforce totals 352.

Ten British Aerospace BAe Jetstream 41s are delivered between February and September, replacing four Avions de Transport Regional ATR42-320s. Two Dornier 228-212s are operated through the end of the year, while a Swearingen Metro II soldiers on. During July, Johannesburg Jan Smuts Airport is renamed Johannesburg International Airport.

While on a February 10, 1996 training flight from Johannesburg, a Swearingen Metro II, with two crew touches down before the landing gear is fully extended; although the aircraft is nearly destroyed, there are no fatalities.

Following a June announcement, the regional begins dedicated Jetstream 41 on behalf of the KwaZulu Natal government.

On February 17, 1997, the company joins with **SA Express Airways (Pty.), Ltd.** and **South African Airways (Pty.), Ltd.** in a three-way alliance. According to the accompanying press release, the pact is designed to provide an integrated national aviation system that can service all routes, ranging from entry level to the national hubs, and will offer national over-border air transportation. Although the three airlines will continue to operate independently, there will be uniformity in their activities in terms of corporate appearance, ticketing, and check-in procedures.

In December, the company purchases 100% control of **Metavia Airlines (Pty.), Ltd.**, but allows its new subsidiary to continue operations under its current name.

By 1998, the fleet includes 10 British Aerospace BAe Jetstream 41s and 2 Fairchild Dornier 328-110s. Destinations visited include Bloemfontein, Durban, Johannesburg, Margate, Mmabatho, Nelspruit, Phalaborwa, Pietersburg, Pietermaritzburg, Plettenberg Bay, Sun City, and Umtata.

During the fall, managers from the Namibian new entrant **Kalahari Express Airline (Pty.), Ltd.** and those from the established **Air Namibia**

(Pty.), Ltd. reach an understanding and agree to work in tandem much as **South African Airways (Pty.), Ltd.** does with **SA Express Airways (Pty.), Ltd.** Start-up arrangements between the two, plus SA Airlink, are sorted out during the remainder of the year, with the South African airline purchasing 49% equity in October. Andre Compion is appointed the new Kalahari managing director.

On January 7, 1999, in a further effort to transform itself into a viable carrier, **Air Namibia (Pty.), Ltd.** signs an agreement in Johannesburg with **South African Airways (Pty.), Ltd.** Under terms of the document, the two carriers pledge to explore such joint business opportunities as combined customer services, linked frequent flyer programs, and code-sharing. The arrangement is extended to Kalahari Express Airline (Pty.), Ltd., **SA Express Airways (Pty.), Ltd.**, and SA Airlink.

On January 25, SA Air Link purchases 43% of **Royal Swazi Airways Corporation, Ltd.** and passes word to **LAM Mozambique Airlines, S.A.** that it wishes the Swazi Fokker 100, chartered in October 1996, returned by March.

It is announced on March 15 that **Kalahari Express Airline (Pty.), Ltd.** will initiate daily flights between Windhoek, Johannesburg, and Cape Town by midyear. The services will complement rather than compete with the frequencies offered on those routes by **Air Namibia (Pty.), Ltd.** or SA Airlink.

Royal Swazi Airways Corporation, Ltd. is renamed **Swaziland Airline, Ltd.** on April 12. After allegedly insulting a ground worker with the racial slur "kaffir" on April 23, a female pilot is fired. The *South Africa Sunday Times* reports two days later that the captain has appealed her termination. The new schedule of **Swaziland Airlink, Ltd.** services between Manzini and Johannesburg begins on July 11.

South African Airways (Pty.), Ltd. (SAA) and its affiliates now engage in a fare war with **Comair (Pty.), Ltd.**, backed by **British Airways, Ltd. (2)**, **Nationwide Air Charter (Pty.), Ltd.**, supported by **Sabena Belgian World Airlines, S.A.**, and **Sun Air (Pty.), Ltd.** On August 1, SA Airlink CEO Rodger Foster, who is also serving as chairman of the Airlines Association of South Africa, warns that the market is hopelessly over-traded and suggests that one or more of the smaller players will soon fail. Loss-making **Sun Air (Pty.), Ltd.** is purchased by SAA on August 13 and shut down 72 hours later.

Kalahari Express Airline (Pty.), Ltd. F28-3000 revenue flights are finally inaugurated on October 31, linking the company's base at Windhoek with Johannesburg and Cape Town.

At the beginning of 2000, SA Airlink operates a fleet of 16 Jetstream 41s and operates over 3,000 flights (80% business, 20% leisure) per month to destinations in Southern Africa. The BAe fleet is the third largest of its type in the world.

In order to launch a massive tourism drive, the company takes over the airport at Phalaborwa from Foskor in April for an undisclosed amount. The facility, previously known as Van Eck Airport, is renamed Kruger Gateway Airport and is operated by a new SA Airlink subsidiary, The Regional Airports Company (Pty.), Ltd. It is anticipated that the number of J-41 roundtrips currently offered to Phalaborwa from Johannesburg will shortly be increased from the current thrice-daily offering.

The schedule of four return flights between Johannesburg and Pietersburg and three on Sundays is enhanced on July 1 with the introduction of once-on-Saturdays roundtrips.

New daily roundtrips between Phalaborwa and Malelane commence at the end of October.

The return route between Cape Town and Kimberley, previously operated by **SA Express Airways (Pty.), Ltd.** with de Havilland Canada DHC-8-314s seven times a week is turned over SA Airlink on November 1. The smaller airline now increases the service to twice weekdays and once on Saturdays and Sundays.

On November 20, orders valued at R2.5 billion are placed for 30 Embraer ERJ-145s, with options on 30 others, some of which may later be converted to ERJ-170s. The first four are due for delivery in 2001 and will be placed into service on routes from Johannesburg to Bulawayo, Ndola, Blantyre, Lilongwa, and Livingstone.

To avoid a cessation of service into Kruger National Park from the south while the government repairs the airport at Melspruit between November 20 and December 16, SA Airlink itself expends R0.5 million to upgrade the airport at Malelane, 75 km. S of Nelspruit. The facility is then employed as an alternative landing site.

The scheduled route between Johannesburg and Mafikeng is closed on December 15.

SA ALLIANCE AIR (PTY.), LTD. See **ALLIANCE AIR (AFRICAN JOINT AIR SERVICE)**

SA EXPRESS AIRWAYS (PTY.) LTD. (SAX): P.O. Box 101, Johannesburg International Airport, Johannesburg 1627, South Africa; Phone 27 (11) 978-5577; Fax 27 (11) 978-5578; <http://www.saexpress.co.za>; Code YB; Year Founded 1993. After two years of exploratory and investment work, SA Express is formed at Johannesburg in the fall of 1993 as a feeder for the flights of **South African Airways (Pty.), Ltd.** Capitalization for an airline holding company, SA Airline Holdings, is provided by the Thebe Investment Group (51%) and a Canadian concern, Lardel Holdings, led by CEO William S. Dulce (49%).

A marketing agreement with SAA will allow the new regional access to the major's computerized reservations system. Although competitors will argue during licensing hearings that any arrangement between SAX and SAA will monopolize domestic services, the pact is allowed to stand.

Orders worth US\$150 million are placed in December for 12 Bombardier Regional Aircraft Division (de Havilland Canada) DHC-8-314s, plus 6 options.

The first two DHC-8-314s are delivered in February 1994. The collapse of **Flitestar (Pty.), Ltd.** provides an unexpected fillip. The first DHC service is announced for March 15 from Johannesburg to Kimberley, but is delayed until April 19. It is soon followed by a route from Johannesburg to Upington. The aircraft are also employed, beginning on April 24, to inaugurate thrice-daily scheduled services to Durban and Cape Town. Four additional turboprops arrive in April and two more in June. These expand the route network to such additional destinations as Bloemfontein, East Long, George, Port Elizabeth, and Maputo, the latter station in Mozambique. Traffic and financial results are not made public.

All 12 DHC-8-314s are in service in 1995 and in January a \$63-million order is placed for 9 British Aerospace (BAe) Jetstream 41s. The new aircraft are delivered between February and September and are placed into service to Bisho/East London, Bloemfontein, Kimberley, Mmabatho, Nelspruit, Pietersburg, Pietermaritzburg, and Umtata.

During July, Johannesburg Jan Smuts Airport is renamed Johannesburg International Airport.

In 1996, a \$130-million order is placed for six Canadair RJ Regional Jets that the company labels ExpressJets. Flights are inaugurated or increased to Walvis Bay and Richards Bay. New liveries are introduced for the DASH 8 fleet.

A new "WOW" customer service campaign is launched on October 21.

Destinations visited in 1997 include Bloemfontein, Cape Town, Durban, East London, George, Kimberley, Port Elizabeth, Richards Bay, Upington, and Walvis Bay in Namibia. One of the company's 12 DHC-8-314s is leased to **Air Namibia, Ltd.**

On February 17, the company joins with **SA Airlink (Pty.), Ltd.** and **South African Airways (Pty.), Ltd.** in a three-way alliance. According to the accompanying press release, the pact is designed to provide an integrated national aviation system that can service all routes, ranging from entry level to the national hubs, and will offer national over-border air transportation.

Although the three airlines will continue to operate independently, there will be uniformity in their activities in terms of corporate appearance, ticketing, and check-in procedures.

On April 1, the number of daily DHC-8-314 return flights from Johannesburg to Richards Bay is increased from three to four, while the to-

tal of daily return flights from Johannesburg to Kimberley is boosted from three to five.

After local Plettenberg Bay resident Ilse Adler finds 24 oil-soaked penguins in May, she takes them to a holding station, where they are kept until arrangements are completed for SA Express to fly the lot to Cape Town. There they are treated by the South African National Foundation for the Conservation of Coastal Birds.

The first Canadair CRJ is delivered in September, followed by a second in October. These are immediately assigned to the longer segments of Johannesburg to Walvis Bay and Cape Town to Walvis Bay.

The **Comair (Pty.), Ltd.** routes from Johannesburg to Skukuza, Hoedspruit, Gaborone, and Manzani are taken over on November 1 as Comair repositions itself as an all-jet operator on the major trunk routes and makes plans to go one-on-one with **South African Airways (Pty.), Ltd.** SAX Managing Director Israel Skosana refuses to disclose the purchase price. Comair will continue to market the routes and retain a share in any profits gained from them.

In December, two DHC-8-314s are chartered to the Brazilian regional **Pena Transportes Aereos, S.A.** A homepage is opened on the Internet's World Wide Web on December 11, by which date the company is serving 45,000 passengers every month.

In May 1998, the sixth Canadair CRJ is delivered and the company is entertaining 50,000 customer boardings per month.

The company sparks a fare war on October 5 when it reduces its domestic ticket prices by up to 15%. Competing **Comair (Pty.), Ltd.** indicates that it will immediately match the lower tariffs, but **Sun Air (Pty.), Ltd.** refuses to join the conflict.

On January 7, 1999, in a further effort to transform itself into a viable carrier, **Air Namibia (Pty.), Ltd.** signs an agreement in Johannesburg with **South African Airways (Pty.), Ltd.** Under terms of the document, the two carriers pledge to explore such joint business opportunities as combined customer services, linked frequent flyer programs, and code-sharing. The arrangement is extended to **Kalahari Express Airline (Pty.), Ltd.**, **SA Express Airways**, and **SA Airlink (Pty.), Ltd.**

Flights continue in 2000. With a fleet of 6 CRJs and 7 DHC-8-300s, SA Express operates to 12 domestic destinations, plus Gaborone and Walvis Bay.

With the CRJ transitional training of **Kendell Airlines (Pty.), Ltd.'s** designated SAAB 340 pilots taking longer than expected, a number are seconded to SA Express during the spring to gain practical experience.

Twice-daily CRJ roundtrips are inaugurated on September 1 from Johannesburg to Eros. An additional two return services between Johannesburg and Eros are laid on beginning on November 17, with a third on November 21. The company now offers 12 weekly roundtrips between the two communities.

SAAK (STAVROPOL JOINT STOCK AIRLINE): Stavropol Airport, Stavropol, 355010, Russia; Phone 7 (86552) 22565; Fax 7 (86552) 31036; Code SVL; Year Founded 1998. The **SAAK-GEM Air Company** or **SAAK-GEM Aviakompaniya** is reformed in late 1998 and renamed. The mission of providing charter passenger and cargo flights to domestic and regional destinations is enhanced by Director General Gennadi Russkikh to also include scheduled service. Rotary-wing work, including agricultural and energy industry support, is also offered.

The fleet at the beginning of 2000 includes 4 each Antonov An-24Bs and An-24RVs, 1 An-26B, 2 Tupolev Tu-134As, and 3 Yak-40s. Six Mil Mi-8/17 and 27 Kamov helicopters are also operated.

SAAK-GEM AIR COMPANY (SAAK-GEM AVIAKOMPANIYA): Russia (1992-1998). Successor to the Stavropol division of Aeroflot Soviet Airlines, SAAK-GEM or the Stavropol Stock Airline is set up at Stavropol Airport in 1992 to offer all-cargo flights to regional destinations. Director General Y. I. Gerasimov begins revenue services with an unspecified number of Antonov An-24s.

Flights continue in 1993-1998, during which years Gennadi Russkikh becomes director general and the corporate mission changes to include

both passenger and cargo charters under the marketing name SAAK. Service is provided by a large fleet of 3 each Tupolev Tu-134As and Yakovlev Yak-40s, 11 Antonov An-24s, 1 An-26, 33 An-2 biplanes, 27 Kamov Ka-26, and 6 Mil Mi-8/17 helicopters.

During the fall of the latter year, SAAK-GEM is officially renamed **SAAK: Stavropol Joint Stock Airline**.

SAARLAND AIRLINES, GmbH: Germany (1989–1993). Saarland is established in early 1989 to offer passenger charter and inclusive-tour flights to destinations in Europe, the Mideast, North Africa, and the Mediterranean. Revenue operations commence with a single Boeing 737-3M8.

Enplanements by year's end total 51,500. Revenues total \$8.3 million and expenses are \$9.5 million; the resulting operating loss is \$1.2 million.

Operations continue apace in 1990–1992. In December of the latter year, financially troubled **Hamburg Airlines, GmbH**, is purchased by Chairman Hans Rudolph Wohri and its owner, Jorgen Block, is given a seat on the Saarland board and allowed to retain 20% shareholding.

Early in 1993, orders are placed for five Airbus Industrie A320-231s with which to replace the Boeing. Unable to maintain viability in a recessionary industry, Saarland and Hamburg close down in the fall.

SAB (SERVICIOS AEREOS DE BEIRA). See COMAG

SABAH AIR (PENERBANGAN SABAH SDN. BDH.): Sabah Air Building, Old Airport Road, Locked Bag 113, Kota Kinabalu, Sabah, 88999, Malaysia; Phone 86 51326; Fax 86 80073; <http://www.borneo-online.com.my/sabahair>; Code SAX; Year Founded 1975. Formed by the Malaysian state of Sabah on September 22, 1975, Sabah Air begins revenue services from its base at Kota Kinabalu late in the year. Regional passenger and cargo charters are undertaken with a fleet of lightplanes and helicopters. Contract services, oil industry support, aerial survey work, and sight-seeing flights are also flown. Airline employment grows to approximately 75 and the fleet eventually comes to comprise 1 GAF Nomad N.22B, 1 Beech Super King Air 200, and 9 Bell helicopters plus an Aerospatiale SA-315B Lama. Enplanements average some 25,000 per year.

The GAF Nomad N.22B with 11 passengers stalls while on approach to Kota Kinabalu on June 6, 1976 and crashes; there are no survivors.

Operations continue apace during the next 14 years and by 1990, General Manager Tony Liew's fleet includes the King Air and Nomad plus 7 Bell 206Bs and a 412.

Operations continue in 1991–1998. In addition to fixed-wing operations, the company has flown rotary-wing missions in the Philippines, Papua New Guinea, Nepal, Taiwan, and Singapore.

While on a 40-min. offshore support flight on November 26, 1996, for the state oil company Petronas Carigali, the Bell 412 crashes at sea, killing all 10 passengers.

By 2000, the company has its main headquarters at Kota Kinabalu, with offices in Labuan, Sandakan, and Tawau. Early in the year, a homepage is opened on the Internet's W3.

SABAH AIRWAYS, LTD. See BORNEO AIRWAYS, LTD.

SABAIR AIRLINES (PTY.), LTD.: Australia (1987–1997). Sabair is established at Toowoomba in 1987 by Lionel Freedman to offer scheduled flights to Brisbane. Revenue operations begin with a Cessna 402C and a Grumman GA-7 Cougar.

Traffic and financial figures become available in 1991 and show that, in 1990, a total of 4,500 passengers are carried. Revenues total A\$340,000 and a net A\$40,000 profit is earned.

Bookings climb to 5,100 in 1991 and a net A\$100,000 profit is generated on revenues of A\$430,000.

Enplanements in 1992 reach 5,400 and revenues are A\$480,000. Net gain moves to A\$130,000.

A Partenavia P-68B is delivered in 1993 and operations continue apace in 1994. With the schedule increased to 15 weekly flights, plans are made to add a second Cessna 402C early in the new year.

The new Cessna is duly delivered in February 1995. A marketing agreement is signed with **Ansett Australia (Pty.), Ltd.** in 1996 and a third Cessna 402C is acquired. Unable to maintain economic viability, the company is forced to shut its doors in December 1997. Its routes and services pass to competing Toowoomba-based **Eastland Air (Pty.), Ltd.**

SABANG MERAUKE RAYA AIR CHARTER (SMAC): Jalan Imam Bonjol No. 59, Medan, North Sumatra, 20157, Indonesia; Phone 62 (61) 537 760; Fax 62 (61) 538 643; Code SMC; Year Founded 1969. SMAC is formed at Medan in 1969 to offer charter service in North Sumatra as a joint venture between the new concern and **Malaysian Air Charter, Ltd. (MAC)**. In 1972, SMAC is split off from MAC and becomes a freestanding Indonesian entity. Nonscheduled lightplane services continue.

SMAC begins scheduled replacement service on several routes conceded to it by **Merpati Nusantara Airlines** early in 1979. Regional passenger and cargo charter and contract service flights also continue to be undertaken.

The fleet by 1985 comprises 3 IPTN (CASA) NC-212-100 Aviocars, 3 Piper PA-31-310 Navajos, 3 Britten-Norman BN-2 Islanders, and 1 Piper PA-23 Aztec; except for removal of the Pipers, no significant equipment changes are made at Managing Director Toto Iman Dewanto's carrier during the next five years.

Points linked to Medan throughout the 1980s and into the 1990s include Aekgodang, Banda Aceh, Dumai, Gunungaitoli, Lhokseumawe, Meulaboh, Pekanbaru, Prapat, Sabang, Sibolga, Sinabang, and Tapaktuan.

In 1991, Dewanto's fleet includes 5 IPTN (CASA) C-212-100 Aviocars. That number remains steady as operations continue in 1992–1996; however, as traffic demands increase, two Fokker F.27-200s are also placed into service. By 1997–1999, the fleet includes the 2 Fokkers, 4 Aviocars, 1 Navajo and 1 PA-31-350 Navajo Chieftain, and 2 Islanders.

SABENA BELGIAN WORLD AIRLINES (SOCIETE ANONYME [S.A.] BELGE D'EXPLOITATION DE LA NAVIGATION AERIENNE): 2 Ave. E. Mounierlaan, Brussels, B-1200, Belgium; Phone 32 (2) 723-3111; Fax 32 (2) 723-8399; <http://www.sabena.com>; Code SN; Year Founded 1923. Business interests in Belgium and the nation's prize colony, the Congo, combine capital on May 23, 1923, to form Sabena as successor to the nation's first carrier, **Syndicat National pour l'Etude des Transports Aériens, S.A. (SNETA)**, founded in 1919. Initial equipment comprises only 14 aircraft: 1 Farman F-50P Goliath, 4 Bleriot-Spad 33s, 1 Ansaldo A300C, 1 de Havilland DH 4, 4 DH 9s, and 3 Rumpler C.IVs. Brussels to Lympe via Ostend services open immediately with a DH 9C mail flight piloted by Capt. Albert Van Cotthem. Plans are undertaken for route expansion and fleet upgrade.

In May 1924, the new state carrier takes delivery of its first Handley Page W.8e trimotor; it is followed by four more license-built by Societe Anonyme Belge de Constructions Aéronautiques, S.A. (SABCA) and known as "Hamiltons." Employing these, together with the older planes, the company on July 14 launches Rotterdam to Basel service via Brussels. Another frequency is extended from Brussels to Amsterdam and Basel via Strasbourg.

On February 12, 1925, the W.8e *Princess Marie-Jose* piloted by Belgian World War I ace Edmond Thieffry, with two crew, departs Brussels on a proving flight to the Belgian Congo. In April, Sabena takes delivery of the first of 13 SABCA-modified W.8es, the W.8f, which is a standard aircraft with a third engine added forward of the cockpit. Following a 75 hr. 51 min. (air time) voyage over 51 days, 5,077 miles, and 20 stops, the intrepid Thieffry arrives at Leopoldville on April 3.

Meanwhile, on March 9, a Breguet 19A2 departs Brussels for a flight to Leopoldville via Cairo; the mission is accomplished on March 30 in seven stages. Having been reconfigured to W.8f standard upon its return from Africa in April, the *Princess Marie-Jose*, piloted by Leopold Roger

and with nine other passengers, makes a second Leopoldville flight during late summer and early fall.

Brussels to London Handley-Page W.8b service begins on May 1, **1926**. The only commercial transport ever designed and built in Belgium is the SABCA S-2, a four-passenger, high-wing monoplane delivered to Sabena in December.

During **1927**, two Fokker F-IIIs are acquired from **KLM (Royal Dutch Airlines, N.V.)**. They enter service between Brussels and Antwerp. In the Congo on December 14, a route is started between Luebo and Tchikapa. Flights begin from Luebo to Lusembo on April 17, **1928**.

During the remainder of the year and in **1929**, a series of airfields are built across the Congo to support Sabena flights. DH-50 and HP W.8bs open several additional Congolese routes, including the major internal Boma-Leopoldville-Elisabethville line.

The first 30 ordered Fokker F-VII/3ms join the fleet and the initial Belgium-Congo airmail service is inaugurated in April **1930**. On the 14th of the same month, 5-nights-per-week Fokker F-VIIb/3m Brussels-London airmail is started.

Systemwide, approximately 8,000 people are carried on the year.

Seven Fokker trimotors are ferried to the Congo in early **1931**. In Europe on May 1, daily Fokker F-VIIb/3m service is opened Brussels-Copenhagen and Malmo and London-Malmo via Antwerp; a frequency to Berlin is started in **1932**.

Flights continue apace in **1933-1934**. On June 4 of the latter year, the 18 passenger Italian Savoia-Marchetti SM-73 trimotor makes its maiden flight and is ordered by the Belgian carrier.

On February 23, **1935**, chief pilot Prosper Cocquyt pilots a Fokker F-VII/3m Brussels-Leopoldville on the first regularly scheduled service from Belgium to the African colony. The multistop journey requires 56 flying hours over 5.5 days. On March 20, an F-VII/3m crashes near Bolongo in the Congo; Governor General Renard, his wife, and five others are killed. By summer, four Savoia-Marchetti S-73s are received.

These are employed to inaugurate Baltic Air Express service from London and Paris to Malmo via Brussels, Hamburg, and Copenhagen. They are also introduced on flights from Brussels to Ostend via Lille and from London to Ostend, Knocke, and Le Zoute. In November, in pool with **Regie Air Afrique, S.A.**, Sabena offers, by flying the Congo stretch, an every-two-weeks mail service from Europe to Elisabethville via Tripoli and Kano. In December, an SM-73 crashes at Tatsfield in Kent, England.

Flying the line in only four days, the carrier's Savoia-Marchetti S-73/3ms enter service on the trans-Africa Brussels to Leopoldville route in October **1936**.

Four Westland Wessex join the fleet in **1937**. On January 27, an SM-73 crashes near Oran, Algeria (12 dead). During the year, SABCA builds seven more SM-73s under license. These are employed to replace Fokker F-VIIb/3ms on the Brussels to Elisabethville service. An SM-73 crashes near Ostend on November 17; 11 are killed, including 5 from the Grand Ducal family of Heise bei Rhein.

Six Junkers Ju-52/3ms and three trimotor SM-83s join the fleet in **1938**. On November 6, the SM-83s assume the Brussels to Congo service, reducing the time between Belgium and Leopoldville to 3 1/2 days or 24-hrs. flying time.

Sabena's fleet at the outbreak of World War II in **1939** comprises 5 Ju-52/3ms and 11 SM-73s/83s, plus 2 Douglas DC-3s registered in April.

The year's enplanements total 34,100.

As the German spring invasion of Western Europe begins on May 10, **1940**, service on Sabena's European routes is suspended. Four SM-73s find their way into RAF No. 271 Squadron while three others and both DC-3s find their way to No. 24 Squadron. During the fighting on May 11, two SM-83s and a DC-3 are shot down over Merville, France; the fleet remainder is sent back to England.

In June, the last DC-3 and six SM-73s/83s are authorized to depart the U.K. for the Belgian Congo via Algeria. By the time of their arrival, Vichy is in control of the French colony. On August 27, four SM-73s are

taken over at Oran and two SM-83s and the DC-3 are captured at Algiers; all seven aircraft are passed to the Italians, with the Douglas eventually assigned to the Regia Aeronautica.

In the Congo, the seven local F-VIIb/3ms, four Westland Wessex, and six Ju-52/3ms are employed in support of **British Overseas Airways Corporation (BOAC)**. Operating as an independent Sabena division, they launch a weekly Takoradi-Cairo link via Lagos, Douala, Libeng, Stanleyville, Juba, and Khartoum in October.

The **British Overseas Airways Corporation (BOAC)**-supported Takoradi-Cairo route is halted at Juba in May **1941** and increased in frequency to twice weekly, the Juba-Cairo sector is flown by the British carrier's flying boats.

Sabena service is opened from the Gold Coast-Cairo in **1942** via Lagos, Bangui, Stanleyville, Khartoum and, after November 26 when that is terminated, from Lagos-Leopoldville. Meanwhile on November 3, the Takoradi-Juba service adds Entebbe as a stop. The African fleet is increased in **1943** with the delivery of Lockheed L-14s and L-18s from the U.S. On July 20, the Takoradi-Juba service, flown under **British Overseas Airways Corporation (BOAC)** contract, is again extended to Cairo. During the summer, an L-18 is captured by German forces; handed over to **Deutsche Lufthansa, A.G. (DLH)**, it enters German airline service on August 6.

In October **1944**, L-18s inaugurate Lisbon-Johannesburg flights via Leopoldville. On V-E Day, the carrier is flying a 20,000-mile African route network. Services from Brussels to Leopoldville are restored in July **1945** and flights from Brussels to London (Croydon) begin again on October 23. By year's end, routes are restarted to Paris, Stockholm, and various other European capitals.

The first DC-4s join the fleet in late spring **1946** and one of the four-engine Douglas transports arrives at New York (LGA) via Shannon and Gander on July 7, marking the first Brussels to U.S. commercial flight by the Belgian company.

A C-47 with three crew and four passengers fails its initial climb away from Haren Airport at Brussels on September 17 and crashes (one dead). The next day, a DC-4 with 7 crew and 37 passengers crashes at Dead Wolf Brook, 35 km. SW of Gander, Newfoundland, while on initial approach in bad weather (27 dead). The latter tragedy is recalled in Frank Tibbo's *Charlie Baker George* (Jespersen Press, 1993).

The last of 10,665 DC-3s built by the Douglas Aircraft Company in California is delivered to the carrier on March 21, **1947**. Regularly scheduled Brussels-New York DC-4 flights start on June 4. During the summer, Sabena becomes the first European airline to receive and place into service the DC-6, which thereafter flies a 15-hr. service to the Congo and 24-hr. service to Johannesburg, both from Brussels. On July 23, DC-6s open a new Brussels-London frequency via Copenhagen, following it up with DC-6 flights to New York, beginning in August.

Europe's first Convair CV-240s are ordered in **1948**. The first Brussels to New York all-cargo service begins on February 20. M. Gilbert Perier becomes president and his first year is tragic.

Coming in from Brussels in thick fog on March 3, a DC-3, the last one built that had been delivered to the airline just the year before and with 3 crew and 19 passengers, crashes at London's Heathrow Airport (20 dead).

A DC-4 with 7 crew and 25 passengers is destroyed in a fiery landing at Magazini, in the Congo, on May 12 (31 dead).

Another 20 die when an L-18, en route from Costermanville to Elisabethville in the Congo, disappears on September 1; its wreckage is found 3 days later and there are no survivors. During the summer and fall, a cooperative roundtrip route into the Belgian Congo from Kenya is operated with **East African Airways Corporation (EAAC)**, employing the Belgian line's L-18s.

The first CV-240s are placed on the carrier's European frequencies in **1949**. On April 6, Sabena is given exclusive rights over all regularly scheduled services to and within the Congo, acquiring two local independents, **Aeromas, S.A.** and **Air Congo (1)**, as a result.

Following closure of the Congo joint venture at the end of the second quarter due to low ridership, the three L-18s employed on that service are sold to **East African Airways Corporation (EAAC)**.

En route to Brussels on December 18, a DC-3 crashes just after take-off from Paris (eight dead).

On August 21, **1950**, in cooperation with the Belgian Post Office, the company establishes the world's first helicopter mail service, employing Bell 47Ds; the experimental operation is flown from Brussels to Turnhout via Antwerp and Liege. Flights begin from New York City to Germany on November 3 via Brussels.

North Atlantic enplanements, meanwhile, are 4,000 for the year.

The first DC-6Bs are ordered on May 12, **1951**. The pilot of a DC-3, with two other cockpit crew aboard, loses control after an engine takes fire and crashes near Gao, Mali, on July 24; there are no survivors.

Flights to Stuttgart commence in October. North Atlantic boardings double to 8,000.

On February 4, **1952**, the propeller of a C-47A with 4 crew and 12 passengers fails in flight, cuts cables, and causes a loss of control that subsequently forces the aircraft to smash into the ground at Kikwit, in the Congo; there are no survivors.

With the addition of a Sikorsky S-55, Maastricht is added to the helicopter mail route. Transatlantic bookings rise to 13,000.

On April 9, **1953**, it is announced that the company will open scheduled passenger helicopter service at the end of the summer linking Brussels and Liege with Cologne and Brussels with Saarbrücken via Luxembourg. The first of two DC-6Bs to join the fleet during these 12 months arrives on April 7. Sabena begins its summer fixed-wing schedule on May 5 by offering first-class services at standard fares.

On June 16, the carrier promises to open international service on September 1. On July 7, the first international helicopter flight from the continent to the U.K. is made when an S-55 arrives at London from Brussels via Lympne, and returns. Strasbourg is added to the transatlantic network the same day.

Europe's first scheduled intercity service begins, as promised, on September 1; four S-55s link Brussels with Rotterdam. Brussels to Bonn service begins on October 5, followed by Brussels to Lille flights five days later.

On October 14, a CV-240 with 4 crew and 40 passengers loses engine power, fails its initial climb out of Frankfurt on a flight to Brussels, and crashes at Kelsterbach, Germany; there are no survivors. It will later be determined that a heavy deposit of lead on the engine spark plugs caused them to short circuit.

On October 28, the first direct Brussels–Manchester–New York connection is made by one of the carrier's DC-6Bs.

While on final approach to Zurich on December 19 in bad weather, a CV-240 with 3 crew and 40 passengers descends below the glide path and crashes at Kloten, 2.5 km. short of the runway (1 dead).

A DC-6 steward falls to his death on December 30 when his plane's door unexpectedly opens over France. The year's North Atlantic bookings rise to 19,000.

Two DC-6Cs are delivered in **1954**. While airlifting pigs between London and Belgrade on June 3, a DC-3 with a crew of three Belgian nationals and a Briton, having strayed into Hungarian airspace near the Austrian border, is strafed by an unidentified MIG-15. All three Belgians are hit (the radio operator is killed), leaving copilot Douglas Wilson to land the aircraft at Graz, in the British Zone in Austria.

Railroads cut their running times from Brussels to Rotterdam, Cologne, and Lille on August 28 to compete with the Sabena helicopter service and on August 31, at the conclusion of the first year of rotary-wing service, the airline reports the transport of 13,000 passengers aboard the S-55s. Transatlantic boardings dip to 18,000.

A DC-6 with 8 crew and 21 passengers, disappears near Rome on February 13, **1955**, minutes after radioing that it is preparing for a routine landing; the wreck is found atop Mount Terminilla on February 21 (29 dead). On April 9, rotary-wing flights are inaugurated from Brussels to Eindhoven in the Netherlands and Duisburg and Dortmund in West

Germany. Sabena's helicopter service boards 20,000 passengers during the year, while North Atlantic bookings soar to 23,000.

On January 28, **1956**, the company announces plans for an extension of its helicopter network to Paris. Later in the year, orders are placed for Douglas DC-7Cs and North Atlantic passenger boardings ascend to 24,000.

When the DC-7Cs are placed in service in **1957**, they help boost transatlantic traffic to 40,000 out of total enplanements of 686,090. Brussels to Paris helicopter frequencies are initiated on March 3 and on June 4 pooled Bristol 170 Mk. 32 vehicle-ferry service is inaugurated with **Air Charter, Ltd./Channel Air Service, Ltd.** between Southend, England, and Ostend. The 100,000th passenger (cumulative) is boarded aboard the helicopter service on June 15. The carrier experiences a net loss on the year, beginning a series of annual reversals that will last until 1983.

Early in **1958**, three L-1049Hs are leased from **Seaboard World Airlines** for use during the Brussels Exhibition. Pooled flights with **Malev Hungarian Airlines** commence on March 17 over a route from Brussels to Budapest, via Prague.

While en route from Brussels to Leopoldville, a DC-7C with 9 crew and 56 passengers fails its climb away from an intermediate stop at Casablanca on May 18 and crashes (61 dead).

In pool with **Aeroflot Soviet Airlines**, Brussels–Moscow DC-7C service is launched on June 2, the first postwar flights between a non-Scandinavian European capital and the seat of the Soviet government.

North Atlantic traffic reaches 59,000.

Operations in the Congo as the decade ends and the **1960s** begin can only be maintained sporadically as that colony disintegrates into the civil war leading to the birth of the new nation of Zaire. At one point, the carrier's major task is the evacuation of Belgian nationals. The airline's first jetliner, a Boeing 707-329, is received on December 4, **1959**.

The first European airline to operate the Stratoliner, Sabena places its new B-707-329 into service on January 19, **1960**, with a return flight from Brussels to Leopoldville.

Just four days later, the new jetliner, back from the Congo, inaugurates the airline's first nonstop transatlantic route from Brussels to New York. As the Congo situation continues to deteriorate through the year, the Boeing makes several evacuation flights. On one of these, it transports a single Stratoliner record of 301 people nonstop from Leopoldville to Brussels.

Brussels to Montreal service is inaugurated weekly on April 1 and a new flight reservations system is unveiled at New York on May 4.

In the African colony, where elite paratroopers and other forces are now actively evacuating all Europeans from the northern and eastern Congo, the Democratic Republic of the Congo is born on June 30. Belgian troops are now reconcentrated in the southern part of the new country, around the Anglo-Belgian Union Minière du Haut Katanga mines at Kolwezi, at the Kamina air base, and along the rail lines linking the mines to Portuguese Angola and Northern Rhodesia. On July 11, Moïse Tshombe declares Katana an independent nation.

In December, weekly roundtrip frequencies are initiated to Mexico City. North Atlantic boardings fall to 49,000. These rebound to 79,000 in 1960, when systemwide bookings are 1,264,094.

The first of 10 Sud SE-210 Caravelle VINs is delivered on January 20, **1961**, as a CV-440 replacement.

While on long approach to Brussels' Zaventem Airport from a February 15 flight from Idlewild Airport, a B-707-329 with 11 crew and 61 passengers mysteriously crashes in the Belgian countryside near the destination point; there are no survivors from the crash and subsequent fire. Among the dead are 18 members of the U.S. figure skating team and 1 person killed on the ground. Although various hypotheses will be advanced, no exact cause for the carrier's second fatal transatlantic disaster in 14 years is determined.

A large mercenary army and air force is now assembled in Katanga, while the Congo Republic's leader, Patrice Lumumba, appeals to the UN for assistance in reintegrating the break-away province. UN peacekeepers

are sent in to supervise the withdrawal of Belgian forces, which retire from all of Zaire's provinces except south Katanga.

During the spring, two DC-4s are leased from **Starways, Ltd.** for use in the Congo under charter to the UN.

With 30% ownership by Sabena, the airline **Air Congo** is reconstituted on June 28, allowing the Belgian flag line to halt internal services in the now-independent nation. Sabena and its subsidiary, **Sobelair, S.A.**, hold a 30% stake and under a six-year contract, the Belgian line begins to train personnel for the new Congo carrier.

On September 17, one of the **Starways, Ltd.** DC-4s is destroyed on the ground at Kamina Airport, Congo, by Katangan fighter aircraft. The other is now turned over to **Air Congo**.

Having appealed for assistance in its reintegration of Katanga first to the UN, Congo President Lumumba now turns to the Soviet Union. Moscow dispatches 10-15 Ilyushin Il-14s, with their **Aeroflot Soviet Airlines** titles painted over in favor of hastily applied Congolese markings. These join five DC-3s requisitioned from **Air Congo** in transporting 1,000 Congolese National Army troops on December 31 to Luluabourg, capital of Kasai province, from where they are trucked toward Katanga where their drive is halted by rebel forces.

The Congolese civil war will intensify during the remainder of the year and into the next two, particularly after the death of Patrice Lumumba.

Transatlantic bookings top 65,000, as systemwide enplanements rise to 1,178,025.

On January 8, 1962, a Caravelle with 27 aboard and en route from Tehran to Istanbul is forced by U.S.S.R. fighter planes to land in Armenia after straying across the Soviet border because of mechanical trouble. The plane's passengers are flown to Brussels by **Aeroflot Soviet Airlines**, while four crewmen are left to ferry the repaired jetliner home four days later.

SE-210 service is now extended to the Middle East, supplementing European routes begun the previous year. North Atlantic boardings jump to 85,000 as additional B-707-329s become available, but systemwide, enplanements drop to 1,384,359.

The carrier moves to bolster its international network in 1963 to help make up the revenues lost with the Congo. The fleet grows to include 51 aircraft with star billing given the 9 SE-210s and 6 B-707-329s.

One of the latter is employed, beginning in March to inaugurate weekly roundtrip services on behalf of **Air Congo** from Leopoldville to Brussels. On April 3, a DC-6B is sold to **Transair Sweden, A.B.** Passenger traffic still declines, however, to 1,345,991.

The workforce stands at 9,431 in 1964. The Congolese civil war ends when President for Life Mobutu Sese Seko declares the Democratic Republic of the Congo to be Zaire.

A total of 52 Sabena aircraft fly only 811,294 passengers systemwide as efforts continue to compensate for the loss of the Congo network. Revenues are \$81.39 million.

Routes are extended to Tunis, Lagos, Abidjan, and Dubrovnik in 1965 as one additional SE-210 and a B-707-329 join the fleet. Direct Brussels to Kigali flights commence and several piston services are replaced by the French-made jetliners. On May 20, a DC-6B is sold to the German Luftwaffe.

Passenger boardings top the million-mark, climbing to 1,014,751. The workforce is now 9,804.

One B-707-329 is replaced in 1966 and four B-727-129s are placed in service. As a result of the previous year's Congo coup, most of Sabena's property in the former colony is seized, along with its in-country funds; traffic rights to Elisabethville, since renamed Lubumbashi, are cancelled.

When Sabena aircrews strike on May 20, 30 employees are stranded in New York City, lacking funds and quarters. Charging they had not participated in the job action and that their employer has locked them out, they are forced to take odd jobs to support themselves, meanwhile granting embarrassing newspaper interviews. On June 5, the Belgian flag line agrees to fly the men home.

Enplanements for the year total 1,175,661.

The fleet in 1967 comprises 9 Boeing 707-329s, 10 SE-210s, 1 DC-7C, 3 DC-6Bs, 8 DC-3s, and 4 CV-440s. A B-727-29C is received and enters service on July 22.

Passenger boardings for the year rise 6% to 1,243,146.

Airline employment is 10,228 in 1968. A message communication service is installed at Brussels National Airport. Two B-707-329Cs are delivered, allowing the carrier to operate an all-jet fleet on its regular services during the summer.

Coming in from Brussels on July 13, a B-707-329C with five crew and two passengers mysteriously descends below its minimum safe altitude, hits a line of trees, and crashes 8 km. N of the airport at Lagos, Nigeria; there are no survivors.

Later in the fall, two of the company's DC-6Bs are converted into swing-tail freighters.

Freight traffic gains 23% over 1967 and passenger boardings climb to 1,257,519. Revenues are now \$104.97 million.

Three additional B-707-329Cs and a Fokker F.27 are added in 1969; orders are placed for B-747-100s. Beginning on April 1, Sabena and **Austrian Airlines, A.G.** begin Vienna-New York service via Brussels on a fifty-fifty shared basis. The company joins the ATLAS maintenance consortium with **Air France, Alitalia, S.p.A., Deutsche Lufthansa, A.G.,** and **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.).**

The workforce is 10,519 and enplanements reach 1,368,030. A total of 106 new employees are hired in 1970.

A DC-3C freighter is damaged in a bad landing at Amsterdam on May 8; there are no fatalities. The aircraft is sufficiently repaired to be ferried to Antwerp on June 1, where it is withdrawn from service and broken up.

The first two B-747-129s, scheduled to be delivered before Christmas, arrive on November 19 and December 4. Throughout the fall quarter, Sabena undergoes a complete organizational study.

Passenger boardings rise 7% to 1,470,000 and cargo is up 6%. The string of net losses continues. In terms of freight carried, the company now ranks as the world's 19th largest airline; with 10,625 workers, it is 21st in employment.

Although majority control is maintained, Belgian government ownership is reduced to 54.72% in 1971, with the remaining 45.28% of holdings being acquired by both public and private interests. This change brings about a complete organizational change and a new and aggressive marketing campaign.

The fleet totals 2 B-747-129s, 12 B-707-329s, 5 B-727-29/29Cs, and 7 SE-210s, 2 of which are sold. Orders are placed for three DC-10-30CFs. The new Jumbojets enter service on the Brussels-New York route in February.

Traffic for the year dips below the 1.46-million level.

The last of five SE-210s to be sold begin disposal in 1972. On May 8, four armed members of the Black September movement, two men and two women, hijack Flight 517, a B-707-329 with 11 crew and 91 passengers en route from Brussels to Tel Aviv, following its takeoff from an intermediate stop at Vienna. Upon landing at Lydda International Airport, Tel Aviv, the pirates threaten to blow up the plane and its passengers unless Israel releases 300 Palestinian guerrilla prisoners and flies them to Egypt.

The next day, on order of the government, Israeli commandos disguised as mechanics storm the plane, ordering all of the hostages to fall to the deck. They open fire, killing two terrorists and an Israeli woman passenger who stands up during the gun battle. The two women are captured, one of whom, along with two passengers, has been wounded. The lady pirates will be tried and given life prison sentences.

Enplanements for the year grow to 1,466,850.

Seven passengers are injured when a Caravelle on a Brussels-Barcelona flight must make an emergency landing at Campostela, Spain, on March 12, 1973, following the pilot's violent maneuver to avoid colliding with another aircraft.

The fiftieth anniversary of the airline is celebrated in May; company statisticians estimate the carriage of 22.5 million passengers since May 1923. The first of three ordered DC-10-30CFs is placed in service.

A newer computerized reservations system, SAPHIR, is installed, a new modernized logo is introduced, and 10 B-737-229s are ordered. En route from Paris to Casablanca on December 23 with 106 aboard, a Caravelle crashes into the Rif Mountains of Morocco; there are no survivors.

Passenger boardings jump 11.1% to 1.68 million while the number of freight ton-kilometers flown rises 2.5% to 240.2 million.

The employee population numbers 9,965 in 1974. Sabena is the first airline to recognize the possibilities of the Jumbojet combi and has its two B-747-129s converted to Dash-129C standard in February and March. In conjunction with **Sobelair, N.V.**, a "Holiday Abroad" marketing program is begun. Seven B-737-229s are delivered and placed into service on European routes.

Boardings accelerate 3% to 1,693,000.

A total of 175 employees are laid off in 1975 or not replaced. Four B-737-229QCs are delivered in June and two DC-10-30CFs in October. These find ready use as the carrier begins to emphasize air cargo, along with "Holidays Abroad" charters to Africa, the Middle East, and Europe.

Enplanements remain level at 1,681,000 and it is too soon to see an increase in cargo.

The workforce in 1976 is 43 fewer still. In January, the B-727-29Cs are sold to the Belgian Air Force.

Freight traffic accelerates by 28% during the year to 366.7 million FTKs and passenger boardings move upward 5% to 1,764,000.

Orderly retirement of the B-707-329s begins in 1977. Chairman Gaston Coppee and Managing Director Marcel Goossens oversee a workforce of 9,848 and a fleet that comprises 2 B-747-129s, 1 B-707-329B, 5 B-707-329Cs, 3 DC-10-30CFs, 10 B-737-229s, 4 B-737-229Cs, and 6 Cessna 310s.

A total of 1,945,920 passengers are carried.

Ministry of Finance official Carlos van Rafelghem is appointed chairman in 1978 and launches a severe austerity program designed to cut losses that have been accumulating since 1957. New service is inaugurated to Atlanta and Doha.

Freight jumps 20.6% and passenger boardings pass the two million mark for the first time, up 3.4% to 2,027,128.

Airline employment in 1979 is decreased 0.9% to 10,021. A new in-flight magazine is launched as is a route to Dublin. Three Airbus Industrie A310s are ordered.

Cargo grows 12.6% to 504.18 million FTKs as passenger bookings ascent a slight 0.8% to 2,043,101.

The workforce is cut another 0.3% in 1980, to 10,064. A second weekly polar service to Tokyo is opened and new routes are extended to Chicago, Detroit, and Brazzaville. On July 8, direct Brussels-Chicago flights begin. A new Brussels-National freight terminal is occupied in September; it is capable of processing 300,000 tons of cargo annually. Two DC-10-30CFs are delivered during the fourth quarter.

As world economic difficulties increase, enplanements dip 3.4% to 1,974,000 and freight falls 9.2% to 467.97 million ton-kilometers.

The last B-707-329 is retired in 1981 and DC-10-30CFs are placed on all-African services south of the Sahara. Several new subsidiaries (fueling, catering, etc.) are formed.

Boardings climb 4% to 2,052,971, but cargo is off 1.3%. A huge \$76.5-million loss is suffered.

The employee population is reduced by 8.4% in 1982 to 8,798, and the salaries of remaining personnel are reduced. In January, Chairman Van Rafelghem joins with other airline CEOs in designing a strategy to force the closure of the British low-fare independent **Laker Airways, Ltd.** The effort succeeds in February.

On March 15, the carrier's management, led by Van Rafelghem, asks its workers to accept wage cuts of 17% to help save \$21 million and also asks the Belgian government to increase the airline's capitalization and give it permission cut or end services to some unprofitable European

destinations. Faced with possible bankruptcy, the employees, on April 1, accept the request wage package.

Later in the year, DC-10-30CF service is started to Dar Es Salaam, Bujumbura, and a new point at Kilimanjaro, while routes to Hamburg, Moscow, and Warsaw are closed.

Passenger boardings dip 2.5% to 2,002,625, but freight rises 5.5% to 487.5 million FTKs. The net loss is cut to \$44.3 million, but expenses are still \$27 million higher than the total earnings of \$731.8 million.

The workforce is cut another 6.1% in 1983 to 8,260.

Boardings decline 2.3% to 1,956,886 while cargo grows a more healthy 1.2% to 493.55 million FTKs. Revenues total \$679.6 million and produce an operating profit of \$23.8 million and the first net profit (\$398,771) since 1957.

The payroll swells 4% in 1984 to 8,592. Two A310-222s are delivered early in the spring and are placed on European routes and a few African services. New services are started to Bamako and Luxembourg as the carrier adopts its second new logo and corporate identity within a decade.

Passenger boardings climb 3.8% to 2,032,000 while freight grows 8.2% to 533.85 million FTKs. Net profits are up 2.8% to \$460,070 on earnings of \$708.6 million.

Employment is up in 1985, by 3.9% to 8,260. The fleet's two B-747-129Cs are introduced on services to central and southern Africa. Frequencies to the U.S. are increased and a new service to Boston begins on April 1. The Scandinavian cities of Oslo and Goteborg are added to the network.

Passenger bookings rise 7.7% to 2.19 million, while freight accelerates 8.8% to 580.96 million FTKs. The operating profit is \$162.7 million and net income of \$4.5 million is recorded, allowing the largest return to shareholders in decades. As the year closes, the pioneer ranks 23rd among all world airlines in terms of the amount of freight carried.

The third A310, a Dash-322 is received in the spring of 1986. On June 10, the first B-747-329C is received and orders are placed for five B-737-329s. Together with **KLM (Royal Dutch Airlines, N.V.)**, the 8,260-employee carrier takes shares in the regional **Delta Air Transport, S.A.**

Bound from Detroit to Boston with 78 aboard on April 8, an A310-222 drops suddenly when it hits turbulence, slamming passengers and food trays into the cabin ceiling and injuring at least 11 customers and 1 flight attendant.

In November, a joint service is launched with **British Caledonian Airways, Ltd. (BCAL)**; Belgian B-747-129Cs with Sabena crews begin daily service Brussels-London-Atlanta. The fear of terrorism on the North Atlantic, particularly among American travelers, helps to prevent a traffic surge as anticipated.

Customer boardings do rise 2.1% to 2,233,746 and cargo is up a slight 0.4% to 583.25 million FTKs. These advances allow profits of \$31 million (operating) and \$3.24 million (net).

Airline employment is increased by 3.7% in 1987 to 9,466. In May, A310-222 flights are begun to Niamey, Lome, Cotonou, and Luanda. Thrice-weekly DC-10-30CF service is launched from Brussels to Toronto. The carrier suffers a difficult year as strikes by company employees, job actions by ATC personnel, work stoppages in other European nations, plus a freight price war, combine to insure cargo and financial downturns.

As of November, all five ordered B-737-329s are received, one of which is leased to the charter subsidiary **Sobelair, N.V.** The subsidiaries Sabena Building, S.A., Sabena Skyshops, S.A., Sabena Technics, S.A., and Sabena Leasing, S.A. are established on December 3.

Enplanements total 2,336,307. Freight ton-kilometers operated decline 5.2% to 553 million while expenses threaten the fruits of \$1.09 billion in revenues, an 18.4% boost. The operating profit drops \$10 million to \$21.2 million while net gain declines to \$1.86 million. The year's bright note is a 5.7% increase in passenger boardings to 2,362,152.

The fleet in 1988 includes 2 B-747-129Cs, 1 B-747-329C, 5 DC-10-30CFs, 2 A310-222s, 1 A310-322, 12 B-737-239s, and 4 B-737-329s.

Orders are outstanding for 5 A340-300s, 1 B-747-329, 4 B-747-329s, and 12 B-737-529s. Weekly frequencies are increased in January to a number of destinations: Barcelona to 9, Lisbon to 7, Munich to 18, Rome to 10, Boston to 4, Montreal to 3, and Toronto to 3. With the acquisition of BCAL by **British Airways, Ltd. (2)**, the joint Atlanta service is concluded.

Passenger boardings jump 10.3% to 2,604,578 while cargo swells 21.5% to 650.53 million FTKs. The operating profit is \$33.52 million.

Company employment is cut by 29.9% in 1989 to 6,632. Plans are made and announced in late June for the creation of a new **Sabena World Airlines, S.A.**, which would be owned by the current Sabena Belgian World Airlines, S.A. (60%), **British Airways, Ltd. (2)** and **KLM (Royal Dutch Airlines, N.V.) (20% each)**. The new entrant, which will be operated independently of its Belgian parent, will concentrate on the operation of a large European hub-and-spoke system centered on Brussels.

Meanwhile, the company must cancel 15 flights because of labor problems on September 8 and endures a 24-hour pilots' strike on September 9-10.

Customer bookings shoot up 8% to 2,811,792 and cargo inches in the same direction by 0.8% to 660.35 million FTKs. Costs conspire to cause a \$36.6-million operating loss.

The payroll is increased by 18.9% in 1990 to 7,884. Political and economic considerations conspire to prevent the establishment of a new three-party-owned Belgian airline, as the European Commission, in July, sends a statement of objections to each of the partners. The same month, an A310-222 becomes the first civil aircraft in scheduled service to use satellite communications as part of its ATC.

Effective September 9, Sabena travelers are able to claim awards as part of the **USAir** Frequent Traveler frequent flyer program. Joint venture frequencies commence with **Maersk Air, A.S.** in October between Brussels and the Danish city of Billund, home of Legos toys.

A cooperative agreement for joint operations is signed with **All Nippon Airways Company, Ltd. (ANA)** at year's end.

Although the year's passenger boardings ascend 12.6% to 3,165,833 and freight rises a slight 0.3% to 662.63 million FTKs, expenses bring a \$200-million loss.

The number of employees inches up another 0.2% in 1991 to 7,900. The fleet now includes 2 leased A310-222s and 1 A310-322, 9 B-737-229As, 4 B-737-229ACs, 6 B-737-329s, 4 B-737-429s, 1 leased B-737-529, 1 chartered B-747-129Cs, 2 B-747-329Cs, 2 de Havilland Canada DHC-8-311s, and 4 owned and 1 chartered DC-10-30CFs. The turboprops are operated under feeder contract by **Schreiner Airways, B.V.** and orders are outstanding for five A340-211s and seven B-737-529s.

In January, operations of the subsidiary **Delta Air Transport, S.A.** are cut in two as a new regional, **DAT Wallonie, S.A.**, is established to serve the French-speaking southern part of the country. Shareholding is divided between Sabena (49%), Meusinvest (25%), **Delta Air Transport, S.A.** (16%), and SMAP (10%). Pierre Godfroid, former head of European operations for the U.S.-based Campbell Soup Co., becomes chairman/CEO early in the year as the Belgian government grants a monetary infusion. During the first quarter, **DAT Wallonie, S.A.** commences operations and joint services with ANA are inaugurated, employing Sabena's B-747-329C, between Tokyo-Moscow-Brussels westbound and Brussels-Tokyo eastbound.

The Danish Supreme Court on June 26, fines six foreign airlines a total of Dkr 452,000 (US\$64,570) for bringing illegal refugees to Denmark without visas or identity documents. The decision in the case against European operators Sabena, **SAS (Scandinavian Airlines System)**, **KLM (Royal Dutch Airlines, N.V.)**, and the defunct **Interflug**, plus **Iraqi Airways** and **Singapore Airlines, Ltd.** has been eagerly awaited by the some 50 airlines flying into Denmark.

The companies have argued that it is not their responsibility to do the work of the police when checking in Denmark-bound passengers. Nor could they be expected to tell the difference between genuine and false visas and passports, or prevent passengers from tearing up their pass-

ports once on board the plane, as has often happened. The Supreme Court is unconvinced by their arguments, and orders the airlines to pay a fine of Dkr 8,000 per passenger illegally brought to Denmark.

A code-sharing agreement is signed with **Air Canada, Ltd.** in September under which the Canadian carrier agrees to purchase blocks of seats on Sabena's thrice-weekly nonstop roundtrips between Brussels and Montreal; additional Air Canada, Ltd. passengers are able to win frequent flyer credits on the Belgian flights.

During the fall, it is announced that the financially troubled state carrier will be rescued by its neighbor, **Air France**, and through recapitalization of Bfr 6 billion (\$179.6 million) provided by the Belgian banking consortium Groupe Bruxelles Lambert. Because of a domestic political crisis, negotiations are suspended in October.

Recession and world political difficulties force traffic down. Customer bookings fall 4.7% to 3,018,209 while cargo slides 26.7% to 485.93 million FTKs. Income exceeds expenses and allows profits: \$72 million (operating) and \$1.5 million (net).

The workforce is reduced by 8.3% in 1992 to 9,784 and the fleet is increased through the lease of an A310-304 from **Deutsche Lufthansa, A.G.** and the delivery of five B-737-529s. On January 16, 50,833 shares are acquired in Internationale Aerospace Management Company. Another order for B-737-529s is cancelled on March 24, but is quickly taken up by **CSA Czechoslovak Airlines**. On April 5, the Belgian government's transport minister, Guy Coeme, announces approval of the long-delayed code-sharing arrangement between its national carrier and **Air France**.

The latter, together with its Belgian financial partners, acquire a \$179.6-million, 37.5% shareholding in Sabena, placing the shares under the control of a new holding company two-thirds owned by Air France. Under the accord, the two will initiate a Paris-Brussels shuttle service. Additionally, work on a three-year plan is begun designed to reconfigure the company's European route network into an extensive hub-and-spoke operation based on Brussels' Zaventem Airport. Plans designed to combine the carrier's African expertise with that of **Air France** subsidiary **UTA (French Airlines)** are discussed.

An obstacle to the partnership is raised in August when Sir Leon Brittan, head of the EC's Competition Commission, recommends that the arrangement be reviewed by the Commission in light of its stringent merger regulations. During the fall, a block-space agreement begins with **Aer Lingus Irish Airlines, Ltd.** on flights between Brussels and Dublin. On December 31, interest in Compagnie des Grands Hotels Africains, S.A. is fully depreciated.

Passenger boardings resume their upward path, climbing 4.1% to 3,142,294, but freight declines by 20.5% to 386.43 million FTKs. Revenues are up 4.3% to \$1.6 billion and expenses rise 1.2% to \$1.57 billion. The return to profitability is marked by an operating surplus of \$28.38 million and net gain of \$184,000. The Sabena Group profit is \$25 million.

In 1993, Chairman/CEO Pierre Godfroid oversees an employee population of 9,500, down 2.9% from the previous year.

En route from Tel Aviv to Brussels with 147 aboard on March 7, a B-747-329C makes an unscheduled landing in Belgrade after the airline receives a telephone warning that 4 terrorists would hijack the Jumbo jet; after a thorough and fruitless search, the plane proceeds.

A de Havilland Canada DHC-8-311s is leased from **Schreiner Airways, B.V.** and is employed on March 28 to inaugurate four-times-per-day scheduled flights from Brussels to London (LCY), replacing those previously operated by **Brymon Airways, Ltd.**

New international services are launched from Brussels to Atlanta, Kano, and Freetown and from Venice to Barcelona. On the other hand, the company, having flown the route since 1957, suspends its service to Montreal (YUL).

On June 1, the carrier enters into a block-space agreement with **Delta Air Lines** on a route from Atlanta to Brussels. Also during the month, the subsidiary **Transair, S.A.** is merged with the **Air France** subsidiary **Jet Tours Belgique, S.A.** and **Jet Tours** to form **Transair Interna-**

tional, S.A. Sabena takes a 42% stake, Jet Tours has 39%, and the remainder is acquired by various travel agencies. Two A340-211s arrive in June, but quickly depart Brussels under charter to *Air France*.

To stave off collapse, the airline's board approves and Chairman Godfroid announces wage cuts of 15% on July 12. The cuts are part of a severe cost-cutting plan designed to save BFr 2 billion (\$56 million) in three years. When more than 50% of the workforce rejects the plan, Chairman Godfroid tenders his resignation on August 4. Once three of the major employee unions agree to accept his austerity package in September, Godfroid withdraws his threat to resign and agrees to continue on. The pilots, facing a wage reduction of 17%, are not a party to the pact. In December, the Belgian government begins negotiations with **Swissair, A.G.** over ways to reduce Sabena's labor costs and raise its capital.

Restructuring of the route network continues apace and helps customer bookings swell 16.2% to 3,650,701. Cargo rises 3.7% to 400.7 million FTKs and revenues for the Sabena Group climb to \$1.49 billion (the airline's share is \$1.38 billion). The group loses a total of \$125.5 million. The airline's losses are \$35.94 million (operating) and \$158.96 million (net).

Airline employment is reduced by 3.8% in 1994 to 9,200 and the fleet is expanded by the addition of two A340-311s, which are also leased to **Air France**. Two DC-10-30s are leased from **Deutsche Lufthansa, A.G.** and a new alliance is signed on January 16 with the American major **Delta Air Lines**, covering block-space and code-sharing on the Brussels-New York routes.

A310-222 joint flights commence daily between Brussels and New York (JFK) and Atlanta. During the last week of July, the EU Commission allows French government aid to **Air France** on the condition that the flag carrier make no effort to acquire or increase its stake in other airlines, including the 37.5% shareholding in Sabena taken in 1992.

Following receipt of a detailed report from the investment bank Lazard Freres analyzing the deteriorating relations between the two national airlines, Sabena Chairman Godfroid meets with **Air France** CEO Christian Blanc during the third week of October to request that the French airline sell its stake.

The code-sharing agreement with **Delta Air Lines** is expanded during the fall and takes effect on November 1. Under its provisions, the two serve Brussels-Boston with five weekly return frequencies and Brussels-Chicago with six roundtrips. Additionally, the pact allows the Belgian and American carriers to jointly operate flights from Brussels over Sabena's routes to the German cities of Berlin, Dusseldorf, Frankfurt, Hamburg, Munich, and Stuttgart. Brussels-Manchester flights are increased to four per day and thrice-daily fifth freedom services are inaugurated in November from Manchester to Rome via Brussels.

Passenger boardings for the year leap ahead by 16.7% to 4,261,562 while freight swells 5.3% to 422.07 million FTKs. Revenues jump 7.8% to \$1.98 billion, while expenses are up only 4.2% to \$1.95 billion. There is a \$28.1-million profit and the net loss "improves" to \$35.94 million. The company's \$678-million long-term debt still continues to create a significant financial burden.

There is no change in the workforce during 1995. After years of resistance on the part of French officials, the EU forces them to open Paris (ORY) to other European airlines; Sabena begins flying into the airport on January 2. No negotiations with unions can be initiated for two months after March. Although the government will appoint mediators, no discussions can be implemented.

Discussions between the Belgian government and **Swissair, A.G.** concerning Sabena's financial plight, which have been on-going since December 1993, appear to bear fruit in early spring. Brussels officials and the Swiss airline let it be known that the latter carrier may purchase up to 49.5% shareholding in the Belgian airline. On April 20, the European Commission enters the picture with a statement that it will only approve this plan when it receives guarantees that any agreement will not distort competition within the European Union.

The Belgian government on April 28 announces that it has decided to approve the terms under which it will sell a 49.5% stake in Sabena to the

Swiss major and expects finalization of a compact within the next two weeks. Sabena executives announce the acquisition on May 2 and two days later, **Swissair, A.G.** officials announce the financial arrangements. In exchange for almost a half interest in the Belgian airline, the Swiss carrier will invest \$228.1 million in Sabena. The arrangement represents acquisition by **Swissair, A.G.** of a \$210.6-million voting-rights equity holding and a \$17.5-million investment in non-voting Belgian law participation certificates.

In addition, **Swissair, A.G.** agrees to lend the publicly held Societe Federale d'Investissement, S.A. (SFI) \$140.4 million with which Brussels can pay back **Air France** for its 37.5% minority stake. The Belgian government, via SFI, will also inject \$52.6 million while a consortium of Belgian investors will provide an extra \$70.2 million capitalization. State ownership of Sabena will drop from 61.8% to 50.5%; options also exist that would allow **Swissair, A.G.** to increase its stake or for the Belgian government to buy back the Swiss stocks if national security requires nationalization.

Although both carriers continue for legal purposes to exist as independent entities, the deal will create the fourth largest airline group in Europe. **Swissair, A.G.** is permitted to appoint five members to the Sabena 12-person board of directors, with a sixth coming from the Belgian shareholders; the twelfth person on the board, its chairman, must be a Belgian or European Union national with approval of both the Belgian shareholders and **Swissair, A.G.**

During the third week of July, the European Commission formally, but with provisions to preserve competition, approves the \$228.1-million **Swissair, A.G.** 49.5% stake in Sabena. To satisfy EC antimonopoly concerns, the two carriers pledge that, over the next five years, they will: (1) make slots available at Brussels, Zurich, and Geneva for any new entrants unable to obtain their own; (2) not increase frequencies on the four principal routes between Belgium and Switzerland more than 25% without EC permission; and (3) will conclude interline agreements with any new entrants wishing to fly the routes and permit them entrance into the frequent flyer programs of the two majors. In essence, the approval represents the application of EC air transport rules upon Switzerland, a non-European Union nation; the Swiss, looking for a way into the EU air market, offer no objections.

A major operational and marketing alliance is now formally signed between the two carriers. Under its terms, they will henceforth cooperate on ground services, information services, sales and reservations, cargo shipments, link their frequent flyer programs, and code-share on routes from Brussels to Geneva and Zurich.

Following intense competition between the Fokker 70 and Avro RJ85, Sabena, during the first week of September, places an order for 23 of the latter type. The jetliners will be operated by Sabena's regional affiliate, **Delta Air Transport, S.A.**, following delivery of the first unit in November.

The **Swissair, A.G.** partner **Austrian Airlines, A.G.** steps forward in October to sign a joint venture and dual-designator agreement with Sabena. The pact will provide for code-sharing between Brussels and Vienna and the sharing of codes on flights from Brussels via Vienna to Ankara, Salonica, and Tirana and from Vienna via Brussels to Strasbourg, Bristol, Newcastle, and Manchester.

After holding a total of 26 meetings since May 22 in an effort to gain "social dialogue" with the company's unions, Chairman/CEO Godfroid mails a letter to all 9,500 employees on November 22. The letter unilaterally suspends all salary agreements and calls for a three-year wage freeze, the end of all cost-of-living increases, an increase by 5% in the number of work orders, and institution of other more flexible work rules. This rigid cost-cutting plan is required, the chairman writes, to effect recovery.

Calling the proposals "pure provocation," union delegates, speaking for cockpit crews, flight attendants, and ground workers, immediately vote a one-day walkout for November 29 and promise further strikes if the measures Godfroid has set forth are actually implemented. The November work stoppage will be followed by additional walkouts and wildcat strikes into the new year.

Although enplanements swell 17.4% to 5,000,951, cargo dips 1.6% to 415.13 million FTKs. Income and loss figures are not provided; however, it is reported that the net loss is down to \$56.57 million, atop an operating gain of just \$77,000.

Airline employment grows 3% in 1996 to 9,766. The year opens poorly in the midst of political controversy, walkouts, and wildcat strikes over the desperate attempts at restructuring and labor neutralization implemented the previous November by Chairman/CEO Godfroid.

After a divisive first two months, the need for new leadership becomes apparent to all involved. During the first week of March, Chairman/CEO Godfroid, Chief Operating Officer Gery Daenick, and Vice President-Operations Raymond Alvoet all resign. The former is immediately replaced as president/CEO by Paul Reutlinger, a longtime **Swissair, A.G.** vice president and management board member. At the same time, Almanij, N.V. Chairman/CEO Jan Huyghebaert is appointed as Sabena's board chairman while former board member Philippe Suinen rejoins the group as vice chairman. To help calm labor difficulties, Belacom Manager of Union Relations Robert Wauters is appointed the carrier's "labor relations mediator" for the next two months.

Three British Aerospace (BAC) 1-11-510EDs are subleased from **European Aviation Air Charter, Ltd.** while the two A340-311s out on lease are returned by **Air France**. In April, the carrier begins to code-share with **TAP-Air Portugal, S.A.** on flights to Macau.

Block-seat code-sharing flights with **Delta Air Lines** are expanded in June when a second daily L-1011 nonstop is instituted by the American major between New York and Brussels.

A code-sharing, blocked-seat agreement begins with **Virgin Express-EuroBelgium Airlines, Ltd.** during the last week of October covering nine daily return services from Brussels to London (LHR). VAX employs new B-737-46Ms wet-leased to Sabena on the route.

The restructuring plan, delayed by labor difficulties in the first two quarters, is finally implemented in November. The same month, a block-seat, dual-designator service is inaugurated with **Finnair O/Y** between Brussels and Stockholm and Brussels and Vienna.

At the same time, the existing dual-designator pact with **Delta Air Lines** is expanded. Ten new U.S. cities will be added: Fort Lauderdale, New Orleans, Cincinnati, Washington, D.C. (IAD), Dallas/Ft. Worth, Houston, Denver, Salt Lake City, Los Angeles, and San Francisco.

The last DC-10-30 and all three A310s are sold in December. Also at this time, the company, acting in an independent role, agrees to market and sell cargo space for **Swissair, A.G.**

Customer bookings move up 3.5% to 5,173,568 but freight falls, declining by 22% to 323.85 million FTKs. Revenues for Sabena Group inch up 2.1% to \$1.72 billion, but expenses jump 9% to \$1.84 billion. The previous year's operating gain turns into a \$131.47-million loss and, due largely to the tardiness in restructuring, the net loss plunges to \$270.13 million, the largest loss in 10 years.

Airline employment is cut 1.5% in 1997 to 9,669. The December cargo agreement with **Swissair, A.G.** takes effect on January 1. Also during the first week, two DC-10-30s are briefly chartered from **Deutsche Lufthansa, A.G.**; they will fly for three to four months until the A340-211s are returned from **Air France** and refurbished.

On January 8, officials in Geneva announce that **Swissair, A.G.**, together with its European partners Sabena and **Austrian Airlines, A.G.**, will be deepening their relationship with **Delta Air Lines** in the U.S. on February 1. The intention is to increase for all the share they enjoy in the North Atlantic air travel market.

On behalf of Sabena, **Virgin Express-EuroBelgium Airlines, S.A.** now doubles its Brussels-Barcelona services by taking over all five of Sabena's daily roundtrips.

Also during the month, **Swissair, A.G.** and Sabena cargo operations in the U.S. are merged. Sabena now signs a memorandum of understanding for four A330-200s.

Transatlantic, code-shared, revenue, dual-designator flights commence on February from all U.S. gateways to Brussels, Zurich, and Vienna. The American press reports on February 22 that Sabena will be-

come the first foreign airline to serve Greater Cincinnati-Northern Airport, now celebrating its fiftieth anniversary year.

When the summer schedule is implemented at the end of March, the company offers flights to a number of new or upgraded destinations. Services begun include four times a week to Beirut, daily to Moscow, thrice weekly to Palma de Mallorca. A code-sharing agreement, signed with the South African regional carrier **Nationwide Air Charter (Pty.), Ltd.** now takes effect, as the Belgian major places its codes on Nationwide services from Johannesburg to Cape Town, Durban, George, and Port Elizabeth.

Virgin Express-EuroBelgium Airlines, S.A. five-times-a-day replacement flights to Rome's Fiumicino Airport commence on March 30, along with new twice-daily flights to London (LGW) flown by Virgin Express with Sabena Avro RJ85s and B-737-229As.

A chartered DC-10-30, painted in a special 101 *Dalmatians* color scheme and wearing "Flying Together With **Swissair**" titles, completes the company's last service with this type on April 27, a flight to Brussels from Chicago (ORD).

The February U.S. press story becomes fact on May 15 when, in cooperation with its new code-sharing partners, the Belgian line launches A340-311 flights from Brussels to the Queen City.

From there, passengers may obtain connections on Delta flights to New Orleans, Memphis, Austin, Denver, Detroit, Dallas, Los Angeles, Phoenix, San Diego, and San Francisco. A special guest on the inaugural flight is 85-year-old James Prettyjohn of Bainbridge, Georgia, who had been a passenger on a 1928 Sabena flight in Belgium.

Also in May, the U.S. DOT approves the carrier's plans to expand its blocked-space, code-share agreements with **Swissair, A.G.**, **Delta Air Lines**, and **Austrian Airlines, A.G.** to 30 U.S. cities beyond Atlanta, New York, and Cincinnati. In return, Delta will purchase seats on the alliance partners' flights to eight cities beyond Brussels, Zurich, and Vienna.

To mark its fiftieth anniversary of service to the U.S., Sabena, on June 30, announces that fares for two, roundtrip from Cincinnati to Brussels, will be just \$50 and will be awarded on a first-come, first-serve basis. The response is overwhelming for the two flights that will leave on September 25 and October 8.

During the summer, flights, previously scheduled for April, are started to Toulouse and Cairo.

On August 27 **Virgin Express-EuroBelgium Airlines, S.A.** is operating a replacement service into London (LHR) from Brussels. Flying as Sabena Flight 603, the B-737-229A with 29 passengers and on ILS approach, comes within 200 ft. horizontally and 600 ft. vertically at 2,400 ft. with **British Airways, Ltd. (2)** Flight 818, a departing B-757-236 with 29 aboard. Both aircraft, in cloud, respond to ATC instructions and avoid disaster, although the near miss is caused by initially faulty ATC.

Two leased DC-10-30s are returned to **Lufthansa German Airlines, A.G.**

During the fall, an innovative plan is put forward by management to acquire a new fleet of narrow-bodied Airbus aircraft over the next several years to replace the company's aging B-737s. After a special purpose financing consortium, 50% owned by Sabena and **Swissair, A.G.**, is set up to provide funding, \$1.4 billion in orders would be placed with Airbus Industrie for 26 A319s, 5 A320s, and 3 A321s, which would begin delivery in 1999.

The scheme immediately brings protest from the union representing Sabena Technics, the company's maintenance and overhaul division. The mechanics fear that the unit will lose upwards of 1,000 jobs when the carrier stops repairing Boeings, many of which are outsourced from such other airlines as **Federal Express, Air France, British Airways, Ltd. (2)**, and **KLM (Royal Dutch Airlines, N.V.)**, in addition to Sabena and **Swissair, A.G.**

Airbus Industrie steps in and promises to direct repair contracts to the division and guarantees 600,000 hours of overhaul work. The Sabena Technic union is appeased and the carrier's board of directors approves the acquisition plan on November 18.

During October, a block-seat agreement begins with **Regional Airlines, S.A.** aboard a Belgian aircraft flying between Brussels and Nantes.

It is reported in the aviation press during the fall that possible merger discussions are held with the Belgian long-haul budget airline **City Bird, S.A.**

In November, Sabena's President/CEO Reutlinger and **City Bird, S.A.** Chairman Victor Hasson hold a joint news conference. Sabena will, indeed, take a 15% equity stake in City Bird Holdings, parent of the airline. In return, **City Bird, S.A.** will operate routes on the major's behalf from Brussels to Montreal, São Paulo, and Newark.

The two also announce that they will share two jetliners, each with its own cabin crews, in-flight catering, and cabin decor. On the outside, both will wear Sabena livery.

In the company's largest aircraft order ever, Sabena, in early December, harmonizes its fleet with those of **Swissair, A.G.** and **Austrian Airlines, A.G.** by requesting \$1.4 billion worth of Airbus Industrie product. Delivery of 26 A319s, 5 A320s, and 3 A321s will begin in January 1999.

At the same time, a strategic alliance is entered into with **TAP-Air Portugal, S.A.**

On December 20, **Delta Air Lines** begins to code-share on company A340-311 flights from Brussels to Kampala. The service, the first for the American carrier into sub-Saharan Africa, will allow passengers through service from Uganda via Brussels to Atlanta, New York (JFK), Cincinnati, Chicago (ORD), and Boston.

For the year, passenger boardings ascend 32.8% to 6,872,146 while cargo advances a moderate 6% to 343.41 million FTKs. Revenues dip 0.2% to \$1.77 billion, while expenses fall 7.5% to \$1.76 billion. There is, happily, an \$8.732-million operating profit while the net loss is cut to \$54.86 million.

Airline employment stands at 9,669 in 1998 and the fleet, 66.7% of which is Stage III certified, includes 36 aircraft at the beginning of the year: 27 B-737s, 2 B-747s, 3 A330-301s, 2 A340-211s, and 2 A340-311s.

Sabena, on January 12, exercises an option to acquire 16% in **City Bird** parent City Bird Holdings for BFr 68 million (US\$1.9 million); it also has an option for a further 8.4% by November 1999.

The **TAP-Air Portugal, S.A.** pact takes effect in March. Dual-designator services commence at this time between Brussels and Lisbon.

At the same time, the company implements a strategic partnership with **AOM French Airlines, S.A.** The two begin to coordinate their schedules at Paris (ORY) to allow seamless connections for passengers originating in Belgium and wishing to travel on to Toulon, Nice, and Marseilles, as well as to such overseas destinations as French Guiana.

Delta Air Lines on March 13 begins to code-share on the daily B-737-329 roundtrips operated by Sabena between Brussels and Oslo.

A second MD-11 ordered by **City Bird, S.A.** is delivered to Sabena at the end of March and is dispatched to the Swissair modification center at Zurich for cabin modifications.

On March 29, the carrier joins with **Swissair, A.G.**, **Austrian Airlines, A.G.**, **TAP-Air Portugal, S.A.**, **THY Turkish Airlines, A.O.**, and **AOM French Airlines, S.A.** to form the "Qualiflyer" alliance. Although members will retain their own identities, they will engage in a long list of joint activities, including ground handling, lounges and ticket offices, and frequent flyer benefits. Collaborative activities that will be added as soon as details can be worked out include maintenance and overhaul, cargo, in-flight catering, information technology, and duty-free concessions.

On April 5, a major code-sharing agreement, originally announced on February 19, begins with **Comair**. Under its terms, the carrier will share codes on the American regional's flights from Cincinnati to Akron/Canton, Dayton, Detroit, Des Moines, Kalamazoo, Lexington, and Louisville. Europe-bound passengers from those points may connect at Cincinnati for Brussels and links to Sabena's European and African networks.

Due to enter service in just three days, the City Bird, S.A. MD-11 being modified at Zurich is damaged by a scissors lift. Repairs are quickly made as both companies await the delivery of a third MD-11 by the end of the month.

One each **City Bird, S.A.** MD-11 and B-767-333A are painted in Sabena colors and reconfigured to include business and economy cabins for Sabena passengers and a separate City Bird cabin. On April 15, in conjunction with **Delta Air Lines**, the two airlines begin to code-share with two these aircraft on **City Bird's** daily roundtrip route from Newark to Brussels, where passengers are able to connect with Sabena flights elsewhere.

Following the threat of **Virgin Express Airlines, S.A.** to move to the U.K. to skirt Belgium's high taxes and costly personnel benefits, President/CEO Reutlinger now seeks government approval to shift the contracts of his pilots to Switzerland and to hire Swiss flight attendants. Reutlinger also points out that, as soon as Switzerland is able to join the European Union, **Swissair, A.G.** will increase its Sabena stake from 49.5% to 67%, thereby reducing the Belgian government's stake to 33% minority holding.

During the month, the company inaugurates a Quick Transfer Center at Zaventem Airport to facilitate connections. The turnaround time of the short-haul aircraft servicing 70 European points from the Brussels facility is cut to just 30 minutes.

The Sabena/City Bird MD-11, on May 6, launches twice-weekly roundtrips from Brussels to Montreal (YUL). The new service marks a return to the Canadian community, flights to which were suspended in 1993.

The code-share arrangement with **Delta Air Lines** is expanded on May 15 at three of its five U.S. gateways. A second daily A340-311 dual-designator service begins from Atlanta to Brussels. At the same time, A340-311s increase their flights from Cincinnati to Brussels from five times a week to daily.

Five weekly A340-311 roundtrips are simultaneously started from Boston to Brussels. Capacity on the route from Chicago to Brussels is boosted from an A340-311 to a B-747-329C, with service provided daily, except Saturdays.

The code-sharing agreement with **Virgin Express Airlines, S.A.** is deepened on May 17 when the two begin several-times-a-day return service from Brussels to London (STN). The company celebrates its seventy-fifth anniversary on May 23.

Delta Air Lines, on June 1, places its code aboard Sabena flights from Brussels to Conakry, Guinea. It also begins dual-designator flights with Sabena on June 6 from Brussels to Banjul, Gambia, again, as two days earlier, employing Sabena equipment.

The code-sharing arrangement with **Comair** is expanded on July 15 to include service to Brussels from Toledo, Indianapolis, St. Louis, Charlotte, and Birmingham. The new dual-designator flights allow Comair passengers from the five cities to travel to and from Brussels via Cincinnati under Sabena's "SN" code.

Just after landing at Brussels upon the completion of an August 29 service from New York, Flight 542, an A340-311 with 10 crew and 255 passengers, suffers the collapse of a landing gear and slides off the runway. Once the plane is stopped, all aboard are evacuated down emergency slides and four people are slightly injured.

On September 3, in the second Brussels airport incident within a week, an A330-311 is being taxied to a gate where it will load 229 passengers for a flight to New York. The aircraft accidentally rams a **Sobellair (Societe Belge de Transports par Air, S.A.)** B-737-329 just outside of its hangar. The departure of the Airbus passengers is delayed. It is anticipated that the damaged nose of the A340 can be repaired within days, but the serious damage to the little Boeing will keep it out of service for weeks.

The code-sharing pact with **Delta Air Lines** grows again on September 6 as the American major places its designator aboard Sabena's twice-weekly A340-311 roundtrips between Brussels and Lome, Togo.

The Belgian government announces new rules on October 5 covering the expulsion of illegal immigrants. The new orders are implemented following the death of a Nigerian woman being sent back to Africa aboard a Sabena aircraft and include the abolition of the use of pillows to stifle the cries of the deportees.

During the fourth quarter, new services are inaugurated in nine additional city-pairs, as well as to Newark, Montreal, and São Paulo.

In December, a new "corrective" color scheme is introduced, first aboard an A340-211. With the theme "Flying from the Heart of Europe," the new livery features blue engine nacelles, bolder titles (replacing the previous shadow titles), and solid blue tails, with the familiar "S" in blue and white lined circle.

Customer bookings this year surge 27.3% to 8,749,582. On \$2.24 billion in revenues, a \$335.78-million net profit is posted. This is the largest gain in the company's history and its first of significance in over 40 years.

Leaders of East Africa end their 2 1/2-year embargo of Burundi on January 26, 1999; Sabena, which has honored the sanctions since their imposition in July 1996, indicates that it will resume flights to Bujumbura in early April.

Two months behind schedule, the first A321-211 from the November 1997 order is delivered on March 2. It enters service on March 8.

Also during March, a five-year code-sharing agreement is signed between **City Bird, S.A.** and **Lignes Aeriennes Congolaises, S.A.** Under its terms, the new Belgian entrant begins to fly passengers and cargo between Europe and Kinshasa on a weekly basis, using LAC flight codes. The arrangement allows LAC to resume international air links abandoned in 1992.

Flight delays and cancellation of services into southern and southeast Europe occur following the beginning of NATO's Operation Allied Force bombing campaign against Yugoslavia on March 24. The united military alliance is attempting to force the government at Belgrade to revise its policy towards its province of Kosovo.

The new schedule is introduced on March 28 and features a number of additions, upgrades, and changes. Flights from Brussels to Boston become daily, while those from Brussels to Atlanta are now flown nonstop six times a week. All Sabena services to the U.S. are operated in code-share with **Delta Air Lines**.

Brussels to Johannesburg roundtrips become daily, while additional frequencies are laid on to Abidjan, Lome, Bamako, Conakry, and Kinshasa. The total number of European cities grows to 75 with the addition of 10 new destinations: Belfast, Birmingham, London (STN), Eindhoven, Faro, Nuremberg, Palma de Majorca, Valencia, Ajaccio, and Catania.

In addition, thrice-weekly RJ85 roundtrips are launched between Brussels and the Channel Island of Jersey by **Virgin Express-EuroBelgium Airlines, S.A.**

Additional upgrades are announced on March 31. Beginning on April 19, the company will introduce a luxury bus return shuttle between Brussels Airport and Valenciennes, France, seven times a day. Thrice-daily RJ100 roundtrips are announced for Verona, Italy, beginning on September 5 with daily RJ100 roundtrips simultaneously beginning from Brussels to Seville, Spain.

A public row between **City Bird, S.A.** and Sabena erupts in Brussels on April 27 over the former's month-old dual-designator pact with **Lignes Aeriennes Congolaises, S.A.** Claiming that the new arrangement is a surprise action that will damage the pioneer line that operates between Brussels and Kinshasa four times a week, Sabena demands \$9.22 million in damages. The company also indicates that it is seeking an arbitration ruling that City Bird's actions constitute a unilateral termination on its part of the commercial arrangement with Sabena.

City Bird President/CEO Victor Hasson calls a news conference to rebut the Sabena action. Hasson complains that Sabena had not wanted the LAC link in the first place and should have known about it given that its 11.2% stake in City Bird includes a seat on the City Bird board. Both companies, which do not suspend their existing pact, indicate that there are no plans to terminate their cooperative agreement and acknowledge that arbitration may take six months to a year.

Chairman Reutlinger informs the airline's shareholders, assembled for their annual meeting at Brussels on April 30, that passenger traffic has slowed considerably in April due to the Kosovo crisis. No exact figures are available.

After both **British Airways, Ltd. (2)** and Sabena pull out of the tender process, **South African Airways (Pty.), Ltd.** and its protege, **Alliance Air (African Joint Air Service)**, are the only prequalified bidders to make an offer for the available 49% stake in Uganda Airlines Corporation, now to be known as **Uganda Airlines, Ltd.** On April 30, the Ugandan government, via the cabinet subcommittee for privatization, cancels the tender process and invites SAA to negotiate the purchase during the week of May 3.

Due to the unfavorable economic situation in Brazil, Sabena cuts the number of its weekly roundtrips from Brussels to São Paulo from five to three on June 1. Simultaneously, the number of weekly MD-11 roundtrips from Brussels to Montreal is boosted from four to six.

The company enters into a European marketing alliance with **American Airlines** and **Swissair, A.G.** on June 22. As soon as government clearances are received, American and Sabena will code-share on each other's flights between Chicago and Brussels and on Sabena services between Boston and Brussels. American and Swissair will code-share on flights between Chicago and Zurich and on Swissair flights between Zurich and both Miami and Boston.

While en route from Copenhagen to Brussels on July 8, Flight 774, an Avro RJ85 with 4 crew and 82 passengers, suddenly receives a TCAS alert concerning an impending possible collision with another plane. The pilots, flying 5 miles above the sea near Amsterdam, plunges 1,000 ft. There is no other plane; the terrifying dive had come as a result of a warning-system malfunction.

The carrier takes delivery of its first A320-214 on August 27; the new Airbus operates its inaugural revenue service on August 30 when it flies from Brussels to Oporto. Sabena is now the first airline to operate all of the European airliner manufacturer's fly-by-wire types.

At the beginning of October, Sabena sells public tickets for the final flight of its last B-747-329C, an October 29-30 overnight service from Cincinnati to Brussels. It also agrees to allow employees to purchase at-cost tickets (\$60) for a final flight over Belgium; fearful that an insufficient number of these fares will be snapped up to fill a Jumbojet, the airline also invites journalists. The press office puts out a release noting the final service.

It is announced by the participants on October 13 that the "Atlantic Excellence" alliance is being dissolved in order that its members might join other world airline groupings. Sabena, **Delta Air Lines**, **Austrian Airlines, A.G.**, and **Swissair, A.G.** will honor existing travel agency and corporate sales agreements through December 31 and end their code-sharing arrangements on or before August 5, 2000. The second of two A320-214s to be delivered since late August is accepted on October 14.

With the end of the summer season in late October, the carrier and **Virgin Express, S.A.** halt their dual-designator service between Brussels and London (LGW), freeing the Sabena B-737-329 employed for the routes the two code share from Brussels to Barcelona and Rome. The two partners continue to offer code-shared flights from Brussels to London (LHR) nine times weekdays, with a reduced number of flights on weekends.

With pomp and ceremony, those holding tickets board the last B-747-329C at 3 p.m. on Saturday, October 30, for an hour-and-a-half aerial tour of Belgium. It turns out, however, that so many "final flights" have been booked that Sabena must operate four 100% load factor trips. Upon the giant plane's return to Brussels from the last of these the next day, it is officially retired.

In partnership with **American Airlines**, five-times-a-week A330-301 roundtrip nonstops commence, also on October 31, between Brussels and Washington, D.C. (IAD). Thrice-weekly A340-211 return service is launched on November 2 from Brussels to Madras. The year's third A320-214 is delivered on November 19.

A memorandum of understanding is signed with Airbus on December 10 for the delivery, in 2001 and 2002, of two A340-313Xs; the deal will later be cancelled.

When partner **Swissair, A.G.** increases the number of its weekly frequencies from Zurich to Bombay and New Delhi on December 7 from

9 to 11, the two carriers, counting Sabena's three flights to and from Chennai, share 14 weekly Indian frequencies.

The last of six A319-112s delivered during the year is accepted on December 22. Also, by the end of the year, the management, marketing, and sales functions of the carrier and **Swissair, A.G.** in the U.K and Ireland have been combined into a single umbrella organization known as the Airline Management Company, Ltd. Swissair's General Manager-UK & Ireland Kirk Albrow is AMC general manager, with his Sabena counterpart, Marc Nellis, as deputy.

Passenger boardings accelerate 13.9% to 9,965,000. Although revenues total \$2.07 billion, there is a \$14.1-million net loss.

Airline employment at the beginning of 2000 stands at 10,638, an 11% increase over the previous 12 months. The first of seven A319-112s to be delivered during the year is accepted on January 26.

The only B-737-229A that the carrier had repainted in its new livery completes its final revenue service on February 6 from Bilbao to Brussels; the next day, it is ferried down to Paris (LBG) for disposal.

A code-sharing agreement is signed with **Air Littoral, S.A.** on February 18. Under its terms, the Belgian major places its designator on all of the French regional's services, except those from Nice to Geneva and Marseilles to Zurich.

A tripartite signing ceremony is held in New Delhi in March for a pair of new cargo agreements. In one, **Emery Worldwide Express** acquires 80% of the daily cargo capacity of **Indian Airlines, Ltd.** between Madras and Singapore. The other, between **Swissair** and **Emery** permits Emery to book belly space aboard Sabena passenger flights and **Swissair, A.G.'s** dedicated thrice-weekly DC-10-30F freighter service to Africa and beyond from Basel.

The dual-designator flights previously operated with **Delta Air Lines** between Brussels and New York (JFK) end on March 25. With the beginning of the summer schedule the next day, a large number of frequencies from Brussels are increased, including to Newark from 14 to 21, Chicago O'Hare, Barcelona, and Rome from 6 to 7, Washington, D.C.'s Dulles International Airport from 5 to 7, Montreal from 5 to 6, Entebbe and Nairobi from 4 to 5, Marseilles and Vienna from 3 to 5, and Edinburgh from 3 to 4.

An A340-211, wearing Sabena colors and host stickers, is leased to **Khalifa Airways, S.A.** on April 5.

Service to Kinshasa in the Democratic Republic of the Congo, suspended since April 14 due to the explosion of an ammunition cache at the airport, are resumed on April 18. Three aircraft had been destroyed and 109 people killed in the disaster, with another 258 wounded.

The final documents are signed on April 26 for SAirGroup to become Sabena's new majority owner by taking over the Belgian government's stake and increasing its own equity holding from 49.5% to 85%. The deal is subject to ratification by a referendum of Swiss voters on May 21 (which turns out to be positive) of a new air transport agreement between Switzerland and the EU, as well as approval of the Belgian parliament.

The sixth and last A330-223 is delivered on May 26.

Employing its 10th long-range A340-311 received on May 29, the company doubles its daily return frequencies from Brussels to New York (JFK) from one to two on June 1.

Also in June, the carrier joins **Swissair, A.G.** and **American Airlines** in placing a new dual-designator arrangement before the U.S. Department of Transportation for approval. Under its terms, the three would code-share on flights from Zurich to Bombay and New Delhi and from Brussels to Chennai, India. The idea will be rejected by the regulators in early August.

Arrangements are completed with **Schreiner Airways, B.V.** under which Schreiner will operate a DHC-8-102 on Sabena's service from Brussels to Sheffield. The wet-leased turboprop, painted in full Sabena colors, is delivered on July 5.

At the end of July, SAirGroup President/CEO Philippe Bruggisser announces creation of a "Conseil de Surveillance," a revised management structure for the about-to-be-merged French carriers **Air Liberte, S.A.**,

Air Littoral, S.A., and **AOM French Airlines, S.A.** Chaired by Mr. Couvelaire, the body's executive management will be headed by Paul Reutlinger, current Sabena president/CEO, who will move to Paris to guide the fusion of the three into one, but will also become vice chair of the Belgian airline's board of directors. Christopher Mueller becomes the new Sabena president/CEO.

Dual-designator service previously operated with **Delta Air Lines** from Brussels to Atlanta ends on August 5 as Sabena moves its terminus from Hartsfield International Airport to Dallas (DFW), flying seven weekly A340-311 roundtrips, code-shared with **American Airlines**, into the Texas airport beginning the next day.

The normal landing expected at Brussels for Flight 3604, an Avro RJ85 incoming from Marseilles on September 19, is turned into an emergency after the cockpit window cracks.

Late in the third quarter, President/CEO Muller institute a cost-cutting program designed to save E357 million (\$300 million).

Already operating twice daily into New York (JFK), the company announces on October 20 that it will halt its flights into Newark in April. In addition, because the route is unprofitable, the company will, at the same time, also suspend service from Brussels to Johannesburg. Additionally, the company's building in New York City and Bujumbura will also be sold. These moves are part of Plan Blue Sky, a cost-cutting measure designed to improve the airline's performance by \$318 million. Part of the savings will also be generated, it is hoped, from "social measures," i.e., labor.

A second daily A319-112 service is added on October 29 from Brussels to Malaga. The number of daily return frequencies from Brussels to Athens is increased from 2 to 3, Venice and Glasgow from 3 to 4, Marseilles from 3 to 5, Belfast from 1 to 3, and Frankfurt from 4 to 5. New thrice-weekly routes are introduced between Brussels and Sofia, while four-times-a-week roundtrips commence from Brussels to Budapest. This enhanced schedule is operated with a mix of A319s, B-737s, RJ100s, and RJ85s.

The next day, following a break in service since 1996 caused by the imposition of sanctions on Burundi, weekly roundtrip service is resumed between Brussels and Bujumbura. Also on October 30, the carrier becomes the first European airline to return to Liberia following its civil war; Sabena, which had stopped flying to the country on October 30, 1990 because of security concerns, inaugurates weekly MD-11 roundtrips from Brussels to Monrovia.

October 30 also sees an increase in the number of weekly A330-223 return frequencies from Brussels to Nairobi from 5 to 6 and from Brussels to Kinshasa from 3 to 5.

Sabena's economic health is not good as it continues to suffer sharp financial reversals. At the beginning of November, SAirGroup executives approach the Belgian government seeking assistance, pointing out that the carrier is still majority-owned by the state, which has a duty to help solve its fiscal distress. Under EU rules, state aid is not permitted; however, a capital injection by shareholders may be qualified as an investment and thus be legal.

On November 2, Sabena baggage handlers at Brussels stage a brief morning strike to protest a lack of safety at the national airport following an armed robbery of men working for **Deutsche Lufthansa, A.G.** two days earlier. The stoppage forces Sabena to cancel 32 local flights. Emergency baggage handling by Sabena executives and others allow the company's international flights to depart on schedule.

All services between Belgium and Switzerland and Boston, Chicago (ORD), Miami, and Washington, D.C. (IAD) are operated as code-shares by November 21.

After 16 1/2 years of service with the fleet, the B-737-229A type is retired from the fleet on November 30 after completion of the last revenue flight. Aircraft OO-SDN wears a special sticker commemorating the event. The "classic" 737 fleet continues to number 6 Dash-329s, 3 Dash-429s, and 6 Dash-529s.

Thrice-weekly B-737-329 roundtrips are inaugurated on December 1 from Brussels to both Sofia and Bucharest. Also on December 1, Sabena

and **LTU International Airways, K.G.** begin to operate joint services from Brussels to Dusseldorf, Frankfurt, Munich, and Stuttgart; Sabena provides the flight equipment.

While on final approach to Bujumbura on its December 5 service from Brussels, Flight 877, an A330-223 with 150 passengers is hit by 11 bullets sprayed from the ground, one of which penetrates an engine. Although the aircraft lands safely, two passengers are reported slightly injured. The Airbus will remain on the ground at the Burundian capital for several days undergoing inspection before it is allowed to return to Europe. After spending a night in a local hotel (at company expense), 82 Nairobi-bound passengers are transferred to another service. Needless to say, Sabena again immediately suspends service to the African nation while the incident is investigated. The principal suspects are Hutu rebels, opposed to the Tutsi-dominated government of President Pierre Buyoya.

It is reported on December 8 that the carrier has begun discussions with **KLM (Royal Dutch Airlines, N.V.)** concerning possible commercial cooperation. KLM, it seems, is interested in taking over the Sabena route from Brussels to Johannesburg that is being suspended in March.

The company notes on December 15 that it will actually halt service to Johannesburg on January 29, three months earlier than previously reported. The route closure will also end the company's code-sharing arrangement with **Nationwide Air Charter (Pty.), Ltd.**

The A330-223 shot at in Burundi arrives under ferry at Bordeaux via Nairobi on December 19. Repairs should be completed shortly. The same day, another A319-112, the last of seven acquired this year, is received. Faced with a glut of capacity at year's end, two A340-311s are grounded. Cash reserves fall to less than 25% of the company's capitalization and huge losses are expected for the year.

Passenger boardings during the 12 months accelerate 9.7% to 10.9 million. Although revenues climb 9.3% to E2.44 billion, there is a gigantic E325-million (\$288.1-million) net loss.

A profit crisis in January will see SAirGroup CEO Bruggisser step down. The board will announce an end to the corporation's aggressive airline acquisition policy and name **Crossair, Ltd.** CEO Moritz Suter to manage its airline group (Crossair, **Swissair, A.G.**, and Sabena). Later in the month, the Belgian government will promise to inject \$90 million into the ailing carrier; SAirGroup will provide another \$142.5 million. An extraordinary shareholders meeting on February 8 will determine whether to proceed with a new business plan or simply shut the historic carrier down. With union support, the SAirGroup's board in mid-February will approve a financial rescue package to keep Sabena from imminent collapse. SAirGroup will assume responsibility for SFr150 million of the SFr250-million (\$230-million) bailout agreement reached earlier with the government of Belgium.

SABER AIR, LTD.: Singapore (1969–1972). In 1969, the government of Singapore acquires an 80% stake in the privately held air taxi **Singapore Air Service, Ltd.** and changes its name. Nonscheduled passenger and cargo services continue as before, employing the company's Douglas DC-3, de Havilland DHC-6-100 Twin Otter, and Cessna lightplanes.

The U.S. supplemental carrier **Overseas National Airlines (ONA)** takes minority shareholding in February 1971. Seeking a foreign carrier to operate long-haul charters on its behalf, ONA outfits the company with a wet-leased Douglas DC-8-61, which flies charters between Singapore and London.

The new association, and indeed the company itself, does not last very long. Six months later, the ONA contract is ended and Saber Air affiliates with **British Caledonian Airways, Ltd.**, which provides it with a wet-leased Boeing 707-399C Stratoliner. Long-haul charters and inclusive tour flights continue until 1972 when the Singapore government closes the company down, contending that it needs but one company to operate foreign flights.

SABER CARGO AIRLINES: 4825 Express Drive, Charlotte, North Carolina 28219, United States; Phone (704) 359-8456; Fax (704) 359-

8275; <http://www.webcom.com/saber>; Code SBR; Year Founded 1977. Saber is founded at Charlotte, North Carolina, in late 1977. Regularly scheduled services commence in April 1978 with a fleet comprising 2 Beech 18s, 1 Aerostar 600, 2 Cessna 207s, 1 Cherokee Lance, and 2 Cherokee Sixes.

FTKs operated in 1979, the first full year of operations, are up to 883,146 and in 1980, the all-cargo carrier provides services to 12 cities with 26 daily departures.

Freight climbs to 1.581 million FTKs on the year as 760 tons of cargo are moved.

Several new Southern routes are opened during 1981 from a new hub developed at Atlanta. The PATCO air traffic controllers' strike and attendant ATC restrictions cause a slight 3.8% decline in cargo traffic, down to 1.521 million FTKs.

Airline employment accelerates 55% in 1982 to 31 and the fleet now includes the Beech 18s, Cessna 207s, and the Aerostar; the other aircraft have been replaced by a Cessna 402C and four Piper PA-31-310 Navajos.

Freight increases 47.5% to 2.24 million FTKs.

The workforce is again dramatically boosted in 1983, up 37.8% to 51, and the fleet is increased by the addition of 2 Swearingen Metro IIs, 1 Hamilton Turboliner, and 1 Bell 206 JetRanger. Destinations served include Lakeland, Tallahassee, Montgomery, Atlanta, Charleston, Columbia, Asheville, Charlotte, Fayetteville, Greenville, Raleigh, and Wilmington. Contract service flights are also undertaken.

Cargo skyrockets 161.3% to 5.86 million pounds.

The payroll is cut 20% in 1984 to 20 and the fleet now comprises 12 Douglas DC-3s, 1 Convair CV-580, 2 Fairchild-Swearingen Metroliners, 2 Beech 18s, 1 Hamilton HA1 Turboliner, 2 Cessna 402s, 2 Cessna 207s, 3 Piper Aerostars, and 1 Bell 206 JetRanger. A new hangar and office facility is built at Charlotte.

Freight traffic continues to grow, climbing 41.2% to 8.27 million pounds.

Another Metroliner and a third Cessna 402 join the fleet in 1985. They cannot help to reverse a traffic downturn as cargo plunges 27.7% to 5,981,000 pounds.

Traffic resumes its forward march for the 51-employee carrier in 1986, growing 14% to 6,821,000 pounds.

Unfortunately, it turns around and marches downward in 1987, off by 13.7% to 5.88 million pounds.

The 51-employee carrier employs a fleet of 27 aircraft in 1988: 2 DC-3s, 12 Beech 18s, 3 Cessna 402Bs, 2 Cessna 207As, 4 Piper PA-31-310 Navajos, 3 Hamilton Turboliners, and 1 Bell 206B.

Cargo carriage plunges another 23% to 4,531,000 pounds.

Both fleet and personnel are unchanged in 1989 and freight continues to free fall.

Poundage transported falls again, by 57.1% to 1,943,000.

Operations continue apace in 1990–1994 with CEO Michael W. Dockery and Operations Director Stanley Anthony employing 2 Douglas freighters and 2 Beech 18s.

In 1995–1999, the workforce includes 16 full-time and six part-time pilots. One Beechcraft is removed and replaced by three additional DC-3s, a Cessna 402A, and a Bell 206B JetRanger helicopter.

The year 2000 is a costly for President Michael Dockery's concern.

En route from Denton, Texas, on the final leg of a July 8 service to El Paso that had originated at Charlotte–Douglas International Airport, a Cessna 402A with a pilot and a passenger loses power and makes a forced landing near Del City, Texas. Although the aircraft is substantially damaged, neither person aboard is hurt.

While landing at Charlotte–Douglas International Airport on September 26, the right main landing gear of a DC-3 collapses. The Douglas is seriously damaged, but its two-person crew is uninjured.

SABOURIN LAKE AIRWAYS, LTD.: Canada (1961–1998). SLA is established at Cochenour, Ontario, in 1961 to provide regional charter, contract service, and air taxi flights to destinations in the surrounding area. Operations continue during the next three decades.

Scheduled third-level services are inaugurated in the Red Lake area beginning in **1990**. Passengers are transported with 1 Beech 99, 1 Cessna 206, 2 de Havilland Canada DHC-2 Beavers, 1 DHC-6 Twin Otter, and 3 Piper PA-31-310 Navajos. Two additional Twin Otters are acquired in **1991**.

Two Douglas DC-3s are added for freight operations in **1992** and in **1993–1994** President Ross Mamakeesic oversees 40 employees and increases his fleet with 2 DHC-3 Otters.

Flights continue in **1995–1998** and during these years, Richard McDole takes charge. His fleet comes to comprise 2 each Beech 99s, DC-3s, and DHC-3 Otters, plus 1 Twin Otter and 1 Cessna 185.

SABRE AIRWAYS, LTD.: 12 The Merlin Centre, County Oak Way, Crawley, West Sussex, England, RH11 7XA, United Kingdom; Phone 44 (1293) 410 727; Fax 44 (1293) 410 737; Code SBE; Year Founded 1994. Upon the November 29, **1994** collapse of **Ambassador Airways, Ltd.**, this carrier is formed by **Air Foyle, Ltd.** to take over the deceased airline's charter contracts. Links are maintained with Inspirations-owned Goldcrest, a seat broker. Revenue operations, on the Air Foyle license, commence on December 17 employing a pair of leased Boeing 737-204As first flown by **Britannia Airways, Ltd.**

Two B-727s, a Dash-203A and a Dash-276A are chartered in **1994** and flying from Birmingham, London (CTN and LGW), Manchester, and Newcastle, the company visits all of the usual European charter destinations, including Turkey, Portugal, Spain, Greece, Italy, France, Bulgaria, and the Canary Islands.

In addition to the two B-737-204s that it has based at London (LGW) at the beginning of **1995**, Sabre bases its B-727-2D3A and B-727-276A at Manchester over the summer. From these locations, the carrier will again offer holiday flights on behalf of the broker Goldcrest. Sabre receives its own certificates and license on December 13, at which time the company is reformed into a freestanding concern. Keith Newnham is appointed managing director and flights continue as before.

Enplanements in **1996** total 516,000. Although the relationship with Goldcrest is continued, the company establishes its own commercial department as well. Orders are placed for two B-737-800s.

Airline employment grows by a huge 74.8% in **1997** to 236. After suffering verbal intimidation towards the crew due to delays and after route alterations are announced, a company pilot refuses to risk takeoff with 187 rowdy passengers from London (LGW) for a flight to Sicily on August 11.

The passengers, a mix of Italian and British, who are later provided with a replacement flight, complain that the airline has treated them unfairly and that accusations of their unruly behavior are unfounded.

A total of 277,000 customers are flown on the year.

Early in **1998**, Sabre undertakes code-sharing flights with **Sabena Belgian World Airlines, S.A.** over the route from London (STN) to Brussels. Merger discussions begin with **Virgin Express, S.A.** On May 18, Virgin Group Chairman Richard Branson announces that **Virgin Express-EuroBelgium Airlines, S.A.** is close to establishing a new holiday subsidiary, based in the U.K., to be known as **Virgin Sun Air, Ltd.** Lift for the new package tour airline, to be formed in partnership with Virgin Holidays, Ltd., will be provided by Sabre Airways under contract starting in 1999.

Between May and July, an A320-211 is subchartered from the new Egyptian carrier **Lotus Air, S.A.E.** A second will also be acquired later. The first of two B-737-8Q8s to be chartered from ILFC on the year arrives on July 27. When the ship enters revenue service a week later, it is the first of its type to be operated by a U.K. carrier.

Recruitment is begun in November for 250 reservations agents for the new Virgin Sun package tour business to be launched in the spring.

Customer bookings accelerate 27.8% to 354,000; 117,000 FTKs are also operated.

Airline employment is increased 1.7% to 240 at the beginning **1999**.

On May 1, the new **Virgin Sun Air, Ltd.** takes wing; lift is provided employing a pair of subleased Sabre A320-214s. Revenue charters are operated from London (GTW) and Manchester to Mediterranean and European holiday destinations.

On May 7, the British charter carrier files a \$1-million suit against **Kiwi International Air Lines** for damages sustained to a jet engine it had leased to the bankrupt U.S. scheduled operator.

Customer bookings increase 23.5% to 445,000, but cargo traffic drops 19.1% to 114,000 FTKs. The workforce at the beginning of **2000** totals 240. At the beginning of the year, a B-727-225A is leased to MSP-based **Sun Country Airlines**; it will be returned in May.

Barnet-based Libra Holidays Group, which had ended its relationship with **Caledonian Airways, Ltd.** at the end of the year, establishes its own Libre Aviation division under the direction of ex-**Cyprus Airways, Ltd.** CEO Demetris Pandazis. Plans are announced for the establishment of a Cypriot charter airline named Sky Airlines, Ltd., that will launch service in spring 2002. Meanwhile, LHG Managing Director Andreas Drakou purchases a 33% stake in Sabre during February, receiving the option to purchase another 30% by March 31 and an extra 30% by year's end. The deal secures immediate seat capacity for Libre with Sabre, but is subject to CAA approval, which Managing Director Newnham now seeks.

As part of the arrangement with Libra Holidays Group, Sabre had pledged to withdraw its B-727s, replacing them with newer aircraft. On June 9, Sabre Managing Director Newnham notes that the carrier will withdraw its B-727s by October, including several reengined units to be returned to service shortly.

The first reengined B-727, a Dash-276A, arrives at London (LGW) on July 8. It wears an all-white livery with red titles.

Arrangements are completed in July for the lease of two Next Generation B-737-81Qs and a B-737-8Q8 to **Miami Air International**. The first two will enter service in November and December, with a third arriving the following summer.

The company's B-727-225A is chartered to **Sun Country Airlines** at Minneapolis (MSP) in late October for use on the charter line's winter schedule.

Libra Holidays Group joins with London (LGW)-based Excel Aviation, a seat-brokering company, to complete the paperwork on November 20 for acquisition of a 78% majority stake in Sabre. The two quickly receive government approval for the takeover. Former **Caledonian Airways, Ltd.** Managing Director Eamon Mullaney now becomes chairman/CEO. Current Sabre Managing Director Newnham will retain his post until January when his deputy, Johathan Bousfield, and former **Caledonian Airways, Ltd.** executive Steven Tomlinson, become joint managing directors. At that point, the small Stansted Airport operation will be closed down and the staff transferred to Gatwick Airport.

The same day, *Travel Trade Gazette UK and Ireland (TTG)* reveals that a new look will be emphasized. It also covers the announcement that Sabre will be renamed **Excel Airways, Ltd.** on May 1. The company has had some public relations problems with its current moniker being confused for that of the SABRE computerized reservation system. The company will continue to operate its fleet of Next Generation B-767-81Qs and Dash-8Q8s, as well as three B-767-204ERs leased this day from **Air Atlanta Icelandic, H.F.** Most will wear "www.excellairways.com" on their sides.

Chairman Mullaney informs *TTG* on November 27 that with the beginning of the summer holiday season at the end of March, Excel will operate from bases at London (LGW), Manchester, and Newcastle to holiday destinations in Greece, Cyprus, Turkey, Portugal, Spain, and the Canary Islands. Two-thirds (700,000) of all the seats will be booked by Libra Holidays; however, 300,000 more will be available for third-party operators.

In fact, Sabre officially changes its name to Excel Airways on December 29, even though it will continue to operate as Sabre until April 30. At year's end, a new Web page is opened on the Internet.

SACHSISCHE LUFTVERKEHRS, A.G.: Germany (1923–1926). Sachsische Luftverkehrs is established at Saxony in late **1923** to offer charter and flight-seeing services. On March 12, **1924**, the company is reformed into a holding company. Shareholding is divided between

Elektra, A.G., the Bank of Saxony, and Junkers Flugzeugwerke, A.G. The latter's stake is approximately 26% and includes contracts for both management and the provision of two F-13s.

Revenue services commence on April 7 on a route from Saxony to Berlin. On April 26, the carrier is drawn into the Junkers-backed Trans Europa Union. Two more F.13s join the fleet during the summer and on August 8, daily roundtrips commence from Dresden to Nuremberg.

Flights continue apace in 1925 as the fleet grows by the addition of another F.13 and four G.24s. When **Deutsche Luft Hansa, A.G. (DLH)** is established in January 1926, **Sachsische Luftverkehrs** is one of the companies merged into it.

SACO (SERVICIO AEREO COLOMBIANO, S.A.): Colombia (1933–1940). Ernesto Samper Mendoza founds SACO at Bogota on June 15, 1933 and prepares to compete with the larger carrier **SCADTA (Sociedad Colombo-Alemana de Transportes Aereos, S.A.)**. Certificates for two direct routes linking Cali and Medellin with Bogota are received from the government and two Ford 5-ATs are purchased from **Transcontinental and Western Air Lines (TWA)** to fly them.

Three ex-**Eastern Air Lines** Curtiss D-2 Kingbirds are purchased in 1934. The former **Transcontinental and Western Air Lines (TWA)** Ford Tri-Motors 5-AT-6 and 5-AT-16 are received on April 5, 1935; the former will not survive long. The most remarkable event in company history and indeed, one of the two or three most spectacular prewar aviation accidents occurs on June 24. While taking off from Medellin, pilot/CEO Mendoza loses power and crashes the 5-AT-6 into the waiting **SCADTA (Sociedad Colombo-Alemana de Transportes Aereos, S.A.)** Ford 5-AT-112 *Manizales*, piloted by Hans Thomas. Mendoza, the noted Argentine singer Carlos Gardel, and 15 others aboard the 2 planes are killed.

Without its dynamic leader, SACO limps along over its route network for another five years, taking delivery of two Curtiss T-32C Condors from **Eastern Air Lines** in 1937 and a pair of new Lockheed Model 10E Electras in 1938.

The Ford Tri-Motor 5-AT-16 is sold to **TACA (Transportes Aereos Centro Americanos, S.A.)** in March 1939. On October 27, officials of SACO and **SCADTA (Sociedad Colombo-Alemana de Transportes Aereos, S.A.)** agree to merge under the latter's banner. The arrangement becomes official on October 3, 1940, by which time all of SACO's routes and assets have been absorbed.

SACSA (SERVICIOS AEREOS DE CHIAPAS, S.A. de C.V.): Mexico (1948–1955). SACSA is formed at Merida in 1948 to fly coffee cargos on behalf of local plantation owners. Yajalon-based **TAYSA (Transportes Aereos Yajalon, S.A. de C.V.)** is purchased and merged in 1949. The fleet comprises a number of older transports including Northrop trimotors, one of which crashes at Tuxtla Gutierrez.

Having begun life with **National Air Transport** in the U.S. in 1931, the Ford 5-AT-103 is purchased from **Lagosa (Lineas Aereas Guerrero-Oaxaca, S.A. de C.V.)** in June 1951; however, its expensive flight hours are much reduced after 1952. In the 1950s, the owners find other ways to get their crops to market and the airline is often reduced to the use of an old Douglas B-18 bomber.

The 5-AT-103 is brought out of storage and refurbished at Mexico City in early 1955, being given a new noncorrugated skin and three overhauled Wasp engines. The costly rebuild does not pay off because the plane is lost in a July 3 accident in the Sierra de San Andreas Mountains. Out of cash and aircraft, the company ceases operation.

SADELCA (SOCIEDAD AEREA DEL CAQUETA, S.A.): Colombia (1977–1986). German Cuellar S. founds this all-cargo airline at Neiva, in southwestern Colombia, to fly all-cargo charters to Bogota and other points within the nation. The fleet is comprised of 3 unmodified ex-military Douglas C-47s, 1 C-54, and 1 Curtiss C-46A.

Within a decade of its 1977 founding, the carrier ceases operations.

SADIA, S.A. (TRANSPORTES AEREOS): Brazil (1954–1972). While working for his father's Concordia meat packing firm S.A. Industria e Comercio Concordia, Omar Fontana forms a private airline on February 25, 1954, its title taken from the first two and last three letters of the family operation. A lone Douglas DC-3 is acquired from **Panair do Brazil, S.A.** and on August 3 the required government certificate allowing the launch of meat haulage to São Paulo is obtained. Sadia, S.A. (Transportes Aereos) is officially registered as a cargo airline on January 5, 1955.

As the DC-3 fleet continues to expand (12 will eventually be received) through the lease of two more Dakotas from **TAN (Transportes Aereos Nacional, S.A.)**, the required technical scheduled passenger certificate is granted to the carrier by the Departamento de Aviacao Civil (DAC) on January 20, 1956. Scheduled passenger services are inaugurated on March 16, São Paulo–Florianopolis via Joacaba and Videira. A second DC-3 is purchased in August and the first of four ordered Curtiss C-46s (only two are delivered) is purchased from **Loide Aereo Nacional, S.A.** in October. It is placed in service and the Joacaba route is stretched to Londrina, Bauru, Ribeirao, and Preto.

A maintenance agreement is signed with **REAL, S.A.** in August 1957, a second C-46 is purchased in October, and service is launched to Brasilia in November. Also in November, **REAL, S.A.** acquires 50% interest and Fontana becomes part of the larger carrier's consortium management team under President Linneu Gomes, who now also becomes president of Sadia. Fontana's creation is allowed to continue operating under its own name, expanding flights to Rio de Janeiro and Porto Alegre while supporting its partner with its Santa Catarina services. The fleet at year's end comprises 5 DC-3s and 2 C-46s.

The carrier's base is transferred to São Paulo in 1958, allowing the integration of services with **REAL, S.A.'s**. Additional DC-3s are received in 1959–1960, although Vice President Fontana is careful to maintain the independence of his charge. **REAL, S.A.** collapses in August 1961 and is taken over by **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**. Omar Fontana is allowed to repurchase Sadia, S.A. from the wreckage of his former partner and resumes complete control.

The released carrier begins to grow in April 1962 with the purchase of three more DC-3s. Simultaneously, **TAS (Transportes Aereos Salvador, S.A.)** is acquired and upon completion of the arrangement on October 26, the company becomes known as **SADIA-TAS, S.A.** The fleet grows to include 12 DC-3s and 3 C-46s. In December, flights begin to link the Bahia city of Salvador with Brasilia, Rio de Janeiro, São Paulo, and Fortaleza. Thus the route network is increased to 53 destinations.

In January 1963, the Brazilian government introduces a new subsidy scheme for feeder routes now labeled Rede de Integracao Nacional (RIN). Plans are undertaken for the acquisition of British-made Handley Page Herald; however, this initial purchase, despite favorable terms by the builder, is halted by the DAC, which will only authorize the four-month lease of two of the Rolls Royce Dart-powered aircraft. The first Herald 203, leased from its manufacturer, is delivered on December 6 and enters service on December 18.

A second Herald, a Dash-100 chartered from the failing Philippine carrier **Cruz Airways**, joins the fleet in February 1964 and enters service in March. Later in the year, **SADIA-TAS, S.A.** is reorganized; Sadia, S.A. emerges as a single-name airline with some stock held by its employees.

On January 6, 1965, a \$4.2-million order is placed for 5 Herald 214s. During the year, the route network is reduced from 53 stops to 28 and service started from Rio de Janeiro to São Paulo.

In February 1966, government approval for Herald operations is officially awarded. DAC officials, convinced of the type's ability through demonstration, allows Fontana to go ahead and acquire additional British aircraft, while remaining within the RIN fare structure. Retirement of the DC-3s/C-46s begins in April as the first of six new Heralds enters service. During the year, the carrier's capitalization is increased from 750,000 to 1 million cruzeiros.

The last DC-3 flight is completed in March 1967 and Chairman Fontana seeks government permission in May to purchase BAC 1-11 jetliners.

A Handley Page HPR-7 Herald 214 with 5 crew and 20 passengers crashes into a 4,635-ft. hill near Curitiba, Brazil, on November 3 (21 dead).

The Shorts SC-7 Skyvan *Patinho Feio* is leased from its manufacturer in late 1968.

Approval is received and orders for BAC 1-11-500s are let in 1969. Between March and May, two Shorts SC-7 Skyvans are test flown on certain routes.

A BAC 1-11-400, leased from its manufacturer, is placed in service on September 17, 1970, pending delivery of the first Dash-500 on October 17. Sadia, S.A. begins flying its owned jetliner, nicknamed *Jatao* (Big Jet) over revenue routes just before the end of the month.

Additional BAC 1-11-500s (seven will eventually be received) are placed on the longer route segments throughout 1971. Headquarters are moved to Brazilia in the spring of 1972 and in June, the carrier is renamed **Transbrasil S.A. (Linhas Aereas)**.

SADIA-TAS, S.A. See **SADIA, S.A.**

SAE SWE AVIATION EUROPE, A.B.: P.O. Box 47, Malmo-Sturup, SE-23032, Sweden; Phone 46 (0) 40 408550; Fax 46 (0) 40 408559; <http://www.sae.se>; Year Founded 1996; This small charter operation is founded by Managing Director Jan Fahlen in July 1996 as a division of Varnamo-based Swetrail Group. The concern is comprised of three divisions: flight operations, technical department (JAR 145 maintenance), and sales. Passenger and cargo charters are operated with a single Fokker F.27 Friendship.

During the spring of 2000, a scheduled daily roundtrip route is opened between Goteborg and Hanover. This new service is temporarily suspended on November 1.

SAEAGA AIRLINES, LTD.: Malaysia (1995–1998). Based at Kota Kinabalu, Malaysia, Saeaga is established in December 1995 by Airtrade Aviation Consultants, Ltd. of Singapore and EEA Malaysia, Ltd. The owners represented by Airtrade include the hotel concern Ekran Sdn. Bhd., which also operates **Sabah Air (Penerbangan Sabah Sdn. Bhd.)** and Ekran Air Sdn. Bhd. as well as the Malaysian states of Sarawak and Sabah.

A de Havilland DHC-8-202 is acquired and on February 15, 1996 makes a route-proving flight from Kuala Lumpur International Airport in Subang to Kuching via Langkawi. The aircraft is flown by Canadian pilots Capt. Eric Dumond and Gaetan Viens and in addition to government and airline officials, has all five of the company's first-hire flight attendants aboard, all retired from **Saudia (Saudi Arabian Airlines)**.

The carrier now receives its charter license from the Department of Civil Aviation and begins, at month's end, nonscheduled flights to Manado in north Sulawesi, Indonesia, and to the southern Philippine communities of Davao and General Santos.

Another Dash 8, a Mark 315, is also purchased during the first quarter, along with a Canadair CRJ-100 Regional Jet. Saeaga, the first airline operator outside of Canada to fly both the Dash 8 and CRJ, begins scheduled services in April.

Services continue apace during the remainder of the year and in 1997, with visits paid to Balikpapan, Bangkok, Davao City, Labuan, Macau, Menado, and Sabah, Sarawak, Subic Bay plus smaller communities in the Indonesian provinces of Sulawesi and Kalimantan and in the southern Philippines.

As a result of the regional economic downturn, the company suspends operations in March 1998. Plans are made to restart, but cannot be implemented.

SAEP (SERVICIOS AEREOS ESPECIALIZADOS EN TRANSPORTES PETROLEROS, S.A.): Ave. El Dorado Entrada, No. 13. Bogota, Colombia; Phone (019) 413-5408; Fax (019) 413-5434; Year

Founded 1980). SAEP is established in 1980 to provide passenger charters for the oil companies operating in Colombia. A fleet of 5 Douglas DC-3s is purchased from the Ecuadorian Air Force and employed to begin revenue services.

Flights continue without incident until February 8, 1986. While en route from Bogota to Rondon on that day, a DC-3 with two crew and three passengers loses power. While attempting to turn back for an emergency landing at its point of origin, the plane crashes and bursts into flame. All aboard are safely evacuated.

Service resumes and is maintained over the next 14 years with a mix of DC-3s and a pair of Antonov An-32Bs imported from the Soviet Union before its demise.

SAESA (SERVICIOS AEREOS ESPECIALES, S.A. de C.V.): Mexico (1960–1977). SAESA is organized on March 28, 1960 with the single purpose of serving as the contract carrier for the return of Mexican citizens deported from the United States. One Douglas DC-3 and 2 Curtiss C-46 Commandos are acquired. Under contract to the U.S. DOJ, initial flights are undertaken between Reynosa and Leon; in 1962–1963, Matamoros and Ciudad Juarez also become deportee destinations.

Scheduled commercial service begins on March 1, 1964, Mexico City to Reynosa via Poza Rica. At this point, the carrier purchases and merges **LAUMSA (Lineas Aereas Mexicanas Unidas, S.A. de C.V.)**. Deportation flights continue into 1965–1966; in December of the latter year, four DC-6s are acquired from **Aeromexico (1) (Aeronaves de Mexico, S.A. de C.V.)**.

The workforce in 1967 totals 64. The fleet now includes 4 DC-6s, 1 DC-3, 2 Curtiss C-46As, and 1 Piper PA-23 Aztec. Enplanements for the year total 110,000.

In 1968, the government threatens to suspend the airline, but instead, takes it over and makes it an **Aeromexico (1) (Aeronaves de Mexico, S.A. de C.V.)** associate, taking away its private S.A. status, along with its independence.

En route from Tampico to Reynosa on October 30, a C-46A with 32 passengers is hijacked to Brownsville, Texas, where the lone gunman surrenders to U.S. Immigration Service personnel. The aircraft is allowed to return and the assailant is extradited back to Mexico, where he is tried and sent to prison.

A DC-3 with 4 crew and 22 passengers crashes into the mountains near Ciudad Victoria, Mexico, on December 31; there are no survivors.

On May 22, 1969, the route network of **Aeromaya, S.A. de C.V.** is acquired and with two Hawker Siddeley HS 748s, the company begins flying to Yucatan destinations on behalf of its parent. The C-46s are now withdrawn.

Several new Hawker Siddeley HS 748-2As are acquired as operations continue apace in 1970–1971. The DC-6s are returned to **Aeromexico (1) (Aeronaves de Mexico, S.A. de C.V.)** during the former year; when the major cannot sell them, they are passed to the Fuerza Aerea Mexicana (Mexican Air Force) for use as transports.

En route from Chetumal to Mexico City with 5 crew and 18 passengers, one of the new British-made turboprops crashes into the jungles of the Yucatan, near Chetumal, 40 km. from its point of origin on January 6, 1972; there are no survivors.

Another HS 748-2A with three crew is damaged beyond repair as the result of a bad landing at Acapulco on July 28, 1973; there are no fatalities.

Service is maintained until 1977 when SAESA ceases operations and is liquidated.

SAETA (COMPANIA ANONIMA ESPANOLA DE TRANSPORTE AEREO, S.A.). See **IBERIA SPANISH AIRLINES (2) (LINEAS AEREAS DE ESPANA, S.A.)**

SAETA (SOCIEDAD AEREA DE TOLIMA, S.A.): Colombia (1947–1952). Capitalized at 570,000 persons, a group of investors from the Tolima province capital of Ibague form SAETA as an independent passenger airline in early 1947. Shareholding is held by local interests

(70%) and **AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.)** (30%). Three ex-military Douglas C-47s (converted to DC-3 civil standard) are purchased, with two more arriving in **1948**.

Services are launched to various destinations within the province and to the cities of Bogota and Medellin. Caribbean coastal destinations are added to the route network in **1949–1951**, along with a stop at Girardot.

A C-47 with 3 crew and 29 passengers is lost at Bogota on August 13 of the former year; there are no survivors.

Unable to compete economically, the carrier is forced to sell out to **AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.)** in **1952**.

SAETA (SOCIEDAD AEREA ECUATORIANA DE TRANSPORTES AEREOS, S.A.): Ecuador (1966–2000). Former army colonels Eduardo Sandoval and Carlos Najera put together a group of investors in late **1966** and found SAETA at Quito, registering it in January **1967**. After obtaining a Piper PA-23 Aztec, the operators inaugurate charter services to Cuenca in March.

Nonscheduled domestic operations continue in **1968**; however, scheduled flights begin in **1969** and the route network is expanded to also include stops at Sucua, Macas, and Pastaza.

In April **1970**, two Vickers Viscount 785Ds are purchased from **Alitalia, S.p.A.** and join the company's Piper and two Douglas DC-3s in expanding frequencies, opening new routes to Guayaquil, Esmeraldas, and Tulcan, and increasing traffic.

A Vickers Viscount 785D is damaged beyond repair when it overruns the runway while landing at Cuenca, Ecuador, on June 3; there are no fatalities.

En route from Quito to Cuenca on October 20, **1971**, a Viscount 785D with 35 passengers is taken over by four men and two women, who order it flown to Cuba.

Passenger boardings for the year total 58,000.

Service continues apace in **1972–1974**.

Alitalia, S.p.A. sells the carrier three of its Sud-Est Caravelle VINs in **1975**. These are employed, beginning in July, to operate a shuttle service that is not unlike the famed **Eastern Air Lines** shuttle operation in the U.S. Every 35 minutes, flights are launched between Simon Bolivar Airport at Quito and Mariscal Sucre Airport at Quito.

A Viscount 785D with 4 crew and 55 passengers disappears on an August 15, **1976** flight from Quito to Cuenca; no wreckage or bodies is ever found. A Viscount 764D with 4 crew and 29 passengers crashes into a mountain near Cuenca on September 4, **1977**; there are no survivors.

On January 18, **1978**, a Viscount 785D en route from Quito to Guayaquil with 60 passengers is taken over by a man and a woman, who order the turboprop diverted to Havana.

En route from Quito to Cuenca on April 23, **1979**, a Viscount 785D with 5 crew and 52 passengers disappears over Pastaza Province. The wreckage will be found in 1984 on high ground, 25 nm. off course.

Services, including contract charter work, are maintained during **1980** and airline employment grows to 105. A Boeing 727-31 first operated by **Trans World Airlines (TWA)** is added, replacing the propeller equipment.

Passenger boardings in **1981** total 189,000 and in **1982**, 195,400. In the latter year, a \$713,575 operating profit is generated.

The number of employees is increased by 4.8% in **1983** to 110 and the fleet now includes 2 SE-210s and 1 B-727-31.

Customer bookings climb 4.2% to 197,395 and revenues advance 8.1% to \$4 million. With expenses under \$3 million, the carrier is able to post an operating profit of \$1.1 million.

Eight new employees are hired in **1984**. Enplanements swell 22.4% to 241,655 and revenues climb 3.7% to \$4.2 million. Expenses jump 22.3% to \$3.6 million, but still allow an operating profit of \$605,128. Net profit improves by 27% to \$70,530 and comes atop an operating gain of \$605,128.

The workforce grows 13.6% in **1985** to 134 and the fleet still includes 1 B-727-31 and 2 Caravelles. Cargo charters are undertaken to Panama, Curaçao, and Colombia with a leased Boeing 707-373C.

Passenger boardings jump 19.7% to 289,296 and revenues rise 23.5% to \$5.2 million. Costs are held to a point where an operating profit of \$1.4 million is generated and net gain of \$607,180 is banked.

Operations continue apace in **1986–1989**. The Caravelles are withdrawn and during the latter year the fleet includes 1 each B-707-373C, B-727-31, and B-727-95. Biweekly international B-727-31 service is begun from Quito and Guayaquil to Miami in May **1988**. A B-727-282A is purchased in **1991**. A leased Airbus Industrie A310-304 is acquired in **1992** and flights are inaugurated to New York via Miami. Two B-737s are also received, one each Dash-2Q8A and Dash-219A.

In **1993**, President Roberto Dunn Barreiro's airline employs 450 workers and places orders for another Airbus. Routes served include Quito to Guayaquil, Quito to Miami via Guayaquil, and Quito to New York via Guayaquil. The latter two services are taken over from **Ecuadoriana Airlines, S.A.** Permission is sought to provide flights from Quito to Los Angeles, again via Guayaquil. Cargo charters are flown to Colombia, Curaçao, and Panama.

After signing a marketing alliance with **AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.)** in July, a joint code-sharing roundtrip service is inaugurated in September and October from Bogota to Cuzco via Guayaquil. When **Ecuadoriana (Compania Ecuatoriana de Aviacion, S.A.)** suspends operations, its Ecuador–U.S. route is assigned to SAETA.

The company joins with private Paraguayan investors calling themselves the Skies of America group during September **1994** to offer a bid for the remnants of **LAP Paraguayan Airlines, S.A.**, now being privatized. In October, the group suggests \$22.1 million as compensation for an 80% stake, a figure that is accepted by the Paraguayan government. The first of three former **Mexicana Airlines, S.A. de C.V.** A320-232s is leased from ILFC in December; it begins flying to Miami with LAPSA titles painted on one side and SAETA on the other.

Passenger boardings during the 12 months total 945,348 and revenues are \$92.52 million. There is a \$26.24-million operating profit and a net gain of just \$22,000.

Airline employment is decreased by 6.6% in **1995** to 960. Three Airbus Industrie A320-232s are received, two of which are leased to the reborn **LAP Air Paraguay, S.A.**; two B-737s are also leased to the new Paraguayan carrier. SAETA inaugurates new service to San Jose and Panama City. A route-specific code-sharing agreement is inked with **Carnival Air Lines** in November.

Enplanements dip 0.6% to 891,838, but revenues advance 8.4% to \$101.23 million. Costs climb 18% to \$79.24 million and allow an operating gain of \$21.99 million and a much larger net profit of \$2.75 million.

The workforce is cut another 37.5% in **1996** to 600. Flights begin to Santiago de Chile and La Paz, Bolivia.

Nevertheless, customer bookings still slide to 834,000. The operating profit jumps to \$37.98 million and a tiny \$14,000 net profit is noted.

The employee population slides another 1.6% in **1997** to 992.

A B-727-251 with three crew is badly damaged when it lands 200 m. short of the runway on the Galapagos Islands on August 22; there are no injuries reported.

An alliance is signed with **Pan American World Airways (2)** on November 3; it will allow passengers of the U.S. carrier to connect at Miami with SAETA flights to Quito and Guayaquil, while customers coming north may smoothly exit onto Pan Am flights.

Passenger boardings accelerate 11.5% to 876,997. Operating revenues plunge 19.2% to \$77.5 million. Expenses fall 10.7% to \$51.81 million. The operating profit falls to \$25.69 million and there is a \$1.51-million net loss.

Destinations visited in **1998** include Bogota, Buenos Aires, Caracas, Curaçao, Guayaquil, Esmeraldas, Lima, Los Angeles, Mexico City, Miami, New York, Panama, Quito, and Santiago de Chile.

The dual-designator alliance with **Pan American World Airways (2)** is put on hold when that company declares bankruptcy during the spring.

A homepage is opened on the Internet's World Wide Web at the end of the year.

Customer bookings slide to 695,000.

By the beginning of **1999**, airline employment has been cut 34.4% to 651.

As it has for several years, the operational and economic situation continues to deteriorate and the chances of survival now appear grim. In October, the carrier attempts to switch to cheaper aircraft on its Miami route. Because Ecuador is rated Category II (safety) by the FAA, the U.S. government refuses to grant the necessary permission.

Customer bookings for the year plunge 47% to 400,000.

A total of 453 workers are employed at the beginning of **2000**, a 30.4% decline over the previous 12 months. In February, the company's partner stops accepting SAETA tickets for lack of payment, forcing the airline to stop flying over its domestic mainstay route from Quito to Guayaquil. Unable to face rising fuel bills and continue under a mountain of debt, SAETA now closes its doors.

SAFAIR (PTY.), LTD.: P.O. Box 938, Kempton Park, 1620, South Africa; Phone 27 (11) 928-0000; Fax 27 (11) 395-1314; <http://www.safair.co.za>; Code FA; Year Founded 1988. When **Air Cape (Pty.), Ltd.** is purchased in August **1988** and merged, the "Freighters" portion of the **Safair Freighters (Pty.), Ltd.** name is now inappropriate. Consequently, the carrier is renamed Safair (Pty.), Ltd. in September. Braam Loots is appointed managing director.

Employing the Air Cape British Aerospace (HS) 748-B2s and Swearingen Merlin IVAs, the defunct airline's passenger services are maintained during the remainder of the year and into **1989** and beyond. Flights are offered from Cape Town to Port Elizabeth via Oudtshoorn, George, and Plettenberg Bay and from Cape Town to Walvis Bay via Alexander Bay and Luderitz.

Another Boeing 707-344C joins the fleet in **1990** followed by a British Aerospace BAe-146-100QT freighter in **1991**.

A BAe 146-200QC arrives on September 22, **1992**. The QT and QC operate overnight freight and parcel services around the nation. Under an October agreement with **Transkei Airways (Pty.), Ltd.**, they fly passengers during daylight hours between Johannesburg and the Transkei capital of Umtata.

Also during the year, the number of Hercules freighters is reduced to 10 and of these, 5 are leased: 1 to the French operator **Jet Fret, S.A.**, 1 to **TAAG Angolan Airlines, S.A.**, and 3 to **Transafrik, S.A.** of São Tome.

In an arrangement between the company and Russia's Ecotrends, Safair is contracted on September 4 to market and manage a wide range of Russian and Ukrainian aircraft in southern Africa. The agreement will not last long, but does allow the company to give consideration to operation of the Antonov An-124. One such machine is employed to operate a test charter from Jan Smuts Airport, Johannesburg, to Moscow, transporting products on behalf of the Hanover, Germany-based concern Marvol.

In **1993-1994**, Chairman Ralph Boettler and Managing Director Piet J. van Arwgen oversees a workforce of 525 and a fleet that now includes 1 BAe 146-100QT, 1 BAe 146-200QC, and the 10 Hercules freighters, leases on 5 of which are continued as earlier. Domestic markets now regularly visited by freighter and passenger turboprops include Cape Town, Durban, East London, George, Walvis Bay, Port Elizabeth, and Johannesburg.

The fleet is altered in **1995-1997**. Gone are the BAe 146s, replaced by one B-727-23F and three B-727-230As. Of the latter, one is leased out to **Transafrik, S.A.** and another to **Sun Air (Pty.), Ltd.** The third is sold, along with a Hercules, to **NWT Air, Ltd.**

In order to concentrate on its oil and defense business, Hunting, plc, in late June **1998** sells its subsidiary airline **Hunting Cargo Airlines, Ltd.** to a consortium consisting of Safair and Compagnie Maritime Belge, S.A. for \$14.7 million. The new owners, led by Chairman Ludvig Criel and CEO Hugh Flynn, transfer the airline to Ireland and register it as **Air Contractors (Ireland), Ltd.** Hunting, meanwhile, negotiates the separate sale of its five remaining L-188CFs.

With a fleet of 6 hush-kitted Boeing 727-200s and 5 Airbus Industrie A300B4Fs, **Air Contractors (Ireland), Ltd.** resumes flying shortly be-

fore Christmas. Over the next three years, it will undertake regular and ad hoc charters throughout Europe and the Mideast, with emphasis on the transport of overnight parcels under contract to **United Parcel Service (UPS)** and **Federal Express**.

Also in December, Safair, itself, is sold to Imperial Holdings for \$40 million.

The company retains its position in **1999** as a leading southern Africa aircraft charter and leasing company. That status is further enhanced in July when **National Airlines (Pty.), Ltd.** is taken over. It is allowed to continue operations under its name as before. The B-727 fleet at year's end includes 1 Dash-23F, 6 Dash-230As or AFs, and 1 each Dash-294A and Dash-232AF. Three B-727-230As remain on lease to **Comair (Commercial Airways [Pty.], Ltd.)** as they have since 1996. In addition, the "classic" B-737 fleet includes 1 Dash-2L9A, 2 Dash-230As, and 3 Dash-236As. Two MD-81s and 5 MD-82s are also on hand. None of these is seldom off lease to one African carrier or another.

A total of 306 workers are employed at the beginning of **2000**. On January 6, a McDonnell Douglas MD-82 is leased to **Dinar Lineas Aereas, S.A.** and departs for service with the airline in Argentina. Two days later, a Lockheed L-100 Hercules, returning to Darwin, Australia, after a UN-sponsored charter to East Timor, is forced to make a belly landing after its main landing gear fails to deploy.

On February 22, the first of two MD-82s is sent to **Air Liberte, S.A.** on a four-year lease. Two more Hercules freighters are wet-leased to the East Timor operation on February 29. The second **Air Liberte, S.A.** is delivered on March 14.

On May 6, an L-100-30 is wet-leased to the UN and departs for Kinshasa on a long-term contract in the Democratic Republic of the Congo. Also during May, a number of B-737s are purchased from and leased back to **Comair (Commercial Airways [Pty.], Ltd.)**.

An R500-million deal is concluded with **South African Airways (Pty.), Ltd.** on May 31. Under terms of the arrangement, which is revealed on June 7, SAA sells its entire fleet of 13 B-737s (11 Dash-244As and 2 Dash-244AFs) and then leases them back. SAA will not only operate the aircraft, but maintain them as well. With over 40 planes, Managing Director Ralph Bottger is pleased to inform the press that Safair is now the largest aircraft leasing and charter firm in Africa.

On July 12, two ex-**Austrian Airlines, A.G.** McDonnell Douglas MD-82s are acquired; arrangements are completed to lease them to **Air Liberte, S.A.** and all will be in French service by the end of the year.

On August 16, a deal is struck to charter a pair of former **Sun Air (Pty.), Ltd.** MD-81s to Florida-based **Spirit Airlines** for delivery before Christmas. At the same time, it completes the wet-lease of an L-100 Hercules to **Federal Express (FedEx)**, which will operate the turboprop freighter in Europe.

At the Africa Aerospace Defense Show on September 6, the airline announces its intention to acquire 10 Next Generation B-737-700s.

A B-737-230A, previously out on lease to **Croatia Airlines**, is chartered to **South African Airways (Pty.), Ltd.** on November 17. On December 11, the company places firm orders for two Next Generation B-737-700s as part of the plan announced in September. Under terms of the agreement, Boeing and engine-maker CFM International will help Safair expand its existing training and maintenance service facilities.

SAFAIR FREIGHTERS (PTY.), LTD.: South Africa (1969-1988). The brainchild of South African Marine Corporation (Pty.), Ltd. (Safmarine) Chairman Dr. G. S. Kushke, this freight line is formed in March **1969** as a subsidiary of that concern to provide international and domestic charter and contract air cargo service. Following delivery of the first of a fleet of Lockheed L-100-20 Hercules freighters, christened **Boland**, revenue services are started in September **1970** from a base at Johannesburg's Jan Smuts Airport.

When the terms of the company's operating license are found to be prohibitively restrictive, consideration is given at the end of **1971** to closing down. This is avoided in March **1972** when a contract is received to initiate a daily Johannesburg to Port Elizabeth via Durban

freight run on behalf of **South African Airways (Pty.), Ltd. (SAA)**. The company will become the world's largest commercial operator of the "Herk."

Revenue services are maintained throughout the **1970s** and **1980s** and the fleet comes to comprise 16 L-382G Hercules turboprops and 2 Boeing 707-344Cs, the latter purchased from SAA in October **1985**. Domestic destinations include Port Elizabeth, Johannesburg, and East London; an international route is maintained to Lilongwe in Malawi. The Hercules are occasionally leased out and some mount long-haul, over-ocean contract flights as far as Canada. Enplanements total 250,000 passengers in **1987**. **Air Cape (Pty.), Ltd.** is purchased in August **1988** and incorporated; with the "cargo" name now inappropriate, the carrier is re-named **Safair (Pty.), Ltd.** in September.

SAFAIR LINES (PTY.), LTD.: South Africa (1989–1991). With G. A. Nortie as general manager, Safair Lines (Pty.), Ltd. is organized at Malan Airport, Cape Town in **1989** as a rebirth of **Air Cape (Pty.), Ltd.** and the noted onetime charter operator **Trek Airways, Ltd.** Outfitted with a fleet comprising 2 Convair CV-580s and 1 Partenavia P.68B, the reborn pioneer now initiates scheduled passenger and cargo services to Oudtshoorn, George, Port Elizabeth, Alexander Bay, Luderitz, and Bloemfontein. A stop at Walvis Bay is added in **1990**.

In October **1991**, Nortie's airline is reorganized and resumes services under the name **Flitestar (Pty.), Ltd.**

SAFARI AIR SERVICES, LTD.: P.O. Box 4151, Nairobi, Kenya; Phone 254 (2) 334046; Fax 254 (2) 503024; Year Founded 1963. Kenya's largest nonscheduled operator, **Campling Bros. & Vanderwal, Ltd.**, is sold to the U.S. concern Blackwell Enterprises of New York City in June **1963** for £120,000. James R. Kelly is named managing director and the company provides FBO services (maintenance, flight training, overhaul) at Wilson Airport.

A scheduled service to local tourist destinations begins in **1966**. These small-scale flight operations are maintained for the next 32 years.

By **1991**, Managing Director L. O. G. Svensson's small 40-employee commuter flies to various resorts and national animal reserves on a scheduled basis. The fleet comprises 3 Cessna 402s and 4 Cessna 404 Titans.

Operations continue in **1992–2000**, during which years a Piper PA-34 Seneca also enters service.

SAFARI AIRWAYS, LTD.: India (1971–1980). A division of JK Chemicals, Ltd., itself a subsidiary of the JK Organization, SAL is formed at Bombay in the summer of **1971** to offer passenger and cargo charter flights. With an initial fleet comprising 2 Douglas DC-3s, 1 Beech 18, and 1 Cessna 310, revenue flights are undertaken beginning in November.

Low-key operations are continued throughout the remainder of the decade. Rising expenses (led by radical fuel price increases) and declining traffic cause JK Chemicals, Ltd. to withdraw its flight services in **1980**.

SAFE AIR, LTD. (STRAITS AIR FERRY EXPRESS, LTD.): New Zealand (1951–1990). **Straits Air Ferry Express, Ltd.** is formed at Blenheim in **1951** to provide passenger and cargo charters, with emphasis on the latter, between the nation's North and South Islands. The fleet is expanded in **1952** to include 15 Bristol 170 Mk. 31 freighters. On March 1, **1954**, two Bristol 170s set a one-day freight record of 163.5 tons hauled between the major islands.

After an uneventful **1955–1956**, a Bristol 170 fails its takeoff from Christchurch on November 21, **1957** and crashes (two dead). Business is conducted on a low-key basis for the next 7 years with freight ton mileage rising to 2.78 million by **1964**.

The workforce in **1965** stands at 115 while the fleet comprises 7 Bristol 170 Mk. 31s, with 4 more on order. These transport 3.89 million ton-miles of cargo. Two Hawker Siddeley Argosy 222 freighters are acquired in **1966**.

In **1967**, the carrier is given the new marketing name **SAFE Air, Ltd.** Airline employment is **1968** is 140. A route is added to Hapupu in the Chatham Islands.

Freight ton-mileage climbs to 4.34 million. Some 2,800 passengers are also flown. Operations continue apace for the remainder of the decade and into the next.

The workforce by **1972** is 184 and the fleet includes 11 Bristol 170s. In December, **SAFE** is taken over by the **New Zealand National Airways Corporation, Ltd.**, becoming a wholly owned subsidiary that is allowed to operate under its previous identity.

During the year, freight ton-miles flown increase by 5.2% to 5.39 million.

Operations continue apace in **1973–1974**. The workforce in **1975** is 193. A total of 11,76 million FTKs are operated.

Employment is increased by three people in **1976**. Cargo, on the other hand, balloons up 13.8% to 13.64 million FTKs.

In **1977**, the fleet includes 11 Bristol 170 Mk. 31Es and 2 Argosies.

When NANAC is merged into **Air New Zealand, Ltd.** on April 1, **1978**, this subsidiary is passed along as well. Under the new owner, it is still allowed to maintain its separate identity, flying as a division. Nonscheduled cargo services continue to be operated throughout the nation on behalf of the owner as well as the New Zealand Post Office and New Zealand Railways. President J. Sawers' fleet now includes 13 Bristol Freighters and 2 Argosies.

Between **1979** and **1986**, Air New Zealand's DC-8-54F is transferred to the **SAFE Air** fleet and 8 Bristol 170s are retired.

A ninth Bristol 170 Mk. 31E with two crew and two passengers is destroyed as the result of a bad landing at Woodborne, New Zealand, on January 14, **1981**; there are no fatalities.

Weeknight cargo services are flown under charter from Auckland to Christchurch by an **Air New Zealand, Ltd.** Boeing 737-200QC.

Operations continue apace in **1987**, with the last Bristols withdrawn.

In **1988**, General Manager W. R. Tanno's two Argosies busily ply their cargos between Christchurch, Wellington, and Chatham Island.

Operations continue apace in **1989**; however, the same cannot be claimed for **1990**. Following Iraq's August 2 invasion of Kuwait, costs, led by fuel prices, spiral upward. Unable to maintain its viability, **Air New Zealand, Ltd.** closes down the **SAFE Air** division in the fourth quarter.

SAFEWAY. See **SOUTHERN AIR FAST EXPRESS**

SAFEWAY AIRLINES: United States (1964–1968). Safeway Airlines is established at Anchorage, Alaska, in the early fall of **1964** to provide scheduled air taxi and contract service flights to local destinations. Revenue flights commence on November 9 with Piper lightplanes and continue until the company fails in **1968**.

SAFIRAN AIRLINES: 2nd Floor, 130 G M Farahani Ave., 44 Esfandiar Blvd., Vali-e-Asr Ave., Tehran City, 15869, Iran; Phone 98 (21) 883-0215; Fax 98 (21) 885-9550; Code SFN; Year Founded 1988. Safiran is set up at Tehran in **1988** to offer international and regional cargo charters. Shareholding is divided between Mohammad Ali Habibian, Mohammad B. Nahvi, T. Hasselian, M. J. Nahvi, Mrs. S. Arabi, and Alirez Azereza Alarpajooh. The first named Nahvi is chairman, with Habibian as managing director and Alarpajooh as senior vice president. Nonscheduled flights commence with three Airbus Industrie A300B4-203s.

A decade later in **1998–2000**, the company, although remaining in the freight business, has changed its emphasis somewhat. Safiran now specializes in international cargo services, especially in outsized loads. The fleet now includes 2 giant Antonov An-124-100 Ruslans, leased out of Russia, as well as 1 Boeing 707F.

SAGAWA HELICOPTER EXPRESS, LTD.: Shinkiba, 4-chome, Koto-ku, Tokyo, Japan; Phone 81 (3) 5569 2023; Fax 81 (3) 4469

2025; Year Founded 1989. When the Sagawa-Kyubin Group begins a same-day express delivery service in 1988 that employs helicopters, it rapidly finds that the cost of using chartered helicopters is extremely high. For example, contractors charge some ¥ 3,000 per kilogram on the carrier's major route between Tokyo and Osaka.

After a year of unprofitable flights, the company in the spring of **1989** determines that it will be far less expensive to operate its own helicopters. To handle them and to build a network throughout the nation, it will construct heliports at its truck terminals. It will also purchase an already existing rotary-wing operator, rather than start a flight service from scratch.

On October 25, Tokyo-based New Japan Domestic Airline, Ltd. (Shin Nihon Kokunai Koku) is purchased for ¥ 4.5 billion. The deal includes a fleet of 22 helicopters and facilities in Tokyo Heliport. New Japan is renamed Sagawa Helicopter Express and New Japan's pilots and mechanics, who have been invited to transfer over, are its workforce.

Operations continue apace over the next decade. By **1997–2000**, President Hirofumi Maeda oversees a fleet that includes 2 Aerospatiale SA-315B Lamas, 5 Bell 206B JetRangers, 13 AS-350B Squirrels, 2 Bolkow B-117s, and 2 Sikorsky S-76Cs.

SAGITTAIR, LTD.: United Kingdom (1969–1972). Late in **1969**, Stephen Quento founds Saggitair, Ltd. at London as a charter operation. Two Beech 18s are purchased in February **1970**, followed by a third in April. Revenue services commence on May 27 with a newspaper delivery flight from the company's London (LHR) base to Geneva. Contract cargo and air freight services to various Continental destinations occupy the carrier for the remainder of the year.

An Armstrong-Whitworthy AW.650 Argosy freighter is purchased in January **1971**, followed by two more in April and August, respectively. While they undergo overhaul, Sagittair's Beechcrafts participate in the delivery of mail from the U.K. to the Continent during the British postal strike. Twice-weekly scheduled all-cargo Argosy service is inaugurated to Lille on November 9, in addition to various ad hoc charters both by the Beech 18s and the heavier aircraft. Scheduled Argosy freight service to Guernsey begins in December.

Operations continue in **1972**; however, the carrier begins to encounter financial difficulties early in the year. Failure to pay debts owed **Midland Air Cargo, Ltd.** results in the seizure of an Argosy in May. In early July, a British dock strike allows a slight upturn in business, but reprieve is insufficient to deflate cash-flow problems.

Sagittair ceases operations on July 28; however, additional capitalization is found, allowing a resumption of service on August 4 with Argosy produce flights from Guernsey to Hurn. Operations cease a second time on September 8, this time for good.

SAGITTAIR, S.p.A.: Italy (1990–1991). The Italian air taxi **Aerotaxi Sud, S.p.A.**, based at Naples, changes its name in **1990** in order to begin offering package tour flights from its base, as well as Rome and Milan. Revenue service is inaugurated with a pair of British Aerospace BAe 146-300s.

Operations continue apace until September **1991**. Having lost its economic viability in a time of recession, the nonscheduled operation is forced to shut down.

SAHA AIRLINES: P.O. Box 13445-965, Tehran, Iran; Phone 98 (21) 669-6200; Fax 98 (21) 669-8016; Code IRZ; Year Founded 1990. SAHA is set up at Tehran in **1990** to offer domestic charter services, both passenger and cargo. General H. Pakbonyan is placed in charge and is provided with a large fleet of Boeings and Fokkers, including 4 B-707-3J9Cs, 2 B-747-2J9Fs, and 2 B-747-131Fs, plus 2 Fokker F.27-400Ms and 2 F.27-600s. The Jumbojets and Stratoliners had previously been operated by **Iran Air**.

Flights continue during the remainder of the decade. Domestic passenger service is operated, along with worldwide cargo charters to all points except Israel and the U.S. As Iran gradually wins greater Western acceptance, it begins to provide traffic figures.

Despite a jammed landing gear, a B-707-3J9C with 160 passengers is able to make a safe landing at Kish on February 11, **1998**, following a service from Tehran. Enplanements for the year total 179,000. Customer bookings dip 0.5% in **1999** to 171,000.

SAHAKOL AIR (SAHAKOL AIR COMPANY, LTD.): Thailand (1968–1986). This charter operator is formed at Bangkok as the air taxi division of Bangkok United Mechanical Company on December 23, **1968**. Revenue passenger and cargo flights in addition to contract service work begins early in **1969** with a Piper PA-31-310 Navajo christened *Trade Wind*.

Over the next 15 years, the company provides service to OICC, an American construction company, USOM, and a number of other organizations engaged in oil and natural gas exploration in the Gulf of Thailand.

Although authority is obtained in **1985** to begin scheduled services linking the capital with points on the Malay Peninsula, Samui Island, and Surin, the right is not exercised. The company is reformed into **Bangkok Airways, Ltd.** during the first week of January **1986**, with Dr. Prasert Prasarttong-Osoth becoming president/CEO.

SAHARA AIRLINES, LTD. See AIR SAHARA, LTD.; SAHARA INDIA AIRLINES, LTD.

SAHARA AIRLINES, S.A.: Cite Ezzahara, Touggourt, Quargla, Algeria; Code 6S; Year Founded 1999. Sahara is established by private Algerian investors in late 1999 to offer domestic services around the huge North African nation. Revenue flights begin with a pair of Fairchild-Hiller FH-227s.

SAHARA INDIA AIRLINES, LTD.: India (1993–2000). This new entrant is established by its president, S. Roy Sahara, at Bombay on September 20, **1991**, to begin new scheduled services to India's regional markets. The company is a subsidiary of Sahara India Pariwar, a corporation with interests not only in aviation, but also in banking, housing, mass communications, consumer products, and export. Uttam Kumar Bose is named CEO, with Capt. S. P. S. Sandhu as operations manager. A permit is sought to begin scheduled airline flights.

Employing a pair of leased jetliners, one each Boeing 737-2U4 and B-737-2R4CA, the company inaugurates frequencies on December 3, **1993**, linking its base with Delhi, Calcutta, and Bangalore.

While practicing touch-and-go landings at New Delhi on March 8, **1994**, a B-737-2R4C with four crew crashes and slides into a parked **Aeroflot Russian International Airlines (ARIA)** Il-86 that is being serviced. All aboard the Sahara aircraft are killed, along with four ground crew.

The company now operates to 10 domestic destinations. The government in November grants a special exemption from its ban on aircraft imports and allows Sahara to import a pair of leased B-737-4Q8s.

The number of destinations served reaches nine during **1995**.

Operations continue apace in **1996** and two more B-737-4Q8s are leased in November. The workforce climbs to 1,450.

During the spring of **1997**, the company places a \$25-million order with Eurocopter for four helicopters, three AS-355Fs and an AS-365N Dauphin. Arrangements are also made to lease three more B-737-4Q8s.

At the same time and with a 10-year lease finance deal from Indian banks, orders, valued at \$65 million, are sent to Aero International (Regional) for five ATR42-500s, with options for two others.

Traffic figures are released through July. These show customer bookings up 42.5% over the same period a year earlier, to 197,866. Freight skyrocketed 71.1% to 3.25 million FTKs.

During the summer, the four Boeing jetliners receive a \$2-million makeover that includes a new exterior paint job and an interior facelift. Twelve economy-class seats are removed in order to expand the business-class cabins, increasing seat pitch and leg space. New carpets, seat-covers, and curtains are also provided. At the same time, Club Crown, a frequent flyer program for corporate travelers, is introduced.

Beginning in October, the new rotary-wing fleet is employed to fly on tourist and feeder routes between Patna, Bodh Gaya, Jaipur, Jodhpur, Jaisalmer, Bombay, and Pune.

It is announced by *The Hindustan Times* on November 26 that the carrier has won the 1997 "World Travel Market" award for the quality of its service within the Indian airline market.

The ATR42-500s arrive during November and December. Two are based at Delhi, two in Bombay, and one in Calcutta. They are deployed from those cities to connect feeder communities with the carrier's main trunk routes. Enplanements total 436,050.

Flights continue in 1998. Airline employment stands at 1,700 and 1,280 offices are operated around the country.

CEO Bose over sees the introduction of a new premium-class service as well as a drive to boost its frequent flyer program and various new public relations campaigns. Customers in business-class seating are now given a choice of Italian, Chinese, Mexican, or Thai food.

Plans are finalized for a major fleet expansion over the next year. It is announced on December 3 that, with government approval, the carrier will add 10, 70-seat turboprops, 2 Next Generation B-737-700s, and 2 helicopters before the end of 1999. The single largest capacity hike by an Indian domestic private airline will enable Sahara to increase its route network significantly.

On December 15, Chief General Manager Kapil Kaul reports that Sahara has installed airborne collision avoidance systems (ACAS) on three of its aircraft. It will be installed on the remaining aircraft before the December 31 government deadline.

Passenger boardings accelerate 14.5% to 510,000, but cargo traffic falls 11.7% to 7.41 million FTKs. Revenues climb 10.5% to \$87 million.

While en route to Bangalore on January 8, 1999, a B-737-4Q8 suffers a complete electrical failure. Using its reserve system, the little Boeing is able to make a safe emergency landing at Bhopal. Such incidents are, reportedly, rare.

Parvez Damania, former CEO of the defunct **Damania Airlines, Ltd.**, becomes the new commercial director on March 15. He announces that Sahara will soon wear a "human face" and offer additional price breaks and improved service in an effort to gain market share.

A fare war is started by Sahara on April 1 over the lucrative Delhi to Bombay route. Sahara offers thrice-daily service compared to **Indian Airline, Ltd.**'s 10 flights, but all are deep-discount, no frills. Fares are cut by 15%-20% in hopes that greater passenger loads will bring profits. **Jet Airways, Ltd.**, which operates eight flights either way between the two cities, is forced to join in.

The problems of the nation's airlines take a back seat when, on April 16, the Hindu-nationalist government of Prime Minister Vajpayee loses a vote of confidence in parliament and collapses. Still, *The Times of India* reports in this day's issue that, to compete with **Jet Airways, Ltd.** and Sahara in the fare war, the contest may be spread as **Indian Airlines, Ltd.** pumps additional capacity onto the routes from Bombay to both Chennai and Bangalore.

Operations Manager Capt. Sandhu and his team travel to Seattle where, in a brief April 28 ceremony, they take delivery of the airline's first Next Generation B-737-B-737-73A, which is leased from Ansett Worldwide Aviation Services. The return to India will be completed by May 3. After workup, the brand new jetliner will be placed on routes connecting New Delhi to Bombay, Lucknow, and Chennai.

Having fallen ill, Ramji Singh, Sahara's security supervisor, is taken to the Danapur military hospital on May 13 and dies in the course of treatment. A former Army subedar, Singh is cremated at the army facility the next day in the presence of his family and Sahara staff.

Later in the day, the press begins to receive phone calls from security personnel at an unnamed competitor. The anonymous informers allege that Singh had taken poison to commit suicide over management high-handedness. Airline and police officers deny any suicide and note that the military hospital had not performed a post mortem of the body because no suspicions had existed. Still, company public relations are not

helped when the newspapers print stories suggesting that a mystery surrounds the staff member's death.

Indian Airways, Ltd. refuses to engage in the upgrades of its rivals and continues to push its new shuttle service and to stress "on-time" performance. The May 18 issue of *The Times of India* reports that Sahara is now offering a five-star bed-and-breakfast add-on with tickets purchased for Bombay and Chennai, while **Jet Airways, Ltd.**, having linked up with ITC hotels, offers domestic passengers a 20% discount on overnight accommodations.

Two days later, on May 20, the Ministry of Civil Aviation again warns domestic airlines that they will have to depart busy trunk routes unless they maintain a minimum five-aircraft fleet. If a fleet falls below that level and is not restored within six months, the ministry will change the status of the offender from scheduled to nonscheduled operator. With only four planes in operation, Sahara appears to be in some danger; however, company officials quickly assure the media that the required fifth plane will soon be flying.

Director Damania grants a lengthy interview to *The Times of India* on May 26 in which he reviews his strategy, the competition Sahara faces in the market, and prospects for the future.

Having changed the name of **Sahara India Airlines, Ltd.** to Sahara Airlines, Ltd. early in 2000, President S. Roy Sahara finds that a smaller company had already been established in Algeria under the name **Sahara Airlines, S.A.** Consequently, the company is again renamed in October.

SAHEL AVIATION SERVICE, S.A.: Bamako, BP 3272, Mali; Phone 223 229826; Fax 223 223345; Year Founded 1989. Sahel is established at Bamako in 1989 to offer executive and small group passenger charters and air taxi flights.

By 2000, the workforce includes two part-time and full-time pilots. Services are offered with a fleet that includes 1 each Beech Super King Air 200 and Cessna 208 Caravan I, plus 2 Cessna 402s.

SAHSA (SERVICIO AEREO DE HONDURAS, S.A.): Honduras (1944-1994). Taking 40% shareholding, **Pan American Airways (PAA)** forms SAHSA on November 16, 1944 in order to offer competition to the Lowell Yerex subsidiary **Compania Nacional TACA de Honduras, S.A.** After acquiring a DC-3 during the summer of 1945, the company begins service on October 22 over domestic routes. Routes are stretched to Puerto Barrios and Guatemala City, but must be withdrawn when it is discovered that the appropriate permits have not been obtained.

Flights are begun with Douglas transports to San Salvador and Belize City in March 1949.

TACA de Honduras, S.A. is purchased in 1953, but is initially allowed to operate under its previous identity until integration is completed the following year. In 1954-1955, both via the TACA integration and on its own, SAHSA places two Curtiss C-46 Commando freighters into service. Business continues apace during the remainder of the year and through 1956.

On April 5, 1957, **Pan American World Airways (1)** reduces its shareholding to 38%. Controlling interest (75%) is now taken in the liquor-flying air transport company **ANHSA (Aerovias Nacionales de Honduras, S.A.)**. The affiliate assumes no new duties, while the larger airline concentrates on the provision of flights to capital cities throughout Central America.

A DC-3 with three crew and nine passengers is lost near Juticalpa, Honduras, on August 29; there are no survivors.

Service continues without incident in 1958, but on January 6, 1959, a chartered DC-3 with three crew and two passengers crashes into Pena Blanca Mountain in Guatemala; there are no survivors.

Two more C-46s are acquired in June 1960.

While landing at Tegucigalpa, Honduras, on June 7, 1962, the undercarriage of a C-46A with two crew collapses; the aircraft is damaged beyond repair, but neither flyer is hurt.

The U.S. CAB grants its permission for a route to New Orleans, beginning in **1964**. Start-up will be delayed. The fleet in **1965** comprises 2 Curtiss C-46s, 4 C-47s, and 1 DC-6B as service finally begins to New Orleans. Airline employment is 240 and enplanements total 168,516.

Unable to halt after landing at Tegucigalpa on February 20, **1967**, following the completion of a service from San Pedro Sula, Flight 203, a DC-6 with 5 crew and 50 passengers, continues off the runway and into a ditch (4 dead).

During the late **1960s**, the carrier comes under intense competitive pressure from its Honduran rival **TAN (Transportes Aereos Nacionales, S.A.)**. At the end of **1968**, two Lockheed L-188Cs are acquired from **Eastern Air Lines**.

The most exciting incident of the period is a September 13, **1969** hijacking, during which a DC-3, on a domestic flight from La Ceiba to Tegucigalpa with 35 aboard, is taken over by a passenger, who forces it to divert to El Salvador. There the skyjacker is arrested.

A DC-3 with 3 crew and 15 passengers is destroyed as the result of a bad landing at Tegucigalpa on November 25; there are no fatalities.

Pan Am sells its last 38% interest in SAHSA to **TAN (Transportes Aereos Nacionales, S.A.)** on January 21, **1970**; the shareholding leads to a close relationship between the nation's two major airlines.

The two Lockheed L-188Cs continue to supplant the DC-3s and are flagships of the fleet until the introduction of the carrier's first jetliner, a Boeing 737-2K6, in October **1974**.

During the late **1970s** and early **1980s**, the fleet comes to comprise the passenger B-737-2K6, a Boeing 727-100, and a pair of DC-3s. The two Electras are converted into L-188CF freighters. Houston is added to the international route network.

Shareholding in ANHSA is upgraded to 95% in **1980**; provided with a de Havilland Canada DHC-7 and SAHSA's two DC-3s, the subsidiary is given most of SAHSA's scheduled domestic and cargo network.

Having arrived at La Aurora from Guatemala City on a January 8, **1981** scheduled flight with one engine out, the six-man crew of an L-188CF departs to ferry the aircraft to Honduras for repairs. Just after departure, the turboprop experiences a complete loss of power and crashes into houses 1 mi. W of the runway. Although there are no survivors from the aircraft, there are no injuries to anyone on the ground in the impact area.

Flight 414, the B-727-81 with 87 aboard and en route from Tegucigalpa to San Pedro Sula, is commandeered over Central America on March 27 by 5 Salvadoran leftist hijackers. The Boeing is forced to land at Managua, Nicaragua, where 38 persons are released and negotiations are opened. The next day, an accord is reached whereby Honduras will release 15 political prisoners to Panama, which agrees to retrieve them to Panama City. When the prisoners arrive on March 29, the SAHSA jetliner is flown there as well; the pirates free their remaining captives and surrender.

A bomb explodes in baggage being unloaded from a B-737-2K6 less than a quarter hour after its arrival at Managua from Tegucigalpa on February 13, **1982**. The blast, which occurs on a conveyer belt, kills three baggage handlers and wounds four other people.

Five leftists hijack the B-737-2K6 on a domestic flight on April 28 and threaten to kill American Gregory Bascom unless \$1-million ransom is paid and Honduras frees 52 political prisoners. The demands are lowered the next day and on May 1 the pirates free their 11 remaining captives and are allowed to take SAHSA's Boeing 727-81 to Cuba.

Operations continue apace in **1983–1984**. The DHC-7 is sold in **1985** and in **1986** ANHSA is absorbed and the jetliners are grounded. Only domestic and a few close regional routes are flown, with the two DC-3s and the Electra, in **1987**.

In **1988**, Capt. Roberto Figueroa is succeeded as general manager by Prof. V. C. Chinchilla and the two Boeing jetliners are reinstated. The company, which had stopped reporting statistics, now resumes, albeit for only the first six months of the year. These show a decline of 15.2% in

passenger boardings over the same period a year earlier to 155,780, but freight traffic is up by 13.5% to 541,000 FTKs.

In **1989**, control is purchased by TAN; however, the two airlines integrate under the single title **TAN-SAHSA Airlines, S.A.** Leonel Lopez is named general manager and the B-727-81 is sold.

The fleet in **1990** includes 1 owned Boeing 737-2A3 and 1 L-188CF Electra plus 1 leased B-737-212A and three chartered B-737-4YOs.

A DC-3 with 3 crew and 29 passengers overruns the runway while landing at Roatan Island, Honduras, on March 18 and ends up in the ocean; there are no fatalities.

The leased B-737-4YOs are returned in **1991** and the B-737-2A3 is taken out of service. TAN and SAHSA officially merge on November 1, with the SAHSA moniker retained. The new airline now sells 41% interest to **TACA International Airlines, S.A.**

Airline employment in **1992** stands at 600 and the fleet of President Gen. Oswaldo Lopez Arellano and General Manager Leonel Lopez is greatly expanded. The B-737-2A3 is returned as the Lockheed freighter is withdrawn. Charters are arranged for one each B-737-214, B-737-217, and B-737-2K6A, plus two B-737-2H6As. Completely refurbished, the carrier's last operational DC-3 is returned to service in October, being employed on ad hoc passenger charters.

The B-737-214 and B-737-2K6A are retired in **1993**. Destinations visited from Tegucigalpa include San Pedro Sula, La Ceiba, Roatan Island, Belize City, Miami, Houston, New Orleans. Service is started to Grand Cayman Island.

Just after landing at Managua from a July 18 Tegucigalpa service, Flight 415, a B-737-2H6 with 6 crew and 88 passengers, skids off the right side of the runway in a rain storm, losing its nose gear and both engines and coming to a stop 200 ft. off the pavement. Although the aircraft is damaged beyond repair, there are no fatalities.

As the result of insurance problems, the company grounds its entire fleet on January 15, **1994**. Although a leased **TACA International Airlines, S.A.** B-737-2H6A is briefly employed, the carrier never again operates its own aircraft, choosing instead to be submerged into TACA Group.

SAIDE (SERVICES AERIENS INTERNATIONAUX D'EGYPTE, S.A.E.): Egypt (1947–1952). This joint-venture Egyptian-Italian concern is based at Cairo in **1947** to provide nonscheduled services to Italy and Lebanon, Libya, and Tunisia. The Egyptian partners hold the majority of the shares (55%), with the Italians, including Fiat, the remainder. Misr Bank provides £E250,000 start-up capital, later increased to £E400,000.

H. E. Ilhamy is named chairman/managing director. Fiat provides 3 of its Fiat G-212s, plus 3 Savoia Marchetti SM-95s. These are employed to begin passenger and cargo routes from Cairo to Alexandria, Athens, and Rome.

A large number of Curtiss C-46 Commando freighters (eventually upwards of 10) become available from war-surplus stocks in Italy. They replace the older Italian equipment beginning in **1948**.

A summer return route is started to Paris in **1949**, followed by a year-round roundtrip service from Cairo to Tripoli via Benghazi.

During the summer of **1950**, Milan joins Paris on the seasonal route network. Alexandria is replaced on the North African run, which is instead irregularly extended from Tripoli to Tunis. During the fall, after the European route again ends, the route from Cairo to Tunis via Benghazi and Tripoli becomes weekly.

The company continues to expand in **1951**, competing with the national airline, **Misrair, S.A.E. (1)**. On April 15, SAIDE resumes flights to Europe, pushing its Rome route on to Munich via Milan, once a week. The services from Cairo to Rome via Alexandria and Athens, become twice-weekly roundtrips, as do those from Cairo to Tunis.

Thrice-weekly roundtrips are inaugurated on May 1, **1952**, between Cairo and Beirut. The company is acquired by the Egyptian flag carrier **Misrair, S.A.E. (1)** on December 1.

 See SAIDE (SERVICES AERIENS INTERNATIONAUX D'EGYPTE, S.A.)

ST. FELICIEN AIR SERVICES, LTD.: Canada (1957–1980). Paul, Luc, and Gilles Dumas join Marc-Aurele Tremblay to found St. Felicien in 1957 at the Quebec city of the same name. Passenger and cargo services are undertaken with Douglas DC-3s in the Ungava Bay region, linking the company's base with such destinations as Roberval, Fort Chimo, Shcefferville, and Quebec City.

Two decades later, a DC-3 is damaged beyond repair as the result of a bad landing at Asbestos Hill on May 20, 1976.

In 1978, Chairman Paul Dumas oversees a workforce of 65 and a fleet comprising 3 DC-3s, 3 Beech 18s, and 1 de Havilland Canada DHC-2 Beaver. Unable to weather higher fuel prices at decade's end, the carrier folds in 1980.

ST. LUCIA AIRWAYS, LTD.: St. Lucia (1975–1987). St. Lucia is established on the Caribbean island of that name in 1975 to provide general charter services on the island and to neighboring Barbados and Martinique. Employing 3 Britten-Norman BN-2 Islanders and 1 de Havilland Canada DHC-6-100 Twin Otter, the airline initiates revenue services between Hewanorra Airport (near Vieux Fort in the South) and Vigie Airport (near Castries in the northwest).

In 1982, the company acquires a Boeing 707-323C Stratofreighter with which to operate all-cargo services to Miami. A Lockheed L-100-20 Hercules freighter is acquired in 1984, followed by a second B-707-323C in 1985.

Flights continue apace in 1986, during which year a new, light blue color scheme is unveiled. Suggestions now surface in the media that the company has been operating covert contract service flights to Iran on behalf of the U.S. CIA. It is also demonstrated that a Stratofreighter has made four flights, between January and April, transporting arms from an American military base to a known CIA supply base in Zaire, where they are turned over to UNITA forces from civil war-torn Angola.

Unable to maintain economic viability or escape the media spotlight, the airline shuts its doors in 1987.

ST. PETERSBURG-TAMPA AIRBOAT LINE: United States (1913–1914). Organized on December 4, 1913 by electrical engineer Paul E. Fansler with backing from his business manager brother Percival and local business leaders, the St. Petersburg-Tampa Airboat Line signs a subsidy contract with the city of St. Petersburg, Florida, on December 13. The St. Petersburg Board of Trade is not only anxious to promote its region but to speed passage across the bay, which now can only be transversed by a \$1, 3-hr. steamboat voyage or a grueling 64-mi., 12-hr. train ride. Four days later, on the tenth anniversary of the Wright Brothers' first powered flight, the city also signs a contract with St. Louis aircraft manufacturer Thomas W. Benoist for the operation of the airline. Fansler and Benoist select the former's \$4,150 flying boat Type XIV for the service.

Two units, together with a Type XIII with which to open a flying school, are provided. All arrive by train, together with Benoist's well-known chief pilot Tony Jannus and his chief mechanic J. D. Smith. A Type XIV, No. 43, is assembled and test flown on December 30 and 31.

With the natty Jannus (outfitted in slacks, a blazer, and a bow tie) at the controls, Benoist's biplane inaugurates the world's first for-profit, roundtrip airline schedule. With ex-St. Petersburg Mayor Abe C. Pheil as passenger (he paid \$400 at auction for the privilege), the plane flies an 18-mi. route from the St. Petersburg Yacht Basin to the mouth of Tampa's Hillsboro River at 10 a.m. on Friday, January 1, 1914. The departure is made before a crowd of 3,000 people, who had participated in a parade to the waterfront, enjoyed a performance by a band from the Johnny Jones Show, and for a few, bid in the lottery won by Pheil.

The inaugural trip down to the city made famous by its cigars takes 23 min. (including a nonscheduled stop caused by engine trouble). Jan-

nus and Pheil are greeted by 2,000 well-wishers and newspaper reporters seeking quotes and taking photos. The former mayor calls his hometown to let the citizens know of their arrival, before departing north with pilot Jannus. The return flight to St. Petersburg is completed at 11:30 a.m., having been operated in 20 min. In reporting the inaugural flight, *The New York Times* coins the word "airliner" to describe the Benoist flying boat.

Another auction is held (the New Years' crowd has not dispersed) and Noel A. Mitchell successfully pledges \$175 for the afternoon roundtrip. On January 2, Mrs. L. A. Whitney, wife of the Chamber of Commerce secretary, makes the trip to Tampa and back, becoming in the process the first woman passenger to fly with a fixed-wing scheduled airline. The *Tampa Tribune* in the day's edition correctly identifies the Fansler operation as "the first commercial air ship line," allowing of course that it was understood that the aircraft employed was fixed-wing and not a dirigible.

Flying a regular timetable twice a day thereafter, this premier scheduled carrier transports one-way resort traffic and cargo at \$5 per head or 100 pounds of freight. The response by the public to the new service is warm and of the \$50-per-day January subsidy (\$1,550), \$360 can be paid back at month's end. A need for additional capacity results in the addition of a second, slightly larger, Benoist seaplane flown by Roger Jannus, Tony's brother.

Although St. Petersburg is impressed with the operation, the City of Tampa at one point attempts to close it down. Employing family ties to the Secretary of Commerce, the Jannus brothers are not only able to quash the effort, but to obtain the first pilot license issued in the U.S. Tony's February 17 certificate is somewhat irregular being, in fact, a ship-pilot's license with the word "steamship" crossed out and written over with the word "aeroplane."

Despite a \$25-per-day subsidy for February and March, the company is able to cover expenses in those months. By the time Fansler's contract expires on March 31, 1,204 passengers have been safely transported and only 3 days have been lost to weather and 4 to mechanical failure, with aircraft repair bills totaling a mere \$100. When the Mexican crisis and the end of the winter tourist season coincide in April, demand for this air transportation falls off and the inaugural air carrier closes its doors when the city's contract with Benoist is concluded.

Of the four major personalities involved in this enterprise, the Jannus brothers are subsequently killed in flying accidents and designer Benoist dies in Ohio in 1917 when he leans out of a streetcar and is hit by telephone pole. The Tony Jannus Award is established in 1963 to recognize outstanding achievement in scheduled commercial aviation while, in 1984, the Florida Aviation Historical Society constructs a flying replica of the Benoist XIV. The Society's aviation museum is opened at St. Petersburg in January 1993.

ST. TAMMANY-GULF COAST AIRWAYS: United States (1927–1929). During the summer of 1927, St. Tammany-Gulf Coast is organized at New Orleans to haul passengers over a 483-mi., multistop flight to Atlanta, via Mobile and Birmingham. With initial capitalization of \$85,000 and a single Fokker Model 4 Universal, service is inaugurated on August 20. Late in the year, company officials make a bid for the new U.S. Post Office Contract Air Mail Route No. 23 (CAM-23) which parallels their network.

The contract is awarded and airmail flights to Atlanta from New Orleans commence on May 1, 1928. In October, New Orleans interests form Gulf Air Lines as a holding company for St. Tammany, which now becomes the airline operating subsidiary minus the St. Tammany prefix. Capitalization is increased to \$225,000, which allows **Gulf Coast Airways** to purchase a Fokker Model 8 Super Universal.

When Tennessee financier A. P. Barrett forms his **Southern Air Transport System** on March 31, 1929, GCA is purchased and merged, becoming an operating division.

ST. THOMAS TAXI AIR: United States (1970–1976). This air taxi operator is set up at San Juan, Puerto Rico, in 1970 to provide scheduled

Beech 18 services to St. Thomas in the U.S. Virgin Islands. Daily roundtrips are duly inaugurated and are sustained through 1976.

ST. VINCENT AND GRENADINES AIR SERVICE, LTD.: St. Vincent and the Grenadines (1976–1982). The national airline of St. Vincent and the Grenadines is set up at Kingtown in March 1976 to provide services to the neighboring Windward Islands. The initial fleet comprises a Britten-Norman BN-2A Trislander and a Piper Apache; however, the latter aircraft is not retained.

The carrier is unable to survive the high costs occasioned by rising fuel prices and the world economic downturn and disappears in 1982.

ST. VINCENT GOVERNMENT AIR SERVICES. See LIAT, LTD. (LEEWARD ISLANDS AIR TRANSPORT)

SAIR AVIATION: United States (1979–1980). Sair Aviation, the FBO at Syracuse, New York, establishes a scheduled airline division in 1979 to provide international passenger and cargo flights to Toronto and Ottawa. Although daily Piper PA-31-350 Navajo Chieftain roundtrips are duly inaugurated, they cannot be maintained beyond 1980.

SAKHA AVIA NATIONAL AIR COMPANY: Gagarina 8, Yakutsk, Yakutsk Zone, 677014, Russia; Phone 7 (41122) 27 085; Fax 7 (41122) 25 489; <http://www.yakutia.ru/win/SakhaAvia/sod/html>; Code K7; Year Founded 1995. In 1995, financially troubled Yakutaviatrans Air Company receives a corporate makeover. Yuri A. Oblan is CEO and he continues to provide service to the Yakutsk region of Siberia with the large fleet that once made up an entire division of Aeroflot Soviet Airlines.

An An-12BP with 7 crew and 3 passengers departs Moscow's Domodedovo Airport on February 24, 1996, on a service to Yakutsk via Omsk and Bratsk. At a point 22 km. NW of Omsk, the aircraft suffers fuel exhaustion and makes a forced landing onto a snow-covered field, during which a wingtip hits an automobile. The aircraft is badly damaged, the car is totally destroyed, but there are no fatalities.

Services are continued during the remainder of the year and in 1997. By 1998, CEO Oblan's all-Russian fleet comprises 5 Tupolev Tu-154Ms, 6 Tu-154Bs, 21 Antonov An-24s, 15 An-12s, 6 An-26s, 1 each An-74, An-2, and Let L-410, 4 Ilyushin Il-76TDS, and 1 each Mil Mi-8 and Mi-2 helicopter.

Just after takeoff from Krasnoyarsk on a service to the Siberian town of Mirny on June 1, an An-12 with seven crew, six passengers and 13 tons of foodstuffs, crashes 25 km. from its point of origin and explodes; there are no survivors.

Under a national plan of consolidation, **Diamond Sakha Airlines** is merged into Sakha Avia later in the year.

The Russian currency crisis that begins in August and the escalating rise in the price of aviation fuel have a devastating impact on the airline.

The carrier, now overextended, is forced to declare bankruptcy early in 1999. Leaders of the local airport authority step forward and offer a plan to create a new airline built around the Sakha Avia fleet. The new company with the old name is duly formed and equipped with the combined fleets of its predecessors: 2 Airbus Industrie A310-324s, 15 Tu-154B-1s, 13 Yak 40s, 17 An-12s, 22 An-24B/RVs, 6 An-26s, 1 An-74, 4 Il-76TDS, and 1 each Mil Mi-8 and Mi-2 helicopters. A regional aircraft wing, equipped with Let L-410s and 8 Mi-8s, is based at Magan Airport. One of the Tu-154Bs is leased to Iran and five Mi-8s are overhauled.

Late in the year, it is reported that all existing An-24s will soon be outdated. Plans are made to reequip with up to 10 of the new An-140s to be built at the Aviakor manufacturing plant in Samara.

As the year ends, the company is forced to abandon its flights to Moscow and Khabarovsk. Scheduled services are, however, maintained from Irkutsk, Novosibirsk, and St. Petersburg.

For the principal airline of Sakha, which is located between Turkistan and North Asia, services must continue on a reduced basis at the beginning of 2000. In January, the carrier returns to state control.

Many of the aircraft in the fleet are now parked, including the entire Tu-154B fleet, while the A310-324s are returned to their lessor. A number of the company's activities in the northern part of the region are now assumed by the new **Yakutiya Airlines**.

New direct An-24 flights to Ust-Mai are introduced on June 28. Scheduled service is resumed to Moscow.

The Sakha government continues to build up a tremendous debt with the airline, as do agencies of the Russian government in Moscow. Sakha Avia continues to operate in late summer and fall despite the necessity of defaulting on its fuel debt payments to the region's primary avgas supplier, AeroportGSMservice. Weekly An24B charters are initiated on October 29 from the Russian island of Kunashir to Nemuro, on the Japanese island of Hokkaido. The Magan-based L-410 fleet, having been found almost too expensive to maintain, is now grounded. The five weekly roundtrips they had operated to Zhigansk are replaced with a single An-24 service.

At the end of November, the company reports a mixed bag of results for the first 10 months. Profits are realized on the routes from Yakutsk to Ust-Mai, Ust-Nera, Zhigansk and Tiksi by reducing the number of flights offered. During the same period, 3.8 million rubles are lost on the Yak-40 service from Yakutsk to Neryungri. Losses are also reported by aircraft type: An-2, 10.25 million rubles; L-410, 900,000 rubles; Yak-40, 5.18 million rubles; and An-24, 350,000 rubles.

At the beginning of December, V. Filatov, deputy chairman of the Sakha Parliament, and Mikhail Vasilyev, director of the Aviation Staff Trade Union of Sakha, convince the regional government to make available 11.8 million rubles (of 14 million rubles requested) to the local ministry of health. These funds will be distributed in 2 tranches of 6 million rubles each as payment to 4 regional carriers, including Sakha Avia. In addition, a new contract is awarded to the Magan-based wing for the operation of a Ministry of Emergency Situations Mi-8 search and rescue (SAR) service in the spring. Implementation of SAR flights depends, however, upon receipt of promised payments from the health ministry, which are slow in arriving. Without these funds, completion of the Mi-8 overhaul program started earlier is hampered because the helicopters, most of which are finished, are being held for nonpayment by the repair stations.

The company now begins renewed preparations for an enhanced summer schedule, which is to be implemented at the end of March. The Tu-154B leased to Iran is reacquired and joins five others remaining in the fleet in a program of additional inspection and maintenance, paid for through the lease of two An-24s. When available, the aircraft recently in Iran will be employed to add two additional weekly flights to Sochi and Yekaterinburg, thereby doubling the number of services provided to those destinations. Other aircraft will start flying from Yakutsk to Vilyuysk, Verkhnevilyuysk, Suntar, Nyurba, and Tiksi, as well as on routes to Blagoveshchensk and Khabarovsk.

As the year ends, the Sakha Regional Aviation Department appoints Oleg Rogalev as the new director general of Sakha Avia. This official will reveal that, during the year, overall revenues have improved by 70% over the previous year, reaching 550 million rubles. Losses are below the 13 million rubles projected. He will also suggest that an An-24 may be employed to launch charter flights from Moscow to destinations in Southeast Asia.

SAKHALINSKIYE AVIA TRASSY-SAT (SAKHALIN AIR ROUTES): Aeroport, Gorkogo Str., Building 50A, Yuzhno Sakhalinsk, 693015, Russia; Phone 7 (42400) 95503; Fax 7 (50441) 62123; <http://www.airport.sakhalin.ru/sat>; Code HZ; Year Founded 1992. Established at Yuzhno-Sakhalinsk Airport at Sakha, northeastern Siberia, on April 20, 1992, this new Russian airline appoints Konstantin P. Sukhorebrik as general director. A mixed fleet is assembled comprising Ilyushin Il-76s, Antonov An-24s, An-26s, and An-12s; these aircraft initiate domestic cargo flights along the Pacific coast in the fall. The company, a sister to **Sakhavia Trans Air Company**, continues operations in 1993–1994.

In 1995, the two carriers are merged under this carrier's name. The fleet consists of 2 Antonov An-12s, 3 Ilyushin Il-76s, 11 Tupolev Tu-154B/Ms, plus 1 chartered Boeing 737-246 and 2 leased Airbus A310-324s.

Being unable to maintain the pair of chartered A310-324s, the carrier transfers them to **Aeroflot Russian International Airlines (ARIA)** toward the end of the month; as part of the transfer, ARIA agrees to employ the aircraft on flights to Yakutsk, a capital of the Sakha Republic.

Enplanements total 846,000 passengers, a slight decline from the previous year. Freight traffic, on the other hand, accelerates by 3.6% to 125.5 million FTKs.

Three more jetliners enter service in 1996, but capacity alone cannot deliver traffic. Customer bookings plunge 25.9% to 626,886.

Destinations visited in 1997–1998 include Blagoveshchensk, Hakodate, Khabarovsk, the Kurile Islands, Oha, Pusan, Seoul, and Vladivostok.

While preparing to land at Vladivostok on May 20 of the latter year following a flight from Skahalín, the crew of the B-737-246 with 103 passengers finds that the landing gear will not lower on command. While the airport is prepared for an emergency crash landing, the cockpit crew is able to lower the wheels manually and land the plane normally. No injuries are reported.

Flights continue without incident in 1999. As the result of the fiscal impact of the Russian currency crisis that began the previous August, the leased A310-324s are returned to their lessor.

A total of 538 workers are employed at the beginning of 2000. The fleet now includes 1 B-737-246, 7 An-24s, 1 An-26, and 1 Il-62. Destinations visited include Korea, Japan, Moscow, Novosibirsk, Irkutsk, Khabarovsk, and several intraregional points on Sakhalín Island.

In an effort to drive down the alleged high fares of **Domodedovo Airlines** on the route from Yuzhno-Sakhalinsk to Moscow and, indeed, provide service when that carrier is briefly shut down, SAT is provided with a second Il-62 in February. The \$1.5-million aircraft is presented to SAT (under charter) from the Sakhalín regional government as part of a plan to assist with the costs the carrier will assume in taking on the new service.

During the spring, the Japanese government grants permission for the inauguration of charter flights from Japan to the Kurile Islands. The new service will be offered as an alternative to the sea crossing, which is only possible between April and October. The first An-24 charter is operated on October 29.

Weekly An-24 roundtrips are inaugurated on December 21 from Sakhalín Island to Harbin, China. By year's end, the carrier is suffering significant financial loss on its Moscow service; by the time it has been operated for a year, the company will have lost almost 37 million rubles (\$1.27 million) flying a total of 14,000 passengers.

On March 15, 2001, the airline will announce the initiation of weekly An-24 return service, beginning in early May, between Yuzhno-Sakhalinsk and Sapporo, Japan, for Russian passengers seeking transit to other Southeast Asian destinations. Return frequencies to Sapporo, as well as Hakodate, will be increased to twice weekly during the summer. Flights from Yuzhno-Sakhalinsk to Moscow will cease on May 20 and the leased Il-62 will be used on the charter routes to Seoul and Pusan.

SAKHAVIA TRANS AIR COMPANY (SAKHA AVIA TRANS AVIAKOMPANIYA): Russia (1993–1995). A sister to **Sakhalinskiye Aviatrassy**, STAC is also established at Yuzhno-Sakhalinsk Airport in 1993 and Vladimir F. Rykunov is appointed general manager. His new concern inaugurates regional and international cargo services with 2 Antonov An-12s and 1 Ilyushin Il-76T.

In 1994, the company mission is enhanced to include passenger operations and the fleet is increased by the addition of 1 more Il-76T, 11 Tupolev Tu-154B/Ms, and the first Western-made aircraft, a leased Boeing 737-247 originally delivered to **Western Airlines** in the U.S., which arrives in August. The first of two chartered Airbus Industrie A310-304s arrive from Toulouse, France, in November. Enplanements reach 850,230.

In 1995, this company is merged into **Sakhalinskiye Avia Trassy-Sat (Sakhalín Air Routes)**, with the latter name surviving.

SAKONNET AIR CHARTER: United States (1986–1987). Sakonnet is established at Middletown, Rhode Island, in 1986 to provide scheduled passenger and cargo services to Newport. Although daily Piper PA-31-310 Navajo roundtrips are duly inaugurated, they cannot be sustained beyond 1987. Charter flights are, however, undertaken and maintained.

SALAIR, A.B.: Sweden (1987–1991). Landvetter-based **AMA Air Express (AMA-Flyg i Goteborg, A.B.)** is acquired by the shipping and offshore energy concern Salenia, A.B., a family enterprise, in late 1986. The name of the international commuter, which had connected Sweden with the Danish city of Aalborg, is changed to Salair, A.B.

From Landvetter in February 1987, the reformed Salair provides scheduled flights to such local destinations as Goteborg, Kalmar, Linköping, Norrköping, Ronneby, and Stockholm. Managing Director Anders Lindman's 50-employee maintains operations with a fleet of 3 Fairchild Metro IIIs and 1 SAAB 340A, the 100th machine delivered by the Swedish manufacturer.

By year's end, a total of 49,000 passengers have been transported.

Four additional Metroliners join the fleet in the spring in 1988 and two more 340As arrive in October. During the year, the commuter **Skyways of Scandinavia, A.B.** is purchased. Urmas Kruusval becomes managing director in 1989 and the fleet is increased by the addition of four Fairchild Metro IIIs. The corporate headquarters is shifted to Linköping and new routes are planned to Stockholm and from Stockholm to Mora and Gävle.

New destinations visited in 1990 include Mora, Gävle, Stockholm, Malmö, and Linköping. This expansion proves more costly than expected, as anticipated passenger traffic of 135,000 passengers is not generated. Plans are now made to merge with the larger regional **Swedair, A.B.**

Early in 1991, Gävle, Malmö, and Stockholm services are suspended and two Metroliners are withdrawn. After the **Swedair, A.B.** merger negotiation fails in April, Per Toom becomes the third managing director since start-up, but he is unable to reverse the downward slide, despite the August inauguration of twice-daily frequencies from Malmö to London (LGW).

Merger negotiations begun between Salenia, A.B. and Gotlandsbolaget, A.B., parent to **Avia Airlines, A.B.** are successfully completed in early 1992. On July 15, Salair, A.B. and **Avia Airlines, A.B.** are joined in a merger, with the latter's name surviving. Salenia, A.B. purchases the enlarged carrier in early 1993 and it is now renamed **Skyways Avia, A.B.**

SALAIR AIR CARGO AIRLINE: United States (1980–1998). Joseph and Bruce Salerno, with later assistance from their father Paul, establish Salair at Seattle, Washington, in 1980, originally to fly fresh fish to market from Alaska. Within four years, the company's fleet is increased from 1 to 4 Douglas DC-3s and, in addition to charter and contract service flights, regularly scheduled all-cargo services are undertaken to Portland and Spokane.

The carrier receives its all-cargo certificate from the DOT on June 27, 1984.

During the remainder of the decade, general charters are expanded to destinations throughout the western regions of the U.S. and Canada. The fleet is increased by the addition of 3 more DC-3s and 3 Convair CV-440s. In 1985, the company is prominently featured in the PBS television special devoted to the DC-3 *The Plane That Changed the World*. Four years later, in 1989, a DC-3C that first entered service with the U.S. 8th Air Force on January 7, 1944, is acquired from a Canadian firm and returned to the U.S. for restoration.

As the company enters the 1990s, it establishes a **Classic Airlines** subsidiary, which employs two DC-3s to fly all first-class scenic, special demonstration, and nostalgia services. A total of 10,708 tons of freight

are hauled in **1991**. Revenues are \$3.06 million and expenses are \$3 million, leaving a \$64,344 net profit.

In **1992**, due largely to the recession, tonnage carried falls off to 3,160. Revenues drop to \$1.73 million and expenses jump to \$1.85 million, producing a loss of \$124,845. The DC-3C acquired in 1989 is sold to **ERA Aviation**.

Airline employment in **1993** totals 47 and the fleet now includes 3 Convair CV-440s and 1 DC-3. On June 28, Salair receives DOT certification to offer scheduled passenger, cargo, and mail transportation anywhere in the U.S. The authority will not, in the end, be used.

Just after takeoff from Spokane on March 18, **1994**, for a service to Portland, a DC-3C with two crew suffers the loss of power to its No. 2 engine, which is shut down. The aircraft descends into the ground 3,450 ft. from the end of the runway and there are no survivors.

While en route from Santo Domingo, Dominican Republic, to Aguadilla, Puerto Rico, on a June 27, **1995**, all-cargo service, a CV-440 with two crew develops engine problems and starts to return to its point of origin, but explodes and crashes near La Ramona; there are no survivors.

While on final approach to Spokane on January 5, **1996**, after a ferry service from Deer Valley, a CV-440F with two crew loses power to both engines at 500 ft. A forced landing is made in a nearby field and there are no fatalities.

The fleet at the beginning of **1997** includes 2 CV-440s and 2 DC-3Cs. On May 5, Salair ceases operations. It is advised by the DOT that its certificates have been temporarily suspended. They can be reinstated within a year if fitness to fly is determined; if no action is taken by the airline to reclaim its operational status, they will be declared dormant and revoked.

In December, Salair informs the DOT that it has been acquired by Air Alaska Cargo and that it is preparing to file a notice of intent to resume operations. On December 19, the carrier registers with the DOT as an air taxi operator and is given a PART 298 certificate.

On May 4, **1998**, the DOT receives word from Salair that it has officially changed its name to Air Alaska Cargo, but that it does not intend to seek a waiver of the revocation-for-dormancy provisions applicable to its previous certificates. Instead, it promises to file a new application for interstate scheduled passenger authority within the next three months. Accordingly, its two earlier certificates are revoked on May 12.

SALMON AIR: 29 Hamner Drive, Salmon, Idaho 83467, United States; Phone (208) 756-6211; Fax (208) 756-6219; <http://www.salmonair.com>; Year Founded 1981. Located in an area between the Bitterroot and Salmon Mountain ranges and the Continental Divide, Salmon Air is incorporated at Boise in **1981** as Mountain Bird. Bush services for fishermen, hunters, and local residents begin with a fleet of 4 small Cessnas. Within a few months, the company is purchased by a husband and wife team and is renamed.

Flights continue over the next 19 years, highlighted by the addition of weekday return scheduled flights to Boise and McCall and charter services to Salt Lake City, Hailey in Sun Valley, and other points in Idaho and surrounding states, including Challis and Idaho Falls. The fleet in **2000** includes 5 each twin-engine and single-engine aircraft and the queen of the fleet, a newly received Pilatus PC-12.

SALPANAVI, S.p.A.: Italy (1947–1948). With financial backing from the Salpanavi shipping concern, this carrier is formed at Milan on July 19, **1947**. Employing ex-military Douglas C-47s converted to DC-3 civil standard, it begins service from Milan to Bari and Rome.

Early in **1948**, the company purchases and merges competing **Aerea Teseo, S.p.A.** and assumes its aircraft, personnel, and routes. As is the case with several other postwar independent carriers, Salpanavi is not a successful operation and ceases operations in April.

SALSA (SERVICIOS AEREOS LITORAL, S.A.). See AEROLITORAL, S.A.

SALTA (SOCIEDAD ARGENTINA DE LINEAS DE TRANSPORTS AEREO, S.A.): Argentina (1957–1959). SALTA is formed as a scheduled third-level carrier at Salta in the northwest section of the country in **1957**. Equipped with 1 Avro Anson and 3 Cessna T-50s, it flies what will prove an unprofitable route from its base town to San Pedro, Oran, and Embarcacion. The company shuts its doors in **1959**.

SALZBURG AIRLINES, GmbH.: Austria (1992–1993). Salzburg is established at its namesake city in the spring of **1992** and begins charter cargo flights during the summer with a single Fairchild Metro IIC. Scheduled passenger services are introduced during the fall with a second Fairchild, a Metro III.

Operations continue for a year.

SAM (SERVICIOS AEROLINEAS MEXICANAS, S.A. de C.V.): Apartado Postal 134, Monterrey Nuevo Leon 64000, Mexico; Phone 52 (8) 386-2929; Fax 52 (8) 386-2422; Code SAM; Year Founded 1992. SAM is established at Monterrey in January **1992**. Employing a Douglas DC-9-32 leased from McDonnell Douglas, it inaugurates scheduled services to Cancún in February. Another DC-9-32, also once flown by **Delta Air Lines**, arrives later in the year. Operations, both charter and scheduled, continue apace in **1993–1994**. The fleet is increased by the addition of 1 each chartered DC-9-14 and Boeing 737-204A.

All of the Douglas transports are withdrawn in **1995** and in **1996–1999** flights are operated with the Boeing.

SAM (SERVICIOS AEREOS DE MICHOACAN, S.A. de C.V.): Mexico (1949–1969). Employing a single Stinson Reliant, Jose Lucino Loperana begins a Michoacan state service in **1949**; joined from his Uruapan base are various destinations including Colima, Apatzingan, Manzanillo, Playa Azul, and Petatlan.

In **1951**, the Boeing 247Ds, DC-3, routes and assets of **Aeronaves de Michoacan, S.A. de C.V.** are acquired and the enlarged operation is named **LAP (Lineas Aereas Picho, S.A. de C.V.)**. Upon the failure of **Lineas Aereas del Balsas, S.A. de C.V.** in **1955**, Loperana acquires that carrier's concessions and begins to service its routes from Uruapan to Morelia and Mexico City and to Colima and Manzanillo. Once again he changes his company's name, to **Servicios Aereos de Michoacan**.

The carrier is purchased by **Aerolineas Sud Pacifico, S.A. de C.V.** in **1960**, which elects to employ the Michoacan name and livery. In **1966**, the carrier passes to Manuel Cardenas, who improves the fleet by the addition of four Piper PA-32 Cherokee Sixes; however, two of these light planes crash, the one in **1969** killing both Cardenas and the airline.

SAM (SOCIEDAD AEREA MEDITERRANEA, S.p.A.): Italy (1960–1968). This **Alitalia, S.p.A.** subsidiary is formed at Rome in **1960** to operate passenger charter and inclusive tour services with 3 Douglas DC-6Bs transferred over by the parent. Local replacement flights for the flag carrier are undertaken with DC-3s, beginning in December **1961**. Two Curtiss C-46 Commandos are acquired in **1962** and operate all-cargo flights on behalf of Alitalia.

A DC-6B freighter with five crew crashes into Italy's Mount Velino on March 8; there are no survivors.

Passenger flights continue until, following the formation of **ATI (Aero Trasporti Italiani, S.p.A.)**, they are transferred to the new Naples-based company. The Commando freighter service is maintained until **1968**.

SAM (SOCIEDAD AERONAUTICA DE MEDELLIN, S.A.): Colombia (1945–1962). Former USAAF pilot Dennis C. Powelson joins Arthur Taylor in forming SAM at Medellin in the summer of **1945**. With initial capitalization of a million pesos (\$600,000), the carrier is registered as an all-cargo airline in October. Several ex-military Douglas C-47s are purchased and operational plans are laid during the next year.

With permissions in hand, Douglas contract air freight service is inaugurated to Miami on September 1, 1946. In 1947–1948, routes are opened to several domestic destinations, including the Sucre province capital of Monteria. The first of an eventual fleet of seven Curtiss C-46 Commando freighters are received in 1949–1950 and these launch cargo flights to Barranquilla, Bogota, Bucaramanga, Cali, and Cartagena.

While completing an all-cargo flight, a C-47D with two crew is damaged beyond repair while landing at Medellin on March 1 of the latter year; neither pilot is hurt.

Initial success gradually fades in 1951–1954 as AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.) and other Colombian carriers diversify and begin to haul more freight.

A C-47A with three crew is lost at Medellin on June 15 of the former year; there are no survivors.

In order to further its own destiny and to assist KLM (Royal Dutch Airlines, N.V.) in forming a South American network, SAM joins with the Dutch flag line in January 1955 to found a joint international airline, RAS (Rutas Aereas de Colombia, S.A.). Six DC-3s are transferred over from the Dutch flag carrier's Caribbean division.

In 1956, SAM is granted permission to inaugurate domestic DC-4 passenger services under the marketing name "Rutas Aereas SAM"; among its destinations are the islands of Providencia and San Andres. The U.S. CAB grants the carrier a permanent foreign air carrier permit in 1957, authorizing multistop all-cargo flights not only to Miami, but to New Orleans and New York. Under unknown circumstances, a C-46D is lost at Planeta Rico, Colombia, on July 25.

The U.S. flights begin in 1958. A C-46A is lost under unknown circumstances near Medellin on September 16.

En route from San Andres to Medellin on December 8, 1959, a Curtiss C-46A with 3 crew and 42 passengers is lost near Moron Island; there are no survivors.

RAS (Rutas Aereas de Colombia, S.A.) takes over SAM's domestic routes in 1960, leaving the parent to concentrate on freighter flights. En route from St. Andrews Island on March 19, a C-46 with 45 aboard crashes while landing at Monteria, Colombia (25 dead).

Faced with stiff competition from AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.), the joint passenger service within Colombia becomes increasingly costly to both SAM and KLM (Royal Dutch Airlines, N.V.), draining the income achieved from the international operations of RAS (Rutas Aereas de Colombia, S.A.).

The fleet in 1961 comprises 4 DC-4s and 3 C-46s. In August 1962, the two carriers terminate their offspring. The Colombian carrier is now reorganized and is renamed SAM Colombia Airlines (Sociedad Aeronautica de Medellin Consolidada, S.A.).

SAM AVIATION, LTD.: Suite 15, Hotel Janpath, Jampath, Connaught Place, New Delhi, 110001, India; Phone 3366626; Fax 3367882; <http://www.alphasoftwares.com/sam>; Year Founded 1994. Sam Aviation is established at New Delhi in the summer of 1994 to offer all-cargo charters exclusively between India and the newly emerged countries of the Commonwealth of Independent States. Employing leased Ilyushin Il-76Ts, revenue flights commence in October. In 1995, the company also secures a license for ground handling at its Indira Gandhi International Airport base at New Delhi, as well as at Sahar Airport at Bombay.

Service is maintained over the remainder of the decade employing not only its aircraft, but, on occasion, wet-leased Il-62s, Antonov An-12s, Tupolev Tu-154s, Boeing 707s, and even an An-124s from Volga-Dnepr Airlines. Destinations visited include Moscow, Tashkent, Alma Ata, Bishkek, Bangladesh, Sri Lanka, and Bangkok. After the financial crisis of 1998–1999 in the CIS, service is expanded to Dubai and other Mideast points. By the end of 2000, the company has operated more than 1,000 cargo flights, uplifting over 50,000 tons of freight. It has also offered over 350 commercial passenger flights.

SAM COLOMBIA AIRLINES (SOCIEDAD AERONAUTICA DE MEDELLIN CONSOLIDADA, S.A.): Apartado Aereo 1085, Calle

53 #45-211, Piso 21, Medellin, Colombia; Phone 57 (4) 251-5544; Fax 57 (4) 251-0711; <http://www.sinfo.net/aviasam>; Code MM; Year Founded 1962. In August 1962, SAM (Sociedad Aeronautica de Medellin, S.A.) is reorganized at Medellin and given its present name. Financially distressed after the recent failure of RAS (Rutas Aereas de Colombia, S.A.), it recent joint venture with KLM (Royal Dutch Airlines, N.V.), SAM is only able to fly another year before it, too, must cease operations in September 1963.

Operating through its Aerotaxi subsidiary, AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.) purchases 94% of SAM's stock, aircraft, and other assets from Dennis Powelson's widow and begins to operate the carrier as a subsidiary and associate.

Despite claims of unfair practice from competing Aerocondor (Aerovias Condor de Colombia, S.A.), which revolve around SAM's status as a second level nonmember of the IATA, neither the Colombian or U.S. governments elect to refuse licensure. Indeed, the U.S. CAB grants the airline a new three-year traffic permit in April 1964.

Airline employment is now 480 and enplanements total 175,000.

SAM enters into a period of intensive domestic competition with Aerocondor in 1965–1966.

By 1967, airline employment is 519 and the company's fleet of 6 Douglas DC-4s transport 267,218 passengers on the year.

The workforce stands at 572 in 1968. Two DC-4s are retired late in the year.

Passenger boardings ascend slightly to 268,072.

A lone gunman diverts a DC-4, en route from Barranquilla to Medellin to Cuba on February 5, 1969. The pirate will later be imprisoned in Sweden.

On March 11, a DC-4 with 40 passengers and en route from Medellin to Cartagena is taken over by a lone assailant holding a stick of dynamite who demands a trip to Cuba. Almost out of fuel, the Douglas must land at Cartagena. On the ground, passengers and crew rush the pirate and in the struggle that follows, the hijacker, a passenger, and a mechanic all fall out of a door on to tarmac. Police open firing killing the mechanic and wounding the customer; they capture the pirate who is unharmed. This is the first airline hijacking to end in death.

Another DC-4 with 29 passengers is hijacked to Havana on April 14 while on a domestic service from Medellin to Barranquilla. The last sky-jacking of a DC-4 is attempted on July 10 during a service from Cali to Bogota; the lone gunman is overpowered and put under arrest.

In October, the carrier sells its four Douglas DC-4s and takes delivery of four Lockheed L-188A Electras—labeled "Astrojets" by the company's public relations department—from Eastern Air Lines. These are now christened *Jupiter*, *Mercurio*, *Neptuno*, and *Marie* and are employed to compete with the four recently purchased by Aerocondor (Aerovias Condor de Colombia, S.A.).

Bookings during the 12 months exceed 400,000.

The workforce in 1970 totals 759. Two more L-188As arrive and are christened *Apollo*, and *Saturno*.

Passenger boardings total 413,459 and freight is up by 15.8%.

The last two L-188As are acquired in 1971 and christened *Venus* and *Pluton*. Offering different fares and services, SAM and Aerocondor (Aerovias Condor de Colombia, S.A.) continue to battle one another from city to city across the Colombian skies until 1972. In that year, they conclude an agreement to avoid cutthroat competition through coordinated schedules.

Enplanements total 664,884.

The employee population in 1973 numbers 925. After eight years as general manager, Oscar Posada resigns. He is succeeded by Ricardo H. Campuzano, the former director of the Colombian Airport Authority. Twice-weekly service is initiated to Panama.

En route from Pereira to Medellin on May 30, an L-188A is taken over by 2 hijackers who demand a huge ransom, plus the release of 140 prisoners held in Colombian jails. Over the next four days, the aircraft criss-crosses the country, landing several times to release prisoners or take on fuel. The government does turn over about 25% of the ransom,

but releases no inmates. Stepping off the Electra one time too many, the pirates are captured by police on June 3.

Passenger boardings decline 1.2% to 657,000; however, freight traffic improves by 35.3%.

Flights to Iquitos, Guatemala, and Manaus begin in 1974. During the spring and with the aim of making a jet equipment choice, SAM officials test the Boeing 727 and 737, DC-9, F.28, and BAC 1-11.

During the next six years, scheduled passenger and cargo services are flown over a domestic and regional network that grows to include these destinations: Barranquilla, Bogota, Cali, Cartagena, Cucuta, Guatemala City, Managua, Medellin, Panama City, San Jose, San Andres Island, and San Salvador. The old all-cargo route to Miami is also maintained.

Operations continue apace in 1975. A lone gunman takes over a Beech B-80 Queen Aire on December 22 during a scheduled service between Barrancabermeja to Medellin. The pirate demands a 3-million peso ransom and free passage out of the country. When the twin-engine aircraft arrives at its destination, the pirate is shot by plainclothes police and arrested.

Events are not as exciting in 1976. The Electra fleet is repossessed by Eastern Air Lines in February and March 1977.

Enplanements this year are 630,411.

In 1978, the employee population totals 530 and General Manager Guillermo Rey's fleet is upgraded; gone are the Electras, replaced by 3 leased Boeing B-720-030Bs (B-720Bs) one of which is christened *Ciudad de Medellin*. Passenger boardings accelerate 10.1% to 789,000.

Enplanements in 1979 plunge to 479,320. The workforce in 1980 totals 500. Passenger boardings climb 8% to 521,000.

They are up again in 1981 to 850,000 and skyrocket to 1.5 million in 1982. Operations continue apace in 1983-1984, during which years the B-720Bs are replaced with four B-727-46s, plus one each Dash-21 and Dash-59.

Customer bookings dip as enplanements in the latter year total 1,042,875. A \$3.9-million operating profit is generated, along with net gain of \$642,000.

Airline employment stands at 475 in 1985 and the fleet includes 6 Boeings.

Passenger boardings rise 7.3% to 1,125,000 and freight climbs 23.7% to 1.8 million FTKs. Revenues advance 27.6% to \$33.4 million and costs are held down, allowing profits: \$4.4 million (operating) and \$838,000 (net). Enplanements in 1986 total 896,817.

The only aircraft to be acquired during the next 7 years, a B-727-24C is delivered to the 521-employee company in 1987. Meanwhile, customer bookings rise 5.8% to 952,035.

The fleet in 1988 comprises the 6 B-727-100s. Passenger boardings dip 6.6% to 594,297, but freight is elevated a huge 43.9% to 7.2 million FTKs.

Enplanements remain level in 1989, but in 1990 they decline by 9.1% to 449,987. Cargo drops 2.8% to 328.3 million FTKs. During these years, Camilo Villegas is executive vice president and is, effectively, the carrier's general manager.

Operations continue apace in 1991 as deregulation comes to the Colombian air transport industry.

During the year, Colombian President Cesar Gaviria, a champion of free markets, fosters domestic airline liberalization. The national civil aviation department, AeroCivil, approves new airlines and awards new routes, while dropping its policing of ticket prices. Consequently, SAM begins to face competition from several new entrants.

New President/CEO Avila Velandia's carrier joins with parent AVIANCA to restructure schedules and eliminate overlapping services.

An on-time record of 90% is established and enplanements total 1,238,668. Profits climb 138%.

One B-727-2Q9A is added to the fleet in 1992. A number of new routes are introduced, including services to Managua and San Salvador.

Passenger boardings increase by 9.6% to 1,370,207. Freight does even better, jumping 25.1% to 81.52 million FTKs.

In 1993, President Jaime Humberto Lopez oversees a workforce of 575, up 21.3% over the previous year. Additional destinations served include Apartado, Arauca, and Pereira.

While descending toward Medellin on a May 19 service from Panama City, a B-727-46 with 7 crew and 125 passengers disappears from traffic control radar screens and collides with 12,300-ft. Mount Paramo Frontino, 40 km. SE of the runway. Wreckage is found the next day, but there are no survivors.

The No. 3 engine of a B-727-46 catches fire during maintenance at Bogota on August 4; the aircraft is lost.

Although customer bookings slide 4.7% to 1,035,417, cargo increases 43.9% to 16.45 million FTKs. Revenues total \$71.4 million and with expenses down, profits are made: \$3.2 million (operating) and \$5 million (net).

In addition to 1 owned B-727-21 freighter, SAM, in 1994, flies 2 leased trimotors, 1 B-727-2K5A, and 1 B-727-260A. Traffic figures are only released for the first quarter and show passenger boardings down 8.5% to 239,115 and freight off 1.3% to 3.51 million FTKs. Also during the first quarter, a \$230-million order is placed for 8 Avro RJ100s, upgraded successor to the Bae 146.

Although the government of new president Ernesto Samper is more conservative, it cannot put the liberalization genie back in the bottle. Domestic airlines, including SAM, continue to add capacity, start new routes, and cut fares or engage in fare wars.

During the first week of June, SAM becomes the initial customer in South America to receive an Avro RJ100. During the year, eight chartered RJ100s are placed into service (the last two in December). They replace B-727s operating from the company's main hubs at Medellin, Bogota, and San Andres on 400-700-mi. sectors to domestic stations as well as to such Central American and Caribbean destinations as Cuba, Jamaica, and Guatemala.

During the year, management control is assigned to AVIANCA Colombia Airlines (Aerovias Nacionales de Colombia, S.A.).

Operations continue apace during 1995-1996. During the latter year, a crisis occurs with the RJ100 fleet when engine problems cause a plunge in dispatch reliability.

Airline employment stands at 430 in 1997 and the fleet comprises 9 leased Avro RJ100s. AlliedSignal and Aero International (Regional) or AI(R) are brought in to provide engine improvements and increased support, helping the Avros to increase their reliability to approximately 97%. Delivery positions are purchased for four B-737-500s.

In October, the decision is taken by AVIANCA Colombia Airlines (Aerovias Nacionales de Colombia, S.A.) to restructure its domestic network. All flights of under 90 minutes are assigned to SAM, leaving the major to concentrate on domestic trunk routes and international services.

In November, services and marketing of both AVIANCA and SAM are placed under the single direction of Vice President Juan Manuel Beltran.

Enplanements for the year total 794,486.

Airline employment remains the same in 1998. In late November, two de Havilland Canada DHC-6-300 Twin Otters are leased from Aero-Century Corporation and are placed into service on the company's thinnest routes.

Passenger boardings accelerate 26.3% to 1.07 million, while cargo traffic plunges 31.3% to 7.81 million FTKs.

In 1999, the Colombian national economy continues to deteriorate, while problems from antigovernment guerrillas increase. By late spring, the peso has been devalued twice within a year and the demand for air travel further evaporates, particularly after rebels seize an AVIANCA Colombia Airlines, S.A. Fokker 50 in April, taking its passengers hostage.

In the face of this continuing downturn, the carrier elects, during the summer, to return to British Aerospace the fleet of nine Avro RJ100s it has been operating to outlying Colombian cities from Bogota since 1994. The first two planes arrive in the U.K. during September, with the remainder due in February.

Under inspection in England in November, corrosion is found in the wings of the four RJ100s returned thus far. Bae immediately notifies

SAM, which grounds the remaining three. The withdrawal of the regional jets significantly disrupts the carrier's local services.

Enplanements for this troubled year total 910,000 and 3.89 million FTKs are also operated.

A total of 491 workers are employed at the beginning of 2000, a 14.2% increase over the previous 12 months. Two MD-83s continue to be operated. At the end of the year, SAM and **AVIANCA Colombian Airlines, S.A.** begin to discuss the possibility of a merger, via a holding company, with **ACES Colombia (Aerolineas Centrales de Colombia, S.A.)**. An arrangement will be struck on March 7, subject to government approval after April 19. After approval, the new holding company will invest \$250 million over the next five years to modernize the carriers, which will continue to operate under their current names.

SAMARA AIRLINES (SAMARA AVIALINII): Samara Airport, Samar, Samara Region, 443901, Russia; Phone 7 (8462) 700-909; Fax 7 (8462) 700-960; <http://www.samara-airlines.ru>; Code E5; Year Founded 1993. Another new Russian carrier founded in 1993, this company is created at the airport of its namesake city to offer regional and international passenger and cargo flights. Shareholding is divided between the State Property Committee (51%) and private investors.

Samara Avialinii has had a more interesting organizational history than most Russian airlines. Originally established as the Kuybyshev Aviation Enterprise in 1961, it was later transformed into No. 65 Squadron and then into the Kuybyshev Joint Aviation Squadron (KuAO). Its privatization now creates the Joint Stock Company Samara Airlines, or Samara Avialinii.

Mikhail F. Evstropov is named managing director and he initiates flights with a mixed fleet of 5 Antonov An-12s, 13 Tupolov Tu-154B/Ms, 7 Tu-134s, and 3 Ilyushin Il-76s.

Operations continue apace in 1994 as passenger boardings reach 1,052,306.

The company's 32 aircraft transport a total of 910,300 passengers in 1995, a 15.5% decline. Cargo traffic, on the other hand, accelerates 89% to 24.4 million FTKs.

Flights continue in 1996, as stops are made in 62 Russian and CIS communities, as well as New Delhi, Fujairah, Istanbul, Tel Aviv, and Vienna. In the spring, former **Aero Volga Concern** Director General Alexander Kozlov is appointed to the same post with Samara.

Enplanements during the 12 months plunge all the way down to 462,160.

Concerned with a growing and unhealthy competition between the nation's regional airlines and those larger carriers based in Moscow, General Manager Kozlov, in October 1997, hosts a summit of 20 colleagues. The regional leaders draw up an alliance document under which they pledge to work together to develop an alternative hub. Capacity will be shared and Samara will be developed as an alternative gateway into Russia for international airlines visiting the country.

The airline's customer bookings increase by 12.8% to 530,000.

During the summer of 1998, the alliance of airlines led by Samara start to coordinate their schedules and engage in joint marketing. Plans are made to develop pricing in a cooperative manner and to improve Samara airport.

Passenger boardings fall 29.5% to 461,000.

Airline employment stands at 1,629 at the beginning of 1999.

Under the leadership of new Director General Victor Tchegov, cross-town competitor **Aero Volga Concern** enters into merger discussions with Samara during 1999. Although government objections are raised, they are overcome by October 21.

Passenger boardings inch up 0.4% to 462,000, while 14 million FTKs are also operated. Revenues total \$1.13 million.

At the beginning of 2000, the airline's ownership is divided between the Samara Region Property Management Department (51%), employees (21.2%), Gazinvest (14%), and Samara International Airport CEO Vyacheslav Chernavin (13.8%).

The final union with **Aero Volga Concern** under the Samara brand occurs on February 14. Samara gains two Tu-154Ms from a once-huge fleet and all AVC employees retain their jobs. Four Samara Tu-154s remain wet-leased to the Iranian carrier **Kish Air**, along with two Il-76Ts. The long-term arrangement, which provides Samara with hard currency, will be extended later in the year.

The carrier avoids repossession of certain of its aircraft on March 17 when it is found that the Inkombank does not have legal title to the pledged planes.

During the spring, a license is received permitting the company to launch flights from Samara to Tianjin, China, via Abakan. With little demand in Samara, the route is believed to be unprofitable and is not started.

Svyatoslav Lychagin, head of a department in the State Property Ministry, informs *The Moscow Times* on August 30 that the government is sending a budget to the Duma this week that includes a list of 20 state-owned companies to be sold next year. **Aeroflot Russian International Airlines (ARIA)**, Samara and **Siberia Airlines (Sibir)** are originally on this privatization document; however, the exact sizes of the stakes to be sold have disappeared from the list after it has gone through final review by the offices of President Putin.

Also on August 30, the carrier wins an exclusive contract to transport personnel to the Baikonur cosmodrome. A Tu-154M is wet-leased to the Hungarian company Atlant Hungary on September 9, effective October 1.

Weekly roundtrips commence on September 12 from Samara to Baku via Surgut and Kazan. On September 21, the board of directors meets to devise a plan to rehabilitate the company's weak financial situation. Although a profit of 30 million rubles was generated during the first seven months of the year, a large debt remains.

Frankfurt replaces Vienna as the company's terminus in the German-speaking world on October 29, as new Yak-40 flights to that city commence.

During the fall, development continues on the carrier's interregional network of 17 destinations, which includes stops at Ekaterinburg, Tyumen, Nizhnevartovsk, Chelyabinsk, Makhachkala, Nizhni Novgorod, Astrakhan, Kazan, Balakovo (Saratov region), Minsk, and Kiev. To increase load factors, fewer direct flights are offered. Due to the demand for travel, it is hoped that the addition of a stop at Nizhni Novgorod on the Yak-40 service from Samara to Minsk will increase load factors by 60%.

Also, the idea of flights to China is resurrected in light of the decision by **Siberia Airlines (Sibir)** to reduce frequencies on its route to Tianjin in favor of Beijing. The decision is taken to inaugurate Tu-134A roundtrips to Tianjin at the end of March as an extension of Samara's existing route via Novosibirsk to Irkutsk. Contracts are negotiated with several travel agencies in Novosibirsk and Irkutsk to ensure route profitability. Ground handling in China will be provided by a subsidiary of the Chinese government.

Weekly return service from Samara to Frankfurt is resumed on December 1 employing Tu-154Ms.

On December 20, the company joins with **BAL Bashkiri Airlines (Bashkirskie Avialinii Aviakompaniya)**, **Nizhegorod Airlines (Nizhegorodskie Avialinii)**, and **Saravia (Saranskiye Avialinii)** to form a joint marketing agreement designed to keep open the air routes in the Volga Federal District. The plan is similar to one announced in Moscow earlier in the month by **Domodedovo Airlines, Chelai-Chelyabinsk Airlines (Chelyabinsk Chief Aviation Enterprise)**, **Kras Air (Krasnoyarsk Avialinii-KrasAir)**, and **Avia Express Cruise**. Details concerning possible joint schedules, tariff adjustments, and fleet combinations are not provided to the media.

The fleet now includes 3 Il-76Ts, 8 Tu-134s, 5 Tu-154Bs, 9 Tu-154Ms, 3 Yak-40s, and 2 Yak-42Ds. As the year ends, code-sharing agreements are signed with **Finnair O/Y** and **MALEV Hungarian Airlines, Rt.** By purchasing blocks of seats with the foreign airlines, Samara is able to provide direct connections for its passengers wishing to fly via Helsinki or Budapest to points in Europe, to New York, and even to Tokyo. Arrangements are also completed for the wet-lease for

four Tu-154Ms to the Hungarian charter concern Atlant-Hungary Airlines, Kft.

All will be surprised early in **2001** when Director General Kozlov suddenly resigns and is succeeded by Chief Financial Officer Rodion Kovalev.

SAMARKAND UNITED AIR DETACHMENT: Samarkand Airport, 703009, Uzbekistan; Phone 7 (3662) 352 272; Year Founded 1995. A subsidiary of **Uzbekistan Havo Yullari National Airline**, SUAD is formed at Samarkand in **1995** to provide domestic and regional passenger charters. Rinat A. Gainullin is CEO and he begins revenue flights with 2 Tupolev Tu-154Ms, 1 Yakovlev Yak-40, 12 Antonov An-24s, 1 An-26, and 20 An-2 biplanes.

SAMOA AIR: P.O. Box 280, Pago Pago, American Samoa, 96799, United States; Phone (684) 699-9106; Fax (684) 699-9991; Code SE; Year Founded 1996. SA is set up at Pago Pago in January **1996** to offer scheduled passenger services from U.S. Samoa to Apia, Western Samoa, just as its earlier predecessor, **Samoa Airlines**, had provided them three decades earlier. The company's Beech King Air 90 and 2 de Havilland Canada DHC-6-200s transport a total of 72,323 passengers.

The 60-employee company boards 71,937 passengers in **1997**, a 0.5% dip.

Flights continue in **1998**. Storms batter the two Samoas during mid-September, forcing the cancellation of all interisland passenger flights on December 20.

While landing at Fitiuta, American Samoa, from a Pago Pago service on April 23, **1999**, Flight 906, a DHC-6-200 with 2 crew and 12 passengers, runs off the right side of the runway into a ditch, losing its nose. Although the aircraft must be written off, no injuries are reported.

SAMOAN AIRLINES: United States (1959–1960). Samoan is formed at Pago Pago in the summer of **1959** to offer scheduled lightplane air taxi services from U.S. Samoa to Apia, Western Samoa. Revenue flights commence on July 14 and are maintained until October **1960** when **Polynesian Airlines** takes over the service.

SAMSA, S.A. See SAM COLOMBIA AIRLINES: SOCIEDAD AERONAUTICA DE MEDELLIN CONSOLIDADA, S.A.

SAN (SERVICIO AEREO DO NORTE). See COMAG

SAN (SERVICIOS AEREOS NACIONALES, S.A.): P.O. Box 7138, Km 2 1/2, Av. Carlos Julio Arrosemena, Guayaquil, Ecuador; Phone 593 (4) 202 832; Fax 593 (4) 201 152; Code WB; Year Founded 1964. Privately owned SAN is formed as an air taxi at Cuenca's Mariscal Lamar Airport on January 20, **1964**. Nonscheduled Douglas DC-3 flight operations commence on May 1 linking Cuenca with Macas via Sucua. Regularly scheduled services commence in October **1967** when a route is opened to Guayaquil; a year later, the company is moved to the nation's second city. In **1969**, Tulcan is added to the route network.

In the summer of **1970**, two Vickers Viscount 828s are purchased from **All Nippon Airways Company, Ltd.** and are employed to launch direct Cuenca to Quito flights in December. Loja and Machala now join the route network and several Viscount 764Ds are acquired.

In November **1975**, three Sud-Est SE-210 Caravelle VIRs are acquired from **TAP Air Portugal, S.A.**

In direct competition with the shuttle flown by the three Caravelles of **SAETA (Sociedad Aerea Ecuatoriana de Transportes Aereos, S.A.)**, SAN, in January **1976**, places its French-made jetliners on the Guayaquil–Quito trunk line.

En route from Guayaquil to Cuenca in poor weather on December 29, **1977**, a Vickers Viscount 764D with 4 crew and 20 passengers crashes into a hill; there are no survivors.

Traffic increases while employment at President Salvador Pacheco Mora's company grows to 75 by **1978**. Two more Caravelles are purchased during the year from **Luxair, S.A.**

Increasing fuel prices and the competition with **SAETA (Sociedad Aerea Ecuatoriana de Transportes Aereos, S.A.)** in **1979–1981** lead to a company decision to operate only scheduled jetliner service and only between the country's three largest cities, Cuenca, Guayaquil, and Quito.

In early **1981**, a Boeing 727-17 is obtained in exchange for a Viscount 828, a DC-3, and two of the last three Caravelles. The American-made trijet enters service in July, at which time company employment stands at 140.

Operations continue apace without incident in **1982**.

While on final approach to Guayaquil on April 29, **1983**, the fleet's last SE-210 Caravelle VIR, with 6 crew and 94 passengers, suffers loss of engine power, requiring a forced landing; as the aircraft hits, it breaks into 3 parts. Eight people are killed and dozens of people are injured.

The company's route and service arrangements change hardly at all over the next decade, although a frequency is opened to the Galapagos Islands and a second B-727-17 is leased for a brief period. In **1993**, President Patricio Suarez Albuja's 180-employee airline still flies just 1 airplane, linking Guayaquil with Quito and Cuenca, plus the Galapagos.

Services are maintained without change during the remainder of the decade. A total of 150 workers are employed at the beginning of **2000**.

SAN (SERVICIOS AEREOS NACIONALES, S.A.). See also LAUMSA (LINEAS AEREAS MEXICANAS UNIDAS, S.A.)

SAN AIR COMPANY: 3 Nurken Abdirov St., Karaganda, 470000, Kazakhstan; Phone 7 (3212) 581 584; Fax 7 (3212) 578 498; Code S3; Year Founded 1995. SAC is set up at Karaganda in **1995** to offer regional and international passenger charters. Yevgeni Varkentin is general director and he begins revenue services with 3 leased Tupolev Tu-154Ms.

By **1999–2000**, the fleet also includes 2 Tu-134As.

SAN DIEGO PADRES AIR TRAVEL. See T-BIRD AIR TRAVEL

SAN FRANCISCO-OAKLAND HELICOPTER AIRLINES (SFO-1): United States (1961–1977). Founded on January 6, **1961** by five former **Los Angeles Airways (LAA)** executives, SFO, certified by the CAB as an air taxi operator, launches scheduled service in the San Francisco Bay area on June 1 with two leased Sikorsky S-62s.

Successful without subsidy, the helicopter carrier is offering nearly a 100 flights per day by December **1962** between the business districts of San Francisco (Marin County Heliport), Oakland, and Berkeley and the two major airports in the first two cities. It is also providing mail service on an interim basis.

Enplanements for the year total 104,000 and the new entrant is now the second largest helicopter airline, preceded only by **New York Airways (2)**.

In February **1963**, the rotary-wing carrier spends \$1 million for the purchase of three more S-62s. In hearings before the CAB, SFO argues that its fellow rotary-wing operators, particularly LAA and NYA, are expensive and wasteful of the subsidy they are receiving from the government. SFO suggests that it can make a profit without a grant and thereby wets the appetite of subsidy-cutters in Congress, who will eventually take away federal support from all four of the nation's helicopter carriers.

The CAB in November awards SFO the first permanent certificate ever granted a helicopter airline. The airline is also receives permanent authority to fly the U.S. Mail at straight mail pay and with no airmail subsidy.

An S-62A with 11 aboard crashes at Oakland on December 2, but only minor injuries are reported.

Enplanements for the year total 125,080, but the loss is nearly \$375,000.

Airline employment in **1964** stands at 280 and the fleet includes 4 S-62s. Early in the year, the downtown San Francisco heliport is closed, leading to a traffic downturn. New frequencies are launched to Marin County Heliport in an effort to make up the difference.

In March, the company is able to begin using the rooftop of a 120-ft.-high municipal parking garage in Oakland as its downtown landing site in that city. When flights begin, they are the first scheduled passenger rooftop services in the world. Air express service is now added.

In order to take advantage of what has become a profitable business of helicopter repair, a new maintenance base is established at Oakland; simultaneously, corporate headquarters are transferred across the Bay from San Francisco. Late in the year, the company purchases two Sikorsky S-61Ns.

Passenger boardings decline by 6% to 118,000 and revenues are \$1.01 million. The loss is cut to \$187,000.

The workforce in **1965** is 325 and the fleet now includes 6 helicopters. The first Sikorsky S-61N is delivered in the spring and following its introduction, new routes and facilities are added. Service is provided to San Francisco Peninsula and the entire East Bay area. New heliports are opened at Palo Alto, Lafayette, and San Jose.

An S-62 with two aboard is forced to ditch in the Bay four mi. NE of Oakland on April 15 after an engine malfunction. The next day, another S-62 suffers an engine malfunction that causes it to crash-land at San Francisco. The tail rotor of an S-62 strikes a truck while the helicopter is taxiing at San Francisco on May 5. No one is seriously hurt in the three accidents noted.

On May 25, a contract is signed with **Trans World Airlines (TWA)** for the establishment of scheduled service between San Jose and Palo Alto and to the TWA terminal at San Francisco. The major guarantees the service's break-even costs to an extent not covered by operating revenues and promises a \$9,000 monthly profit if costs are held to a specified level.

In June, as the result of a CAB exemption received on June 6, SFO proposes hovercraft service. Although financially stable, it begins a shuttle and subsidy arrangement with **American Airlines** at San Francisco on July 14. The shuttle is implemented with the second new S-61N now received.

Employing British-made Westland (Saunders-Roe) SR.N5 Jet Skimmer hovercraft, the carrier begins an experimental trans-San Francisco Bay air-cushioned vehicle service on August 10. The third S-61N arrives during the fall, but, to keep capacity in line with traffic, the number of daily services must be reduced to 88.

Passenger bookings increase to 139,725, but the year's losses total \$342,739.

The fleet in early **1966** comprises 3 S-61Ns, one S-62A, and 2 Westland SR.N5 Jet Skimmers. The carrier reports on June first that **Trans World Airlines (TWA)** and **American Airlines** will underwrite, for 2 years, the costs of 74 daily flights between San Francisco and Oakland and will guarantee an additional \$9,000 income per month. The majors also promise to help raise \$2 million for promotion and expansion.

The employee population in **1967** numbers 399 and the fleet still includes 4 helicopters. The flight completion rate reaches a peak of 97.6%, load factor reaches 39%, and a 49% break-even point is reached.

A total of 289,000 passengers are originated and 760,000 freight ton-miles are flown. Maintenance work is received from the U.S. military under contract and although a figure is not cited, it is noted that the company enjoys a profitable year.

The workforce declines in **1968** to 328. Freight ton-miles total 526 and customer bookings advance 13.5% to 327,879. Revenues are \$3.28 million.

The company's fortunes now begin to slide, as the Vietnam War starts to wind down. Maintenance business is lost and several routes are cut. Passenger boardings in **1969** drop to below 300,000.

The most stringent retrenchment measures are taken in February **1970**. These prove insufficient and on August 1 company officials declare Chapter XI bankruptcy. Under court guidance, management

and scheduling are improved, even as the number of routes is cut to just two.

SFO-1 succeeds in remaining alive and offering limited services, although enplanements for the year decline to 230,000. The company disposes of several helicopters and continues its Chapter XI operations in **1971**. Enplanements for the year are 190,000.

The workforce in **1972** is 122. Depressed conditions continue through the first three quarters; however, traffic loads begin to improve significantly in the third. Improvements are attributed to schedule refinement and a major effort to capture more of the Los Angeles and San Francisco markets through a joint fare arrangement with **Pacific Southwest Airlines (PSA)**. Increased bookings in the final quarter help the year's enplanement total to remain level with 1971's.

Freight ton-miles increase, however, by 5.99% to 312,000.

After almost three years of operation under bankruptcy, the carrier completes a reorganization program during the summer of **1973**. The workforce is increased by 31 employees.

Customer bookings jump 17.1% to 226,000 and cargo traffic is up by 15.1% as 2,000 freight ton-miles are flown.

Airline employment in **1974** is 150. Enplanements rise again, up 5.3% to 238,000.

Twenty-seven employees are laid off in **1975** or not replaced. A unique new marketing campaign is undertaken when the three Sikorsky S-61s are painted in a black and yellow "bumblebee" pattern; labeled "Bumblecopters," they emphasize "beeline" service in the San Francisco Bay region.

The gambit does not appear to work as passenger boardings decline 7.3% to 225,000. Cargo is also down, an even larger 27.3%.

Bumblebee flights continue until August **1976** when a job action by company mechanics forces the operator to shut its doors. Having lost \$4.7 million since the 1970 turnaround, the carrier cannot be reorganized and it is liquidated in August **1977**.

SAN FRANCISCO-OAKLAND HELICOPTER AIRLINES (SFO-2): United States (1981–1987). In the fall of **1981**, AirTrans Holdings, Inc. owner Dean Hanson purchases the name of the first SFO. Employing 3 Bell 206L LongRangers, the new rotary-wing carrier inaugurates scheduled passenger flights on November 12 linking Oakland International Airport with San Francisco and the downtown Oakland Convention Center heliport.

Early in **1982**, flights are initiated to Concord, San Jose, and to Lawrence Livermore Laboratories.

A total of 21,084 passengers are carried in the first full year.

As the result of a traffic downturn early in **1983**, SFO-2 is forced to curtail operations. The LongRangers are grounded and a single Bell 206B JetRanger is employed to operate across San Francisco Bay between SFO and Oakland. Still, President Hanson makes plans to open a heliport at San Rafael, in Marin County.

Bookings remain level at 21,616.

Airline employment in **1984** is 34 as 2 Sikorsky S-58Ts are acquired. Enplanement totals are not released, but despite the introduction of the new aircraft and the opening of the San Rafael heliport, they are still down.

Passenger boardings in **1985**, however, total 19,047. The 42-employee helicopter airline experiences a big traffic downturn in **1986** as customer bookings plunge 45.1% to 10,477. Unable to maintain its economic viability, the helicopter operator shuts its doors in **1987**.

In the fall of **1990**, the company's dormant certificate is revoked. The company petitions for its restoration, citing plans to resume twice-daily Concord-Bakersfield flights with two Piper PA-31T Cheyennes and a PA-31-310 Navajo. Authority is restored in early **1991**.

SAN JUAN AIR: United States (1965–1971). San Juan Air is set up at San Juan, Puerto Rico, in the first quarter of **1965** to provide scheduled air taxi services to destinations throughout the Commonwealth and to the U.S. Virgin Islands. Employing a fleet that comes to comprise 1 each Piper PA-32 Cherokee Six, PA-31-310 Navajo, Cessna 310, and Britten-

Norman BN-2 Islander, San Juan inaugurates daily roundtrips on March 27, maintaining them into 1971.

SAN JUAN AIRLINES: United States (1970–1989). Upon the October 1, 1970 collapse of **Puget Sound Airlines**, Roy Franklin, an owner and former CEO of the merger partner **Island Sky Ferries**, establishes a portion of the consolidated company that he reforms into San Juan Airlines, a scheduled commuter. Employing lightplanes acquired from the assets of Puget Sound, scheduled frequencies are initiated under the name San Juan Airlines over the previous charter routes, as well as to Vancouver and Victoria in British Columbia.

Flights are maintained throughout the 1970s and the fleet is increased by various types. In 1971–1972, two Piper PA-23 Aztecs are purchased, followed by two Britten-Norman BN-2 Islanders in 1973–1974, and two Cessna 207s in 1975–1976. By 1977–1978, roundtrip frequencies between the islands and Seattle total 9 per day and annual revenues average \$700,000.

On May 1, 1979, the company is sold to James Sherrell for \$600,000; the new owner transfers the airline's base to Port Angeles, Washington. The Island Mail subsidiary, operated since 1966, is merged, and founder Franklin retires on September 5. A third Islander is purchased in 1980.

By 1981, the fleet comprises 3 Britten-Norman BN-2 Islanders, 1 Piper PA-23 Aztec, 2 Cessna 207s, and 1 Cessna 206. A new freight service is launched and in competition with Harbor Airlines, scheduled frequencies are inaugurated between Bellingham and Seattle.

Destinations served regularly in 1982 include Hoquim and Port Angeles in Washington State and Vancouver and Victoria in British Columbia. A total of 97,180 passengers are boarded in 1983.

Airline employment in 1984 stands at 120 and the fleet includes 2 Islanders, 3 Cessna 207Cs, and 7 Cessna 402s.

Customer bookings jump 24.9% to 121,406.

The fleet in 1985 is enhanced by the delivery of three additional Cessna 402s and two Embraer EMB-110 Bandeirantes.

Passenger boardings swell 11.2% to 135,000. Still, a \$36,645 operating loss and a net loss of \$1.4 million are taken and lead the company to seek financial relief.

Early in 1986, Alaska Air Group, parent of **Alaska Airlines**, announces plans to acquire 50% shareholding in the Port Angeles, Washington-based small regional. This acquisition process is eventually ended as the carrier suffers a passenger traffic downturn. Instead, the company becomes a code-sharing partner of **United Airlines**.

Customer bookings fall 7.4% to 125,000 and revenues plunge 19.7% to \$6.46 million. Losses of \$64,368 (operating) and \$2 million (net) are suffered.

The workforce is increased by 30.8% in 1987 to 170 and the fleet includes 9 Cessna 402s, 3 Cessna 207s, and 2 Islanders.

Orders are placed for 12 Beech 99s. In May, thrice-daily Cessna 402 nonstop service is initiated between Portland and Bellingham.

Passenger boardings decline again, down to 120,000.

The employee population rises to 228 in 1988 as the carrier undertakes big changes. Nonstop five-times-per-day Beech 99 commercial service is inaugurated during March from Paine Field in Everett, Washington to Portland, Oregon. In April when the United contract ends, San Juan affiliates with **Alaska Airlines**. Meanwhile, the company's Canadian routes are sold to Alaskan partner **Horizon Air**. Dramatic fleet equipment alterations also occur as the Cessna 207s and a Cessna 402 are withdrawn and replaced by summer's end with 11 of 12 ordered Beech 99s.

Customer bookings swell 23% to 212,000.

All remaining routes are sold to Horizon in May 1989. The carrier, which had earlier flown under the names **Orcas Island Air Service**, **Island Sky Ferries**, and **Puget Sound Airlines**, is now occasionally referred to as the nation's oldest commuter airline. In August, after 40 years in the air transport business, the company voluntarily turns in its operating certificate to the FAA, shuts down operations, and is liquidated.

SAN JUAN JET CHARTERS: Luis Munoz Marin International Airport, San Juan, Puerto Rico 00937, United States; Phone (787) 253-0980; Fax (787) 253-0981; Year Founded 1996. SJJC is set up at San Juan in 1996 to provide executive and small group passenger charters throughout the U.S., Canada, Central America, Mexico, and the Caribbean. General Manager Rosa Montalvo oversees the work of 4 full-time pilots and schedules 1 each Beech King Air 90, Cessna 414 Chancellor, Learjet 24, and Learjet 35A Century III.

SANA (SOCIEDAD ARGENTINA DE NAVEGACION AEREA, S.A.): Argentina (1940–1943). Dr. Mario Pastega, one of the co-founders of the Italian-backed **Corporacion Sudamericana de Servicios Aereos**, creates this well-capitalized and wholly owned Argentine carrier at Buenos Aires in early 1940. During the spring, negotiations are completed and 3 flying boats are purchased from **Pan American Airways (PAA)**, 2 Consolidated Model 16 Commodores and 1 Sikorsky S-38 amphibian. On June 5, regularly scheduled flights are inaugurated across the Rio de la Plata to Colonia, Uruguay.

In order to obtain an advantage over its two rivals, The Corporacion and **CAUSA (Compania Aeronautica Uruguaya, S.A.)**, SANA offers deep-discount fares. Plans are made to extend routes to other localities, but the nation's entry into World War II and the loss of the Sikorsky in an accident lead the carrier to cease operations on August 16, 1943.

SANDON AIRLINES (PTY.), LTD. See COUNTRYWIDE AIRLINES (PTY.), LTD.

SANSA (SERVICIOS AEREOS NACIONALES, S.A.): Centro Colon, Apartado 999, San Jose, Costa Rica; Phone (506) 223-4179; Fax (506) 255-2176; <http://www.grupotaca.com>; Code TZ; Year Founded 1979. With **LACSA (Lineas Aereas Costarricenses, S.A.)** as majority 51% shareholder, SANSA is formed at San Jose on October 2, 1979. Service is initiated in early 1980 with 2 CASA C-212-200s and 1 Douglas DC-3 linking the capital with Guapiles, Golfito, Limon, Quepos, Chiles, Tamarindo, Liberia, Palmar, and Coto. In early 1980, a DC-8-55F freighter operation is begun.

In early 1983, the airline is completely reorganized in an effort to reverse declining profits caused by traffic downturns and fuel price increases. The two CASAs are withdrawn and the cargo operation is turned over to **LACSA (Lineas Aereas Costarricenses, S.A.)**. The staff is cut to 45. These emergency cost-cutting measures have a positive effect and enable the carrier to survive the remainder of the decade.

In 1990, General Manager Carlos M. Delgado's company resumes operation of its routes with a single CASA C-212-200 leased from **LACSA (Lineas Aereas Costarricenses, S.A.)**.

While en route from San Jose Juan Santamarita to Palmar Sur y Coto on January 15, Flight 3223, the C-212-200 Aviocar with 3 crew and 20 passengers, crashes into 2,200-m. Pico Blanco in Costa Rica; there are no survivors.

A second chartered Aviocar is placed into service as a replacement during 1993–1994, along with a Douglas DC-3.

Operations continue apace in 1995–1996. Enplanements during the latter year total 24,275.

The TACA Group of Central American airlines in 1997 determines that SANSA should be upgraded in order that it might provide not only improved Costa Rica domestic services, but internal flights in other nations as well. To this end, a new fleet of Cessna 208B Grand Caravans is provided.

Passenger boardings skyrocket 73.7% during the year to 92,300.

On April 6, 1998, TACA Group unveils a new "Inter Cuba" division in cooperation with ENSA, a company owned by the Institute of Civil Aeronautics of Cuba. Although under the operational management of SANSA, the new unit's employees, including its general manager, are all Cubans. Under this arrangement, Cessna 208Bs with Costa Rican pilots provide internal frequencies between La Habana, Varadero, Cayo Coco, Trinidad, Cayo Largo, and Gerona, all growing tourist areas.

As Guatemala has no scheduled, permanent, or efficient domestic air transport for passengers, cargo, or documents, TACA Group at the end of April decides to remedy that situation. The subsidiary **Transportes Aereos Inter, S.A.** is established at Guatemala City to provide frequencies. Equipped with a fleet of Cessna 208B Grand Caravans operated by Costa Rican pilots of SANSA under contract, the new entity begins regular flights to Puerto Barrios, Coatepeque, Retalhuleu, Quetzaltenango, Huehuetenango, and El Quiche.

Enplanements during the 12 months fall back to 57,000.

The company enjoys a resurgence in passenger traffic in **1999** as boardings surge to 102,000.

To the left of its normal route and flying in poor visibility, a Cessna 208B Caravan with two crew and eight passengers, all foreign tourists en route from La Fortuna to Tamarindo, flies into high ground at Volcano Arenal, near Lagunas, on August 26, **2000**; there are no survivors.

SANTA BARBARA AIRLINES, S.A.: Ave. 3H #78-51, Res. Republica-Local 01, Maracaibo, Estabo Zuilia, Venezuela; Phone 1 (58) 14-628929; Fax 1 (58) 14-930250; Code BJ; Year Founded 1995. The plan by 300 private investors in western Venezuela to establish this international and regional scheduled passenger and cargo carrier based at Maracaibo, Venezuela's oil and energy capital, is announced on April 1, **1995**. Heli Saul Fernandez is chairman and president, with former Airbus Industrie official Frans Kramer as general manager/CEO. The official launch occurs on November 1.

The pre-operative phase begins and the company's plans are approved by the Transportation Ministry in April **1996**. Although it is expected that revenue services will begin before year's end, a number of circumstances will interfere with this optimism. First and foremost among these is a delay in aircraft selection and arrival.

After reviewing the aircraft possibilities offered by Aeropostal (Regional), de Havilland Canada, and Fokker, fleet composition is settled in September and a \$22-million lease agreement is signed with AI(R) on December 13. Also, at year's end, a workforce of 80 is recruited, including 24 pilots and 10 engineers.

The first of two previously employed ATR42-320s is delivered on February 14, **1997**. It is employed to inaugurate scheduled services a month later from Maracaibo to Aruba, El Vigia, Merida, and Santa Barbara. Following receipt of the second plane in May, routes are stretched to Barranquilla, Banquisimeto, Curaçao, Cartagena, and San Antonio.

Flights continue apace in **1998–1999** without change or incident. During these years, four more ATR42-320s are acquired and enplanements approach 500,000.

During **2000**, Santa Barbara becomes the third Venezuelan carrier designated to serve the U.S. The company, during the first quarter, also paints its ATRs in a new color scheme.

In December, new CEO Mario Goldberg announces that the carrier will wet-lease an aircraft from a U.S. Part 121 operator and begin flights into Fort Lauderdale during the spring.

SANTA FE SKYWAYS: United States (1946–1948). With the backing of the Atchison, Topeka and Santa Fe Railroad, Santa Fe Skyways is established at Wichita, Kansas, on May 4, **1946** to operate nonscheduled all-cargo services over the parent's rail routes as far west as Arizona and California. Homer R. Lake is named president with George W. Lupton Jr., as vice president/general manager. Initial capitalization of \$100,000 is provided and two war-surplus Douglas C-47 Skytrain transports are purchased.

The inaugural flight, Los Angeles to Salinas, California, is made by Chief Pilot Steve Doss on July 31, with 2,600 pounds of strawberries in 200 crates. A third C-47 arrives and an order is placed for four DC-4s. In November, the company applies to the CAB for certification. The first DC-4 is delivered on December 28; christened *Sky Chief Navajo*, it is placed into service on the Los Angeles to Chicago route.

The second DC-4, *Sky Chief Apache*, arrives on January 15, **1947**, followed by the *Sky Chief Pueblo* on February 21 and *Sky Chief Taos* on

March 18. The second anniversary of contract air service is celebrated in July, at which time employment stands at 110.

Santa Fe is sued in federal court by **California Eastern Airways** and **The Flying Tiger Line**; these two California-based freighters are concerned that the company might be the harbinger of additional railroad-controlled air freight lines to follow. By Thanksgiving, the Skyway workforce has been increased to 145 and the fleet now includes 3 C-47s and 4 DC-4s. Certification still has not been granted and on December 5, the CAB turns down the carrier's application.

Rather than risk an adverse court decision, Skyways elects disbandment, announcing its intention on January 12, **1948**. Having flown 2.01 million miles without accident, the cargo carrier ceases operations on January 15.

SARANSK STATE AVIATION ENTERPRISE: Saransk Airport, Saransk, Russia; Year Founded 1999. SSAFE is established at Saransk in the spring of **1999** to offer passenger charters throughout the Volga region. The company is part of the state-owned group that also operates Saransk Airport. Orders are placed by Director General Anatoly Zakharov for six Antonov An-24Bs that enter service during the spring, along with a pair of Tupolev Tu-134As, and permit the carrier to offer flights during the summer holiday season to Sochi, Mineralny Vody, and St. Petersburg. In the fall, a long-term contract is signed under which the airline will provide lift for the Saratov-based hockey team Sokol. In addition, aviation services are also provided to the automobile manufacturer AutoVAZ at Togliatti.

At the beginning of **2000**, an An-24B is leased to financially troubled **Nizhegorad Airlines (Nizhegorodskii Avialinii)**. The Tu-134As are chartered to unnamed airlines in Moscow and Tartarstan, both of which agree to overhaul them at their expense in return for the cost of their leases. The three remaining Antonovs return to summer charter work in April and also introduce a scheduled route to Baku. By October, the carrier has visited 258 different airports.

Following the crash of its last serviceable An-24 in early November, **Cheboksary Air Enterprise (Cheboksarskoe A/P)** calls upon SSAFE for assistance. Upon its delivery on November 20, the fifth SSAFE An-24B begins replacement service for Cheboksary on its route from Surgut to Moscow via Cheboksary. It is anticipated that the service may continue for some time as Cheboksary Air Enterprise does not have the 2.6 million rubles required to pay the Irkutsk Aircraft Repair Plant for overhauling its damaged aircraft.

SARATOV AVIATION DIVISION (SARATOVSKI OAO): Russia (1992–1994). This local unit of **Aeroflot Russian International Airlines (ARIA)** is established at Saratov Airport in **1992** to provide regional domestic scheduled service and international charters. U. K. Davidov is named general director and his operations are conducted with 5 Let 410s and 3 Yakovlev Yak-42s.

Operations continue apace in **1993** and the fleet is expanded by the addition of 8 L-410s, 9 Yak-42s, 5 Antonov An-24s, and 17 Mil Mi-2s.

The general downturn in the economy brings change in **1994**, as the carrier is reformed into **Saravia**.

SARATOV AVIATION FACTORY (SARATOVSKI AVIATIONNY ZAVOD): Russia (1994–1995). The local aircraft manufacturing concern at Saratov is granted permission in early **1994** to establish an air transport arm with which to earn funding to replace that cut by the state. V. A. Yermishin is placed in charge of the ad hoc passenger and cargo charter operation and is given 5 Yakovlev Yak-40s with which to launch revenue services. These can only be maintained for a year.

SARAVIA: Ulitsa Zhukovskogo St 25, Saratov Airport, Saratov, 410010, Russia; Phone 7 (8452) 642 969; Fax 7 (8452) 646 515; <http://www.saravia.ru>; Code 6SV; Year Founded 1994. Saratov Aviation Division (Saratovskii OAO) is reformed at Saratov in 1994. Yuri Davidov becomes general manager and the fleet includes 13 Let 410s, 9 Yakovlev Yak-42s, 5 Antonov An-24s, plus 15 helicopters. Enplanements total 199,946.

CEO Davidov's 42 aircraft transport a total of 167,600 passengers in 1995, a decline of 19.3%. Cargo traffic, on the other hand, increases by 9% to 5.58 million FTKs.

Flights continue without incident during the remainder of the decade.

On December 20, 2000, the company joins with **BAL Bashkiri Airlines** (Bashkirskie Avialinii Aviakompaniya), **Nizhegorod Airlines** (Nizhegorodskii Avialinii), and **Samara Airlines** (Samara Avialinii) to form a joint marketing agreement designed to keep open the air routes in the Volga Federal District. The plan is similar to one announced in Moscow earlier in the month by **Domodedovo Airlines**, **Chelai-Chelyabinsk Airlines** (Chelyabinsk Chief Aviation Enterprise), **Kras Air** (Krasnoyarsk Avialinii-KrasAir), and **Avia Express Cruise**. Details concerning possible joint schedules, tariff adjustments, and fleet combinations are not provided to the media.

At the end of the year, a homepage is opened on the Internet's World Wide Web.

SARO (SERVICIOS AEREAS RUTAS ORIENTE, S.A. de C.V.): Hidalgo #2724, Col Jardin Obisrado, Monterrey, 64000, Nuevo Leon, Mexico; Phone 52 (83) 301 190; Fax 52 (83) 330 779; Code UF; Year Founded 1991. SARO is established at Monterrey in 1991, its owners hoping to become competitors to the majors, **Mexicana Airlines, S.A. de C.V.** and **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)**. Revenue services commence to major domestic communities with a fleet that over the next year grows to include 2 leased Boeing 737-2L9As, 2 chartered B-737-264As, 1 leased B-727-77, and 3 chartered B-737-130s. A British Aerospace (BAC) 1-11-201AC is acquired as a backup, but is never flown.

The fleet is altered in 1993; although the B-737-2L9As and B-737-130s are retained, the other planes flown earlier are replaced by 2 leased B-727-2Q4As and 1 Douglas DC-9-31. Charter services are briefly operated to Las Vegas.

When DOT officials discover in September that the airline has failed to receive the appropriate route authority, the carrier's rights to fly into the U.S. are revoked and it is fined \$43,000.

Unable to achieve its dream of becoming a full-service scheduled airline, SARO continues charter flights in 1994. The chartered B-737-2L9As are returned to their lessor.

Enplanements total 330,119.

Flights continue in 1995–2000. During these years, the DC-9-31 is returned and the all-chartered fleet comprises 3 B-737-130s and 1 B-737-217.

SAS (SCANDINAVIAN AIRLINES SYSTEM): Frosundaviks Alle 1, Stockholm, S-16187, Sweden; Phone 46 (8) 797-0000; Fax 46 (8) 797-1515; <http://www.sas.se>; Code SK; Year Founded 1946. In 1938, representatives from the governments of Sweden, Norway, and Denmark and their national airlines—**Aktibolaget Aerotransport/ABA Swedish Airlines, A.B.**, **Det Norske Luftfartselskap/DNL Norwegian Air Lines, A.S.**, and **Det Danske Luftfartselskab/DDL Danish Air Lines, A.S.**—agree to pursue the idea of a joint Bergen–New York flying boat service in cooperation with **Pan American Airways (PAA)**.

The German invasion of Norway and Denmark in the spring of 1940 and the Swedish government's refusal to grant **ABA Swedish Airlines, A.B.** a subsidy to support any deal with **Pan American Airways (PAA)**, conspires to force delay in proposals for cooperative operations.

In neutral Sweden on June 9, 1943, Marcus Wallenberg founds **Svensk Interkontinental Lufttrafik, A.B.** (SILA), which becomes his nation's international carrier. **ABA Swedish Air Lines, A.B.** assumes

responsibility for regional and domestic services. Representing the as-yet unformed SAS, Per Norlin, with SILA backing, orders 7, later 10 Douglas DC-4s on November 27.

Norlin and his associates negotiate a North Atlantic concession under the 1944 U.S.–Swedish bilateral air treaty. Nine interned Boeing B-17 bombers are taken in hand and converted to civil status by SAAB; it is tacitly agreed that the planes will be given to and paid for equally by the three state airlines. Although occupied, the Danes promptly smuggle out funds to pay for their share.

On March 23, 1945, SILA formally receives the North Atlantic route authority negotiated the year before. In SILA livery, a converted Flying Fortress makes a token Stockholm–New York flight on June 27. Negotiations between the three national carriers for the actual establishment of a joint consortium begin anew.

An order for four Boeing 377 Stratocruisers is placed on February 28, 1946. In the colors of **ABA Swedish Airlines, A.B.**, the first DC-4, christened *Nordan*, is delivered on May 1. On July 31, the Scandinavian Airlines System (SAS) is formally established. The consortium agreement is the first of its kind in commercial aviation history and a model for later collaborative efforts, such as **Air Afrique, S.A.** The agreement is formalized in a constitution signed by Prince Axel of Denmark, DDL's Per Kampmann, DNL's Thomas S. Falck Jr. and Thomas Olsen, ABA's Carl Florman, and SILA's Marcus Wallenberg. These six individuals become the carrier's first board of directors; Per A. Norlin becomes first president/CEO.

Capital shareholding in the new organization is divided between the companies, with three-sevenths to SILA/ABA and two-sevenths each to DDL and DNL. The agreement establishes Overseas SAS for operation of international flights; however, to overcome international law concerns, the parent companies continue to fly their own separate domestic and European regional services.

Following delivery of the 10 DC-4s ordered in 1943, the first SAS transatlantic New York service (in the Douglas *Nordan*, wearing the national flags of Denmark, Norway, and Sweden) is inaugurated from Stockholm and Copenhagen on September 17 via Prestwick and Gander. An agreement is signed with the U.S.S.R., allowing **Aeroflot Soviet Airlines** to participate, at least indirectly, in the New York service.

On October 21, SILA sells delivery positions for two of its Stratocruisers to **DDL (Danish Air Lines, A.S.)** and **DNL (Norwegian Air Lines, A.S.)**. The two have indicated a willingness to pool B-377 flights with SILA on a twice-weekly service from Stockholm to New York via Oslo, Copenhagen, and Prestwick. The three-nation flag carrier inaugurates New York to Helsinki flights via Stockholm on November 20, with the Russian carrier taking continuing passengers from Helsinki to Moscow. Charter operations to Montevideo begin November 30 and scheduled through service to Buenos Aires on December 29.

While seeking a lost DC-3 on May 16, 1947, a Swedish Consolidated PBY Catalina is attacked by Soviet fighter planes and forced down at sea, injuring two crewmen. The Swedish public is incensed and a crowd stones the Soviet embassy at Stockholm. Daily SAS New York service is launched on June 17. On July 6, three Swedish youths, held aboard a DC-4 as the first stowaways to cross the Atlantic aboard a commercial airliner, arrive at New York and are turned over to police. A DC-4 with 45 aboard crashes into Mount Hymettos, near Athens, on October 28; there are no survivors. Route agreements for Swedish regional services are reached between SILA and **ABA Swedish Air Lines, A.B.** in November. A DC-4 crashes near Ravello, Italy, on November 20 (20 dead) and in December orders are placed for 17 DC-6s.

On April 18, 1948, the regional operations of **DDL Danish Air Lines, A.S.**, **DNL Norwegian Air Lines, A.S.**, and **ABA Swedish Air Lines, A.B.** are combined into an SAS European Division while ABA and SILA are fully amalgamated on July 1 under the former's name. Although four DC-6 building slots are given over to **British Commonwealth Pacific Air Lines, Ltd.**, the first of the new Douglas transports begin to join the fleet in April and May and are integrated onto the New York service.

One of the new DC-6s with 7 crew and 25 passengers is involved in the company's first major accident. Near London's Northolt Airport on July 5, an RAF Avro 685 York collides with one of the new Douglas transports (39 dead) in the worst air disaster in British civil aviation history to date. Both aircraft had been circling in a rainstorm, waiting to land.

South Atlantic DC-6 roundtrips commence on October 30.

En route from Madrid to Copenhagen on February 8, **1949**, a British-built Viking crashes off the coast of Sweden (28 dead). With the four Scandinavian Stratocruisers due for delivery in October and December, SILA announces on April 11 that it has chosen to standardize its fleet on products from Douglas Aircraft. The delivery positions are sold to **British Overseas Airways Corporation (BOAC)**. The first SAS Far Eastern route is opened on October 26, when DC-6 service to Bangkok is inaugurated.

The carrier initiates a "stop over" plan on June 17, **1950**, allowing passengers to visit cities en route at no extra cost. The first of 10 SAAB 90A-2 Scandias begins service with the European Division in December.

Made retroactive to October 1, 1950, the overseas and European divisions of SAS are merged in a final consortium agreement signed on February 8, **1951**. SAS becomes the flag carrier of Denmark, Norway, and Sweden with ABA, DDL, and DNL the nonflying national holding companies. Some £8 million in capital is subscribed to the enterprise in the three-sevenths and two-sevenths proportions of the original 1946 pact; half of the funds are paid by the national governments and half by private investors. The whole agreement is given a renewable 25-year life span.

A DC-3 with 4 crew and 18 passengers crashes while landing at Bromma Airport, Stockholm, on April 1; although the aircraft is destroyed, there are no fatalities.

DC-6 service is launched to Tokyo via Bangkok on April 18 and to Nairobi on November 15. In December, the last of 10 ordered SAAB 90A-2 Scandias enter European service.

A consortium crew led by Capt. Jensen performs the first transpolar flight by a commercial airliner with the delivery on November 19, **1952** of a Douglas DC-6B from Los Angeles to Copenhagen via Edmonton, Canada and Thule, Greenland. This proving flight by the *Arild Viking* is made in 28 hrs. 7 min. (actual flying time is 23 hrs. 38 min.), cutting 1,000 miles off the regular route. A second DC-6B delivery and proving flight is made over the route on December 6.

DC-6B service to Johannesburg is started on January 7, **1953**. Direct DC-6B is initiated from Goteborg, Sweden to New York City on May 18 and a DC-6B departs Oslo on May 23 on the first Europe-Tokyo pre-service flight over the Great Circle Route. After the U.S.S.R. denies the airliner permission to fly across Siberia, the airliner arrives at Shemya, in the Aleutians, the next day. From the Aleutians, the DC-6B goes on to Tokyo on May 25, completing the 6,683-mile trip in 37 hrs. flying time, 3,000 miles less than that required for the conventional route. Tourist-class fares are introduced on the North Atlantic route on October 4.

A DC-6B completes a successful Scandinavia to Los Angeles test flight over the Great Circle Route on January 25, **1954**. The company petitions the U.S. CAB on March 9 for permission to fly regularly scheduled services to San Francisco and Los Angeles. A Dehmel flight trainer is purchased 10 days later and on March 29, mechanics strike at Oslo and Stavenger.

A DC-6B flies from Prestwick, Scotland, to New York City in a record 11 hrs., 7 min. on May 1. Two weeks later, on May 14, the carrier begins to offer a credit plan that will enable travelers to finance their trip costs. A DC-6B completes a Norway to Japan flight on May 19 via the North Pole and Fairbanks, transporting Red Cross personnel bound for South Korea.

On August 18, the CAB grants SAS a Los Angeles route in exchange for Scandinavian permission for **United Air Lines** to operate the same route in reverse. The airline signs an agreement with **Aeroflot Soviet Airlines** on September 5 for the inauguration of Stockholm-Moscow

service. A significant number of Swedish pilots resign on October 15 over alleged preference given to Danish pilots and during the month, the CAB grants the company layover permission for Blueie W 8 airfield at Sondre Stromjord in Greenland.

On November 15, the world's first commercial service is pioneered over the polar shortcut between Europe and California. The DC-6B *Royal Viking* departs Los Angeles, lands at Winnipeg and Blueie W 8 for refueling, and reaches Copenhagen on November 16, completing the inaugural flight in 23 hrs. 58 min. The second phase of the Great Circle Route service is initiated by the DC-6B *Helge Viking* from Copenhagen on November 16, which brings the premiers of the three Scandinavian countries and other VIPs to Los Angeles 35 minutes ahead of schedule, via Sondre Stromjord. En route, the two Douglas transports pass one another.

Convair CV-440s and Douglas DC-7Cs are ordered in **1955**. On May 13, a DC-6B flies from Stockholm to Tokyo via the North Pole in a pre-service record 33 hrs. 20 min. Henning Thorne Holst succeeds Per A. Norlin as president during the fourth quarter.

The first of 16 Convair CV-440s is delivered for service on the European routes in **1956**; as DC-7Cs are acquired, DC-6Bs are transferred to the regional frequencies.

Scheduled service from Oslo to Moscow begins on May 1; three days later, direct Buenos Aires to Moscow flights begin. The premier DC-7C is delivered on August 16 and is christened *Brage Viking*; it is followed by the *Guttorm Viking* on September 25.

On February 24, **1957**, the North Pole route between Copenhagen and Tokyo is inaugurated via Anchorage as the carrier's two DC-7Cs fly simultaneously from both destinations. Japanese Prince Takahito and other VIPs are on the Copenhagen-bound airliner while Danish Premier Hans C. Hansen and Prince Axel are on the Tokyo-bound plane. As the latter transport flies over the top of the world, Premier Hansen broadcasts a message promising goodwill and cooperation between nations on a shrinking globe.

A half-share in the newly organized Swedish domestic carrier **Linje-flyg, A.B.** is subscribed on April 2. On April 5, service is inaugurated from Stockholm to Warsaw and on to Prague. On June 28, SAS becomes the first non-French airline to order a Sud Est Caravelle jetliner.

As of October 10, service is initiated to Cairo via Budapest. Nonstop Lisbon to Brazil flights are initiated on October 20.

A DC-6B with five crew is lost in a training accident at Norrkiping, Sweden on November 28; there are no fatalities.

Late in the year, all eight of the carrier's SAAB 90A-2 Scandias are sold to the Brazilian airline **VASP (Viacao Aerea Sao Paulo, S.A.)** and replaced by Convair CV-440s. Orders are placed for a medium-ranged French jetliner, the Sud SE-210 Caravelle.

Passenger enplanements for the year total 1,396,000.

Following a dispute with IATA over the quality of its food service (the so-called "sandwich war"), SAS, in February **1958**, is authorized to offer passengers its smorgasbord, thus beginning a worldwide catering reputation for superior in-flight meals. An alliance is entered into with **Swissair, A.G.** on October 8.

The consortium agreement is renewed, with slight modifications, on December 16. During the fourth quarter, Ake Rusck succeeds Henning Thorne Holst as president.

On February 20, **1959**, half-interest in the Mexican airline **Aerovias Guest, S.A. de C.V.** is purchased. On April 26, the consortium airline becomes the first non-French carrier to place the Sud SE-210 Caravelle I into regularly scheduled service, flying it on a multistop Copenhagen-Cairo route. Leased from its manufacturer, the aircraft is employed is the first prototype. Also in April, Montreal to Copenhagen service is launched. In a fifty-fifty arrangement, **Thai Airways, Ltd.** and SAS form **Thai Airways International, Ltd. (THAI)** at Bangkok on August 24.

In December, a fleet of six DC-6s is sold to **Aeronaves de Mexico, S.A. de C.V.** As part of the package, SAS agrees to provide Mexican pilots with a three-week transitional training course.

Following a service from Stockholm, Flight 871, an SE-210 Caravelle I with 7 crew and 35 passengers, crashes short of the runway near Ankara on January 19, 1960; there are no survivors.

The first DC-8-32 is received on March 31, and is christened *Dan Viking*. DC-8-32s are introduced on intercontinental service from Copenhagen to New York's Idlewild Airport on May 1, Los Angeles on June 3, and Tokyo on October 11.

On May 7, the new Sud SE-210 Caravelle *Einor Viking* is placed on the Stockholm-London via Copenhagen route. With Princess Astrid of Norway, Princess Margaretha of Sweden, and Princess Margarethe of Denmark aboard, the company makes a Copenhagen to Los Angeles DC-8-32 inaugural flight on June 4 via the Great Circle Route.

A new DC-8-32 narrowly averts disaster during a night takeoff from Copenhagen during August when it flies into a large flock of seagulls. Although three engines and the leading edge of the wing are damaged, the Douglas is able to make an emergency landing back at its point of origin and no injuries are reported. Two days later, the aircraft is back in service.

During the fall, the multinational flag line provides 25% of the start-up capital for newly formed **Gronlandefly, A.S./Greenlandair**.

Regularly scheduled nonstop trans-polar DC-8-32 service is initiated on October 11 between Copenhagen and Seattle. As part of a maintenance pool with **Swissair, A.G.**, the company, late in the year, is able to modify the wing leading edges of its DC-8-32s to accommodate an additional 950 gallons of fuel.

Passenger boardings for the year total 1,880,000.

Following financial reversals in 1960, the 50% share of **Aerovias Guest, S.A. de C.V.** is divested in 1961. In February, the DC-6B *Hjalmar Viking* is sold to **REAL Brazil, S.A.** and Oslo to New York jetliner flights begin on April 20.

On August 20, the carrier announces new cost-cutting measures, including the layoff of 1,250 ground personnel. Meanwhile, the subsidiary **Scanair, A.B.** is formed to provide charter and inclusive-tour service to points in southern Europe, North America, Africa, and the Canary Islands.

The subsidiary SAS Catering, A.B. is set up on October 1. During the fourth quarter, Curt Nicolin succeeds Ake Rusck as president.

A total of 1.97 million passengers are carried during these 12 months.

A Convair CV-990 Coronado is leased from its manufacturer on February 23, 1962 for sublease to **Thai Airways International, Ltd. (THAI)**. Originally christened *Adils Viking*, the new ship initially enters service between Copenhagen and Tokyo via intermediate points. All 14 Caravelles are grounded on March 17 for landing gear modifications; the consortium agreement is further amended on March 26. A second CV-990, *Ring Viking*, is acquired on April 10 and is also sent out to Bangkok.

The *Ring Viking* is rechristened *Srisuriyothai* and enters service on behalf of the SAS partner on May 18.

For its work in pioneering North Pole routes, the carrier, on October 12, receives the Christopher Columbus Prize, which is sometimes known as "The Nobel Prize of Communications."

A DC-8-32 flies from New York to Oslo on October 26 in a record 5 hrs. 55 min. Karl Nilsson succeeds Curt Nicolin as president during the fourth quarter.

As passenger traffic accelerates through the year to 2,157,193, additional capacity is required.

The two Convair CV-990A Coronados are returned from their Asian sublease in 1963 and are assigned to service on the company's South Atlantic routes; the *Srisuriyothai*, incidentally, takes back its original name.

On May 4, a "Top of the World" domestic route is opened with a new northern Norway service from Tromsø to the Kirkenes via Alta and Lakselv. On October 20, Econofare New York to Copenhagen propeller service is begun.

Bookings this year accelerate to 2,376,982.

DC-8-32 flights from Copenhagen to Chicago begin on April 2, 1964.

Airline employment reaches 12,126 during the year, enplanements are up to 2,676,000, and revenues total \$195.15 million.

On February 1, 1965, the first European electronic reservations and ticketing system, SASCO, is introduced by the airline.

A DC-7C with 7 crew and 84 passengers crashes upon takeoff from Tenerife on February 8; although the aircraft must be written off, there are no fatalities.

Bergen is added to the route network on April 5 while Governors Rolvaag and Reynolds and Mayor Daley are among 65 VIPs feted at Copenhagen following the inauguration of direct SAS service from Chicago. An order is placed for eight DC-8-62s and new computer reservations procedures are introduced at the Copenhagen base, where a new air cargo terminal is also under construction.

Passenger boardings rise 14.6% to 3,090,642.

Withdrawn during January, the CV-990As *Adils Viking* and *Ring Viking* are passed to Swissair, A.G. on February 1, 1966. As the result of Norway's discontent with SAS, that nation's new conservative government ends the conglomerate's privileged status over private companies by awarding domestic routes to **Braathens SAFE, A.S.** on May 15.

The Norwegian, Danish, and Swedish pilots associations initiate a unified job action on June 6 and the governments of the respective countries agree to try to settle the strike by voluntary arbitration. The pilots accept an arbitrated settlement, ending their walkout on June 22.

Seattle becomes a new polar route destination on September 2 and on December 19, the carrier becomes launch customer by placing the first orders for the DC-9-21 and DC-9-41 for medium- and short-haul frequencies.

Enplanements this year total 3,283,550.

The airline receives Soviet permission on January 27, 1967 to fly over Siberia on flights to Japan in return for the receipt, by Aeroflot, of permission to fly over Scandinavia. In March, the **British Eagle International Airways, Ltd.** BAC 1-11-301 Stalwart is leased for the summer charter season; given the name *Arnold Viking*, it retains its British registration and markings.

Copenhagen to Leningrad reciprocal service begins on April 4. On May 22, SAS becomes the first airline to introduce the DC-8-62 on long-haul routes.

Meanwhile, permission from Moscow is received on August 8 for operations over the U.S.S.R. on a Copenhagen-Bangkok service. This new Trans-Asian Express DC-8-62 route between Copenhagen, Bangkok, and Singapore via a Tashkent service stop is inaugurated on November 4. The new air cargo terminal is occupied at year's end.

Passenger boardings jump 15% to 3,863,000 and freight traffic climbs 23%.

Airline employment in 1968 totals 13,081. Deliveries of the first of 49 specially ordered DC-9-41s begins in February with the first of the Douglas twin-jets entering service in late March. Dar Es Salaam is added to the African network on March 31 and two DC-8-63s are delivered in July.

On August 17, the carrier announces, that it has accepted a 30-year-old Norwegian woman, Turi Wilderoe, as a pilot trainee, becoming the first major Western line to accept a female for such a post. On September 18, the DC-9-21 specifically designed for SAS begins test operations. The carrier subscribes 22% of the capital required to refinance **Widerøes Flyveselskap A.S.** The first of 10 DC-9-21s is delivered on December 11 and is placed on domestic routes at the end of the year.

Scheduled booking increase 12.8% to 4,155,000 and revenues are now \$286.37 million.

The employee population stands at 14,466 in 1969. The fleet now includes 16 DC-8-62s, 30 DC-9s, 15 SE-210s, and 10 CV-440s, including the first of 10 specially ordered DC-9-21s. Orders are placed for Boeing 747 Jumbojets.

On final approach to Los Angeles on January 13 on a flight from Seattle and Tacoma, the inattentive flight crew of a DC-8-62 with 9 crew and 36 passengers allows their aircraft to land in Santa Monica Bay during an ILS approach (15 dead).

Also on January 13, the KSSU Group for technical and operational cooperation is founded in association with **Swissair, A.G.** and **KLM (Royal**

Dutch Airlines, N.V.; a multi-airline pact is signed for a 10-year period. Under its terms, SAS will specialize in engine overhaul and cockpit standardization.

The first DC-9-21 revenue service is offered on January 27.

A new domestic terminal is opened at Copenhagen's Kastrup Airport and the company becomes the first in Europe to install the Telemax computerized reservations system. The last of the 10 DC-9-21s arrives on April 12 and is christened *Rane Viking*.

On May 2, Turi Wideroe becomes the first woman pilot hired by SAS and the first woman to pilot a passenger craft for a major Western airline. Later in the year, Knut Hagrup succeeds Karl Nilsson as president.

The total number of travelers for the year is 5,007,420; the profit is \$16.1 million.

In 1970, airline employment rises to 14,560. **UTA French Airlines** joins the multi-airline KSSU Group pact in February.

The No. 1 engine of a DC-8-62 with 11 crew and 54 passengers suffers an uncontained failure and fire during the plane's April 19 takeoff roll from Rome; the liftoff is aborted and all aboard are evacuated. No injuries are reported.

A Fokker F.27 goes down near Vagar, in the Faeroes, on September 26 (eight dead).

Freight traffic for the year remains level, passenger boardings increase 10% to 5.05 million, and a record profits of \$17.2 million is recorded—the 8th profit in a row. In terms of passenger boardings, SAS now ranks as the world's 21st largest airline; it is 17th in air freight and 15th in number of employees. With 71 jetliners, it possesses the 17th largest fleet.

The first Boeing 747-283B *Bjarne Viking* is delivered on February 22, 1971 and placed in service on the Copenhagen to New York route on April 1. In February, SAS joins with **Maersk Air A.S.** and **Cimber Air, A.S.** to create **Danair, A.S.** for Danish domestic services. Trans-Siberian Express service is launched on April 3 over a route from Copenhagen to Tokyo via Moscow.

Quick-witted security personnel prevent the hijacking by a lone assailant of a DC-9-41 preparing for a scheduled domestic service from Malmo to Stockholm on May 17.

Vingresor/Club 33, a major tour-producing company, is acquired on June 2.

A new seven-year pact is signed with **Thai Airways, Ltd.** for the operation of **Thai Airways International, Ltd. (THAI)**. Company-owned hotels open in Norway, Denmark, and Sweden. Beginning in September and continuing for 10 months, the carrier offers \$208 roundtrip excursion fare service between New York and the Scandinavian capitals; the fare is the lowest jet tariff offered on the route by a scheduled airline.

The first DC-8-32, *Dan Viking*, is withdrawn at the beginning of October and the second B-747-283B *Ivar Viking* arrives on November 12.

Enplanements for the year dip to 4,580,520.

In 1972, airline employment is up only three people over 1970. East Berlin, Abidjan, Zagreb, Belgrade, and Geneva are added to the route system and orders are placed for DC-10-30s. On May 12, the company takes delivery of a DC-8-63, the last DC-8 manufactured.

Three gunmen, advocating Croatian independence, hijack a DC-9-41 with 79 aboard en route from Goteborg to Stockholm on September 15. They force it to land at Malmo, where they demand the release of six Croats imprisoned for their role in the murder of the Yugoslav ambassador to Sweden, V. Rolic, the previous year.

After obtaining the prisoners, \$200,000 in ransom, and fuel, the passengers are released and the plane is ordered to fly to Madrid, where the pirates surrender to Spanish authorities the next day. The three ringleaders will be tried and given 12-year terms in Spanish prisons.

Freight traffic this year soars by 16.7% and boardings are up to 5,798,000.

Unable to stop after aborting its takeoff from Oslo's Fornebu Airport on January 30, 1973, the DC-9-21 *Reidar Viking* with 4 crew and 29 passengers crashes through a fence onto ice-covered water. Although the landing gear breaks through the surface, the wings support the plane

long enough for all aboard to escape. The short-bodied Douglas subsequently sinks and although retrieved, must be written off.

Also in January, the multinational airline places the largest single equipment order in its history to date: \$105 million for 17 more DC-9-41s. New all-cargo routes are opened to Chicago, Bangkok, and Singapore. An agreement is reached with the People's Republic of China permitting SAS to service Peking at a future date and a new hotel is opened at Copenhagen.

Airliners are designated "department stores" as of July 8 when the carrier begins placing 24-page sales catalogs in the reading material provided in seat pockets. The public relations department maintains that the catalogs will service as in-flight shops for travelers, enabling them to purchase quality products in Scandinavian countries at a 20% discount. Beginning on the night of December 13, the carrier introduces stewardesses in its jetliner cabins costumed as Lucia, Swedish queen of light, as part of the ancient Swedish celebration of what was once considered the year's longest night.

Enplanements for the year are 6,224,130, including the 50 millionth passenger. Cargo traffic is up by 5% and the workforce now totals 14,909. At year's end, the last surviving founder, Dr. Marcus Wallenberg of Sweden, retires from the board of directors.

An SE-210 Caravelle III is damaged beyond repair at Stockholm's Arlanda Airport on January 25, 1974.

The 17 DC-9-41s are received throughout the remainder of the year as the last of 12 Caravelles are retired, including the final unit withdrawn on September 25. The first two DC-10-30s are delivered on October 6 and are put on the Scandinavia-Seattle and Los Angeles polar route on November 5. New Delhi becomes a passenger destination.

Passenger boardings rise 1% to 6,287,000 and cargo traffic is up by 13%.

Airline employment in 1975 stands at 14,863 and the SAS consortium agreement first initialed in 1951 is extended to 1995. DC-8-62/63s replace DC-9-21s on all Mideast routes and, on September 2, DC-9-41 flights are started Oslo-Haugesund and Tromsø-Longyearbyen, the latter city becoming the most northerly point on the world's commercial air map.

Orders are placed for the 53rd and 54th DC-9-41s, allowing the carrier to continue its ranking as the largest employer of the Douglas twin-jet outside of the U.S. A new hotel, the Scandinavian, is opened at Oslo while another, the Lofoten, is occupied at Stansund. Citing consumer preference, the carrier discontinues the traditional chicken dinner on its transatlantic flights as of December 28.

Passenger boardings are up 6% to 6,668,000, freight traffic falls 2%, and the 13th consecutive profit is recorded.

As the result of the Swedish government's reorganization of its domestic services, two of the SAS daily roundtrips between Stockholm and Lulea are transferred to **Linjeflyg, A.B.** on January 1, 1976. Initial B-747-283B service is now inaugurated from New York to Copenhagen; Jumbojets also link Stockholm with New York. As three more DC-10-30s come on line, Douglas wide-body operations are launched to Bangkok, Singapore, Montreal, Chicago, Nairobi, Dar Es Salaam, and Johannesburg.

On October 30, the fleet becomes all-jet as the last two CV-440s are retired. A 13th flight kitchen is opened in London, while the 11th Scandinavian hotel is occupied.

Passenger boardings climb 7% to 7,161,000, freight traffic jumps 15%, and a \$9.8 million net profit is posted.

Service is extended to Kuwait and Barcelona in 1977. A strike by cabin attendants on May 10 forces some flights to be cancelled.

A Goteborg-New York route is opened on November 2. Meanwhile, the B-747-283C delivered on October 27 is christened *Magnus Viking* and is placed on the North Atlantic run on December 14.

Enplanements for the year total 7,381,410.

Carl-Olov Munkburg succeeds Knut Hagrup as president on January 1, 1978. Mini-fares are introduced on the North Atlantic on October 1. Meanwhile, B-747-283B operations to Jeddah commence on September

18 and nonstop Oslo–New York flights start on November 4. An order is placed with Airbus Industrie for two A300B4-120s.

Passenger boardings rise 7% to 7,937,000 and freight traffic climbs 10%. The 16th consecutive net profit, \$21.3 million, is banked.

A second B-747-283C, the *Knut Viking*, is received on March 2, 1979 and is placed in service to Seattle and Los Angeles on November 15, the 25th anniversary of the polar route's beginning. Also in March, additional hotel concerns are acquired, the Park Avenue Hotel in Goteborg and A/S Hord Norsk Hotell drift.

Aarhus–London flights begin in April and business class is introduced on the North Atlantic on November 1. Also in November, DC-10-30s replace DC-8-62/63s on all South American routes.

Early in the year, the carrier boards its 100th million passenger. Enplanements for the year rise 9.9% to 8,669,000. Although freight traffic falls 3.2%, yet another net profit (\$35.6 million) is taken in.

A. B. Olson and Wright, a major Swedish forwarding agency, becomes a wholly owned subsidiary on January 1, 1980. Airline employment is cut by 0.9% during the year to 16,887. The first three A300B4-120s are received early in the year and two more are ordered. In addition, the fleet now comprises 4 B-747-283Bs and Cs, 5 DC-10-30s, 7 DC-8-62/63s, and 61 DC-9-21/41s. The A300B4-120s are placed in service over European regional routes to London, Stockholm, Paris, and Madrid.

On September 20, one of the new aircraft and a **British Airways, Ltd.** (2) jetliner brush each other on a London (LHR) airport runway; no injuries are reported.

Business-class service is extended to Asian and polar routes on October 1. It is announced in November that Jan Carizon, 39-year-old former head of **Linjeflyg, A.B.**, will become CEO in the new year.

Passenger boardings dip 3% to 8,393,000 and freight is down 3.1% to 412 million FTKs. The deepening world recession causes the carrier to suffer its first financial loss in 18 years. Despite a 15% gain in income to \$2.24 billion, expenses are up 17.2% to \$2.23. An operating profit of \$456,000 is earned, but a net loss of \$14.9 million must be recorded in the books.

Jan Carizon becomes president/CEO on January 1, 1981. A total of \$25 million is spent to totally restructure the airline from a production-oriented to a market-oriented company. Six new operating divisions—commercial, traffic, administrative, operations, technical, and associated companies—are set up as profit centers. The B-747-283C *Dan Viking* (the 500th Jumbojet built by Boeing) is received on February 18 and a fourth A300B4-120 joins the fleet in March.

A new route is opened linking the North Sea oil centers of Stavanger and Aberdeen and during the summer a punctuality campaign is launched aimed at producing the best on-time performance in Europe. The *Huge Viking*, a B-747-283C, is acquired on October 22 and an upgraded economy-class, EuroClass, is unveiled over European routes on November 1.

Passenger boardings remain level at 8,413,000, freight traffic declines 1.1%, and a second consecutive net loss (\$18.5 million) is recorded.

The transition from a production-oriented to a market-oriented airline is completed in 1982. The *Ivar Viking* is sold out of service in January, but will be leased back the following month. Following a move to Copenhagen Airport, Improved Business Class is introduced to intercontinental services on February 1 and new Intra-Nordic low fares are initiated on June 1. An unnamed B-747-143, once flown by **Alitalia, S.p.A.**, is leased from Boeing for six months on July 26.

First-class business service begins on intercontinental routes on September 26, the same day a nonstop B-747-283C Copenhagen–Bangkok route is opened. The new low fares are extended from the Nordic market to all European services on November 15. As a result of the campaign begun in 1981, the carrier becomes the most punctual in Europe according to AEA statistics. This achievement will be maintained through 1993.

The number of workers is increased a gradual 1.9% during the year to 16,553. Enplanements rise 5% to 8.9 million, but freight traffic is down 4% to 403.12 million FTKs. The year's best news comes on November 26 when a net profit of \$53.5 million is reported—the largest turnaround

from net loss to net profit in SAS history—on operating revenues of \$1.59 billion.

The number of employees is increased by 2.3% in 1983 to 16,937 and DC-10-30 flights are introduced on the Trans-Siberian Express on April 1. During the first quarter, Chairman Carlzon and **Air France** head Pierre Giraudet clash over the latter's efforts to place a surtax on Euro-class flights to Paris; the foreign ministers of Sweden and France agree that no such tax will be levied.

On April 12, a completely new corporate image, designed by Landor Associates, is unveiled; aircraft exteriors and interiors, uniforms, ground vehicles, and ticket offices are all to be redone by the time the fall schedule begins on September 25. The uniforms alone will require an investment in 252,000 m. of wool and cotton cloth, 298,000 buttons, and 16 km. of gold braid.

Nonstop Stockholm–New York service begins on May 28. Also during the second quarter, the four A300B4-120s are grounded as being too large to generate profits on the European network. Three will soon be leased to **Scanair, A.B.**

The Fokkers the French carrier **TAT (French Regional Airlines, S.A.)** is currently operating are not quite large enough to satisfy its requirements, but are excellent short field aircraft suitable to the majority of airports visited. A search for an F.28 replacement continues. In late summer, arrangements are made to lease for a year's trial a pair of Douglas DC-9-21s from SAS, which owns 14 of the type and is interested in selling them.

The two Douglas transports, *Ubbe Viking* and *Orvar Viking*, are delivered to Paris (ORY) in September and October via Denmark, then the only Scandinavian EEC country (thus making the planes non-import taxable). Revenue flights are undertaken from Paris (ORY) to Chambery, Beziers, and Carcassonne.

An alliance is inked with **Qantas Airways (Pty), Ltd.** late in the year that provides for joint fares and promotions around the world and connections in southeast Asia for onward travel to points in Australia. The Jumbojet *Bjarne Viking* is sold out of service on October 1, but is leased back 10 days later. During the year, the B-747-283C *Knut Viking* is leased to **Nigerian Airways, Ltd.** for a year.

Boardings move upward 6% to 9,343,000, but freight traffic dips again by 4% to 386.76 million FTKs. Revenues are \$1.4 billion. The operating profit, however, more than doubles, up to \$58.9 million, while net gain climbs 35% to \$76.8 million.

The payroll is expanded a hefty 9.6% in 1984 to 17,100 and orders are placed for 3 more DC-10-30s and 6 DC-9-80s. In January, SAS receives the 1983 "Airline of the Year" award from *Air Transport World* magazine.

Continued concentration is placed on the full-fare Business Class market. Flight 901, a DC-10-30 with 177 aboard, skids off the end of a rain-slicked runway while landing at New York (JFK) on February 28; coming to a halt with its nose in a marsh channel off Jamaica Bay. All of the passengers and crew are evacuated, with 12 injured, one seriously.

Although **TAT (French Regional Airlines, S.A.)** wishes to proceed with the sale, SAS, upon reconsideration, elects to retrieve the DC-9-21s for additional service and reclaims them when their lease expires.

The wholly owned commuter subsidiary **EuroLink** is formed in December and eight Fokker F.27s are ordered for it.

Passenger boardings incline upward by 9% to 10.3 million and freight traffic finally rises, climbing 4% to 402.5 million FTKs. An operating profit of \$83.4 million is recorded on revenues of \$1.6 billion.

Employment grows 3.6% in 1985 to 17,710. **EuroLink** services are launched connecting Copenhagen, Hamburg, Oslo, Kristiansand, Goteborg, Haugensund, Vasjo, and Jonkoping. Four newly received Friendships are assigned to the commuter operation while three additional DC-10-30s are delivered to the main fleet. Norway, Sweden, and Denmark agree on June 27 to end all company flights to Johannesburg to protest South Africa's apartheid policies.

During the fourth quarter the European cargo hub is moved from Copenhagen to Cologne as the cargo computer system CAROLINE is introduced.

Passenger traffic rises 6% this year to 10.9 million, but cargo remains level. A fourth consecutive operating profit (\$102 million) is posted on revenues of \$1.9 billion; the net gain is \$100 million. SAS now ranks 24th among all world airlines in terms of passengers carried and 21st in fleet size.

The payroll grows again in **1986**, up 4.9% to 19,773. In January, three A300B4-120s are sold to **Conair of Scandinavia, A.S.** The same month, the first direct Asia-Stockholm service is opened to Stockholm from Bangkok and Singapore. Orders are placed in March for four more DC-9-80s and in June for four additional F.27s. Lars Bergvall is, meanwhile, appointed airline executive vice president/chief operating officer on April 1 and Jan Carizon becomes consortium chairman.

SAS Cargo moves its overnight freight hub in May from Copenhagen to Cologne and in August orders are placed for 10 McDonnell Douglas MD-87s and 4 MD-82s. At year's end, options are taken on 12 MD-11s and the Diners Club International operation in Scandinavia is purchased.

Customer bookings accelerate 9.4% to 11,700,000 and freight is up 3.3% to 409 million FTKs. Revenues swell to \$2.39 billion and with costs low, the operating profit jumps to \$299 million and net profit rises to \$205 million.

Airline employment is increased in **1987** to 20,479. In January, the company receives the 1986 "Passenger Service Award" from *Air Transport World* magazine. The Copenhagen Airport Shopping Centre is opened on April 29.

The DC-9-41 *Gissur Viking*, with 4 crew and 103 passengers is destroyed as the result of a bad landing at Trondheim on February 25; there are no fatalities.

During the year, most of the B-747-283Cs and DC-8-62s/63s are retired; the final Jumbojet transatlantic passenger flight occurs in August. On August 8, SAS Leisure forms **Spanair, S.A.** with Spanish partners.

The carrier's 22-unit hotel chain is expanded into additional cities and the first nonstop service is inaugurated on September 1 from Copenhagen to Tokyo. An arrangement is made with **Thai Airways International, Ltd. (THAI)** on October 3 for connections from Bangkok to other cities in Southeast Asia.

Chairman Carizon's thoughts and recollections, *Moments of Truth* (Boston: Ballinger) are published during the year.

Passenger boardings swell 7.7% to 12,662,000; however, cargo is down 8.1% to 376.77 million FTKs, largely as a result of the European freight rate war. Revenues ascend 18.4% to \$3.45 billion and costs are kept down, producing a \$230 million operating profit and net gain of \$191 million.

Although airline employment is cut 5.3% in **1988** to 19,834, the year is otherwise very busy and productive for the Scandinavian aerial consortium. The fleet now includes 106 aircraft: 48 DC-9-41s, 11 DC-10-30s, 10 MD-81s, 10 MD-82s, 9 DC-9-21s, 9 F.27s, 4 MD-87s, 3 DC-9-41s, and 2 MD-83s. Ninety-eight additional MD-80s, B-767-283ERs/383ERs, and Fokker 50s are requested in January, March, and June orders worth \$3 billion.

An April start-up of flights into China is missed because of problems in finalizing arrangements for overflights over the U.S.S.R.

A \$100-million Eurobond is launched in late spring and a \$350-million revolving line of credit is established with several large international banks, including J. P. Morgan Securities. In June, the consortium agrees with Volvo to form a jointly owned company to combine engine overhaul activities.

On August 22, the carrier finally inaugurates weekly service between Copenhagen and Beijing. In other activities during the year, the three-nation partnership airline initiates flights to Malaga, Cairo, Warsaw, and Reykjavik. With the purchase of three new hostels, its hotel total reaches 22. The subsidiary SAS Service Partner acquires two German companies to become Europe's largest flight-kitchen service.

In pursuit of deeper involvement in an industry facing rapid deregulation and privatization, SAS reaches out to take shares in other carriers. As a complement to its arrangement with **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**, an equity stake is discussed with

Aerolineas Argentinas, S.A., but is put off due to political considerations.

On October 4, 9.9% shareholding is taken in Texas Air Corporation (TAC) and a marketing alliance is signed with its flagship company **Continental Airlines**. The consortium's New York operations are moved from New York (JFK) to the new Continental hub at Newark (EWR), where it might connect with its new partner's flights.

SAS EuroClass (club) passengers now receive first-class accommodations on the **Continental Airlines** portion of U.S. domestic flights. In December, a cooperative agreement is signed with **All-Nippon Airways Company, Ltd. (ANA)** of Japan. A new hub is opened at London (LHR) and on December 15 a 24.9% interest is acquired for \$46 million in the Airlines of Britain, Ltd. holding company, parent of **London City Airways, Ltd., Loganair, Ltd., Manx Airways, Ltd. (2)**, and **British Midland Airways, Ltd.**

Customer bookings rise 5.4% on the year to 13,341,200 and freight climbs 4.2% to 398.67 million FTKs. Revenues ascend 14.5% to \$3.03 billion, expenses rise 9.9% to \$2.66 billion, and operating income reaches \$387 million. Net gain doubles to \$383 million.

Company employment climbs 3.4% in **1989** to 20,471. In January, the company enters into a joint venture leasing business, Aircraft Lease Finance, planning to acquire a \$40-million, 20% share; however, when CIS, the U.S.-based company chosen to manage the enterprise, fails the following month, the airline suspends its participation in the endeavor. Also during these months, plans are made with **All Nippon Airways Company, Ltd. (ANA)** for the operation of two new jointly operated roundtrip polar services from Tokyo to Stockholm.

In March, CEO Jan Carizon is elected to the board of Texas Air Corporation (TAC) as B-767-283ERs/383ERs from the massive airliner order of the previous year begin to arrive. Dubbed "Adams," three self-ticketing machines come on line in April, one each at the airports in Copenhagen, Fomebu, and Arlanda. During the month, \$500 million is paid out to the Japanese Saison Overseas Holdings Group for 40% ownership of the Inter-Continental hotel chain formerly owned by **Pan American World Airways (1)**.

Also in April, the airline acquires Scot Catering, Offshore Services (Aberdeen), Ltd., and Sodexo Scotland, Ltd. It also joins with Diners Club International to offer the first international co-branded airline charge card, the SAS EuroClass Card.

Operations at the new Newark (EWR) hub, including cooperation with **Continental Airlines**, begins on May 1. SAS is the first major European carrier to move all of its operations to Newark from New York (JFK). Also in May, daily nonstop service is introduced between Stockholm and Rome; however, flights to Buenos Aires, Montevideo, and Santiago de Chile end.

In June, the subsidiary SAS Trading purchases the mail order firm Ostermann Petersen, Inc., which specializes in duty-free sales to diplomats around the world. Simultaneously, SAS Service Partner joins with **British Island Airways, Ltd. (2)** to create a joint venture, In-flight Services International, Ltd., a 6,000-sq.-ft. flight kitchen located at London (LGW). Service is inaugurated to Birmingham, England, and Leningrad from Newark, plus 12 other markets.

New stations are opened at Birmingham, Newark, and Toronto. Daily Oslo to Newark flights begin in August. Equity-sharing agreements are initiated with **Finnair O/Y** and **Swissair, A.G.** and marketing arrangements are made with **Canadian International Airlines, Ltd.** Also, majority 70% shareholding is taken in UCAK Service, A.S., a Turkish catering and restaurant concern that operates at 6 Turkish airports.

In September, as the result of a recommendation by the Nordic Council of Ministers, the airline, in cooperation with a **Finnair O/Y**, begins a total ban on smoking on all of its flights to and within Scandinavia. A strategic alliance is entered into with **Swissair, A.G.** on September 28; this is the first phase of the European Quality Alliance.

In October, a joint pool agreement is made with **Martinair Holland, N.V.** for maintenance, flight, technical training, and assistance for their B-767-31AERs. At the same time, the company suffers a \$6.4-million

loss when **British Airways, Ltd. (2)** cancels its ground handling agreement with the carrier at Copenhagen and Stockholm airports.

A comprehensive marketing agreement is signed with **Finnair O/Y** in November designed to develop a "competitive global travel service to, from, within and via the Nordic countries."

A Danish court later in the month orders the major to pay the \$775 air taxi bill of a passenger who, having been bumped from an SAS domestic flight and refused the standard \$45 compensation, had completed his flight by charter and then billed SAS for it. Twice-weekly nonstop roundtrips begin on November 28 between Stockholm and Tallinn and are the first Western international air services to the Estonian city.

Other diversified activities of this 12-month period include the acquisition of Glele & Sohne, GmbH, at Hamburg, the Danish mail order catalog firm Petrsen Bros., Ltd., and the establishment of SAS Holdings, B.V. and SAS Leisure, A.B. Shareholding in **Spanair, S.A.** grows from 25% to 49%. By December 31, the company, with 61 planes in service, is the largest non-U.S. operator of the MD-81/82/83/87 series.

Passenger boardings swell 4.9% to 13,997,300 and freight climbs 6.8% to 425.06 million FTKs. Revenues move ahead by 3.8% to \$3.19 billion, expenses are up 5.6% to \$2.83 billion, and operating income slips to \$353 million. Net profit falls to \$196 million.

The payroll grows another 5% in 1990 to 22,179 and now represents the 20th largest airline workforce in the world. The fleet of 128 aircraft is 16th largest.

On January 8, 30% shareholding is acquired in **LanChile, S.A.**; this figure will later rise to 35% and give the Scandinavians three seats on **LanChile, S.A.'s** board of directors.

As a result of the marketing agreement signed with **Finnair O/Y**, 16 hourly shuttle flights daily begin in the first quarter between Stockholm and Helsinki; at the Finnish capital, the flights connect with Finnair's services to Moscow and Leningrad. European Quality Alliance traffic cooperation with **Swissair, A.G.** begins on March 25.

Later, in April, a maintenance agreement is signed with **LOT Polish Airlines, S.A.** and provides for technical support of that carrier's three new B-767-350ERs.

A joint traffic system with **Swissair, A.G.** is introduced in April. Flights begin to Riga, Visby, and Tampere from Copenhagen on April 21.

Under terms of the marketing agreement signed with **Canadian Airlines International, Ltd.** the previous year, thrice-weekly joint roundtrips are launched in May between Toronto and Copenhagen.

B-767-283ER nonstops are inaugurated on June 6 between Copenhagen and Singapore. Also in June, an agreement is signed with **Air New Zealand, Ltd.** for hub coordination in Southeast Asia for onward travel to points in New Zealand.

In early July, the **Scanair, A.B.** charter subsidiary is allowed to takeover responsibility for its own flight operations, training, and maintenance; the independence movement is called "Own Wings." Late in the month, a mutual-cooperation agreement is signed with **Thai Airways International, Ltd. (THAI)**, under which an SAS/Thai supervisory board will be created with two representatives from each airline to implement, coordinate, and administer strategies and activities.

At the beginning of August, the carrier buys Frank Lorenzo out of Continental Airlines Holdings by acquiring his personal holding company, Jet Capital Corp. and 2.3 million shares of the American major; the SAS stake in **Continental Airlines** rises from 9.9% to 16.8%, with its voting control elevated to 18.4%.

At the same time, flights end to Rio de Janeiro. The Lorenzo purchase is approved by the U.S. DOT in September, the same month in which SAS sells its 50% interest in **Linjeflyg, A.B.** to the Swedish shipping company Bilspedition, A.B. for \$82.6 million. At the same time, when the Anchorage stop is eliminated in favor of direct service between Stockholm and Tokyo, 6.5 hours are cut off the route operated with **All Nippon Airways Company, Ltd. (ANA)**.

In October, 13-hour B-767-283ER flights begin nonstop from Copenhagen to São Paulo, at the same time as direct service to Rio de Janeiro is closed down. The route structure is otherwise extensively remodeled,

including the introduction of service on October 28 from Copenhagen to Prague and Berlin. The arrangement with one of the carrier's Chilean partners collapses in November, requiring the appointment of a Swedish manager for **LanChile, S.A.**

In November and December, extensive cuts are made in the airline's North American operations. Of the 462 employees in the U.S., 126 are given early retirement as company headquarters are transferred from Manhattan to Lyndhurst, New Jersey, and property in Queens is sold.

During the year, the company joins with **Swissair, A.G.** to bring in **Austrian Airlines, A.G.** and expand the European Quality Alliance. SAS Leisure is also active, acquiring shareholding in Turin S.R.L., Club de Vacaciones, S.A. in Spain, the Swedish tour operator Plusresor, A.B., and Finland's Tolvalomat.

Customer bookings for the year climb 6.8% to 14,955,000, making SAS the 21st biggest airline in the world. Cargo gains by a slight 1.2% to 431.38 million FTKs. Revenues jump 13.3% to \$3.89 billion, the 12th best gain in the world. Expenses, however, shoot up 18.1% and cut the operating gain to \$264 million, which is still 6th best. The net profit is \$38.3 million.

The employee population is reduced by 5.1% in 1991 to 38,940 and the fleet now includes 2 B-767-283ERs, 13 B-767-383ERs, 9 DC-9-21s, 34 DC-9-41s, 21 owned and 8 leased McDonnell Douglas MD-81s, 14 MD-82s, 2 MD-83s leased to **Scanair, A.B.**, 9 owned and 3 leased MD-87s, and 22 Fokker 50s.

Recession causes a decline in traffic and income and in January, a major restructuring occurs. The traffic services division is eliminated as six new divisions are created and President Carizon is given greater day-to-day control of operations.

In February, an Action Program is announced designed to reduce operating costs by \$537 million. The plan includes a cut of up to 3,500 positions—16% of the workforce—and creation of a joint data services company with **Swissair, A.G.** It is learned in March that the joint traffic system agreement with **Swissair, A.G.** has so far benefited SAS much more than the partner.

On April 6, flights are initiated from Copenhagen to Alicante, Spain. Also during the month, the company initiates MD-80 services from Stockholm and Oslo to Aarhus Airport, Denmark's new No. 2 aerodrome 40 miles from Copenhagen, and from there to London (LGW).

The company's nonstop service to Tokyo becomes daily on May 1.

Also in May, an agreement is signed with **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandeuse, S.A.)** under which the Scandinavian carrier will purchase 40 seats and 12 tons of cargo space on each of the South American major's 3 weekly flights to Copenhagen.

During the same month, the airline's technical division is retained by **Ethiopian Airlines, S.C.** to provide advice on the construction and operation of a new hangar and maintenance facility project at Addis Ababa Airport, which is partially funded by a grant from the African Development Bank.

The Danish Supreme Court on June 26 fines six foreign airlines a total of Dkr 452,000 (US\$64,570) for bringing illegal refugees to Denmark without visas or identity documents. The decision in the case against European operators SAS, **Sabena (Belgian World Airlines, S.A.)**, **KLM (Royal Dutch Airlines, N.V.)**, and the defunct **Interflug**, plus **Iraqi Airways** and **Singapore Airlines, Ltd.**, has been eagerly awaited by the some 50 airlines flying into Denmark.

The companies have argued that it is not their responsibility to do the police's work when checking in Denmark-bound passengers. Nor can they be expected to tell the difference between genuine and false visas and passports, or prevent passengers from tearing up their passports once on board the plane, as has often happened. The Supreme Court is unconvinced by their arguments, and orders the airlines to pay a fine of Dkr 8,000 per passenger illegally brought to Denmark.

To compensate **Swissair, A.G.** for the previous year's negative financial generation under the joint traffic system, during the summer the Nordic consortium gives its partner its profitable Copenhagen-Geneva daily service. In its place, SAS introduces an evening Oslo to Geneva frequency via Copenhagen.

In July, the company warns its unions that unless agreement can be reached on the Action Program, "more sweeping structural changes" will be necessary. At the same time SAS Trading agrees to provide training and support as part of a new joint venture with **LanChile, S.A.** under which duty-free sales will be offered on the Chilean carrier's international services to North America, Europe, the South Pacific, and throughout Latin America.

The following month, the two companies sign another accord under which **LanChile, S.A.** becomes general sales agency for SAS in Chile. The carrier receives its 50th MD-80 on August 9 and now owns the largest fleet of this type outside of the U.S. On August 19, roundtrips commence between Copenhagen and Kiev.

Having lost money on the thin route from Oslo to Aarhus, the company now signs a strategic agreement with the Danish regional **Sun Air of Scandinavia, A.S.**, which takes over the route with a British Aerospace BAe Jetstream 31.

A new product development program is introduced on September 1 calling for innovation in in-flight and ground services. Later in the month, plans are announced to combine the subsidiary **Scanair, A.B.** with **Conair of Scandinavia, A.S.**, owned by Denmark's Simon Spies Holdings, to form the new charter operator **Premiair, A.S.**

Service is suspended on October 27 over the routes from Copenhagen to São Paulo and to Toronto, as well as from Stockholm to Tampere, Finland. In November, the carrier announces the sale of its 40% interest in the Inter-Continental Hotel chain back to the Saison Group. Although SAS is allowed to retain three hotels for its own chain under the arrangement, the overall pact causes the airline a Skr 2-billion (\$333-million) loss.

The No. 1 engine of Flight 751, an MD-81 with 7 crew and 122 passengers, catches fire during a scheduled service from Stockholm to Copenhagen on December 27. Once the blaze is extinguished and the power plant is shut down, the No. 2 engine fails. The jetliner makes a forced landing into a snowy field near Gottrara after hitting trees that take off a major portion of the right wing. Although the fuselage breaks into three parts, there is neither a fire nor any fatalities; 43 injuries are reported. It will later be reported that the "controlled emergency landing" was due to ice on the wings at takeoff from Arlanda Airport which, upon breaking off, was ingested by the power plants.

Passenger boardings slide 6.8% on the year to 13,949,000, while freight is off 5.4% to 406.4 million FTKs. Revenues ascend to \$3.91 billion and grant a net surplus of \$72.8 million. Parent SAS Group earns \$5.8 billion, but costs force a net loss of \$184.39 million atop an operating surplus of \$381.13 million.

The workforce is reduced to 20,000 during 1992, but the fleet still operates over 100 aircraft. The carrier suspends operations to its last South American destination, São Paulo, on January 1. Copenhagen to Vilnius service begins on January 21, completing SAS service to all three Baltic capitals.

A wide range of new services are introduced during the remainder of the month and in February. These include new aircraft seats, Sony Walkman video, telephone, limousine, or gate check-in, additional movie choices, and a third main menu meal selection. On February 11, it is announced that the carrier will purchase back the 50% shareholding in **Linjeflyg, A.B.** sold to Bilspedition, A.B. in 1990, along with another 1% for majority ownership.

In March, SAS International Hotels sells its option to buy the SAS Palace Hotel in Vienna. Meanwhile, construction of a new hotel is started in Beijing and management responsibility is assumed for hotels in London, Cologne, and Düsseldorf.

The carrier now owns or jointly operates 30 hotels and serves 80 cities in 33 countries. On March 30, the company begins a cooperative service with **Austrian Airlines, A.G.**, employing the latter's A310 four times per week between Copenhagen and Chicago. On March 31, shareholding in Airlines of Britain Holdings is increased to 40%.

On May 20, in cooperation with **VARIG Brazilian Airlines**, thrice-weekly, dual-designator flights commence between Copenhagen and Rio de Janeiro and São Paulo.

Twice-weekly nonstop roundtrips commence on June 1 between Copenhagen and Hong Kong and from Copenhagen to St. Petersburg. Also during the summer, scheduled flights are initiated from Copenhagen to Beijing and Venice. Stockholm to Riga flights are also started and routes from Stavanger to Glasgow and Amsterdam are resumed. A frequent flyer program is started as interest in the domestic airline **Linjeflyg, A.B.** is, as announced, increased to 51% and it begins absorption. Protesting the carrier's plans to lay off 1,500 employees in the wake of its **Linjeflyg, A.B.** acquisition, some 500 cabin and ground crew personnel subject SAS to two days of wildcat strikes at Stockholm at the end of August. The job action forces cancellation of 130 flights and costs the airline \$9.4 million in lost revenues.

In early September, the company takes the strikers to court, suing to recover some of the losses caused by the wildcatters.

The Hong Kong service becomes thrice weekly in the fall. Devaluation of the Swedish krona in the fourth quarter has a major economic impact, causing a \$163-million charge against earnings.

Customer bookings recover and rise 4% to 14,514,000, but cargo slips downward another 1% to 404.68 million FTKs. SAS Group revenues advance 7.7% to \$4.87 billion and expenses are \$4.46 billion. The operating surplus is \$372.11 million; however, a \$96.52-million net loss is taken.

On January 1, 1993, integration of **Linjeflyg, A.B.** is completed. The same day, cabotage rights are employed to initiate a service linking Copenhagen with Leipzig via Hamburg and the SAS Plaza Hotel in Hamburg is sold. Later in the month, the carrier's Berlin operations are transferred from Tegel Airport to Tempelhof as a third daily flight with Fokker 50s is added between Copenhagen and Berlin.

On March 29, Brussels-Lyon and Stuttgart-Thessaloniki frequencies are started. Other new destinations simultaneously added from Copenhagen include Gdansk and Lyon. The new SAS Royal Hotel opens in Beijing on April 3 and on May 3 flights begin from Copenhagen to Luxembourg.

With **Flugfélag Islands, H.F. (2)/Icelandair**, a European hub is established at Copenhagen on June 1 that allows the island carrier's passengers to interline on SAS intra-European and long-haul routes. The two will also link their frequent flyer programs and code-share on a specific route to Hamburg via Copenhagen. Meanwhile, **Sun Air of Scandinavia, A.S.** takes over the route from Aarhus Airport outside Copenhagen, to Stockholm's Bromma Airport.

On June 18, two business areas of SAS Service Partner are sold. Interest in **Aerolineas Argentina, S.A.** is dropped and shareholding in **LanChile, S.A.** is sold. Jan Reinas is appointed interim president on September 27.

After 12 years in charge, Chairman/President Jan Carizon resigns on October 1 to pursue negotiations, the Alcazar plan, for the eventual merging of SAS with **KLM (Royal Dutch Airlines, N.V.)**, **Swissair, A.G.**, and **Austrian Airlines, A.G.**; Deputy President Steffen Harpoeth also departs.

Flights commence on October 18 linking Copenhagen with Thule, Greenland, via Søndre Stromfjord. The company inaugurates its eighth Baltic destination on October 25 when it becomes the first Western airline to start scheduled roundtrip service to Kaliningrad, Russia.

A route is inaugurated from Stockholm to Pori on October 31. At the same time, Avis Rent a Car joins the EuroBonus frequent flyer program.

In November, 51% shareholding is acquired in Air Cater, S.A. in Spain. A massive cost-cutting plan is also announced in November. To save between \$243 and 305 million, the carrier will end service on 17 unprofitable routes and retire 17 aircraft made redundant. In addition, noncore activities will be divested.

At the same time and under an ECC ruling, the company begins domestic services in Spain, flying daily between Barcelona and Madrid with the frequencies beginning and ending in Copenhagen.

While on the ground at Copenhagen being cleaned, an MD-87 catches fire; a 30-cm. hole is punched in the fuselage, requiring the aircraft to be withdrawn from service for significant repair.

The troubled charter subsidiary **Swedair, A.B.** is shutdown late in the year and the regional **Scanair, A.B.** is, as announced earlier, merged with **Conair of Scandinavia, A.S.** on December 31 to form **Premiair, A.S.**

Also in December, Chairman Tage Andersen and Acting President/CEO Jan Reinas are succeeded by Bo Berggren and Jan Sternberg, respectively.

Passenger boardings shoot up 28% to 18.6 million and freight rises 4% to 421.8 million FTKs. Revenues for SAS Group increase by 13.6% to \$4.96 billion, but expenses climb 17.7% to \$4.71 billion. The resulting operating loss is down to \$258.06 million while net loss is cut to \$62.48 million.

The workforce stands at 20,000 in 1994 and during the year, SAS sells five DC-9-21s, a DC-9-41, and one SAAB 340. The former, purchased by Credit Lyonnais, will be chartered to U.S. start-up carrier **Valujet Airlines**.

SAS Leisure and Denmark's Spies Travel Group merge their charter carriers on January 1 to form **Premiair, A.S.**

In January, the decision is taken to sell the SAS Royal Hotel in Cologne to a German investor group as well as to sell for Skr 3 billion (\$359 million)—and immediately lease back—six B-767-383s. During the month, the company begins operation of the Grand Olav Hotel in Trondheim, Norway, and sells the SAS Royal Hotel in Brussels.

The airline's cost-cutting activities are intensified in February. It is announced that 2,900 additional positions will be eliminated, several aircraft will be retired, sales and marketing activities are to be centralized, and the management structure is to be consolidated.

Also during the month, the company's 42.1% stake in **LanChile, S.A.** is sold to **Fast Air Chile, Ltda.** parent Cueto Group and Boris Hirmas. On February 28, the Copenhagen-Glasgow route is transferred to **British Midland Airways, Ltd.** BMA also takes over the service from Bergen to London (LHR) on March 28 under a code-sharing arrangement with the Scandinavian major. The marketing arrangement also provides for dual-designator flights from London (LHR) to the BMA hubs at Belfast, Dublin, Leeds/Bradford, and Teesside.

Also in the first quarter, orders are placed for 35 B-737-600s, for which the carrier is European launch customer. Jan Sternberg becomes the new SAS Group president/CEO on April 1. The same day, the Diners Club Nordic A.S. franchise is sold to Sweden's Skandinaviska Enskilda Banken, A.B.

Concentrating on its root airline business, SAS, in May, sells its SAS Leisure, A.B. subsidiary, including a cruise ship, to the British concern Airtours, Ltd. for Skr 870 million (\$110 million).

The Spanish airline **Spanair, S.A.** becomes an associate on June 1. Also during the month, the carrier receives an MD-83 and sells the Nord-Norsk Hoteldrift.

The SAS Service Partner is sold to the **Swissair, A.G.** subsidiary Gate Gourmet in July. Shareholding in the Airlines of Britain Group is increased during August. SAS International Hotels and Radisson Hotels International sign a cooperative agreement during the month; hereafter, the two will be known as Radisson SAS Hotels Worldwide.

Objecting to a new work schedule, Danish flight mechanics strike on September 12, forcing the company to ground nearly 10% of its flights. Also in September, thrice-weekly flights are initiated from Copenhagen to Osaka.

On October 15, company check-in personnel at Copenhagen end a three-day wildcat strike that has grounded much of the carrier's European operations.

En route from Bardufoss to Oslo on November 3, Flight 347, an MD-82 with 128 passengers, is hijacked by a lone assailant, who allows the aircraft to land at its scheduled destination. There, after an 8-hour siege, the pirate surrenders, freeing all of his hostages unharmed.

The company begins a cooperative agreement with Radisson Hotel International on November 15 and the carrier's hotels begin operations as Radisson SAS Hotels Worldwide. During December, a joint venture agreement is signed between the SAS Flight Academy and SENASA, a

Spanish aviation school; under its terms, the operation, 51% owned by the latter-named partner, will launch an ab initio pilot training program.

On the year, customer bookings inch up 1% to 18,823,000 while cargo does better, growing by 6% to 446.12 million FTKs. Revenues move ahead by 8.9% to \$4.434 billion, while expenses are \$4.3 billion. As a result, SAS Group is able to show a \$128.8-million operating gain and a net profit of \$206.18 million. SAS Group revenues total \$5 billion.

Airline employment in 1995 stands at 20,499, a 2.5% increase. Flights to Turin, the carrier's third new destination in Northern Italy, begin on January 2.

The company on March 15 becomes launch customer for the B-737-600, placing a \$1.2-billion order for 35 with options for another 35. Service to Chicago resumes on March 26 and on March 27, company officials announce that they are holding discussions with **Deutsche Lufthansa, A.G.** on points of mutual cooperation; they report that talks are also underway with other European carriers.

A new alliance is formally signed with the German carrier on May 11 that is designed to combine their routes, sales, and airport services into the largest air transport system in Europe. They will link their frequent flyer programs, share ground handling and cargo services, and enjoy over 2,500 code-sharing frequencies on the Continent and beyond.

Although both airlines will maintain their independence, the Scandinavians agree to reshuffle the alliances with other companies currently maintained. SAS will drop its strategic relationships with **Swissair, A.G.**, **Austrian Airlines, A.G.**, and **Continental Airlines** and will move into a new arrangement with the **Deutsche Lufthansa, A.G.** partner, **United Airlines**.

While waiting to takeoff from Newark (EWR) on May 19, the company's lone B-767-283ER leased from **Transbrasil, S.A.** brushes its left wing against the tail of a **Continental Airlines B-737-3T0**; no casualties are reported aboard either aircraft. All international and intra-European flights from Scandinavia are cancelled on June 2 as the result of a one-day pilots strike brought on by failure of the flyers and management to reach salary accord.

On June 5, a new code-sharing and strategic arrangement package is signed with **Thai Airways International, Ltd. (THAI)**, which also has an alliance with SAS's new partner **Deutsche Lufthansa, A.G.**

To forestall a second 24-hr. strike, SAS locks out its pilots at midnight on June 8. Flights resume again on June 10, but are suspended once more on June 12.

Service is paralyzed again on June 14 as pilots strike to protest the failure of management to meet their wage requirements. More than 800 flights have been cancelled over the two-week period of industrial action. This interruption finally brings agreement between the two disputing sides in July and a 3.95% wage boost for the pilots.

On August 1, the European Commission, worried about the anticompetitive aspects, expresses serious concern over the SAS-DLH alliance. A week later, officials of the continental union formally states its requirement that the two airlines must guarantee fair competition on routes between Scandinavia and Germany if it is to win the Commission's backing. During the month, the airline takes a 16.53% stake in the new **Air Latvia Corporation**. It also increases its order for MD-90-30s from six to eight.

As a complement to the pact each has with **Deutsche Lufthansa, A.G.**, SAS on September 11 joins with **United Airlines** in a comprehensive pact that links the ticketing, schedules, and airport services of all three companies. Passengers will, beginning in April, be able to fly to any of these carriers' destinations in the U.S. and Europe with one ticket and collect frequent flyer mileage points for use in any of the companies' reward programs. The new pact ends the carrier's seven-year alliance with **Continental Airlines**.

Almost unnoticed as the intercontinental alliance gels is the beginning, also in September, of a block-seat agreement with **Air India, Ltd.** on the thrice-weekly Indian flights from Delhi to Chicago via Copenhagen.

Flights to Poznan, Poland, begin in December.

During the year, additional structural changes are made within the route network and the SAS consortium agreement, first signed in 1951 and last renewed in 1975, is extended into the next century.

Enplanements are level, totaling 18,838,000, while freight inches up 2% to 453.28 million FTKs. Operating income climbs 4.5% to \$4.99 billion and expenses total \$4.57 billion. There is a \$423-million operating gain and a net profit of \$370 million is recorded. Both figures are later adjusted downward, to \$587 million and \$337 million, respectively.

The workforce grows by 4.1% in 1996 to 21,348. Implementation of the code-sharing pact with **United Airlines** begins, on a gradual basis, on January 1. Also on January 1, **Deutsche Lufthansa, A.G.** takes over handling of SAS passengers and aircraft at all German stations; two days later, SAS takes over the handling of DLH passengers and aircraft at Scandinavian stations.

A severe winter storm cripples airline operations throughout the entire Northeast region of the U.S. between January 7 and 11. Early in the crisis, 12 flights from Copenhagen, Oslo, and Stockholm to Newark (EWR) must be cancelled; frequencies between these affected cities will not resume before the end of the month's second week.

On January 16, the European Commission agrees to the company's alliance with **Deutsche Lufthansa, A.G.** on condition that the two airlines act to insure their union does not turn into a monopoly and that they agree to give up certain slots, flights, and accords held with other airlines. Both carriers have been moving for some time in the directions required by the EC. On February 1, when the alliance officially takes effect, the flag carriers begin a total of 373 weekly dual-designator connections to 5 destinations in Scandinavia and 7 in Germany.

It is announced, on February 16, that the company will simplify its ownership structure. The streamlining will not affect the current ownership structure, but will force the three national holding companies to separate their non-SAS activities, align their capital to the size of their SAS shareholding, and harmonize their accounting procedures.

Bologna becomes the company's fifth Italian destination on March 11, while twice-daily return flights to Newcastle, England, from Stockholm commence on March 31. Other new services launched from Stockholm on the last day of the month include twice-weekly nonstops to Dublin and six-times-a-week frequencies to Manchester.

A new cargo hub is inaugurated at Goteborg at the beginning of April. From that station, a contract signed with **Atlas Air** during the last week of December comes into effect, as the American freight specialist begins hauling contract cargo weekly to and from New York (JFK) aboard a B-747-200F. Also in April, dual-designator cargo operations commence with **Japan Air Lines Co., Ltd. (2)** on a semiweekly route from Goteborg to Osaka (KIX), Macao, and Delhi.

The flying portion of the code-sharing compact with **United Airlines** also takes effect on April 15, although the link with **Continental Airline's** OnePass frequent flyer program will continue through August. Among the services now provided are dual-designator SAS B-767-383ER flights from Stockholm, Oslo, and Copenhagen to Newark. The airline's first environmental report is presented on April 18.

During the spring, new efforts are made to improve in-flight service and on-time performance as competitors move in on the company's "Golden Triangle" of services between Stockholm, Copenhagen, and Oslo. Still, due to a shortage of pilots, the company must slice 30 daily European flights from its schedule.

In June, code-sharing flights also commence with **Thai Airways International, Ltd. (THAI)** on routes from Bangkok to Stockholm and Copenhagen. Also during the month, the pilots' union is able to negotiate a 3% pay increase and a new weekend schedule.

Also, the names of the carrier's parent companies are changed to SAS Danmark, A.S., SAS Norge, A.S., and SAS Sverige, A.B.

A marketing alliance is signed with Euro Disney on July 17 to offer package tours to Disneyland Paris from the Baltic States, Sweden, Finland, Norway, and Denmark. The company's fiftieth anniversary is officially celebrated on August 1. Thrice-weekly roundtrips from Copenhagen to Minsk, Belarus, commence on August 26.

On September 1, thrice-weekly MD-87 nonstop roundtrips commence between Stockholm and Arkhangelsk. Eight days later, thrice-weekly nonstop flights begin roundtrip from Stockholm to Archangelsk.

Building upon the arrangements both companies already have with **Deutsche Lufthansa, A.G.** and **United Airlines**, the company signs a strategic partnership agreement with **Air Canada, Ltd.** on October 1. Under terms of the pact, which will take effect next April, the two agree to code-share flights, coordinate schedules, passenger, and ground services, and link their frequent flyer programs.

The first of eight new MD-90-30s is accepted at Long Beach on October 8; following the delivery ceremony where the plane is christened *Hiedek Viking*, the new aircraft is flown to Oslo for service on the company's intra-Scandinavian services.

Some 110 Danish employees of the airline stage a wildcat strike in Copenhagen on October 21 in a dispute over the reprimand of their union leader. With the beginning of the winter schedule, six-times-per-week direct Fokker F.28-4000 roundtrips are inaugurated from Stockholm to Warsaw. The Hiedek Viking enters commercial scheduled service on November 11.

On December 16, SAS and its alliance partner **Deutsche Lufthansa, A.G.** simultaneously deny a Danish newspaper report that their partnership will lead to a merger or exchange of holdings.

Customer bookings accelerate 5.7% to 19,828,000 and 620.3 million freight FTKs are operated, a huge 37% increase. Operating income dips 1% to \$4.35 billion and costs rise 2.6% to \$3.9 billion. Operating gain slides to \$237.9 million and the net profit drops to \$227.1 million.

The employee population is increased by 5.5% in 1997 to 22,524.

At the start of the year, the Swedish government begins to tax loyalty points generated in the airline's frequent flyer program. An appeal to the Swedish Ministry of Finance will be unsuccessful.

SAS Commuter begins SweLink services from Stockholm's Arlanda Airport in February, replacing its parent on thin, less-profitable regional routes.

At this time, an accord is signed with **Deutsche Lufthansa, A.G.** under which Lufthansa Cargo and SAS Cargo begin to market and transport each other's freight, both with aircraft and trucks.

While landing at Kiruna in a snowstorm after a March 9 service from Stockholm, an MD-81 with 151 passengers aboard skids off the runway and comes to rest in a snowbank; one customer is injured during the emergency evacuation that follows.

With the beginning of the new spring schedule at the end of March, those routes deemed "not sufficiently profitable" are dropped. Destinations cut include flights from Copenhagen to Borlange, Lyon, Minsk, and Newcastle and from Copenhagen and Stockholm to Osaka. Frequencies between Copenhagen and Hong Kong are increased from four each week to five.

SAS cuts Scandinavian travel agents' commissions in April, reducing levels of compensation from 9% and 8% on domestic and inter-Scandinavian services, respectively. During the month, new twice-daily roundtrips are inaugurated from Stockholm to Oulu, Finland, while frequencies are increased to Dublin, Karlstad, Tampere, Turku, and Vaasa. Also during the month, five-times-a-week service is inaugurated to a fourth Polish destination, Szczecin, from Copenhagen.

With considerable fanfare on May 14, SAS joins with its marketing partners **Deutsche Lufthansa, A.G.**, **Air Canada, Ltd.**, **Thai Airways International, Ltd. (THAI)**, and **United Airlines** in an enhanced joint venture marketing venture to be called "Star Alliance." The new alliance, seen in some quarters as a counter to the proposed **British Airways, Ltd. (2)-American Airlines** arrangement, will stitch together the operational and marketing efforts of all five airlines. Employees of the five will be able to share ticket offices and airport services, purchase supplies jointly, and contribute to joint promotional and advertising campaigns. Advertising will be handled by the New York firm of Young & Rubicam Advertising, which is given a \$25-million budget to publicize unified efforts. Travelers on any of the carriers will be able to accumulate and cash in frequent flyer mileage from any of the five.

On May 30, SAS begins to offer the latest service from the New York area to Europe; daily except Mondays and Wednesdays, a frequency departs Newark (EWR) at 11:50 p.m. for Copenhagen.

A block-space code-sharing agreement with **South African Airways (Pty.), Ltd.** begins on July 1 aboard SAA B-747-344s that operate twice-weekly roundtrips from Johannesburg and Cape Town to Copenhagen via Frankfurt. During the month, a half-year review of the company's hotel business is begun.

Also during the summer, a code-share and block-space agreement begins with **Regional Airlines, S.A.** over a route from Copenhagen to Lyon. In August, the "Star Alliance" code-share with **Air Canada, Ltd.** is expanded; eight Canadian cities are linked to two each in Denmark, Norway, and Sweden.

All flights become nonsmoking on September 1. In September, the SAS Flight Academy begins operation of its next generation B-737 full-flight simulator. On September 19, the number of weekly frequencies from Copenhagen to Beijing is increased from four to five.

VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.) joins the "Star Alliance" on October 22 and negotiations are underway to bring in such other airlines as **South African Airways (Pty.), Ltd.** and **British Midland Airways, Ltd.**

On October 26, SAS and **Deutsche Lufthansa, A.G.** inaugurate dual-designator service to and from Finland: a total of 65 daily roundtrips are initiated from Finland to Scandinavia and to Germany.

When, during the month, SAS reduces certain rates between Copenhagen and Brussels, deep-discount operator **Virgin Express-Eurobelgian Airlines, Ltd.** files a predatory pricing complaint with the European Commission. In response, SAS just goes ahead and lowers all of its fares on the route.

The number of weekly frequencies between Copenhagen and Delhi is increased from three to four on November 8. In what might be considered a wake-up call to a growing Baltic competition, Helsinki-based **Finnair O/Y** in November is designated the official airline of the 1998 European Cultural Capital—Stockholm.

In early December, the company takes a 29% stake in **Wideroe Flyveselskap, A.S.** with an option to take another 34.2% by December 1998; total value of the investment would be \$42.1 million.

At this point, the competition with **Virgin Express-Eurobelgian Airlines, Ltd.** over the route from Copenhagen to Brussels intensifies with the Virgin Group carrier lowering prices 37% below those of SAS in a promotion scheduled to last until March.

En route from Tromsø to Oslo, Norway, on December 17, a company MD-82 with 123 passengers is mistakenly vectored by ATC to the same 35,000-ft. flight level near Trondheim as an **Air Europa, S.A.** B-737-4Y0 en route to Bodo; the near miss that occurs is safely resolved.

Passenger boardings climb 5% to 20,783,000, while cargo traffic rises 15% to 690.4 million freight FTKs. Operating revenues of SAS Group advance 10.6% to \$4.86 billion, while costs move up 9.8% to \$4.56 billion. The operating profit accelerates to \$297.9 million, while a \$278.9-million net profit is celebrated.

At the beginning of 1998, SAS is the 15th largest airline in the world in terms of passenger boardings, number of employees (22,524), and net profit; it is 16th in fleet size, operating income, and operating profit.

The fleet, 68.4% of which is Stage III certified, includes 136 airplanes: 27 DC-9s, 16 Fokker 28s, 14 B-767s, 71 MD-80s, and 8 MD-90-30s.

The carrier's new \$35-million, 292,000-sq.-ft. International Air Cargo Center is opened on January 10 at Newark (EWR); the airline leases out all but 84,000-sq.-ft. of office and cargo space. In order to gain a larger share in the fast-growing leisure-travel market, the new product SAS Pleasure is now launched.

Air Botnia, O/Y, the domestic of rival **Finnair O/Y**, is purchased outright during the month. The first Next Generation B-737-683, for which the carrier is launch customer, makes its maiden flight on January 22. At month's end, the decision is taken to retain the company's 100-unit hotel subsidiary, SAS International Hotels.

A strategic marketing agreement is entered into with **Estonian Air, A.S.** on February 12 (effective March 28, 1999).

While on approach to Kiruna, Sweden, on a March 22 service from Stockholm, an MD-81 with 100 passengers suffers a smoldering electrical system and smoke is smelled in the forward cabin; the jetliner lands with some systems inoperable and blows three tires on roll-out. Slides are deployed when the plane stops and all aboard are evacuated without injury.

Weekly MD-82 roundtrips commence on March 29 between Stockholm and Rome. Simultaneously, twice-daily DC-9-41 roundtrips commence between Stockholm and London (STN). With the launch of this service, flights to London are increased from five flights a day to seven. Twice-daily dual-designator MD-83 roundtrips with **Spanair, S.A.** begin between Copenhagen and Madrid.

Deep-discount "SAS Express" service is inaugurated on April 1 between Stockholm and Copenhagen. The new product offers ticketless travel and replaces in-flight meals with an airside buffet.

With a DC-8F leased from **DHL Worldwide Express**, SAS launches weekend all-cargo roundtrips to New York in April. The service will be maintained through July. On April 29, a 25% stake is taken in the Swedish regional **Skyways, A.B.**

A general strike in Denmark during April and May causes the company Skr 250 million in losses. On May 8, a strategic alliance, effective September 1, is entered into with **Lithuanian Airlines**. The two will try to blunt aggressive Baltic marketing by **Finnair O/Y**.

On May 14, CEO Stenberg joins the supervisory board of the "Star Alliance," while simultaneously, a B-767-383ER is introduced wearing the colors of the partnership. The same day it is announced that, early in the following year, **Air New Zealand, Ltd.** and **Ansett Australia (Pty.), Ltd.** will join the consortium.

Meanwhile, SAS reduces fares between Oslo and seven German cities, as well as between Stockholm and five Finnish communities, including Helsinki.

In May, SAS Cargo takes 50% of the capacity of an Antonov An-26 leased by **DHL Worldwide Express**; the two carriers will offer joint services from Copenhagen to destinations along the Baltic coast.

Cimber Air Holdings, A.S., parent of **Cimber Air, A.S.**, sells a 26% equity stake to SAS in June to strengthen the regional's domestic code-share partnership with the consortium major.

The joint An-26 service with **DHL Worldwide Express** begins on July 1; it links Copenhagen with Riga, Latvia and Vilnius, Lithuania, five times a week. Having added 500 pilots and cabin staff in recent months, the company announces on July 8 that it will recruit 1,000 additional flyers and flight attendants over the next 2 years.

Just after takeoff from Stockholm on a September 13 service to London (GTW), the cockpit crew of Flight 2525, a DC-9-41 with 75 passengers, discovers an engine fuel leak; as a precaution, the Douglas returns to its point of origin. The passengers are transferred to a second aircraft that arrives in the U.K. two hours behind schedule.

As the result of negotiations successfully completed during the summer for a joint weekly all-cargo service in cooperation with SAS and **Japan Air Lines Company, Ltd. (2)**, a **Lufthansa Cargo Airlines, A.G.** B-747-230F begins flying on behalf of the three between Frankfurt, Göteborg, and Osaka on September 21. Frequencies will be increased to three-per-week during the following April.

In an effort to polish its image with customers, SAS, on September 24, unveils a new corporate identity program and plans for the operation of its new B-737-683s, which will be painted in red, blue, and grey colors—the airline's first new livery in 15 years. The new program will cost Skr 700 million.

All staff will also, at the end of March, be outfitted with new uniforms created by Scandinavian designers under the team leadership of Hanne Karlsen. The new uniforms are the eighth since 1946, but the first designed in Scandinavia by Scandinavians and will be worn by more than 15,000 cabin and station personnel by the end of March.

The Financial Times of Singapore reports in its September 25 edition that SAS and **Singapore Airlines, Ltd.** will sign a code-sharing

agreement. It is suggested that the arrangement would ease SIA's entry into the "Star Alliance."

The first B-737-683 is received at the end of the month wearing the airline's new color scheme and corporate logo. It is christened *Bernt Viking* and will enter revenue service on October 23 over the route from Stockholm to Paris.

Beginning in October, new daily B-767-383ER return service links both Stockholm and Copenhagen with Chicago. The new route offers connections for passengers traveling to or from Finland via Stockholm.

Sold out for months, Flight 333, the fully-loaded MD-82 *Hake Viking*, makes the historic and official last flight from Oslo's Fornebu Airport on October 8; crewed by an all-Norwegian cockpit and cabin team, the aircraft continues to Bergen. Two other MD-82s, the *Vidar Viking* and *Sigyn Viking*, unofficially depart later in the evening.

Winning a bet placed three years earlier, **Color Air, A.S.** Chief Pilot Capt. Tord Tangvik is able to depart with his Flight 361 from the new Gardermoen Airport at Oslo ahead of the planned premier departure by SAS Flight 303, also headed for Bergen.

A memorandum of understanding is signed with **Singapore Airlines, Ltd.** on October 10 for the creation of a strategic alliance. Although arrangements will not be completed before the end of the year, it is anticipated that the pact will cover code-share services, frequent flyer programs, network and schedule development, through check-in, reciprocal use of airport lounges, and joint promotions and marketing. When the agreement takes effect on April 1, SAS will code-share on SIA's three weekly direct flights from Singapore to Copenhagen, while SIA will place its code on SAS's Copenhagen-Bangkok-Singapore flights four times a week.

Former Executive Vice President/Chief Operating Officer Kjell Fredheim, now managing director of **Britannia Airways, A.B.**, becomes the new president/CEO of the wholly owned subsidiary **Air Botnia O/Y** on October 15.

At about the same time, a comprehensive commercial accord is inked with **Maersk Air, A.S.** of Denmark. When the pact takes effect on March 28, it will provide for joint ground handling, marketing, frequent flyer program linkage, and dual-designator flights.

At month's end, privately held AirCorp enters into a joint venture with Atlanta-based International Airline Support Group to purchase and lease back to SAS its fleet of 20 DC-9-41s. The Douglas transports will earn the partners some \$14 million in fees over the average 39-month lease periods.

Beginning in October and continuing through November into December, new airways are introduced over Scandinavia as the first step in Airspace 98. SAS adapts its traffic program in this initial phase and encounters significant cancellation problems. The situation is made worse by start-up problems at Oslo's new Gardermoen Airport.

Weekly MD-81 roundtrips are started on November 27 from Copenhagen to Fagernes, Norway.

A long-term cooperative agreement is signed with **Estonian Air, A.S.** during the first week of December. When the pact takes effect on March 28, Estonian will join the SAS frequent flyer program. The two will offer dual-designator service on their flights from Oslo to Tallin and Stockholm.

On December 3, the carrier announces a strategic accord with **All Nippon Airways Company, Ltd. (ANA)** as that carrier's first step into similar arrangements with the other members of the "Star Alliance." The pact will initially involve check-in services, frequent flyer programs, and the use of airport lounges. Code-share operations, joint marketing, and sales activities will also be considered as ANA moves into full partnership with the other carriers.

Daily MD-81 return service is introduced on December 7 from Copenhagen to Alesund, Norway, via Bergen.

In a joint announcement on December 16, SAS and **Air Canada, Ltd.** reveal that they will commence nonstop dual-designator air service five times a week between Toronto and Copenhagen. Flights on the new route, the only scheduled nonstop frequencies linking Canada and Scandinavia, will be operated by Air Canada B-767-233ERs.

Financial crises in Russia and Asia are blamed for causing a significant drop in traffic on routes to Archangel and Hong Kong, while load factors do not justify continuation of service to Venice and Amsterdam. Flights to the four points will, it is announced on December 18, be dropped in March. The released capacity will be used in an effort to bolster traffic to Amsterdam, Helsinki, Milan, and between the three Scandinavian capitals.

Passenger boardings accelerate 4.3% to 21.68 million, while cargo traffic is level at 691 million FTKs. Revenues jump 5.2% to \$4.86 billion. On expenses of \$4.37 million, an operating profit of \$488.18 million is reported. The net gain is up to \$335.78 million.

On arrival at Oslo after a January 17, 1999 service from Bodo, an MD-82 with 110 passengers skids off an icy taxiway while making a sharp turn and gets stuck in a snowbank. No injuries are reported.

Baltic International USA sells its 8.02% stake in **Air Baltic Corporation S.A.** to SAS on January 18, for \$2,144,333.

A report picked up by Reuters, Ltd. and placed on the Internet on February 10 from the Danish newspaper *Politiken* indicates that SAS has suffered a fiscal loss for the previous year. As a result, management must institute new cost-cutting measures that may include cutbacks in the acquisition of new aircraft and the dismissal of employees.

In a brief press announcement on February 23, the carrier announces that, due to a restructuring of flight control systems in France, SAS will be temporarily cancelling 20 European roundtrips per day. Also, almost as an aside, it is noted that the company will be carrying out a \$3-billion restructuring program over the next two years, one that is designed to cut costs and increase profitability.

Speaking before an aviation industry lunch in Brussels, also on February 23, **United Airlines** Vice President Michael Whitaker indicates his belief that the EU will impose no restrictions on the alliance between DLH, UAL, and SAS until it has reviewed a number of other transatlantic pacts.

On February 25, weather, combined with the French flight control system problem, forces SAS to scrub 167 European services, or nearly one flight out of every five. Safety checks being made on the airline's DC-9 fleet also contribute to the cancellations. As a result of falling load factors, on March 7 the company terminates the thrice-weekly roundtrips it has been offering since September 1996 between Stockholm and Arkhangelsk.

In anticipation of air strikes by NATO countries against Serbian military targets in a campaign to compel Belgrade to accept a peace agreement with the ethnic Albanians fighting for an independent Kosovo, SAS, on March 24, halts all scheduled service into Belgrade. A spokesman, in making the announcement, indicates that the situation will be evaluated further toward evening; however, that evening, Operation Allied Force, the bombing attack on targets in Serbia and Kosovo, begins.

Service to Belgrade remains halted on March 25-31 and for the duration of the NATO bombing campaign Operation Allied Force. Flights to south-central and southeastern Europe experience delays of 30-60 min. due to airspace closure.

The pact with **Estonian Air, A.S.** takes effect on March 28. Estonian now joins the SAS EuroBonus frequent flyer program. The two also offer dual-designator service on their flights from Oslo to Tallinn and Stockholm. Thrice-daily dual-designator roundtrips are started between Tallinn and Copenhagen; weekend flights are also offered.

On March 29, the carrier's five-times-a-day nonstop MD-81 return service from Copenhagen to Karup, Denmark, is discontinued and replaced by ATRs of **Cimber Air, A.S.**, which operate an equal number of turboprop flights.

Simultaneously, new code-sharing flights with **Spanair, S.A.** are inaugurated between Copenhagen and Barcelona and from Stockholm to Madrid.

The newspaper *Berlingske Tidende* reports on April 1 that the company has elected to postpone a decision on renewing its long-haul fleet to October—at the earliest.

While landing at Gardermoen Airport early on April 13, smoke begins to seep into the cabin of an MD-81. The touchdown is completed without incident and passengers disembark in an orderly fashion after the incident.

On May 1, SAS celebrates the tenth anniversary of service from Newark. During the decade, it has flown nearly 4 million passengers and operated 225,000 tons of cargo from the New Jersey airport.

Simultaneously, the partnership with **Singapore Airlines, Ltd.** is inaugurated through the linkage of the frequent flyer programs of the two carriers.

In cooperation with "Star Alliance" partner **Air Canada, Ltd.**, five-times-a-week dual-designator service is inaugurated, also on May 1, between Toronto and Copenhagen. The flights are operated by the Canadian line's B-767-233ERs.

On May 5, the business daily *Dagens Naeringsliv* reports that, by coincidence, SAS has learned that foreign-registered planes flying domestic Norwegian routes are exempt from paying value-added taxes. Consequently the airline petitions the municipality of Akershus to return somewhere between Nkr 100 million and Nkr 150 million that it has paid on fuel when not obligated to do so. It also seeks back VAT paid on catering services. Two fuel suppliers also file cases against the Norwegian government, as they were the agencies collecting the tax.

Dual-designator service is inaugurated with **Air Canada, Ltd.** on June 10, five times a week from Canada to Helsinki via Copenhagen.

Company baggage handlers, check-in staff, and administrative personnel at Copenhagen stage a four-hour wildcat strike on July 7 to protest rumored SAS cost-cutting measures. Over 70 of the airline's flights must be cancelled. Later in the month, SAS Denmark Chairman Hugo Schroeder expresses his dissatisfaction with the slow pace of cost-cutting in a letter that is leaked. The content further exacerbates the worker situation.

The Copenhagen ground staff meets with CEO Stenberg on August 9 to discuss their concerns.

It is announced, also on August 9, that the airline will sell four MD-82s to **Midwest Express Airlines** in a deal to be completed by October. The first aircraft would be delivered within a year.

A code-sharing agreement is signed with **Flugfelag Islands, H.F. (2)/Icelandair** on October 8. Under its terms, SAS is allowed to assign its designator to Icelandair flights from the three Scandinavian capitals to Boston, Minneapolis/St. Paul, and Baltimore (BWI) and from Reykjavik via Copenhagen, Stockholm, and Oslo to Hamburg, Goteborg, Munich, Dusseldorf, Brussels, and Zurich. Icelandair, for its part, places its code on SAS flights from Scandinavia to all of its new partner's destinations in Europe.

After 31 years of type service, the last two DC-9-21s, *Skate Viking* and *Rane Viking*, are phased out of scheduled service on October 15; they will be retained through November to provide fleet backup.

In a vivid demonstration of the ability of the "Star Alliance" to make a difference in local communities, **Air Canada, Ltd.** and SAS sign a 14-month agreement later in November under which AC will perform C\$10 million worth of cabin reconfiguration work in its Canadian shops in on SAS's B-767-300 fleet.

On December 14, with the captain's permission, the co-pilot aboard Flight 564 en route from Copenhagen to Oslo proposes marriage to his fiancée, an off-duty SAS flight attendant flying coach. To the cheers of her 50 fellow passengers, the lady goes to the cockpit to accept.

On December 15, orders are placed for four A330-300s and six A340-300s for delivery between 2001 and 2004.

Passenger boardings jump 2.4% to 22,225,000 while cargo traffic dips 1.9% to 741.4 million FTKs. SAS Group revenues rise 1.4% to \$4,868,888,000, while costs increase 5.2% to \$4,544,554,000. The operating profit falls to \$324.33 million, while net gain drops to \$216.53 million.

Airline employment at the beginning of 2000 stands at 25,754, a 7.3% increase over the previous 12 months. Among the world's top 25 airlines, SAS is 16th in passengers, 16th in employee number, and 17th in fleet size, while SAS Group is 16th in operating revenues, 17th in operating profit, and 16th in net gain.

The code-sharing pact with **Flugfelag Islands, H. F. (2)/Icelandair** takes effect on January 1. An order is placed for 12 Airbus Industrie A321-100s on February 17, with an option taken on 10 more. Also during February, the airline joins with GE Capital Aviation Services to form a joint venture leasing firm, Commercial Aviation Leasing, A.B. The first transaction is a sale/lease-back of 30 SAS MD-80s.

Two MD-82s at Oslo are nearly involved in a midair collision on March 8. The one is just beyond the point of cancellation on its takeoff for Bergen when its flight crew spies the second plane on the same runway, just arrived from Bodo. The departing jetliner leaps into the air a scant 300 m. in front of the second and only later is it revealed that a third plane, an MD-81 from Copenhagen, was simultaneously on descent before being radioed off, to land on the same runway.

On March 24, the Swedish news agency TT reveals that small cracks have been found on the turbine blades in four of the engines on the company's 32 new Next Generation B-737-683s. The faults had had no impact on the ability of aircraft to complete their flights. On March 29, the five-times-a-day nonstop MD-81 return service from Copenhagen to Karup, Denmark, is discontinued and replaced by ATR42-520s of **Cimber Air, A.S.**, which operate an equal number of turboprop flights.

On March 31, SAS takes delivery of the 500th Next Generation B-737 constructed, a Dash-783.

A large contract is signed with Airbus Industrie on April 11 for the purchase of 6 A330-300s and 4 A340-300s, plus 12 A321s.

It is announced on April 27 that the carrier is joining with **Lufthansa Cargo Airlines, A.G.** and **Singapore Airlines, Ltd.** to create an air freight joint venture to be known as New Global Cargo. The new entity will integrate the cargo networks of the three founders; based at Frankfurt, it will eventually have 60 long-range freighters and operate to 500 destinations in 35 nations.

SAS, **British Midland Airways, Ltd.**, and **Deutsche Lufthansa, A.G.** intensify their partnership on May 2 by introducing coordinated sales and marketing, reciprocal frequent flyer programs, joint lounge use and code-sharing on all services offered by any of the three from either London (LHR) or Manchester.

Hedrun Viking, the first of five B-737-883s to be accepted, is delivered in ceremonies at Seattle on May 3.

While making a stop at Tromso on a May 11 service from Alto to Oslo, Flight 379, an MD-80 with 124 passengers aboard, is unable to come to a halt and slides off the runway and down onto a tunnel over one of the busiest local highways. Fortunately, everyone aboard is safely evacuated without injury—though they must wait for a replacement aircraft.

In mid-June EU Commission officials suddenly descend upon the offices of SAS, as well as those of **Maersk Air, A.S.** and its owner A. P. Moeller Group, as part of an investigation into the competitive results of the code-sharing pact between the two airlines. The dual-designator review, confirmed to the press by EU headquarters in Brussels, is to determine if the SAS-Maersk pact violates Commission rules.

On July 3, a new dual-designator pact begins with **Spanair, S.A.** Under its terms, Spanair is able to place its code on SAS flights from Madrid to Copenhagen, Helsinki, Goteborg, and Oslo, while SAS shares flights with Spanair from Copenhagen to Alicante, via Paris (CDG).

On August 22, a Fokker 50 is subleased from **KLM Cityhopper, B.V.** The TCAS sounds aboard an SAS Next Generation B-737-683 from Oslo as it approaches Alesund on August 26 because it has, at the direction of ATC, entered onto the same flight path as a **Norwegian Air Shuttle** Fokker 50 en route from Molde to Bergen. The jetliner is able to increase its height, avoiding the turboprop.

The last MD-81 is officially retired on September 17.

The EU Commission informs SAS on October 13 that it has serious concerns about its cooperation with **Deutsche Lufthansa, A.G.** and **Austrian Airlines, A.G.** within the "Star Alliance" concerning competition over the large number of routes from Austria to Germany and the Nordic countries.

As part of **Air Baltic Corporation's** integration into the SAS network, SAS, at the beginning of the winter schedule on October 29, cancels its

own Stockholm to Riga service and turns the route over to Air Baltic, which now becomes the only carrier flying directly between the two cities. To meet demand, frequencies are increased from 78 to 94 every week. Thrice-daily return service from Copenhagen to Birmingham, England, and four-times-a-week roundtrips from Oslo to Dublin also begin on October 29. The first day of the winter schedule also sees frequencies increased on the routes from Copenhagen to Budapest, Hamburg, St. Petersburg, and New York (JFK), from Goteborg to Paris, from Oslo to Paris and Stockholm, and from Stockholm to Budapest, Geneva, Hamburg, New York (JFK), and St. Petersburg. A new weekend route is also flown from Copenhagen to Palma de Mallorca.

While en route from Amsterdam to Stockholm on November 8, a passenger aboard a company MD-82 discovers a note warning of a bomb. An emergency landing is made at Copenhagen, but no explosive is found.

On November 20, thrice-weekday MD-81 return flights commence between Copenhagen and Birmingham, England; two roundtrips are offered on weekends. This is the only direct service between the two cities.

By November 23, the last two DC-9-21s have been released from regularly scheduled flights. They remain in service, however, as backup and are often employed on the routes from Copenhagen to Amsterdam and Amsterdam to Oslo.

Following the collapse of intense scheduling discussions with SAS, the 1,286 company members of the Norwegian Cabin Attendants Union stage a 24-hour strike on November 27. The job action forces the carrier to cancel all of its 161 domestic flights in Norway, 35 in Sweden, and 9 in Denmark, as well as 40 other inter-Scandinavia flights. The same day, SAS announces that 52-year-old Joergen Lindegaard, CEO of GN Store Nord, A.S., will succeed Jan Stenberg as CEO on January 1; he will be the first Dane to head the world's most successful multinational airline. SAS settles with its Norwegian flight attendants on November 30, averting another strike.

Also during the month, the company begins discussions with **Delta Air Lines** concerning the possibility of a trade: Delta's 16 MD-90-30s in exchange for a number of older SAS MD-80s.

The carrier's dispute with its Norwegian cabin crews is settled on December 6. The final DC-9-21 service is operated on December 15, after which the type is retired from the SAS fleet. The company continues to operate 19 DC-9-41s.

Even as SAS and its partners **Deutsche Lufthansa, A.G.** and **British Midland Airways, Ltd.** await the outcome of a European Commission review of a joint venture with Austrian Airlines Group, the three carriers, on December 12, note that they are also awaiting word from the EU on their joint-venture proposal put forward in early May. This move, which they have since been operating on the assumption of approval, would allow them to harmonize pricing and share revenues on European routes and to share routes from London (LHR), including BM's new destinations of Milan, Rome, and Madrid.

Options to purchase another three Next Generation B-737-683s are turned into firm orders on December 22 for delivery in **2002**. The next day, the SKr 3-billion sale to **Deutsche Lufthansa, A.G.** of a 20% stake in **British Midland Airways, Ltd.** is formally completed.

Customer bookings for the year accelerate 7% to 23,780,750, while freight traffic inches up 0.2% to 683.53 million FTKs. Group operating revenues climb 8.7% to SKr 47.5 billion, while operating gain jumps 35% to SKr 3.72 billion. Pretax profit soars 50% to SKr 2.77 billion (\$286.7 million).

SAS COMMUTER (SCANDINAVIAN AIRLINES SYSTEM COMMUTER): P.O. Box 150, 2770 Kastrup, Copenhagen, Denmark; Phone 45 32 32 4848; Fax 45 32 32 28 78; Code SK; Year Founded 1988. Planning for this regional airline is begun by the airlines owning **SAS (Scandinavian Airlines System)** in 1984 to assume, as the new Commuter Operations Department (COD) flight division of the larger airline, various intercity routes within and between Denmark, Sweden, and Norway. Also known as **Scandinavian Business Commuter (SBC)**, the concern will be given a fleet of four Fokker F.27s.

The company does not actually come into existence until August **1988**, at which point it is reformed into SAS Commuter. Hans Erik Stuhr is appointed chairman, with Jorgen Graagengaard as CEO/managing director, and orders are placed for 15 Fokker 50s, with options on 15 more.

The inaugural fleet comprises 9 Fokker F.27s and these are employed to inaugurate scheduled Norlink flights over a hub-and-spoke system in northern Norway and Eurolink services to destinations within Scandinavia and northern Europe from a Copenhagen hub. The company also operates hovercraft between Copenhagen and Malmo.

The COD and its F.27s are absorbed into the parent on April 1, **1989**, as planning proceeds for the initiation of scheduled Fokker 50 regional services as a sister of Norlink. Shareholding is divided into a structure similar to the main SAS consortium; three companies are formed, one each in Denmark, Norway, and Sweden, which are half-owned by private interests and half by the respective governments.

The first unit of the previous year's massive Fokker 50 order arrives in early September and with several others on hand, the company begins operations on September 25, feeding the major at Copenhagen from such destinations as Hanover and Hamburg. A number of leased F.27s are made available. Some will work Swedish routes and the remainder will provide flights in Denmark.

In **1990**, 19 additional Fokker 50s are delivered, allowing retirement of all the F.27s. Seven of the new Fokker 50s begin hub-and-spoke operations over the Norlink routes in northern Norway. From a main base at Tromso, traffic is fed into that destination, as well as Bodo, Evenes, and Alta, from which points 16 daily nonstop roundtrip connections are made to Oslo.

Enplanements total 628,890.

Airline employment is increased by 15.6% in **1991** to 371 and the fleet includes 22 Fokker 50s. A number of new destinations in Sweden and Denmark are initiated.

Passenger boardings double, 49.9%, to 1,255,268. Freight swells 61.4% to 35.05 million FTKs.

Two more Fokker 50s are acquired in **1992** as deregulation begins in Sweden. On October 1, SAS Commuter's Euroclass-configured Fokker 50s begin four-times-per-day roundtrip services from Bromma Airport in downtown Stockholm to Copenhagen, Helsinki, and Oslo.

Airline employment in **1993** stands at 400. European and Norlink services continue to be offered by CEO Hans Erik Stuhr's 22 Fokker 50s.

Flights apace in **1994-1995**. During the latter year, the company begins to examine the possibility of establishing an operation at Stockholm's Arlanda Airport that will parallel its Copenhagen Fokker 50 operation to offer new services. It would also free up the jetliners of **SAS (Scandinavian Airlines System)** now operating on thin routes from the Swedish capital. The new service will be known as SweLink.

The fleet in **1996** that fleet includes 22 Fokker 50s and 4 SAAB SF340As. With the beginning of the summer schedule on March 31, twice-weekly Fokker 50 roundtrips are inaugurated from Copenhagen to Newcastle, England.

Orders are placed in July for four SAAB 2000s and two options. Kjell Sundstrom is named director of SweLink at Stockholm and he sets about establishing the new Arlanda Airport SweLink hub. Following completion of successful negotiations with the SAS Commuter and **SAS (Scandinavian Airlines System)** unions, 50 pilots are recruited.

From a base at Copenhagen, 16 Fokker 50s offer Eurolink services to Aalborg, Billund, and Karup in Denmark as well as over longer routes to Prague, Berlin (Tempelhof Airport), Cologne, Hamburg, Hanover, Luxembourg, Oslo, Stavanger, Gdansk, Poznan, Szczecin, Kalingrad, and the Swedish communities of Goteborg, Jonkoping, Kalmar, Karlstad, Norrkooping, Orebro, Vasteras, and Vaxjo.

At the same time, six Fokker 50s based at Tromso in Norway fly to six communities inside the Arctic Circle: Alta, Bardufoss, Bodo, Evenes, Kirkenes, and Lakselv.

Enplanements for the year total 1.7 million.

The first two SAAB 2000s are delivered during the last week of January **1997** and enter service in February over new Swelink routes 48

times per week from Stockholm (Arlanda Airport) to Kalmar, Angelholm, Karlstad, Kristianstad, Ornskoldsvik, Ronneby, Skelleftea, Sundsvall, Vasteras, and Vaxjo. At month's end, it is reported that the new turboprops have a dispatch reliability of 99.2%, higher than that for the first month of any other new aircraft ever introduced into the fleets of SAS Commuter or **SAS (Scandinavian Airlines System)**.

In March, the company becomes the latest member of the European Regional Airline Association. Having proven unprofitable, the twice-weekly Fokker 50 service from Copenhagen to Newcastle is withdrawn on March 27. The route is turned over to **Cimber Air, A.S.**, which resumes scheduled service on April 1.

Two more SAAB 2000s are delivered in April and like the earlier units, replace F28s and MD-80s on routes handed over by the parent company.

On September 1, a \$350-million order is placed with Bombardier, Inc. for 15 de Havilland Canada DHC-8Q-400s with 18 options for delivery beginning in July 1999. They will replace Fokker 50s on Swedish domestic routes and regional routes in northern Europe.

At the same time, the SAAB 2000 options are converted into firm orders. During September, new SAAB 2000 service is inaugurated from Stockholm to Budapest and Arkhangelsk.

Customer bookings climb to 1.9 million.

The two new SAAB 2000 turboprops arrive at Stockholm's Arlanda Airport in March and April 1998. They are immediately placed on non-stop regional flights from the hub airports at Stockholm, Copenhagen, and Oslo. The number of DHC-8Q-400 firm orders is increased to 17 during July.

At the beginning of 1999, President Ole Pedersen oversees a workforce of 750 and a fleet that includes 22 Fokker 50s and 6 SAAB 2000s.

A \$47-million follow-on request is made to Bombardier, Inc. on June 15 for 2 more DHC-8Q-400s, for a total of 19.

Enplanements for the year total 1,647,000.

At the beginning of 2000, SAS Commuter employs 800 people and operates to 54 city pairs throughout Scandinavia and Western Europe. For example, it continues to operate Swedlink flights from Stockholm to Berlin and communities in western Finland; from Copenhagen, it flies Eurolink frequencies to points in the Czech Republic; in Poland, it flies to Vilnius and Riga on the Baltic and to the German cities of Colobne, Hanover, and Hamburg; and from Tromso it operates Norlink services to points in northern Norway.

The carrier's first Bombardier Dash 8-Q402 enters revenue service on February 4 on the route from Copenhagen to Poznan, Poland. Delays in production and certification problems have put the introduction by the launch customer some 16 months behind schedule. Another 21 aircraft remain on order.

A heavy wind causes Flight 215, a new Dash 8-Q402, to complete its May 27 service from Copenhagen with a very heavy landing, tail first, at Aalborg. The plane, with a 1.5-m. slash in its tale, is out of service for a month.

On July 24, 6 of 15 options for additional DHC-8-Q402s are converted into firm orders, bringing the company's total number of requests for the advanced turboprop to 28.

All nine of the new Dash 8-Q402s in the company's fleet are grounded on October 12 after a series of electronic problems set off faulty cockpit indicator lights. Just barely cleared to return to service, one of the new aircraft suffers a tailstrike while landing at Kastrup Airport, Copenhagen, on October 22. The rash of problems with the new commuter planes will continue through the end of the year and into 2001.

SASA (SERVICIOS AEREOS, S.A.): Peru (1981-1995). Formed at San Ramon in 1981, SASA is equipped with 1 CASA C-212, 1 Cessna 402, 1 Britten-Norman BN-2 Islander, 5 Cessna 206s, and 3 Cessna 210s.

Thirteen years later, it continues to maintain local passenger and cargo charters to such central Peruvian destinations as Atalaya, Buena Pe, Huancayo, Lima, Pozuzo, Pucallpa, Puerto Bermudez, Puerto Inca, Puerto Victoria, Satipo, Sepa, and Tournavista. Flights cease by 1995.

SASCO AIR CHARTER. See **SASCO AIR LINES, LTD.**

SASCO AIR LINES, LTD.: P.O. Box 8260, El Amarat, Khartoum, Sudan; Phone 249 (11) 443 362; Fax 249 (11) 443 336; Code SAC; Year Founded 1983. Nur Aviation Services is set up as an FBO at Khartoum in 1983 by M. M. Nur; a charter division, **Sasco Air Charter**, undertakes air taxi flights with a pair of Cessna 404 Titans.

A decade later, in 1996, the division is renamed, although its charter mission is retained. President Nur operates a fleet comprising 1 each Cessna T210N Turbo Centurian, Douglas DC-3, and Piper PA-23 Aztec. The queen of the new airline division is a Tupolev Tu-134A jetliner, wet-leased long-term.

The Russian-made jetliner operates scheduled domestic passenger services during the remainder of the decade. A total of 40 workers are employed at the beginning of 2000.

SASKAIR (SASKATCHEWAN GOVERNMENT AIRWAYS, LTD.): Canada (1947-1965). The St. Albert-based charter carrier **Mayron and Campbell Aviation, Ltd.** is acquired by the Saskatchewan provincial government in August 1947 and is combined with the air arm of the Provincial Department of Natural Resources to form SGA or Saskair.

During 1948-1964, Saskair continues and expands the charter operations of M & C, including forest fire patrol and fighting, air ambulance, and prospector transport. Also assumed and developed is a scheduled network of 22 destinations in the northern part of the province that are served with small, float-equipped aircraft types, e.g., de Havilland Canada DHC-2 Beavers. A Douglas DC-3 is purchased in 1957.

The regional carrier **Norcanair, Ltd.** is formed in January 1965. Two months later, it purchases Saskair and integrates it into what would become an ongoing operation.

SAT (FLUGGESELLSCHAFT, GmbH): Germany (1976-1986). Privately owned SAT (Special Air Transport) is formed at Flughafen Koln/Bonn in summer 1976 to offer offer regional charters with a fleet of turboprop Fokker F.27-100 Friendships.

Two years later, in 1978, three Sud-Est SE-210 Caravelle XRs previously operated by **LTU International Airlines (Lufttransport Unternehmman, GmbH)** are acquired. Painted in a green and white livery with white "SAT" titles on the fins, these French-made jetliners are employed, beginning in September, to offer international holiday tour and general passenger group charter flights to destinations in Europe, the Mediterranean, the Caribbean, North Africa, and the Canary Islands.

In the early 1980s, two Boeing 727-200s are acquired. They join the fleet wearing the company's final livery, a green two-tone color scheme. Flights continue until June 1986 when SAT is reformed and renamed **Germania Fluggesellschaft, GmbH**.

SATA (SOCIETE ANTILLAISE DE TRANSPORTS AERIENS, S.A.-AIR GUADELOUPE): French West Indies (1970-2000). SATA is formed at Pointe-à-Pitre le Raizot Airport, Guadeloupe, in March 1970; local government and private interests hold 55% of the shares. In addition to its 45% shareholding, **Air France** also provides managerial and other support under contract.

Employing a fleet comprising 2 Fairchild Hiller FH-227Bs, 2 DC-3s, 4 de Havilland Canada DHC-6-300s, and 2 Britten-Norman BN-2s, the company provides general charter flights within the Caribbean archipelago. Additionally, scheduled services are inaugurated from Point-à-Pitre and Basse-Terre to Marie Galante, Les Saintes, Saint Barthelemy, Saint Martin, La Destrade, Saint Francois, Dominica, and from Marie Galante to Basse-Terre.

By 1981, the employee population is 134 and enplanements total 263,989; bookings rise in 1982 to 271,024. The Islanders and a Douglas transport are sold in 1983-1985 and an order is placed for an Avions de Transport Regional ATR42. Service is started from Pointe-à-Pitre to Antigua and replacement daily FH-227 shuttle flights are made on behalf of **Air France** from Pointe-à-Pitre to Fort de France, Martinique.

The first ATR42 is received in **1986**. It helps enplanements climb to 196,300. Airline employment grows 3.9% in **1987**, but customer bookings now fall 7.6% to 182,435. The second ATR42 arrives in **1988**. At the end of the decade, Raymond Du Pont is named general manager; the last DC-3 is retired and is replaced by two Dornier 228-202s. An ATR72 is optioned in **1990** as the company's twentieth anniversary is celebrated.

The fleet in **1991** includes the 2 ATR42s, 3 Dornier 228-202s, and 2 DHC-6-300 Twin Otters. The decision is taken not to exercise the option on the ATR72, due for delivery in May. On June 8, joint Pointe-à-Pitre to Paris roundtrips commence in cooperation with **Air Martinique, S.A.** employing a Douglas DC-10-30 leased from **Minerve, S.A.**

The carrier's first jetliner, a leased Boeing 737-33A, is delivered in December and is used, in cooperation with **Air Martinique, S.A.** and **Air Guyane, S.A.**, to inaugurate a replacement regional network on behalf of **Air France**. The network links Pointe-à-Pitre with Fort de France, Cayenne, Port au Prince, San Juan, St. Martin Juliana, Belem, and Miami.

General Manager Du Pont is succeeded by Daniel Guadart in **1992**; airline employment stands at 246 and the 2 DHC-6s are now withdrawn as a third Dornier 228-202 is leased. Early in the year, capitalization is increased from FFr 8 million to FFr 48 million. Ownership is divided between the local Department (46%), **Air France** (45%), the state (5%), the local Chamber of Commerce and Industry (2%), and local communities (2%). Losses for the year total \$5.5 million.

As a result of its losses, the operator files for bankruptcy in February **1993**. Operations continue apace even though the company begins liquidation in late December. The airline is not, however, allowed to disappear, being held together in **1994** by new General Manager Francois Pameole and his management team from France. The fleet is downsized and the Boeing is withdrawn.

Operations continue apace in **1995–1996**. During the first quarter of **1997**, another Dornier 228-202 is acquired. Flights continue in **1998**.

On January 6, **1999**, **Air France** enters into a new partnership agreement with **SATA**, **Air Saint Martin, S.A.**, and **Air Martinique, S.A.** designed to increase the major's market share in North America and to maintain French-flag air presence in the Caribbean region.

During the first quarter, the B-737-2M8A is wet-leased from **Islandsflug, H.F.** to Caraibenne des Transportes Aeriens, the joint venture established to replace the French major on its Caribbean routes from Fort de France and Pointe-à-Pitre to Cayenne, Miami, and Port au Prince. The Icelandic Boeing will be returned as soon as the combine is able to secure a pair of B-737-300s.

In order to create a larger carrier in fact as well as alliance, the small airlines of the French Caribbean, which had been flying the Antilles as part of the umbrella Caraibenne des Transportes Aeriens joint venture, are actually merged into **SATA** during July **2000**.

The **SATA** fleet is thus enhanced by the addition of the former **Air Saint Martin, S.A.** Dornier 228-202 and Beech 1900D, the **Air Martinique, S.A.** ATR42-320s and Dornier 228-202s, and the **Air Saint Barthelemy, S.A.** 228-201 and de Havilland Canada DHC-6-300. The enlarged airline maintains the local service routes of the three previous independents. It also retains the **Islandsflug, H.F.** B-737-2M8A, previously chartered for Caraibenne des Transportes Aeriens, and employs it to operate daily roundtrips from Fort-de-France and Pointe-à-Pitre to Miami via Port-au-Prince, Haiti.

The surviving partner, controlled by 70% majority owner Groupe Dubreuil (which had previously owned the French carrier **Regional Airlines, S.A.**), is soon thereafter renamed **Air Caraibes, S.A. (2)**.

SATA AIR ACORES (SERVICO ACOREANO DE TRANSPORTES AEREOS, S.A.): Av Infante d'Henrique 55, Ponta Delgada, Azores, 9500, Portugal; Phone 351 (96) 25 067; Fax 351 (96) 24 695; <http://www.sata.pt>; Code SP; Year Founded 1947. Formed as a study group six years earlier and upgraded on June 1, **1947**, this carrier is first known as **Sociedade Acoreana de Transportes Aereos SARL (SATA)** and is equipped with a single war-surplus Beech C-45/AT-11. Revenue

services are inaugurated on June 15 over a route from Sao Miguel to Santa Maria. The first of two de Havilland DH-104 Doves is acquired in **1948**, followed by a second a year later.

Following the loss of the Beechcraft, services are suspended in the early **1950s** until the Doves are allowed to restart the original route and also expand to include Tercoera and Flores Islands.

Services are maintained for a quarter of a century with little change except in equipment. The fleet is enhanced in **1964** with the addition of a Douglas DC-3. A Hawker Siddely HS-748-B2, the first of three received, is delivered in **1970**.

Beginning in **1971**, the Doves are withdrawn as the British turboprops join the fleet. An airport is opened at Horta during the year, allowing the carrier to start flying to Faial Island.

Flights continue in **1972–1975**. Several small de Havilland Canada DHC-6 Twin Otters are acquired during these years. In **1976–1977**, two DC-6s replace the DC-3s.

In late **1978**, President Zinckle dos Reis oversees 435 employees and a fleet comprising 2 Douglas DC-6s and 2 Hawker Siddeley HS 748s.

Caught in a violent squall near Marie Galante Island on November 18, a DHC-6-300 with 1 pilot and 19 passengers crashes into the sea and sinks in 13 m. of water 2 mi. offshore (15 dead).

Flights continue without incident in **1979** and the government acquires 100% shareholding in **1980**. The DC-6s are withdrawn during the year.

During the early **1980s**, the company is reformed and adopts its present name. Ownership is divided between the government (48%), public (48%) and private (4%) interests and Jose Pacheco de Almeida is named president.

Enplanements in **1983** total 190,366.

The workforce is increased 1.6% in **1984** to 573 and the fleet is altered to comprise 3 British Aerospace BAe (HS) 748-B2s. Daily turbo-prop flights link the carrier's four principal destinations.

Passenger boardings dip 1.8% to 187,000 and freight falls 9.1% to 365,000 FTKs.

Enplanements in **1985** ascend once more to total 211,147. In **1986**, passenger boardings grow only 0.4% to 211,995. Freight, however, declines by 16% to 326,000 FTKs.

Three additional 748s are added in **1987–1988**. At this point, eight of the nine islands of the Azores are served. During the latter year, three BAe ATPs are requested, along with authority to fly to mainland Portugal and Madeira.

Enplanements in the latter year total 220,000.

The company's first jetliner, a BAe 146-200, is acquired in 1989, while in December, the first of three requested BAe ATPs begin to replace the BAe 748s.

Passenger boardings inch up by 1.3% to 232,377.

The BAe 146-200 does not prove satisfactory and beginning in February **1990** it is replaced by two more BAe ATPs. At the same time, the last of four BAe 748-B2s are retired. In an effort to increase its presence, the company joins three industry associations: IATA, the Regional Airlines Association, and the European Regional Airlines Association.

Enplanements this year total 247,283.

Company employment is slashed 11.7% in **1991** to 557 and the fleet now includes just 3 Jetstream 61s. An effort is made to increase automation.

Unlike many of its European contemporaries, this carrier enjoys passenger traffic growth of 2.7% during the year with 254,145 passengers flown. Freight, on the other hand, drops 12.6% to 341,000 FTKs.

Recession impacts the company in **1992**. As the winter schedule brings a reduction in services, one ATP is chartered out to **Air Malta, Ltd. (2)**.

Enplanements total 273,968.

In **1993** President Carlos Costa Neves oversees a workforce of 549, down 2.1% from the previous year, and a fleet of 3 ATPs. Destinations visited from Sao Miguel include Santa Maria, Terceira, Graciosa, Sao Jorge, Pico, Faial, Corvo, and Flores.

In November, an ATP is again leased to **Air Malta, Ltd. (2)** for six months. A Dornier 228-202 is chartered from its manufacturer in December to operate from the limited facilities available on Corvo Island.

Passenger bookings slide 3.1% to 265,483 and cargo is down 6.8% to 261,150 FTKs.

Airline employment is increased by 1% in **1994** to 550 and the government announces plans to privatize the carrier. The ATP returns from **Air Malta, Ltd. (2)** and is placed back into service on the company's summer schedule. During the year, ICAO celebrates its fiftieth anniversary by awarding a commemorative medal to an organization or person in each member state that has made a significant contribution to the development of civil aviation. In Portugal, the medal is awarded to SATA.

Customer bookings recover, growing by 2.4% to 271,879; freight declines again, falling 12.5% to 251,000 FTKs.

There is no change in the workforce during **1995** as an order is placed for a B-757-200. Enplanements through September swell 3% to 228,445, but cargo slips 1% to 196,000 FTKs. The fleet is increased in October by addition of a leased Boeing 737-3Q8, which is christened *Corvo*.

With the beginning of the winter schedule, the "Baby Boeing" inaugurates inclusive tour flights to Porto and Madeira.

Airline employment is cut 24.2% in **1996** to 417 and the B-757 order remains outstanding. The airport at Horta is expanded to handle the new aircraft when it is delivered. At the same time, the B-737-3Q8 undertakes vacation flights to Austria, Germany, Belgium, and Italy.

Passenger boardings for the full year accelerate 4.7% to 292,185.

Seven new employees are hired in **1997** and domestic scheduled destinations visited include Corvo Island, Flores Island, Graciosa, Horta, Pico Island, Ponta Delgada, Santa Maria, Sao Jorge Island, and Terceira.

A total of 9,993 flights are completed and enplanements increase by 4.6% to 300,386.

In February **1998**, SATA purchases the outstanding shares of **Ocean Air, S. A.** for the moribund carrier's operating certificate. In March, a B-737-3Q8 is delivered in the company's new color scheme. Christened *San Jorge*, it is assigned to the upgraded Ocean Air, which is relaunched on April 8 as **SATA International, S.A.** The parent company's passenger boardings accelerate 5.7% on the year to 315,000.

By the beginning of **1999**, airline employment has been increased by 1.3% to 471.

The B-737-3Q8 *Corvo* is now transferred to **SATA International, S.A.** and is complemented with one each B-737-3Y0 and B-737-36N; these leased machines are supplemented by a longer-range Airbus A310-304. SATA itself elects to run the Twin Otters and ATPs, while operating maintenance and support activities, as well as four airports in the archipelago.

While en route from Ponta Delgada, South Miguel Islands, to Horta on Faial Island on December 11, Flight 530, an ATP with 4 crew and 31 passengers crashes into 1,067-m.-high Pico da Esperanca Mountain on Sao Jorge Island; there are no survivors.

Passenger boardings for the year jump 11% to 349,000.

Airline employment at the beginning of **2000** stands at 503, a 6.8% increase over the previous 12 months.

Two British Aerospace ATPs are leased from their manufacturer in June; one is a direct replacement for the aircraft lost in 1999. The aircraft are employed to meet a demand for increased interisland service, as well as to provide feed to **SATA International, S.A.**

SATA INTERNATIONAL, S.A.: Avenida Infante D Henrique 55-4, Ponta Delgado, 9500, Portugal; Phone 351 (296) 209 727; Fax 351 (296) 209 722; Code S4; Year Founded 1998. In February **1998**, **SATA Air Acores (Servico Acoreano de Transportes Aereos, S.A.)** purchases the outstanding shares of **Ocean Air, S. A.** for the moribund carrier's operating certificate. In March, a leased Boeing 737-3Q8 is delivered to the parent in the company's new color scheme. Christened *San Jorge*, it is assigned to the upgraded Ocean Air. The new concern, which has received a bid by public tender, is awarded scheduled routes that will link

its base with Lisbon, Funchai, and Oportu. Under the leadership of Managing Director Antonio Sousa, the former Ocean Air is relaunched on April 8 as **SATA International, S.A.**

The B-737-3Q8 *Corvo* is transferred to **SATA International** in **1999** and is complemented with one each B-737-3Y0 and B-737-36N. These leased machines are supplemented at the end of October by a longer-range Airbus A310-304, the *Terceira*, employed to inaugurate twice-daily roundtrips between Lisbon and Ponta Delgado and nightly Lisbon to Frankfurt return service. Charter flights are also completed to various other northwest European destinations, including airports in the United Kingdom, and from those places, during the post-October period, to the Spanish Atlantic islands.

A total of 213 workers are employed at the beginning of **2000**. When **TAP-Air Portugal, S.A.** discontinues its service from Lisbon to Boston on October 29, it begins to code-share on the SATA service begun several months earlier.

SATAIR-AIR MARTINIQUE, S.A.: French West Indies (1974–1981). This airline begins as a charter operation at Fort de France in June **1974**. Nonscheduled passenger and cargo flights are offered throughout the eastern Caribbean.

Employing the marketing title Air Martinique, the company begins scheduled services in **1978** from Fort de France to Dominica, Grenada, St. Lucia, and St. Vincent. The fleet used includes a Britten-Norman BN-2 Islander and a Fokker F.27 Friendship.

Unable to survive financial difficulties caused by significantly higher fuel costs, the commuter stops flying in **1981**.

SATCO (SERVICIO AEREO DE TRANSPORTES COMERCIALES, S.A.): Peru (1963–1973). The Peruvian Air Force air transport division Grupo de Transportes Numero 8, which has been providing Curtiss C-46 and Douglas DC-3 passenger and cargo services between the nation's major cities as a supplement to **Faucett Peruvian Airlines, S.A.**, is redesignated SATCO in **1963**. The fleet is increased by the addition of more Curtiss and Douglas transports, frequencies are increased, and improved emphasis on commercial-type services is initiated.

The first Douglas DC-4 is added in **1966**. Later in the decade as the carrier participates in earthquake relief, it comes to add significant cargo-hauling capacity with four DC-6s and three Lockheed L-100-20 civil Hercules freighters originally delivered to the Air Force.

Operations around the country are continued without incident during the remainder of the decade and into the early **1970s**.

A C-46F, with four crew and six passengers and en route from Chichayo to Tarapota via Moyobamba disappears near Moyobamba on April 20, **1972**; when the wreckage is found later in the day, there are no survivors.

In March **1973**, following extensive evaluation and flight demonstrations (competitions), the Fokker F.28-1000 Fellowship is chosen as the airline's first jetliner.

When **AeroPeru (Empresa de Transportes Aereos de Peru, S.A.)** is formed in May as the new government national flag carrier, the SATCO organization is absorbed as the domestic line.

SATENA COLOMBIA (SERVICIO DE AERONAVAGACION A TERRITORIOS NACIONALES): Avenida El Dorado, Entrada 1, Interior 11, Bogota 11163, Colombia; Phone 57 (1) 413-8438; Fax 57 (1) 413-8178; Code ZT; Year Founded 1962. To provide air service to the underdeveloped and slightly populated areas of eastern and southern Amazon and Orinoco regions of Colombia, SATENA is established in September **1962** as a semi-official government agency to be operated as a special air transport division of the Fuerza Aerea (Air Force). Employing unconverted military C-47s, operations commence on June 1.

In **1963–1964**, services to bush communities are flown with Douglas transports and light planes from bases at Cali, Neiva, and Villavicencio. The fleet in **1965** comprises 2 de Havilland Canada DHC-2 Beavers, 5 DC-3s, 2 DC-4s, and 2 Consolidated PBY-5A Catalinas.

Enplanements total 57,448.

A DC-3 with 13 aboard crashes into the Caqueta River on February 20, **1966** (11 dead).

Law 80 of December 30, **1968** reorganizes the carrier as an autonomous government branch administered by the secretary of defense. Col. Alfredo Ortega is named general manager on January 1, **1969**. On September 8, a DC-3 with 32 aboard crashes near Aspiary AFB in Meta Province; there are no survivors.

Service continues as before in **1970–1971** as the fleet is augmented by a few Fuerza Aerea C-54s.

En route from Medellin to Buenaventura on January 21, **1972**, a chartered DC-3 with 3 crew and 36 passengers strikes high ground in the Andes near San Nicolas, crashes, and burns; there are no survivors.

The first civilian-type airliners acquired are four Hawker Siddeley HS 748-2As purchased late in **1973**.

While climbing away from Bogota on January 9, **1974**, an HS-748-2A with 3 crew and 28 passengers crashes into a hill near Florencia; there are no survivors. Flights continue without incident during the remainder of the year.

Domestic outback service is maintained in **1975–1983** to 63 destinations, branching off a main network built to link the cities of Bogota, Villavicencio, Cali, Florencia, Neiva, Aruca, and Tame. By 1978, airline employment stands at 109 and the fleet comprises 2 DC-4s, 5 DC-3s, and 3 HS 748-2As.

There are seven fatal accidents during these years.

All 20 persons aboard a DC-3 are killed when it crashes near Neiva, Colombia, on January 8, 1975. En route from Ocana to Cucuta, a DC-3 with three crew and three passengers crashes into hilly country near Sardinata on May 3 (three dead).

On final approach to Puerto Asis from Florencia on April 2, 1976, a DC-3 with 2 crew and 14 passengers crashes into a lake (5 dead). A DC-4 with more than 50 aboard vanishes into the Ecuadorian mountains during an August 15 domestic flight.

Having aborted its takeoff from Camanaos, Colombia, on February 17, 1978, a DC-3, with 2 crew and 26 passengers swerves off the runway and crashes into a tree, suffering the separation of both engines and the landing gear; although the aircraft must be written off, there are no fatalities.

The second DC-4 with 66 aboard disappears into the Ecuadorian mountains during an April 23, 1979, domestic flight. On August 22, a mechanic and a buddy steal an HS 748-2A for a joyride from Bogota; the turboprop crashes into a residential area of the city, killing not only the pirates, but three people on the ground as well.

En route to Bogota on December 18, a C-54D with 4 crew and 15 passengers strikes a mountain at Cerro Toledo; there are no survivors.

A C-47B is destroyed at Cali on May 3, 1983; there are no other details concerning the accident.

An HS 748-2A with 5 crew and 16 passengers is destroyed as the result of a bad landing at Pasto on August 7; there are no fatalities.

Two Fokker F.28-3000C Fellowship jetliners are introduced in **1984**.

While on a charter, one of the new F.28-3000Cs with 6 crew and 46 passengers crashes into a fog-shrouded mountain near Florencia during a storm on March 28, **1985**; there are no survivors.

Operations continue apace in **1986–1989** and the carrier offers both scheduled and charter flights to 112 destinations in the hinterland. The fleet in the latter year includes 1 each BAe (HS) 748-2A and 748-2BF, plus 6 CASA C-212-200 Aviocars, 2 C-212-300s, and 1 F.28-3000C.

A C-212-200 Aviocar with 4 crew and 11 passengers collides with a mountain near Medellin on November 18, **1990** and crashes; there are no survivors. It is replaced with a C-212-300. Services are maintained without change in **1991–1992**.

In **1993**, CEO/General Manager Brig. Gen. Alfredo Garcia Rojas oversees a workforce of 300 and a fleet increased by the addition of 1 Cessna 208 Caravan I and 3 Pilatus Turbo-Porters. Flights continue to be made from Bogota and Medellin to Arauca, Ararauca, Bahia Solano, Bucaramanga, Cali, Corozal, Cucuta, El Yopal, Florencia, Guacamayas,

Jurado, La Pedrera, Leticia, Mitu, Neiva, Puerto Carreno, Puerto Inirida, Puerto Asis, Quibdo, San Vicente, Saravena, Tame, Taraira, and Villavicencio.

Operations continue apace in **1994** with a fleet that includes 4 CASA C-212-200s, 3 C-212-300s, 1 each BAe (HS) 748-2A and 748-2BF, and 1 F.28-3000C.

While en route from Villavicencio on March 19, a C-212-200 with 4 crew and 25 passengers suffers an engine failure and must make a forced landing near the town of La Macarena. Although the aircraft is damaged beyond repair, there are no fatalities.

Having abandoned two previous bad weather approaches into La Macarena on September 9, **1995**, a CASA C-212-200 Aviocar with 4 crew and 18 passengers attempts a third. This time the Spanish-made turboprop crashes into a hill short of the runway, killing all aboard save one.

Operations continue apace without incident in **1996**.

During the first quarter of **1997**, orders are placed for three Fairchild Dornier 328-120s. After examiners from the U.S. FAA inspect the country's civil aviation establishment with regards to its safety in the fall, the agency is viewed in local quarters as having criticized its Colombian counterpart AeroCivil by pointing out that it does not control SAETA (the Air Force does).

The Colombian Airline Association ATAC further suggests that the U.S. is overstepping its boundaries by requiring that all of its members be Category 1 recertified before any will be allowed to fly to America.

All of the Dornier 328-110s have arrived by February **1998**. At this point, three more 328-100s are requested.

Flights continue without incident in **1999**. A total of 32 workers are employed at the beginning of **2000**. The company continues to fly a B-727-2B.

SATGA (SOCIETE AERIENNE DE TRANSPORTS GUAYANE-ANTILLES). See GAT (GUYANE AIR TRANSPORT, S.A.)

SATURN AIRWAYS: United States (1948–1976). This supplemental is formed as **All-American Airways** at Miami in **1948** as a "Large Irregular" carrier to offer charter and tour flights to various North American destinations. Cargo and tour passenger flights become a specialty, especially on behalf of the U.S. military.

On February 24, **1964**, the company, now flying eight Douglas DC-6A/Bs and DC-7Cs, receives CAB authority to operate a transatlantic route for the next five years. On May 1, the DOD announces that its fiscal year 1966 Logair trooping awards will only be made to carriers deriving 30% or more of their income from commercial services.

Unable to qualify under these provisions, Howard Korth's **AAXICO Airlines**, an exclusive military contractor with CAB approval, purchases Saturn and submerges itself, effective November 1, **1965**.

The move is made in order to take advantage of the certified commercial status soon expected. AAXICO Chairman Korth and his management team assume control as the emerging airline retains the Saturn name and thus obtains the government contract.

Meanwhile, in April **1966**, Saturn becomes one of 10 irregulars certified as supplemental carriers by the CAB. A C-46, leased to **Zantop International Airlines**, is lost in a Columbia City, Indiana, midair collision with a lightplane on June 16 (three dead). Caribbean route authority is obtained on September 30. The company begins to sell off its huge stock of 23 C-46s during the fall.

Revenues for the year total \$26.63 million and with expenses 2 million less, a net profit of \$2.50 million is earned.

Two propeller airliners are lost within a week during the first month of **1967**.

A DC-6 with four crew is destroyed as the result of a bad landing at Oakland during a training flight on January 24; there are no fatalities. While on final approach to San Antonio on January 31, a DC-6A with three crew comes in too low, flies through a line of trees, and impacts a cliff; there are no survivors.

Early in the year, the carrier becomes a public corporation. The funds obtained from reformation allow purchase of two DC-8-61CFs, the first of which is introduced late in the year. In addition to the Jet Traders, the fleet also includes 10 DC-7CFs and 3 DC-6As. The employee population numbers 483.

Saturn carries 175,808 charter passengers during the year and flies 104,471,174 freight ton-miles. Revenues fall to \$21,990,031. Profits are also down: \$1,585,031 (operating) and \$2,163,395 (net).

The second DC-8-61CF enters service in January 1968. It joins the first in intercontinental charters and upon MAC contracts. The number of DC-6As available is increased by seven and a DC-8-50F is purchased in November.

Saturn enjoys a very successful commercial charter season during this first year of jet operations; bookings exceed 250,000. Revenues bounce upward by 49.2% to \$32,808,586. Profits are also up significantly, both operating (\$4,940,062) and net (\$3,671,752).

Greatly expanding its commercial charter work, Saturn, on April 1, 1969, leases a DC-8-63CF from **The Flying Tiger Line** for 18 months. The number of transatlantic flights during the summer grows to 400. A second DC-8-50F freighter joins the fleet, which now also includes 22 DC-7Cs. When the company's aircraft fails to appear in Amsterdam, 250 U.S. tourists are stranded for 2 days and are finally able to return to New York on September 5.

Revenues are \$27,049,225. Expenses jump to a point where an operating loss of \$539,101 is suffered. Still, a net profit of \$43,764 can be reported.

Heavy fog causes a DC-7C freighter with three crew to crash while on final approach to McGuire AFB on October 11, 1970; there are no survivors.

Revenues for the year decline to \$23,727,539, but costs are brought under control and an \$845,892 operating profit is earned. The net profit jumps to \$556,066.

In 1971, the country's fifth largest supplemental carrier operates 679 million revenue passenger miles and 89.56 million freight ton-miles.

Significant traffic and fiscal growth occurs in 1972 as the carrier begins to shake off the effects of recession, inflation, and the end of the Southeast Asian airlift. While seeking broader operating authority from the CAB, Saturn now introduces the first units in a fleet of 12 Lockheed L-100-30 Hercules as the workhorse of its cargo operations in Europe and throughout the Caribbean, still often on behalf of the military.

In addition, the company acquires several Boeing 707-320Cs for use on its transatlantic charters to such European cities as Frankfurt.

When **Universal Airlines** goes bankrupt in May, the USAF MAC taps Saturn to take over the cargo services that Universal had been providing on its behalf. Saturn is able to lease the nine Lockheed L-188Fs operated by Universal and within a month has resumed the MAC flights.

On May 20, company pilots stage a brief two-day strike that is settled by an agreement between their ALPA local chapter leadership and company management.

By the end of the year, the fleet totals 24 aircraft and the workforce stands at 811.

A total of 297,000 charter passengers are flown and freight ton-miles flown grow by a huge 70.5% to 152.71 million. Revenues advance to \$47.511 million and expenses are held down to \$43.09 million. The operating profit is up 56% to a company record \$4.41 million while net income skyrockets an unbelievable 237% to \$1.79 million.

Eighty-two new employees are hired in 1973. Thirteen additional aircraft are acquired, including the nine Lockheed L-188Fs that are purchased, together with two B-707-320Cs and two L-100-30s. The added capacity helps Howard Korth's 28-year-old supplemental as it continues to expand its passenger and cargo charter business, the latter undertaken primarily for the military.

Customer bookings climb 9.1% to 324,000 while freight traffic grows 26.5%. The total of \$60.25 million in revenues is a record and expenses are \$54.33 million. The operating profit is \$5.92 million and the \$2.54-million net gain is the highest net profit in company history to date.

Airline employment in 1974 is 783.

Fatigue cracks cause the in-flight separation of the outboard section of the left wing, including the No. 1 engine, from Flight 14, an L-100-30 with four crew, over Springfield, Illinois, on May 23; there are no survivors from the crash that follows.

Merger negotiations are undertaken with **Trans-International Airlines**, owned by Transamerica Corporation.

On August 26, flight engineers, attendants, and navigators, all members of the Teamsters, go out on strike; two days later, Saturn goes to court and wins an order that forces all of the workers to return to their duties.

At year's end, officials of the two companies file an agreement with the CAB seeking the government's permission to amalgamate.

Meanwhile, enplanements for the year drop 37.8% to 201,422, only 16% of which are military personnel. A total of 327.38 million freight-ton miles are flown, an increase of 16.1%; 75% of this cargo flown on behalf of MAC. On revenues of \$71.91 million, the net profit doubles, up to \$4.9 million.

The workforce is reduced to 611 in 1975. The Oakland-based supplemental celebrates its thirtieth anniversary. Progress continues toward a merger with TIA. Meanwhile, the addition of a 12th L-100-30 allows the carrier to claim the distinction of being the world's largest operator of the commercial Hercules freighter.

Cargo is up as FTKs rise 5.5% to 343 million. Although expenses reach \$52.55 million, they are submerged by the company's total income of \$61.71 million. The operating profit is \$9.16 million while the net gain is up 9% to \$5.31 million.

The CAB approves the TIA amalgamation in the spring of 1976. On November 30, the purchase is officially completed and the company is merged into **Trans-International Airlines (TIA)**. Prior to the amalgamation, Saturn transports 304.27 million FTKs of freight in 11 months, a decline of 11.7%.

SAUDI ARABIAN AIRLINES: P.O. Box 620, Jeddah, 21231, Saudi Arabia; Phone 966 (2) 686-0000; Fax 966 (2) 686-4552; <http://ee.wpi.edu/~zakharia/saudi-communications.html>; <http://www.saudi-arabian-airlines.com>; Code SV; Year Founded 1996. On July 16, 1996, a new corporate identity is unveiled when this carrier replaces its Saudia trade name, returning to its original Saudi Arabian Airlines moniker. HRH Prince Sultan Bin Abdul Azis remains chairman with HE Dr. Khaled A. Ben-Bakr as director general.

During late summer, Shehnaz Sani (Mudbhatkal), a onetime secretary in the carrier's New Delhi station, wins, after 11 years, the first sexual harassment case against her employer and the first case of its kind in India. The airline appeals the verdict against its station manager to the Indian Supreme Court.

The new name will be applied to all aircraft, signs, ticket counters, uniforms, ticket jackets, publications, and ground equipment. The previous white and green markings are replaced by the new colors of royal blue and turquoise, symbolizing the coral reefs and waters of the Red Sea, beige for sand dunes, and gold. It will take several years to repaint everything; all aircraft in the fleet will, however, eventually have royal blue tails with a gold crescents on either side enclosing the national emblem.

During the month, the company records its highest monthly total of boardings ever, 1.3 million. Flights are resumed flights to Beirut. Scheduled return flights begin on October 28 between Jeddah and Johannesburg.

In the third-deadliest air disaster and the worst midair collision in aviation history, Flight 1907, a **Kazair (Kazakhstan National Airways)** Ilyushin Il-76TD with 10 crew and 27 passengers, is descending to New Delhi toward sunset on November 12 after a charter from Chimgent. The Il-76TD is below its assigned altitude of 14,000 ft. when Flight 763, a Saudi B-747-168B with 23 crew and 289 passengers that has just taken off for Dhahran and Jeddah, is determined to be 8 mi. away, also at 14,000 ft. The Ilyushin descends another 310 ft., but by this time it is too late. Both aircraft collide and burst into flames, falling onto an arid farming area 3 mi. from the village of Charkhi Dadri in Haryana State,

west of New Delhi; wreckage is spread over a six-mile-wide area around. Controversy will surround the cause of the disaster.

The company introduces its homepage on the Internet on December 4, while Dhahran to Cairo service begins on December 14. In need of additional capacity, the company leases two TriStar Is and a B-747-1D1 in December from **Air Atlanta Icelandic, H.F.**

Customer bookings total 11,706,000 this year and 225,465 freight FTKs are operated.

Airline employment stands at 28,843 in **1997** and the entirely owned fleet now includes 11 Airbus Industrie A300B4s-621s, 17 B-737-268As, 9 B-747-368s, 2 B-737-268ACs, 7 B-747-168Bs, 1 B-747-268F, 1 B-747SP-68, 17 Lockheed L-1011-200 TriStars, 10 Grumman G-1159A/C Gulfstreams, 2 Cessna 550 Citation IIs, 2 Dassault Falcon 900s, and 1 de Havilland Canada DHC-6-300.

Orders are outstanding for 5 B-747-468s, 23 B-777-268IGWs, 29 Boeing McDonnell Douglas MD-90-30s, and 4 BMD-11Fs. The requests, valued at \$7.5 billion, are held up by difficulties in the arrangement of financing.

In January, a major contract is signed with **Air Atlanta Icelandic, H.F.** Under its terms, the Icelandic operator wet-leases four B-747s painted in Saudi colors to the Jeddah-based international operator and stations 300 personnel at the Saudi carrier's base to provide support.

Twice-weekly roundtrip flights commence on January 10 between Jeddah and Johannesburg.

A block-space and code-sharing agreement is signed with **United Airlines** on January 23 covering flights between Jeddah and Los Angeles. Under its terms, both carriers commit to a set number of seats on each other's flights, agree to link their frequent flyer programs, offer a single check-in process, and cooperate on reservations, ground handling, and technical issues.

Flights to Lebanon suspended 15 years earlier are resumed on February 1 with 2 weekly roundtrips between Riyadh and Beirut and 2 to Beirut from Jeddah.

The pact with **United Airlines** takes effect on February 18. Saudi Arabian now offers two flights a week between Jeddah and New York. These will now connect with UAL's transcontinental flights to and from Los Angeles.

Two B-747-100s are subleased from **Tower Air** to help handle this year's Hadj flights to Mecca.

On May 4, investigators examining the cause of the previous November's crash are able to state that the Kazair freighter had descended 1,000 ft. below the 15,000-ft. altitude assigned to it by Indian air traffic controllers; the deviation put the aircraft directly into the path of the ascending Jumbojet.

On June 2, a B-747-368 with 327 passengers en route to Chennai, capital of Tamil Nadu, from Riyadh, for reasons not immediately known, mistakenly lands at a nearby air force station airfield instead of the international airport. An airport official later reports that the pilot apparently mistook the air force airfield for the runway at the international terminal. Customs and immigration authorities are sent to the air force airfield to escort the passengers to the airport for customs clearance.

Two TriStar Is are subleased from **Air Atlanta Icelandic, H.F.** at month's end and are employed to inaugurate scheduled return service from Jeddah to India and Pakistan.

The airline becomes official carrier for the Tourism Festival, held in Masher Village in Hail. The festival will become an annual event. In addition, tourists begin to visit the Raghdan Forest in Baha and the Al-Qamas Forest at Baljurshi, both of which have installed cable cars.

It is announced on August 24 that Iran and Saudi Arabia will reestablish airline links, severed in 1979. The B-747 wet-lease agreement with **Air Atlanta Icelandic, H.F.** is concluded at month's end. Most of the contract support workers return to Iceland.

It will be reported on the company's Web site the following spring that for the month of August a record 1,322,249 passengers are flown.

A B-737-268 with 75 passengers runs off the runway following an aborted takeoff from Najran on September 7.

Plans are made in the fall to phase out the TriStar fleet during the next year. It requires 5 months to arrange the \$7.5 billion in financing; the airline is forced to turn to an international banking syndicate for \$4.3 billion of these funds, a loan guaranteed by the Saudi government.

After several months delay due to financing difficulties, the first MD-11F arrives on December 22. Two days later, on December 24, the company receives its first new B-747-468 as part of a one-ceremony delivery of four aircraft. The other three include a B-777-268IGW, an MD-11F, and an MD-90-30.

Enplanements for the year total 11,733,288. It is also noted that, for the 1,417th Hadj season, over 1.2 million pilgrims have been carried on the airline's domestic and international flights. Financial data is unavailable.

Airline employment stands at 24,842 in **1998** and the fleet, 76.7% of which is Stage III certified, includes 86 airplanes at the beginning of the year: 19 B-737s, 2 DC-8s, 28 B-747s, 4 B-777s, 11 A300s, 17 L-1011s, and 5 MD-11s.

En route from Jeddah to London on January 2, a B-747-368 with 14 crew and 348 passengers suffers an electrical malfunction in its cargo hold that starts a fire. The Jumbojet's emergency systems extinguish the fire; however, the flight is diverted to Cairo, where a safe emergency landing is made. No injuries are reported. A number of passengers transfer to an **EgyptAir, S.A.E.** service to the U.K., while others prefer to remain behind for a replacement aircraft dispatched from Saudi Arabia.

Direct twice-weekly B-777-268IGW roundtrips commence on June 18 between Dahran and London (LHR).

Saudi Arabian continues to lose large sums of money; at midyear it flies to 25 domestic airports and 50 international destinations. As the result of weak oil prices, the government slashes funding in its new budget, setting aside 9.2 billion riyals for the airline.

In an effort to regain some lost income, the company heavily promotes domestic tourism, particularly in the nation's Asir region.

On August 18, a steep rise in first- and business-class airfares is announced for domestic routes. First-class ticket prices jump 50%, while business-class fares grow by 35%; economy class prices are not changed.

MD-90-30 flights from Riyadh to London (LHR) on behalf of the Saudi Royal Flight begin on September 1.

As in the past, Saudi Arabian is the official airline for the Madinah Festival during the month of *Rajab* (October 21–November 19).

The Times of India reports in its November 29 issue that the verdict of a lower case in the sexual harassment case of an ex-Saudi secretary Shehnaz Sani (Mudbhatkal) has been upheld. On top of that, the high court orders the airline to reinstate her to her position and pay her 13 years' back wages.

Just after landing at Nairobi on the evening of December 7, a B-747-368 swerves off the runway and becomes stuck in soft ground with its tail blocking the runway. The airport must be closed to all air traffic for the next 12 hours, with flights rerouted to Mombasa or to airports in Tanzania and Uganda.

A contract is signed with **Royal Air Maroc** on December 21 under which Saudi Arabian will transport, on behalf of RAM, up to 15,000 pilgrims to the Holy Land on direct flights between Casablanca and Jeddah during the next Hadj season in the spring of 1999.

Passenger boardings for the year inch up 0.7% to 11,816,000, while cargo traffic rises 0.8% to 933.99 million FTKs.

Pursuant to an agreement between the Finance Ministry and the airline signed several weeks earlier, the Riyadh Bank, on February 7, **1999**, clears payments linked to a 3.5-billion riyals (\$933-million) loan to Saudi Arabian. The payment resolves all debts owed by the airline to the bank.

Beginning in mid-month and continuing through April, two MD-11s are wet-leased from **World Airways** and are employed to operate Hadj flights between Kuala Lumpur, Malaysia, and Medina, Saudi Arabia.

Twenty years after flights were curtailed, Saudi Arabian announces on February 24 that it will resume service to the Iranian cities of Tehran,

Shiraz, Isfahan, and Mashad. No scheduling information is provided, pending the signing of a new bilateral air agreement.

The carrier, on March 14, places 17 L-1011-200s and 8 B-737-268As up for sale. Two of the three TriStars already removed from sale will be based in the U.S. for inspection by possible purchasers. On March 17, three DC-10-15s are chartered from a Belgian lessor for Hadj flights through May.

For some unknown reason, the two MD-11s employed by **World Airways** on Hadj services for Saudi Arabian have been given the colors and titles of the old Saudia, almost three years after that carrier changed its corporate identity.

A bilateral commercial aviation agreement is signed by the government with Iran on May 2. The new pact permits an increase in the number of flights between the two countries and specifically grants Saudi Arabian the right to transport Iranian pilgrims during the Hadj season.

Officials from Saudi Arabian meet with their counterparts from **Emirates Airlines**, **Gulf Air Company G.S.C.**, **Kuwait Airways Corporation**, **Oman Airways**, and **Qatar Airways** at Kuwait City on May 15 to plan a united body to compete against the growing number of major world airline alliances. The CEOs, who also agree to meet quarterly, discuss ways to coordinate and develop additional revenues, cut expenses, and invest jointly in support services.

On June 1, year-round service is launched to Alexandria, Athens, and Milan; seasonal flights to Malaga and Nice also begin.

During October and November, 16 L-1011s and 8 B-737-268As are sold to Custom Air Support at Miami, Florida; Custom will convert the TriStars into freighters, while the "Baby Boeings" will be removed from service sometime in the future. For now, they, together with seven others in the fleet, will soldier on.

A large-scale education program is launched by the company's training division for personnel working in reservations, cargo, passenger services, and refuse disposal services. This initiative is in addition to the unit's normal training function. The training centers at Riyadh, Jeddah, Dhahran, Karachi, Cairo, and London establish 425 courses for 3,412 employees, amounting to 81,900 hours of tutoring.

The *Jakarta Post* reports on December 10 that the Indonesian Ministry of Religious Affairs has signed an agreement with Saudi Arabian to transport 63,861 Hadj pilgrims from Jakarta and Surabaya to Saudi Arabia, beginning in February, at a price of \$1,200 per person.

Scheduled passenger boardings for the year move up 4.3% to 12,328,471 while another 421,171 are customers are flown on charters, bringing the total to 12,749,642 in 115,347 departures. Freight traffic rises 8.2% to 999.98 million FTKs.

At the beginning of 2000, the B-747 fleet now includes at least one of nearly every stretch currently available, including 7 Dash-168Bs, 1 Dash-268F, 10 Dash-368s, and 4 Dash-468s, plus 1 B-474SP-68. Two B-747SP-68s, 1 B-747-3G1, and 2 MD-11s are used as Saudi VIP aircraft. Also operated are 19 B-777-268ERs and 4 MD-11Fs.

B-777-268ERs are introduced onto the Jeddah to Nairobi twice-weekly route on February 22, but due to poor load factors, one of the two return flights is suspended on February 24. Meanwhile, on February 23, the *Al-Sharq Al-Awsat* newspaper reports that an anticipated 9,000 pilgrims will fly from London (LHR) alone this year.

On February 28, an A300B4-620 is leased to **TunisAir, S. A.**, which will employ the aircraft until its A320-211 is received on March 30. Also during February, Saudi Arabian accepts delivery of the last 3 of 116 MD-90-30s constructed.

On approach to Cairo on its July 9 service from Jeddah, Flight 303, a B-777-268ER, is forced to make an emergency landing after a flight attendant finds a note indicating that there is a bomb aboard. Everyone is quickly evacuated once the plane is on the ground, but no explosives are found. The 20th B-777-268ER is delivered on September 30.

While en route from Jeddah to London (LHR) on October 14, Flight 115, a B-777-268ER with 17 crew and 90 passengers, including members of the Saudi royal family, is taken over in Egyptian airspace by two male Saudis (airport security guards), Ayeish Ali al-Khalidi and Faisal

Naji al-Bluey, who claim to have TNT. After aborting a landing at Damascus at the last minute, the aircraft is forced to fly on to Baghdad. Following its landing, the hostages are released and the hijackers, protesting human rights abuses in their nation, are taken in hand by Iraqi police.

Following a dinner for the passengers and crew provided courtesy of the Iraqis, the Boeing is allowed to continue on to the U.K., arriving at Heathrow Airport Terminal 3, where many worried relatives have gathered. Four of the passengers have chosen to fly from Baghdad to Damascus instead of England.

The last of 29 MD-90-30s is delivered on October 23; Saudi Arabian is now the world's largest operator of the type. On October 31, the company's technical services division is awarded ISO 9002 accreditation. The honor is received during a two-day seminar hosted by this unit at Jeddah, in cooperation with the U.S. Federal Aviation Administration.

Suspended sometime earlier, twice-weekly return flights between Jeddah and Kano, Nigeria, are resumed on November 1. In a November 2 ceremony at the Dorchester Hotel in London, the airline receives the 2000 Award for Advertising Excellence in the airline category presented by *Newsweek International* magazine. The 21st B-777-268ER is delivered on November 18; 2 more of this type are to be accepted in 2001.

SH&E is chosen as the lead airline adviser for the privatization of the airline and also in November, the French bank BNP-Paribas is chosen to advise the Saudi government on financial aspects of the process. Other participants at this stage include the Saudi investment banking group GIC-GIB and accounting firm KPMG.

When Nawaz Sharif, the ailing, former prime minister, is pardoned by Pakistan's military government from the life prison term imposed upon him for hijacking and terrorism, he is required to go into exile. A Saudi B-777-268ER transports Sharif and members of his family from an air base near Islamabad to Jeddah on December 9. Sharif receives an official welcome upon his arrival, a move considered something of a slap at his former captors.

Customer bookings during these 12 months inch up 1.9% to 12.56 million, while cargo traffic dips 0.4% to 999.54 million FTKs.

SAUDIA (SAUDI ARABIAN AIRLINES): Saudi Arabia (1946–1996). Owned by King Ibn Saud, **Saudi Arabian Airlines** is formed in May 1946 as an operating agency of the Ministry of Defence. The airline's first airport and operating base is established at Kandara, near what is today the downtown area of Jeddah. The Douglas DC-3 promised to the ruler by President Franklin D. Roosevelt in February 1945 is flown to Jeddah by a **Transcontinental and Western Air Lines (TWA)** crew in June. It is later joined by two others which, together with crews and technical support, are provided by a U.S. Army Air Forces mission and by TWA.

The Douglas transports undertake Hadj charters from Lydda and Dubai to Jeddah and permission is sought from the British government for the inauguration of charter flights to London.

Domestic DC-3 operations are inaugurated on March 14, 1947; passengers and cargo are transported between Riyadh, Jeddah, and Dhahran. At the beginning of 1948, regional routes are opened to Cairo, Damascus, and Beirut. Only domestic and regional flights will be made between now and the end of the 1960s.

Fleet changes and route additions are implemented as the decade ends and the 1950s begin. The first of five British-built Bristol Mk. 21E Wayfarers arrive in 1949, allowing the start of dedicated cargo flights. Five four-engine DC-4s are purchased in 1952. Their arrival at the start of 1953 allows the inauguration of scheduled services to Karachi, Asmara, Amman, Istanbul, and Kuwait City.

Ten Convair CV-340s, the first pressurized aircraft to join the fleet, are purchased in 1954 and are delivered in 1955, the year service is launched to Port Sudan.

By the start of the 10th anniversary year in 1956, the airline has brought all outlying communities of the Kingdom within a few hours of each other, both to and from Riyadh and Jeddah. The first maintenance shops are opened in Jeddah during the year.

There are a number of accidents during the late **1950s**.

A DC-3 is lost at Najran, SA, on February 16, 1956; there are no fatalities. A Bristol 170 Mk. 21E is lost at Taraif, Saudi Arabia, on October 8, 1957; there are no fatalities.

Under circumstances unknown (most likely a bad landing), a Bristol 170 Mk. 21E is destroyed in an accident at Guriat Airstrip, Saudi Arabia, on March 25, 1958.

With 10 CV-340s in service, Saudia is able to inaugurate a daily air shuttle service between Jeddah and Riyadh in April **1959**. About this time, an order is placed for a pair of Boeing 720-068Bs (B-720Bs). Upon their delivery, Saudia will become the first Mideast airline to operate commercial jet airliners. A chartered C-54A with 5 crew and 67 passengers fails its takeoff from Jeddah on September 25 and makes a forced landing. Although the aircraft must be written off, there are no fatalities.

A chartered C-54A with 5 crew and 67 passengers fails its takeoff from Jeddah on September 25, **1959**, and makes a forced landing; although the aircraft must be written off, there are no fatalities.

Two, later three, DC-6s join the fleet in **1960**. On June 26, Mufti rule that Saudi stewardesses must be chaperoned on flights by their fathers, sons, or brothers; the airline hires no native women, preferring to continue using Lebanese or UAR hostesses who do not require looking after.

The carrier's first jetliners, two Boeing 720Bs, are delivered on December 20, **1961**. Originally built for **Ethiopian Airlines, S.C.**, but not taken up, the jets are held in the U.S. while **Trans World Airlines (TWA)** provides pilot training at Kansas City under contract. Revenue B-720B international services to neighboring Middle Eastern cities are initiated on March 15, **1962**. Destinations visited by the new aircraft include Amman, Beirut, and Cairo.

The airline is incorporated on February 19, **1963** and under a decree from King Faisal, it becomes an autonomous government entity chaired by the Minister of Defense and Aviation and run by a board of directors. B-720B flights are started to Sharjah and Tehran.

An in-house pilot training program is launched in **1964**; among its first graduates is Capt. Ahmed Matter, the future director general.

While on a training flight, a DC-3 with two crew crashes 60 mi. S of Jeddah on June 13; both flyers are killed.

The fleet by **1965** comprises 2 Boeing B-720Bs, 10 CV-340s, 11 DC-3s, and 2 DC-6Bs. Orders are placed for three Douglas DC-9-15s. B-720B service is inaugurated to Bombay and Istanbul as rapid expansion of domestic and international operations continue.

On June 24, a DC-3 with 16 aboard crashes near Khalif Nsier; there are no survivors. On August 25, the company becomes a founding member of the Arab Air Carriers Organization (AACO).

On the year, a total of 317,184 passengers are flown.

Routes are extended to London, Frankfurt, and Geneva in July **1966** as the three DC-9-15s enter service. One more DC-6B freighter is also acquired. Orders are placed for two B-707-368Cs.

The workforce in **1967** totals 5,010. New services are inaugurated in February from Jeddah via Beirut to the Mideast cities of Tunis, Rabat, and Tripoli and, Again, via Beirut, to the European trade centers of Frankfurt, London, and Geneva. The carrier joins the International Air Transport Association (IATA) on April 17.

A DC-3 is lost at Jeddah on June 11 under unknown circumstances. En route from Nejran to Jeddah on June 24, a C-47 with 3 crew and 14 passengers crashes near Khalif Nsier, Saudi Arabia (16 dead).

The Jeddah-based carrier now operates 2 B-720Bs, 3 DC-9-15s, 3 DC-6A/Bs, 9 Convair CV-340s, and 8 DC-3s. Enplanements for the year reach 412,987.

The two B-707-368Cs ordered in 1966 are delivered in January **1968**. The London route becomes a twice-weekly nonstop service as the fleet is further enlarged by the addition of two B-727-68s. Four CV-340s and three DC-3s are withdrawn.

After aborting its July 8 landing at Dhahran Airport for a third time in a dust storm and going around, the final company-operated CV-340 with 3 crew and 8 passengers crashes 5 km. S of the runway; there are no survivors.

Flights from Jeddah to Algiers begin in **1969**. En route from Riyadh to Beirut on July 12, **1970**, a B-707-368C with 140 aboard is hijacked to Damascus; the plane is later allowed to return to Jeddah.

The name Saudia is first employed in **1971** and a new livery is introduced. Passenger service to Rome is launched, along with the first non-stop, all-cargo frequencies from Jeddah to Frankfurt. A data processing center is opened at Jeddah and plans are made to install and turn on new IBM machines.

En route home to Riyadh from Jordan on November 10, a DC-3 is hijacked by a man with a gun and forced to Damascus; again the plane is released quickly. Enplanements reach 667,000.

In **1972**, the employee population stands at 4,265.

Having developed engine trouble just after takeoff from Jeddah on January 7, a CV-340 with 3 crew and 12 passengers returns to its point of origin and runs off the runway after a safe emergency landing; there are no fatalities.

The first of five B-727-268s to be received in the year is delivered on March 14. Three DC-3s are retired. Another DC-3 crashes at Tabouk, Saudi Arabia, on July 10; no other details on the accident are available.

Two Piper Apaches are purchased as the nucleus for a domestic air taxi and Royal Family Special Flight division.

The company's route network now includes 49 destinations on 3 continents. Domestic service is now flown between 20 communities.

Passenger boardings for the year jump 24.2% to 880,000.

Additional domestic and regional services are begun in **1973** as the B-727-268s replace the three DC-9-15s that are sold along with the last remaining CV-340s.

Special flights for teachers are operated and customer bookings accelerate to 924,000. A net profit of \$3.3 million is earned.

Burgeoning oil revenues in **1974** lead to plans for rapid expansion. Orders are placed for two wide-bodied Lockheed L-1011-200 TriStars. Flights begin to Paris and Muscat, along with direct flights from Medina to Karachi.

Passenger boardings increase 27.9% to pass the million mark for the first time (1,281,000). The net profit is doubled to \$6.6 million.

The carrier's first two L-1011-200s arrive in June and July **1975**, respectively, as do two B-707-368Cs, two B-737-268s, two Cessna 421Bs, and two Beech King Airs, the last four for local charter work. Long-haul TriStar flights commence on August 15.

An IBM 370-135 computerized reservations system is installed, and service is launched to Abu Dhabi. A management contract is signed with **Hughes Airwest**.

The work force grows to 6,710. Freight service soars 32.3% and passenger traffic swells 46.08% to 1,682,929.

The employee population is increased in **1976** to 9,396.

A DC-10-30CF with 12 crew and 361 passengers makes a heavy landing at Ankara on January 2 in fog and veers off the runway; the aircraft is damaged beyond repair, but no serious injuries are reported.

Additional routes and frequencies are allowed by the acquisition of 13 additional aircraft: 3 more L-1011-200s, 1 B-707-368C, 7 B-737-268s, and 2 Grumman Gulfstream IIs. Under terms of the management contract signed with **Hughes Airwest**, 33 employees of the American carrier arrive during the spring, along with 3 leased Fokker Fairchild F.27Js. Beginning of June 1, the aircraft are employed to launch the Arabian Express, a nonreservation roundtrip shuttle service between Jeddah and Riyadh. This service is extended to Dhahran on August 1. During the fall, a Special Flight Services (SFS) division is established to provide VIP and other government services.

Passenger boardings skyrocket 94.2% to 3,267,991.

To help handle the traffic demand, the carrier accepts three more L-1011-200s in **1977**, plus a B-707-368B, a B-737-268, a DC-8-62CF, and two more Gulfstreams. Still in need of capacity, two B-747-2B4Bs are leased from **Middle East Airlines, S.A.L. (2)** on June 1 and are placed into service over the Riyadh-London route. In addition, the carrier offers a contract for the transport of Hadj pilgrims to **Transavia Holland, N.V.** DC-8-62CF cargo services are undertaken to six European nations.

Enplanements are up to 4,420,000.

One more owned B-737-268 is added to the fleet in **1978**, along with another chartered MEA B-747-2B4BC and routes are opened to Athens, Stockholm, and Kano. A new automated reservations system is unveiled; the Collins Automated Call Distribution System (ACD) turned on at Jeddah allows the carrier to handle incoming telephone reservations calls in a highly organized fashion.

The carrier now takes a 49% interest in **Yemenia (Yemen Airways Company)**. Freight traffic rises 16.3% and passenger bookings accelerate 32.4% to 6,538,909.

In association with **Pan American World Airways (1)**, B-747SP-21 service is inaugurated to New York and Houston in **1979**, the former a nonstop route begun in February.

Two more L-1011-200s and two B-737-268s are accepted and a B-747-230B is leased for a year from **Korean Airlines/Korean Air (KAL)** on June 22. A flight training center is opened and both B720Bs are withdrawn.

A B-797-373C is destroyed as the result of a heavy landing at Jeddah on November 30; there are no injuries or fatalities.

Sheikh Capt. Almed Mattar succeeds Sheik Kamil Sindi as director general. On December 19, a B-747SP-68 is ordered from Boeing.

Cargo surges upward 26.5% and passenger boardings jump 21.8% to 7,964,347.

Airline employment is increased by 17.3% in **1980** to 18,775. New service is introduced to Nairobi, Dhaka, Bangkok, and Mogadishu. Two B-747-168Bs are received (the first on April 28), allowing the graduated return of the two leased from **Middle East Airlines, S.A.L. (2)**. Two Fokker F.28-3000s enter service, replacing the Fokker Fairchild F-27Js.

Flight 163, an L-1011 TriStar 200 with 14 crew and 287 passengers en route from Karachi, catches fire in an aft cargo bin shortly after take-off from Riyadh Airport for Jeddah on August 19. After a safe emergency landing back at the point of origin and move from the main runway to an adjacent taxiway, all those aboard perish because the crew and panicking passengers, overcome by smoke, are unable to open the Lockheed's doors. Crash, fire and rescue personnel arriving on the scene are, almost an half hour after the plane's touchdown, able to pry open door 2R, but by now the interior is engulfed in flames and there are no survivors. Of the seven TriStars lost to fatal accidents over the years, this incident incurs the highest loss of life.

Orders are placed for 4 additional Jumbojets and 11 Airbus Industrie A300B4-620s; an MEA B-747-2B4B is returned in December.

Cargo is up 10.85% to 212.83 million FTKs and enplanements surge 18.8% to 9,459,000.

The employee population swells again in **1981**, up by 19.6% to 22,446. While being refurbished at Luxembourg's Findel Airport on January 15, the DC-8-62CF catches fire and is destroyed. A second B-747SP-68 is requested in March.

Service is started or frequencies increased with the spring schedule to Madrid, New Delhi, and New York. The carrier becomes sole occupant of the South Terminal of the new King Abdul Aziz International Airport at Jeddah and automated ticketing and reservations are introduced. A new Saudia maintenance complex is also opened at the airport.

The first two of five new B-747-168Bs to be delivered in the year arrive during April, followed by two in May, in addition to a B-747-2B5F freighter chartered from **Korean Airlines/Korean Air (KAL)** and an L-1011-200.

The first B-747SP-68 arrives on June 23 and enters service on July 2 over a nonstop weekly return route from Jeddah to New York. The last new Jumbojet of the year arrives on July 31. In cooperation with **The Flying Tiger Line**, Saudia begins a direct all-cargo service to America on October 13.

Passenger boardings dip 0.8% to 9,383,000, but freight grows 46.5% to 311.8 million FTKs.

During the first six months of **1982**, four more B-747-168Bs are placed into service. The second B-747SP-68 arrives on May 25, permitting service to New York to be increased to four times a week. New

routes are begun with other aircraft to Sharjah, Nice, Manila, and Rawalpindi and a Rolls Royce RB-211 engine overhaul shop is opened at Jeddah.

Enplanements for the year total 10,172,000.

The fleet by **1983** comprises 8 B-747-168Bs, 2 each B-747SP-68s and B-747-2B4Bs, 17 L-1011-200s, 4 DC-8-63CFs, 2 DC-9-30s, 5 B-707-320Cs, 19 B-737-268A/ACs, and 1 Piper Apache.

A B-747-2B5F freighter is leased from **Korean Airlines/Korean Air (KAL)** on February 17 and two B-747-2B4BCs leased from **Middle East Airlines, S.A.L. (2)** are returned. Flight operations commence from the new King Khaled International Airport at Riyadh.

Passenger bookings increase 11% to 11,428,659 and total revenues top \$1.96 billion, allowing an operating profit of \$21.4 million.

The employee population in **1984** is 24,732 and the fleet is enlarged by the acquisition of 4 B-707-368Cs, 1 B-737-268, 3 DC-8-63CFs, and 2 Fokker F.28-3000s. Two Cessna Citation IIs are acquired for a Special Flight Services charter program that will become operational in the new year.

Not flexible enough to meet the carrier's requirements, the **Air Afrique, S.A. B-747-2S4F Jumbojet Lome** is withdrawn on March 1 and leased to **National Airlines (2)**; the same day, the American company subleases the plane to Saudia.

En route to Damascus from Jeddah on April 5, Flight 287, an L-1011, is taken over by a Syrian national being returned for trial, who diverts the Lockheed to Istanbul. While on the ground in Turkey being refueled for a flight to an unknown destination, the pirate is overwhelmed by the flight crew and turned over to police.

On August 1, the *Lome* is sold to **Korean Airlines/Korean Air (KAL)**.

Also during the month -621s as launch customer, Saudia receives the first of 11 ordered A300B4-620s to be delivered during the year. Flights to Colombo begin in September.

Two assailants take over an L-1011-200 with 14 crew and 113 passengers en route from London to Riyadh on November 5, and order it flown to Tehran. En route, they demand better treatment of North Yemenis working in Saudi Arabia and foreign aid from the Kingdom to North Yemen. When the plane arrives at the Iranian capital next day, hostages tackle their two captors, allowing Iranian troops to storm the airplane and take control of the situation. Both will be tried in Iran, with one being freed and the other given a 12-year prison term.

Cargo grows 8.1% this year to 458.81 million FTKs and passenger boardings rise a slight 1.8% to 11,365,844.

The workforce is increased 3% in **1985** to 25,732. Early in the year, Special Flight Services, an on-demand executive and small group charter division is established; revenue flights commence with a pair of Cessna Citation IIs. Basic flight training services within the Kingdom commences at the new Flight Training Academy.

En route from Jeddah to Kuwait on March 17 with 97 aboard, an L-1011-200 is seized over Riyadh by a hijacker, who releases all of his hostages except the captain and first officer after the wide-body lands for fuel at Dhahran. Security police enter the aircraft and after the man tosses a hand grenade at them, is killed. Although the blast causes slight physical damage to the Lockheed, there are no other personnel casualties.

A B-747-271C is leased from **Transamerica Airlines** on April 14 while, also in April, a B-747-2B4BC, again leased from **Middle East Airlines, S.A.L. (2)**, is returned.

A B-747-273C arrives under charter from **Korean Airlines/Korean Air (KAL)** on May 8 and together with the TA machine, replaces all but three of the DC-8-63CFs. The first 2 of an order for 10 B-747-368s are delivered in August. In October, a third B-747-368 arrives and twice-weekly nonstop Jumbojet service is begun from Jeddah to Jakarta via Riyadh and Singapore.

The year's last new B-747-368 is delivered in mid-December. A lone assailant attempts to take over a B-747-368 with 213 passengers en route from Karachi to Riyadh on December 27, but is thwarted by

a security guard. Upon examination, it will be determined that the man is "mentally unbalanced," and he will be sent to a psychiatric facility.

During the year, a secretary at the company's New Delhi station is forced to quit in the face of sexual advances by the station manager. The lady, against the advice of her husband (who will later divorce her), files suit in an Indian court.

Freight traffic falls 3.1% to 482.55 million FTKs and passenger boardings dip 4.9% to 11,035,000. Losses for the year are \$59.8 million (operating) and \$63.7 million (net). As the year closes, Saudia stands 23rd among the world's airlines in terms of passengers carried and 10th in the total number of employees.

The payroll is reduced by 4.4% in 1986 to 24,408 as 2 more B-747-368s join the fleet in the first quarter. Jakarta and Lahore join the route system and the **Transamerican Airlines** Jumbojet freighter is returned in March, followed by the **Korean Airlines/Korean Air (KAL)** machine in May; the latter is succeeded by a B-747-2B5F chartered from the same company. Bombs rip through three company offices in Karachi on May 27. In July and August, two more B-747-368s enter service. Five-times-per-week B-747F/DC-8-63CF cargo service is started to Brussels in September and the 10th B-747-368 is delivered on November 10.

Customer bookings fall again, off by 5.9% to 10,350,000. Cargo gains by a slight 1.6% to 476.84 million FTKs. Revenues ascend 5.8% to \$1.98 billion, costs grow by 4.5% to \$2.13 billion, and the operating loss "improves" to \$39.7 million. The net loss is also an improvement, lessened to \$46.5 million.

Airline employment falls again in 1987, down 5.3% to 23,106. Horizon Class business seating is inaugurated on routes to Cairo, London, and New York.

In an effort to establish closer cooperation between the aviation services of Saudi Arabia, Kuwait, Bahrain, Qatar, Oman, and the UAE, the Gulf Cooperation Council Aviation Services Company, Ltd. is established at Jeddah. At this time, SARS (Saudia Automated Reservations System) is successfully cut over from London to Jeddah and the airline subscribes to the Bahamas System of Baggage Handling and Management.

In November, weekly B-747-368 service is inaugurated from Jeddah and Dahrn to Kuala Lumpur, Malaysia.

Passenger boardings resume their upward swing, climbing 1.7% to 10,530,000. Freight is up 6.8% to 490 million FTKs. An operating loss of \$106.7 million is suffered.

The workforce grows 2.9% in 1988 to 23,773, the largest by far of any Arab airline.

A bomb explodes in the Karachi office on April 10, injuring seven people. On June 15, twice-weekly B-747-368 services are initiated from Washington, D.C. (IAD) to Saudi Arabia via New York; Saudia is the first Mideast carrier to serve the U.S. capital directly.

Customer bookings for the year slip 3.7% to 10,147,159, but cargo stages an 8.2% upturn to 489.9 million FTKs. Revenues drop 2% to \$1.9 billion and the operating loss worsens to \$114.3 million.

Company employment inches up another 1.2% in 1989 to 24,064. New services are inaugurated to Addis Ababa and Larnaca.

En route from Islamabad to Riyadh on November 23, Flight 367, a B-747-368 with 339 aboard is forced to land at Karachi when a telephone extortionist calls, claiming a bomb is aboard. Police do find a bomb and take 10 passengers off for questioning. A loose wire has prevented detonation of the explosive in what will be determined is a suicide pact.

Passenger boardings resume their upward slant, slipping skyward a slight 1.1% to 9,988,110. Freight continues to move happily along, growing 23.4% to 604.73 million FTKs.

The workforce is cut 1.2% in 1990 to 23,787. During the spring, a cooperative agreement is signed with **Royal Jordanian Airlines**; in May and under the terms of the pact, Saudia borrows 12 pilots and four flight engineers from its new partner. Weekly service is initiated in June from New York (JFK) to Brussels, continuing on to Saudi Arabia.

Despite the Gulf crisis, which erupts following Iraq's August invasion of Kuwait and brings a cancellation of the new route to New York via Belgium, the Saudi state carrier is able to increase its customer bookings

by 3.2% on the year to 10,311,467. Cargo slides ahead by 0.8% to 609.61 million FTKs. Expenses exceed income and losses are taken: \$53.6 million (operating) and \$163.5 million (net).

The payroll is cut a slight 0.2% in 1991 to 23,785. Flights to Madras begin on April 1.

In November, the suspended Brussels and New York service is resumed. The UN's Operation Desert Shield and Operation Desert Storm early in the year, together with support of the Allied effort, lead to a traffic downturn. In December, a block-space agreement is signed with the Greek carrier **Olympic Airways, S.A.** Greek aircraft will operate the return service exclusively from Athens to Jeddah and Riyadh.

Passenger boardings slide 7.5% to 9.8 million, while freight declines 6.7% to 530.2 million FTKs. Revenues ascend 2.2% to \$2.09 billion and the operating loss is cut to \$35.6 million. Net loss, however, rises to \$139.8 million.

Another 0.1% nick is taken out of the worker population in 1992 as 46 employees do not return or retire. On a more positive note, new hostess uniforms, designed by Saudi couturier Adrian Akbar, are introduced at the end of March.

A pool agreement begins with **Garuda Indonesia** in April for flights between Jakarta and Riyadh, Jeddah, and Dhahran. A purpose-designed head office building is opened next to Jeddah's King Abdul Aziz International Airport during the spring.

On July 1, **EgyptAir, S.A.E.** inaugurates direct charter flights from Johannesburg to Jeddah on behalf of Saudia and **South African Airways (Pty.), Ltd.**

There is a strong recovery from the Gulf conflict during the year as customer bookings zoom up 18.5% to 11,575,163 and cargo rises 34.3% to 712.21 million FTKs. Revenues advance by 11.9% to \$2.3 billion, but losses, even if smaller, continue: \$23.2 million (operating) and \$39.5 million (net).

The payroll at Chairman Prince Sultan Bin Abdul Aziz and Director General Mattar's airline is increased a slight 0.8% in 1993 to 23,924 and the fleet now includes 3 B-737-33AQC's leased from **Falcon Aviation, A.B.**, 3 B-737-5Q8s, 1 B-737-53A leased to **British Midland Airways, Ltd.**, 4 owned and 3 chartered B-737-59Ds, 2 B-767-283ERs chartered to **Transbrasil, S.A. (Linhas Aereas Transbrasil)**, 14 B-767-383ERs, 9 DC-9-21s, 26 DC-9-41s, 31 MD-81s with 6 leased to **Reno Air**, 16 MD-82s, 2 MD-83s, 16 MD-87s, 22 Fokker 50s, 3 F.28-1000s, and 16 F.28-4000s.

To help the carrier provide airlift for Hadj pilgrims, the company subleases three B-747-1D1s from **Air Atlanta Icelandic, H.F.** in April.

Both passenger and cargo flights continue to 25 domestic destinations and 52 international markets, including a new service to Asmara. Ad hoc joint freighter service begins with **Philippine Airlines (PAL)** in August; Saudi Arabian jetliners are employed exclusively on a route from Riyadh to Manila.

Passenger boardings ascend 6.7% to 12,350,822 while freight rises 3.4% to 736.55 million FTKs. Revenues swell 5.9% to \$2.49 billion, but expenses are up 8.2% to \$2.56 billion. As a result, the operating loss deepens to \$78.8 million while the net loss improves to \$36.3 million.

The employee population dips 0.1% in 1994 to 23,917. After considerable negotiation, President Bill Clinton announces in February that the Saudi Arabian state carrier will make a huge investment in U.S.-made jetliners.

A man with a toy gun hijacks a B-767-283ER with 139 aboard en route from Jeddah to Addis Ababa on March 8 and diverts it to Nairobi, Kenya. Once the passengers are freed, police storm the plane to free the cockpit crew and wound and capture the pirate.

Diplomatic relations with the government of South Africa are renewed in May after the government of President Nelson Mandela comes to power.

Flights to Orlando begin on July 1, while 10 Beech B-58 Barons are acquired in midyear for the company's Jeddah-based Basic Flight Training Academy. The year is finished by planning for the forthcoming fiftieth anniversary celebration.

Customer bookings inch up 0.8% to 12,453,406 while cargo moves ahead by 13.3% to 834.75 million FTKs. Revenue dips 0.5% to \$2.46 billion while expenses slide 4.8%, but still total \$2.5 billion. Consequently, the operating loss is \$45.3 million and the net down turn is up to \$67.7 million.

The workforce is increased a slight 0.3% in 1995 to 24,000.

In January, the carrier raises ticket prices: first class by 20%; business class by 15%; and economy class by 10%.

Speaking on television on June 18, Saudia Chairman Prince Sultan Aziz confirms the February 1994 aircraft order announced by President Clinton. Some \$5.2 billion of the request will be placed with Boeing for 23 777-TBDs and 5 747-468s. Another \$2.5 billion will purchase 4 MD-11Fs and 29 MD-90s.

Economy Class is now upgraded to Guest Class and children's meals are introduced.

Traffic figures are provided for the first six months of the year and show enplanements off by 4.8% to 5,676,000. Freight, on the other hand, rises 17.7% during the same period to 457.87 million FTKs.

Airline employment grows 3.5% in 1996 to 24,843. Scheduled return services are inaugurated on April 2 from Riyadh to Asmara and Addis Ababa. On July 16, a new corporate identity is unveiled and the carrier replaces its Saudia trade name, returning to its original **Saudi Arabian Airlines** moniker.

SAVA (SERVICIOS DE AEROTAXIS E ABASTECIMENTO DE VALE AMAZONICA, LTDA.): **Alvares Soares 95, Campo Belo, São Paulo, CEP 04093-002, Brazil; Phone 58 (192) 455 772; Fax 58 (192) 455 745; Code TD; Year Founded 1968.** Sava is established at Manaus in the spring of 1968 to operate domestic all-cargo charters. Three Curtiss C-46 Commandos are acquired and revenue flights commence in June. Two more C-46s are added in the middle 1970s.

Flights continue over the next quarter century; by 2000, the Commandos have all been replaced with a single Boeing 707-320C.

SAVAG, S.A. (VIACAO AEREA GAUCHA): **Brazil (1946–1966).** SAVAG is formed by Capt. Gustavo Cramer and Dr. Augusto L. Otero at Porto Alegre on November 25, 1946; initial capitalization is 3 million cruzeiros, much of it provided by the canning corporation Industrias Leal Santos.

In January 1947, the new carrier purchases 3 Lockheed Model 18 Lodestars from **Panair do Brazil, S.A.** Services are inaugurated to several destinations in the State of Rio Grande do Sul at the end of the year, including Bage, Pelotas, and Rio Grande.

Additional destinations within the state are added in 1948 and a Douglas DC-3 is acquired from **Cruzeiro do Sul, S.A.** in 1949. In 1950–1951, **Cruzeiro do Sul, S.A.** purchases majority control and encourages SAVAG to expand northward, where it encounters stiff resistance from **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**. Following considerable controversy over territorial rights and capacities, toward the end of 1952 the federal government requires SAVAG to suspend most of its newer routes in favor of those carriers already established upon them.

SAVAG continues to operate Porto Alegre–Curitiba over the next 14 years, primarily as a low key, shadow supplement to Cruzeiro. All airline services are contracted from the parent, including aircraft provision, route planning, reservations, baggage handling, maintenance, etc.

In 1953–1955, the carrier gradually loses its identity and by January 1, 1966 has been totally integrated within **Cruzeiro do Sul, S.A.**

SAVCO (SERVICIOS AEREAS VIRGEN DE COPACABANA, S.A.): **Bolivia (1970–1981).** SAVCO is established at Santa Cruz in 1970 to operate domestic passenger charters with a single Douglas DC-6.

En route from Santa Cruz to Arica with four crew and two passengers on a June 17, 1971 charter, the company's lone DC-6 crashes into Putre Mountain at the 18,000-ft. level; the aircraft is destroyed and there are no survivors.

All-cargo flights commence in November after the addition of the first of six Curtiss C-46A Commandos. These flights continue without incident in 1972–1973.

On February 23, 1974, a chartered C-46A with three crew and four passengers is caught in a severe thunderstorm that causes a failure of the ropes holding its cargo. When the center of gravity aboard the aircraft changes, it plunges into a crash at San Francisco de Moxos, from which there are no survivors.

Service continues throughout the remainder of the decade, but the company fails in 1981.

SAVE (SERVICIO AEREO VARGAS ESPANA, S.A.). *See* **SERVICIO AEREO VARGAS ESPANA, S.A. (SAVE)**

SAVIA AIR COMPANY (SAVIA AVIAKOMPANIYA TOO): **6 Ulitsa Nikolskaya, Moscow, 103012, Russia; Phone 7 (95) 924 0300; Fax 7 (95) 209 3737; Year Founded 1993.** Savia is established at Moscow in 1993 to undertake passenger charters to domestic locations. Evgeni V. Sivertsev is general director and he inaugurates flights with 1 each Antonov An-24 and Yakovlev Yak-40. Flights reportedly continue during the remainder of the decade.

SAYAKHAT AIR COMPANY: **124 Bogenbay Batyra St., Almaty, 480091, Kazakhstan; Phone 7 (3272) 622 628; Fax 7 (3272) 622 870; http://www.sayakhat.com; Code W7; Year Founded 1989.** Sayakhat Air Company is a private concern established at Alma-Ata in 1989. Shareholding in the first private air company established in the country is divided between Vladimir V. Kouropatenko, Nadezdha Stolyarova, and N. Ruznetsov, with the former named president/CEO. In 1991, Sayakhat steps up to take over and provide domestic and regional cargo charters previously provided by the **Aeroflot Soviet Airlines** Kazakhstan directorate

A fleet of 4 Ilyushin Il-76TDs, painted in a new livery with the blue flag, golden sun and eagle, is acquired during the summer of 1993 and revenue services begin, linking the company's base with Istanbul, Frankfurt, and London (STN).

By 1997–1998, the airline employs 204 workers and 6 Il-76TDs on dedicated, long-range cargo charters. During these years, it also acquires an Il-62M that is employed to fly Sunday flights from Almaty to Warsaw and back and Friday services from Almaty to Paphos (Cyprus) and back.

The Il-62M is supplemented with three Tupolev Tu-154Ms at the beginning of 1999. Scheduled passenger destinations now include Almaty, Astana, Istanbul, and Xian.

In the 10 years since its founding, Sayakhat has transported over 100,000 tons of cargo.

A total of 200 workers are employed at the beginning of 2000. The Il-62M is now withdrawn and the fleet of the largest private air freighter in the Republic of Kazakhstan now consists of 4 IL-76TDs and 3 Tu-154Ms.

SAYANY AIRLINES: Russia (1996–2000). This small carrier is established in 1996 to offer scheduled regional passenger services. Little is heard about it during the remainder of the decade, although like many other Russian companies, it is badly affected by the Russian currency crisis that begins in August 1998.

In June 2000, a comprehensive agreement is signed with **Siberia Airlines (Sibir)**. Officially, the larger company becomes general sales agent for Sayany and is empowered to provide aircraft and manage and develop its operations. In fact, the alliance becomes a merger in everything but name. On September 4, Sibir begins to fully submerge the operations of its affiliate, using Sibir aircraft on its licensed routes and collecting all revenues. All tickets on Sayany flights are sold under the Sibir name.

En route in from Moscow on October 4, a Tu-154 suffers the failure of a hydraulic flight control system. The aircraft circles above Irkutsk

for an hour burning off excess fuel before it make a successful emergency landing.

In early November, Sibir reports on Sayany's progress during the first 10 months of the year. In that time, the "partner" has operated 308 flights (1,760 flight hours), which have carried 27,688 passengers. Arrangements are completed by month's end for the complete absorption of Sayany into Sibir before the end of the year.

SBZ CARGO, S.A. See SCIBE AIRLIFT, S.A.

SCADTA (LA SOCIEDAD COLOMBO-ALEMANA DE TRANSPORTS AEREOS, S.A. [COLOMBIAN-GERMAN AIR TRANSPORT COMPANY]). Colombia (1919–1940). Capitalized at 100,000 pesos (\$100,000), with heaviest investment from Giesecking and Company, SCADTA is registered before Notary Public No. 2 at the northwest Colombian capital of Barranquilla on December 5, 1919. Alberto Tietjen is named first chairman, with Ernesto Cortissoz as president. Despite the public relations success of the U.S.-made aircraft demonstrated by American salesman William Knox Martin, orders are placed for Junkers F-13s, at just under \$20,000 each.

Late in July 1920, two F-13s arrive at Puerto Colombia on a Dutch ship from Germany, accompanied by Junkers technician Fritz Hammer and aircraft engineer Wilhelm Schnurbusch; they are joined by the carrier's new chief pilot Hellmuth von Krohn, shortly thereafter. The first survey flight is made by the *Colombia* on September 12–13 from Barranquilla to Puerto Berrio via Zambrano, El Banco, and El Ciego. Accompanying Hammer and Schnurbusch as the first official passenger is company director Stuart Hoise, who just happens to have business at the flight's destination.

Meanwhile, SCADTA, which has established a local office, is now allowed to organize its own airmail operation, complete with post offices and stamps (the first of the latter apparently being issued on October 4). A second and larger survey flight is made on October 19–20, Barranquilla to Girardot, a river port in Colombia's capital city.

The event is of such national importance that President Marco Fidel Suarez charts an entire train, invites his cabinet, plus military and religious VIPs and the press, to travel with him to witness the plane's arrival. Unhappily, upon landing at Girardot, the F-13 *Colombia*, a floatplane, founders (one dead). The second F-13, *Bogota*, now arrives at Girardot, flying on up the Magdalena River to Bogota on November 14.

Early in 1921, Austrian industrialist Dr. Peter Paul von Bauer invests in SCADTA, orders additional F-13s, and establishes agencies for the airline in New York, Paris, Hamburg, and Berlin. As a result of von Bauer's efforts, the fleet is increased to six F-13s, allowing scheduled Barranquilla to Girardot service to commence on September 19, with an irregular extension to Neiva. At year's end, flights are also inaugurated Barranquilla to Cartagena and Santa Maria. Trips that had previously required 10 days now take only 10 hours.

Von Bauer arrives at Colombia in early 1922, together with engineer Hermann Knehl, who will soon be asked to lead the airline's new aerial photography and survey division, Seccion Cientifica (Scientific Section). On July 28, von Bauer purchases the Giesecking shares, becoming majority owner.

In August, an F-13 helps to establish the delineation of a portion of the Colombia and Venezuela frontier near Cucuta. In September, Pedro Nel Ospina, the new president of Colombia, makes a roundtrip flight from Girardot to Puerto Berrio in a company Junkers, probably the first head of state to fly with a commercial airline. On December 5, the impressed Colombian Council of Ministers authorizes a mail contract, which is confirmed by the president on December 16. Simultaneously, SCADTA issues its first official timetable and schedule.

To assist the Colombian government in avoiding a run on the State Bank and other national banks in several cities, F-13s, on July 19–20, 1923, fly an emergency 3.1-million pesos (\$3.1 million weighing a ton and a half) from Medellin to Bogota. Although one more F-13 is deliv-

ered during the year, the original *Colombia*, repaired after its previous tragedy, is destroyed in a crash (one dead).

On June 8, 1924, the F-13 *Tolima* is lost during a Barranquilla air show; six are killed, including Chief Pilot Hellmuth von Krohn and the company's first president, Ernesto Cortissoz. On May 4, a German consortium led by Fritz Hammer and **Deutscher Aero Lloyd, A.G.** forms the Condor Syndikat at Berlin to study the viability of further South American operations, including the establishment of an "interamericana" network between Colombia, Central America, and the U.S. Given the opportunity, SCADTA chief von Bauer subscribes 10% of Condor's initial \$200,000 capitalization.

The first international survey flight is flown from Barranquilla to Curaçao and La Guaya on April 8, 1925, followed by a flight from Barranquilla to Maricao on July 27. Two F-13s are delivered during the summer and are christened *Cucuta* and *Bucaramanga*.

Meanwhile, two CMAA-built Dornier Wals, *Atlantico* and *Pacifico*, are leased from the Condor Syndikat and depart Barranquilla on August 18 on a route proving and goodwill flight, via Central America and Cuba to the U.S. After calls at Cartagena, Cristobal, Puerto Limon, San Jose del Norte, Managua, Amapala, La Libertad, San Jose, Lake Amatitlan, Puerto Barrios, Belize City, and Cozumel, the flying boats arrive at Havana on September 19.

U.S. expedition leader von Bauer spends the first months of 1926 negotiating with Americans interested in financing intra-American service and with the U.S. government over traffic rights. The *Pacifico* is allowed to make a trial flight from Havana to Palm Beach via Miami. The negotiations fail, due largely to American fears of "Germans flying over the Panama Canal," and the *Pacifico* returns to Cuba.

The *Atlantico* is crated up and returned to Germany while the *Pacifico* is shipped to Curaçao. Still in hopes of beginning his intercontinental airline, von Bauer orders eight Sikorsky S-38 flying boats. Later in the year, it crashes en route from Curaçao to Barranquilla, thus defeating von Bauer's plan to open a Curaçao to Panama service. On September 3, the F-13 *Caldas* crashes in fog at La Victoria (one dead).

Two more F-13s are delivered during 1927 along with two Dornier Merkurs. While on a trial flight at Barranquilla on June 5, the F-13 *Cauca* is destroyed in a crash; the F-13 *Bogota* is also lost in a summer accident. On October 23, Herbert Bay, flying the F-13 *Boyaca*, makes a survey flight from Barranquilla to Buenaventura. Von Bauer again seeks U.S. permission for a Canal Zone route and is once more refused.

Barranquilla to Guayaquil, Ecuador, F-13 mail flights begin on June 10, 1928; a month later on July 12, Herbert Bay is the first to pilot a commercial revenue flight across the equator. The F-13 *Boyaca* launches the carrier's first international passenger service on the route beginning on July 30. On October 22, Herbert Bay flies the F-13 *Atlantico* on a proving mission to Paita, Peru. During the year, the fleet is strengthened through the addition of five F-13s, the Junkers W.33 *Cundimarca*, and the Dornier Wal *Colombia No. 2*.

The F-13 *Boyaca* makes a second survey flight to Paita on January 22, 1929. On April 1, the Guayaquil and Buenaventura route is extended to Panama City and Cristobal by the recently received Junkers W.33 *Cundimarca*, U.S. permission for the service having finally been achieved.

The fleet is enhanced through the addition of four Junkers W.34s, four F-13s, five de Havilland DH 60 Gipsy Moths, and the first of six Sikorsky S-38Bs, the latter outfitted in the company's new silver and blue livery with a large South American Condor tail logo. The F-13s *Chuco* and *Valle*, placed in service the previous year, are lost in crashes.

Following the October 29 U.S. stock market crash, SCADTA encounters severe financial difficulties. At this point, Paul von Bauer and **Pan American Airways (PAA)** President Juan Trippe conclude a confidential "gentleman's agreement" leading to a buyout by the rapidly expanding American carrier.

In exchange for a covert 80% of the airline's stock, Trippe promises von Bauer new airmail contracts, full access to U.S. markets, and additional aircraft. Von Bauer promises to make certain that Colombia drops

its long-standing objection to **Pan American-Grace Airways (Panagra)** service through Colombia.

On February 15, 1930, by a formal secret contract that is taken to New York and locked in Juan Trippe's safe, **Pan American Airways (PAA)** begins the takeover of SCADTA, which now withdraws from international service to concentrate solely on Colombian domestic operations. Von Bauer resigns as president and is replaced by a Colombian appointee; Colombians, on the surface, remain in charge of the airline. The same day, the new DH-60 *Garza* crashes at Cali.

The DH-60 *Gaviota* is lost during the summer and the F-13 *Santrander* is destroyed by fire while refueling at El Banco on September 2. Service to Guayaquil, which for the past two years has been operated as "Servicio Bolivariano de Transportes Aereos," is withdrawn on December 17; however, F-13 landplane service is simultaneously launched Flandes to Bogota and Ibague.

The **Pan American Airways (PAA)** acquisition is completed on April 10, 1931, at which point the U.S. carrier owns 84.4% controlling interest. Service to Panama City and Cristobal is withdrawn in June and during the year, the DH-60 *Halieto* is lost in a crash. A joint Bogota to New York airmail service is begun with Juan Trippe's line on July 16; SCADTA flies the Colombian sector of this historic premier of the first permanent North America to South America return airmail and cargo route. Two Fokker Model 8 Super Universals are added to the fleet late in the year.

Uraba, Medellin and Central Airways, S.A. is acquired by **Pan American Airways (PAA)** in April 1932 for its Medellin connection to Panama, thereby keeping the "German" SCADTA away from the Canal Zone. SCADTA's Barranquilla-Medellin service via Barrancabermeja, Puerto Berrio, begins on June 27.

A link is made a few weeks later from Medellin to Buenaventura via Cali. On September 2, with an F-13 and a W.34 piloted by Herbert Bay, SCADTA begins nine months of logistics assistance to the government, which is attempting to assert its sovereignty in Caqueta and Putumaya provinces against Peruvian encroachments.

During the year, the Colombian government takes over the Dornier *Wal Colombia No. 2*. The S-38B *Ernesto Cortissoz* crashes during the summer and the Super Universal *Medellin* is lost at La Mesa on December 15. The fleet is, however, strengthened by the arrival of five Ford 5-ATs, which President von Bauer believes will be necessary to change company focus to the remainder of the country from the Magdalena River Valley. They are the first of their type imported into South America.

The government emergency requiring pilot Bay's assistance ends in July 1933. SCADTA's aircraft thus become the first to serve in any kind of wartime combat capacity in the Western Hemisphere. The effort is so successful that Colombian officers involved return to Bogota and convince the government to form an air force.

The company now begins building a network of private airports at the larger cities of Cali, Medellin, and Bogota and establishing weather and radio services. The F-13 *Garcia Rovira* is lost in a summer crash.

On March 10, 1934, the S-38B *von Krohn* crashes in Chuco Province; one man, Newton Marshall, survives and eventually escapes the jungle in an adventure worthy of Hollywood's Indiana Jones. Although the second Fokker Super Universal, *Bogota*, is also lost in an accident, the fleet is strengthened through the addition of the Sikorsky S-41 *Alfonso Lopez* and the Clark GA-43J *Bolivar*. The latter, the only one of its type known to have been operated with floats, is placed in service on the Barranquilla to Santa Maria route. The first of the upgraded 5-AT series Ford Tri-Motors, 5-AT-1, after six years in private U.S. service, is acquired on May 4. The Ford Tri-Motor 5-AT-111 is delivered on August 4, followed by the brand new 5-AT-112 outfitted with a Club interior, in October.

The former **United Air Lines** Ford Tri-Motor 5-AT-106 is delivered on April 19, 1935, followed by the ex-UAL 5-AT-104 on April 26 and 5-AT-114 on June 5; the last is christened *Barranquilla*. The most remarkable event of the year is a crash that occurs on June 24; indeed, the incident is one of the two or three most spectacular prewar aviation

accidents. The Ford 5-AT piloted by **SACO (Servicio Aereo Colombiano, S.A.)** CEO Ernesto Mendoza crashes into the SCADTA 5-AT-112 *Manizales* piloted by Hans Thomas in a takeoff ground collision at Medellin. Mendoza, the noted Argentine singer Carlos Gardel, and 15 others aboard the 2 planes are killed. The 5-AT-108 arrives at Barranquilla on August 16, having been ferried down by a **Pan American Airways (PAA)** crew.

The S-41 *Alfonso Lopez* crashes at Barranquilla on February 14, 1936. The situation is more cheery in March as the former **Transcontinental and Western Air Lines (TWA)** Ford Tri-Motor 5-AT-69, operated in New York Harbor with floats the previous year, is delivered from Kansas City. August 6 is, however, particularly tragic as two planes are lost: the F-13 *Cordoba* at Chuco and the S-38B *Guillermo Valencia* at an unknown jungle point. On December 6, **Pan American Airways (PAA)** finances the purchase of the first 3 of 15 former **United Air Lines** or **Western Air Lines** Boeing 247Ds that will be forwarded to the SCADTA fleet.

Late in January 1937, the premier Boeing, *Belalcazar*, opens a Bogota to Arauca route via Villavicencio. During the summer, a nonstop Barranquilla to Bogota service is first offered and flights also begin from Cucuta to Barranquilla. The U.S. State Department, meanwhile having learned of the secret accord, requests that Trippe take measures to disassociate from the "German" carrier. The PAA chief will stall, instead.

Following discussions with Juan Trippe in early 1938, Peter Paul von Bauer is reinstated as SCADTA president, with Hermann Kuehl as general manager. On May 26, the government decrees that the airline's workforce must be at least 25% Colombian. Meanwhile, on May 13, the F-13 *Darien* is lost in a crash, followed by the loss of the float-equipped Ford 5-AT *Barranquilla*. By year's end, the fleet includes 10 of the 15 B-247Ds; these show a more realistic Condor logo, with the bird emerging from a circle colored like the country's flag. They serve as fleet flagships and pioneer new routes throughout the nation.

As the result of President Franklin D. Roosevelt's direct intervention, **Pan American Airways (PAA)** President Trippe is at last forced to confront the issues raised in Washington circles by his secret "German" airline. On June 14, 1939, he withdraws the accord and SCADTA stock from his safe and together with a supply of cash and company associates, flies to Bogota, and, with a bit of "dollar diplomacy," lines up Colombian government personnel behind his forthcoming purge.

A SCADTA stock meeting is held, a stock vote is taken, and von Bauer and the entire SCADTA directorship is removed. The Ford 5-AT *Leticia* is destroyed in an accident during the summer. On October 11, a Junkers W-34 crashes near Calamar (five dead); 16 days later, on October 27, an agreement is reached to merge the carrier with competing **SACO (Servicio Aereo Colombiano, S.A.)**.

The SACO merger is ratified by the stockholders on February 23, 1940. Officials of the new prize, Colombians all, are given management training that will later prove useful. Five days later on February 28, the B-247D *Quesada* is lost in a crash near Bucaramanga (11 dead).

Under continuing U.S. government pressure and with full knowledge of the Colombian government "fixed" by Trippe the previous year, all German employees, about 80 in all, are summarily fired on June 8. They are replaced by **Pan American Airways (PAA)** employees secretly brought into the country, together with the first of the SACO trainees. On June 14, the carrier's name is changed to **AVIANCA (Aerovias Nacionales de Colombia, S.A.)**.

SCANAIR, A.B.: Sweden (1961–1993). Scanair is established on June 30, 1961 as a privately owned Danish charter operation. After four years of independent operation, the carrier is sold to the consortium of airlines forming **SAS (Scandinavian Airlines System)**. The company is reorganized on October 1, 1965 and capital shareholding in the new organization is divided between the companies: three-sevenths to **ABA Swedish Airlines, A.B.** and two-sevenths each to **DDL Danish Air Lines, A.S.** and **DNL Norwegian Air Lines, A.S.** Offices are opened in Sweden, Norway, and Denmark.

Employing steadily more sophisticated aircraft from Douglas DC-7Cs to Sud-Est SE-210 Caravelles and beyond, Scanair undertakes inclusive-tour and general passenger group flights and charters in Europe and to the Canary Islands, North Africa, and to North America. Over 30 travel agencies book tours with the carrier.

By 1972, the fleet includes 3 Boeing 727s and 2 DC-8s. Enplanements are 726,915.

Despite the oil crisis, bookings climb 1.1% in 1973 to 735,000.

Airline employment in 1974 is 390. Inflation and oil prices do catch up with the carrier this year as passenger boardings decline a significant 17% to 304,439.

Operations continue apace in 1975–1976 and in 1977 enplanements reach 918,577.

Airline employment grows by 14% in 1978 to 505. A new management team is placed in control, headed by George Olsson, managing director, and Henry Engstrom, deputy managing director.

Passenger boardings jump 26.1% to 1,243,000 and a \$1.8-million net profit is earned on operating income of \$108.2 million.

In 1979–1980, the fleet grows to comprise 3 DC-8-63s and 1 DC-8-62 leased as needed from SAS (Scandinavian Airlines System). Destinations visited at the close of the decade from the gateways of Copenhagen, Goteborg, Malmo, Oslo, and Stockholm include Africa, Europe, Thailand, and the U.S.

Enplanements in 1981 total 597,718.

The employee population grows by a significant 30.9% in 1982 to 284. Leases are sought of the parent for two Airbus Industrie A300B4-120s and a B-747-200C.

Passenger boardings increase 46% to 1,111,000. The year's profits are \$585,000 (operating) and \$3.2 million (net).

The number of workers is dramatically increased in 1983, up 11.3% to 316. The fleet of three DC-8-63s leased from SAS (Scandinavian Airlines System) is increased by the chartering of the two requested Airbus Industrie A300B4-120s.

Customer bookings decline 4% to 1,066,000. Revenues jump 13.4% to 111.5 million while expenses climb only 12.6%. The operating profit of \$1.5 million is posted and net gain of \$4.3 million is celebrated.

A third A300B4-120 is chartered from SAS in 1984. A Soviet fighter plane intercepts an airliner in Swedish airspace on August 9, leading to a protest to Moscow from the Stockholm government.

Although enplanements plunge to 574,410, profits of \$647,000 (operating) and \$3.5 million (net) are recorded.

Employment grows a full 10% in 1985 to 351 and orders are placed for 3 additional DC-8-63s.

Passenger boardings climb 6.6% to 615,000. Revenues jump 25.1% to \$138 million and expenses are \$135.6 million. As a result, the operating profit accelerates to \$2.4 million and net gain rises to \$5.7 million.

The fleet is enhanced in 1986 by the addition of a DC-8-63. In January, two of the three A300B4-120s are withdrawn by parent SAS (Scandinavian Airlines System) and sold to Conair of Scandinavia, S.A.

Cargo ascends 13% to 18.3 million FTKs and passenger miles enplanements total 1,346,558. Revenues rise by 9.6% to \$195.9 million, expenses are up 7.6% to \$114.6 million, and the operating profit is \$81.3 million.

In 1987, the 450-employee Swedish pleasure carrier obtains 2 additional DC-8-63s as the final A300B4-120 is withdrawn.

Passenger boardings rise 22% to 1,726,356.

Frequencies are maintained without change or statistics in 1988–1989. During the former year, Always, A.B., a company engaged in the group travel business, is organized as a subsidiary at Stockholm.

CEO Henrik Meldahl's fleet in 1990 includes 5 DC-10-10s, all of which are leased from other airlines. In early July, the company assumes responsibility for its own flight operations, training, and maintenance under an independence program called "Own Wings."

Another DC-10-10 is acquired in 1991 along with three McDonnell Douglas MD-83s, two of which are leased from the parent. An MD-82 is leased from SAS (Scandinavian Airlines System) in 1992. Airline

employment now stands at 1,000 even and enplanements total 1,713,600.

In 1993, Chairman Christer Sandahl and Managing Director Thomas Rosenqvist oversee a workforce of 900. Losing money for some time, the troubled carrier's parent, SAS Leisure, agrees in September to merge it with Conair of Scandinavia, A.S., owned by Denmark's Simon Spies Holdings, to form the new airline Premiir A.S.

The merger becomes official on January 1, 1994.

SCANBEE (SCANDINAVIAN BEELINE CHARTER, A.B.): Sweden (1976–1985). This privately owned Swedish charter operator is registered at Stockholm in 1976. A Convair CV-340 is acquired and employed to inaugurate domestic and regional international turboprop flights beginning in March 1977.

By the early 1980s, the workforce has grown to a total of 12. The CV-340 is replaced with a CV-580 turboprop during 1981.

Unable to generate sufficient traffic to cover growing expenses or acquire more up-to-date equipment, the carrier stops flying in 1985.

SCANDINAVIAN AIRLINES SYSTEM. See SAS (SCANDINAVIAN AIRLINES SYSTEM)

SCANDINAVIAN BUSINESS COMMUTER (SBC). See SAS COMMUTER (SCANDINAVIAN AIRLINES SYSTEM COMMUTER)

SCENIC AIRLINES: 2705 Airport Drive, North Las Vegas, Nevada 89030, United States; Phone (702) 638-3200; Fax (702) 638-3295; <http://www.scenic.com>; Code YR; Year Founded 1967. Organized as an air taxi by John R. Seibold in at Las Vegas North Town Airport in June 1967, Scenic initiates operations with a five-seat aircraft and two employees. During the next three years, Scenic becomes a fully established commuter airline offering scheduled service and sight-seeing flights in Nevada and Arizona. In 1969, the year it turns full-time to flight-seeing, Scenic developed the first automated air tour narration system.

In 1970, Scenic joins with the FAA, the National Park Service, and other tour operators to establish air traffic procedures for safe and environmentally sound flights over the Grand Canyon. It also places its first Cessna 402 into service.

On October 18, 1971, all 10 aboard a Cessna 402 are killed when the plane encounters bad weather during a flight from Las Vegas to the Grand Canyon and crashes at Peach Springs, Arizona, while attempting to return to its point of origin.

The company signs its first international marketing agreement in 1972 to promote tourism to Las Vegas as "The Gateway to the Grand Canyon." The 100,000th passenger is boarded in 1973. By 1974, annual enplanements total 68,750.

Airline employment in 1975 stands at 105. The carrier enjoys a busy year, first switching from North Las Vegas Air Terminal to McCarran International Airport. Simultaneously, a new flight complex, including an 80,000-sq.-ft. hangar, is acquired to handle increasing traffic.

Scenic joins the Deltamatic computerized reservations system of Delta Air Lines. Services are provided with a fleet made up of Cessna 402s and 404s, while orders are placed for three Swearingen Metroliners. On November 30, a Cessna 402 crashes at Elko, Nevada (two dead).

Passenger boardings jump 30% to 97,500. As a result of its outstanding tourism promotions, Seibold's enterprise receives a Presidential E award at year's end.

The number of employees is increased by 21.9% in 1976 to 128. Scenic is now best known for its passenger charters, the major emphasis of which is a 200-mi.-long flight over the Grand Canyon.

To offer nostalgic and unusual sight-seeing tours, the Ford Tri-Motor 5-AT-11 is acquired from Wings and Wheels Museum in Santee, South Carolina, on January 23. Three Swearingen Metro IIs arrive and the company begins flying to Lake Tahoe and other destinations in Southern California.

Customer bookings swell 24.5% to 121,000.

On February 2, **1977**, Ford 5-AT-11 crashes into a ditch while taking off from Las Vegas; one passenger is hurt and the plane is slightly damaged. The ancient airliner is repaired in time for the summer tourist season. Meanwhile, two more Metroliners join the fleet.

Increased marketing built around the Ford helps traffic to reach a total of 139,897 passengers carried.

Although two more Cessna 404 Titans are acquired in **1978**, the company elects to concentrate primarily upon its Las Vegas–Grand Canyon market, suspending several other routes.

As a result of this change, customer bookings fall by 12.6% to 122,291.

The workforce is increased by 5.5% in **1979** to 135 and the fleet, in addition to the Ford, includes 15 Titans. A branch office is opened in Tokyo during the year to manage all sales and marketing activities for business generated in Japan. During the summer, the one-millionth passenger is boarded.

Cargo climbs 76.3% to 40,000 pounds and enplanements jump 36.4% to 166,753.

Passenger boardings at the 48-employee carrier are up by 26% in **1980** to 210,474. A Cessna 404 Titan and its occupants are lost in a crash near Grand Canyon National Park Airport at Tusayan, Arizona, on July 21. On August 10, a windstorm rips the carrier's Ford Tri-Motor from its tie downs and flips it onto its back and into a ditch; it is a total wreck.

Flights to the Grand Canyon from Phoenix and Las Vegas continue apace in **1981** with a fleet that includes 13 Cessna 404 Titans, 15 Cessna 402s, and the inoperable Ford 5-AT-11. Due to a drop in the value of the dollar, a traffic downturn begins in May. Also during the year, Scenic pioneers the use of aircraft simulators in regional airline service for the training of its flight crews.

By year's end, passenger bookings are off by 22% to 164,305.

Continued impact of the recession causes the carrier to lay off 53.3% of its workforce in **1982**, leaving only 70 employees. The fleet is downsized; withdrawn are four Cessna 402s, two Cessna 404s and one Cessna 414. More than 200 flights are operated daily between Las Vegas and Phoenix and the Grand Canyon.

In August, the remains of the smashed trimotor are donated to the San Diego Aerospace Museum. The first two of six ordered de Havilland Canada DHC-6-300 Twin Otters, called "Vistaliners" after their oversized windows, are acquired.

Passenger boardings drop still further, down 25.8% to 121,837.

Enplanements fall yet again in **1983**, dropping 26.4% to 89,708.

Employment grows 25% in **1984** to 125 as the last of 8 "Vistaliners" enters services, replacing all of the smaller Cessnas. For promotional purposes, the carrier orders Ford Tri-Motor 5-AT-74 from its owner, LeMaster, Inc. of Ottawa, Kansas.

Operations are transferred from Scottsdale Airport to Phoenix's new Sky Harbor Airport, from which six flights a day are scheduled to the Grand Canyon; a dozen are still sent to that site from Las Vegas. Longtime President Karl A. Fahr retires and is succeeded by John Siebold, with Richard A. Thomas as senior vice president.

Passenger traffic resumes its upward course, climbing 7% as 95,958 passengers are transported.

The workforce is cut 12% in **1985** to 60.

After a yearlong \$200,000 refurbishment, the Ford completes a week-long cross-country flight designed to evoke the romance of the transcontinental runs made by that aircraft type during the 1930s. Undertaken between September 5 and 12, roughly along the route of **Transcontinental Air Transport (TAT)**, the flight is filmed from an accompanying Twin Otter by Saarlandischer Rundfunk of Frankfurt as part of a travelogue for West German television designed to boost tourism to the U.S. The aircraft is piloted by Scenic Capt. Fred Weir, **United Airlines** father and son pilots Bernard and Bryan Godlove, and **Trans World Airlines (TWA)** Vice President Ronald Reynolds. When it reaches New York, President Siebold officially purchases the trimotor, allowing it to spend October in East Hartford, Connecticut, helping to celebrate the sixtieth anniversary of the Pratt & Whitney engine concern.

Customer bookings for Grand Canyon flights dip 2.5% to 93,570.

The payroll is increased by 22.7% in **1986** to 135 and the fleet includes Ford 5-AT-74, 9 DHC-6-300 Vistaliners, and 2 Metroliners. During the year, Scenic begins converting its Vistaliners with Raisbeck quiet propeller technology, which reduces ground noise impact by two-thirds, thus making the modified Twin Otter the quietest sight-seeing aircraft flying over the Grand Canyon.

Passenger boardings increase 38.8% to 129,939.

The workforce grows again in **1987**, up by 40.7% to 190. In February, four more Twin Otters are acquired; they, too, are outfitted with Vistaliner window modifications. Former Regional Airline Association Executive Vice President Alan R. Stephen is named president in May.

Customer bookings accelerate 34.4% to 174,634.

Airline employment grows by 10% in **1988** to 220 as the number of Twin Otters "Vistaliners" increases by 12 to 25. In May, the carrier introduces \$39 one-way and \$78 roundtrip fares between Las Vegas and the Grand Canyon. Simultaneously, the carrier contracts with Travel Sales International to act as its agent in Italy and Jim Readings, Inc. to represent it in London. The two millionth sight-seeing passenger (cumulative) is boarded during the summer. The trimotor resumes flying.

Enplanements on "trans-Canyon" tour flights increases by 35.5% to 327,761.

The workforce is reduced by 20.5% in **1989** to 175. The Metros are withdrawn as six additional DHC-6s Vistaliners are delivered.

Customer bookings accelerate by 48% to 368,053.

The employee population is elevated by 7.6% in **1990** to 283 and there are 25 Twin Otters in the fleet. The Ford Tri-Motor continues promotional operations.

Passenger boardings move ahead by 5% to 386,572.

Company employment is cut by 2.5% in **1991** to 278 and the number of Twin Otters is reduced to 16. Scheduled service is inaugurated linking the company base with Bullhead City and Laughlin and a new flight-seeing route is opened to Monument Valley, the site employed as background in many Westerns. Throughout the year, owner John Siebold, preparatory to his December retirement, seeks a buyer, but he is unsuccessful.

Customer bookings decline 24.6% to 291,572.

The payroll is cut by 15.5% in **1992** to 235 as 2 more DHC-6s arrive. Scenic celebrates its 25th anniversary this year and implements a new SHARES reservations system.

Bookings for the year drop 3% to 283,592.

The full complement of 25 Twin Otters are back on the line at the beginning **1993**. In the spring, the carrier agrees to sell the aerial tour portion of its business to **Aviation West**, the **Skywest Airlines** subsidiary. The Skywest acquisition allows Scenic to offer an increased number of spectacular sights in the Southwest Grand Circle Region from multiple gateways: Las Vegas, Phoenix, Scottsdale, Sedona, Show Low, Grand Canyon, and Page. Operational facilities are also located at St. George, Kanab, and Cedar City, Utah.

The company now expands its special services department at Las Vegas to offer customized tours and chartered flights throughout the Southwest. It also revises its advertising slogan from "Grand Canyon Experience" to "Gateway to the National Parks."

Passenger boardings this year plunge 57.1% to 123,900.

In **1994**, Scenic opens overseas offices in Denmark, Finland, Norway, Sweden, the Netherlands, Greece, Israel, and Mexico, expanding its worldwide coverage to 19 countries. Customer bookings, largely as a result, recover, increasing to 314,252.

The carrier's fleet in **1995** includes 19 de Havilland Canada Vistaliners, 31 Cessnas, 9 multiengine aircraft, and 4 Cessna 208B Caravans. Early in the year, the company opens offices in Argentina, Brazil, Chile, Colombia, and Venezuela. Scenic is appointed the "Delta Connection" carrier to the Grand Canyon in December. The code-sharing arrangement with the major is a subsection in the arrangement held with **Delta Air Lines** by Scenic's parent, **Skywest Airlines**.

Passenger boardings increase by 7% to 336,419. The good fortune allows profits: \$850,000 (operating) and \$692,000 (net).

Airline employment is cut by 6.7% in 1996 to 280. During the first quarter, four-times-a-day scheduled "Delta Connection" flights to Grand Canyon Airport from McCarran International Airport at Las Vegas.

In an effort to work more closely with travel agents, retailers may now book some 40 different Scenic tours through the SABRE, Apollo, or WorldSpan reservations systems.

A \$5-million terminal is opened at North Las Vegas Airport in early April, which substitutes for the previously operated Scenic Tour Center at McCarran International Airport. The "Delta Connection" contract is now enlarged to cover flights from Las Vegas to Page, Arizona. Scenic also places 14 new motor coaches, equipped with video narration systems, into service; these are designed to enhance passenger enjoyment during their various transfers.

Despite these improvements, enplanements plunge 12.2% to 269,370 and revenues fall 2.3% to \$38.39 million. Expenses are \$38.54 million and the previous year's profits become losses as both a \$143,000 operating loss and a \$299,000 net loss are reported.

In 1997, Scenic celebrates its thirtieth anniversary. The product line is expanded to include Yellowstone tour packages and a new Caesars Magical Nights Tour.

While flying westbound along the San Juan River gorge on June 4, a Cessna 177B with a pilot and three passengers, suffers engine exhaustion. Unable to find a landing site, the pilot ditches into Lake Powell. One person receives minor injuries during evacuation; however, the plane sinks.

En route from Montrose Regional Airport in Colorado to Page, Arizona, on October 8, a Cessna 208B Caravan piloted by Capt. Robert Armstrong with eight passengers aboard disappears. The wreckage is found by searchers on Uncompahgre Plateau at the 10,000-ft. level two days later and there are no survivors.

The tragedy does not take away from a good traffic year, in which customer bookings accelerate 10.1% to 294,403.

Flag tours is purchased in 1998 and a vacation and motor coach tour division is started. The carrier expands its code-sharing agreement with Delta to include daily services from Phoenix to Page.

Just after takeoff from a private airport near Monument Valley, Utah, on March 24, a Cessna 207A with a pilot and five passengers suffers total loss of engine power. A forced landing is made in rough sandy terrain, the nose wheel landing gear separates from the fuselage, and the airplane comes to rest in an inverted position. Four aboard receive minor injuries.

While on its landing roll at the same Monument Valley airstrip on May 17, a Cessna 172P with a pilot and two passengers is caught by a strong gust of wind that forces it to bounce and break its nose gear. The plane comes to rest on its nose and all aboard receive minor injuries.

In order to concentrate on its core business of providing regional airline service, Skywest Airlines, on August 27, sells most of the assets of its Scenic subsidiary to Eagle Canyon Airlines. In making the announcement, Skywest Executive Vice President Bradford R. Rich notes that the Page, Arizona-based tour division will be retained. The sale includes all 18 of Scenic's Twin Otter Vistaliners and other assets that Eagle hopes to eventually integrate. Scenic initially continues separate operations as passenger boardings slide to 262,000.

Amalgamation of Scenic and a planned name change in 1999 by the new owners to Eagle Scenic Airlines does not, after all, occur. Instead, recognizing the importance of the historic FAA Part 121 carrier's branding, Eagle Canyon elects to retain the original name.

David Young becomes CEO and he continues to operate the Twin Otters, often supplementing them with Eagle's larger Fokker Friendships. The U.S. Air Tour Association Web site will report that Scenic has offered 27,648 flights that have transported more than 460,000 passengers, 80% of whom originate from outside the country.

A total of 349 workers are employed at the beginning of 2000. Flight 304, a DHC-6-300 with 2 crew and 15 Japanese passengers fails its take-off from Monument Valley Airport on a May 5 service to Grand Canyon Airport when a gust of wind catches the aircraft, forcing it off the left

side of the runway. Although the nose gear is torn off and the nose section is crushed aft to the windshield, no injuries are reported.

SCENIC AIRWAYS: United States (1927-1930). In mid-July 1927, pilot Lawrence G. Fritz and his copilot, Ford Motor Company chief pilot J. Parker Van Sandt, who is also serving as operations director of Stout Air Services, depart Detroit to deliver the Ford 4-AT-7 to Los Angeles Lincoln automobile dealer Jack L. Maddux, who has agreed to serve as West Coast distributor for the TriMotor and to establish an airline. Among the passengers are Ford Chief Engineer William B. Mayo, Eddie Hamilton, and six others.

According to Van Sandt's account of the delivery flight, which was later written down as "Origin & History of Scenic Airways, 1926-1929," and which has recently been posted on the homepage of Grand Canyon Airlines, it was he who persuaded the group to detour, while en route from Salt Lake City, over the Grand Canyon to Williams, Arizona, taking in the view. This half-hour flight is credited with having inspired an entire new business, the Grand Canyon air tour industry. The 4-AT-7 arrives in Los Angeles on July 27, where Fritz becomes "Commandore" of the Maddux fleet, and is joined as copilot by Edward A. Belandine when Van Sandt returns to Stout.

Captured by the idea of offering sightseers the opportunity to fly over the Grand Canyon, Van Sandt mulls over his emerging concept and after conversations with engineer Mayo, Lawrence Scudder in Chicago, and others (who see a new way to sell airplanes), the chief pilot organizes Scenic Airways in the fall. A site for company headquarters and an airfield is selected on 700 acres of U.S. Forest Service land 12 mi. S of El Tovar, near the Canyon rim. Van Sandt duly leases the location from the government and arrives in a Stinson Detroiter to build a hangar and lay out a primitive airstrip.

Van Sandt, who is still on the Ford payroll, organizes the delivery of two TriMotors over the winter of 1927-1928. In the spring of 1928, the founder returns to his north rim airport and having hired an administration, a mechanic, and an additional pilot, employs the Stinson to initiate the first flight-seeing services in May. An advertising slogan "You Haven't Seen the Canyon Until You've Seen It From the Air" appears in newspapers and magazines promoting the new aerial tours. The new competition is resented by the proprietors of the El Tovar Hotel (run for the Santa Fe Railroad by the noted Fred Harvey restaurant chain), who also control local ground tourism at the Canyon's south rim. Still, at the end of the month, Van Sandt goes back to Detroit to get his larger aircraft.

The first TriMotor, the \$45,000 Ford 4-AT-22, is personally delivered by Van Sandt on June 5, followed by the \$55,475 Ford 5-AT-49 on June 18 and Ford 4-AT-24 on June 23. The latter is equipped with a special 78-foot wing and costs \$3,000 more than the former. Flights from the Canyon's north rim to south rim begin in August.

In his memoir, Van Sandt reveals two additional sources of concern. The first is the U.S. Forest Service itself, local officials of which are not pleased by the intrusion of noisy aircraft in the airspace over the agesilent Canyon. Scenic wins their "begrudging acceptance" by giving free flights to as many USFS personnel as possible. The most hazardous obstacle are the local prairie dog population. Collapsed burrows dug by the little rodents under the landing area cause several broken landing gear for departing or landing aircraft.

The sight-seeing business continues throughout the remainder of the summer until winter weather shuts it down. With assistance from Lawrence Scudder, land is purchased in Phoenix for the construction of an airport (christened "Sky Harbor") and establishment of a flying school. A second airport is opened at Albuquerque and a branch of the Phoenix flying school is also opened.

The two Ford TriMotors resume Grand Canyon sight-seeing flights in May 1929. Business is brisk throughout the spring and summer. Ford 4-AT-24 is sold to Continental Air Express of Los Angeles on September 14.

The October stock market crash puts an end to the availability of tourists able to pay for Grand Canyon flights and thus Ford 4-AT-22 is sold to Col. Reg I. Robbins of Fort Worth, Texas, on November 8. Ford

5-AT-49 is sold to **United Aviation Corporation** at Chicago in March 1930, at which time Scenic Airways shuts its doors and its founder becomes Ford's aircraft sales representative in Europe.

SCHEDULED AIR SERVICES, RYUKYUS (SASR): Japan (1964–1967). SASR is established in 1964 to provide scheduled passenger and cargo services around the Ryukyus Islands in place of a charter operation maintained for some years by **Civil Air Transport (CAT)**, a proprietary subsidiary of the Pacific Corporation, a front organization for the U.S. Central Intelligence Agency. Employing 2 each Curtiss C-46s and Beech 18s, later in the markings of **Air America**, SASR undertakes flights inking Minami Daito with Yonaguni via Haha, Kumejima, Miyako, and Ishigaki.

Operations continue apace in 1965–1966 and the service is taken over by **All Nippon Airways Company, Ltd. (ANA)** in July 1967.

SCHEDULED SKYWAYS: United States (1953–1972). After his previous enterprise, **South Central Air Transport (SCAT-1)**, is closed down in the fall of 1947, Raymond J. "Ray" Ellis, owner of the FBO Fayetteville Flying Service, based at Fayetteville, Arkansas, returns to on-demand charters, flown with Cessna 170s and 195s.

In the fall of 1949, the University of Arkansas at Fayetteville begins an evening program at Little Rock, employing professors from the Fayetteville campus. To get the teachers there and back, Ray Ellis is contracted by the university to fly them in "regular charters" during the school year. These flights, along with on-demand services, continue through the remainder of the decade and into the early years of the next.

When word of the commuter operation spreads, Ellis agrees to provide frequencies for passengers other than those connected with UA. A new FFS subsidiary, **Scheduled Skyways**, equipped with a single Cessna 195, is organized by the FBO owner at Fayetteville on September 1, 1953.

Within days, what will become known as the nation's third oldest commuter, after **San Juan Airlines** and **PBA (Provincetown-Boston Airlines)**, launches thrice-daily roundtrip shuttle service to Little Rock. A total of 838 passengers are carried during the remainder of the year, a number that grows to 2,536 in 1954, the first full year of scheduled frequencies.

Central Airlines begins service to Fayetteville in 1955 and its arrival helps to boost enplanements to 2,891. The first Piper PA-23 Apache is placed into service in 1958. Few changes in fleet or operations are made during the next decade.

During these years, the company grows modestly, increasing its fleet to include, beginning in 1968, several Piper PA-31-310 Navajos. Fort Smith, Harrison, Hot Springs, Jonesboro, and Texarkana join the route network. A route from Fayetteville to Tulsa is not profitable and it is suspended. Passenger bookings are 9,000 in 1969.

Operations continue apace in 1970–1971; however, when owner Ellis retires on October 1, 1972, the carrier is purchased by a group of Arkansas investors, reformed, and renamed **Skyways**.

SCHLESISCHE LUFTVERKEHRS, A.G.: Germany (1925–1926). Schlesische Luftverkehrs is established at Breslau on January 30, 1925, primarily to assist Junkers Luftverkehrs, A.G. in establishing an east-west connection to Essen. The State of Silesia, the City of Breslau, and the Junkers company provide capitalization, with the latter's 12.5% interest represented in the form of two F-13 cabin monoplanes.

Revenue flights commence on May 1 from Gleiwitz to Berlin via Breslau. On May 10, service is launched from Breslau to Dresden, with a connection to Leipzig started on June 1.

The company transfers its operations to the new **Deutsche Luft Hansa, A.G.** in January 1926; however, it will remain a shareholder in the new state carrier until 1930.

SCHREINER AIRWAYS, B.V.: Verbeekstraat 10-12, Leiden, 2332CA, The Netherlands; Phone 31 (71) 531-9319; Fax 31 (71) 531-9311; <http://www.schreiner.nl>; Code AW; Year Founded 1945. Robert

Schreiner forms **Schreiner & Co., B.V.** in 1945 to represent aircraft manufacturers in the marketing of their equipment; later, lightplane charter flights are undertaken for the Ministry of Defense. In 1957, **Schreiner Aero Contractors** is established to provide organized domestic charter operations and overseas helicopter services. The first major overseas contract begins in Iran in 1958 with the Iranian Oil Exploration and Producing Company. In 1959, Schriener begins contract flights in Libya on behalf of Shell and Esso, employing Piper Apaches and Dornier 27s.

Schreiner Aero Contractors opens a base in Nigeria during 1960, again flying Piper Apaches and Dornier 27s as **Aero Contractors of Nigeria** on behalf of the energy industry. Back at Rotterdam in 1961, the company undertakes air taxi flights and charters to various local destinations.

In 1962, the Dutch shipping concern Phs. Van Oumeren, N.V. acquires a 50% stake in Schreiner Aero Contractors, which is incorporated as **Schreiner Airways, B.V.** The company, in 1963, opens a scheduled commuter route from Groningen-Amsterdam-Rotterdam employing one each de Havilland DH 103 Dove and Douglas DC-3, the latter purchased from **KLM (Royal Dutch Airlines, N.V.)**.

With Phs. Van Oumeren backing, Schreiner Airways, in 1964, enters the charter market in competition with **Martin Air Charters, N.V.** Regional flights are undertaken with a leased Fokker F.27 and a DC-7. Over the next two years the fleet will be increased by the addition of two more Friendships and another DC-7.

Following tough struggles in the nonscheduled market, Schreiner Airways, B.V. briefly expires in 1967, but is revived as part of a Schreiner Aviation Group, with **KLM (Royal Dutch Airlines, N.V.)** holding minority ownership. With the DC-7s and Friendships removed, Schreiner begins to concentrate on the provision of contract services with small fixed-wing planes and helicopters. Company assistance is provided to the joint-venture company **Indonesia Air Transport** later in the year and in 1968 a National Flight School is begun. In 1969, Schreiner enters into a joint venture with **British European Airways Helicopters, Ltd.** for the operation of Sikorsky S-61Ns in the North Sea area. The 25th anniversary is celebrated in 1970. Out in Indonesia, **Indonesia Air Transport** begins to provide contract flights for the U.S. oil company **Petrolane**.

Flights continue apace during the next 15 years as Schreiner concentrates on the development of domestic and international charter and contract services, with particular emphasis on helicopters in overseas work, with and without joint ventures or other affiliations. Operations are conducted by two major departments: flight (fixed-wing aircraft) and flight (rotary-wing or helicopters). A subsidiary, **Schreiner Aircraft Maintenance**, is also formed.

Highlights of service in these years include the initiation in 1974 of de Havilland Canada DHC-6 Twin Otter flights in Malaysia in partnership with a local subsidiary, **Wira Kris Schreiner**. In 1976, the **Qatar Flying Center** is begun and three years later, two **Aerospatiale SA-365N Dauphins** are operated in Chile on behalf of **Servio Aero Litoral, S.A.** The subsidiary **Schreiner Airtaxi Argentina, S.A.** initiates service offshore from the Straits of Magellan in 1981, employing a pair of SA-365Ns.

In 1983, two **Aerospatiale AS-350s** begin flying for **City Services, Inc.**, a joint venture with **KLM (Royal Dutch Airlines, N.V.)** in Manila. An AS-355 is sent to Spain during the year to begin flying offshore on behalf of **Helicsa, S.A.**, in which Schreiner takes a minority equity stake.

Three de Havilland Canada DHC-7s are leased for three years to **THY Turkish Airlines (Turk Hava Yollari, A.O.)**. Also during this year, an SA-330J Puma helicopter is sent to Bombay Airport to fly energy support missions for India's Oil and Natural Gas Commission.

In 1984, Twin Otter flights are begun along the Chinese coast in support of energy exploration work. The services are flown under contract to **CAAC (The General Administration of Civil Aviation of China)**. At Rotterdam the following year, Schreiner Airways and **KLM Helicopters, B.V.** establish a joint venture operation named **Airspeed Helicopters Rotterdam, B.V.** Schreiner and **KLM (Royal Dutch Airlines, N.V.)** simultaneously open the fifty-fifty joint venture pilot training concern **Friendship Simulation Company, B.V.** One SA-365N Dauphin is leased to **KLM Helicopters, B.V.** in 1986.

By 1987, the fleet has grown to comprise fixed-wing aircraft like de Havilland Canada DHC-6 Twin Otters, Beech King Airs, Piper Navajo Chieftains, Piper Aztecs, and BN-2 Islanders as well as such rotary-winged units as Sikorsky S-61Ns, S-58Ts, Aerospatiale SA-330J Pumas, Alouettes, SA-365N Dauphins, and AS-350B Ecureuils.

Schreiner Airways Group reports a \$780,000 loss in 1988. In 1989, Schreiner joins with Zimex, Ltd. of Switzerland to form a joint venture concern branded Air Cargo Europe, B.V. ACE undertakes contract flights on behalf of KLM Cargo employing a single Lockheed L-382 Hercules freighter. The previous year's loss becomes a \$780,000 profit.

In 1990, Director B. Biemans's oversees 1 AS-355F Ecureuil II, 4 SA-365C/N Dauphin 2s (3 of which are leased to Aero Contractors of Nigeria), 1 Beech Super King Air 200, 1 Bell 206B JetRanger, 1 DHC-6-300 (which is leased to Aero Contractors of Nigeria), 1 DHC-8-102, 2 DHC-8-301s (1 of which undertakes replacement flights for Sabena Belgian World Airlines, S.A.), 4 Fokker F27s (1 each, Dash-300, Dash-400, Dash-500, and Dash-600), and 1 Lockheed L-382G Hercules freighter.

Another DHC-8-301 is acquired in 1991 to fly services on behalf of the Belgian flag carrier. The fleet in 1992 includes the 4 Friendships, 3 DHC-8-311s, 1 DHC-8-102, 1 Twin Otter, the King Air, and 13 Dauphin 2 helicopters. In November, the Dauphins complete their 100,000th flight hour and revenues for the year are \$100 million.

Evert van Schalk is president in 1993 and oversees a workforce of 450. The company continues to operate a large fleet on behalf of leading airlines and in support of international oil exploration. The number of DHC-8-311s is increased to five. The new aircraft is immediately leased to Sabena Belgian World Airlines, S.A., which employs it to inaugurate four-times-per-day scheduled flights from Brussels to London (LCY), replacing those previously operated by Brymon Airways, Ltd.

A 33.3% interest is purchased by Malaysian Helicopter Services Sdn. Bhd. in April for M\$13 million (\$5 million). Of the total shares purchased, 28.3% of the are acquired from founder Robert Schreiner (who keeps a token 5%), and the remainder from other shareholders, including KLM (Royal Dutch Airlines, N.V.).

Operations continue apace in 1994 as two more DHC-8-311s are placed into service. The company's fiftieth anniversary is celebrated in 1995. During the year, the company acquires a 49% equity stake in the regional airline Air Excel Commuter, B.V. In 1996, President van Schalk's mixed fleet of fixed- and rotary-wing aircraft continues to operate on behalf of leading international oil companies and other air carriers. The other units of Schreiner Aviation Group include Aerocontractors of Nigeria and Schreiner Aircraft Maintenance.

Airline employment in 1997 stands at 214 and the fleet includes 11 Aerospatiale SA-365C/N Dauphin IIs, 1 each Aerospatiale AS-355F Ecureuil II and Bell 206B JetRanger, 4 Twin Otters, 3 DHC-8-102s, 7 DHC-8-311s, and 1 BAe (HS) 125 bizjet.

Having decided to concentrate on its core business of offshore support, on September 1 Schreiner purchases the 51% controlling interest in KLM ERA Helikopters, B.V. held by KLM Royal Dutch Airlines, N.V. The remaining shares are held by the Rowan Co. via its subsidiary ERA Aviation. The purchase includes six Sikorsky S-61Ns and five S-76Bs. The acquisition will be reformed into Schreiner North Sea Helicopters, B.V. and operate within the Netherlands and British offshore market.

On November 26, Mrs. A. Jorritsma, Minister of Transport of the Netherlands, presides over ceremonies opening the new head offices of Schreiner Aviation Group at Hoofddorp. On December 10, it is announced that the board has authorized merger discussions with Air Holland, N.V.

Airline employment stands at 403 in 1998 and the fleet includes 3 DHC-8-102s, 6 DHC-8-311s, 1 Fokker 50, and 1 Lockheed L-100-30 Hercules freighter.

During the first quarter of 1999, the decision is taken to enhance the company's all-cargo replacement services flown on behalf of other European airlines. Three converted A300B4-203s are requested from C-S

Aviation Services, which promises to deliver them upon their conversion into freighters at BAe Aviation Services, Filton, England. The subsidiary Schreiner Airways Cargo may also operate one of the new freighters on its own account.

The first A300B4-203F is received at the end of May and enters service on intra-European routes on June 1, flying on behalf of KLM (Royal Dutch Airlines, N.V.). As the others arrive, they too begin to fly on behalf of KLM, Sabena Belgian World Airlines, S.A., etc. All of these services will be operated on an ACMI (aircraft, crew, maintenance, and insurance) contract basis.

On January 28, 2000, Canadian Helicopter Corporation (CHC) sells its 33% stake in Helicsa, S.A. to its other major partners, Heli-coptereros, S.A. and Schriener Airways, B.V., for C\$6.8 million.

Arrangements are completed with Sabena Belgian World Airlines, N.V. under which Schriener will operate a DHC-8-102 on Sabena's service from Brussels to Sheffield. The wet-leased turboprop, painted in full Sabena colors, is delivered on January 25. The turboprop begins its Sabena flights, thrice-weekdays and once on Sunday, at the end of the month.

When the third A300B4-203F arrives at the beginning of May, it is sent to Liege Airport to an ACMI contract on behalf of TNT Airways, B.V. The subsidiary Schreiner Airways Cargo retains for itself a single A200B4-203F, which begins twice-weekly (weekend) freight roundtrips on July 1 on a route from London (STN) to Istanbul via Amsterdam.

SCHRIENER NORTH SEA HELICOPTERS, B.V. See **SCHRIENER AIRWAYS, B.V.**

SCHUBACH AVIATION: Palomar Airport, 200 Palomar Airport Road, Carlsbad, California 92008, United States; Phone (760) 929-0307; Fax (760) 929-0365; Year Founded 1995. Schubach is established at McClellan-Palomar Airport in 1995 to provide executive and small group passenger charters throughout the U.S.; 3 full-time and 11 part-time pilots are employed. Revenue flights commence with 2 each British Aerospace BAe (HS) 125 Hawkers and Beech King Air 90s, plus 1 each Cessna 501 Citation I, Learjet 35A Century III, Beech King Air 100, Super King Air 200, and Super King Air 300. A Hawker bizjet is also stationed at Lakefront Airport at New Orleans, Louisiana.

SCIBE AIRLIFT, S.A.: P.O. Box 614, Kinshasa 1, Democratic Republic of the Congo; Phone 243 (12) 26 237; Fax 243 (12) 24386; Code ZM; Year Founded 1979. Originally known as SBZ Cargo, S.A., Scibe is formed at Kinshasa in 1979 to provide regular cargo flights within Zaire and charter and contract service operations to various destinations worldwide. Regular passenger services are undertaken with 4 Vickers Viscount 808Cs leased from the Sultan of Oman, linking the capital's N'Jili Airport with Goma.

During the early 1980s, services are maintained with the 4 Viscounts, 1 Lockheed L-100-30 Hercules freighter, and 1 Boeing 727-44C purchased from South African Airways (Pty.), Ltd. in 1982. A pair of B-727-100s (one each -30 and -89), a Lockheed L-100-30 Hercules freighter, and a de Havilland Canada DHC-6 Twin Otter arrive in 1983.

A B-707-329C is delivered in December 1984. In the first quarter of 1985, the privately owned airline, led by Saolena Bemba, initiates scheduled B-727-100 services from Kinshasa to 12 domestic points. In October, the fleet is increased by the addition of a B-707-321B Stratoliner.

In 1986, two Fokker F.27-400Ms and three F.27-500s join the fleet. In February, three Vickers Viscount 808Cs are sold to Air Charter Service, S.A. The company's Twin Otter flies from Goma to Burundi and Rwanda.

Operations continue apace in 1987-1988, as two more Fokkers are purchased. Three Beech King Air 200s are acquired in 1989 and operations continue to link the carrier's base with Goma, Kisangani, and Lubumbashi. The Hercules freighter is removed early in the year.

Operations continue apace in 1990-1992. These years are particularly costly. On September 10, 1991, one of the two F.27-400Ms is lost in a nonfatal landing accident.

The second F.27-400M with 6 crew and 31 passengers strikes high ground 10 km. out from the runway while on initial approach to Goma on December 14, 1992; there are no survivors.

By 1993–1995, Managing Director Saolona's company employs 978 workers and is the largest airline in Zaire. The fleet now comprises 1 Boeing 707-329C, 1 B-707-321B, the original B-727-100s, 2 Twin Otters, 2 Fokker F.27-400Ms, 3 F.27-500s, and the Hercules. An Antonov An-32 is wet-leased from Moscow Airways late in the year.

Flown by a Russian crew, the An-32 fails its takeoff from Kinsasha on January 8, 1996 and crashes into a crowded market; a crewman is killed, along with 300 citizens on the ground. The survivors must be protected by security personnel from angry crowds.

The turboprops and other smaller aircraft are now sold and schedules are maintained with the two Boeing trijets and the B-707-329C. **Shabair, S.A.** now becomes the country's largest private airline.

Despite the civil war which, in early 1997, sees the nation renamed Democratic Republic of the Congo, Scibe Airlift continues to provide lift to Gbadolite, Goma, Isiro, Kindu, Kisangani, Lubumbashi, Mbandaka, and international destinations. Continued political upheaval does not prevent flights in 1998–1999.

A total of 980 workers are employed at the beginning of 2000. The company's B-727-89 remains in operation. Unhappily, a B-727-30 is not.

SCILLONIA AIRWAYS, LTD.: United Kingdom (1965–1968). Remembered as the last major U.K. operator of the de Havilland DH-89A Dragon Rapide, Scillonia is founded at St. Just's Airfield in Cornwall in the summer of 1965. The first DH-89A is purchased in July; christened *Bishop*, it is employed to fly ad hoc charters until winter.

Three more Dragon Rapides, *Tresco*, *Bryher*, and *Samson*, are delivered in May and June, 1966, respectively. These begin flying a scheduled passenger schedule from Newquay and Land's End to the Scilly Isles. Scheduled operations are suspended in October.

The Scilly Isles scheduled route is resumed in May 1967. Charter flights to northern France, particularly those airlifting crayfish, provide welcome additional income. These operations continue into 1968. In debt and unable to take delivery of two Scottish Aviation Twin Pioneers, Scillonia now suspends operations and is liquidated; the entire company sells for a mere £1,299.

SCOLTA (SOCIEDAD COLOMBIANA DE TRANSPORTES AEREOS, S.A.): Colombia (1947–1948). Following the bankruptcy of **Lineas Aereas TACA de Colombia, S.A.** in May 1947, its three Douglas DC-3s are purchased to form the new entrant SCOLTA, which begins flying from Bogota and Medellin to Cartagena and Barranquilla. Having begun life with **National Air Transport** in the U.S. in 1930, the Ford Tri-Motor 5-AT-86 is acquired from SAGO, the South American Gulf Oil Company, late in the year.

As is the situation with several newly formed Colombian carriers at this time, financial difficulties lead to shut down, in this case, in early 1948.

SCORPIO AVIATION, S.A.E.: 17 Aswan Square, El Mohandesin, Giza, 12411, Egypt; Phone 202 346 3709; Fax 202 346 1287; Code SCP; Year Founded 1990. Mohamed Souka establishes this private operation at Giza in 1990 as a general aviation concern emphasizing agricultural support activities such as crop spraying. In mid-decade, the company is enlarged to provide lightplane air taxi flights, as well as cargo charters.

Scorpio is upgraded in 2000 into a scheduled regional airline with 135 employees. Revenue operations are launched with a pair of leased Aeriens de Transport Regional ATR42-320s. Two more ATR42-320s previously flown by **Ethiopian Airlines, S.C.** are chartered from Fortis Prop Jet and are delivered in mid-June.

SCOTAIRWAYS, LTD.: Cambridge Airport, Cambridge, England, CB5 8RT, United Kingdom; Phone 44 (1223) 292 525; Fax 44 (1223) 292 160; <http://www.scotairways.co.uk>; Code CB; Year Founded

1999. Following a significant cash infusion from a pair of Scottish investors, Brian Souter and his sister, Ann Gloag, founders of Perth, Scotland-based Stagecoach, plc, **Suckling Airways, Ltd.** is renamed on October 13. Capt. Roy Suckling remains managing director, with Merlyn Suckling as marketing director. Ownership is divided between the Sucklings (60%) and Stagecoach, plc (40%).

Employing a fleet of 6 Dornier 328-110s and 2 228-212s, which now begin to wear red tartan tail fins, the 20 daily return flights from Cambridge are maintained to London (LCY/LTN), Manchester, Paris (CDG), Southampton, Amsterdam, Dundee, and Glasgow and from Norwich to Edinburgh. To handle an increase in reservations, a new call center is set up at Dundee.

Enplanements for the year total 110,000.

A total of 150 workers are employed at the beginning of 2000.

Discussions between the airline and Fairchild Dornier are held in early January concerning the possibility of ScotAirways acquiring up to 10 328JETS. An actual order will depend upon the outcome of discussions between the manufacturer and the British CAA concerning the aircraft's certification for use at London (LCY). Four-times-a-day roundtrip Dornier 328-110 service is inaugurated on January 24 from Cambridge to Amsterdam.

Noontime return service is inaugurated on February 1 from Edinburgh to London (LCY). At the end of May, the number of return frequencies to Amsterdam is increased to five per weekday with the introduction of lunchtime flights from Southampton.

Daily frequencies between Edinburgh and London (LCY) are increased from three to four on June 9 and to five on June 12. An extra daily roundtrip is simultaneously added between Southampton and Amsterdam. Also in June, the Edinburgh–Norwich service is relinquished to Humberstone-based **Eastern Airways, Ltd.**

During the summer racing season, the *ScotAirways Porsche*, driven by Stuart Scott, pursues the Pirelli Porsche Cup at various European racetracks. Viewers are able to follow the car on television via Eurosport or Sky Sports 2.

Operated with British Aerospace BAe 146s, more roundtrips are added to the London (LCY) to Edinburgh route on September 18. Additionally, another Sunday return flight begins between the two points. Several of the frequencies are operated with Dornier 328-110s.

Politically, ScotAirways finds itself in hot water at the end of October. Claiming that the narrow stairs of its Dornier 328-110 did not offer sufficient space to load a wheelchair, the airline had refused to board Bert Massie, chairman of the U.K. Disabled Rights Commission, at London (LCY). Massie, it turns out, had been on his way to an Edinburgh social services conference to deliver a speech on the treatment of the disabled, a speech he arrived too late to give.

SCOTT AIR CHARTER: 5480 South Howell Ave., Milwaukee, Wisconsin 53207, United States; Phone (414) 744-1300; Fax (414) 744-0547; Year Founded 1983. SAC is set up at Milwaukee in 1983 to provide executive and small group passenger charters throughout the U.S. Over the next 13 years, the company also introduces revenue flights on a worldwide basis.

By 2000, the company employs 15 pilots and operates a large fleet of business aircraft that includes 1 Canadair 601 Challenger, 2 Cessna 650 Citation IIIs, 1 Learjet 24, 2 Learjet 35A Century IIIs, 3 Beech King Air 100s, 1 Super King Air 200, and 1 King Air 90.

SCOTT AVIATION: 32 West 751 Tower Road, West Chicago, Illinois 60185, United States; Phone (630) 513-2222; Fax (630) 513-2227; Year Founded 1989. SA is set up as an FBO at Dupage Airport in 1989. At the same time, the concern establishes a passenger charter division to operate on-demand flights to destinations in the U.S., Canada, Mexico, and the Bahamas. During the early 1990s, the company also rents facilities at Chicago (MDW).

The workforce in 1998–2000 includes 10 full-time and eight part-time staff. The Dupage fleet features 1 each Cessna 500 Citation I,

C-560 Citation V, Learjet 24, Learjet 25, and Piper PA-31-350 Navajo Chieftain. One each Learjet 35A and British Aerospace BAe (HS) 125-3A Hawker are flown from Chicago (MDW).

SCOTTISH AIRLINES, LTD.: United Kingdom (1946–1961). In January 1946, SAL is formed as the air transport division of Scottish Aviation, Ltd., being simultaneously outfitted with a fleet of 2 Douglas C-47s and 2 Consolidated Liberator IIs fitted to civil standard. The first revenue service is undertaken on January 28, Prestwick–Belfast. Pleasure flying from Prestwick is also launched as an economic pursuit, employing an Airspeed AS.40 Oxford and two Percival Proctors.

Other aircraft added during the year include a Liberator III in February, two more Liberator IIs in July, and three additional DC-3s in September. On May 27, scheduled Liberator Reykjavik–Copenhagen via Prestwick services are initiated on behalf of **Flugfélag Islands, H.F. (2)/Icelandair**.

A six-month contract is signed with **KLM (Royal Dutch Airlines, N.V.)** in August for replacement service Prestwick–Amsterdam. SA takes a prewar Fokker F-XXII out of storage in October and briefly employs it to fly from Prestwick to Belfast.

Enplanements for the first year total 28,738.

In January 1947, the carrier begins every-two-weeks nonscheduled DC-3 flights from Prestwick to Lisbon. Under contract to **British European Airways Corporation (BEA)**, Scottish Airlines, Ltd. in February takes over the routes of the state carrier's merger partners **Railway Air Services, Ltd.** and **Scottish Airways, Ltd.** The KLM contract expires on March 31; however, company aircraft now undertake Prestwick to Paris (LBG) services on behalf of **Air France**.

In late spring, charter services are initiated from Prestwick to Brussels via Manchester on behalf of the Belgian independent **Compagnie Belge de Transports Aériens, S.A. (COBETA)**. The replacement contract with **British European Airways Corporation (BEA)** expires at the end of July.

On November 21 in Athens, company officials join with the Greek armed forces and pension fund in founding **Hellenic Airlines, S.A. (Hellas)**; SAL pledges 40% capitalization, plus technical, management, and training assistance. Late in the year, these same officials join Luxembourg government and private interests in forming **Luxembourg Airlines, S.A.**; Scottish Airlines Capt. R. M. Lacy is named managing director. Meanwhile, a number of DC-3s, dispatched to Karachi, participate in Operation India, the airlift of Hindu refugees from newly formed Pakistan into India. During the year, three more DC-3s are acquired.

Passenger bookings accelerate to 43,702.

In February and March 1948, a Liberator II and three DC-3s are sold to **Hellenic Airlines, S.A.** and are employed, beginning in February, to initiate that carrier's scheduled services from Athens to Salonika, Rhodes, Crete, Larissa, and London. At the same time, **Luxembourg Airlines, S.A.**, employing two DC-3s leased and one purchased from Scottish Airlines, Ltd., begins flying to Paris, Zurich, and Frankfurt.

During the summer tourist season, DC-3 charters are regularly flown from Prestwick to the Isle of Man and from London (Northolt) to Zurich. Three de Havilland DH 89As are purchased in August.

During the first three weeks of August, two DC-3s and a Liberator II participate in the Berlin Airlift, flying 116 sorties from Fassberg.

On August 27, the three aircraft are withdrawn and together with another Liberator, are assigned to participate in the August–October milk airlift from Belfast to Blackpool and Liverpool.

During this operation, a Liberator II is destroyed in a crash at Speke on October 13. On November 15, company Liberators inaugurate Lille to London fabric charters on behalf of LEP Air Services.

Two Liberators converted to tanker standard are sent to Schleswigland in mid-February 1949 to resume Scottish Airlines, Ltd. representation in the Berlin Airlift. On April 1, a six-month agreement is signed with **British Overseas Airways Corporation (BOAC)** whereby the independent supplies the crews needed to continue the state carrier's Prestwick to Montreal Liberator service.

An associate agreement is signed with **British European Airways Corporation (BEA)** under terms of which company DC-3s fly a scheduled service from Prestwick to Isle of Man. Contract charter and ad hoc passenger flights are undertaken to southern Europe and the Middle East during the summer.

The two ex-military B-24s, now tankers, conclude their German service on July 12, having flown 381 sorties since February. Meanwhile, on July 23, a DH-89A is lost in a crash at Prestwick.

Following their return to Prestwick, one of the B-24s is sold to **Hellenic Airlines, S.A.** in November. A C-47A with four crew and a passenger fails its initial climb from Northolt Airfield on December 19; although the aircraft must be written off following this accident, there are no fatalities.

Various charters are undertaken, primarily by three DC-3s, during 1950, including a number to the Middle East on behalf of the British Air Ministry. In October, the carrier's Liberator III, leased to **Hellenic Airlines, S.A.** the previous year, is withdrawn. Other fleet changes during the year include the purchase of a DC-3 in January and the removal of a Liberator II in April.

During the first quarter of 1951, Air Ministry charters are flown in Britain, Europe, and the Middle East and all-cargo flights from London (Northolt) to Continental destinations are subchartered from **British European Airways Corporation (BEA)**. On June 9, scheduled DC-3 service is inaugurated from Prestwick to London (Northolt) via Burtonwood. During the summer, nonscheduled all-cargo and passenger DC-3 flights are made London (Northolt)–Dukhan on behalf of Iraq Petroleum Company.

On September 28, the carrier, which until now has actually been a division of Scottish Aviation operating under a marketing title, is reformed and registered as an airline company under the title **Scottish Airlines (Prestwick), Ltd.**, with share capital of £100. Cargo and mail flights are made in November and December on behalf of BEA from London (Northolt) to Milan, Hanover, and Brussels. The Prestwick–Isle of Man service, normally suspended upon the onset of bad weather, is continued during the winter season.

Enplanements for the year total 21,084.

Basra and Bahrain join Dukhan in 1952 as destinations flown by company DC-3s on behalf of Iraq Petroleum Company. To support a new Air Ministry contract, SAL, in October, purchases three Avro York Is, sending them for modifications. The scheduled routes flown in 1951 are maintained while various personnel charters to the Continent are also made. The Fokker F-XXII and three DC-3s are sold during the year.

Passenger boardings grow during the 12 months to 30,198.

The first York I enters service on January 30, 1953 from a base at London (STN), followed by the second two in February and May, respectively. The three carry young Cadets to and from Montreal during the year while also undertaking all-cargo transatlantic charters. Meanwhile, in February, the unprofitable Prestwick to London (Northolt) scheduled is suspended.

The summer's normal ad hoc charters are again flown while the Isle of Man scheduled route is continued. Airline employment at year's end totals 59. With three DC-3s and the last DH-89A sold, the fleet comprises two DC-3s and three York Is.

A total of 30,739 passengers are flown on the year, 10,788 on scheduled services.

New Air Ministry "trooping" contracts are received in early 1954 for flights to Cyprus, Malta, and the Suez Canal.

An Avro 685 York C.1 with three crew is lost while landing at Luqa Airport, Malta, on April 13; there are no fatalities, but the aircraft must be written off.

A second Avro, purchased to replace the one lost in April, is destroyed in a takeoff failure at London (STN) on September 22. Two more York Is are purchased in July and November, respectively. With capacity severely cut, the airline can only transport 24,021 passengers during the year.

A DC-3 is sold in January 1955 and replaced by another York I. Charter and scheduled operations, the former primarily on behalf of the Air Ministry, continue throughout the year and in the next. Two more York

Is are lost in **1956** crashes. Under charter to return troops to the U.K., a chartered York I with a crew of 5 and carrying 45 soldiers from Egypt to Essex on February 18, develops engine trouble and crashes at Zurrieq, Malta, just after takeoff; there are no survivors.

Having failed its takeoff from London (STN) on an April 30 charter, a second Avro 685 York C.1 with 5 crew and 49 passengers is destroyed in the subsequent forced landing (2 dead).

The surviving York Is complete the Air Ministry trooping contract in **1957**. An Avro 685 York C.1 freighter with four crew is lost on approach to London (STN) on December 23; there are no survivors.

A Scottish Aviation Twin Pioneer is purchased in February **1958**, but is immediately leased overseas. Although they fly several charters during the spring and summer, the last two York Is are sold in August. The final remaining aircraft, a DC-3, is employed on the decade-old Prestwick–Isle of Man scheduled service.

During the year, a total of 14,800 passengers are flown.

The Prestwick–Isle of Man route is the much-reduced company's primary business during **1959** and **1960**.

While on a demonstration at Jorhat, India, on March 10 of the latter year, a Scottish Aviation Twin Pioneer 3 with three crew makes a forced landing after failing its initial takeoff climb (two dead).

In February **1961**, Scottish Aviation sells its airline subsidiary to **Dan-Air Services, Ltd.** and the DC-3 is turned over on March 4.

SCOTTISH AIRWAYS, LTD.: United Kingdom (1937–1947). Unable to sustain service, half interest in **Northern and Scottish Airways, Ltd.** is acquired by the London, Midland and Scottish Railroad and its associated motor bus company, David MacBrayne, Ltd. It is merged with Ernest Edmund Fresson's **Highland Airways, Ltd.** (also owned by Whitehall Securities) to form Scottish Airways, Ltd., on August 12, **1937**.

With £100,000 capitalization, LMS, **British Airways, Ltd. (1)**, and David MacBrayne, Ltd. are the principal shareholders. Capt. Fresson, himself, remains on to often pilot revenue flights, as director of the paper Highland, which is the new carrier's northern division.

Enplanements from August–December are 3,629.

A Spartan Cruiser III obtained in the merger is destroyed in a crash at Largs, Ayrshire, on January 14, **1938**. Two de Havilland DH 84 Dragon 2s are sold in February and March, respectively; a new DH 89A Dragon Rapide joins the fleet in April. On May 2, the DH 89A inaugurates Glasgow (Renfrew)–Lerwick (Sumburgh) service via Perth, Inverness, Wick, and Kirkwall. A new Spartan Cruiser II is acquired in June. **Highland Airways, Ltd.** is completed submerged in August and stops flying.

On October 21, in accordance with the Air Navigation Order of September 16, the new ATLB grants the carrier route certification from Inverness to Shetland, from Kirkwall to Longhope, Westray, North Ronaldsay, Sanday, Stronsay, and Wick.

Passenger bookings for the year accelerate to 7,250.

Kirkwall–Glasgow flights begin on May 15, **1939**. Flying a company DH-84 Dragon, Capt. Fresson inaugurates a thrice-weekly airmail route from Inverness to North Ronaldsay via Wick and Kirkwall, on July 31. Two DH 89As are added in July and August, followed by a third in November. Meanwhile, the four-engine Fokker F-XXII *Papegaai* (Parrot) is acquired from **KLM (Royal Dutch Airlines, N.V.)** on September 1; it is rechristened *Sylvia* and will be employed as a navigation trainer operating from Prestwick. At the same time, the one and only Fokker F-XXXVI, the first four-engine airliner built by the Dutch plane maker, is also acquired.

On September 3, war is declared on Germany and all civil flying ceases. Glasgow (Renfrew)–Campbeltown and Islay services are resumed on September 11 and the next day, DH 89A flights are restarted between the Orkney Islands and between Inverness and Kirkwall via Wick. On October 2, a regular mail route is established between Glasgow and Campbeltown. Capt. Fresson begins a charter service to Shetland from Inverness and Kirkwall on November 1.

A total of 8,881 passengers are carried on the year.

Two DH 84s are lost in crashes in early **1940**; one at Inverness on February 14 and the other at Kirkwall on April 19. Meanwhile, a Dragon Rapide is destroyed in a crash in the Orkneys on March 18 and the Spartan Cruiser II is sold in April. On May 5, the company becomes one of seven joining with the Secretary of State for Air to form the **Associated Airways Joint Committee** to govern the wartime operation of domestic air services. The company's Liverpool–Glasgow via Belfast route is reopened the next day. On May 14, flights from Glasgow (Renfrew) to North Uist via Tiree, Barra, and Benbecula, are resumed.

Between May 22 and June 2, company aircraft participate in the evacuation of British Expeditionary Force troops from Dunkirk under auspices of the AAJC. Company aircraft are recalled to the French rescue operation on June 14, except for one DH 84 that is allowed to continue a restricted Inverness–Kirkwall service. Ten days later, AAJC duty completed, two routes are reopened from Glasgow: to Islay via Campbeltown and to the Hebrides. Full Inverness–Kirkwall DH 89A service is resumed on June 26. Capt. Fresson, flying a DH 89A, reopens the Shetland extension of the carrier's Inverness–Kirkwall service. The F-XXXVI is scrapped later in the year.

Enplanements climb to 9,832.

These flights to outlying destinations are maintained in **1941–1943**. Two Dragon Rapides are destroyed in crashes: one at Stornoway on November 25, 1941, and the second at Glasgow (Renfrew) on February 2, 1943. Passenger boardings climb to the 11,000 mark and remain level for those 3 years.

The Fokker F-XXII navigational trainer *Sylvia* is impressed into national service in October 1941. On May 24, **1944**, thrice-weekly flights are started from Inverness–Stornoway, but are suspended on December 18 due to poor weather. Enplanements advance to 12,395.

In order to connect with the transatlantic service of **Trans-Canada Air Lines, Ltd.** the company, in cooperation with **Railroad Air Services, Ltd.**, begins Glasgow (Renfrew)–London (Croydon) service on April 9, **1945**, via Prestwick (the Canadian terminus) and Liverpool and Inverness to Stornoway flights also recommence on April 9. Air letter operations from Stornoway to Glasgow (Renfrew) begin on July 2. A poor airstrip forces cancellation of North Uist service on October 8.

Bookings for the year reach 14,443. During the war years, the carrier has been able to upgrade its fleet by the addition of 9 Dragon Rapides.

All wartime restrictions on civil flying are lifted on January 1, **1946**. On January 28, the company begins a Prestwick–Belfast service with the Fokker F-XXII *Sylvia*, returned from national service and refitted as a transport. Minus the Perth stop, the prewar Glasgow (Renfrew)–Shetland frequency via Inverness and Orkney is resumed on April 15. **British European Airways Corporation (BEA)** is formed on August 1. On September 2, Douglas DC-3 service is inaugurated from London (Northolt)–Prestwick under BEA charter.

A DH 89A flies into a hill north of Glasgow (Renfrew) on September 27 (seven dead). Employing DC-3s/DH-89As in cooperation with **Railway Air Services, Ltd.** and under BEA charter, flights begin north and south from London (Northolt)–Aberdeen via Glasgow (Renfrew) and Prestwick on November 18. On December 20, a DH 89A crashes into a row of houses in Middlesex (two dead).

The highest annual passenger traffic total for the airline's decade-long history is recorded: 65,916.

On February 1, **1947**, the carrier is one of the wartime **Associated Airways Joint Committee** members merged into the new **British European Airways Corporation (BEA)**.

SCOTTISH EUROPEAN AIRWAYS, LTD.: United Kingdom (1984–1991). Originally known as **Scottish Executive Airways, Ltd.**, SEA is organized and incorporated at Edinburgh in the spring of **1984**. Orders are placed for SAAB-Fairchild SF340s and certificates are received from the CAA. Although it is hoped to begin flying in **1985**, operations do not actually commence.

The operating authority of failed **Chieftain Airways, Ltd.** is acquired in early **1988**. Managing Director David Short obtains two British Aerospace

BAe (HS) 748-B2s and inaugurates services from Glasgow Airport to Frankfurt and Brussels in **1989**. In May, Short announces that equity in the airline has been doubled through an investment by a group of local businessmen.

A total of 20,000 passengers are carried on the year.

In February **1990**, a major infusion of capital is received from several companies, including Air UK Group and FFV Aerotech. The funds provided are employed to acquire two BAC 1-11 jetliners, once owned by **Braniff International Airways**, and the route network is expanded from European cities to Edinburgh and Newcastle. Unable to attract sufficient boardings to cover expenses, the carrier sees its BAes grounded for nonpayment of debts and fees. The carrier enters liquidation in April.

Prior to its failure, a total of 1,813 passengers are transported on the year.

Touche Ross administrator Robin Wilson attempts to revive the carrier in **1991**. Approval is obtained from the creditors for a plan under which an Ali Ghandour-led consortium will purchase and restart the airline; the scheme is submitted to the government, which gives its approval in January on condition that the regional be fully funded by April. When capitalization is not forthcoming, all route licenses are revoked and all further rescue efforts cease in July. The liquidation process, on hold over a year, is completed.

SCOTTISH EXECUTIVE AIRWAYS, LTD. *See* **SCOTTISH EUROPEAN AIRWAYS, LTD.**

SCOTTISH MOTOR TRACTION COMPANY, LTD.: United Kingdom (1932). Employing a de Havilland DH 83 Fox Moth, this bus operator's subsidiary is formed in late spring **1932** and begins air taxi service between Scottish destinations on July 18. Business being insufficient following the summer season, the company ceases its aerial operations on October 31.

SCOTSDALE CHARTER. *See* **SUN WEST AIRLINES**

SCRUSE AIR (PTY.), LTD.: Australia (1975–1982). To perform such duties as shark spotting, fire-fighting control, beach rescue, and general charter, Scrusse Air (Pty.), Ltd. is established by Joe Scrusse at West Gosford, New South Wales, on August 6, **1975**. Like **Aeromech Airlines** in the U.S., Scrusse Air is a family business. In addition to Mr. Scrusse as managing director, Mrs. Phyllis Scrusse is secretary and Joe Scrusse Jr. is chief pilot.

Three years later, on September 25, **1978**, scheduled commuter operations are launched to Mascot Airport in Sydney. By November **1981**, the fleet comprises a Partenavia P-68 and two Bell 206B JetRangers. Significant increases in expenses (led by radically higher fuel costs) and less traffic caused by recession force the company to go under in **1982**.

SEA AIR SHUTTLE: United States (1990–1992). Grounded since Hurricane Hugo in **1989**, **Virgin Islands Seaplane Shuttle** regroups during **1990** and is renamed. Employing 3 Grumman G-73 Mallards, it resumes scheduled services in March **1991**. A total of 8,000 passengers are flown on the year and revenues of \$700,000 are generated.

Early in **1992**, SAS files for Chapter XI bankruptcy and ceases operations.

SEA AIRMOTIVE. *See* **SEAIR ALASKAN AIRLINES**

SEA AND SUN AIRLINES: United States (1984–1985). Controlled by the Netherlands Antilles company Seagrove Holdings, S&S is established at New York in the summer of **1984** to operate international passenger charters, primarily to St. Martin. Four Douglas DC-8-62s are acquired and employed to begin revenue services in October.

The initial season does not go well and the decision is taken to lease half the fleet to the Los Angeles-based company **Pacific East Air**. With insufficient funding to undertake another winter holiday schedule, the company shuts down before its first birthday.

SEA BEE AIR, LTD.: New Zealand (1955–1991). Sea Bee Air, Ltd. is established at Auckland in **1955** to provide passenger and cargo air charter flights to various destinations on the upper half of the nation's North Island. Nonscheduled services are maintained for a decade with a Piper Aztec.

When the amphibian division of **Mount Cook Airlines, Ltd.** is closed down at the end of April **1976**, its employees purchase Sea Bee, along with MCA's Grumman G-21A Goose and three Grumman G-44A Widgeons. One Widgeon is leased to **Stewart Island Airways, Ltd.** The proceeds of the sale allow Mount Cook to purchase a Hawker Siddeley HS 748 while the transaction provides the basis under which Sea Bee's 13 employees are able to launch scheduled commuter services in November, at which the Stewart Island lease is ended.

Destinations regularly linked to Mechanics Bay in downtown Auckland include Port Fitzroy, Tryphena, and Whangaparapara on Great Barrier Island, Pakatos Island, and Paihia and Waltangi on the Bay of Islands. In October **1977**, a second G-21A joins the fleet.

Two years later, in July **1979**, charter flights are inaugurated on behalf of **Fiji Air, Ltd.** to destinations within the Fiji group. From a base at Funafuti, the company, in March **1980**, undertakes three years of non-scheduled services on behalf of the Tuvaluan government to its nine atolls. Charters are also flown to destinations in the Tokelau, Kiribati, Samoa, Nauru, and Cook Island groups.

The Fiji operation ends in July **1981** when the assigned Widgeon returns to Auckland for a refit. In August, a G-21G Turbo Goose replaces the Widgeon employed on the charter service to the Cook and other groups.

Beginning in October **1982**, a G-21A based at Fiji begins a two year charter operation to holiday destinations on behalf of Nadi-based Sun Tours. The company's Turbo Goose becomes the first aircraft to ever land at Rakahanga, Cook Islands, when that destination's new airport is opened in December. The Fiji flights on behalf of Sun Tours ends on October 27, **1984**.

Operations continue apace in **1985–1986**; however, the company's demise appears on the horizon in May **1987** when fast boat services from Auckland to Waiheke Island and Great Barrier Island, slower but 50% as expensive, steal large numbers of the 45,000 annual passenger average. By the end of August, Sea Bee must discontinue its flights to Waiheke Island.

In **1989**, Sea Bee is transformed into a holding company for a new subsidiary, **Great Barrier Airlines, Ltd.**, which operates a Grumman G-21A from Auckland to the namesake island. In August **1991**, this service is ended as Sea Bee and Great Barrier, during a time of high recession, close down and sell their Goose to a new American owner.

SEABOARD AIRLINES (PTY.), LTD.: Australia (1987–1990). Founded at Sydney in **1987**, Seaboard undertakes scheduled commuter flights linking the New South Wales capital with Brisbane, Ballina, Canberra, Hobart, and Sale. Managing Director Michael Bartlett's initial fleet comprises 2 de Havilland Canada DHC-6-300 Twin Otters, an Embraer EMB-110P1 Bandeirantes, and 3 Piper PA-31-350 Navajo Chieftains.

Unable to obtain economic viability in a difficult market, the new entrant is forced out of business in **1990**.

SEABOARD & WESTERN AIRLINES: United States (1946–1961). The only U.S. carrier initially established as an all-cargo airline on a transoceanic route, Seaboard & Western Airlines is organized in New York City by former Army Air Transport Command pilots Arthur and Raymond Norden, Carl D. Brell, Warren H. Renninger, and Wallace P. Neth on September 16, **1946**.

Unlike most of the domestic cargo operations established just after World War II, this one sets out to provide scheduled cargo service over the highly competitive North Atlantic. The company's lone war-surplus Douglas C-54 (military DC-4) inaugurates roundtrips on May 10, **1947**, with a flight to the emerging trading center that is Luxembourg. This is the first commercial all-cargo run across the Atlantic.

On July 8, Seaboard is certified as a "Large Irregular" by the CAB and begins to offer semi-regular, on-demand transatlantic charters. During the remainder of the decade, company business grows rapidly, largely as a result of contracts with the International Relief Organization (IRO).

A highlight occurs on July 9, 1948 when a C-54 makes the first freight flight into New York (IDL); arriving from Paris, the cargo is a French racehorse Whirling Ruston. When the aircraft departs later in the day, it represents the first flight to Europe, freight or otherwise, from Idlewild. A Curtiss C-46 Commando freighter is leased from the USAF in August and on October 3, a C-54 transports a record 15,530 pounds of freight from Idlewild to Europe.

On June 18, 1949, the company shares a contract with **Transocean Air Lines (TAL)** from the IRO and Youth Argosy for the transport of U.S. students to Europe and the carriage of displaced persons from Europe to America. Two more C-46s are chartered from the USAF in August.

On May 20, 1950, the CAB grants the carrier permission to fly educational and religious group charters, including summer student charters, to Europe on behalf of Youth Argosy.

On June 6, as the result of infringements of privilege by other carriers of the permission granted on May 20, the CAB orders changes. Among these is a demand that Seaboard stop flying what appears to be regularly scheduled passenger and cargo flights instead of charters. On July 5, a flight scheduled to depart with 65 passengers is postponed when the DOD requisitions the two C-54s involved for Korean service.

A C-54B with six crew crashes while on final approach to the airport at Reykjavik, Iceland, on March 30, 1951; although the aircraft is destroyed, there are no fatalities.

One of the leased C-46s is lost in an accident early in the year and the other two are returned to the military. The fleet of C-54/DC-4s is increased in December from 5 to 12 and \$10 million worth of orders are placed with Lockheed for 4 L-1049D Constellation freighters, plus a stock of spare parts.

A C-54A with four crew must be written off after a hard landing at Pisa, Italy, on January 27, 1952; there are no fatalities.

On March 15, one of the big Douglas transports lands at Belgrade as the first U.S. commercial airliner to enter Yugoslavia since World War II. The next day, another C-54A transports a record 16,014 pounds of cargo from Germany to New York.

On June 18, Seaboard is granted unlimited landing rights in Luxembourg for the next 21 years and on October 8, Hamburg is added as a stop on the West German freight service. In November, the company contracts with **Aer Lingus Irish Airlines, Ltd.**'s international division, **Aerlinite Eireanne, Ltd.**, to provide flight equipment that will allow the Irish carrier to begin transatlantic flights during the new year.

The CAB in 1953 declines to give Aer Lingus Irish Airlines certification into the U.S. for more than two years and the plan by Seaboard to offer it flight equipment now falls through. On March 12, a new contract is signed for weekly cargo flights to Hamburg. A 16,000-pound section of an oil tanker is flown from New York to Italy on July 21, the largest single unit of anything thus far flown across the Atlantic. In November, a record 2.99 million ton-miles of freight are flown.

On May 19, 1954, a five-year certificate is awarded by the CAB for a transatlantic freight route from New York to Germany and Switzerland; there will be a delay in obtaining final approval. The first L-1049D is delivered on August 19 and is christened *American Air Trader*; the *Zurich Air Trader* and the *Paris Air Trader* will follow during the next month. On September 1, the company wins a \$3-million, half-year military charter (later renewed) to fly freight, personnel, and dependents between the U.S. and Europe. This DOD pact gives Seaboard the resources and stature necessary to receive permanent scheduled certification.

With White House approval from President Eisenhower (necessary in cases involving foreign destinations) finally received, the CAB, on August 16, grants Seaboard route authority to Europe from U.S. cities in the Northeast. This scheduled service, company officials know, might be risky, as the carrier will have to compete with a variety of international passenger airlines that also carry freight across the Atlantic.

The DC-4s and Connies, flying from not only New York, but Philadelphia and Baltimore as well, launch charter flights on September 14 to Frankfurt, Hamburg, and Zurich via London and Paris.

During the summer of 1955, three L-1049Ds are leased for two years to **British Overseas Airways Corporation (BOAC)**, which will operate them from New York to Bermuda. On October 2, a contract is signed with **United Air Lines** permitting a single airway bill for freight shipments to and from Europe and to and from any point in the U.S. served by United. Cancellation of the unprofitable London to New York route after 10 months by the U.K. independent **Airwork, Ltd.** is seen as a boon by Seaboard, which immediately prepares to assume it, ordering five L-1049Hs.

Scheduled roundtrip C-54 cargo service to Europe is inaugurated on April 10, 1956. Late in the month, the three Constellation freighters leased to the British flag carrier are returned. During the summer, the *American Air Trader* and *Zurich Air Trader* are modified to L-1049H standard. A 20-ton Univac computer is flown to Germany on August 6-7; the cargo is the heaviest shipped by air across the Atlantic to date.

Late in the year, the first of five ordered Lockheed L-1049H freighters are placed on the line and the *Paris Air Trader*, fitted with wing tanks, is leased to **Eastern Air Lines** to fly the winter's holiday route from New York to Miami.

Interline cargo-handling agreements are signed with **Allegheny Airlines (1)**, **Central Airlines**, and **Trans-Texas Airlines** on August 17, 1957. Daily Constellation cargo flights are launched on September 1. A C-46 is leased in Germany and stationed at Frankfurt to feed incoming cargo to other European destinations.

The fleet at the beginning of 1958 comprises 3 C-54s and 10 L-1049Hs, plus 1 L-1049E now purchased from **Cubana (Compania Cubana de Aviacion, S.A.)** and an L-1049G leased from **Deutsche Lufthansa, A.G.** Several of the Constellations are placed under charter to **British Overseas Airways Corporation (BOAC)** to operate roundtrip New York-London cargo services and during the first quarter, **Sabena Belgian World Airlines, S.A.** charters three L-1049Hs for the duration of the Brussels Exhibition.

The 1952 agreement with **Aerlinite Eireann, Ltd.** to provide flight equipment for transatlantic services is renewed. As a result, thrice-weekly L-1049H roundtrips commence on April 28 between Dublin and New York via Shannon. The frequency becomes daily during the summer, at the same time an L-1049H is chartered to **TAP-Air Portugal, S.A.**

Boston becomes a stop on the Irish contract route in October. On November 10, an L-1049D with five crew goes out of control while landing at New York's Idlewild Airport and crashes into a **Trans-Canada Airways, Ltd.** Vickers Viscount 757; both aircraft are burned out without loss of life.

Buoyed by additional military contracts received during and since the previous year, the company seeks to increase its fleet late in 1959 by ordering five Canadair CL-44Ds.

Despite this growth, working the North Atlantic is proving to be as tough a proposition as company officials originally feared. Additionally, the MATS comes to rely upon its own airlift assets to a greater degree, reducing the number of its contract flights. In the three-year period from 1959 to 1961, the carrier suffers a cumulative net loss of \$4 million.

A new management team is brought in on November 1, 1960, headed by President Richard M. Jackson and is asked to make dramatic efforts to save the transocean pioneer from bankruptcy. On December 14, **Aer Lingus Irish Airlines** is able to introduce B-720Bs on its transatlantic service and terminates the contract with Seaboard for L-1049Hs.

Following a complete company reorganization and refinancing, Jackson's operation assumes a whole new corporate image as **Seaboard World Airlines** in April 1961.

SEABOARD WORLD AIRLINES: United States (1961-1980). Following a complete corporate shakeup, **Seaboard & Western Airlines** is renamed in April 1961. Five new Canadair CL-44Ds purchased under the previous identity are placed into service during the remainder of the year.

In 1962, the carrier records its first profit in six years, some of it based on the lease of a Lockheed L-1049E, formerly flown by **Cubana (Compania Cubana de Aviacion, S.A.)**, to **Intercontinental Airways** and the charter of three L-1049Ds and four L-1049Hs to **Capitol Airways**.

Widespread use of the fixed-cost block space takes off in 1963 as the airline requires shippers to pay for leased blocks of space used or not. One of the most profitable arrangements will be concluded in the spring when **British Overseas Airways Corporation (BOAC)** and Seaboard enter into a joint venture contract. Under terms of their pact, Seaboard operates transatlantic services four times a week and BOAC three. BOAC pays for two pallets on every Seaboard flight and Seaboard does likewise. Although both partners expect to make money, late departure penalty clauses will, on occasion, be invoked. BOAC replaces its DC-7Cs with new Canadair CL-44Ds on September 30.

Revenues for the year total \$27,248,174.

By 1964, the worst of its previous financial difficulties appear to be behind the airline. The workforce totals 1,015 and the fleet comprises 17 aircraft. As the year progresses, most of the Lockheed L-1049Hs are retired in favor of seven Canadairs, which provide the bulk of the company's all-cargo service. Interline agreements are in hand with the European airlines **Deutsche Lufthansa, A.G.**, **Swissair, A.G.**, and **British Overseas Airways Corporation (BOAC)** whereby they now begin to book a set proportion of Seaboard's daily capacity (block-space).

In June, President Richard M. Jackson is able to lease a Douglas DC-8-63F from its manufacturer, thereby joining the ranks of the larger all-freight airlines—and entering the jet age. Incidentally, that airliner, employed on a Monday to Friday transatlantic schedule, is thereafter leased to **Trans-Caribbean Airways** on weekends.

A total of 83,572 passengers are flown on military contracts. Revenue freight ton-miles flown are 83,109. Revenues advance 12.8% to \$31,247,905 and profits jump 53% to a record \$2,759,195.

Although the future appears bright by late December, the Christmas to New Year holidays actually conclude the what turns out to be the company's best year. Thereafter, the battle to survive is a losing one. Undiversified, Seaboard is forced to compete over its routes with the freight capacity of the passenger airlines, which annually become more competent in the cargo field.

Although there are bright spots and despite military charter assistance, the air freight industry as a whole will fail to achieve the traffic potential its prophets have foretold. As a result, few companies are able to reach the fortieth anniversary of the 1945 cargo spurt.

The workforce in 1965 is 1,164 and the fleet comprises 6 aircraft: 3 CL-44Ds and 3 DC-8Fs. Orders remain outstanding for one more DC-8F and two DC-8-63Fs. A second DC-8-63F is leased in the fall. Construction begins on a \$4-million cargo terminal and operations center at New York (JFK).

Freight ton-miles increase to 135,649,019 and 74,518 charter passengers are flown. Profits climb to \$4.7 million.

Early in 1966, two additional DC-8Fs are received. Employing its mixed fleet, Seaboard continues its worldwide, undiversified services, receiving permanent certification on February 12. Confirmed on its transatlantic routes by the CAB, the freighter extends its authority to Italy, Sweden, Denmark, and Norway. In March, a retired L-1049 is sold to **LAPA (Lineas Aereas Patagonicas Argentinas, S.A.)** and two are provided to **Capitol Airways**.

Boston is added as a U.S. co-terminal. The improvements at New York's Kennedy Airport are completed late in the year.

A total of 233,055,000 freight ton-miles are flown during the year.

In March 1967, Seaboard World's New York (JFK) cargo terminal and operations center, now valued at \$5 million, goes into operation. Construction is started on a similar facility at London (LHR). The employee population numbers 1,501 and the fleet consists of 6 DC-8Fs, including 1 received this year. Orders remain outstanding for 2 Boeing 707-320CFs and 12 DC-8-63CFs.

A total of 32,000 charter passengers are flown and the number of freight ton-miles flown increases to 264,771,850.

The employee population numbers 2,000 in 1968. The two Boeing freighters are received during the first quarter. Later, three DC-8-63Fs also arrive. New terminals at Frankfurt and London are occupied and during the last quarter, the airline becomes the leading transatlantic air freight operator.

Charter passenger boardings skyrocket an unbelievable 522% to 199,000 as Seaboard also puts in 281.28 million freight ton-miles. Revenues advance 19.3% to \$65,494,000.

The workforce in 1969 is 1,615. Nine additional DC-8-63Fs are delivered throughout the year and on June 28, service to Europe is launched from the Midwest and Pacific coast.

While on a training flight from Oakland on October 17, a DC-8-63CF with five crew aboard is destroyed as the result of a bad landing back at its point of origin; there are no fatalities.

On the year, a total of 289.97 million freight-ton miles are flown.

Airline employment is reduced 13% in 1970 to 1,856. A pilots strike begins on October 24, but ends by agreement two days later.

A total of 173,835 military contract passengers are flown this year and the company's 14 DC-8 Jet Traders fly 274.6 million freight-ton miles, a 5.6% decline. Revenues are \$83.8 million, expenses \$76 million, and an operating profit of \$7,762,000. A net \$1.49-million loss must, however, be absorbed.

Despite a decline in military demand as Vietnam requirements decrease, Seaboard still flies 363.99 million freight ton-miles in 1971. MAC-generated personnel enplanements total 99,820.

The workforce in 1972 numbers 1,850. Military traffic ferried by the nation's second largest all-cargo carrier continues to decline, but is replaced by civilian services.

Some 70,000 military personnel are boarded during the year, a decline of 42.6%. On the other hand, freight traffic is up by 24.4%. The company remains the leading all-cargo operator on the North Atlantic, hauling 15.5% of the total tonnage transported there. On record revenues of \$99.2 million, a \$5.24-million net profit is reported.

In 1973, 160 employees are laid off. In February, Seaboard wins the approval of the U.S. and West German governments for a high-volume, 30,000-kg. rate, a tariff later approved by 4 other European governments. In addition, three B-747-245Fs are ordered for delivery the following summer as daily transcontinental all-cargo service across the U.S. is started in late spring. Additional marketing efforts are aimed at securing freight and mail business to replace declining Southeast Asian military business.

Company officials join with their counterparts from **Eastern Air Lines** in petitioning the CAB for an interchange service that will provide the first all-cargo through service between Europe and the U.S. Southwest.

Despite a downturn in FTKs flown to 580 million-plus, Seaboard is still able to report the highest commercial freight tonnage in its history to date. Income declines to \$74.8 million and expenses, due to fuel costs and business decline, rise to \$72.46 million. Still, profits are generated: \$2.34 million (operating) and \$2.39 million (net).

Airline employment in 1974 is 1,780. The first of three ordered B-747-245Fs "Containerships" is delivered on July 31; in August, it is placed into service, flying contract services for the U.S. military between New York and Frankfurt via Paris. Simultaneously, an intermodal air-truck container program (which uses 8' x 8' x 20' containers) is inaugurated.

Freight traffic accelerates 11.8% reaching 619.56 million FTKs flown. Revenues rebound, climbing to \$98.19 million; high operating expenses are exactly the same amount. This "draw" results in zero operating profit. A net profit of \$2.5 million is secured, only a slight gain over the previous year.

Sixty-nine new employees are hired in 1975. Both the massive "Containerships of the Air" and the intermodal program are aggressively marketed.

FTKs operated dip 5% to 591.73 million. Expenses are \$116.82 million and outpace total income of \$110.16 million. As a result, a \$6.66-

million operating loss must be absorbed. A net gain of \$970,000 is, however, realized.

The employee population is increased by 11.6% in 1976 to 1,635. The second B-747-245F Containership joins the fleet on April 30; it is the first aircraft in the world to be powered by Pratt & Whitney's up-engined JT9D-70A engines. The second Jumbojet allows the carrier to transport its huge containers on every transatlantic flight and to provide direct New York-Frankfurt services.

Shortly after the arrival of the new freighter, Chairman Richard Jackson is interviewed by Arthur Wallis. The article, "It's Tough at the Top But That's the Way Seaboard's Richard Jackson Likes It," appears in *Interavia* 31 (June 1976): 529-530.

Still, freight traffic declines by 4% on the year to 626.3 million FTKs. On operating revenues of \$110.73 million, expenses are \$109.63 million and the operating profit is \$1.1 million. After accounting changes leave a net loss of \$2.29 million.

FTKs operated decline again in 1977, down to 544.08 million. Fiscal losses continue to mount.

In February 1978, Tiger International purchases 9.9% shareholding of President Jackson's carrier. Effective May 1, the company begins guaranteed next-day transatlantic parcel express service to London, Paris, and Frankfurt. Destinations visited in Europe now include Shannon, Glasgow, Brussels, London, Hamburg, Frankfurt, London, Munich, Stuttgart, Paris, Nuremberg, Basel, Geneva, Rome, Milan, Zurich, Stockholm and Copenhagen.

The fleet includes 2 B-747-245Fs, 7 DC-8-63CFs, 3 DC-8-16CFs, 1 DC-8-50F. Another B-747-245F remains on order and beginning in October, the two on hand are so configured as to allow the transport of cargo containers on the main deck and passengers in the upper-deck compartment.

During the same month, a B-747-273C is chartered from **World Airways**.

The workforce is increased 2.1% during the year to 1,652. Cargo grows by 5.1% to 573.32 million FTKs and 9,625 charter passengers are flown.

The number of employees grows 5.6% in 1979 to 1,767.

Beginning on August 31, company ALPA members stage a brief, two-day strike; a mediated agreement takes effect on September 1.

The last two B-747-245Fs are delivered on September 6 and 29, respectively.

Passenger charters all but vanish during the year, dropping 92.5% to 5,000. Freight, on the other hand, continues to advance, climbing by 16.9% to 670.01 million FTKs.

Tiger International finds its competitor sufficiently attractive to purchase; on October 1, 1980, at a cost of \$450 million, Seaboard is merged into the only real all-cargo success to this point, **The Flying Tiger Line**, and the leased **World Airways** B-747-273C is returned.

SEABORNE AIRLINES: 34 Strand Street, Christiansted, St. Croix, U.S. Virgin Islands 00820, United States; Phone (340) 773-6442; Fax (340) 713-9077; <http://www.seaborneairlines.com>; Code BB; Year Founded 1990. Chuck Slagle and Kenneth Dole established Seaborne Aviation at Ketchikan, Alaska, in 1990 to offer summer cruise ship passengers sight-seeing flights over the glaciers. The seasonal flights are made with a single float-equipped de Havilland Canada DHC-6-300 VistaLiner (a specially modified Twin Otter with huge passenger windows) chartered from Nevada-based Twin Otter International. When on the water, maneuverability is provided by reversible pitch propellers.

Wishing for off-season income, Slagle establishes Seaborne Seaplane Adventures at Charlotte Amalie in the winter of 1992 to provide interisland passenger charters. Aerial sight-seeing shore excursions for cruise ships are undertaken from the former Antilles Air Boat base at St. Thomas with the float-equipped VistaLiner that has been ferried down from Alaska. Seaborne's north and south operations continue with success in 1993.

The service proves so popular that in 1994 Seaborne is able to obtain a Part 135 air taxi certificate and begin seasonal twice-daily return

flights between St. Croix and St. Thomas on December 6. Flights from the former point are operated off a floating dock at the Kings Alley in downtown Christiansted.

Scheduled twice-daily roundtrips from St. Croix to St. Thomas begin in 1995, along with sight-seeing tours to the British Virgin Islands. A second VistaLiner is acquired to handle the cruise ship traffic. The VistaLiner fleet is expanded by one more turboprop in 1996 and enplanements for the first full year of service total 62,534.

Seaborne receives Part 121 regional air carrier authority in 1997 and enhances its schedule, boosting its St. Croix-St. Thomas shuttle to seven daily roundtrips. The fleet now includes 4 VistaLiners and Seaborne is the only regional airline operating exclusively on floats in the Virgin Islands. Passenger boardings rise 2.3% to 64,006.

Enplanements slip 0.4% in 1998 to 64,000. Customer bookings accelerate 19.5% in 1999 to 76,000.

Airline employment stands at 75 at the beginning of 2000. On April 30, the company's floating dock is moved to the former seaplane ramp; although the area has no permanent structures, plans are announced for the creation of an entire seaplane base.

At mid-year, the Virgin Island and Alaska operations are split. Local entrepreneur and 4,000-hr. airline captain Maurice Kurg takes over operation of the former and reorganizes it, changing its name to Seaborne Airlines. On August 15, Seaborne is sold to a Chicago-based investment group led by principals David E. Ziemer, Omar ErSelcuk, and Richard A. Jensen. Capt. Kurg, who has become an equity partner, remains president/CEO.

The new group will provide the capital needed to strengthen Seaborne's fundamental base of operations, while supporting a well-balanced growth strategy. The arrangement shows immediately in the construction of a new seaplane maintenance and passenger facility at the carrier's Christiansted base.

SEABORNE AVIATION. See SEABORNE AIRLINES

SEACO AIRLINES: United States (1976-1980). Seaco is established at Detroit during the early fall of 1976 to provide scheduled intrastate passenger and cargo (including mail) services. Employing a Piper PA-23 Aztec and Cessna 402, the company inaugurates daily roundtrips in October, linking its base with Lansing, Traverse City, Oscoda, and Alpena.

Operations continue throughout the remainder of the year and in 1977-1980. Services cease in June of the latter year.

SEAGLE AIR, LTD.: Airport, Trencin, 91104, Slovak Republic; Phone 421 (831) 6587 334; Fax 421 (831) 6587 333; <http://www.seagleair.sk>; Year Founded 1995. Seagle Air, Ltd. is established in 1995 to provide lightplane sport and parachute flights at air shows in Slovakia. A flight school is operated and a variety of special contracts are filled, including aerial photography, thermometry and thermography flying, and the towing of advertising banners.

Within three years, the company has grown to a point where a larger aircraft is necessary. To that end, a Let L-410UVP is acquired. In 1998-2000, the new Let is flown on executive and small group passenger charters. It also drops parachutists and in the evenings operates express flights on behalf of **DHL Worldwide Express**.

SEAGREEN AIR TRANSPORT, LTD.: P.O. Box 392, V C Bird International Airport, St. John's, Antigua; Phone 32 (59) 805 325; Fax 32 (59) 804 835; Code ES; Year Founded 1964. Seagreen is established at St. John's on Antigua in 1964 to offer all-cargo charter flights to various Caribbean destinations. During the next two decades, the company undertakes regular, if nonscheduled, flights connecting its base with Miami, San Juan, Dominica, Montserrat, St. Kitts, St. Lucia, St. Martin, and St. Vincent. The fleet in 1982-1986 comprises 1 Convair CV-880CF, 1 Douglas DC-7F, 1 DC-6A, and 2 DC-3s, although the CV-880CF is sold to Haiti Air Freight in 1985.

The company is reorganized in **1987** in order to begin flying world-wide passenger and cargo charters, in addition to maintaining those already underway in the Caribbean. W. Lim is named chairman, R. Koh becomes president, and David Tokoph is named managing director. Additionally, Gary Tokoph is appointed area manager to open a new European base at Ostend, Belgium. Three Boeing 707-336Cs are leased and employed to begin new services from Europe to Caracas, Barbados, Martinique, Guadeloupe, and Mexico.

Only one Boeing transport is operated in **1989**, but it is traded in during **1990** for three new chartered units, one each B-707-323C, B-707-336C, and B-707-351C. To service the new freighters, a maintenance contract is signed with **Royal Jordanian Airlines** in May.

A Convair CV-990A Coronado is leased in **1991** and the B-707-323C is placed into storage in **1992**. Holiday charters are inaugurated by Chairman W. Lim's airline in **1993**, at which point airline employment is increased from 55 to 63.

David Tokoph is president in **1994**, with Gary Tokoph as vice president. Operations continue apace with a fleet that includes 1 each B-707-330B, B-707-336C, and Convair CV-990A.

The B-707-330C is leased to **African International Airways, Ltd.** in **1995** and the Convair is replaced by one each B-727-30 and B-737-202C. The latter two do not work out and are withdrawn in **1996–2000**.

SEAGULL AIR: United States (1988–1989). Seagull Air is founded at Bethel, Alaska, by J. Timothy Cracie in early **1988** to offer scheduled passenger and cargo commuter services to local and regional destinations and bush villages. Revenue Piper and Cessna lightplane flights commence in March, linking the company's base with Kwigillingok, Kongiganak, Tuntatuliak, and smaller points.

Operations continue apace in **1989**; however, several accidents lead the FAA to pull the carrier's operating certificate and ground it on August 9.

SEAGULL AIR LINES: United States (1929–1930). Seagull is established at Salt Lake City, Utah, in the summer of **1929** to offer scheduled passenger flights to Ely. Employing Curtiss Robins, the new entrant inaugurates service in September and maintains it until November **1930** when economic downturn forces it to shut its doors.

SEAIR (PALWAN'S AIRLINE): Clark Hangar 7224, Clark International Airport, Angeles City, Philippines; Phone 63 (45) 599 2384; Fax 63 (45) 599 2383; <http://www.flyseair.com>; Year Founded 1994. Iren Dornier and Nikos Gitsis conceptualize Seair in **1994** as a private airline that will service Club Noah Resort in NE Palawan. Plans are to turn the new concern into an air charter company that can service resorts and other tourist destinations such as Boracay and Busuanga.

Three Dornier 28 nine-passenger aircraft are delivered in February **1995** and in March the company is officially organized as Seair, an air taxi. It applies for and receives its documentation and certificates from the SEC and Philippine Civil Aeronautical Board. On-demand flights to rural tourist destinations begin.

In August, Seair receives its Air Operating Certificate (AOC) from the Philippine Air Transportation Office and registers as an enterprise of the Clark Development Corporation. It receives certification as a scheduled operator in the Clark Air Base, Special Economic Zone. Thrice-daily Dornier 28 roundtrips are now inaugurated from the former USAF base at Clark Field to Manila.

In **1996**, Seair introduces the Let L-410UVP to the Philippines, winning certification for the aircraft that it now places onto its Clark–Manila route. Seair is certified as an ATO authorized repair station in **1997** and begins to service class 2 and 3 aircraft and aircraft engines from other Philippine air transport companies.

In **1998**, the carrier fights and defeats a takeover attempt from an unnamed source and once it is safe, expands its services to rural tourist destinations.

The Dornier 28s are phased out in **1999** and replaced with a second Let. Like the first, it has been acquired via the Ayres Company in the U.S.

Plans are made for route expansion the following year. Regularly scheduled roundtrip flights are inaugurated in **2000** from Clark to Caticlan and to the Palawan communities of Busuanga, El Nido, Sandoval, and Puerto Princesa.

SEAIR ALASKA AIRLINES (SEA AIRMOTIVE): United States (1939–1986). Sea Airmotive is established as an FBO at Anchorage in **1939**. Charter passenger and freight flights are undertaken to local Alaskan communities beginning in **1944**. The company is formally incorporated in **1951**. Operations continue apace for the next 30 years to destinations in the southwestern part of Alaska.

While on initial climb away from Bullen Point on May 25, **1979**, a de Havilland Canada DHC-4 Caribou with three crew is caught in a crosswind and crashes in an extreme nose-down altitude; there are no survivors.

In November **1980**, President A. E. Gay's carrier inaugurates scheduled passenger services linking Seair's base with Bethel, Dillingham, Kenai, and King Salmon. From these markets, flights are made to numerous nearby bush communities.

The fleet in **1981** includes 3 Convair CV-580s, 11 de Havilland Canada DHC-6-300 Twin Otters, 1 Beech Super King Air 200, 4 DHC-2 Turbo Beavers, and 8 Bell 206B JetRanger helicopters.

Although flights are temporarily suspended during February, a total of 58,929 passengers are transported through the remainder of the year, along with 182,617 pounds of freight. On revenues of \$16.3 million, the profits are \$1.7 million (operating) and \$395,773 (net).

Seair is merged into **Tyee Airlines** in July **1982** and is henceforth operated as a subsidiary. Traffic and financial data is initially merged with that of its new parent. However, reports resume in **1983**, during which year a feeder arrangement is signed with **Western Airlines** and a total of 102,000 passengers are flown.

In **1984**, services are extended to Iliamna, Prudhoe Bay, and Deadhorse. The fleet is enlarged through the addition of two CV-580s, one DHC-6-300, and one Beech Super King Air 200.

The number of passengers transported rises 43.1% to 146,000.

Two more CV-580s are delivered in early **1985**, along with another Turbo Beaver. Following the January failure of parent **Tyee Airlines**, Seair is forced to soldier on alone.

While on its initial climb away from Prudhoe Bay on a service to Deadhorse on March 12, a DHC-6-300 with two crew and two passengers suffers severe wing icing that causes the Twin Otter to crash-land 900 m. past the end of the runway; there are no fatalities.

The company performs its final revenue flight on January 18, **1986**.

SEAIR PACIFIC (PTY.), LTD. See AIR WHITSUNDAY (PTY.), LTD.

SEAJET: United States (1984–1985). Dissatisfied with management at **Virgin Island Seaplane Shuttle**, one of the three founders, Daniel H. Lewis, sells his interest at the end of September **1984**, electing to begin a competing schedule. Employing a single float-equipped de Havilland Canada DHC-6-300 that had been received on Columbus Day, SeaJet inaugurates a scheduled roundtrip service between St. Croix and St. Thomas on November 1.

The new service is very popular and in early **1985** a second Twin Otter, a Dash-200, is obtained. Before it can be placed into service, however, the Federal Aviation Administration moves in and shuts the company down over safety concerns involving maintenance.

SEALAND HELICOPTERS, LTD.: Canada (1975–1987). Newfoundland entrepreneur Craig Dobbin establishes Sealand Helicopters, Ltd., at St. John's in **1975** and wins the provincial bid award to provide ferry and air ambulance service for a five-year period. Following discovery of the Hibernia oil field off the east coast of Newfoundland in **1979**, the fleet of 29 helicopters is expanded by the purchase of 9 Aerospatiale AS-332 Super Pumas at C\$6 million each for use in support of the offshore development.

Following non-renewal of the provincial ferry and air ambulance contract in **1980**, Sealand swiftly increases its involvement in the offshore oil business in **1981–1984**, capturing 70% of the air transport-related service in Newfoundland and Nova Scotia. Contracts for service are also fulfilled in Trinidad, Colombia, and Brazil.

The fleet in early **1985** includes 7 Aerospatiale AS 332L Pumas, 8 Bell 206B JetRangers, 6 Bell 206L LongRangers. Seven Super Pumas are on order and are received by year's end, raising the company total of this type to 14.

En route from St. John's to the semisubmersible *SEDCO 709* 234 nm. offshore on April 24, **1986**, a Super Puma with 10 aboard is forced to ditch in the ocean close to its destination. No one aboard is injured and the platform's support vessel *Claymore Sea* is able to tow the drifting aircraft to the *SEDCO 709*, which hoists it aboard the ship for transport back to St. John's.

In July, 16-year veteran Ruthanne Page becomes Canada's first female offshore IFR helicopter pilot while in August the company becomes the first helicopter operator to receive Esso Resources Canada, Ltd.'s Three-Star International Safety Award.

Operations continue apace in **1987**. During the summer, the carrier is merged with **Toronto Helicopters, Ltd.** and **Okanagan Helicopters, Ltd.** to form **CHC Helicopter Corporation, Ltd.**

SEAPLANE SHUTTLE TRANSPORT: United States (1976–1977). Seaplane Shuttle Transport is set up at New York City in early **1976** to follow in the wake of **Downtown Airlines**, which had failed the previous July 27. Employing a float-equipped de Havilland Canada DHC-6-200 Twin Otter, Seaplane duly inaugurates daily roundtrips linking its riverfront base with the floatplane base at Philadelphia.

Just like its predecessor, this tiny commuter also encounters unsolvable financial difficulties; it becomes history before the fall of **1977**.

SECURITY AVIATION: 3600 W. International Airport Road, Anchorage, Alaska 99502, United States; Phone 907 248-2677; Fax 907 248-6911; Year Founded 1962. Security is established at Anchorage in **1962** to operate charter and sight-seeing flights to local and bush destinations. During the 38 years that follow, executive charters are also undertaken. In **2000**, the company employs 14 full-time and 2 part-time pilots who fly a fleet that includes 2 Cessna 441 Conquest IIs, 1 C-T310R Turbo 310, 1 Piper PA-31-350 Navajo Chieftain, and 1 Cessna 550 Citation II bizjet.

SEDALIA-MARSHALL-BOONEVILLE (SMB) STAGE LINES. See **SMB STAGE LINES**

SEDONA SKY TREKS: P.O. Box 10752, Sedona, Arizona 86339, United States; Phone (520) 284-2998; <http://www.skytreks.com>; Year Founded 1994. Tom and Tina Newman establish this tiny charter carrier at Sedona, Arizona, in **1994** to provide air taxi service to communities in its colorful Arizona region, as well as air tours and flight-seeing to the deserts and canyons of the scenic Southwest. Revenue flights begin with 1 each Piper PA-32 Cherokee Six and Cessna 177 Cardinal.

SEDTA (SOCIEDAD ECUATORIANA DE TRANSPORTES AEREOS, S.A.): Ecuador (1937–1941). Pioneer Condor Syndikat promoter Fritz Hammer founds SEDTA at Guayaquil on July 24, **1937**. Majority shareholding is owned by **Deutsche Lufthansa, A.G. (DLH)**, it-

self desirous of additional entrance into the Pacific air transport arena. The German flag line, which must provide total support (except for revenues earned) in the absence of Ecuadorian subsidies, transfers two Junkers W-34s and two Ju-52/3ms, christened *Ecuador* and *Guayas*, to its subsidiary in the spring of **1938**.

On March 4, a W-34 crashes in the mountains, killing all aboard, including founder Hammer. Route development is pushed and service is initiated linking Guayaquil and Quito. Other destinations served by the German cabotage airline include Loja, Cuenca, Salinas, Manta, and Esmeraldas. The Ju-52/3m *Ecuador* is lost in a December 10 accident.

On January 13, **1939**, the *Guayas* is transferred to Sindicato Condor in Brazil, leaving the W-34 *Pinchincha* to maintain the German system until it crashes on September 11. While the *Pinchincha* is under repair, the Ju-52/3m *Azuay* is chartered from Sindicato Condor on November 20.

In May **1940**, SEDTA announces that it will begin flying to the Galapagos Islands. Alarmed by any expansion of German service in South America, the U.S. CAB on November 2, on behalf of the American government, authorizes the giant **Pan American-Grace Airways (PANAGRA)**, with Ecuadorian acquiescence, to begin its own cabotage service within Ecuador, employing the technically superior Douglas DC-2 over routes parallel to SEDTA's. **Pan American-Grace Airways (PANAGRA)** inaugurates DC-2 flights Guayaquil–Quito six days later.

The repaired *Pinchincha* is turned over to the **Sindicato Condor, S.A.** on January 14, **1941**. In February, SEDTA leases another Junkers from Brazil; it joins the *Azuay* in an unequal systemwide contest against **Pan American-Grace Airways (PANAGRA)**'s two speedy DC-2s, beginning on March 16. The Junkers trimotor leased in February is returned at month's end and on April 25 is replaced by another chartered unit, the much-traveled *Aconcagua*.

American pressure on the Ecuadorian government increases in late spring; not only is PANANGRA granted an annual \$180,000 subsidy for airport development, but, starting in summer, SEDTA's aviation fuel supply is stopped. On September 5, the *Azuay* and *Aconcagua* are seized by the government. Without aircraft and fuel, **Deutsche Lufthansa, A.G.**'s SEDTA subsidiary halts operations and its German personnel are withdrawn. The last of the airline's wholly owned prewar South American subsidiaries is finished.

On May 9, **1942**, the Ecuadorian air force hands the *Aconcagua* over to the USAAF. America's only active-duty Ju-52/3m, designated a C-79, is assigned to the U.S. Roads Administration then working in Costa Rica in **1943**, following a tour of duty with the 6th Air Force's 20th Troop Carrier Squadron. After the war, the aircraft passes to **TACA de Nicaragua, S.A.** and is lost in a crash at Monte Carmelo in **1948**.

SEEMAFAER, S.A./SAFAIR (COMPAGNIE DE TRANSPORTS AERIENS): France (1976–1986). Privately owned Seemafer, S.A. is established at Aerodrome Nice-Cote d'Azur in March **1976** to operate cargo charters to various destinations in southern Europe, the Mideast, and the Mediterranean. President Francis Lemonnier and General Manager Pierre Bodin recruit a workforce of 30 and purchase a fleet comprising 4 Douglas DC-6As, 1 DC-4, and 1 Aviation Traders ATL-98 Carvair.

The company is reorganized in February **1980** as a public stock company; the principal base is moved to Nantes. Services continue, although by **1984–1985**, the fleet has been upgraded to include a Douglas DC-8-55F and two Lockheed L-100-30 Hercules freighters. The company stops flying in **1986**.

SEMO AIRWAYS: United States (1969–1984). Semo is established in **1969** as the scheduled airline division of Semo Aviation, an FBO at Malden, Missouri, to offer scheduled air taxi flights linking the company's base with Poplar Bluff, St. Louis, and Sikeston. Operations duly commence and are continued apace for the remainder of the decade and into the **1970s** with a fleet of 1 Piper PA-23 Aztec, 1 PA-31-310 Navajo, 5 Beech 18s, and 1 de Havilland DH 114 Heron. These also undertake contract mail flights throughout the state and to Memphis and Little Rock.

Enplanements reach 9,689 by 1980. The fleet is reconstituted in 1981 as passenger boardings plunge 54.9% to 6,079. Gone are the earlier aircraft, replaced by two Beech 99s.

The traffic disaster continues in recessionary 1982 as customer bookings plunge 45.7% to just 3,302. Cargo figures are worse, down 87.5% to 9,000 pounds.

Enplanements decline again in 1983, dipping 8.3% to 3,028. Freight rallies, however, up 77% to 16,000 pounds.

After 3 years of bad business, Semo closes its doors in the fall of 1984, having transported 2,220 people on the year for an ironic 25.3% traffic increase.

SEMPATI AIR: Indonesia (1986–1998). Formed at Jakarta in December 1968 as a wholly owned subsidiary of the Truba Group (Tri Usaha Bhakti), the Indonesian Army foundation, to offer nonscheduled passenger and cargo services, Sempati Air Transport begins revenue operations in March 1969 with a single Douglas DC-3. With a staff of 40, the airline's plane is employed flying workers and equipment to energy (oil) sites in Sumatra, Kalimantan, Sulawesi, and Java.

During the early 1970s, three Fokker F.27 turboprops, given a black, white, and red livery, are acquired, beginning with the *Kurnia*. Destinations visited include points in Indonesia as well as Bangkok, Phnom Penh, and Saigon. By 1973–1974, the Friendships are also flying to Manila, Singapore, and Kuala Lumpur.

Chairman/President Dolf Latumahina's 40-employee firm leases a Boeing 707-320C and begins regularly scheduled flights linking Jakarta with Denpasar (Bali) and Tokyo in 1975. The line's Tokyo license is suspended by the government when **Garuda Indonesian Airlines** begins serving the Japanese capital.

Operations continue apace in 1976–1977 and enplanements in the latter year reach 75,379. Revenues are \$490,000 and a net loss of \$476,556 is suffered.

Airline employment stands at 150 in 1978. Late in the year, Sempati abandons scheduled long-haul operations to Tokyo and Manila, returns its Boeing, and resumes its role as a regional carrier with its three Fokkers.

Passenger boardings since January are up 25.1% to 100,640 and freight traffic has grown by 5.8%. Operating income climbs to \$3.8 million and the net loss is down to \$72,263.

Operations continue apace through the remainder of the decade.

By the middle of the 1980s, the fleet of the quiet charter operator comprises 6 F.27s supported by 170 workers. After the government relaxes the laws regulating private jet operators in 1984, Sempati Air Transport begins planning for the introduction of scheduled flights, hopefully beginning in 1985. Although this goal is not realized, in 1986–1988, services are provided to Pontianak, Pengkai, Tumbang, Singkap, Tanjung, and Pekanbaru.

In 1989, the fleet includes 7 F.27s and Sempati employs 185 workers. The army foundation Tri Usaha Bakti sells 35% shareholding to timber tycoon Bob Hasan and 25% to the Humpuss Group, a private concern controlled by President Suharto's youngest son, Hutmo Mandala Putra. The equity sale raises in excess of Rp 20 billion (\$10.7 million) in new capitalization.

The longtime charter carrier elects to provide scheduled services in 1990. The revamped Indonesian carrier, now known simply as Sempati Air, becomes the first private airline in the nation's history to receive licenses to import new jetliners. Orders are placed with GPA Group in June for the lease of six Fokker 100s, the first of which arrives in August.

A total of 57,468 passengers are flown, along with 211,000 FTKs.

The workforce is increased by 2.2% in 1991 and two F.27s are retired. Traffic figures are reported only for the first five months. These show enplanements of 237,645 and a total of 1.95 million FTKs are operated.

While on a training flight near Banyuwangi on June 5, both engines of an F.27-600 with two crew lose power, causing the aircraft to crash and break up; both flyers are killed.

In July, the second Fokker 100 is acquired by lease and is followed by the other four during the next six months. Permission is also received to launch international service in competition with **Garuda Indonesia** and also in July, flights begin from Jakarta to Singapore twice daily, along with frequencies from Sumatra to the Malaysian communities at Malacca, Kuala Lumpur, and Penang. Permission is sought to acquire seven previously used B-737-200s.

The payroll is sliced 2.1% in 1992 to 185 as Hasan Soedjono becomes president. The fleet is further enhanced by the delivery of six Boeing 737-281s and flights are inaugurated to Perth, Australia, and Taipei and Kao-hsiung, Taiwan.

Statistics are reported through July and show an increase in passenger boardings to 690,277. Freight also climbs, by 21.8%, to 3.42 million FTKs.

The fleet is increased in August 1993 via the addition of three leased Airbus Industrie A300B4-203s, formerly operated by **Pan American World Airways (1)**. Singapore joins the international route network.

Again, figures are available for only the first half-year. Customer bookings are up a whopping 54% to 891,196, but cargo is down 11.4% to 2.85 million FTKs.

Plans are made throughout 1994 for the introduction of the first Fokker 70 into service during the spring of 1995. Fokker Friendship service is inaugurated from Jakarta to Christmas Island. To assist in capacity requirements to the new destination, the Fokker F28.4000 *Kurau* is leased from **Pelita Air Services**.

Through November, customer bookings accelerate 42% to 2,719,890 while cargo skyrockets 132.3% to 13.87 million FTKs.

Airline employment increases 69.5% in 1995 to 3,186. Just after landing at Jakarta after a January 16 service from Denpasar, Flight 416, a B-737-281 with 6 crew and 51 passengers, overruns the runway by 100 m. and its landing gear collapses. There are no injuries reported.

The first two Fokker 70s are delivered in early March and enter service a month later. Two important commercial pacts with foreign carriers begin in the spring.

Joint weekly flights commence four times per week in April with **SilkAir (Pty.), Ltd.**; the route between Lombok and Singapore will be performed exclusively by the **Singapore Airlines, Ltd.** subsidiary employing a Fokker 100. In May, **British Airways, Ltd. (2)** concludes special arrangements that will help its passengers make connecting flights in Indonesia.

Enplanements for the year total 4,889,000. Profits of \$10.3 million are posted.

The workforce is increased another 6.7% in 1996 to 3,400. The F.27-600 *Jayapura*, leased from **Trigana Air Services**, is involved in an accident at Jakarta on May 14 when it strikes the wing of a parked F.28. A fourth A300B4-203 is acquired during the summer. The previous year's good traffic fortune is not repeated. Santun Nainggolan becomes president in December.

Passenger boardings drop 4.8% to 2,623,739 and 23.67 million FTKs are operated, a 5.4% decline.

Catastrophic forest fires and the Asian economic crisis have a significant impact during 1997. Although the pact with SIA remains intact, the carrier is forced to halt services on 10 domestic and 4 international routes, including those to Taiwan and Malaysia.

During the spring, Sempati halts its competition with **Garuda Indonesia** and enters into a strategic agreement with its former rival instead; the arrangement includes code-sharing, joint pricing and purchasing, and schedule coordination.

Just after takeoff from Bandung on July 17 on a flight to Jakarta, Flight 304, the F.27-600 *Jayapura* with 5 crew and 45 passengers and leased from **Trigana Air Services**, develops engine problems. The pilot attempts to make an emergency landing at Sulaiman AB, but the turbo-prop crashes through roofs and walls of a housing project before coming to rest in a muddy field, breaking up and catching fire (29 dead).

The last F.27, *Anugerah*, remains in service, flying from Bali Island to Lombok Island. It is reported in August that the company is over \$300

million in debt. Negotiations concerning a possible equity investment begin with **Singapore Airlines, Ltd.**

President Nainggolan is ousted in September as former **Mandalay Airlines** CEO Gen. Subagio is elected to replace him. President Suharto's son Putra continues to hold 15% equity through the Humpuss Group, but now gains a further 40% via the Malaysian concern Asean Aviation, which takes a significant stake.

Indonesian aviation policy wavers during the national currency and economic crisis in the opening months of **1998**. In an effort to avoid bankruptcy, the carrier, during the first quarter, lays off 60% of its workforce. Unhappily, following nonpayment of maintenance and lease fees, two of its four A300B4-203s are impounded in Malaysia.

The company now operates only three B-737s to increasingly fewer destinations. Despite the slashing of fares by 40%, load factors of 30% or less become normal.

In late spring, Jakarta is rocked by political demonstrations and on May 21, President Suharto resigns. With the entire family in disrepute, including his younger son and Sempati's principal shareholder, the airline faces disaster. Even with emergency fiscal assistance, Sempati, which had once featured a 25-plane fleet with 25 international destinations, is forced to close on May 31.

SEMPATI AIR TRANSPORT. *See* SEMPATI AIR

SENATOR AVIATION CHARTER, GmbH.: Cologne Airport, Hangar 3, Cologne, D-51147, Germany; Phone 49 (2203) 955 830; Fax 49 (2203) 955 839; <http://garnet.acns.fsu.edu/~rpp3657>; Year Founded 1985. Senator is established at Cologne in 1985 to provide executive and small group passenger charters throughout Germany and Northwest Europe. Air taxi, cargo, and air ambulance flights are also performed.

In 1992, a base is also established at Berlin's Tempelhof Airport. By 2000, General Manager Michael Hitgen operates 3 Learjet 35A Century IIIs from Cologne and 1 Beech Super King Air 200 from Berlin.

SENECA FLIGHT OPERATIONS: 2521 Bath Road, Penn Yan, New York, 14527, United States; Phone (315) 536-4471; Fax (315) 536-4558; Year Founded 1956. The corporate carrier Seneca Flight is established at Penn Yan in 1956 to operate aircraft on behalf of various businesses and corporations in New York State.

Tom Cook is director of flight services 44 years later and he schedules a mixed fleet of turbojet and propeller aircraft to destinations within the U.S. and worldwide. The aircraft available include 1 each Cessna 500 Citation I, C-550 Citation II, C-650 Citation III, Dassault 50, Beech 58 Baron, and Beech King Air 90.

SEOUL AIR INTERNATIONAL, LTD.: P.O. Box 10352, Seoul, 100699, South Korea; Phone 82 (2) 699 0991; Fax 82 (2) 699 0954; Code SHI; Year Founded 1972. SAI is established at Seoul in 1972 to offer third-level commuter services to domestic locations. This mission remains unchanged and by 2000 President S.Y. Roh's small carrier is flying to national and regional locations with a pair of British Aerospace BAe Jetstream 31s.

SEPIK AIR CHARTERS (PTY.), LTD. *See* TERRITORY AIRLINES (PTY.), LTD.

SERCA (SERVICIO DE CARGA AEREA, S.A.): Costa Rica (1981–1994). SERCA is founded as a private, all-cargo airline at San Jose in 1981 to offer regular charter and contract services flights to Miami. Initial services are started with a Convair CV-880 freighter, christened *The Bullet*, and a Douglas DC-8-55F. A decade later, President Capt. Vicente Perez Alvarado's 20-employee carrier maintains the same services with a pair of Convair CV-880Fs.

A third Convair freighter arrives in 1992. Financial losses mount throughout 1993, forcing the company to shut its doors in 1994.

SERCA (SERVICIO ESPECIALIZADO DE CARGA AEREA, S.A.): Colombia (1992–1993). SERCA is established at Bogota in 1992 to offer ad hoc all-cargo services to worldwide destinations. President Capt. Vincente Perez Alvarado, whose company is a subsidiary of his San Jose-based operation, recruits a workforce of 20 and obtains a pair of Convair CV-880Fs and a Sud Est SE-210 Caravelle XB3, previously operated by **Sterling Airways, A.S.**, with which to initiate services.

While landing at Cayenne on May 6, 1993 on a positioning flight, the undercarriage of the Caravelle XB3 with four crew collapses and the fuselage fails fore and aft of the wing; there are no fatalities.

Unhappily, the accident and recession fatally impacts the new entrant, which is unable to gain viability and is forced to shut down.

SERENDIP AIRWAYS, LTD.: Sri Lanka (1980–1986). Serendip is formed in 1980 as a joint enterprise by the Maharaja business organization and **Malaysia Air Charter, Ltd.** Employing a Shorts SC-7 Skyvan and later a Shorts 360, the domestic carrier, employing Malaysian flight personnel, undertakes to link Colombo with Jaffna, Batticaloa, Minneriya, and Trincomalee. The failure of MAC in 1986 brings ruin to Serendip.

SERIB WINGS, S.p.A.: Italy (1991–1995). Serib Wings is established in 1991 to offer scheduled third-level passenger services to domestic and regional destinations. Operations commence with 1 each Fairchild-Swearingen Metro and Metro II, the former leased from **Air Vendee, S.A.**

The Metro is withdrawn in 1993 as a consequence of Air Vendee's merger into **Regional Airlines, S.A.** It is replaced during 1994 with a pair of leased British Aerospace BAe Jetstream 31. The two new turboprops are equipped to handle both passengers and cargo. During the summer, the BAes inaugurate night newspaper deliveries.

New roundtrip service is inaugurated in the spring of 1995 between Rome and Vicenza. The carrier is unable to maintain its viability and closes down before the end of the year.

SERVICE DE L'AERONAUTIQUE CIVILE, S.A. (SAC): France/Madagascar (1937–1941). On September 1, 1937, the newly formed **Air Afrique, S.A. (1)** acquires the international route of Madagascar-based **Regie Malagache, S.A.** Domestic services, however, are turned over to this new operator, which is equipped with the SPCAs and two Bloch 120s previously flown by RM.

The scheduled network consists of two major roundtrip routes: Tananarive to Ihosy via Morondava, Tulear, and Fort Dauphin, and Tananarive to Maroantsetra via Majunga and Deigo Suarez.

Flights continue until February 1941 when Vichy France creates the new state carrier **Reseau Aerienne Francaise, S.A.**

SERVICE DE LA NAVIGATION AERIENNE DE MADAGASCAR, S.A. *See* REGIE MALAGACHE, S.A.

SERVICE DE TRANSPORTES AEREOS, S.A.: Sao Tome and Principe (1949–1974). STA launches roundtrip service between Sao Tome and Principe in 1949 employing a single de Havilland DH 82 Tiger Moth. During the first years of the 1950s, frequencies are undertaken to Porto Alegre and from Principe to Santa Isabel. By 1956, the fleet includes the Tiger Moth, plus 3 DH 89A Dragon Rapides and 1 Auster Autocar.

Its aircraft all but worn out and in need of repair, the company suspends services in 1957 and places an order for a DH 114 Heron 2. With the arrival of the Heron 2, flights resume in early 1959.

Financial and technical difficulties will cause STA to stand down between November and December 1960 and again in September 1961.

During the years that remain in the decade, service to Santa Isabel is suspended. Altino A. Gromicho becomes general manager and is able to insure that the company operates without further technical problems.

In 1970, Gromicho purchases a Piper PA-31-350 Navajo and retires the Dragon Rapides. Navajo and Heron 2 flights continue until 1974.

SERVICE DE TRANSPORTS AERIENS REGIONAUX, S.A. (STAR): Belgium (1947–1949). STAR is set up at Leopoldville in 1947 to provide scheduled services throughout the Belgian Congo. The Israeli owners are able to obtain a license from the colonial government and to inaugurate services with a fleet comprising one each WACO biplane and de Havilland DH 82 Tiger Moth, plus four Anson 652As.

The owners have visions of competing with the other small companies active in the Congo at this time, to say nothing of **Sabena Belgian World Airlines, S.A.** Unhappily, financial problems are such that passenger and cargo services are severely limited. Mail is the only commodity flown regularly, from Costermansville to Goma. Customers are flown only on demand and then only to Kigoma and Dar es Salaam.

When Sabena receives authority over all Congo domestic services in April 1949, STAR quickly closes its doors.

SERVICIO AEREO A TERRITORIOS NACIONALES, S.A. See SATENA (SERVICIO AEREO A TERRITORIOS NACIONALES, S.A.)

SERVICIO AEREO BAJA, S.A. de C.V.: Mexico (1958–1971). This third-level operation is set up at Tijuana in 1958 under the name Francisco Munoz Cebellos. Using single-engine Cessnas, a Baja California route network is established and other points are served. Frequencies flown include Tijuana to Bahia de los Angeles, Guerrero Negro, Mulege, and Puerto Vallarta, Tijuana to Los Mochis via Navojoa, and direct Tijuana to Mexicali.

During the 1960s, the company name is changed. Unable to compete effectively against the commuter confederation established by **Aeronaves de Mexico, S.A. de C.V.**, the carrier halts revenue operations in 1971.

SERVICIO AEREO GOMEZ MENDEZ, S.A. de C.V.: Mexico (1953–1966). Manuel Gomez Mendez forms this short-haul operation at Chilpancingo in March 1953 and employing a single Cessna 170, begins flying to various local destinations in Guerrero state. In the 1950s, the route network is increased somewhat, with a significant stop being established at Puebla; the fleet is upgraded through the addition of a Beech C-45, a military version of the Model 18.

On March 6, 1962, Gomez Mendez is granted rights to fly from Mexico City to Apatzingan in Michoacan state; although retaining the Beech, he consequently now sells his Guerrero air taxi permits to Elias Naime. Later in the year, he is awarded concessions that allow him to add Uruapan, Colima, and Manzanillo on his route map. These new services require additional capacity and thus a Douglas DC-3 is purchased from **Mexicana Airlines, S.A. de C.V.**

In March 1963, Gomez Mendez completes a transcontinental route by extending his flights to Guadalajara and Tuxpan. Another DC-3s is acquired, allowing one to be placed on each end of the route. Puerto Vallarta joins the network in August 1964 and another DC-3 is obtained from failed **Aerovias Rojas, S.A. de C.V.**

The operation is formally incorporated late in 1965 and in September 1966 the government grants Gomez Mendez permission to exchange equipment and services with Fernando Barbachano's Cozumel-based

Aero Safari, S.A. de C.V. Finding themselves compatible, the two owners fly to London, conduct negotiations, and on November 1, combine their companies into a new airline, **Aeromaya, S.A. de C.V.**

SERVICIO AEREO LEO LOPEZ, S.A. de C.V.: Apartado Postal 586, Chihuahua, 31000, Mexico; Phone 52 (14) 154454; Fax 52 (14) 159293; Code SA; Year Founded 1943. Pilot Leo Lopez Talamantes establishes an air taxi operation at Chihuahua in 1943 to provide non-scheduled charter flights to mining camps and small cities in the region. Employing a variety of single engine aircraft which, in the beginning, land at small airstrips built by Sr. Lopez, the tiny company continues without change for the next 45 years.

In 1988, the decision is taken to launch scheduled passenger and cargo service to surrounding communities. A Fairchild-Swearingen Metro III is acquired and in January 1989 flights commence linking the carrier's base with Los Mochis and the Texas city of El Paso, where a new U.S. hub has been established.

By 1993, the fleet of President Geopoldo Lopez Grayeb's third-level operation comprises 2 Swearingen Metro IIIs, 2 Cessna 208 Caravan Is, and 2 Cessna 402s. Flights continue in 1994, although 1 Metroliner is withdrawn.

Flights continue in 1995–2000, during which years one Cessna 402 is removed.

SERVICIO AEREO NA AMERICA DO SUL E PARA A EUROPE. See SYNDICATO CONDOR, S.A.

SERVICIO AEREO TERRITORIAL DE SANTA CRUZ, S.A.: Argentina (1934–1945). The government of the Territory of Santa Cruz establishes a base of support in 1933 and early 1934 for regular air services in southern Patagonia. In the spring of the latter year, Servicio Aereo Territorial de Santa Cruz is formed at Rio Gallegos and equipped with a Lockheed Model 5 Vega 1. Services are inaugurated to a variety of small communities on May 31.

The carrier's single aircraft is lost in a crash at Condor on July 11, 1935. Not wishing to see the operation abandoned, the Argentine Navy now provides a Huff Daland Pelican biplane that resumes the service in the spring of 1936.

Two years later in 1938, **Aeroposta Argentina, S.A.** contributes one of its older French-made Latecoere 25s. The carrier's two aircraft maintain links between Rio Gallegos and the smaller Santa Cruz towns until 1945, when the operation is taken over by **Aeroposta Argentina, S.A.**

SERVICIO AEREO VARGAS ESPANA, S.A. (SAVE): Avenida La Barranca, Hangar 90, Aeropuerto El Trompillo, Santa Cruz de la Sierra 1605, Bolivia; Phone (3) 533834; Fax (3) 521247; <http://www.save-bolivia.com>; Year Founded 1972. Privately owned SAVE is formed by retired Bolivian Air Force Maj. Hugo Vargas Espana in 1972 as an air taxi service that operates primarily in support of the petroleum industry. Initially employing Piper PA-34 Seneca Is and Cessna 310s, SAVE flies workers and executives from Texaco, Chevron, Occidental Petroleum, AMOCO, and AGIP Italian and over 15 other firms to destinations around the country.

On February 28, 1975, President Espana is granted a government license to offer nonscheduled services and begins utilizing a Beech 55 Baron. A Beech Kng Air 90 is also acquired.

In 1985, the company enters into a 12-year relationship with Treasure Petroleum Company-Bolivia. The substantial new contract allows the fleet to be upgraded and Beech 99s are brought in to meet the needs of the new employer. The company also sets up an emergency aeromedical division to fly medevac flights in both Bolivia and Brazil.

Authority to offer scheduled third-level domestic passenger services is received on December 27, 1996. Initially employing Beech 99s, later supplemented with Beech 1900Cs, the carrier begins flights that will take it to La Paz, Riberalta, Guayaramerin, San Borja, Trinidad, Magdalena, Cochabamba, Camiri, Villamontes, and Tarija.

SERVICIO AEREOS PANINI, S.A. de C.V.: Mexico (1934–1948). Clay mining executive and amateur pilot Carlos Panini, an Italian immigrant, forms Servicio Aereos Panini at Hidalgo in 1934. A government permit is obtained in 1935 for service from Mexico City to Morelia via the Rio Balsas valley. Two Buhl CA-6 trimotors are purchased in the spring of 1936 and one flown by Felipe Garcia initiates flights in September over the carrier's circuitous Ruta del Balsas. Four Travel Air 6000Bs are acquired in 1937.

The carrier's first route expansion comes in 1939 when Colima and Guadalajara are first served. Two Douglas DC-2s are received in 1940. A major base is constructed in Mexico City during 1941, with a secondary one at Morelia; the fleet is increased by the addition of three more Buhls.

Manzanillo, on the Pacific coast, becomes a stop in July 1942; in October, service is started from Mexico City to Durango. Ometepe joins the route network in 1943. During 1944, the Buhls are replaced by two Boeing 247s and a B-24D and flights are launched from Guadalajara to Monterrey via Zacatecas. Reynosa on the U.S. border receives Panini's attention in 1945, as flights begin arriving from Guadalajara.

Four more B-247Ds join the fleet in 1946 and in July 1947 a permanent concession is granted for the Mexico City–Durango route; lack of traffic and difficulties in the U.S.-Mexico bilateral discussion lead to a suspension of the Guadalajara–Reynosa services. In the fall, flights begin Durango–Sinaloa. A Boeing crashes and the tragedy allegedly causes Panini to decide to quit the airline business.

In 1948, Carlos Oriani, purchases the carrier for a reported 1.5 million pesos and merges it into his **Aerovias Reforma, S.A. de C.V.**

SERVICIO AEREOS RIO NEGRO, S.A.B.: Argentina (1968–1975). This one-plane carrier is set up at Bariloche in 1968 to offer a variety of nonscheduled freight and passenger services with a single Douglas DC-3. Ad hoc flights continue sporadically until 1975 when the owner shuts his doors. The plane is parked in the grass just off the runway of San Justo Airport, outside Buenos Aires.

SERVICIOS AEREOS AVILES, S.A. de C.V.: 5 de Mayo #2605, Colonia Centro, Mazatlan, 82000, Mexico; Phone 52 69 81 60 50; Fax 52 69 15 65 98; Year Founded 1968. Capt. Roberto Aviles establishes this small air taxi at Mazatlan in 1968 to offer passenger and freight flights into the surrounding area. By 2000, the company employs 2 each full-time and part-time pilots and operates 1 each Cessna 172 Skyhawk, C-337 Super Skymaster, and C-401.

SERVICIOS AEREOS BOLIVIANO, S.A.: Bolivia (1970–1987). SAB is established at La Paz in 1970 to operate all-cargo services, including chilled-beef flights. Revenue flights commence with a single Curtiss C-46 Commando. A second Curtiss and an ex-military Boeing B-17 converted into a freighter are acquired in March 1971.

Flights will continue for another 17 years and the C-46 fleet will eventually total 5 machines, although fewer than 3 are ever simultaneously operated.

SERVICIOS AEREOS CONDOR, S.A. See SYNDICATO CONDOR, S.A.

SERVICIOS AEREOS CURTISS, S.A.: Bolivia (1969–1973). Following the demise of **Rutas Aereas Unica, S.A.** in 1969, this new Cochabamba-based company takes over its Curtiss C-46 Commando freighters, after which it is named. The all-cargo airline will eventually have a fleet of 5 such aircraft, although fewer than 3 will ever be operated simultaneously. Flights cease in 1973.

SERVICIOS AEREOS LITORAL, S.A. de C.V. See AEROLITORAL, S.A. de C.V.

SERVICIOS AEREOS MADERO, S.A. de C.V.: Mexico (1961–1969). Established at Chihuahua in 1962, this commuter offers single-engine flights from that city to Nogales via Nuevo Casas Grandes and Cananea. On-demand stops are also made at other points in Chihuahua state.

The government's Aeronaves Alimentadoras compact brings a level of competition against which the carrier cannot compete and thus it ceases flying in 1969.

SERVICIOS AEREOS NACIONALES, S.A. See SANSa (SERVICIOS AEREOS NACIONALES, S.A.)

SERVICIOS AEREOS PATAGONIAS, S.A.: Sand Martin 57, Viedma, Rio Negro, 8500, Argentina; Phone 54 (920) 21330; Fax 54 (920) 23990; Year Founded 1991. Established to serve the Patagonian region of southern Argentina, SAPSA begins charter passenger and express flights in 1991, employing two leased Fairchild Metro IIIs. A Rockwell 690A is placed into service during 1992, followed by one more Metro III and a Metro II in 1993. Operations continue in 1994 and enplanements total 1,034.

Airline employment stands at 50 in 1995. The company's 5 aircraft transport a total of 15,281 passengers, a huge 67.7% increase.

Flights continue in 1996–2000, during which years President Rail Berola acquires a Cessna 402C.

SERVICIOS AEREOS PETROLEROS, S.A. (SAPSA): Hangar 40, Casilla 960, Aeropuerto El Trompillo, Santa Cruz de la Sierra, Bolivia; Phone (3) 538317; Fax (3) 555800; Year Founded 1953. First known as YPFB Transportes Aereos, S.A., SAPSA is established at Santa Cruz de la Sierra in 1953 to provide charter lift for energy and mining industry workers. Flights continue without headline or incident for almost a half-century.

Rene Artez Hurtado is manager in 2000 and he oversees the work of 20 people. The fleet now includes 1 each Aero Commander 890A, de Havilland Canada DHC-6-300 Twin Otter, and Dornier 228-202.

SERVICIOS AEREOS PINTO, S.A.: Bolivia (1989–1990). SAP is established at La Paz in 1989 to offer scheduled passenger and cargo

flights to local and regional destinations. Revenue services commence with a single Beech 99.

Unable to achieve economic viability, the company folds in **1990**.

SERVICIOS AEREOS PROFESIONALES, S.A.: Aeropuerto de Herrera, Ave. Luperon, Santo Domingo, Dominican Republic; Phone (809) 565-2448; Fax (809) 540-4667; <http://www.sapair.com>; Year Founded 1981. The Dominican SAP is established by Jose Miguel Patin Hernandez at Santo Domingo in **1981** to offer local charters and executive passenger services with a single de Havilland Canada DHC-6-100 Twin Otter. Over the next decade, several small Cessnas and a Britten-Norman BN-2 Islander also enter service.

A DHC-6-300 is acquired in **1992**. Over the next seven years, SAP becomes the only carrier in the Dominican Republic certified by the U.S. FAA to offer regular Part 135 services into the U.S. Meanwhile, the fleet is increased by the addition of seven Let 310s and an Embraer EMB-120P1 Bandeirante.

Executive and small group passenger charters are also offered to destinations throughout the Caribbean, Central, and South America.

By **1999**, President Hernandez employs 30 pilots, many expatriate Americans, Canadians, Norwegians, Swedes, Italians, and native Dominicans. His fleet now includes 2 Twin Otters as well as 7 Let L-410s, 2 Shorts 360-200s, 3 Beech 1900Ds, 1 Grumman G-1159 Gulfstream I bizjet, 2 Islanders, 3 Cessna 172K Skyhawks, 2 C-206 Stationaires, 1 Bandeirante, and 1 C-210.

During the first quarter, a homepage is opened on the Internet's World Wide Web.

International destinations visited in **2000** include Curaçao, Bahamas, Aruba, Caracas, Isla Margarita, St. Lucia, Barbados, Martinique, Guadeloupe, Antigua, St. Martin, Puerto Rico, Haiti, Montego Bay, Providenciales, Miami, Orlando, and Cancún. In the Dominican Republic, service is offered to Punta Cana, La Romana, Portillo, Puerto Plata, and Santo Domingo, while Holguin, Varadero, Camaguey, Havana, and Santiago in Cuba are also visited.

SERVICIOS AEREOS REGIONMONTANOS, S.A. de C.V.: Av. General Anaya 601 Pte., Colonia Bella Vista, Monterrey, 64410, Mexico; Phone 52 83 28 62 80; Fax 52 83 28 62 40; Year Founded 1969. SAR is established at Monterrey in **1969** to offer executive and small group passenger charters and air taxi flights. By **2000**, the company has also opened a base at Toluca. It now employs 10 full-time and 8 part-time pilots and operates 2 British Aerospace (HS) 125-800 Hawker bizjets, 1 Piper PA-23-250 Aztec, and 1 Dassault Falcon 10.

SERVICIOS AEREOS SOLIS, S.A. de C.V.: Mexico (1959-1969). Another victim of the government's 1968 Aeronaves Alimentadoras compact that closes it in **1969**, Servicios Aereos Solis is formed at Oaxaca in **1959** to offer smallplane flights from that city to Playa Vicente and other on demand stops in the state of Oaxaca.

SERVICIOS AEREOS ZARATE, S.A. de C.V.: Mexico (1938-1942). Enrique Zarate forms Servicios Aereos Zarate in **1938** to compete with Capt. Louis Melgosa's **Taxi Aereo de Oaxaca, S.A. de C.V.**, providing cargo and passenger charters in the same general area as Melgosa. The fleet flagship is a former **United Air Lines** Boeing 247D.

Following the death of Zarate in the crash of a Travel Air, the assets of his company are acquired in **1942** by **Aeronaves de Mexico, S.A. de C.V.** then backed by **Pan American Airways (PAA)**.

SERVICIOS AMERICANOS: United States (1965-1968). Operationally established by Robert Becker at Miami on an officially legitimate basis in late **1965**, this company inaugurates nonscheduled services to destinations in South America with a single Curtiss C-46 Commando. The aircraft crashes near Asuncion, Paraguay, on March 21, **1966** (three dead); investigators find the wreckage loaded with contraband cargo.

Becker acquires a second Commando and continues operations until

1968 when U.S. Customs seize the aircraft and put the smuggling operator out of business.

SERVICIOS DE AEROTAXIS E ABASTECIMIENTO DE VALE AMAZONICA, LTDA. See **SAVA (SERVICIOS DE AEROTAXIS E ABASTECIMIENTO DE VALE AMAZONICA, LTDA.)**

SERVICIOS DE TRANSPORTES AEREOS FUENGINOS, S.A. See **STAF (SERVICIOS DE TRANSPORTES AEREOS FUENGINOS, S.A.)**

SERVISAIR, S.A.: Belgium (1989-1990). Servisair is founded at Brussels in **1989** to provide passenger and cargo charter services with a fleet of 3 Embraer EMB-110P Bandeirantes and 4 Fokker F.27Fs. Operations continue until the spring of **1990** when the carrier is purchased by and merged into **British Air Ferries, Ltd.**

SERVIVENSA, S.A.: AP 943 Avenida Universidad, Edif 29, Esquina El Chorro, Torre El Chorro, Caracas 101, Venezuela; Phone 58 (2) 561-3366; Fax 58 (2) 563-9696; <http://www.avensa.com.ve>; Code VC; Year Founded 1991. Founded at Caracas in **1991** as a subsidiary of **AVENSA (Aerovias Venezulanass, S.A.)**, Servivensa inaugurates charter passenger and inclusive-tour flights to regional and international destinations. Revenue operations commence with a fleet of 15 aircraft, mostly acquired under lease from the parent company: 8 Douglas DC-9-31s, 3 DC-9-32s, 2 DC-9-51s, and 1 each Boeing 727-227 and B-727-2D3A.

Operations continue apace in **1992** and statistics are reported for the Boulton Group-owned enterprise for the first half of the year. These show enplanements of 415,794 while 502,000 FTKs are operated. Several DC-3s are also obtained for operations into bush locations.

The fleet in **1993** is substantially increased in order to allow for domestic flights, in addition to those already operated. Now available are 4 Beech King Air 90s, 1 Douglas C-47A (military DC-3), and 1 Super King Air 200. As 2 DC-9-31s are retired, the jet fleet is increased by 4 B-727-22s and 1 each B-727-27, B-727-35, B-727-114, B-727-2M7A, and B-727-281A. These are employed to inaugurate low-cost, low-fare services.

Just after landing at Ciudad Bolivar on July 19, a DC-9-32 with 5 crew and 60 passengers hydroplanes off the runway by 150 m., losing its nosegear. There are no injuries reported.

During the first 9 months of the year, a total of 1,192,875 travelers are flown.

During the spring of **1994**, Servivensa successfully replaces **AVENSA (Aerovias Venezulanass, S.A.)** on the Venezuela to Miami shuttle, with market share increasing from 7% to 45%. Plans are made to have the carrier take over all of AVENSA's international operations.

Through September, passenger boardings are down 8.6% to 1,098,412, but freight is up 3.4% to 6.17 million FTKs.

While just 2 km. short of landing on the runway at Cerro Hiaiche, Venezuela, on December 17, the C-47A with 3 crew and 6 passengers hits trees on the side of a hill with its wing, veers right, and crashes (7 dead).

In October **1995**, a passenger and cargo joint service begins with **Mexican Airlines, S.A. de C.V.** over a route from Caracas to Mexico City via Panama City. The fleet is increased in **1996-1997** by the addition of 1 each B-727-227, B-727-2D3A, and DC-9-51. Additional AVENSA replacement services are undertaken.

While returning to Canaima National Park Airfield on October 2, **1998**, after a flight over the Angel Falls, the nation's top tourist attraction, a chartered DC-3C with 3 crew and 22 passengers loses an engine. The aircraft crashes 1 km short of the runway at its destination; the copilot is killed and three customers are injured.

Late in the year, the company enters into a code-sharing agreement with **AeroPeru (Empresa de Transportes Aereos de Peru, S.A.)** for joint operations over the route from Caracas to Lima. The Venezuelan airline provides its B-737-2D3A painted in a dark blue, white, and aqua

livery with titles for both companies. The Alianza Andinas (Andes Alliance) is one of the shortest dual-designator pacts in history. Following its conclusion in December, the Boeing is returned to Servivensa in January 1999.

A DC-9-51, en route from New York to Caracas on April 24, is forced to divert to Hamilton, Bermuda, after an 84-year-old passenger suffers a suspected heart attack. Once the senior is off to the local hospital, the aircraft departs for Venezuela.

The B-727 fleet at the beginning of 2000 continues to include 1 each Dash-27, Dash-227, Dash-2D3A, Dash-2M7A, and Dash-281A. Two B-737-229As previously operated by **Sabena Belgian World Airlines, S.A.** are also operated, along with 1 DC-9-32 and 4 DC-9-31s.

Two flight attendants are arrested in Miami on November 4 and charged with attempting to smuggle heroin into the U.S. in their undergarments. They are allegedly part of a 17-person ring smuggling dope in from Caracas to Miami and New York.

The B-727-2D3A is reported parked at Caracas at the end of the year, without engines. The Dash-2M7A has also been withdrawn.

SEULAWAH AIR SERVICES: Indonesia (1968–1981). To provide flights to Western Indonesia, Seulawan is formed at Jakarta in June 1968 by General Sofjar. Revenue flights begin in the fall with a single Douglas DC-3. In 1970, General Sofjar starts a sister carrier, **Mandala Airlines**. Scheduled services are offered by Seulawah beginning 1971 and are operated with three Convair CV-600s. Flights are pooled with those of **Mandala Airlines** during the next four years and the joint operation is known as **Seulawan-Mandala Airlines**.

By 1978, President H. Soejono's 28-employee carrier has a fleet made up of Vickers Viscount 800, 1 Nihon YS-11A, 1 Fokker F.27, and the original Douglas transport. Unable to maintain economic viability following the dramatic increases in oil costs during 1979–1980, the carrier is forced to stop flying in 1981. Remaining assets are acquired by its sister.

SEULAWAN-MANDALA AIRLINES. See **MANDALA AIRLINES; SEULAWAH AIR SERVICES**

SEVEN AIR, S.A.: Spain (2000). Seven Air is established at Gran Canaria at the beginning of 2000 to operate passenger charters to European holiday destinations. Two chartered B-737-3K9s are acquired from Bavaria Leasing in late May, one of which is based at Paris (CDG) to fly on behalf of a French tour operator. The one remaining in Spain has large "Andalucia Directo" and small "Seven Air" titles. A number of vacation flights are undertaken beginning in June, but by the end of October the short-lived carrier has returned its planes and gone out of business.

SEVEN SEAS AIRLINES, S.A.: Luxembourg (1959–1961). SSA is formed at Amsterdam, the Netherlands, in 1959 to operate passenger charters. Two Douglas DC-4s are acquired and are employed to inaugurate such revenue services as immigrant flights to Australia and the repositioning of ships' crews to Hong Kong and other points in the Far East.

Company headquarters are transferred to Luxembourg in 1960 and the fleet is increased by the addition of two more DC-4s and two Curtiss C-46 Commandos. It is at this point that the company accepts a contract to operate supply flights to supporters of Katanga province during the civil war in the Congo. Indeed, one of the company's Curtiss transports becomes the personal aircraft of the Katangan president.

Services continue until Seven Seas shuts its doors in October 1961.

SEVERSON AIR ACTIVITIES: United States (1964–1965). The FBO Severson Air sets up a scheduled air taxi division late in 1964 to provide flights linking its Great Falls, Montana, base with Conrad, Cut Bank, and Shelby. Cessna lightplane revenue services commence on December 8, but only continue into the following year.

SEYCHELLES AIRLINES, LTD. See **AIR SEYCHELLES, LTD.**

SEYCHELLES INTERNATIONAL AIRWAYS, LTD.: Seychelles (1982–1986). SIA is established at Victoria in late 1982 to offer passenger tour group jet flights from the Seychelles to Europe. Beginning on November 2, the company provides lift for the African Safari Club, which also contracts with Kenya-based African Safari Airways, Ltd.

Flights continue with a pair of Douglas DC-8-63s until the company shuts its doors in July 1986. African Safari purchases one of the Douglas narrow-bodies from among the defunct line's few remaining assets.

SEYCHELLES-KILIMANJARO AIR TRANSPORT, LTD.: Kenya (1952–1968). **East African Airways Corporation (EAAC)** establishes this subsidiary in 1952 to offer scheduled services to the Seychelles. Managing Director Chalmers H. Goodlin's concern is not immediately successful and is shut down.

In 1960, EAAC begins to remove its heavily employed de Havilland DH 89A Dragon Rapides, leasing all but one to the airline, which has purchased an owned unit of its own. These little biplanes are employed to operate a scheduled return service from Dar es Salaam to Tanga via Zanzibar and Pemba Island.

Flights continue without incident until September 13, 1966, when a Dragon Rapide is destroyed in a ground fire at Dar es Salaam. EAAC de Havilland Canada DHC-6 Twin Otters soon begin to displace the Dragon Rapides.

Seychelles-Kilimanjaro ends scheduled services on January 1, 1968, turning its routes over to its parent. Charters will be flown thereafter.

SFAIR (COMPAGNIE DE TRANSPORTS AERIENS, S.A.): France (1980–1987). SFAir is established at Nantes in February 1980 to offer outsize cargo and livestock services in Europe, the Mideast, and North Africa. Revenue operations begin and continue with a pair of Lockheed L-100-30 Hercules freighters and a Douglas DC-8-55F.

By 1983, the company employs 45 workers and transports 5,408 tons of cargo.

SFAir is taken over by **Minerve, S.A.** in 1987 and renamed **Jet Fret, S.A.**

SFO HELICOPTER AIRLINES. See **SAN FRANCISCO-OAKLAND HELICOPTER AIRLINES (SFO-2)**

SGA AIRLINES, LTD.: India (1998). This airline is originally established as **UP Airways, Ltd.** by NCM (Singapore) and the state government of Uttar Pradesh in late 1994 for the express purpose of helping the latter develop the tourist potential of the Lucknow area, particularly in relation to Buddhist traffic. CEO Capt. V. P. S. Sindu's airline is renamed in 1998 and shareholding is now divided between Delhi-based Roopali Industries and the Uttar Pradesh government.

Employing 2 Fokker F.27-500s first acquired in 1995, pilgrim flights are continued to the cities of Agra, Bhopal, Delhi, Jamnagar, Kanpur, Khajuraho, Lucknow, Patna, and the Bihar Buddhist centers. Additionally, daily scheduled roundtrips are offered between Delhi and Jaipur.

Faced with mounting debts and unpaid bills, the carrier, even with a new name, does not complete the year.

SHABAIR, S.A.: Aeroport de la Luano, BP 1060, Lubumbashi, Democratic Republic of the Congo; Phone 243 (22) 5686; Fax 243 (22) 4597; Code SS; Year Founded 1989. Organized at Lubumbashi, Zaire, in 1989, Shabair undertakes regularly scheduled and charter passenger and cargo flights to domestic and international destinations. The inaugural fleet includes 1 leased British Aerospace BAe (BAC) 1-11-401AK and 2 owned BAe (HS) 748-B2s.

Operations continue apace in 1990–1991; however, the fleet is dramatically increased in 1992. Added are one leased BAe (BAC) 1-11-201AC, one B-707-323C, and one B-727-23F.

In 1993, Managing Director Capt. Stavros Papaioannou's 400-employee company possesses a fleet comprising 1 each Boeing 707-323C, B-727-100, B-727-23F, British Aerospace BAe 1-11-201AC, BAe 1-11-401AK, and Pilatus-Britten-Norman PBN-2 Islander. In August, a Douglas DC-10-10, once operated by **Western Airlines**, joins the fleet.

DC-10-10 cargo flights to Western Europe commence in the spring of 1994. Destinations served include Ostend, Belgium.

The leased fleet in 1995-1998 includes 1 BAC 1-11-401AK and 1 Lockheed C-130A Hercules. Owned units include 2 BAe (HS) 748-B2s and 1 each B-707-323C, B-727-22, and B-727-23F. The latter is chartered to **Angola Air Charter**.

Service continues during 1998 and into 1999, despite the civil war that will see Zaire renamed the Democratic Republic of the Congo.

SHACAF AVIATION SERVICES, LTD.: P.O. Box 333, Herzlia Beth, 46103, Israel; Phone 9-501193; Fax 3-501193; Year Founded 1968. Organized at Herzlia Beth, SAS initially undertakes revenue flights as an air taxi and flight training component of an FBO. Later, road patrol flights are undertaken on behalf of the Israeli Police Department, and toward the end of the 1970s scheduled commuter services are initiated linking Tel Aviv with Elat.

These operations are continued over the next quarter century with a fleet that, at its height, comprises 3 Britten-Norman BN-2 Islanders, 1 Piper PA-31-350 Navajo Chieftain, 1 Cessna 172, and 5 Cessna 152s.

Yossef Hadari is managing director in 1998-2000. Although scheduled services are no longer provided, the company continues to offer charter and air taxi travel, as well as flight training. The fleet now includes 2 C-152s, 1 C-172, 1 C-310, and the 3 BN-2s.

SHAHEEN AIR INTERNATIONAL, LTD. See SHAHEEN AIRLINES, LTD.

SHAHEEN AIRLINES, LTD.: 157-8 Clifton Road, Clifton, Karachi, Pakistan; Phone 92 (21) 587-2191; Fax 92 (21) 458-3337; Code NL; Year Founded 1991. With backing from a military pension fund, the Shaheen Foundation, and the general sales agents Akbar Aviation Group, Ltd., Shaheen is formed at Karachi in the first quarter of 1991 and is Pakistan's first independent, privately owned air cargo carrier. M. I. Akbar is appointed president/CEO under Chairman/Air Chief Marshal Abbas Khattak and he recruits a workforce of 140 and acquires a Boeing 707-320C. Stratoliner charter cargo operations to five European destinations begin in the fall.

On October 10, 1993, the Shaheen Foundation/Akbar Aviation Group joint venture is reconfigured into a holding company for the operation not only of the freight-oriented Shaheen Airlines, but of a new passenger-carrying service, Shaheen Air International, Ltd. The Stratofreighter is joined by a pair of B-737-2P5As dry-leased from **Thai Airways International, Ltd. (THAI)**; the Bangkok-based flag carrier also signs a technical contract with the new entrant. With hired Brazilian crews, the "Baby Boeings" are employed to inaugurate scheduled passenger services on December 1, linking the company's base with Islamabad. Frequencies to Lahore and Peshawar commence on December 22.

During 1994, the workforce is increased to 300 and a contract is signed with **Continental Airlines** for the training of pilots at Houston. Ex-Pakistani Air Force pilots now become cockpit crews. Akbar Aviation Group sells its interest to the Shaheen Foundation and by government decree, a money-losing weekly roundtrip is now introduced by SAI from Karachi to the Arabian Sea community of Pasni. On October 23, the government also confirms Shaheen as Pakistan's second flag carrier and plans are also made by it at year's end to lease an Airbus Industrie A300B4.

The new Airbus arrives on February 5, 1995 and it is flown by U.S. contract pilots on domestic services as well as on a new thrice-weekly international route from Peshawar to Dubai. As a result of prolonged fractional violence at Karachi during the first two quarters, the U.S. pilots finally refuse to fly to that city. They are terminated on August 1, as is the Airbus lease.

A second A300B4 is leased in the fall and with a fresh compliment of pilots training at Houston, it relaunches service during the first week of November. Added is a government-required weekly roundtrip from Karachi to Pasni on the coast.

By the end of December, the company is operating 129 weekly domestic sectors. While seeking additional international destinations, the company also signs interline agreements with **Singapore Airlines, Ltd.** and **Deutsche Lufthansa, A.G.**

Although traffic figures are not released, company officials note at year's end that the company has had revenues of \$24.6 million and made a \$2.9-million net profit.

Airline employment at the beginning of 1996 stands at 650. On May 2, domestic flights are suspended in order to allow Shaheen to be reformed. The Airbus service from Peshawar to Dubai continues uninterrupted.

Reformed, Shaheen Airlines prepares to resume domestic and freight services at the end of December 1997. Airline leadership is now provided by CEO M. Arshad Jalil and Managing Director Air Vice Marshal A. Masood Khan, PAF (Ret.).

An A320-200, wet leased by Shaheen Air International, Ltd. from **Constellation International Airlines, S.A.**, enters service on December 19 over the thrice-weekly Dubai route. A Boeing 737-400 is employed on December 21 to relaunch flights from Karachi to Islamabad, Lahore, and Peshawar.

The chartered Shaheen Air International, Ltd. A320-200 is returned on April 24, 1998. It is replaced with a leased Tupolev Tu-154M.

National problems arising from nuclear testing and border fighting with India during 1999 do not impact upon services. Shaheen Air International Ltd., employing the leased Tu-154M, inaugurates a second flight between Karachi and Dubai on September 2.

On September 1, 2000, the AI-Sumbal Group invests \$10 million, while an unnamed London-based UAE firm puts in another \$3.5 million. The infusion will be employed to purchase new equipment, beginning with an Airbus Industrie A321 ordered on October 11.

An attempt to gain international route authorization for Shaheen Air International, Ltd. fails on November 3 when the Pakistani government denies a petition seeking permission to begin regularly scheduled flights to Jeddah and Manchester. Frequencies to Abu Dhabi are, however, approved.

SHAMROCK AIRLINES (1): United States (1973-1974). Shamrock Airlines is set up at Easton, Maryland, in 1973 to provide scheduled air taxi services across the Chesapeake Bay to Baltimore. Daily Piper PA-23 Aztec roundtrips are duly inaugurated, but are maintained only into 1974.

SHAMROCK AIRLINES (2): United States (1969-1980). The second Shamrock is actually the first established, being founded in 1969 as a division of the Atlanta-based Douglas and Lomason Company. Employing a large fleet of 3 Douglas DC-6As and 7 Curtiss C-46 Commandos, the company inaugurates nonscheduled all-cargo services to South America from a base at San Juan, Puerto Rico.

Flights continue apace, but business declines steadily during the late 1970s. By 1978, the company operates just four Commandos. The operation is liquidated in 1980.

SHANDONG AIRLINES COMPANY, LTD.: Yaoqiang Airport, Jinan (Shandong), 250011, China; Phone 86 (531) 554081; Fax 86 (531) 554082; http://www.shandongair.com; Code SC; Year Founded 1994. Shandong Airlines is established by the local government at Jinan, the capital of Shandong Province on China's northeast coast, in March 1994 to provide scheduled passenger and cargo services to domestic destinations. Sun Dehan is appointed president and he is outfitted with a fleet of Xian Y-7-100 turboprops (license-built Antonov An-24s) that are employed to inaugurate revenue flights in December.

Eight-times-per-week flights are made from Jinan to Qingdao, Yantai, Jining, and Shenzhen. At year's end, orders are placed for three B-737-300s (later four) that will allow the company to begin national service.

Operations continue apace in **1995** as plans are made for receipt of the first B-737-35H late in the year. Its delivery is, however, delayed.

The first of a trio of 141-seat B-737-35Hs to join the fleet in **1996** is delivered at the end of April. The route network is increased to 10 destinations with the addition of Beijing, Shenzhen, Shanghai, and Guangzhou, while the number of flights per week reaches 60. Replacing Xian Y-7-100s, the second two "Baby Boeings" enter service in the fall.

Enplanements, reported for the first time, reach 310,000. In addition, 2.83 million FTKs are operated.

In September **1997**, Shandong, in line with Chinese government policy designed to reduce the number of regional airlines so as to increase the efficiency of competition, is one of six carriers to form the New Star Alliance. When activated on the following January 1, the informal compact will, hopefully, begin to boost the quality of its members' services via integrated passenger and marketing services and code-sharing on selected routes.

The company's fourth B-737-35H is received at Qingdao Liuting International Airport on August 3, **1998**. Enplanements for the year increase by 11.3% to 693,000, while cargo traffic surges ahead by 47.3% to 7.53 million FTKs.

Orders are placed on November 9, **1999** for five Canadair CRJ200ERs; the sale represents the first for the Bombardier type to any scheduled Chinese regional airline. Upon their arrival, they will join a B-737 fleet that includes 2 Dash-3Y0s and 5 Dash-35Ns. A Chinese-language homepage is opened on the Internet at year's end.

Customer bookings during these 12 months total 756,000 and 1.26 million FTKs are operated.

In August **2000**, Shandong applies to China's securities moderator for permission to go ahead and stage an initial public offering. Such a move would see the issue of 140 million hard-currency B shares that would bring outstanding shares to 400 million, of which 35% are B shares. Income from the offering would be applied to aircraft purchases.

Five additional Bombardier CRJ200ERs are ordered during the first week of September. As reported by the carrier on October 16, a takeover agreement has been signed in September with **Shanxi Airlines Company, Ltd.** Under its terms, Shandong will purchase a controlling stake in the Tiayuan-based carrier using cash and the sale planes. Concrete provisions and details remain under negotiation and will be announced only after final arrangements have been completed.

The first CRJ from the earlier order is delivered in Canadian ceremonies on October 23.

Reacting to rising fuel costs, the **CAAC (The General Administration of Civil Aviation of China)** on November 1 grants the nation's 34 airlines permission to raise ticket prices by 15% to balance passenger traffic and avgas costs; 23 companies, including Shandong, increase fares on November 5.

On November 10, the premier CRJ, as well as its first DHC 8-Q400, arrive at the company base. Both aircraft have flown to China from Canada via Dubai.

Thrice-weekly CRJ200ER roundtrips commence on November 27 from Qingdao, in Shandong Province to Golmud in Qinghai Province via Zhengzhou in Henan Province and Xining in Qinghai Province. The Bombardier requires four hours to fly the one-way leg of what may be the world's most remote jet route. Golmud is the country's largest salt and chemical industrial base and is known locally as "Salt Lake City."

At year's end, the company offers 94 weekly flights to 41 Chinese cities, most of which are located in coastal areas.

SHANGHAI AIRLINES COMPANY, LTD.: North Gate, Shanghai Hongqiao International Airport, Shanghai, 200335, China; Phone 86 (21) 268-8558; Fax 86 (21) 255-8107; <http://www.shanghai-air.com>; Code FM; Year Founded 1985. Shanghai is one of several regional carriers established in early 1985 under the auspices of **CAAC (General Administration of Civil Aviation of China)**. Based at Shanghai's Hongqiao International Airport, this company, presently the largest independent airline in China, is founded by the Shanghai municipal

government and private investors. The carrier initially purchases 5 used Boeing 707s in April. Partly because it had no authority for this action from Beijing, the company, despite backing from the Bank of China and Shanghai's Jinjiang Group, is not allowed to begin operations.

In August **1986**, **Singapore Airlines, Ltd.** sends six B-707 engineers to Shanghai for a six-month period to help the carrier get its aircraft into shape and these are employed to launch charter flights to Guangzhou and Beijing in December.

Enplanements total 1.09 million.

A fleet of four Xian Y-7 (Chinese license-built Antonov An-24s) is acquired in **1987** to fly local routes from hubs at Nanchang, Jinan, and Hefei.

Charter and scheduled bookings for the year total 1,887,300.

The larger state-owned **China Eastern Airlines Company, Ltd.** is established at Shanghai in June **1988** and from this point, much of the press turns its attention to coverage of that enterprise. Shanghai, owned 75% by the local government and 25% by private investors, places orders for 5 Boeing B-757s.

En route from Ningbo to Xiamen on April 24, **1989**, a Y-7 with 50 passengers is captured by a lone assailant who demands to be flown to Taiwan and stabs a stewardess during the takeover. When the man learns that the aircraft has arrived not at Taipei, but at Fuzhou, he pulls the lanyard on a bomb he is carrying, which explodes, killing himself and wounding two others.

The first two B-757-26Ds arrive in **1990** followed by one more in **1991**. He Peng Nian is chairman, president, and CEO in **1992** and his workforce totals 800. Orders are placed for additional B-757s.

Services continue apace in **1993-1994**, with two more B-757-26Ds entering service during the latter year. Orders are placed for five B-767-36Ds.

One more B-757-26D and the first B-767-36D are delivered in **1995**. Toward the middle of the second quarter, an agreement is concluded with **Japan Air Lines Company, Ltd. (2)** under which the Chinese airline will send approximately 90 flight attendant candidates to Tokyo for a 4-month training course.

Enplanements total 1,588,140.

Sun Zhong Li is president and general manager in **1996** and he oversees an employee population of 1,300. The fleet now includes 7 B-757-26Ds and 1 B-767-36D; orders are outstanding for 4 of the latter type. Destinations visited in China now include Beijing, Chengdu, Fuzhou, Guangzhou, Guilin, Harbin, Kunming, Lanzhou, Nanning, Shantzu, Shenzhen, Wenzhou, Xiamen, Xian, and Zhuhai.

Passenger boardings jump 8.2% to 1.73 million while cargo rises 18.1% to 34.84 million FTKs.

The last B-757 and two more B-767s enter service in **1997**. Orders are placed for three B-767-36Ds to be delivered in the year 2000. In April, an agreement is concluded with ILFC for the charter of three Next Generation B-737-7Q8s beginning in the spring of 1998. On August 28, government approval is received for the inauguration of regional services to Bangkok, Hong Kong, Singapore, and Macao.

Enplanements for the year decline to 1,684,000 and 46.3 million FTKs are operated.

The premier Next Generation B-737-7Q8, resplendent in the carrier's red and white livery, enters service during the second quarter of **1998**. On June 25, thrice-weekly roundtrips commence between Shanghai and Zhousan Island, a tourist destination in Zhejiang Province.

Weekly B-737-7Q8 nonstop roundtrips are inaugurated on December 24 between Xian and Xining.

Enplanements for the year total 2.13 million, while 83.15 million FTKs are operated. A net profit of \$3 million is reported.

On September 16, **1999**, the company is given the honor of making the first landing at Shanghai's new Pudong International Airport.

Service between Shanghai and Macao is doubled on October 6 to four return flights every week. When Portugal hands over Macau to China in December, Shanghai loses its only "international" flight. Connections are still made at that point with **EVA Airways, Ltd.** flights to Taiwan; the two companies enjoy a special relationship that includes through-ticketing.

Customer bookings inch up 0.7% during these 12 months to 2,145,000, while freight jumps 17.4% to 105.9 million FTKs. Longer segments continue to be operated with a fleet of 7 B-757-26Ds and 3 B-767-36Ds.

Airline employment at the beginning of 2000 stands at 2,300, a 1% increase over the previous 12 months.

Weekly B-737 charters are initiated on February 18 to Pochentong, Cambodia; the flights become scheduled in April. Meanwhile, in mid-March, orders, valued at C\$98 million, are placed with Bombardier for three CRJ200ERs.

The company's fourth Next Generation B-737, a Dash-76D, is received at Hongqiao International Airport on May 30.

On May 21, weekly roundtrip service, code-shared with **Royal Air Cambodge, S.A.**, is inaugurated between Shanghai and Phnom Penh. Shanghai thus becomes the first Chinese local service operator to fly abroad. The flights become twice weekly on June 4. The last of five Next Generation B-737s delivered since April 1998 is delivered on July 10; the Dash-76D will arrive at Shanghai three days later and enter service on the routes from Shanghai to Thailand.

In response to a fatal June 22 **Xian Airlines** Y-7-100C crash, **CAAC (The General Administration of Civil Aviation of China)**, in fact, delivers a major reorganization plan to the China State Council in mid-July. Among the proposals is a release of all airlines from the requirement that they purchase aircraft through CAAC. More important, however, is a recommendation that the 13 largest of China's 34 carriers be consolidated into 3 groups built around **Air China International Corporation**, **China Eastern Airlines Company, Ltd.**, and **China Southern Airlines Company, Ltd.** Shanghai begins negotiations to become a partner in the group centered around **China Eastern Airlines Company, Ltd.**

The orders for three Bombardier CRJ200ERs are confirmed during the first week of September.

Reacting to rising fuel costs, on November 1 the **CAAC (The General Administration of Civil Aviation of China)** grants the nation's 34 airlines permission to raise ticket prices by 15% to balance passenger traffic and avgas costs; 23 companies, including Shanghai, increase fares on November 5.

On December 1, the company joins in the frequent flyer program of **Air China International Corporation, Ltd.** Passengers flying with either airline will receive a free ticket when they have flown a collective 10,000 km. (6,215 mi.).

The first CRJ200ER is accepted in ceremonies at Montreal on December 3. The new regional jet arrives at Shanghai two days later, having completed its delivery flight via Munich, Dubai, and Kunming. It enters commercial service on December 25 from Shanghai to Jinan, Nanchang, and Weihai.

As the year ends, new Chairman/General Manager Zhou Chi indicates that his airline will be reformed into a joint-stock company. The first of four Next Generation B-737-8Q8s is expected in January.

SHANGHAI-CHENG TU AIR MAIL LINE: China (1929-1930). In April 1929, Wang Po-chun, the minister of communications in the cabinet of Nationalist Chinese leader Chiang Kai-shek, allies himself with War Minister Feng Yu Liang and Chinese National Aeronautics Association Chairman Gen. Chang Ching-yu in opposing the creation of **China National Aviation Corporation (CNAC-1)**. In addition to their oratory, the three combine their resources to create an airline.

The Ministry of Communications in May signs a contract with the Stinson Company in the U.S. for four Stinson SM-1F Detroit monoplanes. These duly arrive at Shanghai by ship at the end of June and are reassembled by two American pilots and a mechanic employed by the manufacturer.

Once ready for operations, the four aircraft form the heart of Minister Wang's Shanghai-Chengtu Air Mail Line. Revenue flights commence as far as Nanking on July 8 and are the first sustained passenger and air-mail frequencies performed by any carrier in China. In the jumbled pol-

itics of prewar China, the president of the still-paper CNAC-1 resigns on November 15 and is succeeded by none other than Wang Po-chun.

On January 31, 1930, President Wang is able to secure the contract cancellation of another new entrant, **China Airways Federal (CAF)**. He then settles into a protracted negotiation with Curtiss-Wright Company representative Max S Polin. These are successfully concluded on July 8, at which time CNAC-1 is reformed into a new company with the same name. The assets of CAF and the Shanghai-Chengtu Air Mail Line are taken over and merged, with the latter now ceasing flights. During its year of operation, Wang's airline has flown a total of 354 passengers.

SHANK-MCMULLEN AIRCRAFT COMPANY: United States (1923). Two gentlemen named Shank and McMullen establish a large air taxi and charter concern at Huntington, West Virginia, in the spring of 1923. With a fleet of 15 Curtiss JN-4D Jennies, 5 Standard J-1s, 2 Thomas Morse S-4Cs, 3 Curtiss HS-2Ls, 1 Curtiss MF, and 1 Curtiss Oriole, the company undertakes nonscheduled, multistop passenger and cargo flights to Charleston, Cincinnati, and Roanoke.

Unable to achieve financial viability, the company closes down before year's end.

SHANNON AIR, LTD.: Ireland (1964-1966). With American financial backing and Theodore Roosevelt's son Kermit as director general, this nonscheduled operation is formed in early 1964 to fly international charters from Shannon Airport. The first aircraft, a Douglas DC-4, is delivered in early May and on May 30 it begins revenue services with a charter flight, Shannon-Manchester. Weekly charters are flown to this British city and beginning in July, to Birmingham. Also in July, a DC-7CF is purchased and during the fall flies long-range charters to the Western Hemisphere.

Another DC-7CF is acquired in March 1965 and with the previous machine, undertakes a full schedule of passenger and cargo charters as far as Singapore from Newcastle, Southend, Manchester, and London (LGW). One DC-7CF is almost permanently based at the latter airport, flying ad hoc and other passenger and cargo services both on its own behalf and under subcontract to **British United Airways, Ltd.**

During the year, the company's DC-4 is totally engaged flying all of **Alitalia, S.p.A.**'s scheduled cargo runs between the U.K. and Italy. Employing Douglas DC-4s, long-haul flights are dispatched as far as Singapore. The company is not, however, successful financially.

Following the February 1966 impoundment by British Airports Authority officials of its DC-4 for nonpayment of London (LHR) landing fees, Shannon loses its contract with **Alitalia, S.p.A.** This blow is sufficient to cause its owners to declare bankruptcy and cease operations.

SHANNON EXECUTIVE AVIATION, LTD. (SEA): Ireland (1980-1990). SEA is established at Shannon in 1980 to operate passenger and cargo charters and air taxi services around the Emerald Isle, as well as to the U.K. Revenue flights begin and continue with a fleet that includes 1 Shorts SC-7 Skyvan, 1 Aerospatiale Corvette bizjet, 1 Swearingen Metro II, several Piper and Cessna lightplanes, and 1 Bell 206B JetRanger.

Service is maintained until the company suspends activities in 1990.

SHANS AVIA: Russia (1994-1995). Shans Avia is established at Tbilisi in 1994 by Nana Shavgulidze, a Georgian art dealer who thus becomes the only female airline president in the former Soviet Union. Employing a single Tupolev Tu-154 leased from a subsidiary of **Aeroflot Russian International Airlines (ARIA)**, Shans initiates thrice-weekly luxury flights (60 seats as opposed to 160 earlier) to Moscow. Operations continue for just under a year.

SHANXI AIRLINES COMPANY, LTD.: No. 36, Yingze Daija, Tiayuan, Shanxi, 030001, China; Phone 86 (351) 447178; Fax 86 (351) 447178; Code 8C; Year Founded 1981. Shanxi Airlines, a division of Shanxi Aviation, is established at Taiyuan in 1981 to offer regional serv-

ices that had been set up to engage in forestry protection and aerial photography. Initially a charter operation, the company is widely regarded as the first (perhaps a trial) independent airline to be allowed in China.

President Zhang Ti Yuan recruits a workforce of 33 and a fleet comprising 2 each Ilyushin Il-14Ps and Xian Yun-7-100s. Twelve routes are opened connecting the company base at Wusu Airport with Shanghai, Beijing, Guangzhou, and Shenzhen.

While on initial climb away from Linfen on October 7, 1988, a chartered Il-14P with 4 crew and 42 passengers loses power and crashes into a local hotel (42 dead).

The under-explained accident leads to the company's shutdown.

Operations are later resumed and in 1992–1995; Qin Jianming becomes CEO and the surviving Il-14P is withdrawn and replaced by a third Yun-7-100. The workforce grows to 23 and enplanements during the latter year total 918,320.

Passenger boardings accelerate 11.7% in 1996 to 1,040,000, while cargo traffic jumps 22.7% to 21.58 million FTKs.

By 1997–1999, President Jianming's concern employs 33 workers and still operates 3 Xian Yun-7-100s.

As reported by the carrier on October 16, 2000, a takeover agreement has been signed in September with **Shandong Airlines Company, Ltd.** Under its terms, Shandong will purchase a controlling stake in the Tiayuan-based carrier using cash and the sale planes. Concrete provisions and details remain under negotiation and will be announced only after final arrangements have been completed.

Reacting to rising fuel costs, on November 1 the **CAAC (The General Administration of Civil Aviation of China)** grants the nation's 34 airlines permission to raise ticket prices by 15% to balance passenger traffic and avgas costs; 23 companies, including Shanxi, increase fares on November 5.

SHASTA AIR: United States (1979–1982). This tiny air taxi operator is founded at Redding, California, in 1979 as an FBO that also offers charter services and flight lessons. A scheduled route is flown between the company's base and Siskiyou County with a single Cessna 210.

A Piper PA-31-350 Navajo Chieftain is acquired in 1981 and is employed to inaugurate twice-daily roundtrips to Oakland and to Klamath Falls, Oregon. Plans (unfulfilled) are made to acquire a British Aerospace BAe Jetstream 31.

Unable to weather the recession, the company ceases in 1982.

SHAVANO AIR: United States (1978–1981). Frederick Griffith founds Shavano at Denver in 1978 to provide charter services to Colorado's ski resorts. In addition, scheduled air taxi flights are inaugurated to the intrastate destinations of Salada and Trinidad. The fleet comprises 1 Piper PA-34 Seneca, 1 Cessna 337, and 2 Cessna 207s.

Unable to afford increased fuel costs, the carrier goes out of business in 1981.

SHAWANO FLYING SERVICE: United States (1976–1986). **Isle Royal Seaplane Service** is set up at Houghton, Michigan, in 1973 to provide daily scheduled Beech 18 passenger and cargo roundtrips to Isle Royale in Lake Michigan.

Late in the decade, the company is reformed into **Grognet Flying Service**; however, the commuter is transferred to Shawano, Wisconsin, in 1981 and renamed again. Operations continue apace until 1986.

SHAWNEE AIR COMMUTER: United States (1969–1972). The airline division of Shawnee Air, Inc., SAC is established at Topeka, Kansas, in 1969 to provide scheduled passenger and cargo services. Employing Cessna lightplanes, daily roundtrips are inaugurated linking the company's base with Kansas City and with Manhattan via Junction City. These are maintained until 1972.

SHAWNEE AIRLINES: United States (1968–1979). Established by David D. Latham at Orlando, Florida, in the early spring of 1968,

Shawnee is a subsidiary of the Root Company of Daytona Beach. Outfitted with a Beech 18, the commuter begins scheduled daily roundtrip intrastate services on April 1.

An extensive Florida route network is established over the next decade, with principal destinations visited coming to include Miami, Orlando, Gainesville, Tampa, Fort Lauderdale, and Freeport in the Bahamas. The fleet is upgraded by the addition of Beech 99s, Douglas DC-3s, de Havilland DH 114 Herons, Fairchild Hiller FH-227Bs, and de Havilland Canada DHC-6 Twin Otters. Several of the latter are employed in 1971 to inaugurate STOL services to newly opened Walt Disney World.

In 1975, the company joins with **Florida Airlines** in a marketing association known as The Connection. The arrangement lasts only two years, until 1977. Toward the end of the 1970s, Shawnee encounters significant competition not only from its Sarasota-based former partner, but from **Mackey International Airlines** on the Bahamas frequencies.

A total of 22,931 passengers are transported in 1978, down from higher totals earlier. Weakened from its competition with **Florida Airlines** and **Mackey International Airlines** and unable to survive the oil crisis, the carrier folds in 1979.

SHAWNEE AIRWAYS: United States (1958–1966). Ernest Stadvec sets up the FBO Stadvec Aviation at Akron, Ohio, in 1958. Beech 18 charter freight and nonscheduled passenger air taxi services are provided to local Buckeye destinations. A 1961 aircraft collision results in Stadvec changing the name of his firm to Shawnee Airways. Flights continue.

In late fall 1965, the decision is taken to offer a scheduled shuttle service to Detroit. Employing a Lockheed Model 12A, daily roundtrips are inaugurated on November 15, but are only maintained into 1966.

SHEENA AIR TRANSPORT, LTD. See **PACIFIC WESTERN AIR LINES, LTD.**

SHELBY SKY HAVEN, INC. See **FISCHER BROTHERS AVIATION.**

SHENANDOAH AIRLINES: United States (1968–1969). "Your Personal Airline," Shenandoah Airlines is set up at Charlottesville, Virginia, in the heart of the Shenandoah Valley, in late summer 1968 to provide scheduled passenger and cargo services to regional destinations. Employing 1 each Beech 18 and B-80 Queenaire, daily roundtrips are inaugurated by the new commuter on September 16 linking the it's base with Lynchburg, Washington, D.C. (IAD), Roanoke, and Baltimore.

Unable to achieve economic viability, the company is forced to shut down in 1969.

SHENZHEN AIRLINES COMPANY, LTD.: Lingtian Tian, Lingxiao Garden, Shenzhen Airport, Shenzhen, 518128, China; Phone 86 (755) 777-7243; Fax 86 (755) 777-7242; <http://www.shenzhenair.com>; Code 4G; Year Founded 1994. Shenzhen Airlines is established at Shenzhen in Guangdong Province in early 1994 to offer scheduled regional passenger services, particularly to the local special economic zone. Ownership is divided between China Travel Services, CNAC-2, the Bank of China, and the Southern Tongfu Industrial Company. Operational oversight is vested with **China Southern Airlines Company, Ltd.**

Duan Dayang is appointed president and general manager and is provided with a pair of Boeing 737-3L1s. Revenue services commence on October 15 linking the company's base with Beijing, Chengdu, Haikou, Hangzhou, Meixian, Nanjing, Shanghai, Wenzhou, Xiamen, Yantai, and Zengzhou.

Airline employment stands at 363 in 1995 as two leased B-737-37Ks are acquired. Enplanements total 580,700.

Forty new employees are hired in 1996 and two B-737-3K9s are chartered from **Bavaria Fluggesellschaft mbH. & Co.** Passenger boardings surge 26.5% to 790,000.

On May 8, 1997, Flight CZ3456, a company B-737-31B with 74 passengers and coming in from Chongqing in the central province of Sichuan, crashes during its landing at Shenzhen-Huangtian Airport on the border between Macau and Hong Kong. The plane veers off the runway, breaks into 3 pieces, and catches fire (35 dead). The disaster is the first major Chinese airline crash in three years.

For the third straight time, the airline is cited by air passengers as the best among large Chinese airlines that carry less than 2 million passengers annually. The survey, whose results are announced on July 17, had sent out a total of 1.33 million questionnaires concerning passengers' opinions on the service quality of 25 airports and 16 major Chinese airlines. Other winners are **China Eastern Airlines Company, Ltd.** and **Xiamen Airlines Company, Ltd.**, which each win first place in separate contests for the annual passenger volume exceeding 6 million and less than 3 million.

In September, Shenzhen, in line with Chinese government policy designed to reduce the number of regional airlines so as to increase the efficiency of competition, is one of six carriers to form the New Star Alliance. It is hoped that when activated on the following January 1, the informal pact will boost the quality of its members' services via integrated passenger and marketing services and code-sharing on selected routes.

Enplanements during the 12 months total 851,304.

Service is maintained without fanfare during 1998. Passenger boardings climb 5.2% to 898,000, while cargo traffic accelerates 4.7% to 12.26 million FTKs.

A Chinese-language homepage is opened on the Internet at the end of 1999.

Overall enplanements during these 12 months fall to 659,000 while 1.84 million FTKs are operated.

The "classic" B-737 fleet at the beginning of 2000 includes 2 each Dash-3K9s and Dash-31Ls, plus 1 each Dash-3Q8 and Dash-33A. Two Next Generation B-737-79Ks are also flown and will be joined by two Next Generation B-737-78Ss on August 25 and September 15, respectively.

Reacting to rising fuel costs, on November 1 the **CAAC (The General Administration of Civil Aviation of China)** grants the nation's 34 airlines permission to raise ticket prices by 15% to balance passenger traffic and avgas costs; 23 companies, including Shenzhen increase fares on November 5.

A third Next Generation B-737-78S is delivered on December 20.

SHEPPARTON AIRLINES (PTY.), LTD.: Australia (1997-1999). With a Piper PA-31-350 Navajo Chieftain, pilots John Holmes and Grayson Pogue establish Shepparton in October 1997 to provide corporate and small group passenger flights to Sydney and Canberra on a scheduled and charter basis.

Daily roundtrip service is maintained in 1998 and the little company takes particular pride in its level of personal service to its customers. Unhappily, the company is forced to halt scheduled services in 1999.

SHIKOKU AIRWAYS COMPANY, LTD.: 1-1-5 Bancho, Takamatsu-shi, Kagawa-ken, 760, Japan; Phone 81 878-51-7500; Fax 81 878-51-7547; Year Founded 1956. Shikoku is established at Takamatsu in 1956 to operate passenger and light cargo charters, and later, to provide medevac and other rotary-wing work. By 2000, the company employs 15 full-time pilots and operates 4 Eurocopter AS-350B Ecureuils, 1 AS-360C Dauphin, 1 Hughes HU-369, and 2 Eurocopter SA-315B Lamas. It also flies 3 Cessna 172 Skyhawks.

SHILLELAGH AIR TRAVEL CLUB (SHILLELAGHS, THE TRAVEL CLUB): 8027 Leesburg Pike, Suite 413, Vienna, Virginia, 22180, United States; Phone (703) 556-8646; Fax (703) 556-8648; <http://www.fairfaxcountyva.com/travel/club.htm>; Year Founded 1964. In early 1964, three lawyer/private pilots, Roy Swayze, Frank Cowles, and Gordon Kincheloe join with **American Airlines** Captain Tom Latta to form an aircraft dealership at Washington, D.C. (IAD) known as Dulles International Aircraft Corporation. The operation be-

gins with a single Beech 18, which is often employed for charters and small group excursions.

In the spring, word is received that **National Airlines (1)** is selling four Douglas DC-7Bs as they are withdrawn from scheduled service. Swayze and Kincheloe fly to Miami, where they join partner Cowles in making a down payment on the \$110,000 as-is purchase price of the four piston-engine planes. The first aircraft is delivered to Dulles without difficulty and by midsummer is sold, generating sufficient funds to cover the cost of the plane plus the second for which DIAC had contracted.

In September, National calls the DIAC office and informs them that the second DC-7B is now off-service and strongly suggests that it be retrieved before a hurricane, reportedly closing in on Miami airport, arrives. With partners Swayze and Cowles along, Capt. Latta retrieves the aircraft, which must undergo some repair and for which no buyer is available.

After several efforts to sell the aircraft fail, the four reason that, if four people could own a Beechcraft and operate it on charters, a thousand people could join together and own a larger aircraft, say a DC-7B, for the same purpose. A club could be established that would permit its members unique travel experiences to distant locations in their commonly owned aircraft.

Patterned after the general administration and dues structure of a suburban country club, the new organization, which takes its name from the Irish word for "walking stick," is established on October 1 as the Emerald Shillelagh Chowder and Marching Society. The second DC-7B becomes the ESCAMS aircraft, making the group the first U.S. travel club to own its own aircraft. With a name, some members, and an airplane, the club now chooses officers, writes a constitution and by-laws, and completes the paperwork necessary for incorporation in the State of Virginia. It also makes certain that its aircraft and organization are prepared to pass FAA review and to operate under its Part 91 General Aviation rules.

At this point, a membership drive is conducted, promising trips at fares significantly lower than those charged by any of the other U.S. airlines, scheduled or charter. Annual membership dues will be \$100 per person and the first destination will be Montego Bay, Jamaica. The share cost for any member making the trip is to be \$57. Meanwhile, Alice Foy, the soprano soloist at the Bunratty Castle in Ireland, is recruited to come to America and work as the ESCAMS hostess.

With the majority of the plane's 88 seats sold to new members or otherwise occupied by club friends, Capt. Latta, who has also hired a copilot, flight engineer, and two flight attendants (then called "stewardesses"), departs for Jamaica on a Saturday late in the month. The inaugural flight, which passes near Cuba, is intercepted but not troubled by Cuban Air Force MIG 21 fighters. The new travel experience is completed with a return flight to Washington, D.C. (IAD) the next day.

The second flight is made to Las Vegas, followed by Andros Island in the Bahamas, and Mexico City. On the return home from Mexico, one of the DC-7B's four engines loses power, causing Capt. Latta to put down at Houston rather than risking flying back to Washington, D.C. through a series of storms. Unhappily, no one aboard has any money. Fortunately, club President Kincheloe has his American Express credit card. Arrangements are made with **Braniff International Airways** to fly everyone aboard to Dallas and then on to Dulles.

DIAC is, meanwhile, able to dispose of the last two ex-**National Airlines (1)** DC-7Bs, both to travel clubs begun after ESCAMS. In the next two years, the company employs its own part-time mechanics, led as crew chief by former **United Air Lines** mechanic Donald Hoskins, and brings on former naval aviator Comdr. Robert M. Hurt.

In July 1968, the original DC-7B is joined by another DC-7B from **Delta Air Lines**. The first aircraft is withdrawn in September. In March 1969, the group falls under the new FAA Part 123 regulations specifically designed to cover air travel clubs. Flights continue without headline or incident until May 1971, when the DC-7C is sold and the club is, temporarily, without an aircraft.

A Lockheed L-188C Electra is purchased from Northwest Airlines in March 1972 and will provide lift for the club members for the remainder of the decade to points all over North and South America, the Caribbean, Canada, and a few other points as well. In February 1981, the FAA revises its rules for travel clubs, allowing them to fall under the same part of its rule book (Part 125) as corporate organizations. The principal advantage here is that club pilots are able to fly beyond the age 60 retirement required of commercial pilots.

ESCAMS enters the jet age in May 1983 when it acquires a former American Trans Air Boeing 720. The aircraft will be operated until January 1985. By now, deregulation of the American domestic airline industry has significantly lowered airfares and ended the principal reason why air travel clubs were invented. Additionally, fuel and maintenance costs have also significantly risen. With membership numbers declining and prices rising, this pioneer group cannot afford to maintain its own aircraft any longer. As a result, Capt. Hurt, who is now director of operations, makes the last ESCAMS flight with an owned aircraft from Washington, D.C. (IAD) to Miami on February 23, 1986. At Miami, the Electra is sold to a local cargo operation.

Without its own capacity, ESCAMS is now reformed into a specialized inclusive tour travel agency for its members, Shillelaghs, The Travel Club. Under its executive director of operations Carolyn Dodek, exotic excursions continue to be booked for members to a variety of locations using commercial travel on planes, trains, ships, and motor coaches. These range from moderately priced trips to high-end luxury adventures.

By 2000, Shillelaghs has 1,900 members and runs an average of 71 trips a year for them. Particularly successful are its trips to northern Canada for the observation of beluga whales in Hudson Bay and polar bears at Churchill. The Galapagos Islands are another popular destination. Additionally, trips for senior citizens are a specialty and trips to Ireland, home of the shillelagh, are offered three or four times a year.

SHIN CHUO KOKU, K.K.: Ohshima Airport, Ohshima, Tokyo, Japan; Phone 81 4992-2-1651; Year Founded 1979. This little carrier is set up on Oshima Island in 1979 to provide passenger charters to the mainland. By 2000, founder Shigemitsu Takei oversees the flights of 6 Cessna 172 Skyhawks.

SHIN CHUO KOKU/SHIN CHUO AIRLINES. See NEW CENTRAL AVIATION.

SHORELINE AVIATION: P.O. Box 120187, East Haven, Connecticut 06512, United States; Phone (203) 468-8639; Fax (203) 468-1864; <http://www.shorelineaviation.com>; Year Founded 1980. John D. Kelly establishes Shoreline Aviation at Griswold Airport, adjacent to Hammonasset Beach at Madison, Connecticut, in 1980 to offer charter flights to the islands off southern New England. In 1986, the company is relocated to New Haven, where it changes its focus. Henceforth, it specializes in the management of aircraft for corporations and individuals, flying small group and executive charters with a fleet of 25 executive jets.

By the end of the 1990s, offices have been opened in Hartford, New Haven, Bridgeport, Manhattan, and East Hampton and destinations are visited in Western and Eastern Europe, Africa, the Caribbean, Central and South America.

SHOROUK AIRLINES, LTD.: 2 El Shahid Ismail Fahmy St., El Sabaa Emarat Square, Heliopolis, P.O. Box 2684, Horreia, Cairo, Egypt; Phone 20 (2) 417-2313; Fax 20 (2) 417-2311; Code 7Q; Year Founded 1992. Headquartered at Cairo, Shorouk is founded in late 1992 as a joint venture between Egyptair, S.A.E. and Kuwait Airways Corporation. Ismail Sherif is named chairman and he is provided with 2 Airbus Industrie A320-231s with which to launch services. Orders are placed for 2 A320-231s, 3 Boeing 757-29JPFs, and 1 B-757-291.

Thrice-weekly return revenue passenger and cargo charter flights to Beirut, Kuwait, and Luxor commence on March 1, 1993.

Operations continue apace in 1994, including replacement services for Egyptair, S.A.E. and Air Sinai, Ltd. The company also begins to operate charter flights from Italy, France, and Germany to tourist areas in Egypt, including Hurghada and Luxor. A total of 80,000 passengers are flown in 1995.

Approximately \$500,000 in profits are earned during the first quarter of 1996. On August 8, the joint airline increases its capital from \$40 to \$50 million dollars, with plans to achieve an authorized capital of \$100 million within the next 5 years. The two Airbuses enter service later in the year, followed by the Boeings.

Plans are made to operate all-cargo services for Kuwait, but due to poor business results, these ideas are shelved, along with delivery of the three B-757-29JPFs. The company temporarily shuts its doors at the beginning of 1997.

The company is back in the air in 1998; it will operate as before into the new millennium.

Airline employment at the beginning of 2000 totals 240. On January 10, it is announced that the carrier may be renamed Egyptian-Kuwait Flight, Ltd.

The company aircraft color scheme is revised on June 12 through the removal of the cheatline from the four A320-231s.

SHORTER AIRLINES: United States (1972-1974). Shorter is established at Pellston, Michigan, in 1972 to provide scheduled daily intrastate passenger services. Employing 1 each Beech 18, Beech 99, and Douglas DC-3, the company inaugurates roundtrip frequencies linking its base with Detroit and also with Mackinac Island and Sault Ste. Marie. During the winter, the company operates seasonal services in Florida.

Unable to maintain viability, the carrier goes out of business in 1974.

SHORTSTOP JET CHARTER (PTY.), LTD.: Hangar 5, Wirraway Rd., Essendon Airport, Melbourne, 3041, Australia; Phone 61 3-93799299; Fax 61 3-93793643; Year Founded 1982. Shortstop is established at Essendon Airport in 1982 to provide passenger, small group, and cargo charters throughout Victoria. By 2000, Managing Director Mike Falls Jr. oversees the work of 4 full-time pilots and 1 each Douglas DC-3 and Learjet 35A Century III.

SHUANGYANG GENERAL AVIATION COMPANY: P.O. Box 8-145, Anshun, Guizhou Province, 561018, China; Phone 86 853 22923; Fax 86 853 25275; Year Founded 1991. The first local carrier in southwest China, SGAC is established at Anshun in 1991 to provide passenger and cargo charters, as well as agricultural, forestry protection, and aerial photography services. Nine years later, in 2000, President Fan Yuemin oversees a workforce of 37 and a fleet comprising 3 NAMC Y-11s and 4 NAMC Y-12s.

SHUSWAP AIR (SHUSWAP FLIGHT CENTER, LTD.): Box 1887, Salmon Arm, British Columbia V1E 4P9, Canada; Phone (250) 832-8830; Fax 250) 832-2825; <http://www.shuswapair.com>; Code 3S; Year Founded 1989. Stephen W. Raffel and Lori Anthony found this air taxi at Salmon Arm of the huge Shuswap Lake in the interior of British Columbia in 1989. "Shuswap" is a Native American term for "shimmering waters." Flight training, aircraft rental, charters, and scheduled passenger and cargo flights to Vancouver are offered. The initial fleet consists of 1 Piper PA-31-310 Navajo and 2 Cessna 182s. In 1993-1994, airline employment totals 6.

Flights continue in 1995-2000, during which years the Piper is replaced with a Beech King Air 100. Twice-weekday frequencies to and from Vancouver are maintained with one return service on Sundays. C-182 charters are also offered, as are aerial tours, including excursion flights to visit the Seymour Arm Hotel's tearoom, the ski area at Silver Star Mountain, the glacier fields of the Monashee Mountain Range, and the Adams River Salmon Run.

SHUTTLE, INC. See **USAIR SHUTTLE**

SHUTTLE AMERICA: P.O. Box 3246, Windsor Locks, Connecticut 06096, United States; Phone (877) 247-7488; <http://www.airshuttle.com>; Code S5; Year Founded 1998. Shuttle America is established by David F. Hackett (a former strategic planner for **Continental Airlines**) and Gregory D. Aretakis at Windsor Locks in the fall of 1998 to offer deep-discount, ticketless travel to four points in the Northeast. Hackett becomes president, with Aretakis as vice president-management. Initial private capitalization is \$8 million, supplemented by a \$2-million grant from the state of Connecticut. A workforce of 300 is assembled, including 200 in the home state.

Employing a fleet of six de Havilland Canada DHC-8-300s, the new regional begins revenue flights on November 12 linking Hartford with Buffalo thrice daily and Wilmington five times a day. Service is started from Hartford to Norfolk four times a day on December 18.

Between Christmas and New Year's Day, the carrier lifts restrictions on its lowest fares. Tickets are priced at \$19 and \$69 each way during the week.

Thrice-daily roundtrips commence between Trenton-Mercer County Airport in New Jersey and Buffalo, New York, on February 10, 1999. The same number of frequencies are started between Buffalo and Albany on April 6.

The carrier's activities are significantly expanded on July 13. New thrice-daily DHC-8-300 return service is introduced from Long Island/Isip to Albany, with continuation to Buffalo. Additionally, twice-daily roundtrips begin from Long Island/Isip to Norfolk, Virginia Beach, and Williamsburg. Expanded service at Norfolk includes a new nonstop daily roundtrip to Hartford and also to Trenton, as well as one-stop service to Buffalo via Albany.

Enplanements for the year total 237,000.

The workforce totals 275 at the beginning of 2000.

Citing environmental concerns raised by the prospect of noise pollution to such historic areas as Minuteman Historical Park, lawyers representing the surrounding towns of Bedford, Lincoln, Lexington, and Concord petition the FAA to stop the company's introduction of new service from Hanscom Field, north of Boston, to New York (LGA). The regulators agree and on September 11 order Shuttle America to postpone the launch for 30 days. The carrier, which had leased an extra aircraft to handle the route and had begun selling tickets, promises refunds to affected customers.

Four-times-a-day return service from Hanscom Field to La Guardia is introduced on October 11 and by October 13 five of the first eight flights have been sold out. On November 8, 10 additional daily roundtrips are introduced from Hanscom Field, including five to Buffalo via Hartford, four to Trenton and Wilmington, and one Buffalo nonstop.

As the result of a spring law allowing an increase in traffic, New York (LGA) has, by early December, added more than 200 new daily flights and requests have been made that will increase the daily total by almost 600. In an effort to handle an increase certain to exacerbate existing delays and congestion, the FAA and the Port Authority of New York and New Jersey begin coordinating planning while imposing a September moratorium on new La Guardia flights.

On December 4, the FAA holds an action to distribute the available takeoff and landing slots. Each carrier serving the airport draws a certain number, with each then choosing lots for first choice of times for those slots. Shuttle America receives 14 of the new positions. On December 22, it is announced that the route from Hanscom Field into New York (LGA) will be expanded from five daily roundtrips on January 31 to seven.

Passenger boardings during these 12 months jump 4.9% to 245,312.

SHUTTLE BY UNITED. See **UNITED AIRLINES**

SI AIR AOZT: Kemerovo Airport 41, West Siberian Zone, 650041, Russia; Phone 7 (3912) 227 729; Fax 7 (3912) 661 158; Code KVM1;

Year Founded 1994. SAA is established at Kemerovo Airport in 1994 to provide long-haul passenger and cargo charters. M. I. Slavin is appointed general director and he launches revenue flights with 3 Tupolev Tu-154Ms and an unspecified number of Ilyushin Il-76s.

Flights continue in 1995-1998 during which years Ivan Valov becomes CEO. The fleet is altered to include 2 Tu-154Ms, 8 Antonov An-26s, and 5 An-24s.

The fleet at the beginning of 1999-2000 includes 2 An-26s and 1 An-26B.

SIAMESE AIRWAYS COMPANY, LTD.: Thailand (1947-1951).

The government of Thailand constitutes its new national air carrier at Bangkok on March 1, 1947. The company is equipped with one of the former **Aerial Transport Company of Siam, Ltd. (ATCS)** Fairchild Model 24Js that had survived World War II, together with 4 Douglas DC-3s, 2 Beech 18s, and 6 Consolidated L-5s. Revenue services commence on March 3 from the capital to Chiangmai and Chiang Rai. The remainder of the old ATCS routes are restarted during the remainder of the month and into April and May.

SAC inaugurates regional services on December 22 with a route from Songkhla to the Malayan city of Penang. International expansion continues early in the new year. On January 16, 1948, a DC-3 service is launched to Phnom Penh and Saigon, followed by Hong Kong three days later.

To handle this service increase, the fleet grows on January 23 through the addition of five Beech C-35 Bonanzas. This first quarter burst of development sustains the company through the remainder of the year.

Two final markets are added in 1949 as SAC starts flying to Calcutta via Rangoon. The last aircraft to join the fleet are six Noorduyt Norseman in 1950.

The new decade begins with a number of accidents.

A DC-3 with 5 crew and 11 passengers strikes high ground at Cape d'Arguilar, east of Hong Kong, on April 9, 1951; there are no survivors.

A C-54B must be written off after a bad landing at Bangkok on July 13; there are no fatalities.

A DC-3 with three crew aboard overshoots the runway at Bah Fai, Thailand, on August 20 and crashes; although the aircraft must be written off, there are no fatalities.

Despite these losses, further significant company development is anticipated. To that end, the airline purchases Pacific Overseas Airlines (Siam), Ltd. on November 1, 1951 and the same day, the two concerns are merged to create **Thai Airways Company, Ltd.**

SIBAVIA SIBERIAN AIRLINES (SIBAVIA SIBIRSKIR AVIALINII KONTSEK) See SIBERIA AIRLINES

SIBAVIATRANS: SA Vzlelnaya Street, Krasnoyarsk, 660077, Russia; Phone 7 (3912) 227 729; Fax 7 (3912) 553 824; <http://www.siat.ru/siat/n1.html>; Code 5M; Year Founded 1995. Sibaviatrans is established on February 23, 1995, as the transport section of a Krasnoyarsk metal factory. In addition to executive travel, the unit is authorized to undertake passenger and cargo charters and to undertake aerial work.

Boris Abramovich is named director general and he recruits a workforce of 200. A fleet is acquired that comprises 2 Antonov An-2s, 1 British Aerospace BAe 125-700B bizjet, 2 Yakovlev Yak-40s, and 9 Mil Mi-8 helicopters. Revenue services begin before the end of the month and are continued over the next four years without headline or incident. During these years, 1 each Tupolev Tu-154B and Tu-154M and 2 Antonov An-32s are added, along with 22 smaller fixed-wing and rotary-wing aircraft. Revenues of 300 million rubles are reported for 1999.

The Russian media reports that during the summer of 2000, negotiations are conducted between the carrier and **Murmansk Airlines** concerning the possible provision of help in resolving the latter's dismal operating situation. The talks come to nothing because Sibaviatrans is not interested in purchasing additional expensive Tupolevs, wanting only to lease the Antonov biplanes and a number of helicopters. The Murmansk

Web site soon shows most of the helicopter fleet up for sale, as well as both Tupolevs (one for \$2.1 million and the other for \$2.2 million).

Sibaviatrans now opens an office at Murmansk and begins to operate its own return service from that point to Moscow. Executives on the scene now also avail themselves of opportunities to further assess **Murmansk Airlines'** small fleet.

The increasing cost of fuel forces the company to default on its avgas payments on September 4. A payment schedule is soon instituted.

In mid-November, Sibaviatrans and **Murmansk Airlines** conclude a strategic partnership. Under its terms, Sibaviatrans leases three An-2s, all of the Mi-8s (only one of which is serviceable), and two Mi-2s, agreeing to overhaul the grounded helicopters. These are employed by Sibaviatrans to operate the **Murmansk Airlines** routes.

SIBERIA AIRLINES (SIBIR): 4 Fruenze Street, Novosibirsk, 630091, Russia; Phone 7 (3832) 221931; Fax 7 (3832) 226830; <http://www.sibir.ru>; Code S7; Year Founded 1992. When **Aeroflot Soviet Airlines** is reformed in 1992, its Novosibirsk directorate, Sibavia, is initially reformed into the **Toimachevo State Aviation Enterprise**, headquartered at the nearby city of Ob. In May, the concern, physically removed to Tolmachevo Airport, is reborn as Sibavia Sibirskir Avialinii Kompanii, an affiliate of **Aeroflot Russian International Airlines (ARIA)**. The name will be shortened to more familiar Sibir or Siberia Airlines. Shareholding is divided between Sibir employees (51%), the state (25%), and private investors (24%).

V. N. Tasum is general director and in addition to previous regional passenger and cargo flights, now including other CIS republics, he begins to offer charter flights to Europe and Asia. A large fleet is employed that includes 6 Ilyushin Il-86s, 10 Il-76s, 25 Tupolev Tu-154s, 10 Tu-134s, 30 Antonov An-24s, 10 An-26s, 7 An-26Cs, and an unspecified number of Yakovlev Yak-40s.

Enplanements total 4,205,186.

The downturn in the Russian economy during 1993 severely impacts the airline's traffic.

Passenger boardings plunge 41.3% to 2,976,070 while freight is down 39% to 628.5 million FTKs.

Gennady V. Kulichev is president in 1994 and he recruits a workforce of 1,040. The fleet is expanded by the addition of one Il-86, one Tu-154M and seven Tu-154Bs, while the Tu-134s and An-24s are withdrawn. Scheduled service to Moscow is started from Tomsk, Kemerovo, and Barnaul.

Customer bookings fall again, dropping 26.4% to 2, 1,563,574 and cargo is off 12.9% to 548,000 FTKs.

The company's 29 aircraft haul a total of 1,510,700 passengers in 1995, a 3.5% decline. Cargo traffic, on the other hand, inches up 1.1% to 47.2 million FTKs. Much of the freight growth occurs as a result of company flights to Sharjah, UAE, from whence aircraft return filled with all manner of cheap (by Russian standards) clothing and electronic gear.

Airline employment stands at 2,040 in 1996. Incomplete traffic figures reported to ICAO show another bad year. The Sharjah flights continue, often with brightly painted Tu-154Ms.

Customer bookings plunge to 571,625 while only 34.51 million FTKs are operated. There is a \$600,000 net loss.

In 1997, one of Russia's 7 largest carriers, the workforce of Sibavia, is cut 4.7% to 1,950. Scheduled and charter services to 19 destinations continue to be offered with a mixed fleet of 30 aircraft. Holiday flights are initiated to Bulgaria, Turkey, and Israel. An office is opened at Barnaul in October.

In December, BoguchanGESTroi Deputy Director General Vladislav Filev is elected to the board of directors.

Enplanements for the year reach back up 6.6% to 609,226, while 206 million FTKs are also operated. Operating revenues advance 1.1% to \$91.6 million, but costs are still high and there is a \$2.03-million net loss.

The fleet at the start of 1998 includes 5 An-24s, 4 An-26s, 18 Tu-154Ms, and 7 Il-86s. Four other Tu-154Ms are leased out to Iran.

Faced with increased competition, Sibavia moves to modernize. During the second week of April, former board member Vladislav Filev is named director general, with his wife, Nayalya, as deputy director general-commercial and Sergei Borisov as deputy director general-flight operations. At the same time, Atlas Project Management, an aerospace consulting firm, is hired to assist the airline in revitalizing its business methods. Filev and Atlas begin to reorganize the company, department by department, and reduce the number of aircraft in the fleet.

In May, an office is opened in Kemerovo. At this point, the company is able to claim victory in its competition with **Deutsche Lufthansa, A.G.**, which retires from the Frankfurt to Novosibirsk route. Siberian immediately doubles its frequencies between the two cities.

A code-sharing agreement is signed with **Lufthansa Cargo Airlines, A.G.** on the Novosibirsk to Frankfurt route; under its terms, Sibavia will fly all freight for both carriers between the two cities. During July, the company's financial and commercial departments are merged. Flights to Tianzhang commence in August.

Also in August, as economic problems persist, the Russian government devalues the ruble. The official exchange rate is initially pegged at six rubles to the dollar, but soon plunges. By mid-September, currency trades at 16 to 1.

This carrier, like many others across the nation, is forced to sharply increase some economy-class fares on its busy domestic routes. Even so, the new fares are still cheaper, in terms of dollars, than they were before the crisis. Sibavia, for example, increases its one-way fare to Moscow from 600 rubles to 800.

Still, airline continues to grow, opening a new nonscheduled route from Novosibirsk to Beijing in early October. Sibavia operates approximately 20 monthly Il-86 charters to the Chinese capital, taking 50–60 passengers to major shopping areas. They return with 35–36 tons of "hand baggage" on each trip, containing goods that will be sold at a profit. As the Russian economic situation continues to decline during the fall, the number of suitcase flights likewise tapers off.

Scheduled flights, on the other hand, are inaugurated between Novosibirsk and Beijing on December 23. Also during the month, a new office is opened at Tomsk.

Enplanements during the 12 months climbs 2.3% to 623,000 and the company transports 5,850 tons of freight. The carrier transports 52% of all passengers and 65% of the cargo collectively moved by all of the airlines in West Siberia. Siberian enjoys a 65.7% load factor, which is over 10% higher than the average for Russian airlines. Although exact figures are not provided, it is reported that revenues are up 10% over the previous year.

Reporter Vovick Karnozov reveals in "Siberian Merger," an article in the March 22, 1999 on-line edition of *AeroWorldNet*, that the carrier's fleet, on New Year's Day comprises 7 owned and 1 leased Il-86s, 6 leased and 4 owned Tu-154Bs, and 7 Tu-154Ms, 2 of which are leased to Iran. It also operates 1 Tu-134A, an An-32, and 3 An-26 freighters. Orders are outstanding for 1 Il-86 and 3 Yakovlev Yak-42Ds.

The new Novosibirsk to Beijing service, for whatever reason, is not announced in China until January 28.

By the end of March, two Tu-154Ms have been modernized and given business-class seating. All of the others plus the Il-86s will soon be re-configured in the same manner.

Scheduled destinations now visited include Adler/Sochi, Baku, Beijing, Bishkek, Dubai, Dushanbe, Frankfurt, Hanover, Istanbul, Kemerovo, Khabarovsk, Krasnodar, Mineralnye Vody, Moscow, Petropavlovsk-Kamchatsk, Raduzhnyi, Samara, St. Petersburg, Tashkent, Tel Aviv, Tanjin, Tomsk, Urumqi, Vladivostok, Yakutsk, and Yerevan.

Plans proceed for a merger of Sibavia with fiscally troubled **Vnukovo Airlines**.

On July 1, Managing Director Filev is named director general of Vnukovo and begins an attempt to run both carriers prior to their merger. After six weeks with Vnukovo, the man who has done so much for Sibavia realizes that Vnukovo's financial and fleet problems are too significant to allow for an early amalgamation. After putting in place a number of small reforms and instituting joint services over several common

routes, Filev resigns from Vnukovo in early August. Returning to Sibavia, he indicates that, if Vnukovo is able to overcome its problems on its own, a merger may be possible in the second quarter or later of 2000.

Beginning in October, the carrier issues smart cards to their Sibir Plus corporate program members.

It is reported on November 16 that the airline has joined with **Perm State Air Enterprise (Permskoe Gosudartsvennoe A/P)** in a concentrated effort to acquire part of the 25% market share held by **Vnukovo Airlines** in the Ural and Siberian markets.

Late in December, the company accepts delivery of a Tupolev Tu-204-100 under lease from **Perm State Air Enterprise (Permskoe Gosudartsvennoe A/P)**; it enters service on the company's route from Moscow to Novosibirsk.

Passenger boardings jump 19.6% to 744,700, while 28.8 million FTKs are also operated. Revenues rise 1.9% to \$106 million and there is a \$2-million net profit. (A year later, it will be noted that the carrier has actually suffered a 32.8-million ruble—\$1.3 million—loss.) An on-time percentage of 90% is reported.

Airline employment at the beginning of 2000 stands at 2,385, a 19.3% increase over the previous 12 months. Ownership is divided between the Russian Ministry of State Property (25.5%), Novosibirsk Regional Administration (23.44%), Moscow-based Eurofinance Investment Company (5%), Limited Partnership Portfolio Investments (12.71%), SEPT-A (18.8%), and OJSC Rusinprom-invest (19.5%). The fleet now includes 7 Il-86s, 12 Tu-154Bs, 8 Tu-154Ms, 1 Tu-134A, and the chartered Tu-204-100.

At the beginning of the year, Sibir inherits the routes to Kemerovo and Novokuznetsk that had been abandoned in mid-September by bankrupt **Aero Kuznetsk Novokuznetsk Airline**. The insolvent airline is, incidentally, renamed Aerokuzbass, and with a fleet of five Tu-154s, attempts to climb out of bankruptcy and stage a comeback.

On March 7, *Flight International* reports that Sibir is planning to establish a new hub at Moscow's Vnukovo Airport, home of its once and future partner **Vnukovo Airlines**. It also hopes to boost its operations from Perm in the Urals.

Il-86 and Tu-154M passenger and cargo charters to Seoul are resumed on March 20. Sibir's Chinese Il-86 flights are oriented away from the cargo-accompanied shuttle route to Tianjin toward the higher business mix that is available at Beijing. Passenger traffic during the first quarter climbs 5% on the Moscow-to-Novosibirsk route due to the departure from it of **Transaero Airlines** and the temporary grounding of **Vnukovo Airlines**.

On March 23, Flight Directors, Ltd., based at London (LGW) is appointed the carrier's U.K. sales agent. Additional representative offices are also opened at Frankfurt, Moscow, Sochi, and Novokuznetsk. The company begins to employ many of its own agents for a newly unveiled sales program.

At the end of the month, new services are started to Anapa and Barnaul. Eight-times-a-week Tu-154M roundtrips are introduced from Omsk and Novosibirsk to Hanover, Munich, and Frankfurt. Improved schedules are introduced for the major long-haul regional routes, Moscow–Novosibirsk with Novosibirsk–Yakutsk and Vladivostok–Irkutsk with the Irkutsk–Moscow route. Il-86 charters are flown from Novosibirsk to Larnaca, Antalya, Burgas, and Varna and from Moscow to Larnaca, Antalya, and Palma de Mallorca.

In April, arrangements are completed with Avialeasing for the purchase of the Tupolev Tu-204-100 it has chartered from **Perm State Air Enterprise (Permskoe Gosudartsvennoe A/P)**. Funding will follow shortly. Sibir also adds a Tu-154B, retiring two aircraft of the same type.

In June, a comprehensive agreement is signed with **Sayany Airlines**. Officially, the larger company becomes general sales agent for Sayany and is empowered to provide aircraft, manage, and develop its operations. In fact, the alliance will soon become a merger in everything but name.

On July 3, daily Tu-154M roundtrips are inaugurated from Omsk to Moscow's Vnukovo Airport. Seven days later, a license is received that will permit the initiation of new services to Omsk. The company

launches weekly Tu-154M return service from Omsk to Frankfurt via Moscow on July 13. The next day, an interline agreement is signed with **Deutsch Lufthansa, A.G.** that permits the two carriers to sell seats on each other's flights. For the first time, Sibir seats are sold outside of Russia, indeed, anywhere in the world.

A \$15.8-million, 4 1/2-year loan is obtained from the Siberbank on July 19. The new funds allow purchase of the Tu-204-100 it has been leasing and guarantees the airline the money required to purchase upwards of five more Tu-204-100s from Aviastar in the next year, along with several other aircraft needed for its planned fleet upgrade. To meet an April 1 deadline by the EC for TCAS equipment aboard all airliners flown over Western Europe, five Tu-154Ms and two Il-86s begin reequipping with AlliedSignal Version 2 suites.

Svyatoslav Lychagin, head of a department in the State Property Ministry, informs *The Moscow Times* on August 30 that the government is sending a budget to the Duma this week that includes a list of 20 state-owned companies to be sold next year. **Aeroflot Russian International Airlines (ARIA)**, Sibir, and **Samara Airlines** are originally on this privatization document. However, the exact sizes of the stakes to be sold have disappeared from the list after it has gone through final review by the offices of President Putin.

On September 4, Sibir begins to fully submerge the operations of its affiliate, **Sayany Airlines**, using Sibir aircraft on its licensed routes and collecting all revenues. All tickets on Sayany flights are sold under the Sibir name.

With airfare debts by its deputies continuing to grow, the airline, on September 25, takes action against the state for nonpayment. In October, the carrier's information technology division launches "Bilet Plus," an Internet ticket sales agency. The new service will permit its customers to book flights not only with Sibir, but also with other CIS airlines and **Deutsche Lufthansa, A.G.**

With permission from the UN sanctions committee, on October 31 the carrier flies a Tu-154M from Barnaul to Baghdad, flying over Kazakhstan, Turkmenistan, Uzbekistan, and Iran. This route must be employed because Turkey has refused overflight authority. The onetime charter, which Sibir has no plans to repeat, had been organized by the Altai Region as a charity for children suffering from leukemia. In addition to 1,180 kg. of humanitarian aid, the plane also transports 49 passengers. The Tu-154M returns to Barnaul over the same route on November 3.

In November, special pricing is introduced for transit passengers, e.g., for those traveling on the route from Blagoveshensk to Moscow via Blagoveshensk. Arrangements are completed by month's end for the complete absorption of **Sayany Airlines** into Sibir before the end of the year.

New twice-weekly Tu-154M roundtrips commence on December 6 from Moscow's Vnukovo Airport to Irkutsk, historically a transit point on the carrier's route from Novosibirsk to Vladivostok. Later in the month, the carrier introduces its first purchased Tupolev Tu-204-100.

At the end of the year, it is learned that the Russian Ministry of State Property, which owns 25.5% of Sibir, intends to put a percentage of its stake in the airline up for sale in the new year as part of a package of 30 state holdings that are to be privatized. It will first be necessary for the Duma to amend the current law prohibiting the sale of state holdings exceeding \$17 million in valuation.

On December 23, an agreement is reached under which Sibir will take over **Vnukovo Airlines**, the country's third largest airline in terms of passenger boardings, in the biggest landmark in Russian civil aviation history since the breakup of **Aeroflot Soviet Airlines**. The State Service of Civil Aviation (GSA) must approve the deal and there is no precedent in Russian law for the takeover of one major independent airline by another.

If the arrangement is approved, Vnukovo will lose its identity. Undecided is whether or not Vnukovo will operate as a subsidiary with a different name or be folded into its new parent.

Sibir CEO Vladislav Filiov agrees to assume responsibility for Vnukovo's debts and pay the workers of both carriers for the 2.5 months

required for integration. The deal will provide Sibir with a strategic Moscow hub at Vnukovo Airport, 7 more Tu-204-100s (among other types), and boost its route network to almost 200 cities. As anticipated, there is opposition from **East Line Airlines** and **Aeroflot Russian International Airlines (ARIA)**, as well as from within the GSGA itself.

Arrangements are immediately completed for the \$16.9-million purchase and delivery to Sibir of the first ex-Vnukovo Tu-204-100 in February. Upon receipt, the aircraft will be ferried to the Tupolev Aviation Technical Complex at Zhukovsky for further modernization and alteration prior to their joining the fleet in the summer. In addition, \$7.18 million will be expended to purchase one Il-86 and eight Tu-154Ms; Vnukovo will apply the proceeds to its large debt.

Customer bookings accelerate 11.8% during these 12 months to 832,728. In terms of passengers carried, Sibir is now the fourth largest airline in Russia. Cargo traffic jumps 22.5% to 296.6 million FTKs. Revenues jump 16% to \$120 million. On-time percentage dips to 84.6%, while overall flying hours increase by 14.2%, although the cancellation of loss-making CIS routes is reflected in a 24% decline in the number of hours flown by the fleet's Tu-134As. The fleet now includes 11 Tu-154Bs, 9 Tu-154Ms, 7 Il-86s, and 1 Tu-204-100.

The merger with Vnukovo will be officially reported on January 3, 2001. Twelve days later, Sibir will take over the Vnukovo routes to Yerevan, Sochi Novy Urengoi, Nadym, Makhachkala, Mineral Waters and Ulan-Ude. The GSGA, having heard all opponents, will quickly approve this creation of the nation's second-largest airline with Sibir, as promised, assuming responsibility for Vnukovo's 500-million ruble (\$20-million) debt. With the January 23 announcement, Sibir will begin paying Vnukovo's debts, allowing creditors holding the carrier's nine aircraft to begin releasing them. Following approval by Sibir stockholders on April 27, Vnukovo, once Russia's fourth largest airline and the first to disappear in the new year, will operate with its new owner as one entity under the Sibir name. Amalgamation time for the actual legal merger may require another year.

In February 2001, the GSGA reports that the total number of Russian air carriers has fallen from 328 in January 2000 to a current 294. It also reveals that **Kras Air (Krasnoyarsk Avialinii-Krasair)**, **Siberia Airlines (Sibir)**, **Pulkovo Airlines (Pulkovo Aviation Enterprise)**, and **Aeroflot Russian International Airlines (ARIA)** have, between them, carried half of all Russian passenger traffic in 2000.

Those numbers can be expected to grow under the new Aeroplan Alyans (Alliance) that will be signed by Sibir and **Kras Air (Krasnoyarsk Avialinii-Krasair)** at the beginning of March.

SIBERIAN AIRLINES. See **SIBERIA AIRLINES (SIBIR)**

SIBIR. See **SIBERIA AIRLINES (SIBIR)**

SI-CHANG FLYING SERVICE COMPANY, LTD.: 14th Floor, Pacific Place, 140 Sukhumvit Road, Bangkok, 10500, Thailand; Phone 66 (2) 254-3765; Fax 66 (2) 254-3480; Year Founded 1991. Established in early 1991 by Siam Chemicals, Ltd. Chairman Chira Ratanarat, himself a helicopter pilot, Si-Chang provides corporate airlift with a pair of MBB BK-117s. The operation is the only helicopter operation in the country entirely owned by Thai nationals.

In an effort to assist the public in avoiding Bangkok's congested ground transportation situation, Ratanarat, in January 1992, elects to employ his BK-117s in a new scheduled service. Eight-times-per-day revenue flights commence linking the Oriental and Shangri-La Hotels with Don Muang International Airport.

Operations continue apace without fanfare during the remainder of the decade.

SICHUAN AIRLINES COMPANY, LTD.: 9 Nan Sanduan Yihuan Road, Chengdu, Sichuan, 610041, China; Phone 86 (28) 555-1161; Fax 86 (28) 558-2641; <http://www.hps.com/sichuan/sichuan.htm>; Code 3U; Year Founded 1986. Sichuan Airlines is established at

Chengdu in Sichuan Province by the provincial government in September 1986 to provide scheduled domestic passenger and cargo services to domestic and regional destinations. Du Dinghuan is president and oversees a workforce that will grow to 800. Revenue flights commence in July 1988 and continue over the next decade with a fleet of 5 Tupolev Tu-154Ms and 5 Xian Y-7-100s.

Operations continue apace during 1989-1993. During these years, services are undertaken to the following Chinese cities: Beihai, Beijing, Changsha, Chongqing, Daedan, Guangzhou, Guilin, Guiyang, Haikou, Harbin, Jinan, Luzhou, Nanchong, Nanning, Shanghai, Shantou, Shenzhen, Urumqi, Wanxian, Wuhan, Xian, Xiamen, Sichang, and Yibin.

En route from Jinan to Guangzhou on September 30 of the latter year, a Tu-154M with 69 passengers is hijacked by taxi driver Yang Mingde and his wife Han Fengying, who have brought along their 6-year-old son. The Tupolev is diverted to Taiwan, where the family is taken in hand and from which the plane is allowed to return. Yang and Han are tried and receive prison terms of nine years and six years, respectively; their son is sent to a foster home.

The first of 2 Yakovlev Yak-42D 120-seat airliners is delivered to the airline from the Saratov Aircraft Plant in Russia on November 4, 1994. A halt in the use of clearing payments within intergovernmental trade has deprived the manufacturers of orders from five other Chinese companies during the year.

The second Yak-42D is delivered in early 1995. During the third quarter, Sichuan places orders for three leased Airbus Industrie A320-232s that will replace Tu-154Ms.

Enplanements this year total 918,320.

Airline employment stands at 1,400 in 1996. The ILFC delivers the first A320-232 during the third week of January. When it enters service in February, it is the first of its type to be operated by a PRC airline. Two more are received by December.

Passenger boardings surge 11.7% to 1.04 million.

In May 1997, orders are placed for two more A320s. In September, Sichuan, in line with Chinese government policy designed to reduce the number of regional airlines so as to increase the efficiency of competition, is one of six carriers to form the New Star Alliance.

Enplanements for the year total 1,078,785.

The New Star Alliance is activated on January 1, 1998; the informal compact soon begins to boost the quality of its members' services via integrated passenger and marketing services and code-sharing on selected routes.

The first of two new A321-232s is delivered in October, complementing the three A320-232s already in service.

Passenger boardings jump 8.5% to 1.17 million, while cargo traffic climbs 20.5% to 29.94 million FTKs.

The last of five new Airbus A320-232s to be delivered since December 22, 1995, is accepted on July 9, 1999. Director General Du Dinghuan is arrested by police during the summer after customs seizes a pair of Russian-made Tupolev Tu-154Ms that he had been attempting to smuggle into the country. In November, the Tupolevs are put up for auction, but attract no bids from the three potential buyers present due to the high asking price.

On December 26, the Sichuan Provincial Commodities Auction Center again places the aircraft up for sale. One is sold for 900,000 yuan and the other for 400,000 yuan.

Customer boardings fall to 1.05 million this year while 4.47 million FTKs are operated.

Airline employment at the beginning of 2000 totals 1,580, a huge 55.7% increase over the previous 12 months. One "classic" B-737, a Dash-37K, remains in the fleet, which also includes 6 Tu-154Ms and 5 Y-7s.

Company officials announce on April 28 that they are preparing to establish a new feeder subsidiary for Sichuan Province that will be equipped with five Embraer ERJ-145LRs and five de Havilland Canada DHC-8s. Foreign investors are invited to seek minority equity stakes.

On May 1, new A320-232 services are started from Chengdu to Dalian via Jinan, to Zhuhai via Zhangjijie, and to Shenyang via Shijiazhuang.

An order for the five ERJ-145LRs is announced on May 31; it will be confirmed on July 27 during the Farnborough Air Show in England.

In early August, Sichuan becomes the first Chinese regional to place the Xi'an Aircraft Industry Corporation's new MA60 into commercial service. Sichuan and several other carriers have requested the lease of a total of 10 of the new Y-7-200A derivatives.

A Boeing B737-37K is leased from **Zhongyuan Airlines Company, Ltd.** on September 2. Arrangements push forward for the introduction into service of the ERJ-145LRs.

SICOTRA AVIATION, S.A. (SOCIETE INTERNATIONALE DU COMMERCE ET TRANSPORT): Zaire (1986–1991). Founded at Kinshasa in 1986, Sicotra undertakes and continues regional and international all-cargo charter and contract service flights with a single Douglas DC-8-54F first flown by **Zaire Cargo, S.A.** It enters service in January 1987. A Boeing 707-373C, first operated by **World Airways**, is acquired in December.

The Douglas Jet Trader is sold to **Liberia World Airlines** during the summer of 1988, leaving the Stratofreighter to operate flights from the former Belgian colony to Ostend.

Flights continue until the company shuts down in the fall of 1991 following a violent crisis.

SIEM REAP AIRWAYS, LTD.: 571 Rd., No. 6, Phum Salakanseng, Khum Svay Dankum, Srok Khet, Siem Reap, Cambodia; Phone (855 63) 380 191-2; Fax (855 63) 380-191; Code PG; Year Founded 2000. On October 11, 2000, **Bangkok Airways, Ltd.** announces the formation of a Cambodian subsidiary, Siem Reap Airways, which comes into existence on October 29. Employing 3 ATR72-201s leased from the parent, the new regional flies from Siem Reap to Bangkok, Phuket, and Sukhotai and from Phnom Penh to Bangkok and Pattaya.

Bangkok Airways receives its premier B-717-23S on November 15. This first of its type to fly in Asia enters service from Bangkok to Siem Reap and Phnom Penh, Cambodia, in December on lease to Siem Reap Airways.

SIERRA EXPRESSWAY: United States (1995–1996). Sierra Expressway is set up at Oakland, California, in the summer of 1995 to provide feed at that city for **Southwest Airlines (2)** and the **United Airlines** division Shuttle by United. The first of five British Aerospace BAe Jetstream 31s is delivered in August and is employed with its later-arriving sisters to inaugurate a combined 22 daily nonstop services to Eureka and Redding, California, plus Medford, Oregon.

On November 16, daily service is started from Sacramento to Monterey via Oakland. South Lake Tahoe joins the roundtrip route network on December 15.

The last Jetstream 31 is delivered in early January 1996 and begins daily flights from Oakland to Monterey. The aircraft has a sea otter painted on its fuselage along with Monterey Bay Expressway titles. Nonstop roundtrips are inaugurated on January 15 between Monterey and Sacramento along with one-way, nonstops from Monterey to South Lake Tahoe.

Unable to achieve viability, President Michael Forster's commuter is unable to make the lease payments on its Jetstream 31s. When JSX Capital Corporation files suit for recovery of the money owed, a California Superior Court judge orders the commuter to shut down at the end of March.

SIERRA FLITE SERVICE: United States (1979). Sierra Flite Service is set up at Bakersfield, California, during early 1979 to provide scheduled passenger and cargo flights to Las Vegas. Beech King Air 90 revenue flights commence on March 1, but due to lack of traffic, cannot be maintained beyond August 3.

SIERRA LEONE AIRLINES, LTD (SLA): Sierra Leone (1982–1987). In 1982, **Sierra Leone Airways, Ltd.** is reorganized and **British Caledonian Airlines, Ltd. (BCAL)** withdraws its interest. National cit-

izens with Mideast backgrounds help to convince the government to seek new leadership for its national carrier.

Renamed Sierra Leone Airlines, Ltd., ownership is now split between the government (60%), **Alia (Royal Jordanian Airlines)** (20%), and private interests (20%). A new nine-man board of directors takes office; Ali Ghandour, chairman and managing director of Alia, is chairman of the new group as well.

Alia is also given a three-year management and technical support contract and in turn, wet-leases to its new partner one Boeing 707-3D3B Stratoliner painted in SLA livery. It joins an owned fleet of just two Britten-Norman BN-2 Islanders. Under the direction of Jordanian Managing Director Capt. Khaja Yousufuddin and three associates, revenue services over the previous BCAL routes commence in November.

International services in 1983 consist of one weekly roundtrip from Freetown to London via Las Palmas, a second to the British capital via Paris, plus two weekly roundtrips from Freetown to Lagos, one routed via Monrovia and the other via Abidjan. The wet-leased Stratoliner continues to be flown by Alia crews seconded to SLA for two-week periods.

Enplanements are 28,913,

In the spring of 1984, King Hussein of Jordan presents a B-720-030B (B-720B) to Sierra Leone's President Siaka Stevens. Transferred to the Sierra Leone aircraft registry, the aircraft, christened *Spirit of Friendship*, serves as backup to the Stratoliner. Meanwhile, a number of Sierra Leone Trislander pilots are sent to Amman for conversion training on B-707s/B-720Bs.

Passenger boardings climb to 37,500. That traffic figure drops 25% to 30,000 in 1985. In July 1986, flights begin to Banjul and Conakry.

With a history of foreign exchange problems, Sierra Leone cannot afford to make additional necessary improvements and operations of its flag carrier are suspended in August 1987 following the withdrawal of the **Royal Jordanian Airlines** management team. Government efforts to locate another foreign carrier willing to provide management assistance are unsuccessful and it contracts with **Aer Lingus Irish Airlines, Ltd.** in September to operate international flights from Freetown with one each McDonnell Douglas MD-83 and A310-324, both leased from **Air Liberte, S.A.** The nation is left without an air service it can truly call its own.

SIERRA LEONE AIRWAYS, LTD. (SLA): Sierra Leone (1958–1982). With a fleet of de Havilland DH 89A Dragon Rapides, this carrier is formed at Freetown in 1958 as a subsidiary of **West African Airways Corporation (WAAC)** to operate feeder services with 3 de Havilland DH 89A Dragon Rapides across the Sierra Leone River to Lungi International Airport. When WAAC ceases trading on September 30, the operator receives assistance as Sierra Leone Airways, Ltd. from **Nigeria Airways, Ltd.** and the British state carrier **British Overseas Airways Corporation (BOAC)**.

During 1959–1960, Scottish Aviation Twin Pioneers are acquired for bush country operations. Financial problems cause the airline to shut down at the beginning of 1961.

Following independence on April 27, the company becomes a new national flag carrier. A management contract is signed with **British United Airways, Ltd.**, which assumes 70% majority equity as well. The government holds a 20% stake and Mining and General Services holds 10%. BUA and the government select two each of the five members of the board of directors, with M & GS nominating the fifth. Thomas C. Luke is chairman, with Ken Sheparson as general manager.

BUA personnel arrive at Freetown and assume control; flight personnel begin flying the Twin Pioneers to domestic points during June.

A Bristol Britannia 317 is also provided by British carrier, allowing the inauguration of Freetown to London return service in November.

During 1962–1965, routes and frequencies are increased. Daily or twice-daily domestic flights link Freetown with Bo, Bonthe, Gbanatok, Kabala, Kenema, and Yengema. The Britannia 317 leased from BUA for use on the London service is replaced in 1964 by a Vickers VC10. Derek Graham becomes general manager in 1965, with E. H. Chamber taking

up the office in April 1967. The Twin Pioneers are finally replaced late in the decade with two DH 114 Heron 1Bs.

British Caledonian Airways, Ltd. (BCAL) takes over both BUA and the Sierra Leone contract upon its formation in 1970. In March 1973, the African airline is reorganized. The government becomes the majority owner (51%) with BUA's new owner, **British Caledonian Airways, Ltd.**, assuming the 43% and Mining and General Services, 6%. Chairman A. B. Kamara's fleet comprises a pair of Britten-Norman BN-2 III Trislanders. Under charter, BCAL operates services to London and Monrovia on behalf of the carrier.

Regional service is opened to neighboring African states, plus London, Paris, Rome, and the Canary Islands during 1979–1981. The fleet is altered and enhanced to include a Boeing 707-399B, a B-720B, (both jetliners are BCAL charters) and two BN-2 Islanders, the latter for domestic operations. One of the Islanders is involved in a Freetown accident on August 25, 1980.

SIERRA LEONE NATIONAL AIRWAYS, LTD.: Leone House, P.O. Box 285, 25 Pultney Street, Freetown, Sierra Leone; Phone 232 (22) 22 2075; Fax 232 (22) 22 6297; Code LJ; Year Founded 1990. Reorganized at Freetown in 1990 to replace the former **Sierre Leone Airlines, Ltd.**, which had stopped flying in 1987. SNA begins Freetown to London return flights on May 1 using a leased Boeing 707-320B. In August 1991, a management contract is signed with **Air Liberte, S.A.** Under terms of the agreement, the French carrier will pay off \$20 million in debt incurred under the previous management of **Royal Jordanian Airlines** executives in order to allow the company to operate to London and a number of European capitals.

Employing an Airbus A310-324 chartered from **Air Liberte**, weekly service is inaugurated to Paris on October 26; the frequency becomes twice weekly on December 20.

The previous route network is resumed in 1992 and includes stops at Accra, Abidjan, Conakry, and Lagos. During the latter year, the government turns to **Europe Aero Service, S.A.** to take over the management of the airline's operations. EAS brings in its own A310-304 and begins roundtrip service to Paris in December.

President Stanley Palmer acquires a B-727-294A for the airline in 1994. EAS now also undertakes long-haul flights to Las Palmas and extends the Paris service on to London (LGW).

Flight services end in January 1995, at which point, J. S. Kamandah becomes managing director. The 193-employee company turns its attention to the provision of ground-handling services for international carriers visiting Freetown. Surveys are run and plans are made to resume flying. Unhappily, this dream is thwarted by political unrest at the end of the decade.

On November 14, 2000, after suspension for nearly a decade, the carrier resumes weekly multistop return service from Freetown to London (LGW) employing a leased B-727-294A. British troops have been stationed at Freetown for some months providing the security necessary for this and other essential public activities.

SIERRA MOUNTAIN AIRWAYS: United States (1987–1989). Oakland, California-based SMA begins scheduled Dornier 228-200 passenger services during the summer of 1987 linking its base with Mammoth Lakes, Fresno, Long Beach, Battle Mountain, and Reno. Operations continue for only two years.

SIERRA NEVADA AIRLINES: P.O. Box 19398, Las Vegas, Nevada 89132, United States; Code II; Year Founded 1992. Sierra Nevada is established at Las Vegas in 1992 to offer scheduled passenger and cargo services. Revenue flights commence with 4 Cessna 402s and 1 Beech 58 Baron. A total of 15,677 passengers are flown on the year and revenues reach \$1.6 million. Expenses are kept down and profits are made: \$285,062 (operating) and \$11,520 (net). Scheduled operations cease in 1994; however, the carrier continues to offer charter flights.

SIERRA PACIFIC AIRLINES (1): United States (1965–1966). The first SPA is set up at Oakland, California, in the fall of 1965 to provide scheduled passenger and cargo services to Reno via Lake Tahoe. Employing a de Havilland DH 104 Dove, the commuter begins revenue services on November 11, but, despite an interline agreement with **Western Airlines**, it cannot last a year.

SIERRA PACIFIC AIRLINES (2): United States (1972–1978). Early in 1972, **Trans Sierra Airlines**, based at Burbank, California, is reformed and renamed. Employing Piper PA-31-310 Navajos, Cessna 402s, and a Convair CV-340, revenue flights are maintained, linking the company's base with Los Angeles, Fresno, Bishop, and Mammoth Lakes. Service is operated without incident in 1973.

Chartered by Wolper Productions to fly a movie production crew from Bishop to Burbank on March 13, 1974, Flight 802, a CV-340 with 4 crew and 32 passengers crashes at the 6,100-ft. level of White Mountain, 5.2 mi. SE of Bishop; there are no survivors. The aircraft is replaced on October 15 by purchase of a CV-580 from **Frontier Airlines (1)**.

Operations continue apace in 1975–1978; however, fiscal difficulties steadily mount. In July of the latter year, the company is purchased by Mountainwest Aviation of Tucson, Arizona, and will be regenerated into the third SPA.

SIERRA PACIFIC AIRLINES (3): 7700 North Business Park Drive, Tucson, Arizona 85743, United States; Phone (520) 744-1144; Fax (520) 744-0138; Code SI; Year Founded 1978. Mountainwest Aviation is formed at Tucson, Arizona, in February 1976. Two years later in July 1978, the company purchases the assets of failing Los Angeles-based **Sierra Pacific Airlines (2)**, transferring them across state lines where they are operated under the purchased carrier's name as the main subsidiary of a new holding company, Sierra Pacific Corporation.

Passenger boardings jump 30% to 54,622.

Employing 6 Convair CV-580s and 2 de Havilland Canada DHC-6 Twin Otters, the revamped airline undertakes charter and commercial contract flights, both civilian and military, in addition to scheduled flights. Turboprop operations, primarily to the Mammoth ski region, continues apace.

In 1979, the first full year of change, passenger bookings fall 40.6% to 27,000 and freight is off by 34.7% to 27,000 pounds. Rising costs coupled with the energy crisis nearly force the carrier out of business in 1980.

Flights continue without incident in 1981–1982. While on final approach to Hailey, Idaho, on February 15, 1983, Flight 868, a DHC-6-300 with two crew and six passengers suddenly loses power and crash-lands on a highway, veering off and hitting a 4-ft. snowbank. There are no fatalities.

Despite the loss, Sierra Pacific rallies and is able to continue operations through the remainder of the new decade. To help boost income, two CV-580s are wet-leased to **Horizon Air** during the summer season in 1984.

In 1989, the carrier operates seven Convairs, one of which is leased out to **Aspen Airways**. The Aspen lease ends in 1990, at which time four Convairs are chartered to **Express Airlines I** for a year. In 1991, one Convair is leased to **ERA-Jet Alaska** and two leased Boeing 737-112s (one formerly flown by **America West Airlines**) enter service.

The jetliner fleet is significantly increased in 1992; in addition to the CV-580s and two leased B-737-112s, one more B-737-112, two B-737-247s, one B-737-281, one B-737-2T4, and two B-737-3Q8s are also chartered. All of this capacity allows the company to transport a total of 498,000 charter passengers.

Airline employment in 1993 at President Gar Thorsrud's company is 165 and the fleet remains unchanged. Enplanements decline 29.4% to 351,790 and revenues reach \$10.94 million. Expenses hit \$11.99 million and cause a \$1.05-million loss. There is also a \$742,583 net loss.

The workforce is cut to 100 in 1994 as passenger bookings plunge 80.1% to 70,000. Revenues decline 21.8% to \$8.55 million, while

expenses drop 29.1% to \$8.51 million. There is a tiny \$46,000 operating surplus and a net loss of \$69,000.

The eight aircraft of the Tucson-based regional transport a total of 46,000 passengers in 1995, a 34.3% drop. As might be expected, costs outrun revenues and the previous year's operating profit becomes a \$142,000 loss. A \$198,000 net loss is also suffered.

The fleet in 1996 includes 1 chartered B-737-2T4A and 7 CV-580s, 2 of which are out of service. Traffic recovers as customer bookings skyrocket 92.3% to 100,000 and 1.3 million FTKs are operated, a 69.7% jump.

Operating income accelerates 51.6% to \$9.85 million while expenses grow 35.9% to \$9.02 million. An operating profit of \$829,000 is reported, along with a net \$834,000 profit.

Operations continue in 1997, during which year passenger boardings fall 34% to 66,000 and cargo traffic plunges 40.2% to 797,000 FTKs.

Operating revenues decline 43% to \$5.61 million, as expenses drop 27% to \$6.58 million. The operating gain of the previous year is turned into a loss of \$970,000, while the net profit becomes a net loss of \$781,000.

The company continues its charter services in 1998 and, as before, accepts subcharters from other organizations. Among these are the U.S. Forest Service and the U.S. Marshals Service. A second B-737-2T4A is acquired.

For the 12 months, customer bookings accelerate by 25.8% to 83,000.

Revenues jump 15.3% to \$6.47 million, while expenses plunge 14.2% to \$5.63 million. The operating profit is \$819,000 and a net gain of \$313,000 is celebrated.

Customer bookings fall 18.1% in 1999 to 68,000.

On the ground at Grand Isle, Nebraska, on April 15, 2000, a B-737-2T4A en route to Las Vegas on a gambling junket is stranded for four hours when its stairway jams. Unable to free the portal, the airline authorizes airport workers to drive a front-end loader up to the plane and to evacuate those aboard via its snow bucket. Once repairs are made, the delayed visitors reboard and the jetliner departs. The airport, which does not have its own portable stairway, gives consideration to such a purchase.

Passenger boardings increase 20.6% to 82,000.

SIERRA VISTA AVIATION: United States (1982–1988). SVA is founded at Sierra Vista, Arizona, during the summer of 1982 to provide scheduled passenger and cargo flights to Fort Huachuca, Phoenix, and Tucson.

Employing a Douglas DC-3 and Piper lightplanes, the company begins revenue flights in August, continuing them until it is forced out of business in late fall 1988.

SIERRA WEST AIRLINES (1): United States (1987–1991). Sierra West is set up at Albuquerque, New Mexico, early in the first quarter of 1987 to provide scheduled passenger and cargo flights to Taos. Employing a Piper PA-32 Seneca and a Cessna 402, daily roundtrip revenue services commence on March 1 and are continued until the company goes out of business during the recessionary year of 1991.

SIERRA WEST AIRLINES (2): 4511 Cheyenne Ave., Suite 401, Las Vegas, Nevada 89030; Phone (702) 638-0144; Fax (702) 638-0156; Year Founded 1996. Sierra West is established at Las Vegas in 1996 as the airline division of Pak West Airlines, Inc. Deborah Robinson is president with Marino Johansson as vice president-operations. FAR Part 135 charter operations, primarily cargo, commence and continue with five Fairchild Metros, four Learjets, a Fairchild Merlin, and a Dassault Falcon 20.

SI-FLY (COMPAGNIA AEREA, S.p.A.): Piazzale Ungheria 58, Palermo, Sicily, 90141, Italy; Phone 091-6117801; Fax 091-6117580; http://www.sifly.it; Year Founded 1994. Si-Fly is established at Palermo on October 29, 1994 to operate passenger charters. Following a long start-up period, capitalization of L4.33 billion is acquired and orders are placed for a pair of Avions de Transport Aerien ATR42-320s.

Arrival of the first ATR allows the company to begin holiday flights to Tunisia.

On October 1, 1999, scheduled service is inaugurated between Rome and Albenga, with regular flights to Perugia and Ancona added on October 18.

Having been chartered by the UN's World Food Program for a humanitarian service, the ATR42, with 3 crew and 21 passengers departs Rome for Pristina, Kosovo, on November 12. En route, the turboprop crashes into a mountain N of Pristina, killing all aboard.

By early 2000, two more ATR42-320s are on hand and revenue flights over the October routes have been resumed. At the end of March, new services are inaugurated to Olbia, Sardinia, Pantelleria, and Parma. On July 15, twice-daily return service is launched from Rome to Lamezia Terme.

Following receipt of a third ATR in September, a new route is started between Milan and Crotone.

SILICON VALLEY EXPRESS: 1250 Aviation Ave., Suite 140, San Jose, California 95110, United States; Phone (408) 292-0677; Fax (408) 279-8487; http://www.mindspring.com/~siliconvalleyexp; Year Founded 1983. Leslie Bensing establishes SVE at San Jose in 1983 to provide executive jet charters to destinations throughout the U.S. and Canada, Mexico, the Caribbean, and South America. Operations commence and continue with a fleet, which by 2000 includes 2 Learjet 35As.

SILKAIR (PTY.), LTD.: Core L, 5th Storey, SIA Superhub, 30 Airline Road, 1781, Singapore; Phone 65 540 6403; Fax 65 542 6286; http://www.singaporeair.com/silkair/default.htm; Code MI; Year Founded 1992. In an effort to change its image from that of a holiday-resort carrier to Singapore's second scheduled airline with a business-class orientation, Tradewinds (Pty.), Ltd., a wholly owned subsidiary of Singapore Airlines, Ltd., is renamed on April 1, 1992. With a workforce of 310 and a fleet that includes 2 leased Boeing 737-3Y0s and 1 B-737-3L9, General Manager Michael Chen's company is renamed, receives a new logo and color scheme, and continues both scheduled and charter operations.

Tradewinds Tours & Travel (Pty.), Ltd. is restructured and becomes a subsidiary of the airline. Following the delivery of a chartered B-737-3M8 in July, new twice-weekly scheduled routes are opened to Cebu, Phnom Penh, and Medan and business-class service is introduced. In November, business-class passengers are introduced to the Sony video Walkman as an in-flight amenity.

Passenger boardings skyrocket 77.2% to 453,809 and a net income of \$990,000 is earned.

Early in 1993, Syn Chung Wah remains as chairman with Mr. Chan as general manager. The fleet of the 305-employee company comprises 4 Boeing 737-300s, 2 of which are leased from GPA International, and orders are placed with the parent for 2 Airbus A310s.

On February 3, scheduled services are undertaken or expanded from Changi International Airport linking Singapore twice weekly with Kunming, Phnom Penh, Cebu, Hat Yai, Phuket, Yangon, Jakarta, and Medan. In July, the company begins to participate with its parent in the new Passageway frequent flyer program.

A daily service is also jointly opened with Pelangi Air, Ltd. employing Pelangi's two Dornier 228-200s from Seletar to Tioman Island, Malaysia.

Customer bookings swell 28.6% to 583,426.

The employee population grows to 380 in 1994 and the fleet is increased by the addition of 2 Airbus Industrie A310-222s leased from SIA. On February 24, the company celebrates its fifth anniversary; both air and ground staff are given new uniforms to mark the event. Prior to the beginning of the summer schedule at the end of March, three new stations are opened, at Hangzhou, China, Manado, Indonesia, and Chiangmai, Thailand.

During the spring, new service is inaugurated from Singapore to Manado on the Indonesian island of Sulawesi. Thrice-weekly B-737-

3Y0 flights are also initiated to Kao-hsiung, Taiwan; however, this service becomes a daily A310-222 run on July 1.

Late in the year, a lease-purchase order is placed for two Fokker 70s with which to operate the company's shorter routes out of Singapore.

Passenger boardings for the year advance 13.2% to 660,428. Revenues are \$111 million and an operating loss of \$20 million is suffered.

In February 1995, the carrier, in cooperation with **Sempati Air**, begins four weekly joint frequencies from Singapore to Lombok employing a Fokker 100. The first Fokker 70 arrives in March and after training and route proving, enters service on April 1 on routes from Singapore to Solo City, Mataram, Padang, and Pekanbaru.

Too expensive to operate, the A310-222s are meanwhile turned back to the carrier's parent in March. Some of their capacity is taken up by the Fokker 70s, the second of which is delivered in October. Departure of the large Airbus wide-bodies causes a suspension of flights to Kao-hsiung and Hangzhou.

Customer bookings dip 2.6% to 642,172.

Airline employment stands at 483 in 1996 and the fleet includes 2 B-737-3Y0s, 2 Fokker 100s, 2 Fokker 70s, and 1 each B-737-3L9, B-737-3M8, and B-737-33A, the last unit leased.

The progress interrupted the previous year is resumed; enplanements surge 17.4% to 754,134.

The workforce is cut 21.3% in 1997 to 380. Destinations visited include Cebu, Chiang Mai, Hat Yai, Jakarta, Kuantan, Kunming, Langkawi, Lombok, Manado, Medan, Padang, Penkanbaru, Phnom Penh, Phuket, Solo City, Tioman, Ujung Pandang, Xiamen, Vientiane, and Yangon.

Twice-weekly roundtrips commence on March 23 between Singapore and Davao City in the southern Mindanao region of the Philippines. In April, the older twice-weekly route to Cebu becomes a daily service.

Under a dual-designator agreement with SilkAir, **Garuda Indonesia** is able to place its code aboard the Singapore company's twice-weekly Fokker 70 roundtrips, beginning on June 2, between Singapore and Balikpapan, East Kalimantan (Borneo).

Orders are placed in June for 3 Airbus Industrie A319s and 5 A320s to begin delivery in September 1998, plus options on a mix of 10 more. A \$250-million request is also made for IAE V2500 engines with which to power them.

En route from Jakarta's Soekarno Hatta Airport to Singapore, Flight 1185, a B-737-33A piloted by Capt. Tsu Way Ming with 6 other crew and 97 passengers, crashes nose-down into the Musi River, 56 km. N of Palembang, Sumatra, on December 19; there are no survivors.

Passenger boardings continue to march upward, climbing 4.8% to 750,000.

The airline is particularly hard hit in 1998 by the Asian airline recession. The Indonesian market, which accounts for a third of the company's traffic, virtually dries up by the time Sukharno is overthrown in late May. Although aircraft are redeployed to Malaysia and load factors of 60% are maintained, yields lost cannot be regained.

The first of five A320-232s is delivered in mid-September and begins revenue service on September 25 from Singapore to Phuket, Thailand. Although it had been planned to acquire the remaining four by 2000, deliveries of the last two, in the face of the recent Asian economic crisis, are pushed back to 2002.

On November 28, Oetarjo Diran, chairman of Indonesia's Aircraft Accident Investigation Commission, reports that accident investigators are still no nearer to providing any specific answers concerning the cause of the crash of Flight 185. Experts have, however, ruled out weather and terrorism. Delays in publication of an official report will become embarrassing.

Flights continue in 1999. On June 2, twice-weekly nonstop A320-232 roundtrips are inaugurated between Singapore and Trivandrum, in the southwestern Indian state of Kerala.

In August, officials in Indonesia release a report on the 1997 crash of Flight 1185 that focuses heavy attention on pilot Capt. Tsu Way Ming's financial and discipline problems. The report is turned over to police in

both Indonesia and Singapore. On September 2, the Criminal Investigation Division of the Singapore Police Force indicates that a review of the accident is underway and that the case has been, for that purpose, classified as a murder-suicide.

The first of four A319-132s is delivered on September 3. In mid-October, as the second A319-132 is received, the last chartered B-737-3Y0 is withdrawn.

Passenger bookings total 252,000, while 3.51 million FTKs are operated. A total of 505 are employed by the company at the beginning of 2000.

A tragedy 110 nm. E of Chek Lap Kok Airport is barely averted on January 22 when **Dragonair, Ltd.** Flight 437, an A330-342 preparing to land at the Hong Kong airport after a service from Kao-hsiung, narrowly avoids a collision with Silk Air Flight 928, an A320-232 taking off for the continuation of a service from Singapore to Xiamen, in SE China. At their closest before TCAS alarms allow evasive action, the aircraft are apart by approximately 1.3 nm. laterally and 900 ft. vertically.

After completing their final revenue flights, the two Fokker 70s are withdrawn in late March. The third A319-132 is accepted on May 29.

Carrying 100 passengers, an A320-232 completes the first night flight into Thiruvananthapuram International Airport on September 15. The company's thrice-weekly roundtrips into the Indian airport from Singapore are now all switched to evening hours.

Twice-weekly A320-232 return service is inaugurated on November 3 from Singapore to Siem Reap, Cambodia.

In its final report on the 1997 crash of Flight 185, the Indonesian National Transportation Safety Committee report of December 15 indicates that its investigation has been unable to "explain how and why the accident happened." Breaking sharply with the Indonesians, the U.S. NTSB releases a 49-page review of its own input into the crash review on December 18. The American document indicates that there is clearly enough evidence to issue a ruling of pilot suicide by Capt. Tsu Way Ming and is somewhat incredulous that the final Indonesian finding had not been the same, particularly since the NTSC interim report had also concluded suicide was the probable cause.

As the month ends, the **Singapore Airlines, Ltd.** parent names Alphonsus Chia Chung Mun CEO, succeeding Make Swee Wah, who becomes senior vice president-Southwest Pacific.

SILVER AIR, LTD.: Pernerova 16, Prague 8, CZ-18600, Czech Republic; Phone 42 (2) 232-1405; Fax 42 (2) 232-1405; Code SLO; Year Founded 1996. Silver Air is established by General Aviation at Prague in 1996 to offer passenger charters. Zdenek Skoda is president and he begins revenue operations with a single leased Boeing 727-230A and a Let L-410UVP. Flights continue in 1997, including a brief wet-lease of the Boeing to Vietnam's **Pacific Airlines**.

Let service is maintained in 1998-2000, as the American-made jet-liner is returned to its lessor.

SILVER CITY AIRWAYS, LTD.: United Kingdom (1946-1962). A small private charter operation is registered as a U.K. airline on November 25, 1946 for the express purpose of providing a specialized British air link to Australia and South Africa in support of the mining industries of those countries. A total of £500,000 capitalization is provided by the industry, including Imperial Smelting Corporation and the Zinc Corporation, and administrative and management support is given by British Aviation Services (Britavia), under supervision of Managing Director Griffith J. Powell.

The carrier's name is taken from the Zinc Corporation's mining town of Broken Hill ("The Silver City"), Australia. Three Avro Lancastrian 3s, purchased from their manufacturer in October and christened *City of New York*, *City of Canberra*, and *City of London*, are now placed in service between Britain's Langley Aerodrome and South Africa and Australia. Two Douglas DC-3s are added in November and December.

Early in 1947, the Langley base is closed and company operations in the U.K. are shifted over to Blackbushe Airport, site of Britavia's

headquarters. A Lockheed Model 18 Lodestar is purchased in February and employed for fast passenger charters. Three more DC-3s are acquired in June and July, with a de Havilland DH 104 Dove I purchased in the former month and a Lancastrian sold in the latter.

In October, another Dove I is bought and a Bristol 170 Mk. IIA Freighter is leased from its builder. In November, the Freighter and a DC-3 are transferred to Karachi to participate in the airlift of Hindu refugees to India from the newly created Pakistan. The Freighter transports more people than any other single aircraft involved in this Operation India.

Silver City Airways undertakes a variety of ad hoc charters during 1948. A holiday route Blackbushe–Jersey, charter flights within Rhodesia, and the transport of racehorses to and from Continental destinations serve as examples. During the year, another Dove I is accepted and five more Bristol Freighters arrive to replace the first, now returned; three DC-3s are sold. With a Bristol 170 Freighter, the world's first vehicle ferry service is flown under a **British European Airways Corporation (BEA)** associate agreement, Lympne–Le Touquet on July 14; two cars are transported. Following the lift of 174 autos and their occupants, the service is suspended for the winter on October 7. In mid-October, four Bristols are committed to the Berlin Airlift.

Permission to resume the cross-Channel vehicle ferry service is received in January 1949. The Bristols are withdrawn from the Berlin Airlift on February 5, having made the delivery of 896.4 tons of supplies in 213 sorties since October. Produce and livestock charters to and from France and Ireland are now undertaken and on April 15, the Le Touquet vehicle ferry service is resumed.

Return flights to Lympne carry both cars and cargo. Over 10,000 passengers and 2,482 vehicles are flown on the year. The subsidiary, **Air Malta, Ltd.**, is formed to operate two de Havilland DH-104 Doves on charters from the Mediterranean island to Cairo, Tunis, and Catania. The fleet is increased by the addition of a DC-3, a Percival Proctor 3, and three Bristol Freighters, the latter allowing the leased units to return to the manufacturer.

Vehicle ferry and ad hoc charter work occupies the carrier throughout 1950. On March 21, a Bristol 170 Mk. 21 is destroyed in a crash at Cowbridge; a new Mk. 21 joins the fleet at month's end. The DC-3 *City of Hollywood* is sold in June.

Between the spring and October, when services are suspended, a total of 3,950 cars and 900 motorcycles are carried Lympne–Le Touquet. Berlin, Alexandria, Antwerp, Malta, Goteborg, and other cities are visited by chartered Silver City aircraft. **Air Malta, Ltd.** is purchased by **Malta Airways, Ltd.** on December 15 and on December 17, a DC-4 flies Winston Churchill to Marrakesh, remaining on call to the VIP.

Two more Bristol 170 Mk. 21s are purchased in March and April 1951 and are added to the cross-Channel service when it resumes during the latter month. The most successful season yet sees the Freighters transporting 30,000 passengers and 13,000 vehicles between Lympne and Le Touquet.

Many ad hoc charters are again flown, ranging from pest control helicopter flights in Khartoum to a November contract for the transport of 1,800 cows over the air ferry route. The Percival Proctor 3, all three Dove Is, and a DC-4 are sold. During December alone, the Bristols bring over 18 tons of French cheese into Britain every week.

Airline employment in 1952 is 167. On January 10, a new Southampton (Eastleigh) to Cherbourg (Maurpertus) scheduled vehicle ferry service is inaugurated; while awaiting the spring rush, additional funds are raised by flying in French cheese. On April 7, the carrier begins a two-week charter flying office furniture from England to Paris for headquarters of the new North Atlantic Treaty Organization. On April 14, a third vehicle route is inaugurated from Southend to Ostend and in June the company hauls 10 British racing cars to Le Mans for the 24-hour endurance race.

The 10,000th cross-Channel vehicle flight is completed on July 1 and the equestrian teams of Canada, France, and Egypt are transferred to Helsinki for the Olympic Games. Ad hoc charters are also flown to Al-

geria, Germany, Turkey, Holland, Austria, Finland, Italy, Belgium, and other European and North African destinations. At the end of the season, the Ostend route is dropped from the trans-Channel route network; during the summer, 11,000 vehicles and 17,000 travelers have been carried.

Tripoli travel agency owner Sayyed Mohammed Senussi Giaber joins with Silver City to form **Libyan Airways**. The U.K. operator provides two wet-leased Bristol 170 Freighters that are employed to operate non-scheduled all-cargo services to Benghazi and Kufra.

For the winter, five of the six Bristol Freighters are dispatched to Berlin for contract flights out of the former German capital. Fleet changes during the year include the deletion of an Airspeed AS.65 Consul and the addition of three Bristol 171 Mk. 21s.

En route to Hamburg from Berlin on January 19, 1953, a Bristol 170 Mk. 21 with two crew makes a forced landing in fog on the railway lines outside Tempelhof Airport; although the aircraft must be written off, there are no fatalities.

Also in January, weekly scheduled roundtrip Bristol services are initiated by **Libyan Airways** between Tripoli and Benghazi.

On March 31, the company receives the first two of 14 specially ordered Bristol 170 Mk 32 Freighters; the aircraft are employed to inaugurate London (LGW)–Le Touquet ferry flights on April 15. In late June, a Breguet 761 Provence is leased for three months from its French manufacturer; it is sent to Berlin to fly cargo flights to Hamburg.

On September 22, ground is broken for a new airport to replace that at Lympne, which has outgrown its usefulness. When the summer season finishes at the end of October, Silver City finds that it has quadrupled its cross-Channel carriage over 1952: 175,000 vehicles and 93,000 passengers have been flown. With an improvement in relations between the East and the West, Berlin to Hamburg flights cease in December. Six Bristol 170 Mk.32s and two DC-3s join the fleet during the year and no aircraft are removed.

Weekly skiing vehicle flights are inaugurated between Blackbushe and Zurich on January 2, 1954. In June and early July, three more Bristol 170 Mk. 32s are delivered. Construction of the carrier's own airport is completed at Lydd; christened Ferryflight, it is opened on July 13. Within a month, almost all company operations are transferred to this site.

Lympne–Calais ferry service is flown prior to the closure of Lympne Airport on October 31 and a Blackbushe–Zurich frequency is offered during the summer. During the national dock strike of October, company Bristols fly 500 tons of goods over their cross-Channel route in 70 roundtrips.

At month's end, it is reported that the scheduled vehicle services into France and Belgium have accommodated 110,687 passengers and 42,507 vehicles from both Lympne and Ferryflight.

Following a March 24, 1955 proving flight, regularly scheduled Stranraer–Belfast Bristol 170 car ferry flights start on April 6; the same day, a Southampton–Deauville summer service is launched. Late in the month, two DC-3s are added. Liverpool–Belfast flights commence on June 17. Daily Ferryfield–Calais Roadair service is inaugurated on November 1.

A total of 166,000 passengers, 5,000 tons of freight, and 57,000 vehicles are transported during the year.

Daily Southampton–Guernsey vehicle, cargo, and passenger services begin on February 27, 1956. In an effort to rationalize the air transport situation in northern England, plans are laid by the British Aviation Services (Britavia) Group early in the year for the creation of a regional airline division. The first step is the purchase of **Manx Airlines, Ltd. (1)** in March, allowing the new partner to retain its own name.

On May 11, low fare Silver Arrow coach-air service is begun over routes London and Lydd to Le Touquet, Paris, Ostend and Brussels; only the Lydd to Le Touquet and Ostend segments are flown, the remaining portions of the journey being traversed by bus. During June and July, five more Bristol 170 Mk. 32s arrive. Daily Southampton–Jersey vehicle service starts July 1. Twice-daily Newcastle–Belfast–Isle of Man vehicle flights are inaugurated on August 3. A chartered HP.81 Hermes 4A with 7 crew and 65 passengers is destroyed by a bad landing at Karachi on August 5; there are no fatalities.

In early November, a Handley Pages HP-81 Hermes 4 is leased from **Air Safaris, Ltd.** With 6 crew and 74 passengers, it is lost while on final approach to Blackbushe Airport on November 5 (seven dead).

Two DC-3s arrive in Austria on November 16 to begin participation in the airlift of Hungarian refugees to England, becoming the first to arrive from any British independent. Britavia purchases the **Lancaster Aircraft Corporation, Ltd.** on December 12, allowing it to briefly retain its own name and obtaining a de Havilland DH 86, two DC-3s, and two DH-89As in the bargain. The Hungarian airlift ends on December 14, with Silver City having transported 800 refugees to the U.K. in 26 roundtrips.

During the year, almost 200,000 passengers are transported along with over 60,000 vehicles.

In February 1957, two DH-114s, later christened *City of Bradford* and *City of Belfast*, are bought from **Braathens SAFE, A.S. Dragon Airways, Ltd.** is purchased from **Hunting-Clan Air Transport, Ltd.** on March 22.

It is announced that effective in October, Dragon will be merged with **Manx Airlines, Ltd. (1)** and **Lancashire Aircraft Corporation, Ltd.** to form Blackpool-based **Silver City Airways (Northern Division), Ltd.** A small charter operator, **Air Kruise, Ltd.**, is also acquired and is combined with the Ferryfield operation to create **Silver City Airways (Southern Division), Ltd.**

Following delivery of the second Heron in April, the last Dragon Rapide is sold in May.

As a result of continuing demand, fares for the vehicle ferry service are lowered. The company logs its 100,000th cross-Channel vehicle flight in July. At season's end, the Belfast–Stranraer and Southampton–Jersey and Guernsey routes are suspended.

A Bristol 170 Mk. 21 crashes at Winter Hill, Bolton, on February 27, 1958 (35 dead), it is replaced by 3 DC-3s, 2 of which are leased for 6 months from **Cyprus Airways, Ltd.** The DH-86 acquired with Lancaster Aircraft Corporation in 1956 is sold in April. Another Douglas transport is added in April followed by three more in July and August. Meanwhile on May 23 a new seasonal route is opened from Blackpool to Ostend followed, by month's end, by the addition of DC-3 frequencies from Newcastle to Hamburg and Brussels via Leeds, Dusseldorf, Amsterdam, Blackpool, and Isle of Man.

Twice-weekly Heron and Wayfarer flights are initiated on June 1 from Edinburgh to Isle of Man. On September 23, twice-weekly DC-3/DH-114 charters are inaugurated Manchester–Wick on behalf of the Nuclear Power Group.

Passenger and vehicles now average 200,000 and 70,000 enplanements per year, respectively.

The company's only Dove IB is transferred to **Morton Air Services, Ltd.** in February 1959, the same month a Bristol 170 Mk. 21 is destroyed in a crash at Le Touquet. Bournemouth–Cherbourg vehicle ferry flights commence on March 11. Blackpool–Dublin scheduled service is inaugurated, in association with **Aer Lingus Irish Airlines, Ltd.**, on May 15, followed by flights to Jersey, Ostend, Belfast, and the Isle of Man. May 29 marks transport of the 250,000th car across the English Channel.

On June 2, weekly DC-3 inclusive tours are launched from Manchester to Stavanger, followed by the introduction of similar offerings to Glasgow, Luxembourg, and Rotterdam. Later in the month and through December, four ex-**British Overseas Airways Corporation (BOAC)** HP-81 Hermes 4s are obtained and based at Manston Airport, Kent; their names become: *City of Chester*, *City of Coventry*, *City of Truro*, and *City of Gloucester*.

On June 15, the flight stage of the Le Touquet Silver Arrow service begins to originate with HP-81s flying from Manston. During the third quarter, the company briefly entertains the possibility of purchasing 15 Rolls Royce Merlin 527 Dart-powered freighters from the French manufacturer Hurel-Dubois; too expensive to build for limited markets, the proposed aircraft never makes it off the drawing board. The DH-114s *City of Bradford* and *City of Belfast* are sold in November and December and replaced by two more DC-3s.

By 1960 the fleet includes 4 HP-81 Hermes 4s, 1 DH-104, 6 Bristol 170 Mk. 31s, 14 Bristol 170 Mk. 32s, and 11 DC-3s. During the year, the Hermes 4 leased from **Air Safaris, Ltd.** in 1946 is returned and no other fleet changes are made. Given the heavy demands upon Ferryfield, the Ferryfield end of the Ostend route is transferred to the airport at Manston, along with a variety of ad hoc and inclusive-tour charters.

During the summer, HP-81 Glasgow–Reykjavik scheduled, but replacement, services are flown for **Lofleidir H.F./Icelandic Airlines**. Permission is now received to open vehicle ferry services to Corneilles, Auxerre, and Cologne.

In August, night freight charters are offered Manchester–Belfast. As the result of a government contract, HP-81s commence the flying of British soldiers from the U.K. to Germany on October 3. This one-year experimental trooping service will see the roundtrip transport of 3,500 men per month.

Vehicle ferry, inclusive-tour, and ad hoc charter flights continue in 1961 on schedules little changed from the previous year. The experimental German trooping contract is successful, but, when put out to bid, the business is won by **British United Airways, Ltd.**

In October, a Bristol 170 Mk. 21 is withdrawn. The Bristol 170 Mk. 31M *City of Worcester* with three crew and seven passengers crashes while on final approach to Les Provosts, Guernsey, on November 1 (two dead). This is the first vehicle ferry fatal crash in 250,397 Channel crossings since 1948.

British United Airways, Ltd. joins the Britavia Group on November 3; the latter is now transformed into the holding company Air Holdings, Ltd. In December, Silver City officials make plans to open a scheduled route network from Newcastle and Leeds the next year and to fly it, three Vickers Viscount 708s are leased from **Maitland Drewery Aviation, Ltd.**

Air Holdings' two most important subsidiaries, Silver City Airways, Ltd. and **British United Airways, Ltd.**, are merged on January 23, 1962, although the former is allowed to retain its name for the summer marketing season. The Bristol 170 Mk. 21 *City of Sheffield* is destroyed in a crash at Ronaldsway, Isle of Man, on June 30.

During the summer, Silver City transports a total of 105,000 passengers over its routes to the Isle of Man, including 3,243 on July 28, a one-day company record. On November 1, **British United (Channel Islands) Airways, Ltd.** is formed as a single large car ferry operator, becoming **British United Air Ferries, Ltd.** on January 1, 1963.

SILVER KRIS SERVICES: United States (1982–1984). William "Bill" Kingson establishes Silver Kris at Bradley Field, Hartford, Connecticut, in 1982 to undertake both scheduled all-cargo commuter flights, as well as charter and contract services. Employing a fleet of 4 Britten-Norman BN-2 Islanders, 1 Piper PA-31-350 Navajo Chieftain, and 1 Cessna 404 Titan, Kingson's company weekday scheduled routes extend to Philadelphia and to Republic Airport on Long Island.

Operations continue apace in 1983, but cease in 1984.

SILVER STATE AIRLINES: United States (1972–1982). Silver State is formed at Las Vegas in December 1972 to operate Beech 18 charter flights to the Grand Canyon. These on-demand services continue apace for the remainder of the decade.

In March 1980, Robert A. Jones and Perry W. Russell acquire the carrier and begin to provide thrice-daily scheduled flights to the Grand Canyon. Employing a fleet of 2 Embraer EMB-110 Bandeirantes, 4 Beech 18s, and 1 Piper PA-31-350 Navajo Chieftain, the carrier boards 24,800 passengers.

Sales offices emphasizing air tours are established in Tokyo, Frankfurt, and Zurich and late in 1981, two Beech 18s are dedicated to the opening of a southern division and a second route between San Juan and St. Thomas. Bookings for the year rise to 37,314. Unable to weather the recession, the company shuts down in 1982.

SILVER WINGS INTERNATIONAL: United States (1979–1984). SWI is established at Las Vegas to undertake contract passenger charter

flights on behalf of casino operators employing a single Boeing B-720-059B (B-720B). In late **1984**, the FAA orders the company temporarily grounded for conducting unauthorized services earlier in the year. Flights do not resume.

SILVERSTAR. See OMNIFLIGHT AIRWAYS/OMNIFLIGHT HELICOPTERS.

SILVERTIP AVIATION, LTD.: Site 13, Revelstoke, British Columbia, V0E 2S0, Canada; Phone (250) 837-4414; Fax (250) 837-6793; <http://www1.islandnet.com/mountns/silvertp.htm>; Year Founded **1994**. Silvertip is established at Revelstoke in **1994** to provide air charter and flight-seeing services. Revenue flights begin with 2 Cessna 337 Skymasters. Services provided include airline connections from Kelowna, Kamloops, Calgary, and Vancouver and air tours over Mount Revelstoke and Glacier National Parks.

SILVERTIP LODGES & BUSH PILOTS AIR SERVICE: United States (1974–1996). Silvertip is established by Gary and Michael Archer at Anchorage in **1974** to provide contract charter passenger and cargo flights in the city's region. Twenty years later in **1994**, their fleet comprises 3 de Havilland Canada DHC-2 Beavers and 1 DHC-3 Otter. During each of the 3 preceding years, passenger enplanements have averaged 3,000 and revenues \$1.15 million.

Flights cease in **1996**.

SIMBA AIR CARGO, LTD.: P.O. Box 59224, Nairobi, Kenya; Phone 2 (542) 533 529; Code SMB; Year Founded **1995**. SAC is set up at Nairobi by Capt. D. J. Leonard in March **1995** to operate a weekly scheduled charter flight from Kigali, Rwanda, to Brussels via Mombasa, Amsterdam, and Ostend. A Boeing 707-336C is acquired and the thrice-weekly roundtrips, made under a cooperative agreement with **Rwanda Cargo (Societe Nationale des Transportes Aeriens du Rwanda, S.A.)**, commence on April 1. Many of the services carry Rwandan refugees.

Flights continue in **1996–1999**, with emphasis on the transport of fresh vegetables and fruit to Europe.

SIMBAIR, LTD.: Tanzania/Uganda (1971–1977). Simbair, Ltd. is organized at Nairobi in **1971** as the charter subsidiary of **East African Airways Corporation**. Employing a Boeing 707-320B, the company undertakes charters to various destinations in Africa and Europe until the end of January **1977** when it ceases operations following the collapse of the parent company.

SIMBIRSK AERO AIR COMPANY: Ulyanovsk Airport, 8/8 Ulitsa Mozhaiskogo, Ulyanovsk Privotaski Zone, 432030, Russia; Phone 7 (8422) 362 756; Fax 7 (8422) 341 590; Code SBK; Year Founded **1995**. Ulyanovsk Civil Aviation Flight Training School (Ulyanovsk Vau-Ga) is reformed at Ulyanovsk in **1995** into a full-scale airline to offer regional passenger and cargo services. Vitali Rzhovski continues on as director general and he undertakes revenue operations with a fleet that includes 6 Yakovlev Yak-40s, 3 Yak-42s, and 26 Antonov An-26s. Enplanements total 88,648.

The carrier's 35 Russian-made aircraft transport a total of 70,300 in **1996**, a large 26.1% decline. Cargo traffic also falls off, dropping by 3.8% to 2.08 million FTKs.

Although operations are understood to have continued during the remainder of the decade, exact information is not available.

SIMMONS AIRLINES: United States (1974–1998). This company is incorporated by Lawrence J. Simmons on March 15, **1974**, under Michigan law, as L. J. Simmons Enterprises and engages in various businesses related to the air transport industry until October 15, **1978** when, with a single lightplane, it commences flight operations.

Intrastate service is provided from a base at Marquette County Airport at Negaunee in the Upper Peninsula under the old name until July 7,

1980 when the corporate identity is changed to Simmons Airlines. Four Embraer EMB-110 Bandeirantes are ordered to supplement the carrier's two Piper PA-31-350 Navajo Chieftains. Destinations now visited include Chicago, Detroit, Milwaukee, Marquette, Escanaba, Traverse City, Lansing, and Grand Rapids.

Enplanements for the year total 9,913.

Following passage of the Airline Deregulation Act in 1978, L. J. Simmons officials develop an operating strategy designed to provide scheduled air service primarily from small- and medium-sized cities in the Great Lakes area (especially Michigan) to the large metropolitan hubs of Chicago, Detroit, and Milwaukee.

Expansion actually begins in **1981** as many of the newly planned routes are inaugurated. Armed with an Essential Air Service (EAS) contract from the government, Simmons begins flights to and from the Michigan towns of Alpena, Jackson, Manistee, and Menominee and the Wisconsin cities of Marinette and Manitowoc.

This results in a spectacular 293.8% increase in passenger boardings, up to 38,984. Orders are placed for two more Bandeirantes and four Shorts 360s.

Simmons' growth continues in **1982**. Aided by the delivery of 2 additional EMB-110Ps, traffic doubles, up 140.7% to 93,306. A total of 65,000 pounds of cargo is also carried. Revenues rise to \$6.7 million with a net operating income of \$694,384. This financial showing allows the company to be classified as a "large regional," under the provisions of the CAB airline identification scheme.

To handle the increasing demand, the fleet is bolstered in **1983** by the addition of the four Shorts 360s ordered in 1981 and another EMB-110P. Orders are placed for Avions de Transport Regional ATR42s.

Enplanements double yet again during the 12 months, climbing 128.8% to 213,493. Freight also does well, rising 160.3% to 182,000 pounds. Revenues skyrocket 70% to \$11.39 million, but the increase in expenses associated with the new services and airliners leaves a net operating income of only \$401,053.

Airline employment is 600 in **1984** and once more, Simmons' fleet is augmented, this time by the acquisition of four more Shorts 360s, two EMB-110Ps, and three Nihon YS-11As. Late in the year, the company agrees to become a commuter affiliate of **Republic Airlines**. Outstanding traffic growth is experienced again as the number of travelers soars 76.2% to 376,065. Cargo climbs 46.8% to 266,000 pounds. Revenues also jump, by 113% to \$24.2 million, and an almost unbelievable 536% boost is posted in net operating income, \$2.5 million.

By **1985**, Simmons is providing service to 26 cities in Michigan, Illinois, Wisconsin, Ohio, and Minnesota. The scheduling of 1,552 weekly flight segments covers a route system of approximately 193,000 miles. A coordinated service agreement is implemented between the company and **Republic Airlines** on April 28. The latter purchases a 9.2% interest in the former and all of the regional's flights serving Detroit and Minneapolis (MSP), as well as the major's abandoned routes to four Michigan cities, are operated as RepubLink flights under the name **Republic Express**.

On October 25, the carrier joins the **American Airlines** American Eagle commuter system to provide feed to that major's Chicago terminal.

All of this activity leads to a huge 98.6% increase in enplanements to 748,229. Revenues skyrocket 100.6% to \$48.67 million, expenses rise 99.8% to \$43.38 million, and the operating profit doubles to \$5.29 million. Net profit swells to \$1.95 million.

In **1986**, Chairman Joel Murray and President Marvin Murray operate from hubs at Cleveland, Chicago, Detroit, and Milwaukee with a fleet of 2 Avions de Transport Regional ATR42-300s, 8 Embraer EMB-110P-1s, 6 Nihon YS-11As, and 23 Shorts 360s.

Coming into Alpena from Detroit (DTT) on March 13, Flight 1746, an EMB-110P1 with two crew and seven passengers, is forced to execute a missed approach. Coming around, the Bandeirante descends too far and crashes into a wooded area, 1.5 mi. short of the runway (three dead).

On August 12, **Republic Airlines** is purchased by **Northwest Airlines** and is completely merged into the latter on October 1. The new

owners are faced with the question of whether or not to maintain a relationship with Simmons at Detroit, where it requires only one feeder.

In September, the carrier purchases all 26 slots owned by **Comair** at Chicago (ORD); the \$7-million transfer occurs on December 15. Simultaneously, 43 slots are acquired from **Midstate Airlines**, which abandons the Chicago market in favor of Milwaukee.

Passenger boardings increase 46% to 1,092,528 and revenues leap upward by 64.9% to \$70.79 million. Expenses rise 71.5% to \$66.94 million and allow an operating profit of \$3.84 million. Net gain falls to \$1.37 million.

The Japanese turboprops are withdrawn in **1987** and replaced during the summer with two additional ATR42s and seven more Shorts 360s. **Northwest Airlines** in March elects to cancel its Northwest Airlink arrangement with the Ohio-based small regional **Fischer Brothers Aviation** at Detroit and assign it to Simmons. The action forces Fischer to briefly shut down and simultaneously to file a \$150-million antitrust suit against both **Northwest Airlines** and Simmons.

The Cleveland and Milwaukee hubs are downgraded with Minneapolis (MSP) joining the Motor City as the prime Northwest Airlink hubs.

Customer bookings accelerate 22.7% to a record 1,340,455 and revenues climb another 30.8% to \$92.6 million. Costs ascend only 23.5% to \$82.7 million, leaving an operating profit of \$9.88 million. Operating income is a record and so is the \$5.36-million net gain.

On August 8, **1988**, the company is purchased by the new **American Airlines** subsidiary AMR Eagle, Inc. Joel and Marvin Murray are replaced by Executive Vice President Jim Gunn and Vice President-Operations Timothy Harristhal, as the carrier is reborn as "American Eagle." Its aircraft are given new livery as the Northwest Airlink services at Detroit and Minneapolis (MSP) are transferred to **Mesaba Airlines**.

When an ATR42-300 plunges 600-plus feet over Wisconsin before the crew can regain control, the NTSB recommends that the FAA conduct an icing review.

Under both commuter banners, the large regional transports a total of 938,400 passengers on the year.

Vance McDonald becomes vice president-operations in **1989**. The fleet is increased by the addition of seven ATR42-300s and three Shorts 360s as orders are placed for six ATR72-212s.

During January and February, nearly 70 daily commuter flights are added on spokes from the Chicago (ORD) hub to cities in Indiana and Illinois.

Now operating to 16 communities, the large regional enplanes a total of 1,689,909 passengers for a magnificent 80.1% boost over the previous year.

Airline employment skyrockets by 300% in **1990** to 1,800 and the fleet now includes 14 ATR42-300s and 33 Shorts 360s.

Passenger boardings advance by 18.6% to 2,004,529.

Peter Piper becomes president in **1991**. One ATR42-300 is withdrawn as customer bookings climb 3.9% to 2,082,085. Revenues total \$184.82 million and expenses are \$172.14, guaranteeing an operating profit of \$12.68 million. Net gain reaches \$8.14 million.

The employee population explodes upward again in **1992**, by 283.9% to 1,874 and the fleet is significantly increased. Seventeen Shorts 360s are withdrawn and replaced by eight ATR72-212s and seven ATR42-300s. Orders are placed for a large number of SAAB 340Bs.

The carrier's 380 ALPA-represented pilots ratify a new 4-year contract in September. In December, the Chicago-based Eagle stretches its wings all the way to Texas, purchasing the pioneering Dallas (DFW)-based regional **Metro Airlines (Metroflight)** for a reported \$44 million. Simmons now begins to serve 21 cities from its parent's headquarters airport.

Overall passenger boardings move ahead by 12.4% to 2,341,278 and 314,000 FTKs are also operated. Revenues are level at \$184.7 million, but expenses, including the Metro buyout, are higher. As a result, operating income declines to \$2.08 million and the net profit is just \$963,896.

The workforce increases a further 51.6% in **1993** to 2,841 as the carrier is internally relabeled American Eagle Central. The fleet is altered

to comprise a total of 25 ATR42-300s, 14 ATR72-212s, 16 former **Metroflight** SAAB 340As, and 25 SAAB 340Bs.

Operations are consolidated in Texas as the purchase and integration of **Metroflight** is completed and that carrier's Jetstream 31/Shorts 360 fleet is replaced on November 1 with a number of the SAABs counted above. The first of 20 ATR72-212s taken on option and converted to firm orders in July are delivered in December.

Destinations now served from Dallas (DFW) include Abilene, Alexandria, Beaumont/Port Arthur, Bryan/College Station, Fayetteville, Fort Smith, Killeen/Fort Hood, Lafayette, Lake Charles, Laredo, Lawton/Fort Sill, Little Rock, Longview, Midland/Odessa, Monroe, San Angelo, Shreveport, Springfield, Texarkana, Tyler, Waco, and Wichita Falls. From Chicago, flights are undertaken to Akron/Canton, Bloomington, Burlington, Cedar Rapids/Iowa City, Champaign, Decatur, Dubuque, Flint, Fort Wayne, Green Bay, Kalamazoo, La Crosse, Lafayette, Lansing, Madison, Marquette, Milwaukee, Moline, Muskegon, Peoria, Rockford, South Bend, Springfield, Terre Haute, Toledo, Traverse City, Wasau/Steven's Point, and Waterloo.

The largest "American Eagle" carrier and the third largest national airline behind **Alaska Airlines** and **Aloha Airlines**, Simmons enplanes a total of 4,147,135 passengers, a 3.9% boost. Revenues skyrocket 92.1% to \$354.8 million, expenses are up "only" 80.8% to \$330.14 million, and operating gain surges to \$24.65 million. Net profit jumps to \$12.7 million.

A new, 54-month labor contract is ratified in February **1994** by the company's 400 Transport Workers Union mechanics. Designated the ED-50 Simmons Handicapped Passenger Lift, a new wheelchair lift is developed by company engineers and sells for a price of \$2,600, some \$8,000 less than similar devices on the market for regional aircraft. AMR Eagle elects to equip all of its aircraft with the new device.

When in the spring **American Airlines** elects to discontinue B-727 service from Dallas (DFW) to a number of markets, including Dayton, Wichita, Grand Rapids, Lubbock, and Indianapolis, Simmons is called upon to replace the services with its growing fleet of ATR72-212s. Daily departures from Dallas (DFW) and Chicago increase to 150 and 180, respectively, but are not universally appreciated. An increase in from five jet departures to nine turboprop departures each day at Wichita is protested, while the Amarillo, Texas, city government pays **American Airlines** not to withdraw its MD-80s.

En route from Indianapolis to Chicago (ORD) during a rainstorm, Flight 4184 is descending from 10,000 to 8,000 feet in a holding pattern. The ATR72-212 with 68 aboard crashes into a soybean field near Roselawn, Indiana, on October 31, and disintegrates; there are no survivors from an accident believed caused by wing icing.

The tragedy will be reported in Stephen A. Frederick's *Unheeded Warning: The Inside Story of American Eagle Flight 4184* (Blue Ridge Summit, Pa.: TAB, 1996). Just 30 minutes after the crash, a second ATR42-212, with icy wings and an engine out, safely lands at Chicago O'Hare.

On December 2, AMR authorizes reassignments for those Simmons pilots who do not wish to fly the ATRs in wet or cold weather. The FAA on December 9 grounds all ATR42s and ATR72s from flying in those U.S. geographical areas where ice might form, forcing several airlines to substitute smaller turboprops and cancel flights.

Although ATR turboprops comprise much of the "American Eagle" fleet, "American Eagle" President Robert Martens is, fortunately, meeting at AMR headquarters in Dallas with the presidents of the four confederated regionals, including Simmons' Ralph Richard. The group is quickly able to come up with a plan to reconfigure the combined Eagle fleet around the country.

Just after a limited schedule is resumed by **Flagship Airlines** from the O'Hare hub with two SAAB 340Bs, media attention on airline safety causes the operation to be shut down for a week; it is closed again on December 15. Twenty-two of the Simmons ATRs are sent to the company base at Dallas (DFW), 6 to **Wings West Airlines** at Los Angeles, 16 to **Executive Airlines** at Miami, and 1 to San Juan.

Meanwhile, customer bookings accelerate 8.9% to 4,517,000 and cargo increases 63% to 566,000 FTKs.

The workforce stands at 4,180 in 1995. The O'Hare hub is reopened on January 2 and five days later, Simmons resumes flights from that point, employing a fleet of SAAB 340s, proven cold-weather aircraft. Thirty of the Swedish-made turboprops have been transferred in from the Simmons fleet at Dallas (DFW) along with two **Flagship Airlines** SAABs. Three ATR42s and an ATR72 remain grounded at Chicago.

The FAA lifts its ban on ATR flights in icy weather, but demands that airlines employing them must follow new procedures intended to limit the time this aircraft-type spends in potentially dangerous weather. The scattered fleet is gradually returned to its previous hubs between January and the start of the April 2 summer schedule.

A freak hailstorm with 3"-6" balls strikes Dallas (DFW) on April 29. **American Airlines** has 54 jetliners damaged, while Simmons has 24 ATR72s and SAAB 340s put out of service, some for up to a month. A new "American Eagle" terminal is opened at Chicago (ORD) during the spring.

Minutes after takeoff from Chicago (ORD) on July 10, an ATR72-212 with 64 aboard, loses a door; a flight attendant, who is nearly sucked out, suffers minor injuries.

A computer failure at the Chicago Air Route Traffic Control Center forces delays on September 12. Early in the day and partially as a result of the ATC difficulty, a climbing ATR72-212 over Moline comes within 700 ft. of a private Beechcraft operating at 20,000 ft. before it is alerted off; the controller involved is decertified and required to obtain additional training.

Enplanements swell 10.2% to 4,979,461, although cargo dips 2.3% to 1.26 million FTKs. Costs far exceed revenues and bring sizeable losses: \$35.38 million (operating) and \$23.14 million (net).

The employee population is reduced by 17.4% in 1996 to 3,451.

While landing at Traverse City, Michigan, on April 3 following a flight from Chicago (ORD), an ATR42 with 3 crew and 33 passengers suffers the collapse of its left main landing gear during rollout. The pilot shuts the airplane down on the runway and deplanes the passengers; no injuries are reported.

Twenty units of Jetbridge adapter equipment are installed at Chicago (ORD). Flight 4036, an ATR72-212 for Champagne, Illinois, inaugurates this "Chicago Bridge" at Concourse G on November 25. Ten more of the structures, which when not in use, can be folded under the jetway, are situated at other Simmons cities. These allow customers to board and exit ATR72s via terminal jet bridges. When Flight 4036 arrives, Simmons is able to announce that it is the first airline to offer turboprop passengers boarding bridges at both their origin and destination cities.

Passenger boardings soar 20.7% to 6,010,052 and cargo climbs 2.8% to 489,000 FTKs. Operating income accelerates 27% to \$465.4 million while expenses rise 9.4% to \$439.31 million. The previous year's losses are turned into profits: \$26.08 million (operating) and \$22.65 million (net).

In April 1997, "American Eagle" places a \$200 million for 12 ATRs. Under terms of the May agreement between the Allied Pilots Association and **American Airlines**, "American Eagle" pilots will be offered one of every two new-hire positions, but places limits on the stage length Eagle regional jet pilots may fly (550 nm.). Meanwhile, negotiations between representatives of ALPA and AMR's "American Eagle" subsidiary are completed and sent to the 1,900 pilots of Simmons, **Wings West Airlines**, **Executive Airlines**, and **Flagship Airlines** for ratification.

The new ALPA contract is ratified during the third week of August by a vote of 773 to 473. The 16-year compact provides for guaranteed annual pay increases of 7%, improved crew scheduling and reserve conditions, replacement of the four individual company contracts with one master "American Eagle" document, and a no strike-no lockout agreement.

President Richard travels to Toulouse, France, where, on September 5, he accepts a new ATR72-212 from Aero International (Regional) CEO Patrick Gavin in special ceremonies marking the delivery of the

500th ATR. The aircraft is the third delivered of 12 requested in the spring.

Iowa State University professor Janet Sharp, on November 5, becomes the 100 millionth "American Eagle" passenger when she steps aboard Simmons Flight 4070 from Chicago (ORD) to Des Moines. She receives a variety of awards from "American Eagle" President Daniel P. Garton.

Passenger boardings inch up 0.6% to 6,044,580, while freight plunges 29.9% to 347,000 FTKs. Operating revenues advance 8.8% to \$506.48 million, while expenses rise 4.4% to \$458.23 million. The operating profit surges to \$48.05 million as net gain dips to \$22.47 million.

On January 15, 1998, AMR Eagle officials, led by President Garton, announce that the availability of regional jets, the previous August's single Eagle pilot contract, and changes in the economics of the regional airline business dictate consolidation. Consequently, AMR will integrate all four of its airlines into a single carrier by year's end.

At the same time, it is noted that AMR Eagle and Embraer, the aircraft manufacturer, have signed a \$1.1-billion export-finance contract with the National Development Bank of Brazil. The arrangement provides a line of credit that will cover the cost, over three years, of the airline's acquisition of the 42 ERJ-145 Amazons ordered at the June 1997 Paris Air Show, 22 of which are expected before year's end.

Just after landing at Lawton, Oklahoma, following a February 22 service from Dallas (DFW), a SAAB 340B with three crew and three passengers suffers the collapse of its landing gear; although the aircraft is badly damaged, no injuries are reported.

The first two Embraer ERJ-145ER (Extended Range) jetliners are delivered on February 28.

During the second quarter, the new carrier's field services organization begins to take shape. A number of appointments are made at the end of April (effective July 1), including David Kennedy, who becomes senior vice president-operations, while **Flagship Airlines** vice president-flight operations is named AEA's vice president-flight operations under Kennedy.

Reporting to Senior Vice President-Field Services Ralph Criner will be six new hub vice presidents: Mike Costello at Dallas/Fort Worth, Dave Brown at Los Angeles, Jacques Vachon at Miami, Robert Hamilton at New York (JFK), and former **Executive Airlines** President George Hazy at San Juan.

Two RJ-145LRs join the fleet at the beginning of May and one of the RJ-145ERs has an engine change, becoming an RJ-145MR. All of the Amazons will eventually be long-range (LR) models.

Also in May, AMR Eagle's four semiautonomous carriers (Simmons, **Flagship Airlines**, **Executive Airlines**, and **Wings West Airlines**) begin a seven-month period of amalgamation into the single mammoth **American Eagle Airlines**, now viewed by AMR as a sister of **American Airlines**. The presidents of Simmons, **Flagship Airlines**, and **Wings West** are provided with appointments elsewhere within AMR Eagle and are replaced with vice presidents at each of the new airline's hubs. Simmons is the core airline; it will be followed into the merger this month by **Flagship Airlines** and in June by **Wings West**.

On May 15, AEA introduces Embraer RJ-145 Amazon services using the new Brazilian jetliners painted in AEA colors. The initial flights, operated by Simmons pilots, include five daily roundtrips from Chicago (ORD) to Cincinnati, six per day from Chicago to Cleveland, and a daily roundtrip from the Chicago to Milwaukee.

Simultaneously, agreement is reached with the Transport Workers Union of America for a new single-carrier contract. The agreement covers flight dispatchers, mechanics, and ramp-service personnel.

Daily RJ-145LR service to Indianapolis and Columbus begins on June 5, followed by Des Moines on June 26.

In June, the decision is taken to separately maintain the certificate of Puerto Rico-based **Executive Airlines**, moving the operating certificate to Dallas/Fort Worth on July 1. The physical merger of the company into American Eagle Airlines is put off.

Chicago to Cedar Rapids flights commence on July 7.

SIMO AIR, LTD.: Canada (1989–1998). Simo Air is established in spring 1989 to operate third-level commuter flights from Toronto Island Airport. The remainder of the year is spent fighting opposition to expansion of services from that in-town airport and in assembling a diverse fleet of 1 each Britten-Norman BN-2 Islander, Beech King Air 100, and Piper PA-31T Cheyenne.

Revenue operations between Toronto and Windsor commence in early 1990 and continue. By 1995, the fleet has been significantly altered. Gone are the inaugural aircraft, replaced by 1 each Super King Air 200, Cessna 208 Caravan I, and C-208A, plus 4 C-408Bs.

The King Air and C-200 are withdrawn in 1996 and replaced with a single Beech 1900C. Unhappily, services are suspended two years later.

SIMPSON AIR. See COAST AIR (1)

SIMPSON AIR, LTD.: P.O. Box 260, Fort Simpson, Northwest Territories, X0E 0N0, Canada; Phone (403) 695-2505; Fax (403) 695-2925; Year Founded 1979. This small carrier is formed in 1979 to offer passenger and cargo charters and contract services from bases at Cambridge Bay and Fort Simpson as well as scheduled frequencies linking Wrigley with Fort Simpson, Fort Nelson, and Fort Lizard and Nahanni with Butte, Montana. The initial fleet comprises 4 Britten-Norman BN-2 Islanders. In 1981, President W. T. Tweed's company employs 28 personnel.

By 1986, airline employment stands at 12 and the fleet is upgraded to comprise 1 de Havilland Canada DHC-6-100 Twin Otter, 1 Islander, 3 Cessna 185s, 1 Piper PA-23 Aztec, and 1 Piper PA-32 Cherokee Six.

Although operations continue apace in 1987–1988, the latter year is tragic. On October 16, a newly acquired Beech King Air 90 with three aboard, crashes 1.5 mi. short of the runway on approach to Fort Simpson, Northwest Territories; there are no survivors. Already in financial difficulty, the accident forces the company to cease scheduled flying in 1989.

The fleet in March 1990 includes 1 leased Beech 99 and 1 each DHC-6-100 and DHC-6-200. By 1994, the company is performing its charters with only 1 DHC-6-100 Twin Otter. The single aircraft continues to provide total company lift during the next three years.

Flights continue in 1995–1999, during which years the Twin Otter is replaced with a pair of Cessna 206s.

SINGAPORE AIR SERVICES, LTD.: Singapore (1968–1969). The three-year-old nonscheduled air taxi Air Taxi, Ltd. is reformed in 1968 and its fleet of Cessnas and a Douglas DC-3 is increased by the addition of a de Havilland Canada DHC-6-100 Twin Otter. Local passenger and cargo flights continue for another year until the national government acquires 80% shareholding and renames the company **Saber Air, Ltd.**

SINGAPORE AIRLINES, LTD. (SIA): P.O. Box 501, Airmail Transit Center, 918101, Singapore; Phone 65 542-3333; Fax 65 545-5034; <http://www.singaporeair.com>; Code SQ; Year Founded 1972. The new national carrier is incorporated as a subsidiary of Temasek Holdings, Ltd. on January 28, 1972, following the dissolution of the bi-national **Malaysia-Singapore Airlines, Ltd.** Ownership of the company and of the \$203 million in acquired assets is vested in the national government (82.2%) and airline employees (17.2%). Prime Minister Lee Kuan Yew, who had led the fight against the Malaysian service philosophy, appoints his confidant and permanent secretary in the finance ministry, Joseph Y. M. Pillay, as chairman/president.

The fleet includes all of the Boeing equipment retained after the split: 3 B-707-312Bs and 5 B-737-112s and these are now repainted in new yellow and blue livery. On July 26, orders are placed for two, later three, B-747-212Bs plus attendant ground equipment, while three B-707-324Bs are requested from **Continental Airlines** in August.

Flight operations begin over previous MSA routes, especially London, on October 1. Late in the year, Athens, Frankfurt, Osaka, and Zurich join the route network as President Pillay is able to launch a process of negotiating worldwide (almost) reciprocal landing rights. All

routes are served by the Singapore Girls, the gracious, sarong-clad flight attendants who will become SIA's symbol. Their gracious uniforms and those of all ground employees are designed by Pierre Balmain.

Enplanements for the year total 1.82 million and the company ranks as the 54th largest airline in the world; it will move ahead of 47 during the next decade.

The workforce at the beginning of 1973 stands at 6,263 and B-707-324B service to Madras begins on January 1. A Tourism Development Department is established as a division of the airline's administration and a \$25-million Kriscom IBM computerized reservations system is installed and turned on in February. By March, the fleet has been upgraded through the addition of 3 B-707-324Bs and the staff numbers 6,000. In April, holiday charters commence to the resorts on Lake Toba, near Medan, Indonesia.

Low-fare flights are introduced in pool with **British Airways, Ltd.** (2) on July 1. The first of two Jumbojets to be delivered during the year is a B-747-212B that arrives on July 31; it is followed by a second on August 29. Together, the two are employed to launch flights to Hong Kong and Tokyo on October 1 along with services from Sydney to London via Singapore.

Passenger boardings decline 34% to 1,333,000; however, cargo traffic is up by 48.6%.

Airline employment climbs to 7,000 in 1974. One additional B-707-312B is delivered and a third Jumbojet, delivered on July 29, enters service in August. The London frequency is increased and Seoul is added to the international route network, which now comprises 25 cities in 20 countries and covers more than 50,000 unduplicated route miles.

Passenger boardings grow 21% to 1,509,000 and freight traffic soars 58%. Profits of \$16.6 million are reported.

An order is placed in 1975 for a fifth Jumbojet as the fourth, another Dash-212B, joins the fleet on February 6. Also during the month, a hotel management subsidiary is created. The workforce is reduced to 6,008. A wholly owned charter subsidiary, **Tradewinds (Pty.), Ltd.** is formed on February 17. Amsterdam joins the European route network on April 1; the next day, London frequencies are made daily. Chairman Pillay places an \$800-million order for new aircraft later in the month.

Additionally, "meat flights" are inaugurated to Japan, whereby Japanese are able to bring home cheap meat from Singapore. On August 15, a new \$11.5-million engine overhaul facility is opened at Paya Lebar Airport. Three days later, B-707-312B frequencies are inaugurated to Seoul via Bangkok, Hong Kong, and Taipei. With the addition of Seoul, Hong Kong, and Taipei to the route network, SIA has now linked the East Asian nations with the fastest rising economies, the "Mini Dragons."

Bookings soar 20.3% to 1,815,000 and cargo accelerates by 33.4%.

The employee population in 1976 is increased again, up to 6,942. A B-747-212B is acquired on March 30 and an order is placed for six B-727-212As for use on regional routes. Service is opened on May 1 to Dubai, Auckland via Melbourne, and Paris; the next day, the company's London route becomes all-Jumbojet.

In August, the wholly owned charter carrier **Tradewinds (Pty.), Ltd.**, a subsidiary of Singapore's other hotel management subsidiary, is created to offer worldwide passenger and cargo flights, as well as regional scheduled service in cooperation with **Malaysia Air Charter, Ltd.**

The company becomes self-insured in November with the creation of Singapore Aviation and General Insurance Group (Pty.), Ltd. **Tradewinds (Pty.), Ltd.** begins nonscheduled services in October.

Passenger boardings are up 17.5% to 2,132,000 and cargo swells by 23.6%.

Singapore Aero-Engine Overhaul (Pty.), Ltd. is set up on April 1, 1977. In January, the company receives the 1976 "Passenger Services Award" from *Air Transport World* magazine.

The sixth and seventh B-747-212Bs plus six B-727-212As are delivered between June and September and orders are placed on July 6 for seven DC-10-30s. Routes are opened to Copenhagen and Tehran on July 1; 13 days later, a \$14-million air freight terminal is opened at Singapore's airport. In September, a bilateral air service agreement is reached

with the U.S. and on October 21, a pact is signed with **British Airways, Ltd. (2)** for joint Concorde service.

Direct Singapore to Auckland flights commence on November 3 employing a Douglas DC-10-30 leased from **Air New Zealand, Ltd.**

In association with **British Airways, Ltd. (2)**, thrice-weekly London-Bahrain-Singapore Concorde operations begin on December 9; the SST wears BA colors on one side and SIA livery on the other. The service is suspended after only six flights "for environmental reasons."

The year's enplanements are 2,435,906.

The workforce grows 20.4% in **1978** to 9,274. The company is voted "Airline of the Year" in January by *Travel News*. A route is started to Kuwait and in April cargo services are begun to San Francisco via Hong Kong, Guam, and Honolulu. A JT9D engine test facility is commissioned and a \$2.3-million ITEL computer is installed. A \$900-million order is placed for 12 B-747s and 4 B-727-212As, plus spare parts. The first two DC-10-30s are delivered to Chairman/President Pillay's fleet in November.

Cargo traffic soars 58.2% and passenger bookings are up 15.9% to 2,893,000. A profit of \$14.8 million is earned on revenues of \$623 million.

Joint Concorde service with **British Airways, Ltd. (2)** is resumed on January 24, **1979**. On April 1, Brussels becomes the ninth market added in Europe. On April 4, thrice-weekly DC-10-30 passenger service starts to San Francisco via Hong Kong and Honolulu. Having elected to bypass the Guam stop operated on the cargo run, SIA becomes the first airline to fly directly from the British Crown Colony to Hawaii.

The frequency on the transpacific route is increased to four per week in May. The DC-10-30s are replaced by B-747-212Bs between June 9—when the crash of an **American Airlines** machine in Chicago causes the type to be grounded—and September. The Jumbojets, two of which are newly delivered on August 2 and 16, respectively, bear the words "California Here I Come" across their fuselages; a third B-747-212B arrives on September 25 followed by the year's fourth on October 1. Routes are also started to Bali and Brussels and assistance is extended to newly formed Air Lanka.

In November, the very first B-747-212B is sold to **The Flying Tiger Line**. The fleet at decade's end includes 10 B-747-212Bs, 3 B-737-112s, 6 B-727-212As, 10 B-707-312Bs, and 3 DC-10-30s.

Cargo grows 37.3% and passenger boardings jump 16.8% to 3,377,000.

The workforce is increased 2.9% in **1980** to 10,257. Three B-707-312Bs are retired and four DC-10-30s, seven B-747-212Bs, and a B-727-212A join the fleet.

By April 1, the company is operating 17 weekly Jumbojet European services. A second transpacific route is opened on July 2 to Los Angeles, via Taipei and Honolulu. Another two, older B-747-212Bs are sold to **The Flying Tiger Line** in July and September, respectively. Meanwhile, a third and fast—16 1/2-hr.—service across the Pacific is begun via Tokyo to Los Angeles.

Orders are placed for six Airbus Industrie A300B4s. Having drawn insufficient traffic to justify its continuance, joint Concorde service ends on October 30.

Although cargo is off by 2%, passenger traffic rises 13.4% to 3.8 million.

The employee population increases by 51.9% in **1981** to 15,575. One B-747-212B and four A300B4s are delivered, while six B-707-312Bs, the three B-737-112s, and three DC-10-30s are retired. The newly received Jumbojet is the last Dash-200 received. Orders are placed for eight additional Jumbojets and eight more Airbuses.

On February 2, one of the new Airbuses is placed on the Singapore to Madras, India, route, while another starts flying from Singapore to Kuala Lumpur and Jakarta. By April 1, the company is providing eight weekly Jumbojet frequencies to Australia and two to Auckland, New Zealand. On July 1, one of the company's last two B-727-212As is the first aircraft to land at Singapore's brand new Changi Airport. On December 15, a \$1.6-billion order is placed for eight B-747 SUDs (the SUD stands for "stretched upper deck"), four B-757-212s, and six A310-222s.

Freight is up 18.7% to 645.8 million FTKs, while passenger boardings accelerate 15.1% to 4,405,000.

The workforce grows 2.2% in **1982** to 10,449. Continuing its program of maintaining one of the world's youngest aircraft fleets, the carrier phases out two more B-727-212As and receives four A300B4s. With its engines stalled by volcanic ash from Mount Galunggung over Jakarta on July 14, a B-747-212 with 230 aboard falls 1 1/2 mi. before leveling off; the Jumbojet is able to land safely.

Officials of the company and those from **Malaysian Airline System (MAS), Ltd.** agree on November 1 to turn the Singapore-Kuala Lumpur route into a no-frills, non-reservation shuttle similar to that operated by **Eastern Air Lines** in the U.S. On November 23, the two carriers jointly inaugurate holiday services to the Malaysian east coast resorts at Kuantan.

Passenger bookings are up 4.2% to 4,591,000 and cargo climbs 14.1% to 736.82 million FTKs. On revenues of \$1.25 billion, operating and net profits are, respectively, \$23.3 million and \$52.4 million.

The employee population is cut 6.2% in **1983** to 9,798.

The last three DC-10-30s and three B-747-212s are phased out as five B-747-312s and four A300B4s are received. The Jumbojets are sold to **The Flying Tiger Line**. Frequencies on the Los Angeles-Singapore route are increased on May 5 when the B-747-312 makes the first transpacific flight by the SUD aircraft. Incidentally, in-flight slot machines now become a regular feature on all Jumbojet routes.

In September, the company opens the world's largest column-free hangar, near its headquarters at Changi Airport. In December, thrice-weekly Singapore to Kuantan, Malaysia, flights begin.

Freight accelerates 14.8% to 845.96 million FTKs, but passenger bookings dip 1.1% to 4,540,000.

One B-747-212 is retired in **1984** as three B-747-312s and four B-757-212s join the fleet. Flights to Male, Maldives, begin on March 28 while Brisbane and Adelaide join the Australian market list on March 30. In November, twice-weekly B-747-312 service is started to Cairo via Karachi.

Freight is up 13.6% to 961.19 million FTKs and passenger traffic rises 5.6% to 4,792,000 passengers flown. Profits are \$39.1 million (operating) and \$64.7 million (net).

The workforce in **1985** stands at 9,919. The last two B-727-212As and all A300B4s are now sold as delivery is taken on six A310-222s and the last five B-747-312s.

On January 31, the carrier's interest in Singapore Aero-Engine Overhaul (Pty.), Ltd. is sold to Singapore Aircraft Industries (Pty.), Ltd. Beginning on June 1, A310-222s replace A300B4s on the Madras run and under the ICAO 90-min. rule, flights commence to Mauritius the same day.

In November, government interest is reduced to 73% as 50 million new shares are created and floated on the Singapore Stock Exchange.

Passenger boardings increase 2.5% to 4,911,000 and freight swells 2.1% to 980.97 million FTKs. Revenues are \$1.382 billion and expenses are \$1.326 billion, leaving record profits of \$55.9 million (operating) and \$115.3 million (net).

Employment grows 3.3% in **1986** to 10,547. On March 25, a B-747-312C freighter is placed in service. Flights to Delhi commence on April 1, the same day a stop is added at Manchester, England. Also in April, SIA places the largest aircraft order in airline history to that date, a \$3.3 billion-purchase of 14 B-747-400s, plus options on another 6.

On May 10, twice-weekly service is launched directly from Singapore to Bali in cooperation with **Garuda Indonesia**. A second B-747-312C arrives on August 27; also in August, a six-man team of Boeing 707 engineers is dispatched to Shanghai to assist **Shanghai Airlines Company, Ltd.** in preparation of its fleet for charter service that will begin in December. Service is also inaugurated to Christchurch on October 7 and Calcutta, Dhaka, on October 29.

Simultaneously, company officials announce that they will spend \$557 million on improvements at Changi Airport over the next decade, including \$232 million for a second passenger terminal. A second Jumbojet combi enters service in the fall and daily nonstop B-747-312 Singapore-London flights resume in December. Orders are also placed for two Airbus A310-324s.

Customer bookings advance by 1.7% to 4,992,000 and cargo moves upward by 13.3% to 1.11 billion FTKs, third largest among Asian airlines. Revenues rise 3% to \$1.4 billion and expenses are up 1.8%, allowing an operating profit of \$57 million and net gain of \$117 million.

The payroll is improved by 4% to 16,404 in 1987 as the final B-747-312C enters service on March 20. Also in March, a \$2.1-million, 3-year program is initiated to lift the quality perception of the carrier's ground services. The fleet is enhanced by delivery of the first two A310-324s and flights begin to Port Moresby.

On May 1, the fortieth anniversary of service (including that of its predecessors) is celebrated. In addition to the introduction of a new corporate identity program, including a remake of aircraft interiors, new signage, and new livery, it is highlighted by the restoration of an Airspeed Consul, the type employed to make **Malayan Airways, Ltd.**'s first flight.

Government investment is reduced to 55% in June through an additional share offering. On June 11, a second-hand B-747-212B is sold to **Air India, Ltd.** for a price estimated by the press to be between \$45 and \$50 million. Twice-weekly A310-324 frequencies are stretched from Singapore to Katmandu via Dacca in July.

An new agreement is signed with unions in August covering approximately 85% of the airline's staff. Also during the month, a joint service is inaugurated with **Air Niugini** between Singapore and Port Moresby; the route is operated exclusively with Papuan New Guinea aircraft.

In October, the carrier joins with **Malaysian Airlines, Ltd. (MAS)** to offer a joint weekly B737-2H6A service to Langkawi Island, Malaysia, with a stopover at Penang Island.

Direct service is started from Singapore to Istanbul in November, making the carrier the first from Southeast Asia to serve Turkey. In December, the airline joins with **Cathay Pacific Airways (Pty.), Ltd.** and **Thai Airways International, Ltd. (THAI)** to develop a computerized reservations system and travel service to be called ABACUS Travel Systems.

Passenger boardings ascend 9.3% to 5,458,000 and freight retains its third-place rating at 1.25 million FTKs, a 13% boost. Revenues climb 16.6% to \$916.45 million and with expenses down, an operating profit of \$99.1 million can be reported, together with net gain of \$133.85 million.

The workforce grows by 6.1% in 1988 to 17,404 and the fleet of Chairman Pillay and Managing Director Cheong Choong Kong, a former stage actor before becoming an airline executive, now includes 8 B-747-212Bs, 11 B-747-312s, 3 B-747-312Cs, 6 A310-222s, 2 A310-324s, and 4 B-757-212s. Orders are outstanding for 14 B-747-412s and 4 A310-324s.

In January, the company receives the 1987 "Financial Management Award" from *Air Transport World* magazine. A joint-venture agreement is signed with New Japan Aircraft Maintenance Co., Ltd. and C. Itoh & Co., Ltd., also in January, for establishment of Singapore Jamco (Pty.), Ltd. Daily B-747-312 service is initiated from Singapore to San Francisco in January via Hong Kong, while flights are added to Darwin on February 1 and Fukuoka at the end of March.

In April, a Worldwide Emergency Assistance program is unveiled to provide frequent flyers 24-hr. access to prompt assistance in the event of personal, medical, or legal emergencies. Smoking is banned on 4 of 14 daily flights between Singapore and Kuala Lumpur beginning in May.

Twice-weekly B-747-212B service is launched on July 1 from Singapore to Vancouver (Canada) via Seoul. Jumbojet service is also inaugurated to Darwin and Fukuoka. Late in the month, the first pure freighter, a B-747-212F, is delivered for weekly services to Europe, Taiwan, Korean and either New Zealand or Australia. The flight training school, Singapore Flying College (Pty.), Ltd., is opened.

Customer bookings jump 10.8% to 6,045,000 and cargo moves up by 11.9% to 1.39 billion FTKs. Revenues advance by 17.6% to \$2.1 billion and allow operating income of \$401 million. Net gain reaches \$369 million.

The number of employees swells 10.9% in 1989 to 19,309.

In January, the company joins with **Cathay Pacific Airlines (Pty.), Ltd.** in welcoming **Philippine Air Lines, Malaysia Airlines, Ltd. (MAS)**, and **China Airlines, Ltd.** to their new ABACUS reservations

system; **Royal Brunei Airlines** is hooked up later in the year. The no-smoking policy is extended in February to cover the carrier's 13 weekly frequencies from Singapore to Penang. Later in the month, an agreement is signed with **Tradewinds (Pty.), Ltd.** providing for marketing cooperation.

In early March, the first two of 14 ordered B-747-412s are received and begin the first nonstop Singapore-London service on March 29. Meanwhile, in April, the SATS Cargo subsidiary opens its new \$25-million air freight terminal and 24 pilots are hired from the bankrupt Aeromexico.

In late spring, a three-way Global Excellence alliance is joined with **Swissair, A.G.** and **Delta Air Lines**, providing for the exchange of equity interests, as well as joint cooperation in a number of areas including marketing, schedule coordination, and a month-long flight attendant exchange program. A joint-purchasing company will be established at Zurich, with branches in Atlanta and Singapore.

During June, the company bans smoking on all of its short-haul regional flights, including Denpasar, Begawan, Medan, Bandar Seri, Jakarta, Bangkok, Langkawi, Penang, and Kuala Lumpur. The long-haul Jumbojets also initiate Hong Kong to San Francisco flights during the summer. In September, four joint, block-space freighter services per week are inaugurated in cooperation with **Deutsche Lufthansa, A.G.** over SIA's routes from Singapore to Australia.

Three more of the "Megatop" Dash-412s are received in the fall. The company is also the first in the world to arrange for exclusive transmission of television news, via satellite, to its airborne passengers. In December, a 25-minute news program is begun on all Jumbojet and A310-324 flights exceeding three hours.

Enplanements swell 9.9% to 6,643,000 and freight rises 17.7% to 1.64 billion FTKs. Revenues ascend 16.9% to \$2.46 billion, expenses climb just 3.8% to \$1.77 billion, and operating income moves to \$767 million. Net profit totals \$647 million.

Company employment grows by 10.6% in 1990 to 21,355, a figure that ranks the carrier 21st in the size of workforce category among all the world's airlines. In January, the carrier is named the 1989 "Airline of the Year" by *Air Transport World* magazine.

The year is busy. Raffles Class business service is introduced and large aircraft orders are made: \$270 million for 2 A310-324s and \$16.3 billion for 20 MD-11s and 30 B-747-412s. Service is inaugurated to the new destinations of Cebu, Nagoya, and Guangzhou. Additional frequencies are undertaken between Singapore and London (LHR) and as part of its new code-sharing agreement with **Delta Air Lines**, daily Los Angeles to Dallas (DFW) connecting service is initiated in June.

On July 12, the carrier joins with the National Productivity Board to form the Service Quality Centre (Pty.), Ltd. Well-established, the company now joins IATA.

Twice-weekly Singapore to Berlin flights commence on October 28. A flying school is opened during the month at Jandakot, near Perth, Australia. It is the only Asian airline to have its own training center on the island continent.

Passenger boardings climb 7.5% to 6,977,000 and freight climbs 5.8% to 1.69 billion FTKs. Only nine other airlines haul more cargo than SIA. Revenues move ahead by 6.8% to \$2.91 billion and expenses are up 9% to \$2.14 billion. The operating profit of \$809 million thus generated is the highest for any airline in the world. Net profit, however, slips to \$636 million, a \$10-million decline.

The fleet in 1991 includes 6 A310-222s, 11 A310-324s, 1 B-737-3M8F, 4 B-747-212Bs, 1 B-747-212F, 2 B-747-245Fs, 2 owned and 9 leased B-747-312s, 3 B-747-312Cs, and 7 B-747-412s. Orders are outstanding for 2 A310-324s, 20 MD-11s, and 25 B-747-412s.

In early March, **American Airlines** delays accepting its second MD-11 and keeps its first out of service as technical problems in the glass cockpit of the aircraft are resolved with their manufacturer. The dispute between American and McDonnell Douglas (MDC) over 146 different items is widely covered in the aviation press. This dispute, coupled with range problems and communication difficulties, causes the builder a loss

of much credibility. Meanwhile, as a result of its own unanswered questions, Singapore now cancels its own order for MD-11s.

Four Pakistani pirates seize Flight 117, an A310-222 with 129 passengers en route to Singapore from Kuala Lumpur, and returned to Singapore Airport on March 26. The hijackers demand that the Pakistani government release the jailed husband of former Prime Minister Benazir Bhutto.

Government commandos storm the plane the next morning killing all four gunmen and saving the hostages.

Later, delivery is taken of the eighth and ninth B-747-412 and flights are started to Kota Kinabalu, Kuching, and Toronto. The world's first satellite telephone service is introduced and a \$3.36-billion order is placed for seven A340-313s. Deputy Chairman Lim Chin Beng is named Ambassador to Japan.

The carrier, together with **Japan Air Lines Company, Ltd. (2)**, signs a shareholders agreement with Singapore Aerospace, Ltd. to acquire 10% of the latter's wholly owned subsidiary Singapore Aviation Services, Ltd. (SASCO). Service to Toronto starts on June 1.

The Danish Supreme Court on June 26, fines 6 foreign airlines a total of Dkr 452,000 (\$64,570) for bringing illegal refugees to Denmark without visas or identity documents. The decision in the case against European operators **SAS (Scandinavian Airlines System)**, **Sabena Belgian World Airlines, S.A.**, **KLM (Royal Dutch Airlines, N.V.)**, and the defunct **Interflug**, plus **Iraqi Airways** and SIA has been eagerly awaited by the 50 airlines flying into Denmark.

The companies have argued that it is not their responsibility to do the police's work when checking in Denmark-bound passengers. Nor could they be expected to tell the difference between genuine and false visas and passports, or prevent passengers from tearing up their passports once on board the plane, as has often happened. The Supreme Court is unconvinced by their arguments, and orders the airlines to pay a fine of Dkr 8,000 per passenger illegally brought to Denmark.

In November, SIA begins employing a pair of Learjet 31s for advanced pilot training.

Customer bookings jump 7.2% to 7,476,000 and cargo rises 4.3% to 1.76 billion FTKs. Revenues ascend 2.9% to \$3 billion and allow profits of \$659 million (operating) and \$539 million (net).

The payroll is increased by 8.3% in 1992 to 23,793. Employing 1 in every 74 workers in the city-state, SIA is now Singapore's largest private employer. After a 17-year hiatus, direct A310-324 roundtrips begin on February 28 from Singapore to Ho Chi Minh City, four times a week.

On March 29, twice-weekly Singapore to Johannesburg flights begin, some being routed via Mauritius and others nonstop. **South African Airways (Pty.), Ltd.** will offer reciprocal service over the route within a month.

On April 1, most of the carrier's engineering division is merged with Singapore Engine Overhaul Centre, Ltd. to form SIA Engineering Company (Pty.), Ltd. Simultaneously, Apron Services, Cargo Services, and Passenger Services are merged to form the new traffic company SATS Airport Services (Pty.), Ltd. The same day, **Tradewinds Airlines (Pty.), Ltd.** is renamed **SilkAir (Pty.), Ltd.** and the Tradewinds Tours & Travel Services division is reformed into a **SilkAir (Pty.), Ltd.** subsidiary.

Ending its policy of investing only in Singapore hotels, the company, also in April, takes 20% shareholding in a joint venture development project at Yogyakarta in Indonesia. Twice-weekly A310-222 roundtrips commence on May 4 between Singapore and Hanoi.

Additionally, B-747-412 flights begin to Madrid. Big Boeing service to New York commences in July on a frequency of six times per week, three via Brussels and three via Frankfurt. The same month, Singapore-Toronto services are suspended; however, the Vancouver route is retained. A "personal cinema system" is introduced for passengers on long-haul routes while an air cargo electronic datalink system is turned on.

On November 29, B-737-3M8F regional freighter flights are initiated to Bandar Seri Begawan, Bangkok, Dhaka, Ho Chi Minh City, Hong Kong, Madras, and Phnom Penh. Flights are now made to 67 cities in 39 countries. The airline is rated by *Conde Nast Traveler* as best in the

world for passenger service. The receipt of a B-747-412 in December makes the carrier the third in the world to operate 50 Jumbos.

Enplanements accelerate 9.9% to 8,512,000 while freight swells 24.4% to 2.3 billion FTKs. Revenues climb 15.5% to \$3.46 billion and expenses are up 21.9% to \$2.85 billion. The difference results in an operating surplus of \$611 million and net gain of \$513 million.

In 1993, Chairman Pillay and Managing Director Cheong Choong oversee a workforce of 24,711, up 3.9% over the previous year. The fleet is increased by the addition of 2 A310-222s and Boeing's 1,000th Jumbojet. In January, the carrier receives a "Twenty Years of Excellence in International Services" award from *Air Transport World* magazine.

The twice-weekly service between Singapore and Johannesburg is increased to thrice weekly during April. After **China Eastern Airlines Company, Ltd.**, **China Southern Airlines Company**, and **Yunnan Airlines of China, Ltd.** commence flights to Singapore during the month, the flag carrier of Singapore is able to launch reciprocal services into the PRC. Within weeks, a combined total of 14 weekly roundtrips will be offered to Beijing, Shanghai, Guangzhou, Xiamen, or Kunming.

B-747F flights begin to Bombay in the spring, followed by Istanbul, Moscow, San Francisco, and Shenzhen, the latter being the first freight service to that Chinese destination by a foreign carrier.

A new training center is opened in May. In June, the carrier joins in the start of a frequent flyer program, Passages, in collaboration with **Malaysia Airlines, Ltd. (MAS)** and **Cathay Pacific Airways (Pty.), Ltd.**

The arrangement with MAS will result in the establishment of a shuttle service from Singapore to Kuala Lumpur and a joint catering service that will be set up at Madras in India.

In July, the carrier takes a 10% stake, along with **Cathay Pacific Airways (Pty.), Ltd.**, **Japan Air Lines Co., Ltd. (2)**, and other carriers, in the Taeco aircraft maintenance venture at Xiamen in China and 28% shareholding in Royal International Air Catering.

Other achievements of the year include the introduction of passenger service to Hiroshima, launch of the world's first global in-flight facsimile service, and agreement to acquire 40% shareholding in a reformed **Royal Air Cambodge (RAC)**.

Passenger boardings jump 8.7% to 9,305,000 and cargo traffic rises 24.3% to 2.86 billion FTKs. Revenues move ahead by 7.8% to \$3.73 billion and although costs are up 11.6%, they total \$3.18 billion. The operating surplus shrinks to \$548 million while the net profit shrinks to \$501 million. Although both profit lines are off, the former is still sufficient to rank as world's best; net gain is third highest behind a surging **Continental Airlines** and **Trans World Airlines (TWA)**.

Airline employment is increased by 4.2% in 1994 to 25,746 and in early spring, flights begin to Cape Town. Flights to Kao-hsiung, suspended for eight years, are resumed. On April 12, flights are added to destinations in the U.S., Bangladesh, and Vietnam. On June 22, the carrier places \$10.3 billion worth of orders for 52 Boeing 747-400 and Airbus A340-200 jetliners to be delivered between 1996 and 2003. A \$56-million order is also placed for 6 Learjets.

In mid-June, the company reaches an agreement with TATA Industries to launch a domestic joint-venture airline in India sometime after Christmas. Simultaneously, a \$13-million joint venture agreement is signed between subsidiary Singapore Airport Terminal Services and Arab Asia Investments for the development of an in-flight kitchen at Karachi's new Quaid E. Asam International Airport.

Following a coup attempt in Cambodia during the first week of July, SIA withdraws from its arrangement to help restart **Royal Air Cambodge (RAC)**. In August, a commercial and code-sharing agreement is reached with **Vietnam Airlines**. In addition to the inauguration of dual-designator route between Singapore and Ho Chi Minh City, SIA agrees to take 30% shareholding in a Tan Son Nhat Airport cargo handling joint venture in which VA holds a 55% stake.

A commercial alliance is entered into with **Garuda Indonesia** in September when the Indonesia airline takes a 10% stake in SIA's Hong Kong joint venture maintenance concern Pan Asia Pacific Aviation Services. **Royal Brunei Airlines** simultaneously subscribes to 10% shareholding.

An agreement with **Delta Air Lines** is announced on November 1 whereby passengers from each air carrier may use one ticket to fly on either airline. During the year, two B-747-249Fs are sold to **El Al Israel Airlines, Ltd.**

Overall, customer bookings swell 6.6% to 9,920,000 while freight moves ahead by 14.8% to 3.29 billion FTKs. Revenues at the world's most profitable airline accelerate 9.9% to \$4.3 billion and produce profits of \$629 million (operating) and \$586 million (net).

The workforce is increased by another 4.4% in 1995 to 26,875. Two A310-222s operated by the **SilkAir (Pty.), Ltd.** subsidiary are returned, being too expensive for the subsidiary to operate.

In February, the company joins with the Tata Corporation in announcing plans for the expenditure of \$700 million for the establishment of a domestic rival to **Indian Airlines, Ltd.** SIA would hold a 40% stake in the new concern and gain easier access to the subcontinent's expanding market.

Strong demonstrations and threats against Singaporeans in the Philippines force the government of President Fidel Ramos to order security tightened around Singapore Airlines offices and the nation's embassy on March 19. The disturbances have been caused by Singapore's execution of a Filipino domestic worker on March 17 for the murder of another worker in 1991. It will be April before the tension dies down.

During May, SIA joins with **China Airlines, Ltd.** as each subscribe 24.5% and match private owners in establishing a joint venture engine-compressor repair facility at Taipei, Taiwan. An \$S150-million air freight terminal is opened during the last week of the month adjacent to Singapore's Changi Airport.

In September, joint freighter services commence with **British Airways, Ltd. (2)** between Singapore and London.

A \$12.7-billion order is placed for 77 B-777s late in the year and a code-sharing agreement is initiated with **American Airlines** for the Singapore-Chicago route.

Flight attendant Chang Yu, a native of Taiwan, fails to show up for a company service from Los Angeles to Taipei on October 23. Her strangled body is later found wrapped in bed covers and stuffed into a wardrobe shelf at a Los Angeles hotel where her SIA crew had stayed.

On November 20, flight steward Zaini Jeloni is arrested by Singapore police on November 20 on a warrant issued by a U.S. judge and confirmed by a Singapore court. Jeloni will be extradited to California for trial and will be convicted and sentenced.

Passenger boardings jump 8.5% to 10,671,000 while cargo climbs 11.4% to 3.7 billion FTKs. Finances for one of the world's most fiscally capable airlines continue to advance. Revenues ascend 8.3% to \$4.7 billion while expenses are up 7.4% to \$3.98 billion. The operating gain is \$716 million while the net profit reaches \$690 million. The profit lines are later adjusted downward to \$537 million and \$622.3 million, respectively.

Airline employment grows 3.2% in 1996 to 27,737 and the fleet now includes 77 aircraft.

In mid-January, the carrier publishes its first homepage on the World Wide Web.

SIA and Tata Consultancy Services form a joint-venture company at Madras, India, on February 2 to develop and maintain computer software.

Company Chairman Pillay, one of the longest-serving airline executives in the world, steps down on February 28 to become his nation's high commissioner to the U.K. He is succeeded by S. Dhanabalan.

The number of weekly frequencies to Beijing is increased on March 31 from 7 to 10. A third joint freighter service with **Air France** is launched on April 5.

The first two A340-313Xs, the extended-range Airbus version, are received in late April. With satellite navigation available on these aircraft, the first such navaid for the company, the new planes are christened *Celestars*.

During May, the new A340-313s enter service on company routes from Singapore to Melbourne via Bangkok and Jakarta.

A \$12.7-billion order is placed on June 19 for up to 77 B-777s.

On July 1, the company begins to code-share with **American Airlines**. The American designator is applied to Singapore flights from Singapore to Los Angeles and San Francisco; there, connecting passengers may directly board American flights with shared Singapore designations, connecting on to Chicago. The same route may be followed in reverse.

Deputy Chairman/CEO Lim Chin Beng, a 14-year veteran, retires on July 13 to be replaced by Managing Director Cheong Choong Kong on August 1. The same day, the new Silver Kris Lounge opens for first-class passengers at Changi Airport's Terminal 2.

The company's newest building, the \$40-million SATS Maintenance Center 2, is officially opened at Singapore Airport on August 19.

An agreement is signed on August 30 with **Alitalia, S.p.A.** for the joint development of a shared advanced Cargo Operations Management System.

The SATS In-flight Catering's \$172-million Centre 2 is opened at Singapore Airport on October 3. Three days later, the carrier wins the coveted "Best Airline Award" for 1995 from *Conde Nast Traveler*. All-cargo weekly outbound service to Dublin via Dubai begins on October 27; return service begins the next day via Copenhagen and Dubai. A strategic dual-designator service is started on October 29 with **Austrian Airlines, A.G.** covering frequencies between Singapore and Vienna.

SIA sells its shares in the Raffles City and RC Hotels on November 4. Joint-venture freighter service to Frankfurt via Sharjah with **Lufthansa Cargo Airlines, A.G.** is doubled during the month from twice weekly to four times a week.

A joint-venture freight terminal is opened in Vietnam and a catering facility in Macau.

While en route from Singapore to Sydney on December 6, Flight 219, an A10-324 with 16 crew and 236 passengers, hits clear-air turbulence over central Australia; three crew and nine passengers are injured, one seriously. The crew radios ahead and ambulances are waiting at the airport to take the injured to the hospital, where one man must undergo surgery on his hip.

Enplanements surge 10% to 11,838,000 and 4.11 billion FTKs are operated, a 12.3% increase. Operating income inches up 1.6% to \$4.51 billion while costs moves up 4% to \$4.05 billion. Operating profit slides to \$452.1 million, while net gain ascends slightly to \$624.1 million.

Under a new bilateral air agreement between Singapore and India, SIA, on January 5, 1997, increases the number of weekly flights from Singapore to Chennai from five to six. On January 10, the airline is named 1997 "Airline of the Year" by *Executive Travel*.

During this month, the company upgrades its India service, offering a total of 23 flights per week, of which 18 are passenger services. Included in the total are seven frequencies to Bombay, six to Chennai, three to Delhi, and two to Calcutta.

On January 23, Singapore and the United States reach an "open skies" agreement that will end curbs on passenger and cargo services between the two nations and will allow airlines of either country to fly to and beyond the other without restrictions. Singapore is the first nation to accept a U.S. bilateral pact under the "open skies" liberalized formula.

As the result of an ATC failure on January 25, a company A310-324 comes within 1,000 ft. of colliding with a **Swissair, A.G.** MD-11 over Tochigi, Japan, near Tokyo. Disaster is avoided when the TCAS system aboard the Swiss airliner sounds, allowing it to take evasive action.

The new Matsushita interactive gambling system is successfully tested during the January 30 delivery flight of a B-747-412.

On March 30, service is increased by one service per week on routes to Athens, Manchester, Guangzhou, Surabaya, Ho Chi Minh City, Delhi and Dhaka.

Thrice-weekly service is inaugurated on April 1 from Newark (EWR) to Singapore via Amsterdam.

Weekday return joint freighter services commence in April with **Air France**.

Despite an earlier positive ruling by the Indian Foreign Investment Board, an appeal by **Indian Airlines, Ltd.** and the nation's domestic airlines results in a new aviation policy from Aviation Minister C. M.

Ibrahim and the cabinet of the United Front government of Prime Minister H. D. Deve Gowda. Simply put, the new mid-April decision prohibits investments in Indian domestic carriers by foreign airlines, although groups from outside the aviation business may continue to acquire or hold up to 40% of the stakes in domestic carriers. The new policy halts SIA plans to join with the Tata Corporation in forming a rival to **Indian Airlines, Ltd.**

The airline's official fiftieth anniversary is celebrated on May 1. Six days later, the carrier's first B-777-212 IGW arrives at Changi Airport wearing a distinctive "Jubilee" gold livery and is welcomed as a part of the company's anniversary celebrations. On May 23, Singapore Airlines and **Air India, Ltd.** terminate long-running negotiations for a commercial alliance. Air India had wanted access to destinations in the Far East and Asia via a code-share or block-space pact, while Singapore, already possessing a strong presence in those regions, had sought additional capacity on its flights into India. Reaction of Singapore to the Tata decision may also have played some role in ending the talks.

On June 21, Singapore, **Ansett Australia (Pty.), Ltd.**, and **Air New Zealand, Ltd.** jointly sign a memorandum of understanding for the creation of the largest airline alliance in Southeast Asia. The compact contains what has become the normal large-scale partnership compact ingredients of shared networks, codes, marketing, scheduling, reservations, planning, purchasing, cargo, frequent flyer programs, information technologies, and ground and passenger services. Arrangements for certain kinds of financing, fleet rationalization, and relationships with other partners remain to be sorted out.

A joint-venture company is formed with Pratt & Whitney on July 1. The new engine overhaul and repair concern, in which Pratt holds 51%, will begin operations at Singapore later in the year. On July 15, two A310-222s are sold to the Belgian defense ministry for BFr 1.28 billion. The first Airbus will be turned over in September and the second in April 1998.

Manila experiences a runway blackout on July 18 that results in delayed departures, arrivals, and diversions for several hours; an SIA flight from Singapore is diverted to Kao-hsiung, Taiwan.

Thrice-weekly A340-313X roundtrips commence on August 3 between Singapore and Jeddah.

Thrice-weekly roundtrips between Bangkok and Seoul commence on September 3. On September 28, the company introduces ticketless travel on services between Singapore and Kuala Lumpur and between Singapore and Penang.

At the beginning of October, service between Singapore and Christchurch ends as alliance partner **Air New Zealand, Ltd.** takes over flights between the two cities.

In an October 26 Singapore ceremony, Minister of Communications Mah Bow Tan and visiting Brazilian Minister of External Relations Luiz Felipe Lampreia sign an air services agreement. Under its terms, Singapore and **VASP (Viacao Aerea Sao Paulo, S.A.)** are designated to provide thrice-weekly services between the two countries.

The same day, frequencies between Singapore and Beijing are increased from 12 to 14 every week.

On November 28, SIA withdraws from the Global Excellence Alliance with **Swissair, A.G.** and **Delta Air Lines** and signs a memorandum of understanding for a strategic alliance with **Deutsche Lufthansa, A.G.** Under its terms, SIA will hub its European business at Frankfurt while DLH will make Singapore its principal Southeast Asian center for activities from Japan to India.

In addition, the two majors will coordinate frequent flyer programs, offer dual-designator flights, jointly develop marketing, scheduling, customer service activities, and information technology, and share ground handling. There is also discussion of the possibility that SIA will join the "Star Alliance," either with or instead of **Thai Airways International, Ltd. (THAI)**.

Beginning on December 15, SIA offers its Priority Club passengers free airport immigration smart cards.

Passenger boardings move up 2.5% to 12,149,000 while freight jumps 15.7% to 4.76 billion FTKs. With operating revenues of \$4.31 million

and expenses of \$3.84 billion, the company is able to post an operating profit of \$467 million and a net gain of \$569.2 million.

At the beginning of 1998, SIA is the 6th largest airline in the world in terms of freight carried, 8th in net profit, 10th in operating profit, and 18th in operating income.

Airline employment stands at 13,506 and the fleet, all of which is Stage III certified, includes 83 airplanes: 48 B-747s, 4 B-777-212 IGWs, 17 A310-324s, 1 A310-222, and 11 A340-313s.

In January, the company joins with **Air New Zealand, Ltd.** and **Ansett Australia (Pty.), Ltd.** in petitioning the Australian Competition and Consumer Commission for approval of their previously announced strategic alliance. On January 21, the Airspeed Consul that has graced the entrance to the SIA Training Centre for the past five years is moved to the Singapore Science Centre.

The Asian economic crisis begins to have an impact. Frequencies to Kuala Lumpur, Surabaya, and Jakarta are significantly reduced and smaller aircraft are substituted on flights to Hong Kong, Seoul, and Bangkok. Larger aircraft are shifted to routes to Australia, Europe, and the U.S.

On February 20, subsidiary Singapore Airport Terminal Services (Pty.), Ltd. takes a \$10-million, 20% stake in a new joint venture flight kitchen at Manila. Nine days later, ground is broken on a new \$300-million air freight terminal at Changi International Airport.

Weekly flights from Singapore and Frankfurt are increased from 7 to 10 on March 29. Three new frequencies are inaugurated to London, increasing weekly flights from 14 to 17, and the number of weekly flights to Manchester is increased from four to five.

The number of services into the New York area is increased the same day. Previously, SIA had operated daily service into New York (JFK), three times a week via Amsterdam and four via Frankfurt. Now, all seven services are routed via Frankfurt. The Dutch stop is not completely eliminated and three new flights are simultaneously introduced to Newark International Airport via Amsterdam.

Services to Melbourne are boosted from 7 to 10 per week, while B-777-212 IGW flights to Brisbane are increased from 4 per week to 6. Larger aircraft are to occasionally be employed on the company's 14 weekly roundtrips between both Sydney and Perth.

When Chairman S. Dhanabalan leaves in April to become chairman of the Development Bank of Singapore, he is succeeded by board member Michael Fam. The second A310-222, acquired for military purposes the previous July, departs for Belgium during the month.

A block-space, code-sharing agreement is signed with **Asiana Airlines, Ltd.** on April 10; under its terms, the Korean carrier, starting four days later, places its two-letter "OZ" code on SIA A310-324 thrice-weekly roundtrips between Singapore and Seoul. The new flights replace Asiana's existing B-767-38EER roundtrips between the two capitals.

On May 15, a letter of intent is signed for five A340-600s with options for five more. The aircraft will be employed to operate the world's longest nonstop commercial flight, a 17-hr. journey from Singapore to Los Angeles and San Francisco.

At the same time, CEO Kong appears as a virility doctor in the Singapore-produced, English-language movie comedy *Tiger's Whip*.

In addition to the daily B-747-412 service from Singapore to Auckland operated as a code share with **Air New Zealand, Ltd.**, SIA, on June 1, extends the two-airline, dual-designator agreement to cover its thrice-weekly flights to London and Manchester. Customers arriving in Singapore from Auckland on code-shared flights are able to seamlessly travel onwards to the U.K. and to return the same way.

The Australian Competition and Consumer Commission gives its draft approval for the airline's alliance with **Air New Zealand, Ltd.** and **Ansett Australia (Pty.), Ltd.** on June 8. Simultaneously, electronic ticketing is introduced on the Hong Kong route.

On June 15, Malaysian computer salesman Tan Fook Sum becomes enraged when he is asked to move from business class back to the economy-class seat he had originally booked aboard a B-747-412 carrying 258 passengers en route from Singapore to Madrid. Yelling loudly, Tan

next sets fire to rolls of toilet paper that leads to his arrest, while flight attendants put out the fires. Returned to Singapore from Spain, Tan is fined S\$2,000 and allowed to return to Malaysia to await trial in a Singapore court during the spring.

Plans for a new frequent flyer program, to be unveiled in February, are announced on June 29.

As the Asian economic downturn continues, the carrier, on July 1, begins to divert more of its capacity away from Asian routes. It announces that 10 additional weekly flights will be laid on to Australia and New Zealand, along with two weekly services to Hong Kong.

This day, flights to Brisbane are boosted from four to six per week, all using B-777-212 IGW equipment. In addition, weekly services are increased to Mauritius (up from one to two), Istanbul (from two to three), and Dubai (from five to six). The delinking of Karachi from Dubai means Dubai is served by six nonstop flights each week.

Also on July 1, the carrier inaugurates a strategic alliance with **Deutsche Lufthansa, A.G.** Code-sharing is introduced on weekly services of the two airlines from Singapore and Frankfurt and from Frankfurt to New York (JFK). Each airline increases its frequency on the route from 7 to 10 per week.

On July 2, it is announced that soccer enthusiasts will be able to watch the 1998 World Cup aboard all long-haul aircraft fitted with the new KrisWorld personal entertainment system. New World Gourmet Cuisine is introduced on July 16.

East Asia's recession forces the company to come to an agreement with airplane and engine manufacturers on July 22 for the deferral of equipment. Although the company will receive 12 airplanes this year, the delivery of a total of 4 B-777-212 IGWs with Rolls-Royce engines and 1 A340-313X with GE power plants, will be put back from 2000 to 2001. One B-747-412, 8 B-777-212 IGWs, and 2 A340-313Xs will be deferred until 2000-2002.

On July 31, the Australian Competition and Consumer Commission grants regulatory approval of the tripartite alliance between Ansett, ANZ, and SIA.

During the summer, two B-747-412s are painted with special liveries labeled "Tropical Megatops" to denote upgraded in-flight services.

A memorandum of understanding is signed with **China Airlines, Ltd.** (CAL) on August 1 to form a strategic alliance. SIA will acquire up to 10% equity in the Taipei-based flag carrier within six months, with the possibility of increasing its stake at a later time. At mid-month, it is announced that the equity stake will actually be closer to 30% and that the next CAL president will undoubtedly be appointed from SIA.

Services between Singapore and Hong Kong are increased from 33 to 35 weekly flights on August 6. The same day it is announced that managers of the SDIA Group have volunteered to give up their annual service increments for 1998 as a contribution toward containment of costs during this time of Asian economic downturn.

Former SIA A340-313X Chief Pilot Capt. Pow Tuk Kwan is seconded to CAL on September 1 to serve as the ROC airline's vice president-flight operations and training; Capt. Gui Wee Kee, meanwhile, becomes special assistant to the CAL president for flight safety. The same day, using "Jubilee" 777s, the company increases its frequencies to Melbourne from 10 to 12 each week.

With load factors on the high-yield, front-end services not hit as hard by the "Asian economic flu" as those in coach class, the company, on September 11, introduces new first-class cabin services. It also begins to serve free champagne in its tourist class. The same day, SIA is named the "Best Foreign Airline" by *Travel & Leisure Magazine*.

A "Tropical Megatop" B-747-412 departs Singapore on September 13 for an around-the-world publicity flight; stops are made at a number of cities including Frankfurt, London, New York, and Osaka.

Following two years of research and planning and costing in excess of S\$500 million (\$300 million), the carrier's biggest-ever product launch occurs on September 16. These brand-new product and service features are introduced in all three classes aboard B-747-412s, B-777-212 IGWs, and A340-313Xs. In addition to changes to the First, Raffles,

and Economy Class products, SIA also introduces new in-flight cuisine and other service features, including a luxurious First Class check-in reception at Singapore's Changi Airport.

In what will prove an unpopular move exposed by the *Straits Times* newspaper on September 24, SIA has quickly moved to take advantage from the closure of **Philippine Airlines (PAL)** the previous day. One-way ticket prices from Singapore to Manila are boosted from S\$380-S\$430 to S\$810 (\$476). A special roundtrip S\$430 fare for Philippine maids is replaced by a return ticket price of S\$1,206. This occurs while SIA is expressing interest to the Philippine government in acquiring any available shareholding in newly defunct PAL.

The Financial Times of Singapore reports in its September 25 edition that SIA and **SAS (Scandinavian Airlines System)** will sign a code-sharing agreement. It is suggested that the arrangement would ease SIA's entry into the "Star Alliance."

Flights to Sendai, Japan, end on the last day of September. Following delivery of the seventh B-747-400F, also at the end of the month, the aircraft is employed to offer one more weekly service to Los Angeles, Chicago, New York, and Frankfurt.

A code-sharing agreement is signed with **Air India, Ltd.** in late September covering flights to Los Angeles from India beginning on October 1.

A memorandum of understanding is signed with **SAS (Scandinavian Airlines System)** on October 10 for the creation of a strategic alliance. Although arrangements will not be completed before the end of the year, it is anticipated that the pact will cover code-share services, frequent flyer programs, network and schedule development, through check-in, reciprocal use of airport lounges, joint promotions and marketing. When the agreement takes effect on April 1, SIA will place its code on SAS's Copenhagen-Bangkok-Singapore flights four times a week while SAS will code-share on SIA's three weekly direct flights from Singapore to Copenhagen.

The carrier's joint venture with Rolls-Royce is opened at Singapore on October 13. The International Engine Component Overhaul facility will refurbish RB211 and Trent engine parts from around the Asia-Pacific rim.

A second B-747-412 equipped with IEL's Sky Games gaming software is launched on October 14.

Domestic New Zealand code-share services with **Air New Zealand, Ltd.** also commence on October 25 on flights from Christchurch and Auckland to Dunedin, New Plymouth, Queenstown, Rotorua, and Wellington. Customers from both of the major carriers are able to move seamlessly back and forth between seven New Zealand destinations and Singapore.

The code-sharing arrangement with **Deutsche Lufthansa, A.G.** is expanded, also on October 25, allowing the launch of dual designator flights from Frankfurt to Singapore, via Sydney.

When the winter schedule begins on October 28, the carrier adds two new B-777-212 IGW weekly services to Melbourne and one to Brisbane. B-777-212 IGWs replace A340-313Xs on 4 of the 14 weekly roundtrips between Singapore and Perth. The flights coincide with the airline's renewed expansion in the Asian region.

Simultaneously, the number of roundtrips to Kathmandu, Nepal, is increased from two to three per week. Also on October 28, three new B-777-212 IGW roundtrips are introduced to Christchurch and complement the seven code-sharing services operated from that point to Singapore by **Air New Zealand, Ltd.**

In response to the continuing Asian economic downturn, service to Hangzhou, China, ends in early November.

During the remainder of the fourth quarter, the company continues to upgrade services, including the addition of more and better in-flight entertainment systems, menus, and first-class sleeper seats.

In addition to its investment in **China Airlines, Ltd. (CAL)**, discussions on the possible acquisition of equity stakes are held with **Thai Airways International, Ltd. (THAI)** and **South African Airways (Pty.), Ltd.** The carrier is considerably more coy concerning possible talks with **Philippine Airlines (PAL)**, refusing, when asked on December 3, to confirm or deny their occurrence.

The British Broadcasting Corporation reports on December 5 that it has heard from Jakarta that customs officials have foiled an attempt to smuggle more than 1,200 live, poisonous cobras. Labeled as freshwater turtles for export and packed in plastic sacks, they are placed aboard a company airliner for shipment to China, where snakes are prized as a delicacy. The illegal shipment is valued at \$65,000.

Filipino newspapers on December 6 suggest that PAL is negotiating with SIA, but both airlines downplay reports. Agence France-Presse reports that a team from SIA will arrive in Manila during the week for talks.

In response to a U.S. FAA recommendation concerning the fuel tanks aboard long-range B-747s, SIA, on December 8, indicates that it will not be re-routing its flights or reducing payloads as a result, although it will continue to study implications.

On December 9, SIA indicates that it has "no interest" in investing in PAL. Although it had earlier expressed an interest, it now puts out a statement in order to end speculation over its making a possible bid.

During the period of U.S. and British bombing attacks on Iraq between December 16–19, SIA re-routes its flights to Europe over Russian airspace, while those from Europe are shifted to operate south of the Red Sea. The changes are made to provide the services with a wider range of safety.

The attempt to buy into **Thai Airways International, Ltd. (THAI)** hits a snag in mid-month. THAI has delayed a necessary public offering, while political opposition in Bangkok has increased amidst fears that SIA might reduce that city's hub by increasing emphasis on Singapore.

The first of five B-777-312s is delivered on December 17.

A memorandum of understanding is signed with **Air Canada, Ltd.** on December 22 for the creation of a strategic alliance. Although arrangements will not be completed until March, it is anticipated that the pact will cover code-share services, frequent flyer programs, network and schedule development, through check-in, reciprocal use of airport lounges, joint promotions and marketing.

Negotiations with **China Airlines, Ltd. (CAL)**, which have continued since August, become difficult in December. CAL and Taiwanese government officials balk at the prices suggested as well as the percentage to be sold and management control to be exercised. Officials in Taipei demand that the foreign stake be capped at 10%.

Passenger boardings improve by 1.5% to 12.32 million, while cargo traffic inches up 1.4% to 4.82 billion FTKs. Revenues decrease by 5.2% to \$4.09 billion as costs continue to be affected by the Asian economic situation. The operating profit drops 32.1% to \$317 million, although a net \$471-million profit is reported.

When political interference in the talks becomes too intolerable, they collapse on January 9, 1999. Although the SIA captains assigned to assist CAL with safety and training will be allowed to remain, the memorandum of understanding is torn up and there will now be no equity stake in CAL purchased by SIA.

Having elected not to take a stake in **China Airlines, Ltd. (CAL)**, Singapore Airlines now turns its attention to courting **Ansett Australia (Pty.), Ltd.**

The company announces on January 20 that it will halt its flights to and from Berlin by April 1.

In order to improve tourist perceptions concerning the air quality of the tourist area, the airline, on February 9, donates \$125,000 worth of air quality monitoring equipment to Bali.

On February 12, a \$2.2-billion order is placed for five A340-600s, with delivery slated for the end of 2002.

During the month, discussions are begun with **Pakistan International Airlines Corporation** concerning the possible lease to PIA of two B-747-312s.

Thai Transport and Communications Minister Suthep Thaugsuban announces on February 18 that his government may not be able to allow Singapore Airlines to hold a stake in **Thai Airways International, Ltd. (THAI)** because state enterprise laws do not permit it to accept strategic partners that are also business competitors.

By the end of the month, four new B-777-312s are in service.

On March 1, service is withdrawn between Singapore and Darwin, Australia; plans are, however, in place to add additional flights to Adelaide, Melbourne, and Perth later in the year.

Also on March 1, the carrier announces that it will expand its code-sharing pact with **Japan Air Lines Company, Ltd. (2)** in April on freighter flights from Singapore to Tokyo from weekly frequencies to thrice weekly.

Malaysian "air rage" perpetrator Tan Fook Sum, heavily fined earlier for a June incident, is sentenced to a year in prison in absentia on March 4 by Singapore Chief Justice Yong Pung How. Tan, who had refused to return to Singapore to face the courts having already paid a large fine, is sent word that he could be arrested if he ever returns to the country or steps foot aboard an SIA flight.

It is reported the next day that SIA has agreed to provide \$1 million to underwrite tour operators and journalists promoting Indonesian tourism at the March 6–10 International Tourism Fair in Germany.

The most popular airline and the one voted best value for money in a new poll is SIA. The survey, released by the U.K. Consumers' Association's *Holiday Which?* magazine on March 9, is based on responses from 20,000 airline travelers who were asked which airline they would recommend to a friend.

The two B-747-312s not sold to **Pakistan International Airlines Corporation** are, instead, sold to South Africa's newest airline, African Star Airways, on March 14. Under the arrangement, Singapore Airlines will completely reequip the two Jumbojets. South African Star, meanwhile, has yet to receive operating authority.

Deputy Chairman/CEO Cheong Choong Kong signs a joint venture agreement on March 15 between the carrier's SIA Engineering Co. division and Rolls-Royce, PLC and Hong Kong Aero Engine Services, Ltd. to form the joint venture company Singapore Aero Engine Services, Ltd.

The same day, the government of Thailand informs the airline that it will definitely not be allowed to file an equity bid for shareholding in **Thai Airways International, Ltd. (THAI)**. If, however, SIA should join the "Star Alliance," then it might be able to make a joint offer with **Deutsche Lufthansa, A.G.**

Accompanied by **Ansett Australia (Pty.), Ltd.** Chairman Rod Eddington and Deputy Chairman/CEO Cheong Choong Kong of Singapore Airlines, Ltd., News Corp. Senior Executive Vice President Lachlan Murdoch, on behalf of owner Rupert Murdoch, meets with Australian Prime Minister John Howard and Treasurer Peter Costello in Canberra on March 22. SIA had unsuccessfully attempted to gain shareholding in **Qantas Airways (Pty.), Ltd.** in 1992 and has remained desirous of gaining a larger foothold in the big Australian domestic market. The conference follows on the heels of a visit to Canberra earlier in the month by Singapore Prime Minister Goh Chok Tong.

As reported in *The Age* the next day, the men lobby the government leaders for permission to have Singapore Airlines buy a stake in Ansett, which is now jointly owned by News Corp. and **Air New Zealand, Ltd.** Although unstated, it is believed to be the same 25% that **British Airways, Ltd. (2)** holds in **Qantas Airways (Pty.), Ltd.** Doreen Siow of Reuters, Ltd. simultaneously reports that the arrangement will see News Corp. turn over its 50% stake in Ansett for more than A\$500 million. As Prime Minister Howard tells the Australian Broadcasting Corporation, Ansett Australia already is half foreign-owned and any sale to SIA would be a simple foreign transaction that should be worked out by the companies involved under Australian law. Approval is expected from the Foreign Investment Review Board, which will next review the offer.

Having proven unprofitable, the twice-weekly roundtrip service between Singapore and Berlin's Schoenefeld Airport via Zurich is discontinued, also on March 24. Berlin customers are advised of the daily **SIA-Deutsche Lufthansa, A.G.** dual-designator service from Tegel Airport to Singapore via Frankfurt.

At a joint news conference on March 25, News Corp. Chairman Murdoch, Chairman Eddington, and Deputy Chairman/CEO Kong formally announce the understanding under which News Corp. is selling its 50%

stake in Ansett to SIA for A\$500 million. Several hurdles remain to be jumped before the deal is officially completed, including regulatory approvals, due diligence, **Air New Zealand, Ltd.**'s preemptive right to buy News' stake in place of SIA, and the conclusion of a sale and purchase contract. If these conditions are satisfied, the transaction will be finalized in the months after July 1 and Eddington will remain in his post for at least two years.

At a news conference on March 27, Sir Selwyn Cushing, chairman of **Air New Zealand, Ltd.** and of its major shareholder, Brierley Investments, indicates that his airline may exercise its preemptive right to match the SIA offer. To that end, a task force is put together to investigate the possibility of full ownership of Ansett.

The carrier combines with **Deutsche Lufthansa, A.G.**, beginning on April 1, in a joint program for the shipment of their express products.

On April 12, the carrier announces that it will officially join the "Star Alliance" in the fall.

Dow Jones reports, also on April 12, that **Air New Zealand, Ltd.** is still waiting for official notification by News Corp. of its intention to sell its 50% stake in **Ansett Australia (Pty.), Ltd.** before initiating its preemptive right to acquire the stake. ANZ, which has already begun due diligence on the possibility and held preliminary discussions with Singapore Airlines, Ltd., has 30 days from official notification to activate its claim.

The partnership with **SAS (Scandinavian Airlines System)** is inaugurated on May 1 through the linkage of the frequent flyer programs of the two carriers. Also during the day, thrice-weekly A340-313X nonstop roundtrips are launched between Singapore and Lahore, Pakistan.

Plans to announce the carrier's membership in the "Star Alliance" at a meeting of the group's CEOs in Sydney on May 3 are set back as the result of developments in the Ansett stake acquisition. The formal statement is pushed back to October.

Having receiving notice concerning News Corp., Ltd.'s intentions, the **Air New Zealand, Ltd.** team, under Managing Director Jim McCrea, assesses its options regarding the sale. On May 4, the *Sydney Morning Herald* reports that Air New Zealand has given its approval of SIA's purchase of the 50% stake in **Ansett Australia (Pty.), Ltd.** The two offshore airlines will jointly operate Australia's No. 2 carrier.

A strategic alliance is signed with **United Airlines** on May 5 covering linked frequent flyer programs and one-stop check-in services. The former is slated to begin on July 1 and the latter during the third quarter.

Brierley Investments, Ltd. announces on May 25 that it has spent approximately NZ\$106 million (\$57 million) to purchase **Air New Zealand, Ltd.** shares on-market. Its stake in the flag carrier is raised from 42% to 47.11%, thus increasing its influence in the wider Australasian airline scene now being played with **Ansett Australia** and Singapore Airlines. Some analysts suggest that the next step may be for ANZ to exercise its preemptive right to acquire the News Corp. share in Ansett and when fully in control of the Australian line to invite Singapore to buy into a merged entity. Others speculate that Brierley is seeking a way to prop up an unprofitable asset in order to eventually sell it. Neither Ansett or Singapore offer comment.

After a safety audit uncovers major continuing deficiencies and Capt. Pow Tuk Kwan and Gui Wee Kee report that significant differences exist between their ideas on training and those of **China Airlines (CAL)** instructors, the two-year pilot training contract with the Taiwanese line is cancelled during the last week of May, 16 months ahead of its scheduled conclusion.

News Corp., Ltd., on June 9, recesses its talks with both **Air New Zealand, Ltd.** and SIA, but indicates that, once the two have come to terms concerning their equity investment in Ansett, discussions may continue. A day later, SIA pulls out of the negotiations altogether, indicating that it will now look at investing in the flag carriers of Thailand or South Africa.

Related to the 1995 order, SIA, on June 18, exercises 10 options to purchase B-777-212 IGWs, for delivery between 2001 and 2004, in a deal valued at \$1.9 billion. SIA, together with **Lufthansa, A.G.**, with-

draw their application on June 25 and halt their bid for an equity stake in **South African Airways (Pty.), Ltd.**

Singapore's KrisFlyer members are, as of July 1, able to redeem miles for travel over the network of **United Airlines** while UA's Mileage Plus members are also able to earn loyalty points when flying with SIA.

Also on July 1, A340-313X roundtrips are increased from two to seven between Singapore and Beijing. Simultaneously, **Ansett Australia (Pty.), Ltd.** begins to code-share on all SIA services from Australia to Singapore, plus seven weekly roundtrips to London and four-times-a-day return flights to Bangkok.

Also during the month, Australia and New Zealand Banking Group Chairman Charles Goode becomes the first non-Singaporean elected to the airline's board of directors.

Australian mechanic Fracek Piotr is taken before a magistrate at Singapore on August 14 and charged with in-flight inebriation and threatening a flight attendant on a flight from Melbourne earlier in the week. His is the second SIA air rage case in August; earlier in the month, Texan Sanil Shetty Kumar was sentenced to jail for assault aboard a company aircraft.

On July 1, **Ansett Australia (Pty.), Ltd.** begins to code-share on all SIA services from Australia to Singapore, plus seven weekly roundtrips to London and four-times-a-day flights to Bangkok. The last of 15 A340-313Xs delivered since April 1996 is accepted on July 8.

By mutual consent, the carrier, on September 22, agrees with **Swissair, A.G.** to end their pact to own a percentage of each other's share for a minimum 10-year period; the accord was otherwise slated to end in August 2001. The sixth and last B-777-212ER to be delivered this year is accepted at Seattle on September 24; it is also the 18th of its type turned over to the airline since 1997.

On October 2, weekly Sunday B-747-400F all-cargo service is inaugurated to Prestwick Airport, outside Glasgow, Scotland, via Bahrain. Cargo frequencies are added to Amsterdam and Los Angeles, while the Bangalore service is upgraded from B-727F to B-747-412F.

Talks with **Air New Zealand, Ltd.** concerning acquisition of an ANZ stake collapse late in the year after Dr. Cheong Choong Kong's negotiators demand the right to name the New Zealand line's chairman and managing director and to assert major influence over operational activities.

Passenger boardings jump 9.9% to 13,545,000, while freight is up 13.5% to 5,481,708,000 FTKs. Operating revenues surge 15.9% to \$4,773,680,000, while costs rise 13.2% to \$4,297,954,000. The operating profit rises to \$475.72 million, while net gain reaches \$737.45 million.

Airline employment at the beginning of 2000 stands at 13,690, a 1.4% increase over the previous 12 months. Among the world's top 25 airlines, SIA is 5th in FTKs, 12th in employees, 17th in operating revenue, 9th in operating profit, and 4th in net profit. Its B-747 fleet now includes 5 Dash-312s, 36 Dash-412s, and 9 Dash-412Fs.

The last of three B-747-312s to be chartered to **Corsair, S.A.** arrives at the French company's base in January.

Announced a month earlier, arrangements are completed on February 11 with **Virgin Atlantic Airways, Ltd.** under which SIA will take an S\$600.3-million (£600-million), 49% minority stake in Virgin Atlantic, the holding company for Virgin Atlantic Airways, Virgin Holidays, Virgin Sun, and Virgin Aviation Services, the airline's cargo division. Simultaneously, Virgin Atlantic will be recapitalized to the tune of S\$100 million, with S\$51 million of the amount coming from the Virgin Group. Three of Virgin's seven-member board will be appointed from SIA. Both airlines will retain their distinctive identities and continue to develop their own products. Relevant government and other approvals must be obtained.

SIA is named recipient of the 1999 "Passenger Service" award by *Air Transport World* magazine in February. The U.K. government approves the SIA investment in **Virgin Atlantic Airways, Ltd.** at the beginning of March; as soon as the EU Commission agrees to the arrangement, three SIA members will, according to plan, be named to the Virgin board.

Also in March, Dr. Cheong takes the unusual step of directly approaching New Zealand Prime Minister Helen Clark. In a brief Wellington meeting, the SIA chief asks the prime minister to ease offshore restrictions and allow him to acquire a 40% stake. Clark agrees to consider the idea.

On March 24 the European Commission formally approves the SIA purchase of a 49% stake in **Virgin Atlantic Airways, Ltd.** The number of weekly roundtrips from Singapore to Cairns, Australia, is increased from three to four on March 27. Paperwork for the final buy into Virgin is completed on March 30. Also during the first quarter, negotiations resume between Brierley Investments and SIA over the possible acquisition by the latter of significant shareholding in **Air New Zealand, Ltd.**

At the end of the first quarter, a company employee is arrested and charged with embezzling S\$35 million (\$21 million) from 1987 into early 2000.

On April 1, **Qantas Airways (Pty.), Ltd.** offers to acquire an A\$1-billion stake; the tender is rejected on April 10. Instead, SIA takes a NZ\$141.3-million (\$70-million), 8.3% stake later in April and wins New Zealand government approval to purchase 16.7% more (bringing it to the legal 25% limit) for NZ\$285 million (\$130 million). Brierley Investments/ANZ Chairman Sir Selwyn Cushing insists, however, that this minority sell-off will not be finalized until Air New Zealand completes its fiscal takeover of **Ansett Australia (Pty.), Ltd.**

On April 3, SIA and Virgin CEOs Cheong and Branson publicly announce their new relationship. At a meeting of the group's CEOs at Singapore on April 7, Singapore Airlines officially becomes the 13th member of the "Star Alliance."

It is announced on April 27 that the carrier is joining with **SAS (Scandinavian Airlines System)** and **Lufthansa Cargo Airlines, A.G.** to create an air freight joint venture to be known as New Global Cargo. The new entity will integrate the cargo networks of the three founders; based at Frankfurt, it will eventually have 60 long-range freighters and operate to 500 destinations in 35 nations

By May, SIA has finalized its 25% investment, agreeing to give Brierley Investments NZ\$426.3 million for a 25% stake in **Air New Zealand, Ltd.** It also secures a regional alliance with ANZ, three seats on the New Zealand line's board of directors, and veto rights over certain management appointments. At the same time, Dr. Cheong promises to abandon previously mentioned possibilities of linkage with the new **Virgin Blue, Ltd.** Although he recognizes that the New Zealand government is not ready to approve, Cheong repeats his interest in acquiring more than a 25% stake in the Kiwi flag carrier.

On June 1, a B-747-412 is sold to the Stanley Limited Partnership and is then leased back for 43 months. This is the 12th Dash-412 Jumbojet that the carrier has sold and then chartered back.

SIA is able to complete its 25% investment in **Air New Zealand, Ltd.** on August 9 and gains three seats on the ANZ board, one of which is filled by Dr. Cheong.

Singapore Airlines confirms on August 11 that it is planning to replace its fleet of 15 A310-324s and that it has invited both Boeing and Airbus to tender proposals. The former is first, arriving the same day with a B-767-400ER demonstrator. In early September, the airline's leaders indicate that they are not satisfied with the bids received from either manufacturer and so will postpone the retirement of its A310s until 2004.

On September 29, an order is placed for 10 Airbus A3XXs, with an option for 15 more; deliveries will begin in 2006 and continue through 2011. The selection of the giant plane is seen by some aviation writers to echo the decision made by **Pan American World Airways (1)** when it first opted to commit to the giant Boeing 747.

A firm order for nine B-747-400Fs, with nine options, is placed with Boeing on October 16; the first aircraft are expected in the fall of 2002.

The cargo divisions of SIA and **Japan Air Lines Company, Ltd. (2)** begin weekly joint B-747-400F return flights on October 19 between Singapore and Osaka (KIX). All-cargo weekly return frequencies from Singapore to Copenhagen are increased from two to three on October 22. Another strategic pact also takes effect on October 29, this one with **Air Canada, Ltd.** Under its terms, AC places its code on the Asian line's daily return service from Singapore to London (LHR) and on its thrice-weekly roundtrips from Singapore to Copenhagen.

While taking off from Taipei in the horrific weather caused by an approaching October 31 typhoon for the continuation of a Los Angeles

service begun in Singapore, Flight 006, a B-747-412 with 20 crew and 159 passengers, hits something and skids off the runway, damaging a parked **China Airlines, Ltd.** A300B4. A total of 83 passengers are killed. The aircraft had been one of two painted in a special *Tropical First Class Raffles* color scheme. Within days, the story will develop further.

The JumboJet had been cleared for takeoff from runway 05L, but began its take-off run on 05R, closed for maintenance, actually lifting off for a short time before slamming back down. The night is dark with poor visibility and the out-of-use runway, still available for use as a taxiway, is not marked with crosses at any point. A dispute will range into the new year as to whether the runway was lit as a taxiway (green centerline lights) or as a runway (white edge lights). Despite the exact cause, within days, the airline unconditionally accepts full responsibility for the disaster.

Permission sought from the U.K. government for the initiation of direct service from London to New York is denied on November 10. During the month, e-mail trials are carried out aboard two company aircraft. On December 12, a spokesman reveals that, until a new B-747-412 can be obtained in March, six weekly return flights on Asian and Australian routes will be curtailed. The airline will, however, continue to operate over 600 weekly return services with the remainder of its fleet.

Capt. Foong Chee Kong, the Malaysian pilot of the crashed SIA airliner, together with first officers Ng Kheng Leng and Latif Cyrano, are granted permission to leave Taiwan on December 13. The authorities have acted after representatives of Singapore's Trade Office give guarantees that the men will return, as required, to assist in the continuing investigation of the tragedy. They arrive at Taipei on December 21. By this time, the second B-747-412 with the *Tropical First Class Raffles* color scheme has been repainted in deference to the victims of the Taipei tragedy.

It is announced on December 22 that, effective February 4, weekly return frequencies between Singapore and Adelaide will be reduced from four to three.

Customer bookings during these 12 months accelerate 9.8% to 14.87 million while cargo traffic jumps an equal 9.8% to 6.02 billion FTKs.

SINGLETON AIR SERVICES (PTY.), LTD.: Australia (1978–1988). Formed at Singleton, New South Wales, in 1978, Singleton undertakes both charter and scheduled services in the eastern part of the state. Employing a fleet of 3 Piper PA-31-350 Navajo Chieftains and 1 Cessna 402, Managing Director Paul Rees's small regional links its base with both Cessnock and Sydney.

In 1988 as expenses rise, one of the Chieftains and the 402 are replaced by a Cessna 414, but this shift cannot attract new traffic or sufficiently lower expenses to avoid bankruptcy.

SITRA CARGO SYSTEM, S.A.: Peru (1992–1993). SCS is established at Lima in 1992 to offer international ad hoc all-cargo services. Operations commence with a single Douglas DC-8-54F, but continue for less than a year.

SIVEWRIGHT AIRWAYS, LTD.: United Kingdom (1946–1951). The Bacon brothers, owners of the Sivewright Bacon and Company shipping agency, register an air transport subsidiary, Sivewright Airways, as an airline charter company on July 23, 1946. Based at Manchester, the company purchases a new Avro 19 on August 13, christening it the *Salfordia*. For the remainder of the summer, the aircraft flies passengers on an nonscheduled basis between Manchester, the Isle of Man, and Jersey. At the end of the season, the aircraft is leased by a wealthy summer for winter work in South Africa.

Channel Island charters resume in January 1947 and in March, a second Avro 19, named *Mancunia*, is added to the fleet. As the popularity of company services improve, a Miles M.57 Aerovan 4 is purchased in July and christened *Oldhamia*. It is followed on August 30 by acquisition of a Douglas DC-3 named *Ecclesia* from **Scottish Aviation, Ltd.** Within weeks, it is sent to India to participate for two months in Operation India, the transfer of Hindu refugees from newly formed Pakistan

into India. A Miles M.65 Gemini is obtained in October and is called *Palatinia*. On December 29, another DC-3 is purchased from **Scottish Aviation, Ltd.** and christened, but is not delivered.

The Avro 19 *Mancunia* is destroyed in a January 7, 1948 forced landing near Knutsford. It is replaced by a new machine, also named *Mancunia*, in March, along with two de Havilland DH 89A Dragon Rapides. Spring charters out of Manchester commence in March. The DC-3 *Bartonia* is received on April 27.

Between October 19 and November 15, the *Ecclesia* participates in the Berlin Airlift, flying three-ton loads into the former German capital from Hamburg. The Douglas will complete 32 sorties and 87 hours flying time on the lift, carrying in over 116 tons of supplies. A variety of long-range DC-3 flights are made during the year with destinations including Australia, Saudi Arabia, and East Africa.

The long-range charters continue in 1949, beginning with DC-3 flights to Egypt and Germany. Summer work from Manchester to Jersey and the Isle of Man resume in April. Another Dragon Rapide is added in June and on July 4 another DC-3 is purchased, from **British Overseas Airways Corporation (BOAC)** and named *Lancastria*. A wide number of long-range charters are also flown to such destinations as Nairobi, Amsterdam, Stockholm, Accra, Paris, Copenhagen, and Edinburgh.

Isle of Man and Jersey services are again flown in 1950, together with long-range charters similar to those mounted in 1949. Following the summer season, both the *Oldhamia* and *Palatinia* are sold in October. **British European Airways Corporation (BEA)** now serves notice that it will fly the Channel Island routes on a scheduled basis in future years; however, both BEA and BOAC employ company DC-3s to fly certain of its freight contracts.

Having lost its main source of aerial income, Sivewright Airways ceases flying in March 1951; selling off its DC-3s, it reverts to a ground transport organization.

SIX RIVERS AIR SERVICE. See CENTURY AIRLINES (1)

SIZER AIRWAYS: United States (1970–1973). Orin Sizer sets up this regional carrier at Rochester, Minnesota, in early 1970 to offer scheduled passenger and cargo services linking its base with Minneapolis, Roseau, and Baudette. Beech 18 flights are duly inaugurated on a daily roundtrip basis, but insufficient traveler traffic causes passenger frequencies to end in late December. Mail and cargo services are maintained almost three years longer.

SK AIR: Cambodia (1991–1993). SK Air is established in 1991 as a joint venture between private Cambodian and Thai concerns. These lease a Tupolev Tu-134A from **Kampuchea Airlines** and employ it to inaugurate scheduled services in the fall linking Bangkok and Phnom Penh. Operations continue for only two years.

SKAERGARDSFLYG, A.B.: Flight Operations, Marienhamn Airport, Marienhamn, Fi-22100, Finland; Phone 358 (18) 12515; Fax 358 (18) 19405; Code 5Q; Year Founded 1995. Skaergardsflyg is established at Marienhamn in 1995 to provide scheduled commuter services to domestic locations. Sven Lemberg is managing director and he begins revenue flights with 1 each Cessna 206, Britten-Norman BN-2 Islander, and Embraer EMB-110 Bandeirante.

SKAGWAY AIR SERVICE: P.O. Box 357, Skagway, Alaska 99840, United States; Phone (907) 983-2218; Fax (907) 983-2948; http://www.ptialaska.net/~skagair; Code 7J; Year Founded 1963. Ben Lingle founds Skagway at the namesake Alaskan community in 1963 to undertake passenger and cargo charters to local bush destinations. Operations continue apace during the next quarter century.

Employing the company's lightplanes, Lingle inaugurates scheduled roundtrip commuter services to Juneau beginning in March 1988.

It is during one of these flights, on July 30, 1989, that the company experiences a fatal accident. While returning to Skagway in bad weather, a

Piper PA-32 Cherokee Six, with a pilot and five passengers, crashes into a steep, wooded hill near a saltwater inlet; two aboard are killed and the three others seriously injured.

In 1990, the 10-employee small regional operates a fleet of 4 Piper Cherokee Sixes and 1 each Piper PA-34 Seneca, Saratoga, and Pilatus-Britten-Norman PBN-2 Islander.

Enplanements in the 12 months total 5,780.

Another PA-32 Cherokee Six is acquired in 1991 as passenger boardings increase to 5,971. A total of 105,276 pounds of mail are flown in addition.

Three years later in 1994, the operations continue with a Pilatus-Britten-Norman PBN-2 Islander and a Piper Saratoga. Passenger boardings drop 5% to 8,703 and a total of 18,000 FTKs are operated.

Ten people are employed by the company in 1995.

Just after takeoff from Juneau on August 26, six inches of the blade of the PA-18 with a pilot and two passengers, separates from the propeller; no injuries are reported in the safe emergency landing that follows.

Enplanements for the year jump 8% to 9,393.

The fleet in 1996 includes 6 PA-32s and 1 each PA-34 Seneca, Saratoga, Islander, and Piper T-1020. Customer bookings swell 6.2% to 9,980.

There is no change in the workforce during 1997. Passenger boardings decrease 6.8% to 9,304. Business significantly improves in 1998 as customer bookings ascend 15.6% to 11,000.

Passenger bookings turn around the other way in 1999, falling by 12.2% to 9,000.

SKIPPERS AVIATION (PTY.), LTD. Valentine Road, Perth Domestic Airport, Redcliffe, Western Australia, 6104, Australia; Phone 61 (8) 9478 3989; Fax 61 (8) 9478 3184; http://www.skippers.com.au; Year Founded 1990. Skippers is established in 1990 to provide charter services for the mining industry in the vast reaches of the state of Western Australia. Mining crew changes, executive charters, and general flights are offered from bases at both Perth Domestic Airport and the International Airport at Broome. The fleet includes both Cessna 402s and C-441 Conquests.

In a surprise move, Skippers, on July 30, 1996, purchases a 17.3% stake in Cudai, New South Wales-based **Hazelton Airlines (Pty.), Ltd.** from Rothschild Australia (Pty.), Ltd. for \$A3.2 million. Analysts had expected **Qantas Airways (Pty.), Ltd.** to acquire the shareholding instead. Skippers Chairman Stanely Quinlivan joins the Hazelton board, eventually becoming its chairman.

In the fall, Hazelton enters into a major marketing and code-sharing arrangement with Qantas rival **Ansett Australia (Pty.), Ltd.** Thereafter, through the remainder of the decade, the Skippers involvement with the regional airline is largely submerged, although its equity stake rises to 25%.

In the period between the acquisition and the beginning of the new millennium, Skippers grows its fleet to include a mix of leased de Havilland DHC-8-100s, Embraer EMB-120 Brasílias, Fairchild Metro 23s, as well as the original Cessnas. Both Hazelton and Ansett are the source of these charters. Weekly roundtrip scheduled service is inaugurated from Broome to Derby and from Perth to Margaret River.

On October 6, 2000, the Hazelton family sells a 20% stake in the carrier to the **Air New Zealand Ltd.**-owned Ansett Holdings, Ltd., cutting its stake in the carrier from 33.11% to 13.11%. Six days later, Ansett launches an A\$15.3 million (90¢ a share) takeover bid for the remaining shares of the regional. Although Deputy Chairman Charles Hazelton announces that the sale will be good for Australia, several minority shareholders do not believe that. Both Truegrip Aviation (10% stake), led by Peter Truegrip, and Hazelton/Skippers Chairman Quinlivan, believe the Ansett offer to be inadequate. Consequently, a bidding war soon follows.

On November 28, **Qantas Airways (Pty.), Ltd.** enters the picture when its wholly owned subsidiary Qantas Longreach (Pty.), Ltd. makes an off-market takeover bid for all of the shares in Hazelton via a cash offer of A\$1.20 a share. According to Qantas CEO James Strong, this tender is a 33% increase over the Ansett price; the Hazelton board, led by Chairman Quinlivan, quickly endorses the Qantas bid as representing far better value for the company's shares.

Not to be outbid, Ansett soon returns with an offer of A\$1.35 a share and lowers its ownership demand from 90% to 50.1% control. On December 12, Qantas CEO-designate Geoffrey Dixon informs the press that his carrier will be revising its Hazelton bid and urges the regional's shareholders not to accept the Ansett offer. Rivalry for the Hazelton slots intensifies in light of the government's decision not to proceed with plans to build a second international airport at Sydney, indicating that it will instead direct overflow traffic to an upgraded, smaller airport at Bankstown.

On December 20, the Australian Competition and Consumer Commission notifies Qantas Airways (Pty.), Ltd. that it will be coming out against the proposed ownership of Hazelton by either **Ansett Australia (Pty.), Ltd.** or Qantas, noting that a takeover by either major would stifle competition in New South Wales' regional market and by controlling Hazelton's 450 takeoff/landing slots, have an unfair advantage at Sydney Airport.

After informing the ACCC that it wishes to proceed anyway, Qantas, on December 27 informs the Hazelton shareholders that it wishes to purchase 20.1% of the shares, instead of the 20% originally sought. It will leave its offer open until January 24 in order to give it time to consult with the ACCC.

As the year ends, the Hazelton family prepares to accept the Ansett bid on January 2, boosting the stake of Australia's No. 2 carrier from 23% to 35.4% and bidding up Hazelton's value to A\$23 million (US\$22 million). The bidding war will intensify in early January 2001, with both sides topping each other "subject to ACCC approval." The ACCC will eventually disapprove the Qantas effort and the pioneer will bow out of the Hazelton bidding on January 22.

At the end of February, it will be reported that the carrier has suffered a half-year net loss of A\$1.705 million (\$889,158). Analysts will suggest that the outlook for the company's survival is bleak unless the ACCC allows the Ansett takeover.

SKOCDOPOLE BROTHERS AVIATION, LTD. See SUNWEST INTERNATIONAL AVIATION SERVICES, LTD.

SKODA AIR, LTD.: Czech Republic (1979–1996). Skoda Air is established at Pilsen in 1979 to offer scheduled regional flights; the airline is part of Skoda Holdings, the nation's biggest industrial group. Milan Svoboda is named managing director and he establishes a fleet that grows to include 4 Let L-410 Turbolets, 1 Cessna 421, and 5 Cessna 410s. These are employed over the next 15 years on charters and scheduled freight services, the latter on behalf of **DHL Airways** in Europe. It also wet-leases short-term capacity to companies and carriers in Africa.

Operations continue apace in 1993 as an L-200 Morava is purchased. In July 1994, Skoda acquires its first SAAB 340B, which is employed, on behalf of **CSA Czech Airlines**, to operate scheduled passenger flights from Prague to Vienna, plus a Cessna 421C Golden Eagle II.

In 1995, the Golden Eagle is sold to a company in the Philippines and the four Turbolets are sold to a firm in Kenya; they are replaced with an Antonov An-26, which undertakes the **DHL Airways** cargo contract.

Airline employment stands at 29 in 1996. On March 1, the company is renamed **Skoda Engineering + Air Transport, Ltd.**

SKODA ENGINEERING + AIR TRANSPORT, LTD.: Namesti Ceskych Btatri 8, Pizen, CZ-31600, Czech Republic; Phone 420 19 773-2838; Fax 420 19 742-1709; Code SOA; Year Founded 1996. Skoda Air, Ltd., based at Pilzen, is renamed on March 1, 1996. Jaroslav Panik is appointed managing director. With a workforce of 29 and a fleet comprising 1 Antonov An-26, 1 SAAB 340B, and 1 Let L-200 Morava, the company continues its freight, charter, and scheduled services as before.

SKY AIR CARGO, LTD.: Room 75, Passenger Building, Ostend Airport, Ostend, 8400, Belgium; Phone 32 (59) 50 7500; Fax 32 (59) 80 5368; Year Founded 1988. SAC is organized at London on November 10, 1988 to operate a weekly all-cargo service from Ostend Airport to

Tehran, Singapore, and back. Manager Azam Begg recruits a staff of 17 and acquires 1 Boeing 707-323C originally flown by **American Airlines**.

Operations continue apace in 1989–1992 and in 1993 the workforce totals 20. The single Boeing now flies regularly from Ostend to Kinshasa and Nairobi, the Mideast and Far East service having been discontinued in favor of ad hoc charters.

Flights continue in 1994–1999, during which years Roger Sherman becomes managing director.

SKY AIRLINES, LTD. See SABRE AIRWAYS, LTD.

SKY CABS (PTY.), LTD.: P.O. Box 683, 294 1/2 Union Place, Colombo 2, Sri Lanka; Phone 94 (1) 633 332; Fax 94 (1) 635 505; http://www.skycab.com; Code 2E; Year Founded 1990. Sky Cabs is originally set up by its chairman, Ali Akber Seafudeen Jeevunjee, at Colombo in July 1990 as the flight training school Asian Academy of Aeronautics. In 1993, the company becomes the first in Sri Lanka to offer scheduled cargo services. A workforce of 27 is recruited and 2 Antonov An-12s are acquired. Revenue flights commence in August with weekly services to Gan Island in the Addu atolls; the usual outbound cargo is fabric, which is returned as completed garments.

With capitalization of Rs2.5 million and Priyakarage Edward Surendra de Silva as a new partner, the company continues its flights in 1994–1997. During these years, the fleet is increased with two An-8s and Male and Sharjah join the route network. The carrier is reformed into three operating divisions: domestic charter, international cargo operations, and the Asian Academy of Aeronautics.

Sky Cabs frequencies by 1998–2000 reach 11 weekly roundtrips between Colombo and Male, becoming the largest cargo carrier operating into Male. Indeed, it is now the second largest carrier in Sri Lanka.

SKY FREIGHTERS, B.V.: Belgium (1994–1995). Sky Freighters, B.V. is established at Kortrijk in the fall of 1994 to provide twice-daily express services to London (STN). Employing a British Aerospace BAe Jetstream 31 transferred to the Belgian register by its U.K. associate, **Euro Direct Airlines, Ltd.**, Sky Freighters inaugurates flights on October 3, but must shut down upon the failure of Euro Direct in 1995.

SKY HARBOR AIR SERVICES: United States (1970). SHAS is set up at Omaha, Nebraska, in the spring of 1970 to provide Cessna light-plane air taxi flights to intrastate destinations. During the fall, the company is bought out by and merged into Alliance, Nebraska-based **Trans-Nebaska Airlines**.

SKY LINE, A.S.: Esenboga, Ankara, Turkey; Phone 90 (212) 296-1694; Fax 90 (212) 296-1695; Year Founded 1983. Sky Line is established at Ankara in 1983 to provide executive and small group passenger charters around the country. By 2000, General Manager Ferda Tariz oversees the work of 4 full-time pilots and the operations of 2 Beech 400A Beechjets and 1 Beech King Air 90.

SKY ONE EXPRESS: United States (1991–1993). William B. Parris III establishes Sky One Express at Reisterstown, Maryland, in 1991 to operate Section 135 charter flights from Baltimore (BWI) to Ocean City. Services commence with 2 Piper PA-31-310 Navajos and 1 PA-31-350 Navajo Chieftain and by year's end, a total of 6,222 passengers have been flown.

During the summer of 1992, scheduled services are inaugurated over the company's nonscheduled route and a second Chieftain is acquired during the fall. Operations cease in 1993.

SKY PROJECT HELICOPTERS, S.A.: Av. Franklin Roosevelt 39, Rixensart, B-1330, Belgium; Phone 32 (0) 2 654 09 58; Fax 32 (0) 2 652 44 18; http://www.sky-project.com; Year Founded 1993. Employing a chartered Aerospatiale AS350B, Sky Project is organized at Rixensart on November 11, 1993 to offer sight-seeing flights on behalf of the

Foire Commerciale de Wavre. The weather is poor and the flights are made in light snow and low ceiling. While the charters could not be successful, the organizers are sufficiently impressed to remain in business.

In the summer of **1994**, Sky Project operates the first commercial flights in Belgium of the McDonnell Douglas MD520 Notar. The helicopter transports a total of 143 passengers from the little community of Virginal. Sight-seeing flights are made over the Plan Incline in Ronqueres as well as over the Castle of Ittre.

Under contract to the UN in **1995**, Sky Project pilots undertake humanitarian flights in Rwanda in the period after the end of the horrendous genocide. Later in the fall, the company is reformed. Henceforth it will engage in both international operations and local flight-seeing activities. At this point, company aircraft begin air work.

Through the remainder of the decade, the operator provides pipeline patrols, medevac, flight-seeing, aerial photography, airlift, cable-pulling, and other contract services, both in Belgium and overseas.

The company's large helicopter fleet in **2000** includes 1 each Bell 47G, 407, and 412, 2 LongRanger 212s, 3 LongRanger 206Ls, 3 Eurocopter AS350B Ecureuils, 2 SA3 Alouette IIs, 1 each AS355F and AS365 Dauphin, 1 each MD500E and MD520 Notar, 3 Robinson R22 Betas, and 1 R44 Astro.

Sky Project has two major international operations under way. The first employs two Bell 212s in flight operations on behalf of relief organizations in Central and Western Africa. In the second, the company is positioning itself to provide helicopter support for oil and gas fields being opened in Southeast Asia.

SKY SERVICE, S.A.: Kortrijkstraat 317, Wevelgem, B-8650, Belgium; Phone 32 (56) 40 39 11; Fax 32 (56) 40 42 08; <http://www.sky-service.be>; Code SK; Year Founded 1983. Sky Service is organized at Wevelgem in October **1983** to offer domestic and regional cargo charters and express services. Nonscheduled flights continue apace over the next decade. As the **1980s** move into the **1990s**, the company fleet includes 1 Beech King Air 100 and 1 Cessna 550 Citation I.

In **1993**, Barth Foucart is director, a workforce of 15 is recruited, and 1 each Cessna 406 Caravan II and Embraer EMB-110P Bandeirante are acquired. Scheduled passenger operations commence in October and continue as the fleet is increased with two EMB-121 Brasilias which, due to economic difficulties, must be withdrawn in **1994**.

Flights continue in **1995–1999**, during which years airline employment rises to 18 and the fleet is altered to include 1 Beech King Air 90, 1 Fokker F.27-500, 2 Cessna 550 Citation IIs, and 1 Bandeirante.

By **2000**, airline employment totals 35 and the number of EMB-110Ps is increased by two.

SKY TOURS. *See* ISLAND AIR LINES

SKY TOURS HAWAII: United States (1965–1971). STH is established at Honolulu in the late fall of **1965** to provide flight-seeing services to destinations to the east. Employing de Havilland DH 104 Doves and Beech 18s, the carrier inaugurates flights on December 3. In **1966**, Andrew Flying Service and Pan Pacific Aero are purchased and merged; a brief feeder arrangement is entered into with **United Air Lines** in **1967**.

Operations continue apace and scheduled frequencies, operated with Beech 18s under the name **Trans-Isle Airlines**, are undertaken between **1969** and **1971**, when the company shuts down.

SKY VIEW AIR LINES: United States (1928–1930). Another casualty of the Depression, SVAL is established at Pittsburgh, Pennsylvania, in the summer of **1928** to undertake multistop excursion flights to Niagara Falls. The Ford 4-AT-42 Tri-Motor is acquired on September 28 and services commence from Buffalo in August **1929**.

The stock market crash and onset of hard times results in insufficient revenue traffic being generated in **1930**. The carrier shuts down at the end of the tourist season in October and the Ford is sold to Long and Harmon of Dallas, Texas, on January 27, **1931**.

SKYBIRD AIRCHARTERS, LTD.: Kenya (1990–1992). J. Cleave establishes Skybird at Mombasa in **1990** to offer passenger and cargo charters to bush destinations. Operations commence with a fleet that grows to include 1 Pilatus-Britten-Norman PBN-2A Trislander, 1 Cessna 402, 4 Cessna 310s, and 3 Beech B-58 Barons.

Operations continue for two years.

SKYBUS. *See* KEY AIRLINES (2)

SKYBUS AIRWAYS, S.A.: Valaoribu 10, Athens, GR-10671, Greece; Phone 30 (1) 361-2222; Fax 30 (1) 361-2688; Code JX; Year Founded 1995. Skybus is established at Athens in the summer of **1995** to provide scheduled passenger services to Thessaloniki. Revenue services begin on November 15 and continue with a McDonnell Douglas MD-82 leased from **Venus Airlines, S.A.**

Flights continue in **1996–2000**, during which years the MD-82 is returned and the company operates air taxi flights with a Britten-Norman BN-2A Islander.

SKYBUS CORPORATION: United States (1985–1986). New entrant **Frontier Horizon**, a nonunion subsidiary of **Frontier Airlines (1)**, is sold to another newly formed company, Skybus Corporation, in January **1985**. Skybus, which has been unable to obtain operating authority of its own, reforms Frontier Horizon, which is equipped with 5 B-727-191s and 1 B-727-291 leased from Frontier Holdings.

Frontier Horizon's routes are either absorbed by **Frontier Airlines (1)** or dropped by Skybus after May as it attempts to establish its own low-cost service hubbing on Atlanta's Fulton County Airport. In July, the six jetliners begin to provide charter services as the carrier awaits its opportunity—and certification—to launch scheduled services.

During the next 6 months, 47,000 passengers are flown, primarily on charters between Atlanta and Las Vegas. Passengers are also flown for **World Airways** while a number of cargo flights are made on behalf of **The Flying Tiger Line**.

Revenues total \$3.86 million; however, start-up costs are so high that losses are taken: \$568,000 (operating) and \$684,000 (net).

Two Douglas DC-9-15s are leased from **Best Airlines** in early **1986** and are employed to operate a replacement segment on behalf of **New York Air's** Washington to New York shuttle service. The heavy losses suffered during the previous year, together with continued failure in the new, forces Skybus to stop flying in November. Neither traffic nor financial figures are released.

SKYBUS EXPRESS: United States (1991–1992). Privately owned Skybus Express is established in **1991** to provide Essential Air Service (EAS) to three Alabama communities. Revenue flights commence with a single Australian-made GAF Nomad N-24A. Neither traffic nor revenue figures are publicized, although it is reported that three more Nomads enter service.

In the spring of **1992**, two of the three routes are reawarded to **GP Express**, a competitor. Unable to continue, President Ron Ciaravella's carrier shuts down.

SKYCRAFT AIR TRANSPORT, LTD.: Canada (1972–1994). Robin Thompson establishes SAT at Oshawa Airport in Ontario in **1972** to offer cargo and charter services in support of the Canadian automobile industry. Operations are maintained, at first with Cessnas and then, beginning in **1975**, with a fleet of, what by decade's end totals 3 Douglas C-47Bs (military DC-3s). Two of the three are sold beginning in **1981**.

Upon takeoff from St. Louis on January 9, **1984**, the last C-47B with two crew loses power; before an emergency landing can be made on a highway, the left wing strikes a pole, causing the aircraft to crash through a fence and against a highway embankment (one dead).

It will later be determined that, during the lost plane's refueling, Jet-A fuel was used instead of 100LL avgas.

In January 1985, company officials decide to begin scheduled third-level passenger services. Two Embraer EMB-110 Bandeirantes are acquired and in July twice-daily flights link the company's base with Montreal, Ottawa, and Windsor. An affiliation is started with **CPAir, Ltd.** and daily Oshawa to Windsor frequencies are initiated. To handle the charter side, two DC-3s are purchased from **Genair, Ltd.**

International service begins in April 1986 as scheduled daily flights are inaugurated to Detroit. In July, the carrier changes affiliations, moving into a new relationship with **Air Canada, Ltd.**

A Shorts 330 is acquired from **Time Air, Ltd.** in June 1987 and placed into service while a larger Shorts 360 joins the fleet a year later in 1988 and is assigned to the Oshawa to Windsor service.

In 1989–1990, additional charters are undertaken as President Al Graham's nonscheduled fleet is increased with the addition of 1 Piper PA-23 Aztec, 1 Piper PA-31T Cheyenne, 1 Cessna 402, and 1 Cessna Citation. The Shorts 360 is withdrawn in 1991. In 1992, Chairman Thompson oversees 100 employees; however, recession causes severe traffic and financial reversals. The company closes down in February 1994.

SKYFIELD AIR COMPANY: Russia (1997–1998). Skyfield is established at Moscow in late 1997 to provide domestic and regional passenger charters. Revenue flights begin with a single Tupolev Tu-134A. The carrier fails during the fall of 1998 following the Russian government's devaluation of the ruble in August.

SKYFREIGHT (TROPICS INTERNATIONAL): United States (1981–1985). Edward G. Harris establishes Skyfreight at Miami in 1981 to provide scheduled Douglas DC-3 all-cargo flights to Freeport and Nassau in the Bahamas. Charter and contract service flights are also undertaken to other Caribbean destinations.

The scheduled frequencies cease in 1984 and the company goes out of business in 1985.

SKYFREIGHTERS. See **KITTY HAWK AIR CARGO**

SKYJET, S.A.: 75 Blvd. Louis Schmidt, Brussels, 1040, Belgium; Phone 32 (2) 735-6335; Fax 32 (2) 735-6335; <http://www.users.skynet.be/airline.skyjet>; Code S9; Year Founded 1992. Skyjet is established by Pierre Vandenbroucke and Henri Fabry at Brussels in October 1992 to offer passenger charter and inclusive-tour flights to international destinations. The former becomes president with the latter taking the post of managing director. Revenue operations commence at the end of the month with a single leased Douglas DC-10-30.

Operations continue apace over the next five years. A DC-10-15 is leased in 1994, the same year in which the company establishes a South American subsidiary, **Skyjet Brazil, S.A.** Destinations visited now include Cancún, the Caribbean, Margarita Island off the coast of South America, South American destinations, and the U.S. Virgin Islands.

Airline employment stands at 54 in 1997 and plans are made to launch services to Miami, Orlando, and Malaga. The South American subsidiary is renamed **World Brazilian Air, S.A.** during the first quarter, while a chartered Airbus Industrie A300B4 enters service in June.

Flights continue in 1998. The A300B4 is returned to its lessor and the chartered fleet now includes 1 each DC-10-15 and DC-10-30. The later wide-body is often employed to operate as additional capacity for the larger European package tour agencies.

On June 12, another DC-10-30 is acquired, this one from **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)**. It enters service with the carrier as soon as it completes a "D" check at Mexico City. On July 19, the Brazilian Douglas is returned to the Belgian register.

On August 1, the company begins operating under the government-approved marketing name of Skyjet Europe. To provide capacity for the new three new routes initiated by **Tunis Air, S.A.** in late March, the DC-10-15 is leased to the North African carrier on August 9.

Service is maintained during the remainder of the year and in 1999. It is announced on November 9 that a new subsidiary, Skyjet France, S.A.,

will be established at Lille to operate DC-10-30CF freighter service beginning in March or April. This arrangement is delayed.

On July 28, 2000, the DC-10-15 is chartered to Greece-based Electra Aviation, S.A., while the lease of the DC-10-30, out with **Ghana Airways, Ltd.**, is extended through February. On August 3, a DC-10-15F is chartered to **DAS Air Cargo, Ltd.**, wearing full Skyjet colors and DAS titles, leaving Galaxy 1 each DC-10-30 and DC-10-15 to operate on its own business.

SKYJET AVIATION, INC.: Halifax International Airport, 549 Barnes Road, Enfield, Nova Scotia B2T 1K3, Canada; Phone (902) 835-6330; Fax (902) 835-1833; Year Founded 1994. Gary Hamblen establishes his small concern at Halifax in 1994 to provide executive and small group charters throughout Atlantic Canada. By 2000, he employs two pilots and operates his single Beech Super King Air daily.

SKYJET BRAZIL, S.A.: Brazil (1994–1997). Skyjet Brazil is established by Skyjet, S.A. at Rio de Janeiro in 1994 to offer worldwide passenger and inclusive-tour charters. Revenue flights commence and continue with a single Douglas DC-10-30 previously operated by **Deutsche Lufthansa, A.G.**

The fleet is increased in 1996 by the charter of a B-707-331C. Service continues without change. Early in 1997, the company is renamed **World Brazilian Air, S.A.** The leased DC-10-30 is repainted in a new blue and white livery.

SKYLANE AIR CHARTER, LTD.: United Kingdom (1992–1995). J. Baumhardt forms this on-demand service at Southend Airport, Essex, in 1992 to offer charter passenger and cargo flights to cities in the U.K. and Western Europe. A workforce of 10 is assembled and revenue services commence with a fleet that includes 1 Cessna 404 Titan, 1 Piper PA-31-310 Navajo, and 1 PA-31-350 Navajo Chieftain. Flights cease in 1995.

SKYLINE: United States (1975–1976). Skyline is set up at Winchester, Virginia, in 1975 as the scheduled airline division of the FBO Skyline Aviation. Outfitted with a pair of Beech 99s, the company inaugurates daily roundtrips linking its base with Baltimore, Norfolk, Newport News, Richmond, Washington, D.C. (DCA), and Ocean City. Flights can only be offered into 1976.

SKYLINE, LTD. 28 Creek Road, Apapa, Lagos, Nigeria; Phone 234 (1) 587 4658; Fax 234 (1) 774 6136; Year Founded 1999. Under the leadership of Amatzia Snir, Skyline is established at Lagos in March 1999 to offer domestic passenger services, both scheduled and charter. Revenue flights to the main Nigerian cities, as well as numerous bush communities, begins in June employing a pair of de Havilland Canada DHC-7-102s. Plans are announced for the acquisition of Boeing 737 equipment.

A total of 80 workers are employed at the beginning of 2000.

SKYLINE AIR SERVICE: United States (1967). Tom Wilson founds SAS at Anacortes, Washington, on February 16, 1967 to provide scheduled commuter service to Seattle and Everett. The company also joins with **Island Sky Ferries** in the contract supporting **Island Mail, Inc.** Employing Cessna lightplanes, Wilson inaugurates revenue flights at month's end and continues them until June 28, when he joins with the owners of four other carriers in signing the agreement that will create **Puget Sound Airlines** on August 28.

SKYLINE AIRLINES: United States (1979–1981). Skyline is established in 1979 as the air transport division of the FBO Skyline Motors Aviation Services, which is located at Beaver Valley Airport in Pennsylvania. Employing 4 Cessna 404 Titans and 2 Cessna 402s, George Hall's carrier undertakes scheduled passenger and cargo flights to Youngstown, Cleveland, and Detroit.

Operations continue until traffic restrictions imposed as the result of the PATCO air traffic controllers' strike force the carrier out of business in 1981.

SKYLINE MOTORS AVIATION SERVICES: United States (1979–1981). SMAS is established at Beaver Falls, Pennsylvania, in the early fall of 1979 to provide scheduled passenger and cargo services to regional destinations. Employing a pair of Cessna 402s, the company inaugurates daily roundtrips in October, linking its base with Detroit City Airport via Youngstown and Cleveland.

Operations continue apace in 1980 and in June 1981 the airline is sold to Dale Rabassi, who changes its name to **B.A.S. Airlines**.

SKYLINE NEPC, LTD.: Lyka Labs Building, 77 Nehru Road, Ville Parle, 400099, India; Phone 91 (22) 610-7356; Fax 91 (22) 610-7599; <http://www.rediff.com/travel/nepc>; Code D2; Year Founded 1995. Bombay-based **Damania Airways, Ltd.** is purchased by **NEPC Airlines, Ltd.** in May 1995, but is allowed to maintain operations as a subsidiary with this name. Both carriers fly as divisions of NEPC India.

The new corporate arrangement, which includes both a 4.5% equity investment in Damania and an assumption of liabilities, will be investigated by the Securities and Exchange Board of India, as the stake taken is less than the mandatory 5% acquisition required. Chairman Parvez Damania steps down and is replaced as Skyline CEO by NEPC Group executive Ravi Kumar Khenka. Tripuri Kutman Khenka is named managing director. The company continues to operate to 11 domestic destinations, including Madras, Calcutta, and Delhi, with a fleet of 2 leased Boeing 737-2K9As and 2 B-737-282As.

On September 1, NEPC Group enters into an interline agreement with **Swissair, A.G.** Under terms of the arrangement, the Swiss flag carrier will maintain the NEPC fleet and train its personnel, while the Indian company becomes Swissair agent in India.

A third B-737-282A is added in 1996. With its sister **NEPC Airlines, Ltd.**, Skyline NEPC is the second largest domestic airline in India after **Indian Airlines, Ltd.**

In 1997, Chairman Khenka begins to negotiate with Airbus Industrie for a fleet of fuel-efficient European-made narrow-bodies with which to replace his Boeings. At the same time, and in tandem with **NEPC Airlines, Ltd.**, the carrier begins consideration of the takeover of fellow-independent **Archana Airways, Ltd.**, as well as the struggling **Modiluft**. The carrier also begins to expand facilities at its Coimbatore maintenance base.

The Director General of Civil Aviation now orders that NEPC reduce its operations over its trunk routes. The government claims that NEPC has failed to provide sufficient services on required subsistence routes in the nation's northeast.

Still, the carrier and its sister make various expansion plans. In March, permission is received from the government of India for the importation of eight more B-737-200s, four of which will be passed to Skyline NEPC, Ltd.

During the second quarter, it is claimed that the company, together with its **NEPC Airlines, Ltd.** parent, owe some \$4 million to the government in internal passenger taxes collected but not turned over. To press the issue, customs officials seize a B-737-282A.

The Indian Securities and Exchange Commission renews its investigation of the carrier's dramatic takeover of **Damania Airways, Ltd.**

NEPC Group executives, faced with a severe cash crunch and unavailability of new aircraft, elect to emphasize Skyline and close the doors of **NEPC Airlines, Ltd.**, planning to merge its assets into Skyline at the end of the year. The fiscal situation is, however, worse than originally imagined. NEPC Group does not have the funds to make its aircraft lease payments, pay its pilots salaries, or undertake maintenance checks. Both airlines stop flying during the first week of July.

At the end of July, the company is able to cobble together a significant loan from several financial institutions. In early August, the decision to close NEPC is reversed. Both companies are now downsized and

restructured, with the staff reduced in strength from 2,700 to 2,000. Salaries are also cut.

On September 15, **NEPC Airlines, Ltd.** is reborn. Flight operations, in South India, employing the five Fokkers that have not been sold, are restarted on October 1. Skyline NEPC, Ltd., meanwhile, flies the trunk routes.

Both airlines continue to operate in 1998; however, a loss of Rs 1.35 crores is suffered.

In 1999, **NEPC Airlines, Ltd.** is merged into Skyline NEPC, Ltd. The NEPC division will continue to operate its Fokkers, while Skyline NEPC, the dominant carrier, will fly the Boeings. This move, which has been caused by personnel problems and fiscal difficulties brought on by the high price of fuel, forces the revitalized carrier to cancel many of its services to and from Bombay, Bangalore, New Delhi, Calcutta, Indore, Coimbatore, and Madras. The year's loss improves to Rs 1.16 crores.

At the beginning of 2000, offices continue to be maintained at Bombay, Delhi, Calcutta, Madras, and Ahmedabad. On September 17, daily return service is resumed from Madras to Cochin, Coimbatore, and Madurai. Other services are offered on a sporadic basis.

SKYLINE SWEDEN, A.B.: Sweden (1971–1978). Organized at Malmo–Sturup Airport in 1971, Skyline undertakes ad hoc passenger and cargo charter flights linking Sweden with North Africa and other European destinations, many of them holiday vacation resorts. Per-Gunnar Norlin is chairman of the privately owned carrier, with Lennart Nordstrom as president and Bengt Malmberg as managing director. The fleet comprises 2 Vickers Viscount 800s and 1 Viscount 700 and airline employment grows to 52.

In 1975–1976, the carrier begins operating replacement flights for **Linjeflyg, A.B.**

Icing causes a Vickers Viscount 838 with 3 crew and 19 passengers to crash into a parking lot 5 km. short of the runway at Stockholm's Bromma Airport on January 15, 1977; there are no survivors.

Unable to generate sufficient revenues to overcome expenses, recession, and rising fuel costs, the company ceases operations in March 1978.

SKYLINK (PTY.), LTD.: Australia (1990–1991). Formed to provide commuter service in South Australia, Skylink (Pty.), Ltd. is established at Adelaide in 1990. Employing an initial fleet of 2 Cessna 402s, Managing Director Arthur William's company begins revenues services from its base to Port Lincoln, Whyalla, and Kingscote. A new Beech 1900 is delivered from the U.S. in early 1991, but must be returned when the carrier ceases operations later in the year.

SKYLINK AIRLINES, LTD.: Canada (1983–1989). Skylink is established at Boundary Bay Airport at Delta, British Columbia, in 1983 to offer regularly scheduled commuter flights to Victoria. A division of Tradewinds Aviation, Ltd., a charter operator, Skylink interchangeably employs as needed units of the Tradewinds fleet of 1 Piper PA-31-310 Navajo, 2 Britten-Norman BN-2 Islanders, 1 de Havilland DHC-2 Beaver, and various piston-engine Cessna equipment.

Operations continue apace during the remainder of the decade with a passenger and cargo route extended to Seattle. Several Fairchild Metro IIIs are acquired.

While on initial approach to the airport at Terrace, British Columbia, on September 26, 1989, a Metro III with two crew and five passengers initiates a go-around maneuver, but collides in fog and smoke with the tops of a line of 80-ft. high trees 300-ft. S of the runway; the plane crashes and there are no survivors.

As a result of a government audit following the tragedy, the carrier is found to be unworthy and its operating certificate is revoked in mid-October.

SKYLINK AVIATION, INC.: 1027 Yonge St., Ste. 300, Toronto, Ontario, M4W 2K9, Canada; Phone 416 924-9000; Fax 416 924-9005; Code SKK; Year Founded 1988. SkyLink is established at Toronto in

1988 to provide a host of general aviation services, including aircraft project management, air charter brokerage, various support activities, as well as charter flights.

During the 1990s, the subsidiary SkyLink Express, Inc. is established to operate courier and freight services across the country and into the U.S. At the beginning of 2000, Walter Arbib is CEO, with Surjit Babra as president. The two oversee a workforce of 140 and the flights of 7 Beech 1900Cs.

In November, the carrier takes a giant step by basing an Ilyushin Il-76 at Windsor, Ontario, for use on transatlantic and other worldwide ad hoc cargo charters.

SKYLINK EXPRESS, INC. See **SKYLINK AVIATION, INC.**

SKYMARK AIRLINES: United States (1968–1969). Skymark is established at Sacramento, California, in early 1968 to provide scheduled intrastate passenger and cargo services. Employing Cessna 402s and Beech 99s, the new commuter inaugurates revenue flights in February, linking its base with San Jose, Oakland, Fresno, Lake Tahoe, and Bakersfield.

Early in 1969, company owners agree to a merger with **Aero Commuter Airlines** and the last flight is completed on March 24.

SKYMARK AIRLINES COMPANY, LTD.: Svax Shinjoku Building B., 5th Floor, 2-9-23 Shinjoku-ku, Tokyo, 160-0022, Japan; Phone (3) 53 79 07 39; Fax (3) 53 79 07 68; <http://www.skymark.co.jp>; Code BC; Year Founded 1996. Established by entrepreneur Sawada Hideo and his discount travel agency HIS Company, Ltd. and the finance corporation Orix at Tokyo in November 1996, Skymark prepares to participate in the partial deregulation of Japan's airline industry and to take advantage of new slots that are to be opened at Haneda Airport. With \$700,000 in initial capitalization, HIS Company owns a 58.7% stake; Orix Corporation has 6.7% shareholding. Hideo announces that, within 5 years, his staff will grow from an initial 10 employees to 200 and via a public flotation, capital will be increased to \$50 million.

In mid-April 1997, Seiji Fukatsu, president of **All Nippon Airways Company, Ltd.**, announces that his carrier has signed a technical assistance contract with Skymark. Under its terms, the major will assist the new entrant in its acquisition of aircraft and in gaining operating authority from the Ministry of Transport.

A Japanese language site will be opened on the World Wide Web late in the year.

After a lengthy gestation period, the company is licensed on July 31, 1998; it is the first independent Japanese to achieve operating authority since **Nagasaki Airlines Company, Ltd.** in 1963. It will employ 11 retired pilots from **Japan Air Lines Company, Ltd. (2)** and **All-Nippon Airways Company, Ltd. (ANA)**.

A Boeing 767-3Q8ER is chartered from ILFC and **All-Nippon Airways Company, Ltd. (ANA)** has agreed to provide maintenance support for it. The ship arrives painted in an all-white fuselage without titles and a navy blue tail that bears a yellow representation of the constellation Cygnus, the swan.

The new plane is repainted and unveiled to the public on August 27 as a "logojet," bearing advertising for the satellite programming of DIRECTV.

Skymark announces plans to inaugurate thrice-daily deep-discount roundtrips on September 12 between Tokyo (HND) and Fukuoka. The opening day must be postponed for a week, as all final arrangements can not be completed in time.

The inaugural one-way fare over the route is ¥ 13,700 (\$97), about one-half the tariffs charged by Japan's major carriers. They promise to match the rate, thereby bringing on a limited fare war in a nation where ticket prices have always been heavily regulated. Tickets for the September 19 first flight are snapped up within 20 minutes of their being placed on sale.

Successful service is operated during the remainder of the year. On November 17, executives announce that, beginning in March, two new routes will be offered linking Osaka (KIX) with Fukuoka and Sapporo. They will be operated with a second B-767-3Q8ER.

President Kichisaburo Nomura of **All-Nippon Airways Company, Ltd.** tells a news conference on December 17 that ANA lost 18,000 passengers to Skymark in October and 20,000 in November. Although he is reluctant to cut fares on the Skymark route from Tokyo (HND) to Fukuoka due to the revenue costs that would occur, Nomura indicates that such a move may be necessary after the first of the year.

The Singapore Shipping Times reports on December 22 that **Japan Air Lines Company, Ltd. (2)** will follow the lead of ANA in March and reduce its fares by half on 13 out of 24 daily roundtrips between Tokyo (HND) and Fukuoka.

Skymark, on February 1, 1999, seeks approval from the Ministry of Transport to offer scheduled flights from Osaka to both Sapporo and Fukuoka on or before April 24. The company's second ILFC B-767-3Q8ER arrives at the beginning of March wearing colors that honor the Microsoft Corporation.

It is reported by *Nikkei America* on March 16 that the counteroffensive by its rivals has caused the discount airline to hit a rough patch in its so-far smooth sky and a decrease in profitability. Still, this is expected to pass after the airline begins flying two new routes awarded to it by the Transport Ministry on March 31, Osaka to Sapporo and Osaka to Fukuoka.

Daily Osaka to Sapporo roundtrips commence on April 24, along with twice-daily Osaka to Fukuoka return service. Company officials announce that planning is underway for the possible launch of overseas charters from Osaka in the year 2000.

The price of a one-way ticket on the Tokyo–Fukuoka route is increased on July 1 from ¥ 13,700 to ¥ 16,000.

Although traffic figures are unavailable, revenues of \$87 million are generated. Unhappily, a \$40.9-million net loss is suffered.

On January 5, 2000, company officials reveal plans to initiate international charter flights to Guam and Seoul within 15 months. On March 24, the new Yahoo Japan color scheme is unveiled on the carrier's premier B-767-3Q8ER; it replaces the one introduced 18 months earlier sponsoring DIRECTV. Two days later, the Yahoo plane returns to revenue service, flying the route from Tokyo (HND) to Fukuoka.

An initial public offering is successfully completed during June, raising ¥750 million (\$7.5 million). The new funds are earmarked for pilot training and improvements at the carrier's Tokyo (HND) facilities.

In early July, service from Osaka to Fukuoka and Sapporo is discontinued in order that the jetliners employed may be employed to double the Tokyo (HND) to Fukuoka route to six daily roundtrips.

The second "logojet" B-767-3Q8ER is repainted during late summer. When it returns to service on the Tokyo (HND) to Fukuoka route on September 29, it sports a paint scheme advertising the Japanese telecommunications and mobile telephone company J-Phone.

SKYMASTER: United States (1990–1995). Skymaster is founded by Luke A. Smith at Gilford, New Hampshire, in 1990. A fleet of 2 Beech 99s, 1 Piper PA-31-310 Navajo, and 1 Cessna 172 is assembled and employed to inaugurate scheduled third-level service linking the company's base with Keene and Laconia plus Rutland in Vermont, Boston, and Newark.

By 1992, revenues total \$14.3 million and the net profit is \$1.88 million. In 1993, airline employment stands at 37. One Beech 99 is withdrawn in 1994. The move is prelude to complete shutdown in 1995.

SKYPOL, S.A.: Aleja Krakowska 110/114, Warszawa, PL-00971, Poland; Phone 48 (22) 466 345; Fax 48 (22) 465 479; Code PZL; Year Founded 1994. Skypol is set up as an air taxi and commuter at Warsaw in 1994. Revenue flights commence under the direction of Manager Zdzislaw Jabtoriski with 2 Fairchild-Swearingen SA.227 Metro IIIs. It is understood that flights continue during the remainder of the decade, although exact operational information is unavailable.

SKYPORT (PTY.), LTD.: Australia (1991–1993). Skyport is established at Alice Springs, Northern Territories, in 1991 to offer both sched-

uled and nonscheduled third-level flights to Darwin via Katherine, Tennant Creek, Groote Eylands, Borrooloola, Victoria River, Downs, and Hooker Creek. President Roger Leach's three Cessna 402s largely replace the service of **Ansett N.T. (Ansett Airlines of the Northern Territory [Pty.], Ltd.)**.

The fleet in 1992 is increased by the addition of a fourth Cessna 402 and a Cessna 441.

Unhappily, the carrier is unable to achieve economic viability and shuts its doors in 1993.

SKYPOWER EXPRESS AIRWAYS, LTD.: P.O. Box 54110, Falomo, Lagos, Nigeria; Phone 234 (1) 269-3275; Fax 234 (1) 269-3253; Code EAN; Year Founded 1995. Capt. Mohammad Joji sets up Skypower at Lagos in 1985 to offer third-level scheduled and charter passenger flights. Revenue services duly commence with a fleet of 5 Embraer EMB-110P1 Bandeirantes.

Frequencies are continued in 1986–1997, as the company becomes a subsidiary of **Nigeria Airways, Ltd.** In exchange for marketing, reservations, and ground-handling assistance as well as subsidy, the company provides feed to the flag carrier as Express Airways Nigeria.

Having arrived at Yola from Jos on charter on January 31 of the latter year, an EMB-110P1 with 3 crew and 13 passengers is forced to circle for an hour because of bad weather; its fuel exhausted, the Embraer crashes 700 m. short of the runway (five dead).

Service continues during the remainder of the year and in 1998–1999. On January 5 of the latter year, another EMB-110P1 with 3 crew and 15 passengers stalls during its turn onto final approach to Abuja International Airport. The turboprop hits the ground and comes to rest short of the runway, killing one person on the ground.

While en route on March 17, 2000, the crew of a Bandeirante suffers engine problems and elects to divert to Kaunda Airport. A safe gear-up emergency forced landing is made some 600 m. short of the runway. This year, there are no fatalities.

SKYROVER, LTD.: United Kingdom (1989–1990). The third-level Skyrover is established in late spring 1989 to provide scheduled regional passenger flights. Initial roundtrip revenue service is inaugurated over a single route to Dusseldorf with a single Embraer EMB-110P Bandeirante. In the fall, the Brazilian-made turboprop is replaced with a Shorts 330.

Unable to maintain fiscal viability during the slow winter season, the third-level commuter shuts down in early 1990.

SKYSERVICE AIRLINES, LTD.: 9785 Ryan Avenue, Montreal, Quebec H9P 1A2, Canada; Phone (514) 636-1626; Fax (514) 636-3300; <http://www.skyservice.com>; Code SS; Year Founded 1986. Skyservice, Ltd. is established at Montreal (YUL) in 1986 to provide passenger and cargo charter services throughout Canada and the U.S. Dennis Crabtree is named chairman of the board, with Richard J. Nelson as president/CEO. Operations commence with 1 Cessna Citation III, and 1 Gulfstream I, and 4 Learjet 35s.

Nonscheduled flights continue throughout the remainder of the decade and into the next. Skyservice Aircraft Management Services manages several executive aircraft for corporate clients at both Montreal and Toronto.

Two Airbus Industrie A320-212s are chartered from **Monarch Airlines, Ltd.** on October 12, 1995 and are employed, beginning on November 4, to offer inclusive-tour services from Toronto and Montreal to destinations in the United Kingdom. Also for the winter season, two more A320-231s and an A320-232 are also leased from other sources and are employed to provide inclusive-tour flights to Caribbean and Central American destinations. The company's tour operator clients include Sunquest Vacations and ALBATours.

When the winter season ends in March 1996, the Monarch narrowbodies are returned, along with the two additional A320-231s. Summer services to Florida and the Caribbean are flown with the A320-232.

Skyservice Executive Aircraft Charter continues to operate executive aircraft services, employing 1 each Learjet, Citation III, Gulfstream I, and Hawker 125.

In late summer, **Monarch Airlines, Ltd.** subleases a pair of A320-231s to the company. Winter holiday flights resume in October and orders are placed with ILFC for an A330-300.

A new color scheme is introduced in February 1997. During the week of February 24, Skyservice in-flight personnel complete extensive CPR training. Automatic external defibrillators (AED) are placed aboard the company's fleet by March 17 and Skyservice now becomes the first Canadian air carrier to be fully outfitted with AEDs.

At the end of March, the **Monarch Airlines, Ltd.** planes go off lease and the cyclical summer frequencies to the lower U.S. resume. Formerly flown by **LTU (Lufttransport Unternehmen, K.G.)**, the chartered A330-322 arrives at the carrier's Montreal base on May 7 wearing titles that read "First A330 in North America." Two days later, the carrier places its new aircraft into revenue service on a charter to Barcelona. As the summer wears on, the plane is promoted on flights to previously served European destinations. In addition, the aircraft is shown off on charters to Aruba and Las Vegas.

In October, holiday flights to Europe under the winter schedule begin again. A leased company A320-212 flies a subservice for **Allegro Air, S.A. de C.V.**, which is operating charters on behalf of Sun Trips, a unit of Sunquest Vacations.

The two Monarch A320-231s are leased again for the winter holiday season. On November 4, one Monarch at Vancouver and the other at Edmonton are employed to initiate passenger charters to destinations in Mexico, Nevada, and the Caribbean.

In early June 1998, a B-727-231 begins wet-lease operations on behalf of Sport Hawk International Airlines, Ltd., a new Canadian charter concern. Specializing in sports-only flights, Toronto-based Sport Hawk secures contracts from the Toronto Blue Jays MLB team and the Toronto Raptors. The latter is the local NBA professional basketball team previously flown by **Air Canada, Ltd.** A contract will also be inked with the NHL professional hockey team, the Toronto Maple Leafs.

In an effort to rescue people stranded by the September 2 pilots' strike, **Air Canada, Ltd.** wet-leases aircraft from Skyservice and three other Canadian carriers to move people over the next week stuck in the midst of journeys.

In early fall, the Sport Hawk trijet is briefly repainted in an attractive blue and white livery displayed in a television commercial on behalf of Labatt Blue beer.

On May 31, 2000, Chairman/CEO Russel Payson announces that a new, but as yet unnamed, full-service airline subsidiary will begin Airbus operations in November. On June 7, the company reveals the name of its new derivative, **Roots Air, Ltd.** The moniker comes as the result of a marketing and branding alliance with Roots Canada, Ltd. The new entrant's business plan will, reminiscent of **MGM Grand Air**, attempt to lure high-paying customers with additional amenities.

The carrier's A330-322 is leased to **Airtours International Airlines, Ltd.** on October 20 for the winter season, through February. In return, Airtours charters an A320-200 to Skyservice through April.

An A320-212 is also subchartered from **Monarch Airlines, Ltd.** in October for the Canadian line's winter holiday schedule. It is delivered in Monarch colors with Skyservice titles.

Plans continue during the fourth quarter for the launch of the subsidiary airline **Roots Air, Ltd.** early in the new year. On November 23, an A320-232 is chartered for **Roots Air** from Singapore Aircraft Leasing Enterprise (SALE); it will be delivered in March 2001. A B-737-214 is tasked to provide backup.

Its marketing plan a fiasco, the new **Roots Air, Ltd.** is forced to shut-down on May 4, 2001, just 40 days after beginning operations. The fiscal pressure caused by this disaster upon Skyservice Airlines will be so intense that it will be forced to sell a 50% voting and 35% non-voting stake in itself to **Air Canada, Ltd.** for less than C\$15 million and become the major's low-fare carrier effective July 1.

SKYSERVICE USA. See **RYAN INTERNATIONAL AIRLINES**

SKYSTAR INTERNATIONAL AIRLINES: United States (1983–1987). Skystar International is established at Washington, New Jersey, in 1983 to provide inclusive-tour flights to such Catholic shrines as Lourdes, Fatima, Rome, and Mount St. Anne in Quebec on behalf of the religious group Blue Army and the specialty-oriented travel agency Fatima Travel. As the result of questions raised concerning its management and travel club membership, an original application for certification is rejected. Initial flights are operated by **Jet 24 International Airlines** under contract.

Operations continue apace with a wet-leased Boeing 707 Stratoliner named *Queen of Peace* and in late 1984 authority is received to provide regular commercial charters.

Enplanements in 1985 total 107,000 and revenues reach \$11.7 million. An operating loss of \$2.2 million is suffered.

In 1986, the company, which has by now acquired five other Stratoliners, is in a position to offer charters to secular destinations, a number as subcontracts for other airlines.

Late in the year, the government grants Skystar its own scheduled route, from Boston to Fort Lauderdale via Philadelphia. It will not be operated, however, as in January 1987 the company is ordered grounded for maintenance and safety problems. Rather than go through the difficulties of restarting, the company elects to shut down and liquidate its assets.

SKYSTREAM AIRLINES: United States (1973–1980). Cecil Pond establishes Skystream at Plymouth, Indiana, in the late fall of 1973 to provide daily scheduled passenger services to Detroit via Indianapolis and South Bend. Beech 99 roundtrips commence on November 15 and after the routes of **Hub Airlines** are purchased, flights begin to Chicago's Meigs Field.

Skystream purchases **Great Lakes Commuter** in April 1974, taking over its frequencies to Flint, Traverse City, and other Michigan communities. Services are suspended during the first quarter of 1975; however, once they are resumed, they are maintained without incident until June 9, 1979, when a Beech 99 crashes coming into Chicago. Services halt on April 14, 1980.

SKYTEAM ALLIANCE. See **AEROMEXICO (2), S.A. de C.V.; AIR FRANCE; CZECH AIR; DELTA AIR LINES; KOREAN AIR (KAL)**

SKYTEAM LUFTHAFTUNTERMEHMEN, GmbH.: Kleiner Kornweg 26-28, Keisterbach, 65451, Germany; Phone 49 (6107) 7700; Fax 49 (6107) 7700 9; <http://www.sky-team.com>; Code XST; Year Founded 1997. This specialist carrier is established at Keisterbach by Managing Director Manfred Nimfuehr and three other investors in October 1997. With their backgrounds in special aviation activities, the four hope to provide a unique nonscheduled airline service catering to such activities as VIP transport, search and rescue, flight-seeing, and movie filming, as well as public small-group passenger and cargo charters.

A fleet of three Fokker F27-500s is assembled, together with a workforce of 37. Revenue flights, from a base at Frankfurt begin in April 1998 and continue.

SKYTECH AVIATION, LTD.: RR #3, Orillia, Ontario L3V 6H3, Canada; Phone (705) 689-8051; Fax (705) 689-8087; Year Founded 1968. Skytech is established at Orillia in 1968 to provide helicopter aerial taxi services. In 2000, President Michael Fleming employs 8 workers and operates 2 each Bell 206B JetRangers and Bell 206L LongRangers.

SKYTECH HELICOPTER SERVICE, S.A.: Rue d'Anogrun 138, Lasne, B-1380, Belgium; Phone 32 (2) 633-5890; Fax 32 (2) 633-5884; Year Founded 1989. Skytech is established by Thierry

Lakhanisky and Lucienne de Dryer at Lasne, Belgium, in 1989 as a consulting company that markets the Agusta A109 to local concerns. In 1990, the company joins with the Brussels-based FBO Temco to serve as European distributor and sales agent for Rostvertol, manufacturer of the Soviet Union's Mil helicopter. As it had for the Italian aircraft, Skytech agrees to find jobs for Russian helicopters that Temco, in turn, would maintain.

Under the direction of Executive Vice President De Dryver, Skytech also develops a relationship in 1991–1992 with the former **Aeroflot Soviet Airlines** division Ukhta Air Stewardship (also known as Ukhta State Enterprise), a helicopter operator that is attempting to introduce Russian helicopters to the West. After Temco goes bankrupt, Skytech elects to not only market but also to maintain any Soviet helicopters it can place.

Under a five-year contract, Skytech now acquires a fleet of 2 Mi-8AMTs and 1 Mi-10 under lease from USE. All are employed on heavy-lift charters in Europe and around the world.

A giant Mi-26T is chartered in 1993. Two Kamov Ka-32Cs are leased and sent to Papua New Guinea where they are operated by the local carrier Heli Niugini in support of the Kutubu oil field project.

During the spring of 1994, the carrier leases its two Russian-made Mil Mi-8AMT helicopters for three years to **Nepal Airways, Ltd.** The rotary-wing aircraft are delivered to Katmandu by an Antonov An-124 under lease to **Heavylift Airlines, Ltd.** and enter service on September 15. With Skytech maintenance and training support, the Mi-8s undertake not only high-altitude passenger transport, but construction work and food-transport missions as well.

In December, the Mi-26T is engaged in a spectacular 3-day airlift of 7 industrial silos from Hallein to Linz, a distance of 93 miles. Each of the 30,870-lb. structures, too large for ground transport, are released into Linz Harbor, from whence they are transported to Belgium by barge.

Early in 1995, a French concern based in Guyana leases the Mi-26T to support the activities of a Canadian gold-mining project. The helicopter is delivered by ship to Martinique and then flown to Guyana, where it becomes the first Russian-made heavy lift helicopter to operate in the Americas.

Upon completion of the Mi-26T's Guyana services in late March, it is sent on a demonstration tour of Latin America and Canada. A second machine is, meanwhile, leased and dispatched to Central America in April. When it is grounded by mechanical difficulties, Skytech quickly arranges for spare parts delivery. Within a day, an **Aeroflot Russian International Airlines (ARIA)** aircraft has delivered the needed parts to Brussels from Moscow and an **Air France** plane takes them on to Guyana.

During the year, two Mi-8SMTVs join the two Mi-8s already in **Nepal Airways, Ltd.** service. In addition, an Mi-8AMT, equipped as a flying studio, is employed by a French television crew filming in Ethiopia.

By 1996, the fleet has come to comprise 1 Mil 10, 1 Mil 26T, 5 Mil 17s, and 2 Kamov Ka-32Ts. In March 1997, the company acquires 3 additional KA-32Ts through a 3-year lease-purchase agreement. They are sent to Southeast Asia to perform construction and logging operations.

Flights continue in 1998–1999. During the summer of the latter year, two Mi-26Ts are leased by the Italian Civil Protection Authority and based at Lamezia Terme, and Calabria to fight fires. The giant helicopters each arrive from Belgium with a pair of 10,000-liter external tanks. Managed by ETI 2000, the two also return to Italy in summer 2000.

SKYTRAIL (AIR SAFARI, LTD.): P.O. Box 81443, Nairobi, Kenya; Phone 254 (2) 501211; Fax 254 (2) 503362; Year Founded 1982. Skytrail is established at Mombasa in 1982 to provide third-level passenger and cargo flights throughout the country, including stops at the big game parks. Revenue operations commence and continue with a fleet of 4 de Havilland Canada DHC-6-300 Twin Otters.

Almost two decades later, in 2000, CEO Roland Ruedin employs 50 workers and operates 6 Twin Otters, plus 1 each Cessna 206, C-404, and C-414.

SKYTRAIN AIRLINES: United States (1981). The all-cargo commuter **PAFCO Airlines**, owned by Gilbert Chcone and based at Chicago (MDW), is purchased by Joseph Valee on May 15 and renamed. Employing a Piper PA-31-310 Navajo, the small regional inaugurates scheduled passenger services, linking its base with Chicago's Meigs Field, Fort Wayne, South Bend, Lafayette, and Indianapolis.

On September 15, Skytrain is relabeled **Air Great Lakes**.

SKYTREK INTERNATIONAL AIRLINES: United States (1997–1999). Robert Iverson II, former **Kiwi International Airlines** founder/president, who had been forced out of that company, establishes this new charter operation at Richmond in January 1997. Holiday and vacation tour charter flights commence in June with a single Boeing 727-276A first flown by **Australian Airlines (Pty.), Ltd.**

By year's end, the company has acquired 2 more Boeing trijets and transported a total of 70,000 customers.

Flights continue in 1998. During the fall, a homepage is opened on the World Wide Web. Passenger boardings during the 12 months skyrocket 328% to 300,000.

Revenues shoot up 148.7% to \$14.62 million, but expenses increase 192.3% to \$17.78 million. The operating loss grows to \$3.16 million, while the net loss climbs to \$3.35 million.

Like other operators of the Boeing trijet, Sky Trek has only five days after the FAA emergency inspection order of May 22, 1999 to review the wiring aboard its five B-727-200As. The task is completed without incident. In October, founder Iverson resigns. The board now reforms the company, renaming it **Discovery Airlines**.

SKYTRUMP AVIATION SERVICES, LTD.: Russia (1991–1997). Skytrump is established at Moscow in 1991 to provide international freight charters and to undertake contract services. Director General Konstantin G. Vartanov recruits a 35-person workforce and flights are started with 1 each Antonov An-12, An-26, An-32, Ilyushin Il-76T, and Yak 42. Many of the services provided are operated on behalf of the UN to destinations in Kenya, Somalia, Mozambique, Ethiopia, South Africa, Zaire, Namibia, and Angola. As these services expand, the Antonov and Ilyushin freighter fleet is increased.

In 1994 alone, the company transports over 4,000 tons of relief supplies and equipment to war-torn Rwanda.

Beginning in 1995, the carrier undertakes cargo charters on behalf of Russian and other clients from Moscow to closer points, including Tbilisi, Baku, Ashkhabat, Almaty, Bishkek, Novosibirsk, Irkutsk, Senake, Kogalym, Usinsk, Khabarovsk, and Yzhno-Sakhalinsk. Working with the travel company Klassik Line, executive and public passenger charters are begun in 1996 from Moscow to all of the CIS points.

On February 1, 1997, the company is renamed **Remex Airlines**.

SKYWALKER, LTD.: Canada (1986–1988). Without benefit of a code-sharing agreement, this new third-level carrier is established at Toronto Island Airport in February 1986. Equipped with a pair of de Havilland Canada DHC-6-300 Twin Otters, it inaugurates scheduled roundtrip passenger service (C\$18 one way) to Buffalo on March 31. Enplanements for the year total 30,500.

In January 1987, President Curtis Begg receives Canadian Transport Commission permission to use aircraft with up to 60 seats on its route. A third Twin Otter is acquired, a major new marketing campaign is undertaken, and daily frequencies are increased to 12 roundtrips. Later in the spring, flights begin to Rochester. Services across Lake Erie to Cleveland's Burke Lakefront Airport are initiated in the fall. No traffic figures are released.

In April 1988, the carrier, in deep financial difficulties, is shutdown by its stockholders as a bad investment.

SKYWARD AVIATION, LTD.: P.O. Box 1207, Thompson Airport, Thompson, Manitoba, R8N 1P1, Canada; Phone (204) 778-7088; Fax (204) 677-9062; Code K9; Year Founded 1995. Skyward is set up

at Thompson Airport in 1995 as the scheduled airline division of an FBO to provide scheduled passenger and cargo third-level service throughout the province. General Manager Frank P. Behrendt's concern begins scheduled revenue operations with a pair of Embraer EMB-110P1 Bandeirantes. Charter operations continue with a fleet of 2 Cessna 206s, 2 C-402Bs, 1 C-402C, and 1 C-414A.

Two more EMB-110s are acquired in 1996–2000. In 1997, several company aircraft are caught in the flooding that occurs in the province.

SKYWAY: United States (1931–1932). Skyway is established at Wichita, Kansas, in the early spring of 1931 to offer scheduled, multistop passenger service to Kansas City and Blackwell, Oklahoma. The Ford 4-AT-17 is acquired on April 28 and employed to inaugurate flights in November.

Without a mail contract, insufficient passenger traffic is generated and when the trimotor is destroyed in a Blackwell hangar fire on March 15, 1932, the company is forced out of business.

SKYWAY AIRLINES (1): United States (1960–1980). Early in 1960, Skyway Aviation, Inc., the FBO at Fort Leonard Wood, Missouri, establishes a scheduled air taxi division and applies for certification, which is duly granted by the FAA on March 18. Employing a Lockheed Model 10A, a Beech 18, and a Piper PA-32 Cherokee Six, semi-scheduled passenger and cargo flights to St. Louis via Rolla are maintained until 1968.

Regularly scheduled flights begin in 1969 as Douglas DC-3 roundtrips to Chicago commence. Between 1970 and 1980, the company enlarges its fleet by the addition of Beech B-80 Queenaires and undertakes regular frequencies to Lake of the Ozarks, Kansas City, and Columbia. Operations cease in April of the latter year.

SKYWAY AIRLINES (2): 4792 South Howell Avenue, Milwaukee, Wisconsin 53207, United States; Phone (414) 747-4750; Fax (414) 769-4272; <http://www.midwestexpress.com/company/aboutsk.html>; Code YX; Year Founded 1989. Skyway Airlines is formed at Milwaukee, Wisconsin, in early spring 1989 as a subsidiary of Farmington, New Mexico-based **Mesa Airlines**, which signs an agreement with **Midwest Express Airlines** to operate a code-sharing "Midwest Express Connection" service, beginning with four Beech 1900s. Scheduled services to 17 surrounding communities in 4 Midwestern states commence on April 17. Thereafter, traffic and financial results are consolidated with those of **Mesa Airlines**, which reports that its new subsidiary's first eight months are profitable.

The carrier adds five cities to its route network in 1990, along with two Beech 1900Cs. Daily nonstop Milwaukee to Grand Rapids and Muskegon flights are added in August 1991. Simultaneously, twice-daily Beech 1900C flights are started from Milwaukee to Louisville, along with two daily directs from Milwaukee to Oshkosh. A fourth daily nonstop is launched from Milwaukee to Rockford.

Operations continue apace in 1992 and in 1993 Chairman Larry Risley and President Rolly Bergeson oversee a workforce of 150 and operate a fleet of 12 Beech 1900Cs. Destinations now served include the Wisconsin cities of Appleton, Bloomington, Cedar Rapids, Chicago (MDW), Des Moines, Detroit, Flint, Grand Rapids, Green Bay, Indianapolis, Kalamazoo, La Crosse, Lansing, Louisville, Madison, Milwaukee, Muskegon, Omaha, Saginaw/Bay City, Traverse City, and Wausau, as well as Rochester, New York. A net \$5.18-million profit is reported for the year.

When the "Midwest Express Connection" contract ends in 1994, **Mesa Airlines** withdraws this service, which is taken over by the national-sized carrier, and operated by it through its owned subsidiary, Astral Aviation, which in turn operates Skyway. Thirteen Beech 1900C/Ds maintain the previous routes.

On May 15, the company begins weekday nonstop roundtrips from Champagne/Urbana, Illinois, to Peoria and Detroit and one-stops from Champagne/Urbana to Rockford.

Enplanements for the year total 204,865 and revenues jump 61.7% to \$38.63 million. Net gain falls all the way down to \$546,000.

Having joined the company eight years earlier, Brenda Skelton is named senior vice president-marketing and customer services in February 1995. Former **Continental Airlines** official Dennis J. Crabtree becomes senior vice president-operations in September.

The company's 15 aircraft transport a total of 308,942 passengers, a 44% increase.

Airline employment stands at 238 in 1996 as 2 more Beech 1900Ds are added. Twice-daily weekday roundtrips commence on May 1 between Milwaukee and Nashville. Simultaneously, thrice-daily weekday roundtrips are introduced between Nashville and Grand Rapids, Michigan, with twice-daily weekday roundtrips from the Nashville to Dayton. Controller Robert S. Bahlman is named vice president/chief financial officer in December.

Customer bookings for the year move ahead by 4.8% to 323,857.

Destinations visited in early 1997 include Appleton, Atlanta, Boston, Chicago (MDW), Cincinnati, Cleveland, Dallas (DFW), Dayton, Denver, Des Moines, Flint, Grand Rapids, Green Bay, Indianapolis, Kansas City, La Crosse, Lansing, Los Angeles, Madison, Milwaukee, Muskegon, Nashville, New York (LGA), Newark (EWR), Orlando, St. Louis, San Francisco, South Bend, Toronto, Washington, D.C. (DCA), and Wausau.

DHL Worldwide Express Director of Flight Operations David C. Reeve is named president/CEO of Astral Aviation, the airline's parent, on March 1. Six-times-daily nonstop Beech 1900 return flights commence on June 1 between Milwaukee and Marquette, Michigan.

On October 1, the carrier introduces six-times-a-day Beech 1900D nonstop roundtrips between Milwaukee and Escanaba, Michigan, and four-times-a-day nonstop roundtrips between Escanaba and Chicago (MDW).

Local chapter members of ALPA conduct informational picketing at Milwaukee on October 17 and October 20.

On November 19, the NMB declares an impasse in the two-year-old labor talks between Skyway pilots and their management. A mandatory 30-day cooling off period, after which both sides are free to engage in "self-help" measures, goes into effect.

On December 2, pilots vote that unless a tentative agreement is reached with management by December 20, their form of "self-help" will be a strike and work stoppage.

Passenger boardings during the 12 months fall 3.7% to 311,789.

After two years of negotiations between the carrier and the local ALPA chapter, company pilots strike in January 1998. After less than an hour, the flyers have a new four-year contract, which requires ratification by the 135 line pilots.

In February, 99% of the company's pilots vote to ratify the agreement with Skyway.

Having not performed to company expectations, the new service to Chicago (MDW) is withdrawn on March 31. The aircraft that are freed up are employed on April 20 to inaugurate six-times-weekday roundtrips between Milwaukee and Traverse City, Michigan.

Flight 1844, a Beech 1900D, blows all of its main landing gear tires upon landing at Nashville on July 7.

Midwest Express Holdings Chairman Timothy E. Hoeksema announces on July 8 that it will become U.S. launch customer for the Fairchild Dornier 328JET, a new regional jet configuration of the aircraft manufacturer's 328 turboprop. Five firm orders are placed for the aircraft, with an option to purchase 10 more; the first machines are scheduled to be delivered to Skyway beginning in March.

Customer bookings accelerate 14% to 355,376.

By the beginning of 1999, the workforce has been increased by 16.2% to 322.

While en route from Grand Rapids, Michigan, to Milwaukee on February 8, a Beech 1900D with 2 crew and 12 passengers encounters a flock of Canadian geese while flying in broken clouds. One of the birds smashes into the plane's right engine, which must subsequently be shut down. Although an emergency is declared, the turboprop is able to make a safe landing at its destination, with no injuries reported.

Together with its **Midwest Express** parent, Skyway, on April 29, introduces electronic ticketing to those travel agencies across the U.S. that are equipped with the Amadeus reservations system.

The number of weekday "Midwest Express Connection" frequencies from Milwaukee and Wausau/Stevens Point, Wisconsin, is increased from 8 to 12 on May 10.

The first two 328JETs are delivered to launch customer Skyway on August 9. Meanwhile, pilot training for the new regional jets continues at Fairchild headquarters at San Antonio, Texas. Skyway introduces 328JET service on November 1, providing four-times-a-day return flights over a new route from Milwaukee to Pittsburgh. The new regional jets also enter service in four existing markets visited from Milwaukee: Indianapolis in late October, Green Bay and Stevens Point in mid-November, and Nashville in late November.

In December, new six-times-weekday Beech 1900D roundtrips are introduced between Milwaukee and Cedar Rapids; this is the only nonstop service available between the two points.

Passenger boardings climb 8.4% to 385,000. Revenues advance 8.2% to \$44.88 million, while expenses are up 12.5% to \$42.98 million. A \$1.9-million operating profit is posted.

A total of 332 workers are employed at the beginning of 2000.

Twice-weekday Beech 1900D return service is inaugurated on March 13 between Milwaukee and Fort Wayne, Indiana.

On April 2, thrice-daily Beech 1900D roundtrips are launched from Milwaukee to Cedar Rapids, Iowa. Fifteen days later, twice-daily 328JET return flights (one not flown on Saturday and the other on Sunday) begin from Grand Rapids to Washington, D.C. (DCA).

Orders are placed on May 2 for five additional 328JETs and five 428JETs, with no deliveries expected before 2001.

The existing daily turboprop service between Des Moines and Milwaukee is upgraded on June 15 when it is taken over by a **Midwest Express Airlines** DC-9. Plans call for one of the new 328JETs to be placed on the route, beginning in late summer.

Daily roundtrips between Milwaukee and Little Rock commence on October 29. The routes from Milwaukee to Fort Wayne and Grand Rapids to Toronto are closed on November 30.

Customer bookings during these 12 months jump 21.1% to 445,842.

SKYWAY COMMUTER: United States (1983–1985). The former **Air Florida** commuter **Skyways of Ocala** is renamed in 1983. With 3 Beech 99s and 1 Piper PA-31-350 Navajo Chieftain, scheduled services are maintained for two years linking the company's Ocala base with Fort Lauderdale, Orlando, Pensacola, Tallahassee, and West Palm Beach. Enplanements for the year total 51,000.

Unable to recover from the **Air Florida** collapse, the airline has a bad 1984. The situation does not improve in 1985 and in November, the airline ceases operations after merger negotiations with **Air New Orleans** fail. No traffic or financial figures are released during the two-year slide to extinction.

SKYWAYS: United States (1972–1985). The Fayetteville, Arkansas-based commuter airline **Scheduled Skyways** is reformed following its purchase by a group of investors on October 1, 1972, and is renamed **Skyways**, although the **Scheduled Skyways** moniker will continue to be employed by many in the aviation press. With a fleet comprising 1 Piper PA-31 Navajo Chieftain and 2 Beech 99s, President Raymond A. Young III's company maintains services to Little Rock, Harrison, Hot Springs, Jonesboro, and Texarkana.

In mid-decade, services are inaugurated to Dallas, Kansas City, Tulsa, St. Louis, and Memphis. A total of 63,517 passengers are boarded in 1977.

Following passage of the Airline Deregulation Act in 1978, the company begins a rapid expansion program. Enplanements rise 13.7% to 72,197.

The workforce is increased a whopping 94.1% in 1979 to 165 and the fleet is increased to include 5 Swearingen Metro IIs, 3 Beech 99s, and 1 Piper PA-31-310 Navajo.

Passenger boardings skyrocket 59.8% to 115,411.

The employee population rises 12.9% in **1980** to 175. Two additional Metro IIs are acquired and services are inaugurated to Springfield, Nashville, Fort Smith, Knoxville, Birmingham, and El Dorado.

Bookings climb 16.8% to 134,758 and operating income skyrockets 75.4% to \$8.07 million.

Services are initiated in **1981** to Mobile, Pensacola, Jackson, and Oklahoma City. More Metro IIs join the seven already on hand and orders are placed for six Avions de Transport Regional ATR42s.

Bookings at new Chairman/CEO Robert L. Shults' carrier rise 26.4% to 170,408. Freight accelerates 65.9% to 218,682 pounds.

Traffic growth continues in **1982** with 196,144 customers enplaned, a 15.1% increase. Freight increases a spectacular 120.8% to 482,875 pounds.

The payroll is increased by 15.7% in **1983** to 325 and the fleet now comprises 14 Metroliners.

While taxiing on the ground at Hot Springs, Arkansas, on August 27, a Swearingen Metro II with two crew and two passengers suddenly catches fire; although all four persons are safely evacuated, the plane is burned out.

The Arkansas traveler rises to the ranks of the nation's large regionals at year's end and records a 13.4% acceleration in boardings to 222,330; cargo rises 2.4% to 495,000 pounds.

The unbroken string of successes continues for the privately held carrier in **1984** as 225,196 passengers are transported, a 1.3% increase. A Nord 262 is acquired. Buoyed by its achievements in deregulated airspace, the company extends frequencies to 24 additional cities in Alabama, Arkansas, Florida, Mississippi, Missouri, Oklahoma, Tennessee, and Texas.

Despite its traffic growth, Skyways has had financial difficulties for several years and has struggled with the costs of its expansion in an era of rough competition. For the six months ending June 30, the airline takes a \$319,000 net loss on revenues of \$8.9 million. On September 24, an agreement is reached whereby Skyways will become a wholly owned subsidiary of its northern neighbor, **Air Midwest**. To facilitate the union, **Air Midwest** issues one common share of its stock in exchange for each 2.75 held in Skyways.

Customer bookings inch upward 1.3% to 225,196, but freight is down by 12.9% to 431,000 pounds.

The merger of the two companies is completed on January 17, **1985** and thereafter they briefly operate as separate entities while integrating. On June 3, the new subsidiary, which has flown as **Air Midwest Skyways**, is entirely absorbed by its parent. The last independent flight is completed on June 25.

SKYWAYS, LTD.: United Kingdom (1946–1964). Originally organized in 1929 to offer sight-seeing flights, Skyways, Ltd., is reorganized for commercial services on March 12, **1946**, by Brig. Gen. A. C. Critchley, Sir Alan Cobham, and **British Overseas Airways Corporation (BOAC)** Capt. R. J. Ashley. Capitalized at £1,000 per share, the carrier employs Ashley as managing director. A fleet of 2 Avro Yorks, 2 Avro Lancastrians (*Sky Diplomat* and *Sky Lane*), and a DH-89A (*Sky Trail*), is assembled, a contract is negotiated with the Anglo-Iranian Oil Company, and revenue flight services commence on May 14 with a York flying Manston–Basra via Malta and Cairo.

On May 31, inclusive-tour flights on behalf of Sir Henry Lunn, Ltd. begin to Zurich. Two Douglas DC-3s, the *Sky Hawk* and *Sky Ward*, are added in August, followed by a third, the *Sky Liner*, in September and a de Havilland DH 104 Dove I, the *Sky Maid*, in October. In November, the government airfield at Dunsfold is purchased and converted into the company's main base.

By November 30, a total of 7,309 passengers and 140 tons of freight have been flown 741,381 miles.

Two new Lancastrians are purchased on November 1; one is named *Sky Ambassador*, but the other Lancastrian is lost in a Dunsfold hanger fire on December 8 before it can be named. Another Lancastrian is

bought in early December and christened *Sky Chieftain* and later in the month, Cobham resigns from the board of directors to be replaced by Member of Parliament Group Capt. C. A. B. Wilcock.

Airline employment is increased to 1,000 in **1947**.

The Avro 691 Lancastrian 1 freighter *Sky Diplomat* with four crew crashes at the H3 landing ground in Iraq on May 11; there are no survivors. With 7 crew and 17 passengers, the Avro 685 York I *Sky Consul*, acquired in February, is involved in a landing accident at London (LHR) on July 25; although the aircraft must be written off, there are no fatalities.

Charter flights are launched to a variety of new destinations, including Palestine, Hong Kong, China, the Canary Islands, Thailand, Kuwait, Dar es Salaam, Greece, Italy, and Indochina. Swiss charter flights for Sir Henry Lunn, Ltd., continue during the summer.

The Avro 691 Lancastrian 3 freighter *Sky Path* with three crew aboard fails its takeoff from Nutts Corner, Belfast, Ulster, on October 3; although the aircraft must be written off after the accident, there are no fatalities.

The fleet is increased by the addition of six more Lancastrians (*Sky Scout*, *Sky Consort*, *Sky Ruler*, *Sky Minister*, *Sky Envoy*, *Sky Trainer*), a Lockheed 12A, and four DC-4s (converted military C-54s) from **KLM (Royal Dutch Airlines, N.V.)**, christened *Sky Alliance*, *Sky Champion*, *Sky Freedom*, and *Sky Wisdom*. At year's end, the Drayton Group purchases a significant holding.

Weekly Nairobi–Mauritius Lancastrian service begins in January **1948**. Sir Henry Lunn, Ltd. continues to employ company aircraft to fly inclusive tours from London (Northolt) to Geneva. An interest is taken in Croydon-based **Morton Air Services, Ltd.** On May 14, the Dove I *Sky Muse*, is lost in a Mount Coron crash. Three of the ex-KLM (**Royal Dutch Airlines, N.V.**) DC-4s enter service in the spring, followed by the fourth in September, and are employed to provide **British Overseas Airways Corporation (BOAC)** replacement flights to Bahrain and Abadan.

The Lancastrians *Sky Consort*, *Sky Envoy*, *Sky Ruler*, *Sky Minister*, *Sky Trainer*, and *Sky Envoy* are, like the DH-89A *Sky Trail* and the DC-3 *Sky Liner*, sold during the summer. Another York I is purchased in October. On November 16, three Avro Yorks begin participation in the Berlin Airlift, flying from Wunsdorf. On December 16, a company York makes the 5,000th airlift landing by a civilian aircraft. The three-ship DC-3 fleet of **Air Contractors, Ltd.** is acquired in December; these are christened *Sky Dispatch*, *Sky Lancer*, and *Sky Warrior*.

A total of 9,622 passengers are flown on the year.

On January 2, **1949**, four Avro Lancastrian tankers are assigned to the Berlin Airlift.

The C-54A *Sky Wisdom* with 9 crew and 44 passengers is lost while on initial approach to Castle Benito Airfield, Libya, on February 4 (one dead). While on approach to Gatow Airport in Berlin on March 15, the Avro 685 York I *Skyway* with three crew, crashes; there are no survivors.

Two Lancastrians, the *Sky Consort* and *Sky Kingdom*, are purchased in April. Service in the Berlin Airlift continues, but not without loss.

The Avro 685 York C.1 *Sky Dominion*, with three crew, is lost at Neustadt, Germany, on June 19; although the plane must be written off, there are no fatalities. The Avro 691 Lancastrian 4 *Sky Scout* with four crew, is damaged beyond repair while landing at Berlin's Gatow Airport on June 26.

During the last eight months of the commercial phase of the Allied operation, Skyways, Ltd.'s Lancastrians mount 1,655 sorties and the Yorks 1,081; together, the planes fly a total of 23,488 tons of fuel and supplies into West Berlin.

Meanwhile, during the year, charters are flown to Mombasa, Dar es Salaam, Mozambique, Lourenco Marques, Durban, and the Far East. The Mauritius route is closed, but two DH-104s are stationed in India. Late in the year, **British Overseas Airways Corporation (BOAC)** assumes responsibility for those routes it had contracted out to Skyways, Ltd. earlier. As a result of this move and the end of the Berlin Airlift, the independent is forced to lay off some 400 employees and retire its Lancastrians. Enplanements for the year are 13,786.

In February 1950, the carrier's three DC-4s are purchased by **Air France**. The **Morton Air Service, Ltd.** interest is sold. On March 1, the company is liquidated by its owners and all of the Lancastrians, Yorks, and most lightplanes are sold in April. Capitalized at £157,500, a new Skyways, Ltd. is registered on March 31 to assume the business of the old. With six DC-3s and the board of directors carried over, revenue flight operations are resumed from London to Nairobi on May 14. Business remains slow, and by year's end the fleet consists of just 2 Douglas transports.

These are operated during 1951 exclusively in Kuwait on behalf of the Kuwait Oil Company. In June, the two DC-3s in Kuwait are sold and the company, although remaining in existence, ceases flying after return of a leased **Crewsair, Ltd.** DC-3 in December.

In March 1952, Skyways is purchased for some £157,000 by the **Lancashire Aircraft Corporation, Ltd.**, with the parent company being re-named **Lancashire Aircraft Corporation and Skyways, Ltd.** LAC & S now transfers to its new subsidiary its own fleet of 20 Avro Yorks and 3 ex-military Handley Page Halifaxes, concentrating on single- and twin-engine operations. Skyways, Ltd. now relocates its base of operations to Bovington Airport. In pre-merger Skyways, Ltd. livery, the Yorks resume the Ministry of Defence troop-carrying contracts of **Lancashire Aircraft Corporation, Ltd.**, with the first plane departing for the Caribbean on June 2.

In July and August, other Yorks fly charters from England to Helsinki for the Olympic Games. Among the various new charter destinations now added are Stockholm, Amsterdam, Bangkok, Hamburg, Cairo, and Dublin. In October, operations are transferred from Bovingdon to London (STN).

On November 25, **Eagle Aviation, Ltd.**'s five Yorks are purchased for £160,000, along with an Air Ministry troop-carrying contract to Rhodesia for air cadets, making Skyways, Ltd. the world's largest operator of the type. On December 12, the Halifax *Air Voyager* is lost in a Blackpool crash; the Halifax, *Air Regent*, is now withdrawn.

A total of 40,000 troops are carried on the year.

On February 3, 1953, a York is lost over the Atlantic while en route to Gander (39 dead). During the same month, the Air Ministry's Rhodesian contract is cancelled in the face of training cutbacks. In April, the final Halifax, *Air Trader*, is withdrawn and the carrier's Yorks make 11 troop-carrying flights to Nairobi as British troops are sent in to deal with terrorists.

Two more Yorks are added to the fleet in July. Every-tow-weeks, low-fare Colonial Coach or "Crusader" services from the U.K. to Cyprus via Malta commence on November 11.

Enplanements during the 12 months are 71,736.

The U.K.-Nicosia "Crusader" frequency is increased to weekly in 1954. An Avro 685 York C.1 with three crew is lost at Kyritz, Germany, on June 26; there are no survivors.

In March 1955, the Bibby Line purchases control of Skyways, Ltd. and capitalization is increased to £315,000. The former **British Overseas Airways Corporation (BOAC)** Handley Page HP-81 *Hermes* 4s *Hanno*, *Heracles*, *Hector*, *Herodotus*, *Hesperides*, *Hestia*, *Hera*, *Helios*, and *Honor* are acquired and begin flying inclusive-tour commercial charters. On June 10, the *Honor* is leased to **Middle East Airlines, S.A.L.** (1). In late summer, the subsidiary **Skyways Coach-Air, Ltd.** is formed.

Two DC-3s are transferred from **Lancashire Air Corporation, Ltd.** and employed to launch, in association with **Skyways Coach-Air Ltd.** but still in LAC colors, Coach-Air London-Paris proving flights on September 22. Following proving flights that continue until September 24, the subsidiary's two DC-3s, piloted by Capt. J. S. Morgan and E. R. Skemp, introduce the scheduled Coach-Air concept on September 30 over a route London and Lympe to Beauvais, Tille, and Paris.

Only the Lympe-Beauvais and Tille segment is flown, the remaining portions of the journey being traversed by motor bus. By December, the HP-81s have largely replaced the Yorks on MOD "trooping" charters.

Enplanements for the year total 35,574.

A bomb explodes in the forward cargo compartment and destroys a *Hermes* 4 at Nicosia, Cyprus, on March 4, 1956. There are no injuries reported from the incident.

Between November 16 and December 14, DC-3s make four roundtrips U.K.-Vienna, lifting out Hungarian refugees. In December, the **Lancashire Aircraft Corporation, Ltd.** is sold to Britavia Group, but Skyways, Ltd. is not a part of the purchase.

Avro Yorks commence London-Singapore freight service on behalf of **British Overseas Airways Corporation (BOAC)** in early 1957. London-Vichy Coach-Air frequency is inaugurated on June 28, the Lympe-Vichy segment being flown. When the last two Avro Yorks are withdrawn from **British Overseas Airways Corporation (BOAC)** service on November 22, they are immediately purchased by Skyways, Ltd.

On April 1, 1958, the *Hermes* 4 *Hera*, with three crew and undergoing tests, crashes at Meesden Green near London (STN); there are no survivors.

After a decade of service as a flying test bed for the Armstrong-Siddeley Motors, Ltd. Mamba turboprop engine, a C-47, reconverted to civil DC-3 status with its original Twin Wasp radials reinstalled, is purchased on June 4. Promoted by Eric Rylands, Skyways Holding Co., Ltd. is formed and in November, purchases 80% of the stock of **Bahama Airways, Ltd.** from BOAC Associated Companies. **Bahama Airways, Ltd.** is renamed **Skyways (Bahamas), Ltd.** The *Honor*, leased to MEA three years earlier, is withdrawn in December and scrapped.

Although the sale does not take effect until April 1, 1959, **Skyways (Bahamas), Ltd.**, employing *Hermes* 4s, launches service Nassau-Miami, West Palm Beach, and Fort Lauderdale in late winter. The American CAB raises questions concerning traffic rights and the HP-81s prove more and more unsuitable to their routes as the year wears on. In May, a letter of intent is signed with Avro for the purchase of three of its new turboprop-powered Model 748s.

Chartered Lockheed L-749As replaces the *Hermes* 4s as of July 25 on the parent's London-Singapore all-cargo service, now being flown under contract to **British Overseas Airways Corporation (BOAC)**. The *Hermes* 4 *Horatius*, *Herodotus*, and *Hesperides* are scrapped at year's end.

The *Hermes* 4 *Hector* is leased to **Bahamas Airways, Ltd.** for a year in January 1960. Later increased to twice weekly, weekly L-749A contract flights are inaugurated on April 26, London-Malta and Tunis on behalf of **British European Airways Corporation (BEA)**, replacing the long-haul Singapore service provided to **British Overseas Airways Corporation (BOAC)**.

The HP-81 *Heracles* is damaged beyond repair in a landing at London (LHR) on March 8. Passenger traffic on the Nassau-Florida route having eroded during the year, BOAC Associated Companies, in December, elects to repossess its former **Bahama Airways, Ltd.** subsidiary, thereby forcing **Skyways (Bahamas) Ltd.**, to cease trading.

The fleet in 1961 includes 4 L-749As, 5 *Hermes* 4s, 7 Avro Yorks, 4 DC-3s, and 1 DH-89A; the *Hermes* 4s are sold to **Air Safaris, Ltd.** in March. In September, Eric Rylands purchases the Bibby Line's shares and organizes the holding company Eric Rylands, Ltd. to control Skyways, Ltd. and **Skyways Coach-Air, Ltd.**

The **British Overseas Airways Corporation (BOAC)** Far Eastern freight contract ends on March 31, 1962 and one L-749A is returned to the flag carrier. Having received its first aircraft the previous month, **Skyways Coach-Air, Ltd.** on April 17 becomes the first U.K. operator of the Avro 748, placing it into service on cross-Channel flights between Lympe and Beauvais. On September 1, Skyways is purchased by **Euravia, Ltd.**, but is allowed to continue certain charter operations under its presale identity; however, the subsidiary **Skyways Coach-Air, Ltd.** is not part of the acquisition.

In its last complete year of operations, Skyways, Ltd. in 1963 transports a total of 12,660 passengers and 80 tons of freight. All Skyways scheduled and charter work are assumed by **Euravia, Ltd.** in April 1964. The last York is retired on October 8.

SKYWAYS (EAST AFRICA), LTD.: Kenya (1948–1951). SEA is established at Nairobi at the beginning of 1948 and employing a Douglas C-47A, inaugurates scheduled flights to Mauritius via Dar es Salaam and Tananarive on January 13. Flights continue until 1951.

SKYWAYS AVIA, A.B. See **SKYWAYS EXPRESS, A.B.**

SKYWAYS AVIATION: United States (1967). Skyways Aviation, the FBO at Orlando, elects to begin a scheduled air taxi service in 1967. Employing a Cessna 310, the company duly inaugurates frequencies to local destinations; these cannot, however, be maintained through year's end.

SKYWAYS CARGO AIRLINE, LTD.: United Kingdom (1971–1980). Formed in April 1967 as the Lympne Airport-based travel agency of **Skyways Coach-Air, Ltd.**, the company is reformed in early February 1971 following the collapse of its parent on January 21. The new owner, **Air Freight, Ltd.**, which had purchased three Douglas DC-3s from **Skyways, Ltd.** in 1970, now acquires the cargo portion of that airline.

Ownership is divided between Eric Rylands, Ltd., Sea Freight, Ltd., and Beauvais Transit, S.A. The new subsidiary begins all-freight operations on February 21. Exeter-based **South-West Aviation, Ltd.** is taken over in 1973.

Following the closure of Lympne Airport in November 1974, the base of operations is transferred to Lydd Airport, near Rye, Sussex. **Air Freight, Ltd.** is reformed and is renamed **Skyways Cargo Airline, Ltd.** in May 1975. Chairman Eric Rylands and Managing Director T. C. Beddowes now oversee a workforce of 150. The company's five DC-3s continue to maintain scheduled frequencies to Antwerp and Beauvais. Two more Douglas transports join the fleet, making SCA the largest DC-3 operator in Europe.

Flights continue apace in 1976–1979; however, the carrier is unable to withstand the costs associated with the fuel situation in the latter year and must cease operations in 1980.

SKYWAYS COACH-AIR, LTD.: United Kingdom (1962–1972). On September 1, 1962, **Skyways, Ltd.** is purchased by **Euravia, Ltd.**, however, its subsidiary **Skyways Coach-Air, Ltd.** is not part of the acquisition. At the time of the changeover, the **Skyways Coach-Air, Ltd.** fleet is comprised primarily of Douglas DC-3s and two new Avro, later Hawker Siddeley, 748s. A third HS 748 is acquired in April 1963. Two Douglas DC-3s, converted into freighters, begin all-cargo Lympne to Beauvais service in the spring of 1964.

In June 1965, HS 748 coach-air service is initiated Lympne to Tours and Vichy. To replace capacity lost when an HS 748 is leased to **Leeward Islands Air Transport, Ltd.**, a Fokker F.27-100 Friendship is chartered for the summer from **Schreiner Airways, B.V.**

An HS-748-1A with 4 crew and 48 passengers is destroyed as the result of a bad landing at Lympne on July 11; there are no fatalities. It is replaced by an HS 748 leased for a month from the manufacturer.

A C-47B with 3 crew and 29 passengers is destroyed as the result of a bad landing at Le Treport, France, on December 17; there are no fatalities.

There are no service or fleet changes in 1966, but in March 1967, two HS 748s are purchased from **BKS Air Transport, Ltd.** Transport Holdings Company purchases 50% interest in the carrier in October and now begins loaning the airline £1 million per year.

In April 1968, Lympne Airport, now with a concrete runway, is renamed Ashford Airport. During the summer tourist season, an Airspeed AS-57 Ambassador and an extra HS 748 are chartered from **Autair International Airways, Ltd.** Ford Motor Company underwrites

a twice-daily London (STN)–Cologne HS 748 service in January 1969. In November, another HS 748 is purchased.

When it is unable to obtain another loan installment in the winter of 1970, the carrier is forced to cease trading on January 20, 1971. Backed by Sterling Securities, a group of investors, led by former **Skyways Coach-Air, Ltd.** Commercial Manager John Knox, purchases the passenger portion of the defunct airline and four HS 748s late in the month,

renaming it **Skyways International, Ltd.** Scheduled operations resume on February 8, Ashford–Beauvais.

In February 1972, **Dan-Air/Dan-Air Services, Ltd.** enters into negotiations for the purchase of the carrier, successfully completing a £650,000 deal on April 12. **Skyways International, Ltd.** is briefly known as **Dan-Air Skyways, Ltd.**, but is quickly thereafter integrated.

SKYWAYS ENTERPRISE, A.B.: Flyfaltsgatan 31, Torslanda, S-41337, Sweden; Phone 46 31 92 60; Fax 46 31 92 34 34; http://www.flying.se; http://www.flygtorget.se/flygbolag/blue_index.html; Code F3; Year Founded 2000. In 1998, founder Eigil Jakobsen is president of **Flying Enterprise, A.B.**, with Alf Lindqvist as chairman. The employee population numbers 103 and the fleet comprises 3 Piper PA-31-350 Navajo Chieftains, 2 Metro IIs, 3 British Aerospace BAe Jetstream 31s, 3 Shorts 360-300s, and 1 Shorts 330. Destinations visited include Gdansk, Halmstad, Jonkoping, Skovde, Stockholm (Arlanda and Bromma Airports), and Visby.

To make up for the loss of feeder services provided by **Air Botnia, A.B.** before its purchase by **SAS (Scandinavian Airlines System)**, **Finnair O/Y** enters into an arrangement with **Flying Enterprise**. Four SAAB 340s previously employed by **Finnaviation, O/Y** are sold to the Swedish regional, and then wet-leased back to **Finnair**.

This new approach to covering Finnish domestic service does not prove profitable and **Finnair O/Y** serves notice that it would like to terminate its arrangement at the end October 1999. That date will actually be missed by six months.

During the fall of 1999, President Jakobsen enters into negotiations with the large Swedish regional **Skyways, A.B.** concerning a possible equity stake or corporate takeover. On January 18, 2000, **Skyways Holdings, A.B.** agrees to purchase 900,000 A shares of **Flying Enterprise, A.B.** from Tippi Fastighets, A.B. for SKr 62.50 per share; B shares will fetch SKr 60 per share. The board of directors approves of the sale at a special meeting on February 15. The remaining B shares are purchased from other shareholders and the entire transaction is completed by February 28.

Renamed **Skyways Enterprise**, the company's agreement with **Finnair O/Y** is cancelled during the first week of March, leading to termination of the wet-lease service operated by **Flying Enterprise** from Helsinki to Mikkeli.

On October 1, three other **Skyways, A.B.** subsidiaries, **Highland Air, A.B.**, **Air Express I Norrkoping, A.B.**, and **Airborne of Sweden, A.B.**, are combined to form Hultsfred-based **Skyways Regional, A.B.**

Skyways Enterprise continues to operate as a wholly owned subsidiary, concentrating on feeder traffic from Stockholm's Bromma Airport.

SKYWAYS EXPRESS, A.B.: Box 915, Arlanda, S-19586, Sweden; Phone 46 (8) 595-13500; Fax 46 (8) 595-13590; http://www.skyways.se; Code JZ; Year Founded 1993. On October 15, 1992, the troubled Swedish commuters **Avia Airlines, A.B.** and **Salair, A.B.** effect a merger. This union is upgraded in early 1993 when **Salenia, A.B.**, the family shipping and offshore energy industry concern that owns the latter, purchases the enlarged carrier and renames it **Skyways Avia, A.B.** Former **Malmo Aviation, A.B.** executive Jan Palmer is named president/CEO.

The fleet of the large regional now includes 6 SAAB 340As and 4 Shorts 360-300s. A number of new routes are added. Markets served from Stockholm (Arlanda), Linkoping, Norrkoping, Orebro, and Visby now include Copenhagen, Kalmar, Linkoping, Mora, Norrkoping, Stockholm, Riga, and Visby.

Enplanements total 42,000 and despite the elimination of Saturday and Sunday flights, a loss of \$5.3 million is taken.

Airline employment stands at 175 in 1994. The Shorts turboprops are replaced with two more SAAB 340As. Employing a single SAAB 340QC, night freight flights are inaugurated from Stockholm to Sundsvall and Lulea. Using Stockholm's Bromma Airport located downtown as an alternative to Arlanda Airport, the company signs a feed agreement with

Deutsche Lufthansa, A.G. and begins to compete with **SAS (Scandinavian Airlines System)**.

Enplanements jump to 318,964, revenues are \$38.6 million, and there are profits: \$1.1 million (operating) and \$546,000 (net).

In January **1995**, a Fokker 50 is wet-leased from **Flugfelag Islands, H.F./Icelandair**. It is joined in May by the first of the new Fokker 50s and placed in service from Stockholm's Arlanda Airport to Borlange and Visby in Gotland. The fleet is also increased by 13 SAABs and by the second Fokker 50, which is delivered in August. A bright new livery is introduced in September.

Destinations visited in **1996** include Arvidsjaur, Borlange, Copenhagen, Gallivare, Kramfors, Lycksele, Orebro, Pori, Storuman, Trollhattan, Vilhelmina, and Visby.

Enplanements for the year total 565,830.

In order to guarantee itself feed, the company, in March **1997**, takes 91% majority ownership in another regional, **Highland Air, A.B.** The Highland company name and management remain unchanged.

Acting on behalf of **Kendell Airlines (Pty.), Ltd., Ansett Australia (Pty.), Ltd.** agrees in May to trade four Fokker 50s to Skyways in exchange for four SAAB 340As.

New routes opened during the year include Borlange to Copenhagen, Stockholm (Arlanda) to Bergen and Jyvaskya, and Goteborg to Umea and Sundsvall. Twice-daily roundtrips between Malmo and Vasteras commence on October 13.

Passenger boardings during the 12 months increase 18% to 667,520.

Destinations visited in early **1998** include Arvidsjaur, Bergen, Borlange, Copenhagen, Gallivare, Goteborg, Hultsfred, Kiruna, Kramfors, Linkoping, Lycksele, Malmo, More, Orebro, Oskarshamn, Pori, Stockholm (Arlanda Airport), Storuman, Sundsvail, Trollhattan, Umea, Vasteras, Vilhelmina, and Visby.

At the request of officials in Gallivare, a second daily Fokker 50 roundtrip is initiated on January 12 between that city and Stockholm (Arlanda). Twice-daily J-32 return service is inaugurated by the **Highland Air, A.B.** subsidiary on February 16 between Malmo and Orebo, while the number of daily roundtrips from Malmo to Vasteras is boosted from two to three.

On April 29, a 25% stake in the carrier is purchased by **SAS (Scandinavian Airlines System)**. Against the advice of some of his closest advisors, Chairman Palmer pushes the arrangement as a measure to ensure the airline's future development and to end a period of aggressive, if not always successful, competition with the multinational major. Skyways becomes a regional partner of SAS (which is allowed to nominate one member to the Skyways Holding board), retaining its independence and even the livery on its airplanes. A strategic marketing pact is signed between the two airlines under which the two begin to code-share and sell tickets on each other's flights; Skyways is able to participate in the SAS EuroBonus frequent flyer program.

An order for two Embraer ERJ-145 ExpressJets is placed on October 15, together with three options. On October 2, Skyways purchases **Air Express I Norrkoping, A.B.** from Thomas Sjo, intending to maintain the Air Express identity and expand its route network so as to more effectively feed the new parent at Stockholm.

The first two ERJs arrive in late November and early December.

Enplanements during these 12 months total 759,000 on 40,983 scheduled departures. Revenues jump 24% to SKr 879 million and a net profit of SKr 41 million (\$4.9 million) is generated.

The workforce at the start of **1999** totals 513, a 7% increase over the previous year. Plans are announced for the recruitment of 40 new employees to handle connections at Arlanda Airport, where Skyways is now the second-largest operator in terms of takeoffs and landings, and 20 for Gothenburg.

New twice-daily ERJ-145 international services, operated in cooperation with **SAS (Scandinavian Airlines System)**, are inaugurated on January 11 from Goteborg to Helsinki. Goteborg's Landvetter Airport becomes a new RJ second hub for the company and a viable alternative to Stockholm's Arlanda Airport.

At the end of March, ERJ services are launched from Goteborg to Brussels and from Stockholm to Vaasa, Pori, and Bergen, from Vasteras to Oslo, and from Linkoping, Vaxjo, and Borlang to Copenhagen. Orders are placed on April 12 for two more ERJ-145s.

Total acquisition of **Air Express I Norrkoping, A.B.** and **Highland Air, A.B.** by Skyways is completed on May 12. Their routes are now completely integrated in Skyways' national and international traffic systems. The same day, Jan Palmer moves up to become president/CEO of Skyways Holding, A.B. He is succeeded as president of the airline by Skyways Flight School Vice President Kjell-Ake Westin; Peter Korning, Skyways production manager, becomes the new vice president.

As the result of a ruling by the EU Commission in June, previously expended environmental fees of SKr 27.5 million for 1995-1996 are credited to Skyways' revenues. Planning begins for a group stock exchange listing; however, the timing of the application to the Stockholm Stock Exchange is uncertain.

Employing the carrier's newly delivered fourth ExpressJet, new twice-daily ERJ-145 return services are introduced between Stockholm and Manchester on October 31. A morning service is offered on Saturdays and an evening service on Sundays. Also on Halloween, Skyways takes over the **SAS (Scandinavian Airlines System)** service from Stockholm (Arlanda) to Zurich.

When **Braathens, A.S.** stops flying from Halmstad to Stockholm, Skyways takes the route over, flying it with Fokker 50s. Enplanements for the year accelerate to 986,000 on 52,397 scheduled departures.

Airline employment totals approximately 700 at the beginning of **2000** and Skyways purchases total control of **Airborne of Sweden, A.B.** The Skyways Group now serves 32 destinations, 7 of them international. At this point, it moves to control another small feeder, this one facing some suspense, as it flies on behalf of rival **Finnair O/Y**.

On January 18, Skyways Holdings, A.B. agrees to purchase 900,000 A shares of **Flying Enterprise, A.B.** from Tipp Fastighets, A.B. for SKr 62.50 per share; B shares will fetch SKr 60 per share. The board of directors approves of the sale at a special meeting on February 15. The remaining B shares are purchased from other shareholders and the entire transaction is completed by February 28.

Rebranded **Skyways Enterprise, A.B.**, the company's agreement with **Finnair O/Y** is cancelled during the first week of March, leading to termination of the Helsinki to Mikkeli wet-lease service operated by Flying Enterprise. An ERJ-145 is leased on July 1 for six months to **British Midland Airways, Ltd.**, which will base it at Birmingham to operate weekday roundtrips to Brussels and Frankfurt.

On September 29, Skyways is named "Regional Airline of the Year" by the European Regions Airline Association (ERA).

On October 1, Highland Air, A.B. is combined with **Air Express I Norrkoping, A.B.** and **Airborne of Sweden, A.B.** to form Hultsfred-based **Skyways Regional, A.B.** The flagship airline, Skyways, is now renamed Skyways Express, A.B. The change has been initiated by Skyway Holdings to gain a more distinct identity in its markets. Skyways Express moves its offices to Arlanda Airport at Stockholm, while Skyway Regional's headquarters are located in the former Highland Air suites in Hultsfred.

Skyways Enterprise, A.B. continues to operate as a wholly owned subsidiary, concentrating on feeder traffic from Stockholm's Bromma Airport. Although planning continues, delivery of a group application for a listing on the Stockholm Stock Exchange is delayed.

The Skyways Group fleet at year's end includes 14 J-32s, 2 Dornier 228s, 4 ERJ-145s, 15 Fokker 50s, and 14 SAABs.

SKYWAYS INTERNATIONAL, LTD.: United Kingdom (1971-1972). When **Skyways Coach-Air, Ltd.** is unable to obtain another loan installment in the winter of **1970**, the carrier is forced to cease trading on January 20, **1971**. Backed by Sterling Securities, a group of investors led by the outgoing Commercial Manager John Knox, purchases the passenger portion of the defunct airline and four Hawker Siddeley HS 748s late in the month, renaming it Skyways International, Ltd. Scheduled operations resume on February 8 from Ashford to Beauvais.

In February 1972, **Dan-Air/Dan-Air Services, Ltd.** enters into negotiations for the purchase of the carrier, successfully completing a \$650,000 deal on April 12. Skyways International is briefly known as **Dan-Air Skyways, Ltd.**, but is quickly thereafter integrated.

SKYWAYS OF OCALA: United States (1981–1983). Bearing the name of its base city, Skyways is established in 1981 to provide feeder services as part of the **Air Florida** commuter network. Operations are undertaken with 3 Beech 99s linking Ocala with Fort Lauderdale, Orlando, Pensacola, Tallahassee, and West Palm Beach.

In 1983, the third-level operator is renamed **Skyway Commuter**.

SKYWAYS OF SCANDINAVIA, A.B.: Sweden (1986–1988). Late in 1986, **AMA Flyg Norwing, A.B.** is reformed and renamed. Scheduled commuter services continue to be operated linking Stockholm's Arlanda Airport with Gavle and Mora. Managing Director Alf Olsson's fleet comprises only 2 Fairchild Metro IIIs.

Malmo service begins and another Metro III is acquired in 1987. In 1988, the company is purchased by rival **Salair, A.B.** and merged.

SKYWEST AIRLINES: 444 South River Road, St. George, Utah 84790, United States; Phone (801) 634-3000; Fax (801) 634-3305; <http://www.skywest.com>; Code OO; Year Founded 1972. For \$100,000, J. Ralph Atkin purchases **Dixie Airlines**, based at St. George, Utah, on March 27, 1972 and renames the FBO/charter operation Sky West Aviation (later SkyWest, Inc.).

Employing a single Piper PA-34 Seneca piloted by Earl B. Snow (later Chief Pilot Snow), an air transport division launches thrice-weekly scheduled service over a St. George–Cedar City–Richfield–Salt Lake City route on June 22. During the next 6 months, a total of 256 passengers are transported.

The small Utah intrastate grows and in the first quarter of 1973 leases the first of five Piper PA-31-350 Navajo Chieftains; a second arrives in December.

The last three Chieftains arrive by April 1974. In May, the route network is stretched from St. George to Las Vegas and to Moab, Bullfrog, and Page, Arizona. Unhappily, this expansion proves very expensive. In August, now deeply in debt, Ralph Atkin turns to his 26-year-old son Jerry, a new CPA, for assistance, appointing him financial director.

The Moab destination is immediately closed and two Chieftains are sold. Creditors are convinced to give the company more time to meet its financial obligations.

Although a total of 11,887 passengers are flown on the year, there is a loss.

Raising \$150,000 in fresh capital in October 1975 alone, Jerry Atkin is able to effect a fiscal rescue and is named president/CEO.

Enplanements for the year total 15,072.

The fleet in 1976 includes 3 Piper PA-31-350 Navajo Chieftains. Supported by **Hughes Airwest**, SkyWest during the summer is able to win certification from the CAB.

Passenger boardings increase by 5% to 15,781. Freight traffic skyrockets 53% to 101,558 pounds. Revenues for the year total \$931,489 and allow a \$17,097 profit, the company's first.

In 1977, routes are operated with a fleet that has been increased to also include 10 Cessna 207As, acquired as part of the purchase of the Page-based FBO Lake Powell Air Service. These LPAS Cessnas fly charters on behalf of rafters traveling down the Colorado River.

Hughes Airwest retires entirely from a number of routes on August 1, the day SkyWest's certification takes effect. The commuter is able to replace Hughes and inaugurate services linking Cedar City and Page with Las Vegas and Salt Lake City. Following receipt of an airmail contract, a fourth Navajo Chieftain is acquired and a fifth is ordered.

Enplanements for the year total 16,034 and on income of \$775,000, a net \$50,000 profit is reported.

Airline employment is increased by 50% in 1978 to 75. During this year of the Airline Deregulation Act, plans are laid for expansion and or-

ders are placed for three Swearingen Metro IIs. A fifth Chieftain is received for the company's route network, along with Essential Air Service (EAS) subsidies that begin in the fall.

Passenger boardings jump 45.8% to 29,583 and among the bookings are the 100,000th (cumulative) passenger. Sky West's revenues shoot up 41.9% to \$1.1 million, allowing a 20% boost in net profits (\$120,900).

The number of employees shoots up by 53.9% in 1979 to 100.

A new half-million dollar headquarters and maintenance facility is occupied at the St. George base. Replacing service previously offered by **Frontier Airlines (1)**, new Chieftain routes are pushed to Phoenix from Flagstaff, Page, St. George, and Cedar City, while, on July 1 the first of three ordered Fairchild-Swearingen Metro IIs are placed on line.

As a result of the new services, passenger boardings rise 41.3% to 41,813. Revenues skyrocket 62.2% to \$1.95 million, but expenses associated with expansion cause an \$82,000 net loss.

The employee population rises 28.8% in 1980 to 130 and the 2 Metro IIs join the fleet in the early spring. SkyWest replaces the **Western Airlines** service between Salt Lake City and Pocatello in April and simultaneously opens service from Flagstaff to Las Vegas.

Traffic increases by 64.7% as 68,657 passengers are carried. On the financial side, revenues advance by 57.9% to \$6 million, but expenses jump 59.7% to \$6.2 million, leaving a \$200,000 operating loss.

Twenty new employees are hired in 1981 and orders are placed for a Metro III. Employing the **Republic Airlines** ESCORT system, reservations are computerized at the St. George headquarters.

A Cessna TU-206 collides over Fort Collins, Colorado, on April 17 with an **Air U.S.** Handley Page HP-137; there are no survivors.

Despite the PATCO air traffic controllers' strike, the number of passengers transported rises 13.9% to 78,234. Revenues push ahead by 16.1% to \$6.5 million, while expenses accelerate 16.4% to \$6.4 million, giving the carrier a \$32,610 net profit.

SkyWest officials enjoy a particularly satisfying year in 1982. Airline employment is increased 25% to 200 as services are started to Rock Springs, Wyoming and Vernal, Utah, replacing those previously offered by **Frontier Airlines (1)**.

To handle the increased load this good fortune is bringing, five more Metroliners are acquired, including two previously operated by **Rio Airways**. The EAS routes to Elko and Ely, Nevada, are taken over from **United Airlines**. The company now begins to keep track of its freight carriage, planning to expand in that area in the future. Most of its cargo consists of mail, express packages, and bank documents.

Enplanements leap 52.6% to 119,394 and a total of 1.23 million pounds of freight is transported. Operating revenues balloon 68.4% to \$9.68 million and although expenses rise 56.1% to \$9.05 million, the carrier is able to publish a record net profit of \$403,688, atop an operating gain of \$825,000.

The workforce swells 20.5% in 1983 to 229 and 2 Fairchild-Swearingen Metro IIIs join the fleet. Taking advantage of the withdrawal of **Republic Airlines**, the company, during the first quarter, inaugurates flights to Twin Falls, Idaho.

Passenger boardings move ahead by 36.7% to 163,960 and revenues ascend 41.2% to \$14.9 million. Expenses are kept in line and allow an operating profit of \$1.62 million. A second net profit record (\$1.1 million) is established.

Profitable throughout most of its history and particularly of late, the 590-employee SkyWest determines to expand again in 1984. Services are inaugurated to Pocatello and Idaho Falls, Idaho, and in addition, flights begin from Reno to Salt Lake City via Elko and Ely and from Salt Lake City to Grand Junction, Colorado. On August 1, frequencies are initiated between Las Vegas and Palm Springs, California.

The company's size is doubled overnight when the Palm Springs-based commuter airline **Sun Aire Lines**, together with its fleet of 12 Metro IIs, is purchased from the DiGiorgio Corporation on September 28 for \$7.9 million (\$7 million of which is borrowed money). Also absorbed is a Los Angeles hub, with spokes out to San Diego, Santa Barbara, Burbank, Ontario, Imperial Valley, and Phoenix.

With a combined total of 653,716 passengers booked (up 31.6% over the number carried separately the year before), the newly merged company ends the year as the 10th largest U.S. regional, providing service to 27 cities in Colorado, Arizona, Nevada, Utah, Wyoming, Idaho, and California. Revenues are \$32.41 million and allow profits of \$3.41 million (operating) and \$1.89 million (net).

The fleet in 1985 comprises 18 Fairchild-Swearingen Metro IIs and 12 Metro IIIs; orders are placed for 6 Embraer EMB-120 Brasilias. Late in the year, the St. George, Utah-based large regional enters into a code-sharing arrangement with **Western Airlines** effective the following spring.

A total of 691,236 passengers are flown on the year and revenues reach \$48.98 million. With costs held to \$44.24 million, the operating profit is \$4.74 million and net gain is \$2.47 million.

Airline employment rises 33.1% in 1986 to 821 and the fleet includes 15 Metro IIs. Aircraft are repainted in modified Western colors and "SkyWest Western Express" services begin to feed the major's principal hubs on April 1. Later in the month, a continuous maintenance program is implemented following inspection fines levied by the FAA. SkyWest goes public on June 26, makes its first public stock offering and employs the \$11.3 million in proceeds to order six Embraer EMB-120 Brasilias. Meanwhile, flights begin to seven new markets.

A week before Christmas, a Metroliner executing a missed approach at Salt Lake City strikes a 45-ft.-tall instrument landing system tower, tearing away the left main landing gear; unaware of the gear loss, the crew diverts to Pocatello, where a safe landing is performed. On a more positive note, the first Brasilia is delivered on December 24.

Enplanements rise 9.7% to 760,045 and revenues ascend 7.9% to \$52.95 million. Expenses jump 10.5% to \$49.05 million, but allow a \$3.89-million operating profit. Net gain climbs to \$3.14 million, a company record.

The payroll is increased by 6.6% in 1987 to 875. On January 15, Flight 1834 is on final approach to Runway 34 at Salt Lake City following service from Pocatello. The Metroliner, carrying two crew and six passengers, collides in midair with a private Mooney 20 carrying two passengers, which has flown directly into the path of the Swearingen at 7,000 ft. over Kearns; both aircraft crash and there are no survivors.

The fleet is increased during the year by the addition of five Brasilias, the first two of which enter service over the Palm Springs-Los Angeles-San Diego route on February 1.

In addition, the large regional also flies 25 Fairchild Metro IIIs and 13 Metro IIs. On April 1, **Western Airlines**, which has been purchased by **Delta Air Lines**, is absorbed into the Atlanta-based major. SkyWest now transfers its allegiance, becoming a "Delta Connection" carrier.

Nonstop EMB-120 service is inaugurated in July from Fresno to San Diego and Los Angeles. Nonstop frequencies are introduced in October from Twin Falls, Idaho, to Salt Lake City. During the remainder of the fall, service is reduced on a number of California routes with flights to Oxnard discontinued in early December.

A Metro III is forced to land on its belly at Yuma, Arizona, on December 20 after its landing gear jams; no injuries are reported.

Passenger boardings increase by 22.3% to 917,912, but freight falls 4.9% to 1.38 million pounds. Revenues rise 20.8% to \$50.8 million, but growth costs are higher. As a result, losses are suffered: \$2.46 million (operating) and \$1.45 million (net).

The workforce grows by 25.7% in 1988 to 1,100 and the fleet receives 7 new Fairchild Metro IIIs to replace some of its older Metro IIs. A new \$2.5-million, 56,000-sq.-ft. maintenance base is opened at Palm Springs, California, on January 1, with daily Brasilia frequencies introduced that day from Salt Lake City to Palm Springs. At this point, the company receives the 1987 "Regional Airline of the Year" award from *Air Transport World* magazine.

In late January, SkyWest sells 20% shareholding to **Delta Air Lines** for \$6 million. Significant capacity (two EMB-120s) is shifted from California to Delta's Salt Lake City hub in February and daily service is begun from there in March to Bozeman, Butte, Billings, Helena, and Missoula, Montana and Boise, Idaho. The route network grows to include

44 cities in 8 Western states, although only four stops (Cedar City, Ely, Page, and West Yellowstone) remain subsidized.

Customer bookings dip by 1.2% to 906,833, but cargo climbs 2% to 1.6 million pounds. Revenues ascend 23.1% to \$62.47 million, expenses are up 8% to \$57.5 million, and the operating profit is \$4.97 million. Net gain totals \$2.87 million.

Airline employment grows another 9.1% in 1989 to 1,000 and President Jerry Atkin's fleet now includes 36 Metros and 6 Brasilias. In March, the company joins the Canadair Regional Jet program, even before the jetliner program's official launch, by signing a memorandum of understanding for the purchase of 10 CRJs.

A new subsidiary, **Aviation Services West**, is created to provide charter and tour flights in Utah and Arizona, with special emphasis on the Grand Canyon. It launches revenue flights in the spring with a de Havilland Canada DHC-6-300 Vistaliner; its traffic figures will for years be reported with those of its parent.

Indeed, SkyWest's passenger boardings now surpass the million-mark in annual boardings for the first time (1,000,865) as a 10.4% boost in ridership is noted. Freight, on the other hand, declines 8.2% to 1,474,000 pounds. Revenues advance 16.3% to \$72.69 million, expenses jump 19.2% to \$68.55 million, and operating income dips to \$4.13 million. Net profit, however, improves to \$3.24 million.

The payroll is increased by 14.8% in 1990 to 1,286 as 4 Brasilias and 1 Metro are reinstated.

While on initial approach to Salt Lake City on January 15, a Metro III with 2 crew and 14 passengers strikes the ground near Elko in the zero visibility of a snowstorm; fortunately, there are no fatalities.

Also in January, daily nonstops are inaugurated from Los Angeles to San Jose, Telluride, Palmdale, and Inyokern.

New services are introduced in June from Salt Lake City to Sun Valley, Great Falls, and West Yellowstone.

Enplanements climb 9.5% to 1,096,381 and revenues are ahead by 20.3% to \$113.6 million. Expenses grow 19.4% to \$106.4 million and allow an operating profit of \$6.08 million. Net gain reaches \$4.55 million.

Company employment is increased by 2.7% in 1991 to 1,441 and 2 more Metros are obtained. On February 1, **USAir** Flight 1493, a B-737-3B7 with 90 aboard, lands atop the company's Flight 5569, a Metro III with 12 aboard, preparing to takeoff from Los Angeles (LAX) in clear weather. The jetliner bursts into flames and 34 aboard are killed, while all 12 on the smashed commuter plane perish. In terms of frequency, SkyWest is now the leading carrier operating out of Los Angeles (LAX). Meanwhile, ski season service begins to Telluride and Sun Valley and a new maintenance hangar is completed at Salt Lake City.

Bookings jump 8.5% to 1,264,718 and cargo rises 9.3% to 276,000 FTKs. After deducting expenses of \$104.62 million from total income of \$108.11 million, the operating profit declines to \$3.49 million. Net profit is cut to \$1.83 million.

The payroll grows a slight 0.5% in 1992 to 1,465 as 10 more Brasilias are placed into service. In February, ground is broken on a new \$3.6-million, 63,000-sq.-ft. corporate headquarters building at St. George. A special cash dividend of 2% per common share is declared in September for shareholders of record.

Passenger boardings incline upward 18% to 1,492,336 and freight climbs 21.3% to 318,000 FTKs. Despite stiff fare competition, revenues increase 10.6% to \$125.3 million and expenses are held lower. The operating profit is \$3.8 million and net gain totals \$1.99 million.

Airline employment is increased by 12.5% in 1993 to 1,800 and the fleet reaches 32 Fairchild and 19 Embraer 120s. In the spring, just as it is occupying its new headquarters, Aviation Services West purchases control of the Grand Canyon flight-seeing operations of pioneer operator **Scenic Airlines**. In May, a \$300-million order is placed for 20 EMB-120 Brasilias, with options on 20 more.

Destinations visited from hubs at Salt Lake City, Los Angeles, Las Vegas, and Phoenix include Bakersfield, Billings, Boise, Bozeman, Burbank, Butte, Cedar City, Elko, Ely, Flagstaff, Fresno, Grand Junction, Helena, Idaho Falls, Imperial/El Centro, Inyokern, Jackson, Las Vegas,

Los Angeles Orange County, Monterey, Ontario/San Bernadino, Page, Palm Springs, Palmdale/Lancaster, Phoenix, Pocatello, Reno, Sacramento, St. George, Salt Lake City, San Diego, San Jose, San Luis Obispo, Santa Barbara, Santa Maria, Sun Valley, Telluride, Twin Falls, Vernal, West Yellowstone, and Yuma.

In July, a \$170-million order is confirmed with Bombardier Regional Aircraft Division for 10 Canadair CRJ-100s, with options on 10 more also approved.

Customer bookings accelerate 9.4% to 1,632,425 and cargo climbs 28.5% to 2,897,296 pounds or 408,000 FTKs. Revenues swell 17.2% to \$146.8 million while expenses grow only 11.4% to \$135.33 million. As a result, operating income is boosted to \$11.46 million and net gain increases sixfold to \$6.7 million.

Airline employment is increased 13% in 1994 to 2,101. The first Canadair CRJ-100 Regional Jet is delivered in January and begins to operate service on February 15 from Palm Springs to Salt Lake City. On March 1, the "Delta Connection" partner begins to replace its major colleague in several markets. This day, thrice-daily nonstop roundtrips are launched from Salt Lake City to Boise. Additionally in early March, Canadair CRJ Regional Jet service begins to several Western cities, including Butte, Montana and Casper, Wyoming.

Daily nonstop roundtrips are initiated from the Utah capital on April 3 to Burbank, Glendale, Pasadena, Casper, Rapid City, Sioux Falls. Service from Salt Lake City to Butte, Montana, is expanded to thrice-daily nonstop roundtrips. The first of the new Brasilia order arrives in May. Four CRJ-100s are in service by midyear, with a fifth arriving before year's end.

Passenger boardings accelerate 13.6% to 1,730,993 and freight climbs 30.4% to 435,000 FTKs. Revenues leap up 28.1% to \$187.99 million while expenses move ahead by 20.7% to \$163.31 million. The pretax profit is up to \$21.02 million, while net gain doubles to \$13.64 million.

The workforce is reduced by 23.8% in 1995 to 1,600 as 5 more Canadairs join the fleet. On January 10, the company moves its operations at Salt Lake City International Airport from the end of Concourse B in Terminal 1 to the new Concourse E in Terminal 2. The new 23,500-sq.-ft. facility triples the airline's gates from 5 to 15 and reduces by half the time it takes to walk to Concourse D, where most connecting **Delta Air Lines** flights depart.

In early March, the company lowers its Salt Lake City fares by \$60 to \$80 to boost local reservations. A daily afternoon flight from Eugene, Oregon, to Salt Lake City begins on April 1.

When **Delta Air Lines** makes a large reduction in daily jetliner departures from Los Angeles (LAX) on May 1, SkyWest is called upon to increase its Los Angeles (LAX) daily departures from 106 to 115 by summer. The same day, the company replaces its last Metroliners and introduces into service four Canadair CRJ-100ERs and four Embraer EMB-120 Brasilias.

Daily "Delta Connection" roundtrips commence on December 1 between Colorado Springs and Salt Lake City.

The year is memorable for the fierce fare wars waged in the company's California market, contests SkyWest does not always win.

Still, enplanements accelerate 6.5% to 2,198,377 and revenues rise 7.2% to \$188.54 million. Costs climb 15.5% to \$178.85 million and these leave smaller profit lines. Operating gain drops to \$9.69 million and a net \$6.51-million profit is recorded. Both figures are later adjusted downward to \$5.71 million and \$4.36 million, respectively.

The employee population is increased by 49% in 1996 to 2,384 and the fleet now includes 50 Brasilias and 10 Canadair CRJ-100s.

On January 1, the third and fourth of seven daily roundtrips from Bakersfield to Los Angeles is upgraded to EMB-120s. Brasilias are simultaneously employed to upgrade the second of three daily nonstop roundtrips between Bakersfield and Sacramento.

On May 1, a fourth daily "Delta Connection" roundtrip service is inaugurated between Eugene, Oregon, and Salt Lake City; it will be maintained through September 30.

Without giving up its **Delta Air Lines** affiliation, SkyWest now also signs a code-sharing agreement with **Continental Airlines**, agreeing to provide "Continental Connection" service at Los Angeles.

During his approach to Los Angeles on November 29 following a flight from Bakersfield, the captain of Flight 5410, an EMB-120 with 2 crew and 16 passengers, sustains an eye injury when he is illuminated by what is believed to be a laser. A safe landing is made by the copilot and no other injuries are reported.

Customer bookings accelerate 17.6% to 2,592,245 and operating income jumps 12.5% to \$283.3 million. Expenses are \$267.89 million and a \$15.41-million operating gain is generated. A net \$10.11-million profit is also reported.

The workforce grows another 4.5% in 1997 to 2,300. When **United Airlines** early in the year elects to transfer code-sharing on eight routes out of Los Angeles to SkyWest, **United Express (Mesa Air Group)** files suit. Although Mesa will continue to seek "commercial resolution" of the move, UAL will eventually provide it with seven new California routes as compensation.

While climbing away from San Diego on a May 21 service to Los Angeles, "Delta Connection" Flight 724, an EMB-120ER with 3 crew and 14 passengers, loses power to its No. 2 engine because of fire. Once the fire is extinguished, the turboprop suffers a hydraulic system failure, necessitating a distress call. The plane is diverted to Miramar NAS, where a successful engine-out landing on a long, foamed runway is accomplished without flaps, brakes, or steering. The Embraer overruns the runway by 1,300 feet, coming to a stop into a grassy area. No injuries are reported.

In late June, Transport Canada issues an emergency airworthiness directive after a 14-inch crack is found in the bulkhead frame of a company CRJ-100ER, just before the wing. Having landed without incident, the aircraft's pilot had reported difficulty in maintaining full cabin pressure at altitude. Inspections in July will reveal cracks in 7 of the carrier's 10 Canadairs (cracks will also be found on 30 other jetliners worldwide). The manufacturer, Bombardier, makes field repairs that require 100 man-hours of work and cost C\$6,000 per plane.

Also during the summer, negotiations continue with **United Airlines** concerning the regional's assumption of additional markets. On July 22, a "United Express" pact is signed between the two that will take effect in October.

On October 1, the company, together with **United Express (Mesa Air Group)**, increases services from the Los Angeles hub by 73% to 175 daily flights; a significant portion of this growth is in 4 markets served to and from Los Angeles (LAX): Santa Barbara, Monterey, Palm Springs, and San Diego.

At the same time, a large number of new California destinations are now visited 29-times-per-day, including Carlsbad, Fresno, Imperial, Monterey, Orange County, Palm Springs, Santa Barbara, Visalia, and Utah. New services added include San Diego, San Jose, and St. George.

Point-to-point routes include Fresno and Burbank, Las Vegas and Fresno, Las Vegas and Palm Springs, Las Vegas and Santa Barbara, Palm Springs and Phoenix, San Diego and Burbank, San Diego and Santa Barbara, and Santa Barbara and San Jose.

Simultaneously, the carrier's marketing agreement with **Delta Air Lines** is reaffirmed when the commuter signs an updated "Delta Connection" contract. SkyWest will provide feed for Delta at both Los Angeles and Salt Lake City. Under this pact, the company will continue serve longer segments with the 10 Canadair CRJ-100ERs based at Salt Lake City.

Given the need for additional "United Express" capacity, it will no longer provide "Delta Connection" service from Las Vegas. Consequently, twice-daily roundtrips between St. George, Utah, and Las Vegas are discontinued, as is a daily roundtrip to the gambling capital from Bakersfield.

In mid-November, pilots at **United Airlines** vote to allow "United Express" partners to operate regional jets in UE colors. Meanwhile, as a "Delta Connection" affiliate, SkyWest continues to offer 39 daily nonstop flights from Los Angeles to Bakersfield, Fresno, Monterey, Palm

Springs, San Diego, and Santa Barbara. In addition, SkyWest operates 95 daily nonstop "Delta Connection" flights from Salt Lake City to 27 destinations.

For the year, passenger boardings accelerate 12.3% to 2,989,062.

Operating revenues advance 6.8% to \$297.09 million, while expenses inch up 0.2% to \$263.14 million. The operating gain more than doubles, rising to \$33.95 million. The net profit also doubles and then some, hitting \$21.94 million.

United Airlines announces in January 1998 that it has cancelled, effective May 30, its "United Express" arrangement with **Mesa Air Group**. This development rebounds to the benefit of SkyWest, which is named UAL's new code-sharing partner on February 10 and as a result, watches its stock shoot up 176% over the same period a year earlier, to 38 1/2.

During the last week of February, a \$51-million order is placed for 10 new EMB-120 Brasilas, with 40 options also taken. These will be delivered by October 1 and employed from the new hub at San Francisco. Arrangements also include the acquisition of 10 more EMB-120s from **Great Lakes Aviation**.

Brasilia deliveries begin in early March. On March 12, while riding his motorcycle some 40-mi. NE of San Diego, Chairman/CEO Atkin collides with an automobile. Suffering a broken left arm and leg, plus secondary internal injuries, Atkin is taken to a hospital at Escondido. Executive Vice President/Chief Operating Officer Ronald B. Reber takes over management of the airline temporarily.

The Los Angeles hub is expanded on April 23 when EMB-120 "United Express" flights commence to and from Bakersfield, Carlsbad, Fresno, Inyokern, Orange County, Oxnard, and Visalia. The added flights bring to over 600 the number of feeder services SkyWest flies daily on behalf of **United Airlines**.

It also offers 104 daily "Delta Connection" departures from Salt Lake City feeding the 176 daily **Delta Air Lines** flights from that Utah hub, the major's third largest. In total, SkyWest offers 300 daily "Delta Connection" departures to 40 cities in 12 Western states plus Canada.

SkyWest initiates 54 new roundtrip **United Express** services from Portland and Seattle the same day. Twelve daily roundtrip frequencies are undertaken from Seattle to Portland, Oregon, seven to Bellingham, six to Pasco and Yakima, and two to Eugene. From Portland, six to Eugene and Richmond/Bend, five to Medford, and two to Pasco and Redding.

On June 1, the company establishes a new West Coast hub at San Francisco from which to operate daily "United Express" EMB-120 services to 12 West Coast domestic destinations. Sixteen daily roundtrip frequencies from San Francisco are undertaken to Fresno and Sacramento, ten to Eureka/Arcata, eight to Redding, six to Chico, five to Bakersfield, Monterey, and San Luis Obispo, four to Modesto and Santa Rosa, three to Merced, and two to Santa Barbara. Seventeen new EMB-120s have are being obtained with which to support the growth.

In order to concentrate on its core business of providing regional airline service, SkyWest, on August 27, sells most of the assets of its **Scenic Airlines** subsidiary to **Eagle Canyon Airlines**. In making the announcement, Executive Vice President Bradford R. Rich notes that the Page, Arizona-based tour division will be retained.

"United Express" EMB-120 roundtrips between Seattle and Vancouver begin on October 25, six times a day.

After lengthy discussions, SkyWest and **Delta Air Lines** announce on December 11 that they will end the Los Angeles portion of their code-sharing agreement on April 4.

During the 12 months, customer bookings increase 52.5% to 4,422,328. Revenues jump 46% to \$388.62 million, while expenses are held to \$324.32 million. The operating profit doubles to \$64.3 million, while net gain climbs to \$41.83 million.

By the beginning of 1999, the workforce has been increased by 43.5% to 3,300.

A firm order is placed on January 22 with Bombardier, Inc. for 25 Canadair CRJ-200LRs, with options taken on 25 more. The request is

valued at approximately \$560 million. Deliveries will commence in July 2000 and continue for two years.

A malfunctioning propeller forces an EMB-120 to make an emergency landing at Los Angeles (LAX) on February 9. There are no injuries and all passengers are put aboard another aircraft to continue their journey.

With lease financing arrangement by Newcourt Capital, SkyWest is able, on February 24, to place a \$560-million order with Bombardier Aerospace for 50 CRJs.

The company's schedule is significantly increased when the summer schedule begins on April 4.

New "United Express" EMB-120 return service is initiated from Seattle to Spokane, six times a day. In addition, a seventh daily EMB-120 "United Express" roundtrip is laid on from Seattle to Yakima. Thrice-daily "United Express" EMB-120 return service is introduced from Portland to Eureka/Arcata, California. "United Express" service from Portland to Medford is increased to seven daily roundtrips.

Simultaneously, the Los Angeles operation is further expanded. For the first time since 1991, the company flies EMB-120 service between Los Angeles (LAX) and Santa Rosa, offering four-times-a-day "United Express" return service. Thrice-daily "United Express" Brasilia return flights also commence between Los Angeles (LAX) and Merced.

In addition, the number of daily EMB-120 "United Express" flights from Los Angeles (LAX) to Fresno is increased from 12 to 15 daily roundtrips. From Los Angeles (LAX) to Monterey from 13 to 15; from (Los Angeles) LAX to Palm Springs from 19 to 20; and from (Los Angeles) LAX to Santa Barbara from 14 to 15.

Electronic ticketing is introduced, beginning on April 26. Four days later, a follow-on order is placed with Bombardier Aerospace for 10 additional CRJ-200LRs. The \$230-million transaction brings SkyWest's firm CRJ order to 45 aircraft, 10 of which have so far been delivered. The carrier also has 35 CRJ options for a total of 80 firm and optioned aircraft.

Passenger boardings swell 23.2% to 5,447,000. Revenues jump 22.2% to \$474.77 million, while expenses are up 19.7% to \$388.09 million. The operating profit grows to \$86.68 million, while net gain reaches \$57.14 million.

Airline employment at the beginning of 2000 stands at 3,600, a huge 88% increase over the previous 12 months. The United Express operator offers a thousand daily departures to 63 cities in 13 Western states and Canada.

On April 2, the daily EMB-120 "United Express" return service from Salt Lake City to Twin Falls is increased from five roundtrips to six.

United Airlines and its "United Express" regional partners exchange several routes on June 8. Employing Embraer EMB-120s, SkyWest replaces United's 11 daily roundtrips between Monterey and San Francisco.

Skywest is named best-managed company among nonstate-owned regional-sized airlines in the "2000 Index of Competitiveness" published by *Aviation Week and Space Technology* on July 10.

On August 25, \$117 million is raised in a secondary public offering of 2.6 million shares of common stock at \$44.50 per share on the Nasdaq exchange. The issue represents 9.5% of the airline's stock, of which the total is now 26.35 million shares, and boosts the company's capitalization to \$1.2 billion. Underwriters Raymon James & Associates have an option to purchase an additional 400,000 shares to cover over-allotments. The nation's fourth largest regional airline will invest in some 40 new regional jets (provided it can secure scope clause concessions via **United Airline's** tentative labor contract signed the next day with ALPA), spare parts, and support equipment.

Twice-daily CRJ200ER "United Express" return service is initiated on October 1 from Denver to Fresno. On November 1, thrice-daily CRJ200ER "United Express" roundtrips begin from Denver to Bozeman, Montana. The twice-daily EMB-120 "United Express" service from San Jose to Santa Barbara is doubled to four roundtrips on November 13.

Daily roundtrip CRJ200ER "United Express" frequencies are initiated on December 1 from Salt Lake City to both Minneapolis (MSP) and Phoenix. The same day, the number of daily CRJ200ER "United Express" return flights between Salt Lake City and Albuquerque is boosted from two to three.

As the year ends, plans are well advanced for the initiation of new twice-daily CRJ200ER roundtrips on January 31 from Salt Lake City to Sacramento.

Customer bookings during these 12 months inch up 2.8% to 5,598,499.

SKYWEST AIRLINES (PTY.), LTD.: Perth Domestic Airport, Perth, Western Australia, 6105, Australia; Phone 61 (9) 478-9999; Fax 61 (9) 478-9928; Code YT; Year Founded 1967. Begun at Wittenoom, Western Australia, in 1964 as the FBO Skywest Aviation (Pty.), Ltd., the company sets up a charter operation in 1967 initially known as **Pilbarra Air Services (Pty.), Ltd.** In 1972, the company is relocated to Perth Airport at Redcliffe and renamed Skywest Airlines (Pty.), Ltd. Skywest wins a government contract in 1978 to provide Coastwatch services on behalf of the Customs Service. As the decade ends, the carrier is operating not only this duty, but some scheduled service and charter flights on behalf of area oil and mining companies.

In 1980, **Stillwell Airlines, Ltd.**, the largest commuter operator in the region, is purchased and merged.

While on final approach to Esperance on May 13, a Swearingen SA.226TC Metro with a pilot and 11 passengers, loses power in its right engine. A forced landing is made onto an adjacent field, where the landing gear collapses and the plane catches fire. All aboard are safely evacuated before the turboprop is consumed in the flames.

Airline employment in 1981 is 85 and the fleet comprises 1 Grumman Gulfstream I, 2 Cessna Citation IIs, 3 Beech Super King Air 200s, 2 Embraer EMB-110s, 1 Swearingen Metro II, 1 Mitsubishi MU-2N, and 2 GAF Nomad N-24As. The regional network links Perth with Albany, Bunbury, Esperance, Meekatharra, Mount Magnet, Telfer, Wiluna, Yeeleerie, and Rottneest Island.

Transwest Airlines (Pty.), Ltd. is taken over in January 1982 and two more companies are taken over in 1983: **H. C. Sleigh Airlines, (Pty.) Ltd.** in July and Tamworth-based **East-West Airlines (Pty.), Ltd.** in December. East-West, which has grown to become the nation's largest regional airline, is allowed to maintain its separate identity. Additional destinations now added include Geraldton, Kalgoorlie, Laverton, Leinster, Leonora, Marble Bar, Newman, Norseman, and Nullagine.

In 1984, rights are obtained to fly the trunk routes out of Perth to Karatha and Port Hedland. Three BAe Jetstream 31s, 1 Super King Air 200, 1 Cessna Citation II, 3 Britten-Norman BN-2 Islanders, 1 Cessna 402, 5 Cessna 310s, and 10 Aero Commander 500s are added as the Metro II, MU-2N, and 1 GAF Nomad N-24A are deleted. Orders are placed for 2 additional Jetstream 31s.

Following the conclusion of commercial operations by Sri Lanka's **Upali Aviation, Ltd.**, a de Havilland Canada DHC-6-300 Twin Otter is purchased from that operation in early 1985. Managing Director Bill Meeke's fleet is rationalized in 1987 around four Jetstream 31s and four Cessna 310s. However, in 1988, it is expanded again by the addition of two more DHC-6-300 Twin Otters and three GAF Nomad N-22Bs. During the following year, 1989, the decision is taken to rationalize the fleet.

In 1990, Robert E. "Bob" Mason is named general manager. The Twin Otters and Nomads are withdrawn. Services are maintained from Perth and Port Hedland to the ports of West Australia. The fleet in 1991 includes 1 leased DHC-8-102, 2 Cessna 402Cs, 5 Cessna 310s, and 4 British Aerospace BAe Jetstream 31s.

Enplanements total 77,274.

In 1992, the Cessna 310s are retired in favor of two more 402Cs. Passenger boardings inch downward 1.2% to 76,897. Operations continue in 1993 as an order is placed in December for a SAAB 340B and enplanements reach 72,900.

Skywest is sold into the **Ansett Australia (Pty.), Ltd.** feeder system in 1994. The SAAB order is cancelled as the carrier is provided with the

first of three Fokker 50s. The new turboprop is employed on services from Perth, Esperance, and the eastern gold fields region.

Customer bookings accelerate 19% to 90,000.

The second and third Fokker 50s arrive in 1995 and are employed to replace **Ansett Australia (Pty.), Ltd.** on several routes.

Passenger boardings increase 63.5% to 149,329.

Airline employment stands at 165 in 1996 and the fleet is enhanced by the addition of 3 more Fokker 50s.

Traffic gains are somewhat more modest this year, rising 9% to 236,648 passengers flown.

The workforce is 74 in 1997. When **Ansett Australia (Pty.), Ltd.** embarks upon a fleet rationalization beginning in May, it turns over its remaining Fokker to **SkyWest**.

The regional's passenger boardings jump 12.6% to 267,111.

During the spring, General Manager Robert Mason retires after 22 years service with Skywest and its predecessor. He is succeeded by William "Bill" Jauncey. Along with other Ansett regional airlines, Skywest adopts a new, "cleaner" look that will progressively include changes in livery, signage, and stationery. The Ansett Starmark will continue to be employed on all aircraft and the Skywest titles will be in the new Ansett typestyle, using Ansett blue typeface. It is anticipated that much of the makeover will be in place before Christmas.

Customer bookings during these 12 months fall 3.2% to 242,000.

The workforce totals 165 at the beginning of 2000. In mid-February, the aviation media reports that **Ansett Australia (Pty.), Ltd.** is considering a merger of its regional carriers Skywest, **Aeropelican Air Services (Pty.), Ltd.**, and **Kendell Airlines (Pty.), Ltd.** into a super regional airline; the enlarged Kendell would be led by Ansett executive Ronald Roalky. This move would take the major's two-year campaign to cut A\$55 million (\$31 million) in costs across its regional network to a new stage.

SKYWORLD AIRLINES: United States (1985-1990). The airline division of Denver-based Ports of Call, a travel club, changes its name in late 1985. The parent club, however, continues to operate under its **Ports of Call** moniker. Although traffic figures are not made available, Skyworld officials do report that the carrier's fleet of 3 B-707-123s and 1 B-727-100 have flown sufficient passengers to generate a \$1.6-million profit.

A total of 698.1 million revenue passenger kilometers (RPKs) are flown in 1986; however, expenses rise at such a pace that only a \$92,809 profit can be achieved.

The Stratoliner fleet is increased by seven units in 1987. A series of passenger charters are operated on behalf of the uncertified start-up Grand Pacific Airlines between Los Angeles and Pago Pago.

A total of 469,000 passengers are flown over 990 million RPKs, the latter being a 41.8% increase. Revenues climb to \$55.6 million and produce an operating profit of \$28,000. There is, however, a net loss of \$2.64 million.

When, in August 1988, the independent package tour operator Maptours fails to continue payments to Skyworld for the June-September charter flights for which it contracted between Boston and New York and Terceira and Lisbon, the airline is forced to cancel 22 flights. In addition, under DOT regulations, the charter carrier must operate 18 flights through September 19 and at its own expense (\$470,000) to return stranded passengers.

The 410-employee charter operator transports a total of 517,000 passengers, a 6.6% increase. Revenues jump 13.9% to \$63.3 million, but expenses accelerate by 21.2% to \$67.33 million, leaving an operating loss of \$4.02 million. The net loss triples to \$6.61 million.

The fleet in 1989 includes 5 B-707-320Bs, 3 B-707-123s, and the single B-727-100. On March 9, Skyworld files a \$1.07-million suit against Maptours for breach of contract. Through July, the last month it turns in statistics, the company flies 167,957 passengers. In August, the decision is taken to close down, largely because of the costs associated with maintaining the aging Stratoliners.

Just after New Year's 1990, Ports of Call travel club is sold for \$500,000 to Amtran, Inc., parent of **American Trans Air**, a much larger competing charter airline. The Skyworld fleet is liquidated.

H. C. SLEIGH AIRLINES (PTY.), LTD.: Australia (1972–1983).

This commuter carrier is formed at Essendon Airport, Victoria, in 1972 as the air transport division of H. C. Sleigh Aviation, Ltd., Australian distributor of GAF Nomad, Mitsubishi MU-2, Pilatus aircraft. With a fleet of 3 Cessna 404s and 1 Rockwell Commander 500, the carrier in 1973–1982 develops a service from Victoria to Flinders Island.

Flights from Launceston link the mainland with a Tasmanian network comprising routes to Hobart and to Devonport, Wynyard, and King Island. In July 1983, the operation is purchased by rival **SkyWest Airlines (Pty.), Ltd.**

SLICK AIRWAYS: United States (1946–1966). USAAF Air Transport Command pilot Earl F. Slick, with the assistance of Col. Samuel Dunlap III, arranges to lease the former military base at San Antonio, Texas, during the summer of 1945 and pays \$247,500 for a fleet of nine war surplus Curtiss C-46E Commandos from the Reconstruction Finance Corporation. The aircraft are available because they are in Nashville on VJ Day and are no longer required for lend-lease to China for its air force. During the fall, the transports, still wearing the Chinese blue and white livery (which will be retained), arrive in Texas. Slick himself is discharged from the service in December.

Slick Airways is incorporated at San Antonio in January 1946. Employing the Curtiss transports, Slick begins Newark to Texas service on February 20; transcontinental contract flights begin on March 4.

A C-46E with two crew aboard is lost in a landing accident at Dallas on December 10; there are no fatalities.

In the period between May 1947 and September 1948, government examiners find that the company flies 90% of its services between 10 major cities and offers only 37 flights to smaller, on-demand communities.

During this timeframe, four aircraft are lost in operational accidents.

On February 14 of the former year, a C-46E crashes while on final approach to Denver (two dead). Another C-46E with two crew and a passenger is lost on Blue Bell Knoll Mountain, Utah, on August 21 (three dead). A third C-46E with two crew is involved in a landing accident at Burbank, California, on September 17; although the aircraft must be written off, there are no fatalities.

A C-46E with two crew crashes at Port Columbus, Ohio, on May 16 of the latter year (two dead).

When the carrier is certified by the CAB on July 29, 1949, it is the nation's largest all-cargo airline, operating an owned fleet of 12 Commandos, plus 10 leased from the MATS. The company now receives government authorization to operate a southern transcontinental route from California to the East Coast via the south and southwest.

A Curtiss C-46E with two crew and a passenger is lost four km. NW of Cheyenne, Wyoming, on October 9; there are no survivors.

At the beginning of 1950, the company flies to 22 cities and employs trucks to visit 8 others. Fifteen C-46 Commandos are leased from the USAF on February 21.

The carrier flies a record 7.2 million ton-miles of cargo during the year's first quarter and registers 2.96 million ton-miles flown in June and 4.05 million in July.

Charging antitrust violations, the freight operator now sues a number of operators; these include **American Airlines**, **United Air Lines**, **Trans World Airlines (TWA)**, the air freight forwarder **Air Cargo, Inc.**, and **ATA**. The suit will not be successful.

A C-46E with three crew is lost at Newhall, California, on February 23, 1951; there are no fatalities.

Slick becomes the launch customer for the Douglas DC-6A Liftmaster, receiving the prototype on March 7. The carrier introduces the reworked passenger airliner, now freighter, into service on April 16 on its transcontinental route. During January–June, the company carries half of all-cargo transported industry-wide.

Slick Airways should have enjoyed a profitable and long history given its air freight stature at the beginning of the 1950s, but, unfortunately, it does not. Undiversified, it attempts to maintain itself exclusively on revenues from an air cargo industry still in its infancy. Although the internecine and dramatic rate wars of 1946–1947 are survived, due largely to its founder's management skills—and a \$3-million Slick family investment—the company is now forced to compete with the scheduled passenger airlines, which begin to concentrate on freight development.

All of the C-46s are withdrawn from scheduled operations in 1952, replaced by DC-6As.

A C-46F with two crew is lost at East Granby, near Bradley Field, Connecticut, on March 4, 1953; both crewmen are killed.

By late winter, Slick, suffering severe financial difficulty, is forced to seek a merger partner in order to survive. On March 26, company officials join Robert E. Prescott of **The Flying Tiger Line** in announcing a merger of the two carriers.

The union is approved by the CAB on January 5, 1954, and integration begins in February, but unhappily, CAB lower-echelon lawyers join the passenger airlines in objecting to the potential monopolistic threat from such an amalgamation. Meanwhile, the two carriers, faced with intense labor problems as a result of the termination of the government's Korean Airlift, are disappointed when the CAB defers issuance of a new certificate pending resolution of the late disputes. As the costs of the merger mount, it cannot be maintained and on September 20, the arrangement falls through. Slick must find another way to stay in the air.

Despite three years of effort, Slick is not financially able to maintain its scheduled freight service and so on February 24, 1958, these operations are suddenly abandoned. At the same time, an order for five Lockheed L-1049H Super Constellations made two years earlier is postponed. The available fleet now comprises 7 DC-6As, 8 DC-4s, and 13 C-46s.

Concentrating completely on contract flights, particularly those across the Pacific for the U.S. MATS, the carrier begins to approach self-sufficiency as the decade ends.

Three L-1049Hs are leased from Lockheed early in 1959 and two more are acquired from the Argentine carrier **Transcontinental, S.A.** The last of 856 Constellations to be constructed is an L-1049H delivered to Slick on September 30. Six Canadair CL-44D swing-tail freighters are ordered in October.

In July 1960, as a diversification hedge, Slick purchases the Illinois Shade Cloth Company for \$6.3 million and late in the following year, 1961, begins to receive the Canadair CL-44Ds.

Delivered on February 5, 1962, the first Slick CL-44D enters service on February 11 on a San Francisco to Manila military charter. Unhappily, the plane is badly damaged on April 14 when it overshoots its landing at Wake Island. Late in the month, Slick is able to resume scheduled transcontinental roundtrips. Having lost its Nos. 1 and 3 engines, a DC-4 crash-lands at Ackerly, Texas, on May 9.

Pleased with the first two Canadairs despite the operational failure of April, President Alvin Johnson orders two more in June, which are placed into operation by the end of September. Scheduled transcontinental cargo frequencies are resumed on October 1.

The two major domestic routes now operated are from New York to California via Indianapolis and from Chicago to Houston via Indianapolis. A holding company, the Slick Corporation, is formed to operate the airline and two nonaviation divisions as subsidiaries.

A leased L-1049H freighter with three crew and five passengers crashes while on final approach to San Francisco on February 3, 1963 (four dead).

In September, three L-1049Hs are leased from **World Airways**. Off to an apparent turnaround, Slick earns a net profit of \$113,608. Airline employment in 1964 is 906 and the carrier operates 24 aircraft. One of these, the former **United Air Lines** DC-4 *Mainliner Yosemite*, while on final approach to Logan International Airport on March 10, crashes into Boston Harbor (four dead); tail icing is the cause of the disaster. In April,

a Truck-Air program is started, allowing service to over 1,800 off-line communities.

The nosewheel of a DC-4 collapses following the plane's landing at Norfolk, Virginia, on November 19 and a new terminal is opened at Chicago toward year's end.

Revenues climb 19.3% to \$23.3 million. A net loss is taken by the airline, but is more than equaled by the holding company's profit from its two other segments.

Slick now falls upon hard times as costs override cargo-transport receipts. The CAB allows the company to suspend regularly scheduled services once more, on August 27, 1965. At this point, Slick's 240 employees have overseen the boarding of 9,252 passengers on the year. The three **World Airways** Super H Constellations are returned at year's end. A total of 174 million freight ton-miles are flown.

Eleven months later, on July 1, 1966, those assets being employed in Slick Corporation's airline operations are transferred to **Airlift International**. Thereafter, the onetime industry leader operates as a holding company for nonaviation related firms, while retaining only a minor stockholding interest in Airlift, itself destined for economic difficulties. The company's scheduled route certificate is passed to Airlift on July 22, 1968.

SLM (SURINAAMSE LUCHTVAART MAATSCHAPPIJ, N.V.): Dutch Guiana (1954–1975). Late in 1954, SLM (Surinaamse Luchtvaart Maatschappij, N.V.) is formed by the colonial government at Paramaribo to operate domestic feeder services in the colony of Dutch Guiana. A management contract is signed with **KLM (Royal Dutch Airlines, N.V.)** Lightplanes are employed to fly from the capital to the towns of Albina via Monengo in the south and Nickerie via Coronie in the north.

On August 30, 1962, SLM is completely taken over by the government and finally officially registered; it is now given a Douglas DC-3. The following year, the carrier acquires several Bell 47G helicopters that are employed for aerial spraying in the rice district near Wageningen and even beyond the border into Guyana.

Late in 1964, pooled West Indian service is inaugurated in cooperation with **ALM (Antillean Airlines, N.V.)**; destinations include Georgetown, Port of Spain, and Curaçao. Late in the decade, a DC-9 is leased from ALM and employed to start Paramaribo to Curaçao operations via Port of Spain.

Suriname gains its independence from Holland in November 1975 and on November 2, employing a DC-8-55F leased from **KLM (Royal Dutch Airlines, N.V.)**, begins service to Amsterdam as **SLM (Surinam Airways, N.V.)**.

SLM (SURINAME AIRWAYS, N.V.): Coppenaestraat 136, P.O. Box 2029, Paramaribo, Suriname; Phone (597) 465 700; Fax (597) 491 213; <http://www.sim.firm.sr>; Code PY; Year Founded 1975. When Suriname gains its independence from The Netherlands in November 1975, the colonial airline **SLM (Surinaamse Luchtvaart Maatschappij, N.V.)** becomes state owned; it is now renamed and designated the new national carrier. The **KLM (Royal Dutch Airlines, N.V.)** management contract is maintained.

Predating this move by three weeks, the carrier, on November 2, leases a Douglas DC-8-55F from **KLM (Royal Dutch Airlines, N.V.)**; christened *Sabaku* and painted in SLM colors, it is employed to launch flights to Amsterdam via Santa Maria in the Azores.

In 1976–1977, a DC-8-63 chartered from **KLM (Royal Dutch Airlines, N.V.)** replaces the DC-8-55F and the fleet is further augmented by the addition of two more leased aircraft: a de Havilland Canada DHC-6 Twin Otter and a DC-6A. The latter, configured as a freighter, is employed to start all-cargo flights to Miami via Curaçao.

International destinations flown to from Zanderij International Airport are Nieuw Nickerie, St. Eiland, Georgetown, Port of Spain, and Amsterdam. Domestic destinations served from Zorg en Hoop Airport include Apoera, Avanavero, Bakhuis, Djoemor, Ladouanie, and Monengo. Enplanements for the latter year total 103,116.

The workforce is increased in 1978 by 23.7% to 371 and route mileage is now 8,384. A 45% shareholding is taken in **Suriname Air Cargo**. The fleet now includes the leased Dutch DC-8-63, 3 DC-9-32s pool leased with **ALM Antilles Airlines, N.V.**, four leased Twin Otters, and two leased DC-6As. Orders are placed for three DHC-6s to replace the chartered Canadian turboprops. On approach to Paramaribo in bad weather after a May 5 flight from Willemstad, a DC-6A freighter with 3 crew strikes trees 1,800 ft. short of the runway and crashes; there are no fatalities.

Passenger boardings accelerate 27.9% to 143,018.

Led by President L. C. Johanns, a new government-backed management team takes over from **KLM (Royal Dutch Airlines, N.V.)** in 1979. The three owned Twin Otters are placed in service.

Passenger boardings jump 14.5% to 163,724.

A Paramaribo–Belem service is started during the summer of 1980 followed by new routes to Miami and Curaçao. Enplanements in 1982 total 120,292 and in 1983 117,397.

In 1984–1986, the fleet is altered to include two DC-8-62s leased from **KLM (Royal Dutch Airlines, N.V.)** and two Twin Otters. Port-au-Prince is added as a stop on the Miami route and the domestic network is reduced to five stops.

Financial difficulties plague the carrier in 1987–1988, but it is kept alive. While on final approach to Paramaribo on a June 7, 1989 service from Amsterdam, Flight 764, a DC-8-62 with 9 crew and 178 passengers flies below minimum altitude and strikes trees in the jungle, causing the aircraft to roll into the ground (176 dead).

One DC-8-62 is withdrawn in 1990, followed by the other in 1992. Withdrawal of the jetliner effectively ends the carrier's service to Amsterdam. A DHC-8-311 is chartered in 1993 and destinations now visited include Belem, Cayenne, Curaçao, Miami, and Port-au-Prince.

Two more DHC-6-300 Twin Otters join the fleet in 1994. By this time, the company enters into a block-space code-sharing agreement with **KLM (Royal Dutch Airlines, N.V.)** on the international route from Paramaribo to Amsterdam.

Although no changes occur in 1995, a McDonnell Douglas MD-87 is leased in 1996 to resume service to Miami and other regional destinations. The new route from Paramaribo to Miami, due to begin on April 1, must be delayed as the U.S. FAA, convinced that the MD-87 is not receiving proper maintenance, bars the plane from the U.S. In late June, Suriname contracts with **American Airlines** to handle the required servicing and upon its completion, the FAA ban is lifted.

Markets served in 1997 include Aruba, Barbados, Belem, Cayenne, Curaçao, Georgetown, Macapa, Miami, Paramaribo, Port-au-Prince, and Port of Spain.

On May 14, SLM and **KLM (Royal Dutch Airlines, N.V.)** expand their joint roundtrip services between Paramaribo and Amsterdam from twice-weekly to thrice-weekly. SLM and KLM introduce new, permanent low fares on flights between Amsterdam and Paramaribo as of November 1.

Flights continue in 1998–1999. Following a scheduling disagreement, the code-share with **ALM (Antillean Airlines, N.V.)** between Paramaribo and Miami ends on November 2. **Miami Air International**, which had wet-leased B-727-200s to ALM for the route, now transfers one aircraft to SLM, which employs it to inaugurate charters from Paramaribo to Miami via Curaçao. The company's DC-9-51 is employed elsewhere.

SLO (SURINAAMSE LUCHTVAART ONDERNEMING, N.V.): Dutch Guiana (1969–1981). **Suriname Air Cargo** is set up by Henry R. Goodman (99% shareholding) and Johannes Ziel (1%) at Paramaribo Airport in 1969 to offer cargo charter flights. Services are inaugurated with a single Douglas DC-7CF. Following the independence of Suriname in November 1975, **SLM (Suriname Airways, N.V.)** assumes a 45% interest with Mr. Ziel taking the remainder.

By 1981, the carrier has failed and its services have been incorporated by the state carrier.

SLOANE HELICOPTERS, LTD.: The Business Aviation Centre, Sywell, Northampton, England, NN6 0BN, United Kingdom; Phone (44) 1604 790595; Fax (44) 1604 790988; <http://www.sloanehelicopters.com>; Year Founded 1969. David George establishes Sloane Helicopters at Northampton in 1969 to provide rotary-wing sales, charter, engineering, and flight school services.

Over the next 30 years, Chairman George becomes the U.K. helicopter distributor for both Robinson and Augusta and opens three training facilities, as well as a secondary base at Son Bonet Airport, Palma de Mallorca, Spain.

David Morley is managing director in 1998–2000 and oversees the operations of those flying the company's Agusta 109, 2 Bell 206B JetRangers, and 6 each Robinson R.44 Astros and R.22s.

SLOCUM AIR: United States (1978–1984). Slocum is established at Miami in 1979 to provide scheduled daily roundtrip air taxi flights to the Bahamian destinations of Governor's Harbour, Marsh Harbour, North Eleuthers, Rook Sound, and Treasure Cay.

Operations continue into the new decade with 2 each Britten-Norman BN-2 Islanders and BN-2 Trislanders. The company also undertakes frequencies to the Florida cities of Fort Lauderdale, Fort Myers, Melbourne, Vero Beach, and Orlando. As a result of a FAA safety inspection in 1984, the four-plane airline is grounded and goes out of business.

SLOVAIR (1): Czechoslovakia (1969–1990). Based at Bratislava's Ivanka Airport, **Agrolet**, a specialized associate of the state carrier **CSA (Czechoslovak Airlines)**, is reformed on July 1, 1969 into the independent SlovAir. A variety of internal activities, 90% of which are the same as those previously offered by **Agrolet**, are undertaken on behalf of its government owners. These include charter and contract services, industrial support flights, aeromedical evacuation, and agricultural applications. Many are accomplished with the biplane Antonov An-2.

Employing a small fleet of Let L-210s and L-410s, scheduled air taxi feeder services are flown beginning in 1970–1971.

Flying from Prague to Marienbad on April 18, 1972, an L-410 is captured by two pirates, who shoot and wound the copilot before the pilot agrees to divert the aircraft to West Germany. On the ground beyond the Iron Curtain, the skyjackers surrender, seeking political asylum. Tried in a West German court, they will, instead, be sentenced to seven-years in prison each. One will later commit suicide.

En route from Marianske Lazne to Prague on June 8, an L-410 with 3 crew and 17 passengers is taken over by 10 of the customers, who demand to be flown to West Germany. When the pilot resists, he is killed; two other crew members are also hurt, leaving the copilot to fly the aircraft. On the ground in West Germany, the group asks for asylum. Instead, they receive prison terms of from three to seven years.

Flights continue in 1973–1975 and by 1976 the commuter services are taken over by **CSA (Czechoslovak Airlines)**. The fleet at this time comprises nearly 200 aircraft, including An-2s, Let Moravas, Cmelak Z-37s and Z-237s, Mil Mi-8s, and Mi-2s. These nonscheduled operations continue into the 1980s. One An-2 is destroyed in a crash at Smedava in August 1982 while spraying crops.

In 1987, Andrej Hubada succeeds Jan Mac as executive director and scheduled regional services are resumed with three L-200s; an L-410 joins the fleet in early 1988. Mac returns to his post in 1989 but relinquishes it to Lubomir Kovacik in 1990. In November, Slov Air joins with the Swiss regional **Crossair, Ltd.** to form **Tatra Air, A.G.** into which it is absorbed.

SLOVAIR (2): Ivanka Airport, Bratislava, 82312, Slovak Republic; Phone 42 (7) 29 1408; Fax 42 (7) 29 2314; Code SL8; Year Founded 1994. Slov Air (2) is set up at Koscie in July 1994 to provide domestic scheduled passenger services. Flights commence and continue with 5, later 3, Let L-410UVPs.

SLOVAK AIRLINES: Trnavska Cesta 56, Bratislava, 81002, Slovak Republic; Phone 421 (7) 525 4064; Fax 421 (7) 525 4042; Code 6Q; Year Founded 1997. Slovak is established in late 1997 to serve as flag carrier for the new Slovak Republic. A fleet comprising 2 Tupolev Tu-154Ms and 1 SAAB 340A are acquired and employed to launch both scheduled and charter flights on March 29, 1998. Scheduled destinations visited include Moscow and Tatry/Poprad; charters are operated to points in Russia, Cyprus, Greece, Italy, and Spain.

Enplanements total 84,000.

Flights continue in 1999–2000, during which years a third Tu-154M is acquired. Scheduled destinations now include Kosice, Moscow, and Munich.

During the spring of the latter year, the Poprad-Tatry bid for the 2006 Winter Olympic games is boosted via a special Tu-154 color scheme.

SLOVENSKA LETECKA AKCLOVA SPOLECNOST (SLS): Czechoslovakia (1939–1944). Following the German invasion of Czechoslovakia in March 1939, **CSA (Czechoslovak State Airlines)** is disbanded. To replace that national airline, **Deutsche Lufthansa, A.G. (DLH)** establishes this carrier at Bratislava to operate domestic scheduled services for the area recognized by the Reich as an independent Slovakia.

A mixed fleet is provided, including several Junkers Ju-86s, and operated under DLH direction on flights to Vienna and Berlin. The company also supports the Slovak Air Force.

The captive company ceases operations when Slovakia is invaded by the Soviets in the fall of 1944. Its assets will pass to the new **CSA (Ceskoslovenske Aerolinie)**, created on September 15, 1945.

SMB STAGE LINES: United States (1930–1990). This freight airline is originally established at Des Moines, Iowa, in 1930, to provide ground transport (taxi, then bus) under the name the Sedalia-Marshall-Boonville (SMB) Stage Lines. In 1950, the concern is awarded a U.S. Post Office mail contract; letter are hauled on company buses or consigned to already existing air carriers.

On June 9, 1966, this company forms an air transport division with which to operate air cargo flights and to participate in the U.S. Post Office's experimental Air Taxi Mail Program. Within months of start-up, the company's Beech 18s are flying a route network to Tulsa, Muskogee, and Dallas.

Airmail service between Des Moines and Spencer, Iowa, begins in July 1967 and within months, SMB is the largest operator in the program. On October 21, 1968, the company reaches an agreement with **Frontier Airlines (1)** to operate feeder passenger services to cities in Texas and Oklahoma.

Employing Beech 99s, these routes are only briefly flown before SMB reverts to just airmail and contract service frequencies. In 1969, a hub is established at Grapevine, Texas, and Beech 18 freighter flights are initiated from it to Muskogee, McAlester, Paris, and Dallas.

This carrier grows enormously during the next decade and acquires a fleet of turboprop freighters, including 15 Convair CV-600s (7 are purchased from **Trans-Texas International Airlines**), 11 Beech 18s, 3 Douglas DC-3s, and 6 Israel Aircraft Industries 1123 Westwind executive jets. Scheduled operations are initiated from a new base at Dallas (DFW); the privately owned operator, which also performs charter and contract services, transports 26,912 FTKs in 1978.

Windshield icing that restricts pilot visibility results in a DC-3 freighter with two crew landing 300 ft. short of the runway at Des Moines on December 2. Although the aircraft is badly damaged, there are no fatalities.

Destinations visited in 1979 include Austin, Chicago, Cleveland, Des Moines, Houston, Jackson, Kansas City, Memphis, Oklahoma City, Omaha, Pittsburgh, San Antonio, Temple, Tulsa, Waco, and Wichita. Cargo traffic jumps 47% to 50,779 FTKs.

The fleet is altered in 1980 to include 10 Beech 18s and 7 Convair CV-600s. As a result of the recession and rising fuel prices, freight drops by 21.6% to 39.8 million FTKs.

Four Beech 18s are retired in **1981**, succeeded by a single Lockheed L-188AF Electra.

Freight rises 30% to 52 million FTKs, while revenues accelerate 25% to \$15 million.

By **1985**, the fleet comprises 3 Beech 18s, 3 Convair CV-640s, 7 CV-600s, and 1 Lockheed L-100-20 Hercules and mounts scheduled freighter flights not only in the Southwest, but into the Midwest and East as well. Flights continue without incident in **1986**.

Having accidentally crossfed both engines on the right fuel tank, a CV-640 with two crew en route from Chicago to Oklahoma City on October 28, **1987**, becomes fuel exhausted and crashes near Bartlesville. Although the aircraft must be written off, there are no fatalities.

Two years later, in **1989**, flights are conducted with 3 Beech 18s, 1 leased Beech King Air 90, 14 CV-600s, 2 CV-600Fs, 1 CV-640, and 2 CV-640Fs. SMB is of the larger air operators unable to weather the **1990** recession. It is forced to cease operations after its parent, Landa Industries, declares Chapter XI bankruptcy.

SMOKEY BEAR AIR: 2100 Kachemak Drive, P.O. Box 457, Homer, Alaska 99603, United States; Phone (907) 235-1511; Fax (907) 235-1501; <http://www.xyz.net/~seldovia/sbayair.htm>; Year Founded 2000. The air taxi Smokey Bear Air is established at Homer in **2000** to offer daily Cessna 182 service to Seldovia, Port Graham, and Nanwalek. One-way fares to the former point are \$25, with a \$40 tariff for flights to the latter two. In addition to these regular flights, on-demand services are made to destinations throughout Alaska.

A homepage is opened on the World Wide Web; Claire McCann, Scott Cunningham, and Cliff Jeska alert readers that each passenger is allowed 50 pounds of free baggage and that packages weighing up to 50 pounds can be flown for \$10.

SMOLENSK AVIATION ENTERPRISE (SMOLENSKOE AVIAPRED PRIAT). See **SMOLENSKAVIA**

SMOLENSKAVIA: Smolensk Airport, Smolensk, 214019, Russia; Phone 7 (08100) 58165; Year Founded 1994. Formerly the **Aeroflot Soviet Airlines** Smolensk division and then a part of **Central Districts Airlines**, Smolenskavia is reformed into an independent joint stock company during **1994**. With Vasilii A. Izvochikov as director general, domestic passenger services, both scheduled feeder and charter, are launched with a fleet that includes 8 Let L-410UVPs and 31 Antonov An-2s. Rotary-wing work is also performed with 10 Mil Mi-2 helicopters.

Flights continue in **1995–1999**, during which years the fixed-wing fleet is altered to include first 7, and then 5, L-410UVP-Es and 34 An-2s. Seven Mi-2s remain in service.

SMYER AIRCRAFT: United States (1968–1972). This air taxi is set up at Arkansas City, Kansas, in **1968** to provide regularly scheduled daily roundtrip passenger flights to Wichita for executives of the Cessna plants employed in the two cities. Employing a Beech 18 and Cessna lightplanes, the company maintains its operations until its owners are killed in the June 3, **1972** crash of their Beechcraft near Winfield, Kansas.

SNAS WORLDWIDE EXPRESS: P.O. Box 22199, Riyadh, L11495, Saudi Arabia; Phone 966 (1) 462 0371; Fax 966 (1) 462 1919; <http://www.dhl.com>; Code ER; Year Founded 1977. Privately owned SNAS, originally established at Riyadh in **1977** to provide express ground services, signs a contract with **DHL Worldwide Express** in **1995** to offer regional cargo and express services by air as well as by ground. The 70-employee company begins revenue flights with 1 Convair CV-580 and 3 Fairchild Metro IIIs.

SNETA. See **SYNDICAT NATIONAL POUR L'ETUDE DES TRANSPORT AERIENS, S.A.**

SOBELAIR, N.V. (SOCIETE BELGE DE TRANSPORTS PAR AIR): 131 Ae. Frans Courtens, Brussels, B-1030, Belgium; Phone 32 (2) 730-5211; Fax 32 (2) 730-5280; <http://www.sobelair.com>; Code Q7; Year Founded 1946. With 71% ownership, four ex-RAF employees from the state carrier **Sabena Belgian World Airlines, S.A.** form Sobelair on July 30, **1946** to operate scheduled and on-demand Douglas DC-3 passenger service between Belgium and the Congo, plus other African destinations.

Sobelair begins operations in the spring of **1947** and these continue with little change for the next decade. Scheduled DC-4 flights are maintained between Brussels and the Congo and a domestic, local-service network of Cessna 310-flown routes is established and operated in the Congo as a supplement to the main services provided by the parent.

During **1957**, a scheduled domestic network is organized. In **1959–1960**, Sobelair aircraft are used to evacuate Belgians from the civil-war torn Congo.

A chartered C-46A, with seven crew and 28 passengers crashes into a mountain peak while on its initial approach to the airport at Bunia, Congo, on April 22 of the latter year; there are no survivors.

Sobelair holds a 5% stake (equal to that of local airline **Air Brousse, S.A.**) in the new **Air Congo, S.A. (2)** formed in the Democratic Republic of the Congo in **1961**. Parent Sabena holds an even larger stake. Equipped with a DC-7C provided by Sabena, Sobelair undertakes weekly return service from Brussels to Elisabethville via Usambura beginning on July 25.

Following the carrier's withdrawal from Africa in June **1962**, it is reformed as the non-IATA charter subsidiary of the national airline, **Sabena Belgian World Airlines, S.A.** and is employed to undertake nonscheduled passenger and cargo flights and inclusive-tour services with several hand-me-down propeller airliners.

Late in the decade, the company is equipped with three Sud-Est SE-210 Caravelle VINs transferred from the parent.

Bad weather forces a DC-6B freighter with seven crew to return to Malaga, Spain, on December 20, **1970**; a hydraulic failure causes the left gear to remain retracted upon landing and the aircraft to run off the runway, being damaged beyond repair; there are no fatalities.

A pair of Boeing 707-329s leased from Sabena join the fleet in the middle **1970s** and by **1976** Managing Director G. Claeys oversees a workforce of 22. In **1977–1978**, airline employment under new Managing Director Maurice Dans climbs to 90. An order is placed for a B-737-200.

Over the next 5 years, the workforce is increased to 130 and the fleet is altered; gone are the Caravelles, replaced by 3 B-737-229As. Recession and high fuel prices cause significant decline in the early **1980s**. Passenger boardings fall from a high of 412,083 in **1981** to 333,261 in **1983**.

Just after takeoff from Brussels on March 29, 1981, a B-707-329 with 9 crew and 109 passengers suffers a No. 3 engine failure and fire, forcing the crew to return to the point of origin. The aircraft is damaged beyond repair when it runs off the runway after landing, but all aboard are safely evacuated.

Boardings rebound in the middle part of the decade and new destinations are added. The fleet grows to include 3 B-737-229As and 2 B-707-329s.

One of the B-737-229As is leased to **Air Djibouti, S.A.** in **1985**. Passenger boardings this year total 390,000 and \$600,000 in profits are generated.

Enplanements in **1986** are back up to 422,000 and a \$1.09-million profit is reported.

Operations continue apace in **1987** as the first B-737-329C joins the fleet of President Gerrit Kreveid and Managing Director Pierre Jonnart in September. After being hush-kitted, a B-707-329 rejoins the fleet.

Bookings climb to 568,786. Profits are \$301,327 (operating) and \$1.5 million (net).

Airline employment is increased by 4.8% in **1988** to 110 and orders are placed for 2 B-737-400s.

Passenger boardings swell 18.9% to 701,338 and revenues ascend 28.4% to \$67.2 million. The operating profit jumps to \$1.8 million and net gain reaches \$1.77 million.

Operations continue apace in 1989 as the last Stratoliner is retired. In 1990, the payroll has 140 names and the fleet comprises 2 B-737-229As, 1 B-737-329, and 1 B-737-46B; orders are placed for 2 B-737-429s. Routes are stretched to Egypt, France, Cyprus, Greece, Italy, Ireland, Morocco, Malta, Spain, Tunisia, Portugal, and Turkey.

Enplanements during the 12 months total 808,400.

Two more Dash-229As are obtained in 1991 by lease from **Sabena Belgian World Airlines, S.A.** and the order for Dash-429s is reduced to one. The **Air Djibouti, S.A.** B-737-229A is now returned as that carrier goes bankrupt.

In 1992, airline employment stands at 135. Another **Sabena Belgian World Airlines, S.A.** B-737-229A is leased as delivery is taken on the Dash-429.

Enplanements for the year total 457,700.

Chairman/Managing Director Jonnart oversees 150 employees in 1993, an increase of 11.1% over the previous year. The fleet now includes 2 owned and 1 leased B-737-229As and 1 each B-737-329, B-737-4Y0, B-737-429, and B-737-46B. These aircraft are all painted in the new livery introduced in the spring.

More Israeli destinations are added to the charter network and help passenger boardings double to 916,000.

Neither workforce nor fleet changes in 1994 as enplanements decline 24.9% to 688,000.

The company suffers another bad traffic year in 1995 as customer bookings drop 11.4% to 609,400.

Airline employment is increased 25.1% in 1996 to 324 and 1 each B-767-328ER and B-767-33AER are added during the spring.

Sabena's charter subsidiary enjoys a better year than its parent, as passenger boardings jump 10.4% to 1,353,000.

The employee population grows another 8.3% in 1997 to 351. Customer bookings shoot up 13.5% to 768,000.

Destinations visited in 1998 include Austria, California, Cyprus, the Dominican Republic, Egypt, Florida, France, Greece, Ireland, Israel, Italy, Malta, Morocco, the Netherlands Antilles, Portugal, Spain, Thailand, Tunisia, and Turkey.

The second Brussels airport incident within a week involving an aircraft of **Sabena Belgian World Airlines, S.A.** occurs on September 3. An A330-311 being taxied to a gate, where it will load 229 passengers for a flight to New York, accidentally rams a Sobelair Air B-737-329 just outside of its hangar. The departure of the Airbus passengers is delayed. It is anticipated that the damaged nose of the A340 can be repaired within days, but the serious damage to the little Boeing will keep it out of service for weeks.

Flights continue in 1999. Plans are now announced by SAirGroup for the creation of a large European Leisure Group that will include not only **LTU International Airways, GmbH.**, but the **Swissair, A.G.** subsidiary **Balair/CTA**, Sabena's subsidiary **Sobelair**, **Crossair, Ltd.**, **Air Europe, S.p.A.**, and **Volare, S.p.A.** The new arrangement, under the direction of project leader Stefan Helsing, is designed to be part of an integrated network built around the already-existing "Atlantic Excellence" and "Qualiflyer" alliances.

Six days after its arrival at Dusseldorf from Seattle on April 6, 2000, a new B-767-3BGER is ferried over to Brussels. The first aircraft painted in the carrier's new "Sabenalike" color scheme, the plane enters revenue service on April 14.

The A320-231 previously operated by **Transaer Cologne, GmbH.** is repainted by **Transaer International Airlines, Ltd.** and chartered to Sobelair for a short engagement that begins on July 5. The Airbus is returned to Ireland on September 2, one-and-a-half months before Transaer goes bankrupt.

The company's older B-767-228ER is replaced on November 30 with a new B-767-3BGER that had been delivered eight days earlier in Seat-

tle. The lease of the older aircraft, owned by Ansett Worldwide Leasing, is transferred over to **Vietnam Airlines** the next day.

Plans by **Hapag-Lloyd Fluggesellschaft, mbH.** to launch a Hapag-Lloyd Belgium charter subsidiary in March are scrapped on December 8 when Jetair, with which it was to contract for inclusive-tour flights, signs instead with Sobelair.

The "classic" B-737 fleet at year's end includes one each Dash-3M8, Dash-329, Dash-33S, Dash-46B, Dash-429, and Dash-405.

SOCHI AIRLINES AVIAPRIMA: Sochi Airport, Sochi, Krasnodarsky Region, 354355, Russia, Phone 7 (8622) 440 045; Fax 7 (8622) 442 255; Code J5; Year Founded 1992. Sochi Airlines is set up at Sochi on October 15, 1992, as a joint stock company that will offer domestic, regional, and international passenger and cargo services, both scheduled and charter. Valery P. Soukhanov is general director and he recruits a workforce that will come to total 294.

Revenue flights commence on March 3, 1993, and continue. By 2000, the fleet includes 1 Tupolev Tu-154M, 1 Tu-134A, 1 Ilyushin Il-76T, 1 Antonov An-12, An-24, and An-26. Destinations visited include Athens, Antalya, Beirut, Cairo, Damascus, Dubai, Frankfurt, Helsinki, Istanbul, Kiev, Moscow, Ostrava, Saldriki, Samara, Sharjah, and Tel Aviv.

SOCHISPETSAVIA AIR COMPANY: Sochi Airport, Sochi, 354355, Russia; Phone 7 (8622) 44 652; Fax 7 (8622) 442 645; Code NNB; Year Founded 1996. SAC is set up at Sochi in 1996 to operate international and domestic heavy-lift rotary-wing contract services. S. A. Bazyan is CEO and he begins revenue operations with 11 Mil Mi-8s and 9 Kamov Ka-32s.

Though not as well known as **Tyumenaviatrans**, this concern continues to operate successfully throughout the remainder of the decade, providing heavy lift and other transport services for industries at home and abroad.

SOCIETA ADRIA AERO LLOYD, A.G. *See* **ALA LITTORIA, S.p.A.**

SOCIETA AEREA MEDITERRANEA, S.p.A. (SAM) (1): Italy (1926–1934). Utilizing state funds, SAM is formed at Rome on March 27, 1926. Employing the first of 15 Savoia-Marchetti S-55s to be acquired, it opens service from Brindisi to Valona on February 4, 1927. An Albanian network is created on July 7, when majority interest is purchased in the **Deutsche Luft Hansa, A.G. (DLH)** subsidiary **Adria Aero Lloyd, A.G.** With additional flying boats in hand, Italian service is launched on April 28, 1928 over a route from Cagliari to Rome.

As the carrier's success grows, frequencies are extended to Tunis on December 10, 1929 from Ostia and Cagliari. By 1930, passenger boardings are averaging just under 10,000 per year and the fleet comprises 9 S-55s, 1 S-59, and 1 Cant 22. It is now decided that the airline should be upgraded through the addition of new equipment and routes. To that end, orders are placed with Savoia-Marchetti for six of the first landplane commercial transports designed by Alexandro Marchetti, the SM-71.

The first step outward is introduction of a direct Rome–Tirana frequency on July 1, 1931. Meanwhile, six new SM-71 trimotors are delivered in the late spring and are introduced on a new Rome–Brindisi service on July 6. On December 31, the state-sponsored airline takes over **Transadriatica, S.p.A.**, thereby acquiring additional landplanes (eight Junkers F-13s and two G-24s) and a trans-Alps route to Munich via Vienna.

The Tirana route is extended to Salonica on May 11, 1932 and on August 11, 1933, the SM-71s stretch the Munich route to Berlin.

SM-71s replace F-13s on the Tirana to Salonica service on February 4, 1934, thereafter flying the entire route from Rome to Salonica. In April, SM-66s replace SM-55s on the Rome to Tunis service. SAM's aggressive expansion ends in the creation of an Italian state airline. On August 24, it purchases two of its principal competitors: **Societa Anonima Navigazione Aerea, S.p.A. (SANA)** and **Societa Italiana Servizi Aerei, S.p.A. (SISA)**, following this in early fall with the acquisition of **Aero Espresso Italiana, S.p.A. (AEI)**. The four carriers are merged on October 28 to form **Ala Littoria, S.p.A.**

SOCIETA AEREA MEDITERRANEA, S.p.A. (SAM) (2): Italy (1959–1976). The second SAM is set up at Aeroporto Ciampino, Rome, in December 1959 to operate charter and inclusive-tour flights on behalf of **Alitalia, S.p.A.** Employing a Vickers Viscount 700 and Douglas DC-3s, non-IATA services to various destinations in Europe and North Africa commence in early 1960.

Within 5 years, the company workforce has grown to 195. The fleet in 1965 comprises seven DC-6Bs and enplanements are 212,590.

Operations continue apace through the remainder of the decade.

During the early 1970s, the state carrier assumes complete ownership of SAM and equips it with three Sud-Est SE-210 Caravelle VIs. In 1975, President Aldo Remondino and Director General Francesco Casale oversee a workforce of 125. Operations cease in 1976, at which point the employees and two Caravelles are transferred to **Alitalia, S.p.A.**

SOCIETA ANONIMA AERO ESPRESSO ITALIANA, S.p.A. (AEI): Italy (1923–1934). This pioneer is formed at Brindisi on December 12, 1923. Employing 6 Savoia-Marchetti S-55C twin-engine flying boats, scheduled services are inaugurated on August 1, 1926 from Brindisi to Constantinople via Patras, Athens, and Mitylene. The carrier has the honor of becoming Italy's first international airline.

With the fleet strengthened through additional aircraft purchases, operations, via Patras, Athens, and Syra, are started to Rhodes on April 1, 1930. Late in 1933, trimotor S-66 flying boats enter service. On August 24, 1934, AEI is purchased by competing **Societa Aerea Mediterranea, S.p.A.**, which itself joins with several other airlines in October to form the state company **Ala Littoria, S.p.A.**

SOCIETA ANONIMA AVIO-LINEE ITALIANE, S.p.A. (ALI): Italy (1926–1949). Owned by the Fiat manufacturing concern, this carrier is formed at Milan on November 13, 1926. Fokker F-VIIs are acquired and on May 13, 1928 a route is opened to Munich via Trento; this is followed on October 9 with a service south to Rome. On September 1, 1929, the airline begins flying from Milan to Turin and by 1930 passenger boardings are approaching 3,000 per year.

The fleet, in 1931, includes one F-VIIa and seven F-VIIb/3ms; on April 1 of that year, the Munich stop is stretched on to Berlin by F-VIIb/3ms. The single Fiat G-2 makes its first flight in July 1932.

Given the political power of its owners, ALI escapes merger into the state carrier **Ala Littoria, S.p.A.** when it is formed in October 1934 and continues as the nation's only independent carrier. The Fiat G-2 enters service at the same time and is assigned to the three principal domestic route segments: Rimini to Milan, Turin to Milan, and Milan to Rome.

The twin-engine Fiat G-18, similar in appearance to the Douglas DC-2, makes its maiden flight on March 18, 1935. Orders are placed for nine as the carrier also receives six Savoia-Marchetti SM-73 trimotors, powered by Alfa Romeo engines.

In 1936, the Turin destination is extended to Paris in the north, which now allows direct service from the French capital south via Turin and Milan, to Venice. The one and only Fiat APR-2, first flown the previous year, enters service during the year on a route from Venice to Paris via Milan. It operates primarily on the Milan to Paris segment during 1937. Throughout the year, the manufacturer's six G-18s are eased into service. On April 6, the first units open service from Venice to Paris via Milan and Turin.

On June 1, 1938, the G-18 Paris route is stretched to London. The fleet in 1939 comprises 1 Douglas DC-2, 6 SM-73s, and 9 Fiat G-18s. At optimum strength, the G-18s are also able to offer flights from Rome to Milan and from Milan to Bucharest via Venice, Zagreb, and Belgrade.

When war comes to the Mediterranean in the summer of 1940, the carrier suspends operations. Meanwhile, Fiat, in October, test flies its latest airliner design, the low-wing G-12 trimotor.

With continued Fiat support and new Fiat G-12s, the prewar airline is reborn in April 1947. Service is extended from Rome to Milan and Albenga and from Milan down to Naples via Genoa and Rome. Like numerous other postwar Italian airlines, success is elusive. Late in the year and into 1948, the fleet is upgraded by the addition of six Fiat G-212 CP Aeropullman Monterosas.

In 1949, the Fiat-backed operator takes the lead in uniting certain of these into a larger carrier, **Avio Linee Italiane-Flotte Reunite, S.p.A.**; the purchased companies are **Societa Italiana Servizi Aerei, S.p.A. (SISA)**, **Airone, S.p.A.**, and **Transadriatica (Societa Transadriatica di Navigazione Aerea, S.p.A.)**.

SOCIETA ANONIMA NAVIGAZIONE AEREA, S.p.A. (SANA): Italy (1925–1934). SANA is formed at Rome on January 19, 1925. Employing four-engine Dornier Do J Wals (Whales) and Do R Super Wals manufactured at the German company's Italian subsidiary, Costruzioni Meccaniche Aeronautiche S.A., service is started along a route from Genoa via Rome and Naples to Palermo on April 7, 1926. On November 1, 1928, the carrier extends itself aggressively, opening three new routes from Rome: to Tripoli via Malta on November 1, to Marseilles via Genoa on November 5, and to Barcelona on November 15.

Operating parallel to the **Imperial Airways, Ltd.** route, the company initiates flying boat service to Alexandria on April 11, 1929 via Rome, Naples, and Athens. When the British refuse to pool operations and

receipts, the Italians withdraw Imperial staging rights on October 31. On December 10, a frequency is begun between Palermo and Tunis.

On September 1, 1930, Wals initiate flights from Palermo to Tripoli, where a connection is made with the Benghazi route of **Nord Africa Aviazione, S.p.A.** SANA carries approximately 10,000 passengers on the year and by 1931 its fleet includes 15 Italian built Wals, including 3 of the Do Rs. With new agreements with **Imperial Airways, Ltd.**, the two carriers begin operating the Mediterranean more harmoniously; however, in Genoa Harbor during the year, a Wal collides with the Imperial Airways Kent Class flying boat *Sylvanus*; both aircraft are seriously damaged.

In April 1934, the carrier takes delivery of several new Savoia-Marchetti S-66 flying boats and places them on the Tunis and Tripoli routes. On August 24, the airline is one of three purchased by competing **Societa Area Mediterranea, S.p.A.** On October 28, these, plus **Societa Anonima Aero Expresso Italiana, S.p.A.**, are merged to form the state carrier **Ala Littoria, S.p.A.**

SOCIETA ITALIANE SERVIZI AEREI, S.p.A. (SISA) (1): Italy (1923–1934). SISA is formed at Trieste in 1923. Equipped with 3 Cant 10ters flying boats, the company begins the first Italian revenue airline services on April 1, 1926. The inaugural route runs from Trieste to Turin via Venice and Pavia. On October 15, a frequency is begun between Trieste and Ancona via Pola and Zara. During 1927 and until its completion in December 1928, the carrier gradually opens a circular route from Trieste to Trieste via Zara, Ancona, and Venice. These offerings are successful.

A Trieste–Genoa, via Venice and Pavia route is opened on April 14, 1930 and also during the spring, four up-engined Cant 10ters join the fleet. By year's end, a total of some 10,000 passengers are being transported annually in a fleet which, by 1931, numbers 15 Cant machines, including eight new Cant 22s.

The latter are received during the second half and in 1932–1933 commence Trieste to Genoa and Trieste to Ancona via Zara frequencies, freeing the Cant 10ters to concentrate on the segments from Trieste to Zara via Fiume and from Trieste to Venice via Fiume.

On August 24, 1934, the airline is one of three purchased by competing **Societa Area Mediterranean, S.p.A.** On October 28, these, plus **Societa Anonima Aero Expresso Italiana, S.p.A.**, are merged to form the state carrier **Ala Littoria, S.p.A.**

SOCIETA ITALIANE SERVIZI AEREI, S.p.A. (SISA) (2): Italy (1947–1949). Backed by the Cosusic shipping organization, this carrier is organized at Trieste on June 8, 1947, taking the name of the **Ala Littoria, S.p.A.** merger partner. Using Douglas C-47s converted to DC-3 civil standard, it opens and maintains a variety of north-south routes in 1947–1948: Trieste to Naples via Rome, Trieste to Prague via Vienna, Trieste to Genoa via Milan, Trieste to Belgrade via Zagreb, Trieste to Athens via Rome and Bari plus services from Marseilles to Barcelona and Beirut to Baghdad.

Unsuccessful, the airline is one of several merged in 1949 to form **Avio Linee Italiane-Flotte Reunite, S.p.A.**

SOCIETA NORD AFRICA AVIAZIONE, S.p.A.: Italy (1931–1935). Societa Nord Africa Aviazione, S.p.A., founded in December 1931 to operate a Tripoli–Benghazi and Benghazi–Tobruk service with 5 Caproni Ca-101s, is taken over by **Ala Littoria, S.p.A.** on July 31, 1935. Only 3 Caproni transports have survived to be turned over.

SOCIETE AERO NIGER, S.A. See AERO NIGER (SOCIETE AERO NIGER, S.A.)

SOCIETE AIGLE AZUR, S.A. (SAA): France (1946–1955). Societe Aigle Azur (the “Blue Eagle”) is organized in the spring of 1946 to operate a Mediterranean network with a fleet of 2 war surplus Junkers Ju-52/3ms; points of call include Algiers and Oran from Marseilles and

Tunis from Nice via Calvi. Operations continue apace for the remainder of the decade in France, North Africa, and in Indochina.

In January 1950, the company purchases and merges competing **Compagnie Algerienne de Transports Aeriens, S.A. (CATA)** and assumes that airline's Douglas DC-3s and routes from Algiers to Constantine and Biskra.

A Bristol 170 with three crew and a passenger is lost near Saigon on March 10; there are no survivors.

En route from Paris to Dakar on July 10, a DC-3 with 4 crew and 25 passengers fails its climb away from Casablanca on a charter flight and crashes (22 dead).

A DC-3 must be written off at Luang Prabang, Laos, on February 12, 1951; specific details are unavailable.

In April, SAA buys **Trans World Airlines (TWA)**'s five surplus Boeing 307s and becomes the 1950s largest operator of the Stratoliner.

The first two B-307s, formerly known as the *Cherokee* and *Zuni*, are delivered in May, followed by the *Comanche* and *Navajo* in June, and the *Apache* in July. These are employed in September to stretch the carrier's operations to Brazzaville and Dakar. At year's end, the company is divided into two divisions, Morocco and Indochina. The former is equipped with the first of five Curtiss C-46 Commando freighters ordered.

Stratoliner service to Saigon and Hanoi is inaugurated in the spring of 1952 and to Tananarive, Madagascar, in the fall. When **Air Laos, S.A.** is formed late in the year, the French carrier acquires a stake (20%) and provides the new Indochinese company with Douglas DC-3s.

Three fatal crashes, all in Indochina, are suffered in 1953.

The first occurs on March 17, when a DC-3 with eight aboard crashes while landing at Da Nang; there are no survivors.

On April 16, a DC-3 with 3 crew and 27 passengers suffers a wing failure and crashes west of Hanoi; there are no survivors.

A DC-3 charter from Vientiane with 3 crew and 22 passengers suffers an onboard fire on June 16 and crashes at Phou-Lassy, Vietnam; there are no survivors and the wreckage is not found for thirteen days.

While taking off from Dien Bien Phu on January 31, 1954, the wheels of a DC-3 are prematurely retracted, causing the plane to crash; there are no fatalities, but the Douglas must be written off. Viet Minh forces destroy a DC-3 on the ground at Giam Lam, Vietnam, on March 4. Viet Minh antiaircraft gunners shoot down a C-46E approaching Dien Bien Phu on March 13; both of its crewmen are killed.

Following the July Geneva agreement ending the Indochina War, the subsidiary **Aigle Azur Extreme Orient, S.A.** is formed at the South Vietnamese capital from the company's Indochine division; the *Apache* is reacquired from **Air Laos, S.A.** and assigned to this Saigon-based company.

In 1955, SAA is purchased and amalgamated into **Union Aeromarine de Transport (UAT)**; however, its Saigon-based subsidiary retains the Boeings and continues independently of UAT. Two C-46s are sold to **Air Cameroun (Societe Anonyme des Avions Meyer et Cie, S.A.)**.

SOCIETE AIRTRANSIVOIRE, S.A. See AIRTRANSIVOIRE (SOCIETE AIRTRANSIVOIRE, S.A.)

SOCIETE ANONYME ROUMAINE DE TRANSPORTS AERIENS, S.A. (SARTA): Romania (1932–1937). The French aircraft manufacturer Poetz forms SARTA at Sofia in early 1932 to offer internal competition to both the French-backed CIDNA concern (soon to become a part of **Air France**) as well as the new Romanian government carrier **Linile Aeriene Romane Exploatate cu Statul (LARES)**. Equipped with Poetz 56s, SARTA begins a single 500-mile domestic route from Arad in the north, south through Budapest to Constanta.

Electing to possess a complete state carrier flying both international and domestic service, the Romanian government reconstitutes LARES on July 13, 1937. SARTA and its aircraft and routes are purchased and merged.

SOCIETE AUXILIAIRE DE TRANSPORT AERIEN, S.A. (SATA): Switzerland (1966–1978). SATA is established at Geneva in June 1966 by Edmond Favre, Charles Jacquat, and Raymond Lambert, initially as an air taxi operator. Although small-scale nonscheduled flights will be maintained with 1 Cessna 421, 1 C-401, and 1 C-172 during the life of the company, the partners elect during the early 1970s to convert their enterprise into a full-scale international charter and inclusive-tour service.

With Favre as chairman and Jacquat as president, SATA begins to acquire jetliners and offer group flights to holiday destinations in Europe, the Mediterranean, South America, the U.S., and the Caribbean. Operations continue apace throughout the decade's first eight years with a fleet that comes to include not only the 3 Cessnas, also but 3 Sud-Est SE-210 Caravelle XRs, 1 Douglas DC-8-50, and 1 DC-8-63CF.

Expenses far exceed profits and in October 1978 the company enters bankruptcy. Its assets will be taken over by **Compagnie de Transports Aerien, S.A. (CTA)**, a new subsidiary of **Swissair, A.G.**

SOCIETE CALEDONIENNE DE TRANSPORTS AERIENS, S.A. (TRANSPAC): French Oceania (1955–1968). TRAPAS is reorganized and renamed on September 25, 1955. Scheduled services are undertaken linking the carrier's base at Aerodrome de Magenta at Noumea with Mueo, Kone, Koumac, Belep, Houailou, and Touhu in New Caledonia and Mare, Tiga, and Lifu in the Loyalty Islands.

A total of 1,200 passengers are flown during the inaugural year.

Twelve years later, in 1967, the company is maintaining its same route network with a fleet of 3 de Havilland DH 114 Herons, 2 Piper PA-23 Aztecs, and 2 PA-28 Cherokees. Orders are outstanding for a de Havilland Canada DHC-6 Twin Otter.

Enplanements for the year total 44,852.

Airline employment reaches 75 in 1968 and the Twin Otter is delivered. Later in the year, the carrier is renamed **Air Caledonie, S.A.**

SOCIETE DE TRANSPORTS AERIENS INTERNATIONAUX ET REGIONAUX, S.A. (STAIR): France (1990–1994). STAIR is established at Paris in 1990 to offer passenger charter and inclusive-tour flights to international and regional destinations throughout Europe, the Mediterranean, North Africa, and the Mideast.

Revenue services commence with a single Aerospatiale (Sud) SE-210 Caravelle XB and continue until the company shuts down in 1994.

SOCIETE DES TRANSPORTES AERIENS GUYANAIS, S.A. *See* **TAG (SOCIETE DES TRANSPORTES AERIENS GUYANAIS, S.A.)**

SOCIETE FRANCAISE DE TRANSPORTES AERIENS DU PACIFIC SUD (TRAPAS): French Polynesia (1948–1955). TRAPAS is formed at New Caledonia in 1948 to provide air transport between the islands making up the French empire in the Pacific Ocean area. On September 25, 1955, the carrier is renamed **Societe Caledonienne de Transports Aeriens, S.A. (TRANSPAC)**.

SOCIETE FRANCO-BILBAINE DES TRANSPORT AERIENS, S.A.: France (1920–1923). Early in 1920, **Compagnie des Transports Aeronautiques du Sud-Ouest, S.A.** is recapitalized, reformed, and given this name. With a fleet of 15 aircraft, it resumes summer-only service from its Bayonne base to Santander and Bilbao. After three years of low traffic and poor financial returns, the carrier disappears in 1923.

SOCIETE GENERALE DE TRANSPORT AERIEN, S.A. (SGTA): France (1922–1933). In 1922, **Lignes Aeriennes Farman** is renamed **Societe Generale de Transport Aerien, S.A. (SGTA)**; the previous Farman routes are maintained. When **Air Union, S.A.** is formed in January 1923, it elects to concentrate its resources on Paris–London service. SGTA, in turn, takes over the former **Compagnie des Grands Express Aeriens, S.A. (CGEA)** routes Paris to Geneva and Paris to Aix-les-Bains via Lausanne and Evian.

Thirteen Farman F-170 *Jabirus* (Storks) inaugurate Paris to Berlin via Cologne service on May 26, 1926. Later in the year, four Farman F-3X *Jabirus* (Storks) begin service on a route from Paris to Amsterdam via Brussels.

In 1927, SGTA enters into a pooling arrangement with **Deutsche Luft Hansa, A.G. (DLH)** on the Berlin run. Service is launched to Copenhagen and Malmo via Cologne and Hamburg. On January 3, 1928, night flights are added on routes from Paris to Rome and from Paris to Casablanca.

In February, the first Farman 180 *Oiseau Bleu* (Blue Bird) is put into service on the London–Paris route. With a blue-painted fuselage and twin engines mounted in tandem above the top wings, the 180 provides accommodations for 24 passengers; on night flights, up to 17 may be carried in couchettes. The aircraft wins public accolades for two other features. It is one of the first to carry a fully equipped bar (at the rear of the fuselage) and, more importantly from a safety viewpoint, it is able to maintain altitude on only one engine with a 17,500-lb. payload.

Frequencies are increased Paris to Berlin later in the year as the company begins to concentrate on its Continental operations.

A year later, in 1929, the three Farman 180 *Oiseau Bleus* (Blue Birds) are put into service on the Paris–Berlin route.

During 1930, six Farman F-301s begin flying from Paris to Berlin and from Paris to Malmo via Brussels, Essen, Hamburg, and Copenhagen. Enplanements for the year total some 12,500.

Fourteen single-engine Farman F-190s are delivered in 1931–1932 and on August 30, 1933, SGTA is one of the four merger partners that create **Air France**.

SOLAIR (SOLOMON ISLANDS AIRWAYS, LTD.): P.O. Box 23, Honiara, Guadalcanal, Solomon Islands; Phone 677 20 031; Fax 677 23 992; <http://www.solomonairlines.com.au>; Code IE; Year Founded 1968. When Honiara, Guadalcanal-based **Megapode Airways, Ltd.** is taken over by Bryan McCook's **Macair (Melanesian Airline Charter Company [Pty.], Ltd.)** of Papua New Guinea on May 1, 1968, the new subsidiary is allowed, as of June 1, to continue its regularly scheduled and charter operations under its revised identity of Solair.

Employing a new de Havilland DH 104 Dove supplied by Macair, the company visits airstrips at Munda and Segi Point (Seghe) on New Georgia, Yandina, in the Russell Islands, Kirakira on San Cristobal, and Auki on Malaita Island.

In 1969-1975, the Solair fleet is increased by the addition of a second Dove and two Beech 55 Barons. During the first quarter of the latter year, the Macair subsidiary acquires operating rights between Honiara and the Papua New Guinea community of Kieta, on Bougainville. Solair is now the smallest international airline in the world. In April, Macair and its Solair subsidiary are purchased by **Talair (Tourist Airlines of Niugini, Ltd.)**. Macair is merged, but Solair is allowed to continue operations as a subsidiary of its latest owner.

During 1976, Solair's two Doves are replaced by a Beech 80 Queen Air and a Lake Buccaneer. Flights continue to link Honiara with Ringi Cove, Gizo, Munda, Sege, Mono, Balalae, Choiseul Bay, Barakoma, Auki, Parasi, Santa Cruz, Kira Kira, Bellona, Rennel, and Kieta. By 1977, enplanements total 21,458.

A route is extended to Espiritu Santo and Port Vila on April 7, 1978. When the new sovereign nation emerges from the former British protectorate, it indicates its intention to acquire 49% shareholding and to exercise its right to purchase the remaining 51% for a set price within five years, plus a goodwill figure to be negotiated.

Passenger boardings leap 26% to 28,997 for the year.

The number of employees is increased by 19.7% in 1979 to 91. In April, the government of the Solomon Islands purchases 49% shareholding. The fleet, which had comprised 2 Beech B-80 Queen Airs, 2 Beech Barons, and 1 Lake Buccaneer, is now upgraded by the addition of a Swearingen Metro II and two Britten-Norman BN-2 Islanders.

Customer bookings accelerate 16.8% to 3,377 while freight is up 37.3% to 560 million FTKs. A \$140,892 profit is earned on total income of \$1.5 million.

Employing its partner's BAC 1-11s, Solair joins with **Air Pacific, Ltd.** in April 1980 to introduce flights from Honiara to Brisbane. At the same time, twice-weekly services are inaugurated from Honiara to Kieta and to Espiritu Santo in Vanuatu, once known as the New Hebrides.

Traffic increases for the 106-employee carrier during the next three years. In 1981, a total of 46,200 travelers are enplaned. The figure grows to 51,200 in 1982 and 55,000 in 1983.

The fleet in 1984 also includes two de Havilland Canada DHC-6-200 Twin Otters and an Embraer EMB-110P1 Bandeirante leased from the parent. During the year, the government indicates its desire to purchase the remaining 51% stake; however, it will require three years of negotiation to settle on a price. During this period, staff morale declines and in 1985-1986, three general managers are appointed.

Finally, in 1987, **Talair (Tourist Airlines of Niugini [Pty.], Ltd.)**, after taking back its leased aircraft, turns the company over to the Solomons for \$1.4 million. Additional assets transferred include the Queen Air and Baron, two Islanders, an Avis-affiliated car rental firm called Pacific Car Rentals, and the inactive tour company Hunts of the Pacific, Ltd. John Rofeta is appointed chairman with Graham Hawthorne as managing director.

Early in 1988, A\$2-million in orders are placed for a pair of new DHC-6-300 Twin Otters and the Baron is immediately replaced with a Piper PA-23 Aztec. New local destinations are now added, including Avu Avu, Ballalae, Fera, Marau, Mbambanakira, Onepusu, Seghe, Tulagi, and Yandina. An active program is launched to recruit new management and flying personnel.

In association with **Qantas Airways (Pty), Ltd.**, scheduled international Boeing 737-2T5 services, employing an aircraft owned by **Air Pacific, Ltd.**, are inaugurated weekly to Brisbane, Kieta, Luganville, and Vila. Solair takes 15 seats aboard each flight for sale in its own name.

In 1989, the fleet comprises 1 Beech B-80, 1 DHC-6-300 Twin Otter, 1 Piper Aztec, and 2 BN-2 Islanders. A code-sharing agreement is signed with **Air Pacific, Ltd.** and a block of 15 seats is purchased for each of the Fijian airline's weekly Nadi to Honiara services. Late in the year, **Air Pacific, Ltd.** informs Chairman Rofeta that it will soon replace its "Baby Boeing" with a B-767-200. The decision is now taken by Solair to acquire its own jetliner.

John Baura becomes general manager in 1990 as the marketing title Solomon Airlines, Ltd. is adopted. The carrier, despite its newly designed livery in the national colors of blue, yellow, and green, remains known as Solair to many.

A technical contract is signed with **Air New Zealand, Ltd.** and international services continue, now employing a former **Malaysia Airlines, Ltd.** B-737-2H6 christened *Guadalcanal* and chartered from ILFC. In August, a code-sharing agreement begins with **Air Vanuatu**; the *Guadalcanal* will be employed to operate dual-designator between Port Vila and Auckland via Nadi.

The fleet in 1991 includes 1 each B-737-2H6 and 2 DHC-6-300s. An order is placed for a B-737-4Q8.

While on a September 3 scheduled Solomon Islands service, a DHC-6-300 with 2 crew and 13 passengers crashes into Mount Nashua, Guadalcanal, at the 4,110-ft. level; there are no survivors.

Plans made earlier to retire the company's two Islanders must be put on hold, as they are pressed into service to fill the capacity hole left with the loss of the Twin Otter.

In 1992 the government obtains complete control of its services and a B-737-4Q8, leased from ILFC, arrives at Honiara, setting a distance and endurance record on its multi-leg delivery flight in April. The new aircraft, also named *Guadalcanal*, enters service on May 19, at which time the carrier elects to return the B-737-2H6. Code-shared services are now inaugurated with **Royal Tongan Airlines, Ltd.** between Fiji, Tonga, and Auckland.

General Manager Baura is relieved in **1993** with Gideon Zolevele Jr. being temporarily placed in charge until the appointment of James Bradfield. The new Boeing begins direct services to Nadi and Cairns.

When the alliance with **Royal Tongan Airlines, Ltd.** expires in the spring, the Henderson Field-based flag carrier finds that its jetliner offers too much capacity. Consequently, a new arrangement will be required.

Flights between Nadi and Auckland end, leaving Solomon with a single weekly flight to and from New Zealand. Additionally, the Honiara–Brisbane–Cairns route is rearranged in order to eliminate 250 hours of flight time.

Services continue apace in **1994**. Facing continued heavy losses from its carrier, the Solomon Islands government on April 1 asks **Qantas Airways (Pty.), Ltd.** to take over a number of Solomon Airlines' services, using a Qantas B-737-376, plus the lease of a B-737-4Q8 chartered from ILFC.

Qantas agrees to operate the services, but does not immediately agree to transfer the lease. That view changes, however, as the Australian major assumes the lease of the B-737-4Q8, and wet-leases back to Solair one of its own B-737-376s, for use during 41 flying hours per week.

In October, a route- and code-sharing arrangement is entered into with the Papua New Guinea flag carrier **Air Niugini (Pty.), Ltd.** The latter, employing Fokker F.28s, relieves Solomon Airlines from its expensive twice-weekly roundtrip service from Port Moresby to Honiara. Another DHC-6-300 is leased from the Australian carrier **Flight West Airlines (Pty.), Ltd.** in November.

Flights continue in **1995–1998**, with no change in fleet or mission. Marketing agreements continue with or are entered into with **Qantas Airways (Pty.), Ltd.**, **Air Niugini (Pty.), Ltd.**, **Air Nauru**, **Air Pacific**, and **Air Vanuatu**. Destinations visited include Auckland, Auki, Avu, Balalae, Bellona, Brisbane, Choiseul Bay, Fera Island, Gizo, Kira Kira, Marau Island, Mbambanakira, Melbourne, Mone, Munda, Nadi, Parasi, Port Moresby, Port Vila, Rennell, Santa Ana, Santa Cruz Island, Sege, Suavanao, Sydney, Viro, and Yandina.

Nearly two years after making application, General Manager Gideon Zoloveke Jr. is able to announce on March 24, **1999**, that the engineering department of Solair has been certified by the joint agency of the European Union.

When a coup is attempted in the Solomon Islands on June 5, **2000**, the carrier, not wishing any problems, temporarily suspends domestic and international operations. The B-737-376 remains in Australia.

A Britten Norman BN-2 Islander and its pilot are taken hostage by rebel militia groups on September 16. The flyer and his plane will be released by the end of the month; the \$2-million ransom demand is not paid.

Flights to Brisbane, Fiji, and Vanuatu are resumed in early October.

SOLAR AIRLINES: United States (1964–1965). Solar is founded at Pecos, Texas, during the early fall of **1964** to offer scheduled passenger and cargo services over a route to New Mexico. Employing 2 Beech 18s, Solar begins daily roundtrips on October 27, linking its base to Roswell via Marta, Alpine, Fort Stockton, Monahans, Artesia, Dallas (DAL), Midland, and Hobbs. Overextended, the new commuter stops flying in **1965**.

SOLID'AIR, S.A.: Rue de Luxembourg, Sandweiler, L-5230, Luxembourg; Phone 352 355 2201; <http://www.solidair.lu>; Year Founded 1998. This new charter operation is established by Enor Aakrann at Luxembourg in the fall of **1998** to fly long-haul nonscheduled services to the U.S. and Caribbean. Chairman Aakrann leases an Airbus Industrie A310-304, which begins revenue flights on December 12.

Flights continue in **1999–2000**, as another A310-304 is acquired and Mexico is added to the holiday route network.

SOLINAIR: Aerodrom Portoroz, Secovje, SL0066333, Slovenia; Phone 386 (6) 679 001; Fax 386 (6) 679 715; Code SOP; Year Founded 1992. Solinair is established at Ljubljana in early **1992** to offer regional services with a fleet of 1 Let 410, 1 PZL M.20, and 4 Piper PA-34 Senecas. The former is wet-leased from the Czech carrier **Air Kitkovic**.

Flights on behalf of Brussels-based **European Air Transport, S.A.** linking the company's base with Vienna begin in April. Permission is sought for routes to Basel, Geneva, and Lugano. Operations continue.

SOLOMON AIRLINES, LTD. See SOLAIR (SOLOMON ISLANDS AIRWAYS, LTD.)

SOMALI AIRLINES, LTD.: P.O. Box 726, Via Medina, Mogadishu, Somalia; Phone 252 (1) 81 533; Fax 252 (1) 80 489; Code HH; Year Founded 1964. The government (51%), in partnership with **Alitalia, S.p.A.** (49%), forms this new national carrier on March 9, **1964** to provide scheduled passenger and freight services. Hamud Sherif is named chairman and a five-year support contract is signed with the Italian flag carrier. The new entrant also receives a gift of four Douglas DC-3s from the U.S.

Revenue services are initiated with 2 Douglas DC-3s over a 15-point domestic network beginning in July.

On March 9, **1965**, a full pooling agreement is signed with Aden Airways and the company's first international route is operated. A route from Mogadishu to Aden is flown jointly with the new partner. By September, the four DC-3s are linking the capital with Hargeisa, Migiurtina, Chisomaio, Bosaso, Alulua, Candala, and smaller points.

Service to Nairobi is started in January **1966** and continues until June 16. On that day, after Radio Mogadishu airs propaganda attacks on Kenyan President Jomo Kenyatta, flights into the country by Somali Airlines are banned. Roundtrip service to Dar es Salaam commences in October **1967**.

During the remainder of the decade, the fleet is increased by the addition of two Vickers Viscount 785Ds and two Cessna 180s. Following the revolution of **1969**, the relationship with **Alitalia, S.p.A.** ends. Abdi Mohammed Namus becomes chairman.

Having lost flight controls, a Vickers 785D with 4 crew and 26 passengers makes a heavy landing at Mogadishu on May 6, **1970**; the landing gear collapses and the turboprop skids 900 m. (5 dead).

Following the Viscount tragedy, **Pakistan International Airlines Corporation (PIA)** acquires a managerial and technical contract during the early **1970s**, succeeding **Alitalia, S.p.A.**

During **1971–1974**, Chairman Kenadit Ahmed Yusuf's fleet is gradually increased to include 2 Boeing B-720-023Bs (B-720Bs) leased from a British company, 2 Vickers Viscount 785D, 2 DC-3s, 1 Cessna 402, 2 Cessna 206s, and 1 Cessna 180. PIA provides the pilots to fly the Boeings on long-haul operations.

International services are inaugurated in **1975** and over the next decade link Mogadishu with Muscat, Abu Dhabi, Nairobi, Sana'a, Jeddah, Cairo, and Rome.

A DC-3 with three crew and eight passengers loses power to No. 1 engine and crashes near Bosaso on August 16; although the aircraft must be written off, there are no serious injuries.

The chartered B-720Bs are replaced in **1976** with two units of the same type purchased from **American Airlines**. **Alitalia, S.p.A.**'s stake is acquired by the government in **1977**, which now assumes total control. When a **Deutsche Lufthansa, A.G.** Boeing 737-230 is hijacked to Mogadishu, the Somali government allows West German commandos to storm the plane and free its passengers.

In the aftermath of this incident, a new relationship is forged between the governments of the two involved nations and aid, including support for Somali Airlines, begins to arrive from Bonn in **1978**. During the year, an F27-600RF is placed into service. Airline employment grows to 352 by **1979**.

The fleet is altered during the early **1980s** as one B-720B is withdrawn and is replaced by two B-707-330Cs purchased from the West German state airline for \$1 million each. Also acquired by lease from a company owned by the Bonn government are two Dornier 228-201s.

Routes are extended to Rome, Frankfurt, Djibouti, and Doha, plus eight local stops. Airline employment grows to some 700 in **1981**. On July 20, the F27-600RF with 50 passengers aboard crashes near Balad; there are no survivors.

Enplanements for the year reach 111,000.

After a drop-off to 99,000 in 1982, traffic increases again in 1983 as 117,000 passengers are transported. During the year, Colonel Mahamud Gulaid becomes chairman/CEO.

Three armed Somali soldiers hijack Flight 414, a B-720B en route from Mogadishu to Jeddah with 130 aboard on November 24, 1984, after beating the pilot and wounding a crew member in an in-flight shootout. The plane is diverted to Addis Ababa where 22 people are released, but a threat is made to blow up the plane unless the Somali government releases seven condemned prisoners.

On November 15, the pirates agree to wait until November 27 before taking action. On that day, with their jailed compatriots freed, they release their prisoners unharmed when given the choice of political asylum or exile.

Bookings for the year reach a high of 120,000.

Enplanements drop 20% to 100,000 in 1985. In 1986, routes are opened to Banjul and Conakry. Operations continue apace in 1987. In April 1988, the company contracts with **Deutsche Lufthansa, A.G.** for the technical support of an Airbus Industrie A310-304, which is delivered in the fall under dry-lease from **Sabena Belgian World Airlines, S.A.** Traffic statistics are released for the first half of the year and show 61,781 enplanements.

In 1989, the fleet includes 2 B-720Bs, 1 of which is out of service, 2 Dornier 228-201s, and 1 each B-707-330C, Fokker F.27-600RF, and A310-304. The latter, a purchased unit, arrives in March to replace the leased Sabena machine.

After aborting its takeoff from Nairobi on May 17, a B-707-330B with 13 crew and 57 passengers overruns the end of a wet runway and ends up in a rice field. Although the Stratoliner must be written off, there are no fatalities.

En route from Hargeysa to Mogadishu on June 28, the F.27-600RF with 6 crew and 24 passengers is hit by a terrorist surface-to-air missile and crashes near Borama, Woqooyi Galbeed; there are no survivors.

Flights are interrupted by the civil strife in the early 1990s. Only the Airbus and Dorniers see service in 1990. In 1991, the Airbus is placed into storage and replaced by a B-727-282A. The Boeing is withdrawn in 1992 and the Dorniers are grounded.

By 1993–1996 as UN forces enforce cease-fires and then gradually evacuate, Chairman/CEO Gulaid's dormant carrier possesses a fleet of 2 B-707-320Bs, 2 Dornier 228-201s, and the first of 2 ordered Airbus Industrie A310-304s. Plans are made to resume jet flights from Mogadishu to Doha, Djibouti, Dubai, Abu Dhabi, Cairo, Frankfurt, Rome, Jeddah, and Nairobi and have the Dorniers relaunch scheduled domestic services.

Flights with the Dorniers begin again and are sporadic thereafter. On January 18, 1999, heavy fighting breaks out around the southern city of Kismayo and the Somali National Front closes it to all aircraft. Reviewing the activities of this concern in the 1990s, it is fair to say that it has not, in fact, operated as a real airline since 1991.

SONMEZ HOLDING AIRLINES (SONMEZ HAVAYOLLARI, A.S.): Yakova Yolu 9 Km, Sonmez Holding Tesisleri, Bursa, Turkey; Phone 90 (224) 246-5445; Fax 90 (224) 246-5446; Code SMZ; Year Founded 1984. Organized at Bursa in late 1984, President Osman Celikadam and General Manager Erdogan Keskin's new third-level carrier undertakes scheduled flights to cities inland of the Sea of Marmara with a pair of CASA C-212-100 Aviocars.

Celal Sonmez becomes president in 1992. In 1993–1997, services linking Bursa with Istanbul are provided by the Aviocars and a Shorts 360-100. A Bell 222UT also provides passenger charters.

Service is maintained in 1998–2000, during which years the Aviocars are withdrawn and replaced with a Grumman Gulfstream I and a Cessna 650 Citation III bizjet.

SONORA AIRLINES: United States (1967–1969). Sonora Airlines is set up at Reno, Nevada, in late fall 1967 to provide scheduled passenger

commuter roundtrips to Winnemucca via Ely and Lovelock. Daily Piper PA-31-310 Navajo revenue flights commence on December 16 and continue until the company goes out of business in 1969.

SOONAIR LINES: United States (1980–1981). Soonair is established at Tulsa, Oklahoma, during the first quarter of 1980 to provide scheduled passenger and cargo roundtrips to Dallas (DAL). Employing a Beech Turbo 18, daily revenue flights commence in April and are maintained until June 1981.

SOSOLISO AIRLINES, LTD.: Enugu, Nigeria; Code OSL; Year Founded 2000. Sosoliso Airlines is established at Enugu during the late spring of 2000 to offer scheduled revenue services to Lagos, Abuja, and Port Harcourt. A Boeing 727-2H9A is leased from **JAT Yugoslav Airlines** and employed to begin scheduled flights in July.

A second B-727-2H9A, christened *Rose of Enugu*, is chartered from JAT in late December.

SOUND AIR AVIATION: United States (1978). Sound Air Aviation, the FBO at Ronkonkoma, New York, establishes a scheduled air taxi division in 1978 to provide flights connecting Islip with New York (LGA). Although daily Aero Commander 500B roundtrips duly begin, they can only be maintained for a few months.

SOUNDAIR EXPRESS, LTD.: Canada (1979–1991). Having expanded, Brian Child's Wiarton, Ontario-based **Owen Sound Air Service (OSAS)** is renamed Soundair in 1979; the company mission continues to provide all-cargo charter services to regional destinations. Service is rendered with a Cessna 310, a chartered Gates Learjet 23, and several Howard 500s (converted Lockheed Model 18 Lodestars). In February 1980, a contract is obtained from **Purolator Courier**, for international flights between Toronto and Columbus, Ohio. The service is inaugurated with the first of an order for Swearingen Merlin IVs, as Soundair begins retiring its Howards.

The first Douglas DC-3 is received in November 1981. Two more arrive under lease in 1982 and are employed to initiate a nightly contract, on behalf of **Emery Air Freight**, between Montreal and Hartford, Connecticut, via Burlington, Vermont. The original Douglas is now committed to **Airborne Express** for a service between Toronto and Buffalo. Company headquarters are transferred to Toronto at midyear and a Merlin IV St. Johns–Halifax–Toronto route is opened on behalf of **Purolator Courier**.

Three new owned DC-3s arrive in 1983, each a replacement for one of the earlier machines now returned. With loads increasing, the operator is in need of more capacity than its licensure will allow. To overcome Canada's leisurely licensing process, owned Child begins merger discussions with financially distressed **Aero Trades Western, Ltd.** of Winnipeg.

Employing a second leased Gates Learjet, freighter flights are inaugurated in February 1984 from Vancouver to Calgary to Winnipeg to Columbus, Ohio. Late in the year, the **Aero Trades Western, Ltd.** acquisition is completed; the company not only receives upgraded licenses, but another DC-3 and two DC-4s.

Soundair is now transformed into a holding company to operate scheduled and nonscheduled airline subsidiaries. A passenger-flying division, **Commuter Express**, is discussed above. The freight subsidiary, which concerns us here, is relabeled Soundair Express. It will not release traffic statistics because officials claim they will not be tracking the carrier's freight ton-kilometers.

One of the two newly acquired DC-4s is employed in January 1985 to take over the cargo flights from Montreal to Hartford via Burlington. The other four-engine Douglas and the acquired DC-3 assume **Aero Trades Western, Ltd.**'s freight charter service from Winnipeg to northern Manitoba. With a DC-4 purchased from **Calm Air, Ltd.** via **Basler Flight Service** and the other pulled off the nonscheduled Manitoba service in July, Soundair Express starts freighter flights on behalf of **Emery**

Air Freight to Dayton, Ohio, from Quebec City, Montreal, Ottawa, Toronto, and Hamilton.

On October 6, a DC-3 is lost in a nonfatal accident at St. Louis. Later in the month, a Dassault Falcon 20, followed shortly thereafter by a second, begins flying for **Purolator Courier** between Montreal and Indianapolis via Ottawa and Toronto.

The three DC-4s are withdrawn in September 1986 and replaced with a Convair CV-580 in October. One of the former is sold to **Air North, Ltd.** In November, the Learjet 23s are transferred to a new Soundair subsidiary, **Executive Jet Canada, Ltd.** A Fokker Fairchild F.27F is purchased in May 1987, followed by another CV-580 in July. The Dutch-made turboprop is employed to service a **DHL Corporation** contract from Toronto to Cincinnati. Also during the summer, a Merlin IV is based at Montreal to undertake a DHL service to New York. Meanwhile, in the fall, a Cessna 402 and a Fairchild Metro II undertake replacement flights for **NWT Air, Ltd.** from Toronto to Ottawa and Montreal, respectively.

Three additional Convairs are delivered in March 1988 and a fourth in May (withdrawn in August). During the spring, freight and courier services are combined and all but two Merlin IVs are withdrawn. The terminus of the **Purolator Courier** service is switched in September from Indianapolis to Wilmington, Ohio, and is rerouted to Winnipeg and Calgary. The Fokker is replaced by a Dassault. A DC-3 is sold in October.

Operations continue apace in 1989; however, recessionary cost increases put the company into the red. In April 1990, Soundair Express stops flying and goes into bankruptcy. When the company is liquidated in 1991, its assets are purchased by **KnightHawk Air Express, Ltd.**

SOUNDSAIR, LTD.: New Zealand (1996-1998). Soundsair is set up at Wellington Airport on April 4, 1996 to offer scheduled passenger and cargo services throughout the nation. The company is successor to John Sinclair's bankrupt floatplane operation **Floatair, Ltd.**, which had flown to Great Barrier and Steward Islands since 1992.

Barry Hvid is general manager and he begins and continues revenue operations with 1 each Cessna 185 and Partenavia P-68B, plus 2 Cessna 208 Caravan Is.

The company expands on November 1 to operate a shuttle service between Wellington and Koromiko near Picton. This doubles its number of daily flights across the strait from 8 to 16.

The Cook Strait airline encounters regulatory and safety difficulties in early 1997 and is briefly grounded. It resumes flying again on March 9 after the CAA is satisfied its passenger operations meet safety standards. Strict conditions have been imposed, including weekly safety audits.

The company is out of business in 1998.

SOUTH AFRICAN AERIAL NAVIGATION COMPANY (PTY.), LTD. See **SOUTH AFRICAN AERIAL TRANSPORT (PTY.), LTD.**

SOUTH AFRICAN AERIAL TRANSPORT (PTY.), LTD.: South Africa (1919-1920). As world leaders meet in conference at Versailles in 1919 to write an official end to World War I, a number of South African veterans of the Royal Flying Corps, meeting in London, form potentially rival air transport concerns to operate in their homeland.

Maj. A. M. Miller sets up South African Aerial Navigation Company (Pty.), Ltd. while several unnamed ex-military flyers, having found £100,000 capitalization, establish South African Aerial Transport (Pty.), Ltd. Happily for all concerned, the two infant companies are soon merged.

Having removed themselves to Johannesburg, the principals establish a company office in the Explorations Building during June and appoint Maj. A. Francis as managing director. Plans are made to launch operations from Baragwanth Aerodrome, south of the city. Orders are placed for five Avro 504Ks, which are shipped by ocean freighter from the U.K. in July, along with a number of recruited mechanics.

After the aircraft have been uncrated, reassembled, and tested, Maj. Francis is ready to begin marketing. With T. F. Allen, mayor of Johan-

nesburg, as first passenger, scheduled flights commence on October 25 to Pretoria, Durban, Newcastle, and Pietermaritzburg. Maj. C. G. Ross undertakes the first charter, on November 15, on behalf of the *Johannesburg Star*.

Service continues apace for the next year. Attempts are made in the interim to interest the government in providing a subsidy—even an air-mail grant—but the efforts are in vain. It is noted that after SAAT closes its doors in November 1920, the pioneer has transported a total of 5,000 passengers. It also has the honor of having introduced commercial aeronautics to the nation.

SOUTH AFRICAN AIRWAYS (PTY.), LTD. (SAA): Private Bag X13, Johannesburg International Airport, Johannesburg, Gauteng 1627, South Africa; Phone 27 (11) 978-1127; Fax 27 (11) 978-1126; <http://www.saa.co.za/SAA>; Code SA; Year Founded 1934. South African Airways (Sud Afrikaanse Lugdiens) is formed at Durban on February 1, 1934 as a division of the South African Railways and Harbours Administration. Maj. Allister Miller's failing **Union Airways (Pty.), Ltd.** is purchased and merged and its order for three Junkers Ju-52/3ms is confirmed by the Union government. John Holthouse is named general manager and Union's routes, aircraft, and personnel are briefly placed back into service on February 5 under the new name.

Union/SAA's three Junkers F.13s and W.34 and two de Havilland DH 60G Gypsy Moths continue to offer weekly roundtrips from Cape Town to Durban via Port Elizabeth and East London and six-times-a-week return flights from Durban to Johannesburg. Railways and Harbours Administration head T. H. Watermeyer soon orders a halt to operations while orders for the first of 10 Junkers Ju-52/3ms are filled.

The premier "Iron Annie" (originally ordered by Union and christened *Jan van Riebeck*) is placed in service on November 15 as the first multiengine aircraft to be employed on the nation's domestic commercial routes. Upon its arrival at Durban from Johannesburg, the Junkers is mobbed by well-wishers seeking to inspect the giant aircraft; passengers are unable to alight for the jostling throng.

Two more German-made aircraft arrive and are christened *Lord Charles Somerset* and *Simon van der Stel*. Four-times-per-week services are now offered from Johannesburg to Cape Town via Durban and Port Elizabeth.

South-West African Airways, Ltd. is purchased for R14,000 and merged on February 1, 1935; its three aircraft (two Junkers A50s and an F.13) enter local operations. SWAA's single authorized scheduled route, Windhoek to Kimberly, becomes a part of SAA's main line operations on February 7.

Following a month-long conference between government officials and representatives from the U.K. Air Ministry on June 13, it is announced that the British flag carrier, **Imperial Airways, Ltd.**, will begin to call at Durban when the Empire Air Mail Scheme begins in two years. More importantly, SAA is granted authority to fly between Johannesburg and Lusaka. At the end of the month, a fourth Ju-52/3m, *Sir Benjamin d'Urban*, enters service.

The headquarters of the enlarged carrier are moved to Rand Field at Germiston, near Johannesburg, on July 1. Just over a month later, on August 6, Ju-52/3ms launch weekly Johannesburg-Kimberley-Beaufort West-Cape Town return shuttle flights. A total of 147 letters (5 registered) are carried on the first scheduled flight from Beaufort West. The first northbound flight over the new shuttle route is started on August 9.

On September 2, SAA launches a route from Windhoek to Cape Town via Kimberly. The first return service over the new segments begins on September 3.

The **Imperial Airways, Ltd.** service from Johannesburg to Cape Town is withdrawn and taken over by SAA, which also begins to fly unsurcharged first-class mail. One of the former **Union Airways (Pty.), Ltd.** DH 60Gs is lost in an accident on November 29.

A Junkers F.13 is destroyed in an accident on January 29, 1936. Twice-weekly direct Germiston to Cape Town via Bloemfontein, Kimberly, and Beaufort West, flights commence on April 1. Southbound

flights are operated on Mondays and Wednesdays and northbound on Tuesdays and Fridays.

Germiston to Cape Town twice-weekly coastal roundtrips, also taken over from **Imperial Airways, Ltd.**, also begin on April 1 and are flown via Durban, East London, and Port Elizabeth. Southbound flights are operated on Thursdays and Sundays, northbound, on Mondays and Fridays. The first mail to be flown on this new route had departed England aboard an **Imperial Airways, Ltd.** plane on March 24.

On June 1, SAA and the Union Post Office negotiate a "Late Mail" contract under which letters and postcards may be accepted at airports (for a 2d fee each) after their official pickup times elsewhere. During late summer, four six-passenger Airspeed Envoys are acquired.

The weekly Kimberley–Windhoek feeder service is cancelled on October 8 and is replaced with a new route from Germiston to Windhoek via Bloemfontein, Kimberley, Upington, Keetmanshoop, and Mariental. The first Airspeed Envoy return service from Windhoek is operated on October 9 and permits direct connection with **Imperial Airways, Ltd.** flights from Germiston.

The schedules for the direct and coastal routes between Germiston and Cape Town are changed on October 11. The direct route, operated via Kimberley and Beaufort West, is operated south on Sundays (with mail from Imperial Airways) and Wednesdays and north on Tuesdays (with mail for Imperial) and Fridays. The southbound coastal route flights are now made on Thursdays (with mail from Imperial Airways) and Mondays and north on Mondays (with mail for Imperial) and Thursdays.

On October 12, weekly Airspeed Envoy Johannesburg to Port Elizabeth via Bloemfontein, Monday services are inaugurated. On November 12, a new South African postage stamp is issued for use on internal airmail. Late in the year, orders are placed for the first of 16 10-passenger Junkers Ju-86s.

The first Ju-86 is delivered on June 5, 1937, and is named *Sir J. Gordon Springg*. Four days later, Johannesburg to Lusaka flights commence via Pietermaritzburg, Bulawayo, and Livingstone.

Since January, six additional Ju-52/3ms have been delivered, although the last is destroyed in an accident a few days after delivery in mid-June. On June 29, the airline begins carriage of unsurcharged mail as a partner in the Empire Air Mail Scheme. Routes are opened from Johannesburg to Lusaka, Broken Hill, Nairobi, and Kisumu on July 4 and twice weekly, carrying mail only, from Johannesburg to Lourenco Marques on July 17, with the first return over the mail route on July 19.

The former **Union Airways (Pty.), Ltd.** Junkers W.34 is lost in a crash at George on October 16 that kills its crew. Two more Envoys are received by year's end.

Also during the fourth quarter, orders are placed for 19 up-engined Ju-52/3ms. The first two planes sent down are lost in crashes en route, although their crews are recovered. In Germany, neither the Luftwaffe, the Junkers Flugzeugwerke, A.G., or **Deutsche Lufthansa, A.G.** have sufficient qualified crews to make delivery flights as far away as South Africa. The builder is forced to turn to the German Reichluftfahrtministerium (RLM), or Air Ministry, for assistance. Conversations ensue between the Junkers Director General Tiedemann and the well-known former Lufthansa pilot Capt., now SS-Standartenfuhrer Hans Baur concerning the use of crews from the Flugbereitschaft RLM (a divisional unit of the air ministry that is often referred to as the Regierungsstaffel or government squadron). Baur personally obtains approval from Adolf Hitler for the use of three crews, including one that he heads himself.

The first three Ju-52/3ms, complete with necessary supplies and vital navigational maps, depart the Dessau factory at the end of December. Flying via Munich, Rome, Tripoli, Benghazi, Cairo, Tanganyika, and Southern Rhodesia, with other African refueling and overnight stops made at remote destinations, they arrive at Rand Airport, Johannesburg, in mid-January. Only a few more of the sturdy Junkers planes will be delivered before the outbreak of World War II.

In 1938, service is inaugurated Johannesburg–Bulawayo on February 1, Johannesburg–Cape Town via Bloemfontein on March 1, and with the

Sir J. Gordon Springg, Johannesburg–Windhoek via Palapye Road and Mann on November 4. Meanwhile, on October 28, a bilateral air agreement between South Africa and Portugal makes provision for roundtrip flights between Luanda, Angola, and Germiston in the Transvaal.

On behalf of **Imperial Airways, Ltd.**, the Kalahari (or Bechuana-land) Desert Feeder Service is launched on November 1. The initial flight is from Johannesburg to Windhoek, via Palapye, Maun, Gobabia, while the return service from Windhoek to Johannesburg, is operated via Keetmanshoop, Upington, and Kimberley.

The fleet at year's end includes 11 Ju-52/3ms and 18 Ju-86s, the 4 Ansons having been passed to the South African Air Force several months earlier.

A Johannesburg to Luanda route via Keetmanshoop, Windhoek, Outjo, Mossamedes, and Lobito, is opened on August 21, 1939. The premier multistop return flight from Luanda to Johannesburg is operated on August 25.

Due to the outbreak of World War II on September 1, the Empire Air Mail Scheme comes to an end late in the month. At the same time, the South African government takes over the carrier's fleet, dividing it into two units, or wings, one military and one civil.

All-but-two of the Ju-86s are placed into the Military Wing, while the remaining two Ju-86s and 11 Ju-52s are left in the Civil Wing. The latter, with reduced capacity, suspends the routes from Cape Town to Windhoek and from Johannesburg to Lourenco Marques, Entebbe, and Luanda.

Early in 1940, orders are placed for 29 Lockheed Lodestars. All South African civil operations are suspended on May 24 and all aircraft so engaged are subjected to government impressment. SAA's 33 pilots are drafted.

The British government takes over all but one of the 29 Lockheed Model 18s ordered before they can be delivered to SAA in October. In order to maintain communications between certain of its territories, the U.K. orders the routes from Johannesburg to Entebbe and from Johannesburg to Luanda to be reopened on December 17.

In March 1941, the weekly roundtrip service to Entebbe is extended to Leopoldville in the Belgian Congo. Weekly service is started between Lourenco Marques and Leopoldville via Johannesburg and Entebbe on June 6. The mail pouch contains just 20 letters. Weekly Johannesburg to Kisumu service is begun in conjunction with **Southern Rhodesian Air Services, Ltd.** on June 7 via Bulawayo, Salisbury, Lusaka, Ndola, Kasama, Mbeya, Dodoma, and Nairobi.

On February 2, 1942, a weekly return service begins from Cape Town to Leopoldville via Johannesburg, Bulawayo, Lusaka, and Elizabethville. The South African mails connect at Leopoldville with **Pan American Airways** Boeing 314 flights to the U.S. All SAA service, including the delivery of unsurcharged mail, is suspended in August.

On May 23, 1944, airmail is again accepted in South Africa for delivery to Great Britain. There is, however, no guarantee that the post will not go by ship, instead.

Toward the end of November, the South African government releases six L-18s for priority passenger services. SAA personnel are reassembled under the leadership of new General Manager C. J. "Boetie" Venter.

Employing the Lodestars, SAA, on December 1, resumes weekly services from Johannesburg to Salisbury via Bulawayo, twice weekly from Johannesburg to Cape Town via Kimberley and Bloemfontein, thrice weekly from Johannesburg to Cape Town via East London and Port Elizabeth, and daily from Johannesburg to Durban. With the release of three more Lodestars, SAA restarts weekly flights from Johannesburg to Port Elizabeth and from Johannesburg to Windhoek.

At the South African Air Transport Conference held at Cape Town in March 1945, government and air transport officials (from large and small operations) discuss postwar commercial flying within the country. Plans for a service to link South Africa with Europe are reviewed.

Orders are placed for three (later seven) Douglas DC-4s in midyear. Nine passenger-carrying Avro 685 York Is are leased from **British Overseas Airways Corporation (BOAC)**. When the first of these ar-

rives on November 7, it is christened *Springbok* and is employed as part of a pool arrangement with the British state carrier, to commence weekly Johannesburg London (Bournemouth) Springbok return service via Nairobi, Khartoum, Cairo, and Tripoli on November 10. Airmail for the U.K. and Europe only is accepted.

Named for the majestic antelope, the two-day flights enter the history books as the first commercial landplane-service from South Africa to Europe and SAA's first international service. For its part, BOAC flies the Springbok route thrice weekly from Johannesburg to London (Hurn Airport) via Livingstone, Brazzaville, Kano, and Tripoli.

At the end of the year, two more York Is, *Impala* and *Sable*, arrive and orders are placed for three (later seven) Douglas DC-4s.

Following delivery of the initial DC-4, nonstop daily Johannesburg to Cape Town return service is inaugurated on May 1, 1946, the same day the airline resumes carriage of unsurcharged mail. The unnamed DC-4s are delivered during the first two quarters.

As a supplement to the York flights, thrice-monthly, two-day Johannesburg to London Springbok DC-4 flights commence on July 8, with stops at Nairobi, Khartoum, Tripoli, and Rome.

During the summer, the first two de Havilland DH 104 Dove 1s (*Katberg* and *Naval Hill*) and the first of eight Douglas DC-3s to eventually be received begin service over domestic routes. The airline's first stewardesses are now employed. Under a new pool arrangement with **DETA (Divisao de Exploracao dos Transportes Aereos, S.A.)** of Mozambique, weekly return service is initiated in October from Johannesburg to Lourenco Marques via Durban and Bloemfontein.

The fleet, at the beginning of 1947, includes the Dove 1s *Naval Hill* and *Katberg*, 5 DC-3s, 9 York Is, and 7 DC-4s.

Having been delivered beginning in September, the first of eight Vickers 635 Viking 1Bs, *Simonsberg* and *Cathkin Peak*, are placed in service on domestic and regional routes during October, beginning with the replacement of the Lodestars operating the twice-weekly segments from Johannesburg to Bulawayo.

An office is opened in London and on November 1, Johannesburg to London *Springbok* service is increased to thrice weekly as the York Is are withdrawn from the route and replaced with DC-4s. The Viking 1Bs *Mont-Aux-Sources*, *Gulakop*, *Devil's Peak*, *Signal Hill*, *Leeuwkop*, and *Mount Prospect* are all in service by year's end.

Joint SAA-British Overseas Airways Corporation (BOAC) 76-hr. Johannesburg to London all-cargo Avro York flights begin on April 14, 1948. Weekly Johannesburg to Cairo DC-4 service is kicked off on January 30, 1949. The year's enplanements total 135,000 as orders are placed for four Lockheed L-749A Constellations.

Weekly Johannesburg to Lydda DC-4 return flights via Nairobi and Khartoum are started on February 20, 1950. Seven L-18 Lodestars are sold for £35,000 to **East African Airways Corporation**.

The first L-749A is delivered on May 8; christened *Cape Town*, it is placed on the Springbok service to London beginning on August 26 and is the first fully pressurized commercial aircraft to be employed on the route to Europe.

Arrival of the other three Constellations allows the DC-4s to be withdrawn from the London route by October 31. The following month, SAA sells its Vikings to **British European Airways Corporation (BEA)** and begins to release them to the British operator at the rate of one per month.

Bookings grow to 157,000.

During 1951, orders are placed for the de Havilland DH 106 Comet I. Company employees institute a controversial "go slow" work policy in an effort to gain for SAA its independence from the Railways and Harbour Administration; it is not successful. Daily DC-4 Johannesburg to Cape Town via Durban return services begin in August.

Pooled return service with **Commercial Air Services (Pty.), Ltd.** begins during the fourth quarter from Johannesburg to Margate.

A DC-3 with 4 crew and 13 passengers crashes into Mount Ingeli near Kokstad, SW of Durban, on October 15; there are no survivors.

Weekly Goldplate L-749A return service is initiated from Johannesburg to London on November 1 via Nairobi, Khartoum, and Rome.

Passenger boardings are 165,128.

The following year, 1952, is taken up with planning for the introduction of jetliner service. South African crews are sent to London for training aboard the new Comet Is of **British Overseas Airways Corporation (BOAC)** as Constellations continue the Springbok services. Frankfurt becomes a stop on the Goldplate Constellation route on July 1.

A DC-3 is lost at Carolina, South Africa, on September 15; there is no information on casualties.

Enplanements for the year reach 179,658.

Tourist-class fares are introduced on October 3, 1953 on three of the four weekly L-749A Springbok services to London. The reconfigured Constellations also begin to make additional stops at Livingstone, Lusaka, Athens, and Frankfurt.

Flights simultaneously commence from Johannesburg's new Jan Smuts International Airport on October 3 and the next day, employing a de Havilland DH 106 Comet I flown by an SAA crew and under contract from BOAC, but wearing SAA titles, the carrier begins twice-weekly jetliner Springbok London to Johannesburg flights. SAA is the first airline outside the U.K. to operate jetliners commercially.

Tourist Class fares are cut on the Springbok route before year's end. By this time, the fleet includes 11 Lodestars, 7 DC-4s, 5 DC-3s, and 4 L-749As.

The year's enplanements jump to 205,256.

During a Springbok flight to Johannesburg on April 8, 1954, the BOAC Comet I G-ALYY, just after takeoff from Naples for Cairo, disintegrates and crashes into the Tyrrhenian Sea (21 dead). The jetliner type is withdrawn from service worldwide and SAA cancels its order for the type.

The company now reinstates the L-749A as its principal long-haul aircraft and these once again offer one first-class and three tourist-class services per week over the Springbok route.

A DC-4 route is launched from Windhoek to Livingstone during the summer. Indeed, all of the Lodestars are now withdrawn and domestic and regional flights are handled with DC-3s and DC-4s. In August, three DC-7Bs are ordered from the U.S. as Constellation replacements.

Bookings this year accelerate to 217,899, despite the jetliner tragedy. Boardings increase during 1955 to 240,147.

The first DC-7B is delivered in February 1956 and is christened *Dromedaris*. Seven Vickers Viscount 813s are ordered in March, while toward the end of the month and at the beginning of April, two more DC-7Bs, *Reiger* and *Goede Hoop*, are acquired.

The newly delivered DC-7Bs are introduced on the London Springbok service on April 21 and are the first of their type to be operated outside of the U.S. On July 1, L-749A flights are started to Salisbury, Rhodesia; by this time, Constellations have replaced DC-4s on all international routes and have reduced the time to London to only 28 hours.

With only one stop at Khartoum, DC-7B Springbok flights begin to London on December 4. Flying time for this express service is 21 hrs. 10 min. Enplanements for the year rise to 267,288.

Twice-weekly Johannesburg to London DC-7B return flights via Leopoldville, Kano, Algiers, and Amsterdam begin on April 2, 1957. Employing a shorter route via Kano rather than Khartoum, a DC-7B one-stop Johannesburg to London Springbok runs in May; initial and largely sustained flying time on this express route is a record 17 hrs. 45 min. A pooled service agreement with **Central African Airways Corporation** is also signed in May.

The L-749As are placed on the longer domestic routes, including Johannesburg to Durban. The fourth DC-7B, *Chapman*, arrives in October, allowing frequencies on the Springbok return route to be increased to five times a week.

With SAA L-749As, a pooled Wallaby service is opened with **Qantas Empire Airways (Pty.), Ltd.** on November 25 over a route across the Indian Ocean from Johannesburg via Mauritius to Perth and Sydney. The first return flight from Australia is made on November 27. DC-7Bs replace the Constellations just after Christmas. Bookings this year skyrocket to 302,102.

Orders are placed in February 1958 for three Boeing 707-344s. The first two of seven Viscount 813s are delivered on October 26 and replace L-749As on the Johannesburg to Salisbury route, now renamed the Bosbok route, on November 24.

Contingency planning is started during the year for the possibility that newly independent black African states might deny overflight rights. Company aircraft begin surveying alternate routes along Africa's Atlantic coast and two captains perform familiarization flights into Las Palmas and Luanda.

Viscount 813 flights commence on December 15 from Johannesburg to Port Elizabeth via Bloemfontein and Kimberley.

Boardings rise through the 12 months to 303,053.

Twice-weekly Viscount 813 Johannesburg to Bulawayo flights are introduced on January 9, 1959. By month's end, the Vickers turboprops are operating all of the carrier's domestic services.

On February 1, the carrier celebrates its twenty-fifth anniversary. Skycoach economy-class fares are introduced on DC-4 domestic routes beginning on March 25.

Skycoach DC-4 return service is initiated from Johannesburg to Cape Town on October 5. Four days later, two DC-4s are sold to UAT (Union Aeromaritime de Transports, S.A.). DC-3 "colored only" frequencies commence on December 4, with fares 25% lower than the same service as provided by Viscounts.

The L-749A *Cape Town*, along with the other L-749As, are retired later in the year, freeing up their names for use on the Boeing jetliners. The Constellations are put up for sale, but no buyers are found. Enplanements this year reach 319,165.

Two, later four, L-749As are returned to service during the first half of 1960 to offer low-cost domestic flights. The first B-707-344 is delivered on July 15; piloted by Capt. J. M. B. Botes and S. Pienaar, the Stratoliner makes the 11,445-mile flight from Seattle, Washington, to Jan Smuts Airport at Johannesburg in 21 hrs. 35 min. Christened *Cape Town*, the aircraft is renamed *Johannesburg* when the second Boeing arrives on August 22 and takes the *Cape Town* name. SAA is the first airline to operate Boeing intercontinentals with full span leading edge flaps.

On September 4, *Cape Town* establishes a new 1 hr. 15 min. Cape Town to Johannesburg record. The B-707-344s are placed on the Johannesburg to London Springbok run beginning on October 1 and begin to replace the DC-7Bs.

As the result of political disturbances in the Belgian Congo, frequencies to Leopoldville are suspended. The *Cape Town* is damaged as the result of a bad (belly) landing at Nairobi on October 30. Toward the end of the fourth quarter, frequencies on the Springbok route are cut to three times a week.

Bookings during these 12 months swell to 366,438.

In 1961, the fleet comprises three B-707-344s (*Johannesburg*, ex-*Cape Town*, *Cape Town*, ex-*Durban*, and *Durban*, ex-*Johannesburg*), 4 DC-7Bs, 7 Viscount 813s, 4 L-749As, 5 DC-4s, and 6 DC-3s. Two of the Constellations, including the former *Cape Town*, are leased to **Trek Airways, Ltd.** for the independent's low-cost European services.

Paris becomes a stop on the Springbok service when service to Europe is introduced from Cape Town via Johannesburg on June 1.

In December, an arrangement is worked out with **Cubana (Empresa Cubana de Aviacion, S.A.)**. Under its terms, SAA will purchase a pair of Viscount 818s from the island airline for £770,000 and two L-749As.

Passenger traffic climbs to 376,713.

The fleet is increased by one former **Cubana (Empresa Cubana de Aviacion, S.A.)** Viscount 818, christened *Reitbok*, in March 1962. Since Cubana is unable to deliver the second turboprop, SAA holds on to the Constellations.

A DC-3 with four crew and three passengers makes a forced landing north of Seymour, South Africa, on March 6 (two dead).

In April, SAA becomes the first airline to fly a nonstop route from South Africa to Europe: Johannesburg to Athens in nine hours. During the summer, weekly and experimental DC-7B newspaper delivery

flights are made from Johannesburg to Cape Town under contract to the former city's *Sunday Times*. Each service is able to transport 11 tons of newspapers, enough for every citizen in Cape Town who wishes to purchase one.

Passenger boardings for the year advance to 409,551.

In what turns out to be a timely move, South Africa and Portugal conclude a new bilateral air agreement during the spring of 1963. It provides access for SAA services to Lisbon and Lourenco Marques from Johannesburg and Durban.

On August 22, a number of newly independent black African states, along with Egypt, Algeria, Sudan, and Libya, ban the carrier from their airspace in protest against South Africa's racial policies. As the result of contingency planning begun five years earlier, SAA shifts its long-haul services to a bulging route along the Atlantic west coast of Africa and does not miss a flight.

On September 20, **British Overseas Airways Corporation (BOAC)**, **East African Airways Corporation**, and **Central African Airways Corporation** withdraw from a profit-sharing pool with the airline for the same political reason. Nairobi closes Wilson Airport to the South Africans on November 12.

Still, 460,660 people are carried on the year and revenues total \$39,113,400.

In 1964, the workforce totals 3,582. The carrier's thirtieth anniversary is celebrated in February. Orders, valued at \$28 million, are placed for five B-727-100s, a B-707-320B, and an L-749A, the former *Cape Town*; her three sisters are sold to **ACE Freighters, Ltd.** for R 120,000.

Passenger boardings rise 16.9% to 612,066. Revenues are \$43.8 million, allowing an \$841,000 profit.

The employee population increases by 16 in 1965. On May 7, **Trek Airways (Pty.), Ltd.** begins once-every two-weeks roundtrips on behalf of the major from Johannesburg to Perth via Mauritius and the Cocos Islands; the "down under" flights by the two airlines allow South Africa to provide weekly services to and from Australia.

A new twice-weekly European Springbok routing is opened on June 4: Johannesburg to London via Luanda, Las Palmas, and Madrid.

The B-707-320B and five B-727-44s are delivered between June 3 and September as all but one of the DC-4s and a Viscount 813 are retired. Meanwhile, beginning on August 1, the five newly arrived trijets, christened *Tugela*, *Orange*, *Vaal*, *Limpopo*, and *Letaba*, enter service. The final DC-4 flight, accompanied by ceremony, is operated by *Lebombo* on September 30 from Johannesburg to Windhoek via Upington and Keetmanshoop.

The **Trek Airways (Pty.), Ltd.** replacement flights to Australia end on October 1, as another B-707-320B order is placed. The same day, B-727-44s complete the process of taking over South African domestic flights from the Viscounts. Windhoek becomes a Springbok stop on November 1.

A total of 693,267 people are carried on the year.

Two B-727-144s are delivered in 1966 and orders are placed for three B-707-344Cs, three B-737-244s, and three B-747-100s. During January, the final DC-4, *Lebombo*, is sold to the South African Air Force.

The company switches from its decade-old Las Palmas route, flying the Springbok route to Europe, beginning on April 1, via a technical stop at the former Portuguese colony of Ilha do Sal, one of the Cape Verde Islands, about 350 miles off the coast of Senegal. Two more B-727-44s are received and two DC-7Bs are sold to **Transair Sweden, A.B.**

Alex Marais "Lex" Conradie succeeds John G. Grove as chairman in July. On September 3, a weekly return service is initiated from Johannesburg to Gaborone in Botswana.

A total of 843,000 travelers are transported.

A B-707-344 is delivered in 1967 and the employee population reaches 4,101. The fleet now comprises 23 aircraft.

During the first quarter, authority is received to operate flights into Luanda and Salisbury.

While approaching East London in bad weather on March 13 on a flight from Port Elizabeth, Flight 406, the Vickers Viscount 818 *Rietbok*

with 5 crew and 20 passengers, mysteriously plunges into the Indian Ocean 35 mi. offshore; wreckage is found the next day and there are no survivors.

Replacing the DC-7B service and the propeller plane's intermediate stops, B-707-344 flights commence on March 29 from Johannesburg to Sydney via Mauritius and Perth.

Basutair, Ltd. is reformed in midyear, with the assistance of **Commercial Air Services (Pty.), Ltd.** Richard Southworth, Basutair founder/managing director, remains in charge. A Douglas DC-3 is leased from Comair and under contract to the government, it is employed, beginning on October 2, to offer a scheduled weekly roundtrip between Maseru and Johannesburg. A second weekly roundtrip is offered as a pooled frequency in partnership with SAA.

Passenger boardings accelerate 14% to 956,400 and the revenue passenger mile (RPM) mark exceeds a billion for the first time (1,029,727,000).

Airline employment is 4,502 in 1968. One B-707-344C, one B-727-44, a B-727-44QC, and three B-737-244s join the fleet as the last DC-7B and a DC-3 are sold.

Reciprocal Paris to Johannesburg all-cargo services are begun with **Air France** on January 20. **Air Madagascar (Societe National Malagache de Transports Aeriens, S.A.)** places orders in February for two B-737-2B2s. It also signs an agreement with South African Airways; under its terms, SAA will maintain the new "Baby Boeings." Windhoek becomes a stop during March on the Springbok service to Frankfurt.

En route to London from Johannesburg on April 20, Flight 228, the B-707-344C *Durban* with 12 crew and 116 passengers aborts takeoff from its intermediate stop at J. G. Strijdom Airport at Windhoek, Namibia, and crashes in scrub 5,327 m. from the end of the runway (123 dead).

A new B-707-334C arrives a month's end; christened *Port Elizabeth*, it is registered sometime later in the year.

The carrier orders 30 pilots and stewardesses to begin karate training on October 5 as a defense against hijacking. Following their October 29 arrivals, the first two B-737-244s are named *Rongala* and *Pongola*.

Passenger boardings jump another 14% to pass the one million-mark for the first time (1,059,812). Revenues total \$84.5 million.

Service is inaugurated from Johannesburg to New York via Rio de Janeiro on January 4, 1969. The B-707-344C *East London* is acquired in the spring as a replacement for the machine lost the previous year. In April, Johannesburg to New York (JFK) service is started via Rio de Janeiro.

Two more B-707-344Cs, including the *Pretoria*, are delivered on August 28.

The first **Air Madagascar (Societe National Malagache de Transports Aeriens, S.A.)** B-737-2B2 is delivered in September and is christened *Boina*. Following workup and proving flights, it begins a weekly return service to Johannesburg on October 15. The Boeing flies to South Africa on Saturdays and returns on Thursdays. As a way of gaining currency to help pay for the new machine, it is wet-leased to SAA between Sundays and Wednesdays and flies over South African domestic routes. This arrangement will last for a year.

The B-737-244 *Malopo* arrives on October 22. Enplanements move ahead this year to 1,218,751.

Airline employment stands at 5,381 in 1970. A new joint freight service with **British Overseas Airways Corporation (BOAC)** is opened between London to Johannesburg early in the year. Offices are commissioned in Barcelona, Brussels, Chicago, and Houston. Three more B-737-244s, *Gouritis*, *Umkomaas*, and *Nossob*, are delivered and enter domestic services. During the year, the last DC-3 is withdrawn from domestic and trans-border services and orders are placed for a pair of Hawker Siddeley HS 748s. Additionally, the company becomes the first to have an integrated message-switching and automated reservations system housed in one central computer.

Cargo traffic grows 19% and passenger boardings soar 18.7% to 1,499,079.

The carrier's HS-748 is delivered in January 1971, followed by the second in February. The first wide-body, a B-747-244B, is delivered on

October 22. Christened *Lebombo*, the giant new aircraft, complete with the black silhouette emblem of a Flying Springbok on its tail, is placed into service on December 1 over the company's Springbok route from Johannesburg to London.

A second Dash-244B, the *Drakensberg*, arrives 12 days later. With the first Hawker Siddeley HS 748s now in full operation, the Viscount 813s are contracted to be sold to **British Midland Airways, Ltd.**

Bookings for the year are up to 1,612,000.

Airline employment stands at 7,325 in 1972. Three additional B-747-244Bs arrive between January and September and are christened *Tafelberg*, *Magaliesberg*, and *Swartberg*; they join a fleet now comprising 9 B-707s, 9 B-727-44/244s, 6 B-737-244s, 7 Viscount 813s, 3 Hawker-Siddeley 748s, and 3 DC-3s.

Weekly B-747-244B roundtrips commence on January 9 between Johannesburg and Cape Town. The last Viscount 813 service is operated in early February. The routes to Rhodesia and South West Africa are taken over by the B-727s and B-737-244s. A second weekly roundtrip service to Rio de Janeiro begins on April 1.

In an effort to extort money from H. Oppenheimer, chairman of the Anglo-American Mining Company on May 24, two Lebanese hijackers, F. A. Camil and A. Yaghi, commandeer the B-727-44 *Letaba* during a Salisbury-Johannesburg flight. Malawi military forces storm the aircraft on May 26 at Blantyre and capture the pirates; Camil and Yaghi will be tried and sentenced to prison.

Chairman Alex Marais Couralis retires on August 2 and is succeeded by James Adam. In partnership with **Aerolineas Argentinas, S.A.** a Johannesburg to Cape Town weekly roundtrip service begins on November 6.

Unduplicated route mileage is now in excess of 50,000. All aircraft are repainted in a new color scheme during the year and the last Viscount 813 is delivered to **British Midland Airways, Ltd.** Bookings approach the two million mark.

The employee population in 1973 numbers 7,457. B-747-244B service is inaugurated between Cape Town and Buenos Aires. Freight soars 49.8% and enplanements rise to 2,211,000.

The workforce in 1974 is 7,703. Weekly B-747-244B service is launched from Johannesburg to Hong Kong in June via the Seychelles Islands. On July 16, an \$87-million order is placed with Boeing for three B-747SP-44s.

Chairman Adam announces his early retirement at year's end. Enplanements total 2,697,623. On revenues of \$248 million, a net \$4-million profit is earned.

Orders are placed in 1975 for four Airbus Industrie A300B2K-3Cs. Two more B-747SP-44s are requested on August 28, with an option taken on another. A sixth B-747SP-44 is ordered in October, making SAA the largest purchaser of the aircraft type.

A B-747-244B with 287 aboard is hit by gunfire during its April 8 landing at Luanda, Angola, an intermediate stop on the regular London service. No injuries are reported and the Jumbojet returns safely to Johannesburg. Officials speculate that opponents of Dr. Agostinho Neto, president of the Popular Front for the Liberation of Angola, shot at the airliner under the suspicion that he was aboard the aircraft.

Cargo traffic dips 1.4% this year, but passenger boardings increase 6.3% to 2,879,000. Revenues jump to \$271 million, leaving a \$9.9-million profit.

The employee population in 1976 is 9,914. The first of five B-747SP-44s, the *Matroosberg*, carrying 50 passengers, is delivered on March 24 following the establishment of a new world record for the longest nonstop flight by a commercial aircraft: Paine Field, in Washington State, to Cape Town (10,290 miles) in 17 hrs., 22 min. Among the VIPs aboard the historic service is Minister of Transport and Communications S. I. Muller.

The second B-747SP-44, the *Outeniqua*, is delivered on April 23. It wears its starboard SAA titles in Afrikaans and those on the portside in English.

Three more of her type will arrive through November and are christened, respectively, *Maluti*, *Majoba*, and *Hantam*; when placed into service, they will significantly increase the company's nonstop capability

around those many black African nations that will not grant overflight privileges due to the government's racial policies. The *Matroosberg* begins revenue service on May 1 flying from Johannesburg to Rome via Athens and Lisbon.

The company's New York headquarters is vandalized during office hours on June 18 by two unidentified Afro-American males. Following delivery of the *Outeniqua*, it begins weekly roundtrips on August 1 from Johannesburg to New York via Sal Island, cutting 2 1/2 hours off the previous routing.

The first of four ordered Airbus Industrie A300B3K-3Cs joins the fleet on October 31; christened *Gemsbok*, it is placed into service on November 26.

Cargo is up 2.9% and passenger bookings rise 2% to 2,938,000.

Enplanements grow to 3,010,000 in 1977, as three more A300B2K-3Cs, *Blesbok*, *Waterbok*, and *Rooibok*, and the sixth B-747SP-44, *Soutpansberg*, join the fleet.

The first B-707 Stratoliner, the *Johannesburg*, is sold to **British Midland Airways, Ltd.** on July 27. The profit has little impact when a \$12-million operating loss is suffered.

Airline employment at CEO M. E. Smuts's carrier in 1978 is 10,478. B-747SP-44 service is inaugurated to Tel Aviv. A new domestic excursion fare is introduced.

Passenger boardings grow 4.2% to 3,142,000 and freight traffic is up 27.5%. On total revenues of \$332.7 million, expenses are \$327.5 million and the operating profit is \$5 million.

The fleet in 1979 includes 5 B-747-244Bs, 6 B-747SP-44s, 3 B-707-344Cs, 6 B-727-244s, 6 B-727-44QCs, 6 B-737-244s, 4 A300B2K-3Cs, and 3 HS 748s.

Following the February 16 destruction of an **Air Rhodesia, Ltd.** Vickers Viscount 782D by a heat-seeking missile fired by guerrillas, SAA cancels its twice-weekly Salisbury to London service, as well as its twice-weekly roundtrips between Johannesburg and Victoria Falls. The B-707-344C *East London* is sold in March.

Passenger boardings accelerate 16.1% to 3,646,000, while freight traffic advances 7.1% during the year. As the result of increasing fuel prices, a \$31.3-million operating loss is taken.

Airline employment is reduced by 2.2% in 1980 to 11,244. Two B-747-244B combis (BC), the *Waterberg* and *Helderberg*, are added, while 12 B-737-244As and 2 A300B4-203s are ordered.

The company announces on July 1 that it will hire black women as flight attendants for the first time. The B-747SP-44 *Matroosberg* is leased to **Luxair, S.A.** in October.

Passenger boardings swell 9.2% to 3.8 million while cargo rises 5.6% to 250.9 million FTKs. Revenues reach \$871.6 million, but expenses climb 36.9% to \$925.3 million, leaving a \$53.7-million operating loss.

The number of employees is increased by 1.4% in 1981 to 11,397.

Luxair, S.A. is unable to begin operations with the *Matroosberg* and so returns it in January.

A fleet of British Aerospace (BAe) 146-100s is acquired to provide frequencies to the capitals of the neighboring nations of Botswana, Lesotho, and Swaziland. During the spring, the transportation portfolio in the government is remodeled; the airline and other units formerly operated under the Railways and Harbours Administration are placed under the new department South Africa Transport Services.

A historical aircraft collection is deemed an appropriate way to celebrate the company's 50th anniversary in 1984 and a special fund is established for its upkeep. A search is undertaken for a Junkers Ju-52/3m, but being unable to locate an actual German-made model, SAA purchases from a private collector in England a license-built model manufactured by Construcciones Aeronauticas, S.A. (CASA) in Spain. The plane is shipped to Lemwerder, Germany, where it is disassembled and shipped to South Africa in May. It will be painstakingly rebuilt and refurbished to resemble the first South African "Tante Ju," the *Jan Van Riebeeck*. Of more than 5,000 Ju-52/3ms built, she will be, when reborn, one of only six still flying in the world.

The A300B4-203 Springbok is delivered in August, along with six B-737-244As, *Tugela*, *Limpopo*, *Vaal*, *Oranje*, *Letaba*, and *Komati*.

Enplanements are up a slight 0.6% to 4,005,000 while freight balloons by 19.4% to 311.06 million FTKs. Another operating loss is posted.

The employee population in 1982 stands at 12,247. Seven more B-737-244As (*Marico*, *Kei*, *Berg*, *Caledon*, *Olifants*, *Wilge*, and *Umgeni*) and two more A300B4-203s (*Eland* and *Bosbok*) join the fleet as the last B-727-44QC is retired and sold, helping to pay for some of its successors.

The technical and overhaul base at Johannesburg now provides support for the aircraft of **Air Comores, Ltd.**, **Air Mauritius, Ltd.**, **Air Zimbabwe Corporation**, **LAM Mozambique Airlines, S.A.**, **Royal Swazi Airlines**, and **TAP (Air-Portugal, S.A.)**. The facility features a newly opened hangar that is the largest in the southern hemisphere.

During the year, the state-appointed Margo Commission of Inquiry into Civil Aviation refuses to make a recommendation on airline deregulation and over 80% of its 300 recommendations will be ignored. The first and only combi Airbus, the A300C4-203 *Koedoe/Kudu*, is also placed into service following its October 29 delivery.

Orders are placed for two B-747-300s and in December the B-727-44 *Letaba*, the only SAA aircraft ever hijacked, is sold to **Aerotol Colombia, S.A.** It is reported that, at some unnamed point during the year, a passenger aboard a company flight, assisted by a flight attendant, gives birth to a healthy baby.

Freight accelerates 1.9% to 318.94 million FTKs, but passenger boardings dip 1.7% to 3,940,000. This year's operating loss is \$65.6 million.

One B-737-244 is sold in 1983 and other cost-cutting measures are taken. Two B-747-344s, the *Cape Town/Kaapstad* and *Johannesburg*, are delivered in April and May, respectively, and are employed to launch nonstop Johannesburg-London Springbok service. A route is also opened to the Comores, in the Indian Ocean. SAA claims the honor of being the first airline to fly nonstop between Johannesburg and London.

When the BAe 146-100s are sold, service to Botswana, Lesotho, and Swaziland must be abandoned as the airports in their capital cities cannot accommodate the company's B-737-244s. Gert van der Veer, assistant general manager of South African Transport Services, becomes chairman/CEO on October 1.

Withdrawn from their final thrice-weekly Durban to Richard's Bay route, the company's last propeller equipment, three HS 748s, are sold to Canada's **Austin Airways, Ltd.** in December.

Freight soars again, up 15.9% to 369.59 million FTKs, but passenger traffic declines another 2.3% to 3,851,561 passengers carried. The operating loss is reduced to \$37.9 million on revenues of \$808 million, up 9.6% over 1982; the net loss is \$41.6 million.

The workforce in 1984 is a reduced 11,728. The company is reorganized into two major segments—domestic/regional and international, each under a chief director. A variety of promotional fares are introduced, along with business-class, 50%-off Midnight Flights, and senior citizen services. The company celebrates its fiftieth anniversary throughout the year.

The Boeing 747SP-44 *Maluti* is leased to **Air Mauritius, Ltd.** on October 28; christened *Chateau du Reduit*, it inaugurates service to Paris and London for that carrier on November 3. A week later, it also launches flights from Mauritius to Paris via Rome.

Passenger boardings reflect the upturn in world economic conditions, jumping 12.6% to 4,334,754, while freight traffic swells 23.8% to 457.56 million FTKs. On revenues of \$780 million, expenses drop 14.6% to \$735 million, leaving an operating profit of \$45 million and a net profit of \$13.2 million.

The employee rolls are cut another 5% in 1985, down to 11,048. The fleet now includes 2 B-747-344s, 5 B-747-244Bs, 2 B-747-244Cs, 4 B-747SP-44s, 4 A300B2K-C3s, 2 A300B4-203s, 1 A300C4-203, 5 B-737-244s, and 13 B-737-244As.

In March, B-747SP-44 nonstop flights begin from Johannesburg to Zurich; on March 15, the B-747SP-44 *Majuba* is leased to **Royal Air Maroc, S.A.** To counter a continuing decline in domestic passenger

boardings, the company, in the spring, introduces a number of special discounted fares.

On April 1, the B-747SP-44 *Outeniqua* is leased to **Air Malawi, Ltd.** just for the purpose of providing an executive transport for a state visit to London. Painted by April 12 in Air Malawi colors and given the temporary name of *Mulanje*, the Jumbojet, on April 16, flies President Hastings Banda and his official party from Blantyre to London (LHR) via Amsterdam for a conference. Paying fees all the while, the giant aircraft is parked at the U.K. airport for three weeks until, on May 11, it returns Banda and party back to their country and is returned to SAA.

Following the introduction of emergency measures by the South African government in July, the U.S. DOT withdraws SAA's operating permit to serve Houston, while Australia cuts the carrier's service to Perth and Sydney to one flight weekly. Flights to Buenos Aires also cease, primarily for economic reasons.

Two B-737-244s are sold as political turmoil and a sharp drop in the value of the country's currency, the Rand, impacts the carrier. Passenger boardings dip 2.9% to 4,207,000 and cargo falls 13.7% to 394.88 million FTKs. Revenues plunge 24.2% to \$589.9 million; losses are \$19 million (operating) and \$44.8 million (net).

The payroll grows a slight 0.5% in 1986 to 11,100. During the first quarter, the company increases its domestic and "See South Africa" fares by 10%; however, international ticket prices remain unchanged. On September 4, **Royal Air Maroc, S.A.** purchases the long-range B-747SP-44 *Majuba* operated under lease over the past 18 months.

On October 12, service is suspended to and from America as the result of the U.S. sanctions against South Africa on account of its government's racial policies. Meanwhile, the UN also introduces sanctions and the Australian government adds its own, forcing the carrier to suspend its weekly Johannesburg to Perth and Sydney services on November 9.

Bookings decline 9.1% to 3,208,000 and cargo drops 15.4% to 276.22 million FTKs.

Avoiding most of black and Muslim Africa north of Lusaka, SAA in 1987 operates its long-haul B-747SP-44 services from Johannesburg and Cape Town via Abidjan or Ilha Do Sal to Lisbon, Madrid, Paris, London, Zurich, Amsterdam, Brussels, Frankfurt, Vienna, Rome, Athens, and Tel Aviv.

Decline in capacity requirements allows the lease of the B-747SP-44 *Matroosberg* to **Air Mauritius, Ltd.** on April 1. Named *Chateau de Re-duit*, the Jumbojet replaces one of the two Air Mauritius Stratoliners on the Bombay and Singapore routes and permits expansion of the European network to include stops at Geneva and Munich.

Simultaneously, the B-747-244B *Drakensburg* is leased to **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** for 16 months.

During the fall, business-class service on domestic flights is upgraded on both A300s and B-737s. In addition, a new domestic frequent flyer program is initiated and a variety of promotional fares are introduced.

Planning once more to start long-haul service, **Luxavia, S.A.** leases the B-747SP-44 *Outeniqua* on November 1. The remainder of the year is spent painting the giant aircraft in the operator's white and soft blue colors.

On November 28, Flight 295, is approaching Mauritius for refueling during a flight from Taiwan to Johannesburg. The B-747-244B Helderberg with 19 crew and 140 passengers suffers a blaze in its cargo hold and crashes on fire into the Indian Ocean 125 mi. SW of its destination; there are no survivors.

As the result of Australia's withdrawal of traffic rights, airline officials are not in a position to assist Australia's state carrier's when they face a pilots' strike and seek replacement flyers at the end of the year.

SAA refuses to release its traffic figures to the Western press, although it does admit to a \$26.3-million operating income and a net profit of \$42.3 million. It is eventually learned that enplanements have totaled 4,194,768.

Airline employment falls by 4.5% in 1988 to 10,502. Two Airbus Industrie A320s are ordered in January. In February, the B-747SP-44 *Out-*

eniqua leased to **Luxavia, S.A.** is placed into service between Luxembourg and Johannesburg. At the same time, a **Luxavia, S.A.** Airbus is leased to replace an A300B4-203 chartered to **Wardair Canada, Ltd.** Orders are placed in March for two A310-321s, with options on five more. By May, the company is offering 500 domestic flights per week, with half flown between Johannesburg and Cape Town.

Late night and early morning low-fare flights, with stops at Port Elizabeth and Durban, prove extremely popular. The *Drakensburg* returns from its Brazilian lease in August.

The B-747SP-44 *Soutpansberg* is sent to **Air Mauritius, Ltd.** on a September 30 short-term lease; the plane is not renamed.

In October, it is announced that SAA has joined the ranks of those few airlines in the world with women pilots; three fly over its international routes.

Passenger boardings accelerate 15.7% to 4,976,000, but freight is off by 11.1% to 238.23 million FTKs. Revenues swell 12.1% to \$697 million and low costs allow an operating profit of \$33 million and net gain of \$117.7 million.

The workforce is increased by 7.4% in 1989 to 11,279, largest for any corporation in Africa south of the Sahara. The fleet now includes 5 B-747SP-44s, 6 B-747-244Bs, 2 B-747-344s, 4 A300B2K-C3s, 4 A300B4-203s, 1 A300C4-203, and 17 B-737-244s. Orders are placed for two B-747-444s and seven A320-231s.

The B-747SP-44 *Soutpansberg* is returned by **Air Mauritius, Ltd.** in January.

Flights are inaugurated to Manchester, England, via Paris. After having been allowed to use Abidjan, Ivory Coast, as an unofficial transit stop for some years, the carrier is now able to start an improvement of tourist services to that city as a result of improved relations between the two governments.

Recession is seen to begin in midyear and will have a steadily worsening impact on the airline in the years immediately ahead. Moroni, in the Indian Ocean's Comoros Islands, becomes a destination in October. Late in the month, the company diversifies into the travel business, assuming a 50% stake in the Skybird inclusive tour concern, which includes ground tours and air charters.

Customer bookings for the year jump 15.3% to 5,982,097, but cargo plunges to 223.57 million FTKs.

Company employment is decreased by 15% in 1990 to 10,200. On April 1, the carrier becomes a division of Transnet, a government-owned company. Privatization, the process of forming SAA into a fully market-related commercial enterprise, begins. Simultaneously, the B-747SP-44 *Soutpansberg* is chartered to **Namib Air, Ltd.**

In August, flights—and profits—to and from the Magasar Republic are operated in pool with **Air Madagascar (Societe National Malagache de Transports Aeriens, S.A.)**.

Service is initiated to Brussels during the fall. The company simultaneously attempts to reach an agreement with the government of Kenya for the inauguration of services to Nairobi.

All is in place until Kenyan President Daniel Moi cancels the renewed air connection on December 1, following a visit from African National Congress Deputy President Nelson Mandela. Moi then changes his mind again after a visit from South Africa's foreign minister Pik Botha. The fully loaded SAA 747 finally departs Nairobi for Johannesburg on December 8. In cooperation with SAA, **Kenya Airways, Ltd.** will be able to initiate reciprocal flights in January.

Passenger boardings rise 3.5% to 5,374,337 and freight ascends 21.8% to 62.64 million FTKs. Revenues advance 23.7% to \$973 million. Income exceeds costs and profits are generated: \$31.6 million (operating) and \$24 million (net).

The payroll grows a slight 1.6% in 1991 to 11,368 and the fleet now includes 4 A300B2K-C3s, 3 A300B4-203s, 1 of which is leased to **Philippine Airlines (PAL)**, 1 A300C4-203, 4 B-737-244s, 13 B-737-244As, 5 B-747-244Bs, 1 B-747-244BC, 2 B-747-344s, and 5 B-747SP-44s, 1 of which is chartered to **Luxair, S.A.** and 1 to **Namib Air, Ltd.**

The first B-747-444 is delivered in January and is christened *Durban*. Orders, valued at \$890 million, are placed for four more Dash-444 *Jumbojets* and seven A320s.

Due to a 10% traffic drop in early 1991 over 1990, the company, on February 15 temporarily discontinues certain flights to Frankfurt.

Flights to the Seychelles, Kinshasa, and Abidjan commence in April, while those to Lubumbashi via Lusaka are withdrawn.

As sanctions against the nation are lifted in the spring, new routes are opened; the first is a weekly flight to Milan started on June 1. Additional markets entered or expanded include Zaire, Madagascar, Reunion, Tanzania, and Morocco.

Zukile Nomvete is appointed Transnet executive director of airways and properties in April, with a five-year mandate to oversee SAA's strategic direction and policy decisions.

The second B-747-444 arrives in June and is named *Bloemfontein*.

On September 8, for the first time since 1963, the company is able to resume flights over the Sudan, Egypt, and other points in eastern Africa. Eight days later, the government of the Sudan, without warning, terminates SAA's overflight rights. Notice is initially received by a B-747-244B en route to London.

Following the deregulation of the domestic airline business, the challenge to SAA begins almost immediately as **Flitestar Airlines (Pty.), Ltd.** inaugurates A320-212 services from Johannesburg to Cape Town and Durban and from Cape Town to Port Elizabeth. To smooth the introduction of its own new A320-231s, SAA now begins maintaining the A320s of rival Flitestar.

At the beginning of October, **Namib Air, Ltd.** is renamed **Air Namibia, Ltd.** The B-747SP-44 *Soutpansberg*, on lease to that carrier, is renamed *Etosha* on October 15.

SAA receives permission, on October 26, to resume flights to the U.S. after a five-year ban.

An interline agreement is signed with **Aeroflot Soviet Airlines** on November 1, the same day services are resumed to Athens. At the same time, the B-747SP-44 *Hantam* is leased to **Air Mauritius, Ltd.**, where it is rechristened *Chateau Labourdonnais*.

On November 2, a second weekly flight is launched between Johannesburg and Paris (ORY). To attract business travelers from France, SAA offers a number of amenities to French travelers, including a free car rental, lodging, and special rates on SAA domestic flights.

On November 3, thrice-weekly direct B-747-244B service begins to New York, with a stop at Ilha do Sal in the Cape Verde Islands.

Also, on November 6, the first of seven A320-231s is delivered to Johannesburg and christened *Blue Crane*. While on its delivery flight, it had crossed Angola, the first flight over that African state by any company aircraft since 1975.

During the month, a separate cargo business unit is established within the airline, which consolidates both the domestic and international freight operations. SAACARE, the carrier's computerized cargo reservations and tracking system, is extended to domestic cargo services as well.

The South African government, in November, introduces an interim aviation policy, designed to permit faster agreement on bilateral services with other countries while a full policy is worked out.

For the first time in history, a SAA aircraft flies to Moscow; the B-747-244B that lands at the Soviet capital on December 1 arrives as an extension of the Frankfurt service. Regularly scheduled service between the U.S.S.R. and South Africa is not then being planned.

Three more A320-231s, *Bokakierie*, *Hadida*, and *Vis Arend*, arrive in December. The number of weekly B-747-244B flights to New York is increased to four as of December 25.

Customer bookings for the year decline 10.1% to 4,723,365, but cargo climbs 2.2% to 215.25 million FTKs. Revenues ascend 10.5% to \$1.09 billion and there is an operating profit of \$243.97 million. The net loss is \$72.27 million.

Service to the Australian cities of Sydney and Perth are reinstated on January 18, 1992. Also in the first quarter, **Flitestar Airlines, Ltd.** acquires the smaller airlines **Air Cape (Pty.), Ltd.** and **Luxair Express**,

S.A. They continue their operations as subsidiaries of the holding company Trek Airways, with Air Cape and Flitestar dedicated to domestic and regional operations and Luxair continuing a Johannesburg to Luxembourg route operated with the leased SAA B-747SP-44 *Outeniqua*, now rechristened *Luxavia Star*.

A new bilateral air agreement is signed in mid-February between the governments of South Africa and Israel. Prior to the establishment of these legal provisions, reciprocal flights by SAA and **El Al Israel Airlines, Ltd.** have been conducted under a diplomatic agreement. A bilateral is also signed during the month with the government of Singapore.

On March 29, new weekly SAA roundtrip flights are inaugurated from Johannesburg to Cairo, with continuing service to Athens. Weekly nonstop roundtrips from Johannesburg to Hong Kong commence on April 1; twice-weekly roundtrips are also launched between Johannesburg and Singapore.

A charter package is opened to Luanda later in the month. Also during the spring, a B-747-244B, three B-737-244s, and an A300B4-203 are placed up for sale. Retired from the South African Air Force in 1977, the one time SAA DC-4 *Lebombo* is purchased for historical restoration.

It is reported in the Middle East press on April 28 that negotiations have been completed and that **Flitestar Airlines, Ltd.** will commence operations in October from Johannesburg to Bahrain via Mombasa. It will be the South African carrier's first international route.

Interavia Air Letter notes in its May 22 issue that Flitestar, by May 19, has reached the 57% load factors required to break even. The airline in 7 months has successfully captured 20% of the South African domestic market.

Exiting years of sanctions and isolation, the South African flag carrier on June 1 signs a marketing alliance with **Air Afrique, S.A.**, which will allow it to fly a new thrice-weekly joint route from Johannesburg to Abidjan via Brazzaville and to serve most major African capitals by November. Simultaneously, weekly frequencies are initiated to Bangkok and Singapore.

Following the successful conclusion of a three-month legal battle with SAA, **Flitestar Airlines, Ltd.** receives a license from the South African National Transport Commission on June 15 to inaugurate services between Johannesburg and Mombasa in September.

Simultaneously, SAA receives back from **Air Mauritius, Ltd.** the B-747SP-44 *Hantam*, which has been serving with that carrier as the *Chateau Labourdonnais*.

Also in June, the governments of South Africa and Japan sign a bilateral air services agreement.

On July 1, **EgyptAir, S.A.E.** inaugurates direct charter flights from Johannesburg to Jeddah on behalf of SAA and **Saudia (Saudi Arabian Airlines)**.

Munich becomes a market on August 13. Daytime service between Johannesburg and London begins on August 29. A 50% reduction in fare is offered for companions accompanying full-fare paying customers on the route. The A320-231s *Bataleur* and *Loerie* arrive during the month.

Simultaneously, the carrier leases three Antonov An-32s and two Ilyushin Il-76Ts from the Air and Navigational Transport Agency of the Ukraine for use as dedicated freighters throughout Europe and Africa. The five, flown by the Ukrainian crews that will operate them under a contract with South Africa, arrive at Jan Smuts Airport together on September 4. The An-32s thereafter fly to Egypt and the Il-76Ts to Europe.

With the placement into service of two more B-747-444s, the *Kemp-ton Park* and *Vulindlela*, the number of flights to New York's JFK International Airport is increased on November 1 to four per week, including three operated by B-747-444s. The fourth service, operated with a B-747-244B, stops for refueling in the Cape Verde Islands.

A strategic arrangement is signed with **American Airlines** on November 4, under which the American major agrees to provide code-sharing feed to SAA at New York (JFK). The arrangement will eventually lead to joint flights from JFK to Miami and Johannesburg and linkage of frequent flyer programs.

The first service between the major vacation areas of the U.S. and South Africa is inaugurated on December 13 when the "Flying Springbok" airline launches weekly nonstop B-747-444 flights from Miami to Cape Town, continuing on to Johannesburg.

Meanwhile, **Flitestar Airlines, Ltd.** has suffered heavy financial reversals during the remainder of the recession year as SAA pours additional capacity onto its domestic routes to overwhelm the independent. Additionally, pressure on yields and the devaluation of the rand against the U.S. dollar, in which most of Flitestar's leasing and other costs are paid, ends the warm thought of profits enjoyed in the spring.

The government does not interfere as the situation has worsened for Flitestar, which is unable to launch its new international services, runs up large debts, and only enplanes a total 400,000 passengers.

Despite its own expansion, the world political situation, recession, and drought, have forced SAA's passenger enplanements to fall another 3.5% to 4,559,200. Freight, on the other hand, has increased 38% to 263.48 million FTKs.

Revenues this year climb 5.5% to \$1.2 billion and expenses rise 9% to \$982.5 million. The difference in these figures is an operating surplus of \$226.97 million. The net loss increases, however, to \$114.56 million.

Chairman van der Veer's workforce is sliced by 13% in 1993 to 10,044 and his fleet now includes 4 A300B2K-C3s, 3 A300B4-203s, 1 A300C4-203, 6 A320-231s, 13 B-737-244As, 5 B-747-244Bs, 1 B-747-244BC, 2 B-747-344s, 4 B-747-444s, 5 B-747SP-44s, and 1 leased B-767-2B1ER, the *Protea*. One A300B4-203 remains out on lease to **Philippine Airlines (PAL)** while the B-747-244BC is chartered to **Garuda Indonesian Airways**.

A code-sharing agreement is signed with **VARIG Brazilian Airlines (Viacao Area de Rio Grandense, S.A.)** in January covering service on a route from Johannesburg to Bangkok.

In January, Prime Minister De Klerk's regulators require SAA to cut back capacity on domestic trunk routes by 30% in an effort to save **Flitestar Airlines, Ltd.**

Larnaca, Cyprus, is included as a stop on the Tel Aviv route from February 2. Beginning in March, for all holding first-class tickets, SAA introduces free helicopter flights via **New York Helicopter Airways** between New York (JFK) and downtown Manhattan.

Also in March, a new code-sharing agreement with **Austrian Airlines, A.G.** is signed for service on a route from Johannesburg to Vienna. Flights now resume to Blantyre and Luanda and the Munich frequency becomes twice weekly. The twice-weekly roundtrips to Singapore are increased to thrice weekly.

On March 25, the B-747SP-44 *Hantam* is chartered to **Air Namibia, Ltd.**

The capacity restrictions on SAA imposed by the government have come too late and **Flitestar Airlines, Ltd.** is forced to suspend operations in mid-April. There is also no money for Trek Airways to operate its other subsidiary, Luxair, and the B-747SP-44 *Outeniqua*, which it has chartered, is now returned. Michael Myburgh, a longtime railroad and harbor administrator, is appointed managing director, also in April.

In May, New York cargo operations are relocated to the AMR facility at JFK. The B-747SP-44 *Hantam* is returned by **Air Namibia, Ltd.** on May 12. Frequencies to Hamburg are introduced on June 30.

Sufficient funding is found and **Flitestar Airlines, Ltd.** is able to resume limited domestic operations on September 1. **Luxair Express, S.A.** is able to reacquire the *Outeniqua* on September 3. Once again known as the *Luxavia Star*, its all-white fuselage is split by a black cheatline. Titles are worn over the forward fuselage and the tail is black-white-black, with the single word "Trek" written in tall block-letters on the white.

The last of seven new A320-231s is also delivered in September and is named *Korhaan*. To help cut costs, flights to Athens, Milan, Hamburg, and Manchester are withdrawn during the month.

During October, the A300C4-203 is taken out of all-passenger service and is converted into an A300F4-203 for freighter operations.

Customer bookings inch up 1.9% to 4,776,795 while cargo advances 4.2% to 100 million FTKs. Revenues decline by 3.8% to \$872.61 million and expenses drop 7.4% to \$896.23 million. The operating loss is 22.62 million and a net figure is not given.

In 1994, flights begin to Toronto, São Paulo, and Los Angeles. Dusseldorf replaces Hamburg as the third destination within Germany, additional frequencies to Victoria Falls and Miami are inaugurated as is a direct service from Cape Town to Hong Kong.

During the first quarter, ICAO suspends the long-standing Assembly Resolution A18-4, which had limited the carrier's participation in the UN body.

On April 11, **Flitestar Airlines, Ltd.**, which was able to resume limited services the previous fall, is in desperate need of support and signs a commercial agreement with SAA. The same day the B-747SP-44 *Luxavia Star*, otherwise known as the *Outeniqua*, is returned.

The arrangement puts an end to Flitestar's attempts to compete head on with SAA on domestic trunk routes. The holding company Trek Airways withdraws from the market after the flag carrier provides a multi-million rand payment. Shareholders shut down both Flitestar and Luxair Executive, S.A. on April 20, thereby bringing South Africa's experiment with deregulation perilously close to failure.

Out on lease with **Air Mauritius, Ltd.** where it has flown as the *Chateau Mon Plaisir*, the B-747SP-44 *Matroosberg* is returned on May 31.

Ground-handling operations are consolidated into a new SAA subsidiary, Apron Services Company (Pty.), Ltd., in June at four domestic airports.

The DC-4, restored and as part of the Historic Flight, departs Johannesburg on July 19 and flying via Mokuti Lodge in Namibia, Luanda, Abidjan, Las Palmas, Ponta Deigeda in the Azores, and St. Johns in Newfoundland, arrives at Oshkosh, Wisconsin, a week later for the Experimental Aircraft Association Convention. Passengers making the flight receive passage back to South Africa aboard a B-747.

Late in the year, a controversy arises over an advertising spot created for the carrier by the American firm of Sonnenberg Murphy Leo Burnett, which recreates the reenactment of the baby's birth in-flight back in 1982. The company now promises to recruit a new racially diverse pilot corps.

Having served a decade with **Air Mauritius, Ltd.** as the *Chateau de Reduit*, the B-747SP-44 *Maluti* is returned to SAA on November 10.

With headquarters at Impala House in Kampala, **Alliance Airlines (African Joint Air Service)** is established as a consortium airline on December 20. Shareholding is divided between SAA (40%), **Air Tanzania Corporation** (10%), and **Uganda Airlines, Ltd.** (10%), with the Tanzanian and Ugandan governments holding 30% pending complete privatization. SAA signs a contract to provide maintenance and support.

From this point on, the company does not release passenger and freight statistics.

Revenues for the year reach \$1.21 billion, while operating expenses are \$1.13 billion. Consequently, the operating income is \$80.29 million and a net gain of \$46.56 is reported.

Airline employment stands at 10,427 in 1995. The fleet now includes 11 B-737-244As, 4 each B-747-444s and Airbus A300B2K-C3s, 7 A320-231s, 5 each B-747-244Bs and B-747SP-44s, 4 A300B4-203s, 1 of which is out of service, and 3 B-747-344s, 2 B-737-244AFs, and 1 each A300F4-203 and B-747-244BF. Orders are outstanding for 8 B-777s and 2 B-747-444s.

Adrian Sibbo is elected chairman of the new **Alliance Airlines (African Joint Air Service)** with Christo Roodt as managing director. A workforce of 60 is employed and the Boeing 747SP-44 *Matroosberg* is wet-leased from SAA in February.

After a contract is signed with the Adelaide-based Australian Aviation College, a racially diverse group of 12 cadets begins its training there in May under the pledge made by SAA officials the previous fall. A total of 40 will be given this education.

During June, a \$4.09-million investment is made as the company expands its air freight facilities in Johannesburg, Durban, and Cape Town.

The growth includes the upgrading of loading areas, access channels, and equipment, as well as the installation of barcoding, scanning, and racking systems.

Scheduled international and regional passenger services by the joint **Alliance Airlines (African Joint Air Service)** commence on July 1 as its leased Jumbojet begins flying from Dar es Salaam and Entebbe to Bombay and London (LGW). Also during July, Johannesburg Jan Smuts Airport is renamed Johannesburg International Airport.

The B-747SP-44 *Maluti* is chartered to **Air Namibia, Ltd.** in October.

On November 3, an order, valued at \$1.3 billion, is placed for seven B-777-244s and two B-747-444s. Later in the month, a new code-sharing agreement is signed with **Deutsche Lufthansa, A.G.**, which will take effect the following spring.

Having been converted by HAECO in Hong Kong, a B-747-244F enters service at the end of the year. Late in the year, a B-767-2B1ER, christened *Protea*, is leased by SAA from the struggling **LAM Mozambique Airlines, S.A.** and new service begins to Buenos Aires.

In December, LSG Lufthansa Service/SKY Chiefs acquires a 21% stake in a Johannesburg-based in-flight catering service. Just before Christmas, the São Paulo route is extended to Buenos Aires.

The number of weekly flights over the route from Johannesburg to London begins to be increased during the first quarter of 1996 from 9 to 14.

A strategic alliance with **Deutsche Lufthansa, A.G.** comes into effect on April 29. In addition to joint venture cargo flights between Johannesburg and Frankfurt, another 86 dual-designator connections per week are now offered each week between South Africa and Germany. Shared airport facilities, clubs, lounges, and ground handling are also part of the deal, along with a linkage of frequent flyer programs.

A new bilateral aviation agreement with the United States is signed on April 30. It is the first between the two nations since Washington terminated the previous accord a decade earlier because of South Africa's apartheid policy.

Also during the month, a new executive committee is set up to run Transnet; the aviation brief is given to Chairman Nomvete, to whom Managing Director Myburgh now reports. Nomvete, a onetime **Ethiopian Airlines, S.C.** flight engineer whose application for employment at SAA had been rejected years earlier, immediately begins to interfere in the day-to-day operations of the carrier, raising tensions at an airline where morale problems caused by transition are already high.

At the beginning of June, the B-747SP-44 *Maluti* returns from **Air Namibia, Ltd.** at the beginning of June. The B-747SP-44 *Outeniqua* is chartered to the carrier in its place.

On June 14, a third weekly nonstop roundtrip is instituted between Miami and Cape Town; it is followed by the introduction, on June 19, of a fifth weekly roundtrip between Johannesburg and New York.

The first of 80 independently owned and operated South African Airways City Center travel agency franchises is opened in Johannesburg in June. The concept, based on one employed by DLH in Germany, will be managed by Transnet. The portent for domestic competition is increased during the month when **British Airways, Ltd. (2)** signs its first non-European franchise agreement with **Comair (Pty.), Ltd.**

In a salute to the July Summer Olympic Games in Atlanta, a B-747-312 is christened *Ndizani* ("To Soar, To Fly to New Height"). When it is released from the paint shop in May, it wears a very vibrant livery based on the colors of the new national flag and displaying stick figures of cheering children. It is announced that the plane will not be repainted until September 1997 as it supports Cape Town's efforts to secure the 2004 Olympics.

Prior to suspending its New York-Johannesburg service on August 23, **World Airways** makes an arrangement with SAA to care for those World passengers holding tickets for the route beyond the end-of-service date.

Discussions are held with **British Midland Airways, Ltd.** and **Thai Airways International, Ltd.** during the summer. At the same time, a 10-city code-sharing arrangement is entered into with **American Airlines.**

The company applies for membership in the African Civil Aviation Commission during September. At the same time, the London-based banking firm of SBC Warburg is contracted to advise the carrier on how best to undertake its privatization.

In partnership with **American Airlines**, code-sharing begins on October 1 over weekly routes from Johannesburg and Cape Town to Atlanta, Boston, Chicago, Dallas (DFW), Houston, Orlando, Philadelphia, San Francisco, and Washington, D.C. (IAD) via New York or Miami.

Sun Air (Pty.), Ltd. implements a strategic agreement with **Virgin Atlantic Airways, Ltd.** on October 2, feeding passengers to VA from its "golden triangle" route network of Johannesburg, Cape Town, and Durban. The next day, Virgin begins its own services into Johannesburg from London.

Despite SAA objections, **Comair (Pty.), Ltd.** is able to launch service on October 22 as a franchise partner of **British Airways, Ltd. (2)**. These two companies begin to place severe pressure on SAA's 9-city network and its 575 weekly flights.

The company's primary Asian hub is switched to Bangkok from Singapore on October 26. On that date, service to Singapore is discontinued and the company's three weekly trips to Hong Kong become nonstops. The dual-designator service with **American Airlines** commences the next day. SAA is allowed to place its "SA" code on flights to eight U.S. cities beyond New York and Miami.

The company enters its 16th African market on November 4 when twice-weekly service to Abidjan begins, and doubles its frequencies to Accra to twice weekly. Twice-weekly B-747-244A roundtrips commence in November between Johannesburg and Osaka (KIX).

SAA begins to counter the VAA and BA low-cost partnerships by forming a strong alliance with **SA Airlink (Pty.), Ltd.** and **SA Express (Pty.), Ltd.**

Although passenger traffic figures for the year are not released, fiscal details are and show revenues of \$1.43 billion, with expenses of \$1.47 billion. There is an operating loss of \$37.2 million and a net downturn of \$92.6 million.

Sydney Organizing Committee CEO Mal Hemerling and **Ansett Australia (Pty.), Ltd.** Chairman Rod Eddington announce on January 28, 1997 that SAA has been chosen one of seven carriers to receive the designation of official carrier for the Sydney 2000 Olympic Games.

A code-sharing arrangement with **KLM (Royal Dutch Airlines, N.V.)**, begins in February when SAA begins to feed the Netherlands major at Johannesburg with passengers connecting with its incoming services from Cape Town and Durban.

On February 17, the company joins with **SA Express Airways (Pty), Ltd.** and **SA Airlink (Pty.), Ltd.** in a three-way alliance. According to the accompanying press release, the pact is designed to provide an integrated national aviation system that can service all routes, ranging from entry level to the national hubs, and will offer national over-border air transportation. Although the three airlines will continue to operate independently, there will be commonality in their branching in terms of corporate appearance, ticketing, and check-in procedures.

At the end of the month, Dr. Anton Rupert organizes the Peace Parks Foundation, a nonprofit organization dedicated to the protection of the wildlife heritage of southern Africa. SAA is one of the new group's first corporate sponsors.

On March 22, the company, as part of a stage show hosted by President Mandela and simultaneously broadcast by satellite to venues throughout the country, unveils a new \$1.69-million corporate identity project undertaken by the Johannesburg-based advertising agency Herd-boys. The program is scheduled to be completed by century's end.

The highlight of the proceedings is the introduction of the "Horizon Mark," the nation's post-Apartheid flag, on the B-747-244B *Drakenberg*, which is to be painted on the orange aircraft tails, along with a new all-white fuselage livery, during regular maintenance. The golden arrow symbol in the middle of the multicolored tail replaces the carrier's historic Flying Springbok emblem.

On April 16, the SAA Museum Society's DC-4 is leased to **Swissair, A.G.** for the summer for use in events celebrating that carrier's fiftieth anniversary of transatlantic flight. Also in April, a code-sharing pact is entered into with **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** and twice-weekly dual-designator roundtrips commence between Johannesburg and Rio de Janeiro.

When the "Star Alliance" between **SAS (Scandinavian Airlines System), Deutsche Lufthansa, A.G., Thai Airways International, Ltd. (THAI), Air Canada, Ltd., and United Airlines** is announced on May 14, negotiations are already underway to bring SAA in as another partner.

Continued deferrals of the new B-777s due to politics surrounding engine selection, the company is forced, by its need for more capacity, to reactivate an older aircraft and seek newer ones.

In May, orders are placed for two B-747-400s. The first arrives at month's end and is placed on the European routes; the second will follow in October.

In June, block-space, dual-designator frequencies commence with **Emirates Airlines** on five Emirates and one SAA flight per week between Johannesburg and Dubai.

A number of changes in the international schedule commence on July 1. Relying on its new *Star Alliance* partner **Deutsche Lufthansa, A.G.** to take over the service, SAA drops its direct flights from Johannesburg to Munich and Dusseldorf. At the same time, it launches new twice-weekly roundtrips from Johannesburg and Cape Town to Copenhagen. The service to Denmark is a dual-designator offering with **SAS (Scandinavian Airlines System)** employing SAA aircraft.

Frequencies on the route from Johannesburg to Frankfurt are increased from six to eight per week, while those on the route from the South African city to Zurich are doubled from two to four. Flights from Johannesburg to Paris and Amsterdam are also increased.

A code-sharing agreement is signed with **Japan Air Lines Company, Ltd. (2)** on July 7, with JAL thus becoming the first Japanese airline to offer connections to South Africa.

The B-747SP-44 *Outeniqua*, retired earlier, is returned to service in early July. Painted in the company's new color scheme, the aircraft is placed into service on the route to Paris. Also at mid-month, the carrier acquires a leased B-767-266, first flown by **EgyptAir, S.A.E.** and later traded into United Technologies.

According to an article by chart Dave English, SAA now operates two of the longest routes in the world: New York-Johannesburg, 5,967 st.mi., 14 hrs. 35 min. eastbound only and Cape Town-Miami, 7,665 st.mi.; 14 hrs. 30 min. westbound and 13 hrs. 5 min. eastbound (*Airways* [July-August]: 21).

Despite earlier assurances that the carrier will soon be privatized, Saki Maconzoma, Managing Director of Transnet, the airline's state-run owners, indicates on August 4 that the proposal to sell a minority of the government's shares abroad is only "tentative"; the statement causes confusion.

Twice-weekly block-seat service with **Japan Air Lines Company, Ltd. (2)** begins on October 2 between Osaka (KIX) to Johannesburg via Bangkok; the flights are operated by SAA B-747-244Bs. SAA also acquires a second leased B-767-2B1ER that allows it to improve its African regional schedules, to introduce a fourth weekly frequency to India, and to operate six weekly connections to Mauritius.

The carrier opens a New York City ticket office on October 10. During the fall, negotiations regarding "Star Alliance" entrance continue. The airline and Sony Trans Con sign an agreement during the first week of November under which the company's Jumbojets, beginning the following May, will test the Passport interactive in-seat passenger entertainment and information system.

In October, stated-owned **Sun Air (Pty.), Ltd.** is sold to a consortium that includes **Comair (Pty.), Ltd. (25%)**, the black empowerment consortium Rethabile and Coordinated Network Investments (55%), National Empowerment Fund (15%), and company employees (5%).

On December 12, a large fire breaks out at Terminal One of London (LHR), forcing cancellation of several company departures.

Traffic figures for the year are not provided, however, it will be noted during the upcoming March that losses have totaled R 345 million (\$70 million). Later, fiscal figures will be reported that show revenues of \$1.392 billion, costs of \$1.391 billion, and an operating profit of \$1.6 million. There will be a net loss, however, of \$64.2 million.

Airline employment in 1998 stands at 11,200 and the fleet, 72.9% of which is Stage III certified, includes 48 airplanes: 13 B-737s, 17 B-747s, 3 B-767s, 8 A300s, and 7 A320s. The **Air Namibia, Ltd. B-747SP-44 Etosha**, formerly the SAA *Soutpansberg*, will be removed from service during the year.

In January, a freight contract is signed with **Southern Air Transport**. The U.S. carrier inaugurates thrice-weekly New York (JFK) to Johannesburg via Amsterdam and Lagos all-cargo return services employing a B-747-249F recently purchased from **Northwest Airlines**.

A lengthy engine selection process earlier causes a delay in the delivery of the company's new B-777-244s. Also during the first quarter, an A300B2K-C3 is dedicated to the Nelson Mandela Children's Fund. Rechristened *The Love Plane*, the Airbus is given a new livery showing greeting cards drawn by children; corporate sponsors are listed on the nose. The color scheme is only allowed to remain intact for a fortnight; thereafter throughout the remainder of the year, the cards are gradually removed, from back to front.

Following South Africa's decision to open diplomatic relations with the People's Republic of China rather than Taiwan's Republic of China, the company, during the last week of April, begins negotiations for a code-sharing agreement with **Air China International Corporation, China Eastern Airlines Company, Ltd., and China Southern Airlines Company, Ltd.**

During mid-May, Transnet Executive Director Zukile Nomvete is removed from his position and given a post of reduced responsibility. Transnet Managing Director Saki Maconzoma also opens a search for a new CEO as CEO Michael Myburgh is ordered to take early retirement.

Twice-weekly roundtrips are inaugurated on May 26 from Johannesburg to Dakar via Abidjan.

The DC-4 of the company's Historic Flight division, now renamed "Skycoach Africa," departs with a small group of passengers for Zurich on May 30 to be on hand Germany in June to participate in the fiftieth anniversary celebrations marking the Berlin Airlift. The northbound flight proceeds via Victoria Falls, Zimbabwe, Tanzania, Zanzibar, Jordan, and Istanbul.

After several years of losses, the company's management team begins to implement a restructuring plan on June 1. The initial components of this cost-cutting effort include the permanent closure of the Rickenbacker Airport Maintenance Facility in Columbus. Approximately 100 full-time and 10 part-time employees from company headquarters receive 60-day notices of possible lay offs. It is hoped that these and other measures will return the firm to profitability by the fourth quarter.

During takeoff from Johannesburg for a service to London during the second week of June, the lever to a back door on Flight 222, a B-747-344, disengages, letting it open slightly. Flight attendant Derusha Naidoo jumps from her seat and pushes it back; with assistance, the door is inspected and rearmed. In an interview in the June 21 issue of *The Sunday Times*, Captain Dennis Spence hails Naidoo's heroism.

Durban model/barmaid Reema Mahaber and British businessman Charles Watkinson are caught in carnal embrace aboard a company flight from London to Johannesburg during the month. These amorous antics, little-reported outside the airline industry, will help boost efforts by major carriers particularly Richard Branson of **Virgin Atlantic Airways, Ltd.**, to introduce better long-haul sleeping accommodations.

On July 1, the company increases its roundtrip frequencies to Hong Kong from two to three per week. Transnet Managing Director Saki Maconzoma announces that former WorldCorp/**World Airways** CEO T. Coleman Andrews was been appointed two weeks earlier to head the airline, succeeding Managing Director Myburgh, who will remain through the end of the month. Andrews will maintain his 46% stake in World, but as the two carriers have no plans to do business together, no conflict of

interest is anticipated. Andrews, prior to the announcement, makes 19 surreptitious trips with the carrier to check out its services. He finds unmistakable evidence of low staff morale, questions of direction, and worries over an aging fleet. Corruption and thievery are also worrisome.

Among his first areas of emphasis, new leader Andrews seeks to improve the carrier's 70% on-time performance by offering employees \$9-per-month incentives. Additionally, Hyundai donates 12 automobiles to the airline and for every month in which there is an on-time improvement, the names of all employees with perfect attendance are entered into a company-wide lottery for one of them.

Andrews and SAA begin to further implement a program designed to turn the company around before its planned partial privatization; the *Plan for Winning* document is made available to the media and all employees.

Christened *iBhayi*, the first B-747-444 powered with the new Rolls-Royce RB211-524G/H-T engines enters service on August 16.

Some 3,000 airline ground workers, members of the South African Railways and Harbours Workers' Union, reject an 8.5% wage offer and go out on strike on September 1. Domestic and international flights continue to run as scheduled as SAA implements contingency plans.

Employing the new B-747-444 *iBhayi*, the company initiates a sixth daily roundtrip service to Miami from Johannesburg on September 6 via Cape Town. David James, southern African general manager for **Virgin Atlantic Airways, Ltd.**, is recruited to become SAA's new global sales network director.

On October 1, Transnet sells four noncore airline subsidiaries: Connex, Transwerk, Apron Services, and Air Chefs. The contract with **Southern Air Transport** ends, also on October 1, with the bankruptcy of the U.S. airline.

The carrier and the Airlines Association of Southern Africa on October 8 call upon the South African government to end the formula employed by Petronet and the National Oil Refinery to establish what they call "excessive" jet fuel prices at Johannesburg.

A strategic code-sharing agreement is signed with **Swissair, A.G.** on October 26. Under its terms, SAA will distribute all Swissair traffic from Johannesburg throughout Southern Africa while Swissair will distribute all SAA traffic from Zurich to numerous destinations in Europe. A joint daily service to and between Zurich and Johannesburg will be introduced within months.

The privatization process, which has been hobbled since 1995 by ongoing discussions between the airline's parent Transnet and its creditors over the restructuring of SAA's \$666-million debt, moves forward in November. The government and the carrier come to terms under which the state assumes part of the airline's debt to help SAA attract equity bidders.

In a quick effort to gain domination over the air routes between South Africa and Zimbabwe, the company, according to the November 10 issue of the *Zimbabwe Standard*, slashes its fares between Harare and Cape Town, Durban, East London, and Port Elizabeth by over 50% off the published schedule. The discounted ticket sale continues through November 30.

Daily service to Miami becomes a fact on November 24 with the addition of another daily roundtrip. Service to Lagos, Nigeria, begins at the end of the month. In December, the bid process is opened; foreign carriers are invited to submit plans for equity investments of upwards of 25%.

Twice-weekly B-767-2B1ER roundtrips commence on December 3 between Johannesburg and Lagos; requiring a seven-hr. flight one-way, it is the company's first service to Nigeria.

At the end of the year, in a controversial move in preservation circles, the airline is suspends its links with the SAA Historic Flight. The unit's aircraft are ordered to vacate the airline's hangar at Johannesburg airport before the end of March. Pilots and engineers who have been allowed to work with the pioneer piston-engine aircraft must now volunteer their time. SAA will, however, honor all existing bookings for aerial tours. Although passenger numbers on the year are not available, it is reported that revenue passenger kilometers have increased 5.1% to 9.85 million. Freight ton-miles, meanwhile, have declined 3.2% to 1.16 million. Total

revenues reach \$1.31 billion, while costs are \$1.25 billion. The operating profit jumps to \$60 million, while the previous year's net loss becomes an \$8.8-million net gain—the company's first-ever profit.

In a further effort to transform itself into a viable carrier, **Air Namibia (Pty.), Ltd.**, on January 7, 1999, signs an agreement in Johannesburg with SAA. Under terms of the document, the two carriers pledge to explore such joint business opportunities as combined customer services, linked frequent flyer programs, and code-sharing. The arrangement is extended to Kalahari Express Airline (Pty.), Ltd., **SA Express Airways (Pty.), Ltd.**, and **SA Airlink (Pty.), Ltd.**

It is reported by SAA on January 22 that eight foreign airlines have come forward to make bids, one of which will hopefully be found acceptable by May, which is when the government hopes the privatization process will be completed. The eight include **KLM (Royal Dutch Airlines, N.V.)/Northwest Airlines, Deutsche Lufthansa, A.G., British Airways, Ltd. (2), Swissair, A.G., Virgin Atlantic Airways, Ltd., Singapore Airlines, Ltd., and American Airlines.**

A code-sharing agreement is signed with **Ghana Airways Corporation** on January 27 for a joint midweek service between Accra and Johannesburg. The two flag carriers will pool their services to make more efficient use of capacity and market reach. Beginning today, the two will share the Wednesday return flight operated by SAA, the cabins of which will be staffed by Ghana flight attendants.

Nationwide Air Charter (Pty.), Ltd. joins with **Sun Air (Pty.), Ltd. and Comair (Pty.), Ltd.**, also in January, in lodging a complaint with the South African Competition Board. The three allege that South African Airways has so reduced prices and increased capacity on a number of domestic routes as to be engaged in predatory pricing violations. Some SAA fares on the routes between Johannesburg and Durban are less expensive than motor buses. The board indicates that it will undertake an investigation over the next few months. When made aware of the Competition Board complaint, officials from SAA indicate that they will contest the claims.

Twice-weekly roundtrips between Johannesburg and Osaka (KIX) are suspended by both SAA and **Japan Air Lines Company, Ltd. (2)** on January 31.

Following an announcement during the week that no survivors have been found from the two chartered C-130s downed over Angola on December 26 and January 2, SAA, on February 5, announces the precautionary measure of diverting its flight paths over Angola.

While taxiing for takeoff from Blantyre on February 5, an A300B2K-C3 with 143 aboard suddenly stops and then return to the gate. A bird has flown into the engine, damaging 10 blades and making it impossible to depart. An **Air Malawi, Ltd.** B-737-33A is chartered to ferry the stranded passengers on to Johannesburg.

It is also noted during the month that the company has begun to get a handle on its corruption problems. Staff accused of damaging the carrier by stealing aircraft spare parts or other graft are fired and in some cases, arrested.

The Minister of Public Enterprises announces on March 15 that the carrier will be incorporated by the end of the month and privatized by mid-June. A number of potential equity partners have already held meetings with his office, it is revealed, and an information memorandum will be posted by April 1 inviting nonbinding offers to be submitted by April 16.

The airline's chairman, Mafika Mkhwanazi, goes on to say that the preferred bidder for a minority equity stake will, hopefully, be announced by the end of June from a list that includes SAirGroup, KLM/Northwest, and Lufthansa/Singapore. Although the value of SAA has yet to be established, it is anticipated that upwards of R 1 billion will be raised from selling a 25% stake.

SAA withdraws service from Dakar on March 29. Company customers are to be offered more frequent service to Dakar via Accra under a new code-sharing agreement with **Ghana Airways Corporation**. Also during March, the former Historic Flight is relocated to the old Swartkop Air Force base at Pretoria, home of the SAAF's noted museum and the South African Airways Museum Society. The entire complex be-

comes an enhanced mecca for South African and Southern Hemisphere historic aviation buffs.

Charges and counter-charges begun at the start of the year concerning illegal or unethical activities by **Aero Zambia, Ltd.** continue throughout the first quarter and into the second.

On April 8, the *Times of Zambia* reports that the South African Civil Aviation Authority is conducting an inquiry into the neighboring airline's activities. If it is found to have broken regulations as some have indicated it has, its authority to land in South Africa will be terminated.

The *London Daily Mail* reports on April 15 that **Virgin Atlantic Airways, Ltd.** has pulled out of bidding for a stake in SAA. The next day, SAA notes that a U.S.-based airline and a consortium of investors from the U.S. have recently come forward to offer bids. At this point, the carriers known to be interested include **Deutsche Lufthansa, A.G./Singapore Airlines, Ltd.**, **Northwest Airlines/KLM (Royal Dutch Airlines, N.V.)**, **Swissair, A.G.**, **American Airlines**, and **British Airways, Ltd. (2)**. Also, financier David Bonderman and his Texas Pacific Group, which own stakes in several U.S. airlines as well as **Ryanair, Ltd.** in Ireland, seek a stake as well.

Minister of Public Enterprises Stella Sigcau now makes the principal address at the christening of the company's fourth B-747-444. She indicates that her department has set May 31 as a deadline for binding offers from prospective bidders, with final negotiations with the potential partners set for June 7 through the 18, just after South Africa's second post-apartheid general election on June 2.

SAA and its partner **Alliance Air (African Joint Air Service)** are, by late April, ready to quit the bidding process for **Uganda Airlines, Ltd.** The two partners had insisted on not being saddled with the entire **Uganda Airlines, Ltd.** debt, including the lease on a B-737, have less than parity on the board of directors, that the business and capital investment plans already drawn up be binding, that certain airports become hubs, and that brand names and airline codes continue to reflect Uganda. All of these concerns are rejected by the Ugandans.

Indeed, on April 21, the two airlines do withdraw from the **Uganda Airlines, Ltd.** bidding process. So concerned is Ugandan privatization minister Manzi Tumubweine that he personally calls CEO Andrews and obtains a meeting to review the outstanding issues. Within several days, the two sides have convened and the Ugandan government has agreed to water down or delete entirely all of the requirements that SAA has found objectionable. Events will prove this decision on the part of the Ugandans to be a wise course of action.

Meanwhile, the matter concerning **Aero Zambia, Ltd.** remains under review. Later in the month, Aero Zambia loses the right to operate the Johannesburg to Lusaka route on Fridays. The airline petitions a court, which grants an injunction against the transfer of the service to SAA. The injunction is later dissolved, but Aero Zambia is granted another stay of execution. This time SAA challenges and on April 27, again according to the *Times of Zambia*, Zambian Supreme Court Judge Weston Muzyamba rules on the matter in chambers: the stay will no longer remain in place because the entire case will be heard *inter-parte* at a later date.

On April 28, President/CEO Andrews and **Cathay Pacific Airways (Pty.), Ltd.** Deputy Chairman/CEO David Turnbull sign a memorandum of understanding for a long-term commercial agreement at Hong Kong. Under its terms, the two companies will link their frequent flyer programs, offer code-sharing flights, and cooperate on ground handling.

After both **British Airways, Ltd. (2)** and **Sabena Belgian World Airlines, S.A.** pull out of the tender process, SAA and its protegee, **Alliance Air (African Joint Air Service)**, are the only prequalified bidders to make an offer for the available 49% stake in **Uganda Airlines, Ltd.**

On April 30, the Ugandan government via the cabinet subcommittee for privatization cancels the tender process and invites SAA to negotiate the purchase during the week of May 3. In a letter from Ugandan Privatization Minister Tumubweine, SAA is informed that his government will negotiate directly with the airline with a view of reaching an agreement by May 31.

Reporter Robyn Chalmers reveals in the May 14 issue of the Johannesburg *Business Day* that a short list of bidders for the state-owned carrier has been compiled, but their identity is being closely guarded as negotiations with them continue. The key players in the privatization process continue to be the government's private enterprises ministry, the lead transaction advisor Merrill Lynch, and the parent company Transnet. It is known that as many as 12 groups have put forward non-binding expressions of interest with two consortiums emerging as frontrunners—**Lufthansa/Singapore Airlines** and **Swissair/Delta Air Lines**.

It is reported on May 21 that the company is also holding discussions with **Swissair, A.G.** concerning the possibility that it may enter the "Qualiflyer" group, sponsored by the Swiss line. Officials from SAA and SAirGroup both stress that no agreement has been concluded.

As part of his State of the Nation address on June 25, President Thabo Mbeki informs parliament that SAirGroup has won the bid and will acquire a 20% equity stake in SAA for R 1.4 billion (\$232 million). The Swissair parent has an option to purchase another 10% within six months. **Deutsche Lufthansa, A.G.** and **Singapore Airlines, Ltd.** had withdrawn from the bidding with **American Airlines**, Texas Pacific Group (**Continental Airlines** shareholders), and **Ryanair, Ltd.** losing out. The SAirGroup link is expected to help SAA cut interest rates, negotiate less expensive aircraft deals, and to enter major alliance relationships, beginning with immediate admission to the Qualiflyer group.

The SAirGroup announcement is cause for celebration at Johannesburg's Airways Park, where CEO Andrews, together with Yvonne Chaka Chaka, announces winners for four Hyundai cars and offers a pep talk.

Under terms of a three-way code-sharing agreement signed with **Aerolineas Argentinas, S.A.** and **VARIG Brazilian Airlines (Viação Aerea Rio-Grandense, S.A.)**, SAA introduces twice-weekly nonstop roundtrips on July 8 between Johannesburg and São Paulo.

On October 1 it is revealed that the carrier has signed a major marketing and code-sharing agreement with **Delta Air Lines**. Under the terms of the agreement, Delta agrees to purchase block seats on the daily SAA B-747-444 direct nonstop return service from Johannesburg to both Atlanta and New York (JFK). The service from Johannesburg and the Georgia city will be the first nonstop direct link between the city pair.

A strategic equity agreement and code-sharing arrangement is concluded with SAirGroup, parent of **Swissair, A.G.**, on November 20. Under its terms, SAirGroup will purchase a 20% stake in its new partner.

Twice-weekly A320-231 roundtrips are resumed on December 1 between Johannesburg and Kinshasa, Democratic Republic of the Congo. On December 7, company officials travel to Uganda where, in discussions with Ugandan President Yoweri Museveni, they make an offer to purchase a 49% stake in his troubled flag carrier.

Also during December, a spectacular new first-class lounge is opened at the Johannesburg Airport, resplendent with unique African art.

It will later be revealed that a total of 5.1 million passengers have been flown on the year, including 3.4 million on domestic services. It is also reported that revenue passenger kilometers have increased 11.3% to 10.96 million. Freight ton-miles, meanwhile, have risen 32.1% to 1.53 million. Total revenues reach \$1.59 billion, while costs are \$1.49 billion. The operating profit jumps to R 570 million (\$90.4 million), while the previous year's net loss becomes an \$19.3-million net gain.

On January 7, 2000, the U.S. DOT approves the block-seat, code-sharing alliance **Delta Air Lines** has concluded with South African, clearing the way for it to begin from New York (JFK) on January 30 and from Atlanta on January 31. Protesting that skills within the state holding company Transnet are spread too thin, Public Enterprises Minister Jeffrey Radebe refuses to permit the resignation of Transnet Deputy Managing Director Mafika Mkwana as chairman of SAA and his replacement as interim chairman by Transnet Managing Director Saki Macozoma. Macozoma has informed the government that he will not renew his contract with the government when it expires in March 2001. Mkwana's contract is also due to end, but he is needed to remain as SAA's head at least until the board's restructuring required by the SAirGroup investment is completed.

By month's end, the company's international on-time performance rating has risen to 82.8% and its domestic performance to 92%.

An A320-231 landing at Lusaka on February 29 skids off the runway into a nearby field, where its No. 2 engine gets stuck in the mud and its right main landing gear collapses. In an effort to further deal with its revenue management, SAA, in February, purchases a new generation of sophisticated PROS software to perform a number of rev-man tasks, as well as providing the training necessary to operate it.

A long overdue fleet overhaul program is launched on March 1 with a \$680-million order for 21 Next Generation B-737-844s, the first of which is scheduled for delivery in May. The new aircraft, which represent SAA's largest aircraft purchase ever, will be placed on domestic South African as well as regional routes, replacing 3 B-767s, 7 A300s, and 7 A320s.

A B-767-2B1ER leased from **LAM (Linhas Aereas de Mocambique, S.A.)** is returned to Maputo on March 23. On March 26, the Cape Town extension of **Austrian Airline, A.G.'s** Vienna to Johannesburg service is dropped; instead, Austrian begins to code-share on SAA flights on the Cape Town sector.

Unhappy with the inability of the Ugandan government to come to a decision concerning its equity offer, SAA, on March 28, drops its offer to buy a 49% stake in **Uganda Airlines**. Executive Vice President William Meany informs Manzi Tumubweine, Uganda's state minister for privatization, of the decision by registered mail.

In a SFr 1-billion (\$598-million) transaction, SAA in March outsources its information technology functions to Atraxis, a subsidiary of SAirGroup. Atraxis indicates that it will form a Johannesburg-based joint venture, Atraxis Africa, to handle the work and provide employment for the 300 SAA employees who will transfer over.

After stepping back from a call for the closing of **Alliance Air (African Joint Air Service)**'s in April, Transnet, parent of **South African Airways (Pty.), Ltd.**, instead gives warning that it wishes to pull out of the joint venture within six months. It does, however, agree to provide funding as long as Uganda and Tanzania agree to a new business plan and contribute monthly funding of \$126,000 each.

The marketing name SA Alliance Air (Pty.), Ltd. is now employed and a SAA B-767-244 takes over the route from Johannesburg to London (LHR) via Entebbe and Dar es Salaam previously operated by the lion's head-painted Alliance B-747SP-44. Another SAA aircraft, a B-737-244A, is employed by **Alliance Air Express, S.A.** to fly a weekly roundtrip route between Johannesburg, Kigali, and Entebbe.

A marketing and code-sharing agreement is signed with **Zambia Skyways, Ltd.** When the pact begins on April 18, SAA takes over the smaller line's Lusaka to Johannesburg route, operating larger equipment until Zambia Skyways can obtain Western jetliners of its own.

Also in April, a new curbside check-in facility is opened at Johannesburg Airport for premium passengers; similar facilities will soon be available at Durban and in London.

On May 1, **Delta Air Lines** begins block-seat, code-sharing aboard SAA services from Johannesburg to Windhoek, Namibia. On May 29, the office of the South African public prosecutor, at the recommendation of the South African Truth and Reconciliation Commission, reopens the investigation into the crash of a B-747 off Mauritius in 1987 that killed 159 people. Information has been received during closed-door testimony indicating that the Jumbojet, counter to international law, had been transporting a military cargo.

Uganda fails to make payment of any kind toward the upkeep of SA Alliance Air (Pty.), Ltd. after May and Tanzania escapes the cash contribution by providing the carrier with in-kind services, such as landing fees and ground handling. The two national governments, acting in consultation, do agree to sell their shares into the private sector, thereby minimizing state involvement in the joint venture. Their national carriers, meanwhile, concentrate on a new daily roundtrip schedule jointly introduced between Dar es Salaam and Entebbe.

A R 500-million deal is concluded with **Safair (Pty.), Ltd.** on June 7. Under its terms, SAA sells its entire fleet of 13 B-737s (11 Dash-244As

and 2 Dash-244AFs) and then leases them back. SAA will not only operate the aircraft, but maintain them as well. With over 40 planes, Safair is now the largest aircraft leasing and charter firm in Africa.

The first of 16 ordered Next Generation B-737-800s, a Dash-85F leased from GATX Flightlease Management, is received on July 5; although later units will be upgraded during assembly, this unit will have to be retrofitted with a required new wing needed to extend range by up to 400 miles. Two more Next Generation B-737-85Fs are delivered on the same day, June 30.

At the beginning of August, management inadvertently sets off a firestorm of employee protest when it announces that it will cancel 16 collective bargaining agreements. It is feared that the move will bring salary reductions of at least 30%. Union leaders ask the South African government to intervene in the situation on August 7 and to dismiss President/CEO Coleman Andrews, threatening, otherwise, to go on strike. On August 8, SAA officials explain that any contract changes will not impact salaries, but will provide for "updated agreements" that loosen work rules in such a manner as to help keep the company competitive.

On August 8, the carrier signs a contract with **Nigeria Airways, Ltd.** under which it agrees to resume New York service on behalf of the Lagos-based flag carrier. Under the pact, SAA will provide a Jumbojet with seating for 330 passengers, out of which 109 are assigned to the Nigerians.

Under contract, a SAA B-747-344 undertakes a promotional flight, code-shared with **Delta Air Lines**, on behalf of **Nigeria Airways, Ltd.** on August 15 between Lagos and New York (JFK). Aboard are SAA Chairman Behki Sibiya and President/CEO Andrews; Engineer Zakari Haruna, representing the Nigerian Minister of Aviation; Nigeria Airways CEO Edmund Abayomi Jones; chairmen of the Nigerian House and Senate aviation committees, seven journalists, and a full complement of executives from the two airlines, plus travel agents and journalists. Five more such roundtrips will be operated by the end of October.

Blaming leaders of its partner nations, particularly Tanzania, for its inability to perform to a higher level, the SA Alliance Air (Pty.), Ltd., during the first week of September, reports a \$50-million loss since 1994. As the month closes, Senior Vice President William L. Meaney announces that he will be stepping down at the end of the year and will be succeeded by Otis Africa Managing Director Bonang Mohale. Part of his duties will also be handled by Willy Boulter, general manager for Europe, who will be placed into the new vice president-alliances/network management post.

Late in September, SAA announces that it is increasing the number of frequencies on its routes to Bulawayo, Lusaka, Maputo, Nairobi, and Victoria Falls. Also during September, SAA leases a pair of B-747-200s previously operated by **Swissair, A.G.** A fifth Next Generation B-737-85F is delivered on September 29.

On October 2, **DAS Air Cargo, Ltd.** and the Tanzanian Chamber of Commerce step forward with an offer to purchase 30% stakes (the Uganda and Tanzania holdings) each in SA Alliance Air (Pty.), Ltd., with DAS also bidding \$5 million to take over the 40% stake held by Transnet. The deal is conditional in that DAS must also be given traffic rights to the Alliance routes and the Alliance debt must be satisfied.

A memorandum of agreement is signed on October 9 between the governments of South Africa and Iran. Under its provisions, SAA will be able to operate from Johannesburg and Cape Town to Iran's various communities while **Iran Air** is permitted to begin flights from Tehran to any point in South Africa.

The **DAS Air Cargo, Ltd.** rescue effort collapses on October 10. With both Uganda and Tanzania having failed to pay their part of expenses, South African Airways (Pty.), Ltd. refuses to continue operating its Boeings for the partnership airline. Without lift, the company is forced to suspend all operations the same day. SAA, for its part, announces that it will begin a thrice-weekly return service between Johannesburg and Entebbe on December 1.

Seeking surety for owed salaries and benefits, workers for the grounded airline seize a SAA passenger jetliner when it arrives at Dar es

Salaam, Tanzania, on October 13. South African Airways (Pty.), Ltd. quickly appeals to a local judge, who orders the aircraft released. Company workers in Tanzania also file suit against Managing Director Chris Zweigenthal for breach of trust.

Following an interview with police, the partnership carrier's managing director and two associates flee Uganda for South Africa on October 15. The next day, at the request of the airline's workers, the Kampala High Court freezes the Alliance Air records and orders that an inquiry into the company be launched. In a related story, **Uganda Airways, Ltd.**, which is being liquidated and sold its last Fokker three days earlier, is shut down on October 16.

With both the carrier and **Qantas Airways (Pty.), Ltd.** losing money on their roundtrip routes from Johannesburg to Australia, the two agree to a new code-sharing agreement for the services on October 18. When the pact takes effect in mid-January, the two will divide the three-stop route between them, with each controlling 40% of the seats in all three classes on each other's aircraft. SAA will continue to operate from Johannesburg to Perth while Qantas will operate return flights from Sydney to Johannesburg via Perth.

The sixth SAA B-737-85F is delivered on October 25. Alliance Air Managing Director Zweigenthal, unable to discharge his duties from exile in Johannesburg, resigns on October 26. The same day, the workers in Kampala drop their suit. On October 27, Ugandan and Tanzanian private concerns step into buy the suspended airline and announce plans for a revival by December 1. The Nigerian charters become scheduled, thrice-weekly flights on October 29.

For the New York (JFK) joint venture charter frequencies due to be turned into thrice-weekly scheduled roundtrips with South African Airways (Pty.), Ltd. on October 31, SAA has painted a B-747-344 in a special joint color scheme. Before the service can be launched, however, there is a dispute over the number of seats Nigeria Airways will be allowed to sell under the August agreement. The impasse forces the start-up to be put on hold.

On November 6, **Nationwide Air Charter (Pty.), Ltd.** makes a formal complaint to government regulators concerning alleged predatory pricing policies on domestic routes by SAA.

On November 10, a code-sharing agreement is signed with **Qantas Airways (Pty.), Ltd.** covering the Perth-Harare route from which the Australian line had withdrawn two weeks earlier.

Nigerian Aviation Minister Dr. Kema Chikwe personally works to make certain that arrangement with the South Africans for a joint venture air service do not collapse; after diplomatic intervention, the dispute with **Nigeria Airways, Ltd.** is settled on November 13. The same day, it is reported that the joint flights to the U.S. will take off in December (they will not, in fact, begin until February 21).

A B-737-230A, previously operated by **Croatia Airlines**, is chartered from **Safair (Pty.), Ltd.** on November 17. On November 21, weekly frequencies are increased from 3 to 7 from Johannesburg to Bulawayo, 10 to 11 from Harare, 6 to 7 from Lusaka, 8 to 10 from Maputo, 4 to 7 from Nairobi, and 9 to 11 from Victoria Falls. The first improved Next Generation B-737, a Dash-8S3, is delivered, also on November 21.

The A300 wearing a special *The Love Plane* livery showing messages from children is retired on November 27.

Thrice-weekly B-737-244B return flights commence on December 1 between Johannesburg and Entebbe, Uganda. The same day, **Delta Air Lines** begins to code-share on SAA services from Johannesburg to Dar es Salaam. On December 12, a \$50-million contract is signed with Rolls-Royce Limited for comprehensive maintenance on the airline's RB211-524H engines. Another B-737-8S3 is delivered, also on December 12.

Just before Christmas, the government extends the option of SAirGroup to purchase an additional 10% stake in SAA, but indicates that it will require a higher price, not that the value of its carrier has increased. With the Swiss airline group suffering fiscal problems, it is not immediately apparent whether or not the stake will be taken up.

According to an interview with a company spokesperson that will be published by Reuters, Ltd. on January 5, enplanements for the year total

five million, domestically and internationally. When, because of a profit crisis, the board of SAirGroup, parent of **Swissair, A.G.**, ends its policy of airline equity acquisition early in the new year, it also closes out any chance of its further investment in SAA. On March 1, Real Africa Holdings Chairman Donald Ncube will succeed Bheki Sibiba as nonexecutive chairman while, on March 30, President/CEO Andrews will be succeeded by Chief Financial Officer/Executive Vice President Andre Viljoen.

SOUTH AFRICAN EXPRESS (PTY.), LTD. See **SA EXPRESS (PTY.), LTD.**

SOUTH ATLANTIC AIRLINES: United States (1968-1969). SAA is set up at Myrtle Beach, South Carolina, during the summer of 1968 as an affiliate of Sports by Air, Inc. Employing a pair of Aero Commander 500Bs, the commuter inaugurates daily scheduled roundtrips on August 15 linking its base with Hilton Head, Columbia, Raleigh, Jacksonville, Savannah, Charleston, and Raleigh. Services are maintained into 1969.

SOUTH CENTRAL AIR: 135 Granite Post Court, Kenai, Alaska 99611, United States; Phone (907) 283-7676; Fax (907) 283-3678; Code XE; Year Founded 1967. Harold and Irene Andersen establish this charter operation at Kenai, Alaska, in 1967, flying passengers and cargo to surrounding locales over the next 15 years. The company is sold to David Diamond in early 1981 and is reformed to provide scheduled passenger and cargo flights to destinations throughout the south central portion of the state, especially the Kenai Peninsula.

President Diamond inaugurates high-frequency nonstop service to Anchorage and multiple-frequency flights to Homer, Seward, and Soldotna. The initial fleet includes a mix of Cessna lightplanes, and 1 each Piper PA-31-310 Navajo, PA-31-350 Navajo Chieftain, and Britten-Norman BN-2 Islander. Not required as a private carrier to reveal its traffic figures, it will, however, do so on a sporadic basis.

Several Piper PA-31-350 Navajo Chieftains are acquired in 1982 and enplanements reach 79,991.

In October 1983, the company is purchased by **Kenai Air Alaska**, which will operate it as a subsidiary.

While taxiing in fog at Anchorage on December 23, **Korean Airlines/Korean Air (KAL)** Flight 084, a DC-10-30F with three crew, manages to become situated on the wrong runway. During its takeoff roll, the wide-body collides head on with South Central Air Flight 59, the Navajo Chieftain with nine passengers, which is taking off on a service to Kenai. Flight 084 overruns the runway by 1,434 ft. and although both aircraft are badly damaged, amazingly, there are no fatalities.

Passenger boardings for the year climb to 108,611.

During 1984-1985, airline employment is 100 and the fleet comprises 2 Piper T-1040s, 5 Piper PA-31-350 Navajo Chieftains, 1 Piper PA-31-310 Navajo, 1 Piper PA-34 Seneca, 1 Britten-Norman BN-2 Islander, 2 Cessna 207As, and 1 Cessna 206. Enplanements in the latter year total 217,591.

The fleet in 1986 includes 7 Chieftains, the 2 T-1040s, 1 Cessna 207A, and the Islander. Enplanements reach 130,000.

Vernon Lofstedt Jr. becomes president in early 1987. The 100-employee small regional becomes a "United Express" code-sharing affiliate of the major **United Airlines** in June and replaces one of its Chieftains with another T-1040.

A Piper Navajo Chieftain with eight aboard loses power after takeoff from Kenai, Alaska, on December 23 and crashes into a house, killing five passengers and the pilot; residents of the abode escape unharmed.

Passenger boardings, however, shrink by 17.1% to 107,772.

In 1988, the T-1040s are replaced by a British Aerospace BAe Jetstream 31 and three more PA-31-350s.

The Jetstream is withdrawn in 1989 as three new T-1040s are made available. The United contract is terminated and the company now holds its enplanements confidential.

On December 22, a Piper Navajo Chieftain misses its approach to the uncontrolled airport at Beluga after an all-cargo service from Kenia and crashes into trees about 8 mi. to the NW; the pilot is killed.

The T-1040 fleet is increased to seven in **1990** as all but three Navajo Chieftains are withdrawn.

Following the eruption of Mount Redoubt on the evening of April 6, South Central stops flying from Anchorage when, as spokesperson Dawn McKibbin has it, ash begins falling "pretty good." After missing six flights, the company resumes flights about 8 a.m. the next morning. Enplanements this year total 91,423.

One more T-1040 is acquired in **1991**, along with a Cessna 207A and a Pilatus Britten-Norman PBN-2 Islander. The three Chieftains are reinstated.

Despite this fleet expansion, passenger boardings decline to 72,629. A total of 679,617 pounds of mail are flown.

Airline employment stands at 90 in **1992** as passenger traffic plunges 32% to 49,172 passengers flown.

Services continue in **1993–1994**. During these years, a de Havilland Canada DHC-4 is acquired for all-cargo services.

Following the collapse of both **MarkAir** and **MarkAir Express** passenger services earlier in the year, South Central adds scheduled passenger flights between Anchorage and Homer during the fall of **1995**. Plans are announced for similar flights between Anchorage and Kenai.

While on final approach to the airport at Nanwalek on December 10, a PA-32, with a pilot and five passengers, encounters strong winds and strikes the end of the runway, sliding 100-ft. to a stop. Three aboard are injured, one seriously.

The workforce in **1996** remains the same as it was four years earlier and the fleet includes 14 aircraft: 6 T-1040s, 4 Navajo Chieftains, and 1 each Islander, Cessna 185, C-206, and C-207A. A total of 50,019 passengers are flown, not including 11,669 on charters.

En route from St. Mary's to Kenai with freight on January 29, **1997**, the DHC-4 with two crew and a load of mining equipment, loses its No. 2 engine. The aircraft is diverted first to Aniak and then to Sparrevohn, where it encounters severe turbulence while trying to land. As a result, the turboprop collides with snow-covered hilly terrain away from the airfield (one dead).

While on its takeoff roll from Beluga Airport on the evening of November 11, a Navajo Chieftain, with one pilot and four passengers, collides with a moose; although the aircraft is badly damaged and the moose is killed, no injuries are reported by those people aboard.

Scheduled customer bookings accelerate 5.8% to 40,567. In addition, 8,302 charter passengers are flown, along with 2.3 million pounds of mail and freight.

Flights continue in **1998**. While climbing away from Homer on a service to English Bay on February 6, a Cessna 207A stalls, rolls, and crashes into the ground; the pilot is killed.

Unable to recover from the effects of this latest tragedy, the company now shuts down.

Operations are resumed shortly thereafter, with many flights made on behalf of other operators or concerns. These continue, without headline or incident, into the first month of **2001**. While en route Unalaska Island for Anchorage on January 23 on a charter for Majestic Air Cargo with 2,350 pounds of cod milt from Trident Seafoods, a DC-3 with two crew crashes in fog and heavy snow on Table Top Mountain, near Elder Point, Alaska. A fisherman will find the wreckage and report that there are no survivors.

SOUTH CENTRAL AIR TRANSPORT (1): United States (1946–1947). Raymond J. "Ray" Ellis, owner of the FBO **Fayetteville Flying Service**, establishes the intrastate carrier SCAT-1 at Fayetteville, Arkansas, in August **1946** in hopes of having it approved as a scheduled airline. Employing 9 Cessna UC-78s, 5 of which are converted to civil T-50 standard, Ellis inaugurates intrastate revenue and passenger flights connecting his base with Little Rock, Hot Springs, Hope, El Dorado, and Harrison.

Operations continue into **1947**; however, the CAB does not approve the company's application for certification. Hence, SCAT-1 closes down in late fall.

SOUTH CENTRAL AIR TRANSPORT (2): United States (1971–1978). SCAT-2 is set up at Natchez, Mississippi, in **1971** to undertake a full schedule of daily passenger services to regional destinations. With a fleet that includes 1 each Britten-Norman BN-2 Islander, de Havilland Canada DHC-6-100 Twin Otter, and Handley Page HP-37 Jetstream, the company duly inaugurates revenue flights linking its base with Jackson, New Orleans, Tupelo, Columbus, Montgomery, Mobile, Fort Walton Beach, and Panama City.

Operations continue apace until **1978**.

SOUTH CENTRAL AIRLINES: United States (1964–1965). South Central is established at Ocala, Florida, during the summer of **1964** to provide scheduled daily roundtrip services to Gainesville and Jacksonville. Employing a Piper PA-23 Aztec, the company launches air taxi revenue flights in July, maintaining them into **1965**.

SOUTH COAST AIRWAYS (PTY.), LTD. See EAST-WEST AIRLINES (PTY.), LTD.

SOUTH EAST AIR, LTD.: United Kingdom (1986–1988). SEA is established at Shoreham in **1986** to operate scheduled services to Jersey. Revenue services commence with 3 Dart Heralds and 2 de Havilland Canada DHC-6 Twin Otters and continue apace through **1987**.

The small regional does not release any statistics, but apparently encounters negative financial numbers, which force it to shut down in February **1988** and enter receivership.

SOUTH EAST EUROPEAN AIRWAYS, S.A.: Greece (1993–1995). SEEA is established at Athens in early **1993** to operate domestic and regional services with a fleet of 2 Fokker 50s and 3 Fairchild Metro IIIs. Kostas Piladakis is named managing director and a contract is entered into with **Virgin Atlantic Airways, Ltd.** to initiate feeder services on its behalf from Athens–London (LGW). An Airbus A320 is ordered and in the meantime, a B-737-42C is leased from **Air U.K. Leisure, Ltd.** and employed to begin the international contract on March 29.

The Boeing is replaced in January **1994** with a leased Airbus Industrie A320-231. A Fairchild Metro 23 is also acquired. Encountering severe financial difficulties, the carrier fails in March **1995** and transfers its Airbus over to VAA, which begins its own service on the U.K.–Greece route.

SOUTH NAHANNI AIRWAYS, LTD.: P.O. Box 407, Fort Simpson, Northwest Territories X0E 0N0, Canada; Phone (867) 695-2007; Fax (867) 695-2943; <http://www.pacificocean.com/nahanni>; Year Founded 1996. Jacques Harvey establishes South Nahanni at Fort Simpson in **1996** to operate year-round, 24-hour air charter services. Founder/Chief Pilot Harvey employs a float-equipped de Havilland Canada DHC-6-300 Twin Otter and specializes in the transport of tour groups to surrounding lakes and rivers, particularly Nahanni National Park. Additionally, flights are undertaken to Virginia Falls, Rabbittkettle, Moose Ponds, and Island Lakes.

Service is maintained in **1997–1999**.

SOUTH PACIFIC AIR LINES: United States (1953–1964). SPA is organized by the Robert Dollar Company as **Dollar Airlines, Ltd.** at Tahiti in **1953**. The remainder of the decade is taken up with attempts to begin operations over a route to Honolulu. Initially, the Australian operator **Trans-Ocean Airways, Ltd.** is acquired, together with its two Shorts S.25 Solents (a third is later purchased from the U.K.). Christmas Island A-bomb tests prevent the start-up of services.

Following establishment of the U.S. Federal Aviation Administration (FAA) in mid-decade, significant modifications to the Solents are required in order that they might meet airworthiness requirements of the new government agency. About the time these are completed, the French begin to build a new landplane airport at Tahiti that will eliminate the value of flying boats.

In late 1959, an arrangement is made with **Trans World Airlines (TWA)** for the lease of a Lockheed L-1049E, which is christened *Bounty* in honor of the ship made famous by the British mutiny. At long last, it is employed to commence scheduled flights from Hawaii to Tahiti on April 2, 1960. Passengers reaching the French island are able to complete the final sector from Bora Bora to Papeete aboard the Short Sandringham flying boat operated by **Reseau Aerien Interinsulaire, S.A.**

The new Tahiti airport is opened on September 20, 1961 and the airline, now renamed, offers a new Honolulu to Samoa frequency beginning on March 14, 1962. A second L-1049A is purchased from **Trans World Airlines (TWA)** on June 7.

The CAB, on January 28, 1963, grants the mainland U.S. to Tahiti route to **Pan American World Airways (1)**. While the decision awaits presidential pleasure, the major U.S. carrier and the little Polynesian operator reach accord on September 18. Pan Am will rent its competitor's route for 20 years, paying 50% of operating profit for the first decade and 10% for the second.

On November 12, President Kennedy grants **Pan American World Airways (1)** the route, which now makes Juan Trippe's deal with South Pacific unnecessary. Faced with an inevitable end, South Pacific allows itself to be acquired by the major in November 1964.

SOUTH PACIFIC AIRLINES OF NEW ZEALAND, LTD.: New Zealand (1960–1966). With support from **Ansett Airlines of Australia (Pty.), Ltd.** and over 800 small shareholders, privately owned SPANZ is established by Capt. Rex Daniell and Robert Anderson at Auckland in the fall of 1960 to operate scheduled and charter services, largely on behalf of the tourist industry, to provincial centers. Capt. Daniel had led RNZAF No. 24 Squadron (C-47) during the Normandy Invasion in 1944.

Employing a pair of Douglas DC-3s outfitted with large "Viewmaster" windows, revenue flights commence on December 14 to New Plymouth, Hamilton, Taupo, Napier, Masterton, Nelson, Hokitika, Wigram, Wanaka, Timaru, Oamaru, Queenstown, and Alexandra.

After Ansett withdraws its support in October 1964, SPANZ soldiers on alone. Without support from the Australians and facing stiff competition from the state-owned domestic carrier **New Zealand National Airways Corporation, Ltd.**, the airline is finally forced to shut its doors on February 28, 1966.

Forty years later, beginning on December 8, 2000, the company's founders and a number of former employees will join aviation enthusiasts from around the world in a weeklong celebration of the company's memory.

SOUTH PACIFIC ISLAND AIRWAYS: United States (1973–1989). Organized in June 1973, SPIA provides commuter services in American Samoa from a base at Pago Pago. During the next decade, the company undertakes scheduled passenger flights to the Ofu and Tau Islands in American Samoa, Apia in Western Samoa, Ha'apia, Tongatapu, and Vava'u in Tonga, and to the Wallis/Fortuna Islands in French Polynesia. The fleet grows to include 3 de Havilland Canada DHC-6-300 Twin Otters, 2 Cessna 402s, and 1 Britten-Norman BN-2 Islander.

Operations are undertaken without incident in 1974–1978.

A DHC-6-300 with 2 crew and 16 passengers is destroyed as the result of a bad landing at Tau, American Samoa, on November 5, 1979; there are no fatalities.

The company receives scheduled authority in late 1980. In February 1981, the first of four Boeing 707-320B Stratoliners become available and scheduled roundtrip flights are inaugurated to Honolulu on March 26. In the years following, the carrier expands its charter services to points in Canada, Europe, and the South Pacific.

Enplanements reach 110,000 in 1982, jumping 62.7% to 179,000 in 1983. Destinations served beyond the Pacific include Guam, Port Moresby in New Guinea, Honolulu, Anchorage, and Vancouver.

The payroll is boosted 57.9% in 1984 to 401 and the fleet includes 4 B-707-320Bs, 4 DHC-6-300s, and 1 Islander.

While on final approach to Tau, Manua Island, on a July 21 service from Pago Pago, the elevator control cable of a DHC-6-300 with 3 crew and 11 passengers fails. The aircraft hits the terminal roof with its left wing and crashes, hitting a nearby vehicle in the process; one person aboard is killed and the remaining 15 are injured, 7 seriously.

While making an unauthorized polar flight on September 30, a company Boeing with 200 people aboard, nearly becomes involved in an international incident when it strays off course over Norway. Norwegian F-16 fighter planes are scrambled and head off the jetliner, which is approaching within 15-minutes distance of Soviet airspace and a heavily guarded U.S.S.R. naval base.

On October 13, the FAA, citing that flight and others like it, as well as over 50 other violations mostly for safety, grounds the carrier by pulling its FAR Part 121 operating certificate. A court stays the grounding order on September 18 and SPIA resumes partial services in mid-October. The government takes the case to another court and obtains a ruling in its favor, which allows the FAA to re-ground the carrier on October 22.

For the 10 months of operations, the carrier's bookings increase 14% to 204,337 and revenues improve by 10.2% to \$31.4 million. Low costs allow an operating profit of \$2.9 million and net gain of \$2.5 million.

As 1985 begins, officials endeavor to clear up their difficulties with the FAA and to relaunch services. Boeing jetliner flights resume in February between Honolulu and Pago Pago and Papeete. A court on March 8 allows the B-707-320Bs to operate despite the FAA's desire that they be required to stand down for noise-reducing engine modifications.

FAR Part 135 Twin Otter commuter operations are allowed to resume in March. Plans are made to inaugurate charter flights to Majuro, Jakarta, Kwajalein, Auckland, and Manila. As its Stratoliners are not hush-kitted and make too much noise, the government grounds the company again, this time on June 9.

As a result, the year's passenger boardings plunge 712.1% to 55,000. Revenues fall 78.3% to \$7.2 million, but expenses are low enough to allow an operating profit of \$376,000. There is a net \$82,000 net loss.

Early in 1986, the company attempts to obtain an FAA hush-kit exemption that will allow an April launch of its planned central and south Pacific operations. The favor is granted and a single B-707-320B undertakes regularly scheduled flights to Guam, Tahiti, and Pago Pago. In July, the company files for Chapter XI bankruptcy protection. As a result, it does not release any traffic or financial information.

In February 1987, the FAA grounds the carrier yet again, this time for maintenance and record-keeping violations. There is another appeal and the carrier is given another extension. The company is able to clear up some of its violations and continues Twin Otter operations in bankruptcy until December 20, 1988.

The inactive carrier that has refused to die so many times finally does so on January 17, 1989, when the DOT steps in and lifts both the airline's operating certificate and exemption authority. From these actions there is no appeal and the bankruptcy trustee now oversees the Chapter VII liquidation.

SOUTH QUEENSLAND AIRWAYS (PTY.), LTD.: Australia (1939–1940). This little-known carrier is formed at Brisbane in the fall of 1939. Equipped with a de Havilland DH 84 Dragon, it begins flying a route to Toowoomba and Cunnamulla. Unable to succeed against larger competitors and fiscal difficulties, the operation is shut down on April 29, 1940.

SOUTH WEST AFRICAN AIRWAYS, A.G.: South West Africa (1930–1935). The postal authorities of the South West Africa (present day Namibia) government announce on February 4, 1930 that in order to provide feeder flights on the upcoming England–South Africa route of **Imperial Airways, Ltd.**, they will soon commission the establishment of a weekly return airmail service between Windhoek and Kimberley. In early 1931, the colonial government requests that the German Air Ministry help it to establish an air service for South West Africa. The

request finds favor and is passed over to the Junkers Company at Dessau, which has a history of not only building airplanes, but of starting airlines (sometimes as ready-made customers) as well. F. Hoepfner is sent down to take charge of this latest Junkers subsidiary.

Hoepfner arrives in late spring, along with a Junkers F.13 and two A.50s. At this point, it is learned that the planned expansion of the **Imperial Airways, Ltd.** African route is behind schedule. Instead of passing through the area in April, it will now be the end of the year. The colonial post office decides not to wait, but elects to push ahead with its own internal South West African service, which will be operated over three routes: Northern, Southern, and Coastal.

Once the service is organized and airmen are hired, including British chief pilot F. C. J. Fry, South West Airlines is officially founded on August 1. During the day, Capt. Fry inaugurates the Northern route, flying from Windhoek to Grootfontein via Okahandja, Omaruru, Otjiwarongo, and Taubeb. The first return flight over the route is operated two days later.

With Capt. A. O. Wright at the controls, the Southern route is launched on August 4. It is flown from Windhoek to Keetmanshoop via Rehoboth and Mariental. Wright flies back over the route on August 6.

The Coastal route is timed to connect with the incoming post delivered to Walvis Bay by mail steamers. Capt. Fry initiates this service on August 11, flying from Walvis Bay to Windhoek via Okahandja, Karib, and Swakopmund.

The last of the experimental flights over the Southern route is completed on December 4 and over the Coastal route on December 14.

On January 26, 1932, the first regular feeder flight is operated from Windhoek to Kimberley via Mariental, Keetmanshoop, and Upington. At Kimberley, mail going north is loaded aboard an **Imperial Airways, Ltd.** aircraft, while that going south is sent by train. Capt. Fry operates the last SWAA experimental service over the Northern route on February 15.

Flights continue in 1933–1935, during which years Fry and another pilot, Peter Falk, also are assigned to survey the territory, establishing airfields at small and bush communities. Tiring of its money-losing commitment and swamped with business from the new Third Reich, Junkers determines to close down its African airline.

On February 1 of the latter year, the company is purchased by **South African Airways (Pty.), Ltd.** for R 14,000.

SOUTH WEST AFRICAN AIRWAYS, A.G.: South West Africa (1946–1958). In November 1946, G. T. “Porky” van Rooyan and Peter Falk, both of whom had been involved with **South West African Airways, A.G.**, attempt to revive the name of that carrier for a new airline they have formed. Finding that the moniker is already in use, they must settle for the title South West Air Transport.

Having acquired several four-seat Ryan Navions, SWAT finally inaugurates regular services in 1949, linking Windhoek and Grootfontein via Otjiwarongo, Outjo, and Tsumeb. The following year, the company begins a feeder affiliation with **South African Airways (Pty.), Ltd.**

During 1950–1958, stops are also added at Swakopmund and Walvis Bay. The fleet is increased to include 7 Navions and 1 de Havilland DH 89A Dragon Rapide. **Oxyx Aviation (Pty.), Ltd.** is taken over in March 1959, at which time the company is reformed into **Suidwes Lugdiens (Pty.), Ltd.**

SOUTHCOAST AIRWAYS. See **ALASKA SOUTHCOAST AIRWAYS.**

SOUTHEAST (PTY.), LTD.: South Africa (1992–1994). Southeast is established at Bisho, the capital of the homeland of Ciskei, in April 1992. Employing a leased Convair CV-580, scheduled roundtrip services are inaugurated in July between the company base and Johannesburg.

Flights continue until April 1994 when Ciskei is integrated into the new Eastern Cape Province and the carrier is shut down.

SOUTHEAST AIR (1): United States (1979). Southeast-1 is established at New Bedford, Massachusetts, in early 1979 to provide sched-

uled passenger and cargo flights to Martha’s Vineyard, Nantucket, and New York (LGA). Although daily Piper PA-23 Aztec roundtrips are duly begun, they last only until the fall.

SOUTHEAST AIR (2): P.O. Box 1358, Manteo, North Carolina 27954, United States; Phone (919) 473-3222; Fax (919) 473-1349; <http://www.southeastair.com>; Year Founded 1992. North Carolina-based Southeast Air begins intrastate services in summer 1992, flying a total of 702 revenue passengers. Emphasis is placed upon services to the Outer Banks. The workforce is increased by 33.3% in 1993 to eight and the fleet includes two Cessna 172s, a Cessna 206, and one Piper PA-31-310 Navajo.

Customer bookings accelerate 47.9% to 1,038 and cargo rises 63% to 12,000 FTKs. Revenues jump 68.9% to \$351,061.

Flights continue apace in 1994–1998. During these years, President Betty Shotton Brindley, a longtime Outer Banks tourism executive, and Operations Director David Lehr oversee the flights of four pilots.

Regularly scheduled shuttle flights are introduced during the spring of 1999 between Manteo and Norfolk, Virginia.

SOUTHEAST AIRLINES (1): United States (1956–1960). E. Ward King, owner of Kingsport-based Mason & Dixon Truck Lines, establishes Southeast Airlines at Tri-Cities Regional Airport, Blountville, Tennessee, in 1956. The intrastate start-up is a subsidiary of the airport’s FBO, Southeast Aviation. The state Bureau of Aeronautics, in hearings conducted late in the year, approves intrastate operations. King, having obtained a required \$250,000 in capitalization, hires a workforce and purchases 5 Douglas DC-3s.

Intrastate flights commence in February 1957. Initial destinations served include Knoxville, Chattanooga, and Nashville. In the spring, Southeast approaches the U.S. CAB for local service routes outside Tennessee. When five potential competitors object, the government regulators consolidate Southeast’s request into its Southeast Area Local Service route case, then pending.

Destinations now served include, from east to west: Tri Cities, Knoxville, Chattanooga, Shelbyville/Tullahoma, Nashville, Clarksville, Jackson, Union City, Dyersburg, and Memphis.

A DC-3 with three crew and seven passengers crashes into Tennessee’s Mount Holston on January 8, 1958; there are no survivors.

As Crown Coach service continues back and forth across Tennessee, King, having received approval from **Delta Air Lines** and **Eastern Air Lines**, approaches the CAB for permission to issue interline tickets and to receive subsidy payments. The government denies both requests. A state subsidy award is received for use in opening additional frequencies from Tri-Cities to Nashville via Knoxville.

The fleet is increased in 1959 by the addition of two Convair CV-240s purchased from **American Airlines**. During the year, one Douglas transport is written off following an accident. Service to Dyersburg, Union City, and Clarksville is suspended as finances crumble. Unable to maintain viability or obtain a last-ditch fiscal bailout from the Tennessee state government, Southeast Airlines (1) closes its doors on August 1, 1960. DC-3 charters are flown for a few additional months as the company undergoes liquidation.

Plans to restart services in 1961 are crushed when the CAB awards its routes to Atlanta-based **Southern Airways**.

SOUTHEAST AIRLINES (2): United States (1962–1976). Irving Jones and Donald Sittman establish the second Southeast Airlines at Miami during the late summer of 1962 to take over the route from Miami to Key West via Marathon abandoned by **National Airlines (1)**. Employing 1 each Beech 18 and Douglas DC-3, daily roundtrip revenue frequencies commence on September 25.

Service over the route is maintained for the next 15 years. During this period, the fleet is expanded by the addition of a Martin 2-0-2A and a Fokker F.27 and the route network grows to include a route from Miami to Freeport in the Bahamas, operated by a Grumman Goose.

Perhaps the most harrowing event in the airline's history is a 1968 hijacking, one of many U.S. to Cuba incidents of the 1960s and early 1970s.

En route from Key West to Miami on June 29, Flight 101, the DC-3 with 17 passengers aboard, is diverted to Havana by a passenger. The aircraft and most of its occupants are allowed to return, but two passengers are retained by the Cubans. One, of course, is the hijacker. The other is Capt. George Prellezo, who had commandeered a Cubana airliner to Florida eight years earlier. Prellezo will be tried and sentenced to eight years in prison; however, he will be returned to the U.S. after just three weeks in jail.

SOUTHEAST AIRLINES (3): United States (1974–1984). Formed at Fort Lauderdale, Florida, in association with **Trans East International Airlines** in 1974, this third-level carrier undertakes scheduled passenger services to the Florida communities of West Palm Beach and Naples, as well as the Bahamian destinations of Marsh Harbour, Governor's Harbour, North Eleuthera, Treasure Cay, and Rock Sound. The flight equipment employed consists primarily of Cessna 402s and Cessna 404 Titans.

Enplanements in the inaugural year total 60,024.

Airline employment in 1975 stands at 75. Passenger boardings drop 27.9% to 46,894. Freight is also down by 27.3%, to 11,000 FTKs.

Operations continue apace in 1976–1979, with declining enplanements. The fleet is upgraded to include 1 Boeing 707-320B, 1 B-720B, and 1 Fokker F.27. In 1977, a Lockheed L-188C is leased for a year from **Eastern Air Lines**.

These planes combine to carry a total of just 27,000 passengers in the latter year.

Higher fuel costs, inflation, and recession combine during 1980–1982 to force the carrier out of the scheduled airline business and into charter work. The larger aircraft are all withdrawn in favor of 1 Embraer EMB-110 Bandeirante, 10 de Havilland Canada DHC-2 Beavers, and 2 Cessna 185s.

In 1983, the company enters into an association with cross-town charter competitor **State Airlines**, officials of which desire to offer scheduled flights. Under terms of the agreement, Southeast's frequencies are offered under the marketing name State Southeast. The association is, however, short-lived as, on the heels of the bankruptcy of **Trans East International Airlines** in November, Southeast itself ceases operations.

Enplanements for the 11 months operated during the year total only 3,122.

The airline files for Chapter XI protection in February 1984. It does not resume flights, being purchased by and merged into **Atlantic Southeast Airlines (ASA)**.

SOUTHEAST AIRLINES (4): United States (1978–1979). This Southeast Airlines is set up at Jackson, Tennessee, in 1978 to offer daily roundtrip shuttle services to Memphis and to Corinth, Mississippi. Although de Havilland DH 104 Dove frequencies are duly inaugurated, they cannot be maintained.

SOUTHEAST AIRLINES (5): United States (1979–1981). The last Southeast Airlines is the reformed scheduled air taxi operator Cat Cay Airlines, first established at Miami in 1959. Taken over by MCA Leasing in early 1979, the renamed company acquires one each former **United Airlines** Boeing B-720-022 and **Pan American World Airways** (1) B-707-321C. These are employed on May 8 to launch scheduled roundtrips to Aguadilla, Puerto Rico.

Government inspectors find the company wanting and it loses its certificate in October. Although scheduled flights cease, charters are maintained on a sporadic basis. By 1981, the two original aircraft are replaced by a leased B-727F, which operates all-cargo charters to Colombia for several months before finally shutting down for good.

SOUTHEAST AIRLINES (6): 12552 Belcher Road, Largo, Florida 33773, United States; Phone 800-222-1201; <http://www.jetsouth-east.com>; Code JX; Year Founded 1999. On June 18, 1997, the

Largo-based discount air carrier **Sun Jet International Airlines** grounds its planes, lays off most of its 145 employees, and prepares to file for Chapter 11 protection the following Monday. Passengers are switched to flights by Detroit-based **Spirit Airlines**. That company operates Sun Jet's flights to Orlando, St. Petersburg, Fort Lauderdale, and Newark.

The carrier keeps its operating certificate active with the government and seeks a rescue package that will allow it to resume operations. Aviation Industries Corporation, led by former owner Thomas Kolfenbach, steps before the U.S. Bankruptcy Court on February 12, 1998 and wins permission to provide debtor-in-possession financing. Although Sun Jet Chairman John Mansouc and his management team are left in place, AIC retains AIBC Investment Services Corporation to advise it as it prepares to recall workers, expedite revalidation of the carrier's fitness certificate with the DOT, and resume passenger charters.

A reorganization plan is filed with the court by March 20. When it becomes a reality, the airline will fly under a new brand name. During the remainder of the year, Chairman Mansouc and President Brooke Mayger concentrate on emerging from bankruptcy, winning back DOT operating approval, and beginning new charter flights.

The DOT finds Sun Jet fit to resume service during the first quarter of 1999. Flights resume from a base at St. Petersburg with a single Douglas DC-9-32 and under the name Southeast Airlines (6). A second DC-9-32 is acquired later in the year. Both conduct deep-discount public charters as well as contract flights from Atlanta to Biloxi, Mississippi, on behalf of various casinos.

Enplanements total 114,000.

Arrangements are completed for the acquisition of two more DC-9s during the spring of 2000. In August, Southeast takes delivery of the two DC-9-31s previously operated by and purchased from **USAirways**. They arrive in colorful liveries that feature the old "Sun King" logo of **National Airlines** (1).

Daily scheduled roundtrip service is inaugurated on October 12 from Atlanta to Sarasota and St. Petersburg, Florida. This is followed on October 26 by the start of daily return flights from Atlanta to Charlotte–Douglas International Airport. Low advance bookings cause the company to indefinitely suspend the new route after its inaugural flight.

With its own North Carolina scheduled service out of the picture, the company accepts a scheduled service contract from flightserve.com, an Internet travel concern that is a subsidiary of the eResource Capital Group. On behalf of its new partner, Southeast launches daily Skysaver Jet Shuttle roundtrips on November 17 from Norfolk, Virginia, to Orlando and New York (LGA). Additional Florida services will be started on January 6.

As the result of a spring law allowing an increase in traffic, New York (LGA) has, by early December, added more than 200 new daily flights and requests have been made that will increase the daily total by almost 600. In an effort to handle an increase certain to exacerbate existing delays and congestion, the FAA and the Port Authority of New York and New Jersey begin coordinated planning while imposing a September moratorium on new La Guardia flights. On December 4, the FAA holds an action to distribute the available takeoff and landing slots. Each carrier serving the airport draws a certain number, with each then choosing lots for first choice of times for those slots. Southeast receives four of the new positions.

In late December, the company initiates six weekly return charter flights year round from Charlotte to Cancún, Mexico, on behalf of flightserve.com subsidiary Internet Aviation Services. Seasonal flights are also offered to Cancún from both Atlanta and New Orleans.

Passenger boardings during these 12 months surge 32.8% to 162,000.

SOUTHEAST ALASKA AIRLINES: United States (1979–1982). Under the leadership of new owner and CEO Paul Breed, Jim Webber's Ketchikan, Alaska-based **Webber Airlines**, founded in 1970, is merged with **Flair Air** in 1979 to form SAA. Employing a mixed fleet of Cessna 185s, de Havilland Canada DHC-2 Beavers, and Grumman G-23 Geese, Breed's carrier continues to provide scheduled passenger and cargo

services linking the Ketchikan base with Juneau, Petersburg, Wrangell, Klawok, Craig, and Hydaburg.

Operations continue apace in **1980–1981**; SEA is purchased by Ketchikan competitor **Tyee Airlines** on December 31, **1982** and merged.

SOUTHEAST CARGO AIR: United States (1984–1992). SCA is set up at Miami in **1984** to operate ad hoc freight charters and contract service flights. Revenue flights begin with a leased Boeing 707-320C and continue into **1992**.

SOUTHEAST COMMUTER AIRLINE: United States (1971). SCA is set up at Mobile, Alabama, in early **1971** to offer scheduled passenger air taxi flights to Montgomery, Pensacola, Dothan, and Birmingham. Beech 18 revenue frequencies are duly inaugurated, but can only be maintained for a few months.

SOUTHEAST PACIFIC AIRLINES, S.A.: Chile (1992–1993). SPA is established at Santiago during the summer of **1992** to offer scheduled domestic passenger and cargo services. Employing a Boeing 737-200 chartered from Polaris Aircraft Leasing Corp., the company begins operations in August.

Unable to achieve viability, the new entrant shuts its doors early in **1993**.

SOUTHEAST SKYWAYS: United States (1968–1982). Dean Williams and Billy Bernhardt found Southeast Skyways at Juneau in Alaska in March **1968**. Employing several Cessna 206s, they begin operations to various nonscheduled destinations in the southeastern part of the state.

In June **1982**, the company is purchased by Jim Shanks and Jim Lindsey and, perhaps inadvertently, takes the same name as the famous CIA-sponsored airline of southeast Asia fame, **Air America**. Shanks and Lindsey sell out to Bob Jacobsen, Mike Fenster, and Drew Haag on November 1. The corporate identity is changed again on February 22, **1983** to **Wings of Alaska**.

SOUTHEASTERN AIRLINES: United States (1982–1983). Southeastern is set up at Huntsville, Alabama, in the spring of **1982** to offer scheduled passenger and cargo services to regional destinations. Employing 1 each Cessna 402 and Embraer EMB-110P1 Bandeirante, plus an Australian-made Government Aircraft Factory (GAF) Nomad N-24A, Southeastern inaugurates daily roundtrips on June 15 linking its base with Gadsden, Atlanta, Memphis, Nashville, Auburn, Tupelo, and Columbus.

Overextended, the company goes out of business in **1983**.

SOUTHEASTERN COMMUTER AIRLINES: United States (1979–1983). Roy H. Hagerty, president of **Coastal Air**, reforms his third-level service at Auburn, Alabama in **1979**. Employing 1 de Havilland DH 104 Dove and 2 Riley Doves, the operator undertakes scheduled passenger and cargo service to Opelika and Atlanta. Flights continue apace into the new decade, losing additional money each year as operating costs, led by fuel prices, increase.

Unable to survive both inflation and recession, the carrier agrees to its takeover by and merger into **Atlantic Southeast Airlines** in April **1983**.

SOUTHEND-ON-SEA FLYING SERVICE, LTD.: United Kingdom (1932–1935). Southend-on-Sea is registered on December 15, **1932**. Services finally begin, in conjunction with Short Brothers, Ltd., on June 9, **1934**, when a Short Scion and a de Havilland DH 83 Fox Moth initiate hourly Southend–Rochester ferry service; frequency is cut to four trips per day as of October 7 and suspended for winter.

During the summer of **1935**, two routes are opened from Allhallows: to Rochester and to Southend, as well as an experimental twice-weekly Rochester–Portsmouth frequency. The company ceases operations on October 26.

SOUTHERN AIR: 4323 Eastpointe Dr., Columbus, Ohio 43232, United States; Phone 614-759-5000; Year Founded 1999. In February **1999**, a group of former **Southern Air Transport** managers and others band together under the name of Devon Partners and announce plans for the creation of a new Southern Air that will succeed their historic pioneer. Capitalization of \$3.4 million is secured and the SAT assets are purchased in March. The reborn airline, under the leadership of President Thomas Gillies, begins the DOT/FAA certification process, applying for the international routes previously operated by SAT.

An 18-year-old B-747-230F is purchased from **Lufthansa Cargo Airlines, A.G.**; it will be wet-leased to other carriers under ACMI contracts until the new Southern can resume its own flight operations. Two more B-747-230Fs are acquired by midyear.

As the year progresses and Southern's government paperwork is reviewed, rival **Kitty Hawk International** opposes the Southern application for the old SAT routes, claiming that the new concern is asking for established routes before it is granted operating authority. This potential breach of the rules is not acceptable and the DOT settles the question in mid-November. Southern is granted its operating permit. However, all certificates and exemption authority held by the defunct SAT are cancelled. Any U.S. carrier may now bid on the routes Southern had hoped would come to it.

ACMI service is continued in **2000**. Following the termination of services by **Kitty Hawk International**, Southern, beginning on May 15, is able to finally operate its own Jumbojet services, in its own colors, over the old KHI routes.

A third B-747F is acquired at the beginning of August; wearing the new "SA" logo on its tail, it begins service on behalf of **Cathay Pacific Airways (Pty.), Ltd.** Plans are now made to start a new hub at Chicago (ORD).

SOUTHERN AIR, LTD.: P.O. Box 860, Invercargill, 9500, New Zealand; Phone 64 (3) 218-9129; Fax 64 (3) 214-4681; Code WK; Year Founded 1978. When an airfield is built on Stewart Island, the amphibious operation undertaken by **Stewart Island Air Services, Ltd.** is changed to a land-based service. To promote this new approach, SIAS is renamed Southern Air, Ltd. on January 28, **1978**. Simultaneously, Chairman W. G. Broughton and General Manager W. M. Norris' new fleet of 1 GAF Nomad N-22B, 1 Piper PA-23 Aztec, and 1 Cessna 402 inaugurate scheduled flights. Frequencies to Dunedin are inaugurated in **1980**.

Services are maintained throughout the 1980s. In **1986**, Keith A. Smith becomes managing director and the fleet is altered. Gone are the Cessnas and Nomad, replaced by three Pilatus-Britten-Norman PBN-2 Islanders. Operations continue through the remainder of the decade and the workforce grows to 22.

Traffic and financial figures become available in 1991 and show a total of 31,000 passengers carried in **1990**. Revenues total NZ\$1.8 million, expenses are NZ\$1.5 million, and the operating profit is NZ\$300,000. Net gain reaches NZ\$1.8 million.

Fiscal results are no longer released, primarily because money is lost as customer bookings decline to 28,000 in **1991**, a figure exactly repeated in **1992**, despite the addition of a fourth Islander.

Operations continue apace in **1993–1998** as Managing Director Smith adds a fourth PBN-2 Islander and several additional Cessna 402s are returned to service. On August 19 of the latter year, a Cessna 402 with 10 passengers crashes while on a flight-seeing tour (4 dead).

Service is maintained without further incident into the new millennium. In March 2000, the company is taken over by **Southeast Air, Ltd.**, who operates Southern as a division.

SOUTHERN AIR FAST EXPRESS (SAFE): United States (1930–1931). Following its purchase by **American Airways** in September **1930**, **Southwest Air Fast Express (SAFEWAY)**, the conglomerate's newest subsidiary, joins with the Robertson division, original recipient

of the Contract Air Mail Route No. 2 (CAM-2) from Chicago to St. Louis, to bid on a new service, CAM-33, Atlanta to Los Angeles.

The two, independent on paper, are duly awarded the new contract on October 15 and in turn sublet it to Southern Air Fast Express, another new AA subsidiary outfitted four days earlier with all of SAFEWAY's Ford Tri-Motors. For a publicity photograph, one of these, Ford 5-AT-29, gives a strength demonstration test later in the month when 32 employees are lined up atop its wing.

SAFE will be renamed **Southern Transcontinental Airways**, half-owned by the AA parent. While the ink dries on the various papers, **American Airways** flies the mail service. A year later, in October 1931, the company is folded into its parent.

SOUTHERN AIR LINES (YUGAVIA AVIATRANSPORTNII KONCERN): 40 Ulitsa Engelsa, Rostov-on-Don, 344700, Russia; Phone 7 (8632) 664 698; Fax 7 (8632) 664 698; Code V4; Year Founded 1992. When **Aeroflot Soviet Airlines** is reformed in 1992, this longtime North Caucasian directorate, based at Rostov-on-Don, becomes a semiautonomous division of **Aeroflot Russian International Airlines (ARIA)**. G. A. Kruglikov is director general and his fleet includes 20-plus Tupolev Tu-154s, 20-plus Tu-134s, 10-plus Yakovlev Yak-42s, 20-plus Yak-40s, 15-plus Antonov An-24s/-26s, and 10-plus An-12s. Passenger and cargo charters are added to other CIS destinations, as well as localities in Asia, Africa, and Europe. Enplanments total 5,327,148.

The 1993 downturn in the Russian economy significantly impacts traffic results. Passenger boardings fall 39.8% to 3,810,550 while freight is down 26.3% to 725 million FTKs. The number of Tu-154s is reduced to 15 in 1994 as the carrier suffers another decline in customer bookings, down 11% to 3.39 million. Cargo falls to 13.1% to 630 million FTKs. The company struggles through 1995 before setting down to success in 1996-1997. The Russian currency crisis, which begins in the summer of 1998, plays havoc with company finances and finally puts the concern out of the passenger business.

AirlinersOnline.com reports, on August 18, 2000, that a new Southern Cargo Air Lines has been formed at Taganrog/Urrt, 43 nm. W of Rostov-on-Don, to operate charters with a single An-12.

SOUTHERN AIR TRANSPORT: United States (1946-1998). Established by Frederick C. "Doc" Moor and Stanley G. Williams at Miami in 1946, SAT has a long and at times controversial history in contract and charter cargo work. Initially the carrier is equipped with one purchased and two leased Curtiss C-46 Commandos and specializes in live-stock carriage. Early services are within Florida and to San Juan, Puerto Rico, and the U.S. Virgin Islands.

The company is formally incorporated in Florida on October 31, 1949. In the 1950s, the carrier is awarded Supplemental status and begins to participate in the USAF LogAir and later, the Civil Reserve Air Fleet (CRAF) program.

A C-46F with two crew must be written off following a hard landing at Dallas on July 19, 1953; there are no fatalities.

In 1960, the MATS requires that all contract carriers in the Far East be certified as both a supplemental and LogAir participant. In need of such an entity to fulfill an MATS contract then being operated by **Air America** from Tachikawa AFB near Tokyo to Pacific destinations, another proprietary, the Pacific Corporation—the covert airline holding company of the U.S. CIA—decides to purchase an existing civilian airline.

A survey of the nation's 18 supplemental carriers reveals Miami-based SAT to be the most agreeable acquisition candidate, particularly as a contingency need is envisioned for airlift capability into South America. With the concurrence of the Civil CAB, DOD, Air America management, and the appropriate CIA bureaus, CIA Director Allen W. Dulles approves the takeover on July 15, authorizing that funds be made available from the budget of Clandestine Services.

The Pacific Corporation purchases indebted SAT, then with an appeal pending for permanent certification before the CAB, for \$307,506.10. With

Moor and Williams remaining corporate officials and nominal half-owners, the company is divided into two divisions. The Atlantic division continues to operate from the company's Miami facilities. The Pacific division headquarters are transferred to Tokyo's Tachikawa AFB. Meanwhile, Pacific Corporation guarantees a \$6.6-million loan to SAT from private bankers.

In Japan, the operator is reequipped with 3 Douglas DC-6s paid for with a \$6.7-million loan obtained via the CIA proprietary company Actus Technology and transferred from the CIA airline **Air America**. SAT begins to fly military personnel and charter cargos on October 1 to various Oriental destinations, especially Okinawa, where a large CIA supply base is maintained. By year's end, the value of assets rises from \$100,000 to \$2.5 million, debt is gone, and a \$75,000 profit (all above board from military contracts) can be reported.

Over the next 13 years, SAT undertakes both legitimate and "black" flights on behalf of its secret owners. The latter entail the unheralded transfer of arms from the CIA's Okinawa supply center to secret bases in India, Thailand, and elsewhere. The fleet is increased by the addition of three more DC-6s.

During the April 1961 Bay of Pigs invasion of Cuba, a Dominican-registered Consolidated PB5-5A is converted by the airline into a communications center at Miami and is used by the CIA under the code name Swan Island. A C-46 crashes at Point-à-Pitre in the French West Indies on July 11, 1962.

In April 1966, Southern is one of 10 supplementals to obtain permanent certification and on September 30 the CAB grants Caribbean and Pacific scheduled all-cargo operating authority. Revenues publicly reported for the year are \$7,539,281. Operating expenses are \$6,830,257 and the net profit is \$379,205.

Revenues in 1967 jump to \$16,518,465. Profits are also up: \$1,558,366 (operating) and \$1,267,833 (net).

In 1968 it is decided that in order for the airline to compete more effectively for military contracts (often legitimate, but sometimes used to cover secret operations), SAT must have two Boeing 727-92Cs. These are delivered and give every outward appearance of being normal "three-holers," but are in fact covertly modified to allow airdrops, a capability never employed.

One of these is loaned in January to **Civil Air Transport (CAT)**, another CIA proprietary, which crashes it on Taiwan on February 16 (21 dead). During the year, two Lockheed L-100-20 freighters are placed into service, making SAT the first operator of the commercial Hercules.

Revenues for the year are down to \$10,369,865. Profits are the smallest in years: \$102,513 (operating) and \$87,845 net.

The fleet in 1969 comprises the 2 Boeings, 2 L-100-20s, 1 DC-7C, 3 DC-6A/Bs, 2 DC-4s, and 2 C-46Fs.

Revenues are \$11,044,960. Although a \$147,190 operating profit is earned, a \$1,470 net loss is taken.

In 1970, income declines to \$10,789,552 as the number of legitimate contracts flown is, along with the carrier's Indochinese involvement, reduced.

The operating profit falls to \$96,445, but a \$50,820 net profit is realized.

Out of 10 U.S. supplemental carriers in 1971, SAT is the ninth largest, flying 23.59 million freight ton-miles. That number declines in 1972, down by 2.19% to 23.16 million. A total of 39,000 charter passengers carried are and the workforce is 155.

Meanwhile, on April 2, CIA Director William E. Colby authorizes the divestiture of CIA ownership and control, beginning with the immediate elimination of the carrier's Pacific division and sale of the two Boeings. In May, two CIA officials meet with CAB officials to determine the best way in which to disengage the agency from the carrier. As a result of this conference, CIA determines to sell the carrier to its current management.

Income is bolstered by operation of a \$2-million, 6-month relief operation to Bangladesh on behalf of AID. FTKs flown are 33.82 million. Overall income reported on CAB Form 41 is \$8.17 million and expenses are \$8.31 million. Consequently, a \$141,000 operating loss is absorbed. On the other hand, a net profit of \$51,000 is posted.

On January 19, 1973, the CIA director officially approves the sale of SAT to its current management. SAT's board of directors, on February 28, executes corporate action on the sale agreement. On March 1, a petition for approval of the sale is filed with the CAB. Once the proposed arrangement is opened to public inspection, other supplemental airlines step forward to object; the CIA makes known its position that failure of the sale will mean the company's dissolution. Still, SAT remains the target of complaints to the CAB from potential competitors, which attack the airline's growth through "illegal" government subsidies.

On July 31, the CIA director orders SAT's dissolution; however, the current management steps forward with a new plan. It will remove itself from CAB jurisdiction by relinquishing its supplemental status and fly as a Part 121 operator. As CAB approval would not be required in such a case, the CIA agrees, on October 1, to this new arrangement, pending the purchaser's ability to obtain prompt financing.

Four days later, a new sale agreement is executed. On November 29, the First National Bank of Chicago agrees to loan the purchaser \$4.5 million and the sale is closed on December 31. SAT is sold back to its original owners for \$2,145,000. Following repayment of a \$3,125,000 **Air America** loan, SAT has \$8.1 million in assets and \$868,490.09 in liabilities. All-cargo service is resumed from Miami to Puerto Rico and the U.S. Virgin Islands. The number of FTKs flown declines by 32.58% to 22.8 million and 22 employees are laid off.

A dispute over a clause in the contract forces arbitration between SAT and **Air America** on January 25, 1974. A civil suit filed in March by a group of SAT employees, which disputes the propriety of the airline's sale by the CIA, is dismissed by a federal court "with prejudice" on July 17. After eight months of discussion, the arbitrator rules in favor of **Air America** on September 5 and SAT is required to pay the CIA an additional \$1,304,243.

All of these acquisition and disposal details will be examined in 1975 by the U.S. Senate's Select Committee to Study Government Operations with Respect to Intelligence Activities, also known as the Church Committee for its Chairman Sen. Frank Church. Results will be published in Book 1 of its 1976 *Final Report*.

During the civil war in Angola, SAT is often contracted to fly in munitions and various other supplies.

Operations continue apace in through 1977-1978 and President Stanley G. Williams oversees a workforce of 75 and operates a fleet of 1 Lockheed L-100-30 and 1 L-100-20 Hercules freighters. During the latter year, some 42% of all contract work is flown on behalf of the Iranian Air Force. Losses total \$272,928.

James H. Bastian, who had been the company's legal counsel during its years as a CIA proprietary company, becomes sole owner and chairman in 1979. The fall of the Shah of Iran's government has a significant impact on company traffic and revenue figures. FTKs operated have declined since mid-decade and total 14.28 million in 1980.

The fleet in 1981 includes 1 DC-6A, 3 L-100-30s, and 1 DC-8-21F. In May, **CASAIR (Caribbean Air Services)** is reconstituted by SAT's owners to fly DC-3 and DC-6 scheduled cargo flights in the eastern Caribbean from a base at San Juan.

Overall, FTKs operated skyrocket 73.4% to 24.76 million.

On December 28, 1982, the CAB revokes the company's scheduled operating permit; however, the one for military charters granted in 1960 is retained.

Freight traffic totals 16.47 million FTKs and revenues are \$9.8 million. Despite the generation of a \$628,700 operating profit, the company suffers a net \$111,000 loss.

William G. Langton, former executive of **The Flying Tiger Line** and **Evergreen International Airlines** becomes president in 1983. Cargo plunges 28.3% to 12.84 million FTKs.

Despite the traffic downturn, the year is financially successful. Operating income climbs 18.7% to \$11.64 million while costs rise 11% to \$10.18 million. Consequently, the operating profit jumps to \$1.45 million and a pleasing \$614,000 net gain is reported.

Airline employment grows 38.5% in 1984 to 180 and the fleet comprises 6 Lockheed L-100-30 Hercules. After appeal, SAT suspends its scheduled flights to Puerto Rico and the Virgin Islands, continuing to operate worldwide all-freight and contract service flights. A total of \$9.1 million in contracts is won from the USAF MAC. Much of this funding will cover the commitment of up to eight L-100s on daily shuttle flights between continental U.S. military bases.

Additionally, the once and future covert operator becomes a feeder operator for **UPS (United Parcel Service)**, as the latter expands its flight operations.

The carrier's largest private account is accepted from IAS-Guernsey, Ltd., an Anglo-Irish firm that has been contracted to provide cargo services for the Marxist government of Angola. As the flying subcontractor for IAS, SAT operates 296 flights into Luanda between June and December. Cuban soldiers are passengers on some of the services.

Largely as a result of these new arrangements, the carrier is able to boost its cargo traffic by a whopping 477% to 74.05 million FTKs. The year's profits are \$4.17 million (operating) and \$1.84 million (net).

The payroll is increased by 38.9% in 1985 to 250 and the fleet includes the 16 Hercules freighters plus 8 B-707-320B/Cs. Under contract to the shadowy U.S. National Security Agency subgroup "The Enterprise" operated by Maj. Gen. Richard Secord, USAF (Ret.) and USMC Lt. Col. Oliver North, the carrier in January undertakes a contract for munitions flights from Portugal to Guatemala, munitions destined for the Nicaraguan Contras.

President Langton seeks to increase the company's military work and undertakes freight haulage for the U.S. military's LogAir and Quicktrans systems. An additional \$23.4 million worth of MAC contracts is received.

In May, three B-707-369Cs are purchased from **Kuwait Airways**; flown to Miami during July and August, they are outfitted with Tracor hush kits before joining the fleet.

According to an account in the August 1, 1990 issue of the *Miami Herald*, in October, Richard Gadd, an associate of North and Secord, requests SAT President Langton to dispatch Senior Vice President Robert Mason to Panama. There, he is to set up Amalgamated Commercial Enterprises (ACE), whose main purpose is the establishment of a commercial bank account through which funds may be funneled for the purchase of supplies for the Contra network. Mason will later contend that the funds SAT expends for supplies are reimbursed.

Flights on behalf of IAS-Gurnsey, Ltd. into Angola continue during the year, as the carrier makes 579 flights for the Irish concern. Following a warning from the DOS, SAT stops offering passage to Cuban troops. In addition, L-100s perform 105 services into the Angolan port city of Benguela on behalf of the U.S. government.

SAT is contracted in November to fly a shipment of American arms between Israel and Iran via Portugal. Security for the arrangements made by Iranian arms dealer Manucher Ghorbanifar, which are supposed to have been kept secret, is compromised and information concerning the flight is reported in the press, bringing a measure of embarrassment to all of the governments concerned.

The total number of FTKs operated decline by 24.8% to 55.68 million. Revenues jump 29.9% to \$38.58 million, costs climb 26.5% to \$32.25 million, and a \$6.33 million operating profit is generated. Net profit doubles to \$3.92 million.

Operations continue apace in 1986 as the number of LogAir and overnight express flights is increased. The company now also undertakes monthly flights to Havana on behalf of the State Department's U.S. Interests Section.

As the result of a Sandinista incursion into Honduras in March, the Honduran government requests aid from the U.S. A grant of \$20 million in military aid is authorized to Honduras, along with an airlift contract for transport. Meanwhile, the DOS is authorized to provide "humanitarian" assistance to the Contras; Lt. Col. North establishes the Nicaraguan Humanitarian Assistance Office (NHAO) to provide airlift services, which are contracted out to SAT.

At the end of March, the carrier's Hercules freighters begin flying from Washington, D.C. (IAD) and New Orleans down to the Contra airfield at Aguacate, Honduras. Thereafter, they also undertake NHAO flights to Ilopango and beginning in April, airdrops over Nicaragua.

Just after takeoff from Kelly AFB at San Antonio on October 4, Flight LOG51, an L-382G with 3 crew, having reached an altitude of 700 ft., banks left in a roll and dives into the ramp area in an almost inverted attitude, sliding between two hangars and exploding. There are no survivors.

Under the direction of Gen. Secord's lieutenant Robert C. Dutton and SAT management, Corporate Air Services, which has hired a number of former **Air America** and Cuban exile pilots, undertakes covert aerial supply drop missions to the Contras in 1987. Project Democracy flights from Costa Rica to Nicaragua are undertaken by de Havilland Canada C-7 Caribous and Fairchild C-123 Providers.

While landing after a training flight from Fairfield-Travis AFB, California, on April 8, Flight 517, an L-100-30 with five crew, loses power and smashes into the airport perimeter fence; all aboard are killed and the aircraft must be written off.

On August 21, SAT pays \$86.4 million to purchase the entire 11-unit Hercules fleet of **Transamerica Airlines**, raising the number of its airplanes to 12 hush-kitted B-707-320QCs and 17 L-100-30s.

During September, Project Democracy aircraft drop 185,000 pounds of supplies in Nicaragua in 10-15 missions.

On October 5, a Fairchild Provider is shot down over the jungles of northern Nicaragua and "kicker" Eugene Hasenfus is the only one of four crewmen to survive (he is the only one wearing a parachute). Captured by the Sandinistas, Hasenfus claims that his plane had been hired by the CIA. Following this claim, the U.S. covert air operation in support of the Contras is compromised and media exposure helps to unravel the so-called Iran-Contra Affair. Later in the month, Lt. Col. North is able to intervene with the DOJ and convince it to abandon an investigation it is about to launch into the activities of SAT.

Freight traffic increases to 392.5 million FTKs and revenues skyrocket 74.5% to \$119.5 million. The latter figure allows the controversial airline to advance from the ranks of the large regionals to national status. Profits total \$15.17 million (operating) and \$7.62 million (net).

The workforce is increased by 8.1% in 1988 to 683. Two more Stratoliner freighters are acquired. A variety of government contracts are undertaken to provide L-100 relief flights to various famine-plagued African destinations, including Kenya, Uganda, and Ethiopia. Seven Hercules freighters are assigned to what was once labeled as the "Dark Continent," flying for such international relief organizations as the International Committee of the Red Cross and Caritas, the Catholic relief agency.

The carrier is also the first to employ the Hercules to spray insecticide, again on African contract, in Senegal and Morocco, and the first to land relief supplies in Soviet Armenia following the December earthquake.

Freight traffic grows by only 0.7% to 397 million FTKs, but revenues increase 17.82% to \$140.81 million. Costs are held to a 14.5% increase, \$119.47 million, and allow operating income to reach \$21.34 million. Net gain grows to \$9.93 million.

Airline employment grows again in 1989, up 12.4% to 770. The fleet is dramatically increased to include 1 Boeing 707-311C, 3 B-707-321Cs, 1 B-707-399C, and 2 B-707-338Cs leased from **Burlington Air Express** in support of a contract with that operator. Also included are 1 B-707-321C and 1 B-707-338C leased from and operated for **CP Air Freight, Ltd.**, 3 B-707-369Cs, 2 Lockheed L-382Es, 15 L-382Gs, including 3 (representing an entire fleet) leased from **Globe Air**, and an L-1329 Jetstar 6. SAT is now the world's largest commercial operator of both the Stratoliner and the Hercules.

The FAA officially grants the carrier authority to airdrop food and supplies and it becomes the first U.S. airline to operate such relief missions on behalf of the Red Cross.

Despite much activity, freight traffic is essentially flat, growing only a slight 0.4% to 399 million FTKs. Revenues rise 3.4% to \$145.59 million. Costs, however, climb more quickly, by 10.5% to \$132 million, cutting the operating profit to \$13.6 million. Net profit falls to \$5.9 million.

The number of employees grows by 3.9% in 1990 to 800 as the Jetstar 6 is withdrawn. Cooperation with **Japan Air Lines Company, Ltd.** (2) is strengthened during July when a weekly joint Chicago to Tokyo air freight operation is initiated.

During the spring, SAT is contracted to provide three Hercules freighters in support of the Kutubu Project in Papua New Guinea; the L-100s begin to haul massive amounts of supplies and equipment in support of one of the most important oil discoveries ever on the Pacific Rim.

At the end of July, Eugene Hasenfus and the family of deceased airman Wallace Sawyer, who were shot down over Nicaragua on October 5, 1986, file suit against SAT and retired USAF Gen. Richard Secord. The suit contends that they misled the crew of the C-123 that was sent into dangerous territory with faulty equipment and that SAT should be held responsible for damages because the Miami-based airline employed a series of companies, such as ACE, to shield its covert Contra involvement from scrutiny.

While climbing away from Juba, Sudan, on August 12, the No. 4 engine of an L-100-30 with four crew and a passenger loses power, followed by problems with the No. 1 and 2 engines. A safe emergency landing is made back at the point of origin; however, the Hercules runs off the runway, stopping against a row of sea containers.

Cargo traffic declines a slight 0.6% to 396.68 million FTKs, but revenues swell 4.7% to \$152.5 million. Expenses are only up 1.14% to \$133.47 million and allow an operating profit of \$19.02 million. Net gain balloons to \$22.56 million.

The employee population is not significantly changed in 1991. One L-382G and one L-382E are withdrawn and the first two of six chartered Douglas DC-8-71F is acquired from GPA Group, Ltd. in February. The **CP Air Freight, Ltd.** charter is concluded and the Canadian operator's aircraft are returned. Lockheed's Hercules flight training center is purchased and in May SimuFlight, a simulator training facility based at Tampa, is purchased from bankruptcy.

An L-100-20 with five crew strikes a land mine while taking off from Wau, Sudan, on September 2 and crashes; there are no fatalities.

The **Burlington Air Express** contract is concluded and all of that operator's B-707-321Cs and B-707-338Cs are returned. On charter, one more L-382G and four additional DC-8-71Fs are obtained.

Freight traffic declines by 13.1% to 344.71 million FTKs; however, revenues move upward by 14.65% to \$174.85 million. Expenses jump 17.3% to \$156.57 million and guarantee operating income of \$18.98 million. Net profit jumps to \$26.41 million.

Company employment is cut by 25% in 1992 to 600. Two DC-8-71Fs are replaced by a leased DC-8-73CFs.

On January 17, the company acquires all three of the Lockheed L-100-30 cargo planes previously operated by the Alaskan carrier **MarkAir**. Painted in SAT's black, white, and gray colors, two of the aircraft will be wet-leased back to help **MarkAir** operate a \$5.6 USAF contract, received the same day, to ferry cargo and passengers from Elmendorf AFB to Galena, King Salmon, Atka, Shemya, and Amchitka.

The downward spiral in cargo traffic continues with FTKs operated sliding to 234,442. Revenues drop 20.9% to \$138.31 million, but expenses fall 15.9% to \$131.74 million. As a result, operating profit is reduced to \$6.57 million and net gain drops to \$4.93 million.

Recognized as a specialist in the delivery of outsized cargo to bush areas where normal air transport does not exist or landing surface conditions are inappropriate, Chairman Bastion and President Langton oversee a workforce of 395 in 1993, a 34.2% decline from the previous year. Ad hoc/contract services are also offered to other cargo companies, airlines, and governments. In the spring, a minority interest is assumed in the Seattle-based freight carrier **Polar Air Cargo**.

B-747-100Fs will be chartered to the new entrant for use on long-haul cargo flights to Asia and Ireland, which will be made on the basis of the SAT certificate.

A new Corporate Aviation Services division is established in August to provide support services for operators of bizjets. Landing and overflight

permits, contract fuel, weather services, computerized flight plans, and a worldwide high-frequency radio network will all be offered; if needed, CAS will also arrange for catering, ground transport, and hotel accommodations.

The support contract for the Kutubu Project in Papua New Guinea ends during the year.

Cargo traffic climbs 36% to 326.91 million FTKs and revenues plunge 13.6% to \$119.45 million. Expenses are also down, by 10.3% to \$118.23 million and allow operating income of \$1.22 million. Net gain also declines, to \$1.84 million.

Airline employment increases 51.9% in 1994 to 600. In late January, the company offers the oil industry locally based, specially outfitted transports that can be quickly placed into service to fight oil spills. Equipped with the Biebert Aerial Delivery Dispersal System, one each L-100 is stationed at Anchorage and London (CTN); the aircraft are able to fly regional cargo services when not required for special duties.

The last two B-707-369Cs are withdrawn from service early in the spring and in July, the first of three chartered Jumbojet freighters reports for duty, a B-747-273C leased from **Evergreen International Airlines**. It is employed on a long-term contract from Aeroflora of Colombia to make daily roundtrip flights transporting fresh flowers for the U.S. market from Bogota to Miami.

A contract is now accepted to fly cargo on behalf of **Air India, Ltd.** A Douglas DC-8-73, repainted in **Air India Cargo** livery but with the "S" logo on the tail, is placed on the service in August, flying pallets westward from Indian cities via the Mideast to Zurich and Brussels and hence, via Gander, to New York (JFK). Upon receipt of a second DC-8-73F in September, it is also committed to the weekly Indian service, flying on behalf of **British Airways, Ltd. (2)**.

On October 24, a three-year contract is received from International Enterprise Group to operate twice-weekly, all-cargo roundtrips from Miami to Buenos Aires and Santiago de Chile.

Two additional leased Jumbojet freighters are put into service later in the year, one each B-747-212BC and B-747-246F, and these undertake the International Enterprise Group commission.

Freight traffic skyrockets 91.5% to 624.61 million FTKs and the year's revenues advance by 40.5% to \$167.79 million. Expenses are only up 33.5% to \$157.87 million, leaving an operating surplus of \$9.91 million and net profit of \$8.95 million.

There is no change in the workforce during 1995. In March, the State of Ohio begins to woo the airline, promising it certain tax advantages if it will move to its capital city Columbus. SAT agrees, in return for economic incentives, to make the move over a three-year period.

It is announced on May 29 that **Japan Air Lines Company, Ltd. (2)** will, during high traffic periods, turn over a portion of its cross-border cargo business to SAT. It is estimated that the Japanese company will save up to 10% over the cost of operating its own aircraft by wet-leasing needed capacity elsewhere.

A contract is entered into with **Japan Air Lines Company, Ltd. (2)** and in July weekly B-747-212F services are inaugurated on its behalf from Tokyo (NRT) to the U.S.

In August, a DC-8-73F is leased from **Challenge Air Cargo** via GPA for eight months. During the summer, the company begins to move certain of its administrative staff to temporary facilities it has purchased at Rickenbacker Air Industrial Park; some aircraft maintenance operations are performed in a renovated military hangar. Plans are announced for the construction of a \$35.8-million, 180,000-sq.-ft. facility on 30 acres at Rickenbacker during the following year. When up and running, the SAT complex is expected to provide 300 additional jobs for Ohioans.

It is announced in Columbus by *The Daily Reporter* on October 23 that the Ohio Job Creation Tax Authority has granted SAT a \$1.79-million tax credit to attract its corporate and maintenance offices from Miami (MIA) to the city's Rickenbacker Air Industrial Park. In addition, other incentives are also reported. These include a \$212,000 Franklin County grant for infrastructure improvements, \$300,000 in job recruitment services from the Ohio Bureau of Employment Services, a \$400,000 jobs training

grant, \$5-million direct loan, and \$500,000 grant from the Ohio Department of Development.

At the beginning of November, four Lockheed L-100 Hercules freighters are leased to **UPS (United Parcel Service)**; repainted in UPS colors, they will provide extra capacity into smaller airports for the upcoming holiday season.

Also in November, the company provides the aviation media with an inventory of its aircraft contracts. Of its 18 Hercules, 3 are employed by the USAF, 1 is on emergency standby and cargo duties for the North Sea oil industry while another performs similar duties out of Anchorage, 8 support relief activities in Africa, and 5 are available for ad hoc assignment. The two DC-8-73Fs continue to operate charters to India.

A total of 844.02 million FTKs are operated, a 35.7% increase. Revenues slightly exceed expenses and there is an operating profit of \$445,000. A net \$2.6-million loss is suffered.

The employee population remains the same in 1996. On January 2, SAT L-100 Hercules freighters begin a 90-day contract for Houston-based Brown & Root Services Corporation to fly supplies and equipment from Zagreb, Croatia, to Tuzla, Bosnia-Herzegovina. These will be employed to build a road into Bosnia that will be employed by a force of 20,000 U.S. soldiers in the NATO Implementation Force (IFOR).

In a highly visible operation conducted on January 7, one of the L-100 Hercules freighters leased to **UPS (United Parcel Service)** is employed to transport the "killer whale" Keik, star of the *Free Willie* films. After a 9 1/2-hour flight from Mexico City via Monterrey, Mexico, and Phoenix, the Orca is placed in a custom-designed tank at the Oregon Coast Aquarium in Newport, Oregon.

On February 10, Oil Spill Response, Ltd., a subsidiary of **Air Foyle, Ltd.**, contracts with SAT to provide assistance in dispersing oil slicks up to 12 miles long off the Welsh coast. The slicks had been caused from the loss of an estimated 19 million gallons of light crude oil leaked from a stranded tanker. An SAT L-100-30 on February 11-12 flies three missions spraying dispersant on slicks off Milford Haven and across Carmarthen Bay in southwest Wales.

Ironically, a client's spill of toxic mercury in the cargo hold of a company B-747F at the end of the month renders the plane useless.

On April 30, SAT receives DOT authority to employ its two leased B-747-246Fs over the dormant **USAfrica Airways** routes to South Africa. The previous month, in an effort to block the award, the U.S. District Court for the District of Delaware at the request of **Tower Air** issued a temporary restraining order. This order is now withdrawn and within weeks the Jumbo freighters will commence twice-weekly roundtrips from Columbus via New York (JFK) to Johannesburg and Cape Town with a non-traffic technical stop at Sal Island.

On May 8, the Ohio Department of Development awards the airline another \$500,000 grant for the purchase of equipment in connection with the construction of its new headquarters facility.

On May 15, the DOT awards SAT authorization to undertake two additional roundtrips to South Africa. When the flights commence in early fall, they will operate from Columbus to New York (JFK) and from there via Luanda (Angola) to Johannesburg and Cape Town.

Also in May, **Challenge Air Cargo** leases a B-767-34AFER from **UPS (United Parcel Service)** on a month-to-month basis. The wide-body, which replaces a DC-8F previously leased from SAT, will be employed to operate weekend all-cargo services from Miami (MIA) to Venezuela and Brazil.

In an executive session of the Rickenbacker Port Authority board on June 5, SAT spokesman David Sweet informs the lawmakers that, because it has a shortage of Jumbojet freighters (only two are currently available), portions of the company's three-year transition plan must be delayed. Groundbreaking for the \$180,000-sq.-ft. hangar facility must be put off until the spring of 1997.

During late spring and summer, the company continues its piecemeal relocation from Miami to Rickenbacker AFB, Ohio; a company press release indicates that the move is made because Columbus is with 800 km. of the entire U.S. population.

Cargo traffic drops 10.9% to 752.1 million FTKs. Financial figures are provided through September. Costs of \$118.62 million are less than operating income of \$119.93 million; the operating gain increases to \$1.31 million, but the net loss deepens to \$2.8 million. It will later be reported that revenue income for the whole year is just \$164.5 million.

The fleet at the beginning of 1997 includes 2 leased B-747-246Fs, 1 chartered B-747-212F, 3 leased DC-8-73Fs, 1 chartered DC-8-71F, plus 1 owned L-382E and 14 owned L-382Gs.

During the spring, an L-382G is contracted to transport mining supplies and fuel in support of a copper mining program being undertaken in Tabubil, Papua New Guinea. The groundbreaking in Ohio is again postponed and will never, in fact, occur.

On July 11, an interline agreement is signed with **Japan Air Lines Company, Ltd. (2)**. Under its terms, twice-weekly JAL flights from Tokyo (NRT) to San Francisco will offload their goods to an SAT aircraft, which will deliver them to Dallas (DFW) the next day. The service replaces the current Tokyo-Atlanta offering, which requires truck transport from the Georgia hub to Dallas (DFW).

In August, it is revealed that the company will postpone its expansion plans until the year 2000 to allow for an increase in the Jumbojet freighter fleet to nine planes. With Hercules-required relief flights fewer in number, efforts are pressed to sell off the L-382 fleet.

On August 19, a contract is signed with **Cargolux Airlines International, S.A.** to serve eight cities from a Luxembourg base, including Huntsville, Alabama, Miami, and Bradley, Connecticut, as well as cities in Scotland, Mexico, Colombia, and Venezuela.

During December, the company purchases a B-747-249F from **Northwest Airlines**.

A total of 221.4 million FTKs are operated, a gigantic 70.6% decline. Operating revenues slide 2.8% to \$159.82 million, while expenses rise 6.6% to \$173.92 million. The previous year's operating gain becomes a \$14.1 million loss, while the net loss deepens to \$17.7 million.

While landing at Mekoryuk, Alaska after a January 10, 1998, flight from Anchorage, an L-382G Hercules with four crew crashes; although the aircraft is badly damaged, no injuries are reported.

The new Jumbojet freighter is delivered to Southern's Miami hub in January. Under contract to **South African Airways (Pty.), Ltd.**, the aircraft quickly relocates to New York (JFK) from which it begins thrice-weekly all-cargo flights to Johannesburg, via Amsterdam and Lagos.

Following a massive February 4 earthquake in the area of Rustaq, Afghanistan, a city located near the country's northern boarder, the company is contracted by the International Committee of the Red Cross to fly relief missions. A Hercules freighter and two flight crews are dispatched to Peshawar, Pakistan, from which the huge turboprop will fly relief missions, dropping palletized, bagged supplies in 18,000-lb. deployments from 700 ft.

Beginning on March 7, an L-382G Hercules is sent to Trujillo, Peru, on contract to Minera Yanacocha, S.A., a subsidiary of Newmont Gold, the second largest gold producer in the world. Over the next 45 days, the freighter will fly diesel fuel 5 times daily into the mining base at Cajamarca. The aerial operations replace road transport, which has been made impossible by the heavy rains in the area caused by El Nino.

Under terms of a second subcontract signed with **Japan Air Lines Company, Ltd. (2)** on March 24, a B-747-212F is employed, beginning on April 1, to offer weekly all-cargo roundtrips between Tokyo (NRT) to the U.S.

By the end of the second quarter, five Hercules freighters have been sold under the crash program to dispose of the turboprop freighters. Also in June, the Rickenbacker maintenance facility is shut down, with 110 employees laid off.

On July 22, **Fine Air** executes a letter of intent to acquire SAT. The acquisition is expected to be completed within 90 days, subject to the satisfactory completion of due diligence, receipt of all necessary regulatory approvals, and certain other conditions, including board approvals. Fine has plans to continue its new subsidiary as a separate company, which will, in turn, lease its five B-747-200Fs to other carriers. Three

would be taken by Fine itself for use on its expanding Latin American services.

In the month afterwards, both parties work together in an effort to develop an acquisition plan that will be effective for both companies. A major stumbling block occurs when SAT is unable to find a buyer for the remainder of its fleet of Lockheed Hercules freighters, which Fine does not want to acquire.

Unable to find a way to dispose of the Lockheeds, an agreement is not reached; both parties elect to explore other business opportunities and terminate their acquisition plans on August 24.

Just after it has extricated itself from due diligence under a letter of intent for its acquisition by **Fine Air**, Southern signs a nonbinding letter of intent to be taken over by **Kitty Hawk Airways**. If completed, the acquisition will be made for a combination of cash and stock and indemnities against certain SAT lease obligations. Kitty Hawk will not get the SAT fleet of Lockheed Hercules aircraft which, with their related parts and equipment and associated debt, will be transferred to another entity before closing.

Again, the transaction is expected to be completed within 90 days, subject to the negotiation and execution of a definitive purchase agreement, receipt of regulatory approvals, and satisfaction of closing conditions.

Unable to reach a definitive agreement, once more because of the Hercules fleet, discussions for the acquisition of SAT end on September 14. The press release issued the next morning indicates that there are no penalties or fees for either side associated with the breakdown.

Three tires are blown as a B-747-200F takes off from Miami (MIA) on September 21. The aircraft makes a safe emergency landing back at its point of origin, but is parked.

On September 24, the company informs its clients that financial problems will cause it to shut down. Company employees are made aware of the bleak situation on September 25, the same day 450 of their number nationwide, including flight crews, maintenance workers, and support personnel, are laid off. Some 30 workers are kept on at headquarters. At the same time, the three operational B-747-200Fs are ferried back to Columbus and the remaining L-382Gs are sent to a facility at Marana, Arizona.

When the historic carrier shuts its doors on September 26, over 800 creditors, including the State of Ohio, begin lining up for payment of outstanding debts.

SAT files for Chapter XI bankruptcy protection on October 1 in U.S. Bankruptcy Court for the Southern District of Ohio. Assets of \$111.3 million are listed, with liabilities of \$103 million. The Lockheeds are eventually sold, mostly in Africa, and although no plans are immediately announced for either reorganization or a resumption of services, the company homepage on the Internet's World Wide Web remains active through the end of December.

In February 1999, a group of SAT managers and others band together under the name Devon Partners and announce plans for the creation of a new Southern Air that will succeed their historic pioneer. Capitalization of \$3.4 million is secured and the SAT assets are purchased in March. The reborn airline, under the leadership of President Thomas Gillies, begins the DOT/FAA certification process, applying for the international routes previously operated by SAT. An 18-year-old B-747-230F is purchased from **Lufthansa Cargo Airlines, A.G.**; it will be wet-leased to other carriers until the new Southern can resume its own flight operations.

SOUTHERN AIR TRANSPORT SYSTEM: United States (1929-1930). Tennessee financier A. P. Barrett, who had purchased and reformed **Texas Air Transport** in November 1928, with the assistance of his Vice President/Treasurer Cyrus R. ("C. R.") Smith, forms SATS on March 31, 1929, incorporating it under the laws of the state of Delaware. The operation, which may have been modeled on the **Universal Air Lines System** of **Universal Aviation Corporation**, has a number of divisions, including three airline subsidiaries: **Texas Air Transport**, which maintains its CAM-21 and CAM-22 mail routes; **Texas Flying**

Service, the former TAT passenger division; and **Gulf Coast Airways** (formerly **St. Tammany-Gulf Coast Airways**), a new acquisition.

CAM-32 from Atlanta to New Orleans and CAM-29 from New Orleans to Houston routes are continued under the St. Tammany name. All passenger work is turned over to a combined TFS-St. Tammany division christened SAT Flying Services, which employs Fokker Model 8 Super Universals, Curtiss Robins, and Travel Air 6000s over the El Paso–Dallas–Houston–Brownsville multistop network.

In May, Barrett sells controlling interest to the Aviation Corporation (AVCO), but continues to operate his system under its previous name. On May 16, the company's Fokker Model 8 Super Universal makes a nonfatal crash landing during a storm into the Delaware Mountains of Texas. While flying over Bogalusa, Louisiana, on September 1, pilot W. A. McDonald's Curtiss Robin, with two passengers aboard, suffers a wing failure, but safely crash-lands.

In the fall, passengers on the Dallas–El Paso route are provided with box lunches; the promotional sandwiches, taken aboard at Big Springs, prove quite popular with travelers. A Pitcairn PA-5 of the St. Tammany-Gulf Coast subsidiary crashes upon takeoff at Galveston, Texas, on November 14. The wreck is put on a truck for Dallas, but catches fire and is destroyed with its transport at Bremond. Preparing to land at Amarillo from a December 30 sight-seeing tour, the Travel Air 6000B piloted by station manager Robert Gray crashes (five dead).

On January 25, 1930, **American Airways** is formed as AVCO's principal operating subsidiary through the expedient of a stock exchange between the new entrant and the holding company's subsidiaries. Consequently, SATS receives 2,074 shares in AA and is now both a stockholder and a division. The Southern story is finished under the **American Airlines** entry.

SOUTHERN AIRLINES (PTY.), LTD.: Australia (1955–1958). Southern is founded at Adelaide in the late fall of 1955. Equipped with de Havilland DH 104s and DH 114s, it undertakes services on December 12 to a variety of Victoria destinations, as well as several on Tasmania, King and Flinders Islands. Unable to maintain a level of traffic sufficient to turn a profit, the carrier ceases operations in October 1958.

SOUTHERN AIRLINES AND FREIGHTERS (PTY.), LTD.: Australia (1937–1938). Southern Airlines and Freighters is founded at Sydney on July 30, 1937 to take over the routes and assets of **Intercity Airways (Pty.), Ltd.** Employing the predecessor airline's Gannet aircraft, it continues the twice-weekly Sydney–Broken Hill flights via Nyngan begun in November 1936. Broken Hill–Mildura service is undertaken on August 9, but lack of traffic forces suspension of the route on September 17.

Unable to continue operations due to significant traffic and financial downturns, Southern is forced into liquidation on February 9, 1938.

SOUTHERN AIRLINK: 12 Third Street, Bay Springs, Mississippi, 39422, United States; Phone (888) 835-9535; Fax (601) 764-2564; Year Founded 1996. SA is established at Thigpen Field at Bay Springs in 1996 to provide executive and small group passenger flights throughout the Southern U.S. and to the Caribbean. Chief Pilot Paul Daughtrey begins flights with a single Cessna 500 Citation I bizjet.

SOUTHERN AIRWAYS (1): United States (1936–1979). Frank W. Hulse, the **Delta Air Service** (later **Delta Air Lines**) Augusta station manager, and his business partner Ike Jones purchase control of the FBO/flight school Southern Airways of Georgia in June 1936.

Through 1939, Hulse and Jones expand their business (which will eventually be reorganized into one of the world's largest FBOs, Hanger One, Inc.) to airfields at the Georgia cities of Atlanta and Savannah, as well as Orangeburg, Anderson, and Greenville, South Carolina, and Muscle Shoals, Alabama. Having resigned from Delta, Hulse establishes additional FBO sites at Camden, South Carolina, and Decatur, Alabama in 1940, the year he enlists in the U.S. Army Air Corps.

Hulse is released from the AAC in 1941 and is requested to establish pilot training centers at his FBO. During World War II, a total of 25,000 flyers will earn their wings under his sponsorship in the Civilian Pilot Training program.

Looking to the future, on July 7, 1943, Southern Airways is incorporated by Hulse under the laws of the state of Delaware. Six months later, on January 6, 1944, Hulse files an application with the CAB for the establishment of a local service carrier to provide scheduled and certified air transport service in eight southeastern states.

A Douglas C-47B is purchased from the Reclamation Finance Corporation on March 14, 1946. After conversion to DC-3 civil standard and during the next two years, it will be leased to **Piedmont Aviation** and also make several charter flights on behalf of SA.

A public stock offering is made late in 1948 and executive headquarters are established at Atlanta on January 1, 1949. A temporary CAB operating certificate is received in February and an inaugural flight is made on June 10 from Atlanta to Memphis via Gadsden and Tuscaloosa, Alabama, and Columbus, Mississippi.

The DC-3, piloted by Capt. George Bradford, introduces Southern's new livery, which will be worn by all of the airline's aircraft through September 1961. This consists of a bare metal finish, a broad yellow fuselage stripe trimmed with small blue stripes, the titles "Fly Southern" over the windowline and on the tail, and a company logo aft the passenger door.

Fifteen days later, on June 25, southbound flights commence from Atlanta to Jacksonville via LaGrange, Columbus, Albany, Moultrie, and Valdosta. On August 5, Atlanta to Charlotte, North Carolina, frequencies commence via Athens, Georgia, and Greenwood, Greenville, and Spartanburg, South Carolina. Flights from Columbus, Georgia, to Charleston, South Carolina, begin on September 15 via Macon and Augusta.

Memphis to Jackson, Mississippi, twice-daily roundtrips commence on October 25, 1950; aboard Flight 401 on inauguration day are stewaresses from **American Airlines**, **Capital Air Lines**, **Chicago & Southern Air Lines**, **Delta Air Lines**, **Eastern Air Lines**, and **Braniff International Airways**, all promoting their carriers' Memphis connection. Jackson to Mobile flights begin on December 9 via Laurel and Hattiesburg and by year's end, the fleet includes 10 DC-3s, known as "Southern's Belles."

The great-great-granddaughter of Confederate general, Pierre G. T. Beauregard, christens a new DC-3 General Beauregard on January 15, 1951, and following the ceremony, it is employed to launch service from New Orleans to Columbus, Mississippi, via Jackson, Natchez, and Baton Rouge, Louisiana. The route network now stands at 2,113 unduplicated miles and is expanded again on June 20, when a new market is opened at Tupelo, Mississippi. Frequencies commence to Gulfport–Biloxi on March 21, 1952.

The second—and last—named DC-3 is acquired in January 1953, the *Gen. Stephen D. Lee*. **Delta Air Lines's** headquarters city of Monroe, Louisiana, is initially visited on June 13 and on July 1 the CAB's temporary operating certificate is renewed through the remainder of the year. Less profitable cities, such as Augusta and Macon, Georgia, Charleston, South Carolina, and Hattiesburg, are suspended in the fall. The company's 500,000th passenger is boarded at Columbus in November, but during the month, flights end to Clarksdale, Mississippi, and LaGrange, Georgia.

Operations continue apace in 1954 and permanent local-service certification is received from the CAB on December 9, 1955. Traffic continues to grow through 1956 and on June 29 flights begin to Panama City, Florida. Mrs. Robert Coleman, the airline's one millionth passenger (cumulative) is boarded at Charlotte, North Carolina, on August 12, 1957.

When **Delta Air Lines** drops its Memphis to Greenwood, Mississippi, route, Southern takes it over on October 1, adding an extension to Jackson. Atlanta to Memphis via Anniston and Gadsden service begins on December 1. The route network now totals 2,780 unduplicated miles.

As late as **1958**, the carrier's fleet is still comprised entirely of Douglas transports, 13 to be exact. Airline employment stands at 700 in **1959** and 7 additional DC-3s are acquired. The tenth anniversary is celebrated throughout the year with the slogan "Going Places with the South for Ten Great Years." On July 1, the airline begins flying to University/Oxford, Mississippi, Bogalusa, Louisiana, and Huntsville, Alabama. With service to the latter city's Redstone Arsenal, Southern now serves more military installations than any other airline in the world.

As the result of the CAB's decision in the Southeastern Area Local Service Case, as announced on July 21, Southern receives operating authority to 17 cities—the largest award of service rights in company history.

One stop service is inaugurated on January 11, **1960** from New Orleans to Panama City, Florida. At the end of February, Southern begins flying from New Orleans to Nashville via Muscle Shoals. Meridian, Mississippi, together with Decatur and Selma, Alabama, join the route network on April 1.

Labor unrest among members of the local chapter of ALPA results in a job action by company pilots on June 5. When negotiations break down and the strike continues, Southern hires nonunion flyers. On August 1, service is expanded within Tennessee when a Nashville to Memphis via Jackson route is opened. **Superior Airlines** is established by the striking pilots, but is unsuccessful, leading to a court hearing on unfair labor practices. Southern and ALPA will settle and under political pressure, the airline will rehire most of the strikers.

While attempting to maneuver in a congested area, a DC-3 with 12 aboard rams a parked Douglas at Atlanta on September 10. Back in Tennessee on November 1, service is initiated from Nashville to Tri-Cities (Bristol, Kingsport, and Johnson City) via Knoxville. Three more DC-3s are acquired during the month, allowing a December launch of frequencies from Chattanooga to Shelbyville/Tullahoma and Huntsville.

Airline employment approaches 1,000 in **1961** and the fleet includes 24 DC-3s. During the first quarter, the entire Tennessee intrastate route network of failed **Southeast Airlines (1)** is acquired.

Southern's two millionth passenger (cumulative) is boarded at Knoxville on June 18. The following month, five Martin 4-0-4s are purchased from **Eastern Air Lines**. During the summer, service is inaugurated to Corinth and Pascagoula, Mississippi, and the Tennessee route system is finished by the addition of the former **Southeast Airlines (1)** stations at Clarksville, Paris, Morristown, and Union City.

The five Martins arrive on October 29 and launch Aristocrat service in November. They display a new livery, which will soon be applied to all company aircraft: grey belly to the windowline, thin yellow line and wide blue line over the windowline and white upper fuselage with the title "Southern" above the wing. The yellow and blue lines appear at the tail root and a stylish "S" is visible on the tail.

A DC-3 collides with a Cessna 172 on the ground at Tuscaloosa, Alabama, on November 1; no one aboard the Douglas is hurt.

The first Southern Aristocrat awards are made to local dignitaries in **1962** as a marketing tool and a new corporate headquarters is occupied at Atlanta. Meanwhile, eight additional 4-0-4s and a DC-3 are placed on company routes, which include new frequencies from Columbus, Georgia, to Myrtle Beach, South Carolina, via Charleston and from Atlanta to New Orleans via Columbus, Decatur, and Fort Walton Beach. The accident-free 500 millionth passenger mile is completed, giving cause for celebration.

A Martin 4-0-4 with 19 aboard fails to recover from a bounced landing at Baton Rouge on June 17, **1963** and crashes; there are no injuries reported. A new 49,000-sq.-ft. maintenance hangar is opened at Atlanta and the three millionth passenger (cumulative) is boarded on July 10. Late in November, service is dropped to two small cities in Mississippi and five in Tennessee.

Enplanements for the year total 626,128 and a net profit of \$328,210 is earned.

Airline employment in **1964** stands at 1,159 and the fleet now includes 36 aircraft. On February 12, one of these, a DC-3 with 29 aboard,

encounters clear-air turbulence near Huntsville, Alabama; one passenger is badly hurt. Another Douglas with five aboard fails its takeoff from Tupelo, Mississippi, on March 4, but no injuries are reported.

During the year, six additional Martin 4-0-4s are acquired, replacing six Douglas transports. As the result of a CAB award, the company is able to inaugurate a Panama City to Memphis route via Montgomery, Birmingham, and Muscle Shoals, on July 1.

In addition, Southern takes over the former **Eastern Air Lines** services to Albany, Macon, Rome, and Waycross in Georgia and to the Florida cities of Ocala and Gainesville.

Passenger boardings at President Frank Hulse's carrier accelerate 23% to an all-time high (thus far) of 735,231. Revenues jump 18.5% to \$10,213,754 and a record net profit of \$675,628 is banked.

The workforce grows to 1,352 in **1965**. Orders are placed for three DC-9-10s.

Passenger bookings climb 18.2% to 851,762. Revenues grow to \$19,887,647. Operating expenses are \$18,012,193. The operating profit is \$1,875,454 and the net profit is \$937,975. Since 1962, the carrier has been the most profitable in its classification. Much of the credit for this fiscal achievement goes to Vice President-Finance Marion Lamar Muse, a master of rate formulas, who now departs to head **Central Airlines** and will one day found **Southwest Airlines (2)**.

The five millionth passenger (cumulative) is boarded in February **1966**. Alone among local service carriers, Southern never operates a turboprop airliner. Instead, it moves directly from the piston era to the jet age in August when an order is placed with Douglas for three DC-9-15s. Never much in the news except for an occasional airliner accident, this carrier achieves a reputation as a "quiet airline."

Revenue passenger miles flown are 203 million and freight ton-miles are 1.1 million. Revenues climb to \$22 million and an \$859,743 net profit is posted.

The employee population in **1967** numbers 1,498 and the fleet includes 28 aircraft: 3 DC-3s and 25 Martin 4-0-4s. Orders are placed for 6 DC-9-31s. The first DC-9-15 arrives in Atlanta at the beginning of June and on June 15 it is placed into service. When DC-3 Flight 240 from Dothan, Alabama, to Memphis is completed on July 31, the final piston-engine Douglas transport is withdrawn; in a ceremony, President Hulse and Capt. Bradford hang a large "For Sale" sign on the airliner.

Southern introduces the first jetliner service from Memphis to the Carolinas on August 1 when the third, newly delivered, DC-9-15 begins flying from the Mississippi River community to North Carolina via Jackson, Nashville, Knoxville, and Tri Cities.

A total of 1,183,000 passengers are originated and 1,377,000 freight ton miles are flown. Total revenues advance to \$24.25 million; however, expenses lead to a loss of \$158,715.

The workforce in **1968** numbers 1,521 and the fleet includes 30 aircraft.

On January 1, while on a ferry flight, a Martin 4-0-4 with three crew overshoots the runway while landing at Oxford, Mississippi, and suffers the collapse of its landing gear; there are no fatalities.

As the result of the Southern New York Route award and entry into Washington, D.C., the carrier receives its first long-haul passenger markets, which increase its total number of revenue passenger miles by a quarter. The fleet is bolstered by the arrival of three more DC-9-15s.

Passenger boardings leap up by 23.5% to 1,308,000 and cargo traffic rises by 12.7%. Income is a record \$29,390,278.

In **1969**, the company takes delivery of a seventh DC-9-15 and during May and June, three DC-9-31s. Beginning on September 1, twice-daily jetliner flights connect Fort Walton Beach, Florida, Dothan, Alabama, and Columbus, Georgia, with Washington, D.C. and New York City. Simultaneously, operations to Chicago also begin.

Enplanements total 1,344,381. Revenues for the year are \$37.83 million. Although a \$427,000 operating profit is earned, a net loss of \$822,000 must be absorbed.

Airline employment in **1970** grows 1.4% to 1,769. The fleet grows to include 30 aircraft: 15 DC-9s and 15 Martin 4-0-4s. When the airline in-

augurates service to Chicago (MDW) on April 1, an alligator "ambassador" from the Okefenokee Swamp escapes into the crowd during welcoming ceremonies, causing a disturbance well covered by local media.

The most publicized event in company history is negative occurs on November 14. Chartered Flight 932 is approaching Tri-State Airport at Huntington, West Virginia, from Kinston, North Carolina, with 4 crew and 71 passengers, including 43 players and coaches from the Marshall University football team. The DC-9-31 strikes the top of trees on a 922-ft. ridge and explodes about 1 1/2 miles from the end of the runway; there are no survivors.

Despite the tragedy, overall passenger boardings for the year increase 15.4% to 1,589,102 and freight traffic is up by 49%. Fiscally, losses continue to mount. Having posted revenues of \$49.7 million, Southern's costs climb to \$51.2 million, leaving an operating loss of \$1.5 million and a net loss of \$3.3 million.

In 1971, stewardesses uniforms include "hot pants" and plastic boots while yellow smiling "Have a Nice Day" faces are painted on the radomes of the jetliners.

Enplanements for the year are 1,965,096.

The workforce in 1972 is 2,084. During the summer, the company's DC-9s are given new livery, highlighted by a new white Flightmark "S" applied to a royal blue field on the tail; the "S" is soon nicknamed "spaghetti stripes," after their three wavy lines. Southern suffers the industry's most spectacular skyjacking during the year, involving a 30 hour ordeal and 2 trips to Cuba, beginning on November 11.

L. D. Moore and H. D. Jackson, wanted by Detroit police as suspected rapists, and M. Cole, an escapee from prison at Nashville, brandish guns and hand grenades and take over Flight 49, a DC-9-15 with 31 other passengers aboard en route from Birmingham to Memphis. They force the Douglas to land in Jackson, Mississippi, Cleveland, Ohio, Toronto, Ontario, Lexington, Kentucky, and Knoxville, Tennessee. At the last destination, they demand bullet-proof vests, helmets, parachutes, stimulants for the crew, food for the passengers, and \$10 million in ransom. As negotiations drag, the pirates shoot the copilot and threaten to takeoff and crash the airplane into the Atomic Energy Commission's research facility at nearby Oak Ridge if their demands are not quickly met.

After their requests are granted and ransom is paid in the amount of \$2 million, the plane is ordered to Havana, where the hijackers insist on speaking with Premier Castro himself. Oddly, the plane now returns to Key West for refueling, where the tires are shot out by FBI agents. Still, the DC-9-15 is able to leave for Cuba and lands on a foam-covered runway at Jose Marti Airport, where the three pirates are taken into custody by Cuban police and the money is confiscated. The passengers and Douglas jetliner return to Miami the next day.

Efforts are made to recover a \$2 million ransom paid in the process. The incident is relived by Ed Blair and William R. Haas in their *Odyssey of Terror* (Nashville, Tenn.: Broadman Press, 1977).

During the fall, 13 DC-9-14s are purchased from **Delta Air Lines**. Passenger boardings jump 11.8% to 2,228,000 and cargo does even better, rising by 23.7%. Income is \$68.63 million and expenses are \$65.74 million. Consequently, profits are made: \$2.89 million (operating) and \$1.6 million (net).

A total of 409 new employees join the airline in 1973 as do the first of the DC-9-14s. On December 1, officials report that its federal subsidy will be increased by \$400,000 per year for the next five years to cover the \$2 million seized by the Cuban government after the DC-9 hijacking of the previous November.

Customer bookings jump 18% to 2,628,000 and freight traffic is up by 9.3%. Expenses of \$82.28 million are charged off against \$83.77 million total revenues and result in an operating profit of \$1.48 million and a net gain of \$417,000.

Airline employment in 1974 is 2,657 and the fleet now owns 24 DC-9s. Construction is begun on a new \$25-million jet maintenance base at Atlanta and on December 9, daily nonstop roundtrip service is inaugurated from Miami to Grand Cayman Island. The first television ads, "Nobody is Second-Class on Southern," begin to appear.

Further success comes to Southern as enplanements accelerate 17.4% to 3,084,000. Cargo is off, however, by a slight 2.4%. Income rises 28% \$108.56 million while expenses are held to \$101.67 million. The operating profit is \$6.88 million and net income skyrockets to \$3.48 million.

The workforce in 1975 is 2,539. At an August 10 news conference, Alabama Senator John Sparkman and President Hulse display a check for \$2,609,789.83 in Canadian dollars, disclosing that it has been received from Premier Castro as payback of the \$2 million ransom paid to hijackers in 1972. The hijackers themselves will return to the U.S. during the 1980 Cuban boatlift; found out during processing, they will receive prison sentences of from 20 to 25 years.

CEO since founding, Hulse now moves up to the board room to become chairman/CEO. He is succeeded as president by Graydon Hall, as George M. Gross becomes executive vice president/general manager.

Minor growth of 0.7% is experienced in passenger bookings (3,104,000). Although expenses are \$114.75 million, they disappear into the company's total income of \$118.07 million. The year's operating profit is \$3.31 million and net income, though down, is still \$2.74 million.

The number of employees is increased by 9.8% in 1976 to 2,787. A new "Your Travel Agent is Free" marketing campaign is undertaken and a \$27-million maintenance hangar and facility is completed. Late in the year, authority is granted for services to the Cayman Islands.

Customer boardings jump 10.6% to 3,245,387 while freight does better, up 16.1% to 8.7 million FTKs. Operating income is \$140.16 million and expenses are \$137.67 million. This happy imbalance results in an operating profit of \$2.49 million and net gain of \$405,000.

As flights from Memphis increase to 83 per day to 42 cities in 14 states in 1977, the river town now becomes the airline's long-haul hub.

En route from Huntsville to Atlanta on April 4, Flight 242, a DC-9-31 with 4 crew and 81 passengers, encounters a severe thunderstorm near New Hope, Georgia, (some 40 mi. from Atlanta). Both engines fail and cannot be restarted, forcing the flight crew to attempt an emergency landing on State Spur Highway 92. The gambit is unsuccessful and the jetliner crashes, killing 63 people on the aircraft and 9 in an automobile on the road.

Surviving flight attendant Sandy Purl, with Gregg Lewis, recalls the accident and her troubled life thereafter in *Am I Alive?: A Surviving Flight Attendant's Struggle and Inspiring Triumph over Tragedy* (San Francisco: Harper & Row, 1986).

Survivors of this disaster, families of victims, and rescue workers will hold a reunion at New Hope on April 14, 1997. To replace the Martin 4-0-4s being gradually withdrawn, the company, between June and November, takes delivery of a fleet of eight Fairchild-Swearingen Metro IIs.

Meanwhile, new general offices are occupied at Atlanta along with a new computer reservations center as merger discussions begin with **North Central Airlines**. Acquired from **Air Canada, Ltd.**, a DC-9-32F begins all-cargo service on October 1. Late in the year, orders are placed for four McDonnell Douglas MD-80s.

Enplanements total 3,534,000. On revenues of \$159.51 million, a record net \$8.25- million profit is gained, much of it based on a late payment for mail carriage of \$500,000 and a \$3.9-million insurance settlement.

Chairman Hulse and President Hall oversee a workforce of 3,216 in 1978, up 10.1%. The fleet comprises 5 DC-9-30s, 22 DC-9-15s, and 8 Fairchild-Swearingen Metro IIs. Service is provided to 67 cities in 13 states.

Flight 753, the final Martin 4-0-4 return service is operated as a "commemorative" flight on April 30 between Atlanta and Gadsden, Intrubute to Southern's last piston engine aircraft to make a scheduled flight, a group of 14 senior company staffer are invited to join passengers on the service. When the flight is completed, this last of 25 Southern Martins is retired.

During the second quarter, merger discussions are held with **Allegheny Airlines (1)**, **Ozark Air Lines**, **Piedmont Airlines (1)**, **Texas International Airlines**, and **North Central Airlines**.

Officials and stockholders approve a merger with **North Central Airlines** that will create a much larger carrier; the plan of amalgamation is

sent to the CAB in July and because of the Caribbean routes, to the White House, for approval.

Meanwhile, passenger boardings pass the four million mark for the first time (4,232,000) while freight is up by 13.1% to 11.2 million FTKs. Although operating income rises 18.2% to \$188.51 million, expenses are kept to \$180.80 million and a \$7.7-million operating profit is made. The net profit, despite receipt of \$600,000 for four surplus jet engines, declines a not-unexpected 70.8% to \$2.4 million.

Airline employment at the beginning of 1979 stands at 3,300. The CAB and President Carter both agree to the proposed marriage in February and final approval is announced in April. Southern officially merges with **North Central Airlines** on July 1 to form **Republic Airlines**. Integration of the two airlines is completed on October 1 when the new "RC" two-letter code takes effect.

SOUTHERN AIRWAYS (2): United States (1986–1987). Jackson, Mississippi-based **Flight Line**, a scheduled commuter airline sponsored by the FBO Miller-Wills, changes its name in 1986 in an effort to further highlight its geographical service area and to participate in a code-sharing arrangement with **American Airlines**.

Daily roundtrips linking its base with New Orleans, Baton Rouge, Greenwood, Memphis, and Oxford-Tupelo are maintained with a fleet that includes 2 Cessna 402s, 1 Embraer EMB-110 Bandeirante, 2 Piper T-1040s, and 1 Beech King Air 200.

A total of 2,228 passengers are flown on the year.

Operations cease in 1987.

SOUTHERN AIRWAYS, LTD.: United Kingdom (1938). On January 28, 1938, Bury St. Edmunds Airport, Ltd., owned by the Straight Corporation, is registered; the company name is changed to Southern Airways, Ltd. on May 30. On June 20, a Short Scion is employed to inaugurate air taxi service between Ipswich and Clacton, which is ended in September, the same month in which a Ramsgate-Ilford route, started on July 26, is also closed down.

SOUTHERN AUSTRALIA AIRLINES (PTY.), LTD.: Australia (1991–2001). **Sunstate Airlines (Mildura) (Pty.), Ltd.** becomes an affiliate of **Australian Airlines (Pty.), Ltd.** in 1991 and is renamed at year's end. General Manager Tony Matthew's airline continues to operate a Shorts 360 and two Cessna 404 Titans on routes linking Mildura with Adelaide, Renmark, Melbourne, and Broken Hill. The company also contracts with the Victoria government to operate an air ambulance service of six Titans from a base at Melbourne's Essendon Airport.

Enplanements for the year total 27,004.

The fleet is increased in early 1992 to include 2 de Havilland Canada DHC-8-102s, 2 Embraer EMB-110P1 Bandeirantes, 2 Shorts 330s, and 3 Shorts 360s. Those services linking Melbourne with Devonport and Launceston are taken over from **Eastern Australia Airlines (Pty.), Ltd.** In November, **Australian Airlines (Pty.), Ltd.** is acquired by **Qantas Airways (Pty.), Ltd.**

Passenger boardings jump 55% to 60,008.

Now a subsidiary of the nation's fabled pioneer, SAA continues operations apace in 1993, transporting a total of 118,135 passengers, but losing A\$69,000 in the process.

The fleet in 1994 includes 2 Dash-8s and 2 Cessna 404 Titans. Customer bookings accelerate 8.7% to 129,392 and an A\$1.2-million profit is reported.

A third DHC-8-102 is placed into service in 1995 as service is inaugurated to Burnie.

Passenger boardings during the 12 months climb 22.1% to 151,453.

Airline employment stands at 155 in 1996 and on December 6, two British Aerospace BAe 146-100s are added. The *City of Launceston* is the first to enter service and by Christmas, both are replacing a **Qantas Airways (Pty.), Ltd.** Boeing on nonstop daily routes from Sydney and Melbourne to Launceston and Hobart.

Enplanements this year leap ahead by 32% to 236,648.

The workforce is cut to 60 during 1997. Customer bookings skyrocket 79% to 346,355.

Service is maintained without fanfare in 1998. During the 12 months, passenger boardings accelerate 42% to 492,000. By the beginning of 1999, airline employment has been increased by 186.7% to 172.

Passenger boardings rise 1.2% on the year to 498,000.

A third Bae 146-100 is acquired and beginning on March 28, 2000, the carrier inaugurates new daily roundtrips from Hobart to Melbourne. It simultaneously adds another return service between Hobart and Sydney. Southern Australia will be merged into Qantas Link during June 2001.

SOUTHERN AVIATION (PTY.), LTD.: South Africa (1947–1964). Having arrived at Port Elizabeth with his family and a de Havilland DH 89A Dragon Rapide late in 1946, Philip Smulian begins operating charters to local destinations. His enterprise proves successful and he is able to acquire two other small competitors, Haller Aviation (Pty.), Ltd. and Sharwood's Flying Service (Pty.), Ltd. at the beginning of 1947. These are merged to form Southern.

Employing a fleet that comes to comprise 2 Cessna 150s and 1 each C-182, Piper J-3 Cub, and PA-23 Apache, Smulian is able to continue nonscheduled flights until June 1964, when he sells out to **National Airways (Pty.), Ltd.**

SOUTHERN AVIATION AIRLINES: United States (1964–1974). Southern Aviation, the FBO based at Lawton, Oklahoma, receives FAA certification on September 15, 1964 for a new scheduled airline division. Nonscheduled flights are maintained during the next two years. Employing Cessna 206s, the scheduled operation, marketed as Southern Aviation Airlines, commences in 1967, linking the company's base with Dallas via Ardmore and Sherman.

The company reverts to charter flights only in 1970–1973 and is liquidated in 1974.

SOUTHERN EXPRESS AIRLINES: United States (1984–1986). Following an affiliation as a commuter partner with failed **Air Florida**, **Finair** is renamed SEA on May 15, 1984. From its base at Miami, operations are continued by President Nick Finazzo's small regional with a fleet of 4 Embraer EMB-110s, 1 Piper T-1020, and 6 Piper PA-31-350 Navajo Chieftains. Destinations visited daily beginning in June include Fort Lauderdale, Fort Myers, Jacksonville, Key West, Marathon, Naples, Sarasota, Tallahassee, and Tampa.

The fleet is increased in 1985 by one Bandeirante and three Navajo Chieftains. Still fiscally weak from its **Air Florida** connection, the carrier signs a code-sharing contract with **Piedmont Airlines** in October.

Enplanements for the year total 180,000.

Just a week before the "Piedmont Commuter" affiliation is to begin on January 15, 1986, the larger carrier withdraws from the arrangement, citing the partner's failure to honor its obligations. It turns out that, after the inaugural flight, the Internal Revenue Service has seized the Bandeirante employed to cover SEA's back taxes. Devastated, SEA suspends operations a day later and files for Chapter XI bankruptcy in March.

SOUTHERN FRONTIER AIRLINES, LTD.: Canada (1977–1985). SFA is established at Calgary Airport in early May 1977. Employing a single Douglas DC-3, the new charter entrant begins revenue flights on June 1. A year later, in 1978, the company acquires the Calgary scheduled certification of **Gateway Aviation, Ltd.** and inaugurates flights from the Alberta capital to Cold Lake, Regina, Swift Current, and Lloydminster. Regular freight service is undertaken to Edson, Grand Prairie, Pincher Creek, Lethbridge, and Medicine Hat. A de Havilland Canada DHC-6 Twin Otter is purchased in 1979.

In 1981, the fleet comprises 2 DC-3s, the Twin Otter, 2 Beech King Air 90s, 1 Cessna 401, and 3 Cessna 402s. Enplanements for the year total 9,000, rising to 13,900 in 1982. Frequencies are increased in 1983 after the acquisition of a Beech 99.

In **1984**, the company moves to a terminal at the new Calgary International Airport. It also obtains a second Beech 99 (to replace the first, which is sold to **Quebec Aviation, Ltd.**) and leases a Convair CV-440. These allow the carrier to expand to Edmonton; from the municipal airport there, it is able to offer services to Saskatoon.

In January **1985**, SFA is taken over by **Time Air, Ltd.**

SOUTHERN INTERNATIONAL AIR TRANSPORT, LTD.: United Kingdom (1974–1980). SIAT is organized in Sussex in July **1974**, but will not actually begin operations for another two years. Philip Bowles is named managing director and he recruits a workforce of 20 and a fleet comprising 1 each Vickers Viscount 800 and Viscount 700.

All-cargo charter operations commence in **1976** from London (LGW) to destinations in the Middle East, Africa, and Europe. Unable to maintain sufficient traffic to cover rising expenses, the carrier stops flying in **1980**.

SOUTHERN INTERNATIONAL AIRLINES. See **FLORIDA AIRLINES (2)**

SOUTHERN JERSEY AIRWAYS: United States (1977–1990). In July **1977**, **Atlantic City Airlines**, owned by the Donald C. Youngs Sr. and Jr. is reformed and renamed. A unit in the "Allegheny Commuter" network, the carrier continues to provide scheduled passenger flights linking its Atlantic City base with Wildwood, Cape May, Millville, Philadelphia, Newark, Trenton, Asbury Park, and Monmouth.

Operations continue apace in **1978**, but a Beech B-55 Baron with three aboard crashes while taxiing at New York (LGA) on August 10, **1979**; there are no survivors.

By **1980**, enplanements total 135,034. In **1981**, President Donald C. Young Sr. oversees a workforce of 130 and operates a fleet comprising 5 de Havilland Canada DHC-6-300 Twin Otters and 2 Piper PA-31-350 Navajo Chieftains.

In **1982–1983**, revenue frequencies are initiated to New York (JFK and LGA) and to Washington, D.C. (DCA). Enplanements in the latter year reach 128,080. Orders are placed for DHC-7-102s, the first of which enters service, along with another Twin Otter, in **1984**. For the year, passenger boardings jump 26% to 161,411.

A second Dash 7 begins flying in **1985** and helps the "Allegheny Commuter" partner to increase its customer bookings by 10.2% to 177,895. Unfortunately, enplanements drop 6.9% in **1986** to 165,588.

President Young's fleet in **1987** includes 6 Twin Otters and 2 Dash 7s. Enplanements climb to 176,767. Still, losses continue: \$1.3 million (operating) and \$1 million (net). At year's end, the company is sold to Richard Olsen, who keeps the Youngs on.

Another DHC-6-300 and another DHC-7-102 join the fleet in **1988**. In March, however, **USAir** withdraws its 18-year-old "Allegheny Commuter" contract from the small regional. The commuter now approaches Texas Air Corporation (TAC) and receives both "Eastern Express" and "Continental Express" contracts on May 13 to feed both majors at its former Allegheny destinations.

Additionally, summer service is introduced to Cape May and Wildwood from Philadelphia. Costs involved in these changes force the carrier into Chapter XI bankruptcy in September. On the year, passenger boardings plunge 27.9% to 127,540 and revenues decline 30.6% to \$7.7 million. Losses total \$4.4 million (operating) and \$3.5 million (net).

One Dash 7 is removed in early **1989**. As a result of the **Eastern Air Lines** strike that begins in March, Southern Jersey switches affiliations, becoming exclusively a "Continental Express" carrier. The company's cash flow situation now gets out of hand and it is forced to shut down in May while filing for Chapter XI bankruptcy.

During the remainder of the year, SJA joins in negotiations with fellow bankrupt regional **Emerald Airlines** aimed at a merger into a new airline, Atlantic City Express. The talks are not successful and the carrier is reduced to the operation in **1990** of one Twin Otter, leased from **Scenic Airlines** of Las Vegas.

Early in **1991**, President Donald Young is able to purchase two more DHC-6-300s and the routes of **Long Island Airlines**. Unhappily, the airline now loses its "Continental Express" affiliation and unable to maintain its viability in the face of higher fuel bills and recession, the small regional defaults on its arrangement with Long Island and shuts down in early February.

SOUTHERN LINKS. See **AIR BOTSWANA (PTY.), LTD.**

SOUTHERN MARYLAND AVIATION: United States (1977–1978). SMA, the FBO at California, Maryland, establishes a scheduled airline division in **1977** and launches daily Piper PA-23 Aztec roundtrips between St. Mary's and Washington, D.C. (DCA). The service can only be maintained for a year.

SOUTHERN NEVADA AIRLINES: United States (1980–1981). Southern Nevada is set up at Las Vegas in the late spring of **1980** to provide scheduled passenger flights to the Grand Canyon. Piper PA-31-310 Navajo revenue flights are launched in June, but cannot be maintained a year.

SOUTHERN PACIFIC REGIONAL AIRLINES (PTY.), LTD.: Australia (1990–1993). SPRA is established at Albion, Queensland, in **1990** as successor to **Queensland Pacific Airlines (Pty.), Ltd.** to offer scheduled regional passenger and cargo service. General Manager George Brown's new entrant initiates revenue flights with 4 Mohawk 298s in the spring from Brisbane to Bundaberg and Gladstone. Orders are placed for 3 more Mohawks and enplanements for the year total 11,449.

Charter flights are added in **1991** and passenger boardings climb to 75,964.

The four Mohawks inaugurate three more routes in **1992** and customer bookings advance to 92,100. Operations continue into **1993**, but halt in April for lack of money.

SOUTHERN RHODESIA AIR SERVICES, LTD.: Southern Rhodesia (1940–1946). The assets of **Rhodesia and Nyasaland Airways, Ltd.** are taken over by the government of Southern Rhodesia on February 1, **1940** and transformed into SRAS, a communications squadron/airline of the air force, which had been formed a month earlier.

Employing de Havilland DH 89 Dragon Rapides acquired in the purchase maintain all former routes. Destinations visited from Salisbury and Bulawayo include Beira, Johannesburg, Blantyre, Lilongwe, Fort Jameson, Lusaka, Fort Jameson, Mankoya, Mongu, Mumbwa, and Broken Hill.

Later in the year, flights from Blantyre to Beira and Fort Jameson are withdrawn, while a route is added from Lusaka to Kisumu via Nairobi.

On June 7, **1941**, in conjunction with **South African Airways (Pty.), Ltd.**, DH-89 service is inaugurated weekly between Johannesburg and Kisumu via Bulawayo, Salisbury, Lusaka, Ndola, Kasama, Mbeya, Dodoma, and Nairobi.

During June **1945**, the Air Ministry of Southern Rhodesia announces that SRAS will operate all commercial air services on behalf of the governments of Nyasaland and Rhodesia, both north and south. These join together on June 1, **1946** to form **Central African Airways Corporation** as successor to SRAS.

SOUTHERN SCENIC AIR SERVICES, LTD. See **NEW ZEALAND TRANSPORT AND TRAVEL, LTD.**

SOUTHERN SKIES: United States (1981). Southern Skies is founded at Belle Chasse, Louisiana, in early **1981** to provide daily scheduled roundtrip shuttle services to New Orleans and Lafayette. Although Piper lightplane flights are duly inaugurated, they must be halted before year's end as a result of the PATCO air traffic controllers' strike.

SOUTHERN SKY AIRLINES (PTY.), LTD.: Thomas Street, Adelaide Airport, Adelaide, South Australia, 5950, Australia; Phone 1800 64 3300; Fax (08) 8231-3688; Year Founded 1996. SKA is es-

published in 1996 to provide charter flights to Kangaroo Island, the Eyre Peninsula, and the K. J. Riverland. Services commence with a pair of Cessna 404s and a Piper PA-31-310 Navajo.

Scheduled flights to Kingscote commence in September 1997. Airline employment in 1998–2000 is 20.

SOUTHERN TRANSCONTINENTAL AIRWAYS. See **SOUTHERN AIR FAST EXPRESS (SAFE)**

SOUTHERN WINDS, S.A.: Cordoba Airport, Av. Colon 540, Cordoba 5147, Argentina; Phone (051) 24 1212; Fax (051) 24 7251; <http://www.sw.com.ar>; Code A4; Year Founded 1996. The most successful of several new Argentine regional carriers begun in the mid-1990s, Southern Winds is established at Cordoba, 340 mi. NW of Buenos Aires, as Pampas Air in the spring of 1996. Founder/President Juan Maggio, an executive formerly with LADE (Lineas Aereas del Estado, S.A.) intends to provide scheduled services to provinces in the Argentine central interior (bypassing Buenos Aires) not with the usual turbo-props, but with the more advanced regional jets now becoming available. This concept wins capitalization from a number of banks, including Newcourt and Craft and National Westminster, and a small workforce of about 30 people is recruited.

Southern Winds, as the company is now renamed, becomes the South American launch customer for the Bombardier Canadair Regional Jet. It also takes over most of the Cordoba-based business of Austral Express, S.A. when that regional, previously known as Inter Austral, S.A., transfers its hub to Buenos Aires.

Two Canadair CRJ100LRs, wearing a livery nearly identical to that of Bombardier, their manufacturer, are brought in and employed on July 1 to launch revenue return flights from Cordoba to Tucuman, Salta, Mendoza, Neuquen, and Bariloche. In October, Aerolineas Argentinas, S.A. contracts with the new entrant to provide a daily roundtrip replacement service on its behalf from Cordoba and Rosario to Ezeiza.

Enplanements for the inaugural period total 120,000. Although revenues are \$9 million, initial costs bring a \$200,000 loss.

In 1997, the earlier block-seat, code-sharing agreement with Aerolineas Argentinas, S.A. blossoms into a full-scale strategic alliance, under which the major not only offers payment, but provides ticketing, check-in, and ground handling. Destinations visited include Bariloche, Buenos Aires, Mar del Plata, Mendoza, Neuquen, Rio Cuarto, Rosario, Salta, and Tucuman.

Enplanements of 285,360 are announced for the year. It is also noted that the company has operational revenues of \$30 million and a net gain of \$1 million.

It is revealed in June 1998 that the company is in need of additional capitalization in order to expand and to begin service to Buenos Aires. Alternatives that will be considered are acquisition of a merger partner willing to take a 40% stake or an initial public offering, either of which are designed to bring in approximately \$15 million.

By now, the national economy is slowing somewhat and fuel prices begin to rise. A number of routes previously operated by CRJs are turned over to the first of six de Havilland Canada DHC-8-102s that will join the fleet over the next year. Buenos Aires is on the schedule when the new timetable starts at the end of October. Additionally, charter flights are now added to Porto Seguro, Brazil.

In December, a homepage is launched on the Internet's World Wide Web.

The fleet in 1999 includes 6 Dash-8s and 5 CRJ100LRs. During the fall, the strategic alliance with Aerolineas Argentinas, S.A. is terminated, as the major turns to its own Aerolineas Argentinas Express operation. AR Express, operated by AeroVIP, S.A., begins flying as a low-cost regional, forcing Southern Winds to file a "dumping" lawsuit, charging that the new services it flies are operated below cost to drive Southern Winds off certain routes.

Southern Winds, meanwhile, continues to operate all of its previous routes, including all of the services once provided to Aerolineas, except the daily roundtrips to Ezeiza. Two Dash-8s are withdrawn.

Passenger boardings skyrocket a remarkable 233.3% to 1,000,000. Revenues leap ahead by 350% to \$60 million.

The workforce stands at 700 at the beginning of 2000. A total of 60 daily flights are offered to and between Cordoba, Salta, Tucuman, Catamarca, La Rioja, San Juan, Mendoza, Resistencia, Santa Fe, Rosario, Rio Cuarto, Buenos Aires, Punta del Este, Mar del Plata, Santa Maria de Los Andes, Neuquen, Bariloche, and Comodoro Rivadavia.

CRJ flights begin on March 26 from Rio Gallego to both Buenos Aires and Cordoba. Two more CRJs, Dash-200ERs, are received, on each on April 9 and April 12.

SOUTHERN WORLD AIRLINES, LTD.: New Zealand (1991). SWA is established at Wellington in early 1991 to offer international all-cargo charter services between South Pacific locales and the U.S. West Coast. Revenue flights commence in March with a single Douglas DC-8-63F. A second DC-8-63F joins the fleet in July. Recessionary forces are such that the start-up operation is unable to achieve economic viability and is forced to cease operations in October.

SOUTH-WEST AFRICAN AIRWAYS (PTY.), LTD. See **SOUTH AFRICAN AIRWAYS (PTY.), LTD.**

SOUTHWEST AIR (PTY.), LTD.: P.O. Box 71, Mendi, SHP, Papua New Guinea; Phone 675 591031; Fax 675 591358; Code W2; Year Founded 1995. SWA is set up at Mendi in 1995 to operate scheduled passenger and cargo services to local domestic destinations. Managing Director J. Sauverian begins revenue operations with 1 each de Havilland Canada DHC-6-300 Twin Otter and Embraer EMB-110P1 Bandeirante, plus 3 Pilatus-Britten-Norman PBN-2A Islanders.

Flights continue during the remainder of the decade.
