Meanwhile, the newly received Condor Syndikat Junkers G-24 *Ypiranga* makes a proving flight from Porto Alegre to Rio de Janeiro on June 3, returning six days later. The *Atlantico* and its route are turned over to **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** on June 15, following the its 65th flight over the "Linha da Lagoa"; since February, 800 passengers have been transported without mishap.

The Condor Syndikat officially ceases operations on July 1, but, in fact, continues flying for the remainder of the year while Fritz W. Hammer and **Deutsche Luft Hansa, A.G. (DLH)** work out plans with Brazilian officials for its replacement. A license for a route from Rio de Janeiro to Recife is granted by the government in on August 27 along with rights to operate flying boats between the island of Fernando Noronha, off the Brazilian northeast coast, and the mainland.

Two more Dornier Wals, the *Santos Dumont* and the *Bartholomeu de Gusmao*, are placed in service. On November 9, regularly scheduled, four-day Wal and G-24 flights are inaugurated from Rio de Janeiro–Porto Alegre, with an extension down to Rio Grande. By year's end, 13 passengers have been carried on 2 flights to Recife and 160 on

22 services from Rio to Porto Alegre. On December 1, a new Brazilian company, **Syndicato Condor, S.A.** is registered as an airline.

CONGO AIRLINES, S.P.R.L. (CAL): 1928 Ave. Kabambare, Commune de Barumbu, P.O. Box 12847, Kinshasa, 1284, Democratic Republic of the Congo; Phone 243 (88) 46 947; Fax 243 (88) 00 235; <http://www.congoairlines.com>; Code EO; Year Founded 1994. Express Cargo of Kinshasa forms the airline subsidiary **Zaire Express, S.A.** in 1994 to offer scheduled domestic and regional passenger and cargo services. Stavros Papaioannou is chairman with Jose Endundo as president. A workforce of 1,200 is recruited and revenue flights commence with 1 Boeing 707-358C Stratofreighter and 3 British Aerospace BAe (BAC) 1-11-500s.

Despite the civil war that will result in the replacement of the government of Zaire with a new Democratic Republic of the Congo, services continue in 1995–1996.

One each B-727-30 and B727-214 are acquired and destinations visited include Bauavu, Beni, Bunia, Butembo, Gbadolite, Gemena, Goma, Isiro, Kananga, Kindu, Kisangani, Lubumbashi, Mbandaka, and Mbuji-Mayi.

In the spring of 1997, after the rebel forces of Desire Kabila come to power, this most important privately owned airline in the Congo changes its name to Congo Airlines, S.P.R.L. (CAL). It also makes an unsuccessful claim on the traffic rights of defunct **Air Zaire, S.A.**, which rights are instead passed to **Lignes Aeriennes Congolaises, S.A. (LAC)**.

Services continue during the remainder of the year and into 1998. Destinations visited include Brussels, Bukavu, Gbadolite, Gemena, Goma, Isiro, Johannesburg, Kalemie, Kananga, Kindu, Kisangani, Lubumbashi, Mbandaka, and Mbuji-Mayi.

Civil war is renewed on August 2 and the Stratofreighter is seized on the ground at Goma as the fighting begins, along with a B-707F of **Lignes Aeriennes Congolaises, S.A. (LAC)**. President Kabila receives support from Angola, Zimbabwe, Sudan, and Chad, while Uganda, Rwanda, and Burundi assist his opponents.

A number of charter pilots are also captured and they are required to fly military equipment and troops from Uganda and Rwanda to rebel positions in the eastern part of the country. In addition, the Stratoliners haul freedom fighters from their strongholds to points in the west, where they battle for towns held by forces loyal to Kabila.

Government forces suffer serious setbacks in their efforts to put down the rebellion and enemy forces move into the mineral-rich province of Eastern Kasai. Communities ranging in size from villages to cities the size of Kindu are surrounded, attacked, and often captured.

To assist in resupply efforts, anti-Kabila forces charge, the Kinshasa-government employs the civil airliners of LAC and CAL as troop transports. A rebel missile shoots down one of these, the B-727-30, over Kindu, 440 km. SW of Goma, on October 10. A spokesman for antigovernment forces claims that the aircraft, with 40 troops and military equipment, is downed while landing at the city's airport from Kinshasa. CAL Chairman Papaioannou tells Reuters, Ltd. that the little Boeing with 3 crew and 38 passengers, primarily women and children, had been destroyed as it was taking off. Both sides agree that there are no survivors and the Kabila government asks the UN to condemn the downing.

Despite the conflict, in early November the airline is able to open a homepage on the World Wide Web. There it posts a message indicating that it is "searching after an aircraft Boeing 707-300 Cargo. Lease or Sale. Please make offer."

During the first quarter of 1999, a hush-kitted B-727-227A, first operated by **Braniff International Airways**, is acquired.

Flights continue during the remainder of the year and into the new millennium. Destinations visited include Kinshasa, Lubumbashi, Johannesburg, Mbuji-Mayi, Kananga, Mbandaka, and Gemena.

Political unrest continues in the nation during the first half of 2000. A large explosion rocks Kinshasa Airport on April 12 and three company aircraft are reported damaged.

CONGO COMMERCIAL AIRLINES, S.P.R.L. See **CITY CONNEXION AIRLINES, S.A.**

CONGRESSIONAL AIR CHARTERS: 7940 Airpark Road, Gaithersburg, Maryland 20879, United States; Phone (301) 840-0880; Fax (301) 926-2340; Year Founded 1995. Monty Lilley establishes CAC at Montgomery County Airpark in 1995 to provide executive and small group passenger charters throughout the U.S. and to Bermuda. By 2000, the concern employs seven pilots and operates three Beech 58 Barons and a Beech King Air 90.

CONIFAIR AVIATION, LTD.: 800-8E Rue, Aeroport de Quebec, Sainte-Foy, Quebec G2E 5W1, Canada; Phone (418) 877-2934; Fax (418) 877-5638; Code RO; Year Founded 1979. Conifair is established at Aeroport de Quebec, Sainte-Foy, Quebec, in 1979 to provide seasonal charter services to regional destinations.

Operations continue apace throughout the 1980s and into the early 1990s with a fleet that grows to include 3 Convair CV-580s, 4 Douglas DC-4s, and 5 DC-6s. Aerial fire fighting becomes a company specialty.

While climbing along a steep hill near St. Anne-des-Monts on a water bombing service from Boneventure on June 26, 1989, a C-118A (a military DC-6A), with four crew, crashes; there are no survivors.

Victor M. Rivas is chairman/CEO in 2000 with John R. Walters as president/chief operating officer. The fleet now includes 1 CV-580, 4 DC-4s, and 5 DC-6s.

CONNECTAIR: United States (1984). Established at Santa Barbara, California, in the spring of 1984, Connectair inaugurates scheduled third-level passenger service on May 1 to Los Angeles, San Jose, and Las Vegas with a pair of Fairchild F-27s leased from Champion Spark Plug. The company cannot sustain operations and files for Chapter VI bankruptcy on October 11, halting all flights.

CONNECTAIR, LTD.: United Kingdom (1984–1988). Connectair, Ltd. is founded at London (LGW) by Robert Wright in early 1984 to provide charter and air taxi service with an Embraer EMB-110P1 Bandeirante. Capitalization is provided by the Bank of England's Investors in Industry, the U.K. Department of Trade and Industry, and the Quadrant Development Capital Fund. In late spring, the company joins the British Caledonian Commuter network of **British Caledonian Airways, Ltd. (BCAL)** and begins to fly scheduled services between London (LGW) and Antwerp in May.

In 1986–1987, the fleet is upgraded by the addition of a Shorts 330 and a Shorts 360 and revenue flights are inaugurated from London (LGW) to Rotterdam and from Manchester to Antwerp and Rotterdam. Following the takeover of **British Caledonian Airways, Ltd. (BCAL)** in December of the latter year, a code-sharing agreement is signed with the new owners, **British Airways, Ltd. (2)**. Enplanements reach 65,000.

Airline employment stands at 45 in 1988 and, early in the year, Dusseldorf is added to the route network from Gatwick. On June 17, the airline is purchased by **Airlines of Europe, Ltd.** for £6.3 million, cash. Connectair, Ltd. is merged in July with **Guernsey Airlines, Ltd.** to form **Air Europe Express, Ltd.**

CONNELLAN AIRWAYS (PTY.), LTD.: Australia (1939–1970). On July 31, 1939, the Australian Post Office, the Department of Civil Aviation, and the Australian Flying Doctor Service grant subsidies to Edward J. Connellan to start a 17-point, every-two-weeks service in the Northern Territories between Alice Springs and Wyndham. With 2 Percival Gull 6s, the bush operation begins on August 8 with a mail-only flight; the initial route includes stops at Mount Doreen, The Granites, Tanami, Nicholson, Iwerway, Victoria River, and Auvergne.

After five years of regular—if meandering—services, the operation is registered as Connellan Airways (Pty.), Ltd., on September 20, 1943.

Between 1944 and 1970, the carrier's equipment is upgraded; many new small-plane types, such as Cessnas and Pipers, enter service. Additional local fields are served, including the Darwin-Goote Eylandt mission station service taken over from **MacRobertson-Miller Airlines (Pty.) Ltd.** on July 1, 1960. The route network exceeds 10,000 miles to about 100 tiny destinations.

In 1970, the carrier is renamed **Conair (Pty.) Ltd.**; flights in the Northern Territories continue.

CONNER AIR LINES: United States (1983-1991). F. A. Connor establishes this passenger and cargo charter operation at Miami (MIA) in 1983. Employing 4 Douglas DC-8-33s, 2 DC-8-62s, and 9 DC-6A/Bs, the 60-employee carrier undertakes nonscheduled passenger and cargo flights to destinations in the Caribbean and Latin America.

Although passenger charters will be dropped and the jetliners retired, Conner, otherwise, continues apace in 1984-1986, but offers no statistics for the period.

In 1987, the company reports to the U.S. DOT that it has flown 3,814,210 FTKs. Revenues reach \$876,000, but costs are greater, and Conner loses \$39,000.

Conner's fleet in 1988 includes only 3 DC-6As. Cargo declines 36.3% to 2.33 million FTKs. Revenues also fall, by 24.7%, to \$660,000 and both operating and net losses are the same: \$26,000.

Freight traffic not only recovers, but skyrockets by 159.4% in 1989 to 6.05 million FTKs. Revenues jump 23.9% to \$818,001, but costs leave an operating loss of \$247,796. The net loss is \$1,000 higher.

The previous year's good traffic report brings a growth in capacity in 1990; added to the fleet are 3 DC-6As, 2 DC-7Fs, and 1 DC-8-33F. The expansion is a mistake as recession depresses rather than improves the air cargo market. In addition, the company faces a significant fine from the FAA in September for not submitting the drug testing plan required by the previous December 18 for all Part 121 carriers operating aircraft over 31 seats.

As of October, the carrier fails to respond to government inquiries. Cargo plunges 47.2% to 3.19 million FTKs. Revenues, however, grow by 63.7% to \$1.33 million and expenses, up 20.4%, are controlled at \$1.28 million. The operating profit is \$56,634 and the net loss is cut to \$4,243.

Conner flies a total of 1.36 million FTKs during the first half of 1991, a decline of 57.3%. The slump in traffic, together with continuing, if unspecified, difficulties with the FAA and recession-related fiscal loss, forces the company to shut down in late summer.

CONNIE KALITTA SERVICES: United States (1972-1998). This privately owned charter and contract service carrier is founded by world champion drag racer Conrad A. "Connie" Kalitta at Detroit's Willow Run Airport in the fall of 1972. Outfitted with Beech 18s and Learjet 23s, the operator launches revenue services to various midwestern destinations in November. Operations continue apace during the remainder of the decade and into the next.

While on final approach to the airport at Kansas City on December 5, 1983, a Hamilton Turbolineer freighter (converted Beech TC-45J) descends too fast and crashes into a railroad yard; the aircraft is destroyed by impact and fire and the pilot is killed.

In 1984, another Willow Run operator, **Jet Way**, is acquired, along with its fleet of DC-8s and DC-6s. As a result, the Kalitta workforce grows to 80 and the fleet comes to include 2 Douglas DC-8-54Fs, 2 DC-6As, 6 Learjet 23s/24s, 11 Beech 18s, and 3 Mitsubishi Mu-2s.

A DC-9-15 is purchased in 1986 and service continues apace in 1987. A Hamilton Turbolineer takes off from Memphis on October 8 with its tail stand—used to prevent the aircraft from tipping on its tail while being loaded—still attached. When advised of this fact, the pilot turns to return to the runway. The aircraft, however, stalls and crashes, killing the flyer.

In 1988, the company purchases the fitness certificate of **American International Airlines** and makes plans to restart it.

The 260-employee airline in 1989 operates a fleet of 34 aircraft, including 2 DC-8-54Fs, 3 DC-8-51Fs, 1 DC-9-15F, 11 Beech 18s, 1 Mu-2, 1 Cessna 310, 4 B-727-100s, 6 Learjet 23/24s, and 5 Learjet 25s. Having returned to drag racing, owner Kallita, in his car the *Running Hunter*, becomes the first in his field to drive 290 mph.

A total of 199.62 million FTKs are flown. Revenues total \$51.4 million and the operating profit is \$10.3 million.

In 1990, the fleet is increased by the addition of 1 DC-8-54F, 1 DC-8-73F, 1 DC-8-63F, 4 DC-8-55Fs, 1 DC-8-52F, and 1 Cessna 310. Three B-727-100s are withdrawn. At 199.52 million FTKs, cargo traffic is level.

In 1991, the company is reformed into Kallita Group. The name of the new holding company's airline division is changed to that of an earlier acquisition, **American International Airlines (AIA)**. Meanwhile, charter services continue via the Connie Kalitta Flying Services unit.

Operations continue over the next seven years. Donald L. Schilling is president of the charter division in 1997. The company provides both passenger and cargo services from hubs at Willow Run Airport, as well as Morristown, Tennessee, Brownsville, and El Paso, Texas, with a fleet of 19 Learjets, 11 Volpar Turboliners, 3 Mitsubishi Mu-2s, 3 Hansa Jets, 1 Piper Cherokee Six, and 1 British Aerospace BAe (HS) 125-700 Hawker.

On September 22, Conrad Kalitta signs a letter of intent to combine the Kalitta companies with Kitty Hawk, Inc. Kalitta will receive 5.1 million shares of Kitty Hawk common stock, \$22 million in cash, and a "significant management role" in the combined operation. At the same time and in a related transaction, **Kitty Hawk Air Cargo**, the airline operating subsidiary of Kitty Hawk, Inc., purchases 16 AIA B-727s for \$51 million in cash. The first three aircraft will start flying under their new livery on October 1, with the remainder arriving at approximately one per month thereafter.

The next day, a public offering of 4.1 million shares of common stock are sold by Kitty Hawk. Net proceeds of the equity offering and proceeds from a \$340 million offering of senior secured notes of the company (due in 2004) will fund the merger with Kalitta, retirement of existing debt, and for general corporate purposes. Late in the year, CKS and the other Kalitta concerns are officially acquired by Texas-based **Kitty Hawk Air Group**. All will be absorbed by the end of the first quarter of 1998.

CONQUEST AIRLINES: United States (1988-1997). After obtaining \$1.5 million start-up capital, former **Texas Airlines** CEO Victor Rivas and his brother Rafael set up Conquest Airlines at Beaumont, Texas, in February 1988. An order is placed, and then cancelled, for 4 CAT 200 modified Beech King Air 200s. During March, Chairman/CEO Rivas receives Conquest's Part 125 operating certificate from the FAA. A new order is made for 5 Beech 1900Cs, the first of which arrives at the end of the month, with the remainder delivered in April and May. Meanwhile, the first revenue flight is operated on April 14 to Austin.

With the other aircraft in hand, the company employs them during late spring and early summer in the inauguration of scheduled flights linking the company base with Corpus Christi. At the same time, orders are placed for 7 CASA/Nurtanio CN-235s. It is hoped they will arrive by August and allow the inauguration of services from Houston's Hull Airport to Dallas (DAL). When their arrival is delayed, the Beechcraft are employed instead. A \$922,000 net loss is suffered.

The 216-employee company goes public in May 1989, by which time 4 more Beech 1900s have been delivered. During the year, the schedule grows to include 90 departures per day from Beaumont to Abilene, Austin, Brownsville, Corpus Christi, Houston, Laredo, McAllen, San Angelo, San Antonio, and Tyler.

Passenger boardings reach 118,766 and revenues \$5.57 million. Start-up and operating expenses bring losses of \$712,127 (operating) and \$2.16 million (net).

In 1990, the carrier tenders takeover bids to **GP Express** and **Exec Express II**. Its own customer bookings accelerate to 156,658 and an

operating loss of \$1.6 million must be absorbed. Neither acquisition is completed by the 150-employee carrier. In **1991** the company returns its 9 Beech 1900s to their manufacturer, replacing them with 5 Fairchild Metro IIIs. The move leads to a court fight. Conquest Leasing, Inc. is formed on April 17.

Passenger boardings plunge 42.3% to 90,402 and revenues fall 26% to \$6.1 million. Expenses drop 44.9% to \$6.56 million and guarantee an operating loss of \$464,446. Unhappily, a net \$5.1-million net loss is suffered.

The legal matter with Beech is settled in Conquest's favor in early **1992**, at which point the carrier trades in its Metroliners and replaces them with 8 Beech 1900Cs, 2 Beech 1300s, and 1 Beech 58 Baron.

Customer bookings recover and grow by 15.3% to 104,249. Revenues descend 18.2% to \$8.4 million while costs rise. As a result, the operating loss is \$340,837. The \$7.8-million Beech settlement allows the posting of a \$6.9-million net profit.

From Birmingham, Alabama, on May 17, **1993**, Conquest inaugurates four daily nonstops to Mobile, thrice-daily nonstops to Little Rock, and thrice-daily nonstops to Greenville and Spartanburg. On June 16, President Rivas's company inaugurates daily nonstop roundtrips from Birmingham to Knoxville and Charleston, South Carolina.

In November, the carrier introduces a total of 21 daily nonstops from Sugar Land Municipal Airport at Houston to Austin, Dallas, and other Texas cities.

Overall, Conquest transports a total of 125,869 passengers, a 20.7% increase over the previous year.

Airline employment stands at 250 in **1994** and a new hub is opened at Austin, to which corporate headquarters are transferred. The fleet is altered again as 8 Metro IIIs replace the previous equipment. Flights also begin from San Antonio to the Mexican community of Monterrey.

Cofounder Raphael Rivas dies in June and the concern is merged with WICO holding Corp. of Niles, Illinois, a vending machine distributor. Flights to all locations outside of Texas are halted and, in September, WICO executives sell the aviation operations to a new group, Conquest Industries.

Still, customer bookings leap ahead by 27.7% to 160,730.

The fleet is reduced by one Metro III in **1995**. Service is maintained to Sugar Land, Abilene, Corpus Christi, Beaumont/Port Arthur, McAllen, San Antonio, Tyler, and Dallas, but it is severely trimmed. In February, service to Austin is reduced to twice daily and on April 30 the flight to Houston is suspended altogether.

On June 30, Conquest Industries officials and executives from **Air L.A.** begin merger discussions. Given all the difficulties faced by the concern, it is not surprising that enplanements for the year plunge 43.7% to just 90,530.

The company files for Chapter XI bankruptcy protection in January **1996**, listing liabilities of \$1 million to \$9.9 million and assets of \$1 million to \$9.9 million. Conquest continues to fly as it reorganizes.

In March, a letter of intent is signed with **Air L.A.** for purchase of that company. The deal is canceled in early April, but concluded, for \$6 million and assumption of debt, on June 22. James A. McLean becomes chairman with former **Wings West** President William Hirsh is appointed interim president of the new subsidiary.

Passenger boardings recover and require the addition of 2 more Metro IIIs. Conquest comes out of Chapter XI on December 9 and is able to report that bookings have grown 7.1% during these 12 months to 96,962.

Chairman McLean is appointed president/CEO of the reformed Conquest in January **1997** and his fleet includes 7 Metro IIIs. Rigid financial controls are instituted, the budget is trimmed, and a number of new executives are appointed, including W. Daniel Shields, the vice president-marketing. By now, over 90% of the carrier's customers are business travelers and an aggressive advertising and marketing program is undertaken by Shields to make certain that those numbers do not falter.

Destinations visited include Abilene, Austin, Beaumont/Port Arthur, Corpus Christi, Laredo, McAllen, San Angelo, San Antonio, and Tyler. Through the first quarter, McLean reports customer boardings of 21,657. Service from Austin to Tyler is offered five times a day as of June 23.

At the end of June, plans are announced for the inauguration of new or renewed services to New Orleans, Houston, Bryan, and College Station. These goals are not implemented as, once again, the company's finances fail, forcing it to shut down in August. Attempts at revival will be made.

CONSOLIDATED AIR LINES: United States (1935–1936). After a year of hauling newspapers from San Francisco, Consolidated is formed as an airline at Alameda on July 1, **1935** to offer scheduled passenger flights to the state capital at Sacramento, replacing those formerly provided by **Pacific Seaboard Airlines**.

Employing a Fokker Model 8 Super Universal and a Buhl Airedan, the carrier begins thrice-daily (except Sunday) roundtrip services in early September. The fleet is greatly enhanced by the addition of the Ford Tri-Motor 4-AT-16 on September 23. By year's end, a total of 1,388 passengers and 91 tons of express have been carried.

Although services are maintained, traffic is so poor that the carrier must shut its doors in early November **1936**.

CONSOLIDATED AIRWAYS (PTY.), LTD.: South Africa (1965–1966). Consolidated is set up by Louis Malan and other investors at Pietersburg in **1965** to operate nonscheduled flights throughout the northern Transvaal. Operations begin with 2 Piper PA-30 Twin Comanches, 2 Cessna 210s, and 1 C-320 Skyknight. Service continues for about a year.

CONSORCIO AVIAXSA, S.A. de C.V.: Hangar 13, Zona "D" Zona Hangares, Apto. Intal Co de Mexico, Mexico City, 15520, Mexico; Phone 52 (5) 756-0650; Fax 52 (5) 756-455; Code 6A; Year Founded 1990. CA is set up at Mexico City on May 5, **1990** as a subsidiary of **Aeroexo (Aeroejecutivos, S.A. de C.V.)**. Alejandro Morales Mega is chairman, with Eduardo Morales Mega as president. Revenue flights commence in September with a pair of Boeing 727-31s leased from the parent.

Charters (both passenger and cargo) and replacement services are flown on behalf of Aeroexo and by **2000** airline employment has grown to 375. The fleet now includes the original Boeings, plus 7 chartered B-727-276As. Destinations visited include Cancún, Chetumal, Merida, Monterrey, Oaxaca, Tapachula, Tuxtla Gutierrez, and Villahermosa.

CONSTANTA STATE AIRLINE: Zaporozhye Airport, Zaporozhye, 330013, Ukraine; Phone 380 (612) 604 323; Fax 380 (612) 688 423; Code UZA; Year Founded 1994. CSA is established in the early spring of **1994** to offer charter passenger and cargo services to domestic, regional, and international destinations. Viktor M. Gostishev is named CEO and is authorized to recruit a workforce that will eventually total 164. With 3 Antonov An-32s and 7 Yakovlev Yak-40s, revenue flights commence on June 1.

Service is maintained in **1995–1999**. During the latter year, 11,000 passengers are flown. The company employs 164 workers at the beginning of **2000**.

CONSTELLATION INTERNATIONAL AIRLINES, S.A.: Belgium (1995–1999). E. Serimozu founds CIA at Brussels National Airport in March **1995** to operate passenger charters and inclusive-tour flights around Europe and to North Africa. Serimozu is chairman and C. H. Heinzman is named director general. A leased Boeing 727-2X3 is acquired and inaugurates nonscheduled services in April.

Operations continue apace in **1996–1998**, during which years 2 Airbus Industrie A320-200s enter service and the Boeing is returned to its lessor. Enplanements during the latter year total 3.2 million.

Airline employment at the beginning of **1999** stands at 63.

Rising fuel prices and falling income force the carrier to cancel all flights as of December 4. After unfruitful deliberation as to the feasibility of a restart, the company shuts its doors the following week.

CONTACT AIR, LTD.: P.O. Box 5175, Fort McMurray, Alberta T9H 3G2, Canada; Phone (403) 743-8218; Fax (403) 743-8225; Code 3T; Year Founded 1995. Contact Air is set up at Fort McMurray in 1995 to offer regularly scheduled, third-level passenger and cargo services to domestic destinations, as well as on-demand charters. John Rodgers is managing director and he begins operations with a fleet of 2 de Havilland Canada DHC-2 Beavers, 3 Beech King Air 100s, 2 Piper PA-31-350 Navajo Chieftains, 1 Beech 99, and 1 Cessna 207A.

CONTACTAIR FLUGDIENST, GmbH. & CO.: Echterdingen Str. 30, Stuttgart, D-70599, Germany; Phone 49 (711) 1 676 541; Fax 49 (711) 1 676 565; Code VJ; Year Founded 1969. Contactair is established by Gunter Eheim at Stuttgart in 1969 to offer charter, air ambulance, and air taxi flights to surrounding West German communities. In 1974, the carrier begins scheduled replacement operations to Munster and Hamburg on behalf of the new **Deutsche Luftverkehrsgesellschaft, GmbH. (DLT)**. Services are maintained throughout the remainder of the decade and in the early 1980s the 40-employee company offers not only daily scheduled flights between Munich and Munster, but continues its charter and contract service work, with emphasis on executive flights.

A British Aerospace BAe Jetstream 31, the first production model, joins the fleet on December 15, 1982, followed by 2 more in 1983. The fleet in 1984 comprises 2 Gates Learjet 35As and 3 British Aerospace BAe Jetstream 31s.

In 1986, Managing Director Heinz Landes enlarges his fleet through the purchase of another Learjet 35A, a Beech King Air 90, and a Super King Air 200. A fourth Jetstream 31 is added in 1987. In 1988–1989, 3 new de Havilland Canada DHC-8-102s join the fleet, leased from **Tyroler Airways, GmbH.**

A new group of replacement services are now offered on behalf of **Deutsche Luftverkehrsgesellschaft, GmbH. (DLT)** In 1990, the King Air 90 and all but 2 Jetstream 31s are removed as Europe's first 2 DHC-8-301s enter service and 1 Super King Air 200 is purchased.

The fleet in 1991 includes 2 leased Jetstream 31s, 2 chartered DHC-8-102s, and 2 owned DHC-8-301s. **Deutsche Luftverkehrsgesellschaft, GmbH. (DLT)** changes its name to **Lufthansa CityLine, GmbH.** However, contract services for the major's subsidiary continue as before.

Orders are placed in the spring of 1992 for 2 Dornier 328s and services are initiated from Munich to Lugano. Two DHC-8-311s enter service and, in December, a \$14-million order is placed for another DHC-8-301.

Airline employment in 1993 stands at 185. While attempting to land at Paris (CDG) in darkness and fog on January 6, a DHC-8-301, inbound from Bremen on behalf of **Lufthansa CityLine, GmbH.** with 22 aboard, crashes short of the runway (4 dead). What would have been the fifth DHC-8, a Dash-311, is delivered in August.

The number of employees in the workforce falls to 170 in 1994 and the fleet includes 2 DHC-8-102s, 1 DHC-8-301, and 3 DHC-8-311s. One Jetstream 31 is removed and the second is subleased to the Danish carrier **Sun Air of Scandinavia, A.S.** As before, operations continue.

As **Lufthansa CityLine, GmbH.** moves towards all-jet status in 1995–1996, it turns over its Fokker 50s to Contactair, which in turn retires its DHCs and Jetstreams. In May of the former year, the carrier signs a franchise agreement with **Deutsche Lufthansa, A.G.** Wearing Team Lufthansa colors, Contactair operates flights for the major and **Lufthansa CityLine, GmbH.** from Stuttgart to Munich, Brussels, Cologne, Dusseldorf, and Munster. It also flies from Bremen to Munich and Paris and from Munich to Geneva, Paris, Marseilles, and Bologna.

By the beginning of 1997, President Eheim's fleet, now largely operated in Team Lufthansa livery, includes 2 Beech King Airs, 1 Cessna Citation II, and 11 Fokker 50s. **Lufthansa CityLine, GmbH.**'s twelfth and final Fokker 50 is received late in the first quarter.

Flights continue in during the remainder of the decade.

CONTI-FLUG INTERNATIONAL AIRLINES, GmbH.: Germany (1964–1994). Conti-Flug is formed at Cologne by Baron von Ketteler in 1964 to operate international charters. Nonscheduled services are undertaken with a Hawker Siddeley HS 125 executive jet and are maintained for most of the next three decades. During those years, the fleet is upgraded by the addition of another HS 125, 2 Beech Super King Air 200s, 1 Canadair CL-601 Challenger, and 1 Learjet 35A.

A British Aerospace BAe 146-200 is leased in 1991 as Managing Director Markus Schacher's German charter operator begins to provide dedicated British Aerospace BAe 146-200 weekday roundtrip charters on behalf of Airbus Industrie between Hanover and Toulouse. It also offers nonscheduled weekend incentive flights to Riga, Vilnius, and Venice. Negotiations are completed and an announcement is made that the carrier will become the third (actually, fourth) operator to begin scheduled services into the new London City Airport.

A second BAe 146-200 is purchased in May 1992, allowing flights to London (LCY) to begin from Berlin (Tempelhof Airport) on October 26. Conti-Flug is the first scheduled jet operator to do so. Flights to Riga and Vilnius are ended due to lack of traffic and increased insurance costs associated with doing business in volatile Latvia and Lithuania.

Airline employment in 1993 stands at 130. The company receives significant domestic competition from **Deutsche Lufthansa, A.G.**, which also flies twice daily between Berlin and London (LHR), and begins to suffer financial difficulties. Still, 40,000 passengers are transported on the route to London City.

Continuing to suffer fiscal reversal in 1994, Conti-Flug begins to make changes in its executive management. Baron von Ketteler warns Managing Director Schacher and CEO Ernst von Dornberg that new sources of income must be found to avoid disaster. During the summer, the profitable shuttle service operated between Hamburg and Toulouse on behalf of Deutsche Aerospace is lost, along with aid from those few banks still offering support. As a result, the 30-year old airline ceases scheduled operations in September and files for bankruptcy.

CONTINENTAL AIR, LTD.: India (1991). In light of the need for additional capacity on India's short-haul routes, the government, in 1990–1991, encourages a number of small taxi operators to expand their operations and become regularly scheduled carriers. One of those electing to make the effort is Continental, which begins the provision of passenger services from Bombay during the latter year.

Employing a Boeing 720B and several Fokker F.27-200 Friendships, CA inaugurates services to Delhi, Hyderabad, Nagpur, and other points. Unable to achieve economic viability, the concern fails within months of start-up.

CONTINENTAL AIR CHARTER: United States (1948–1953). John Belding forms CAC at Miami in 1948 to offer nonscheduled passenger and cargo flights throughout the eastern U.S., with special emphasis on service between Pittsburgh, Buffalo, and stops in Florida. Operations commence with Curtiss C-46 Commandos reconfigured for passenger seating.

Operations continue without incident until December 30, 1951, when a C-46 charter with 38 passengers is reported missing while on a Miami–Buffalo run. Government officials and the media report the aircraft as being down 100 mi. N of Pittsburgh, possibly in Lake Ontario. As searchers frantically seek survivors, a passenger, upon hearing the news, calls from Miami the next morning to report that the Curtiss has simply been delayed by mechanical repairs and will arrive in New York later in the day.

The false alarm is followed by a real tragedy a year later. En route from Pittsburgh to Buffalo on December 29, 1952, a C-46 with 40 aboard crashes near Salamanca, New York, in a blizzard (26 dead); George Albert, one of the survivors, is able to make his way to a farmhouse through the snow for aid.

Unable to survive the affects of this disaster, CAC closes down in 1953.

CONTINENTAL AIR EXPRESS: United States (1929–1930). CAE is established at Los Angeles, California, in early summer 1929 to offer scheduled passenger and air express flights to San Diego via Bakersfield, Fresno, and Alameda. Acquired from **Scenic Airways**, the Ford 4-AT-24 is employed to begin service on September 14. Revenue operations continue until November 6, 1930.

CONTINENTAL AIR LINES (1): United States (1927–1928). On October 10, 1927, CAL is organized at Cleveland, Ohio to bid for the U.S. Post Office's Contract Air Mail Route No. 16 (CAM-16) and to offer scheduled multistop mail and passenger service over it to Louisville.

Having won the bid, a fleet of 3 Travel Air 6000s is assembled and revenue flights commence on August 1, 1928 via Columbus, Dayton, and Cincinnati. The Columbus–Cleveland leg is stretched northeast to Akron on November 15.

On Thanksgiving Day, November 25, pilot Tilden "Pete" Johnson, en route to Louisville from Cleveland with mail and no passengers, is caught in a snow squall west of Massillon at Lebanon and killed when his Travel Air crashes.

On December 31, the small carrier is one of several taken over by Universal Aviation Corporation, which will operate it as a subsidiary division of its **Universal Air Lines System**.

CONTINENTAL AIR LINES (2): United States (1937–1958). On July 1, 1937, **Varney Air Transport** is renamed Continental Air Lines. Passenger, cargo, and mail operations are now relaunched under a new marketing slogan, "Fly the Old Santa Fe Trail." Operations are continued apace by President Louis Mueller and Executive Vice President Robert Six over the 520-mile airmail route AM-29. Running from Pueblo, Colorado to El Paso, via Albuquerque, and from Pueblo to Denver, the company flies the route with a fleet of 3 Lockheed Model 12 "Baby Electras" received the previous month, plus a Lockheed Model 5 Vega. Company headquarters are transferred to Denver on October 31.

Six succeeds Mueller as president/CEO on February 3, 1938. On February 15, the Denver–Albuquerque frequency is increased. A regional identity is promoted with the unveiling of a new American Pueblo Indian head insignia. Former **Transcontinental and Western Air (TWA)** official Oscar R. "Ted" Haueter is appointed vice president operations.

Continental receives "Grandfather rights" on its routes under the new Civil Aeronautics Act as of July 11, effective November 20. An application—in fact, the first—is also filed with the new Civil Aviation Authority (CAA) for unclaimed AM-43, a 430-mile route from Pueblo to Wichita via Garden City, Kansas. With the help of Lehman Brothers, a \$280,000 public stock offering is made late in the year. The first profit is reported on December 31.

The first of 2 Lockheed Model 14H Super Electras purchased from **Northwest Airlines** arrives in April 1939. A chartered Lockheed Model 10E Electra is obtained on May 5, while the second Super Electra is delivered during June.

After a year of litigation and challenge caused as much by government bureaucrats as competitors, the Pueblo to Wichita Lockheed Vega flights commence on July 5. Late in the year, 2 Lockheed Model 14 "Super Electras" are acquired; they replace the Electra Juniors on the main north to south route and allow the Model 12s to begin flying to Wichita.

On May 14, 1940 a new service is opened from Albuquerque to El Paso, mostly over poorly settled territory, with stops at Roswell Hobbs, and Carlsbad, site of the caverns. The fleet is further strengthened in August when 3 Lockheed Model 18 Lodestars are purchased, replacing the Model 12s.

In late fall, stops are added at Las Vegas, New Mexico, and La Junta, Colorado. A total of 17,232 passengers are carried on the year, providing revenues of \$218,000. Still, most of the company's income is derived from mail contracts, which render \$491,000 in subsidies.

In March 1941, via Lehman Brothers, another public stock offering nets \$170,000; additional financing is obtained from a \$425,000 Chase Manhattan Bank loan. The funds are employed to obtain 6 additional

Lodestars. On April 27, the Indian head logo is replaced with a new and modern Thunderbird insignia, which is among the first service marks registered with the U.S. Patent Office.

On June 21, the CAB awards Continental an extension of its Wichita route to Tulsa. During the summer, a new maintenance facility is occupied at Denver and the new Model 18s are delivered. On August 21, a San Antonio route is requested and, on December 15, eight days after the Japanese attack on Pearl Harbor, the company's new airliners initiate the Tulsa service. On Christmas Day, the airline's first female flight attendant begins work.

A total of 20,293 passengers are carried on the year.

Full stewardess service becomes available as of January 5, 1942—just in time to be discontinued as a wartime luxury. On February 16, the U.S. Army Air Forces (AAF) contract with Continental to begin a bomber modification program in Denver, initially at the United Air Lines hangar. The first job entails changes to 49 Boeing B-17 Flying Fortresses. Although still essentially a local service carrier, Continental responds to wartime requirements in March and begins to fly a transcontinental Air Transport Command charter cargo route between San Francisco and Harrisburg, Pennsylvania.

One-half of the carrier's Lodestar fleet is requisitioned by the government in June. In September, Robert Six, along with **American Airlines'** C. R. Smith, joins the government's Ferrying Command. He is sworn in as a captain and stationed in New Caledonia. In his place, Terry Drinkwater, executive vice president, is left in charge. Work is undertaken on a company-owned modification center in Denver for military aircraft work. On December 11, a Denver–Kansas City route (AM-60) award is received from the CAB. Passenger boardings total 11,400.

In 1943, Six is shifted to the Caribbean, where he becomes responsible for maintaining the military air routes between the U.S. and Brazil. Under the direction of the company's chief engineer, Stanley Shatto, the modification center in Denver is occupied on October 1; 1,000 B-17s will eventually be worked on in the \$5-million, 2-hangar facility. Two weeks later, on October 15, the fleet is strengthened when the Army Air Forces (AAF) releases a Lodestar for domestic operations. On December 8, a new CAB route award from Hobbs to San Antonio is announced.

In February 1944, the modification center begins work on B-29 changes. The contract does not open smoothly, as Acting President Drinkwater and Chief Engineer Shatto alienate workers; production rates decline and a job action is threatened. Lockheed Lodestar service is inaugurated over the Denver–Kansas City via Topeka AM-60 route on March 1.

In the spring, AAF Commanding General Henry "Hap" Arnold sends Colonel Six back to Denver to resolve differences at the modification center; Six accomplishes his mission through a show of military authority. In May, flights begin from Hobbs to San Antonio via Midland, Odessa, Big Spring, and San Angelo, and direct from El Paso to San Antonio. On June 11, Six is released from the military. Upon his return, Drinkwater resigns and is subsequently hired by **American Airlines**.

The first of several Douglas C-47s (military DC-3s) are obtained in an AAF-sponsored lottery at the manufacturer's Santa Monica facility; returned to Denver, they are modified to civil standard and the first enters service on December 22.

Enplanements are now 51,800 and, for the first time in company history, passenger income (\$846,000) exceeds mail subsidy (\$687,000). In addition, wartime government contracts have provided the company with \$900,000 in cash, allowing the debt to be reduced to only \$500,000.

Additional modified C-47s join the fleet in the first half of 1945 and 11 are available by June 30. From its offices in the Municipal Air Terminal at Denver, Continental's officers direct operations over a 2,327-mile route network covering five states. On July 1, nonstop direct Denver to Kansas City flights begin, together with a service featuring one stop at Topeka.

Later in the summer, a new route award is received and, following the lifting of the wartime priority reservation system on October 15, frequencies are initiated from El Paso to Tulsa via Wichita Falls, Lubbock, and Oklahoma City. The last Lodestar is retired on December 5.

Continental is the only large U.S. airline not to jump on the postwar bandwagon and seek foreign routes from the CAB.

Passenger boardings for the year climb to 167,000 and revenues from them total \$3.24 million; government mail payments provide another \$637,000.

The company's first air freight is carried on January 1, 1946. An AM-29 expansion is inaugurated on March 5; company DC-3s begin flying from Hobbs to Tulsa. Direct El Paso to Tulsa service is also started, being followed on July 16 with direct flights from Denver to Oklahoma City.

On August 16, upon the advice of Douglas official Edward Burton, orders are placed for 5 Convair CV-240s. An employee contest is held to name the Douglas transports and as a group, the title "Skystreamers" is applied. Fourteen are available by late December.

In 1947, the marketing initiative "The Blue Skyway" is adopted for Continental Air Lines; the DC-3 Skystreamers are appropriately painted. On April 16, 1948, Lawton and Fort Sill stops are added to the Tulsa-El Paso route, along with Socorro, Truth or Consequences, Los Cruces, and Raton. The first CV-240 is delivered on July 23 and, when the initial unit is placed into service on December 15, the carrier is able to announce that it is first to install radar equipment for every flight. Coach-class service is introduced at year's end.

In the summer of 1949, the CAB refuses President Six's attempt to take over the certificate of **Parks Air Lines**, preferring to give it to the new entrant, **Ozark Air Lines**, instead. On July 15, Continental follows **Capital Airlines** in introducing coach-class services, beginning with \$22 one-way Denver-Kansas City flights.

VOR (variable omni-range) direction-finding equipment is installed systemwide with the project completed on October 15, 1950. At this time, the CAB certifies Continental as the first carrier to be fully operational with the new technology.

As a result of the CAB's February 8, 1951 ruling in the Southern interchange case, Continental is able to join with **American Airlines** and **Braniff International Airways** in exploratory flights aimed at opening that service. On February 28, \$7.6 million in orders are placed for 7 CV-340s and 2 DC-6Bs; the expenditure almost equals the carrier's entire gross income for the year.

The government regulators, however, turn down an April 5 request to purchase fiscally distressed Minneapolis (MSP)-based **Midwest Airlines**. **Braniff International Airways** withdraws from the southern transcontinental arrangement and surrenders its authority to Continental. The action receives CAB approval on July 13 and is tantamount to authorizing Bob Six's airline to start service from San Antonio to Houston.

The carrier begins the El Paso-Houston service on July 26. The joint interchange through service flown with AA (and employing the latter's DC-6Bs) to Los Angeles is known as Arrow Service. Continental places orders for 2 of its DC-6Bs on October 10, but, on October 22, the CAB rejects a company request to take over **Mid-Continent Air Lines**.

Via an interchange with **Mid-Continent Air Lines**, El Paso to St. Louis service begins on February 1, 1952. Not having been merged with anyone, **Midwest Airlines** fails on May 16. **Braniff International Airways** is allowed to acquire **Mid-Continent Air Lines** on August 16. During the year, President/CEO Six makes a spirited application during the CAB hearings into the celebrated Denver Service Case.

Manhattan, Kansas, joins the route network on April 6, 1953, followed by direct Tulsa to Kansas City flights which begin on July 1. The 2 DC-6Bs ordered in 1951 arrive and are placed into service on the California-Texas interchange route. At the same time, the first of the 7 CV-340s requested the same year also join the fleet.

Via an interchange agreement with **United Air Lines**, Seattle and Portland to Tulsa service is inaugurated on September 15. Continental leases 2 DC-6Bs from **United Air Lines** to use on the new frequency until its own can be delivered. On December 10, officials of the company sign merger papers with those from **Pioneer Air Lines**, which continues, initially, as a subsidiary under its own name.

Flight 46, a CV-340 with three crew and eight passengers, fails its initial climb away from Midland, Texas, on March 16, 1954, and makes a belly landing in a field 3.5 mi. NE of the runway; although the aircraft must be written off, there are no fatalities.

On September 1, Socorro, Truth or Consequences, and Los Cruces service is halted and replaced by frequencies to Alamogordo. The CAB approves the **Pioneer Air Lines** takeover on December 7 and among the officers who come into Continental's ranks through this acquisition is the company's new vice president-finance, Harding Lawrence, future president of **Braniff International Airways**.

To operate the new local service routes throughout Texas and New Mexico, a fleet of Convair CV-440s is ordered at year's end.

An owned DC-6B arrives on January 5, 1955; employed on the interchange service with **United Air Lines**, it is painted with dual markings. The first important and direct postwar route awarded to the airline occurs on November 14. As the result of its finding in the Denver Service Case, the CAB certifies the company to fly between Chicago and Los Angeles via Denver and Kansas City, with nonstop rights between city pairs on the route.

Although challenged in court, the award will turn the small local company founded by Walter Varney into a major U.S. trunk line. So buoyed are company officials that, in December, they place \$64 million in orders for 24 new airliners, including 4 Boeing 707s, 15 Vickers Viscount 812Ds, and 5 DC-7Bs.

Continental becomes the launch customer for the Convair CV-440 Metropolitan on April 1, 1956. At the end of the year, the company begins to advertise plans for an upcoming special service to Los Angeles.

On January 17, 1957, the U.S. Court of Appeals upholds the carrier's right to offer a special Chicago-Los Angeles service. The first DC-7B arrives on April 5 and is christened *City of Los Angeles*. On April 28, it begins Gold Carpet Service between Chicago and Los Angeles via Denver; nonstop and one stop (Denver) frequencies are offered. The service is very elaborate, featuring gold-helmeted, welcoming ground crews in California. At travel agencies and other company stations, midjets—outfitted in gold-colored spacesuits with finned helmets and smoking rocket backpacks—are available to promote the new routing. On July 8, an alternate stop becomes available at Kansas City.

Enplanements for the year total 829,000.

On January 1, 1958, Harding Lawrence succeeds Clarence C. West as executive vice president. On February 14, Continental receives its first 812D, becoming the second major U.S. airline (after **Capital Airlines**) to take delivery of the Vickers Viscount British-made turboprop. In the spring, Continental applies for new routes as the CAB considers the Southern Transcontinental Service Case.

All ground crew, reservations personnel, and flight crews receive new uniforms on May 1. Vickers 812D Jet Power Viscount II service is inaugurated on May 28 on the Chicago-Los Angeles route with stops in such cities as Kansas City and Denver. The DC-7Bs are employed exclusively on the nonstop Illinois-California frequencies.

The CAB, on July 22, authorizes the carrier to operate nonstop flights from its Dallas (DFW) hub to Santa Fe, Albuquerque, Abilene, Amarillo, Midland/Odessa, Lubbock, and El Paso. During the year, the two names "Air Lines" are dropped in favor of a single **Continental Airlines** title.

CONTINENTAL AIR SERVICES: United States (1965-1975). Agency for International Development (AID) and Central Intelligence Agency (CIA) contractor William Bird & Son sells its Vientiane (Laos)-based air transport division to **Continental Airlines** on September 1, 1965 for over \$1 million. Bird & Son, back on May 20, have already lost the first man to the Pathet Lao when a pilot, Ernest C. Brace, is captured at a small Laotian airstrip. He will become the longest-held "civilian" POW of the Vietnam conflict.

The contractor's general manager, Robert L. "Dutch" Brogersma, a CIA and **Civil Air Transport (CAT)** veteran from whom the Bird enterprise had originally been purchased in 1956, is kept on to lead the

350-employee Continental Air Services. CAS had been formed in April as a wholly owned, Nevada-registered subsidiary of Continental Airlines.

Brogersma's affiliation with CAS now leads to one of the stranger events in covert air operations—competition between an established but secret spy airline, Air America, and a private, public carrier, Continental. In order to avoid revelation of Air America's real owners—knowledge that would surely become public should Continental sue the government to gain a share of the AID contracts being awarded for the transport of goods into Laos—CAS is allowed by the CIA to receive, under public contract, AID airlift business.

The company, originally set up to operate aircraft and ground facilities in support of construction and engineering businesses and the energy industry, is now soon divided into two overseas divisions. The first, stationed at the old Bird facility at Vientiane, operates under contract to AID. The second division, based at Saigon, is chartered to **Air Vietnam, S.A.**, flag carrier for the Republic of Vietnam. Airline employment will reach 800.

The inherited fleet includes 5 each Douglas DC-3s and Curtiss C-46s Commandos, 6 Dornier Do-28s, 3 Scottish Aviation Pioneers, 12 Pilatus Porters, plus a number of Cessnas and helicopters. Those operating from Laos are employed, sometimes with and sometimes in competition with, **Air America**, to fly supplies and men to provincial destinations.

Those supplementing the national carrier of South Vietnam undertake missions into the mountainous regions of the country as well as other nonmilitary and quasi-military delivery services in support of the government. Significant amounts of supply work are accomplished for the American RMK-BRJ construction group.

Flights continue apace for the next decade. An average of 4,000 hours per month is logged; upwards of 20,000 passengers and 6,000 tons of supplies are transported every 30 days. On September 30 of the inaugural year, the company takes delivery of the first production Lockheed L-100, a civilian derivative of the C-130 Hercules. It will be flown over Laos.

Flights continue over the next two years, during which two aircraft are lost in fatal accidents. A DC-3 with two crew crashes at Sam Neua, Laos, on April 17, 1966 while on a supply drop; there are no survivors. After suffering the loss of an engine, a C-46D with five crew crashes near Phu Cum, Laos, on August 13, 1967; there are no survivors.

On April 11, 1968, CAS provides support to Bangkok businessmen who form the air taxi operation **Bira Air Transport, Ltd.** at Don Muang Airport to provide passenger and cargo flights about Thailand. Thai citizens hold 70% shareholding with CAS the remainder. Price Bira, for whom the company is named, is elected president by the combined board of directors. Twin Beech and Pilatus Porter equipment is leased from CAS.

While making an emergency landing in northeast Thailand on January 6, 1969, a DC-3 overcrowded with 55 aboard, crashes; there are no survivors. In August, fearful of its neutral stance in the Vietnam War, the Swiss government embargoes the delivery of further Porters to **Air America** and CAS. Finally, by December, Continental Air Services is able to convince the Swiss that its Porters are employed only in refugee work and not as troop transports. A total of 73 CAS personnel are now present at Vientiane.

In October 1970, the Americans create **Air Alliance**, a CAS subsidiary designed specifically to assist in the organization and operation of Phnom Penh-based **Khmer Akas (Cambodia Air)**. Initial DC-3 service from Battambang is inaugurated on October 21. Until the Khmer Rouge takes over the country, this is Cambodia's single air carrier. Demilitarized, the prototype of the first Au-23A armed Pilatus PC-6C Porter, built in Maryland by Fairchild, is turned over to CAS in March 1971. It will crash before year's end. During the year, three additional C-46s are received.

CAS, itself, is closed down in July 1972, at which point Continental Chairman Robert Six reports that, since 1965, CAS has generated \$24,288,000 in AID contracts. **Air Alliance**, meanwhile, continues its

southeast Asian operations until May 26, 1975 when its operations are halted in response to increased Pathet Lao activities and student demonstrations. **Air Alliance** is disbanded on December 19.

CONTINENTAL AIRLINES: P.O. Box 4607, 2929 Allen Parkway, Houston, Texas 77019, United States; Phone (713) 834-5000; Fax (713) 523-4085; <http://www.flycontinental.com>; Code CO; Year Founded 1958. Robert Six's steadily growing **Continental Air Lines** is renamed Continental Airlines during 1958. The Dallas–Albuquerque route award is officially confirmed on February 12, 1959 and in April the carrier inaugurates new nonstop routes between Dallas (DFW) and the other Texas and New Mexico cities authorized. When the CAB opens its Transpacific Route Case, Continental applies for flights to Honolulu.

Having meanwhile completed its premier flight on March 25, the first of 5 Boeing 707-124 Stratoliners is delivered on April 19, followed by a second on May 27. The aircraft are painted with a streamlined thunderbird logo on the forward and aft fuselage atop a red, white, and blue color scheme completed with a gold upper tail. Inside, the first-class lounge features television.

These pure jets are employed to launch nonstop daily Golden Jet 707 service over the Chicago to Los Angeles route on June 8. The frequency is increased to thrice daily on June 22.

The Boeings begin stopping at Kansas City and Denver on August 15 with six daily frequencies offered from Illinois to California and back beginning on September 5. With five jetliners now available, the carrier is able to sell many of its piston-engine aircraft as well as two Viscount 812Ds.

During the fall, President/CEO Six accepts an invitation to address the Newcomen Society in New York concerning the history of his airline. As is the Society's custom, Six's remarks are published as a small pamphlet, *Continental Airlines: A Story of Growth*.

Revenues for the year allow record profits of \$4 million (operating) and \$1.7 million (net).

Early in 1960, President/CEO Six turns down a serious offer from Howard Hughes to take over leadership of financially distressed but larger **Trans World Airlines (TWA)**. A Viscount 812D crashes while landing at Tulsa on February 9; although no one is injured, the plane is badly damaged. The fifth B-707-124 arrives on March 17.

While refueling a Viscount 812D at Lubbock, Texas, on June 8, an attendant inadvertently backs into a rotating propeller and is badly injured. Employing DC-7Bs retired from the Chicago–Los Angeles service, Continental, on July 1, doubles service on its interchange route with **American Airlines** between Houston and Los Angeles, adding a stop at San Antonio in the process. Between June 30 and October 10, the company's flight engineers stage a job action, the first in the airline's history.

Willing, in light of its growth, to withdraw from a number of local service routes, the carrier, on November 2, is allowed by the CAB to transfer its 10-city Denver to Tulsa route to **Central Airlines**. On November 17 in the Southwestern Area Local Service Case, a CAB examiner suggests that the company also surrender authority to 10 other destinations in Texas, Colorado, and New Mexico. Passenger boardings for the year are 1,337,000.

A B-707-124, with 24 aboard, suffers an in-flight engine fire over Rockford, Illinois, on January 9, 1961; the plane is able to land safely at Chicago. Although Continental is denied a Pacific route when the Transpacific Route Case is settled early in the year, it does receive a new domestic award when the CAB closes its Southern Transcontinental Service Case on March 13.

The **American Airlines**–Continental interchange agreement California–Texas, initiated in 1951, ends on June 11 when Six's aircraft begin through flights from Los Angeles to Houston via Phoenix, Tucson, El Paso, and San Antonio. Also in June, orders are placed for 4 Boeing 720Bs.

On August 3, Flight 54, a B-707-124 with 73 passengers en route to Houston from Los Angeles, is hijacked by ex-convict L. Bearden and his son Cody, 16, who board the craft at Phoenix and order the pilot at gun-

point to fly to Havana. Both are seized during an El Paso refueling stop after FBI and border patrol marksmen cripple the plane by shooting out its tires as it attempts takeoff.

The U.S. as yet does not have an air piracy law. Therefore, Bearden will be convicted of extortion and "intrastate transportation of a stolen aircraft" and sentenced to 20 years in prison; his son Cody will receive a three-year term in a juvenile facility.

Also in August, the carrier seeks route authority to the U.S. East Coast. The route exchange with **Central Airlines** takes effect on December 1, the same day Continental introduces economy-class service on its main routes. After six months of discussion, President/CEO Six joins George "Ted" Baker, CEO of **National Airlines**, on December 12 in announcing a merger. **Frontier Airlines (1)** owner Maytag secretly purchases **National Airlines**, however, and the merger possibility dissolves.

On May 22, 1962, just before boarding Flight 11, a B-707-124 with 8 crew and 36 other passengers, passenger T. G. Doty purchases dynamite and a \$275,000 insurance policy. At 39,000 feet over a point approximately 5 mi. NNW of Unionville, Missouri, en route from Chicago (ORD) via Kansas City to Los Angeles, Doty sets off his bomb in a towel container in the right rear lavatory. The resulting blast destroys the jetliner in midair, killing almost everyone aboard. One passenger is actually found alive in the wreckage, but he will die within 2 hrs.

Doty's suicide-for-insurance plot marks the first successful sabotage of a commercial jet airliner. The tragedy is also the first fatal accident in Continental's 24-year history and, as a result, the carrier's order for 4 Boeing 720Bs placed earlier in the year is increased to 5.

Equipped with fan-jet engines, the carrier's first Boeing 720-24B (720B) enters service on June 3. The jetliner introduces the carrier's new black, white, and gold livery. When the captain's attention is diverted during the takeoff of a Viscount 812D, with 2 other crew and 13 passengers from Amarillo, Texas, on July 8, the plane, with 16 aboard, returns to the runway, where the propellers from Nos. 2 and 3 engines hit the pavement. The aircraft is returned to the gate, with no serious injuries reported.

The fourth B-720B is delivered the next day. The new plane inaugurates the company's first pure jet service at Dallas, Midland, and Albuquerque on July 13.

A three-tier tariff schedule is introduced in August: first class, business class, and jet economy class. On September 8, the Continental Casualty Company sues to deny payment of benefits to the widow of bomber Doty. Slightly altered to change the names and provide a better ending, the entire episode will appear in Arthur Hailey's 1968 novel *Airport*.

Coming in from Texas on January 28, 1963, a Viscount 812D with three crew and five passengers crashes while on initial approach to Kansas City; there are no survivors.

Following its February 1 finding in the Southwestern Area Local Service Case, the CAB orders Continental to divest itself of 14 unprofitable local feeder destinations in Texas, New Mexico, and Colorado and to give up its government subsidy for their maintenance. It is allowed to retain stops at Amarillo, Midland, and Odessa. Corporate headquarters are moved to Los Angeles on July 15.

Also in July, a deposit of \$550,000 is made for 3 Anglo-French Concorde; no SSTs will be delivered and the money buys the carrier excellent publicity at the time. The CAB final order calling upon the carrier to divest itself of 14 southwestern destinations is made on October 11. By November 12, Continental has transferred 14 local southwestern destinations to **Frontier Airlines (1)** and **Trans-Texas Airways**.

The CAB concludes its Transpacific Route Case in November and denies all requests for California to Hawaii service.

Enplanements total 1,690,200 during the 12 months and the net profit is \$2.41 million. A total of \$389,771 is earned from charter and contract service flights.

Airline employment in 1964 stands at 3,632 and the fleet includes 26 aircraft. That number is reduced by one in March as the DC-7B *City of Los Angeles* is withdrawn. In May, Continental obtains a U.S.

Military Airlift Command (MAC) contract to ferry soldiers to and from the Orient.

A pair of Boeing 707-324Cs are acquired and employed to begin this service from California's Travis AFB on September 4. Initial roundtrip routes extend from the Norton and El Toro military bases (near Los Angeles) to Honolulu or Anchorage and hence to Taipei, Okinawa, Tokyo, Clark AFB (Philippines), Saigon, Bangkok, Danang, and Cam Ranh Bay. The operations to and in the Far East will continue for a decade.

Domestically, a sixth Boeing 720B enters service. Executive Vice President Lawrence resigns at the end of the year and is succeeded by former **Trans World Airlines (TWA)** official Alexander Damm.

Passenger boardings jump 6.1% to 1.81 million. Overall revenues advance 12.5% to \$88 million, including a \$3.96-million increase in charter and contract service operations. Record net profits of \$5.68 million are banked.

The workforce in 1965 is up to 4,143. In March, orders are placed for 12 DC-9-10Cs and Harding Lawrence becomes president of **Braniff International Airways** on April 5. Meanwhile, former presidential press secretary Pierre Salinger joins the board of directors for a two-year stint. The Nos. 1 and 2 engines of a B-720B, with 22 aboard, fail during the plane's May 3 takeoff from Los Angeles; no one aboard is hurt.

Additional Boeing 707-324Cs begin to join the fleet as the Vietnam airlift is expanded from McGuire AFB, New Jersey, and Kelly AFB, Texas. The additional Boeing long-haul equipment allows the carrier to undertake 50 inclusive-tour flights to European destinations such as Copenhagen, Rome, Paris, Frankfurt, and London. As the result of Salinger's assistance and Chairman Six's persistence, the carrier now receives a military contract to provide air transport services within Southeast Asia.

Coming in from Los Angeles on July 1, Flight 12, a B-707-124 with 6 crew and 60 passengers, overshoots the runway while landing at Kansas City and strikes an earthen mound; there are no fatalities and injuries are minor.

While descending to Leavenworth, Kansas, on August 17, a B-720B with 110 aboard must take evasive action to avoid a midair collision.

On September 1, the subsidiary **Continental Air Services** is established at Vientiane, Laos, to take over the air transport division of William Bird & Son. CAS will operate in concert with the Air America, the CIA's secretly operated airline, but will not, officially, engage in any CIA activities.

To continue its lure to businessmen travelers, the company joins others in promoting the sexiness of its stewardesses; it even runs a magazine ad showing a female flight attendant's backside as an on-board attraction. On October 17, a B-707-324C with 114 aboard encounters clear air turbulence over Glenwood Springs, Colorado; injuries are minor.

On the last day of the year, the fleet includes 26 aircraft. Enplanements for the year total 1,992,000 and cargo also rises. Revenues swell 32% to \$116,772,000, passing the million-mark in income for the first time in the company's history. Net income doubles to \$12.1 million.

Pioneer Louis H. Mueller resigns as board chairman on February 28, 1966 and, following its final shuttle run from Denver to Colorado Springs, the last DC-3 is withdrawn in April. The first DC-9-10C enters service on April 10; joined by others of its type, it will replace the carrier's Viscount 812Ds, which are sold to **Channel Airways, Ltd.** of the U.K. in November.

Meanwhile, the DC-9-10s offer Golden Jet Service to communities losing their British-made turboprops. A \$600,000 refundable deposit is made for Boeing's SST. A net profit of \$17 million is reported.

New liveries are introduced on company aircraft in March 1967, timed to coincide with a new Discover America service while, in April, Continental is awarded a new route to the Pacific Northwest. Simultaneously, as the result of the bankruptcy of the supplemental carrier **Transocean Air Lines**, the U.S. government is forced to find some other concern to provide air transport in the Marshall, Caroline, and Mariana Islands, collectively known as Micronesia.

In the spring, the U.S. Interior Department reviews bids and chooses to offer its contract to a new firm, **Air Micronesia**, which is a partnership between **Aloha Airlines** (20%), Continental Airlines (31%), and the United Micronesia Development Corporation (48%). The UMDC will eventually come to control 60% of "Air Mike," but the carrier itself will remain, essentially, a shell with a profit-sharing arrangement with the major, its true parent. Within Continental, the operation is considered primarily as a division, Continental Air Micronesia, based on Honolulu. Although the mainland operator has not a single foreign route, it has considerable Pacific experience flying 8 Boeing 707-324Cs on contract service for the MAC to South Vietnam.

Employing a leased Boeing 727-100, New Orleans to Portland and Seattle flights begin on June 13 via Houston, Tulsa, and Wichita. The inauguration takes place a day following the end of the overall 1953 interchange agreement with **United Air Lines**. On July 1, the Continental-United interchange association Texas to the Northwest is ended. Two days later, the interchange service to St. Louis flown with **Braniff International Airways** is also suspended.

The fleet now includes 10 DC-9-10s and 10 B-707-324Cs; in December, a withdrawn B-707-124 is sold to **Trans World Airlines (TWA)**. On the year, 1,323 roundtrip Vietnam airlift flights are made. The workforce at year's end totals 6,000 and the fleet also includes 19 other aircraft. A total of 3,013,000 passengers are originated and freight ton-miles flown total 70.47 million.

A further \$1.5-million refundable investment in the Boeing SST is made on January 12, 1968; no such aircraft will ever be developed, let alone delivered. With **Aloha Airlines** entering the picture later, Continental starts initial Air Micronesia service under contract, on May 16, as its B-727-024Cs fly eastward from Micronesia to Hawaii and westward to Okinawa. Attention is also focused on expanding the company's Pacific hotels. Also in May, the first B-727-224s are placed into service on the New Orleans-Seattle run.

The world's largest air cargo building is occupied at Chicago (ORD) in June and, during the year, Austin and Colorado Springs join the route network. A new modern orange, red and gold livery is introduced along with a new tail insignia; the SONIC 360 computerized reservations system is also placed on line.

While on final approach to Denver after a November 19 service from Los Angeles, Flight 18, a B-707-324C with 70 passengers is rocked over Gunnison by an explosion in its rear lavatory, which sets off a fire that is extinguished by the crew. No injuries are reported and after the plane lands a passenger, seen exiting the lavatory just before the blast, is detained by the FBI.

On December 19, President Johnson overturns the CAB Pacific Route Case findings and makes a substantial route award to Continental. Three additional B-707-324Cs, 3 DC-9-10s, and 13 B-727-224s augment the fleet throughout the year. The employee population numbers 6,928.

Passenger boardings climb 13% to 3,855,000 and freight traffic accelerates by 26.5%. Revenues surpass 2 million for the first time—\$208,195,100—and the operating profit is \$43.32 million; net gain is \$4.13 million.

All of Continental's transpacific service stands Robert Six's company in good stead in Washington, D.C. and, as a result of the CAB's Transpacific Route Case findings, Continental is awarded a route to Honolulu on January 4, 1969, from Chicago, Kansas City, Phoenix, and three California cities. Authority is also granted to Australia and New Zealand and delivery is accepted on 4 B-747-124s. At first deferring the Hawaii award on January 24, President Nixon orders the CAB on February 11 to vacate all Pacific certificates awarded by Johnson, including Six's.

The Hawaii route is, however, confirmed by Nixon on April 14 and made official by a CAB order of July 22. Unable to immediately employ the Jumbojets, Continental is forced to place them in storage at a New Mexico hangar for \$13 million per year.

Just after takeoff from El Paso on July 26, Flight 156, a DC-9-10 with 30 passengers is taken over by a knife-wielding hijacker, who orders the

aircraft flown to Cuba. The passengers are allowed to deplane at the Midland, Texas, refueling point, before the Douglas flies on to Havana. The pirate will return to the U.S. before the end of the year, but will quickly be caught by police; he will be tried in 1970 and sentenced to a prison term of 50 years.

B-707-324C flights to Honolulu commence on September 9 as an extension of the Chicago-Los Angeles run while direct Chicago to Honolulu service begins on November 1.

Enplanements for the year are 4,172,000. Operating revenues are \$255.66 million and with expenses low, profits are made: \$48.81 (operating) and \$3.21 million (net).

Airline employment in 1970 is 8,329 and the fleet includes 63 aircraft. Mutual Computer Services is acquired in April and its computer reservation system is subleased to **Hughes Airwest**, **Ozark Airlines**, and **Piedmont Airlines**.

The first Jumbojet is received on May 18 and Continental's new B-747-124, known as a "Proud Bird of Paradise," is introduced on its Chicago-Hawaii route on June 26. With a cabin interior decorated by CEO Six's third wife actress Audrey Meadows, the Boeing's seating arrangement will prove unusual in that it has the lowest (290 passengers) for any Jumbojet employed to date.

The second B-747-124 arrives on July 13 and, also in July, orders are placed for 8 DC-10-10s. While on approach to Los Angeles (LAX) from Hilo, Hawaii, on August 4, a B-707-324C with 91 aboard collides with a Cessna 150; the jetliner is able to land safely, but the occupants of the lightplane are killed. The third B-747-124 is delivered on August 12 and the first Los Angeles to Chicago all-jet, all-cargo service is inaugurated in September via Denver and Kansas City.

In October, **Air Alliance** is created as a **Continental Air Services** subsidiary designed specifically to assist in the organization and operation of Phnom Penh-based **Khmer Akas (Cambodia Air)**.

An unarmed hijacker unsuccessfully attempts to take over Flight 144, a DC-9-10 with 30 passengers en route from Albuquerque to Tulsa on December 19. He is subdued by his fellow passengers and will later receive a five-year prison term.

Customer bookings advance by 12.5% to 4,768,000 and freight traffic swells by 48.2%. Revenues of \$289.37 million are produced, an increase of 13.2%. The operating profit increases slightly to \$51.53 million, but the net profit falls to \$3.74 million.

Beginning on May 5, 1971, a special \$10 ticket is offered for round-trips between 20 selected cities on the route network; the fare is designed to provide flight experience for those who have never flown before. Capitalization is increased by \$125 million in June, acquired as loans from investment banks. The last of 4 B-747-124s enters service on June 24.

In the first of four consecutive triumphs, a contestant representing Continental is chosen "Miss Airlines International." A new advertising slogan, "We Really Move Our Tails for You," meets with mixed reactions.

On August 4, a B-707-324C is involved in an accident with a Cessna 150J owned by **Floyd Flying Service** at Compton, California.

Enplanements are 5,735,157. Revenues total \$331.55 million and the operating profit is \$64.75 million; net gain doubles to \$7.48 million.

M. B. Davenport, a 56-year-old resident of Vancouver, Washington, is arrested by the FBI at Portland, Oregon, on April 11, 1972 after he attempts to hijack a B-707-324C and demands a \$500,000 ransom. On April 24, options are taken on 4 additional DC-10-10s.

One of the older wide-bodies is involved in an accident at Tucson, Arizona, on May 2. The first Douglas DC-10-10s, with cabin decor again by Audrey Meadows, are delivered in late spring and enter service over the Chicago to Los Angeles via Denver route on June 1.

Continental Air Services is closed down in July, at which point Continental Chairman Six reports that, since 1965, it has generated \$24,288,000 in U.S. Agency for International Development (AID) contacts. **Air Alliance**, meanwhile, continues to help **Khmer Akas** run its DC-3 service.

The tail engine of a DC-10-10 falls off shortly after takeoff from Los Angeles on July 28; debris falls on Hollywood and Beverly Hills.

Despite this, the DC-10 options are converted into firm orders on September 20, bringing the total number to 16 machines requested, including 8 Dash-10CFs. A total of 29 older jetliners are sold to other carriers throughout the year, bringing in a \$90-million profit.

The 116 persons aboard a B-727-224 en route from Phoenix to Los Angeles on November 27, escape injury after the craft's tires blow out on landing, causing a fire in the affected wheel well. A group of ten DC-9-10s are purchased by **Hughes Airwest**, also in November.

Passenger boardings ascend 6.7% to 6,147,000 and cargo advances by 18%. Revenues are \$365,904,000 and the net profit, the 34th in 35 reporting periods, is \$9.18 million and comes atop an operating gain of \$76.63 million.

The workforce in **1973** is 9,109. Continental joins with **Western Airlines** in July to seek a new interchange route from Texas to Alaska. A B-747-124 is removed on September 15 and retired to temporary storage at Roswell, New Mexico. Also in September, new transatlantic route authority is sought.

During the year, it is decided to standardize the fleet on two aircraft types, the DC-10 and B-727. A total of 35 aircraft are consequently withdrawn—all of the B-707-324Cs, 18 DC-9-10s, and the majority of the B-720Bs. MAC transpacific airlift contracts now also end.

Customer bookings accelerate 5.6% to 6,493,000, but freight is down by 25.5%. Record revenues of \$387.33 million are chalked up, but expenses associated with the fuel crisis soar. Consequently, a \$61.94-million operating profit is secured while the net profit declines to \$100,000.

A total of 329 new employees are hired in **1974**. To conserve fuel, the 4 B-747-124s are withdrawn on January 10 and put up for sale. After a long dispute with the CAB, Continental finally reaches the East Coast on February 1, as B-720B service is opened between Houston and Miami.

On June 1, the carrier begins its interchange frequency with **Western Airlines** to Anchorage, Alaska, from Houston and Dallas (DFW) via Seattle. The Houston to Anchorage route is operated by a Continental DC-10, while that from Dallas (DFW) to Anchorage is flown by a Western B-727-247.

The National Organization for Women (NOW) awards Continental its "Hall of Shame" award for its "Fly Me" ads. A B 720B is sold to **Ethiopian Airlines, S.C.** on September 16 and is delivered in November.

The fleet at year's end comprises 12 DC-10-10s and DC-10-10CFs, 33 B-727-224s, 2 B-720Bs, and 3 DC-9-10s, plus two B-727-024Cs leased to **Air Micronesia**. The special relationship with **Air Vietnam** ends late in the year and a B-747-124 is sold to **Wardair Canada, Ltd.** in December.

Enplanements grow 2.9% to 6,679,000 and the total FTKs flown increases to 246.69 million, a rise of 16%. Income moves ahead to \$457.27 million and expenses are held in check. The operating profit is \$98.97 million and the net income skyrockets to \$8.11 million.

The workforce in **1975** grows to 9,709. When President/Chief Operating Officer Six becomes Chairman/CEO, he is replaced by Executive Vice President Damm. The last 4 of 16 ordered DC-10-10s are received in March, with 8 being converted to all-cargo configuration.

The operations of **Air Alliance** are halted on May 26 in response to increased Pathet Lao activities and student demonstrations that force American interests out of the country. Major capital investment programs begun earlier are completed and an automated dispatch and flight following system called SAFE (System for Automated Flight Efficiency) is placed in service.

Flight 426, a B-727-224 with 7 crew and 124 passengers, encounters severe windshear in a thunderstorm as it takes off from Denver on August 7 and is forced to crash into a wheat field near the departure end of the runway. There are no fatalities, but 38 aboard are injured; the plane, itself, must be written off.

On September 15, Fred Salomon, who has already collected five hostages on a crime spree begun earlier in the day, commandeers a

B-727-224 on the ground at San Jose, California. Two of the hostages, maintenance workers, are ordered to start the engines and taxi out on to the runway, but police shoot out the tires. The pirate kills physician Dr. Frank I. Weifels in the exterior doorway. In sight of the police after the shooting, Salomon is shot dead by marksmen.

Later in the month and in October, the 3 remaining Jumbojets are sold to the Iranian Air Force. Air Alliance is disbanded on December 19.

Passenger boardings jump 8.6% to 7,256,000 while FTKs flown increase a substantial 41.6% to 324.54 million. Despite operating income of \$86.38 million, the company loses \$9.72 million net on total income of \$515.4 million.

The number of employees is reduced by 1% in **1976** to 9,608. Pub lounges and condensed double feature movies are introduced on DC-10 flights. Nonstop Denver to San Diego service is inaugurated on May 21. Petitions for new route authorities are filed with the CAB and an award of a Saipan to Japan route is made.

The Air Line Pilots Association (ALPA) grounds the carrier during a job action lasting from October 23 to November 17. Still, the striking pilots volunteer, six days into the work stoppage, to fly two flights weekly on the routes to Micronesia since air service is the lifeline of those islands.

The strike impacts on the year's total customer bookings, which decline 3% to 7,077,000. Cargo is down 1% to 321.15 million FTKs. Revenues advance to \$551.46 million while expenses are kept in check at \$508.72 million. As a result, the operating profit is \$91.13 million and net gain improves by \$19 million to \$9.21 million.

Peoria joins the route network on February 28, **1977**. As a result of CAB findings in the Denver-Southeast Route Case, Continental receives access to the Florida cities of Miami, Ft. Lauderdale, Tampa, and St. Petersburg from Denver, Tulsa, and Wichita. The Saipan-Japan route is inaugurated on behalf of **Air Micronesia**. A B-727-224 is involved in an accident at Tucson, Arizona, on June 3.

Enplanements for the year total 8,134,000 and, on revenues of \$657.07 million, the operating profit is \$97.49 and net gain is \$25.64 million. Following a lapse begun during the 1973 fuel crisis, the carrier is now able to resume dividend payments.

The number of employees is increased a dramatic 74.2% in **1978** to 11,502.

Capt. Gene Hersche of Flight 603, a DC-10-10 with 14 crew and 186 passengers, attempts to reject takeoff from Los Angeles (LAX) on February 1, after suffering three blown tires while on his takeoff roll. The wide-body goes off the right corner of the runway, catches fire, and comes to rest 664 feet away (2 dead). His last trip before mandatory retirement, Capt. Hersche is credited with saving many other lives by keeping the plane from plunging into a gasoline storage area and car rental parking lot.

In early spring, with airline deregulation becoming U.S. government policy, officials of **Western Airlines** and Continental discuss joining forces and announce plans for a merger on June 1. The same day, the two carriers launch an interchange route from Houston to Calgary (Alberta) via Denver.

The exact plans of the airline merger are made public on July 12. Also in July, President Carter approves transpacific service to Australia and New Zealand. A formal and joint merger application is filed with the CAB on September 19.

Phoenix to Las Vegas direct service is initiated on October 1 and, two weeks later on October 13, Continental launches its longest route as DC-10 service from Los Angeles to Taipei via Honolulu and Guam is inaugurated.

During the fall, frequencies are increased from El Paso and San Antonio. Australian-U.S. relations become increasingly strained on November 12 as the result of a U.S. threat to ban or curtail **Qantas Airways (Pty.), Ltd.** flights to the West Coast unless Australia allows Continental to join **Pan American World Airways (1)** as the second American carrier on the South Pacific route.

Australia rejects the threat on November 3 and indicates that Continental can enter the route only if **Pan American World Airways (1)**

agrees to cut its flights by 50%. After a month of further negotiations, American and Australian diplomats agree on December 15 to let Continental fly between the West Coast and Sydney. The CAB turns down the Western merger request at year's end.

Passenger boardings jump 14% to a record 9,458,000, while cargo moves ahead by 4.5% to 385.53 million FTKs. Operating income advances 17.9% to a record \$771.9 million while expenses are held down to \$729.27 million. The operating profit is \$42.69 million and a record net profit of \$49.19 million is reported.

The workforce is increased by 1.7% in 1979 to 11,700. Houston to Washington, D.C. (IAD) flights commence on January 2 and two long-range DC-10-30s are ordered on February 8.

John Carleton Kivlen commandeers Flight 62, a B-727-224 with 94 passengers en route from Los Angeles to Miami on March 16, soon after its scheduled stopover at Phoenix. There, the pirate demands \$200,000 in ransom and passage to Cuba. However, he becomes isolated after the flight attendant he holds as hostage escapes and must surrender to FBI agents to save his life. Kivlen will be found mentally unstable and will be sent to a psychiatric institution.

On April 29, the carrier receives British permission for service from Los Angeles to Hong Kong via Honolulu and Guam. As the result of the previous fall's negotiations, the older, golden DC-10-10s begin, on May 1, multistop flights to Australia and New Zealand. As the result of the **American Airlines** crash at Chicago on June 9, Continental's DC-10-10 fleet (42% of its aircraft) is grounded for 38 days.

On July 18, the new passenger service to Taiwan is suspended and replaced by an all-cargo service to Taipei. Denver is now elevated to major hub status and from it Continental initiates new or expanded services, beginning on September 1, to the Mexican communities of La Paz, Los Cabos, Acapulco, and Puerto Vallarta and Manzanillo via El Paso and Albuquerque.

Denver to Newark service is inaugurated on October 1, the same day a branch all-freight line is opened from Guam to Hong Kong, while service to Okinawa is ended. Houston to New York flights are launched on October 28. Other markets entered include Las Vegas, San Francisco, San Jose, San Antonio, Phoenix, Peoria, and Washington, D.C. In December, the routes to Taipei and Hong Kong are shut down.

Passenger boardings climb 4.5% to 9,880,000 and cargo ascends 2.7% to 395.8 million FTKs. Coupled to this activity are increased costs (led by surging fuel prices) which get out of hand by rising 29.29% to \$942.85 million on operating income of \$922.33 million, itself a 19.48% rise. The result is an operating loss of \$20.52 million and a net loss of \$13,185,000.

The employee population is cut by 18.7% in 1980 to 10,614. In January, 4 DC-10-10CFs are sold to **Federal Express**; three aircraft will be delivered to the freight line by year's end, bringing in \$28 million.

When President Damm and his executives cannot stem the flow of red ink, Chairman/CEO Six and his board put a new management team into place on February 1. It is led by ex-**Frontier Airlines** (1) President A. L. "Al" Feldman.

On April 14, upon hearing of a possible mechanical defect, the air pirate that has taken over Flight 11, a B-727-224 on the ground at Denver demanding that it depart for California, now elects not to take any chances—and surrenders. He will be tried and sentenced to prison for 20 years.

As the financial crisis worsens and losses exceed \$20 million, a number of routes are closed or altered. The route structure is now changed from a linear network to one employing the hub-and-spoke system, in this case centered on Denver, Houston, and El Paso. Flights from San Jose to Portland and Seattle end on June 1.

New flights are initiated on July 1 from Denver to Casper and Grand Junction. Alexander Damm, former president and current board vice chairman, retires the same day.

Continental and **Western Airlines** again file a joint merger application with the CAB on August 8, but it, too, comes to naught. However, the Alaskan interchange service ends. Significantly, the hard-won Chi-

cago to Los Angeles service, which cannot now be operated at a profit, is cancelled on September 8.

Cuban refugee Rafael A. Castando Reys threatens to set fire to Flight 67, a B-727-224 with 132 passengers en route from Miami to San Antonio on October 25, unless he is taken to Havana. Before he can act, he is seized by crew members, who hold him prisoner until the plane can land and he is arrested. Castando Reys will be indicted on charges of air piracy, tried, convicted, and sentenced to prison for 30 years.

The 2 new DC-10-30s are introduced on the transpacific route on October 26. Two more B-727-224s arrive in November. Flight attendants, members of the Union of Flight Attendants Local No. 1, go on strike from December 5 to 20; despite a mediated agreement first tentatively reached on December 16, the job action will have a morale-busting effect, to say nothing of an impact on holiday traffic. In a further effort to cut losses, two hotels on the islands of Truk and Palau are sold.

Still, customer bookings plunge 18% to 7,420,000 and cargo drops by 35% to 318.5 million FTKs. Expenses rise 11.4% to \$1.05 billion, dwarfing the 7.16% boost in operating income to \$988.32 million. A net loss of \$20.7 million is reported, along with an operating loss of \$61.92 million.

The number of employees grows a scant 1% in 1981 to 10,722. Houston becomes the carrier's main international hub in January and from it, beginning on January 10, the carrier launches scheduled frequencies to the Yucatan peninsula holiday cities of Merida, Cozumel, and Cancún. The CAB's administrative law judge approves the merger plans of Continental and **Western Airlines** on February 6.

Gunman Victor Malassauskas seizes Flight 72, a B-727-224 at Los Angeles on March 5, and demands a \$3-million ransom, but peacefully surrenders to authorities after an 11-hour standoff.

The **Western Airlines** merger plan collapses in March; however, Texas Air Corporation (TAC), parent of **Texas International Airlines**, led by its Chairman Frank Lorenzo, begins buying up Continental stock, initially seeking 48.5% shareholding, up from 4.54%. In response to the Lorenzo announcement, two Continental pilots, Paul Eckel and Charles "Chuck" Cheeld organize a plan for an employee buyout. Company workers vote 8,932 to 359 in favor of the idea and a total of 9 banks are lined up to help with the \$185 million takeover.

The Denver hub is further strengthened and from it many new spokes soon radiate, beginning with service to Tucson on April 1, Indianapolis and Omaha on April 28, Boston and Lincoln on June 1, Philadelphia and Milwaukee on June 1, and Minneapolis on August 1.

The PATCO air traffic controller's job action, which begins on August 3, and a fight for control of the floundering one-time local service carrier darkens the picture significantly.

Tragedy occurs on August 9 when President Feldman, despondent over the recent death of his wife, takes his own life. He is succeeded on August 11 by George Warde as the banks withdraw their support from Eckel and Cheeld's initiative. A DC-10-10 is outfitted with winglets and begins six months of trials on August 31.

Additional markets are opened during the fall, including Salt Lake City on September 15, Pensacola on October 1, Melbourne, Australia, on October 23, and New York (LGA), Green Bay and Louisville on October 25.

On November 25, TAC wins control of 50.8% of Continental's stock while service to Orlando and Tampa begins on December 1. During the year, Patricia Burr, hired two years earlier, becomes the first woman appointed to a managerial position within the carrier's finance department.

Passenger boardings dip 0.4% to 8,407,000 and cargo is up 0.9% to 249.12 million FTKs. The percentages on operating income are higher than on expenses, but the actual figures are reversed. Revenues ascend 8.78% to \$1.07 billion while costs climb 8.05% to \$1.13 billion. As a result, a \$59.71 million (operating) loss is taken and the year's \$95,299,000 net decline is the largest fiscal reversal in company history to date.

Announced as a "prosperity plan," a new cost cutting and staff reduction program is introduced on January 25, 1982. A new board is elected

in March made up of TAC nominees, including Lorenzo and duplicate time tables for TIA and Continental are published on June 1. On July 13, Texas International and Continental merge under the TAC umbrella; Bob Six retires. A whole new airline, cleared of overlap and built around the former Continental's name and route structure, takes to the air on the effective operational date of October 31.

New destinations taken over from TIA include Cleveland, St. Louis, Jacksonville, Hartford, Monterrey, and Guadalajara. New slots are now taken at Great Falls, Billings, and Rapid City while the Venezuelan cities of Maracaibo and Caracas join the Latin route network. A new Alaskan interchange arrangement is worked out with **Alaska Airlines**; service is undertaken to Anchorage, Fairbanks, and Prudhoe Bay via Portland.

Houston (IAH) becomes the principal hub, from whence departures rise to 240 per day, and once the 13-year-old interline partnership with **Metro Airlines** is terminated, the major reenters the Houston-Beaumont and Port Arthur market that the large regional had previously served on Continental's behalf.

The combined workforce of 13,800 is 1.9% smaller than that for the two carriers when they were independent. The amalgamated 110-aircraft fleet comprises 11 DC-10-10s, 2 DC-10-30s, 45 B-727-200s, 15 B-727-100s, 22 DC-9-30s, and 17 DC-9-10s.

Former **Pan American World Airways (1)** Vice President Stephen M. Wolf is named president/CEO on December 1, with ex-president Warde sent to Hawaii to oversee **Air Micronesia**. Company executives Michael Conway and Al Frei now depart to participate in the founding of **America West Airlines**.

Traffic and financial results for Continental and TIA are now combined. Overall passenger boardings accelerate 7.4% to 13,181,000 and freight climbs 10.2% to 280.82 million FTKs. Operating income jumps 2.95% to \$1.42 billion, but expenses balloon to \$1.46 billion, including \$90 million to meet interest payments on debt. Losses, though down, continue: \$34.6 million (operating) and \$41.8 million (net). The company's long-term debt is now \$642 million against \$142 million in shareholders' equity.

Financial loss, low production, additional layoffs, cost cutting, and traffic declines continue in **1983**, with the fiscal red ink eventually reaching \$218.5 million. In March, the wholly owned subsidiary Airline Development Corporation is formed to acquire Continental Computer Systems. Also during the spring, Patricia Burr departs the company's finance department for **America West Airlines**, where she will rise to become corporate treasurer a decade later.

Company headquarters are moved from Los Angeles to Houston and the carrier's unions spar with management continuously. The International Association of Machinists and Aerospace Workers (IAM) walks out on strike on August 13. Late in the month, pilots and flight attendants reject a request for \$100 million in temporary concessions.

Nonstop service is begun between Houston and Pensacola on September 1 while additional flights are added between Houston and Midland and Odessa.

On September 14, Chairman Lorenzo offers employees the opportunity to purchase 35% of the carrier's stock in exchange for \$150 million in benefit cuts and productivity increases spread over several years. The local chapters of the pilots' and flight attendants' unions join the IAM in rejecting this plan.

President/CEO Wolf resigns on September 21 and Philip J. Bakes is named as his successor; the same day, the board learns that the airline has only a nine-day cash supply. Lorenzo makes one final appeal for concessions to the pilots, but receives no union response. On September 24 the carrier ceases operations to its 78 domestic cities, lays off 12,000 employees (65% of the workforce), and files for Chapter XI bankruptcy.

Within 56 hours, under court protection, Continental resumes flights to 25 domestic markets while its international routes are maintained as they were before the bankruptcy filing. All of the DC-10-10s and 30 B-727s are grounded and the remainder undertake low-cost, \$49, one-way fares between city pairings.

Only 4,000 employees remain when, on October 1, both pilots and flight attendants strike the company. All union contracts are now cancelled and new, lower wage rates are imposed. While the unions continue their job actions and discussions are held, the carrier begins to rebuild its domestic network and introduces a new round of low-cost fares—\$49 on any nonstop flight—on October 23.

Unions representing Australia's airline employees vote on November 4 to deny support service for the carrier's daily flight from Los Angeles to Sydney and Melbourne, an action designed to halt the flights in sympathy for their Continental comrades.

A DC-9-30, with Frank Lorenzo among its passengers, lands by mistake on a taxiway between two runways at Denver on November 10. Service to Portland is resumed on November 15, at which point just under half of the former capacity is flown. A new two-tier pricing structure is introduced on December 16 and service is resumed by year's end from Denver to Minneapolis, Salt Lake City, and Colorado Springs.

The year's traffic reflects the turmoil as enplanements fall 24.3% to 9,978,000 and cargo plunges 28% to 202.33 million FTKs. Although revenues are down 5.10% to \$1.1 billion, costs jump 2.25% to \$1.24 billion. The operating loss deepens to \$145.1 million and the net loss is, as noted above, a huge \$218.5 million—the largest suffered by any U.S. carrier this year.

The 10,614-employee carrier gradually expands its markets in **1984**. Houston-Miami and Denver-Phoenix flights begin on January 15 followed by service to Omaha in February. Detroit and Philadelphia provide slots on March 1. New Pacific routes are also opened from Guam to Tokyo nonstop on March 18 and Honolulu to Guam nonstop on March 31.

Meanwhile, on March 24, the rear stairway of a B-727-224 comes open in flight, forcing the plane's pilot to make an emergency landing at Denver; the inner door had remained closed and no injuries are reported.

McAllen, Texas becomes a stop on April 1. Frequencies are launched to Albuquerque and Ontario, California in May and to San Jose, Dallas (DFW), and Boston in July.

Continental now makes an attempt to take over controlling interest of the UMDA, 60% owner of **Air Micronesia**. As the 4 B-727-024Cs operated under "Air Mike" colors continue to service their routes, negotiations with the Pacific Ocean islands involved continue. Simultaneously, the mainland major combines its south and mid-Pacific operations under George Warde's Continental Air Micronesia division, based in Honolulu.

Two new DC-10-30s are now placed on the transpacific service, beginning with a July 1 routing from Guam to Taipei and Hong Kong. Pensacola resumes its previous network position on August 1 and service to Milwaukee and Cincinnati starts on September 5.

In the fall, 3 McDonnell Douglas MD-80s are leased to assist with the domestic load and President Bakes promises a plan of reorganization and repayment will be presented to the bankruptcy court during the following June. TAC in October orders 24 B-737-3T0s, announcing that half will be leased to an expanding Continental. When creditors object, the court rules that the first 4 be delivered on schedule and that the arrival of the remainder be pegged to the company's first-half success.

Before the month is over, the holding company also announces creation of a joint-marketing airline to be owned with Continental and known as **Continental West Airlines**. Based at Los Angeles, it will be TAC's agent to receive and employ the B-737-3T0s ordered for Continental but blocked from delivery by the court. Late in the year, orders are placed for 3 new and 3 used Airbus Industrie A300B4s.

Assisted by a suspension of various economies, including payments on debts incurred before Chapter XI, Continental increases its passenger boardings by 9.45% to 11,100,000 and freight traffic by 3.5% to 215.17 million FTK. Revenues grow by 6.2% to \$1.19 billion and costs (led by gains made through the cancellation of all union contracts and imposition of lower wage rates) drop 14.9% to \$1.08 billion. Operating income turns around to post a \$109.54-million gain and a net profit of \$50.3 million (largely assisted by a suspension of debt payment) is posted, the first gain enjoyed since 1978.

The payroll grows 20.6% in 1985 to 12,800. In May, the company reaches agreement with **Garuda Indonesian Airways** for the start of joint operations to the holiday island of Bali. Simultaneously, the carrier closes down Continental Air Micronesia and all routes to the Pacific are now operated as full Continental services. The reorganization plan promised for June is pushed later into the summer, and then beyond. Meanwhile, in late July, frequencies are begun to Reno, Nevada, bringing to 48 the number of domestic cities served.

Weekly service begins in cooperation with the Indonesian flag carrier on August 18. Employing a **Garuda Indonesian Airways** DC-10-30 painted with its own colors on one side and Continental's on the other, Garuda crews operate the Bali-Guam sector and Continental flies on from Guam to Los Angeles via Honolulu. The same segments are handled in reverse on the return. Minority interest in **New York Air** is purchased on August 28 for \$32.5 million. On August 29, **Continental West Airlines** begins low fare services on the West Coast, from Los Angeles to San Jose and Seattle.

In the fall, a new subsidiary, Cargo Development Group, is established to control company freight operations and a suit is filed against **American Airlines** charging that its SABRE computerized reservations system demonstrates bias against Continental flights. The joint **Garuda Indonesian Airways** service to Bali becomes twice-weekly in November. During the year, the fleet is increased by 26 airliners, including the first of 3 new and 3 used A300B4-203s.

Customer bookings increase 45.2% to 16,165,000 and cargo climbs 26.9% to 272.98 million FTKs. Revenues jump a huge 45.9% to \$1.73 billion and expenses are up 44.6% to \$1.57 billion. The operating profit is \$156.7 million. Despite outlays of \$15.7 million in reorganization expenses, \$17.5 million for employee profit sharing, and \$17.8 million as severance pay for former striking pilots, Continental earns, while in bankruptcy, record net profits of \$64.28 million.

Airline employment is increased by 1.9% in 1986 to 13,000. During the first quarter, the long-awaited Continental reorganization plan is unveiled. Under its terms, TAC proposes buying all 20% of the available Continental common shares and completing the merger with **Texas International Airlines**. This approach, received well by creditors, facilitates the financial assistance the carrier requires. Continental, which had delayed its reorganization plan and even its West Coast subsidiary **Continental West Airlines**, is instructed by the court to raise its initial offer by 25% per share, now receives favorable court review, and emerges from Chapter XI.

The block on further B-737-3T0 deliveries to the major is lifted and quickly leads to Continental West's absorption into the major. The entire ploy has an ironic ending—the B-737-3T0s received for employment on the routes of the “complementary” carrier are immediately shifted elsewhere, being replaced by older DC-9-30s.

The joint service with **Garuda Indonesian Airways** to Bali becomes thrice-weekly in April, while additional Airbus Industrie A300B4-203s join the fleet. On May 1, the carrier begins flying in and out of Dallas (DAL) and it is decided to inaugurate a shuttle service between the two airports in Houston.

Ailing competitor **PEOPLEExpress**, launched by former Frank Lorenzo associate Donald Burr, is purchased in early spring, but is allowed to maintain its separate identity during a period of integration. The takeover also brings **PEOPLEExpress'** recent **Britt Airways** and **Provincetown-Boston Airlines (PBA)** acquisitions into the Continental fold. Additionally, the assets of **Frontier Airlines (1)**, recently purchased by **PEOPLEExpress**, also become available, including the significant Denver hub.

While en route over the Gulf of Mexico on August 5, a B-727-224 with 103 passengers encounters turbulence; a passenger, who has disregarded warnings to fasten his seatbelt, is seriously injured.

Continental, later in the year, begins to employ the ex-Frontier and People equipment and facilities at Denver and purchases **Rocky Mountain Airways** and interlines with **Trans-Colorado Airlines** to provide guaranteed “Continental Express” feed.

With the purchase of **Eastern Air Lines** on November 26, Texas Air Corporation now becomes the largest airline holding company in the U.S. While operations of the pioneer member of the “Big Four” are separately maintained, TAC integrates sales into Continental-Eastern Sales, Inc.; freight comes to be handled by the Cargo Development Group. Employing a DC-9-10 under contract, Conroe, Texas-based **Emerald Airways** initiates Continental's Houston Proud Express shuttle flights on August 18 between International and Hobby Airports. In September, the company is \$925 million in debt.

Former chairman Bob Six dies at his home in Beverly Hills, California, on October 6 at age 79. **American Airlines** executive Thomas Platt becomes president in October, at which time TAC Chairman Lorenzo and **Eastern Airline's** new president, Philip Bakes, begin to employ the threat of further intersubsidiary amalgamations or outright divisional and asset sales in negotiating with Eastern's unions.

Also in October, thrice-weekly nonstop DC-10-30 service is initiated from New York to Honolulu, continuing on to Sydney, and twice-weekly DC-10-30 flights originate from Los Angeles to Tahiti, Auckland, Sydney, and Melbourne. The purchase of **PEOPLEExpress/Frontier Airlines (1)** is completed on December 30.

Enplanements for the year accelerate 26.4% to 20,409,000 while freight advances 39.6% to 378.67 million FTKs. Revenues jump 18.55% to \$2.05 billion and costs climb 21.16% to \$1.9 billion. Operating profit declines to \$143.21 million and net gain falls by \$47 million to \$17.94 million.

Airline employment stands at 35,000 in 1987. Police seize Norwood Emmanuel at Washington, D.C., on January 10. Emmanuel had demanded to speak to the leader of the Black Muslim group after passing a threatening note aboard a jetliner en route to the nation's capital from Newark.

Also in January, the route system is expanded by 19 daily roundtrip flights out of New Orleans to Houston (HOU), New York (LGA), Mexico City, Cancún, Los Angeles, Miami, Newark, Orlando, and Las Vegas. During the same month, TAC completes the buyout of minority stockholders at the court-required share price and Continental becomes a wholly owned subsidiary.

On February 1, operations and assets of the TAC subsidiaries **New York Air** and **PEOPLEExpress** are integrated with those of **Frontier Airlines (1)** into Continental in a “big bang” merger. Lorenzo now controls 20% of all U.S. airline seats and, at his height, is labeled “master of the skies” by *Fortune* magazine. Even after the older names are removed from the schedule board, however, they are retained to label corporate divisions and to segregate employment populations and fleets. With 72% of Continental's common stock in hand, TAC moves, on February 6, to acquire the remainder, paying \$16.50 per share.

A twin-engine private plane crossing the runway at Los Angeles on February 25 is clipped by a B-727-224A with 91 aboard during its take-off; no injuries are reported and the flight is not aborted.

The corporate reorganization causes significant difficulty for passengers, who flood the government and media with complaints concerning hundreds of cancelled flights and much lost baggage. In April, System One Direct Access and EAL Automation Systems are acquired from **Eastern Air Lines** and merged.

As a result of the perceived turmoil and during the spring, the U.S. Congress holds hearings on ways to improve airline service quality. Simultaneously, the DOT begins a massive safety examination of Continental and **Eastern Air Lines** and a financial review of TAC itself. Meanwhile, the threat of further cuts into **Eastern Air Lines** is demonstrated by the transfer of 6 A300B4-203s to Continental, along with various airport gates and traditional **Eastern Air Lines** routes.

Work is begun on building up the former **New York Air** Newark hub and continues on the **PEOPLEExpress** center at Denver; new efforts are made to build hubs at New Orleans, Cleveland, and Washington, D.C. (IAD). **Presidential Airways** becomes the “Continental Express” feeder at the latter point, with the major purchasing the large regional's terminal, located in a choice midfield location. At Cleveland, a major

marketing campaign is fought with the airline's rival from Pittsburgh, during which Continental employs the slogan "Nuts to USAir."

A **Delta Air Lines** Jumbojet and a Continental DC-10-30 come extremely close to colliding over the Atlantic Ocean on July 8, missing each other by as little as 100 feet.

During October President Plaskett is forced out, due largely to the operational glitches occurring after February 1.

Also in October, the FAA launches an intensive program of airport screening. Over the next 18 months, FAA agents will be able to slip 734 test weapons or explosives through airline-run screening points and will, in turn, impose \$5.21 million in fines against some 50 airlines that fail the unannounced tests.

Flight 1713, a DC-9-14 with 5 crew and 77 passengers, crashes while taking off for Boise in a snowstorm from Denver on November 15 (28 dead). The accident is attributed to icing and pilot error, the captain and copilot having only 203 hours of experience in DC-9 operations between them. An account by surviving Capt. Robert Linck will appear in the December 21 issue of *People Weekly*. Henry Hurt will expand on the incident in his "Miracle in the Blizzard," *Reader's Digest* 106 (February 1990): 101-132.

Late in the year, Continental abandons its Dulles initiative, driving **Presidential Airways** to depart its "Continental Express" affiliation and become a code-sharing partner of **United Airlines**. Orders are now placed for new equipment for the remaining "Continental Express" feeders, **Bar Harbor Airlines**, **Britt Airways**, **Provincetown-Boston Airline**, and **Rocky Mountain Airways**. The orders include 20 EMB-120s, 10 Beech 1900s, and 16 (later 50) Avions de Transport Regional ATR42-300s.

Customer bookings decline by 5% during the 12 months to 40,294,000 while cargo climbs 13.8% to 596.3 million FTKs. Revenues swell 18.19% to \$3.97 billion, costs jump 15.49% to \$3.94 billion, and the operating profit is a slight \$26.51 million. Integration of the subsidiaries results in a net \$258.08-million loss.

The workforce grows by 1.9% in 1988 to 35,649. Early in January, former **Pan American World Airways (1)** Vice Chairman Martin R. Shugrue Jr. becomes president, succeeding Thomas Plaskett, who now wins Juan Trippe's old chair. Shugrue immediately puts into place both operational and financial monitoring and control systems previously lacking. Continental's Houston Proud Express contract is concluded with **Emerald Airways** on January 15, the same day that **Britt Airways** steps forward to assume, with less expensive Fairchild Hiller FH-227B turboprops, the route, now relabeled *Hobby Shuttle*. Also in January, the One Pass frequent flyer program is initiated.

Meanwhile, the government's safety investigation receives wide media attention and does business no good. Surplus capacity problems are encountered and force a 7% systemwide cutback in departures, including 20% at Denver.

Cincinnati Reds Manager Pete Rose apologizes to the company on April 15 for the rowdy behavior of some of his players during a flight from San Francisco to Houston. The pilot of a DC-9-30, bound from Boston to Cleveland on May 30, takes evasive action to avoid hitting a small private plane southeast of Cleveland.

To maintain liquidity, Continental is forced to borrow \$273 million from **Eastern Air Lines** and TAC. In July, it also sells 15 gates at Washington, D.C. (IAD) to **United Airlines**. At this point, **SAS (Scandinavian Airlines System)** steps into the picture, seeking to play a larger role in what it perceives as an airline world rapidly moving toward total deregulation. **SAS (Scandinavian Airlines System)** enters into a broad-based marketing arrangement with Continental—a move that will be followed by **KLM (Royal Dutch Airlines, N.V.)** with **Northwest Airlines** and **British Airways, Ltd. (2)** with **USAir**. The Scandinavian airline consortium purchases 9.9% shareholding in TAC and agrees to move its New York operations to Newark from New York (JFK), meshing schedules at both locations. Joint marketing and frequent flyer programs are undertaken on flights connecting to Scandinavia through the New Jersey airport.

A quality service training institute for employees is also funded and none too soon. A *Fortune* magazine survey of products and services from 306 U.S. companies finds Continental rated the worst. A new domestic and international cargo hub is opened at Newark in August on behalf of the wholly owned cargo services subsidiary Cargo Development Group. Daily nonstop, roundtrips begin in September between Los Angeles and the Mexican community of Los Cabos; departures are cut back another 14% at Denver, from 236 to 202.

In October, twice-weekly B-747-238B flights, employing the first of four Jumbojets leased from **Qantas Airways (Pty.), Ltd.**, are inaugurated from Honolulu to Cairns, with continuing service to Brisbane. In conjunction with the new Cairns service, thrice-weekly San Diego to Honolulu services commence on October 31. Twice-daily Cleveland to St. Louis frequencies begin, along with daily Cleveland to Denver service. Two one-stops to Tampa and Orlando are made nonstop.

In December, flights are initiated from Newark to the Caribbean destinations of Aruba, Montego Bay, Puerto Plata, and St. Martin.

Passenger boardings fall 6% to 37,861,000 while freight holds steady and actually grows by 20.3% to 717.59 million FTKs. Revenues rise 14.6% to \$4.55 billion, expenses jump 13.26% to \$4.46 billion, and operating income of \$83.46 million is generated. A net loss of \$315.52 million must be absorbed. Shareholder's equity drops to \$94.8 million and interest costs reach \$298 million on \$2.2 billion in long-term debt.

The payroll is cut 7.4% in 1989 to 33,000. In February, almost 12 months after becoming president, Martin Shugrue resigns. Shortly thereafter, TAC appoints former **Trans World Airlines (TWA)** Executive Vice President Joseph Corr as the carrier's chairman/CEO; Frank Lorenzo vacates that chair, but holds on to his chairmanships of both TAC and **Eastern Air Lines**. The latter now leases 6 DC-9-30s from Continental.

While on final approach for a landing at Houston after a March 1 service from San Antonio, the cockpit crew of an MD-82 with 117 passengers misunderstands ATC instructions. It begins a 360-degree turn toward a **Trans World Airlines (TWA)** MD-82 with 57 passengers arriving from Austin in the opposite direction. At 900-m. altitude, the two planes miss each other by just 120 m.

In accordance with its shareholding agreement, **SAS (Scandinavian Airlines System)** in March arranges for the election of its chairman, Jan Carizon, to the TAC board of directors.

On April 26, Jumbojet flights commence over the newly won Seattle to Tokyo route.

On June 1, the FAA assesses fines against those carriers failing its latest round of airport screening tests. Continental, with 19 security breaches, is faced with \$127,000 in punishment.

Four-times-per-week Portland, Maine, to New York (LGA) service is introduced in June, along with new thrice-daily nonstop flights from Groton and New London to Newark, from Bridgeport to Newark, and from Newark to Harrisburg. Also in June, a \$2.8-million order is placed for 50 B-737-300s, with options taken on 50 more.

A B-727-224A aborts its Denver takeoff on August 13 when its tail engine disintegrates, scattering pieces of metal and rotor blades on the runway.

President Corr resigns in mid-October and Chairman Lorenzo takes his position; shortly thereafter Continental's Vice President-Finance Mickey Foret is promoted to the company's presidency. In mid-December, as part of the sale of **Eastern Air Line's** South American routes to **American Airlines** for \$349 million in much-needed funds, Continental agrees to drop its long-standing suit charging bias in American's SABRE computerized reservations system. In addition, **Eastern Air Lines** and Continental slots are turned over at New York (JFK and LGA), Washington, D.C. (DCA), and Chicago (ORD), as well as Eastern's interest in four South American ground handling companies and property in Puerto Rico.

On the gain side of the ledger, a gate exchange is made with **American Airlines** at Dallas (DFW), an agreement to purchase certain computer services from SystemOne is signed, and Continental flights into

Washington, D.C. (DCA) are handled by **American Airlines** ground crews. For the total route and assets exchange, TAC receives \$471 million.

A \$4.5-billion order is placed with Airbus Industrie in November for 20 A330/340 jetliners. During the year, the Continental Airlines Historical Society is formed and acquires the former **Provincetown-Boston Airline (PBA)** high-time DC-3 N130PB.

The year's customer bookings fall 6.1% to 35,350,000; however, cargo grows 5.8% to 759.36 million FTKs. At \$885.6 million, TAC's consolidated net loss is the largest in airline history to date. Continental, for its part, manages to return to profitability, although just barely. Revenues ascend by 8.58% to \$4.94 billion, expenses are up 7.12% to \$4.78 billion, and the operating profit is \$156.21 million. A slim \$3.05-million net profit is achieved, based largely upon a nonrecurring net gain from debt retirement and asset sales of \$81.2 million.

The workforce remains level in 1990, but is still the 10th largest in the world. The fleet (6th largest) now consists of 339 jetliners, including 7 B-747-200s, 2 B-747-100s, 89 B-727-200s, 13 B-727-100s, 10 DC-10-30s, 7 DC-10-10s, 28 DC-9-30s, 7 DC-9-10s, 65 MD-80s, 55 B-737-300s, 25 B-737-200s, 14 B-737-100s, and 17 A300B4-203s. Orders are outstanding for 100 B-737s, 40 A330/340, and 50 B-757-200s, while 5 former **TranStar Airlines** DC-9-51s are leased from **Southwest Airlines**.

On January 8, the company introduces \$9 one-way fare within Texas and to a few destinations outside the Lone Star State. Also in January, nonstop Denver to London service is increased from three to five frequencies per week. Meanwhile, a share of TAC stock purchased in 1980 is now worth \$1,317.

In February, Electronic Data Systems (EDS) proposes acquisition and merger of the SystemOne reservations system in a new partnership with TAC. Continental will become not only a prime contractor, but a 25% shareholder with **Eastern Air Lines** as well. Later in the month, in anticipation of major expansion, the carrier commits \$76 million to improve its facilities at Cleveland Hopkins Airport.

In early March, Continental agrees with the City of Denver to support the construction by the city of a new airport, scheduled to open in 1993, by promising to take a 20-year lease. A \$336-million lawsuit against **United Airlines** that had charged UA with unfair competition through the use of its reservations system, is settled on March 29 just before jury deliberation in a 10-week trial in Los Angeles federal court.

Nonstop flights from Houston to Nicaragua end on April 10. Also in April, the bankruptcy court removes **Eastern Air Lines** from TAC management and TAC changes its name to Continental Airlines Holdings, Inc. (CAHI), with Continental as its major subsidiary. The change eliminates bankrupt **Eastern Air Lines**.

The captain of Flight 1129, a Ft. Lauderdale to Houston service, returns his aircraft to the Florida city on May 14 when a belly compartment fails to pressurize after takeoff, endangering a kitten being transported; the action is quick enough to avoid harm to the feline.

Service is started from Honolulu to Tokyo in June and twice-weekly frequencies are stretched from Guam to Sapporo. Its improvements completed, the carrier increases its Cleveland departures from 126 to 159 every day. Nonstop service is initiated from El Paso, Texas, to Mexico City on July 1; the carrier is the first U.S. major to fly directly from a border city into Mexico since the early 1980s.

During early August, a significant management restructuring is announced. Frank Lorenzo steps down as chairman/CEO and his 2.25 million shares of airline common stock are bought up for \$31 million. Allowed to remain a board member, he also receives \$19.7 million in salary and severance pay, i.e., a "golden parachute." **SAS (Scandinavian Airlines System)** takes a substantially larger stake (from 9.8% to 16.8% total) through its purchase of the former chairman's shares, both in the carrier and his personal investment vehicle, Jet Capital Corp.

Executive vice president and Lorenzo associate, Robert Snedeker and Carl Pohlard, also step down. Senior Vice President-Flight Operations Donald J. Breeding is promoted to vice president operations and former "Continental Express" President Neil F. Meehan becomes senior vice president-customer services.

Iraq invades Kuwait on August 2 and fuel prices begin to dramatically increase. Lorenzo is succeeded as chairman/CEO three days later by former **Delta Air Lines** President/CEO Hollis L. Harris, the seventh president in seven years.

Four-times-per-day roundtrip flights from Atlanta to Newark commence in September and a new "Continental Express" division is now created under President Stephen J. Kolski to combine contract commuters **Bar Harbor Airlines**, **Britt Airways**, and **Rocky Mountain Airways**. At month's end, a DC-10-30 is purchased from **Eastern Air Lines**.

Company officials vehemently deny October rumors that the heavily leveraged company faces bankruptcy.

The EDS proposal fails in November as the two partners cancel their agreement; however, daily Houston to Honolulu service begins, continuing on to Tokyo.

Having acquired both deteriorating finances in a time of recession and high fuel prices and inherited pension plan liabilities from **Eastern Air Lines**, Chairman Harris is forced to again put Continental Airline Holdings (formerly TAC) into Chapter XI bankruptcy, on December 3. Immediately, the 5 DC-9-51s leased from Southwest are returned.

Passenger boardings rise a slight 1.5% to 35,496,000 and, in terms of enplanements, the airline is now the seventh largest in the world. Freight moves upward by 4% to 789.72 million FTKs. Although revenues are up 5.22% to \$5.2 billion (good enough for ninth among all world carriers), expenses are up 13.7% to \$5.44 billion. The operating loss doubles to \$241.81 million and net loss is a mind-boggling \$1.23 billion. CAHI, the parent, sees its revenues down by 6.8% to \$6.23 billion and its operating loss, including the airline's, up to \$426.6 million. The net loss, including the write-off of Eastern, is \$2.3 billion, more than twice the amount ever lost in a single year by the entire U.S. scheduled airline industry combined.

The payroll is increased by 12.1% in 1991 to 37,000 and the fleet now includes 337 aircraft.

In January, the DOT approves the company's Seattle-Tokyo route sale to the AMR Corporation, parent of **American Airlines**, for \$150 million. The bankrupt airline is able to persuade its creditors during March to allow it to take over **Eastern Air Line's** obligations—and thus ownership—for 67 slots at New York (LGA), a flight kitchen, and 6 A300B4-203s.

With funding achieved through reallocation of advertising funds, the carrier introduces a new corporate image in March, designed to help it refurbish its sagging image. Designed by New York-based Lippincott & Margulies, the change includes a new logo that features a stylized globe, blue-and-gold livery, and new aircraft interior designs. Also unveiled are new employee uniforms, facilities, amenities, and corporate materials.

The makeover costs \$50 million and some airline enthusiasts will decry the change from the carrier's former bright colors to what they consider an insipid "corporate white" color scheme.

In April, Chairman Harris announces that plans to sell all or part of Continental in the wake of its bad 1990 have been dropped, but, in self-defense, the company must now engage in the discount frenzy set off by **American Airlines'** new four-tier Value Pricing Plan fare structure.

During the first quarter, Continental acquires 6 more A300B4-203s from **Eastern Air Lines** as well as 64 of that carrier's slots and 6 gates at New York (LGA); a total of 44 new La Guardia departures are started, many replacing Eastern frequencies to Florida. During April, Continental Airlines Holdings and EDS announce a 10-year, \$2.1 billion agreement under which the latter will assume responsibility for all information technology services for SystemOne and Continental.

Following EDS's refusal to follow through on a deal to buy the SystemOne reservations system, a new purchaser is found in Atlanta-based Worldspan. In May, Continental confirms that purchase discussions are underway with a number of potential buyers and, in June, Chase Manhattan Bank agrees to a \$120-million debtor-in-possession loan.

On August 7, the Federal District Court in Atlanta converts an antitrust lawsuit against nine airlines into a class-action suit that could benefit many consumers and cost the carriers millions of dollars. The antitrust suit charges that this company and the others conspired to

keep ticket prices high at 23 hub airports. As the result of the power struggle that now ensues over the future direction of the airline, Chairman Harris and Executive Vice President Lamar Durrett are ousted, also in August.

Carl Pohlad becomes nonexecutive board chairman and Harris is succeeded as CEO by Vice Chairman Robert R. Ferguson III, who must oversee preparation of a new reorganization plan for presentation to the U.S. Bankruptcy Court. Other proteges of the former chairman, Frank Lorenzo, are also promoted, including, Charles Goolsbee, who becomes executive vice president, and Lewis Jordan.

In September, financial considerations cause Continental to eliminate another 890 positions (including 9 vice presidents) and cut management wages. This is on top of the earlier removal of 600 positions, grounding of 22 aircraft, and cut back of the flight schedule by 6%.

A B-727-224A brushes an **American Airlines** aircraft at Newark on October 16 and 23; people suffer minor injuries in the emergency evacuations that follow. An agreement is reached with a Hong Kong investment group on October 27 for the sale of the carrier's Micronesian routes for \$270 million.

Still more cost-cutting measures are put in place in November and December, with most operations centered on New York (LGA) sold to **USAir** in December, as are a number at Washington, D.C. (DCA). A total of 114 slots plus the East End Terminal at La Guardia are sold for \$61 million.

Customer bookings for the year ascend 4.4% to 37,818,000 and cargo rises a similar 4.2% to 823.07 million FTKs. Although revenues are up by 1.56% to \$5.28 billion, expenses increase 1.99% to \$5.55 billion and cause an operating loss of \$269.14 million. The net loss improves to minus \$340.91 million. Meanwhile, parent Continental Airline Holdings sees its revenues fall 10.9% to \$5.55 billion. The operating loss is cut in half to minus \$218.9 million and the net loss is \$305.7 million.

Company employment grows 3.5% in **1992** to 38,300, despite the fact that massive wage cuts of \$108 million (10% average per worker) are put in place. In the spring, former President/CEO Harris becomes president/CEO of **Air Canada, Ltd.** In June, a new contract, the first in nine years, is signed with the carrier's flight attendants union and, during the summer, service is inaugurated to Paris, Quito, Leon, Little Rock, and Midland from Houston and to Munich, Frankfurt, and Madrid from Newark.

In July, it is reported that Houston investor Charles Hurwitz has reached tentative agreement with the airline's parent whereby a group he leads will acquire 72% majority ownership. Another Houston businessman, Alfredo Brener, leading the consortium's acquisition vehicle Houston Air, offers \$385 million for Continental Airline Holdings in August, bettering the Hurwitz bid by \$60 million; under U.S. law, Brener, a Mexican citizen, can only obtain 25% shareholding.

In the fall, company officials file a new reorganization plan with the bankruptcy court, one which has been approved by its unsecured creditors and, not long afterward, by the judge. Under its terms, three new companies are to be created from existing subsidiaries. **Continental Micronesia, Inc.** will continue to operate the Pacific routes started as **Air Micronesia** while former subsidiary SystemOne Corp., Inc. remains in charge of reservations services. **Continental Express, Inc.**, formed the previous year, combines the operations of **Britt Airways** and **Rocky Mountain Airways**.

As of September, Continental leads the list of U.S. majors providing sports charters. In addition to providing a total of 225 nonscheduled flights for 17 professional baseball teams, the carrier has 11 National Football League (NFL) teams under exclusive contract, including the Buffalo Bills, Cleveland Browns, Houston Oilers, Indianapolis Colts, Los Angeles Raiders, Los Angeles Rams, New England Patriots, New York Jets, Philadelphia Eagles, San Diego Chargers, and Tampa Bay Buccaneers. So much sports charter work is undertaken that 4 to 8 aircraft, ranging in size from B-737s to an A300, are dedicated to it; flight attendants who service the flights receive special training.

The most important news of the year arrives just before the holidays in November. Continental Holdings signs an agreement with **Air**

Canada, Ltd. and Air Partners I.P. under which the new Canadian and American partners will purchase majority (62.2%) interest (\$140 million in equity and \$310 million in new debt securities). Business First is introduced in December, combining elements of both first-class and business-class services.

Passenger boardings ascend 2.6% to 38,791,000, but freight is down 3% to 798.18 million FTKs. Revenues decline 1.4% to \$5.2 billion and expenses fall 2.7% to \$5.4 billion. The operating loss is cut to \$107.6 million and net loss descends to \$125.3 million.

The workforce is reduced by 5.5% in **1993** to 36,191, the 10th largest airline employee population in the world. The world's 7th largest fleet consists of 316 aircraft, including 3 leased B-747-200s, 2 chartered B-747-100s, 1 owned B-727-100, 80 chartered B-727-200s, 6 leased DC-10-10s, 13 chartered DC-10-30s, 3 owned DC-9-30s, 31 chartered DC-9-30s, 10 owned and 55 leased MD-80s, 10 owned and 48 chartered B-737-300s, 12 leased and 8 owned B-737-200s, 13 owned B-737-100s, and 2 leased and 19 owned A300B4-203s.

In February, the creditors approve the carrier's new reorganization plan. Federal Judge Marvin H. Shoob approves a \$458-million settlement of a class-action antitrust lawsuit on March 22 that charges the carrier and five others with price-fixing. Travelers will now be able to receive discount airfare coupons to compensate for overcharges by the carriers on flights between January 1988 and June 1991. Also in March, a firm order for 20 A330/340s is cancelled, along with options for 18 others.

Virgin Atlantic Airways, Ltd. complains to the national advertising division of the Council of Better Business Bureaus on April 11 concerning the line's Business First service.

While landing at Denver on April 26 following a service from Salt Lake City, an MD-82 loses 40 km. in air speed when caught in a wind-shear; the aircraft stalls and its after undercarriage hits the ground hard. No injuries are, however, reported.

Just after landing at Denver the next day, on a service from San Francisco, an MD-82 with 113 passengers suffers a landing gear collapse that causes the aircraft to skid to a halt with its wing touching the ground. An emergency evacuation is carried out and there are two slight injuries.

The financial rescue package of **Air Canada, Ltd.** and Texas-based Air Partners I. P., together with a large loan from General Electric, takes effect on April 27, allowing Continental to emerge from Chapter XI bankruptcy for the second time in 11 years. Under U.S. foreign ownership law, the Canadians hold only a 24% minority voting interest (28.7% on an undiluted basis), with Air Partners having 41% more, along with 39.8% held by unsecured creditors and 2.8% assigned to the employee pension fund. "Fresh start" accounting methods go into effect the next day as Air Partners' David Bonderman takes office as chairman. The long-term debt is now \$1.7 billion (down from \$5 billion) and \$600 million in cash is on hand.

As part of its investment, **Air Canada, Ltd.** simultaneously signs a comprehensive marketing agreement with Continental that includes code-sharing and joint frequent flyer programs with links through Continental's Newark and Houston hubs to other U.S. destinations. Other aspects of the arrangement include reciprocal ground handling and general sales, joint purchasing, inventory sharing, and maintenance cooperation. Daniel P. Garten is named senior vice president/chief financial officer on May 1. Orders are now placed for 50 B-737-300s, 12 B-767s, 25 B-757-200s, and 5 B-777s with options are taken on 98 more.

Company pilots vote to join the upstart union, Independent Association of Continental Pilots, on July 7, rejecting membership in ALPA. A week later, on July 14, service is inaugurated from Houston to Vera Cruz. On July 27, a comprehensive agreement and strategic marketing alliance is signed with **Air France**, which is designed to see the two carriers blend their schedules and share passenger check-ins, allowing greater convenience for passengers traveling across the Atlantic.

On August 2, Continental is one of seven carriers to win an Air Force contract to provide long- and short-range international airlift services under the Civil Reserve Air Fleet program; the pact is valued at \$9 million.

The airline is taken to court in August by **UltrAir**, which has ceased scheduled operations from Houston (IAH) charging illegal, anticompetitive, and predatory behavior by the major.

Under the direction of President Ferguson, who promises profits within a year, the company, on September 9, begins testing a new strategy for short-haul routes, adding more frequent service for flights of less than 2 hours on a network of some 12 cities in the East, while lowering ticket prices.

Also in September, it is announced that capacity will be reduced by 10%; in addition to the return of 30 older aircraft, including 8 B-727-200s to lessors, Continental will cut service to 9 cities (including all of those served in Australia and New Zealand) and eliminate up to 2,500 positions.

Company officials on October 1 will unveil Ferguson's CALite low-fare operation as their vehicle with which to challenge both **Southwest Airlines** and **USAir**. (CALite is an internal term, not marketed, but seized upon by the media.) The famous "Peanuts Fares" from the early 1970s are reintroduced as the carrier, betting its future on its new approach, signals a willingness to resume the famous airline war fought—and lost—by predecessor **Texas International Airlines** 20 years earlier.

After several years of restoration, the CAHS DC-3 N130PB, wearing 1950s livery and with cabin and flight attendant crews in historic uniforms, is in Baltimore for the CALite kickoff which sees the new division offering point-to-point service in 50 markets.

As the result of a push by the U.S. House of Representatives to have the FAA check air quality in airliner cabins, the Federal Center for Prevention Services issues its report on October 20. It shows that there is compelling evidence that a Continental flight attendant with active tuberculosis infected 23 crew members who worked with her during the early fall.

The agreement with **Air France** comes into effect on November 1.

On November 17, a B-727-224A arriving from Houston with 88 aboard nearly lands at Chicago (ORD) without its landing gear down. An accident is averted after the pilot of another jetliner notices the situation and radios a last-minute warning.

In response to the public's acceptance of CALite during its first weeks, the program is expanded in December. In addition to the extension of the low-cost service to Providence and Boston, Continental boosts frequencies to 256 daily departures between 79 city pairs in the eastern U.S. The company is unable to keep up and runs into great difficulty as it attempts to reposition spares, ground crews, and other tooling while employing 10 different Boeing, McDonnell Douglas, and Airbus plane types.

Customer bookings for the year inch up 0.7% to 38,628,000, still 6th best in the world, while cargo falls 11.7% to 704.53 million FTKs. Although revenues rise 5.1% to \$5.77 billion, expenses move ahead by 3.4% to \$5.79 billion. Consequently, there is a \$17.68-million operating loss. Net profit skyrockets to \$2.6 billion, but is actually a total write-off of the debt accompanying emergence from Chapter XI.

Airline employment is reduced another 4.8% in 1994 to 37,800. Early in the year, Continental joins in the bankruptcy reorganization of **America West Airlines** by signing a commercial alliance with the Phoenix-based major. Continental puts in some \$13 million, gains 4% shareholding, and will share ground-handling, frequent flyer programs, airport facilities, marketing, purchasing, and codes. Gates are now requested at Dallas (DAL), home base of arch rival **Southwest Airlines**.

In its continuing effort to mimic its rivals, CALite, on February 1, spreads its discount fares to more than half of its 2,000 daily departures and adds Chicago (MDW) and Greenville, South Carolina, to its route network. The first new jetliner delivered in 6 years arrives on February 8, a B-737-524; it is one of 50 "Baby Boeings" on order.

Boeing Commercial Aircraft executive Gordon Bethune becomes president/chief operating officer and begins his service on February 14. Shortly after his arrival, he is buttonholed by a company pilot, who explains how the airline is about to fail.

USAir counterattacks CALite on February 16, increasing frequencies in a number of its short-haul markets. Problems with CALite continue

to mount and the decision is taken to reduce the workforce by 40% through Labor Day.

Flight 795, an MD-82 piloted by Capt. Philip A. Wright with 6 other crew and 81 passengers, fails to gain sufficient speed for take-off from New York (LGA) on March 2 in a snowstorm. When the liftoff is rejected, the aircraft runs off the end of Runway 13 and stops just 8 feet from Flushing Bay, its nose dangling above the water. All aboard are evacuated, some with minor injuries.

The CALite "Peanuts Fares" operation is doubled on March 9, with daily departures growing to 875 in 293 markets; the figures represent 25% of the airline's total capacity.

On March 17, the U.S. government settles an antitrust suit against Continental and five other airlines. They agree to changes in their reservations systems, which the government had complained were used to fix airfares. Without admitting or denying the accusation, it is agreed by the companies to end the practice of communicating proposed fare increases to each other through the system maintained by the Airline Tariff Publishing Company. Also during the month, daily departures at the Denver hub are reduced from 139 to 107.

In April, the airline announces that 1,000 additional positions will be eliminated. Talks are initiated for the sale of the "Continental Express" division and service is suspended to 10 cities, 7 of which are "Continental Express" destinations. Pay cuts instituted during the bankruptcy are restored and a block of one million shares, equal to 4% of the airline's total stock, is turned over to employees.

A strategic marketing and code-sharing agreement is signed with the Italian flag line **Alitalia, S.p.A.** on May 1. Under its terms, the two agree to link their Newark to Rome routes, employing a Continental DC-10-30 painted in the Italian line's colors on one side and the American carrier's on the other. This code-sharing arrangement will be complemented by joint marketing and frequent flyer programs that will help customers of the Italian line make connections with over 140 flights per day to and from U.S. domestic destinations.

Two days later, the prices of unrestricted flights to Europe are cut by as much as 67% from 28 U.S. cities. On May 5, it is announced that CALite will be expanded as more no-frills, coach-class seats will be taken from first-class seats now in service.

Ten days later, the company begins to raise by one-third the number of flights on which it offers unrestricted low fares, expands its no-frill short-haul service, and hires 400 more pilots. The first of two B-757-224s to arrive during the month is delivered on May 12 and enters service eight days later.

As part of a humorous promotion offering low-cost "Peanuts Fares," the company, on June 22, offers families with the last name of Nutt the chance to join in ribbon-cutting ceremonies at 14 airports where service is being expanded.

In July, the CALite identity of the company's low fare, no-frills service is changed to Continental Lite (CO Lite); the division's 100 aircraft and dedicated gate areas are painted in this new livery and title, including the first B-737-524 available at the changeover ceremony. The company notifies its employees on July 7 that it will close its Denver crew base on October 31 and transfer 529 pilots and 863 flight attendants to other bases.

Joint service with **Alitalia, S.p.A.** from Rome to Newark begins in July. Later in the month, the third of 25 B-757-224s is delivered.

At the same time, the Flight Test Group is established under the direction of Capt. Bob Hutton, contract flight training director. Fifteen senior captains over age 60 will perform critical flight tests and ferry flights, saving the carrier more than \$1 million within a year.

With the expansion of services on September 7, CO Lite accounts for more than half of the airline's daily departures (998 of 1,675) and is in 70 U.S. market pairs.

Code-sharing flights with **America West Airlines** commence on October 1 over 59 domestic airports via the AWA hubs at Phoenix and Las Vegas and the Continental hubs at Houston and Newark. The Denver crew base is closed, as scheduled, on October 31.

On November 3, the carrier announces that it is conducting an internal analysis that may result in the transfer of as many as 1,400 maintenance positions out of Los Angeles (LAX). Five days later, on November 8, Continental sends an internal memorandum to its employees announcing that it will begin immediately to close its maintenance bases at LAX and Denver, subcontracting its maintenance work in both cities. Plans are outlined on November 12 for the elimination of \$150 million in costs during 1995, including an elimination of 1,640 jobs from the maintenance bases at both LAX and Denver.

Also in November, Vice Chairman/CEO Ferguson, having failed to make good on his promise to turn a profit within a year, is replaced by Gordon Bethune. Bethune, who had threatened to depart unless he received a board seat, now receives a \$1.5-million bonus and the board cochairmanship. He also has the board elect Bain & Company consultant Greg Brenneman to the post of president/chief operating officer. He also begins the replacement of 50 of the airline's top 61 executives with 20 of his own choice.

The Independent Association of Continental Pilots, in December, asks for federal mediation of its contract differences with the carrier. At the same time, the airline becomes the first to operate aircraft equipped with a predictive windshear detection system, the RdR-iB equipment of Allied Signal recently certified by the FAA. Later in the month, a 10-year, \$200-million agreement is reached with GE's Engine Services Department for the overhaul of jetliner engines.

According to a report in the July 4, 1997 on-line issue of the *Knight-Ridder/Tribune Business News*, CEO Bethune and Chief Operating Officer Brenneman now forge a plan to turn the airline around "over a few bottles of wine at Bethune's dining room table."

Overall passenger boardings for the year accelerate by 9.3% to 42,202,000, but freight drops 11.3% to 624.75 million FTKs. Revenues slip by 1.7% to \$5.66 billion even as expenses fall 1.8% to \$5.68 billion. The pretax loss is down to \$10.97 million and there is a \$613.34-million net loss.

The workforce declines 16.6% in 1995 to 33,700. Four A300B4-203s are grounded and the 13 others will be withdrawn from service before the end of the year.

During the first week of the year, it is announced that 40 daily CALite flights will be added out of Greensboro, North Carolina. At the same time, it is noted that services out of Cleveland will also be reshuffled.

Four of the company's international flights must be diverted to Bangor, Maine, for customs clearance on January 9, because of early morning electrical power problems at Newark. The same disruption also causes the carrier to cancel most of its 62 New Jersey departures and 37 arrivals. Services return to normal next morning.

On January 10, the number of daily departures from Cleveland to Chicago, Milwaukee, and Indianapolis are cut by two, from Greensboro, Baltimore, and Houston by one, and flights to Providence are eliminated. Seven daily jet flights to Detroit, Buffalo, and Louisville are replaced with commuter services.

Five days later, an announcement is made that, in the process of weeding out unprofitable routes, as many as 4,000 jobs may be lost, most to early retirements, leaves of absence, normal attrition, and some layoffs.

On January 26, a DOT consent order is agreed to under which Continental will pay a \$38,000 penalty and distribute 60,000 discount travel coupons to settle charges that it failed to disclose fuel surcharges in its advance advertising of fares. During the month's third week, CEO Bethune launches a "Go Forward" plan to revive the carrier. Its tenants include large cuts in the CO Lite operation, an 18% reduction in capacity, a deferment in Boeing aircraft deliveries, suspension of payments on major leases and debts, and a postponement in pay increases.

The airline is one of three majors that announce, on January 30, an average \$40 fare increase for those passengers flying roundtrips into or out of the new Denver International Airport when it opens at the end of February.

On February 1, Greenwich Air Services of Miami signs a five-year contract to provide renovation and maintenance services for the airline's aircraft engines.

Beginning on February 2 and continuing through April 23, the carrier and **America West Airlines** implement a second phase of their 1994 agreement. During these weeks, AWA performs ground handling and customer service functions for Continental at the airports at Salt Lake City, Albuquerque, El Paso, Tucson, Seattle, and Omaha. Continental returns the favor for AWA at Baltimore, Philadelphia, Chicago (O'Hare), Orlando, and Tampa. As a result of the changes, 157 Continental and 130 America West employees are offered transfers to cities where the new jobs are created.

Company officials announce on February 14 that they will match the fare cuts for winter and spring travel to the U.S., Europe, and the Caribbean started by **American Airlines** and **America West Airlines** two days earlier.

On February 27, Flight 34, a DC-10-30 en route for London, is the last scheduled airliner to depart Denver's Stapleton International Airport. Operations are transferred to the new Denver International Airport the next day.

On March 1, in the face of complaints from thousands of travelers, Continental officials admit that they erred the previous year in changing the travel rewards for its most frequent flyers and reinstates its previous One Pass Elite program. On the same day, the CO Lite flights and others are boosted from Greensboro, North Carolina. Of the company's 162 daily departures from the airport, 100 are Continental—57 jet and 43 commuter.

A few days later the company, in partnership with **America West Airlines** under the marketing agreement signed the previous October, increase by 30 the number of dual-designator airports visited.

A new in-flight communications system, FlightLink, is introduced; available on select flights, the interactive service operates from personal seatback-installed viewing screens and a keyboard at each seat.

Although the cap on travel agent commissions remains officially in place, the company, together with **Delta Air Lines**, breaks the majors' February collective decision on payments on March 28 by beginning to offer financial incentives that will reward larger travel agencies for exceeding their sales goals.

On April 13, company executives announce an end to CO Lite low-fare services. Although many operational changes instituted for the scheme will be retained, the company will reduce flooded routes to such cities as Greensboro and raise the previous bargain-basement fares. First-class service will be returned to all-coach planes. Overall, CO Lite is held responsible for \$120 million in company losses in 1994 and \$140 million since its start in late 1993.

En route over Utopia, Texas, on April 19, an MD-82 with 58 passengers encounters clear air turbulence while trying to avoid a line of thunderstorms; one flight attendant is seriously injured.

E-Ticket, a new ticketless travel program that allows passengers to make reservations and select seats through an automated ticket machine, is introduced on April 20. The system has been jointly developed by AT & T's Global Information Solutions, General Motors' Electronic Data Systems, and Continental.

Continental launches what has become a seasonal airfare competition on May 1 by offering discounts of up to 35% on off-peak summer travel on certain days. The other majors quickly match the carrier. At the same time, Lawrence Kellner, the chief financial officer for American Savings Bank, is named Continental's executive vice president/chief financial officer.

When **Deutsche Lufthansa, A.G.** and **SAS (Scandinavian Airlines System)** announce a new alliance on May 11, the latter also reports that it will drop its strategic relationship with Continental in favor of a new relationship with **United Airlines**.

While waiting to takeoff from Newark on May 19, the right horizontal stabilizer and elevator of a B-737-524 with 288 passengers is brushed by the left wing of an **SAS (Scandinavian Airlines System)** B-767-283ER. Neither plane is evacuated.

Meanwhile, a second B-737-3TO with 95 passengers on approach to Tallahassee encounters a downdraft that causes the aircraft to lose 400 ft. of altitude. A passenger, against orders to remain seated, falls and breaks her right ankle walking toward the lavatory.

The same day, Continental offers its pilots a 38% pay raise via the leadership of the Independent Association of Continental Pilots.

It is reported on May 25, that **Mesa Air Group** has entered into discussions with Continental for the purchase of its **Continental Express** subsidiary. Under terms of negotiation, Mesa would take over the major's commuter in exchange for a 33% investment in MAG by Continental valued at \$90 million. **Mesa Air Group**, which had lost its president, Jonathan Ornstein, to **Continental Express** the previous year, rejects the estimated \$90-million offer on June 2.

The effects of Hurricane Allison cause the company's daily on-time performance to fall to just 77% during the first week of June. Reflecting the company's growing success this year is the decision, implemented on June 12, to raise fares on certain of the carrier's Business First services from Newark and Houston (IAH) to London and from Los Angeles to Paris.

On June 26, it is announced that **Air Canada, Ltd.** will add eight more daily flights to the U.S. as part of its expanding alliance with Continental. Such nonstop Continental routes as Vancouver to Newark and to Houston (IAH) will seamlessly open to the Canadian carrier's passengers while Air Canada will provide 26 daily flights to Continental.

Following 18 months of negotiations, the airline and the Independent Association of Continental Pilots reach agreement on June 28 for a new contract. Subject to member ratification, the pact provides for 13.5% and 5% pay increases in the next two years.

Lawrence "Larry" Kellner is appointed chief financial officer during the month.

After considerable effort, all of the carrier's airliners, by July 1, wear the same livery for the first time in years. Daily roundtrip B-757-224 service is inaugurated on July 15 between Newark and Manchester, England.

During the last week of the month, an extensive marketing alliance is entered into with **USAfrica Airways**. The new entrant, which had suspended operations in February and entered Chapter XI bankruptcy protection, has (wrongly as it turns out) expectations of emerging in November and resuming its flights. Continental, for its part, will code-share on **USAfrica Airways** flights and provide ground handling at Newark.

On August 26, Continental, followed closely by **Northwest Airlines**, temporarily cuts fares by up to 58% on certain routes.

Retroactive to July 1, the pilot contract is ratified by vote of the local union's membership during the first week of September; it is the first collective bargaining agreement for Continental flyers since 1983.

On September 7 a total of 95 skycaps—the uniformed airport porters who check bags at curbside—are eliminated at 10 Continental cities. The service is contracted out to Cleveland-based International Total Services; displaced workers are allowed to transfer to the new employer.

Thrice-daily B-737 roundtrips commence the same day between Houston and Nashville. Jet service from Houston to Corpus Christi is simultaneously increased from two daily roundtrips to three. At the same, the carrier's four-times-a-week nonstop roundtrips from Houston (IAH) to Puerto Vallarta, Mexico, are increased to daily.

By mid-month, the carrier is operating a total of 404 jet and commuter flights per day from Houston (IAH).

On September 29, all warrants held by **Air Canada, Ltd.** for future purchase of Continental Airlines common stock are purchased by the American major for US\$50.5 million, giving the Canadian carrier a significant third-quarter gain. The warrant sale does not affect the northern airline's ownership of 18.5% of Continental's outstanding stock or its voting rights stake of 23.8%.

By October, E-Tickets are available in 86 originating cities and via travel agents for departures from San Antonio, Houston, Dallas (DFW), and New Orleans.

While en route from Houston to Los Angeles on October 22, "blue ice"—toilet fluid frozen onto the fuselage—breaks loose and is ingested into the left engine of an MD-82, putting it out of commission. The jetliner is diverted to El Paso, where a safe emergency landing is made.

While a shipment of 2,800 pounds of phosphorus matches is being loaded aboard a B-727-224A at Panama City, Panama, on November 7 for a flight to Houston, a fire erupts in cargo bins 3 and 4. No one is hurt among the three crew, three security agents, and four cleaning personnel aboard and the aircraft is safely evacuated. Continental immediately suspends the acceptance of hazardous material cargos from Latin American countries while checks are made; the trijet will be ferried back to the U.S. for repairs.

During the third week of November, directors of the Independent Association of Continental Pilots vote to join ALPA. After significant reformation of finances and management, the company, by month's end, is out of default and has negotiated much of its debt down with lower interest rates.

ATC notices sparks coming out of the left engine of an MD-82 as it is taking off from Newark on December 1; the departure is quickly aborted.

Also during the last quarter, Continental, which has made significant progress in its on-time performance rating, also tops the industry in baggage handling. Employees are rewarded with a \$100 bonus.

At the same time, a new marketing alliance is signed with **World Airways** for a route to be inaugurated to Johannesburg next summer. The decisions to eliminate CO Lite focus on hubs, boost service levels to improve unit yield and revenues, and dispose of excess capacity brings about what Chairman Bethune labels "one of the most dramatic [fiscal] turnarounds in U.S. business." Company morale has also improved—so much so that employees provide Chairman Bethune with a surprise Christmas gift of a Harley Davidson motorcycle.

Traffic figures reflect these changes, dropping 11% in enplanements to 37,575,000 and 22.6% in cargo to 2.97 billion FTKs. Operating income moves up 2.7% to \$5.82 billion and costs fall 4.2% to \$5.44 billion. This year there are profits: operating gain totals \$385 million and a \$224 million net profit is widely reported.

Airline employment stands at 43,000 in 1996, a 27.6% increase.

On January 5, Continental outbids AT & T, American Express, and Bell Atlantic to win a \$29-million, 12-year contract to place its name on the Brendan Byrne Arena in East Rutherford, New Jersey. The facility, home of the New Jersey Nets NBA basketball team and the New Jersey Devils NHL hockey team will henceforth be known as Continental Airlines Arena.

A major winter storm disrupts airline operations on the East Coast between January 7 and 11. Although the carrier must cancel over 1,500 flights during this period, its Severe Weather Action Plan allows Continental to divert aircraft from the region. Services resume from the Newark hub late on January 11.

The January issue of *Air Transport World* magazine names Continental as its 1995 "Airline of the Year." During the third week of January, a code-sharing pact is signed with the TACA Group, controlled by El Salvador's **TACA International Airlines, S.A.** Under its terms, CO codes will be added to the flights of the TACA partners to Santo Domingo, Cali, Guayaquil, Quito, and Panama City while the TACA designator will appear on Continental frequencies from Houston to Los Angeles and from Houston, Miami, and Dallas (DFW) to Newark.

It is reported on January 30 that Continental has begun to target elite-level participants in its competitors' frequent flyer plans by offering to automatically enroll them as elite members of its One Pass program if they can document a similar status with a competitor.

During the winter, America West Vacations, a subsidiary of **America West Airlines**, begins to offer vacation services to Tampa and Orlando from Boston, Houston, and Newark and from Cleveland to Las Vegas; the flight portion is handled by Continental Airlines.

Also in January, the company negotiates a code-sharing agreement with **CSA Czech Airlines** covering its daily flights from Prague to

Newark. It also covers 24 selected Continental domestic services originating from the New Jersey airfield.

The *Houston Chronicle* reports on February 6 that CEO Bethune and five other senior officials have purchased a total of \$600,000 in company stock on the open market.

Also during the first week of February, **All Nippon Airways Co., Ltd., (ANA)** joins with Continental, **Delta Air Lines**, and **American Airlines** in calling for renewed bilateral discussions between the U.S. and Japan. Hopes are expressed by ANA President/CEO Seiji Fukatsu, during a Washington, D.C. visit, that operations originally authorized in 1952 will be liberalized for those airlines not original partners to the first bilateral.

On February 19, the flight crew of Flight 1943, a DC-9-32 with 5 crew and 82 passengers coming in from Washington, D.C. (DCA), miss a portion of their checklist and continue an unstabilized approach that results in a wheels-up landing at Houston (IAH). Twelve passengers receive minor injuries after the plane skids 6,915 ft. down Runway 27 and comes to rest in the grass. The flyers are both soon thereafter dismissed.

The very next day, a B-737-130, with 79 passengers, lands at Washington, D.C. (DCA) at an excessive speed, causing the plane to touch-down too far down the runway to avoid an overrun. The aircraft exceeds the end of the runway by 250 feet and encounters mud, with both in-board main landing gear tires blown from the attempt to stop. No injuries are reported.

A daily roundtrip service is inaugurated in March between Newark and London (LGW) while three more additional weekly flights are introduced to London (LGW) from Houston (IAH). The number of weekly frequencies to London from the Texas community now stands at 10.

The DOT now requires that the company provide several slots to discount carriers, such as **ValuJet Airlines**.

The dual-designator flights with **CSA Czech Airlines** commence on April 1. On April 7, smoking is banned on all 530 weekly flights from the U.S. to markets in the Caribbean and Latin America.

On April 22, **Air Canada, Ltd.** begins to reduce down to 4% the 24% stake in Continental that it purchased in 1993. Since March 4 and the end of the month, Continental has inaugurated daily nonstop jetliner roundtrips from Cleveland to Seattle, Tacoma, Dallas (DFW), Norfolk, Providence, and Raleigh/Durham.

Nonstop daily roundtrips commence on May 1 between Newark and Myrtle Beach simultaneously; Saturday-only flights begin between Myrtle Beach and Cleveland.

Also in May, the company receives the J. D. Power & Associates award as the top long-haul U.S. carrier based on customer satisfaction; the carrier is the first firm in any industry to go from last to first in the Power survey in a one-year period.

A significant number of flights are added on June 6 from the company's Houston, Newark, and Cleveland hubs while the Greensboro hub is dramatically cut.

At Houston, the number of daily departures jumps from 406 to 429 and includes inauguration of services to three new destinations—Lubbock, Portland, and San Jose—and the introduction of new nonstop frequencies to 4 cities previously served via Cleveland or Newark. In addition, the number of international flights is increased on routes to San Pedro Sula, Panama City, Guatemala City, and London.

Newark, Continental's second-largest hub, benefits from a 14% increase in business; the number of daily departures grow to 359, including 237 provided by jetliners. The emphasis at New Jersey is placed on international frequencies; new Continental flights are inaugurated to Lima, Quito via Bogota, and to Guatemala City via San Salvador. A new daily domestic roundtrip to Newark is begun from San Antonio, Texas.

At the same time, a new code-sharing agreement with **World Airways** takes effect. Not only does World transfer four of its long-haul flights to Newark to connect with Continental's, but the two offer weekly dual-designator nonstop flights to Johannesburg, Tel Aviv, Dublin, and Shannon as World inaugurates its new South African service.

Cleveland, the newest Continental hub, also sees a dramatic increase in the number of departures, up to 235 from 172 a year earlier. The number of nonstop frequencies grows from 46 to 61. At the same time, the airline continues to upgrade its Hopkins International Airport facilities, adding new ticket counters, doubling its baggage spaces by adding a third baggage carousel, and boosting the number of check-in stations from 17 to 30. CEO Bethune offers hope that international service to Europe might one day be offered, but also notes that, should Cleveland to London (LGW) flights be started now, Continental would lose \$4 million.

At Greensboro, which had been a significant company station prior to the disbanding of CO Lite in 1994, departures are reduced from 40 to 11. In addition, the flight crew base at the airport is closed; the 139 pilots and 170 flight attendants based at it are transferred to the carrier's three other hubs.

Also in June, the company becomes an alliance partner with **China Airlines, Ltd. (CAL)**; preparatory to the signing of a full dual-designator pact in the fourth quarter, the two begin jointly marketing frequent flyer programs, shared airport lounges, and one-stop check-in.

On June 27, Continental and its machinists union-represented flight attendants reach tentative agreement on a new contract, details of which are not released.

Employing two leased DC-10-30ERs, the company, on July 6, begins weekly Saturday over and Sunday back nonstops between Newark and Dusseldorf. The service complements the airline's daily flights to Frankfurt and plans are made to enhance the Dusseldorf frequencies to daily in 1997.

Also in July, officials of **TACA International Airline, S.A.** (TACA Group) and **American Airlines** sign a memorandum of understanding for establishment of a strategic partnership. Due to intense opposition from other Latin American carriers, as well as Continental and **United Airlines**, the pact will remain enmeshed in bureaucratic regulatory wrangling during the next year.

Also in July, **Continental Micronesia** assumes \$160 million of its parent's debt, helping the major to ease out of a number of restrictive requirements imposed by Chapter XI financing.

The landing slots at New York (LGA) surrendered to **ValuJet Airlines** in the spring are returned on August 26. The discount airline, which suffered a terrible crash in May, is unable to make use of them or pay fees associated with them.

Also in August, the 5,600 flight attendants ratify a new multiyear contract that includes both productivity increases and wage raises.

On September 2, **Continental Express** President David Siegal announces a \$375-million order for 25 Embraer EMB-145 Amazon regional aircraft, with options on another 175 over the next 12 years. The planes will be leased by parent Continental from the manufacturer and subleased to the regional on a 16 1/2-year operating lease; financing is arranged by Embraer.

On September 3, four other major airlines follow Continental's lead and agree in principle to settle a suit by the American Society of Travel Agents charging the carriers illegally conspired to cap travel agent commissions on domestic airline tickets. The five will reportedly pay a total of \$87 million, but will be able to retain the controversial \$50 commission cap.

While taxiing for takeoff from New York (LGA) for Cleveland on September 5, ground crew spy what they believe to be flames shooting from the Number 2 engine of an MD-83. Alerted, the pilot stops the plane and orders his 83 passengers to exit via emergency evacuation chutes now deployed. Maintenance will later determine that the engine had suffered a false start.

A \$1.8-billion order is placed during the first week of October for 60 B-737s to be delivered between July 1997 and December 1999.

A code-sharing agreement is entered into with **Asiana Airlines** during October covering return flights from Taipei to Houston that will begin in a year.

Also during the month, a code-sharing agreement is signed with **Business Air, Ltd.** Under its terms, Continental will place its designator on

the Scottish regional's services from Manchester to Aberdeen, Dundee, Edinburgh, and Glasgow. Continental's DC-10-30 Flight 20 will depart Newark the previous evening and arrive in Manchester at 7:50 a.m., in time to offer its passengers easy connection to Business Air flights north.

After two months of negotiations, Continental is able to participate in something of a first in the rapidly growing world of international airline alliances. On October 16, it signs major marketing and code-sharing agreements with **Air France**, which simultaneously signs the same kind of accord with **Delta Air Lines**. The arrangements will allow **Air France** to tap into the huge U.S. travel market to feed its growing global market, while the American carriers will have a ready-made group of French customers to carry within the U.S.

With the election of former U.S. Treasury Secretary Lloyd Benson in early November, the board of trustees is expanded to 13 seats. At the same time, Mr. Bethune becomes chairman and CEO, while David Bonderman, the former board chairman, remains a director and becomes chairman of the executive committee.

The U.S. State Department and Continental, together with six other majors, reach an agreement on November 19 to provide speedier notification of the families of U.S. victims in the event of air disasters abroad. The arrangement, lobbied for by groups representing crash victims' families, puts into effect the provisions of a 1990 federal law calling upon the carrier's to provide the State Department with a passenger list within 3 hours of a crash.

Press reports leak out on December 3 concerning talks between company representatives and those of **Delta Air Lines** concerning a possible merger. Three days later it is revealed that the Continental ALPA chapter has hired its own financial adviser to evaluate the effects of any merger with Delta.

Following a Latin-style celebration and ceremony, the carrier, on December 12, inaugurates daily nonstop B-757-224 flights from Newark to Panama City, Panama, and continuing on to Guayaquil, Ecuador. At the same time, additional frequencies are added from Newark to southern holiday destinations, including Miami, Ft. Lauderdale, West Palm Beach, Ft. Myers, Sarasota, Bradenton, Phoenix, Cancún, St. Martin, and Antigua.

Chairman Bethune announces on December 15 that Continental has ended merger talks with other airlines and has no immediate plans to resume them. No explanation is offered and no "other" airlines are identified.

The first EMB-145 Amazon regional jetliner is handed over to **Continental Express** on December 18 at Embraer's São Jose dos Campos facility in Brazil.

Customer bookings ascend 2% to 38,332,000 and 524.35 million FTKs are operated, a 27.6% increase. Operating revenues jump 9.2% to \$6.36 billion while expenses, headed by increased fuel costs, move up 7.3% to \$5.83 billion. Operating gain swells to \$525 million while a \$319-million net profit is recorded.

The employee population is reduced by 7% in 1997 to 40,000. On January 10, Continental joins **Delta Air Lines**, **United Airlines**, **USAir**, and **Trans-World Airlines (TWA)** in submitting requested comments to the U.K. Office of Fair Trading concerning the proposed strategic alliance between **American Airlines** and **British Airways, Ltd. (2)**. All five protest that such a pact would make the British and American giants the dominant carriers in transatlantic and other markets. They claim that the OFT's proposal to require AA and BA relinquish 168 weekly slots at London (LHR) is insufficient to counterbalance the alliance. BA files a 148-page response to these and other remarks.

Discussions begin during the second week with **Aeroflot Russian International Airlines (ARIA)** concerning a possible code-sharing and marketing agreement, contingent upon the American carrier receiving permission to fly to Moscow.

On January 15, a marketing alliance is signed with ARIA, under which the state-owned Russian carrier guarantees the sale of half of the seats on a code-sharing service for five years.

Simultaneously, as soon as government approvals can be achieved, code-sharing service is readied with **China Airlines, Ltd.** for flights from Taipei to the West Coast. In ceremonies during the month, the company, in recognition of its rapid transformation, is named "Airline of the Year" by the industry magazine *Air Transport World*.

Just after landing at Newark on February 17 following a service from Denver, an MD-82, with 141 passengers, suffers a nosewheel collapse; although the aircraft is damaged, there are no injuries.

It is announced in February that the company and **Alitalia, S.p.A.** will increase their capacity on three daily nonstops between New York and Italy. Under terms of a new agreement, a daily frequency is added to the one already operated from Newark to Rome, along with a daily service to Milan. On February 28, the previous seasonal service to Dusseldorf from Newark becomes a regularly scheduled daily DC-10-30 destination.

On March 7, hydraulic fuel is sucked into the auxiliary power unit that provides air conditioning in the cabin of an MD-82 as it prepares to depart from Newark. When thick smoke fills the rear of the cabin, the 59 passengers are evacuated down an emergency chute at the front of the plane and 12 are slightly injured.

An extensive code-sharing and marketing deal is signed with **Virgin Atlantic Airways, Ltd.** on March 13 that gives Continental access to London (LHR). The arrangement replaces one between VA and **Delta Air Lines**, which is now left without a British partner. The new partnership provides Continental with blocked space on VA flights to London from Newark, New York (JFK), Washington, D.C. (IAD), Los Angeles, San Francisco, Boston, Miami, and Orlando and from Orlando to Manchester. Full implementation will be completed by the next February 2.

On April 1, Chairman/CEO Bethune is named an "Aerospace Laureate" by *Aviation Week and Space Technology*. The alliance with **Air France** is activated in April. In addition to schedule coordination and linked frequent flyer programs, preparations are made to launch extensive code-sharing flights from Newark to Paris (CDG) and beyond just as soon as a new U.S.-France bilateral agreement is signed. Simultaneously, **Air France** and Continental move their Paris operations to the French major's Terminal 2 at Charles de Gaulle International Airport.

During the first week of the second quarter, negotiations, aimed at reaching a contract by the June 30 due date, are launched between the airline and the Independent Association of Continental Pilots. The pilots' union, whose 5,100 members took a pay cut in 1993, accuse management of lowballing on wages, but CEO Bethune believes an amicable agreement will soon be reached.

The carrier agrees to purchase from its largest shareholder, Air Partners, a total of 3.8 million shares of Continental Class B common stock for \$94.2 million.

Also in April, a business agreement is signed with **Colgan Air** that allows that major's passengers to connect via Colgan flights to destinations in West Virginia, Virginia, Massachusetts, and Maine. At the same time, **Gulfstream International Airlines** becomes a "Continental Connection" partner; it provides feed to the major in Florida, Nassau, Eleuthera, Marsh Harbor, and Treasure Cay in the Bahamas.

Flight 1181, a B-737-200 with 5 crew and 70 passengers encounters turbulence just after takeoff from Atlanta on April 28; a flight attendant suffers a broken ankle and the plane returns to its point of origin.

New nonstop international service is now added on May 1 from Houston to Vancouver, Honolulu, and Caracas. At the same time, daily nonstop B-757-224 flights commence from Newark to Lisbon, Portugal.

Terminal improvements are undertaken at Houston (IAH), including a \$70-million renovation of Terminal B, and Cleveland, where an \$80-million concourse is constructed for RJ ExpressJet service.

Flight 1760, a B-737-3T0 with 5 crew and 49 passengers arriving from Houston on May 11, mistakenly lands on the wrong landing strip—the USN's Cabaniss Field—six miles away from its Corpus Christi destination; both pilots are suspended. The next day, the FAA reports that Continental had unknowingly carried a shipment of oxygen generators in the cargo hold of a passenger jet during a recent flight.

Despite the May 11 Houston incident, the company, for the second year running, receives the J. D. Power & Associates crown on May 15; it is based on customer satisfaction and ranks Continental as the top U.S. long-haul airline.

During the month, Continental becomes the first "official" airline of Broadway after it signs a five-year, seven-figure marketing contract with the League of American Theaters and Producers. The airline will sponsor a relaunched "Broadway Line," a national show and ticketing telephone line, as well as the "Broadway on Broadway" season opener and "Stars in the Alley," a free Manhattan concert that closes the season.

At the beginning of June, Continental launches a \$1-million program to "Latinize" U.S. and Mexican airports to attract Spanish-speaking passengers and increase its share of the growing Latin American market. The program includes bilingual airport signs, information booths, and a larger number of bilingual employees, both on the ground and as flight attendants.

While being moved from a maintenance area at Washington, D.C. (DCA) to its terminal on June 7, a B-727-227 overshoots the jetway and collides with the terminal building of **USAirways**. The plane is damaged, but no injuries are reported.

Daily B-737-3T0 roundtrips commence on June 12 between Houston (IAH) and Vancouver.

Continental begins a media advertising campaign on June 17 designed to remind those in the New York City area that Continental, flying out of Newark, is the leading domestic airline hubbed in their region and urging them to enhance their services from the New Jersey airport. New York City Mayor Rudolph Giuliani complains that the promotion disparages the image of his metropolis and company officials suspend it on June 24.

Also on June 24, a letter of intent is signed to purchase the 9% stake in **Continental Micronesia** still held by the United Micronesia Development Association, thereby allowing the carrier to end its contractual obligations. The \$73-million sale will be approved by the UMDA at its annual meeting on July 10. Twice-weekly B-727-224A roundtrips commence on June 26 between Houston and Nassau.

Also in June, the company signs a 20-year exclusive contract with Boeing, subject to later definitive details, for the purchase of 5 B-777-200s and 30 B-767-400ERs, with options possible on the types later. Boeing will provide all of the company's airplanes in the future, with the exception of regional jets. The timetable for the first delivery of the 5 B-777-200s already on order is pushed up to September 1998.

During the month, after having made over \$75 million in terminal and connector improvements, Continental takes over Terminal B at Houston (IAH) from **American Airlines** and **Delta Air Lines**, which have moved to Terminal A.

The DOT grants the airline route authority on June 30 for a new service from Newark to Moscow, beginning on April 30.

Following a statement from the Independent Association of Continental Airline Pilots that a contract might not be finished before October, the carrier asks that the process be speeded up for conclusion by July 1. Both sides bring in a negotiator from the National Mediation Board (NMB). At the same time, the Teamsters begin an organizing drive among the carrier's nonunion mechanics.

On July 9, company pilots stage the first of four planned airport pickets at Newark in support of their demand for a pay raise. The next day, daily DC-10-30 return service is inaugurated from Newark to Rio de Janeiro via São Paulo.

During midyear, services are optimized at the carrier's Houston, Cleveland, and Newark hubs. Special emphasis is placed on Newark, now marketed as more convenient than New York (JFK); Continental is now called "New York's airline." New international routes are launched from the New Jersey airport to Dusseldorf, Lisbon, and Birmingham, England.

At the end of July, **American Airline's** almost-partner **British Airways, Ltd. (2)** and Iberia discuss a 10% equity stake for the U.K. flag carrier as well as a strategic partnership with the usual frequent flyer

program linkage and code-sharing on routes between Madrid and London. Significant opposition quickly materializes from Continental and **United Airlines**, which fear not only an AA-BA linkup, but the potential domination of Latin American routes by American.

Continental, meanwhile, institutes a \$1-million "Latinization" program of its own, aimed at easing its way into new markets in South America, particularly Brazil. Personnel are given training in Spanish and Portuguese and bilingual English-Spanish signage appears at its facilities at those airports visited. Bilingual electronic information displays are placed at the top 20 U.S.-originating Latin traffic centers.

At this point, daily services are started from Houston to Guayaquil and Lima and from Newark to Panama City, São Paulo, and Rio de Janeiro. The Business First frequent flyer program for business travelers is available on these flights.

Also during July, the carrier purchases 4 MD-82s and 6 B-737-300s it had previously operated under lease.

A marketing alliance is signed on July 30 between Continental and **Hawaiian Airlines**, which includes **Continental Micronesia** as well. The pact, scheduled to start on October 1, will allow the Continental to tie its feed to Hawaiian's 12 daily nonstops from Honolulu to the West Coast. In addition, Continental will be able to increase feed for Hawaiian and **Continental Micronesia** on their services from Hawaii to Guam.

On August 1, the company launches daily DC-10-30 roundtrips between Houston and Honolulu, with a connection to **Continental Micronesia's** service on to Guam. Simultaneously, the company announces that it will build the first and only wide-body maintenance hangar in Hawaii—a 112,000-sq.-ft., \$24-million facility that will open during the spring of 1998.

Tragedy strikes at Lima, Peru, on August 2 during the boarding of 141 passengers a B-757-224 being readied for departure to Miami. An 86-year-old male customer is assisted in his wheelchair by a gate agent to the top of the rear portable stairs. There he is instructed to remain at the top of the steps while the gate agent loads his wheelchair into the cargo bin. Instead, the passenger continues into the aircraft and then through the catering door, from which he falls to the tarmac, landing between the catering truck and the aircraft. Although the senior is rushed to the hospital, he subsequently dies from his injuries.

In a reflection of the competition for new business and leisure travelers, the company during the month elects to seek a new advertising agency, ending its four-year relationship with Dallas-based Richards Group in favor of N. W. Ayer & Partners. At the same time, it records its highest load factor for any month in the carrier's 63-year history—76.8%.

On August 26, a code-sharing agreement is signed with **EVA Air, Ltd.** of Taiwan; it represents an expansion of the 1994 all-cargo arrangement between the two carriers. When the pact becomes operational in the new year, it will apply to Continental connections with EVA services to Taipei and 15 Southeast Asian destinations from Seattle, Honolulu, Newark, Los Angeles, and San Francisco. Joint marketing, maintenance coordination, and linked frequent flyer programs will also be included.

Daily dual-designator flights aboard **Aeroflot Russian International Airlines (ARIA)** DC-10-30ERs commence on August 30; the 4,668-mile nonstop trips from Newark to Moscow's Sheremetyevo International Airport require 10 hrs. 30 min. flying time.

In early September, Continental is granted approval from the DOT to start direct nonstop DC-10-30ER service between Newark and Moscow, starting on April 1. Moscow will be Continental's 11th European destination. This announcement follows on the heels of an earlier agreement reached with **Aeroflot Russian International Airlines (ARIA)** under which the Russian carrier will purchase, market, and sell half of the seats on Continental's Newark-Moscow service.

While en route from Los Angeles (LAX) to Cleveland on September 4, Flight 1740 is forced to make an emergency landing at Omaha after a 36-year-old female passenger is found unconscious in a restroom. Attempts to revive her in-flight and on the ground are unsuccessful.

Plans are announced on September 11 for a transfer of all headquarters functions into a 600,000-sq.-ft. leased space in the Cullen Center Office complex in downtown Houston, owned by Toronto-based TrizecHahn Corp., Ltd. The move will be completed by January 1999.

A \$4-million contract is now signed with Unisys for installation of its Customer Loyalty System software; when fully implemented, Continental's One Pass frequent flyer program, Presidents Club Lounge, and Seniors Club will all be combined into one system.

Code-sharing is finally started with **China Airlines, Ltd. (CAL)** on September 20 over a weekly return-route from Taipei to Houston via San Francisco.

On September 24, the carrier announces that it will raise the wages of all of its employees by the year 2000 in a move expected to cost \$500 million. The news is not welcomed by members of the company's pilot union, who have been negotiating with the company since April, which sees the move as an attempt to divide the carrier's workers. The next day, pilot leaders indicate that if a settlement is not reached by October 1, they will distribute strike authorization ballots.

Although the majors disagree over Latin American routing, they band together behind **United Airlines** on October 1 when the Chicago-based giant cuts commissions paid to travel agencies for writing tickets. Although commissions on roundtrip domestic flights remain at \$50 with no cap on international flights, rates are reduced from 10% to 8% for domestic and international ticketing.

This payment initiative is immediately matched by Continental, **American Airlines**, **Delta Air Lines**, **USAirways**, and **Northwest Airlines**. **Southwest Airlines** and **Kiwi International Air Lines** announce that they will maintain the 10% scale. The travel agency industry, which, despite ticketless travel still writes 80% of all tickets sold, protests.

On October 3, the important relationship with **Air France** still cannot be implemented; French Transport Minister Jean-Claude Gayssot in a statement this Friday stresses his absolute opposition to the U.S. "open skies" approach. Later in the day, it is announced that, to celebrate the upcoming tenth anniversary of the One Pass frequent flyer program, the carrier will hold a sweepstakes during the remainder of the year. One Pass members flying through December 31 will be eligible for a variety of prizes, including free first-class travel for one winner for a decade.

The company begins a second daily Newark-Paris service during the month.

On October 7, the pilot of Flight 2051 is required by an ATC controller to abort his takeoff from Cleveland Hopkins Airport after taxiing onto the wrong runway. The B-737-3T0 charter is flying the Cleveland Indians baseball team to the first game of the 1997 American League Championship Series in Baltimore. No injuries are reported and the aircraft departs later without further incident.

On October 15, it is announced that the carrier will begin nonstop Houston-Aruba service on Wednesdays and Sundays beginning on May 15. At the same time, a code-sharing agreement is entered into with **China Airlines, Ltd. (CAL)** covering return flights from Taipei to Houston. Another is signed with **EVA Air, Ltd.**; under its terms, connections to Taipei will be made via Newark, Seattle, San Francisco, Los Angeles, and Honolulu.

A300B4-203 copilot Tammy Blakey, who had filed a sexual harassment suit against the company in 1991 because it would not require pilots to remove pornographic materials routinely left in cockpits, is, during the month, awarded \$875,000 by a federal court.

Also during October, a commercial agreement begins with **ACES Colombia, S.A.** ACES shares codes on the American major's daily return services from Newark and Houston to Bogota and Quito and acts as its general sales agent in 23 Colombian cities.

On October 31, the carrier agrees to award frequent flyer miles to supermarket shoppers who use the credit card of Houston-based Randalls Food Markets.

On November 1, Continental moves out of **Air Canada, Ltd.**'s Terminal 2 in Toronto, making room for "Star Alliance" partner, **United**

Airlines. Simultaneously, **Air Canada, Ltd.** transfers from Continental's Newark terminal to United's.

During the first week of November, management and the Independent Association of Continental Pilots reach tentative agreement on a salary dispute; resolve had been met following 15 days of talks brokered by Stephen E. Crable, chief of the NMB.

Continental and **LOT Polish Airlines, S.A.** sign a pro rata accord at Warsaw on November 6, cutting fares on joint routes. The reduced fares will apply on LOT's services to Frankfurt, London, Manchester, and Paris, with onward connections by Continental to 130 destinations in the U.S.

After several months of negotiations with the office of Newark Mayor Sharpe James, who had approached the company earlier in the year, Continental on November 15 agrees to recruit and hire 1,000 local residents to staff full- and part-time support positions at Newark.

In December, company officials negotiate with those from **Northwest Airlines** concerning the possibility of the Minneapolis-based major's purchasing a 14%, \$450-million equity stake in Continental and the two carriers creating a new global operating alliance under which each airline will continue its separate identity and maintain its own workforce. Both would, however, share many marketing functions and would offer dual-designator flights. Such an arrangement would allow the Minneapolis-based carrier to take over the shareholding of Continental Chairman Bonderman and his Air Partners and thereby gain a 52% voting majority.

USA Today reports, on December 10, the newly-released DOT 10-year report of on-time percentages for the nation's 10 major airlines, with a note that the airlines, themselves, began reporting mechanical delays in 1995. The industry average since record keeping was begun in September 1987 is 79.3%; Continental demonstrates a 78.7% achievement, good for 7th place.

Thrice-weekly nonstop roundtrips commence on December 15 between Miami and Santiago de Chile.

When apprised of the possible arrangement with **Northwest Airlines**, the leadership of NWA's pilot union, whose members hold an 11.5% stake, refuses on December 16 to relax the scope clause in its contract. This prohibits the company from placing its flight code on the flights of other airlines without their exemption. Negotiations continue at NWA continue for two more days, during which time Steve Zoller, the union executive committee chairman, admits that his body does not have the authority to make such a deal. Management officials hint that talks with Continental will have to be broken off.

A third daily B-737 nonstop return service is inaugurated on December 18 between Houston and Guadalajara, as well as from San Diego to Mexico City. Simultaneously, daily B-737 nonstops commence between Houston and Caracas, the carrier's 26th Latin American destination.

Late in the month, the company's plans to code-share with **EVA Air, Ltd.** are approved by the U.S. DOT.

Passenger boardings advance 7.5% to 42,210,000, while cargo traffic jumps 31.5% to 689.53 million FTKs. Operating revenues advance 13.4% to \$7.21 billion, while expenses are up 11.3% to \$6.49 billion. A record \$716-million operating profit is earned while a net \$385-million gain is enjoyed.

At the beginning of 1998, Continental is the 7th largest airline in the world, in terms of passenger boardings, fleet size, and operating profit, 8th in number of employees, 12th in operating income, and 11th in net profit.

The workforce numbers 40,000 and the fleet, 74.6% of which is Stage III certified, consists of 315 aircraft, including 30 B-727-200s, 133 B-737s, 28 DC-9s, 23 B-757s, 32 DC-10s, and 69 MD-80s.

On January 26, the company joins with **Northwest Airlines** in announcing creation of a "global strategic alliance." As negotiated, the pact allows NWA to take the 14% of Continental's common stock equity held by Air Partners I.P. Acquisition of these shares will provide NWA with 51% controlling (voting) interest, but will cost \$519 million—\$311 million in stock and the remainder in 4.1 million shares of NWA common stock.

Fears concerning an end to Continental's independence are assuaged when NWA officials pledge to place their holding into a "voting trust" for six years, which will be exercised as a block only if another airline seeks to takeover Continental. Both the DOT and NWA pilots must grant approval, the latter for any code-sharing.

On January 30, a new bilateral air agreement is announced between the U.S. and Japan. Under its tentative terms, the company will be allowed to add 90 weekly roundtrip flights to the 46 already flown.

On February 2, Continental, under a new block-space, dual-designator pact, begins to code-share on **Virgin Atlantic Airways, Ltd.** flights from New York (JFK), Newark, Los Angeles, San Francisco, Miami, and Washington, D.C. (IAD) to London (LHR). Virgin will place its codes on Continental's twice-daily frequencies from New York to London (LGW). In essence, the two airlines attempt, with six daily flights, to create a shuttle service between New York and London. Continental will also purchase seats on Virgin's seasonal services between Manchester and Orlando.

San Diego to Mexico City frequencies commence at the beginning of February while frequencies on the previously instituted routes from Newark to Cancún and from Houston to San Jose, Guatemala City, and San Salvador are doubled from daily to twice-daily.

Passengers are now allowed to use cellular phones while aircraft doors are open during boarding and unloading.

On February 13, the company receives DOT authorization to inaugurate scheduled services from Newark and Houston (IAH) to Tokyo (NRT). The carrier announces plans to initiate the flights in December.

The company's board of directors, at month's end, authorizes the expenditure of up to \$100 million to repurchase shares of the company's common stock or convertible securities owned by others. Simultaneously, after 10 months of negotiations, a tentative agreement is reached with the Independent Association of Continental Pilots on a new five-year contract. The arrangement is sent to the carrier's line pilots for ratification.

A third daily roundtrip frequency is introduced on March 1 between Houston (IAH) and Toronto.

Also at the beginning of March, the company loses out in a bidding fight to **Delta Air Lines** over investment in **AeroPeru, S.A.** At the same time, executives and representatives from the Independent Association of Continental Pilots reach tentative agreement on a new five-year contract.

Just prior to departure from Manchester, England, for Newark on March 8, a small fire breaks out in the No. 2 engine of a DC-10-30 due a fuel leak; all 249 passengers are quickly evacuated.

On March 11, it is announced that, pending approvals, the company will inaugurate daily nonstop service between Cleveland and London (LGW) by April 30, 1999.

U.S. Secretary of Transportation Rodney E. Slater and Japanese Transport Minister Takao Fujii are the principals for the formal signing of the new U.S.-Japan bilateral air agreement in ceremonies at Washington, D.C. (IAD) on March 14.

Two days later, the DOT authorizes 64 weekly flights to Japan for carriers that have previously had their services severely limited. Continental is given permission for 14 weekly flights, which will include new daily services to Tokyo from Houston and Newark.

It also grants new code-sharing permission, including authority for Continental to offer dual-designation on any 14 of the 28 weekly services which **Northwest Airlines** flies to Tokyo from Detroit, Los Angeles, and San Francisco or from Detroit (DTT) to Osaka.

On March 26, a code-sharing agreement, to take effect during the summer, is signed with **VASP Brazilian Airlines, S.A.**

At a meeting in Paris, Chairman/CEO Bethune and **Air France** Chairman/CEO Jean-Cyril Spinetta reaffirm "a mutual commitment to the marketing alliance initiated in October 1996." Despite the absence of a U.S.-France bilateral, the two will engage in all activities possible short of code-sharing.

Dual-designator block-seat connections with **EVA Air, Ltd.** to Taipei begin on March 30 via Newark, Seattle, San Francisco, Los Angeles,

and Honolulu. Continental provides the U.S. transcontinental lift while an EVA B-747-45E links the West Coast with Taiwan.

With international investor interest in Colombia having declined during January and February in the face of its poor economy, officials of **ACES Colombia, S.A.** elect to reduce from 30% to 20% the equity stake it will sell to foreigners. The share sale is completed at the end of March with 19% being taken by Continental.

A new flight schedule is introduced at the carrier's three main hubs on April 5. Cleveland offers the least new mainline changes, adding a third daily jet flight each to San Francisco and Providence, Rhode Island.

From Houston, new three-times-per-week DC-9-32 jet service is introduced to Merida, daily ERJ-145 service to Tampico, and four-times-per-week DC-9-32 service to Vera Cruz, raising to 14 the number of cities Continental serves in Mexico—more than any other U.S. major. Five more flights are added to Detroit, two to Portland, Oregon, and seven to Washington, D.C. (DCA).

Daily jet nonstop roundtrips are inaugurated from Newark to Manchester, New Hampshire, and Austin, Texas. Also from the New Jersey hub, additional daily jet service is laid on to key West Coast cities, including seven to Los Angeles, five to San Francisco, and three to San Diego, while two more flights are sent to Chicago O'Hare, bring its total number to nine.

A new "open skies" bilateral agreement is signed between the U.S and France on April 8. The arrangement will allow the company to strengthen its alliance with **Air France**. This memorable day also sees introduction on the carrier's first Next Generation B-737-724s; until familiarization is complete at month's end, the new aircraft will fly short-haul routes.

At the same time, the carrier places orders for 15 Next Generation B-737-924s, to be delivered during the second quarter of 2001.

During x-ray inspection of bags checked for a flight from Houston (IAH) to Bogota on April 23, U.S. Customs Service inspectors find and seize \$1.5 million in cash hidden in shrink-wrapped board games.

Transcontinental and Latin American B-737-724 service is inaugurated on April 30. Among the services flown is a new nonstop roundtrip between Newark and Caracas, Venezuela.

A fourth daily roundtrip is introduced on May 1 between Houston (IAH) and Minneapolis (MSP), with a third roundtrip also being added from Houston to Pittsburgh.

Following the discovery of two small holes apparently burned through a 0.5-in. conduit aboard a B-737-200 by sparks from worn wiring, the FAA, on May 7, issues an airworthiness directive requiring that fuel tank wiring on older B-737s, B-747s, and B-767s must be immediately inspected. Systemwide, the demand causes Continental to cancel fewer than 1% of its 1,346 scheduled departures.

Twice-weekly Sunday and Wednesday B-737-524 roundtrips commence on May 10 from Houston to Aruba. These are the only scheduled nonstops to Aruba from a U.S. destination west of the Mississippi River.

Starting with Panama City on May 14, the company begins to make electronic ticketing available for passengers visiting 27 countries; all should be on line by year's end.

Houston-Aruba roundtrips commence on May 15. Continental and **America West Airlines** jointly announce in May that they are engaged in finding a way to make it possible to interline E-tickets, which cannot now be transferred between airlines, even among those in alliance. A solution is promised by spring 1999.

American Airlines, which is engaged in a legal battle with Dallas aviation authorities to prevent interstate service from Dallas Love Field, now announces that it will, itself, engage in direct competition with **Southwest Airlines (2)** from the historic battleground airport, where Southwest is currently the only major operator. The first service will be operated 14 times a day to Austin during the summer employing MD-80s.

Continental holds two gates at Love Field, but, after an initial announcement on May 20 that it will launch seven-times-a-day service to Houston (IAH) on June 11, it elects not to go up against Southwest by itself again.

It does, however, announce that its subsidiary, **Continental Express**, will inaugurate nonstop Embraer ERJ-145 roundtrips to Cleveland Hopkins Airport in July. The announcement causes the governing board of Dallas (DFW) to file suit in state court seeking an injunction to block the service.

Fares on advance purchase tickets are raised by 5% late on May 20; the move is quickly followed by other airlines.

Also on May 20, a DC-10-30 with 285 passengers hits a pocket of clear air turbulence at 35,000 ft. over the Pacific Ocean while en route to Honolulu; seven persons are injured.

The carrier in May expands its alliance with **Northwest Airlines** to include the Minneapolis-based major's associates **Air China International Airlines**, **America West Airlines**, and **Alaska Airlines**. All four will link their frequent flyer programs, coordinate schedules, offer joint marketing and maintenance where appropriate, share lounges, and plan for code-sharing.

Thirty minutes into a service from Los Angeles to Hawaii on May 21, Flight 75, a DC-10-30ER with 13 crew and 285 passengers, encounters turbulence, which causes it to drop twice within eight seconds. The aircraft makes a safe return to LAX where three badly injured flight attendants are sent to hospital, along with five passengers with minor injuries.

Daily nonstop DC-10-30 roundtrips commence on May 30 between Newark and Santiago de Chile, the company's sixth South American city visited from New Jersey.

Also in May, a 49% stake in the parent holding company of **COPA (Compania Panamena de Aviacion, S.A.)** is acquired. Subject to "certain conditions," the two will enter into a comprehensive marketing and code-sharing alliance.

Anticipating a strong summer, the company, in May and June, hires 400 additional airport agents and 200 "service ambassadors." An additional 352 ground service vehicles are also purchased, at a cost of \$12 million.

A joint announcement from the airline and the Transport Workers Union of America on June 3 heralds the signing of a tentative collective bargaining agreement extension to the end of 2003. The pact comes after four days of intense direct negotiations and replaces the previous contract, which does not, in fact, become amendable until April 1999.

On June 11, twice-daily nonstop roundtrips commence between Charlotte and Houston. This service is in addition to Continental's existing thrice-daily frequencies between Charlotte and Newark.

Daily, nonstop, 10-hr. DC-10-30 return flights are inaugurated on June 11 from Newark to Honolulu, with continuing service to Guam and Manila. Simultaneously, twice-daily B-737-524 roundtrips are initiated from Houston (IAH) to Calgary with thrice-daily ERJ-145 roundtrips being started to Amarillo.

Daily nonstop B-737-524 flights commence on June 12 from Chicago (MDW) to Houston (IAH). A third daily flight is also added between Chicago (MDW) and Newark.

The same day, the carrier's 2,063 eligible pilots cast ballots to approve a new contract good for 5 years; 1,066 ALPA members vote against the contract.

The U.S.-France bilateral accord reached on April 8 is formally signed on June 18 in a ceremony by French Foreign Minister Hubert Vedrine and U.S. Secretary of State Madeleine K. Albright and Secretary of Transportation Rodney E. Slater. The pact opens the way for new transatlantic code-sharing, expansion of the company's agreement with **Air France**, and additional frequencies.

Continental and **Air France** waste no time in implementing the code-sharing plan under the new U.S.-France bilateral. On June 19, the two begin code-sharing on each other's transatlantic flights between Paris and Newark and Paris and Houston. Additionally, Continental shares its codes on Air France flights beyond Paris to destinations in France, Germany, Belgium, Denmark, Sweden, Norway, Switzerland, Austria, and Finland. Likewise, **Air France** applies its code to Continental domestic services from Newark and Houston to Cleveland, Dallas (DFW), San

Antonio, Austin, Detroit, Philadelphia, Syracuse, Pittsburgh, Buffalo, Norfolk, Rochester, and Albuquerque.

Also, daily roundtrips begin in June from Newark to Dublin and Shannon. Electronic ticketing is expanded to international flights, beginning with services to Panama and Mexico.

In June, it is announced that the carrier, employing as yet undelivered B-777s, will commence daily nonstops from Newark to Tokyo on November 30 and from Houston to Tokyo on December 30. Also in June, the company receives its first 3 B-737-824s.

Late in the month, the company and its pilots sign a new five-year agreement which prohibits any in-house Metrojet-type division. Meanwhile, on June 25, leaders of the pilots union at **Northwest Airlines** vote to file a grievance challenging the proposed alliance with Continental.

June is also the month in which CEO Bethune sees the book he had coauthored with Scott Huler published, *From Worst to First: Behind the Scenes of Continental's Remarkable Comeback* (New York: John Wiley & Sons, 1998).

Having received formal approval from the U.S. and Brazilian governments, the code-share agreement with **VASP Brazilian Airlines, S.A.** takes effect on July 1. Continental places its two-letter code on VASP flights from São Paulo to Miami, Los Angeles, and 14 cities in Brazil. Simultaneously, VASP places its code on Continental services from Newark to São Paulo, Rio de Janeiro, and 20 domestic U.S. destinations. The service employs freshly painted DC-10-30s wearing logos from both companies.

Daily nonstop B-737-724 roundtrips commence on July 7 between Newark and San Jose, Costa Rica. The company now also introduces its first B-737-824 on July 15 over a route from Washington, D.C. (DCA) to Los Angeles via Newark. As more of the Next Generation 800s are received, they will be flown on routes from Newark to Los Angeles and from Tampa to Seattle via Houston.

Special ceremonies during the day, also on July 15, highlight the introduction of new daily roundtrip service to Scotland. A reception is held at Gate 74, Terminal C, of Newark International Airport at 4:30 p.m. during which a Scottish band and bagpipers perform. A special ceremony, including readings from the poetry of Robert Burns, is held an hour later, with the inaugural B-757-224 flight departing for Glasgow at 6:45 p.m.

A 3,500-sq.-ft. Presidents Club opens at Dallas (DFW) on July 20. During the summer, the headquarters move into office space in downtown Houston begins.

The first of two peak travel period seasonal flights to Costa Rica commence on August 1; daily B-737-524 nonstop roundtrips will continue through September 9.

On August 10, a code-sharing agreement is signed with **British Midland Airways, Ltd.**; BMA, beginning on August 17, will operate as a feeder for Continental's transatlantic services, while Continental will place its codes on BMA flights from Manchester to Aberdeen, Edinburgh, and Glasgow.

Like other airlines, Continental recommends reservations, but also agrees to honor on a stand-by basis the tickets of stranded **Northwest Airlines** passengers after its pilots walk out on strike on August 29.

During the second week of September, **Trans World Airlines (TWA)** Chairman/CEO Gerald L. Gitner, speaking before the Wings Club in New York, comes out squarely against the proposed domestic code-sharing alliance between **Northwest Airlines** and Continental. He has less to say about the apparently derailed deal between **United Airlines** and **Delta Air Lines**.

Pilots from **Northwest Airlines** ratify a new contract on September 12, ending the longest U.S. airline strike since 1989. Service is gradually reinstated over the next week. On September 17, Continental announces that it will begin daily nonstop return service from New York and Newark to Zurich on April 14 and to Brussels on May 3.

A strategic marketing agreement between the airline and **ASERCA (Aerolineas Regional de Centro, C.A.)**, plus its new partner **Air Aruba, N.V.**, is signed on September 18. The pact will lead to code-sharing on

Continental flights between the U.S. and Venezuela and on ASERCA flights to domestic Venezuelan destinations beyond Caracas. It will also allow Continental to code-share on Continental services from Houston to Aruba and on Air Aruba flights from Aruba and New York, Newark, Miami and Tampa. Customers will be able to earn Continental One Pass frequent flyer miles aboard flights of either of the Latin carriers.

On September 21, a company MD-80 makes the first differential-GPS instrument approach by a revenue-service aircraft in the U.S. when it comes into both Newark and Minneapolis (MSP).

During the end of the month, the company engages in preliminary discussions with **Northwest Airlines** concerning a possible global alliance to counter "OneWorld," the pact recently signed by **American Airlines, British Airlines, Ltd. (2)** and several other airlines. The Continental-NWA alliance would also include the extant alliance partners of the two carriers.

The carrier and its **Continental Express** subsidiary bitterly criticize the decision by the 48th Judicial District Court of Tarrant County, Texas, on October 16 that grants a summary judgment to the plaintiffs and prohibits the initiation of commuter service from Love Field in Dallas to Cleveland. Both companies promise to appeal in federal court.

Just after landing at Guadalajara on the night of September 16 following a service from Houston, Flight 475, a B-737-524 with 6 crew and 102 passengers, veers off the runway and suffers the collapse of its nose landing gear. Although the jetliner is badly damaged, all aboard are safely evacuated and no injuries are reported.

The first of 5 B-777-224 IGWs to be delivered before the end of the year arrives at Houston on October 2. Following its arrival, the plane, of which Continental is only the second U.S. operator, enters a period of shakedown training and route testing flights.

A B-727-224A aborts its takeoff from Miami (MIA) on October 7 due to a catastrophic uncontained engine failure in its No. 2 engine.

A tentative contract agreement is reached between the airline and its mechanics union, the Teamsters, on October 12.

The Associated Press reports on October 20 that the U.S. Department of Justice (DOJ) has held several days of talks with representatives of **Northwest Airlines**, Continental, and Air Partners concerning the NWA-Continental alliance. The DOJ is reportedly very concerned over the plan of the Minneapolis (MSP)-based major to gain a controlling stake in Continental and then merge the two carriers' routes. Sources suggest the DOJ may file suit before the end of the week in an effort to stop the plan.

Simultaneously, Continental receives final DOT approval for the initiation of daily B-757-224ER roundtrips from Cleveland to London (LGW) beginning on February 19. The new service is contingent upon the carrier's receiving commercially viable slots.

On October 23, the DOJ files suit in the Federal District Court in Detroit to block the **Northwest Airlines** plan to acquire majority voting control of Continental via a stock purchase. The government contends that the purchase by NWA would effectively merge the nation's fourth- and fifth-largest airlines and thus unlawfully limit competition in the U.S. airline industry.

Voting 2,085 against and 257 for, the carrier's Teamster-represented mechanics on November 1 reject the offer negotiated with management back on October 12.

Also at the beginning of November, the premier B-777-224 IGW undertakes scheduled return service from Houston (IAH) to Newark and Los Angeles.

While en route from Seattle to Newark on November 16, the crew of a company airliner is surprised when a man assaults a flight attendant and attempts to enter the cockpit; he is restrained and turned over to police when the plane lands. He will be indicted by a federal grand jury on December 18.

The arrangement with **Northwest Airlines** to start a joint frequent flyer program is put on hold on November 19 when the DOT rules that the two majors cannot begin their loyalty offering before December 4.

The next day, **Northwest Airlines**, which has vowed to complete its deal with Continental despite the antitrust lawsuit, completes its acqui-

sition of a controlling stake in Continental. The arrangement gives the nation's fourth-largest airline a 14% equity stake in Continental as well as voting control of up to 51% of the No. 5 carrier. Executives from both airlines indicate that they will proceed to implement domestic code-sharing involving upwards of 850 flights.

Also on November 20, an order is placed for 10 B-767-224ERs, which will begin delivery in the year 2000 and will be employed to serve international markets in Europe and South America.

Agreement is reached between management and representatives of the Teamsters on November 22 on a new 3-year contract for the carrier's 3,000 mechanics. The document will now be put to a vote of the membership.

The carrier, on November 30, inaugurates its first-ever return service from Newark (EWR) to Tokyo (NRT). Flight 14, which will be operated daily, will employ Continental's first B-777-224 IGW. Continental now becomes the only airline to provide daily nonstop service to Japan from a hub in the Northeast U.S.

Also on November 30, **Air France** President Jean-Cyril Spinetta announces at a news conference in Paris that his company will make a decision, by the end of 1999, on whether to invite Continental or **Delta Air Lines** to join it in building a global alliance.

A five-year contract is signed between the carrier and the Independent Association of Continental Pilots on December 14; the pact, which becomes amendable in October 2002, provides company flyers with pay increases and improved working conditions.

Daily nonstop Next Generation B-737-724 roundtrips commence on December 15 between Houston (IAH) and San Juan, Puerto Rico. At the same time, daily B-737-3T0 roundtrips are launched between Houston (IAH), Reno, and Tahoe and from Birmingham, Alabama, to Newark via Atlanta. The second of the year's two peak seasonal travel time B-737-524 roundtrips are begun from LAX to San Salvador; they will continue through January 6.

On December 17, a cooperative marketing agreement is signed with **Avant Airlines, S.A.** of Chile. Beginning in the new year, the two airlines will offer code-sharing on flights between the U.S. and Chile and over domestic U.S. and Chilean routes.

Two days later, a fourth daily nonstop return service is initiated to San Juan from Newark. Simultaneously, weekly Saturday Next Generation B-737-724 flights to San Juan are started from Cleveland.

While flying a rented single-engine lightplane on December 27, an Illinois pilot becomes lost and flies in restricted airspace near Giants Stadium, East Rutherford, New Jersey, just as a football game between the New England Patriots and New York Jets is ending. Worse, the plane comes within 300 ft. vertically and a quarter-mile horizontally (30 seconds) of colliding with an approaching Continental jetliner with 146 passengers. ATC warns the B-737-724 to halt its descent as the Cessna veers off at the last moment.

Continental and **Northwest Airlines** begin dual-designator flights on December 29 on 28 weekly international flights between the U.S. and Japan and 21 weekly flights beyond Japan. From the mainland U.S., Continental places its code on Northwest flights between New York (JFK) and San Francisco to Tokyo (NRT) and between Detroit and Osaka (KIX). Similarly, Northwest applies its code to Continental's new B-777-224 IGW daily roundtrips between Newark and Tokyo (NRT).

At year's end, plans are made to welcome the second B-777-224 IGW and, on January 31, the inauguration of Houston (IAH) to Tokyo (NRT) service.

Customer bookings during the 12 months advance by 5.9% to 43.62 million, while freight traffic rises 10.6% to 834.85 million FTKs. Revenues jump 10.2% to \$7.95 billion, while expenses rise 11.6% to \$7.25 billion. The operating profit slips to \$701 million while net gain is off \$2 million to \$383 million.

When the January 1999 issue of *Fortune* magazine is published, Continental is listed as one of the "100 Best Companies to Work for in America."

The new three-year contract between Continental and its Teamster-represented mechanics is ratified on January 5.

On January 7, B-777-224 IGWs replace DC-10-30s on one of the company's two daily roundtrips between Newark and London (LGW).

Also on January 7, Continental and **Northwest Airlines** begin linking a major portion of their domestic flight schedules and implementing more international dual-designator flights. The two majors, despite DOT opposition, initiate code-sharing on approximately 850 domestic and international flights to 95 destinations.

As part of the arrangement, Continental code-shares daily on **Northwest Airlines** and Northwest AirlinK domestic flights, including cities where it does not currently fly, such as Sioux City, Boise, Knoxville, and Spokane. Northwest, likewise, code-shares daily on Continental and **Continental Express** flights, including cities where it has no service, such as Corpus Christi, Charleston, Scranton, and Daytona Beach.

Additionally, Continental starts to code-share on select **Northwest Airlines** flights to Canada, such as Calgary, Vancouver, Edmonton, Saskatoon, and Winnipeg. Although Continental already provides daily service to Calgary and Vancouver, it does not operate its own flights to Edmonton, Saskatoon, or Winnipeg.

Following a failure to its left engine, an MD-82 with 120 passengers aborts its takeoff from Baltimore (BWI) for Houston on January 8; the plane skids off the runway and stops some 100 m. from the end of the pavement. No emergency evacuation is ordered and no injuries are reported.

In keeping with the code-sharing agreement implemented between Continental and **Northwest Airlines** in December, **Mesaba Airlines**, on January 14, enters into a dual-designator arrangement with Continental. Under terms of the pact, the major's "CO" designator will be placed on all of Mesaba's Northwest AirlinK flights in and out of Detroit (DDT) and Minneapolis (MSP) that connect to Continental flights in their hubs at Newark (EWR), Houston (IAH), and Cleveland.

It is announced on January 20 that daily nonstop B-777-224 IGW roundtrips will begin in August between Newark and Tel Aviv.

Also on January 20, while en route from Tokyo (NRT) to Honolulu, Flight 910, a B-747-238B with 18 crew and 336 passengers, encounters turbulence at 33,000 feet. Three hours out from its destination, 18 passengers and 4 flight attendants in the rear of the aircraft are injured, although only 1 is seriously hurt.

Also on January 20, **America West Airlines** announces that it has been contacted by a number of airlines expressing interest in a variety of business transactions ranging from strategic alliances to mergers. It confirms that **United Airlines** has made an offer to take it over in a merger; the action is similar to the pact concluded in December between **Northwest Airlines** and Continental. Analysts see the alliance as a move by the Chicago-based major to counter the recent acquisition for western growth of **Reno Air** by **American Airlines**.

The next day, it is revealed that **Delta Air Lines** has also been in conversation with America West. **Southwest Airlines** (2), which is the second most dominant carrier at Phoenix, denies any interest in taking over the company. Texas Pacific (46.9%) and Continental (8%), which between them own 54.9% of the company and have a right of first refusal on any shares that Texas Pacific may offer for sale. Continental Chairman Bethune indicates that his carrier "would assert its rights" over those shares in the unlikely event that an offer for America West is cleared by federal regulators and labor unions.

On January 25, the company announces that, beginning in June, it will increase its daily service from Cleveland to the West Coast by adding a fourth flight to Los Angeles, a third flight to San Francisco, a second flight to Seattle, and a new daily flight to Portland, Oregon. In addition, a third daily service will be started to Dallas (DFW).

When **Delta Air Lines** on January 29 raises business ticket prices by 2% and leisure ticket costs by 4%, Continental is one of four majors to quickly follow suit. The move, the first airfare boost for U.S. airlines in 18 months, is seen as the opening salvo in an opening series of across-the-board fare hikes.

Daily nonstop B-777-224 IGW roundtrips commence on January 31 between Houston (IAD) and Tokyo (NRT). U.S. Assistant Secretary of Transportation Charles Hunnicutt is a guest aboard the first ever nonstop flight made between Houston and Asia.

On February 5, **America West Airlines** CEO William Franke, speaks before a Goldman, Sachs conference in Miami. He lets it be known that the airline's major minority shareholder, TPG Partners L.P., will support the sale of the airline only if the buyer purchases all of its stock, Class A and B shares alike, valued at approximately \$1 billion. Continental, seeking to block a takeover by **United Airlines**, has contended that it could take control merely by acquiring TPG's Class A stock at an estimated cost of \$50 million. This position, seconded by TPG Chairman Bonderman later in the day, is seen by analysts as an effort by America West to maximize for shareholders the value of any purchase.

Leaders of the pilots' unions from Continental and **Northwest Airlines** sign a formal letter of cooperation on February 10 pledging mutual support and cooperation between the two labor groups.

An anonymous caller claims a bomb is aboard a company jetliner bound from Houston (IAH) to Quito, Ecuador, on February 11. Departure of the flight is delayed as the aircraft is searched; no explosives are found.

Twice-daily B-737-300 service begins on February 12 from Birmingham, Alabama, to Newark. Also on February 12, the airline announces that it will begin new daily nonstop return service to Brussels and Zurich in early spring and daily nonstop roundtrips between Newark and Tel Aviv on August 2. It also notes that a number of transatlantic B-757 flights will be upgraded to DC-10-30 while B-777-224 IGWs will replace DC-10-30s on other routes.

The *London Sunday Times* reports on February 14 that the carrier is engaged in talks with **Air France**, **Alitalia, S.p.A.**, **Delta Air Lines**, and **Northwest Airlines** concerning the possibility of forging a global alliance with which to challenge the existing—and growing—international pacts, "OneWorld" and the "Star Alliance."

According to a report in the February 19 issue of *The Wall Street Journal*, **Delta Air Lines**, which has been considering entry into the bidding war for AWA, has withdrawn as of February 17. Also on that Wednesday, UAL, Inc., parent of **United Airlines**, tenders an undisclosed cash offer for the airline. The newspaper sees the prospect of a bidding war with Continental.

The Italian news agency Ansa reports on February 21 that **Air France** is in discussions with **KLM (Royal Dutch Airlines, N.V.)**, **Northwest Airlines**, and **Alitalia, S.p.A.** concerning the possibility of Air France joining their global alliance. Northwest and KLM are also alliance partners of Continental, which is one of two U.S. airlines seeking a partnership with the French line. None of the suggested participants will confirm the story.

Air France Chairman Spinetta, basking in the success of the carrier's initial public offering on February 22, takes the opportunity to reaffirm to radio interviewers his intention to choose, before the end of the year, either **Delta Air Lines** or **Continental Airlines** as the carrier's major global alliance partner.

Perhaps more important to the moment, on February 22 **America West Airlines** halts its talks with **United Airlines** concerning a merger.

Breaking ranks with its partners, on February 23, **Alitalia, S.p.A.**, through an unidentified spokesman, confirms that his carrier, along with **Northwest Airlines** and **KLM (Royal Dutch Airlines, N.V.)** are at the "very beginning" of alliance talks with **Air France**.

Also during the day, the carrier announces that it will begin daily nonstop DC-10-30 roundtrips on July 1 between Newark and Amsterdam.

A broad strategic marketing agreement is entered into with **Alaska Airlines**, and its sister carrier **Horizon Air**, on February 25. As soon as government approvals are received, the three will link their frequent flyer programs and commence code-sharing flights.

During the week of March 1, the last B-747 and B-737-200 are removed from the fleet, dropping from 9 to 7 the number of jetliner types utilized; the carrier will use only 4 types by 2005. During the year, 57

aircraft are scheduled to be retired and 60 added, dropping the average age of units to just 7.6 years and giving Continental one of the youngest domestic fleets in the U.S. airline industry.

At the same time, the carrier announces that, like **USAirways**, it has finally won economically viable takeoff and landing slots at London (LGW) for which it has held DOT authority from Cleveland for over a year. Daily return service will commence at the end of June.

B-777-224 IGWs replace DC-10-30s on the westbound leg of one of the daily nonstop roundtrip services from London (LGW) to Houston on March 2.

On March 3, a B-737-3T0 with 5 crew and 60 passengers prepares for departure from Newark to Jacksonville. With the pilot's permission, the door of Flight 517 is reopened to admit a late passenger, but a flight attendant falls out and down onto the tarmac. The aircraft captain rushes to the side of the seriously injured attendant, who has been flying with the company for four months, and remains with her until she is placed aboard an ambulance.

An MD-82 suffers a right main landing gear fire while landing at Houston on March 10; no injuries are reported.

While en route from Ft. Lauderdale to Newark on March 16, an MD-82 with 146 passengers, suffers the failure of its left engine at 28,000 ft. over the Bahamas. Metal fragments pierce the aircraft's tailcone, causing those in the cockpit to believe the tailcone had fallen off. An emergency is declared and the plane returns to its point of origin, where a safe landing is made and no injuries are reported.

A second DC-10-30 on the westbound route is replaced on April 5. Also on April 5, DC-10-30s replace B-757-224ERs on the westbound leg of the daily nonstop roundtrip from Glasgow to Newark; the Boeings will return to both legs on October 30.

Also on April 5, the previously combined daily B-757-224ER roundtrip from Newark to Dublin and Shannon is separated into two roundtrips, one each from Newark to Shannon and Newark to Dublin. The route will be merged again on October 30.

Later in the day, it is announced that daily Next Generation B-737-724 roundtrips will begin on December 16 between Cleveland and San Juan, Puerto Rico.

On April 9, the airline announces that it will increase prices by 3% for advanced-purchase tickets and 1% for walk-ups (business travelers). When other major competitors refuse to go along and raise their fares, most ticket prices are returned to their previous levels.

B-777-224 IGWs replace DC-10-30s on the westbound segment of the carrier's nonstop roundtrip service between Paris (CDG) and Newark on May 2. Daily nonstop DC-10-30 return service from New York and Newark to Brussels begins on May 3-4.

At a May 10 press conference in New York it is announced that **Alitalia, S.p.A.** will join the multinational airline alliance operated by **Northwest Airlines** and **KLM (Royal Dutch Airlines, N.V.)**. The representatives of the partners indicate that their companies are asking the DOT to grant antitrust immunity to their joint venture, after which they will be able to set ticket prices together, code-share, manage seat inventories, and share services, costs, and revenues. Following approval, the first routes to be operated under the new joint venture will be from Detroit to Rome and Milan.

This new partnership will form the core of a long-awaited fourth major global airline alliance, "Wings," which will be formally announced later in the year, probably in the fourth quarter. Before that time, it is anticipated that Continental will also become an alliance partner.

On May 11, *El Comercio* notes that the financially troubled and grounded **AeroPeru (Empresa de Transportes Aereos de Peru, S.A.)** has completed negotiations with Continental on a plan that will have the U.S. company take a 49% stake in exchange for a significant equity investment. As part of the arrangement, however, Continental asks the Peruvian government to grant it exclusive rights to AeroPeru's long-haul routes. It is simultaneously reported that AeroPeru has reduced its debts from \$174 million to \$70 million.

The next day, it is reported by *Gestion* that the debt is actually down to \$40 million. Given the possible Continental interest, President Fujimori now extends to June 1 his May 17 deadline for the submission of a reorganization plan by AeroPeru.

Two days later, it is announced that the company will turn its six-times-a-day nonstop Newark to Dallas (DFW) route into a roundtrip shuttle service on September 9 by the addition of three more frequencies.

En route from Mexico City to Newark on May 25, Flight 236, a B-737-724 with 8 crew and 68 passengers encounters turbulence while on approach to its destination. One flight attendant sustains a serious injury to his ankle; no one else aboard is hurt.

The restructuring concept of **AeroPeru (Empresa de Transportes Aereos de Peru, S.A.)** is officially presented as scheduled on June 1 and lays out the manner in which AeroPeru will process its \$174-million debt. It is also noted that the fine points of a compact with Continental have nearly been worked out; a few days later, Continental, having completed its due diligence and uncovered serious potential problems, pulls out of the unsigned pact.

Chartered from Tombo Aviation Services, the first of 12 Next Generation B-737-71Qs is delivered to **COPA (Compania Panamena de Aviacion, S.A.)** in ceremonies at Seattle on May 24. The aircraft wears the company's new image, which emphasizes the new alliance with Continental. Following its arrival at Tocumen International Airport at Panama City, additional ceremonies are held, with a ribbon cutting by Panamanian first lady Dora Perez Balladares and comments from COPA Chairman Motta. Simultaneously, the code-share with Continental is implemented through a linkage of the two carriers' frequent flyer programs. Plans are announced for the opening of a new Presidents Club by the two at the Panama Airport later in the year.

Daily nonstop DC-10-30 roundtrips from Newark to Zurich commence, also on June 1. Continental's newest B-777-224 IGWs replace DC-10-30s on the westbound segment of the carrier's daily nonstop roundtrips to Zurich next day.

President Roberto Abusada of AeroPeru is very relieved to announce the final details of his airline's restructuring plan at a press conference on June 2. Under the new agreement, Continental assumes a 49%, \$30-million equity stake. Creditors take on 30% of the shares, with the remainder split between employees (5%) and an independent institutions set up by the Peruvian government (16%). Domestic service is to be resumed on June 22, with international flights restarting in September.

COPA (Compania Panamena de Aviacion, S.A.) and Continental begin code-sharing on June 10. The Panamanian line places its "CM" code on approximately 35 Continental flights serving 22 destinations (including Houston, Newark, and Los Angeles), while the American major puts its "CO" code on COPA's flights to Latin America, as well as Miami.

On June 11, B-777-224 IGWs replace DC-10-30s on the westbound leg of the daily nonstop roundtrip from Frankfurt to Newark. Also on June 11, DC-10-30s permanently replace B-757-224ERs employed on the westbound leg of the daily nonstop roundtrip service from Birmingham to Newark.

Seasonal nonstop B-737-724 Saturday roundtrips commence on June 12 from Newark to San Salvador via Guatemala City. Flights will continue until September 4.

The whole **AeroPeru (Empresa de Transportes Aereos de Peru, S.A.)** restructuring plan comes unglued on June 17 when Continental informs President Fujimori and airline officials that, having completed its survey, it, like **American Airlines**, is abandoning its interest.

Angered due to the lateness of her flight and the alleged rudeness of a flight attendant, a 54-year-old woman attacks attendants and attempts to force her way into the cockpit of a flight, which must be diverted to Buffalo. The woman, who is restrained, is charged and appears in court on June 24.

Considered a candidate, President/Chief Operating Officer Brennehan withdraws on June 29 from consideration for the presidency at Compaq Computer Corp.

When **Sun Jet International Sales** suddenly collapses on June 25, Continental is one of several companies to step in and assist its more than 2,500 stranded passengers by offering them substantially discounted fares.

Daily nonstop roundtrip B-757-224ER roundtrips commence on June 30 between Cleveland and London (LGW). This is the first transatlantic service ever operated out of Hopkins International Airport.

En route from Newark to San Juan on July 9, Flight 743, a B-737-824 with 6 crew and 153 passengers encounters severe turbulence at a point 180 mi. S of Bermuda. A safe emergency landing is made at Bermuda and 16 aboard are hospitalized with serious injuries, with another 45 people, including all 4 flight attendants, treated for minor hurts and released.

An expanded code-sharing agreement is signed with **Gulfstream International Airlines** on July 14. Under its terms, Gulfstream will expand its services on November 1 between San Juan and St. Thomas, St. Croix, St. Martin, and St. Kitts in the Virgin Islands.

Daily nonstop DC-10-30 roundtrips begin on July 15 between Newark and Amsterdam.

Beginning on July 16 and continuing through October 30, DC-10-30s replace B-757-224ERs on the westbound leg of the company's daily nonstop roundtrips between Lisbon and Newark.

Passenger John C. Davis Jr. is arrested at Newark on July 22 on charges of aggravated assault. In an air rage incident, he is alleged to have thrown gate agent Angelo Sottile to the ground, breaking his neck. Davis will undergo surgery, while Davis will be released on \$50,000 bail pending his trial.

The next day, the carrier experiences 222 aircraft delays at Newark International Airport alone; the average delay is 1 hr.17 min.

In a speech before the Aero Club on July 26, Chairman Bethune demands that violent passengers be permanently barred from U.S. airlines.

Chairman Bethune also appears on the ABC-TV weekly news show *This Week with Sam Donaldson and Cokie Roberts* on August 22 to discuss the problems of nationwide flight delays, blaming many of them on the inadequacy of the nation's ATC.

The August 23 issue of Malcolm Ginsberg's *Air and Business Travel News* reports that the proposed "Wings" global alliance is in serious jeopardy. Abstracting a report from the previous day's London *Financial Times*, the newsletter notes that a significant disagreement between Continental and **KLM (Royal Dutch Airlines, N.V.)** concerning linkage and revenue sharing on transatlantic flights risks termination of the grouping and creation of a new alliance without Continental.

Much to Chairman Bethune's delight, the FAA issues a report on September 1 accepting most of the blame for the air traffic delays that have plagued the traveling public this summer.

By the beginning of September, Continental has received 12 B-777-224 IGWs and these have replaced DC-10s on flights from Houston to London and from Newark to London, Paris, Frankfurt, and Tel Aviv. The new long-range Boeings also serve Tokyo.

A sixth transatlantic B-777 service is launched on September 7 as the new aircraft replace DC-10s on the daily flight to Manchester, England. B-777 service from Newark to Rome will start on November 1 and to Milan on November 16.

The number of daily roundtrip flights between Newark and Dallas (Dallas (DFW)) are increased on September 9 from six to nine. On September 16, the carrier retires its last Stage II aircraft, a DC-9 at Cleveland.

In late September, the carrier and **America West Airlines** become the first two U.S. airlines to offer interline e-ticketing, via SABRE or Amadeus, on each other's flights. On October 31, the two expand their code-share to include the international cities of Toronto, Ottawa, Montreal, Manchester, Birmingham, Glasgow, Frankfurt, and Dusseldorf.

In another move toward diversity at the airline, Capt. Deborah McCoy is named senior vice president-flight operations, also in October.

As a corporate sponsor of "NYC 2000," Continental honors the "Big Apple" on November 16 when a new B-777-224, wearing a special mil-

lennium color scheme commissioned from pop artist Peter Max, begins service from Newark. Three days later, B-777-224s replace DC-10-30s on the Newark-Milan service.

Also in November, Senior Vice President-Asia James Ream is named president of **Continental Express**. Daily DC-10-30 roundtrips from Houston (IAH) to São Paulo commence on November 30.

Anticipated for some months, a joint marketing agreement is signed with **KLM (Royal Dutch Airlines, N.V.)** on December 15. Under its terms, the two carriers pledge to undertake code-sharing, reciprocal frequent-flyer and lounge programs, and through check-in of passengers and baggage.

A code-sharing agreement with **CSA Czech Airlines** on the Prague-Bucharest route comes into effect on December 21.

Passenger boardings ascend 5.6% to 44,012,000, while cargo jumps 26.8% to 1,114,941,000 FTKs. Operating revenues rise 9% to 8,639,000 while costs are up 11.3% to \$8,039,000,000. Operating profit slips to \$600 million, but net profit surges to \$455 million.

Among the world's top 25 airlines at the beginning of the new millennium, Continental is 7th in passengers, fleet size, and net gain, 11th in employee numbers and operating revenues, and 8th in operating profit.

In February 2000, Chairman/CEO Bethune announces that Continental wishes to purchase back the majority stake held by **Northwest Airlines** in a 10-year voting trust. He promises that the strategic alliance between the two airlines will not be impacted. The leader also seeks consumer support by actually issuing legal challenges to competitors over their use of airport "bag sizer" to review carry-on luggage.

On February 25, it is announced that the year-and-a-half-old code-sharing agreement with **VASP Brazilian Airlines, S.A.** will be terminated.

Saturday nonstop B-737-524 roundtrips commence on March 4 between Newark and Albuquerque. Lack of competitive landing slots at Tokyo (NRT) forces the company, on April 3, to cancel its thrice-weekly services from Honolulu.

The carrier's 8,500 AFA-represented flight attendants ratify a new four-year contract in April. When the merger between **KLM (Royal Dutch Airlines, N.V.)** and **Alitalia, S.p.A.** fails on April 28, Continental maintains its transatlantic code-sharing partnership between Newark and Italy with the former and its friendly arrangements with the latter.

Twice-daily B-737-524 roundtrips are started on May 2 between Houston (IAH) and Sacramento.

The Houston (IAH) to Lima B-737-724 roundtrip service is expanded thrice weekly to Santa Cruz, Bolivia, on June 14. Twice-daily B-737-524 return service also begins from Houston (IAH) to Oakland, along with new daily roundtrips between Cleveland and Austin. Thrice-weekly B-757-224 roundtrips commence from Newark to Santa Cruz, Bolivia, via Lima with daily return flights also added between Houston (IAH) and Anchorage.

On July 1, Chairman/CEO Bethune and his top four deputies sign five-year contract extensions. At the same time, the company's relationship with **Delta Air Lines** ends as the Delta-based major moves into the new "SkyTeam" alliance.

The carrier, beginning on July 16, places its "CO" code on **Northwest Airlines** daily return flights from Los Angeles to Osaka (KIX) and Tokyo (NRT) and from Seattle to Tokyo (NRT).

It is strongly suggested that a thrust reverser wear strip lost from Flight 55, a DC-10-30 taking off down Runway 26R at Paris (CDG) for Newark four minutes earlier on July 25, is the infamous metal piece causing the tire explosion which brings down **Air France** Concorde Flight 4590.

At the end of the month, it is announced that the company will fly the first nonstop B-777-224ER roundtrips between New York (JFK) and Hong Kong beginning on March 1. At 7,337 nm., the 16 hr. 30 min. services will be the longest nonstop flights offered by any U.S. airline.

Twice-daily nonstop B-737-724 roundtrips are launched on August 1 from Oakland to Newark. The carrier's first B-767-424 arrives on August 30; the delivery flight from Boeing Field to Newark had been

piloted by Chairman/CEO Bethune. The new plane and others like it will replace the company's DC-10-30s on international service, particularly on the Newark to South America routes.

At Houston (IAH) on September 2, Continental fully cooperates with representatives of the FAA, NTSB, and British and French safety agencies as they inspect the DC-10-30 suspected of leaving the metal strip that played a crucial role in the Concorde disaster. Although a strip like the one in question is missing from the Jumbojet, inspectors do not definitely determine that it is "the" suspect piece.

B-767-424 service is inaugurated on September 14 as a series of route proving flights between Newark and Orlando.

It is announced on September 28 that **Air France** will sue Continental for allegedly causing the July 25 Concorde disaster; Continental maintains that there is insufficient evidence that a 17" metal strip, which supposedly fell off of one of its DC-10s, was involved in the accident.

After two weeks of practice runs between Newark and Orlando, the carrier's premier B-767-424 is deployed to the airline's Newark-Rio de Janeiro route on October 1. On October 5, a DC-10-30 is scheduled on the Houston (IAH) to Belize City route to provide extra lift to and from hurricane-damaged Belize. With an order for 15 (with the first arriving in November 2001), Continental becomes the second U.S. carrier to request the B-757-300.

B-767-424s replace DC-10-30s on the Newark to Paris (CDG) route on October 29 and the Newark to London (LGW) service the next day. The B-767-224ERs received from a group of ten ordered in August go into service on December 1 over the Newark to Zurich route and from Houston (IAH) to São Paulo on December 14.

Four-times-per-day B-737-724 roundtrips also commence on December 14 from Newark to Aruba, the carrier's tenth Caribbean destination.

CONTINENTAL AIRWAYS: United States (1930-1932). Established at Chicago in late spring 1930, Continental is equipped with 2 Travel Air 6000s that inaugurate scheduled passenger services to Columbus via Indianapolis and Dayton on June 30. During the remainder of the year, a total of 995 passengers are carried.

On July 18, 1931, the route is stretched via Pittsburgh to Washington, D.C. and 2 new Lockheed Model 9 Orions are placed into service over it.

A Chicago hangar fire destroys both Orions on February 5, 1932. Without sufficient capacity in the remaining Travel Airs, nor funds to purchase replacement aircraft, the company must shut its doors.

CONTINENTAL AVIATION, LTD.: E-4/130 Arera Colony, Bhopal, 462016, India; Phone 91 (755) 566 625; Fax 91 (755) 563 447; Year Founded 1991. This new regional airline is formed at Bhopal in 1991. Sam Verma is named managing director and the initial fleet comprises a Boeing 720-025 and a Fokker F.27-100 Friendship. Revenue flights begin late in the year to cities in the province of Madhya Pradesh, but last only briefly. When the government grounds the two aircraft, the carrier goes out of business.

New investment is found in 1992 and allows the carrier to resume operations. The Fokker is employed to fly short-haul services. Services continue in 1993-1994 and the short-haul operation is strengthened by the addition of a Piper PA-31-310 Navajo.

Service continues apace in during the remainder of the decade as two more F.27-100s are acquired.

CONTINENTAL AVIATION CORPORATION. See **UNIVERSAL AVIATION CORPORATION**

CONTINENTAL CONNECTION COMMUTER NETWORK. See **AIR MIDWEST; AIR NEW ORLEANS; ATLANTIS AIRLINES; BAR HARBOR AIRLINES; BRITT AIRWAYS; COLGAN AIR; COMMUTAIR; EASTERN METRO EXPRESS; GULFSTREAM INTERNATIONAL AIRLINES; GULL AIR; MID PACIFIC AIRLINES; PARADISE ISLAND AIRWAYS; PIONEER AIRLINES (2); PRECISION AIRLINES; PROVINCETOWN-BOSTON AIR-**

CONTINENTAL EXPRESS, INC.: 15333 JFK Blvd., Suite 600, Gateway II, Houston, Texas 77032, United States; Phone (713) 985-2700; Fax (713) 590-3820; Code RU; Year Founded 1990. Britt Airways and Rocky Mountain Airways, which have operated Continental's commuter services under contract for some time, including the previous quarter under the moniker **Jet Link**, are consolidated with the assets of **Bar Harbor Airlines** into a single division of **Continental Airlines** in August 1990. The amalgamation process takes six months, during which time the merger partners finish out operations under their own names.

When Continental Express emerges at New York (JFK) as a single entity in January 1991, Stephen J. Kolski is president and airline employment is 2,100. Operating from the hub cities of Cleveland, Denver, Newark, and Houston is a fleet that comprises 37 Avions de Transport Regional ATR42-320s, 15 Beech 1900s, 5 de Havilland Canada DHC-7-102s, and 33 Embraer EMB-120 Brasílias. Four-times-per-day roundtrips commence between Houston and Jackson, Mississippi, in June.

On September 12, Continental Express Flight 2574, a Brasília owned by the Britt Airways division, with 3 crew and 11 passengers en route from Laredo, suffers an in-flight structural breakup and crashes into a corn field near Eagle Lake, Texas, 75 mi. from its Houston destination; there are no survivors. Witnesses on the ground report that the aircraft appears to have been on fire before impact. It will be determined that company mechanics have left 47 screws out of the leading-edge flap of the EMB-120's left horizontal stabilizer during scheduled maintenance and when that edge separates, the airplane goes out of control.

A total of 3,298,811 passengers are flown on the year, down 2.6% from the previous year's combined total.

Company employment is cut 22.2% in 1992 to 2,100, but 5 more ATR42-320s are delivered in December. Passenger boardings multiply by 14.6% to 3,774,719.

The payroll grows 5.8% in 1993 to 2,200 and the fleet now comprises 96 aircraft, including 15 Beech 1900s, 32 EMB-120s, 42 ATR42-320s, 5 DHC-7-102s, and 1 ATR72-212. President Kolski is succeeded by Dennis Crabtree in February.

While taking off from Grider Field Airport at Pine Bluff, Arkansas, on April 29, an EMB-120 stalls at 17,000 ft. and goes out of control. The flight crew is able to regain control after losing over 11,000 ft. and makes a safe forced landing back at the point of origin. Although no injuries are reported, in-flight loads cause extensive engine damage.

Four-times-per-day nonstop roundtrips are initiated on May 7 between Newark and Atlantic City. Also in May, a contract is signed with Messier Services, Inc., a wholly owned subsidiary of Messier-Bugatti of Sterling, Virginia, to provide maintenance and repair service for the entire ATR42-320 fleet.

On December 3, the company takes delivery of its second ATR72-210, which, incidentally, is the 350th ATR built. At month's end, the aircraft begins service from Denver to various Colorado ski communities, including Aspen.

Customer bookings rise another 10.7% this year to 4,177,648.

Airline employment is increased by 22.7% in 1994 to 2,700.

The former executive vice president of **Mesa Airlines**, Jonathan G. Ornstein, becomes the carrier's new president on July 1. Service is suspended on many Denver routes in the fall and the Beech 1900s and DHC-7-102s are withdrawn.

The major event of the year is the grounding of the Newark-based ATR72-212 fleet on December 10, following the FAA's order that the Franco-Italian aircraft not fly in icy conditions. Passenger boardings decline 5.9% on the year to 3,933,154.

There is no change in the workforce during 1995. The government ban on ATR operations is lifted on January 11. It is reported on May 15 that **Continental Airlines** has entered into discussions with **Mesa Air**

Group concerning the possible sale of this commuter subsidiary to MAG in exchange for a 33% investment in the nation's largest regional. Mesa rejects the estimated \$90 million deal on June 2.

Enplanements drop 7% to 3,658,000 and 458,000 freight FTKs are operated. Still, operating income exceeds costs and there are profits: \$17.25 million (operating) and \$4.46 million (net).

The employee population falls to 2,200 in **1996** and the fleet now includes 3 ATR72-212s, 38 ATR42-320s, 32 EMB-120s, and 8 Beech 1900Cs.

Daily ATR42 roundtrip service is initiated on March 4 from Cleveland to Kalamazoo and South Bend.

On April 1, a \$260-million order is placed for 20 ATR42-512s. Eight will be delivered between the third week of May and November and stationed at the carrier's Houston hub.

After a three-year absence, daily ATR42 service is restarted between Cleveland and Akron-Canton Regional Airport on June 6. Simultaneously, thrice-daily nonstop return services begin from Cleveland to New York (JFK) and daily from the Lake Erie metropolis to Greensboro and Raleigh/Durham. In addition, four flights are added to Buffalo, Flint, and Indianapolis, bringing to 123 the total of departures from Cleveland.

On September 2, President Siegel announces a \$375-million order for 25 Embraer EMB-145 Amazon regional aircraft, with options on another 175 over the next 12 years. The planes will be leased by parent **Continental Airlines** from the manufacturer and subleased to the regional on a 16½-year operating lease; financing is arranged by Embraer.

ATR42-512 thrice-daily roundtrips commence on November 1 between Cleveland and Toronto. During the month, a number of company pilots, together with FAA flyers, travel to Embraer's São Jose dos Campos facility in Brazil to undergo flight training on the new regional jets. The first two EMB-145 Amazons are handed over to the company on December 18 in São Jose dos Campos ceremonies. Two more are received on December 26.

Customer bookings accelerate 12.1% to 4,101,000 while cargo falls 3.5% to 442,000 FTKs. Revenues surge 27.1% to \$386.76 million while expenses rise only 16.1% to \$333.34 million. Operating gain moves up to \$53.41 million and a \$27.23-million net profit is posted.

The employee population dips 0.1% in **1997** to 2,200. The fifth EMB-145 arrives in February and crew training is undertaken for them at Lubbock, Texas. Plans to put them into operation on March 1 are shelved late in February in order that additional aircraft might be received and training finished.

EMB-145 ExpressJet services are inaugurated from the Cleveland hub on April 6. Four of the six new aircraft—one of them acting as a spare backup—begin flying thrice-daily roundtrips to Milwaukee and Greensboro and twice-daily roundtrips to St. Louis and Hartford. The inaugural flight, however, is Flight 4109 from Cleveland to Milwaukee; the start of thrice-daily roundtrip frequencies from Milwaukee to Newark by the same plane is twice delayed by weather.

On May 1, ExpressJet flights are launched from Cleveland to Minneapolis, Buffalo, Raleigh/Durham, and Providence. Plans to open flights from the Ohio city to White Plains, New York, four times daily hit a snag when airline officials learn that their ExpressJet is 7 ft. longer than the airport allows under its commuter aircraft classification. The airport's restriction of the EMB-145 to its "large" aircraft category requires Continental Express to half its planned frequencies and operate them at the odd hours of 8:30 a.m. and 7:30 p.m. President Siegel protests the aircraft size ruling as "arbitrary."

In June, nonstop ExpressJet flights commence from Newark to Savannah, Georgia. A new Terminal B concourse is opened at Houston (IAH) in September.

On September 10, thrice-daily nonstop EMB-145 service is inaugurated from Houston to Wichita, Kansas. Also at this time, company officials agree to delay their first flight to comply with the voluntary noise curfew at Westchester County Airport at Valhalla, New York.

On October 1, the carrier inaugurates four-times-per-day EMB-145 service from that destination to Corpus Christi and Wichita. EMB-145

service begins from Cleveland to Toronto on November 1. The same day, two more daily flights are added between Houston (IAH) and Houston Ellington Field and between Houston (IAH) and Beaumont and Port Arthur, Texas.

Passenger boardings jump 19.3% to 4,888,000, while freight advances 16.9% to 515,000 FTKs. Operating revenues ascend 18.9% to \$459.65 million, while expenses rise 17.2% to \$390.52 million. The previous year's operating gain is better, rising to \$69.13 million, while the net profit increases to \$36.12 million.

At the beginning of **1998**, Continental Express is the 21st largest airline in the world in terms of fleet size. Embraer renames its EMB-145 the ERJ-145 to emphasize its regional-jet capabilities. The fleet now includes 38 ATR42-320/520s, 3 ATR72-212s, 25 Beech 1900Ds, 32 EMB-120s, and 34 ERJ-145s.

Just after landing at Windsor Locks, Connecticut, on January 21, the right engine of Flight 3332, an ATR42-320 with 3 crew and 36 passengers, explodes into fire. The aircraft is stopped on the runway and all aboard are evacuated as smoke fills the cabin. Airport fire trucks put out the blaze.

While on a training flight at the Jefferson County Airport at Beaumont, Texas, on February 11, a new ERJ-145 ExpressJet with 4 crew is badly damaged when it rolls into a grass area 15–20 ft. off the ground during a takeoff maneuver; no one aboard is badly hurt.

Thrice-daily nonstop ERJ-145 roundtrips are inaugurated on May 1 between Newark and Ottawa.

On May 8, Continental Express places \$315 million in orders with Embraer for 25 ERJ-135s, plus 50 options. Officials from the North American launch customer are on hand at São Jose Dos Campos, Brazil, on May 12 when the first of the \$12.6-million jetliners is rolled out.

Also at the beginning of May, parent **Continental Airlines** finds itself drawn into a dispute between Dallas civil bodies and **American Airlines**, which wishes to operate scheduled long-haul flights out of Love Field in competition with **Southwest Airlines** (2).

Continental Airlines holds two gates at Love Field, but elects not to go up against Southwest again. It does, however, announce on May 19 that its subsidiary, Continental Express, will inaugurate nonstop Embraer ERJ-145 roundtrips to Cleveland in early July. The announcement causes the governing board at Dallas (DFW) and **American Airlines** to file suit in state court seeing an injunction to block the service.

On June 11, the company launches uncontested nonstop intrastate ERJ-145 ExpressJet return service from Dallas (DAL) to Houston (IAH) seven times a day.

While taxiing preparatory to departure from Newark on June 27, Continental Express Flight 4280, an ATR42-320 with 3 crew and 45 passengers, is subjected to an electronic engine fire warning. The aircraft is halted on the taxiway and a precautionary passenger evacuation follows, using only the main cabin entrance door. One passenger receives a minor injury and, upon examination, no evidence of smoke or fire is found.

Employing three ERJ-145 ExpressJets and a B-737 leased from **Continental Airlines**, Continental Express, on July 1, increases the frequency of flights between Newark and Montreal from three to four every day. Simultaneously, twice-daily ERJ-145 ExpressJet nonstop roundtrips commence from Houston (IAH) to Cincinnati.

The 48th Judicial District Court of Tarrant County, Texas, issues a temporary injunction on July 9 barring the launch of Continental Express service from Dallas (DAL) to Ohio; the airline appeals immediately.

On August 11, it announced that, as part of its transition to regional jets, it will retire its fleet of 32 EMB-120s by December 2000.

Intrastate **American Airlines** Fokker 100 and MD-80 roundtrips commence on August 31 between Dallas (DAL) and Austin, 14 times a day. Meanwhile, the major and the city of Fort Worth continue to oppose an effort by Continental Express to overturn the July 9 court ban against its flights to Cleveland.

The number of daily ERJ-145 ExpressJet nonstop roundtrips frequencies from Houston (IAH) to Cincinnati is increased on September 1 from two to three.

Twice-daily nonstop ERJ-145 ExpressJet roundtrips begin on October 1 between Houston (IAH) and Greenville and Spartanburg, South Carolina.

The carrier and its parent, **Continental Airlines**, bitterly criticize the decision by the 48th Judicial District Court on October 16, which grants a summary judgment to the plaintiffs and prohibits the initiation of commuter service from Dallas (DAL) to Cleveland. Both companies promise to appeal in federal court.

As contract talks between management and the Independent Association of Continental Pilots drag on, company pilots, on October 13, begin informational picketing at selected airports to draw public attention to the failing negotiations.

Following weeks of negotiation with involvement of the NMB, a tentative agreement is reached between management and the pilots on October 30.

ERJ-145 ExpressJet nonstop roundtrips begin on November 1 between Cleveland and Indianapolis.

On December 5, **Northwest Airlines**, which has vowed to complete a deal with **Continental Airlines** despite an antitrust lawsuit from the government, completes its acquisition of a controlling stake in Continental. The arrangement gives the nation's 4th-largest airline a 14% equity stake in Continental as well as voting control of up to 51% of the No. 5 carrier. Executives from both airlines indicate that they will proceed to implement domestic code-sharing involving upwards of 850 flights.

On December 14, the five-year pact between Continental Express management and the pilots is finalized and signed.

Customer bookings during the 12 months accelerate 16.24% to 5.68 million, while cargo traffic rises 4.83% to 539,000 FTKs.

Revenues surge 24.2% to \$570.67 while expenditures grow by 25.8% to \$491.38 million. The operating gain moves up to \$79.29 million, while net gain moves ahead to \$47.25 million.

Continental Airlines and **Northwest Airlines** begin linking a major portion of their domestic flight schedules and implementing more international dual-designator flights on January 7, 1999. The two majors, despite DOT opposition, initiate code-sharing on approximately 850 domestic and international flights to 95 destinations.

As part of the arrangement, **Northwest Airlines** code-shares daily on **Continental Airlines** and Continental Express flights, including cities where it has no service, such as Corpus Christi, Charleston, Scranton, and Daytona Beach.

At a joint news conference at McGee Tyson Airport on March 5, President Siegel and Congressman John Duncan (R-Tenn.) announce that the carrier will establish a mid-network maintenance facility for its regional jets. It will be located in a new 65,000-sq.-ft. hangar to be built on the northeast quadrant of the Knoxville airport. In addition, daily ERJ-145 ExpressJet roundtrips will be inaugurated from Knoxville to Houston (IAH) on July 7, increasing to twice daily on August 1. Flights to Cleveland and Newark are promised by year's end.

An ERJ-145 is forced to return to Cleveland on March 6 after smoke is reported in the cabin. No one aboard is injured and the incident is traced to deicing fluid in the air conditioning system.

It is announced on March 12 that Continental Express will initiate daily nonstop ERJ-145 return service from Houston (IAH) to Chihuahua, Saltillo, and Torreon, Mexico, starting on June 10, August 1, and November 22, respectively.

Wearing a special star-speckled livery and titles indicating the company is "En Route to an All Jet Fleet," Continental Express accepts its 100th ERJ-145 ExpressJet at the end of the month.

Twice-daily ERJ-145 ExpressJet roundtrips commence on April 1 between Cleveland and Montreal (YUL). Three days later, twice-daily regional flights start from Cleveland to Providence, Rhode Island, operating in conjunction with the main line service of **Continental Airlines**.

Twice-daily ERJ-145 roundtrips begin on May 1 from Cleveland to Islip, New York, and to Memphis. Simultaneously, an ERJ-145 daily roundtrip is initiated between Lubbock and Houston (IAH), bringing the number of daily regional services on the route up from four to five.

On June 1, the carrier's new \$90-million Regional Jet Concourse D is opened at Cleveland. The new facility connects to Concourse C via an underground tunnel with moving sidewalks. The concourse provides 12 regional jet gates with the convenience of jet bridge loading, together with 24 turbojet loading positions.

The first service from the new facility, also on June 1, is the introduction of twice-daily ERJ-145 roundtrips to Manchester, New Hampshire. Nine days later, ExpressJet flights are launched to Chicago (ORD) thrice daily and timed to complement the main line flights of **Continental Airlines**. The same day, ERJ-145 roundtrips to Chihuahua, Mexico, begin.

On July 1, a major expansion of ExpressJet service from Cleveland is inaugurated. On that day, twice-daily roundtrips are begun to both Charlotte, North Carolina, and Omaha and daily roundtrips start to Burlington, Vermont, and Jacksonville, Florida.

Frequencies between Houston and Dallas (DAL) are boosted on July 9 from 9 to 11 each day.

A ground crew member imitating a wing walker is killed on July 28 when he walks into a rotating propeller of Flight 3402, an ATR42-520 with 3 crew and 33 passengers, which is just terminating its flight at Gate 7 of Adams Field, Little Rock, Arkansas.

The company's first new ERJ-135 enters revenue service on September 9, operating to Knoxville, White Plains, Chicago (MDW), and St. Louis.

Following the October departure of President David Siegel to become president/CEO of the Budget Group, **Continental Airlines** Senior Vice President-Asia James B. Ream, who had been president/CEO of **Continental Micronesia** in 1996-1998, is appointed as his successor. In November, ground is broken on a new maintenance facility at Knoxville's McGee-Tyson International Airport.

Older frequencies are now increased and several new routes introduced, including Knoxville to New York (LGA), Charleston to Cleveland, Cleveland to Madison, and Houston (IAH) to Mazatlan, Mexico.

Overall passenger boardings surge 17.3% to 6,664,000 while cargo falls 6% to 507,000 FTKs. Revenues jump 22.4% to \$698.67 million, while expenses are up 19% to \$584.79 million. The operating profit ascends to \$113.87 million while net gain reaches \$71.43 million.

Airline employment at the beginning of 2000 stands at 3,576, an 18.7% increase over the past 12 months. Among the world's top 25 airlines at the beginning of the new millennium, Continental Express has the 19th largest fleet.

New daily nonstop ERJ-145 roundtrips commence on February 10 between Houston (IAH) and Mazatlan, Mexico. Simultaneously, four-times-a-day ERJ-145 return flights begin from Cleveland to Charleston, West Virginia. On February 12, weekend ERJ-145 roundtrips are begun from Cleveland to Charleston, South Carolina, and Savannah, Georgia.

In a mammoth purchase announced at the Asian Aerospace exposition, the company requests that Embraer deliver 75 ERJ-145s and 25 ERJ-135s by the end of 2003.

On March 2, nonstop ERJ-145 daily return service is started from Houston (IAH) to Potosi, Mexico, thrice daily from Cleveland to Hamilton, Ontario, and from Houston (IAH) to Abilene.

Twice-daily ERJ-145 roundtrips begin on April 2 from Houston (IAH) to Columbia, South Carolina. A daily ERJ-145 roundtrip is initiated on May 2 between Houston (IAH) and Puebla, Mexico.

Four-times-a-day ERJ-145 return service begins on June 1 from Cleveland to Dallas (LOV). Aguascalientes, served with a daily ERJ-145 roundtrip from Houston (IAH) beginning on June 14, is the company's 20th Mexican destination. The daily ERJ-145 frequency from Houston (IAH) to both Chihuahua and Tampico are simultaneously doubled and an ERJ-135 replaces an EMB-120 on one of the three daily roundtrips between Cleveland and Albany. New daily ERJ-145 return service is also started from Cleveland to Austin.

Also in a June ceremony, a 32,000-sq.-ft., \$25-million training facility, the airline's first at Houston, is opened; it will be employed by the company's flight operations, in-flight and airport services training departments.

With an order for 75 (with 100 options) announced at the Farnborough air show, the regional becomes launch customer on July 26 for the Embraer ERJ-145XR (extended range).

Daily ERJ-145 roundtrips from Houston (IAH) to Hermosillo begin on August 1.

On September 7, four daily ERJ-145 roundtrips are initiated from New York (LGA) to Richmond and to Buffalo. Buffalo becomes an all-jet city when ERJ-135s upgrade the carrier's route to Cleveland.

The ERJ maintenance base at Knoxville is dedicated on October 4.

Thrice-daily ERJ-145 return service is initiated on December 1 from Norfolk to New York (LGA), along with daily ExpressJet roundtrips from Norfolk to Jacksonville.

CONTINENTAL MICRONESIA: P.O. Box 8778, A B Won Pet International Airport, Tamuning, Guam, 96911, United States; Phone (671) 649-5208; Fax (671) 646-7498; <http://www.flycomairontinental.com/g1/micro.micro.html>; Code CS; Year Founded 1993. In November 1992, Air Canada, Ltd. and Texas-based Air Partners I. P. accept a reorganization plan presented by Continental Airlines officials and agree to take over the financially troubled U.S. major. One of the points of reorganization is a plan to spin off Continental's Air Micronesia division into a separate subsidiary.

Air Micronesia is elevated in status in May 1993. Personnel, services, and organization remain the same as does the fleet of 10 Boeing 727s, including 5 Dash-224As, 2 Dash-30s, 2 Dash-232As, and 1 Dash-92C. Continental's ownership stake is now 91%.

Destinations visited from Saipan include Fukuoka, Guatn Yap, Honolulu, Johnston Island, Kwajalein, Majuro, Manila, Nagoya, Okinawa, Ponape, Rota, Tokyo, and Truk. The DOT labels the new carrier a national airline.

Reflecting its new billing, Continental Micronesia flies a total of 1,354,000 passengers and 59.31 million FTKs by year's end. Revenues are \$189.21 million, expenses are \$143.96 million, and the operating profit is \$45.24 million. Changeover costs force a net loss of \$2.4 million.

With the elimination of Australia and New Zealand from the parent's schedule the previous year, the now-profitable Continental Micronesia becomes the center of Continental's 1994 Pacific strategy. By summer, this unit is providing scheduled service to 6 Japanese cities in addition to destinations in Korea, Hong Kong, Taiwan, Indonesia, the Philippines, and 10 islands in the western Pacific. During the year, the fleet is increased by the addition of 2 Douglas DC-10-10s.

Customer bookings skyrocket 70.8% to 2,314,000 and cargo balloons 60.9% to 95.42 million FTKs. Revenues skyrocket 102.8% to \$676.28 million while expenses are only up 80.8% to \$572.81 million. Consequently, there is a \$103.47-million operating surplus and a net gain of \$49.08 million.

Under a marketing agreement with **DHL Worldwide Express**, Continental Micronesia in 1995 operates its B-727-92C over a small cargo network based on Manila.

The company's aircraft transport a total of 2,660,000 passengers, a 15% increase. Cargo rises 3.4% to 98.7 million FTKs. Income at \$741.6 million far exceeds expenses and there are sizeable profits: \$128.56 million (operating) and \$67.31 million (net).

Four Boeing 747-200Bs are leased in 1996 as traffic gains are noted. Service to Sydney is dropped as the DC-10 committed to fly the route is deemed too large.

During the first quarter, 4 B-727-264s are purchased by **DHL Worldwide Express** from **Mexicana Airlines, S.A. de C.V.** All are converted into freighters at Miami and are thereafter sent out to Guam to be operated by the company under contract.

In July, Continental Micronesia assumes \$160 million of its parent's debt, helping the major to ease out of a number of restrictive requirements imposed by Chapter XI financing.

Continental's Vice President Finance James Ream becomes the airline's new president in October. Additional routes to Japan are sought,

but their receipt is held up by the impasse in bilateral air agreement negotiations between the U.S. and Japan.

Customer bookings inch up 1.8% to 2,707,000 and 115.42 million FTKs are operated, a 16.9% increase. Operating income dips 1.1% to \$777.24 million while costs are up 6.4% to \$699.66 million. The operating gain falls to \$77.58 million and the net profit drops to \$27.78 million.

One each B-747-238B and B-747-243B are chartered from **Continental Airlines** during the first quarter of 1997 and are employed to upgrade the carrier's flights to Tokyo, Osaka, and Nagoya. Two more Jumbos will be leased before the end of the year.

On June 24, Continental signs a letter of intent to purchase the 9% stake held in CS by the United Micronesia Development Association and thereby end its contractual agreements with the local investors. The UMDA stockholders approve the \$73-million sale at their annual meeting on July 10.

A marketing alliance is signed on July 30 between **Continental Airlines** and **Hawaiian Airlines**, which includes Continental Micronesia as well. The pact, scheduled to start on October 1, will allow the former to tie its feed to the latter's 12 daily nonstops from Honolulu to the West Coast. In addition, Continental will be able to increase feed for Hawaiian and Continental Micronesia on their services from Hawaii to Guam.

Two days later, **Continental Airlines** inaugurates daily nonstop DC-10-30 flights from Houston (IAH) to Honolulu, timed to connect with Continental Micronesia's continuing service on to Guam. The Asian economic downturn begins to have an impact on company business during the fall.

On December 16, Typhoon Paka sweeps across Guam, with the highest winds ever recorded. Forewarned, Continental Micronesia has been able to evacuate its entire fleet before the storm strikes.

Passenger boardings drop 3% to 2,626,000, but freight jumps 26.6% to 146.16 million FTKs. Operating revenues fall 6.2% to \$729.17 as expenses rise 4% to \$727.82 million. The previous year's huge operating profit falls to \$1.35 million while the net gain becomes a \$20.17 million loss.

In January 1998, **Continental Airlines** arranges its schedule to provide seamless connections between its flights from the U.S. West Coast to Hawaii and those Continental Micronesia departures leaving Hawaii for Guam and points beyond. Discussions between **Continental Airlines** and **Northwest Airlines** lead company officials to anticipate a significant upturn in feed from Tokyo and Osaka to its own route network.

On March 2, the first of 5 new B-757-224s is delivered. At the end of the month, 3 DC-10-30s and 5 B-727-200s are sent back to the U.S. to bolster the parent's fleet, leaving the carrier with 9 B-727-200s, 3 DC-10-30s, 4 B-747-200s, and 2 new B-757-224s.

Unprofitable flights to Seoul are discontinued during the second quarter and the last of the 5 new aircraft are in service by the end of June.

The number of Japanese destinations reaches nine on July 1 with the initiation of daily return service from Guam to Okayama and Niigata. During the month, thrice-weekly B-727-200 service is initiated from Guam to Cairns, Australia, while a similar number of frequencies are started with B-757-224s to Noumea, New Caledonia.

On August 11, parent **Continental Airlines** announces that this subsidiary will retire its 4 Jumbos by April 1991 and its 13 B-727s by December 2000. The B-747s will be replaced by DC-10-30s and the trijets by a reduced number of B-737s.

En route from Guam to Tokyo (NRT) on August 22, Flight 967, the chartered B-747-238B with 449 passengers, encounters severe turbulence at a point some 400 mi. N of the point of origin; three passengers are injured and are taken to the hospital after landing.

Late in the year President/CEO Ream is named senior vice president-Asia of **Continental Airlines**.

Customer bookings during the 12 months plunge 12.15% to 2.3 million, while freight traffic inches up 0.56% to 146.98 million FTKs. Revenues plunge 15.6% to \$615.22 million and even though they are down by 20.3%, expenses still total \$653.1 million. There is a \$37.87-million operating loss and the net loss worsens to \$35.86 million.

Airline employment in **1999** stands at 200.

As a result of the closure of the airport runway at Pohnpei, Guam, for repairs on February 17, Continental Micronesia must halt service to and from that destination until March 1.

During the week of March 1, the company retires its last Jumbojets.

Customer bookings plunge 18.9% to 1,872,000, while freight falls 14.9% to 125.08 million FTKs. Revenues drop 17.2% to \$509.56 million, while expenses also take a welcome plunge, dropping 26.7% to \$314.36 million. Operating profit climbs out of the red and into the black at \$30.76 million, while the large net loss is turned into an \$8.69-million net gain.

Airline employment at the beginning of **2000** stands at 4,940, a dip of 0.2% over the previous 12 months.

Twice-weekly B-737-824 roundtrips commence on July 16 from Guam to Seoul. Beginning in the fall, the carrier retires its last 4 B-737-224As, replacing them with Dash-824s, and by October 1, has returned all of its B-737-224s to its parent. The fleet of 8 B-737-824s is now transparent, wearing full Continental colors and titles. Additional DC-10-30s will be brought in from Continental as needed.

CONTINENTAL WEST AIRLINES: United States (1984–1986). In October **1984**, Texas Air Corporation (TAC), parent of **Continental Airlines**, announces the purchase of 24 Boeing 737-3T0s, half of which are destined for lease by the bankrupt major in 1985. Creditors, seeking payment before expansion, petition the U.S. Bankruptcy Court to block the acquisition. The court rules that it will allow delivery of the first four aircraft on schedule, but that the others must be held back until Continental's financial results for the first half-year can be examined along with its reorganization plan, promised for June.

Within days, TAC announces the formation of a joint-venture subsidiary, ownership of which will be shared with **Continental Airlines**. The carrier, to be based at Los Angeles, is, in fact, a low-fare entrant designed to employ the embargoed aircraft until such time as they can be amalgamated.

In June **1985**, 6 B-737-3T0s in CWA colors inaugurate scheduled services "complimenting" those of the major's from LAX to Las Vegas and Reno. The result of this start-up is a hurtful California fare war. The total number of enplanements is buried in the annual figures of the parent organization.

In **1986**, **Continental Airlines**, which has delayed its reorganization plan, presents it to the bankruptcy court, which, together with creditors, receives it favorably. The block on further B-737-3T0 deliveries is lifted and quickly leads to CWA's absorption into the major. The entire ploy has an ironic ending: the B-737-3T0s received for the routes of the "complementary" carrier are immediately shifted elsewhere, being replaced by older DC-9-32s.

CONTRACT AIR CARGO: ILF Group, 6860 South Service Dr., Waterford, Michigan 48327, United States; Phone (248) 666-9630; Fax (248) 666-9614; Code 3C; Year Founded 1983. CAC is established at Waterford, Michigan, in the spring of **1983** to offer ad hoc all-cargo services throughout the Midwest. Part 125 charter operations commence with a single Douglas DC-4.

Nonscheduled flights continue over the decade, prior to the establishment of the affiliated **Corporate Express**.

By **2000**, President Anders Hurtig oversees a workforce of 60 and a fleet of 2 Convair CV-340s, 4 CV-580s, and the DC-4.

Destinations visited include Atlanta, Baltimore, Charleston, Jacksonville, Little Rock, Myrtle Beach, Nashville, Norfolk, Raleigh/Durham, Savannah, Tri-Cities Regional Airport, and Wilmington.

COOK INLET AVIATION. See **INLET AIRLINES**

COOK ISLAND AIR (COOK ISLAND AIRWAYS, LTD.): Cook Islands (1973–1991). The Cook Islands government 10% shareholding joins with **Air New Zealand, Ltd.**'s 90% shareholding in August **1973** to form this third-level airline to operate scheduled air services among

the islands. Equipped with 1 each Britten-Norman BN-2 Islander and Piper PA-23 Aztec, Cook Island Air inaugurates service from Rarotonga to Aitutaki on November 25.

During the decade that follows, the Aztec is discarded; however, scheduled Islander service is started to Atiu, Mauke, and Mitiaro while charter and sight-seeing flights are also offered.

Passenger boardings in **1981** total 8,896 and in **1982** the total is 9,037. Systemwide, traffic does not advance significantly thereafter.

By **1988** General Manager B. H. Jones can only afford to keep one Islander in the air. In October, the Rarotonga–Auckland service is cancelled in favor of a route from Sydney to Rarotonga.

Paul K. Collins is named general manager in **1989**. A de Havilland DHC-6 is acquired. Operations continue apace in **1990**, but, as one of the economy measures undertaken by parent **Air New Zealand, Ltd.**, Cook Island Air is shut down in **1991**.

COOK ISLANDS INTERNATIONAL, LTD.: Cook Islands (1987–1991). Early in **1987**, Rarotonga officials create a national flag carrier to operate service to regional South Pacific destinations. A plan is negotiated with **Ansett Airlines of Australia (Pty.), Ltd.** for shared-lease, joint-use, with **Polynesian Airlines, Ltd.**, of a Boeing 727-277. Revenue flights begin before the end of the year and continue until January **1991** when, unable to maintain economic viability, the carrier is forced to shut down.

COOK STRAIT AIRWAYS, LTD.: New Zealand (1935–1939). Cook Strait Airways, Ltd. is formed at Wellington in late fall **1935** to offer scheduled services between New Zealand's North and South Islands. With two de Havilland DH 89s christened *Mercury* and *Jupiter*, regular services are inaugurated to Nelson via Blenheim on December 30. This route is maintained during **1936** and on February 23, **1937** thrice-weekly flights are started from Nelson via Greymouth to Hokitika.

A thrice-weekly Wellington to Hokitika via Nelson frequency is introduced on October 30. The fleet in **1938** comprises 5 DH-89s. The nation's involvement in World War II forces the company to cease operations on November 9, **1939**.

COOK STRAIT SKYFERRY, LTD.: New Zealand (1990–1992). Cook Strait is set up at Wellington in **1990** to offer scheduled services to and between Blenheim and Picton. Stephen Gray becomes operations manager and revenue services are initiated with a start-up fleet comprising 1 Cessna 208 Caravan I, 1 Pilatus-Britten-Norman PBN-2 Islander, and 3 PBN-2A Trislanders.

Recession in **1990–1991** hurts business and the fleet is reduced to just the Caravan. Freight is now flown exclusively in lieu of passengers. Unable to find a niche, the little commuter is forced to cease operations in **1992**.

COOPER SKYBIRD AIRCHARTERS, LTD.: Kenya (1988–1989). Cooper Skybird is formed in **1988** to provide both charter flights and scheduled services. Managing Director J. M. Cleave's Piper PA-34 Seneca and Pilatus-Britten-Norman PBN-2 Islander undertake scheduled frequencies linking the carrier's Mombasa base with Malindi and Lamu.

With traffic too light and expenses too high, the carrier cannot achieve economic viability and ceases operations in late **1989**.

COPA (COMPANIA PANAMENA DE AVIACION, S.A.): P.O. Box 1572, Panama City 1, Panama; Phone (507) 272 522; Fax (507) 271 952; <http://www.copaair.com>; Code CM; Year Founded 1944. The Panamanian government forms this carrier at Panama City on June 21, **1944**; in need of support and expertise, COPA sells 40% shareholding to **Pan American Airways (PAA)** on August 30. The carrier's first Douglas DC-3 is leased to **LACSA (Lineas Aereas Costarricenses, S.A.)** in May **1946**; that airline subsequently crashes the aircraft on November 26.

Unable to obtain a replacement until the spring of 1947, COPA does not begin service until May 5. On that date, former military C-47s, converted to DC-3 civil standard, initiate multistop flights over a single route from Albrook Field in the Canal Zone (pending completion of Tocumen Airport at Panama City) to the town of Changuinola, near Costa Rica. Flights will also be made thrice weekly to David and weekly to Bocas del Toro as part of this service, beginning on August 15.

This low-key domestic network is the carrier's only operation for almost two decades, with the only fleet change being the addition of 2 each Curtiss C-46 Commandos and Convair CV-240s in 1952. The company wins authorization to launch service to Miami in 1965, but chooses not to start.

Regional service finally begins in January 1966 when COPA DC-3s begin flying to San Jose, Costa Rica. A Hawker Siddeley HS 748, ordered in 1965, is delivered on August 5, allowing inauguration of a frequency to Medellin, Columbia.

Three years later, in September 1969, HS 748 Series 2A flights to Managua are initiated, followed by a service to Barranquilla in October. COPA becomes completely Panamanian owned on March 15, 1971, when **Pan American World Airways (1)** sells back its interest. Low cost fares are introduced along with a Lockheed L-188A Electra in October.

COPA maintains its domestic and minimal regional network over the next decade, concentrating on discount fares over jetliner service. An HS 748-2A is sold back to Hawker Siddeley in May 1974; the manufacturer will employ the aircraft to develop a coast guard patrol plane. Two former **Eastern Air Lines** L-188Cs join the fleet during the year.

By 1978, Chairman Dr. Carlos Icaza presides over an airline of 502 employees that links the nation with Costa Rica, Nicaragua, El Salvador, Guatemala, and Colombia.

In 1981, scheduled Panamanian domestic flights are discontinued and the company begins to concentrate on building a regional and international route network. Passenger boardings on the year total 141,924 and are level in 1982.

One each L-188A and L-188C are sold to **Galaxy Airlines** in 1983. Customer bookings rise to 147,163.

During the following 10 years, San Salvador, El Salvador; Guatemala City, Kingston, and Port-au-Prince are added as destinations. The first Boeing 737-200 is placed in service in 1984 and the last L-188C is retired in 1985.

Operations continue apace in 1986–1988 and in 1989, the fleet includes the B-737-112 and one leased B-737-230C. Service to Miami begins on December 1, but these and all other operations are curtailed by the U.S. invasion on December 20–21, during which the Tocumen–Torrijos International Airport, east of Panama City, is damaged in the fighting.

Once civil operations are allowed to resume in 1990, the fleet is increased by the addition of a leased B-737-281 and a B-737-204A, the latter chartered from **Britannia Airways, Ltd.** The Miami service becomes permanent and frequencies are increased to five per week in February and daily on April 1.

One of these “Baby Boeings,” with 22 aboard, crashes into the Pacific Ocean on April 18 after takeoff from the Panamanian island of Contadora as the result of birds being sucked into its engine (20 dead). Plans are announced in September for the purchase of the grounded **Air Panama International, S.A.**

Another chartered B-737-204A joins the fleet in 1991 as new services are started to Mexico City in October. The company now operates internationally to San Jose, Managua City, San Salvador, Guatemala City, and Miami.

Statistics are reported for the period from May through December and show enplanements skyrocketing 79.7% to 265,581 and freight rising 25.8% to 2.38 million FTKs.

The workforce is increased a dramatic 61.9% in 1992 to 620 as a leased B-737-275 joins the fleet and begins flying to Cali and Montego Bay in May and San Juan, Puerto Rico, in June.

While en route from Panama City to Cali on June 6, Flight 201, a B-737-204 with 7 crew and 40 passengers encounters thunderstorms at 25,000 ft. The aircraft suddenly rolls into a steep descent and starts to break up as it passes 10,000 ft. The jetliner plunges into the earth, nose down at an 80-degree angle.

The wreckage is found near the border with Colombia on June 7 and there are no survivors. The search for clues to the cause of the tragedy will be documented in the Public Broadcasting System's *Nova* series documentary *The Mystery of Flight 201*.

Figures are released for the first five months of the year. They indicate bookings are down to 114,129 and freight is only 1.7 million FTKs. Later in the year, a comprehensive marketing plan is signed with **TACA International Airlines, S.A.**, which provides for joint purchasing, fleet rationalization, and cooperation on support services. COPA will be the only one of the six members of the TACA Group in which TACA International does not hold equity.

By 1993, the workforce stands at 620 and Chairman/President Alberto Motta's fleet comprises 5 B-737-200s. Passenger bookings through June are up 18.2% to 160,239 while freight rises 29.7% to 2.7 million FTKs.

Just after landing at Panama City following a November 19 service from Miami, a B-737-112 with 6 crew and 86 passengers suffers the collapse of its nosegear on a rain-soaked runway; although the aircraft is severely damaged, there are no fatalities.

Airline employment is increased by 19.3% in 1994 to 945 and the fleet now contains 1 owned B-737-230C freighter and 7 other Baby Boeings, all leased passenger-carrying models.

While en route from Guatemala City to El Salvador on August 7, a B-737-200 with 78 passengers is taken over by a lone air pirate who demands that the aircraft divert to Managua. The hijacker is taken in hand by Nicaraguan police as soon as he steps off the aircraft.

Customer boardings, for the year as a whole, jump 36.3% to 519,602.

The workforce grows to 1,158 in 1995, a 22.5% increase. The U.S. reservations centers of the TACA Group members are consolidated in a single El Salvador facility and services are initiated to the Dominican Republic. On June 14, the company's license is renewed for the operation of services between Panama City and San Juan via Santo Domingo.

Enplanements increase 43.8% to 661,185 and operating revenue jumps 24.3% to \$180.79 million.

Airline employment grows a significant 51.3% in 1996 to 1,210. Service is started to Havana, Caracas, São Paulo, and Buenos Aires. An alliance is planned with **American Airlines** as part of the general accord with the TACA Group.

Unknown by the public, the company operates a U.S.-registered B-737-200 on 138 flights during July without an FAA-approved maintenance program. This month of service will cause difficulties.

By year's end, the group operates an extensive international route network that includes 14 points in Central America, 12 in South America, 3 in Mexico, and 8 in the U.S.

The company's 11 B-737s transport a total of 688,769 passengers, a 4.2% increase, and 187,000 FTKs are operated, a giant 71.3% improvement.

The employee population grows by 6.4% in 1997 to 1,308. TACA Group officials and executives from **American Airlines** sign a code-sharing pact in the spring. Flights to Santiago and Lima commence in July, the same month in which the U.S. FAA certifies the company to undertake limited repairs and maintenance work.

In September, the FAA proposes a \$138,000 fine against COPA for its unauthorized B-737 operation the previous July. Noting that the airline has made significant progress over the previous 12 months, the American agency refuses to stiffen the fine.

In November, TACA Group begins service to Santo Domingo. Two-class service is introduced by COPA during November. Thrice-daily service to Dallas (DFW) from San Salvador, San Jose, and Guatemala City begins in December.

Destinations visited at the end of the year include Barranquilla, Bogota, Cali, Cartagena, Dallas (DFW), Guatemala City, Guayaquil, Havana, Kingston, Lima, Managua, Medellin, Mexico City, Miami, Montego Bay, Port-au-Prince, Quito, San Jose, San Juan, San Pedro Sula, San Salvador, Santiago, and Santo Domingo.

Passenger boardings ascend 12.1% to 772,178 while freight increases 56.3% to 17.25 million FTKs.

The carrier bans smoking on all of its services as of January 1, 1998.

In May, a 49% stake in the carrier's parent holding company is acquired by **Continental Airlines**. Subject to "certain conditions," the two will enter into a comprehensive marketing and code-sharing alliance.

COPA, on January 19, 1999, places orders for 8 Next Generation B-737-700s. Simultaneously, four units are requested from two lessors, Tombo Aviation Services and GE Capital Aviation Services, with the first aircraft scheduled for delivery in April.

Chartered from Tombo, the premier Next Generation B-737-71Q is delivered in ceremonies at Seattle on May 24. The aircraft wears the company's new image, emphasizing the new alliance with **Continental Airlines**.

Following its arrival at Panama City, additional ceremonies are held, with a ribbon cut by Panamanian first lady Dora Perez Balladares and comments from COPA Chairman/President Alberto Motta. Simultaneously, the code-share with Continental is initially implemented through a linkage of the two carriers' frequent flyer programs. Plans are announced for the opening of a new Presidents Club at the Panama airport later in the year. COPA continues to plan for the opening of services to Buenos Aires and São Paulo.

It is announced on May 25 that the number of daily roundtrip flights between Newark and Dallas (DFW) will be increased on September 9 from six to nine.

COPA and Continental begin code-sharing on June 10. The Panamanian line places its "CM" code on approximately 35 Continental flights serving 22 destinations (including Houston, Newark, and Los Angeles), while the American major puts its "CO" code on COPA's flights to Latin America, as well as Miami.

Daily return flights from Panama City to Guatemala City begin on July 5.

New service is started to San Salvador on October 15.

Twice-daily Next Generation B-737-71Q return flights are offered on October 29 between Panama City and both Miami and Lima.

A second daily return service to Havana is launched on November 8 while four-times-a-week Next Generation B-737-71Q roundtrips begin on November 26 from Panama City to Buenos Aires.

With immediate effect, a strategic alliance is entered into with Santiago-based **Avant Airlines, S.A.** on December 2. In addition to linking frequent flyer programs, the two share their codes on one another's flights.

Traffic and figures are not available as the carrier enters 2000.

With financing arranged by the U.S. Export-Import Bank, Copa orders four more Next Generation B-737-71Qs on February 2.

Four weekly Next Generation B-737-71Q roundtrips are initiated on February 7 from Panama City to Orlando. Flights to Cancún, also four-times-a-week, begin the next day.

The new Presidents Club at Tocumen International Airport in Panama is opened on March 12 in joint ceremonies with **Continental Airlines**.

Under terms of a new pact, the carrier begins to place its "CM" code on **Gulfstream International Airlines** flights between Miami and Orlando on May 2.

Daily nonstop service to Los Angeles is initiated from Panama City on June 1, followed by thrice-weekly roundtrips to São Paulo on June 29. This expansion is made possible by two recently delivered B-737-71Qs.

COPENHAGEN AIR TAXI, A.S.: Kobenhavns Lufthavn Roskilde, Lufthavnsvej 20, DK-4000, Roskilde, Denmark; Phone 45 (46) 19 11 14; Fax 45 (46) 19 11 15; <http://www.daa.dk/copenhagen/index.htm>; Code CAT; Year Founded 1963. Organized at Kobenhavna

Lufthaven (Copenhagen Airport) in May 1963, this company, as its name implies, is primarily a charter operator. Late in the decade, it begins to offer scheduled lightplane services from its base to the islands of Anholt, Laeso, and Samso.

These commuter services continue with little change into the 1980s, at which time the fleet comprises 2 Partenavia P-68Cs, 1 Piper PA-23 Aztec, and 16 single-engine aircraft.

In 1986, Managing Director/Chief Pilot Kenneth Arly Larsen acquires 2 more P-68Cs. No significant alterations until 1990 when another Partenavia is delivered, along with 2 Piper PA-31-350 Navajo Chieftains and 2 Piper PA-34 Senecas.

Managing Director Larsen and General Manager C. B. Christoffersen oversee a workforce of 22 in 1993-1994. The fleet now includes 1 Aztec, 1 Seneca, 1 Mu-2, 2 Navajo Chieftains, 5 Partenavias, and 12 Cessna 18 Skylanes.

It is understood that flights continue without change for the remainder of the decade; exact information is, however, unavailable, except for schedule information that is promoted via an Internet website.

COPISA (COMPANIA PERUANA INTERNACIONAL DE AVIACION, S.A.): Peru (1964-1973). With a fleet of 3 Curtiss C-46 Commandos, this charter carrier, founded at Lima in July 1964, undertakes freight and passenger charters from Iquitos to Maracaibo and from Lima to Miami via Cali and Panama City. A Lockheed L-749 Constellation, previously flown by **British Overseas Airways Corporation (BOAC)** and **Capitol Airways**, is leased from California Airmotive in February 1966.

Following a suspension of services between July and September 1967b, the company resumes flying the Lima-Miami run, although the Maracaibo operation is withdrawn. At this time, 2 more Constellations are acquired, including a former **Air France** L-749 purchased from **Royal Air Maroc** and an L-649 once flown by **Eastern Air Lines**. Late in 1968b, an L-749A previously operated by **Skyways, Ltd.** is purchased from the Bolivian charter operator **Transportes Aereos Benianos, S.A.**

Operations continue apace in 1968-1972, during which time the L-649 is passed to the Dominican airline **Aerovias Nacionales Quisqueyanas, S.A.** As the result of increasing fuel prices and a poor economy, the carrier shuts down permanently in 1973.

COPPER STATE AIRLINES: United States (1980-1982). Wiley E. Green's Douglas, Arizona-based FBO Go Flying establishes an airline division in the spring of 1980 to offer scheduled intrastate passenger and cargo flights. Employing a Piper PA-31-350 Navajo Chieftain and a PA-34 Seneca, the new entrant inaugurates revenue services to Tucson, El Paso, Sedona, Prescott, and Phoenix on April 11.

Operations continue apace until 1982 when the company, another third-level victim of the national recession, shuts its doors.

COPTCO HELICOPTER SERVICE: Isla Grande, Lot 3 South, San Juan, Puerto Rico 00907, United States; Phone (787) 729-0000; Fax (787) 729-0003; Year Founded 1993. Coptco is set up at Fernando Luis Ribas Dominicci Airport in 1993 to offer executive and sight-seeing passenger charters. Within seven years, Operations Director Danny Castro oversees the work of four pilots who fly two Aerospatiale AS-350 Astars.

COPTERLINE O/Y: Heliport Hernesaai, Hernematalankata 2, Helsinki, 00150, Finland; Phone 358 (9) 681 1670; Fax 350 (9) 681 16767; <http://www.copterline.com>; Year Founded 1999. On March 8, 1999, the 39-year-old **Helikopteripalvelu, O/Y** and decade-old Copter Action, O/Y are merged to create Finland's largest civil rotary-wing operator, Copter Action Oy Helikopteripalvelu. Tapani Makinen is named managing director on April 9 and his fleet includes a mix of 14 Eurocopter BO-105Cs, EC-135s and Ecureuils, Hughes 300 and 500s, and a Bell 290B Jet Ranger.

Operations of the two merger partners are officially combined on July 30. Helicopter work performed includes EMS flights, power line inspection, training, and search and rescue. Research is conducted for the possible implementation of a helicopter commuter service for business travelers. Revenues for the year total FIM 35 million and a profit of FIM 5 million is posted.

The workforce totals 80 at the beginning of 2000. The decision to launch a scheduled helicopter passenger service is announced in January. On February 1, orders valued at \$15 million are placed for a pair of Sikorsky S-76C+ helicopters, the first of which is delivered on March 16.

The combined company celebrates its fortieth anniversary on April 5. The second S-76C+ is delivered on April 28.

On May 5, 26-times-a-day scheduled return passenger service is inaugurated across the Gulf of Finland between Helsinki and the Estonian capital of Tallinn. Fares for the 43.5-nm. 18-min. flights are \$140. Customer boardings quickly accelerate to between 3,000 and 4,000 per month.

On May 19, letters of intent are signed with Sikorsky for two new airline-configured S-92s, valued at \$15.5 million a copy. Planning is now started for a new Helsinki to St. Petersburg route, which could be inaugurated shortly after delivery of the S-92s.

CORAL AIR: United States (1980–1984). Established by John Stuart Jervis, who had previously operated **Clipper Air International**, at St. Croix in the U.S. Virgin Islands on January 15, 1980, this small third-level operator begins scheduled passenger and cargo flights to San Juan on February 15.

The initial fleet comprises 4 Australian-built GAF Nomad N-24As and 1 Nomad N-22B that give the company its greatest distinction, that of the largest U.S. operator of this little-known aircraft type. On May 12, **Eastern Caribbean Airways** is purchased. Enplanements reach 50,112 by December 31.

Flights are maintained or initiated during 1981 to St. Thomas, Tortola, Nevis, and St. Kitts. The workforce grows to 84 and the fleet now also features 1 Shorts 330, 1 Britten-Norman BN-2 Islander, and 1 Piper PA-34 Seneca. Customer bookings skyrocket 147% to 123,784. Start-up, acquisition, and other costs force Coral to enter Chapter XI bankruptcy at year's end.

The third-level operator flies through its reorganization and re-emerges on August 6, 1982 with 2 new de Havilland Canada DHC-6-200 Twin Otters and a new management team led by president and owner Jervis. Flying from Christiansted to San Juan, St. Thomas, and Tortola, Coral Air transports 85,841 passengers.

Operations continue apace in 1983, but the company, never in good fiscal health, is forced to reduce its aircraft fleet to the 2 De DHC-6-200 Twin Otters. In 1984 the small regional is sold again, but the new owners can do no better and the company ceases operations later in the year.

CORDOVA AIRLINES: United States (1936–1967). Cordova Airlines is formed by "Mudhole" Smith at Cordova, Alaska, in June 1936 to offer flights to various destinations in and surrounding Anchorage. Service is offered, initially, with a Bellanca CH-300 Pacemaker floatplane. Bush operations continue for the remainder of the decade and the three following.

Three crashes and two tragedies are experienced during the 1950s. On January 15, 1951, four freeze to death following the crash of a lightplane on the Copper River flats. A Lockheed Model 10A must be written off following a bad landing at Anchorage on June 25, 1952.

Operations continue apace in 1953–1955. Rival **Christensen Air Service** is acquired in March 1956. En route from Seward to Anchorage on April 10, a newly delivered Aero Commander 500 crashes at about the midway point between the two cities (six dead).

Two years later, in 1958, the company's fleet comprises 2 Douglas DC-3s, 1 Curtiss C-46 Commando, and a variety of small aircraft such as de Havilland Canada DHC-2 Beavers and DHC-3 Otters. Services are maintained without incident in 1959 over a route network that includes such destinations as Anchorage, Valdez, Cordova, and Seward.

A PA-18 is badly damaged following its landing on wet snow at the head of Alaska's Nicjowak River on December 3, 1960. A newly acquired Grumman G-44 Widgeon crashes at Hinchinbrook Island on August 14, 1961, injuring both men aboard.

On July 23, 1963, another Widgeon with four aboard overshoots its landing and crashes. Acquired to run freight, a C-46 is heavily damaged in an Anchorage crash on September 5. It is written off and replaced with two other of the same type. Enplanements for the year are up to 26,963.

The great Alaskan Earthquake of March 1964 strikes in the center of the company's market territory. For months after the event, the airplane, including Cordova's, is the only way to reach affected communities. As a result, the company's 7 aircraft and 84 employees work unceasingly to provide transport. A G-44, with eight aboard, crashes at Cordova on July 17 and a Cessna 185, with two aboard, is lost while landing at Seldovia on December 22. Injuries in both incidents are slight.

As a result of the earthquake, passenger boardings jump 30% to 38,518 and freight traffic climbs by 41%.

The workforce in 1965 totals 69. A Cessna 180 with three passengers makes a hard landing at English Bay on April 19. Another Cessna 180 with five aboard crashes at Lake Tustumena on September 4 (four dead). A DC-3 cargo plane suffers a flat tire while landing at McCarthy on September 14 and crashes. Bookings for the year decline to 34,642.

Flights continue without change in 1966; however, both traffic and revenues decline. Customer bookings are only 22,000. At New Year's 1967, the employee population is reduced to 47 and 2 aircraft are removed, including 1 of the Commandos. Merger discussions are started with the company's main competitor and, on December 7, Cordova is purchased by and merged into **Alaska Airlines**.

CORK AVIATION CENTRE, LTD.: Cork Airport, Cork, Ireland; Phone 353 (21) 888747; Fax 353 (21) 888500; <http://www.aardvark.ie/cac>; Year Founded 1995. Cork Aviation Centre is established at Cork, in the Republic of Ireland, in 1995, as an air taxi and small group charter company. Revenue flights begin, and continue, with a Piper Aztec.

CORPORACION BOLIVIANO DE FORMENTO, S.A.: Bolivia (1946–1965). Government-owned CBF is established at La Paz in the spring of 1946 to haul bulk cargo, including meat. Three Curtiss C-46 Commandos are acquired and revenue flights commence in May.

Operations continue for two decades largely without change, although 3 former military Boeing B-17s are also placed into service. On May 29, 1965, the company's assets are transferred to **LAB (Lloyd Aero Boliviano, S.A.)**.

CORPORACION SUDAMERICANA DE SERVICIOS AEREOS, S.A.: Argentina (1938–1946). Dr. Mario Pastega and Ing. Mauro Herlitska establish the company at Buenos Aires in 1938 to fly a shuttle across the Rio de la Plata to Montevideo. Having obtained a pair of Macchi C-94 flying boats and aircrew from Italy, the new entrant begins flights between the waterfronts of the two capitals in February 1939.

Buenos Aires–Rosario service is inaugurated on May 15, but is suspended in early September. The Italian-backed carrier maintains its crossings until December 1941 when, after the Second World War expands beyond Europe, it is forced to suspend operations.

In late 1945, Dr. Jose Doderio forms an air transport subsidiary for his steamship concern, *Compania Argentina de Aeronavegacion Doderio*. A flying boat enthusiast, Doderio now orders several Short S-25 Sandringhams from the U.K. and, on May 2, 1946, purchases the remaining assets of the "Corporacion," with the idea of restarting it.

Pursuant to its new policy of assuring local participation in Argentine air transport through the creation of joint stock companies, the government decrees the start-up of **ALFA (Aviacion del Litoral Fluvial Argentina, S.A.)** on May 8. It encourages Doderio to take majority ownership and merge the Corporacion and the new entrant. Doderio does so

and the one-time Italian-backed airline is thus absorbed to form the basis of a new carrier.

CORPORATE AIR (1): United States (1978–1993). Corporate Air is established at by Barry S. Lutin at Brainard Airport, Hartford, Connecticut, in 1978. Nonscheduled, third-level, all-cargo services are inaugurated and during the year, a total of 394,000 pounds of freight are transported. The company's 12 aircraft are able to increase their haulage by a huge 60.3% in 1979 to 992,000 pounds.

Operations continue apace and, by 1985, the fleet includes 1 Convair 580, 1 Convair 640, 1 Convair 240, 6 Learjet 25s, 4 Piper PA-31-310 Navajos, 4 Piper T-1040s, plus several Piper lightplanes. This fleet remains in service for eight more years.

CORPORATE AIR (2): Billings–Logan International Airport, P.O. Box 30998, Billings, Montana 59107, United States; Phone (406) 248-1541; Fax (406) 248-7670; <http://www.aviationdirectory.com/corporat.htm>; Code DN; Year Founded 1981. Michael Overstreet forms Corporate Air at Billings, Montana, in 1981 to provide all-cargo services throughout the northwest, many on behalf of express operators and freight forwarders.

Revenue operations commence and continue with a fleet that includes 17 Rockwell Aero Commander 500B/680s, 1 Beech 99, 42 Cessna 208 Caravan Is, 3 de Havilland Canada DHC-6-300 Twin Otters, 2 Shorts 330s, and 4 Piper PA-31-310 Navajos.

By 1996–1997 Chairman Overstreet and President Linda Overstreet have increased their business, with additional hubs established at Denver and Honolulu. Replacement services are often flown on behalf of **Federal Express** and **Midway Airlines (2)**. Now significantly larger, the fleet includes the 17 Aero Commanders, 9 Douglas DC-3s, 4 each Piper PA-31-350 Navajo Chieftains, Embraer EMB 110 Bandeirantes, and Twin Otters, 3 each Shorts 330s and Shorts 360s, 2 each Beech 99s, Convair CV-340s, and Fokker F.27-600s, and 1 each DC-4, Beech 1900C, Cessna 414 Chancellor, and Convair CV-580.

While en route on a ferry flight from Oakland, California, to Honolulu on April 12 of the latter year, a DHC-6-300 runs out of gas and ditches into the Pacific Ocean near Hilo. Although the aircraft is lost, the pilot is rescued by the US Coast Guard.

Just after landing at Billings on November 25 following an all-cargo service from Great Falls, a Shorts 360 with two crew suffers the collapse of its left main landing gear, causing the aircraft to ground loop and slide. Although the plane is badly damaged, neither flyer is hurt.

Flights continue in 1998, albeit not without cost. While on approach to Bismarck after a FedEx-contracted all-cargo flight from Grand Forks on April 7, a Cessna 208B crashes; the aircraft is destroyed and its pilot killed.

On May 9, an Aero Commander 500A suffers the collapse of its left main landing gear while landing at Billings; although the plane is damaged, the pilot is unhurt. On June 16, the pilot of another Aero Commander, a 680L, is not so lucky. While on approach to Helena following an all-cargo service from Kalispell, the plane collides with 5,150-ft. high terrain and is destroyed, its flyer killed. Despite the loss, service is maintained into the new millennium.

CORPORATE AIR MANAGEMENT: 6740 S. Service Drive, Waterford, Michigan 48327, United States; Phone (248) 666-3343; Fax (248) 666-1112; Year Founded 1985. CAM is set up at Oakland–Pontiac Airport in 1985 to offer FAR Part 135 passenger charters in competition with **Chrysler Pentastar Aviation** and **Corporate Flight**.

By 2000, the successful carrier is not only operating in the North America, but to Mexico, South America, and the Caribbean as well. The employee population reaches 15 full-time and 8 part-time staff and the fleet now includes 1 each British Aerospace BAe (HS) 125-400 Hawker, Learjet 24E, Learjet 25D, Beech Super King Air 200, and Beech King Air 90.

CORPORATE AIRCRAFT MANAGEMENT: 583 Bell Ave., Chesterfield, Missouri 63005, United States; Phone (314) 532-1918; Fax (314) 532-9657; Year Founded 1993. CAM is founded at St. Louis in 1993 to provide executive and small group passenger charters for public and corporate customers. Within 7 years, the company employs 10 pilots and bases its aircraft at both St. Louis airports.

The majority of the fleet is based at Spirit of St. Louis Airport and includes 2 Cessna 501 Citation Is and 1 each Grumman G-1159 Gulfstream II, Mitsubishi Mu-300 Diamond IA, Beech Super King Air 200, King Air 100, and King Air 90. A Learjet 60 is flown from St. Louis.

CORPORATE AIRLINES: P.O. Box 270487, Nashville International Airport, Nashville, Tennessee 37227, United States; Phone 615-275-3950; Fax 615-275-3039; <http://www.iflycorpex.com>; Code 3C; Year Founded 1996. To help fill the void left by the departure of American Eagle, CEA is established at Nashville, Tennessee, in late October 1996 as the scheduled airline division of Charles R. “Chuck” Howell IV’s charter operator **Corporate Flight Management**. A fleet of 6 British Aerospace BAe Jetstream 31s, painted in the company’s blue, white, and silver livery, is assembled during November while the carrier obtains its Part 121 certificate from the FAA.

Business-class service and atmosphere is immediately emphasized. Plans are made to greet customers with complimentary coffee and newspapers and escort them to their aircraft over red carpets. Revenue services from Nashville to Knoxville and Tri-Cities Regional Airport commence on December 16.

Scheduled services are inaugurated in January 1997 to Atlanta, Little Rock, and Memphis, although the latter two destinations will be dropped later on. When **Great Lakes Aviation**, an associate of **Midway Airlines (2)** at Raleigh/Durham, voluntarily shuts down over safety issues on May 16, the Nashville carrier quickly enters into a code-sharing agreement with Midway.

On June 1, Corporate Jetstream 31s inaugurate 24 daily frequencies from the North Carolina airport to Columbus, Nashville, Baltimore (BWI), Norfolk, Wilmington, Myrtle Beach, Charleston, Savannah, and Jacksonville. In order to free up capacity for the new hub, service to unprofitable Knoxville and Tri-Cities Regional Airport is dropped.

At the same time as the company expands, orders are placed with BAe Asset Management: Turboprops for the charter of 14 Jetstream 32s. All will be units removed within the last year by American Eagle carriers. A simple frequent flyer program is now instituted: fly 9 roundtrips (or 18 one-ways) and win a 10th roundtrip free.

The first Jetstream 32s, upgraded to Enhanced Performance or EP standard, are delivered to the company’s Nashville headquarters in September. Airline employment increases to 230 and a site is established on the World Wide Web.

A total of 129,613 passengers are flown during this first full year.

In May 1998, the company, in an effort to heighten name recognition with business travelers, changes the airline name to Corporate Airlines.

When **Midway Airlines (2)** introduces daily Canadair CRJ200 service on June 14 between Raleigh/Durham and both Charleston and Myrtle Beach, South Carolina, Corporate’s daily Jetstream 32 frequencies between these points is increased from two to three.

On August 3, thrice-daily Jetstream 32 roundtrips, dual-designator with **Midway Airlines (2)**, are inaugurated between Raleigh/Durham and both Columbia and Greenville/Spartanburg, South Carolina.

Flights continue apace during the remainder of the year. Customer bookings accelerate 15.4% to 150,000.

Passenger boardings accelerate 19.9% to 179,000.

During the early spring of 2000, the Nashville-based regional purchases 5 more Jetstream 32EPs. When **Trans States Airlines** elects to concentrate on ATR and ERJ-145 services, Corporate, under a new contract with **Trans World Airlines**, is able to launch “Trans World Express” flights on May 8. Routes covered include St. Louis to Cape Girardeau, Fort Leonard Wood, Marion, and Quincy in Illinois and Burlington, Iowa. Eight more J-32EPs are leased for the expansion.

CORPORATE AIRLINES CANBERRA (PTY.), LTD.: Australia (1992–1996). Privately owned CAC is established at the Australian capital in 1992 to offer scheduled third-level passenger and cargo services to Merimblula. Revenue flights begin in October with 3 Cessna 404 Titans. Neither traffic nor financial figures are released.

In 1993, the carrier assumes responsibility for the Canberra–Albury route previously flown by failed **Western Airlines (Pty.), Ltd.** A Cessna 441 is acquired to service the new run.

Operations continue apace in 1994–1995. Although no information is available, the company's traffic and fiscal situation deteriorate to a point where it is forced to shut its doors in February 1996.

CORPORATE EXPRESS: 6860 South Service Drive, Waterford, Michigan 48327, United States; Phone (810) 666-9713; Fax (810) 666-9614; <http://www.corpxair.com>; Code 3C; Year Founded 1992. Corporate Express is established by the IFL Group at Waterford, Michigan, in 1992 to operate nonscheduled cargo services throughout the Midwest as an affiliate of **Contract Air Cargo**. Revenue flights begin and continue with a fleet of 9 Douglas DC-3s.

By 2000, President Michael Church oversees a workforce of 60 and operates nonscheduled services with a fleet of 8 Douglas freighters.

CORPORATE EXPRESS, LTD.: Calgary Esso Aviat, 575 Palmer Road N.E., Calgary, Alberta, T2E 7G4, Canada; Phone (403) 216-4050; <http://www.corpxair.com>; Year Founded 1974. Corporate Express traces its heritage to Gord Peariso's founding of his Peariso Aviation, Ltd. at Calgary in 1974 to provide aircraft maintenance and parts for over 30 major oil companies operating corporate planes in western Canada.

In the mid-1980s, Peariso takes over Corpac Canada, Ltd., the Piper Aircraft Corporation's Canadian Cheyenne distributor. After managing a corporate Beech King Air for several years, Corpac Canada eventually acquires the aircraft and diversifies into the charter business under the name Corporate Express.

In 1991, the company launches the first corporate shuttle service in western Canada, operating it with a British Aerospace BAe Jetstream 31 back and forth between Calgary and Edmonton for the Telus Corporation.

Corporate Express gradually expands during the remainder of the decade and into 2000. Airline employment grows to 30 and a fleet of 4 Jetstream 31s based in Calgary and Edmonton flies over 45,000 people on corporate shuttles and charters throughout western Canada and North America.

CORPORATE EXPRESS AIRLINES (CORPEX). See CORPORATE AIRLINES

CORPORATE FLIGHT: 6150 Highland Road, Waterford, Michigan 48327, United States; Phone (248) 666-8865; Fax (248) 666-8805; <http://www.corporateflight.com>; Year Founded 1979. Corporate Flight is set up at Oakland–Pontiac Airport in 1979 to offer independent FAR Part 135 passenger charters in competition with **Chrysler Pentastar Aviation**.

By 2000, the carrier employs 14 full-time and four part-time staff and operates a fleet that includes 1 each British Aerospace BAe (HS) 125-700A Hawker, North American NA-265-7 Sabreliner, NA-265-80 Sabreliner, Cessna 550 Citation II, Learjet 25, Beech King Air 100, and Piper PA-42 Cheyenne III.

CORPORATE FLIGHT MANAGEMENT: P.O. Box 270487, Nashville International Airport, Nashville, Tennessee 37227, United States; Phone 615-275-3950; Fax 615-275-6565; <http://www.iflycorpex.com>; Year Founded 1981. Corporate Flight Management is established by Charles R. "Chuck" Howell IV at Nashville in 1981 to offer charter and contract service flights throughout the middle southern U.S. with a fleet of Piper PA-31-310 Navajos. Operations commence and continue.

In October 1996, a scheduled airline division, Corporate Express Airlines, is established. Outfitted with 6 British Aerospace BAe Jetstream 31s, it begins revenue services in December.

During the summer of 1997, Corpex significantly expands its network and charters a fleet of 14 former American Eagle BAe Jetstream 32s, the first of which arrives in September. At this, CFM acquires for its charter services a Jetstream 31 previously operated by **Eastern Metro Express**.

In May 1998, the carrier's scheduled air transport division, **Corporate Express Airlines**, is renamed **Corporate Airlines** in an effort to better identify the carrier for the business traveler.

Unscheduled charters continue to be offered by the parent into the new millennium.

CORPORATE HELICOPTERS OF SAN DIEGO: 3753 John J. Montgomery Drive #2, San Diego, California 92123, United States; Phone (619) 505-5650; Fax (619) 874-3038; Year Founded 1989. Ivor Shier sets up this rotary-wing corporate passenger transport concern at San Diego in 1989. Within 11 years, Shier employs four full-time pilots and operates 2 Bell 206B JetRangers, 1 Bell 206L Long-Ranger, 1 Aerospatiale AS-350B Ecureuil, 1 AS-355E Twinstar, and 1 Robinson R-22.

CORPORATE JETS: 14600 North Airport Drive, Scottsdale, Arizona 85260, United States; Phone (602) 948-2400; Fax (602) 948-3874; <http://www.corpjet.com>; Year Founded 1969. Originally established as an FBO at Scottsdale, Arizona, in 1969, Corporate, over the next 30 years, also becomes a well-known executive and small group passenger charter operator. By 2000, the concern employs 10 full-time pilots and operates services from 4 eastern locations in addition to its principal base in the West.

From Scottsdale, Corporate flies 1 each Cessna 525 Citation, C-560 Citation V, C-425 Conquest, and British Aerospace BAe (HS) 125-400 Hawker. A Learjet 35A is based at Tampa, a Hawker is stationed at Dekalb–Peachtree Airport at Atlanta, with another at Charlottesville, Virginia.

The company's principal eastern station is at Pittsburgh's Allegheny County Airport. From here, the company operates 3 Learjet 35As, 1 Citation III, 1 Beech King Air 100, and 1 Cessna 340.

CORSAIR, S.A.: 24 rue Saarinen Sillic 221, Rungis Cedex, F-94528, France; Phone 33 (1) 49 79 49 79; Fax 33 (1) 49 79 49 68; <http://www.corsair-info.com>; <http://www.pacificislands.com/airlines/corsair.html>; Code SS; Year Founded 1993. Adopted in 1993, Corsair is the new name for **Corse Air International, S.A.** Nouvelles Frontieres, France's largest tour operator, continues to operate the company as its in-house airline. Employing the previous fleet of 2 Boeing 747-121s, 2 B-737-3M8s and 1 B-737-4B3, Chairman Paul Casanova's 200-employee carrier continues to provide charter and inclusive-tour flights from the company base at Paris (Orly) to destinations in Europe, the Mediterranean, and North Africa. A weekly Jumbojet roundtrip, begun the previous year, is also maintained between Paris (CDG) and Tahiti via Los Angeles (LAX).

A total of 1.1 million passengers are flown. Revenues total \$236.9 million and allow an \$11-million net profit.

Airline employment stands at 600 in 1994. The 2 B-737-3M8s are retired as the Jumbojet fleet grows through the addition of a B-747-206B leased from **KLM (Royal Dutch Airlines, N.V.)**.

Initially flown as the **South African Airways (Pty.), Ltd. Majuba** and then sold, a B-747SP-44 is purchased from **Royal Air Maroc, S.A.** on October 13. A Douglas DC-10-30 is subleased from the new Belgian operator **ChallengeAir, S.A.**

Passenger boardings for the year accelerate 9.6% to 1,206,000.

There is no change in the workforce during 1995. During the spring, a second DC-10-30, also painted in an all-white scheme with olive drab and red markings, is wet-leased (and repainted) from the Belgian charter operator **ChallengeAir, S.A.** At the same time, a B-737-2K5A is leased from **Aigle Azur Transport Aeriens, S.A.**

In June, a second weekly roundtrip flight, employing the B-747SP-44, is added between Oakland, California, and Tahiti. Many customers are booked as the result of a contract with San Francisco-based Manuia Tours.

Both services over this route are now flown by the Special Purpose Jumbojet and are continued even after the French government resumes Polynesian nuclear testing in September, which causes tourism to plunge.

With French nuclear testing completed, customer bookings to French Polynesia rebound during the last four months of the year.

Enplanements this year jump 30.1% to 1,569,500.

The fleet in 1996 includes 10 Jumbojets and 2 DC-10-30s, the second unit being a former **Air France** unit that has also been chartered from **ChallengeAir, S.A.** A third weekly roundtrip is introduced on July 3 from Paris (CDG) to Oakland and Los Angeles.

On July 5, the second weekly Paris to Tahiti via Los Angeles roundtrip is operated with a chartered B-747-206B. Passengers are often drawn from contracts with Voyage Tahiti and Club Med.

The financially troubled **Air Liberte, S.A.** is placed into receivership on September 26 and its chartered Douglas wide-bodies are returned to Finland. Given six months by the Creteil bankruptcy court, located at Orly where Air Liberte is based, to develop a workable reorganization plan, Chairman Belhassine promises to write a recovery program by the end of October, at which time \$120 million in fiscal year losses must be reported.

Following further exploration into the company's finances during the first week of October, the Creteil bankruptcy court determines that **Air Liberte, S.A.'s** fiscal situation is worse than was originally reported. Even though a number of unprofitable routes are now cut, the court announces that it must have outside acquisition bids by October 14 in order to avoid ordering the company liquidated.

Suitors for the stricken airline begin to emerge late in the week. With pressure to keep it in French hands and its unions seeking acquisition, **Air France** expresses interest. Under European Commission restrictions against acquisition of other carriers during the time of its \$4-billion state bailout, it appears unlikely that the independent will be placed under the major's umbrella.

Other companies expressing an interest include **AOM French Airlines, S.A.**, which has been seeking a merger, along with **British Airways, Ltd. (2)**, **Virgin Express, Ltd.**, **TAT European Airlines, S.A.**, and Corsair.

After **AOM French Airlines, S.A.** and **Air France** drop out of the picture, two parties, **Nouvelles Frontiers** and a group of private investors, submit offerings for **Air Liberte, S.A.** to the Creteil Court on October 14.

Nouvelles Frontiers notes that it has partners in the Rivaud Bank and **Royal Air Maroc** who would be willing to take over **Air Liberte, S.A.**—including its \$300-million debt—and make it profitable within 18 months. It would also make an offer to acquire **AOM French Airlines, S.A.** The two independents would be merged with its own in-house carrier, Corsair, to create a major independent airline that could then compete with **Air France**.

During the last week of October, the Rivaud bank and **Nouvelles Frontiers** abandon their efforts to take over **Air Liberte, S.A.**; Rivaud throws its support behind **British Airways (2)**, with the 2 pledging to invest \$124 million in the ailing French independent. BA would hold 70% interest with the remaining 30% stake held by Rivaud. Meanwhile, **Virgin Atlantic Express, Ltd.** is joined by a number of unnamed investors in presenting an alternative to the French bankruptcy court handling the case; the court extends the deadline for its decision, but, in the end, **British Airways, Ltd. (2)** wins out.

Only 1 DC-10-30 is leased from **ChallengeAir, S.A.** in 1997. The Belgian operator chooses to share its other wide-body with **Calendonian Airways, Ltd.** Markets now visited include Abidjan, Bangkok, Cayenne, Dakar, Fort de France, Los Angeles, Mombasa, Montreal, New York, Noumea, Papeete, Pointe-à-Pitre, Rome, San Francisco, St. Louis, St. Martin, and destinations throughout the Mediterranean.

Coming into Moroni, Comoros, on December 25 on its regularly scheduled weekly roundtrip from Paris to Reunion, the company's B-747-312 with 564 passengers, touches down during a storm and then skids 1,500 ft. off the runway into a field of volcanic earth. No injuries are reported.

Customer bookings this year total 1,877,600.

Flights continue in 1998. In January, Corsair ceases its weekly service to the Comoros as the result of secessionist rebellions on the islands of Anjouan and Moheli.

In an effort to rescue people stranded by the September 2 pilots' strike, **Air Canada, Ltd.** over the next week wet-leases aircraft from **Royal Aviation, Ltd.**, **First Air, Ltd.**, **Skyservice, Ltd.**, and Corsair to move passengers. The French charter line provides a B-747-206B to fly the important Paris-Canada flights.

Passenger boardings during the 12 months fall 6.1% to 1.76 million.

By the beginning of 1999, airline employment has been increased by 8.3% to 1,300.

While taxiing at Los Angeles (LAX) on June 6 just after landing on a service from France, Corsair Flight 942, a B-747SP-44 with 17 crew and 257 passengers, stops short of its assigned gate with its left wing partially extended onto the taxiway. Simultaneously, **Philippine Air Lines (PAL)** Flight 103, a B-747-4F6 with 20 crew and 405 passengers, is taxiing west and collides with the stationary Corsair aircraft. Although the wings of both aircraft are damaged, no injuries are reported.

Thrice-weekly B-747-312 (sometimes B-747SP-44) roundtrips are initiated on June 18 between Paris (ORY) and New York (JFK). The year's enplanements reach 2 million.

The last of 3 B-747-312s to be chartered from **Singapore International Airlines, Ltd.** arrives at the company base in January 2000. An Airbus A330 is received on April 3. It is employed to operate thrice-weekly nonstops from Paris (ORY) to New York (JFK) between June 17 and September 9.

Originally intended for the moribund Algerian start-up Ecoair International, S.A., a B-737-200A is employed by Corsair during the summer to operate regional charters from Paris (ORY).

As it is preparing to land at St. Martin on September 1, Flight 868, a fully loaded company B-747-312 inbound from Paris (CDG), becomes the subject of a bomb threat. Upon landing, all aboard are quickly evacuated, but no explosive is found. The aircraft is allowed to resume its roundtrip back to Paris via Martinique.

The Pan African News Agency reports on October 7 that Corsair will soon open charter operations in East Africa, replacing the **Air France** service from Paris to Nairobi, Kenya, halted on March 25.

It is announced on October 9 that Preussag, A.G. will purchase a 6% stake in the carrier's **Nouvelles Frontieres** parent, subject to European Commission approval. The stake will later be boosted to 34.4%. Preussag officials believe that Corsair's long-haul operations well complement the medium-range services of their own charter airline, **Hapag-Lloyd Fluggesellschaft mbH.**

An ACMI contract is signed with **Biman Bangladesh Airlines, Ltd.** on October 27 for use of a B-747-312 during the next Hadji season.

CORSAIRWAYS: United States (1942-1946). A division of Consolidated-Vultee Aircraft Corporation, Corsairways is organized on April 1, 1942 under the direction of Richard A. McMakin, the company's flight and service department chief pilot. It is immediately placed under contract to the U.S. Army Air Force's Air Transport Command for the delivery of high priority personnel and express to the Pacific. Between April 2-8, McMakin, with a handpicked crew, makes a proving flight with an LB-30 (the transport version of the B-24 Liberator) over 16,400 miles from California to Australia.

Regularly scheduled LB-30 service is inaugurated on April 23 from San Diego to Williamstown via Hamilton Field, California, Hickam Field, Hawaii, Canton Island, Fiji, and Plaines des Gaiacs, New Caledonia. Pilots from **United Air Lines** begin U.S.-Australia familiarization flights aboard company LB-30s during August. Beginning in September,

flights start from Hamilton Field and end at Amberley Field, near Ipswich in Queensland. United is able to begin a second Pacific contract at months end employing the pilots flown during the previous 30 days.

Chief Test Pilot/Manager McMakin is killed while making a May 10, 1943 flight aboard the XB-32 bomber prototype. He is succeeded at Corsairway by Robert S. Mitchell. The California operations center is shifted again on December 15, from Hamilton Field to Fairfield-Suisan Field, later Travis AFB. As World War II progresses, the secret organization's civilian pilots continue fly a variety of cargo aircraft, including Consolidated LB-30s/C-44s and Douglas C-47s out of California and Hawaii to destinations as diverse as Australia, New Zealand, Guadalcanal, Tarawa, Kwajalein, Guam, and the Philippines.

In 1944-1945, Corsairways's 17 Liberator transports average 14 hrs. 30 min. to 15 hrs. 11 min. in the air per plane, per day—a record that still stands. Following V-J Day, little attention is paid to the corporate airline. A number of Corsairways personnel band together in October 1945 to form **Pacific Overseas Airways**.

When the company airline is shut down on December 15, a number of records grace the pioneer's history. Although 3 fatal accidents have been suffered during its years of service, the airline has flown over 101 million ton-miles of cargo over 299 million passenger miles. It had achieved a record California-Australia roundtrip time of 3 days, 17 hrs. and until the introduction of Douglas DC-7, a company LB-30 will hold the Honolulu-San Francisco speed record.

Corsairways' government contract is officially cancelled on January 1, 1946 and it fades from memory as "the unknown airline."

CORSE AIR INTERNATIONAL, S.A.: France (1981-1993). Corse Air International, S.A. is established at Paris in 1981 to offer charter and inclusive-tour flights from its base at Orly Airport and another at Ajaccio, Corsica, to destinations in Europe, the Mediterranean, and North Africa. Revenue flights commence on July 1 with a fleet comprising 3 Sud-Est SE-210 Caravelle VINs and 1 Caravelle XB.

Services are maintained throughout the remainder of the decade, with the first B-737-3Y0 arriving in 1987. A B-747-121 is leased from **Lionair, Ltd.** in 1988 and employed to commence long-range charters to North America. Operations continue apace in 1989 and, in 1990, Chairman Paul Casanova's fleet includes 2 Boeing 737-3Y0s and the B-747-121 leased from **Lionair, Ltd.**

Another B-747-121 is added in 1991, leased from **Cargolux Airlines International, S.A.** Nouvelle Frontiers, an important French tour operator, now acquires a stake in the carrier and the new corporate identity requires a new logo and livery. Although traffic figures are not released, it is revealed that a \$7-million net profit is earned.

In 1992, a B-737-4B3 is leased from **Air France**. Enplanements total 608,000. In early 1993, the carrier is renamed **Corsair, S.A.**

CORSE MEDITERRANEE (COMPAGNIE CORSE MEDITERRANEE, S.A.): **Aéroport de Campo del l'Gro, BP 505, Ajaccio, Corsica 20186, France; Phone 33 (4) 95 29 95 00; Fax 33 (4) 95 29 05 05; <http://www.corsemed.com>; Code XK; Year Founded 1989.** Corse Mediterranee is organized in late 1989 at Corsica's Aéroport de Campo Dell'Oro in Ajaccio to provide both chartered and scheduled regional services. **Air France, Air Inter,** and **TAT Transport Aerien Transregional, S.A.** are all minority FFfr 1-million partners. Pierre Philippe Ceccaldi is named chairman/CEO, with Daniel Gaudart as managing director. Two Avions de Transport Regional ATR72-210s are obtained, allowing revenue services to commence to Nice on July 1, 1990.

Flights are inaugurated from Ajaccio and Bastia to Marseilles on behalf of **Air France** and **Air Inter** in addition to services from those two destinations to Nice and Rome. A Calvi to Nice route is also initiated.

Four additional ATR72-210s join the fleet in 1991. One of these is the new turboprop delivered to **Brit Air, S.A.** in May, operated under charter.

During the summer, a chartered Fokker 100 is operated on the carrier's routes from Ajaccio to Marseilles and Bastia. Enplanements at the 275-employee airline total 488,000.

The leased ATR72-210 is withdrawn in January 1992 and replaced by 2 Fokker 100s leased from **TAT (Transport Aerien Transregional, S.A.)**.

In 1993, Chairman/CEO Ceccaldi oversees a workforce of 273 and a fleet of 5 ATR72-210s and 2 chartered Fokker 100s. Operations continue in 1994 and bookings, reported for the first half only, reach 389,625. Revenues of \$90.33 million are earned, which allow a \$609,000 net profit.

There is no change in either workforce or fleet in 1995. Again, figures are only released through June. These show enplanements off 3.9% to 375,000.

In December 1996, a pair of Fokker 100s formerly operated by **Swissair, A.G.** are leased from a French financial institution that had acquired them from BAe Asset Management: Jets. A total of 752,303 passengers are transported.

Destinations visited in 1997 include Geneva, Marseilles, Milan, Nice, Rome, and Zurich. The fleet now includes 3 Fokker 100s and 5 ATR72-210s. Enplanements reach 771,145 and operating income of FFfr 497 million is generated.

The fleet in 1998 includes 5 each ATR72-210s and Fokker 100s. During the year, the company continues a process of diversification begun the previous year with the creation of the tour operator CCM Voyages. With several investors, the airline launches a Mediterranean maintenance hub for regional aircraft; however, the initial outcome is not successful. More profitable is the deepening of the company's commuter contract with **Air France** into an arrangement that represents 15% of the airline's total turnover. Operational revenues for the year climb to FFfr 540 million and allow a FFfr 26.7-million profit.

At the beginning of 1999, a decision on the company's tender for the renewal of its three-year operating certificate covering routes between Corsica and France is delayed for at least 12 months. Plans to launch flights to Figari in competition with **Air Liberte, S.A.** must be put on hold and an ATR72-202 acquired for the service is, instead, contracted for "Air France Express" flights between Nice and Lyon. The introduction of new European Union labor rules requires that the staff be increased by 27 workers by year's end (for a total of 467).

A total of 387,000 passengers are flown during the year.

At the beginning of 2000, the Corsican Regional Assembly cancels its public service tender for a link from Ajaccio, Calvi, and Bastia to Marseilles and Nice. Consequently, Corse remains the sole operator on routes to the island from southern France.

Per schedule, the company now renegotiates its feeder contract with **Air France**, while simultaneously pondering a switch to regional jets.

COSMOPOLITAN AIRLINES: United States (1978-1985). Cosmopolitan Aviation, owned by Peter and George Garrambone at Farmingdale, New York, creates a scheduled air taxi division in 1978. Employing a Convair CV-440 Metropolitan, the company inaugurates daily roundtrips linking its base with Boston, Atlantic City, and Albany. Operations continue apace for the remainder of the decade and into the early 1980s.

The company encounters financial difficulty in 1985 and goes out of business.

COSMOS AIR, GmbH: Flugplatz, Mannheim-Neustadt, D-68163, Germany; Phone 49 (621) 416040; Fax 49 (621) 460412; Code ZE; Year Founded 1997. Cosmos is established at Mannheim in 1997 to offer regional scheduled services as an affiliate of Arcus Air Logistics. Revenue flights to Berlin's Tempelhof begin with 2 Fairchild Dornier 228-210s and a 328-110.

COSMOS AND TRANSPORT AVIA (KIT KOSMOS E TRANSPORT AVIAKOMPANNIYA): 12 Reysovaya Ulitsa, Aéroport Vnukov, Moscow, 103027, Russia; Year Founded 1992. The air transport department of an industry based in the national capital, C & T is expanded at Moscow's Aéroport Vnukov in 1992 to offer ad hoc passen-

ger and cargo charter flights to destinations in Africa, Europe, and Asia. I. I. Kanygin is named general director and he begins revenue services with a fleet that includes 3 Tupolev Tu-134s, 3 Antonov An-8s, and 1 Ilyushin Il-76.

Operations continue in 1993-1999 and a second Il-76 is placed into service.

It is understood that flights continue without change during the remainder of the decade and that the fleet is enhanced by the addition of a second Il-76; exact additional information is, however, unavailable.

COUGAR HELICOPTERS, LTD.: P.O. Box 248, Halifax International Airport, Waverly, Nova Scotia B0N 2S0, Canada; Phone (902) 873-3611; Fax (902) 873-3972; <http://www.cougar.ca>; Year Founded 1984. Cougar Helicopters, Ltd. is established at Halifax, Nova Scotia, in late 1984 to provide scheduled shuttle services between the downtown Waterfront Heliport and Halifax International Airport. Modeling itself on New York Helicopter Corporation, which company officials have visited, the new entrant is outfitted with 1 each Bell 206L LongRanger and Bell 206B JetRanger.

Scheduled to be coordinated with the arrival and departure of Air Canada, Ltd. flights, Cougar inaugurates 16-per-day one-way flights on June 4, 1985. In 1986, former Okanagan Helicopters, Ltd. Captain James Johnston and a partner purchase the company.

Operations continue apace over the remainder of the decade. Local financier David Hennigar comes aboard as chief shareholder and CEO, with Johnston now president/general manager; Johnston's original partner is bought out.

In these years, Johnston develops an ag-spraying technique that saves half the cost of using fixed-wing aircraft. The process is not only cost effective but accurate, preventing the needless application of herbicide to unintended plots of land, including the usual collateral target of reforested acreage. Fraser, Inc., a major forestry company, offers Cougar a five-year contract to employ its technique; other firms follow.

In 1990, the company begins to accelerate following receipt of a \$C2.5-million, renewable contract from the LASMO oil consortium to provide support near Sable Island, 135 nm. SE of Halifax. To handle this new challenge, a Sikorsky S-61N is purchased from KLM Helicopters, B.V.

At the same time, Cougar introduces the idea of employing helicopters round-the-clock to seek out vessels fishing illegally in Canadian waters and photograph them for prosecution. The contract with Canada's Department of Fisheries and Oceans will lead to the development of Transport Canada-approved over-water IF and night approach techniques.

The third major accomplishment of the year is the introduction of a maritime search and rescue (SAR) service for the National Search and Rescue Secretariat and Canada's Department of National Defense. The Cougar initiative results in the first civilian marine SAR operation in North America.

Also, with the financial support of LASMO and the provincial health departments of Nova Scotia, New Brunswick, and Prince Edward Island, Cougar begins an emergency medical service (EMS) based at Halifax, employing a Sikorsky S-76 equipped with a Cougar-designed incubator and stretcher. Later in the year, a non-Canadian contract is obtained from Global Marine Drilling Company to support a Conoco offshore drilling operation off Gijon, Spain.

These operations are maintained in 1991 as revenues climb to C\$5.5 million and profits reach C\$175,000. The fleet in 1992 includes the S-61N, 2 S-76s, and 1 each Bell 206B JetRanger and 206L LongRanger. In February, Cougar continues a tradition, begun several years earlier with other local operators, of providing aerial transport for sightseers wishing to view newly born seal pups on the ice floes near the Magdalen Islands in the Gulf of St. Lawrence.

During the summer of 1993, the SAR and fishery reconnaissance contracts are lost to Canadian Helicopter Corporation, Ltd. At the same time, a dedicated airmedical S-76 is based at Ottawa, the cost of which

is covered by the Ontario Department of Health. Hennigar and Johnston's company is now recognized as the seventh fastest growing firm in Canada by a leading business magazine.

Later in the year and into 1994, Cougar begins aerial support of firms seeking aerial photography for television commercials. Additionally, a contract is signed with the New Brunswick Department of Natural Resources to support the count of moose, ducks, deer, and other animals. During the summer of the latter year, an S-76 is pressed into service during a week to provide forest fire assistance, putting in 90 flight hours transporting and dumping water on flames with a Bambi bucket.

In June, Cougar establishes a presence in the Thai offshore market when it forms a joint venture with Thai Petroleum Services, a company that will be known as Thai Canadian Helicopter and Petroleum Services, Ltd. A Sikorsky S-76A is dispatched to Ko Samui Island in the Gulf of Thailand, from which it provides support beginning on July 1. A second will follow shortly thereafter.

Also in July, following the creation of the Hibernia offshore oil project by a consortium led by Mobil Oil Canada (33.1%), Chevron Canada (26.8%), Petro-Canada (25%), Cougar is awarded a five-year C\$37-million contract to provide support during and after construction of the drilling platforms. A fifty-fifty joint venture is now entered into with Norway's Helikopter Air Service, A.S. Under its terms, HAS will provide pilot training and maintenance and lease to a new Cougar Hibernia Division of 3 of its Eurocopter AS-332L.1 Super Pumas. In addition, work begins on a new hangar at St. Johns Airport that will house the chartered helicopters.

In addition to the Hibernia buildup, Cougar, by the end of 1996, is also operating elsewhere. One S-61N performs offshore work in Nova Scotia, 3 Bell 206s and 1 Eurocopter AS-355 are engaged in domestic Canadian forest fire fighting and aerial work, and 2 S-76As are providing offshore support in Thailand.

The new C\$3.2-million, 32,000-sq.-ft. hangar is opened in mid-April 1997. The first 2 Super Pumas arrive from Norway in early May and, beginning on May 23, one daily Super Puma flight is undertaken while the platform is towed to the Hibernia field's location, 170 nm. off the Newfoundland coast. The third AS-332L.1 arrives on June 1 and the Hibernia platform is secured on June 6.

During the subsequent construction phase, lasting through August, the carrier makes four-times-per-weekday roundtrips to the platform, transporting many of the 360 workers employed on it.

Flights continue in 1998-1999, as a third Super Puma enters service. In early December of the former year, Canadian Helicopter Corporation, Ltd. is outbid by Cougar on a new C\$20-million contract from Terra Nova. Under the agreement, Cougar will employ its Super Pumas in support of Terra Nova's glory hole, subsea construction, drilling, and operations activities off Newfoundland in 1999-2002.

In February 2000, Cougar, together with Vancouver-based Helijet International, Inc., becomes launch customer for the 19-seat Sikorsky S-92A Helibus. Deliveries of 5 units in a \$65-million contract will commence in April 2002.

COULSON AIRCRANE, LTD.: RR#3, Site 360 Comp 8, Port Alberni, British Columbia V9Y 7L7, Canada; Phone (250) 723-8100; Fax (250) 723-0608; <http://www.coulsonaircrane.com>; Year Founded 1987. Coulson Aircrane, a privately owned family business, is established on Vancouver Island by Wayne Coulson in 1987. The first Sikorsky S-61 is purchased and the company begins to engage in heli-logging, fire fighting, and hydro tower construction activities. It also opens an overhaul and repair service.

During the remainder of the decade, the company grows its fleet and expands its operational experience throughout the Pacific Northwest, operating as far north as Alaska, as far south as California, east to Quebec, and southeast to Idaho.

On July 18, 1989, the company is awarded a U.S. patent for a revolutionary grapple system designed by company personnel to complement the conventional heli-logging program. The grapple, with its greater

safety features, allows the Sikorsky to enter dangerous areas where it is unsafe for chokermen to work.

Service continues apace during the **1990s**, during which years Coulson remains president, with Rita Carter as operations manager and John Coughlin as chief pilot. A workforce of 75 is employed and the fleet comes to include 4 S-61s, 3 Bell 206B JetRangers, 1 Bell 222, and 1 single fixed-wing de Havilland Canada DHC-6-300 Twin Otter.

In **1992**, Sikorsky Aircraft singles out and awards Coulson a plaque for "The Highest Annual Utilization in the History of the S-61." Four years later, General Electric acknowledges the firm for having flown the "Most Single Aircraft Hours" with their CT-58 engine.

As the decade draws to a close, Coulson Airplane has the highest time-utilized S-61 fleet in the world, with each of its aircraft averaging in excess of 2,500 flight-hours each year. In **1997** alone, the 4 S-61s externally fly over a billion pounds.

COUNTRY CONNECTION AIRLINES (PTY.), LTD.: P.O. Box 171, Cootamundra NSW 2590, Australia; Phone +61 69 423 500; Fax +61 69 423 213; <http://www.wagga.com.au/cc>; Code XL; Year Founded 1991. Privately owned CCA is established by Terence and Deidre McKenzie at Cootamundra in the summer of **1991** as the scheduled airline division of South West Aviation (Pty.), Ltd., an FBO and maintenance facility set up in **1980**. The two entrepreneurs establish their carrier to provide regional third-level passenger and cargo services for an area of southwestern New South Wales abandoned by **Hazleton Airlines (Pty.), Ltd.** Terence becomes managing director and inaugurates revenue operations in September with a single Piper PA-31-350 Navajo Chieftain. Neither traffic nor financial figures will be released.

A second Chieftain is acquired in July **1992** and, in **1993**, Thompson's fleet includes 1 Piper PA-34-200T Twin Seneca II, 3 Beech 58 Barons, 1 Embraer EMB-110P1 Bandeirante, 2 Cessna 404 Titans, and 1 Pilatus-Britten-Norman PBN-2 Islander.

Three Piper PA-31-310 Navajos and a Cessna 310 are placed into service during **1994**. These aircraft replace all previous units.

Airline employment in **1995–2000** stands at six full-time and seven part-time staff. The route network includes 14 communities; major destinations visited from Cootamundra are Sydney, Young, West Wyalong, Cowra, and Forbes.

COUNTRYAIR (PTY.), LTD.: Australia (1958–1991). Country Air Services (Pty.), Ltd. is formed by Keith Thompson at Rockhampton Airport on October 16, **1958** to provide passenger and cargo services throughout Queensland. Initially, charter passenger and freight services are flown, including scenic trips over the Great Barrier Reef. During the late 1960s, the carrier begins scheduled feeder flights from Rockhampton to Great Keppel Island on behalf of **Trans-Australian Airlines (Pty.), Ltd.** As demand increases, the fleet grows to include 1 Piper PA-31-350 Navajo Chieftain, 1 Britten-Norman BN-2 Islander, 1 Piper PA-23 Aztec, 1 Piper PA-30 Twin Comanche, 2 Piper PA-24 Comanches, and 1 Piper PA-28 Cherokee.

In **1983**, the company receives its present name following a change in ownership; the Comanches and Cherokee are withdrawn. During the decade that follows, Countrywide elects to enter the regional airline market with additional scheduled services to such distant destinations as Brisbane, Middlesbrough, and Dysart.

The fleet is now upgraded and by **1988**, Managing Director Thompson's operation is employing 1 Islander, 1 Chieftain, 1 Beech B-58 Baron, and 1 Piper PA-34 Seneca. The first Embraer EMB-110 Bandeirante is acquired and the network is enlarged through the addition of stops at Gladstone, Mackay, and Cairns.

In **1989**, the Islander, Navajo Chieftain, and other small types are replaced with 4 Cessna 404 Titans. Operations continue apace in **1990**; however, recession causes the carrier to fail in **1991**.

COUNTRYWIDE AIRLINES (PTY.), LTD.: Australia (1980–1982). This third-level carrier is formed on July 2, **1980** through the merger of

four small South Australia commuters: **Business Aviation (Pty.), Ltd., Cobden Airways (Pty.), Ltd., Murray Valley Airlines (Pty.), Ltd., and Sandon Airlines (Pty.), Ltd.** Headquartered at Mildura, the company's fleet comprises 2 Piper PA-31-350 Navajo Chieftains, 1 Piper PA-31-310 Navajo, 1 Cessna 421, and 1 Partenavia P-68. Service is inaugurated from Quirindi and Wee Was to Sydney and from Renmark and Mildura to Adelaide.

Unable to absorb the higher fuel prices of the early **1980s** and with traffic slipping as a result of the world economic situation, the company is forced to cease flying in **1982**.

COURT AIR (PTY.), LTD.: P.O. Box 2546, Cape Town 8000, South Africa; Phone 27 (0) 21 934 3693; Fax 27 (0) 21 934 3698; Code SCT1; Year Founded 1993. Court Air is established at Cape Town in August **1993** as a subsidiary of **Court Helicopters (Pty.), Ltd.** Jeremy Labuschagne is CEO and he begins and continues scheduled passenger services with a pair of Convair CV-580s.

Also, charters are operated on behalf of energy concerns, taking customers to points where Court's helicopters may transfer them to offshore installations.

Reorganized as the Fixed-Wing Division of **Court Helicopters (Pty.), Ltd.**, this unit is fully purchased by **Helikopter Air Services, A.S.** group on July 1, **1998**. It is allowed to retain its own identity.

COURT HELICOPTERS (PTY.), LTD.: South Africa (1964–2000). This privately owned rotary-wing carrier is formed in **1964** as **Autair Helicopters (South Africa), Ltd.** to provide passenger, cargo and charter services throughout South Africa. A subsidiary of the U.K.-based **Autair, Ltd.**, the operator also undertakes crop-spraying assignments with its fleet of Bell 47s.

During the remainder of the year and into **1965**, Autair surveys the Durban–Johannesburg pipeline and undertakes game conservation work in Kruger National Park. In **1966**, the company is awarded a contract by Marine Diamonds to provide services to the diamond barges off the South West Africa coast; crews and supplies are flown by Sikorsky S-55s.

As the result of the **1967** closing of the Suez Canal and the February **1968** grounding of the oil tanker *Sivella* at Green Point, South Africa, company officials devise a new service. It is designed to help ships avoid the dangers that arise from an increasing number of vessels navigating close to the coastline as they cruise past the Cape of Good Hope.

On June 12, a trial is undertaken by Capt. Theodore Huddleston, who flies an S-55A netload of tomatoes, wine, mail, etc. out to the passing *Dorcasia*. The logistic mission is a success. On September 6, the world's first commercial ship service by helicopter is inaugurated when another S-55A flies to the tanker *Mobil Libya* in the first of a continuing number of supply flights to be conducted in the years that follow and that will become one of the company's mainstay missions.

In **1971**, the carrier's parent company is renamed **Court Line Aviation, Ltd.** Upon the liquidation of Court Line Aviation, this subsidiary is acquired as a fifty-fifty partnership from its liquidators in November **1974** by the South African engineering firm of Murray and Roberts (M&R), together with a consortium of investors known as the Van Zyl Group, named after its leader.

The previous name, minus the "Line Aviation," is retained; however, emphasis is now placed on support of the oil industry, including specialization in resupply flights to oil tankers passing off the coasts. International political sanctions inhibit company growth as Court is excluded from flying in many parts of the world. Still, possibilities exist.

In January **1975**, Court joins with a local Argentine operator to form a company that will engage in seismic work, as well as the offshore support of Shell, Mobil, Total, and the national oil company. In **1976–1977**, Chairman J. J. M. Van Zyl's company also expands to South West Africa and establishes subsidiaries in Bahrain, as well as other Mideast and African nations. These operations must be conducted "quietly," in order to avoid sanctions and political difficulties.

In 1978, airline employment stands at 120 and the fleet comprises 2 Sikorsky S-61Ns, 2 S-62As, 3 S-58Ts, 1 S-55, 2 Bell 206 JetRangers, and 2 Aerospatiale SA-318C Alouette IIs. When a **New York Helicopter Airways** S-61N crashes on the roof of the Pan Am building, the wreckage is purchased by Court and transported to Cape Town, where it is converted into the world's only S-61NC.

In 1979, Court obtains a contract to supply the Argentine oil rig *General Mosconi* and the S-61NC is sent out to handle the task. At the same time, a West German Navy S-58ET is acquired and is employed to extend the ship service out from Durban. By year's end, the line is servicing upwards of 150 ships per month rounding the Cape.

The Argentine arrangement is concluded in 1980 when Court's shareholding is sold to the French operator **Heli-Union, S.A.** Widening of the Suez Canal now begins to cut into the number of oil tankers and bulk carriers passing the Cape.

Following acquisition of Johannesburg-based **Republic Helicopters (Pty.), Ltd.** in 1981, the fleet grows to include 15 Bell 206s, 5 Bell Model 47s, 1 Sikorsky S-61N, and 5 Sikorsky S-58Ts. The workforce averages 125 during 1982–1983. In 1984, Court's Mideast interests are sold to the Dutch carrier **Schreiner Airways, B.V.** Although fleet elements will change, the overall support and transport mission remains the same for the remainder of the decade.

In 1989, a pair of S-61Ns are leased to the new **Hummingbird Helicopters, Ltd.** of the Republic of Maldives. Jeremy Labuschagne becomes managing director in 1990 and, in January 1991, the company begins to employ the global positioning system (GPS) to locate ships rounding the Cape of Good Hope in poor weather. From George, 2 S-61s service a production field on behalf of the South African oil company Soekor.

The 2 leased Hummingbird Sikorskys are returned to the Cape Town base during the first quarter of 1992. With the introduction of political reforms in South Africa, trade barriers begin to fall away during the year and after several years the carrier is once again able to purchase Bell helicopters from Canada.

In 1993, Court inaugurates fire-fighting activities in Natal and Eastern Transvaal employing 2 leased Russian-made Mil Mi-8MTVs. In Namibia, 2 S-61s support an exploration contract held with Norsky Hydro. Meanwhile, Bell 206B JetRangers equipped with special spray-boom attachments begin the "livewire" washing of electric lines on behalf of the South African utility, Eskom.

In August, the company establishes a fixed-wing subsidiary, **Court Air (Pty.), Ltd.** at Cape Town; under the direction of J. Labuschagne, the company begins flying a pair of Convair CV-580s on scheduled services.

Airline employment in 1994 stands at 140 and the fleet, based at B. F. Malan Airport east of Cape Town, includes 9 S-61s, 1 S-76, and 15 Bell 206B/Ls. Two Convair 580s conduct fixed-wing charters and a Bell 206B JetRanger is outfitted for search and rescue (SAR) service. The number of monthly ship resupply missions flown now averages 30. In April, Bell 206s are chartered by the United Nations to monitor activities during the national election.

Operations continue apace in 1995. Operating income ascends to \$15 million and a \$1-million profit is generated.

In 1996, a Sikorsky S-61N is chartered from **British International Helicopters, Ltd.** In a deal valued at \$5.5 million, a third of the company's shareholding is acquired in July by Norway's **Helikopter Air Service, A.S.** HAS is a major component of Helikopter Service Group, which also comprises **Bond Helicopters, Ltd.** of Great Britain and **Lloyd Helicopters (Pty.), Ltd.** of Australia.

Won the previous summer, the Shannon-based SAR mission of **Irish Helicopters, Ltd.** is handed over to **Bond Helicopters, Ltd.** on January 1, 1997. In an example of industry consolidation, execution of the contract is arranged by Helikopter Service Group employing a Sikorsky S-61N leased from Court.

After some months of negotiation, HAG, in March 1997, wins the right to raise its holding in Court to 100% by the following fall.

That option is exercised on July 1, 1998, with HAG taking over the remaining two-thirds interest in a deal valued at \$22.4 million. Operational control is turned over on September 1.

Organized into three divisions—offshore multiengine helicopters, on-shore light single-engine helicopters, and fixed-wing operations—the airline continues to provide support to the offshore markets of Angola, Namibia, and South Africa and to support UN peacekeeping activities in Mozambique.

On November 24, Court is awarded a three-year contract by Soekor E&P (Pty.), Ltd. to support oil exploration and production off the coast of South Africa. When the service begins on January 1, 2000, Court provides two Sikorsky S-61s to fly between four installations and the mainland.

In late February, the South African operator signs a contract with the government of Mozambique to undertake relief flights to people displaced by the severe floods in that nation. On February 28, an S-61 is diverted from an offshore oil rig off Cape Town and makes a 10-hour flight to Maputo, where it is joined by a Bell 212 in completing 6–8 hour per day operations into the devastated interior. These flights continue throughout March.

Effective October 19, all of the subsidiaries of **Canadian Helicopter Corporation, Ltd.** adopt the CHC moniker and are renamed in the manner of **CHC Scotia, Ltd.** Thus, Court is renamed **CHC Helicopters Africa (Pty.), Ltd.** Aircraft from all subsidiaries are now repainted in the CHC red, blue, and white livery and a common look is adopted for all company literature. The reason for the changeover is reported in a single key sentence in the CHC newsletter, *Rotortales*: "The integrated global oil companies which have emerged in recent years seek an integrated global helicopter company to provide services around the world."

Managing Director Jeremy Labuschagne's 160-employee concern continues operations as before, employing a fleet of 29 aircraft. The main focus remains support of oil and gas exploration, although a variety of EMS, search and rescue, and charter flights continue to be offered.

COURT LINE AVIATION, LTD.: United Kingdom (1970–1974). Following its abandonment of unprofitable scheduled services on October 31, 1969, **Autair International Airways, Ltd.**'s owner Court Line, Ltd. elects to concentrate all of its airline resources on inclusive-tour operations. From September to November, tour contracts are signed with 11 major holiday booking agencies, including giant Clarkson's Holidays, Ltd. In December, 2 new BAC 1-11-518FGs, ordered in April, are delivered and christened *Halcyon Sky* and *Halcyon Sun*.

On January 1, 1970, the company name, in tune with a decision announced the previous September 11, is changed to Court Line Aviation, Ltd. During the first quarter, 4 more BAC 1-11-518FGs, *Halcyon Days*, *Halcyon Nights*, *Halcyon Star*, and *Halcyon Cloud*, are added and the lone BAC 1-11-408EF *Halcyon Cloud* is sold. Beginning on March 14, inclusive-tour services are inaugurated to the Mediterranean from the main London (CTN) base, plus Cardiff, Birmingham, and Bristol. Clarkson's Holidays, Ltd. for its part begins to offer thousands of low-cost tour opportunities aimed at its goal of becoming the nation's volume leader in travel. As a result, a price war breaks out between U.K. tour agencies.

At this point, the company, following the example of **Braniff International Airways** in the U.S., becomes the first air carrier in Europe to introduce vivid aircraft paint schemes. Within months, the entire airline, from jetliner to ticket counter to boarding passes, is covered in two- and three-tone psychedelic color schemes designed by Mr. and Mrs. Peter Murdoch, fresh from their graphical triumph at the 1968 Mexico City Olympic Games. Thus the *Halcyon Sun* is painted in a radiant two-tone orange, the *Halcyon Dawn* is two-tone green, and the *Halcyon Cloud* is pastel two-tone pink. The single word "Court" appears on the fuselage under the windowline and a stylized "C" appears on the tail.

Female flight attendant uniforms—Court referred to these employees as hostesses, not stewardesses—consisted of short skirts, fashion blouses, and straw boater hats. Only the hats themselves were a straw-colored; the

hatbands, uniform shoes, and separates were multicolored. Other flight and ground personnel were not quite so boldly attired. Famed designer Mary Quant would be called in later to design additional new clothing.

To assist travelers needing transportation from central London to Luton Airport or back, the company establishes a bus service based in the district of Swiss Cottage. A total of 28 motor coaches, each painted in a bright two-tone color, provide transport to the North London Air Terminal.

Fleet changes in **1971** include the sale of the BAC 1-11-416EK *Halcyon Sun* and the purchase of a Hawker Siddeley HS 125, 2 BAC 1-11-518FGs christened *Halcyon Dawn* and *Halcyon Beach*, and 2 BAC 1-11-517Fes christened *Halcyon Bay* and *Halcyon Cove*. In late winter, with British business slow, several of the carrier's BAC 1-11s are transferred to LIAT in what will become an annual practice.

With the parent already owning holdings in the West Indies, Court Line Aviation, in December, takes a 75% controlling interest in **Leeward Islands Air Transport, Ltd. (LIAT)**. This local service Hawker Siddeley HS 748/Britten-Norman BN-2 Islander operator was formerly affiliated with **British West Indies, Ltd. (2) (BWIA International Airways, Ltd.)**. Meanwhile, the Court Line group is building a large resort at St. Lucia and planning is begun for air service to the U.K.

Clarkson's Holidays, Ltd., the company's major contractor, suffering in its price war, loses £2.6 million even though the carrier has enplanements for the year of 1,158,000.

Airline employment in **1972** stands at 1,053. London (LGW) and Manchester become departure points for the many Mediterranean tours and on August 17, an order is placed for 2 Lockheed L-1011-1 TriStars; this is the first non-North America TriStar order. The last 2 HS 748s are sold to LIAT in October and in addition to extensive additional West Indian investment, a BAC 1-11-523FJ, *Halcyon Breeze*, is purchased. It joins a pair of BAC 1-11-523FJs leased from **British Midland Airways, Ltd.** and left unnamed. The fleet now includes 12 BAC 1-11-500s.

Passenger boardings climb 25% to 1,544,000, but Clarkson's loss mounts to £4.8 million.

A BAC 1-11-517FE, *Halcyon Beach*, is purchased in February **1973**. In March, the first L-1011-1 is delivered under charter from Airlease International. Outfitted with a unique self-contained, main-deck air stairs and painted two-tone yellow and orange, it is christened *Halcyon Days*.

On April 2, the aircraft begins the first European wide-body service, flying a charter from London (CTN) to Palma de Mallorca, Spain. Seventeen other destinations in the Mediterranean and in Europe will also be visited on holiday services. The second TriStar, in a two-tone pink livery, is delivered on April 30 and is christened *Halcyon Breeze*; it joins its predecessor in service on May 5.

Meanwhile to prevent the bankruptcy of its largest contractor, Court Line purchases Clarkson's Holidays, Ltd. in April. The cost is £1, plus assumption of the tour operator's substantial debt. In May, Airfare, Ltd., an advance booking charter (ABC) agency is acquired. The energy crisis of October, caused when the OPEC countries triple the price for oil, will lead to a recession in the travel industry and kill off a number of companies. In November, the Lockheeds begin flying inclusive tours from London (LGW/CTN) to the Caribbean. Enplanements reach 2.25 million.

Horizon Holidays, Ltd. is purchased in January **1974**, becoming the sixth tour operator acquired since 1970. Its commitments with others must now be fulfilled by Court Line Aviation, Ltd., including money-back guarantees, refundable deposits, and promises to other airlines, such as **British Caledonian Airways, Ltd. (BCAL)** for the lease of equipment. Unfortunately, the world oil crisis has caused national recession and inflation that deliver only poor bookings, further conspiring to cause Court Line severe financial distress.

In the spring, political discord in Greece, Portugal, and Cyprus cause the closing of certain tour destinations. In June, the British government agrees to take over Court Line's shipping concern for £16 million.

This is not, however, sufficient to save the airline subsidiary, which, with £15 million in debts, is allowed to suddenly go bankrupt on the

evening of August 15. In the largest and most severe British airline collapse ever, and one of the first in a series of charter carrier failures, 1,100 airline employees lose positions, 50,000 vacationers are stranded, and over 150,000 with paid contracts lose their investments. Only a lucky few, aboard the pink L-1011 TriStar *Halcyon Breeze* complete their trip home, arriving at London (CTN) from the Caribbean early on the morning of August 16.

COURTESY AIR SERVICE: United States (1979–1980). Courtesy Air Service is set up by Theodore Zoli at Glens Falls, New York, in the summer of **1979** to provide scheduled passenger and cargo services to intrastate destinations. Employing 1 each Beech 18 and Piper PA-31-350 Navajo Chieftain, daily roundtrips are inaugurated in September linking the company's base with Saranac Lake and New York City (LGA).

Operations continue apace into **1980** and, in February, the company is one of several providing shuttle flights for travelers visiting the Lake Placid Winter Olympic Games. Unable to maintain economic viability, the company goes out of business in August.

COVAL AIR, LTD.: Canada (1979–1994). Coval is established at Campbell River, British Columbia, in **1979** to undertake scheduled floatplane services to over 150 points throughout the province. For most of the next decade, the fleet of 2 Cessna 185s, 2 de Havilland Canada DHC-2 Beavers, and 3 DHC-3 Otters is operated by Managing Director George Fillatrault.

Bob Dick becomes general manager in **1987** and he is succeeded by Dave Jackson in **1989**; Donna Denny is president. The fleet is enlarged in **1991** by the addition of another Beaver and a second C-185. In **1993**, the workforce totals 22 and the fleet now includes 3 Cessna 185s, 3 Beavers, and 3 Otters.

Unable to maintain its economic viability in hard times, the company shuts down in **1994**.

COYOTE AIR, INC.: Box 162, Teslin, Yukon Territories, Y0A 1B0, Canada; Phone (403) 390-2605; Fax (403) 390-2606; Year Founded 1998. Coyote is established at Teslin in **1998** to operate charters to bush locations throughout the Yukon. Pilatus Porter operations begin and continue.

CRANE AIRLINES (PTY.), LTD.: Australia (1991–1993). Rod Crane establishes this privately owned operation at Mascot, New South Wales, in **1991** to offer both scheduled and chartered flights to Sydney, Cowra, Young, and Cootamundra. Revenue flights begin in October with 1 Aero Commander 500, 1 AC-600, and 1 Learjet 35A. Enplanements for the year total 5,700 and 300 pounds of cargo are carried.

Passenger boardings move ahead to 5,900 in **1992** and freight climbs to 350 pounds. However, the company is unable to maintain viability and shuts down in **1993**.

CRESCENT AIR TRANSPORT, LTD.: Pakistan (1952–1954). Crescent Air Transport is formed in early **1952** to provide charter supply flights to Skardu and Gilgit from Karachi with de Havilland DH-89A Dragon Rapides. During the summer, daily service is initiated between Karachi and Sibi via Hyderabad, Nawabshah, Sukkur, and Jacobabad. These operations continue through **1953** and until the company is liquidated in December **1954**. Company assets pass to **Pakistan International Airlines Corporation** when it is registered in March **1955**.

CRESCENT AIRWAYS: 7501 Pembroke Road, N. Perry Apt. W, Hollywood, Florida 33023, United States; Phone (305) 987-1900; Fax (305) 987-1912; <http://www.crescentair.com>; Year Founded 1962. George Nesmith establishes Crescent Airways, Inc. at Hollywood, Florida, in **1962** to serve as a Bell Helicopter service center, while providing charter flights from North Perry Airport to destinations in the Miami region. These operations continue without change for over two accident-free decades.

The company is taken over by Dean Shealy and Larry D. Stevens in **1984** and is restructured to concentrate on several key service areas, including EMS, electronic news gathering, environmental services such as pest control, fire suppression, utility line maintenance, fish-spotting, and aerial taxi work. Additionally, the company continues to serve as a Bell Helicopter broker, buying, refurbishing, and reselling used machines.

The fleet in **1985** includes 16 Bell 206L LongRangers and 206B JetRanger IIIs. In November, the company obtains a Department of the Interior (DOI) contract for water-pollution control work in the state of Washington. Revenues for the year total \$2.1 million.

Operations continue apace in **1986–1988**.

In **1989**, the company employs 10 pilots and 3 mechanics from a Texas base to fly 2 single-engine helicopters in energy industry support operations in the Gulf of Mexico. Two more helicopters are employed on this service, beginning in **1990–1991**.

On January 2, **1992**, the company is merged with Atlanta-based **DME Helicopters, Inc.** with the Crescent name surviving. Financing of the amalgamation is provided by Atlanta's Barnett Bank and U.S. West Financial Services of Kansas City, Missouri.

Jack R. Hereth, DME's owner and president, becomes the new firm's chairman, with Crescent's former CEO, Larry D. Stevens, as vice chairman. Dean H. Shealy, Crescent's former president, is appointed president/COO of the new concern, the administrative headquarters of which are consolidated in Atlanta. The combined fleet now includes 21 Bell 206B JetRangers, 15 Bell 206L LongRangers, 14 Schweizer 300Cs, 1 Bell 212, 1 Sikorsky S-58, and 1 Eurocopter (formerly MBB) BO-105.

Following the devastation caused in south Florida by Hurricane Andrew in late August, nine helicopters are contracted to perform power and pipeline reconnaissance, news gathering, and other activities. In addition to offshore support, power line patrol, electronic news gathering activities, and other services similar to those provided in 1984, the company's aircraft fly UN peacekeeping patrols in Croatia, spray crops in Nicaragua, harvest Christmas trees, and provide air transport support for sea trials of the USN's Aegis guided-missile destroyers. The carrier is the seventh largest U.S. commercial helicopter operator with revenues for the year of \$20 million.

Airline employment in **1993** stands at 139. The company's fleet of 58 helicopters continues to undertake offshore support, external lift, utility patrol, charter service, and ag services, as well as a repair and overhaul business at Hollywood, Florida. A total of \$560,000 is lost on the fiscal year.

On January 11, **1994**, Crescent goes public, taking in more than \$9 million in an initial public offering. A portion of the preferred shares issued to Larry Stevens and President Dean Shealy as part of the 1992 merger are redeemed for \$2.8 million of the proceeds, while another \$2.6 million is committed to the acquisition of upwards of 16 light helicopters.

In February, Chairman Hereth announces the accomplishment of a joint-venture agreement with Mexico City-based **Heliservicios, S.A.** The move allows Crescent to expand its offshore charter work with oil and gas companies in Mexico under the North American Free Trade Agreement. Thomas Ramirez, formerly an **Omniflight** vice president, is appointed company president on March 1, with Ronald LeFleur as executive vice president.

Following the signing of a joint venture document in March with Caracas-based **Petroleum Helicopters, S.A.**, Crescent, in April, supplies 2 Bell 206L LongRangers for use in natural gas and mining operations in Venezuela.

On June 1, Crescent, as the result of a May 6 decision, purchases the Hawaiian tour operations of **Papillon Airways** for \$35 million; the new purchase is operated as a wholly owned subsidiary. It also takes over **Kona Helicopters, Hawaii Pacific Helicopters**, and Air Repair Hawaii, as well as **Papillon Helicopters**. A fatal AS-350B accident is suffered by Papillon in July; the disaster, plus engine problems, causes the new acquisition to ground its 13 aircraft for repair and inspection.

Having suffered two quarters of loss, the company is able to negotiate a standstill on its bank payments and seeks debt restructuring. In

October, Gene Erskine, president/CEO of the Papillon Hawaii operation is named Crescent CEO.

Operations continue into **1995** with a fleet that includes 24 JetRangers, 20 LongRangers, 2 Bell 212s, and 4 Robinson R-22s. Unable to economically integrate the Papillon acquisition, which, in turn, cannot adjust to the FAA's new operating rules in Hawaii, Crescent in early January finds itself in significant financial difficulty. It loses a utility-line patrol contract, realizes lower margins on new Gulf of Mexico contracts, sees its insurance costs jump \$1.52 million, and is unable to cover salary increases.

On January 13, a standstill agreement between the company and its creditors expires and CEO Jack Hereth is unable to find major new investment. Before the company suspends trading, its stock falls to 25 cents per share.

While in a cruise flight 800-ft. above a football field at Miami on January 28, the engine of a Bell 206L LongRanger with 3 passengers fails. The pilot is able to initiate an autorotation and to make a safe, if hard, emergency landing.

Crescent files for bankruptcy on February 4, but continues to operate with a \$4.8-million package provided by First Union National Bank. The new arrangement provides needed working capital and replaces the company's revolving credit. When the company's quarterly report is filed at the end of March, it is revealed that Bell Helicopter Textron and **Papillon Airways** are the company's two largest unsecured creditors. Crescent is now in default on \$19.9 million in loans.

In May, the board of directors decides to liquidate the company's assets rather than attempt to reorganize and emerge from bankruptcy. It will, however, attempt to keep Papillon Hawaii alive. Chairman Hereth resigns and is replaced by CEO Erskine. Operations cease on May 31.

In July, a line of credit is obtained from First Union Bank of Florida. It covers the cost of preparing a plan for the bankruptcy court that will explain how Crescent will liquidate its Part 135 operation, but keep Papillon Hawaii flying. The plan is not completed and Papillon Hawaii is closed down on September 5.

Crescent's 30-plus JetRangers and LongRangers, plus 6 AS-350Bs and 2 JetRangers from PH, are disposed of by the end of September.

After a year's absence, Crescent is reborn at the company's original site in Hollywood, Florida, in January **1997**. Again held by former owners Dean Shealy and Larry Stevens, the company applies to the FAA for a Part 135 license, which is granted at the end of February.

A line of credit is secured and the company is able to regain its status as an FAA repair station. Four Bell 206B JetRangers are acquired and, before the company resumes flying in March, it is able to place \$6.5 million in sales with local corporate customers, electronic news gathering customers, maintenance, and parts buyers.

Low-key operations are continued into the new millennium.

CREST AIRLINES: United States (1967). Crest is established at Atlanta in early **1967** to provide scheduled air taxi flights to Dalton, Calhoun, and Tifton. Daily Aero Commander 500B roundtrips duly commence, but cannot be maintained beyond year's end.

CRETAN AIRLINES, S.A.: Roussou Hourdiou 6, Heraklion, Crete, GR-71201, Greece; Phone 30 (81) 342 742; Fax 30 (81) 432 742; Code C5; Year Founded 1993. Cretan is established at Athens in the spring of **1993** to undertake ad hoc charter flights, primarily from German airports, to destinations in Europe, the Mediterranean, Africa, and the Mideast. Vasilis Plevris is named CEO and 2 Airbus Industrie A320-230s are acquired with which to launch revenue flights in June. Enplanements during the remainder of the start-up year total 50,000.

In **1994**, scheduled services are offered on Greek domestic routes. A pair of Dornier 328-110s, ordered in January, are placed into service during the second quarter and a third A320-231, leased from the Slovenian carrier **Adria Airways**, is acquired in midyear. The aircraft operate island routes as well as international services. Traffic figures are not available.

Operations continue apace during the remainder of the decade with no fleet changes. Destinations visited include Antofagasta, Catama, Chalten, Chillan, Concepcion, Copiapo, Iquique, La Serena, Los Angeles, Ovalle, Puerto Montt, Santiago, Talca, Temuco, Valdiva, Vallenar, and Vina del Mar.

CRILLY AIRWAYS, LTD.: United Kingdom (1935–1936). Crilly Airways, Ltd. is formed by Leo Crilly on March 9, 1935; initial capitalization is £12,000 and the first aircraft is a de Havilland DH 84 Dragon christened *Spirit of Doncaster*. The Dragon inaugurates company operations on March 11, flying Doncaster to London (Croydon). Additional DH-84s are acquired and on April 2, twice-daily Leicester to Bristol and Norwich flights are started. Thrice-daily Nottingham–Leicester and return operations begin on May 18.

During June and July, twice-daily Nottingham and Leicester to Skegness frequencies are provided. Sunday-only flights are offered Norwich–Ramsgate via Ipswich and Southend, beginning on July 7 and run until September 30. Meanwhile on August 1, twice-daily Leicester to Liverpool service begins. The fleet by summer's end comprises 2 Dragons and 3 Monospar ST.25s.

On October 1, daily frequencies are offered from Leicester to Norwich and London (Croydon), to Bristol, and to London (Croydon) direct. During the fall, company officials formulate plans to offer regular service to Lisbon and, later, from there to Gibraltar and West Africa.

When the scheme is brought to the attention of Prime Minister Stanley Baldwin, he prepares a letter of introduction and support to the Portuguese prime minister, which is flown to Lisbon by a Crilly Dragon. On December 13, a contract is signed with the Portuguese government for delivery of mail over a route from London to Lisbon. Orders are now placed with **KLM (Royal Dutch Airlines, N.V.)** for the purchase of 4 of its surplus Fokker F-XIIs.

Flying one of the newly delivered Fokker F-XIIs, pilot G. S. Jones-Evans undertakes a London–Lisbon proving flight on February 1–2, 1936, a night stop being made at Madrid. At the Portuguese capital, the aircraft is christened *Lisboa* (Lisbon) by the granddaughter of the nation's president. With a mail cargo, the *Lisboa* returns to London (Croydon) via Madrid and Bordeaux on February 4. Spanish refusal to grant overflight rights doom start-up of regular services and, consequently, the two delivered Fokkers and the manufacturing positions for the two being built, are sold to the new **British Airways, Ltd. (1)** at month's end. Two months later, the company's foreign routes are also purchased by the first BA.

Domestic services, however, continue and a Bristol to Bournemouth service is launched in July. Unable to survive financially following the start-up failure of the Portuguese venture, the company ceases trading on September 9 and enters receivership.

CRIMEA AIR: Simpheropol Airport, Crimea, 333902, Ukraine; Phone 38 (0652) 28 54 81; Fax 38 (0652) 27 22 88; Code OR; Year Founded 1994. Crimea Air is established at Simpheropol Airport in late 1994 to offer scheduled regional passenger and cargo services. Vladimir Anufriev is named managing director and he begins revenue flights with a fleet that comprises 8 Antonov An-24s and 4 each An-26s and Tupolev Tu-154s.

Enplanements in 1995, the first full year of service, total 232,693. The workforce stands at 2,000 in 1996 and the company's 14 aircraft continue to provide feeder service for **Air Ukraine** out of the Crimea, transporting a total of 222,036 passengers, a 4.8% decline.

During 1997, the employee population is reduced to 500. Customer bookings plunge 27.1% to 161,788.

Business continues to decline during 1998. Passenger boardings plunge 47.5% to 81,000.

They fall again in 1999, dropping all the way down to 65,000.

By the start of 2000, 3 Tu-154s have been withdrawn and 1 Yakovlev Yak-42D added to the largely Antonov-equipped fleet.

CROATIA AIRLINES: Savska 4A, Zagreb, Zagreb County, 10000, Croatia; Phone 385 (1) 616-0066; Fax 385 (1) 530 475; <http://www.ctn.tel.hr/ctn>; Code OU; Year Founded 1989. Organized as **Zagal (Zagreb Airlines)** at Zagreb, Yugoslavia, in 1989, this company is renamed as the flag carrier of the new Republic of Croatia on July 23, 1990. Shareholding is divided between INA (27.1%), Zagreb Airport (14.2%), Croatian Privatization Fund (9.5%), Enikon (8%), Coning (7.3%), and private investors (8%). Offices are also opened in Split, Dubrovnik, Zadar, Pula, and Rijeka, as well as in Amsterdam, Frankfurt, Zurich, London, Paris, Rome, Sarajevo, Skopje, and Vienna.

President Matija Katijik recruits a 100-person workforce and a fleet comprising 2 McDonnell Douglas MD-82s wet-leased from **Adria Airways**. In addition, 2 each Cessna 310s and 402s operate all-cargo services on behalf of **DHL Airlines** and **UPS (United Parcel Service)**.

A total of 29,000 FTKs are flown during the year and revenues total \$950,000. Profits are \$150,000 (operating) and \$30,000 (net).

Passenger services are inaugurated with the MD-82s on May 5, 1991 over a number of domestic and international routes previously operated by **JAT (Jugoslav Airlines)**. Among these are those to Germany and Switzerland, flown as Croatia migrant worker charters. Croatian airspace is closed by United Nations embargo in September. Operations are suspended and the MD-82s are returned to **Adria Airways** to keep them from harm during military action. The operating base at Zagreb is, also, temporarily transferred.

Enplanements total 139,975 and revenues are \$6.7 million. Expenses are significant and a \$2.88-million operating loss is suffered.

When the country's airspace is reopened to commercial activities on April 1, 1992, **JAT (Jugoslav Airlines)** remains under UN sanction. Croatia, which is prepared to resume operations with a new fleet of 3 Boeing 737-230s, leased from **Deutsche Lufthansa, A.G.**, for international flights and 1 Cessna Citation II, 1 Cessna 310R, and 3 Cessna 402Cs for domestic routes, prepares to take over the services of the dormant flag carrier.

Services are resumed on April 5 for nine months and destinations visited from Zagreb include Stuttgart, Pula, Rome, Munich, Paris, London, Moscow, Dusseldorf, Frankfurt, Amsterdam, and Berlin. During its period of operation, blocked space is also provided to **Air France** on company flights from Zagreb to Paris.

Passenger boardings climb 53.6% to 215,000 and a total of 1.2 million FTKs are flown. The profit picture is mixed as the carrier earns a \$683,000 operating profit, but suffers a net \$2.9-million loss.

In 1993, President Katijik oversees a workforce of 422, up 54.6% over the previous year. Two more chartered B-737-230s arrive from Germany and are joined on short-haul and regional routes by a pair of Avions de Transport Regional ATR42-300s.

On May 15, twice-weekly B-737-230 flights begin from Pula and Manchester, England. In July, new service is introduced from Pula to Split and Dubrovnik and from Krk to Zagreb, Split, Dubrovnik, Bratislava, Budapest, and Prague.

Brussels, Copenhagen, Skopje, Stuttgart, and Tirana also join the route network in the fall as the Yugoslav civil war slackens.

Customer bookings skyrocket 98.7% to 473,462 and cargo balloons 103.2% to 2.58 million FTKs. Revenues jump a spectacular 124.5% to 60.2 million and expenses rise 121.2% to \$57.8 million. The resulting operating surplus is \$2.4 million, but, unhappily, the net loss swells to \$3.6 million.

Airline employment is cut by 5.2% in 1994 to 400 and flights begin to Istanbul. The number of European destinations served now totals 32. During the summer, dual-designator service begins with **LOT Polish Airlines, S.A.**, employing a Polish ATR72-200 over a route from Zagreb to Warsaw.

Passenger boardings increase another 39.5% to 660,600 and freight accelerates by 26.1% to 3.24 million FTKs. Revenues skyrocket 43.1% to \$83.48 million and with expenses up only 35.8% to \$73.88 million, there is an operating profit of \$9.59 million. The net loss improves to \$2.13 million.

There is no change in the workforce during **1995**. Enplanements inch up 2.6% to 678,805 while cargo is up an almost equal 2.3% to 2.4 million FTKs. Revenues rise 13.7% to \$95.4 million and costs are such as to allow an operating gain of \$4.65 million. There is, however, a net loss of \$3.4 million.

Airline employment is increased by 13.6% in **1996** to 661. During the summer, flights are begun to Mostar and Sarajevo when their airports are reopened to civil operations. Destinations now visited include Amsterdam, Berlin, Bol, Brussels, Copenhagen, Dublin, Dubrovnik, Dusseldorf, Frankfurt, Istanbul, London, Moscow, Munich, Paris, Prague, Paula, Rome, Skopje, Split, Stockholm, Stuttgart, Tirana, Vienna, Zagreb, Zadar, and Zurich.

Discussions with Boeing are well underway when, in early December, they are broken off. It will be reported in the January 6 issue of *World Airline News* that the U.S. government is to blame. A source at Croatia Travel Agency reports that after the U.S. begins complaining to Croatian President Franjo Tudjman concerning democracy issues, Tudjman retaliates by diverting the airline's CEO Katijik from Boeing to Airbus.

Customer bookings ascend 24.4% to 823,010 but only 2.26 million FTKs are operated, a 3.5% decrease. Still, operating income jumps 19.5% to \$113.96 million and costs are up 11.3% to \$100.96 million. Operating profit quadruples to \$12.96 million and a net \$4.16-million profit is reported, a figure later revised to just \$103,000.

The workforce grows 18% in **1997** to 801. On January 21, orders are placed for 2 Airbus Industrie A319s, with options taken for 3 more. The new planes will be delivered early in 1998. Six new markets are opened, including Madrid and Sarajevo.

A dual-designator service from **Malaysia Airlines, Ltd.** and **Swissair, A.G.** begins on October 30 on thrice-weekly B-777-2H6 IGW stops from Kuala Lumpur to Zagreb via Vienna. In the afternoon of the welcoming ceremony, Malaysia and Croatia Airlines sign a code-sharing agreement for the Zagreb-Vienna sector.

Passenger boardings climb 5.2% to 865,757 (of which 300,000 are foreign tourists), but cargo declines by 10.8% to 2.02 million FTKs. Operating revenues drop 5.3% to \$107.93 million as expenses jump 16% to \$117.19 million. From profitability, the company now suffers losses: \$6.02 million (operating) and \$21.62 million (net).

The first A319-112 is delivered at Hamburg on January 21, **1998** and allows the initiation of scheduled service to Tel Aviv and Moscow. The second A319-112 arrives on June 4 and is pressed into service to take the heat off passenger traffic to the Adriatic coast in the height of the tourist season.

Customer bookings increase by 6.2% to 919,000, but cargo traffic dips 1.9% to 1.98 million FTKs. Revenues inch up 1% to \$110.43 million, while expenses fall 1.1%, but still total \$114.1 million. The operating loss improves to \$3.67 million, while a net loss of \$2.2 million is also suffered.

The fleet in **1999** includes the 2 A319s, 4 B-737-230s, and 3 ATR42-320s. Airline employment is 845, a 6% increase over the previous year.

On March 24, in anticipation of air strikes by NATO countries against Serbian military targets in a campaign for an independent Kosovo, Croatia halts all scheduled service from Zagreb into Belgrade, Rome, and Tel Aviv, and closes its airspace. A spokesman, in making the announcement, indicates that the situation will be evaluated further toward evening; however, that evening, *Operation Allied Force*, the bombing attack on targets in Serbia and Kosovo, begins.

After closing its airspace for two nights and a day, Croatia reopens all except one coastal airport on March 27, enabling resumption of civilian air traffic by its own airline and foreign carriers. Croatia Airlines must, however, change flight times to allow planes to make roundtrips before Split and Dubrovnik airports close at 5 p.m. each day.

Pula Airport is reopened on March 30 and service from Zagreb to Rome and Tel Aviv is resumed on March 31; flights to Belgrade remain suspended for the duration of *Operation Allied Force*.

The NATO Stabilization Force (SFOR) on April 13 reopens the airports at Sarajevo, Mostar, and Banja Luka for daytime flights only.

Croatia Airlines resumes flights to Sarajevo on April 15 and to Mostar four days later.

Operation Allied Force is over on June 11. Days later, a third A319-112 is acquired. On June 18, the company receives its first A320-214, which is christened *Dubrovnik* and is assigned to medium-haul European routes.

On July 1, the carrier signs a code-sharing document with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** that covers flights between Zagreb and Barcelona.

Customer bookings are level for the year at 864,000, while cargo traffic actually declines, dipping 0.9% to 1.75 million FTKs. Losses of \$13.5 million are suffered.

On April 12, **2000**, a **Flightline, Ltd.** British Aerospace BAe 146-200 begins wet-lease flights on behalf of the carrier for the summer season. The charter had been arranged by Airbus Industrie to cover the late delivery of another A320. On July 1, dissatisfaction with the airliner causes it to be returned.

Daily A320-214 roundtrip service is resumed from Zagreb to Brussels on October 29, but is halted between Zagreb and Madrid.

CROMWELL AIR LINES: United States (1929-1931). Cromwell Air Lines is founded at Dallas, Texas, in the fall of **1929** to offer scheduled passenger flights to San Angelo. Employing a single Stinson, the new entrant begins service in November. Operations continue until October **1931**.

CRONUS AIRLINES, S.A.: 517 Vougliamenis Ave. & 1 Agimos Street, Athens, GR-16341, Greece; Phone 30 (1) 995 6400; Fax 30 (1) 995 6405; <http://www.cronus.gr>; Code X5; Year Founded 1994. J. Manftas sets up Cronus at Athens in **1994** to offer international charter services. Revenue flights commence with a single leased Boeing 737-33A in April **1995**.

Operations continue in **1996-1998**. During these years, a workforce of 400 is recruited and bases are also established at Thessaloniki and Heraklion. Hooked up to a reservations system network employed by major airlines, the company also operates 14 booking and ticketing agencies. The fleet is increased by the addition of two more chartered B-737-33As and a B-737-4Y0.

Cronus begins flying from Thessaloniki in November **1996** to Frankfurt, Munich, Dusseldorf, Cologne, and Stuttgart. In July **1997**, London (LHR) joins that list. In April **1998**, service is launched from Athens to Paris (CDG), while in December, daily service is initiated to Heraklion and Rhodes.

A majority stake in the airline is purchased on December 28, **1998**, by Athens-based Attica Enterprises, S.A., a Greek ferryboat operator. Enplanements reach 500,000 and generate revenues of \$53 million.

A leased B-737-453 enters service in **1999** as orders are placed for the delivery of a Next Generation B-737-700 in 2001 and a NG B-737-800 in 2003. In May, service is started to Chania; flights to Rome (FCO) begin on July 1.

New service is initiated from Athens to Kavala and Mitilini in the fall of **2000**. Domestic frequencies are increased to Thessaloniki and Heraklion.

CROSS SOUND COMMUTER: United States (1970-1974). CSC is established at Port Orchard, Washington, in **1970** to fly scheduled Britten-Norman BN-2 Islander passenger and cargo services to Bremerton, Olympia, and Tacoma. A victim of the first large energy crisis, the commuter shuts its doors in **1974**.

CROSSAIR, LTD. (COMPANY FOR REGIONAL EUROPEAN AIR TRANSPORT): Postfach, Basel, CH-4002, Switzerland; Phone 41 (61) 325-2525; Fax 41 (61) 325-3268; Code LX; Year Founded **1978**. Founder Moritz Suter's executive commuter company, **Business Flyers Basel, Ltd.**, is renamed Crossair, Ltd. on November 14, **1978**. Financial backing is obtained from public and private sources, orders are

placed for 8 Swearingen Metro IIs, and plans are made for the start of scheduled operations.

Revenue flights with the first Metro II and 2 Cessna 421s begin on July 2, 1979 over routes from Zurich to Nuremberg and Innsbruck.

Enplanements during the following six months reach 12,739. Profits are earned: \$225,000 (operating) and \$157,000 (net).

Airline employment is increased by 66.7% in 1980 to 40. As 2 additional Metroliners are added to the fleet, service is extended from Bern to Paris and from Geneva and Zurich to Hanover. In October, launch orders are placed for 5, later 10, SAAB-Fairchild SF340s.

By the close of the carrier's first full year, passenger boardings have skyrocketed 283.7% to 48,879. Revenues of \$7 million hold expenses of \$6.1 million in line and allow an increased operating profit of \$921,000. Net gain remains unchanged.

Additional regional stops are flown in 1981. Three more Metroliners are acquired. Destinations now served from Zurich include Luxembourg, Hanover, Nuremberg, Innsbruck, Klagenfurt, and Rotterdam. Also added is a service from Bern to Lugano.

Passenger boardings rise to 78,079 and a net profit of \$42,500 is recorded.

The fleet in 1982 comprises 8 Metro IIIs and 1 Metro II; orders are outstanding for 10 SAAB-Fairchild SF340s and a final Metro III. After protracted negotiations, a five-year agreement is signed with **Swissair, A.G.** on February 12, defining the respective areas of activity for the two airlines. Flights by the 85-employee company begin to destinations in Holland, Belgium, and Luxembourg.

Passenger boardings soar 47.5% to 148,157 and freight traffic climbs to 49,000 pounds. A net profit of \$442,000 is reported on total revenues of \$18.5 million.

Airline employment is 130 in 1983. Basel-Paris and Dusseldorf service is undertaken on behalf of **Swissair, A.G.** and the lone Metro II is replaced by a Metro III.

Passenger bookings skyrocket 43.3% to 212,160.

The first SF340 is delivered in April 1984 and the launch customer places it into Basel-Paris service on June 15. This service replaces several **Swissair, A.G.** frequencies, but under an arrangement with the flag line, retains **Swissair, A.G.** flight numbers. The Metro IIIs are sold, but delays and engine problems slow 340 delivery, allowing only 2 more SAAB machines to be acquired during the year. To fill the gap, 3 Fokker F.27s, 1 Sud SE-210 Caravelle, and 2 DC-9-81s are leased.

Passenger boardings swell 35.1% to 286,681. Revenues decline 62% to \$24.15 million and the net profit is off 32% to \$895,233.

The payroll grows by 40% in 1985 to 280, even as SF340 delivery and technical problems persist. By year's end, 8 aircraft are in service and the carrier begins selling off its Metro fleet. Meanwhile, new Basel and Nizza markets are opened. In November, the carrier sells 2 Metro IIIs to the new Spanish regionals **Air Valencia, S.A.** and **Air Catalonia, S.A.**

Passenger traffic rises 29.2% to 370,514 and freight skyrockets 83.1% to 216,000 FTKs. Revenues grow 30.6% to \$49.2 million and expenses are up 26.9% to \$39.3 million; profits are \$9.83 million (operating) and \$1.86 million (net).

Airline employment climbs again in 1986, up 1.3% to 350. The last 2 SF340s of the original order are delivered in March and the fleet now comprises all 10 SF340s plus 6 Metro IIIs. In May, the carrier flies its first service with an all-female crew. The **Swissair, A.G.** replacement agreement first initialed in 1983 is renewed on September 16. Destinations visited include Basel, Mulhouse, Geneva, Lugano, Agno, Luxembourg, and Zurich.

Customer bookings rise 2.2% to 472,158 and cargo increases an incredible 201.3% to 1.9 million FTKs.

The payroll is increased still further in 1987 by 28.6% to 450, and another Metro III is added. Passenger boardings jump 24.6% to 588,328.

The employee population grows by 21.3% in 1988 to 546 and all but 2 Metro IIIs are removed as 3 more SF340s join the fleet. Orders are placed for 19 340Bs plus 110 options.

On June 13, the shareholders' assembly votes to allow **Swissair, A.G.** to acquire a 38.4% equity stake and 41% of the regional's voting rights. In return, the national airline invests SFr 111 million. A new cooperative agreement is signed specifying closer collaboration in a number of fields.

Passenger boardings accelerate 29.3% to 760,744. In addition, 345,000 FTKs are transported.

Airline employment climbs 10.4% in 1989 to 603 as all of the Metros are replaced. The all-SAAB fleet now includes 19 340As and 5 340Bs. New routes are initiated from Lugano to Rome and from Bern to Brussels and Dusseldorf. In March, the company begins to offer five-times-per-week replacement service to Lyons and Ljubljana on behalf of **Swissair, A.G.**

Customer bookings ascend 19.4% to 909,023.

In January 1990, the company receives the "Regional Airline of the Year" award from *Air Transport World* magazine.

The fleet is now significantly increased. In addition to the acquisition of 3 more SAAB 340Bs, 1 Fokker 50 and the first of 3 British Aerospace BAe 146-200s, dubbed "Jumbolinos" and acquired from **USAir**, are placed into service. Four SAAB 340As are withdrawn and leased to the New Zealand carrier **Air Nelson, Ltd.** A SAAB 340A is lost in a ground accident at Zurich on February 21.

Flights begin to the Channel Islands and Barcelona in April; a total of 37 destinations are currently served in 10 nations. A financial state is taken in the Scottish regional **Business Air, Ltd.** and, in July, Crossair joins with **Slovair** to establish **Tatra Air, A.G.** at Bratislava.

Passenger boardings leap skyward by 18.4% to pass the million-mark for the first time at 1,076,591. On the downside, a \$4.53-million net loss is suffered.

Two more SAAB 340As are withdrawn in 1991 to be succeeded by 7 340Bs and 14 Fokker 50s; 2 more ex-**USAir** BAe 146-200s also arrive. On March 13, **Swissair, A.G.** increases its equity stake to 48.5% and acquires a majority 59.9% of voting rights. Replacement flights for its new parent are undertaken to Bordeaux beginning on March 31. Also in March, weekly 340B flights begin from Zurich to Bristol, England, and London (STN).

In August, five-times-per-week BAe 146-200 flights are started from Basel to London (LHR). Also during the summer, a SAAB 340A is repainted to commemorate the 700th anniversary of the Swiss Federation; the color scheme by 10-year-old Giacomo Fiscalini has won top place in a design competition.

On October 27, President Moritz Suter's company begins flying to Hanover and Nuremberg, again as replacement for **Swissair, A.G.** In November, the Swiss flag carrier transfers the route to Crossair completely. The same month, a BAe 146-300 "Jumboliner" is placed into service on the thrice-daily Basel-Paris route.

Customer bookings ascend 12% to 1,148,671 and 39.31 million FTKs are operated. The net loss grows to \$7.48 million.

The workforce is increased by 6.8% in 1992 to 1,087 and the fleet now includes 3 BAe 146-200s, 1 BAe 146-300, 5 Fokker 50s, 15 SAAB 340As, and 15 SAAB 340Bs. Orders are outstanding for 4 BAe 146-200s and 4 BAe (AVRO) RJ85 Regional Jets. With an order for 20, the airline becomes launch customer for the SAAB 2000 Concordino; the carrier also becomes the first to operate a BAe 146 into London (LCY), beginning twice-daily flights from Zurich on March 30. Also during the first quarter, a BAe 146-200 is leased to **Business Air, Ltd.**

In April, Crossair sells its 40% shareholding in the German regional **Delta Air Regionalflugverkehr, GmbH.** to **British Airways, Ltd.** (2) as the major seeks to maintain its entry in the German domestic market following termination of its 1945 Allied-grant rights. Having lost well over a million SFr and faced with nonpayment of the aircraft lease, the carrier now withdraws as one-third shareholder in **Tatra Air, A.G.** The SAAB 340A is reclaimed, repainted, and reenters Crossair service.

On May 4, SAAB 340A/B services are initiated from Zurich to Sion. Other new routes started during the year include Lugano to Munich and Basel to Vienna to London (LHR), Leipzig, and Dresden.

Passenger boardings jump 16% for the year to 1,335,484 and freight rises 23% to 48.17 million FTKs. Revenues are \$214.17 million and expenses are only \$189.02 million. As a result, operating profit, assisted by the Delta sale, surges to \$25.14 million. The net gain of \$745,800 is a significant turnaround.

In 1993, Chairman A. J. Wiederkehr and President/CEO Suter oversee a workforce of 1,175, up 8.1% over the previous year. The largest Swiss regional is now the largest of its size in Europe. Three SAAB 340As are leased to **Business Air, Ltd.**, one to **Deutsche BA Luftfahrtgesellschaft, GmbH.**, and 4, out on lease to **Air Nelson, Ltd.**, are sold to that airline for SFr 7.16 million. The first of 4 Avro RJ85 Regional Jets, the new name for the BAe 146 program transferred to the BAe-Taiwan Aerospace joint venture program, is delivered in April, giving the carrier cause to adopt a new corporate image, logo, and livery. New crew uniforms are also unveiled, along with an improved catering service.

Delivery of the world's first production model SAAB 2000 Concordino, also a cause of celebration for its launch customer, must be delayed past the planned September 3 arrival. The manufacturer provides a free BAe 146-300 to provide capacity until its delayed product can be acquired.

During the 12 months, scheduled departures total 76,400 while, at year's end, **Swissair, A.G.** participation is increased from 49.4% to 56.1% of share capital and from 52.6% to 59.8% of voting rights. Customer bookings swell 8.1% to 970,500 while cargo swells 19% to 57.17 million FTKs. Revenues advance 16% to \$261.3 million while costs rise only 10.9% to \$406.35 million. Consequently, the operating surplus is \$28.84 million while the net profit skyrockets to \$19.8 million.

Airline employment increases to 1,420 in 1994. On March 27, the company inaugurates a number of new routes. These include Zurich to Dublin, Birmingham, Ljubljana, and Hanover; Genf to Amsterdam, Berlin (Tempelhof Airport), Bilbao, Vienna, Barcelona, Genoa, Jersey, and Lorient; Lugano to Olbia; and Basel to Dresden, Leipzig, Vienna, Birmingham, and Nice. New **Swissair** replacement routes are Geneva to Berlin (Tempelhof Airport), Bilbao, Bordeaux, and Prague, and Zurich to Klagenfurt, Luxembourg, Ljubljana, Marseilles, and Strasbourg.

The highlight of the year is the August introduction into service of the first of 5 of the world's first operational SAAB 2000s; it is christened *Concordino* (giving its name to the type in Crossair service) and begins flying from Basel to Paris (CDG). Two more of the advanced turboprops arrive in September and 2 in October. These replace SAABs on twice-weekly routes from Basel to Barcelona, Copenhagen, Madrid, and Rome, from Lugano to Paris, and from Bern to London's City Airport. During the 12 months, scheduled departures increase to 83,300.

Late in the year, plans are made by **Swissair, A.G.** to turn over all of its less-than-100 seat operations to this subsidiary, as well as the aircraft and services formerly flown by **Balair-CTA, S.A.**

Passenger boardings accelerate another 13% to 1,864,093 while revenues increase 3.7% to \$322.3 million. Net gain drops to \$13.2 million.

During the last week of March 1995, **Swissair, A.G.** orders 12 Avro RJ100 Jumbolinos to be operated by Crossair on the less-than-100 seat services. Having entered into a block-seat code-sharing agreement with **LOT Polish Airlines, S.A.**, **Swissair, A.G.** now turns to **Crossair** to implement it by flying a SAAB 2000 over a route from Zurich to Krakow.

Five more SAAB 2000 Concordinos are also requested. An RJ85 is reequipped with telephones in a year-long experiment for passengers; the plane is returned to service on June 1 on routes from Geneva to London (City Airport), Birmingham, and Dublin. When the main runway at Stuttgart Airport is down for repairs between July 31 and October 1, Crossair leases an RJ85 to **Swissair, A.G.**, which will employ it to maintain services to the cross-runway of the German airport. It will also lease a BAe 146-200 to **Deutsche BA Luftfahrtgesellschaft, GmbH.** for the same purpose.

The small- and medium-haul routes and aircraft are taken over in September and operated from hubs at Geneva and Zurich with 10 trans-

ferred **Swissair, A.G.** Fokker 100s. They will gradually be withdrawn in trade to Avro as the RJ100 Jumbolinos begin to arrive at the end of the month. To celebrate the opening of the famed musical at Basel in October, the company's 10th SAAB 2000 Concordino is now delivered in a special *Phantom of the Opera* livery.

During November, a cost cutting plan, WIN, prepared by McKinsey Consulting, is sent to arbitration by **Swissair, A.G.** and its pilots' union Aeropers. If implemented, the concept will see an unspecified number of **Swissair** pilots transferred to Crossair, Ltd. In addition, 1,600 **Balair/CTA** positions would be cut over the next several years and 300 ground workers will be laid off. Although executives from **Swissair** and Crossair, Ltd. all refuse to consider a group agreement covering cockpit crews from both companies, the mediator promises a solution by April.

Repainted in Crossair livery, 8 former **Balair/CTA** McDonnell-Douglas MD-82/83s arrive in late November and early December.

The new services allow Crossair to make significant traffic and financial gains. Customer bookings again jump 13%, rising to 2,109,542, while freight swells 28% to 81.58 million FTKs. Operating revenues climb 18% to \$386 million and a net profit of \$14.5 million, later adjusted downward to \$12.57 million, is posted.

Airline employment stands at 6,586 in 1996 and the fleet grows to include 8 MD-82/83s, 11 RJ100 Jumbolinos, 4 RJ85s, 23 SAAB 2000 Concordinos, and 15 SAAB 340As. Two more SAAB 340As are chartered to **Business Air, Ltd.** and 1 MD-82 is leased to the Argentine charter operator **Dinar Lineas Aereas, S.A.**

During the first quarter, the carrier joins with the Swiss travel agency Hotelplan and McDonald's Restaurants to begin operating charter flights. "McPlane," an MD-83, is unveiled at the airline's Zurich headquarters on March 27 in a gala celebration. Bright red, with the restaurant's name painted in large letters along the fuselage at the window level and its logo on the tail, the plane will be employed to operate non-scheduled frequencies. Three days later, it begins flying from Zurich and Geneva to Mediterranean holiday destinations.

To better handle its rapid expansion, the company restructures its operations on April 1. Geneva and Western Europe are added as departments of the commercial and finance division and a whole new product management division is created, with three new departments—cargo/cabin crew, network management, and ground operations.

The company completes its takeover of the medium-haul charter flights of **Balair-CTA, S.A.** and the 100-seat scheduled operations of **Swissair, A.G.**

During the third week of May, a company SAAB 2000 Concordino begins three months testing of a head-up display provided by Flight Dynamics; the carrier is first to order a HUD for regional services.

The "McPlane" visits London (CTN) and Manchester in June in connection with the Euro '96 Football Championships. Meanwhile, 12 new destinations have been added during the first half, including a six-days-per-week RJ85 nonstop roundtrip service between Zurich and Edinburgh.

The final RJ100 Jumbolino is delivered in September. With the start of the winter schedule at the end of October, the carrier introduces two-class cabin in-flight service aboard its jetliners. Turboprop operations remain single-class.

The changeover brings significant growth in traffic and rewards. Enplanements increase 53% to 3,228,591 and operating income surges 59% to \$518.6 million. Net profit grows by \$4 million to \$16.6 million, a 32% increase.

The workforce is increased a slight 0.9% in 1997 to 2,301. At the end of January, Crossair joins with a group of French investors in taking the first steps toward the establishment of a French regional airline to be hubbed at the new Basel-Mulhouse EuroAirport. Actually located in France, the airport goes by the IATA MLH (Mulhouse) identifier for flights from its French side and BSL (Basel) for services from the Swiss side. Crossair takes a 35% holding in the FFr 260-million (\$45-million) minimum share capital in the start-up and establishes a headquarters presence at the new airport.

If the tentatively named Europe Continental Airways, S.A. moves ahead, it will allow sufficient European Union links as to alleviate the carrier's new Italian problem.

Deregulation for EU members begins on April 1 and Crossair's need for free access to Italian skies becomes increasingly apparent. Because of resistance from the Italian authorities, the non-EU-member airline is required to withdraw its Lugano-Rome and its Lugano-Bologna services, and reduce frequencies between Lugano and Venice, Florence, and Naples. The airline also faces battles with the Portuguese and Greek authorities.

In May, the carrier takes over the turboprop routes from Zurich and Geneva to Stuttgart which **Regional Airlines, S.A.** had purchased from **Deutsche BA Luftfahrtgesellschaft, GmbH.** the previous year, but has elected not to fly itself.

The European Joint Aviation Authorities certifies Flight Dynamics Head-Up Guidance System for use aboard company SAAB 2000 Concordinos. The first unit is installed on August 5 and half of the SAAB 2000 fleet will be so equipped by year's end.

In December, the company announces a significant expansion of its fleet, with orders, valued at SFr 262 million (US\$179 million) placed for 4 Avro RJ100 Jumbolinos, 6 SAAB 2000 Concordinos, and 2 used MD-83s. The latter will be employed on scheduled services, as well as on-demand charters.

Passenger boardings accelerate 19% to 3,848,724, while freight surges 27% to 206.31 million FTKs. Net profits of SFr43.2 million (\$29.4 million) are posted on revenues of SFr 883 million and are almost double those earned a year earlier.

Philippe Bruggisser is now chairman, with CEO Suter remaining in office. Their fleet at the beginning of 1998 includes 4 Avro RJ85s 12 RJ100s, 11 MD-80s, 16 SAAB 340s, and 28 SAAB 2000s.

Plans are announced in January for the construction of a new office building near its temporary headquarters at the Basel-Mulhouse Euro-Airport. Crossair also announces plans to invest FFr 100 million in the expansion of EuroAirport and, in return, receives 9 proximity gates in the present terminal.

Europe Continental Airways, S.A. is now projected to begin service in April as **Crossair Europe, S.A.**; flights will be provided to Venice, Milan, and Marseilles.

Employing a pair of SAAB 340Bs leased from Crossair, **Crossair Europe, S.A.** launches thrice-daily roundtrip flights from the French side of EuroAirport on March 29 to Milan. Operating as a European Union company, the new entrant does not have the bilateral barriers and high landing fees to contend with as does Crossair. Commercial and technical coordination is maintained with the Swiss airline.

Plans are made to provide Director General Philip Perrin de Nelle's company with a chartered MD-83 during the fall and to initiate frequencies to Rome (Ciampino Airport).

Employing the MD-83, wet-leased to **Swissair, A.G.**, Crossair, on May 1, launches flights from Zurich on behalf of its parent to five East European destinations, including Baku, Samara, Yerevan, and Tbilisi. The return services are undertaken two to three times each week.

Joint operations simultaneously commence with **PGA Portugal Airlines, S.A.** over a route from EuroAirport to Lisbon.

Wet-leased Crossair MD-80s undertake Swissair replacement service on May 1 from Zurich to both Nice and to Berlin (Tegel Airport).

Beginning on May 2, **Delta Air Lines** places its code on the daily roundtrip Avroliner service which Crossair operates between Zurich and Riga, Latvia.

During the month, the company joins with **Lufthansa CityLine, A.G.** to launch the Fairchild Dornier 728JET, with deliveries set for 2001.

In late September, **Swissair, A.G.** upsets the Crossair expansion plans by purchasing a 44% equity stake in the French regional **Air Littoral, S.A.** Crossair had hoped to move into France and southern Europe via its **Crossair Europe, S.A.** affiliate.

During the month and on October 28, a number of new services are launched. Employing an Avro RJ85, daily roundtrips commence from

Basel to Stockholm and from Zurich to Goteborg. In addition, a midday service is added between Basel and Valencia and the Zurich to London (LCY) route is operated four-times-a-day.

The twice-weekly MD-83 return service from Zurich to Samara, Russia, ends on October 25 and the aircraft is transferred to a service from Zurich to Larnaca, Cyprus.

A long-haul MD-82/83 charter program is introduced, also on October 28. The most successful enterprise is a weekly roundtrip from Zurich to Goa, India, with a technical refueling stop at Tehran. Flights from Zurich to Pristina, Kosovo, will prove short-lived due to the political situation in the Yugoslav province.

In an effort to draw attention to Switzerland's bid for the 2006 Winter Olympics, a SAAB 2000 is introduced into service in November wearing a special winter sports livery, comprised of little red silhouettes of sportsmen (skiers, ice skaters, hockey players, etc.) dotting its white fuselage. "Valais," the name of the French-speaking canton where the games would be held, appears in white under a white mountain logo on the red tail.

Swissair strategic alliance partner **Delta Air Lines** begins to code-share on December 1 on Crossair's daily SAAB 2000 service from Zurich to Krakow, Poland.

Enplanements for the 12 months advance by 14.5% to 5,397,248. Revenues advance to SFr 1.01 billion (\$674.61 million) and net gain surges 47% to SFr 63.5 million (\$42.24 million).

Crossair receives its 14th Avro RJ100 from British Aerospace on January 4, 1999, wearing the new EuroCross livery of a blue and red ball incorporating the European Union logo on one side of its fuselage. The aircraft is assigned to **Crossair Europe, S.A.** and enters service two days later, replacing a SAAB 2000 on the route from Basel to Stockholm.

An early morning RJ100 roundtrip is inaugurated on February 22 from London (LCY) to Zurich; there are now five daily return services over this route. At this time, Crossair becomes a member of the **Swissair, A.G.**-led "QualiFlyer" alliance.

The winter charter service between Zurich and Pristina, Kosovo, ends just as NATO begins its aerial bombing campaign against Yugoslavia on March 24.

As is the case with other airlines across Europe, the summer schedule begins on March 28. Seasonal MD-83 nonstop roundtrips are now offered every day from Zurich to Thessaloniki, Greece. Simultaneously, MD-83s replace RJ100s on flights from Basel to London (LHR), while the RJ100s offer a new weekly roundtrip from Zurich to Birmingham. Nonstop MD-83 roundtrip service is also inaugurated from Zurich to both Dublin and Goteborg, five times a week.

At the beginning of April, daily scheduled flights are resumed between Zurich and Klagenfurt, Austria.

Plans are now announced by SAirGroup for the creation of a large European Leisure Group, which will include not only **LTU International Airways, GmbH.**, but the **Swissair, A.G.** subsidiary **Balair/CTA**; **Sabena Belgian World Airlines, S.A.**'s subsidiary **Sobelair, S.A.**; Crossair, Ltd.; **Air Europe, S.p.A.**, and **Volare, S.p.A.** The new arrangement, under the direction of project leader Stefan Helsing, is designed to be part of an integrated network built around the already-existing "Atlantic Excellence" and "QualiFlyer" alliances.

During the summer, an MD-83 is wet-leased to **Flugfelag Islands (2)/Icelandair, H.F.**, which employs the aircraft on a weekly seasonal service from Reykjavik to Zurich.

When **British Airways, Ltd. (2)** gives up its London (LHR) to Basel service in late October, Crossair, in partnership with the British major, takes it over with MD-83s. Flights from Zurich to Pristina, suspended during the Kosovo crisis, resume on October 31.

Also during October, an MD-83, operated on behalf of Dusseldorf-based Consul Weltreisen, offers a luxury tour to Xian in China via Muscat, Hong Kong, Siem Reap, Langkawi, Chiang Mdi, and Shanghai.

Nine company aircraft are damaged by wind-driven equipment and cargo containers when fierce winter winds with gusts of more than

100 mph. hit the airports at Zurich, Stuttgart, and Copenhagen during Christmas week.

Although customer bookings climb 11.1% to 5,997,000 this year, many in the company believe that European ATC delays and higher fuel costs have hurt market share, to say nothing of revenues. Operating income moves ahead by 14.8% to \$728,977,000, but expenses are up 18.2% to \$682,816,000. The previous year's operating profit falls to \$46,161,000 while net gain drops to \$33,070,000.

Having just turned around at Zurich after a January 20, 2000, flight from Guernsey, Flight 498, a SAAB 340B with three crew (including a captain temporarily seconded to the carrier from **Moldavian Airlines**) and seven passengers, departs for Dresden. Following some confusion over direction, the turboprop increases speed and then enters into a high-speed spiral descent, crashing into an open field near Nassenwil. There are no survivors.

Now in its 21st year of scheduled service, on February 26 Europe's largest regional takes delivery of the first of 7 Embraer ERJ-145s—all in the company's new twenty-fifth anniversary livery. Upon its arrival at Basel on March 4, the Express Jet is greeted in ceremonies as the premier unit of the massive fleet replacement program that will see all of the current SAAB and AVRO RJs withdrawn by 2006. The same day, the MD-83 previously painted in the red McDonald's color scheme is returned to service, also wearing the company's new livery.

With the beginning of the summer schedule on March 26, **Swissair, A.G.**, in a move to cut costs and increase services, transfers the bulk of its Geneva-based services to Crossair. The smaller carrier's McDonnell Douglas now visit Athens, Madrid, Rome, and Lisbon. At the same time, Basel is dropped as a stop on the Zurich to Dresden and Prague route, while twice-daily return flights from Geneva to Toulouse and Marseilles are now operated as a code-share aboard **Air Engiadina, Ltd.** Dornier 328-110s. Plans to start new service from Basel to Helsinki are postponed for a year, along with increased frequencies from Basel to Madrid and Cologne.

On the same day, the company's new ERJ-145s enter revenue service on routes from Basel to Manchester, Madrid, Birmingham, Copenhagen, Oslo, Hamburg, and Valencia. Employing one of the Swiss carrier's MD-80s, **Aer Lingus Irish Airlines, Ltd.** also begins to code-share on daily Crossair return flights between Zurich and Dublin.

Swiss voters, on May 21, approve a referendum that permits implementation of a bilateral treaty establishing closer ties between the historically neutral country and the European Union. As a result, the airlines of SAirGroup, including Crossair, will, in three steps, gain the same rights as carriers from EU nations.

As Crossair continues to eliminate its SAAB 340A fleet, lease arrangements are completed by June with **Carpatair**, the regional subsidiary of **Moldavian Airlines**, for a pair of the Swedish-built turboprops.

In mid-August, the carrier reports that, for the first time since 1992, it has experienced a financial downturn in the first half-year. The \$3.5-million loss is blamed on high fuel costs and an unfavorable exchange rate with the U.S. dollar.

Reacting to these negative figures, company officials, at the carrier's annual meeting, inform shareholders that the company's route network will be adjusted and fares will be increased to offset rising fuel costs. This attempt to increase earnings by CHF 50 million may also lead to layoffs.

At Kos on October 26, **Olympic Airways, S.A.** baggage handler Manolis Lambros, who has entered the cargo hold of a company MD-83 to stow a caged dog, is accidentally locked in by coworkers. The young man survives the following 15-min. flight to Rhodes, where he is discovered in shock and shivering, but otherwise unhurt.

With the beginning of the winter schedule on October 29, frequencies are reduced from Basel to Alicante, Malaga, Munich, and Venice, as well as between Lugano and Rome and suspended altogether between Basle and Nuremberg.

CROSSAIR EUROPE, S.A.: Batiment du Catering, EuroAirport, Basel Mulhouse Freiburg, Saint-Louis, F-68300, France; Phone 33

(3) 89 90 40 95; Fax 33 (3) 89 90 40 89; Code QE; Year Founded 1997. At the end of January 1997, **Crossair, Ltd.** joins with a group of French investors in taking the first steps toward the establishment of a French regional airline to be hubbed at the new EuroAirport at Basel-Mulhouse. Actually located in France, the airport goes by the IATA MLH (Mulhouse) identifier for flights from its French side and BSL (Basel) for services from the Swiss side.

Crossair takes a 35% holding in the FFr 260 million (\$45 million) minimum share capital in the French-registered start-up and establishes a headquarters presence at the new airport. If the tentatively named Europe Continental Airways, S.A. moves ahead, it will allow sufficient European Union links as to alleviate the Swiss carrier's new Italian problem.

On March 29, 1998, employing a pair of SAAB 340Bs leased from **Crossair, Ltd.**, Crossair Europe, S.A., which has integrated Europe Continental Airways, S.A., launches thrice-daily roundtrip flights from the French side of EuroAirport to Milan. Operating as a European Union company, the new entrant does not have the bilateral barriers and high landing fees to contend with as does **Crossair, Ltd.** Commercial and technical coordination is maintained with the Swiss airline.

Plans are made to provide Director General Philip Perrin de Nelle's company with a chartered MD-83 and to initiate frequencies to Rome (Ciampino Airport).

Twice-daily frequencies to Venice, and daily roundtrips to Marseilles are added on May 1 from EuroAirport.

The expansion plans of **Crossair, Ltd.** into France and southern Europe are dealt something of a blow in late September when **Swissair, A.G.** purchases the French regional **Air Littoral, S.A.**

During September and October, a daily roundtrip service is inaugurated from EuroAirport to Karlsruhe and Baden-Baden in Germany. Flights from EuroAirport to Freiburg are simultaneously increased to thrice daily.

Crossair, Ltd. receives its 14th Avro RJ100 from British Aerospace on January 4, 1999 wearing the new EuroCross livery of a blue and red ball incorporating the European Union logo on one side of its fuselage. The aircraft is assigned to Crossair Europe, S.A. and enters service two days later replacing a SAAB 2000 on the route from Basel to Stockholm.

CROW EXECUTIVE AIR: Toledo Metcalf Airport, 28331 Lemoyne Road, Milbury, Ohio 43447, United States; Phone (419) 838-6921; Fax (419) 838-6911; Code CCG; Year Founded 1947. Crow is set up at Toledo Metcalf Airport in northwest Ohio in 1947 to provide worldwide and North American executive and small group passenger charters, freight, and air ambulance services. Smallplane flights to Detroit and Cleveland commence and continue for the next 40 years.

Under the direction of Vice President Emilio Costilla, the company in 1998 maintains a major fleet at Metcalf Field. From here, Crow operates 2 Learjet 24Bs and 1 each Learjet 35A, Cessna 208B Caravan I, Swearingen Metro II, Piper PA-31-350 Navajo Chieftain, and PA-23 Aztec F.

In July, Crow acquires Flight Operations, an FBO and charter concern based at Cleveland's Burke Lakefront Airport. That company had flown 1 each Learjet 24D, Learjet-25B, and Learjet-35A from the downtown Cleveland airport and these services are continued.

CROWN AIR: United States (1981-1989). Crown Air is established at San Juan, Puerto Rico, on May 28, 1981 as the purchased, reformed, re-named, and upgraded version of **Dorado Wings**, previously the island's oldest air carrier. Equipped with a fleet of 3 British Aerospace BAe Jetstream 31s, 9 Britten-Norman BN-2 Islanders, and 1 Piper PA-31-310 Navajo, the company operates 54 scheduled daily flights to Tortola, Virgin Gorda, St. Thomas, Palmas del Mar, Dorado Beach, Cerramar Beach, and Mayaguez, while also connecting St. Thomas to the British Virgin Islands.

In 1982-1983, President Michael T. Fenn's carrier removes its Jetstreams and substitutes 5 de Havilland Canada DHC-6 Twin Otters, 1 Fairchild-Swearingen Metro II, and another Islander. New destinations

served include Aguadilla, Palmas del Mar, Humacao, San Juan, St. Martin, Anguilla, and St. Kitts.

Enplanements during the latter year total 102,358.

Customer bookings skyrocket 71% in **1984** to 175,000. When **Pri-nair (Puerto Rico International Airlines)** and **Vieques Air Link** cease operations in mid-**1985**, the assets of the former are purchased by Crown Air, making it the largest commuter airline in Puerto Rico. Passenger flights to the Virgin Islands are increased by 70% in June and, on July 1, 10 U.S. Postal Service mail routes are obtained, worth a total of \$700,000–\$800,000.

Passenger boardings for the year rise 3% to 180,000.

Operations continue apace in **1986–1988**; however, as **Executive Air Charter** and **Eastern Metro Express** mount competition, the carrier's services and finances decline. Unable to continue, **Crown Air** stops flying in March **1989** and files for Chapter VII liquidation.

CROWN AIRLINES: United States (1978–1979). Bill Davis forms Crown Airlines at Texico, New Mexico, in **1978** to provide Essential Air Service (EAS) flights over those routes abandoned by **Texas International Airlines** in the wake of deregulation. Employing Piper PA-31-310 Navajos, Davis undertakes to operate routes linking Albuquerque with Lubbock via Clovis, Carlsbad, Hobbs, and Roswell. Unable to turn a profit, Crown goes out of business in **1979**.

CROWN AIRWAYS: United States (1969–1993). This wholly owned subsidiary of Brockway, Inc. is set up at Clearfield–Jefferson City Airport in Falls Creek, Pennsylvania, in early **1969** to provide "Allegheny Commuter" service. Daily roundtrip revenue flights on a Pittsburgh–DuBois route begins on March 17 and a subsidized Essential Air Services (EAS) daily frequency is initiated to Franklin and Oil City in December.

Operations continue apace during the remainder of the decade and into the **1970s** while the fleet is upgraded from Cessna lightplanes to a pair of de Havilland Canada DHC-6-100 Twin Otters. Company headquarters are transferred to Harrisburg in **1972**.

By **1975** enplanements are 38,627. Passenger boardings jump 21% in **1976** to 48,895 while a total of 801,213 pounds of freight are hauled. Enplanements in **1977** total 57,587. Passenger boardings advance 9.5% in **1978** to 63,631, but freight is down, by 4.3%, to 787,000 FTKs. Services are maintained without change in **1979**.

The first Shorts 330 is delivered in the spring of **1980**. On April 1, President John Aikman's carrier begins replacement operations between Youngstown, Ohio, and Pittsburgh for **United Air Lines**. On October 28, a fourth station is added when Crown replaces **USAir** on the Parkersburg, West Virginia–Pittsburgh run. This expanded system allows the small regional to post an outstanding traffic increase as 137,068 passengers are flown.

In **1981**, the fleet comprises 2 Shorts 330s and 2 DHC-6-200 Twin Otters. Enplanements total 192,212, a 40.2% boost; however, cargo traffic declines by 12.8% to 444,000 pounds.

The workforce is increased 6% in **1982** to 88. As is the case with many small airlines during the economic slump, Crown suffers a decline in passenger boardings—off 13.6% to 165,975—and in freight. This trend is halted in **1983** as passenger traffic rises a slight 2.3% to 169,825. Cargo traffic still continues to fall, dropping 8.5% to 269,000 pounds.

The year **1984** is an outstanding one for the Pennsylvania-based company as it moves into the ranks of what the CAB classifies as "large regionals" and the fleet is increased to a total of 3 Shorts 330s and 3 de Havilland DHC-6-200 Twin Otters.

Following the demise of **Wright Airlines** service, Crown adds Clarksburg, West Virginia, to its "Allegheny Commuter" network on June 1. In the fall, Parkersburg, West Virginia, and Youngstown, Ohio, join the route network. Enplanements increase 24.7% to a record 211,813; however, freight continues to plunge, dropping by 19.1% to 217,000 pounds.

The 155-employee company begins service to Morgantown, West Virginia, on January 3, **1985**. Two more Twin Otters, Dash-300s, join

the fleet during the year as flights also begin to Latrobe, Pennsylvania. Passenger boardings ascend 26.6% to 268,161, but cargo is down again, by 17% to 180,000 pounds.

The workforce is reduced by 9.7% in **1986** to 140, but, otherwise, the Allegheny partner enjoys a good passenger year. Customer bookings rise 7.5% to 288,343, but cargo declines 25.2% to 135,000 pounds.

Sister airline of the "Piedmont Connection" carrier **Brockway Air** enjoys a healthy **1987** as passenger boardings jump 9.2% to 314,905.

Toledo, Ohio-based Owens-Illinois purchases the carrier's Brockway parent in early **1988**; still, Vice president/General Manager Al J. Beiga's maintains services apace, with the airline offering an average of 94 daily, weekday departures.

When Owens-Illinois sells its **Brockway Airlines** division to **Metro Airlines** in the spring of **1989**, it specifically retains Crown Airways. With **Piedmont Airlines** absorbed into **USAir** by August, the Falls Creek, Pennsylvania-based small regional renegotiates its code-sharing contract with the major and obtains a 10-year extension to serve as part of the "Allegheny Commuter" network, now renamed "USAir Express." The 174-employee's 4 Twin Otters and 3 Shorts 330s fly a total of 313,553 passengers, a 6.4% decline.

Early in **1990**, 2 Shorts 360s join the fleet and, in March, the carrier is sold to Al Beiga and Philip Burnaman. Passenger boardings rebound and grow by 7.5% to 337,177. The fleet in **1991** includes 2 Beech 1900s, 2 Shorts 360s, 4 Shorts 330s, and 2 Twin Otters. Destinations visited include Clarksburg, Cumberland, Franklin, Oil City, Latrobe, Morgantown, Parkersburg, Washington, D.C., Wilmington, and Youngstown. Passenger boardings ascend 3.7% to 349,614.

A third Beech 1900 joins the fleet in **1992** and helps customer bookings to rise by 3.8% to 362,327. In **1993**, Chairman Philip R. Burnaman and President Albert J. Beiga oversee 249 employees and a fleet of 3 Shorts 330s, 2 DHC-6-300s, 2 Shorts 360s, and 3 Beech 1900s. Customer bookings decline 0.4% to 360,832 and at year's end, the airline is sold to mega-regional **Mesa Airlines**, which renames its new subsidiary **Liberty Express**.

CROWN INTERNATIONAL AIRLINES: United States (1974–1979). CIA is established at Norfolk, Virginia, in **1974** to provide scheduled passenger services to the North Carolina communities of Hatteras and Manteo.

Daily de Havilland DH 104 Dove seasonal flights are duly inaugurated and are offered through **1979**.

CROWNAIR, LTD.: Canada (1989–1990). Established at Toronto in January **1989**, this new charter operator acquires a hush-kitted Douglas DC-8-52 and begins inclusive-tour flights to Orlando and Montego Bay in February. Summer flights are made to Europe before the aircraft returns to its winter routes in the fall. In serious financial difficulty, the company has closed its doors by the time Iraq invades Kuwait in August **1990**.

CROWTHER FLIGHT CENTER (BREMERTON AIR TAXI): United States (1964–1967). BAT, the airline operating division of Crowther, is established at Bremerton, Washington, in early **1964** to provide scheduled Beech 18 passenger and cargo flights to Seattle. Operations commence on February 2 and continue until the carrier is taken over by and merged into **Puget Sound Airlines** on August 28, **1967**.

CRPA (COMPANIA RIO PLATENSE DE AVIACION, S.A.): Argentina (1921–1924). Ex-British RFC Major Shirley H. Kingsley and Argentine representative of George H. Thomas' Aircraft Manufacturing Company, Ltd., having completed a series of demonstrations flights in early **1919**, now proposes establishment of a regularly scheduled commercial air service to fly passengers from Buenos Aires to Montevideo, Uruguay. Arrangements are made with Thomas to provide aircraft and on August 1, **The River Plate Aviation Company, Ltd.** is formed. The first of 12 de Havilland DH 6s and 2 DH 16s arrive by year's end.

Kingsley employs the new aircraft in early 1920 to fly charters, which bring in income and keep interest up. A base is established at San Isidro on May 23. Nonscheduled operations do not bring in sufficient income and the international scheme is in danger of failing before it can be mounted.

Meanwhile, French representatives have also come to Argentina to sell aircraft and have put together a demonstration organization, **Compania Franco-Argentina de Transportes Aereos, S.A.**

Following negotiations concerning a joint River Plate service, Kingsley and the French merge their demonstration fleets on September 21, 1921 under the umbrella of CRPA (Compania Rio Platense de Aviacion, S.A.). Kingsley is named managing director.

With a full complement of aircraft and necessary personnel, CRPA inaugurates Argentina's first regular and advertised commercial flights on December 17. Following their arrival at San Isidro's airport by taxi from the Plaza Mayo in Buenos Aires, passengers are flown for 2 hrs. 30 mins. over the 120-mile-wide river to Villa Colon's airfield in Uruguay. From there passengers are transported overland to Montevideo's Plaza Constitucion by automobile.

The daily Villa Colon route is briefly suspended on April 30, 1922, but is resumed in June. On November 20, the equipment and routes are changed. Two Vickers Type 73 Viking 4 amphibians are inserted and take their passengers directly between the Buenos Aires port city of Darsena Norte and Montevideo's Muelle Maciel downtown piers.

Service is continued in 1923, being suspended on March 31. Despite Argentina's growing interest—a 4,500 peso monthly mail subsidy is granted by the Post Office with another 4,500 pesos from the War Department—and even the printing of special air mail stamps, CRPA does not resume service in 1924.

CRUZEIRO BRAZILIAN AIRLINES (CRUZEIRO DO SUL, S.A.-SERVICIOS AEREOS, LTD.): Brazil (1941–1993). The pioneer German-controlled airline **Syndicato Condor, S.A.** is renamed **Servicios Aeros Condor, S.A.**, on August 19, 1941, at approximately the same time its two Focke-Wulf Fw-200s are grounded for lack of spare parts. Starting just after the attack on Pearl Harbor, German control begins to shift to the Brazilians as a group of Rio businessmen, backed personally by the nation's president, Getulio Vargas, purchases the carrier, paying the airline's \$2.7-million debt to **Deutsche Lufthansa, A.G. (DLH)**. Starved for fuel and awaiting trained Brazilian personnel, the carrier suspends operations at year's end.

Dr. Jose Bento Riberto Dentas is appointed director general on January 6, 1942 and flight operations are resumed in March. Brazil declares war on Germany in August and all remaining German employees are summarily dismissed. All assets become Brazilian property by government decree of August 25, including the fleet of 2 Condors, 2 Junkers Ju-46s, and 16 Ju-52/3ms.

A government decree of January 16, 1943 changes the carrier's name to **Servicios Aereos Cruzeiro do Sul, S.A.** Following a February–March Douglas DC-3 demonstration, the director general, on March 31, orders 4 Douglas transports. The first, delivered to Rio de Janeiro on September 24, is christened *America do Norte*, and enters service in November. All of the American planes are in operation along the coastal trunk routes by year's end. Meanwhile, Ju-52/3ms survey flights are made in December to the interior cities of Porto Velho and Boa Vista.

Late in 1944, a Ju-52/3m survey flight is made from Manaus to Caracas via Boa Vista, Santa Elena, and Ciudad Bolivar. In cooperation with **LAV (Linea Aeropostal Venezolana), S.A.**, joint multistop services are inaugurated in early 1945 from Rio de Janeiro to Caracas. Meanwhile, the fleet is increased through the addition of more DC-3s and the Lockheed L-12A *Saci*.

Capitalization is increased in 1946 to 20 million cruzeiros. On May 3, 3 ex-USAAF C-54s converted to DC-4 civil standard are received. They are christened *Sirius*, *Canopus*, and *Vega* and placed in service over longer route segments during the summer. One of these departs New York (LGA) for Rio de Janeiro on July 3 on a proving flight for a planned biweekly service.

The two Focke-Wulf Fw-200s are retired in April 1947. On October 2, the carrier is granted authority by the U.S. CAB to operate services to the United States.

The DC-4s make some 30 Rio de Janeiro–New York and Washington, D.C. via San Juan proving flights in 1948. A DC-3 is lost on March 16 en route from Rio to São Paulo (six dead).

As government subsidy is not forthcoming, the carrier, in 1949, elects not to open North American services. Instead, the big four-engine Douglas transports are sold for \$1.8 million, the income being placed as down payment on an order for 4 Convair CV-340s.

The Brazilian government in 1950–1951 grants per-kilometer subsidy for foreign service to those airlines willing to undertake it. Cruzeiro now has no aircraft for U.S. operations and does not choose to lease any.

While on a go-around after a failed landing at Florianopolis on March 22 of the latter year, a DC-3 with 4 crew and 10 passengers comes down in the sea (3 dead).

The carrier's U.S. authorization is cancelled in 1952 and the routes are turned over to **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**.

In cooperation with **LAB (Lloyd Aero Boliviano, S.A.)**, DC-3 flights commence in 1953 to Santa Cruz, Bolivia. Also, Rio de Janeiro–Georgetown DC-3 frequencies are launched via Cayenne, French Guiana.

A fully loaded DC-3 suffers propeller failure while on approach to the airport at Rio de Janeiro on September 12; the Douglas ditches in the ocean off shore (six dead).

Having made a fast touchdown while landing at Rio de Janeiro on October 21, the pilot of a DC-3 with 2 other crew and 28 passengers is unable to prevent the Douglas from overrunning into Guanabara Bay; although the aircraft is lost, there are no fatalities.

The CV-340s ordered in 1949 arrive throughout 1954. Christened *Sirius*, *Canopus*, *Vega*, and *Antares*, they replace DC-3s on trunk lines and international flights and are the first pressurized equipment in Brazil.

A new bimonthly stop is initiated to Planaltina, destined to become part of a new federal territory. During its September 12 landing, a DC-3 ditches in a bay near Rio de Janeiro (six dead).

The regional and domestic route network is improved during 1955–1959, if not greatly expanded. The fleet is increased by the acquisition of 5 CV-440s, 10 CV-240s, and 8 Fairchild C-82A Packet freighters. Four aircraft are lost during these years.

A DC-3 with four crew and nine passengers is lost at Sierro do Caparaó, Brazil, on August 26, 1955; there are no survivors.

While climbing away from Belem on December 1, 1956, a DC-3 with four crew and two passengers suffers engine failure and crashes; there are no survivors. A DC-3 replacement aircraft is received from **Trans World Airlines (TWA)** in April 1957.

While on approach to Florianopolis on June 16, 1958, a CV-440 with 5 crew and 21 passengers, including the former president, Ramos, and Governor Lacerda, encounters windshear and downdrafts, forcing the aircraft to descend into the ground (21 dead).

On September 5 of the same year, another Douglas transport goes down at Campina Grande (five dead).

In terms of passenger kilometers flown in 1960, Cruzeiro ranks as the eighth largest airline in Latin America. On April 12, a DC-3 with 10 aboard fails its takeoff from Pelotas and crashes; there are no survivors.

In 1961, orders are placed for 4 Sud-Est SE-210 Caravelle jetliners. On August 7, the Linha do Tocantius and Linha do Araguaia routes are turned over to **VASP Brazilian Airlines (Viacao Aerea Sao Paulo, S.A.)**.

The fleet in 1962 comprises 23 DC-3s, 14 Convairs, and 2 Fairchilds.

A CV-240 with 3 crew and 22 passengers is flying so low that it hits a eucalyptus tree at a height of 40 m. and crashes 1,860 m. short of Runway 23 at Vitoria's Goiabeira Airport on May 9 (23 dead).

The first French-made Caravelle VIR jetliner is delivered in December and enters revenue service in January 1963.

A CV-240 with 5 crew and 40 passengers suffers engine trouble while climbing away from São Paulo on January 15 and crashes into a row of houses. Six people aboard the plane are killed, along with seven on the ground, four of whom fall victim to a fire truck rushing to the disaster scene.

While landing at Parnaíba in bad weather on January 22, a CV-340 with three crew and six passengers veers off the right side of the runway and ground loops; although the Convair must be written off, there are no fatalities.

Returning to its point of origin at São Paulo on May 3 feathering the propeller of damaged No. 2 engine, a CV-340 with 5 crew and 45 passengers and which had originally taken off for Rio de Janeiro, stalls and crashes into a house during final approach (37 dead).

Airline employment in 1964 totals 3,871 and fleet has 48 aircraft. A total of 489,000 passengers are flown on the year and revenues of \$8.1 million are earned.

Following the collapse of **Panair do Brazil, S.A.** on February 16, 1965, Cruzeiro do Sul inherits, via the government, 3 Caravelles VIRs and 5 Consolidated PB-5A Catalinas, the latter being employed to maintain the failed carrier's Amazon area services to some 30 destinations. The Convair fleet begins phaseout.

Traffic rights on the Buenos Aires to Montevideo international route are pooled with **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** and frequencies of four per week are initiated.

In August, two nonfatal accidents are suffered within a week. A CV-240 is destroyed as the result of a bad landing at Rio de Janeiro on August 20; there are no fatalities. A C-47 is destroyed as the result of a hard landing at Caruaru, on August 28; again, there are no fatalities.

Systemwide, bookings for the year accelerate to 530,157.

On January 1, 1966, the carriers **VAG (Viacao Aerea Gaucha, S.A.)** and **TAL (Transportes Aereos, S.A.)** are absorbed, together with their fleets and routes in northern Brazil. Many weeks later, orders are placed for 8 YAMC YS-11A-202 turboprops from Japan.

The workforce in 1967 totals 4,341 and the fleet consists of 36 aircraft, including 7 Caravelle VIRs, 25 DC-3s, 2 C-82As, and 4 YS-11A-202s, the first of which is delivered in July. Enplanements reach 645,365.

The employee population is increased in 1968 to 4,475. Four additional YS-11A-202s are placed in service in October and November. Passenger boardings jump 10.7% to 714,079 and freight traffic skyrockets by 110%. Revenues increase to \$23.2 million.

The workforce drops to 4,331 in 1969. While on domestic flights on October 8, a Caravelle VIR and an **Aerolineas Argentinas, S.A.** plane are both hijacked to Cuba. The Cruzeiro SE-210, with 67 passengers, is taken over by 4 armed men during a domestic service from Belem to Manaus.

A YS-11A-202 with 12 passengers is hijacked over the Amazon River on November 12 by an unidentified gunman and is diverted to Havana. Still, bookings for the year rise to 739,663.

The employee count advances in 1970 to 4,447. Shortly after takeoff from Montevideo on January 1 on a flight to Rio de Janeiro, a Caravelle VIR is seized by six men and two women who order it flown to Cuba. The flight will require three days. First, a technical problem requires that the aircraft divert to Lima, Peru, and wait until a new generator can be flown in from Santiago de Chile and installed. After takeoff, new generator problems occur and the aircraft lands at Panama City. Unable to secure a new generator, engineers hook up 22 automobile batteries and are able to start the engines. The French-made jetliner arrives at Havana 46 hours after its takeover.

In an unsuccessful effort to force the release of 40 political prisoners in Brazil, 4 pirates attempt to seize a Caravelle VIR at Rio de Janeiro on July 1, but are captured in the process; the pilot and a police officer are shot and wounded in the melee.

On July 4, 2 gunmen force a YS-11A-202 with 63 passengers en route from Belem to Macapa, to fly to Cuba after a refueling stop at Cayenne, French Guiana—one of five made along the way—where some of the hostages are permitted to deplane.

Police seize a Peruvian national at Belem on July 15 following his attempt to board a YS-11A-202 with a gun. All but 8 DC-3s are retired as orders are placed, also in July, for 3 Boeing 727-1C3s.

A DC-3 crashes at Cruzeiro do Sul Acre on August 22; there is no information on casualties.

Passenger boardings swell 5.8% on the year to 785,205 and cargo climbs 6.8%.

In 1971, Transportation Consultants, Inc. is engaged to represent the carrier in the U.S. The first B-727-1C3 is delivered to Rio de Janeiro in January and begins service to Brasília and Buenos Aires on February 3.

Just after takeoff from Sena Madureira, Brazil, on September 28, a DC-3 with 4 crew and 28 passengers loses an engine. While attempting to return to the airport, the aircraft strikes trees in the Amazon jungle and crashes, killing all aboard.

Enplanements this year are up to 848,920.

The employee population in 1972 stands at 4,466. An additional B-727-100 is acquired from **Hughes Airwest** and a YS-11A-202 is sold to **Pacific Southwest Airlines (PSA)**. Routes are opened Belem–Cayenne–Paramaribo and Rio de Janeiro–Porto Vello–Manaus. A YS-11A is destroyed as the result of a bad landing at São Paulo on October 18; there are no fatalities.

Passenger boardings soar 24% to pass the million-mark in annual boardings for the first time (1,117,000) and cargo jumps 22%.

The workforce totals 4,700 in 1973 and the fleet includes 3 B-727-1C3s, 1 B-727-100, 7 Caravelles, 6 YS-11A-202s, and 5 DC-3s. Another B-727-100 is purchased from **Wardair Canada, Ltd.** Service is inaugurated Belem–Port of Spain, Manaus–Bogota, and Brasília–Lima.

Arriving from Belem, an SE-210 Caravelle VIN with 7 crew and 16 passengers, stalls while on final approach to São Luis on June 1 and crashes; there are no survivors.

A Sud Est SE-210 Caravelle VIR with 5 crew and 53 passengers hydroplanes after landing at Manaus on December 23, departs the runway, and goes down over a slope; there are no fatalities.

Cargo traffic increases 21% and passenger boardings increase by 14.3% to 1,277,000.

The workforce in 1974 is 5,000. The fleet is increased by 4 B-727-1C3s and 1 DC-3 and decreased by 2 Caravelles and 2 YS-11A-202s. Orders are placed for 6 B-737-2C3s. The country's economic condition, fuel price increases, and excess capacity lead to so severe a financial crisis that the carrier is forced to seek government funding as it seeks a merger partner. To help redress the fiscal difficulties, Carlos Ribeiro Mosso is named vice president finance.

On the traffic side, passenger boardings accelerate 8% to 1,324,000 and cargo gains by 11%.

The employee population is cut in 1975 to 4,265. In January, the 6 B-737-2C3s ordered the previous year are received. They begin service in late winter. A way out of Cruzeiro's financial plight is found on May 22 when the Fundacao Rubem Berta, owners of **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**, purchases 65% controlling interest. Unlike most buyouts, however, the carrier will be allowed to keep operating under its own name with its schedules, fleet, reservations, etc. rearranged to provide better connecting service with the flag carrier.

Following finalization of the sale on June 6, a new management team, led by President Dr. Aguinaldo Junqueira, is installed. Among the initial changes now made is the retirement of all of the Caravelles. On August 26, the government's Civil Aviation Department decrees that the combine cannot operate more than 40% of the nation's domestic traffic share.

Passenger boardings for the year are up 8.25% to 1,433,336 and cargo increased by 11.5% to 142.07 million FTKs.

The work force is cut another 1.6% in 1976 to 4,188. The fleet now includes 4 B-727-C3s, 3 B-727-1C3s, 1 B-727-100, 6 B-737-2C3s, and 4 YS-11A-202s.

On March 10, the Civil Aviation Department allows the domestic traffic share to rise to 45%. Rearrangement of schedules continues so as to provide better connecting service with the international and

domestic flights of **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**.

Passenger bookings jump 15.5% to 1,655,633, but freight falls 16.2%.

Having touched down too far down the runway at Navegantes on April 29, 1977, a YS-11A-202 freighter with two crew, runs off the right side and collides with light beacons, causing the landing gear to collapse. No serious injuries are reported.

The last 3 YS-11A-202s are now retired. Enplanements accelerate to 1,720,552.

Airline employment in 1978 totals 4,164. Passenger boardings grow 13.8% to 1,996,000, and freight climbs a slight 1.6%. Profits are \$7.68 million.

The carrier offers a portion of its stock for sale in 1979. Fundacao Rubem Berta shareholding is decreased to 62% while public interests, via the sale, come to hold the remaining 38%. Orders are placed for 4 Airbus Industrie A300B4s.

Passenger bookings advance 11% to 2,207,833 and freight ascents 6.9%. Revenues soar 62.5% to \$98 million, producing a 23.1% jump in profits to \$10.1 million.

The workforce is increased 1% in 1980 to 5,162. The first of 2 A300B4-203s to be delivered during the year arrives in June. On October 7, the Civil Aviation Department again reduces the traffic share allowed to 40%.

Passenger boardings climb 10% to 2.4 million and freight is up 13.6%. In terms of passenger kilometers flown, the carrier now ranks as the 18th largest airline in Latin America, the same position it held 20 years earlier.

As the world's economic woes visit Brazil in 1981 passenger boardings drop 6% to 2.28 million, but cargo climbs 18% to 25.3 million FTKs. A \$1-million operating loss is suffered.

The workforce is reduced 3.4% in 1982 to 4,096. The single B-727-100 is withdrawn.

Passenger traffic ascends a slight 0.1% as 2,254,779 passengers are carried; freight rises 4% to 24.76 million FTKs. Revenues grow 2.2% to \$193 million, and expenses climb only 0.8% to \$188.5 million, producing an operating profit of \$4.47 million.

A total of 35 employees leave the company in 1983 as the second of a pair of A300B4-203s is received. Service is opened from Manaus to Port of Spain and Bridgetown.

Boardings dip 5.3% to 2,134,696, but cargo climbs a welcome 16.2% to 28.77 million FTKs. Income falls 18.7% to \$153.6 million and expenses grow 10% to \$166.1 million, leaving a \$12.4-million operating loss.

Airline employment falls another 2.9% in 1984 to 3,943. A B-737-2C3 is withdrawn.

Enplanements dip 10% to 2,120,000, freight traffic remains the same, and another financial loss is taken.

The employee population declines 4.3% to 3,513 in 1985 and the fleet now includes 2 A300B4-203s, 6 B-737-2C3s, 3 B-727-C3s, and 3 B-727-1C3s.

Passenger boardings jump 7.2% to 2,272,000 and cargo swells 26.9% to 36.4 million FTKs. The operating profit is \$1.56 million; however, a net \$5.2-million loss is suffered.

The payroll is cut again in 1986, down 14.8% to 2,996. Customer bookings accelerate 31.7% to 2,992,158 and freight increases 60.3% to 58.37 million FTKs. Revenues advance by 25.2% to \$216.6 million and costs are held in line. As a result, operating profit jumps to \$13.2 million and net gain recovers to \$10.1 million.

Still deeper cuts are made into the employee population in 1987, which now falls to 2,535, a 15.4% decline.

Passenger boardings inch upward by 1.2% to 3,028,795, but cargo falls 5.5% to 55.17 million FTKs. Revenues surge 8.7% to \$235.4 million, but expenses increase 13.9% and thus cause operating profit to fall to \$3.8 million. There is a net loss of \$2.25 million.

The workforce is stabilized in 1988 and actually grows by 6.5% to 2,481. The fleet now includes 3 B-727-C3s, 3 B-727-1C3s, 6 B-737-2C3s, and 2 Airbus Industrie A300B4-203s.

Customer bookings rise 2% to 3,081,423, but freight continues to fall, declining by 22% to 43.21 million FTKs. Costs exceed income and losses of \$9.57 million (operating) and \$3.42 million (operating) are suffered.

Company employment is cut by 7.9% in 1989 and the fleet is reduced by 1 Airbus. In October, regional carrier **TAM (Transportes Aereos Regionais, S.A.)** begins operations over the São Paulo-Rio de Janeiro Air Bridge, challenging the monopoly Cruzeiro shares with the majors **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)**, **VASP Brazilian Airlines (Viacao Aerea Sao Paulo, S.A.)**, and **Trans-brasil, S.A. (Linha Aerea)**.

Passenger boardings surge ahead by 13.9% to 3,515,332 while freight regains its upward momentum, moving ahead by 59.9% to 69.11 million FTKs. Revenues are boosted 16% to \$334.4 million, but expenses increase 24% to \$369.19 million, guaranteeing an operating loss of \$34.48 million. The net loss is up dramatically, to \$26.18 million.

The workforce is cut another 5.5% in 1990 to 1,963. The active fleet now includes 6 B-737-2C3As, 3 B-727-C3s, 2 B-727-25s, and 1 B-727-11. Since the middle of the decade, the carrier's routes have been gradually reduced in number until it is flying only to Buenos Aires, Montevideo, and the Bolivian cities of Santa Cruz and La Paz.

Customer bookings decline 10.8% to 3,136,970, but cargo grows 9.3% to 75.56 million FTKs. Revenues ascend 9.1% to \$364.9 million, but expenses are more and the operating loss is \$37 million.

The payroll is sliced again in 1991, down 5.8% to 1,850. Passenger boardings fall another 6% to 2,960,589, but freight swells 26% to 55.83 million FTKs. Revenues decline 5% to \$361.9 million and costs fall somewhat, allowing the operating loss to be cut to \$13 million.

The employee population regroups in 1992, growing by 5.4% to 1,950 and the fleet now consists of just the 6 B-737-2C3As.

Customer bookings drop 4% to 2,835,835 while cargo falls 7% to 51.7 million FTKs. Plans are made to merge the veteran 17-year subsidiary into **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** during the next year.

By 1993, airline employment is 2,535 and Chairman Junqueira's fleet comprises 2 A300B4-203s and 6 B-737-200s. The integration into **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** is completed during the first quarter.

CRYDERMAN AIR SERVICE. See CENTURY AIRLINES (2)

CRYM-AVIA: Ukraine (1993-1994). Crym-Avia is established at Simferopol Airport in the Crimea in 1993 to offer scheduled services to Kiev and other regional destinations. Vladimir A. Anufriev is named CEO and he inaugurates services with an all-Tupolev fleet of Tu-154s and Tu-134s. Operations continue just over a year.

CSA AIR: Ford Airport, Iron Mountain, Michigan 49801, United States; Phone (906) 774-3101; Fax (906) 774-6540; Year Founded 1986. Wayne Ross forms CSA Air at Iron Mountain, Michigan, in late 1986 to provide scheduled cargo services to destinations throughout the upper Midwest, many on behalf of express operators and freight forwarders. A wholly owned subsidiary of Mountain Air Cargo, the company is outfitted with Cessna 208 Caravan Is provided by the parent.

All shareholding in the **Mountain Air Cargo** subsidiary is transferred to MAC's parent, Atlanta-based Air Transportation Holding Company, on April 1, 1990. The number of Caravans is increased to 21.

On March 31, 1991, both MAC and CSA Air become exclusive servants of **Federal Express**, signing agreements that the major can cancel on a month's notice. Operations continue during the remainder of the decade, during which time President Ross increases his fleet by 7 Caravans.

CSA CZECH AIRLINES, A.S.: Airport Praha, Ruzyně, 16008, Czech Republic; Phone 42 (4) 481-5183; Fax 42 (4) 481-5183; http://www.csa.cz; Code OK; Year Founded 1995. Following the

dissolution of Czechoslovakia, the former **CSA Czechoslovak Airlines** is renamed CSA Czech Airlines on March 26, 1995. Shareholding is split among the Fund for National Property, Konsolidiscri Bank, and EBRD. There is no change in the airline's legal status or existing agreements or alliances. Antonin Jakubse is president.

During the year, employment inches up 0.2% to 3,900 and 24 aircraft are retained in the fleet. New services begin to Hanover and Stuttgart.

A code-sharing and joint service agreement begins with **TAROM Romanian Airlines, S.A.** in April covering flights from Prague to Bucharest. The last CSA flights between Ostrava and Prague are concluded during the summer; thereafter, the company enters into a block-seat, code-sharing agreement with **Air Ostrava, S.R.O.** covering that carrier's six daily return flights between the two cities.

In October, a blocked-seat arrangement commences with **Swissair, A.G.** on services between Prague and Zurich. Simultaneously, the company inaugurates code-sharing with **MALEV Hungarian Airlines** on frequencies between Prague and Budapest. Meanwhile, loads on the previously instituted dual-designator route with **LOT Polish Airlines, S.A.** from Prague to Warsaw grows by 60%.

Enplanements climb 20.1% to 1,488,317 while freight transport increases 17.3% to 25.62 million FTKs.

There is no change in the workforce during 1996 and the owned fleet now includes 4 Avions de Transport Regional ATR72s, 2 Airbus Industrie A310-304s, 5 B-737-55Ss, 3 Tupolev Tu-134As, and 4 Tu-154Ms. Also operated are 2 chartered ATR42-320s and 2 B737-4Y0s.

In January, the company negotiates a code-sharing agreement with **Continental Airlines** that covers its daily flights from Prague to Newark and on 24 selected Continental domestic services originating from the New Jersey airport. The first enhanced ATR42-400 is delivered to the company during the third week of March. A second arrives at month's end.

The dual-designator flights with **Continental Airlines** commence on April 1. During the month, the carrier announces that it will upgrade its fleet with 10 more Boeing 737s that will replace old Soviet equipment.

In order pay for its fleet upgrade, CSA reveals, on June 21, that it has reached agreement with Ceskoslovenska Obchodni Banka and CIBC Wood Gundy of Canada for a \$350-million financing package. Four more chartered ATR42-320s enter service during the summer; however, the two units leased previously are replaced by two owned ATR42-320s.

An exchange-of-seats arrangement begins with **Alitalia, S.p.A.** in October on frequencies from Prague to Rome and Milan.

Later in the year, a subsidiary and infrastructure division is created to coordinate the work of four new subsidiaries created over the last two years: CSA Airtours, A.S., Slovak Air Services, S.R.O., Amadeus Marketing CSA, S.R.O., and CSA Services, S.R.O.

A company A310-304 is shown landing and taxiing in the opening scenes of the motion picture *Hidden Assassin*, starring Dolph Lundgren and Maruschka Detmers, filmed in Prague during the year.

Traffic figures are mixed. Customer bookings accelerate 8.3% to 1,612,126, but only 22.21 million FTKs are operated, a 4.2% decline.

Airline employment is increased by 1.9% in 1997 to 3,976. At the beginning of the year, shareholding is divided between the national government (56.4%), the Prague municipal government (2.9%), and private investors (40.7%).

The first link between a Japanese airline and East European carriers occurs on January 18 when **Japan Air Lines Company, Ltd. (2)** signs code-sharing agreements, effective in the summer, with CSA and **MALEV Hungarian Airlines**. Flights from Tokyo (NRT) or Osaka (KIX) to Frankfurt will be able to make seamless connections on to the partner lines for flights to Prague and Budapest. Between now and June, JAL will aggressively market the new alliance.

The first of 3 new B-737-55Ss to arrive during the year is delivered on February 20. On April 5, a \$350-million order is confirmed with Boeing for 10 B-737-500s, which will be phased in to replace outdated Rus-

sian equipment. They will be paid for with the financial package announced the previous year.

It is revealed on March 27 that the Russian federation aviation agency has refused to continue its agreement with Czech Airlines and will not to grant it authority to conduct flights for the summer season from Bratislava and Prague to Moscow. The decision will cost the Czech carrier \$75,000 in lost income.

Two more "Baby Boeings" arrive, one each in April and May, at which point all of the Tupolevs are retired from scheduled service and assigned to charter operations.

A blocked-space agreement begins with **Air France** in May on flights from Prague to Paris. The two-year-old joint services and code-sharing agreement with **TAROM Romanian Airlines, S.A.** ceases in June. Also during the month, a new North Terminal is opened at Ruzyně Airport at Prague.

At this point, the new dual-designator services with JAL begin. Code-sharing on domestic routes begins with **Air Ostrava, S.R.O.** during the summer.

In anticipation of a healthy winter charter business—much of it booked via the wholly owned CSA Airtours subsidiary—the company in late September leases 2 of the 6 Tu-154Ms owned by **VIA Bulgarian Airlines**. These are joined in nonscheduled service to Greece, Turkey, and Spain by the company's last 4 Tu-154Ms.

Also during September, a marketing agreement is entered into with **Continental Airlines**. Under the arrangement, the two companies link their frequent flyer programs and share their codes on flights to and from the U.S. and on connections in America.

In November, it is announced that, for the past year, CSA has had the fewest number of delays due to technical reasons of any member of the Association of European Airlines (AEA). A third phase in the upgrading of Prague's Ruzyně Airport is completed late in the month.

The last 3 of 14 Tu-134As operated by the company are retired in December.

Passenger boardings accelerate 7.5% to 1,733,657 while freight increases 4.3% to 23.1 million FTKs. A \$3.2-million net profit (later adjusted to \$2.7 million) is celebrated.

Airline employment stands in 1998 at 3,976.

The British Broadcasting Corporation reports on February 22 that the airline has started a new regular service between Moscow and the Czech resort town of Karlovy Vary. Many newly rich Russians have moved to the area since the fall of the Soviet Union, buying up property and even setting up a Russian school and Orthodox Church.

Three new B-737-55Ss arrive during the spring as new dual-designator routes are started with **Air Ostrava, S.R.O.** to Ljubljana and Strasbourg. International service is initiated to Amman, Bologna, Nice, and Oslo.

Led by Transport and Communications Minister Petr Moos, the government, in July, announces that, because CSA had turned its 1996 loss into a 1997 profit, the government would not provide the airline with a promised 500-million koruna (\$15 million) cash injection. The airline responds by noting that it still requires the funds in order to increase its capital and make it attractive to a strategic partner.

At the end of August, an agreement is signed with **Hapag-Lloyd Fluggesellschaft, mbH**, under which the Prague-based scheduled operator will perform certification checks on the German charter line's B-737-4K5s. On September 30, a \$20-million cargo terminal is opened at Prague's Ruzyně Airport.

The company celebrates its seventy-fifth anniversary in October.

While en route from Newark (EWR) to Prague on November 16, Flight 53, an A310-304 is forced by an unspecified technical problem to divert to Gander, Newfoundland; once the problem is resolved, the Airbus is allowed to proceed across the Atlantic.

Enplanements for the year reach 1,801,800, a 3.9% increase; freight traffic climbs 6.9% to 24.7 million FTKs. Net gain climbs to \$11.8 million.

By the beginning of 1999, airline employment has been cut by 1.6% to 3,912.

Czech receives its first B-737-5K5 on February 18, and it is named after south Bohemia's *Jindřich v Hradce*.

In anticipation of air strikes by NATO countries against Serbian military targets in a campaign for an independent Kosovo, CSA, on March 24, halts all scheduled service into Belgrade. A spokesman, in making the announcement, indicates that the situation will be evaluated further toward evening; however, that evening, Operation Allied Force, the bombing attack on targets in Serbia and Kosovo, begins.

Service to Belgrade remains halted on March 25 and for the duration of the NATO bombing campaign. Flights to south-central and south-eastern Europe experience delays of 30–60 min. due to airspace closure.

In cooperation with **Air France**, the number of daily roundtrips to Paris are increased to six on March 28. A new fifth daily CSA roundtrip is simultaneously started from Prague to Amsterdam, bringing the daily total to five, and in cooperation with **KLM Royal Dutch Airlines, N.V.**, the weekly total to 32.

With the start of the summer schedule, the dual-designator pact with **Deutsche Lufthansa, A.G.** is deepened to provide a total of 272 weekly flights (136 in each direction) between the Czech Republic and Germany.

Daily roundtrips are introduced between Prague and London (STN), which are in addition to the 14 weekly roundtrips to London (LHR). New B-737-5K5 roundtrips are introduced between Prague and Dublin, four times a week, together with two new roundtrips to Göteborg, Sweden. In addition, the first of 28 summer-only weekly return flights to Beirut is operated.

The second B-737-5K5 arrives on April 20 and is named *Kladno*. Three days later, the company enters into a \$10-million arrangement with SABRE for the creation of a turnkey System Operations Control center for CSA, which will be ready in a year.

Ousted as chairman, President Antonia Jakubse resigns during the early summer; he is succeeded in office on July 24 by Vice President-Technology Miroslav Kula. At this point, the Czech Transport Ministry announces that the carrier's privatization is being postponed until 2001.

It is revealed on December 20 that CSA is now the second largest exporter in the Czech Republic. A code-sharing agreement with **Continental Airlines** on the Prague–Bucharest route comes into effect on December 21.

Customer bookings for the first 11 months climb 14.3% to 1,919,000 while freight is up 4% to 23,234,000 FTKs.

Airline employment stands at 3,795 at the beginning of 2000, a 3% drop over the previous 12 months.

The Tu-154M *Marianske Lazne* operates the last CSA service by the type on January 10, a charter flight from Prague to Istanbul. While in Czech service, the Tupolevs flew over 51.3 million km.—equivalent to 1,280 flights around the world. The final Soviet-era jetliner is replaced on charters by the B-737-45S *Jihlava* and the Dash-45S *Liberec*.

On March 10, CSA takes delivery of 2 additional B-737-45Ss, the last 2 Dash-400s manufactured by Boeing. The same day, as replacement for the failed **Air Ostrava Spol. S.R.O.**, regularly scheduled roundtrips are inaugurated between Prague and Ostrava. Service between Prague and Belgrade is resumed on April 10.

Scheduled flights are initiated between Prague and Brno on May 22 by the recently christened B-737-45S *Brno*. Twice-weekly B-737-55S roundtrips are launched from Prague to Aleppo, Syria, at the beginning of June; one flight continues on to Damascus before returning to the Czech Republic. Other destinations receiving increased service during the month include Amsterdam, Beirut, Brussels, Copenhagen, Dublin, and Tel Aviv.

On June 21, plans are unveiled under which the carrier would join the new "SkyTeam" alliance, headed by **Air France** and **Delta Air Lines**, the following March. Those majors will also each acquire a 15% stake in the Czech carrier by 2002.

Formal government approval to join "SkyTeam" is received on August 27. A formal invitation to join is received from the alliance on October 18.

CSA CZECHOSLOVAK AIRLINES (CESKOSLOVENSKE STATNI AEROLINIE): Czechoslovakia (1923–1994). The Czechoslovakian state carrier is formed on July 19, 1923. Experimental Hansa

Brandenburg Aero A-14 postal, passenger, and cargo flights begin on October 29 over a route from Prague to Bratislava, Kosice, and Uzhorod. The inaugural flight had actually been launched the previous day, but an emergency landing required it to be restarted.

The two-place biplanes, supplied by the Czech air force that had operated them over this route since March 1, fly a total of 23 passengers by year's end.

The first Czech-designed commercial airliner, the five-passenger Aero A-10, enters service in early 1924 over a new Prague–Brno and Bratislava route and is joined by several Junkers F-13s.

A de Havilland DH 50A is acquired in early 1925, followed by 7 more, license-built by Aero, in 1926. Frequencies are increased, particularly to the West Bohemian resort area.

In addition to the Aeros, 6 Farman F-60 Goliaths, license-built by Avia and Letov, are in service by 1928. In August, 7 Aero A-23s are introduced on 2 routes out of Prague: to Uzhorod via Brno, Bratislava, and Kosice and to Marianbad.

In 1929–1930, as the carrier seeks to further develop its domestic system and prepares to begin foreign flights, the fleet is upgraded to include a combination of 16 de Havilland DH-50s, Junkers F-13s, Aero A-23s, A-32s, and A-35s. The latter are placed into service on two routes: Brno to Uzhorod via Bratislava and Kosice, and Marianbad to Cluj via Moravská and Ostrava.

Four Fokker F-VIIb/3ms are received on July 1 of the latter year; they inaugurate international service from Prague–Bratislava–Zagreb on July 30. Late in the year, the national aircraft registration prefix is changed from L to OK.

Four Letov S-32s are acquired in November 1931 and are placed into service on the Prague to Karlsbad via Marienbad, route.

During the spring of 1932, a Caproni Ca 97 is acquired from Italy and is placed into service on a frequency from Prague to Carlsbad via Marienbad.

During the remainder of the year and into 1933, international services are opened (primarily to the east) and frequencies are extended to Bucharest on September 11.

Orders are placed for additional foreign aircraft in 1934. Two Avia F-IXDs (license-built Fokker F-IXs) join the fleet in 1935 and are employed to initiate Vienna service. On September 2, 1936, the company initiates Prague to Moscow via Warsaw services.

In 1937, the fleet is upgraded by the addition of 3 Savoia-Marchetti SM-73s and 4 British-made Airspeed Envoy IIIs.

CSA moves into the prize-winning new Ruzyně Airport at Prague on April 1 and inaugurates Envoy flights to Brussels on April 7. Customer services throughout the system are improved by introduction of the first cabin attendants.

The fleet, by the close of the year, is considerably upgraded, comprising the SM-73s, Envoy IIIs, as well as 7 Fokker F-VIIb/3ms, 1 Avia-built Fokker F-IXd, 7 Aero A-35s, 1 British-made Saro Cloud (amphibian), 4 Letov S-32s, 1 Letov S-218, and 1 Caproni Ca-97.

By the time of the Munich crisis of 1938, frequencies are being offered from Prague to Rome and Bucharest via Brno; to Paris, Brussels, Venice, and Trieste via Klagenfurt and Bratislava; and to Susek via Bratislava. The Munich Agreement of September, under which the Sudetenland is ceded to Germany, significantly impacts operations.

Following the March 15, 1939, partition of the nation, the company ceases independent operations and is taken over by **Deutsche Lufthansa, A.G. (DLH)**. Its assets are integrated into the German fleet within six months.

A rejuvenated and liberated CSA resumes limited domestic operations on March 4, 1945 with ex-Luftwaffe Ju-52/3ms. The carrier is officially reestablished on September 14 as the civil air operating division of the nation's transportation department. During the first year, pilots and ground crews seconded from the Czech air force keep the airline in operation.

Modified to civil DC-3 standard by Avia, the first of 60 Douglas C-47s are obtained for international services by early 1946. Flights are

resumed on March 1 over routes from Prague to Brno, Bratislava, Zurich, and Paris. On August 7, a new bilateral air agreement is signed between Czechoslovakia and Poland. As a result, CSA is able to inaugurate Prague–Warsaw return service on August 13. By year's end, international service has also been restarted or inaugurated to Amsterdam, Belgrade, Bucharest, Copenhagen, Oslo, Paris, and Stockholm.

Additional DC-3s are delivered in 1947 and intercontinental service is inaugurated with flights to Cairo and Ankara. On February 13, a C-47 with three crew fails its initial climb into a training flight and crashes near Klavno, near Prague; there are no survivors.

Five days later, the carrier's flight personnel strike in an effort to force improvements in safety measures.

Following the Communist coup in 1948, routes and frequencies are severely curtailed as Soviet direction and technical assistance predominates the carrier's activities.

On April 6, 20 passengers join the captain and two dissident crew members in seizing a DC-3 en route from Prague to Bratislava and force it to West Germany; six persons return to Czechoslovakia. The incident marks the first case of air piracy employed to escape from behind the Iron Curtain.

En route from Brno to Ceske Budejovice on May 4, another DC-3 is taken over by five passengers, who force it to fly to Munich.

A route is opened from Stockholm to Helsinki on June 19.

A DC-3 crashes into the mountains of southern Greece on December 24 (24 dead).

Cyprus Airways, Ltd. assumes CSA's service from Athens to Lydda via Cyprus on June 12, 1949. Ten Ilyushin Il-12Bs are acquired during the remainder of the year. One of these replaces a DC-3 on September 12 on a new Prague to London (Northolt) service, a new extension of the route to Paris. Domestic service is now emphasized; however, international service is flown to Moscow and the capitals of Warsaw Pact countries.

A DC-3 with five passengers crashes into a mountain 200 mi. E of Prah on February 27, 1950; there are no survivors.

On March 24, 3 Il-12s with a total of 83 people are diverted by passengers and crew to Erding Field, West Germany. The aircraft had been on scheduled services to Prague from Brno, Ostrava, and Bratislava, respectively.

Between November 13 and 15, the company flies delegates from London to the World Peace Conference in Warsaw, making unauthorized flights over the U.S. zone of Germany. As a result, on November 27, U.S. High Commissioner McCloy closes two routes over West Germany to CSA and severely limits the number of flights allowed on the third. Czech protests the next day are rejected.

Operations continue apace in 1951–1952. On March 24, 1953, an Il-12 en route from Prague to Brno with 31 passengers, is seized by 4 passengers who divert it to Frankfurt, West Germany. There they seek political asylum with 2 other passengers and Capt. Miroslav Slovak, who was not involved in the plot. The Ilyushin, its crew, and 23 passengers return to Prague the next day.

A DC-3 with 4 crew and 11 passengers fails its takeoff from Prague on January 14, 1954, and makes a forced crash landing nearby; there are no survivors.

The first of some 50 license-built Avia-14s (Czech-made Ilyushin Il-14s) begin to enter service in 1955–1956. On January 17–18 of the latter year, an Il-12B with 3 crew and 23 passengers crashes in the Tatra Mountains near Torysa (22 dead); the Czech government blames drifting Free Europe Press propaganda balloons for the tragedy.

The engines of an Ilyushin, with 5 crew and 18 passengers, including a 10-man Peking Opera Company delegation, catch fire just after takeoff from Zurich on November 24 and force the plane to crash near Eglisau; there are no survivors.

The only export customer for the twinjet Tupolev Tu-104A, CSA acquires 6 beginning on November 15, 1957 and christened *Praha* (Prague), *Bratislava*, *Brno*, *Ostrava*, *Plzen* (Pilsen), and *Ceske Budejovice*. The *Praha* enters service on December 9 on the Prague–Moscow route.

During the same year, the 50 Il-14s, domestically manufactured by Avia, begin to join the fleet, initiating regional service on June 8. After a six-year lapse, service is resumed to London on October 6. New routes are also opened to Paris, Brussels, and Moscow. The year's enplanements total 293,000.

Cairo flights are begun on August 26, 1958. During the summer of 1959, CSA receives the balance of its 6 Tu-104As and becomes the first Eastern block airline to open a long-haul route outside of Europe and the Middle East when it launches Prague–Bombay Tupolev service via Cairo. Late in the year, the Tu-104A *Bratislava* is lost in a nonfatal refueling accident at Bombay.

Early in 1960, Il-18s replace the retired Il-12Bs and begin Prague–Bratislav flights on January 28. On April 1, Tu-104A flights begin from Prague to London.

Starting on July 22, service is also started from Prague to Konakry (Guinea) via Rabat and Dakar. The Tu-104A Bombay route is extended to Djakarta on August 26.

Following the March signing of an air assistance pact with the Soviet government, **Air Guinee** is formed at Conakry as a state corporation in October with Czech technical support and an Ilyushin Il-18 turboprop wet-leased from CSA.

Enplanements for the year are 754,000.

The year 1961 is a tragic one for the carrier.

An Avia 14, with five crew and five passengers, fails its January 2 initial climb away from Hostivice on a training flight; there are no survivors from the subsequent forced landing.

While on its March 28 descent, an Il-18B with 8 crew and 44 passengers, crashes and explodes at Russelbach, 22 km. NE of the airport at Nuremberg, West Germany. There are no survivors from a service en route from Prague to Mali.

An Il-18B, bound from Prague to Zurich with 8 crew and 64 passengers on July 12, explodes and crashes after hitting a power line during a landing attempt in fog near Casablanca; there are no survivors. Meanwhile, on May 15, direct flights are initiated to Cambodia.

In all, 759,000 travelers are carried on the year.

The Bombay route is extended to Jakarta in 1962. An Avia 14, with 3 crew and 31 passengers, crashes near Slavkov u Brna on September 10 (11 dead).

Passenger boardings for the year reach 831,000.

Transatlantic flights begin on February 7, 1963 when Bristol Britannia 310s, leased from **Cubana (Empresa Consolidada Cubana de Aviacion, S.A.)** are employed to operate a direct Havana–Prague route via Prestwick, Shannon, Gander, and New York (a technical stop only).

While refueling at Bombay on March 16, a Tu-104A catches fire and is destroyed; no injuries are reported.

Bookings for the year reach 959,000.

In 1964–1967, CSA becomes the first East European airline to operate a worldwide network as a variety of destinations are added linking Prague with Europe, the Middle East, Africa, Canada, South America, and the Far East. Employing one of three new Tu-124Vs (christened *Melnik*, *Centrotex*, and *Mlada Boleslav*), CSA begins Prague to Frankfurt service—the first twin turbofan service by an IATA member—on November 26 of the former year.

Released passenger traffic figures show increases from 1.24 million in 1965 to 1.39 million in 1967.

En route from Prague to Havana via Shannon and Gander on September 5 of the latter year, Flight 523, an Il-18D with 8 crew and 61 passengers crashes just after takeoff from its intermediate Canadian stop (37 dead).

On May 1, 1968, an Il-62 is leased from **Aeroflot Soviet Airlines** for the Prague–London service and orders are placed for several more. An Avia 14 with 3 crew and 37 passengers crashes just after takeoff from Prague on October 11 (11 dead). The same day, another Avia 14 is lost at Ptic; however, no details concerning the accident are available.

The company announces on December 27, 1969, that, during the following spring, a new Il-62 will visit the U.S. making stops at New York,

Philadelphia, Boston, and Washington, D.C. in a series of promotional and crew orientation programs prior to the start of regularly scheduled services. Enplanements for the year are 1.47 million.

An Il-62 does, in fact, begin Prague to New York via Montreal operations on May 4, 1970. That happy event is partially eclipsed by a June 1 accident.

Having failed two visual landing attempts in heavy fog on one Tripoli runway, the pilot of a Tu-104A with 10 crew and 3 passengers, elects to try another, but crashes 5.5 km. S of it; there are no survivors.

En route from Karlovy Vary to Prague on June 8, an Il-18 is hijacked by four men and four women, with a baby, who divert it to Nuremberg, West Germany; upon landing, the pirates ask for political asylum. The German authorities hold the five who brandished arms during the hijacking and release the other three, who are sent to a refugee camp. The five will be tried and sentenced to prison terms ranging from 8 months to 2½ years.

On August 8, three men, two brothers, and one man's son, take over an Il-14 with 27 aboard en route from Prague to Bratislava, and force it to fly to Vienna where they seek asylum; the plane, minus the pirates, returns to Prague the next day. The brothers will be tried and given prison terms of 12 and 15 months, respectively.

As the result of crew-distracting cabin pressure problems, Flight 744, a Tu-124V with 6 crew and 14 passengers arriving from Prague makes a belly landing at Zurich on August 18; the aircraft slides 875 m. down the runway and is damaged beyond repair; there are no fatalities.

Passenger bookings for the year dip to 1.44 million.

The CSA associate **Slov-Air** is formed at Bratislava in 1971; equipped with Let L-410 Turbolets, it begins third-level service. During the year, two Il-18s are acquired from the government. The first owned Il-62s arrive, wearing a livery that emphasizes a new "OK" logo. Orderly retirement of the Tu-104As begins in December when the first Tu-134As enter service.

An Avia 14 crashes near Karlovy Vary, Czechoslovakia, on February 1, 1972; there is no information concerning any casualties.

Czech miners K. Dolezal and A. Larch hijack a domestic Prague-Marienburg flight with nine aboard on April 18, and after shooting the copilot, force the plane to fly to Nuremberg, West Germany. There the two request political asylum, but are arrested by police.

En route from Marienburg to Prague on June 8, an Il-18 is commandeered by seven men and three women, who force it to land in West Germany after fatally wounding the pilot. During the year, **Pan American World Airways (1)** becomes the carrier's general sales agent in the U.S.

Enplanements for the year total 1.66 million.

Two more aircraft are lost in 1973. Coming in from Damascus on August 29, Flight 531, a Tu-104A with 8 crew and 62 passengers, is destroyed as the result of a bad landing at Nicosia, Cyprus; there are no fatalities.

An Avia 14 is lost at Brno on October 25; there are no other details on the accident.

Passenger boardings for the year are the same as in 1972, but climb to 1.8 million in 1974.

An Il-62 with 11 crew and 117 passengers crashes 17 km. NE of Damascus while on initial approach on August 20, 1975 (126 dead).

Since 1972, all the Tu-104As and Tu-124Vs are replaced by Il-62s and Tu-134As. Customer bookings reach 1.9 million.

At the start of 1976, the third-level carrier **Slov-Air** is taken over and merged, together with its 14-point domestic network and 12 Let L-410s.

While on final approach to Bratislava on July 28, an Il-18V with 6 crew and 73 passengers, loses control and crash-lands in a recreational lake (76 dead).

A 26-year-old Czech railroad worker, Rudolf Becvar, hijacks an Il-18 to Munich on October 28 during a domestic flight from Prague to Bratislava and is taken into custody on air piracy charges. Becvar will be tried and sentenced to eight years in prison.

Passenger this year traffic falls to 1.8 million.

Just after landing at Prague on January 2, 1977, a Tu-134 with 6 crew and 42 passengers collides with an Il-18 with 6 crew that is taking off.

The Tupolev veers off the runway and comes to rest 2,000 m. away. There are no fatalities aboard either aircraft, but at least 10 people are injured.

An Avia 14T freighter with three crew and two passengers departs from its flight path while on final approach to Bratislava on February 11 and crashes into trees 1,800 m. short of the runway (four dead).

Vlastimil Toupalik and Ruzena Vickova, two CSA employees, commandeer a Yak-40 during an October 11 domestic flight from Karlovy Vary to Prague and divert it to Frankfurt, where they are arrested by West German police. The two will be tried and sent to prison for terms of 3½ and 6 years respectively.

Enplanements for the year reach 1,525,698.

The carrier's fifty-fifth anniversary is celebrated in 1978. Director General Jindrich Kopriva now oversees a workforce of 4,341 and a fleet comprising 7 Il-62s, 8 Il-18s, 13 Tu-134As, 17 Yak 40s, and 12 L-410s.

On February 6, Hans Neitzel, using a dummy bomb, hijacks a Tu-134 with 46 aboard from East Berlin to Frankfurt and requests asylum. The pirate will be tried and given a four-year prison sentence.

En route from Prague to Brno on May 10, an Il-18 with 39 passengers is skyjacked by 3 adults with 2 children in tow and diverted to Frankfurt. All are taken in hand by police and the male adults will receive prison terms.

Seven days later, a lone assailant, attempting to hijack a Yak-40 during a service from Brno to Prague, is overpowered by his fellow passengers. On May 29, crew members of another Yak-40 also overcome a skyjacker as he tries to take over their aircraft on a scheduled service between Brno and Karlovy Vary.

Josef Katrincak, his wife Anna, and Radomir Sebesta steal a Yak-40 while on a November 10 domestic flight and force it to land in West Germany.

Freight grows 7.9% during the year and passenger boardings increase 9.2% to 1,680,284.

Airline employment grows 0.1% in 1979 to 6,070. In April, CSA hosts the 14th annual meeting of the Airlines of the Berlin Treaty. Two Il-62Ms are delivered. Passenger traffic grows 4.7% to pass the 2-million mark for the first time (2,006,976). Freight, however, is off by 2% to 16.38 million FTKs.

The workforce is reduced by 0.3% in 1980 to 6,054. A third Il-62M is placed in service and, in May, the carrier begins to offer joint service, in cooperation with **Air France**, over the route from Prague to Paris.

The world economic downturn brings a sharp traffic decline outside of Eastern Europe; cargo falls 20.6% to 13 million FTKs and enplanements drop 16.5% to 1,675,000.

The employee population is reduced by 6.8% in 1981 to 5,639 and the carrier's 12 L-410s, 5 Il-18s, and 11 Yak 40s are retired.

Despite a 3.7% boost in cargo to 12.53 million FTKs, passenger bookings again drop significantly, dipping 31.3% to 1,165,700.

Airline employment is 5,639 in 1982. A fourth Il-62M is acquired, but the company office in Chicago is closed. Cargo climbs 12.1% to 14.05 million FTKs, but passenger boardings slip again, falling 9.9% to 1,050,000.

The number of workers is reduced in 1983 to 5,476. Czech police shoot and kill Marian Pesko, who tries to hijack a Yak-40 with 34 aboard during a February 18 domestic flight from Poprad to Prague.

Service is started to Malta and an Il-18 is retired.

Passenger traffic rises 8.1% to 1,135,000 and freight increases by 7.3% to 52.23 million FTKs.

Twenty-three new employees are hired in 1984 as Lisbon is added to the route network. An Il-62 is replaced by another Il-62M. OK Class service is introduced on several routes.

Although cargo is off 1.3% to 13.45 million FTKs, enplanements rise a slight 0.3% to 1,138,551.

The workforce grows 0.4% in 1985 to 5,522. OK Class service is expanded to the carrier's Jakarta and Ho Chi Minh City routes, as yet another Il-62M is delivered. Orders are placed for 7 Tu-154Ms.

Freight soars 29.2% to 17.98 million FTKs and passenger bookings are up 7.1% to 1,420,000.

Twenty-four new employees are hired in **1986**. OK Class service is initiated on all remaining international routes as the carrier adds an Il-62M and retires an Il-62. Orders remain outstanding for the 7 Tu-154Ms. A new route is opened to the resort community of Split and the SITA departure and weight-and-balance control system is implemented at Prague.

Customer boardings ascend 2.5% to 1,251,000, but cargo continues its upward push, rising 14.5% to 58.3 million FTKs.

Airline employment is increased by 0.4% in **1987** to 5,562. Passenger boardings ascend 9.4% to 1,367,896 and freight rises 8% to 62.97 million FTKs.

The workforce grows another 1.5% in **1988** to 5,644. Beginning in April, 3 new Tu-154Ms join the fleet, which now also includes 12 Tu-134As, 2 Il-18s, and 6 Yak-40s. The Tu-154Ms initiate new service to Bangkok.

Customer bookings jump 5.9% to 1,448,900. Cargo climbs 4.5% to 65.78 million FTKs.

The payroll inches upward by 0.7% in **1989** to 5,648 as 3 more Tu-154Ms are delivered; the last 2 Il-18s are retired. Following the year's political upheaval, the government withdraws its subsidy to the state-owned airline. The company is now able to look to the West for support and reequipment, requesting its first foreign airliners in 40 years.

Passenger boardings ascend by 2.9% to 1,490,667, but freight is up only a meager 0.5% to 66.09 million FTKs.

Company employment grows by 3.5% in **1990** to 5,658. The last of 18 Il-18s in service is retired in January. Early in the year, CSA begins to look for a foreign equity partner.

New services are initiated to Hamburg and Mexico City during the summer. Negotiations are completed on September 21 between CSA and the Austrian trading company Aircom Luftfahrthandels for the latter's purchase of some of the carrier's Soviet-made airliners. About the same time, CSA begins code-sharing flights with **Austrian Airlines, A.G.** between Prague and Vienna.

During the fall, the number of Prague to Paris weekly roundtrip flights is increased from five to seven. The carrier joins the Airlines Reporting Corporation on December 3 and is no longer required to use **Pan American World Airways (1)** as its general sales agent in the U.S. The company's first Western-built aircraft, an Airbus Industrie A310-304, is delivered later in the month as Miroslav Ehl becomes director of U.S. operations, succeeding Miroslav Belovsky.

Recession intrudes on the carrier and forces its traffic to decline. Customer bookings drop 15.5% to 1,259,400 while cargo slides 12.1% to 16.76 million FTKs.

The payroll is sliced 28.4% in **1991** to 4,126 and the fleet now includes, save the Airbus, an all-Russian fleet of 2 Ilyushin Il-62s, 6 Il-62Ms, 7 Tupolev Tu-134As, 7 Tu-154Ms, and 6 Yakovlev Yak-40Ks.

A second A310-304 is received on February 14 and is christened *Praha*; both units are placed into service. The *Praha* begins flying from Prague to Milan on February 17 while her sister launches weekly Prague to New York via Montreal flights on March 4.

Other Airbus destinations visited during the spring include Kuala Lumpur, Singapore, Bangkok, and Jakarta. Orders are placed for 5 B-737-55Ss and 4 Avions de Transport Regional ATR72s. Service is initiated in June from Prague to Tel Aviv.

At the same time, the company resumes flying to the U.A.E. destinations of Abu Dhabi and Dubai, which service had been halted just before the outbreak of Operation Desert Storm in January.

On July 1, an Il-62 is wet-leased to **Malev Hungarian Airlines**; it is painted in the colors of the client carrier.

Thrice-weekly roundtrip flights are inaugurated on October 27 between Prague and New York (JFK); two flights are direct and one includes a stop at Montreal. Closed for a decade, the Chicago office is reopened in the fall. A huge new Cargo 2 warehouse is opened at Prague in December.

Passenger boardings slide another 24.2% to 974,500, but freight increases 47.6% to 31.3 million FTKs. Revenues of \$220.4 million exceed expenses and provide a \$7.2-million operating profit.

The workforce inches up 1.8% in **1992** to 4,200 and the fleet is increased by the addition of 4 ATR72-202s and 5 B-737-55Ss. The latter become conveniently available when **Sabena (Belgian World Airlines, S.A.)** cancels its order for them on March 24. The \$114-million Boeing package is a 12-year lease, paid for through the issue of notes bearing a prime fixed annual interest rate and backed by the U.S. Export-Import Bank and the Czech government.

Weekly Saturday service is added to the Prague-Montreal route on March 29 and Monday service on the same run from Montreal to Chicago begins on May 4. Meanwhile, on April 15, the first ATR72-202 is placed into short-haul service out of Prague. An agreement is reached with **THY Turkish Airlines (Turk Hava Yollari, A.O.)** at the end of April for joint flights between Prague and Istanbul.

A second Chicago frequency, Wednesday, is started on June 3.

New markets are also initiated at Dusseldorf, Riga, Lvov, Manchester, and Riyadh. In July, a pooling of aircraft orders with **Air France** and **Sabena (Belgian World Airlines, S.A.)** is announced; the western majors are able to transfer their surplus orders to CSA, which badly needs new aircraft.

With guidance and assistance from the J. P. Morgan Bank in London, the carrier is privatized in October and it is announced that **Air France** will lead a consortium that will acquire a 32.8% stake. Under a memorandum of understanding signed between the two carriers and subject to approval by the two governments, the French carrier will contribute \$6 million in cash and \$14 million in payments-in-kind assistance in catering, engineering, pilot training, and maintenance. The remainder of the \$60-million shareholding will be acquired by the London-based European Bank for Reconstruction and Development, headed by Chairman Attali's twin brother Jacques, and the Caisse des Depots et Consignations; each will expend \$20 million.

The remainder of the East European carrier, valued at \$150 million and the first to find a Western shareholder, is divided between the Czech government (49.28%), the leading Czech insurance company (4.5%), and local Czech communities (mainly Prague, Bratislava, Kosice, and Poprad) the remainder. The new owners pledge the funding necessary to begin modernization of the Czech airline's aging fleet, while **Air France** is also contracted to provide maintenance, pilot training, and other technical assistance.

The number of frequencies from London (LHR) to Prague are increased under **Air France** sponsorship to 13 per week. During December, the carrier's newly received ATR72-202s expand the regional network by launching roundtrip flights from Bratislava to Kosice and from Bratislava to Tatra and Poprad, as well as from Silac to Prague.

Customer bookings recover and grow by 15.6% to 1,078,160, while cargo drops 5.2% to 27.3 million FTKs.

In **1993**, the new president, Jan Fiker, and George Vajdovsky, his managing director and **Air France** executive, make no changes in their payroll. The fleet now includes 6 Il-62Ms, 5 each B-737-55Ss and Tu-134As, 4 each ATR72-202s and Tu-154Ms, and 2 each Il-62Ms and A310-304s. Following the division of the Czech and Slovak parts of Czechoslovakia into separate republics in January, the company acquires an equity stake in the regional airline **Tatra Air, A.G.** A joint roundtrip, weekday ATR42-202 service is opened in cooperation with **Eurowings RFG & NFD, GmbH**, in April between Prague and Munich.

A block-space agreement is signed with **LOT Polish Airlines, S.A.** in August covering 12 to 13 weekly ATR72-202 return flights on the route from Prague to Warsaw; a similar arrangement is inked with **Deutsche Lufthansa, A.G.** in October for services between Prague and Munich.

Passenger boardings climb 6.3% to 1,146,111, but freight is down 10.8% to 24.35 million FTKs. Losses are recorded: \$39.11 million (operating) and \$28 million (net).

Airline employment is reduced by 7.3% in **1994** to 3,894 and the fleet is cut by 3 Il-62Ms. In light of the previous year's heavy loss, a crisis erupts in January between the Czech government and **Air France**, which seeks financial compensation from it, contending that it overpaid for its 19.1% shareholding in the Czech carrier. The AF representative

on the CSA board, Managing Director Veydovsky, resigns at the same time that the government not only forces CSA President Jiri Fiker to resign in favor of Antonin Jakubse, but begins to seek an investor to buy out **Air France**, which does not really want to sell.

During the month, shareholders approve a restructuring plan that includes aircraft sales and route cutbacks, and the government, responding to the airline's request, orders **KLM (Royal Dutch Airlines, N.V.)**, **Swissair, A.G.**, and **Deutsche Lufthansa, A.G.** to curtail their flights into Prague.

On March 2, a new cargo terminal is opened at Prague. It is connected to the airport's Intercom internal communication system and the Sita Air Cargo booking system.

Late in April, **Air France** sells its 19.1%, 52,000-share interest to the Czech banking group Konsolidacni Banka (Consolidated Bank). Although the two companies pledge to continue cooperation in some commercial, airport handling, catering, and computerized service areas, the AF directors on the CSA board are withdrawn, along with all French executives and technicians.

The company, now the flag carrier of the Czech Republic, adopts a new corporate image and livery and plans are made to change the company's name to **CSA Czech Airlines, A.S.** on March 26. Flights from Prague are maintained to 5 domestic cities, as well as internationally to 50 destinations on 4 continents.

In April, an alliance is entered into with **Iberia Spanish Airlines (2) (Lineas Areas de Espana, S.A.)** covering joint service on routes from Prague to Madrid, Barcelona, and Palma de Mallorca. The following month, a block-space agreement is signed with **KLM (Royal Dutch Airlines, N.V.)** for service from Prague to Amsterdam.

Enplanements for the year jump 8.2% to 1,239,693, but freight is off by 10.3% to 21.85 million FTKs. Revenues jump 16.6% to \$244.85 million and, although they are down by 1.4%, expenses still reach \$245.6 million. Consequently, there is a \$757,000 operating loss. On the positive side, there is a net profit of \$4 million.

There is an unofficial website at <http://solid.csa.cz/ANGL/history.htm>.

CTA GENEVA, S.A. See **COMPAGNIE DE TRANSPORT AERIENNE, S.A.**

CUBA AEROPOSTAL, S.A.: **Cuba (1948–1961)**, CA is set up at Havana on August 16, 1948 to operate all-cargo services around the island. Three Curtiss C-46 Commandos are acquired and revenue flights commence on May 3, 1949 over a route to Nueva Gerona.

Unheralded flights continue until June 1961 when the carrier is taken over by **Cubana (Empresa Consolidada Cubana de Aviacion, S.A.)**.

CUBANA (COMPANIA CUBANA DE AVIACION, S.A.): Cuba (1945–1959). **Cubana (Compania Nacional Cubana de Aviacion, S.A.)**, a wholly owned subsidiary of **Pan American Airways (PAA)**, is renamed in the fall of 1945. Plans are now made to allow Cuban interests to acquire shareholding and, on December 31, private local concerns and citizens purchase 48,000 shares or 48% interest.

Although the Ford 5-AT-40 is sold to Air Tours of Put-in-Bay, Ohio, on July 26, 1946, it will end its days with **Johnson Flying Service** of Montana in 1953. Paralleling in reverse the original 1927 **Pan American Airways (PAA)** inaugural route, the carrier, now employing the Cubana marketing name, launches its first international service on May 15, 1946, Havana–Miami. The fleet in 1947 comprises 12 Douglas DC-3s.

Cuban interests gain 52% majority control of the carrier on April 5, 1948, although **Pan American Airways (PAA)**, as principal minority owner, continues strong administrative and technical support. Employing a DC-4 leased from its former parent and christened *Estrella de Cuba*, Cubana initiates transatlantic Havana–Madrid service via the Azores on April 26. **Pan American Airways (PAA)** delivers a second DC-4, *Ruta da Colon*, later in the fall. Five additional DC-4s are acquired in 1949.

The holding by Juan Trippe's carrier insures award of a U.S. air-mail contract on February 15, 1950 and DC-4s now replace DC-3s on the Miami frequencies. A DC-3 is lost in dense fog at Holguin, Cuba, on November 25; although the aircraft must be written off, there are no fatalities.

Shareholding by **Pan American World Airways (1)**, as the American major is now known, is reduced to 42% on March 31, 1951.

En route from Havana to Miami on April 25, a DC-4 with 5 crew and 34 passengers collides off Key West with a USN Beech SNB with four crew, which is on an instrument training mission; both aircraft go down and there are no survivors.

On June 3, a joint **Transocean Air Lines (TAL)** and **Loftheidir, H.F./Icelandic Airlines** U.S. to U.K. charter flight, with British war brides and children aboard, is rerouted via Cuba and France. The U.K. has refused the TOAL DC-4 a landing permit, acting under a CAB rules limiting charter flights to educational and religious groups. At Havana, the charter is shifted to Cubana, which is allowed to fly to the U.K. on June 7.

On January 1, 1952, a CAB ban on New York to Havana flights by Cubana is lifted. A DC-4 with 5 crew and 32 passengers en route from Madrid to Havana on December 6, crashes in the Atlantic Ocean, 2 miles off Kindley Air Base, Bermuda (37 dead).

Cuban interests take 80% shareholding on April 7, 1953. Meanwhile, long-haul and regional route expansion from Miami to Varadero Beach begins January 23, Havana to New York, reciprocal with **National Airlines**, on May 1, Havana to Mexico City via Merida on September 17, and Havana to Port-au-Prince on November 28. Two ex-**Pan American World Airways (1)** Lockheed L-049s are purchased during the summer and are placed in service on the Mexico City route in the fall.

A C-46A is lost at Rando Boyeros on May 17, 1954; there are no fatalities, but the aircraft must be written off.

On July 23, Juan Trippe's airline sells its last shares and ends its 22-year sponsorship. To avoid the adverse publicity surrounding the major's pull-out, Cubana launches a large advertising campaign in the U.S. aimed at luring travelers who might gravitate to other Cuba-bound American-owned airlines.

A Lockheed L-1049E is leased from **Pan American World Airways (1)** and placed on the Madrid and Mexico City routes while orders are placed for 3 new L-1049Gs and 12 Curtiss C-46A/D freighters. A second L-1049E is purchased and this is delivered from Los Angeles to Havana on November 22 in a record 7 hrs. 20 min. On December 1, it, too, begins flying from Havana to Madrid via Bermuda, Santa Maria in the Azores, and Lisbon.

The first C-47A/Ds join the fleet in 1955, providing all-cargo services to Miami and other destinations. The new L-1049E also begins to fly to New York and Mexico City. Two L-049s are sold to **El Al Israel Airlines, Ltd.** in October and 3 British-built Vickers Viscount 755s are ordered in December.

The first of 3 L-1049Gs to arrive in 1956 is delivered on February 20. The Super Connies are placed on the Madrid and Mexico City services on March 14 and are employed to launch nonstop, daily flights to New York on May 12. The Viscounts arrive simultaneously and enter operations on May 25. Additional orders are sent to Vickers in the fall as the leased **Pan American World Airways (1)** L-1049E is returned and the owned L-1049E is sold to **Seaboard & Western Airlines**. Former General Manager Juan M. Palli Diaz becomes president at year's end.

Five Viscount 818s are introduced during 1957. Early in the year, President Palli Diaz hires top artists to provide nightclub-style entertainment as an inducement on the Thursday evening L-049 Havana–Miami service; the publicity and load factors gained by "The Tropicana Express" are significant. The Viscount 755s begin to arrive in late spring and are placed on the Miami route beginning in August.

On April 4–5, 1958, 16 Cubana pilots seek political asylum in Miami after refusing to fly guns for President Batista's army. Four days later, the first in a series of revolution-related skyjackings will occur as a DC-3, en route from Havana to Santa Clara, is diverted to Merida, Mexico. The plane and its hostages are returned next day.

On April 13, the crew of a DC-3 with 25 passengers en route from Havana to Santa Clara defects with the aircraft to Miami. There they seek political asylum, complaining that the Cuban government is ordering them to fly over combat areas. Four Bristol Britannia 318s are ordered in August.

On October 22, a DC-4 en route from Cayo Mambi to Moa Bay with 14 passengers is seized by several of Fidel Castro's rebels. Although the pilot is shot and wounded and the Douglas is diverted to Florida, all of the hostages and the aircraft are later released.

Flight 495, a Vickers Viscount 755D with 4 crew and 17 passengers en route from Miami to Veradero, Cuba, on November 1, is hijacked by 5 Cuban rebels. In the evening, the aircraft is observed circling near Antilla in Oriente province, as it prepares to land at Preston Airport. Out of fuel, the turboprop, instead, crashes into Nipe Bay, 1,300 ft. offshore (18 dead).

A DC-3 with 25 passengers is hijacked five days later while on a scheduled flight from Manzanillo to Holguin and is held for awhile at a rebel airstrip before the hostages are released. This latest skyjacking results in the cancellation of all Cuban domestic airline services.

It is announced on November 24 that the carrier will feature bingo games on its Havana to New York and Havana to Mexico City flights. The first Britannia 318 arrives in time to begin Mexico City service on December 22. Meanwhile, orders are placed for 2 Boeing 707-138Bs.

The second Britannia 318 starts Havana–New York service in January 1959 while Fidel Castro takes control of the government on February 16.

Four anti-Castro men seize a DC-4 on April 16 and force the pilot to divert it from its domestic flight to Miami.

On April 25, a Vickers Viscount 755D with 16 passengers en route from Veradero to Havan, is seized by 4 passengers, one of who was a top general to former president Batista, and two women, who have hidden pistols under their skirts. The skyjackers demand to be flown to Miami, but because of the turboprop's low fuel supply, settles for a diversion to Key West. On May 25, Cubana is nationalized and given its present name.

CUBANA (COMPANIA NACIONAL CUBANA DE AVIACION, S.A.): Cuba (1932–1945). Pan American Airways (PAA) purchases **Compania Nacional Cubana de Aviacion Curtiss, S.A.** from North American Aviation Corporation on May 6, 1932 and renames it, dropping the word Curtiss not only to show ownership change but to allow for an easier company abbreviation—CNAC. All of the non-Ford aircraft previously employed are discarded throughout out the remainder of the year and 1933.

On January 16 of the latter year, one of the last company-owned Curtiss C-1 Robins, with a pilot and four passengers, is forced down at sea. The wreck is sighted by both a Cuban Air Force aircraft and a PAA search plane. All five are rescued by a Cuban gunboat the next day.

In an episode usually attributed to **Chalk's International Airlines** with embellishments, Cuban dictator Gen. Gerardo Machado peacefully departs Havana's Rancho Boyeros Airport on August 12 aboard a Sikorsky S-38 piloted by the carrier's chief pilot, Capt. Arthur Lee, who had been seconded, along with the amphibian, from PAA.

The first of 5 ex-Pan American Airways (PAA) Lockheed Model 10A Electras joins the fleet late in 1934. With all five machines in hand, the Fords are replaced on the primary Cuban Air Limited Havana–Santiago multistop route on July 29, 1935. The 5-ATs are, however, retained on secondary segments, including a Santiago–Baracoa extension christened the Oriente Flyer.

Pan American Airways (PAA) turns over the Ford 5-AT-27 on November 30, 1936; it will be followed into service by another Tri-Motor no longer required by Juan Trippe's line, the 5-AT-40, which arrives on June 15, 1938. The entire Cubana route network is integrated by 1939 and linked to the American parent's international network.

An ex-Pan American Airways (PAA) Lockheed Model 12 is introduced in 1940. A Ford 5-AT is leased to newly established **CDA (Compania Dominicana de Aviacion, S.A.)** in 1944. In March 1945, 2 for-

mer military C-47s, reconfigured to civil DC-3 standard, are placed in service. In the fall, the carrier's name is changed to **Cubana (Compania Cubana de Aviacion, S.A.)**.

CUBANA (COMPANIA NACIONAL CUBANA DE AVIACION CURTISS, S.A.): Cuba (1929–1932). On October 8, 1929, through its **International Aviation** subsidiary, North American Aviation Corporation establishes **Compania Nacional Cubana de Aviacion Curtiss**. Employing 2 Curtiss C-1 Robins and 1 Curtiss Thrush plus 3 ex-Eastern Air Transport Ford 4-ATs (Dash-63, Dash 69, and Dash-70), Cubana begins multistop Havana–Santiago domestic flights—Cuban Air Limited—on October 30, 1930. On December 10, one of these crashes in mountainous terrain while en route from Santiago to Havana (four dead).

Travel Airs plus 2 ex-Pan American Airways (PAA) Sikorsky S-38Bs are placed in service during 1931. The carrier is purchased by Juan Trippe's carrier on May 6, 1932 and renamed **Cubana (Compania Nacional Cubana de Aviacion, S.A.)**.

CUBANA (EMPRESA CONSOLIDADA CUBANA DE AVIACION, S.A.): Calle 23 Pt 64 Vedado, La Rampa, Havana 4, Cuba; Phone 53 (7) 784 961; Fax 53 (7) 793 333; <http://www.cubana.cu>; Code CU; Year Founded 1959. Following the overthrow of the previous Cuban regime by Fidel Castro in February 1959, **Cubana (Compania Cubana de Aviacion, S.A.)** is nationalized on May 25 and given its present name. In June, a third newly received Bristol Britannia 318 is placed on the Madrid route as the New York run becomes all-Britannia. The fourth Bristol joins the fleet on August 25.

Three passengers on a domestic Vickers Viscount 755D, with 34 other passengers en route from Havana to Santiago, force the pilot to fly them to Miami on October 2. On October 22, 45 Cubana employees at New York (IDL) stop work for an hour to show their loyalty to the new Castro government.

The year closes with the airline—and the nation—in financial difficulty.

Financial problems mount in 1960. One Britannia 318 is leased to **Eagle Airways, Ltd.** and 2 undelivered B-707-138Bs are chartered to **Western Airlines**. The 5 Viscount 818s and 3 Lockheed L-1049G Super Constellations are put up for sale.

The pilot, two crew members, and a passenger of Flight 800, an L-1049G, defects at Miami on April 12 after the pilot burns out the plane's engines upon landing.

As of July 1, those companies whose oil refineries have been seized by Cuba, bar Cubana's Havana–Madrid flight from refueling at Bermuda; as a result, Castro's airline must abandon the service. A rash of hijackings continues.

Four days later, a Britannia 318 en route from Havana to Madrid is hijacked by two members of its crew and diverted to Miami. On July 17, the pilot of a Vickers Viscount 755D en route from Havan to Miami, takes over his own aircraft and diverts it to Jamaica. With their families (two women and two children) in place to greet them when they arrive in Miami, a DC-3 is taken over on July 28 by its captain, with the aid of two passengers, and diverted to Florida from a scheduled service to Antilla.

Lack of service payments leads to the impoundment of several aircraft. On September 16, a Britannia is seized in New York in connection with the Harris Outdoor Ad Company's suit to recover \$237,000 in lost advertising revenues. The Cuban tourist committee reports the Harris bill paid on September 18, but it is not. Two days later, a second aircraft, a DC-4, is seized at New York, followed by another Britannia on September 21, the latter as the result of O. Manalich's desire to protect its holdings in Cubana.

On September 24, the Harris firm bills Castro for its advertisements in the journal *El Diario*. Four days later, Castro is forced to visit the UN and return home aboard an **Aeroflot Soviet Airlines** aircraft. The Cuban delegation protests to the U.S. State Department and seeks a court order freeing its impounded aircraft. Meanwhile, Cuba sues Harris for \$3 million in damages, denying it owns the firm a debt. On September 29, one aircraft is freed on the grounds of diplomatic immunity.

A DC-4 with 36 aboard en route to the Isle of Pines on October 29, is diverted to Key West, Florida, after the copilot and 8 passengers kill an airliner guard and 3 others in a gun battle. The next day, the 9 hijackers win a hearing on their bid for political asylum while the other 26 passengers are allowed to return with their aircraft to Cuba. The second impounded aircraft is freed on November 9, but litigation continues.

An L-049 Constellation, which has been acquired by **Trans-European Aviation, Ltd.** and is en route to London, is attached at Charlotte, North Carolina, on January 27, **1961**, in the name of refugee Jacob Shapiro, who claims Cuba has nationalized his hosiery mill, valued at \$750,000. TEA never receives this aircraft.

Although the Madrid route is maintained, national political confrontation with the U.S. now results in abrupt termination of flights to America. Citing American "hostility," the company ends its Havana to Miami and New York service on February 10. Having by now forged close ties to the Eastern bloc, Cubana, also in February, signs an agreement with **CSA Czechoslovak Airlines** to operate its Britannias, in CSA livery, on Cuban's behalf over a new multistop Havana-Prague route that begins on March 1.

On April 20, the Florida Circuit Court denies an appeal against the sale of five aircraft as part of the assets sold in a 1960 damage award to Harris Outdoor Ad Company for its unpaid advertising fees. Havana to New York service is resumed on April 25, followed by the restoration of flights to Miami from the Cuban capital on May 6.

En route from Havana to Veradero on July 3, a DC-3 with 20 passengers is commandeered by 11 men and 3 women. A security guard is shot and wounded in the takeover, with the Douglas transport subsequently flown to Miami.

Three planes flown into the U.S. on July 4 are seized to satisfy the Harris claim. On August 2, the State Department advises Cuba that, to prevent the sale of the planes seized a month earlier, it must request diplomatic immunity for them.

The Cuban government, on September 15, cancels over 15,000 reservations held by Cubans for flights to the U.S., purportedly to end ticket speculation. A new procedure is established for obtaining seats. In October, the U.S.S.R. delivers the initial 5 of 11 ordered Ilyushin Il-14s, which are placed on the country's domestic routes. On November 4, the State Department seeks a permit to intervene in the litigation over Harris's seizure of Cuban airliners to satisfy its judgment against the Castro government; Washington holds that the aircraft are immune to seizure.

An Il-14 with 4 crew and 18 passengers fails its initial climb away from Santiago de Cuba on March 27, **1962** for a flight to Havana; there are no survivors from the subsequent crash.

As replacements for the British turboprops, Cubana receives as a transfer from **Aeroflot Soviet Airlines** the first 3 of 5 requested Il-18s and an Antonov An-12 in late fall; they are placed in service from Havana-Mexico City and other regional destinations.

During **1963**, the company begins a 5-year effort to replace almost all of its American and British aircraft with Soviet, including 12 Il-14s, 1 Antonov An-12, 7 Il-18s, and 10 An-24s.

On September 17, **1964**, the company receives permission from the **British Overseas Airways Corporation (BOAC)** to begin Havana to Nassau weekly service. Both the U.S. and Bahamian governments seek to persuade the British not to grant landing rights; however, the British report that Cubana has received its route under a 1948 agreement.

When the first Cuban airliner arrives at Nassau on September 21, a crowd is present to jeer its passengers and crew. After the U.K. rejects a formal Bahamian request of September 25 to void the 1948 pact, Cubana ceases services to the island next day. A Britannia is attached at Montreal on October 15 by **World Wide Airways, Ltd.**, seeking to recover C\$953,858 in claims against the Cuban government; the aircraft is released under a C\$1-million surety.

Operations proceed without undue incident in **1965**. Two bloody hijackings, one successful and one not, occur in **1966**.

En route to Havana from Santiago on March 27, an Il-18V with 91 passengers is the subject of the first attempt. The flight engineer takes

over the aircraft, killing a security guard in the process. Under cover of darkness, the plane is landed at what the hijacker initially believes is Miami, but which is, in fact, Havana's Jose Marti Airport. When he learns of the ruse after landing, the pirate kills the pilot and wounds the copilot, forcing the Ilyushin to swerve off the runway into a fence. The hijacker escapes, but is captured two weeks later and executed.

On July 8, an Il-18V bound to Havana from Santiago is hijacked by nine Cubans, including the pilot, who fly the plane to Jamaica and seek asylum. The copilot, who had been shot, an injured crewman, and the plane are returned to Cuba the next day.

An Il-18B is lost near Cienfuegos under unknown circumstances on July 10.

The first of 12 Antonov An-24s are delivered during the second half of the year.

The carrier's lone An-12 with 10 aboard explodes just after landing at Mexico City on February 9, **1967**; there are no survivors. The world press speculates that the disaster has been caused by a bomb placed aboard by anti-Castro elements. The first of the An-24s is now received. Although all transatlantic flights stop during **1968-1969**, regional services are maintained.

Operations continue apace in **1970** and, on June 21, **1971**, Havana to Santiago de Cuba flights begin. While on a July 12 domestic flight from Havana to Cienfuegos, two men attempt to hijack Flight 740, an Il-14, but when faced with failure, they drop a live grenade that explodes, killing one passenger and wounding three others. In the confusion, the pirates are subdued and the plane lands safely.

All of the company's remaining C-46 Commandos are sold during August-October **1972**. Cuba and Guyana sign an agreement on July 1, **1973**, that links company services with Africa through Guyana and the Caribbean.

The first pure jetliner to be received since the revolution is an Ilyushin Il-62, which begins Havana-Madrid flights in November **1974**. Cubana begins weekly roundtrip flights between Havana and Panama City on July 27, **1975**. The last of 12 An-24s is delivered during the fall.

On March 18, **1976**, Flight 455, a DC-8-43 leased from **Air Canada, Ltd.**, with 16 crew and 13 passengers, collides in midair near Havana with a company An-24B with five crew out on a training flight. The Antonov crashes and there are no survivors. The Douglas, meanwhile, suffers the separation of the outer portion of its wing, including an engine, but is able to land safely with no serious injuries reported.

On October 6 there is another in-flight bomb explosion. Flight 455, a DC-8-33 also leased from **Air Canada, Ltd.**, with 15 crew and 57 passengers en route from Georgetown, Guyana, to Kingston, Jamaica, via Barbados, crashes into the sea 5 mi. W of Bridgetown, Barbados, shortly after takeoff from Seawell International Airport. The El Condor exile group claims responsibility for this terrorism. It is later claimed that the infamy is masterminded by U.S. CIA-trained Bay of Pigs veteran Luis Posada Carriles and carried out by his expert bomb-making associate Hernan Ricardo Losano, who is arrested in Venezuela. Years later, the pair will be jailed in Venezuela for their participation in the tragedy. Deon E. Phillips reviews the incident in his "Terrorism and Security in the Caribbean: The 1976 Cubana Disaster Off Barbados," in *Terrorism* 14 (Fall 1991): 209+.

Airline security is increased on November 1, but, six days later, Cubana's Madrid office is bombed. Heavy damage is caused, but there are no casualties.

From **1977-1982**, the fleet is increased by the addition of 7 Il-62Ms, 5 Tupolev Tu-154s, 1 Il-76, 7 Yak-40s, and 6 An-26s. Five Il-18s and 6 Il-14s are retired. However, as late as 1978, General Manager Julio Rodriguez and his 1,775 employees still include the Canadian DC-8-43 and 3 Britannia 318s among their flight equipment.

In addition to the maintenance of a 15-point domestic network, long-haul services are started to Montreal with Tu-154s, and East Berlin, Prague, Paris, Madrid, Luanda, Maputo, Sal, and Tripoli with Il-62s. The Yak-40s, Il-18s, and An-26s fly to Barbados, Georgetown, Kingston, Lima, Managua, Panama City, and Port of Spain.

A Yak-40 with 4 crew and 33 passengers crash-lands at Baracoa on February 3, 1980 (one dead). While on a training flight on May 13, an Il-14 with three crew crashes into the sea 500 yards off Varadero; there are no survivors.

On March 4-5, 1983 the daily Cubana flights from New York (JFK) deviate from their flight plans toward Griffis AFB, near Syracuse. As a result, on March 25 the carrier is banned from U.S. airspace for two weeks by order of the State Department. Three days later, the carrier apologizes for its two violations in air traffic routing. There are no further problems during the remainder of the year or in 1984.

Enplanements in 1985 total 894,000, excluding troops ferried to Africa.

During the climb away from Havana on January 19, the pilot of an Il-18D with 5 crew and 33 passengers loses control. The turboprop crashes while he attempts to recover and land on a highway near San Jose de Las Lajas; there are no survivors.

The boarding figure climbs to 912,127 in 1986.

While on its takeoff roll from Havana's Jose Marti Airport on March 10, 1987, for a scheduled service to Nueva Gerona, on the Island of Pines, an An-24, with 48 passengers, is subjected to an attempted hijacking. The assailant is armed with a hand grenade and demands to be flown to the U.S. When the pilot refuses, the pirate drops a grenade, which explodes wounding 13 persons. In the confusion, an off-duty policeman comes forward and shoots the skyjacker dead.

Enplanements for the year drop back by 1.6% to 889,013.

The workforce is increased by 4.5% in 1988 to 4,600. In late summer and fall, Hurricanes George and Mitch cause great damage throughout Central America and the Caribbean. Cuban medical brigades and relief supplies are transported to Guatemala, Haiti, Honduras, and Nicaragua in Cubana aircraft placed at the disposal of the government.

Despite the weather, passenger boardings for the year jump 8.4% to 963,881 and freight is ahead by 9.1%, 27.81 million FTKs.

Company employment grows by 28.9% in 1989 to 6,007, as General Director Rolando Teutelo orders 4 Yak-42Ds for his short- and medium-haul operations.

Just after takeoff from Havana for Berlin in heavy rain on the night of September 4, an Il-62M with 11 crew and 115 passengers is caught in downdrafts that force it to hit a navigational aerial and then crash into a residential area. All aboard the jetliner are killed, along with 45 people on the ground. The event will remain Cuba's worst airline disaster.

The first of 2 ordered Yak 42D arrives in Havana on September 14 from Russia via Shannon, Ireland.

Customer bookings swell 6.1% to 1,212,345, but cargo is down by 13.5% to 37.19 million FTKs.

Employment remains the same in 1990 and the fleet includes 12 Il-62Ms, 9 Tu-154s, 8 Yak-40s, 12 An-24s, 26 An-26s, 4 Il-18s, and 2 Il-76s.

An An-26 with 41 passengers fails its takeoff from Santiago de Cuba on March 20 and crashes; the aircraft is burned out and there are no survivors.

While on initial approach to Punta Jardinero on a nonscheduled service from Camaguey on October 24, Flight 2886, a Yak-40 with 7 crew and 24 passengers, strikes the ground 4 km. short of the runway at a speed of 280 km./h. (11 dead).

Enplanements fall to 1,137,481 and freight is down 40.2% to 11 million FTKs.

The company enjoys a good year in 1991. In March, discussions are undertaken with VASP Brazilian Airlines (Viacao Aerea Sao Paulo, S.A.) concerning an eventual joint operation of routes to Canada and Europe. The second new Yak-42D is delivered in July, replacing on passenger routes the last of the Il-18s, which are now converted into freighters. Five Yak-40s are also added.

A Tu-154B-2, with 12 crew and 100 passengers, lands too far down the runway at Mexico City on September 14 and goes off the end, sustaining massive damage. No fatalities are reported.

Passenger boardings inch up 1.5% to 1,154,803 while freight rises 28% to 55.83 million FTKs.

Airline employment stands at 5,000 in 1992. On January 3, German Pompa, a Cuban military pilot assigned to ferry tourists in the Varadero Beach resort east of Havana, hijacks one of the airline's Mil Mi-8 helicopters from Varo Daro Airport. He flies himself and 34 other defectors to Tamiami Airport near Miami. All aboard receive political asylum and the helicopter is allowed to return to Cuba five days after its arrival.

Statistics are reported through October and show customer bookings down 9.2% to 876,449. Cargo, on the other hand, increases 22.3% to 35.16 million FTKs. Revenues total \$237.5 million, but expenses are higher. Consequently, Cubana suffers an operating loss of \$8.3 million and a net loss of \$6.1 million.

In 1993, General Director Heriberto Priego oversees an entirely Soviet built fleet that consists of 12 Antonov An-24RVs, 25 An-26s, 4 Il-18s, 12 Il-62Ms, 1 Il-62MK, 4 Il-76MDs, 4 Tu-154B-2s, 4 Tu-154Ms, 8 Yak-40s, 1 Yak-40F, and 4 Yak-42s.

Markets served from Havana include not only domestic communities but such international destinations as Basel, Berlin, Bonn, Brussels, Buenos Aires, Cancún, Frankfurt, Helsinki, Kingston, Lima, Lisbon, London (STN), Luanda, Madrid, Managua, Mexico City, Milan, Montreal, Moscow, Panama City, Paris, Quebec, Santiago de Chile, Toronto, and Vienna.

On January 1, pilot Carlos Cancio Porcel diverts his Yak 40, with 48 relatives and friends aboard, to Miami. With Cuba a popular holiday destination for Brazilian tourists, Cubana launches, in the fall, twice-weekly Il-62M roundtrips from Havana to São Paulo.

Passenger boardings for the year as a whole decline another 11.2% to 901,645.

Six Fokker F27-600s and a Douglas DC-10-30 are received from Aviacion y Comercio, S.A. (AVIACO) of Spain in early spring 1994. At this point, a new color scheme is introduced. The Douglas wide-body is immediately assigned to the carrier's Havana to London service.

Customer bookings inch up 1.1% to 911,519, but cargo accelerates by 19.3% to 37.21 million FTKs.

The carrier's 88 airliners transport a total of 1,035,883 passengers in 1995, a 13.6% increase. Freight grows 17.3% to 43.65 million FTKs.

Airline employment stands at 1,100 in 1996. In addition to domestic markets, the company now also visits points in the Caribbean and Latin America, plus Basel, Berlin, Brussels, Cologne, Frankfurt, London, Moscow, Munich, Paris, and Prague.

The international airports at Holguin and Camaguey are upgraded and a \$25.5-million contract is signed with Intelcan Technosystems of Canada for the construction of a third terminal at Havana's Jose Marti International Airport. Funding to purchase Canadian goods and services to be employed in the task are advanced by that nation's Export Development Corporation.

The airline is subjected to two hijackings during the summer, both of which are successful.

While on a scheduled domestic service on July 7, an An-24 is taken over by a lone gunman, who orders the aircraft diverted to the U.S. naval base at Guantanamo Bay. En route from Havana to Varadero on August 16, a single-engine lightplane is seized by three men waving knives, who also order it to land at "Gitmo."

Customer bookings jump 12% to 1,159,890 and 58.27 million FTKs are operated, a 28.9% increase.

Destinations visited in 1997 include Baracoa, Barcelona, Bayamo, Berlin, Bogota, Brussels, Buenos Aires, Camaguey, Cancún, Caracas, Cayo Coco, Cayo Largo del Sur, Ciego de Avila, Fort de France, Frankfurt, Guantanamo, Guayaquil, Holguin, Kingston, Las Tunas, Lima, Lisbon, London (LGW), Madrid, Manzanillo, Mendoza, Mexico City, Moa, Montevideo, Montreal, Moscow, Nueva Gerona, Panama City, Paris (Orly Airport), Pointe-à-Pitre, Quito, Rio de Janeiro, Rome, San Jose, Santiago, Santiago de Compostela, Santiago de Cuba, Santo Domingo, São Paulo, Toronto, Varadero, and Vitoria.

It is reported by the Communist Party daily *Granma* on January 8 that the three state-owned airlines and service firms will be rolled into a

single corporation for the purpose of doubling passenger capacity and boosting airline earnings.

Just after takeoff from Santiago on a July 11 service to Havana, Flight 787, an An-24RV with 5 crew and 39 passengers, crashes into the sea off the southern coast; there are no survivors.

Traffic figures are revealed for the first quarter and show passenger bookings up 16.4% to 334,787, while freight climbs 10.8% to 14.61 million FTKs.

Services continue in **1998**, but not without cost.

While taking off from Quito, Ecuador, on an August 29 service to Havana via Guayaquil, Flight 409, a Tu-154M with 14 crew and 76 passengers, loses altitude. It clips the top of an auto mechanic's shop just beyond the runway, barely missing a middle-income residential area, before crashing into a soccer field. A total of 69 people aboard the aircraft and 9 on the ground are killed, with many others wounded, including children playing soccer.

With the cause of the crash still unsolved by September 10, the aircraft's flight-data and cockpit-voice recorders are sent to Moscow for analysis.

The carrier must cancel its domestic and international departures on September 25 when Hurricane Georges sweeps across the island.

On August 20, a \$30-million, 18-month aircraft, crew, management, and insurance (ACMI) contract is signed with Ireland-based **TransAer International, Ltd.** for the wet-lease of two Airbus Industrie A320-231s. The first aircraft, wearing dual TransAer and Cubana titles, arrives at Havana in early November and replaces Tupolev Tu-154Ms on regional services to Mexico City and Central America. The second aircraft will be delivered before the end of the year.

Flights continue in **1999**. Cubana and **TransAer International, Ltd.** come to an agreement in January, which is announced on February 7. The Cuban flag carrier will replace its leased DC-10-30 later in the year with a pair of A340s chartered from the Irish line.

On March 9, the U.K. Consumers' Association's magazine, *Holiday Which?*, releases a new survey of customer satisfaction from 20,000 airline travelers who have been asked which carrier they would recommend to a friend. Cubana is the worst-rated airline overall, with one in two passengers surveyed reporting they could not recommend it.

Thrice-weekly nonstop roundtrips are inaugurated on June 21 between Havana and Guatemala City.

The **TransAer International, Ltd.** contract is renewed in mid-August.

A code-sharing agreement is signed with **Aeroflot Russian International Airlines (ARIA)** on November 19. Under its terms, the Russian line is able to place its designator on Cubana flights into Latin America.

Employing a pair of DC-10-30s wet-leased from **AOM French Airlines, S.A.**, Cubana launches twice-weekly roundtrips on December 15 from Havana to both Rome and Milan. Weekly DC-10-30 return flights from Havana to Geneva begin the next day.

While landing on a slippery Runway 19 at Guatemala City following a December 21 service from Havana, Flight 261, a DC-10-30 with 18 crew and 296 passengers, slides off the end down a steep bank into 10 houses. Sixteen aboard the Jumbojet are killed, along with two people on the ground.

Four days later, on Christmas Day, another DC-10-30 with 12 crew and 10 passengers crashes into a San Luis hill while on approach to Valencia, Venezuela, on a service from Havana. This time there are no survivors.

Passenger boardings for the year total 1,259,000 and 1.63 million FTKs are operated.

As a result of the capacity problems caused by the December accidents, the new route between Havana and Geneva is dropped on January 24, **2000**.

Employing a B-767-3Q8ER and a B-777-2Q8 from its partner, the company begins dual designator service with **Air Europe, S.p.A.** on April 6 from Rome to Cayo Largo, Havana, and Santiago de Cuba and on April 22 from Milan to the same three destinations.

Arrangements are completed with **AOM French Airlines, S.A.** and one of its DC-10-30s is wet-leased to fly from Havana to Paris (CDG), beginning on June 5.

The failure of Ireland-based **TransAer International Airlines, Ltd.** on October 20 deprives the company of its A320-200s. Consequently, beginning on October 23, Ilyushin Il-62s are placed back into service on flights to Montreal and Toronto.

CUMBERLAND AIRLINES: United States (1964–1990). Originally founded by Alfred Nicholson at Cumberland, Maryland, in **1964**, this air taxi operator flies under the name of **Nicholson Air Service**. Nonscheduled and charter services are provided throughout western Pennsylvania and Maryland with a Piper Colt and a Piper Comanche. A Piper PA-23 Aztec is purchased in **1967**, allowing the initiation of scheduled flights to Baltimore.

This small regional enjoys a rather uneven success after joining the ranks of the nation's commuter airlines in **1975**, under the marketing name Cumberland Airlines.

Late in **1977**, **Nicholson Air Service** purchases Lake Havasu City, Arizona-based **Lake Havasu Airlines**, which is also operated as a subsidiary, **Havasu Airlines**. With a fleet of 2 Piper PA-31-310 Navajos, regular flights are offered to Latrobe, Pennsylvania, and Baltimore. Enplanements total 20,675.

In **1978**, passenger boardings rise 4% to 21,559; 246,651 pounds of freight is hauled. Customer bookings rise 16% to 24,933 in **1979**. The carrier's 16 aircraft also haul 514,000 pounds of cargo, a 108.2% increase.

In **1980**, **Nicholson Air Services** divides its operating subsidiaries into two divisions of the whole: an eastern division, Cumberland, and a western division, **Havasu Airlines**. These will have much in common, not the least of which are the statistics reported. The former provides scheduled services to Pittsburgh, Latrobe, Baltimore, and Ocean City. The latter provides the same to Phoenix, Bullhead City, and Las Vegas. The number of total employees is 37 and the fleet comprises 5 Navajos, 4 Piper Aztecs, 2 PA-31-350 Navajo Chieftains, and 1 Beech 99. Combined passenger traffic drops 30% on the year as 16,389 passengers are boarded on the year.

A total of 407,000 pounds of freight are transported in **1981**, as enplanements dip by 3% to 14,562. Most of the downturn is due to the summer PATCO air traffic controllers' strike and subsequent ATC restrictions. Destinations served by Cumberland now include Boston, Hartford, Springfield, Newark, Washington, Cumberland, Baltimore, Ocean City, Pittsburgh, Latrobe, Philadelphia, and Richmond.

This trend is reversed in **1982** as the enplanement rate grows by 61.4% to 23,509. Cargo also improves, rising 8.1% to 439,000 pounds.

A healthy traffic increase is also seen in **1983** as passenger boardings increase another 21.5% to 28,556. Freight increases 58.6% to 696,643 pounds.

These two years of progress are followed by a fatal accident and a slight traffic decline in **1984**.

While on approach to the airport at Cumberland, Maryland, on March 5, a Piper PA-31 with 3 passengers, crashes into a 776-ft. hill, 8.5 mi. from the runway; there are no survivors.

Customer bookings fall off by 1.8% to 9,565 passengers flown.

Passenger boardings recover nicely in **1985**, climbing 17.9% to 11,281. Cargo is now 328,000 pounds. In early July **1986**, Cumberland becomes a code-sharing partner of **World Airways**, employing 3 Piper Navajos to feed the major at Baltimore (BWI). The arrangement is short-lived and terminated once **World Airways** withdraws from scheduled services in September.

Traffic is down again and customer bookings fall 37.4% to 7,060.

Cumberland enjoys a return to health in **1987** as passenger boardings jump 17.4% to 8,290. A total of 140,180 pounds of freight are also flown. Following a pilot walkout in December, western division partner **Havasu Airlines** ceases operations.

The fleet of the 38-employee carrier includes 7 Piper PA-31 Navajos in **1988**. Customer bookings decline 5.7% to 7,816 and cargo plunges 62.5% to 53,000 pounds.

The financially troubled airline is purchased by Coastal Maine Holdings in early 1989. The new owners speak of employing the airline as the basis of a new commuter network, linking it up with **Braniff, Inc.** When this plan is not immediately implemented, creditors are able to force the regional's closing in October. Its 7 Navajos are repossessed by lessors or sold. To this point, the carrier has flown a total of 4,863 passengers, a decline of 25.8% over the same period a year earlier.

Cumberland manages to get back into the air in January 1990, but when Coastal Maine Holdings fails to make a required \$1-million payment to **Braniff, Inc.** in mid-March, the carrier is forced to shut down once more, ending scheduled service to Baltimore and small parcel flights to Pittsburgh. Additionally, the carrier's certification is suspended and the company flying school at Cumberland is closed.

Embarrassed, Coastal Maine's aviation consultant and former **Continental Airlines** President Martin Shugrue, now resigns. Airport officials at Baltimore serve notice of eviction because of overdue rent; company founder and first president Nicholson dies after a long illness. Meanwhile, the commuter's 7 Piper Navajos and light training aircraft, 18 machines in all, are repossessed for public auction by a Baltimore bank.

As if this climax is not sad enough, it is reported in early April that Beech Aircraft in Wichita, Kansas, has been given a \$250,000 down payment on a Super King Air 200 by Coastal Maine Holdings Chairman Anthony Steele. The check bounces and it takes the manufacturer a week to trace its aircraft to south Florida. Steele, who had earlier been convicted of loan-sharking in New York and was wanted in New Jersey for writing bad checks, is captured by Florida police, but released when New Jersey fails to pursue extradition.

Now unable to pursue its dream, Coastal Maine sells Cumberland to KPT Aviation, which makes plans to resume services. Despite strenuous efforts on the part of its owners to restart, Cumberland enters Chapter VII liquidation in November.

CUNARD-EAGLE AIRWAYS, LTD.: United Kingdom (1960–1963). On March 21, 1960, major shareholding in **Eagle Airways, Ltd.** is assumed by the Cunard Steamship Co., Ltd. Eagle founder Harold Bamberg receives a seat on the Cunard board and his former airline is transformed into Cunard-Eagle Airways, Ltd. On April 6, the new carrier takes delivery of a Bristol Britannia 318 on a 7-month lease from **Cubana (Compania Cubana de Aviacion, S.A.)**; it is placed in service the same day flying servicemen to Christmas Island. Simultaneously, the carrier purchases 2 Vickers Viscount 707s from the Cuban airline to replace the Viscount 805s *Enterprise* and *Good Fortune* now sold; the new ships are not christened.

The company is now relocated from Blackbushe to London (LHR) and its Vikings resume scheduled fortnightly flights from Manchester to Ostend and Bergen. A British transatlantic route is awarded and when the Britannia 318 returns from the Pacific, low frequency, low-fare London (LHR)–Bermuda and Nassau "Skycoach" service is initiated on October 10.

Five days later, economy-class, every-two-weeks London to Bermuda, Nassau, and Miami flights begin. The Bermuda subsidiary flies 20,000 passengers on its New York route, gaining a 12% of its market. Three Vikings are sold during the year and the fleet is enhanced by the addition of 2 Viscount 755s, which are named *City of Edinburgh* and *City of Belfast*.

In March 1961, two additional Douglas DC-6As are acquired along with a Bristol Britannia 324 christened *Good Fortune*.

A DC-6A with 6 crew crashes while practicing touch-and-go landings at Shannon Airport on March 26; although the aircraft must be written off, there are no fatalities.

A second Britannia 324 arrives in May and is named *Endeavor*. In late spring, the carrier appeals to the Air Transport Licensing Board (ATLB) for a variety of domestic route licenses as well as a new North Atlantic permission; after much dispute with other carriers, almost all are eventually denied. An initial Cunard-Eagle London to New York route is overturned upon **British Overseas Airways Corporation (BOAC)** ap-

peal, but another ruling opens a number of European destinations on June 22.

During the summer holiday season, efforts by the Bermuda and Nassau-based subsidiaries are stepped up. The frequency to New York becomes twice daily while Nassau–Miami flights are advanced to four per day. The weekly London–Miami via Bermuda and Nassau Britannia flights continue. In August, a pool agreement is signed with **Austrian Airlines, A.G.** for operation of joint service to Innsbruck from London (LGW). Simultaneously, operations from Manchester reach the new destinations of Hamburg, Pisa, and Rimini.

While en route from London to Stavanger, a chartered Vickers 610 Viking 3B with 3 crew and 36 British schoolboys, crashes into Mt. Holteheia, Norway, on August 9; there are no survivors.

The Manchester to Hamburg and Copenhagen frequencies cease in October, the same month in which the leased Britannia 318 is returned to **Cubana (Compania Cubana de Aviacion, S.A.)**. In December, the company announces forthcoming cutbacks. During the year 4 Vikings and 1 Heron are sold and 2 Boeing 707-465s are ordered before the company's New York license is revoked.

In the spring of 1962, some of the remaining services out of Manchester are cancelled. Unable to find a buyer to take over its jetliner order, the carrier accepts its first B-707-465 on February 27. Operated under Bermuda registry, the new addition is placed on the New York route on March 27.

On May 5, the new Boeing begins twice-weekly London–Bermuda and Nassau service. On May 20, a DC-6A inaugurates a weekly Manchester–Newcastle–Bergen service that will continue until September 23.

On June 7, the Cunard Steamship Co. abruptly pulls many of its assets out of Cunard-Eagle Airways, Ltd. In an effort to control all British operations across the North Atlantic to the Caribbean and eastern U.S., it teams up with **British Overseas Airways Corporation (BOAC)** to form the new joint **BOAC-Cunard**, with BOAC holding 70% of the shares and Cunard 30%.

The new partners triumph over Bamberg, who leads the opposition in a civil action, and take possession of the second B-707-465 in July. More importantly, they also gain the former Cunard-Eagle Airways subsidiaries in Bermuda and the Bahamas, both of which are absorbed into BOAC by fall. Meanwhile, what is left of Cunard-Eagle is reconfigured as a European regional scheduled and nonscheduled carrier.

On June 8, another DC-6A begins flying to Adelaide on a new long-term Air Ministry contract. A Viking 1B with 39 aboard crashes near Stavanger, Norway, on August 9; there are no survivors. During the year, two Vikings are sold.

Harold Bamberg purchases 60% majority shareholding in Cunard-Eagle Airways, Ltd. on February 14, 1963. Additional regional routes are added and the company is granted permission to begin serving Scotland's two largest cities in competition with **British European Airways Corporation (BEA)**—the first independent to be so allowed. The 2 Viscount 707s purchased in 1960 are sold in July. In order to demonstrate his control and interest in regional achievement, on August 9 Bamberg renames the company **British Eagle Airways, Ltd.**

CURTIS-MADSEN AIRLINES (PTY.), LTD.: Australia (1949–1952). Curtis-Madsen is formed at Sydney in early 1949 to fly a variety of short-haul, smallplane routes from the New South Wales capital. Traffic eventually proves insufficient to justify continuation and the company is liquidated on February 29, 1952. Its equipment is sold to **East West Airlines (Pty.), Ltd.**

CURTISS FLYING SERVICE OF BOSTON (NEW ENGLAND): United States (1929–1932). Established at Boston in the early spring of 1929, CFS of B is an affiliate of the Paterson, New Jersey-based Wright Aeronautical Corporation. The air taxi inaugurates scheduled Curtiss Robin passenger service to Nantucket and Bar Harbor in July.

The Ford Tri-Motor 4-AT-50 is acquired from **Curtiss Flying Service of New York** on October 25. Flights with the large and small aircraft continue until the service goes out of business in December 1932.

CURTISS FLYING SERVICE OF CALIFORNIA: United States (1929). A component of the nationwide Curtiss flight empire controlled by the Wright Aeronautical Corporation of Paterson, New Jersey, CFS of C is set up at Alameda in the spring of 1929 to offer passenger and express services within the Golden State. Service begins with a Ford Tri-Motor 4-AT-32 and, in August, the carrier is renamed **Curtiss-Wright Flying Service**.

CURTISS FLYING SERVICE OF CHICAGO. See CURTISS FLYING SERVICE OF THE MIDDLE WEST

CURTISS FLYING SERVICE OF NEW YORK: United States (1929–1933). Another, although later, unit in a series of small flight operations maintained across the country by the Wright Aeronautical Corporation of Paterson, New Jersey, CFS of NY is founded in the spring of 1929 to undertake a Metropolitan Air Ferry Service (MAFS) around New York. The route is inaugurated on May 14–15 by the new Ford Tri-Motors 4-AT-50 and 4-AT-53. It is expanded on May 22 by the Ford 4-AT-51 and on June 4 by the 4-AT-52. To gain publicity, the company's Ford 4-ATs all sport solid-colored fuselages, one red, one orange, one blue, and one green. On November 1, the 4-AT-53 is passed to **Curtiss Flying Service of the Middle West**.

A new division is established at Miami on January 13, 1930, to which the Ford 4-AT-52 is assigned. Following the winter vacation season, the Tri-Motor is moved north to New York on May 9. On September 26, it is decided to offer a transcontinental aerial hearse service. A company branch is set up at Pittsburgh and 4-AT-52 is sent west to this Pennsylvania city.

The MAFS is again upgraded on August 31, 1931, when the 4-AT-49 joins the fleet. On May 25, 1932, the 4-AT-49 is sold to Detroit-based **Transamerican Airlines**. The 4-AT-52 is purchased by Dallas-based **Fakes and Company** on December 3 and the Ford 4-AT-51 is passed to **Carolina Air Transport** on April 7, 1933. The corporation now shuts down its flight operations nationwide.

CURTISS FLYING SERVICE OF THE MIDDLE WEST: United States (1929–1932). Employing a Sikorsky S-36 amphibian, this affiliate of the Paterson, New Jersey-based Wright Aeronautical Corporation begins passenger flights in June 1929 between the Chicago Loop and the city's Municipal Airport. The Ford 4-AT-2 also enters service, acquired from **National Air Transport**. On November 1, the Ford 4-AT-53 arrives from Long Island, having been sent west by the Curtiss Flying Service of New York.

The organization is reformed on October 10, 1930 and renamed **Curtiss Flying Service of Chicago**. Flights continue until October 21, 1932.

CURTISS-WRIGHT FLYING SERVICE: United States (1929–1930). **Curtiss Flying Service of California**, based at Alameda, is reformed and renamed in August 1929. Although tied down, the company's sole aircraft, the Ford 4-AT-32, is blown upside down and destroyed during a windstorm at Burbank's Grand Central Air Terminal on November 21, 1930. Loss of the plane brings an end to the service.

CUSTOM AIR TRANSPORT: United States (1995–1998). With headquarters in Denison, Texas, CAT is established in 1995 to conduct scheduled and charter cargo services from a hub at Detroit. CEO Roger Taylor launches operations in September with a single Boeing 727-224F, flying to Cleveland and Kansas City.

The hub is shifted to Florida in 1996 and services are enhanced with the addition of a B-727-225F and an Aviation Traders ATL-98 Carvair. A contract is signed with **Emery Air Freight** to transport packages on its behalf.

In September, Custom contracts with **Hinduja Cargo Services, Ltd.** of New Delhi, India, to provide services to Sharjah, U.A.E., from six cities on the subcontinent. The Indian operation is 40% owned by **Lufthansa Cargo Airlines, A.G.**, which supplies the 3 B-727-243Fs that will connect with its Douglas DC-8-73F operation from the U.A.E.

The Custom-flown Boeing freighters duly inaugurate scheduled services to Hyderabad, as well as New Delhi, Bombay, Madras, Bangalore, and Kathmandu. Flights are also made to Colombo, Sri Lanka. The route network is increased in October with stops added at Ahmadabad, Varanasi, and Coimbatore. In mid-October, the company inaugurates weekly service into Indonesia's new Hang Nadim Airport, which is located just 20 miles from Singapore.

Financial figures are released for the second half of the year. These show revenues of \$6.69 million, expenses of \$6.56 million, and small profits: \$128,000 (operating) and \$122,000 (net).

Early in 1997, the 90-employee company applies to the DOT for U.S. charter passenger service authority. Meanwhile, the Hinduja cargo fleet is increased by the addition of 4 more B-727Fs. Bangalore, Bombay, Calcutta, and Madras join the route network.

An Aviation Traders ATL-98 Carvair, with two crew, fails its takeoff from Griffin–Spalding County Airport at Griffin, Georgia on April 4, overruns the runway by 3,701 feet, crosses Zebulon Road, and crashes into a vacant Piggly Wiggly grocery store near the Spalding Square parking lot before catching fire. There are no survivors.

At the end of the year, plans are in place to begin nonscheduled charter and inclusive-tour flights in the spring to Las Vegas and the Caribbean from the Midwest and Northeast. The services would be flown under the name **Tropic Aire**.

Although traffic figures are not released, financial reports are filed with the government. These show operating revenues up 15.5% to \$7.83 million, with expenses rising 35.1% to \$8.45 million. The previous year's operating gain becomes a \$614,000 operating loss, while the net profit becomes a \$614,000 net loss.

The company is visited by an FAA inspection team in the spring of 1998, which finds "discrepancies in airworthiness and pilot training." Rather than contest the findings, the carrier voluntarily grounds itself, pending an attempted resolution of its problems.

CUSTOM HELICOPTERS, LTD.: St. Andrews Airport, P.O. Box 66130, Winnipeg, Manitoba R3K 2E7, Canada; Phone (204) 338-7953; Fax (204) 663-5037; <http://www.customheli.com>; Year Founded 1977. Custom Helicopters is established at Winnipeg in 1977 to provide rotary-wing charter service. The company also serves as a Bell Helicopter customer service facility and flight school.

Over the next 22 years, the company expands and branches out to provide a host of aerial work. Services include aerial inspection, diamond drill support, corporate transportation, support of mineral exploration, power line maintenance, wildlife surveys and live animal capture, forest fire fighting, and aerial photography in support of the motion picture industry.

By 2000, Custom is owned by its senior management group. Emphasis continues to be placed on maintenance and President J. Hawes also serves as director of maintenance; Vice President D. McDougall is director of flight operations. Services are maintained with a fleet that now numbers 12 Bell 206B JetRangers and 8 additional units, including Bell 205 A1s, Bell 206L LongRangers, and Hughes 300Cs.

CUTTER AVIATION: 2802 Old Tower Road, Phoenix, Arizona 85034, United States; Phone (602) 267-4080; Fax (602) 275-9749; Year Founded 1928. One of the nation's oldest FBOs, Cutter is established at Phoenix in 1928. Over the next 50 years, the company also undertakes a wide variety of charter operations, both passenger and cargo. By 2000, Cutter employs nine full-time pilots and operates its non-scheduled services from two airports.

From Sky Harbor International Airport in Arizona, it operates 1 each Cessna 560 Citation V, Beech 2000 Starship, Super King Air 300, Super

King Air 200, King Air 90, Beech 58 Baron, Beech A36 Bonanza, and Bell 230 helicopter.

Two Barons and 2 Bonanzas are based at Albuquerque, New Mexico, along with 1 each Starship, Super King Air 200, King Air 100, Cessna 421, and Piper PA-31C Cheyenne II.

CUTTER-CARR FLYING SERVICE: United States (1948–1963). When Congress requires the Atomic Energy Commission to provide certain services to its closed “atomic cities,” a government contract for air service between Albuquerque and Los Alamos, New Mexico, is let in 1948. William P. Cutter and Clark Carr found Cutter-Carr Flying Service, win the appointment, and undertake scheduled flights with Beech Bonanzas.

In 1953, the company’s mission is enlarged to include transportation of classified cargo throughout the U.S. These operations will remain secret. Within a decade of its start-up, CCFS is offering seven flights per day between Albuquerque and Los Alamos.

Cutter and Carr elect to go their separate ways during 1963. Clark Carr founds **Carco Air Service** and wins the renewed government contract.

CYPRESS AIRLINES, LTD.: Canada (1987–1997). President Stephen Hynes establishes CA at Richmond in 1987 to provide local air taxi, air ambulance, and executive-jet charters throughout western Canada. These activities occupy the company for most of the next decade.

In 1996, the company expands into the scheduled airline arena by employing its 3 executive-appointed Convair CV-580s to serve Vancouver and other British Columbia communities on a regular basis.

Airline employment in 1997–1998 stands at 25. The scheduled service initiative proves a fiscal disaster and, as a result, the company is forced to shut its doors during the latter year.

CYPRUS AIRWAYS, LTD.: P.O. Box 1903, 21 Aikeou Street, Nicosia, Cyprus; Phone 357 (2) 44 3054; Fax 357 (2) 44 3167; <http://www.cyprusair.com>; Code CY; Year Founded 1947. Capitalized at £125,000, this carrier is incorporated at Nicosia on September 24, 1947. Shareholding is divided three ways: 44.90% is held by **British European Airways Corporation (BEA)**; 22.45% by the Cypriot government; and 36.65% by local Cypriot interests. The British airline assumes responsibility for long-haul service, in cooperation with the local carrier. London–Nicosia service is inaugurated on October 6 with Cyprus de Havilland DH 89As Dragon Rapides taking the Athens–Nicosia segment.

In March 1948, **British European Airways Corporation (BEA)** delivers 3 DC-3s, which are christened *Salamis*, *Amathus*, and *Citium*. These Douglas-made transports open service on April 18 from Nicosia to Athens, Ankara, Istanbul, Beirut, Lydda, Alexandria, and Cairo.

Service is started to Rome in the spring of 1949. On June 30, the carrier takes over the Athens–Cyprus–Lydda service of **CSA Czechoslovak Airlines**.

In 1950, DC-3 flights are inaugurated to Waddi Halfa and Khartoum as well as to Kuwait, Bahrain, and Baghdad. The shareholding arrangement is modified. The Cypriot government now holds 31%, Cypriot interests, **British European Airways Corporation (BEA)**, and **British Overseas Airways Corporation (BOAC)** now hold 23% each. **British European Airways Corporation (BEA)** Elizabethans are put on the London–Nicosia service on June 7, 1952; Cyprus Airways DC-3s continue to fly the Athens–Nicosia leg.

The world’s first turboprop proving flight is flown on April 2, 1953 as the **British European Airways Corporation (BEA)** Vickers Viscount 701 *Robert Falcon Scott* makes a proving flight London–Rome–Athens–Nicosia. On behalf of Cyprus Airways, Ltd., **British European Airways Corporation (BEA)**, on April 18, begins the world’s first sustained turboprop passenger service as the Viscount 701, christened *Sir Robert Shackleton*, flies London–Nicosia. As during the proving flight, a Cyprus

DC-3 makes the Athens–Nicosia connection. Regular Nicosia–Benghazi and Tripoli DC-3 flights commence on April 25.

Again operating on behalf of Cyprus Airways, Ltd., **British European Airways Corporation (BEA)** begins Nicosia–Beirut Viscount 701 services on April 13, 1954, as an extension of the London–Nicosia route. The Libyan service is suspended in 1956 as the British regional begins direct Tripoli and Benghazi flights from London.

Under a charter arrangement with Cyprus Airways, Ltd., BEA’s London–Nicosia route is extend to Tel Aviv on October 7.

As the result of a five year agreement signed on January 28, 1958, **British European Airways Corporation (BEA)** assumes full responsibility for the carrier’s operations in February. **British Overseas Airways Corporation (BOAC)** sells its 23% shareholding to the Cypriot government in June, but BEA, its sister corporation, retains a quarter interest. Cyprus becomes an independent nation on August 16, 1960.

In 1961, Cyprus joins the British Commonwealth and a new five-year pact is signed with BEA on January 26. On behalf of the island carrier, **British European Airways Corporation (BEA)**-crewed de Havilland DH-106 Comet 4Bs open services in 1962 to Doha, Kuwait, Bahrain, and other Persian Gulf states.

In 1963–1964, contracted Comet 4Bs begin Athens, Rome, and London services. Vickers Viscount 806s are, during 1965, introduced on the Cairo, Jordan, Jerusalem, and Rhodes frequencies. **British European Airways Corporation (BEA)** Comet 4Bs continue to operate the carrier’s services between Nicosia, Athens, Rome, and London. A total of 51,438 passengers are flown on the year.

Airline employment stands at 140 in 1966 and the fleet is made up of 2 owned Viscount 806s. Bookings climb to 69,133.

The airline’s owned fleet in 1967 still consists of just 2 Viscount 806s; 200 workers are employed. Passenger boardings accelerate 17% to 85,569, while freight traffic is up 46%.

In 1968–1969, the involvement of **British European Airways Corporation (BEA)** lessens until the operational agreement ends in November of the latter year; the carrier begins to increase its own fleet and to fly on its own. The first Hawker Siddeley Trident 2E is received in September.

The Nicosia to London routes previously flown by the British shareholder’s Comet 4Bs are taken over in 1970 and operated by the company’s Trident 2E. Cyprair Tours, Ltd. is formed as a subsidiary and 2 Trident 1Es, formerly operated by **Kuwait Airways, Ltd.**, are acquired under lease from **British European Airways Corporation (BEA)**, which had purchased them.

A second Trident 2E is acquired in 1971, during which year bookings reach 132,861. Airline employment stands at 443.

Another Trident, a 1E, is added to the fleet in 1972 and the unduplicated mileage is 2,500. Passenger boardings climb 33.9% to 201,000 while freight traffic jumps 20.3%.

The delivery of 2 additional Trident 2Es in 1973 allows routes to be opened to Paris, Brussels, and Manchester. An office is opened in Athens. Freight soars 22% and passenger bookings advance by 15.8% to 233,000.

A BAC 1-11-518 is leased from **Court Line Aviation, Ltd.** in May 1974. Turkish troops invade the island in July and occupy Nicosia International Airport; the entire fleet is caught on the ground. One Trident 2E is lost during the combat at the airport and the other 3 are captured (and will not be released until after years of negotiation); the leased Trident 1E and 2E are both destroyed at Nicosia on July 22, forcing the airline to suspend operations.

Although the head office remains in Nicosia after the conflict, corporate operations are moved to Larnaca on the island’s southern end, and a new fleet is assembled comprising 1 Boeing 720B, 1 Douglas DC-8-52, and 1 BAC 1-11-537GF.

Revenue services are resumed on February 8, 1975 between Larnaca and Athens. Beirut and Tel Aviv flights are resumed soon thereafter and service to London and Cairo is restarted in September and December, respectively. Meanwhile, in late November, the BAC 1-11-518 leased the

previous year is returned to the U.K. and is replaced with a chartered Douglas DC-9-15.

Passenger enplanements for the last quarter are 79,075.

Several new Middle Eastern destinations are added to the route network in 1976. During the summer, requests are placed for 2 BAC 1-11-537GFs. They are the last of this aircraft type to be ordered. While the company waits for them to be built, a former **Monarch Airlines, Ltd.** BAC 1-11-518 is leased, allowing the DC-9-15 to be returned to its lessor.

Passenger boardings skyrocket 64.9% to 225,285 while cargo zooms upward a spectacular 463.6%. During the year, employment increases 31.7% to 565 workers.

Two B-720Bs are leased from **Monarch Airlines, Ltd.** in 1977 and the Trident 2E held by the Turks is finally returned. Markets now served include Athens, Beirut, Tel Aviv, London, Cairo, Frankfurt, Paris, Bahrain, Dubai, Kuwait, Muscat, Amman, Damascus, Jeddah, Benghazi, Zurich, and Salonika. To help carry the load, a BAC 1-11-523 previously operated by **Transbrasil, S.A. (Linha Aerea)** is chartered for the year's second half. The first BAC 1-11-537GF is delivered on December 8. Enplanements grow to 258,285.

The workforce is 726 in 1978. The second BAC 1-11-537GF arrives on January 28. Two Palestinian gunmen kill Egyptian President Sadat's confidant, the newspaper editor Youssef el-Sebai, at Nicosia's Hilton Hotel on February 18, seize 30 hostages, and take cover in the hotel's restaurant. After negotiations with the Cypriot government, led by President Spyros Kyprianou, the pirates exchange 12 hostages for safe conduct, by bus, to Larnaca Airport. In exchange for the release of 7 more prisoners, the government turns over the carrier's DC-8-52 to the gunmen, with which to make their escape.

After taking off from Larnaca, the hijackers are refused permission to land all around the Mediterranean, receiving permission to refuel only at Djibouti, late in the day. Eleven hours later, the plane takes off for Libya and Algeria, both of which deny landing permission, and it is thus forced to return to Larnaca on the evening of February 19.

About an hour after the Douglas transport lands on the island, a U.S.-made Lockheed C-130 arrives with 74 Egyptian commandos aboard. Led by Brig. Gen. Nabil Shukry, the commandos begin an unauthorized assault on the airliner to free the hostages—only to be intercepted by the Cypriot National Guard. In the hour-long gun battle that follows, 15 Egyptians are killed and 22 persons are wounded on both sides. One of the CA BAC 1-11-537GFs is badly damaged.

The hijackers, meanwhile, release their own 11 hostages and the plane's 4 crewmen and surrender to the Cypriots. Both Egypt and Cyprus blame one another for the incident's bloodshed and in the wave of anti-Palestinian fervor which follows, Egypt breaks its diplomatic ties with Cyprus on February 22, the same day the damaged BAC 1-11-537GF returns to the U.K. for repairs. The plane returns to service on April 19.

A B-707-123B, with 8 crew and 58 passengers is destroyed as the result of a bad landing at Bahrain on August 19; there are no fatalities.

Later in the year, service is started to Zurich, London (LHR), and Paris. A Canadair CL-44D freighter is purchased and orders are placed for 3 B-707-123Bs. On October 15, a BAC 1-11-537GF is leased to **British Airways, Ltd. (2)**.

Passenger boardings jump 18% to 315,400 and freight soars 22.8%. A \$1.3-million net profit is reported.

Airline employment is increased by 18.8% in 1979 to 861. New routes are opened to Dusseldorf, Manchester, Munich, and Abu Dhabi. The 3 purchased B-720Bs are delivered and the 2 chartered from **Monarch Airlines, Ltd.** are returned.

Enplanements climb 22.8% to 387,451 and cargo grows 23%. Revenues reach \$47.86 million, but expenses (with increased fuel prices leading the way) hit \$48.6 million, producing a loss of \$699,997.

The workforce is increased by 12.1% in 1980 to 987 and service is extended to Rhodes, Birmingham, England, and Milan. The BAC 1-11-537GF on lease to **British Airways, Ltd. (2)** is returned on April 28.

After a training flight from Akrotiri on November 4 the landing gear of a Canadair CL-44D cannot be lowered. The aircraft, carrying three crew, makes a belly landing on foam; there are no fatalities.

Late in the year, Stavros Galataris becomes chairman and joint managing director while Stavros Nathaniel is named vice chairman and joint managing director. Passenger traffic swells 13.6% to 440,792 and freight climbs 11.9%.

Two more employees are hired in 1981 as Galataris and Nathaniel arrive to establish a new management team. Boardings rise 3.2% to 454,998; cargo declines by the same percentage to 16.46 million FTKs.

The workforce drops 10.3% to 887 in 1982. Once new long-term credit, guaranteed by the British, French, and German governments, is obtained from a consortium of European banks, led by Britain's Midland Bank, 2 Airbus Industrie A310-203s are ordered.

Passenger boardings dip 0.1% to 454,610, but cargo increases by 9.2% to 17.97 million FTKs. On revenues of \$72.8 million, an \$8-million net profit is reported.

The last British interest reverts to the Cypriot government in 1983; it now holds 69% of the shares with private interests the remainder. Orders are now placed for 4 A320-230s.

Cargo drops 3.8%, but passenger boardings are up 6.8% to 485,314.

The employee population in 1984 is 1,115, a 3.4% boost. The 2 A310-203s ordered in 1982 are received and placed in service during the first quarter.

Passenger bookings soar 23.9% to 601,447 and freight accelerates 40.6% to 26.84 million FTKs.

A third A310-203 joins the fleet in 1985. Two gunmen, seeking freedom for Lebanese comrades jailed in Cyprus, seize a BAC 1-11-537GF at Beirut on February 7 and threaten to kill 12 hostages. The unnamed Lebanese pirates surrender five hours later when the government of Cyprus promises to give consideration to their demand that their colleagues be freed. Two days later, Lebanese terrorists promise to attack additional Cypriot targets unless the two jailed hijackers are also released.

The workforce remains level, but boardings jump 13.9% to 684,948, 60–70% of which are leisure travelers. Freight drops 42% to 7.61 million FTKs, yet a \$22.6-million profit is generated. Since 1981, the carrier's paid-up capital has risen to \$9.2 million.

The payroll is increased by 10.8% in 1986 to 1,235 as the airline introduces a new livery, together with services to Geneva, Abu Dhabi, Doha, and Muscat. A new theme of "Personal Touch" is introduced for passenger services, including the employment of cabin attendants fluent in Arabic, French, and German, in addition to English. Anyone making their first flight is given a certificate signed by a captain. An office is opened in New York and the company begins affiliation with the **Aer Lingus Irish Airlines** Astral computerized reservations system. Customer bookings jump 7.6% to 737,190, but cargo falls again, down 9.6% to 6.88 million FTKs.

The employee population grows another 21.5% in 1987 to 1,500. Passenger boardings ascend 13.6% to 837,547 and freight recovers, rising 12.8% to 32.42 million FTKs.

The workforce is increased a further 21.3% in 1988 to 1,820 and the fleet now includes 3 B-707-120Bs, 3 BAC 1-11-537GFs, and 3 A310-203s. Orders are outstanding for another A310-204 and 8 A320-230s. Customer bookings decline 8.8% to 763,547, but cargo increases by 5.9% to 27.03 million FTKs.

Airline employment is cut by 1.9% in 1989 to 1,786. The first A320-230 is delivered at year's end. Enplanements resume an upward momentum, climbing 8.1% to 825,074. Freight rises 25.1% to 33.69 million FTKs.

The number of company workers falls another 12.7% in 1990 to 1,560. Passenger boardings shoot up 18.6% to 978,312, while freight moves ahead by 7% to 36.06 million FTKs. Revenues reach \$164 million and allow an operating surplus of \$16.65 million. There is, however, a net loss of \$2.14 million.

The fleet in 1991 includes 3 A310-203s, 1 A310-204, 4 A320-230s, and 1 BAC 1-11-537GFs. Orders are outstanding for 4 A320-230s. A

block-space agreement is concluded with **KLM (Royal Dutch Airlines, N.V.)** on June 6, covering flights from Amsterdam to Larnaca and Paphos and via Larnaca to Amman and Damascus. The flights commence 21 days later.

New markets are initiated at Heraklion, Helsinki, Brussels, and Berlin. Employing a Cyprus A320-230, twice-weekly, dual-designator service begins with **KLM (Royal Dutch Airlines, N.V.)** on July 30 from Amsterdam to Beirut via Larnaca.

Late in the year, a restructuring and relaunching of the company is announced that is designed to turn the company into a "full-fledged European airline with an international flavor."

A new corporate identity, featuring new livery, is introduced in December and includes new cabin service, upgraded menus, and dedicated business-class. Simultaneously, an agreement is signed with **American Airlines** under which the American major agrees to fulfill, under contract, all of Cyprus' computer needs.

Recession and the Gulf crisis impact traffic, sending customer bookings downward by 2.6% to 952,600 and cargo down 1.9% to 32.15 million FTKs.

The workforce is increased by 4.2% in **1992** to 1,807 and the fleet grows with the addition of 7 A320-231s and 2 BAC 1-11-537GFs. One of the former is leased to **Eurocypria Airlines**, while orders are outstanding for an eighth unit. In June, flights are started to Salzburg via Vienna and to Rome.

Passenger boardings recover and grow 10.9% to 1,057,288. Freight falls again, declining 5.6% to 34.27 million FTKs.

In **1993**, Chairman Vassilis Rologis and CEO Panikos Papadakis oversee an employee population of 1,560, down 13.7% from the previous year. The fleet now includes 3 each BAC 1-11-537GFs and A310-203s, 1 A310-304, and 8 A320-231s, with 2 more of the latter joining the first Eurocypria charter. A code-sharing alliance is signed with **Emirates** in March and, under its terms, joint services are inaugurated between Larnaca and Dubai employing Cyprus A320-231s. Other new markets are opened to Linz and Lyon.

Customer bookings accelerate 6.7% to 1,181,031, but cargo slips 2.7% to 33.3 million FTKs. A \$10-million net loss is suffered.

Airline employment is increased by 15.4% in **1994** to 1,806 as operations continue apace. Officials begin seeking outside investment of \$110 million with which to refinance the carrier's debt. In March, twice-weekly service is initiated from Larnaca to Moscow under a new code-sharing agreement with **Aeroflot Russian International Airlines**.

Passenger boardings leap upward by 15.6% to 1,364,812 while freight recovers, growing by 7.3% to 35.76 million FTKs. The previous year's financial loss is turned into an \$18-million net gain.

Six people leave the company in **1995** and a block-space agreement begins in June with **Kuwait Airways Corporation** on the KAC route from Kuwait City to Larnaca. In October, a block-seat, code-sharing agreement with **Gulf Air** takes effect in October; the Larnaca-based carrier purchases seats on Gulf Air's twice-weekly nonstop A340-312 flights to New York and Houston.

Enplanements fall 4.8% to 1,299,110 while cargo is down a slight 1.5% to 36.3 million FTKs.

There is no change in the workforce during **1996** and the fleet now includes 3 A310-203s, 1 A310-204, and 4 A320-231s, 3 of which are leased to the subsidiary **Eurocypria Airlines**.

The twice-weekly, dual-designator flights with **Gulf Air** to the U.S. are expanded in June to thrice weekly. An exchange-seat agreement begins with **Alitalia, S.p.A.** in October on return services between Larnaca and Rome.

Through November, customer bookings are down 1.2% to 1,158,456 and 32.1 million FTKs are operated, a 4.2% drop. Losses for the year total \$2.13 million (operating) and \$4.35 million (net).

Airline employment increases a slight 0.3% in **1997** to 1,795. Markets visited at the beginning of this year include Amman, Amsterdam, Athens, Bahrain, Beirut, Berlin, Birmingham, Brussels, Damascus, Dubai, Frankfurt, Helsinki, Heraklion, Jeddah, Kuwait, Linz, London,

Lyon, Manchester, Munich, Paris, Riyadh, Rome, Salzburg, Tel Aviv, Vienna, and Zurich.

A commercial agreement is signed with **United Airlines** providing for joint sales and promotions in the U.S. and Cyprus.

On March 30, biweekly return service is inaugurated from Prague to Dresden via Paphos Airport. Weekly roundtrips commence on April 29 from Prague to Strasbourg and Lyons and on May 5 from Prague to London (STN).

The airline's chairman, Takis Kyriakides, travels with Commerce Minister Kyriakos Christofi to Moscow, where a new office is opened on June 26. Frequencies from the Russian capital to Cyprus are thereafter boosted to four per week and in honor of the company's birthday, are initially offered at just \$300 one way.

Passenger boardings for the full year ascend 5.4% to 1,292,468 while cargo inches up 0.8% to 35.66 million FTKs. Revenues rise 7.1% to \$255.9 million and expenses climb 5.5% to \$249.88 million. Still, losses increase. There is a \$6.02-million operating loss and a net loss of \$6.4 million.

Loss-making flights continue apace in **1998**, as the airline becomes embroiled in controversy with its pilots union, Pasipy.

When senior captains of **Eurocypria Airlines** allege in the spring that their management is rigging recruitment procedures to secure appointments of particular pilots as political favors, that airline becomes the subject of a parliamentary investigation. At the same time, a number of Eurocypria pilots allege that Cyprus Airways' Pasipy members are attempting to close the charter firm by arranging disruptions and delays of its flights.

Meanwhile, Cyprus officials attempt to implement a strategic plan designed to cut costs and help the carrier compete in a liberalized European air environment. The scheme calls for staff cuts, pay cuts or freezes, and the reduction of certain unprofitable routes and services.

Reacting to their management's strategic plans, 95 Pasipy members, who have been seeking a pay increase and have received no satisfaction, go out on strike July 23 to 26. Their action forces the cancellation of 153 flights and shuts the company down, costing its even more potential income in the midst of the island's lucrative tourist season.

When service is resumed late on July 26, yet another incident, this one somewhat unique, incurs more losses for the airline. Unknown to anyone, a young passenger smuggles his pet squirrel aboard an A320-231 service from Athens to Nicosia. The youngster says nothing after the pet escapes while he is in the toilet. Once the plane lands and the passengers deplane, ground crews see the squirrel running through the plane. Electing not to gas the aircraft, it will take 24 hours to capture the animal with food. Officials claim the squirrel has cost the company \$95,250 in rescheduled or delayed flights, but nevertheless invites the youngster to come forward and claim his pet without penalty.

The airline postpones the introduction of a total smoking ban on October 26 following objections from cabin staff concerning a proposed exemption for pilots.

Much of the remainder of the year is taken up by top executives in discussions with other European airlines concerning possible alliance links. It also seeks to find a "strategic investor" willing to acquire upwards of 17% equity interest.

Enplanements for the year grow 4.3% to 1.41 million, while cargo traffic rises 7% to 38.17 million FTKs.

By the beginning of **1999**, airline employment has been reduced by 3.1% to 1,850.

Demanding a 4.5% pay increase, company employees, on January 28, stage a four-hour strike; the action causes their airline to delay the arrival of 20 incoming flights from Europe and the Mideast.

On April 9, Capt. Chris Christodoulou, head of the pilots' union, indicates that 100 company flyers are willing to purchase the 12% stake—over five million shares—at a price of \$4.6 million. The offer is made in light of the lukewarm response to a January invitation for public bids made by the government's finance ministry and a necessity to sell the shares by September if the airline is to maintain its listing on the stock exchange.

On May 23, as the labor dispute between pilots and management drags on, both are embarrassed. An entourage of singers en route to the Eurovision contest in Israel is stranded after two Cyprus Airways pilots call in sick, thereby cancelling two flights. The performers finally reach Tel Aviv aboard an **El Al Israel Airlines, Ltd.** flight.

Labor unrest continues at the airline as it heads into the busy summer season. Under terms of their collective bargaining agreement, unionized copilots are not allowed to apply for captain vacancies at the charter subsidiary **Eurocypria Airlines, Ltd.** This perceived injustice so angers union members that, when Cyprus advertises for captain vacancies at Eurocypria, the company's flyers stage a 24-hr. strike on June 22 in protest. The industrial action delays 11 flights and 3,000 passengers and costs the carrier C£120,000 (\$215,000).

After giving the government and airline executives 24 hrs. to show goodwill (which is not forthcoming), the pilots return to the picket lines on June 24–25.

Angered, the government of Cyprus refuses to cave in and temporarily deregulates its skies at midnight on June 24, opening air corridors, including the most precious Larnaca to Athens to London (LHR) run to all airlines. Only 4 of 18 daily scheduled flights are thus affected, with 14 others completed using aircraft wet-leased from abroad.

The pilots strike ends at midnight on June 25. On July 18, three company aircraft in one day are grounded due to technical problems. Hun-

dreds of passengers awaiting connections in Greece and Cyprus are temporarily stranded.

While en route from Larnaca to Athens on November 28, Flight 312, an A310-303 with 230 passengers, suffers rapid decompression that forces the crew to make a fast descent and an emergency return to point of origin. The Airbus is grounded and tested, but when taken up for a test flight, redevelops the problem, along with other systems malfunctions. A second emergency landing is safely made.

Passenger boardings dip 1% during the year to 1,396,000, but cargo grows 6.6% to 40,686,000 FTKs.

Airline employment stands at 1,852 at the start of **2000**, a slight 0.1% increase.

The carrier signs a new five-year, £1.3-million renewal contract with SABRE in July.

Friday A310-303 roundtrips are inaugurated on November 1 from Larnaca to Munich via Paphos.

D & D AVIATION: 470 North 2400 W., Salt Lake City, Utah 84116, United States; Phone (801) 532-0990; Fax (801) 532-0991; Year Founded 1993. D & D is established at Salt Lake City in 1993 to provide executive and small group passenger charters. By 2000, the company employs four pilots and operates from the Utah airfield as well as from Scottsdale, Arizona.

One each Learjet 24D, Learjet-25D, and Learjet-35A, plus a Beech King Air 90, are operated from Salt Lake City while two Learjet 35As are flown from Scottsdale.

D & S AVIATION: Van Nuys Airport, 16700 Roscow Blvd., Van Nuys, California 91406, United States; Phone (818) 831-3002; Fax (818) 831-7002; <http://www.choicemall.com/dsaviation>; Year Founded 1993. D & S is set up at Van Nuys, California, in 1993 by David and Suzanne Salzman to offer professional pilot training. Within a year, with Suzanne serving as general manager, the company begins Cessna 172 Skyhawk scenic tours of Los Angeles, Catalina, Malibu, and Santa Barbara. The company also runs air taxi flights between those destinations and to San Luis Obispo, Bakersfield, Mojave/Lancaster, Ventura, Orange County, San Diego, Palm Springs, and San Bernardino/Riverside.

DAALLO AIRLINES, S.A. (AIRLINE OF THE HORN OF AFRICA): P.O. Box 21297, Dubai, United Arab Emirates; Phone 971 (4) 733808; Fax 971 (4) 734464; <http://www.daallo.com>; Code D3; Year Founded 1991. Supposedly owned by a Somali family, Dubai-based Daallo Airlines is established at Djibouti in January 1991 to offer regional nonscheduled services into war-torn Somalia. Several Cessna 208 Caravan Is are acquired and allow operations to commence on March 20 with a charter to Hargeisa. Despite the intervention of the UN, a dire need to meet air transportation requirements in the region persists, particularly where land communications between different points has become difficult and dangerous. Daallo Airlines is able to quickly reach most of the regions of Somalia and serve this transportation requirement.

Over the next nine years, additional routes are extended to a variety of Mideast points and the Cessnas are replaced with aircraft from Russia and the Czech Republic.

By the end of the decade, the airline operates four weekly roundtrips from Dubai and Sharjah to Djibouti and Somalia. It also provides direct air services from the Somali towns of Berbera, Bosasso, Borama, Burao, Erigavo, and Mogadishu. It also provides two weekly return services from Jeddah to Mogadishu.

An interline agreement has been negotiated with **Saudi Arabian Airlines** and negotiations are undertaken for similar pacts with **Oman Air** and **Qata Airways**.

In 2000, Managing Director Mohamed Yassin employs a workforce of 60. The fleet includes 2 Antonov An-24RVs, 1 Let L-410UVPs, and 2 Tupolev Tu-154M. An Ilyushin Il-18, 2 An-24RVs, and 2 L-410UVPs employed earlier have been withdrawn. Plans are under active consideration for an expansion of services to Nairobi, Kampala, Kinshasa, and Kigali.

DAC AIR, CLUJ: 2-4 Ministerului Street, Bucharest, Romania; Phone 40 (1) 223-2575; Fax 40 (1) 223-0844; <http://www.dntcj.ro/dacair>; Code 6P; Year Founded 1996. Romanian businessman George C. Paunescu establishes this new entrant at Bucharest during the last week of January 1996 to offer regional and domestic scheduled passenger services. A 15% stake, in the form of assets rather than equity, is taken by **TAROM Romanian Airlines (Transporturile Aeriene Romane, S.A.)**. Mr. Paunescu takes the post of managing director/CEO and places a \$140-million order for 4 de Havilland Canada DHC-8-311s and 4 Canadair CRJ200 Regional Jets. In addition, four options are taken on each type, along with four conditional orders. The overall value will, if implemented, reach \$425 million.

Two Dash-8-311s are turned over to the start-up in May and, upon their arrival, allow the company, while awaiting its owned aircraft, to inaugurate scheduled replacement services for TAROM to 12 domestic destinations.

Ground handling, passenger facilities, and reservations and ticketing are handled by TAROM as part of its equity agreement.

The first owned DHC-8-311 is turned over to the company in Canada in mid-July and the premier CRJ200 is delivered in September; both begin flying to cities in Central Europe and along the Black Sea Basin. Three more DHC-8-311s arrive before the end of the year.

The fleet in 1997 includes 4 leased DHC-8-311s and 4 CRJ200s. On occasion, several Antonov An-24s are leased from TAROM. During the summer, code-sharing flights are launched with **MALEV Hungarian Airlines**.

Flights continue in 1998–2000. In those years, the route network from Bucharest grows to include stops at Timisoara, Budapest, Venice, and Munich.

DAGESTAN AIRLINES (MAKHACHKALA AIR ENTERPRISE-DAG DAGESTAN AIRLINES): Makhachkala Airport, Makhachkala, Dagestan, 367016, Russia; Phone 7 (87222) 73 701; Code YUH; Year Founded 1993. This small air company is reformed from the Makhachkala division of the old **Aeroflot Soviet Airlines**. Provided with a fleet of 6 Antonov An-24s and 3 Tupolev Tu-154Ms, the company begins regularly scheduled flights linking its base in the Russian Caucasus, on the Caspian Sea adjacent to Azerbaijan, with Kazan and Surgut. Little is known concerning the actual operations of this company. It has been reported that 1.5 million enplanements were recorded in 1997.

On November 12, 2000, a Tu-154M with 10 crew and 48 passengers aboard is en route from Makhachkala to Moscow headed to the Russian capital to support the Dagestan soccer team in an upcoming match. An armed gunman seizes the plane and orders it to land at Baku, Azerbaijan, for refueling. On the ground, negotiations are started with local officials while a hostage negotiating team is being sent by air from Moscow.

Before the Moscow negotiating team can arrive, the aircraft, not yet refueled, takes off for a new destination—Israel. At this point, the situation begins to take on international overtones, as the attention of both Russian President Vladimir Putin and Israeli Prime Minister Ehud Barak, who is flying to the U.S. for Palestine talks, are drawn to the unfolding drama. Conversations monitored between the pilot and the control tower at Ben-Gurion Airport at Tel Aviv reveal that the aircraft has only enough fuel for a short flight.

Initially, Israeli officials are concerned that the plane has been hijacked by Islamic militants; however, when it becomes clear that the pirate is a young Russian, the Tupolev is cleared to land at the Uvda military base in the southern Negev desert. There, the young extremist releases his hostages and surrenders to Israeli officials. While the Dagestan Airlines aircraft is detained, its crew and passengers are allowed to return to Moscow shortly thereafter on another plane chartered for them. That evening, the hijacker is flown to Moscow aboard a Russian government aircraft, his subsequent fate unknown.

DAI NIPPON KOKUYU.S.O KABU.S.HIKI KAISHA. See **JAPAN AIR LINES COMPANY (1)**

THE DAIMLER AIRWAY, LTD.: United Kingdom (1919–1924). Owned by BSA, Ltd., Daimler Hire, Ltd. is formed as a transport subsidiary on June 7, 1919. Daimler Air Hire, the aircraft operating division of Daimler Hire, Ltd., is formed in 1920. In December, George Holt Thomas sells the remaining assets of his bankrupt **Aircraft Transport and Travel (AT & T)** to this new pioneer.

All British civil services are suspended for lack of money in the face of foreign subsidized competition on February 28, 1921. Although originally opposed to state aid, Secretary of State for Air Winston S. Churchill organizes a Cross-Channel Subsidies Committee on March 2 under Lord Londonderry. The overseas carriers are granted a temporary government £88,200 subsidy on March 19, allowing resumption of operations.

Daimler proprietors Col. Frank Searle (who had also established the London General Omnibus Company) and George Woods-Humphrey, late of **Handley Page Transport, Ltd.**, acquire £30,000 capital from a

group of BSA-Daimler officials, as the division's name is changed to The Daimler Airway, Ltd. Searle is appointed managing director, Woods-Humphrey becomes general director, and the U.K. Air Ministry agrees to loan the new entrant 6 De Havilland DH-34s and 1 DH-18A originally intended for AT & T. Several pilots are hired at an annual salary of £1,000.

The first DH-34 is delivered on March 31, 1922. On April 2, the new plane, piloted by G. Ray Hinchliffe, flies the company's first service, a newspaper delivery from London to Paris. Hinchliffe, a former Royal Flying Corps pilot who wears a pink eye patch as the result of a wartime crash, is among the first to actively promote the mystique of commercial air pilots. It became his habit—some would say eccentricity—to put on a bowler hat at the conclusion of each flight for his walk from his aircraft to the terminal.

Meanwhile, Managing Director Searle attempts to adapt the Daimler Hire vehicle-usage system to the air and plans to obtain 1,000 hours of flying time annually from each de Havilland. Although this will not be feasible, his company will obtain an early reputation for rapid turnaround.

The first collision between two airliners on scheduled flights occurs on April 7. En route to England from Le Bourget field, in poor visibility over Thieuloy-Saint-Antoine, 18 miles north of Beauvais, a Daimler DH-18A on loan from **The Instone Air Line, Ltd.**, piloted by Robin Duke, collides with a **Compagnie des Grand Express Aerien** Farman F-60 Goliath (seven dead).

In May, a DH-34 makes two return journeys to Paris in one day, allowing Daimler claim to the record of being the first commercial carrier to do so.

On June 2, a DH-34 sets another record by completing five London–Paris return flights in one day. There is steady traffic growth during the summer and, in August, a total of 496 passengers and 13 tons of cargo are transported.

In a DH-34 piloted by Hinchliffe, Managing Director Searle and General Manager Woods-Humphrey survey a prospective Berlin route on September 15–23.

It is now reported that, for its first 6 months, the carrier has transported 1,514 passengers. Operating revenues total £10,292, with this total increased by government subsidy to £18,992. Unhappily, expenditures are £42,350 and the loss is £23,358.

A revised subsidy scheme is introduced by the government on October 1, under which Daimler is given £55,000 and is allocated a Manchester–London–Amsterdam–Berlin route. The Weimar government will block the German extension for months, primarily over the issue of international flying facilities in Germany. Over the next three weeks, Daimler continues to operate a newspaper service to Paris.

London–Rotterdam DH-34 flights, meanwhile, commence on October 9 in cooperation with **KLM (Royal Dutch Airlines, N.V.)**. This service is followed on October 23 by the inauguration of an Amsterdam–London and Manchester DH-34 frequency.

Season tickets are introduced on the England–Holland route in December; booklets of 25 return or 50 one-way tickets are available for £100.

During the year, a trio of 14-year-old cabin boys, including Jack Sanderson, is sent aloft on Daimler flights to assist passengers. Dressed in “monkey jackets” and with stiff wing collars and bow ties, they thus become the first flight attendants.

In early February 1923, the Parliament's Civil Air Subsidies Committee, headed by Sir Hebert Hambling, makes a report favoring the merging into one state carrier of all the private British carriers. The Manchester route is extended to Birmingham (for the British Industries Fair) between February 19 and March 2.

On March 14, Sir Samuel Hoare, Secretary of State for Air, indicates the U.K. government's acceptance of the Hambling report and its intention to merge the private airlines when their subsidy contracts expire the following March. Also during the first quarter, General Manager Woods-Humphrey flies to Berlin to personally untie the knots preventing his company's authorized aerial artery to that German city.

On April 13, flying a DH-34, pilot Hinchliffe inaugurates weekly London to Berlin service via Amsterdam, Bremen, and Hamburg, in collaboration with **Deutsche Aero-Lloyd, A.G.** The service is operated twice weekly by the British airline, which does not enjoy the traffic it had at the same point a year earlier. On top of this problem in customer turnout is a lack of capacity to cope with large numbers of passengers when they do appear.

Airmail is carried on this first scheduled route between the British and former German capital as of August 13. Meanwhile, a company DH-34 is placed at the disposal of British officials at the International Aeronautical Exposition at Goteborg, July 30–August 12. Frequency on the German route becomes thrice weekly at the end of August.

The first fatal domestic airline accident occurs on September 14 when a DH-34, piloted by L. G. Robinson, crashes near Ivinghoe, Buckinghamshire, while en route from London to Manchester; all six aboard are killed, including young Jack Sanderson, the first flight attendant killed in the line of duty. The route from London to Manchester is suspended.

The aircraft involved, G-EBBS, had been tracked by the government and held up to the press as an example of a civil airliner with an intense and safe service record of over 150,000 accident-free miles. Its loss has a negative impact on the U.K. public's opinion of commercial aviation.

Later in the month, pilot Hinchliffe suffers an engine failure while on a scheduled service, but is able to put down on a small island off Rotterdam. He immediately arranges for his aircraft to be sent to that city by barge and for Daimler to send out a replacement engine on another de Havilland. Hinchliffe's plane is equipped with navigation lights (not a common feature at the time) and he and his associate take off, flying to Lympe where they land after dark. The two return to London's Croydon airfield the next morning.

Continuous fog settles over the English Channel at the end of September and beginning of October, preventing Daimler service to Germany. Pilot O. P. Jones, who will later become a noted **Imperial Airways, Ltd./BOAC** captain, is the only one to make it through, completing one return service to Cologne.

Closed east of Hamburg on October 8, the Berlin service is reopened on November 4, rerouted via Rotterdam and Hanover. This schedule change follows by three days the resumption of flights from London to Manchester. It will be shut down again at the end of the month.

The report of the government's Civil Air Transport Subsidies Committee results in a final December 3 agreement between the affected parties to nationalize the British air transport industry by purchasing the assets of the independents and merging them into a single state-owned airline. For Daimler, the game is already up; it transports just 23 passengers in December.

If December's traffic figures were pathetic, those for January 1924 are almost unbelievable—only nine customers are flown. Passenger boardings inch up ever so slightly during February and service between London and Manchester is restarted on March 1.

The Daimler Airways, Ltd. ceases to exist on March 31, when **Imperial Airways, Ltd.** is formed. Frank Searle becomes managing director of the British government's “chosen instrument,” with George Woods-Humphrey moving over as general manager.

In its lifetime, Daimler transports a total of 5,796 passengers and generates income of £113,939. Expenses of £131,242, are, however, significantly greater and there is a £17,303 loss.

DAIRO AIR SERVICES, LTD. See DAS AIR CARGO, LTD.

DAK FAR EASTERN AVIATION (KHABAROVSK UNITED AIR DETACHMENT): Russia (1993–1999). Based at Khabarovsk in the far east of the nation, this **Aeroflot Soviet Airlines** directorate is reformed in 1992, achieving autonomous status. The fleet includes 20 Ilyushin Il-62s, 25 Tupolev Tu-154s, 20 Antonov An-24s, 40 Yakovlev Yak-40s, and 25 LET 410s. Orders are placed for 2 Il-96Ms.

I. V. Nagorny is director and his organization continues to operate as before, providing trunk and regional services throughout Siberia and to Moscow and other destinations in the new CIS.

Enplanements total 3,415,101.

Continuing to fly from Khabarovsk Airport in **1993** and provide regional domestic services as part of the Far Eastern Detachment of **Aeroflot Russian International Airlines (ARIA)**, the company will soon gain its independence and become the parent of many of the airlines operating from Khabarovsk. Igor N. Spichenko is now general manager and revenue services are operated with a mixed fleet of 8 Antonov An-24s and An-26s, 8 Tupolev Tu-154A/B/Cs, and 14 Ilyushin Il-62Ms.

Due to the country's uncertain economic situation, passenger boardings decline 33.2% to 2,563,890 while freight traffic falls 28.2% to 675.5 million FTKs.

Operations are continued to East Siberian destinations in **1994**. Aerial work is undertaken in the area employing a fleet of Mil helicopters. The company also flies scheduled services from the Far East to Anchorage and other points in Alaska, complementing the flights offered by **Alaska Airlines**.

Customer bookings decline again, dropping by 29.8% to 1.8 million. Cargo, on the other hand, recovers, growing by 18.7% to 801.8 million FTKs.

The radar station at Sovetskaya Gavan is destroyed by a hurricane in November **1995**. Partially as a result, the worst of 17 CIS fatal accidents this year occurs on December 7. While en route from Yushno to Khabarovsk, the company's Flight 3949, a Tu-154B with 8 crew and 89 passengers, disappears. The aircraft's wreckage is found 11 days later at a point 50 km. W of Grossevidchi, near Tartar Strait; there are no survivors.

Enplanements are off again this year, down 29.4% to 778,200. Freight carriage also drops, falling 23.3% to 54.18 million FTKs.

The company's fleet in **1996** includes 19 An-24s, 10 An-26s, 22 Il-62Ms, and 25 Tu-154A/B/Cs. Orders are outstanding for 2 Il-96Ms. Passenger boardings plunge 25.9% to 576,650.

On May 7, **1997**, an Mi-8 with five aboard crashes three km. from Katen village, near Khabarovsk (one dead). A search-and-rescue helicopter picks up the survivors the next day.

Following a safety incident in Seattle late in the year, inspectors from the FAA find that the company is still flying on Aeroflot's operating certificate, having failed to obtain its own from the U.S. A temporary permit is issued as Washington protests the situation.

Customer bookings fall another 11.4% to 511,000.

Service is maintained in **1998** with the matter of the company's operating certificate satisfactorily resolved. Another horrendous traffic year, passenger boardings drop 21.2% to 393,000.

In January **1999**, the carrier is renamed **Dalavia**.

DAKONO AIR: 9 Bolshoi Sawinsky per 9, Moscow Zone, 121019, Russia; Phone 7 (095) 248-0740; Fax 7 (095) 248-0690; Code DCA; Year Founded 1993. DA is established at Moscow on May 20, **1993** to offer ad hoc passenger and cargo charters to destinations in Europe, Asia, and the Mideast. General Director F. D. Zolotarev begins services in April **1994** with a fleet of 3 Yakovlev Yak-42s and 1 Ilyushin Il-76TD.

One Yak-42 is removed and another Il-76TD is acquired in **1995** and flights continue in **1996–2000**.

DAKOTA WEST AIRLINES: United States (1974–1975). DWA is set up at Rapid City, South Dakota, in **1974** to provide scheduled daily Cessna lightplane passenger roundtrips to Minneapolis (MSP) via Brookings. Flights continue until September **1975**, when the company goes out of business.

DAL AIRLINES: United States (1963–1968). Ted C. Connell forms DAL at Killeen, Texas, in **1963** to provide Beech 18 shuttle service for military personnel stationed at Fort Hood. Permission is received in the summer of **1966** to inaugurate regularly scheduled passenger and cargo services; daily roundtrips commence on August 18 to Dallas and Defidder.

When competing **Hood Airlines** fails in late **1967**, Connell purchases that carrier from bankruptcy proceedings. He then merges DAL into the larger operation and on May 23, **1968**, the amalgamated entity emerges not as DAL Airlines but as a new, stronger **Hood Airlines**.

DALAVIA: Russia (1999–2001). **DAK Far Eastern Aviation (Khabarovsk United Air Detachment)** is renamed in January **1999**. Pavel Sevastyanov is Managing Director and his fleet includes 13 Antonov An-24Bs, 7 An-24Vs, 8 An-26s, 2 An-26Bs, 22 Ilyushin Il-62M, 2 Tupolev Tu-154s, and 20 Tu-154Bs. Orders are outstanding for 2 Tu-204-100s.

As part of its continuing effort to find or augment domestic partners and to develop its presence in the Russian Far East, **Aeroflot Russian International Airlines (ARIA)** Managing Director Valery Okulov travels to Khabarovsk on May 7. There, he and Managing Director Sevastyanov sign a strategic agreement. Under its terms, the two begin to jointly operate their fleet and ground facilities in the area, create a common pool of spare parts, stockpile kerosene fuel, and train both flight and ground personnel.

Scheduled destinations, many flown in code-share with ARIA, include Adler/Sochi, Aomori, Chita, Ekaterinburg, Irkutsk, Kiev, Krasnodar, Mineralnye Vody, Moscow, Niigata, Novosibirsk, Okhotsk, Omsk, Petropavlovsk Kamchats, St. Petersburg, Tashkent, Utan-Ude, Vladivostok, and Yuzhno Sakhalinsk. Occasional charters continue to be flown to the U.S. and Canada.

It is reported on March 21, **2000** that the airline may, in fact, become the first customer to take delivery of the new Tu-214-100 (Tu-204-200).

On April 30, Tu-154B service is resumed from Khabarovsk to Aomori, Japan. Flights to Guangzhou begin on May 20.

It is reported on July 21 that the company will lease a pair of Tu-214s in April and September of 2001, although construction of neither plane is as yet completed. The 8-year, \$62-million charter arrangement calls for the airline to pay a substantial amount up front to assist KAPO and ANTK Tupolev to complete assembly of the aircraft, but if all goes as planned, the aircraft will be owned by the airline in 2008. Funding is handled by a regional government guaranteed leasing structure managed by the Financial Leasing Company. Dalcombank establishes a Dal-Com-avia deposit account product, solely for construction of the aircraft. Deposits will be accepted from individuals, who will receive airfare discounts from Dalavia of 10%–50%, depending on the size of their deposit.

The first Tu-214 is completed in late October. On November 14, it is flown to China via Khabarovsk on its first long-haul flight. Aboard are Dalavia Director General Pavel Sevastyanov, ANTK Tupolev Director General Vasily Alexandrov, KAPO Director General Nail Khairullin, and the plane's chief designer, Yuri Vorobyev.

Twice-weekly An-24 return service is initiated on November 23 from Khabarovsk to Jiamusi, the second largest city in Heilongjiang province after Harbin. Previously flown by **China Northern Airlines Company, Ltd.**, the route had been closed three years earlier. Dalavia will be expanded on April 1, **2001** by the inclusion of **Nikolaevsk-NA-Amur Air Enterprise and Vostok Airlines**; on May 4, the three will be combined, effective August 1, into **Khabarovskavia**.

DALLAS EXPRESS AIRLINES: United States (1994–1996). Dallas Express is founded at Dallas (DFW) in the spring of **1994** to provide feed for **Southwest Airlines**. Revenue operations commence in May with a single Beech 1300. The company suspends operations in September, having transported a total of 4,000 passengers since start-up.

Work is begun on a restructuring of the company that will allow a resumption of services the following March 1. Although resumption occurs on schedule, it is not fiscally successful and the airline shuts down for good in January **1996**.

DALMIA-JAIN AIRWAYS, LTD.: India (1946–1953). In July **1946**, the **Indian National Airways, Ltd. (INA)** is acquired by **Dalmia-Jain, Ltd.**, and renamed Dalmia-Jain Airways, Ltd. The carrier, which has

pioneered named services in India, simultaneously inaugurates Khyber Indiaman flights from Delhi to Peshawar via Lahore and Rawalpindi. As the summer progresses, the company's southern route from Delhi via Allahabad, Nagpur, Hyderabad, and Bangalore, to Madras, is turned over to the new **Deccan Airways, Ltd.**

When India and Pakistan are partitioned, direct Lahore–Ahmedabad service is abandoned in June 1947. The first of six previously ordered Vickers Viking Mk.1Bs is delivered to company representatives at England's Heston airfield on August 8 and is christened *Jumna*. In November, the Calcutta–Rangoon service halted by INA in 1942 is restarted.

The remainder of the Viking Mk.1Bs joins the fleet in 1948, along with a pair of Bristol 170 Wayfarers.

A Vickers 604 Viking 1B, with 4 crew and 15 passengers, is lost at Monte Cardo, France, on March 27; there are no survivors. A Vickers 604 Viking 1B with 4 crew and 19 passengers is involved in an accident at Palem Airport, New Delhi, on October 8; although the aircraft must be written off, there are no fatalities.

In cooperation with **Deccan Airways, Ltd.**, Dalmia-Jain assumes responsibility for operation of the nation's night-airmail services from **Indian Overseas Airlines, Ltd.** for three weeks, beginning on June 10, 1949. Monsoon rains cause the operation to be suspended on June 30.

As the result of proving flights on the northern borders, service to Srinagar, capital of Kashmir and a popular vacation destination via Amritsar and Jammu, is begun in July.

In February 1950, the government of India establishes an Air Transport Inquiry Committee to review the industry.

A DC-3 with 4 crew and 18 passengers suffers a wing failure in turbulence on July 17 and crashes 6 mi. SE of Patharkot, Nepal; there are no survivors. Another Douglas transport has the unenviable task of opening an airtail to the garrison town of Leh on the Indus River, 11,000-ft. up in the mountains.

The first commercial service into Nepal, a route from Calcutta to Katmandu via Patna, begins in 1951.

As the result of parliamentary study, an Air Corporation Bill is passed calling for the nationalization of all Indian airlines.

On August 17, Pakistan bars the company from making flights over Pakistan to Afghanistan.

New Delhi to Karachi service is cut on September 15 because of a gasoline shortage. India–Afghanistan service via Iran is started on November 24, as the airline detours around Pakistan.

A DC-3 is held on the ground at Karachi on December 5 when it is refused refueling. Katmandu, Nepal, becomes a hub on December 23.

A DC-3 with three crew aboard stalls on its climb from Bagdogra on February 8, 1952, and is brought back down; although the damaged plane must be written off, there are no fatalities.

The Air Corporation Bill receives presidential assent on May 28, 1953 and the process of state takeover results in the formal creation of the **Indian Airlines Corporation** on August 1.

DAMANIA AIRWAYS, LTD.: India (1993–1995). Founded by 33-year-old agri-businessman Pervez Damania at Bombay in early 1993, Damania is capitalized at \$8.3 million and equipped with two each Boeing 737-2K9As and B-737-282As leased from **TAP-Air Portugal, S.A.** Daily revenue operations of “the businessman's airline” commence in May to Calcutta, Bangalore, Goa, Poona, and Indore.

Another “Baby Boeing” is received from Lisbon in November. Also, in November and December, an Rs 100-million (\$3.2-million) stock offering is made to raise funds with which to continue expansion; this fiscal move marks the first time that airline shares are traded on the Indian stock market and it is oversubscribed by 10 times.

During its first 7 months, Damania transports a total of 444,692 passengers. Revenues are \$63 million and allow a profit of \$4.5 million.

In January 1994, Chairman/Managing Director Damania employs 34 pilots, 866 other workers, and operates 12 services per day from Bombay, including 2 each to Bangalore, Goa, Delhi, Calcutta, and Poona, the

latter with a newly received Beech 18. Additionally, a daily roundtrip is offered to Indore.

In April, the new Civil Aviation Ministry secretary, K. Padmanabhaiah, who is also joint chairman/CEO of **Air India, Ltd.** and **Indian Airlines, Ltd.**, begins a crackdown on safety violations. Cited for technical violations of safety regulations, Damania is ordered to stand down for the month of April, but the order for its service suspension is withdrawn after a week. In May, alcohol service is banned on all Indian domestic service.

Damania announces on July 5 that it will raise \$21 million in capital markets to cover the lease of 3 additional B-737-200s, plus smaller aircraft with which to launch a feeder network in western India.

In October, the airline becomes the first in India to avail itself of a new government-created opportunity to import its own oil. To save almost half of its annual cost, the carrier buys an export license on the open market and signs an 8% fee and royalty arrangement with India Oil Corporation, Ltd. for the delivery and storage of the precious product.

Traffic figures are not released, although it is reported that a \$900,000 profit is earned. That announcement is incorrect as the company has, since July, lost Rs 40 million (\$1.27 million).

On May 22, 1995, the company is taken over by **NEPC Airways, Ltd.** and renamed **Skyline NEPC, Ltd.**

DAN AIR/DAN AIR SERVICES, LTD.: United Kingdom (1953–1992). The charter carrier **Dan Air Services, Ltd.**, is formed in March 1953 at Southend by shipping brokers Davies and Newman, Ltd., later Davies & Newman Holding plc, and this corporate air transport division is registered as an airline on May 21; initial capitalization is £5,000.

Douglas DC-3 revenue operations begin with an ad hoc charter to Shannon via Manchester in June with the Douglas acquired from **Meredith Air Transport, Ltd.** Nonscheduled package holiday flights (later known as inclusive-tours) are undertaken during the remainder of the summer from Southend to Calvi, in Corsica.

Enplanements total 4,243.

A second DC-3 is purchased in February 1954 and flights are started to Biarritz, Ostend, Paris, and Pisa. Three Avro York I freighters are obtained in July.

The base of operations is moved to Blackbushe Airport, southwest of London, in January 1955, the same month in which the Yorks begin long-range freight charters to Africa and Asia.

Two more York Is are bought from **Air Charter, Ltd.** in 1956 in order to fulfill an Air Ministry contract for the carriage of stores from RAF Lyneham–Singapore.

In June, the first scheduled (summer-only) DC-3 service is initiated, Blackbushe–Jersey. Between November 16 and December 14, the company's 2 DC-3s make 11 roundtrip flights to Austria, taking over medicine and bringing to England 350 refugees of the Hungarian Revolution.

To supplement the Douglas transports on the Jersey run, a de Havilland DH 114 Heron 1B is leased for six months from **Overseas Air Transport, Ltd.** in June 1957, the same month a Bristol 170 Mk. 31 Freighter is acquired to service additional government contracts awarded during the year.

The final DH 114 Heron 1B service is completed in January 1958. Another Bristol Freighter is delivered on March 31, leaving the next day on a cargo flight to Gibraltar.

May is disastrous as two transports are destroyed in crashes. An Avro 685 York I freighter, with three crew, is destroyed in a hard landing at Luqa Airport, Malta, on May 20; there are no fatalities. Five days later, a second York with five crew is less fortunate when it crashes at Gurgaon, India, on an all-cargo service (four dead).

A two-year **British European Airways Corporation (BEA)** all-cargo replacement contract is received in 1959 for the state carrier's London (LHR)–Glasgow (Renfrew) via Manchester night freight route; the first flight is made by a DC-3 on May 25–26 and Yorks will later be added to the service.

Although the government's Singapore contract is concluded, it is replaced by one for the transport of the *Black Knight* rocket to its Australian test range. Twelve days are required to deliver the cargo to the Woomera site. Consequently, a third Bristol Freighter is purchased in July to begin the service.

Earlier in the year, a Bristol is converted to a passenger-carrying Wayfarer configuration and is employed with the DC-3s in operating inclusive-tour flights from London (LGW), Manchester, and other local destinations.

Three Airspeed AS.57 Ambassadors are purchased from the Australian airline **Butler Air Transport, Ltd.** in November; they are the company's first pressurized airliners.

In January 1960, two DH 104 Dove 1Bs are acquired, entering service at the beginning of the second quarter. During the spring, several additional BEA scheduled freight contracts are awarded.

In June, Yorks begin flying cargo from London (LGW) to Brussels, Milan, and Rome on behalf of **British European Airways Corporation (BEA)**. Meanwhile, the first Airspeed Ambassador enters company service on March 15; it will be joined by the other two in offering package holiday flights from London (LGW) for the summer season.

After taking over management of Luisgate airfield south of Bristol, the company is allowed to commence scheduled services in April from that point to Liverpool and in May, from Cardiff and Bristol to Jersey. Elsewhere, base operations are transferred from Blackbushe to London (LGW) as of May 31.

Two new routes, one international, are started on July 16: Cardiff and Bristol to Basel and Liverpool to Plymouth via Cardiff and Bristol. A significant increase in inclusive-tour flights occurs during the summer.

A DH Dove 1B extends the Liverpool end of the Plymouth–Liverpool route thrice weekly to Newcastle on January 4, 1961. **Scottish Airways, Ltd.**, its routes and lone DC-3, are acquired in March from Scottish Aviation at Prestwick and merged; an Ambassador is purchased at the same time.

A Bristol 170 inaugurates the ex-Scottish Prestwick–Isle of Man service on May 27. During the summer, scheduled flights to the Isle of Man are also started from Bristol, Cardiff, Exeter, Plymouth, Staverton, and Swansea. A Liverpool–Newcastle–Dundee frequency is initiated on July 7.

Liverpool–Rotterdam scheduled service is inaugurated in January 1962. Another Ambassador is added in April while a York I is eliminated in November. Bristol and London (LGW) to Ostend flights are also undertaken.

During the winter, **British European Airways Corporation (BEA)** places Argosies on its freight routes, thus ending the need for Dan-Air, Ltd.'s replacement York services.

Two of the last three company York Is are sold in February and May 1963. Another Ambassador is delivered in February and a DC-3 and a DH 114 Heron 1B are received in May, the latter replacing the Dove 1Bs on the Plymouth–Newcastle multistage route on September 18. One of the DH 104s is sold in October. Charter work is now handled almost exclusively by AS.57s and DC-3s.

Enplanements for the year total 115,215 (35,735 scheduled).

One of the three Bristol 170s is sold in January 1964 and the last York I is withdrawn in April, the same month in which the one and only DH 114 Heron 2B is received. Racehorse transport becomes a Bristol specialty and a full slate of tour flights is laid on during the summer.

In the first quarter of 1965, two DC-4s are chartered for six months from Trans World Leasing. The last Dove 1B is sold in February.

During the year, three unprofitable scheduled routes are dropped: Teesside–Cardiff via Chester; Cardiff–Amsterdam via Bristol; and Bristol–Plymouth. With the Heron 2B no longer needed to service these routes, it is sold in September; the DC-4s exit in October.

To replace the returned DC-4s, a DC-7BF is purchased in March 1966 and placed on all-cargo charters to Africa, the Mideast, and Asia.

A chartered Airspeed AS.57 Ambassador 2 with 4 crew and 55 passengers is destroyed on April 14 as the result of a bad landing on a wet runway at Beauvais, France; there are no fatalities. The company's Piper

PA-23 Apache training aircraft is destroyed in a Godalming crash on September 1 (two dead).

In October, the carrier purchases three de Havilland DH 106 Comet 4s from **British Overseas Airways Corporation (BOAC)**; two of the aircraft have been on hand since May 9 undergoing alterations. When the Comets enter nonscheduled passenger service during the winter, they automatically make Dan-Air, Ltd. the third British jetliner operator. Over the next 14 years, the carrier will come to operate more than half of all Comets manufactured.

A third ex-**British Overseas Airways Corporation (BOAC)** Comet 4 is delivered in April 1967, followed by a fourth in October. Meanwhile, in May, Isle of Man to Swansea and Carlisle scheduled flights commence. Two Airspeed Ambassadors are withdrawn during the year.

Completing a training flight, an Airspeed AS.57 Ambassador 2 with two crew is destroyed as the result of a bad landing at Manston on September 30, 1968; there are no fatalities.

Two DC-3s are also disposed of during the year. When **British Eagle Airways, Ltd.** fails in November, Dan-Air, Ltd. scrambles to pick up that carrier's next year's contracts with the travel agents Everyman Travel and Lunn-Poly.

Early in 1969, the contracts are awarded and to provide capacity, the airline now purchases two more Comet 4s and a pair of former **American Airlines** BAC 1-11-401AKs. The latter are placed into service in March from a base at Luton Airport, north of London.

In May, the **British Eagle Airways, Ltd.** London (LGW)–Newquay route is taken over; the route will prove unprofitable and will be suspended later in the year. The final DC-7BF service is completed in June, after which the freighter is sold.

The first transatlantic charter is flown in October when a Comet 4 takes an inclusive-tour from London (LGW) to Port of Spain, Trinidad. Additional fleet changes include the acquisition of five more Comet 4s and a BAC 1-11-301AG and the withdrawal of the DC-7BF freighter. The BAC 1-11-205 *Stalwart* is purchased from **British Eagle International Airways, Ltd.** on October 14.

Passenger bookings reach 509,025; airline employment stands at 800; and a £200,000 profit is reported.

The fleet at the beginning of 1970 includes 11 Comet 4s and 4 BAC 1-11s; the last Bristol 170 is sold in February. The former **British Eagle International Airways, Ltd.** BAC 1-11-205 *Superb* is acquired in March.

As a replacement for its last DC-3, a Nord 262 is purchased from **Air Ceylon, Ltd.** in June; following upgrade and crew training, it is placed in service on the Newcastle–Bristol via Liverpool and Cardiff route on July 22. At this point, the French-made machine is the only one of its type on the British civil aircraft register.

Meanwhile, on July 3, the carrier's first major fatal accident occurs. En route from Manchester to Barcelona with 7 crew and 105 tourists, a chartered Comet 4 is believed to have crashed into the sea 18 mi. NE of Barcelona with no survivors. In fact, the wreckage is found in the Montseny Mountains near Gerona, 32 mi. N of Barcelona on July 4. The outcome, however, is the same: no survivors.

On July 6, weekend Newcastle–Carlisle–Isle of Man AS.57 services begin and the final DC-3 service is completed in September. Arriving on a training flight from Newcastle on October 7, a DH 106 Comet 4, with four crew and five passengers, mistakenly makes a wheels-up landing at Woolsington; although the aircraft is damaged beyond repair, there are no fatalities.

On October 29, the U.S. Civil Aeronautics Board grants charter rights from the U.K. to the U.S. To promote the forthcoming American service, a joint marketing arrangement, Dan-Air International, is formed in cooperation with CPS Aviation Services.

On January 1, 1971, the company purchases the Boeing 707-321 *Clipper Splendid* from **Pan American World Airways (1)**. It enters service on the new transatlantic affinity group flights at the end of March, the same month in which two DH 106 Comet 4Cs are acquired. The de Havillands are used on charter flights to the Greek and Canary islands.

On May 1, the Avro 748-200 prototype is delivered; it is dispatched to Newcastle to replace the Nord 262 on the Bristol run.

The last AS.57 flight is made Jersey–London (LGW) on September 26 and thereafter the type is retired and withdrawn from the Dan-Air, Ltd. fleet as of November, the same month in which an Avro 748-226 is delivered. A BAC 1-11-414, first flown by **Bavaria Fluggesellschaft, mbH. & Co.**, is acquired on December 21.

Following its last revenue flight on January 26, 1972, the Nord 262 is withdrawn and in February it is sold to the French operator **Rousseau Aviation, S.A.**

On February 11, competitor **Skyways International, Ltd.** is purchased from Sterling Industrial Securities for £650,000. The arrangement is completed on April 12 and includes four older Hawker Siddley HS 748-100s that are allowed to continue the Skyways Ashford–Beauvais coach-air service under the title Dan-Air Skyways, with a modified green and red livery.

During February and March, **Channel Airways, Ltd.**'s four Comet 4Bs are purchased. Simultaneously, the failed Berlin-based charter carrier **Orientair** is acquired along with its contracts for nonscheduled Tenerife flights.

Dan-Air, Ltd. now inaugurates a number of new (including some inherited) "Link City" scheduled routes: London (CTN)–Leeds–Glasgow on April 11; Bournemouth–Newcastle via Birmingham, Liverpool, and Manchester on April 10; Swansea–Jersey and Newcastle–Jersey via Carlisle on May 27; and London (LGW)–Berne on June 5. Meanwhile, in May, a second B-707-321 is received from **Pan American World Airways (1)** and an Avro 748-232 is added in June.

Skyways International is completely absorbed by early 1973.

In March, three B-727-46s, purchased from **Japan Air Lines Company, Ltd. (2)** in 1972, are delivered, making Dan-Air, Ltd. the first British operator to fly this American type. The premier trijet revenue flight is made on April 13, Manchester to Alicante; also during April and May, six Comet 4s are withdrawn and two Comet 4Bs are added. By summer, all three Boeings are in service on the tour routes, including the planned ex-**Orientair** operation to the Canary Islands with a Berlin-based machine equipped with long-range fuel tanks.

In August, a £1.7-million contract is signed with C.P.S. Jetsave for next year's transatlantic charters to Calgary, Vancouver, Toronto, as well as Trinidad and Barbados. Other new routes opened are from Teesside to Amsterdam, from London (LGW) to Clermont Ferrand and Montpellier, from Newcastle to Bergen, and from Ashford to Jersey.

Four more Comet 4Bs are received in October along with a Comet 4C; three of the five will never enter service. In November, the final Comet 4 service is completed and the aircraft is withdrawn.

Passenger boardings for the year rise 26%, surpassing two million (2,217,000), while cargo traffic skyrockets by 64%.

The workforce in 1974 totals 2,298.

With the delivery of two additional B-727-46s in April, a new color scheme is introduced. On April 20, scheduled Comet 4 service is initiated London (LGW)–Newcastle and, on May 20, a pooled HS 748 London (LGW)–Ostend scheduled route is flown with **Sabena Belgian World Airlines, S.A.** Inclusive-tour flights are inaugurated from Berlin to the Canary Islands and scheduled service is started from London (LGW) to Newcastle and Bristol, continuing on to Amsterdam.

The airport at Ashford is closed on October 31, requiring movement to nearby Lydd.

Passenger traffic climbs 4% to 2,258,000. Total employment is 2,000 and at the year's end the fleet numbers 33 aircraft.

During the first quarter of 1975, four ex-**Court Line, Ltd.** BAC 1-11-518FGs are acquired, together with two BAC 1-11-207AJs, the last two purchased on March 29 from **Zambia Airways Corporation**. Five former RAF Comet 4Cs are also taken over by the company, converted at Lasham, and placed into service on inclusive-tour operations. In March, Liverpool is dropped from the route network, effectively ending service to Amsterdam. During the year, two Vickers Viscount 700s and an 800 briefly join the fleet.

On May 24, an Avro 748, based at Aberdeen, inaugurates service to Isle of Man while simultaneously, London (LGW)–Isle of Man flights also begin. During the year, all-cargo night flights are started from London (LGW)–Belfast. A BAC 1-11-509EW is delivered in October, the same month in which the Viscount 800 is withdrawn. The two Viscount 700s depart the fleet in December.

Enplanements for the year jump 13% to 2,507,000. Freight traffic is off by a huge 98% to 31.71 million FTKs.

Employment is increased by 9% in 1976 as the workforce is increased to 2,365.

On January 6, HS 748 Cardiff–Glasgow via Leeds scheduled service is inaugurated. An advance booking U.K. to Africa charter service is begun and the fleet continues to grow as 2 B-707-320Cs, 1 used B-727-100, 1 used BAC 1-11-500, and 8 HS 748s are added.

On behalf of International Weekend, Inc., B-707-321 London (LGW)–Boston charter flights are flown weekly and biweekly between March and November. In a public ceremony on October 28, the Lord Mayor of Newcastle-upon-Tyne christens one of the BAC 1-11-207s *City of Newcastle-upon-Tyne*.

Passenger boardings climb 14% to 2,845,734. Freight traffic skyrockets an almost unbelievable 980% to 60.2 million FTKs.

Operations continue apace in 1977–1978. To fly contracts in support of the growing North Sea oil industry, a base of operations is established at Aberdeen, Scotland, to which 14 HS 748s are assigned for the delivery of workers and supplies to Scatsa and Sumburgh. During this period, HS 748 and BAC 1-11 scheduled service is inaugurated from London (LGW) and Newcastle to Berne, Switzerland.

A Vickers Viscount 810 is acquired in January 1979. Two more One-Elevens are acquired during the first quarter, including a former **Bavaria Germanair Fluggesellschaft, mbH. & Co.** DASH-515 and the **British Caledonian Airways, Ltd. (BCAL)** DASH-501 *Isle of Arran*.

On July 1, the company joins the Royal Mail program known as "Spokes from Speke," flying an Avro 748 each night from Newcastle to the sorting hub at Liverpool's Speke Airport and back to Newcastle for distribution.

On July 31, a chartered HS 748-1A, with 3 crew and 44 passengers, fails to become airborne on takeoff from Sumburgh, Shetland Islands, and crashes into the sea 50m. offshore (17 dead). Speculation is that the elevator gust-lock reengaged, causing the crash.

While on final approach to London (LGW) on September 5, a B-707-321 pitches down to –100 degrees in 5 seconds from an altitude of 800 feet; the accident occurs at such a low altitude that there is no in-flight explosion, despite disintegration of its fuel-laden wing.

Removal of the Comets, whose final service was operated the previous October, commences in 1980 as Dan-Air/Dan-Air Services, Ltd. begins in March to take delivery of the first of 10 Boeing 727-200s.

While on initial approach to Tenerife after an April 25 flight from Manchester, Flight 1008, a B-727-64 with 8 crew and 138 passengers, passes the final point (FP) beacon, but continues on to crash into a mountain in the Esperanza Forest; there are no survivors. A mass funeral for 121 victims of the tragedy is held in Manchester on May 12.

The first of 10 B-737-200s arrives in October and the last of 9 Comet 4Cs operated since 1971 is withdrawn in November 9 following a celebration trip made by 119 passengers from Gatwick Airport.

In 1981, routes and frequencies of scheduled services are maintained as additional inclusive-tour and charter destinations are added, along with the remainder of the new B-727-200 equipment. The Viscount 810 is withdrawn in April.

While descending on a flight from London (LGW) to East Midlands on June 26, an HS 748-2A freighter, with three crew, suffers the loss of its right-hand rear door, which strikes the horizontal tailplane. Out of control, the plane dives to earth, losing its wings in the process; there are no survivors.

On September 30, the last Comet 4C, withdrawn in late 1980, is flown from Lasham to East Fortune, Scotland, where it will serve as a static

airport display. Three BAC 1-11-531s, the *Poa*, *Chirripo*, and *Arenal* are purchased from **LACSA (Lineas Aereas Costarricenses, S.A.)**.

Chairman F. E. F. Newman and Managing Director A. J. Snudden oversee a 3,300-employee workforce in 1982.

The former **Laker Airways, Ltd.** route from London (LGW) to Zurich is taken over in February. The carrier also purchases Laker's 50% stake in Gatwick Handling, Ltd., adding it to its own 50% share and making the service company a fully owned subsidiary.

A BAC 1-11-515 is leased on March 1 to **British Caledonian Airways, Ltd. (BCAL)**. Graham Hutchinson becomes managing director at the end of the year.

Orders are placed in 1983 for British Aerospace BAe 146-100 jetliners. A BAC 1-11-401 is sold to Westinghouse Electric on February 3 for use as an executive transport. It is replaced by a pair of former **Air Manchester, Ltd.** BAC 1-11-416s chartered from their manufacturer.

When the BAe 146-100s begin to arrive in May, they take over the HS 748 services from London (LGW) to Berne and from Newcastle, Cardiff, and Bristol to Amsterdam. At this point, one of the two BAC 1-11-416s is returned. Passenger traffic for the year totals 3,495,000.

Invited in by the Saarland government, the carrier inaugurates scheduled BAe (HS) 748 flights between Saarbrücken and West Berlin on January 9, 1984, taking over from **TAT (Touraine Air Transport S.A.)**.

The number of employees jumps 4.5% to 2,953 and the fleet comprises 48 aircraft, including 9 B-727-200s, 19 BAe (BAC) 1-11s, 9 BAe (HS) 748s, 6 B-737-200s, and 3 BAe 146-100s. An order is placed for a B-737-3Q8 and, on March 28, a BAC 1-11-525 is leased from **TAROM (Transporturile Aeriene Romane, S.A.)**.

Freight traffic accelerates 41.7% to 2.3 million FTKs as enplanements skyrocket 24.2% to 4.6 million. The year's net profit is \$4.6 million.

During the winter of 1985, BAe 146-100 charter flights are inaugurated to Innsbruck. New BAe 146 test services are flown from Berlin-Amsterdam via Saarbrücken. As one BAe (BAC) 1-11-400 is retired, one each Airbus A300B4-203 (leased from **Hapag-Lloyd Fluggesellschaft, mbH**), B-737-3Q8, and B-727-200A join the fleet.

Passenger boardings rise 8.9% to 5,007,000 and freight traffic skyrockets 85% to 4.28 million FTKs. Unfortunately, the net profit dips to \$1.58 million.

The workforce is increased by 7.6% in 1986 to 3,150.

During the winter ski season, BAe 146 charters are launched from the U.K. to Innsbruck, Chamber, and Berne.

In the spring, thrice-weekly scheduled service is inaugurated to the former. A second A300B4 to replace the first, is leased from **Hapag-Lloyd Fluggesellschaft, mbH**, and placed in service, and one HS 748 is retired.

In November, the company agrees to a U.K. Equal Opportunities Commission demand that it stop refusing to recruit male flight attendants. Customer bookings climb 6% to 5,309,000 and cargo jumps again, up 35.8% to 2.75 million FTKs.

The employee population is enhanced a further 3.8% in 1987 to 3,580 and the last BAC 1-11-400 is withdrawn in November. Passenger boardings rise 3.2% to 5,481,000 and freight climbs 8.2% to 2.98 million FTKs.

The workforce is cut 7.3% in 1988 to 3,320 and the fleet now includes 1 owned Airbus Industrie A300B4-203, 4 B-727-46s, 100s, 7 B-727-200s, 11 BAC 1-11-500s, 6 BAC 1-11-200/300/400s, 5 B-737-200s, 1 B-737-3Q8, 15 BAe 748-B2s, and 3 BAe 146-100s. Orders are outstanding for 1 B-737-3Q8, 2 B-737-4Q8s, 1 A300B4, and 1 BAe 146-300. The wholly owned subsidiary Sheawater Insurance Co., Ltd., is incorporated on February 22.

On September 10, 20 members of the Inverness Baptist community, led by Rev. William Freel, become involved in a debate with the airline, which has mixed up their bookings on a flight to London with connection to the Holy Land. Dan Air at day's end arranges a special charter that transports the group to London (LHR), where it is able to link up with other Baptists flying to Tel Aviv.

Class Elite business-passenger oriented scheduled service is launched to the sound of bagpipes in October over a route from London (LGW)

to Paris. Customer bookings move ahead by 6% to 5,804,000 and cargo climbs 28.2% to 3.82 million FTKs. Revenues total \$602 million and all-low profits of \$16.9 million (operating) and \$17.1 million (net).

The payroll is increased by 5.3% in 1989 to 4,135 and the fleet now includes 46 aircraft. Class Elite flights are initiated to Vienna in May and Berlin in July.

Passenger boardings increase 8.1% to 6,276,000, but freight climbs only a slight 0.7% to 3.63 million FTKs.

Company employment is cut by 5.4% in 1990 to 3,910. Business class is introduced on several routes, including new ones from London (LGW) to Vienna and to Berlin (Tegel Airport). Beginning in late June, the company contracts with **Virgin Atlantic Airways, Ltd.** to provide discount airfares within the U.K. for Virgin's arriving transatlantic passengers.

In July, Davies & Newman approach company-rescue specialist David James, who has saved 80 companies from bankruptcy, to take over its management and save the airline. James agrees to start work in November but, by October 18, the airline is 12 hours away from financial collapse. Notified of the situation while in Los Angeles, James flies back the same day and, overnight, is able to negotiate £40 million (\$72 million) in extended credit.

The final A300B4 is retired in October, the last of 10 B-727-100/200s is withdrawn in November, and in December, four-times-per-week service is initiated from Manchester to Göteborg, Sweden.

Customer bookings slide 6.1% to 5,892,000 and cargo drops by 4% to 3.48 million FTKs.

The employee population declines 45.7% in 1991 to 2,123 and the fleet now includes 2 BAe (BAC) 1-11-509EWs, 1 each 1-11-515FB, 1-11-517FE, and 1-11-520FN, 4 1-11-518FGs, 2 1-11-531FSs, 2 each BAe 146-100s and 146-300s, 1 each B-727-46, B-727-212, and B-727-2D3A, 2 B-727-217As, 1 each B-727-230A, B-727-264A, B-727-264A, B-727-276A, 2 B-727-277As, 1 each B-737-2E7A, B-737-2U4A, and B-737-210A, 2 B-737-3Q8s, 3 B-737-4Q8s, 3 BAe (HS) 748-B1s, and 3 BAe (HS) 748-B2s. Orders are outstanding for 2 BAe 146-300s, 3 B-737-4Q8s, and 3 B-737-4S3s. The B-727-46 is leased to **SAM (Sociedad Aeronautica de Medellin, S.A.)** in Columbia and one B-727-276A is chartered to **Sun Country Air Lines** in the U.S.

The demise of **Air Europe, Ltd.** will provide the opportunity for some expansion and, indeed, keep the older company from going under itself. Weekly flights are launched in January from Manchester to Innsbruck.

The Western response to Iraq's invasion of Kuwait, Operation Desert Storm, is unleashed at the end of the month. Scheduled traffic for the carrier declines by 35% and revenues are off by 60%. Still, income is generated at the beginning of February by the sale of the company's engineering unit to FLS Aerospace of Denmark for £27.5 million.

On March 1, daily service is inaugurated from London (LGW) to Amsterdam and from Manchester to Paris (CDG). By April, traffic is back to its 1990 level. Other scheduled markets are opened at Oslo, Brussels, and Gibraltar and a BAe 146-200 is leased during July.

In October, a £49.3 million (\$85 million) refinancing occurs. Recession and the Gulf crisis cause passenger boardings to plunge another 17.6% to 4,857,751 and freight falls 12.5% further to 3.05 million FTKs.

Airline employment in 1992 stands at 2,150.

In January, security guards must be called to maintain order on a company B-727-276A at Geneva after its captain agrees to delay departure with 140 passengers and wait three hours for 46 others caught in a traffic jam while returning from a horror movie festival.

Six weekly return flights begin on February 26 from London (LGW) to Stockholm (Arlanda Airport).

CEO David N. James becomes chairman on March 1 and is succeeded by **Cathay Pacific Airways (Pty.), Ltd.**'s former European general manager, John Olsen.

At the beginning of the summer schedule, orders are placed for six BAe 146-300s for delivery the following year. Meanwhile, two of the

new type arrive under lease and help to inaugurate the company's summer schedule.

On March 2, daily flights commence from London (LGW) to Athens. The Stockholm frequencies are doubled on March 29 and new daily Gatwick to Rome roundtrips commence on April 3. Six daily return flights from London (LGW) to Barcelona are started on May 5.

The Athens route is extended in June to Istanbul and Cairo while the last of five BAe 146-100s is withdrawn in July.

After two years of decline, the carrier is unable to maintain fiscal viability and, in late September, suspends its shares on the London Stock Exchange and begins looking for another rescue similar to the previous year's. Simultaneously, the last of 20 HS 748s first operated in 1971 departs the fleet.

Both **Virgin Atlantic Airways, Ltd.** and **British Airways, Ltd.** (2) review the company and, for the symbolic figure of £1 sterling, the company is purchased by British Airways on October 30. It is allowed to operate through the end of the year as preparations are made to turn its assets over to **British Airways Regional, Ltd.**

Customer bookings for the final year are down another 11.2% to 4,110,456, but cargo grows 10.4% to 4.06 million FTKs.

There is an unofficial website at <http://www.concentric.net/~mchallen/danair.htm>.

DANAIR, A.S.: Denmark (1971–1997). Danair, A.S. is formed at Copenhagen as Denmark's primary domestic passenger airline and as a consortium enterprise in February 1971. Shareholding is held by **SAS (Scandinavian Airlines System)** (57%), **Maersk Air, A.S.** (38%), and **Cimber Air, A.S.** (5%). The carrier itself does not actually fly any services, as they are scheduled by the partners, which supply both aircraft and flight crews as required. When operations begin on November 1, **SAS (Scandinavian Airlines System)** dedicates a Douglas DC-9-21, **Maersk Air, A.S.** a Boeing 737-2L9, and **Cimber Air, A.S.** a VFW-614. Chairman Frede Ahlgreen Eriksen and his 18 employees initially schedule flights to Billund, Esbjerg, Karup, Odense, Skrydstrup, Stauning, Sonderborg, Thisted, and the Faroe Islands.

Services continue apace in 1972–1974 with Aalborg and Aarhus added as markets. While **SAS (Scandinavian Airlines System)** continues to supply two DC-9-21s, **Maersk Air, A.S.** alters and increases its contribution by providing four Fokker F-27s. **Cimber Air, A.S.**, having deleted its VFW-614, contributes two Nord 262s.

Enplanements during the latter year are 506,698. The workforce in 1975 stands at 11. Passenger boardings rise a miniscule 1% to 511,816.

The fleet is realigned once again in 1976, this time to an all-jet configuration. Gone are the Fokkers and Nordes, replaced by two VFW-614s, a Boeing 737-2L9, and two more DC-9-21s. Customer bookings accelerate a handsome 17% to 627,636.

Enplanements in 1977 total 679,880 and jump by 8% in 1978 to 739,000. Operations continue apace during the remainder of the decade and throughout the 1980s.

During the early 1990s, Chairman Eriksen's workforce is reduced to nine. While there are no changes in the route, the contributed equipment is revised. **SAS (Scandinavian Airlines System)** still employs DC-9s, but adds McDonnell Douglas MD-80s and Fokker F.27s. **Cimber Air, A.S.** contributes Avions de Transport Regional ATR42s, while **Maersk Air, A.S.** provides Boeing 737-2L9s, Shorts 360s, and Fokker 50s.

By 1994, the contributed fleet includes one **SAS (Scandinavian Airlines System)** MD-80, one **Cimber Air, A.S.** ATR42-320, and one **Maersk Air, A.S.** Fokker 50.

Operations cease on September 30, 1995. All efforts to resume operations fail and the company is liquidated in 1997.

DANBURY AIRWAYS: United States (1980–1981). Danbury Airways is set up by John Dunning at Danbury, Connecticut, in 1980 to provide scheduled passenger and cargo services to New York (JFK and LGA). Although daily de Havilland Canada DHC-6-200 Twin Otter roundtrips are duly inaugurated, air traffic control (ATC) restrictions imposed in

the wake of the summer 1981 PATCO air traffic controllers' strike restrict the commuter's income and push it out of business.

DANISH AIR TRANSPORT, A.S.: P.O. Box 80, Vamdrup, DK-6580, Denmark; Phone 45 7558 3777; Fax 45 7558 3772; <http://www.daa.dk/dat>; Code DX; Year Founded 1989. DAT is established by former military pilot Capt. Jesper Rungholm at Copenhagen in 1989. With the assistance of several employees, a Shorts SC-7 Skyvan is imported from Thailand and employed to offer European all-cargo services. During the summer and on weekends, the aircraft is employed to fly sports parachutists.

A second SC-7 is acquired in 1990, as is a contract from **DHL Worldwide Express**. Managing Director Rungholm's company now flies general cargo, as well as such priority express as spare automobile parts. A Beech King Air 90 is purchased in 1991, allowing the inauguration of nonscheduled passenger charters. A Fairchild-Swearingen Metro II is leased in 1992.

A total of seven bases are established between 1993–1998, including four in Denmark, two in France, and one at London (CTN) in England. Revenue passenger and cargo flights are operated throughout Europe and into Africa and the CIS. DAT aircraft are reported from Reykjavik in the west to Alma Ata in the east and from the Kirkenes in the north to Dakar in the south.

With the addition of two Beech 1900Cs in 1994–1996, scheduled services are launched between Esbjerg, Aalborg, and Stavanger. Additional cargo contracts are undertaken on behalf of **DHL Worldwide Express**.

DAT operates one each Beech King Air 90 and Piper PA-23 Aztec from Kolding Airport at Vamdrup; a Beech 1900C and two Cessna 501 Citation Is from Billund; one each all-cargo configured Cessna 208 Caravan I and Shorts SC-7 Skyvan from Copenhagen; and one each Beech 1900C and Embraer EMB-120 Brasilia from Copenhagen.

At London (CTN), the carrier stations one each all-cargo configured Beech King Air 90 and Cessna 406 Caravan II, plus a Beech 1900C passenger-turboprop. A Skyvan freighter is stationed at Le Puy, France, while one each passenger-configured King Air 90 and Super King Air 200 are based at Montpellier.

A new Embraer EMB-120RT Brasilia enters service in January 1998. A second Brasilia is acquired on October 26; equipped with an oversized galley, it operates charters from the company base at Esbjerg. Two SAAB 340As are also acquired, but these are leased to **Aurigny Air Service, Ltd.** in early 1999.

An ATR42-430 is leased from **Cimber Air, A.S.** on July 1, 2000 and employed to operate replacement flights to Geneva on behalf of **Regional Airlines, S.A.**

DANUBE AIR, LTD.: Hungary (1990–1992). Danube Air is established at Budapest in March 1990. Laszlo Kurtos is named managing director of the charter operation, which is financed by the Austrian company IBU.S. and the FBO Viennair. A Let 410 is leased from **CSA (Czechoslovak Airlines)** and is employed to operate nonscheduled flights linking the carrier's base with Vienna.

Plans are made in early 1991 to offer scheduled services to Graz, as well as destinations in northern Italy, Romania, and Bulgaria. Unable to maintain viability in a time of recession, the carrier closes down in 1992.

DANZIGER LLOYD LUFTDIENST, GmbH.: Poland (1921–1923). As only Danzig-registered aircraft are allowed to fly over the League of Nations-administered "Polish Corridor," which separates Germany in the west from East Prussia, **Lloyd Luftdienst, GmbH.** affiliate **Lloyd Ostflug, GmbH.** forms this subsidiary for that purpose in late spring 1921. New Junkers F-13s are employed during the summer to initiate international service from Danzig (Gdansk) to Königsberg and Memel.

In the spring of 1922 the route is extended eastward to Riga via Kaunas and westward to Stettin, then on to Hamburg.

When the German parent becomes part of the **Deutscher Aero Lloyd, A.G.** conglomerate on February 6, 1923, its wholly owned Polish

associate is drawn in as well. Danziger Lloyd Luftdienst is joined with **Danziger Luft Reederei, GmbH.** in April to form **Danziger Aero Lloyd, A.G.**

DANZIGER LUFT REEDEREI, GmbH.: Poland (1919–1921). As only Danzig-registered aircraft are allowed to fly over the League of Nations-administered “Polish Corridor,” which separates Germany in the west from East Prussia, **Deutsche Luft Reederei, GmbH.** forms this subsidiary for that purpose in October 1919. In 1920, this carrier becomes the first noncharter member to join the International Air Traffic Association (IATA). On July 29, its single Fokker F-III launches international service from Danzig (Gdansk) to Königsberg and Memel. The route is extended to Riga and Reval in August.

When the German parent becomes part of **Deutscher Aero-Union, A.G.** on April 27, 1921, its wholly owned Polish associate joins as well.

On February 6, 1923, Danziger Luft Reederei is joined with **Danziger Lloyd Luftdienst** to form, effective in April, **Danziger Aero Lloyd, A.G.**, a component of the **Deutscher Aero Lloyd, A.G.** conglomerate.

DANZIGER LUFTPOST GmbH.: Poland (1921–1923). As only Danzig-registered aircraft are allowed to fly over the League of Nations-administered “Polish Corridor,” which separates Germany in the west from East Prussia, **Junkers Luftverkehr, GmbH.** forms **Danziger Luftpost** as a subsidiary for that purpose on February 26, 1921.

In the summer of 1922 international F-13 service is inaugurated from Danzig (Gdansk) to Königsberg and Memel. The route, which is the same as that flown by **Danziger Lloyd Luftdienst (DLL)**, is also extended to Riga and Reval in August.

In 1923, the two competing airlines (DLL is now **Danziger Aero Lloyd, A.G.**) come to operate the route, now extended, alternately, to Berlin. On October 22, DL is one of six small companies combined into the Junkers-sponsored Ost-Europa Union.

DAP AIRLINES. See **AEROVIAS DAP, S.A.**

DARDANEL A.O.: Cenakeray, Turkey; Year Founded 1997. Dardanel is established at Cenakeray in July 1997 as the air transport division of a frozen food company. Nonscheduled flights commence with a single leased Beech 1900C.

Two purchased Beech 1900Ds replace the chartered airliner in January 1998 and inaugurate daily scheduled services that link the company's base with Istanbul. Plans are made to inaugurate frequencies to Edremit and Ankara.

DARIEN AIRLINES. See **ADSA (AEROVIAS DARIENTAS, S.A.)**

DAS AIR CARGO (DAIRO AIR SERVICES, LTD.): ANA House, Aviation Court, Gatwick Road, Crawley, West Sussex, RH10 2RJ, United Kingdom; Phone 44 (1293) 540; 303; Fax 44 (1293) 551 545; http://www.dasair.com; Code SE; Year Founded 1983. This all-cargo carrier is formed by aviator Joseph C. Joy and his politically connected wife Daisy at Entebbe, Uganda, in 1983 to operate a freight service for the nation now freed of dictator Idi Amin and allow the import of badly needed products from Europe. The name is based on the corporate name **Dairo Air Services, Ltd.**, with “Dairo” being an acronym for Daisy and Roy. A Boeing 707-321C Stratofreighter is acquired by charter and an initial flight to London (LGW) is undertaken with a cargo of flowers, coffee, and minerals.

At London, Chairman Joy, who also serves as pilot, forms an association with local air-freight forwarder Andrew King and a DAS office is opened at Gatwick Airport. The one available avenue from the U.K. to Africa with a capacity shortage at this point is from London (LGW) to Entebbe via Lagos in Nigeria. For the next year, the Joys and King offer a weekly international roundtrip service with mixed cargo over this route, which is enriched by the need for supplies to support the growing Nigerian energy industry.

In 1985, King joins with Andrew Leslie to form ANA (“Andy and Andy”) Aviation Services, Ltd., which now receives a contract to manage and operate DAS Air Cargo, Ltd. and to act as its European sales agent and intrinsic U.K. partner. King becomes operations director.

Meanwhile, having also added a B-707-338C, Chairman Joy flies charter and scheduled cargo services linking London (LGW) with Accra, Entebbe, Kano, Lagos, and Port Harcourt. A long-standing, thrice-weekly contract sees the company's Boeings transport flowers from Nairobi to Rotterdam during the October to May flower seasons through 1986.

Regular freight services to Ugandan communities, including Entebbe (serving the capital, Kampala), as well as Nigeria and Kenya, begin in 1987. At the same time, the company begins a close working relationship with the Zimbabwe-based all-cargo carrier **Affretair, Ltd. (2)**. The B-707-338C is soon leased to the U.K. carrier **Anglo Airlines, Ltd.** That charter ends in 1989, when flights to Ghana begin.

In August 1990, the fleet is increased by a third through the addition of a B-707-379C and Philip Thompson is appointed commercial director. A U.S. office is opened at Houston, where DAS Air Cargo U.S.A. is established as a jointly owned independent company held by ANA Aviation Services, Ltd. and its Orlando, Florida-based director Terry Phipps.

In January 1991, weekly B-707F service is initiated from Sharjah, U.A.E., to Entebbe, with continuing service to Nairobi, Kenya. The newest Stratofreighter is, however, removed for financial reasons later in the year. Still, an office is opened in Orlando and sales agents are appointed in several other major U.S. cities. Reserved space cargo services from North America to London are provided, as part of a new cargo interline arrangement and under contract by **Virgin Atlantic Airways, Ltd.**

Scheduled service is initiated in 1992 to Gambia and Sierra Leone and former **Trans World Airlines (TWA)** executive James Milton is appointed to open a strategically important office at Washington, D.C.

While en route from London (LGW) to Port Harcourt on November 25, the B-707-321C, with three crew and one passenger, undershoots the runway at Kano by 5 km. while landing in a sandstorm; although the aircraft is damaged beyond repair, there are no fatalities.

The economic slowdown is dramatically reversed in 1993; business improves and a frequency is initiated to Djibouti. Chairman Joy and his partners oversee a workforce of 50 and 2 more aircraft are obtained, a B-707-369C replacement and a B-707-379C, the latter by lease. Destinations visited include London (LGW), Accra, Banjul, Entebbe, Free-town, Djibouti, Kano, Lagos, Nairobi, and Port Harcourt.

At the same time, interline agreements are executed with **Air U.K., Ltd., American Airlines, British Airways, Ltd. (2), Delta Air Lines, Trans World Airlines (TWA), United Airlines**, as well as **Virgin Atlantic Airways, Ltd.** Most importantly, DAS becomes African interline cargo partner for **Continental Airlines** and agrees to transship the American major's goods to that continent following their arrival at London. This arrangement supersedes the previous reserved space agreement with **Virgin Atlantic Airways, Ltd.** and allows **Continental Airlines** to promote DAS Air Cargo U.S.A. in America.

The company is voted “Best All Cargo Airline in 1993,” by *Air Cargo News*.

The company begins a program of diversification in 1994, with emphasis upon worldwide ad hoc operations throughout Africa and as far afield as the Caribbean. A large contract is received from the U.S. Army for the transport of goods to Guantanamo Bay, Cuba, from Antigua.

A Douglas DC-10-10 is ordered as frequencies commence from London (LGW) to Lusaka. Flights commence to Dubai on behalf of Sheikh Ahmed Bin Saeed Al Maktoum, chairman of **Emirates**. The wealthy airline leader, who owns over 600 thoroughbreds, pays for the transport of over 200 of these prize horses from London to Dubai for the warm winter season.

The chartered fleet in 1995 includes one each B-707-338C, B-707-351C, B-707-369C, and B-707-379C, plus the DC-10-30CF, which enters service in November.

Flights continue, linking Uganda with London, Dubai, Amsterdam, and points throughout sub-Saharan Africa. As has become a usual practice, the company increases its services to The Netherlands between May and September to four per week, transporting tons of fresh flowers to Rotterdam and Amsterdam.

Early in **1996**, a two-year all-cargo contract is signed with **Air Afrique, S.A.** Flights to Dubai are increased to thrice weekly.

Just after landing at Bamako after a June 30 all-cargo service from Niamey on behalf of **Air Afrique, S.A.**, a B-707-369C with four crew is hit by a powerful burst of wind during a rainstorm. The gust lifts the left wing, forcing the right wing to hit the ground and the Stratofreighter to veer off the runway. At this point, the right wing smashes into a bunker and separates from the fuselage. Although the aircraft must be written off, there are no serious injuries reported.

A total of 31.55 million tons of goods are flown during the year and revenues of \$59 million are generated.

Operations continue in **1997**. During the years, the B-707-379C operates weekly roundtrip all-cargo services, on behalf of **Air Afrique, S.A.**, from Abidjan and Dakar to New York (JFK). Business improves as a total of 44.02 million tons are delivered and revenues jump to \$67.5 million.

The fleet in **1998** includes 3 B-707Fs and 2 DC-10-30Fs. As of March 10, shipments of explosives are not accepted for DAS flights into Nigeria, while any arms, ammunition, or explosives going into Bahrain must have written authority from that country's interior ministry prior to forwarding. Flights to Kinshasa and Lubumbashi are inaugurated on March 11 via Ostend.

Service is started on April 23 to Doha via Bahrain while additional flights into Muscat are begun via Abu Dhabi.

Weekly roundtrip service to Monrovia and Freetown is restored on July 2. The company continues to provide scheduled all-cargo flights between Africa, Europe, and the Mideast through the remainder of the year and into the next.

At the beginning of **2000**, the 6-plane fleet of DAS continues to operate its network across 6 continents. Eight weekly DC-10-30F flights from London and Amsterdam to Africa and three to Dubai are offered.

Arriving at Entebbe, Uganda, after an April 30 service from London (LGW), a DC-10-30F carrying 50 tons of freight overruns the runway and plunges into the shallow waters of Lake Victoria, breaking into two pieces. Although no injuries are reported, the aircraft must be written off. It will be reported that the freighter, near maximum landing weight, could not stop on the rain-slick pavement and to avoid approach lights and ILS antenna, had steered left off the runway, but could not be halted before hitting the water.

In May, the weekly Stratofreighter return service from Johannesburg to Entebbe is doubled to twice weekly. On August 3, a DC-10-30F is chartered from **Skyjet, S.A.** wearing full Skyjet colors and DAS titles.

On October 2, DAS and the Tanzanian Chamber of Commerce step forward with an offer to purchase 30% stakes (the Uganda and Tanzania holdings) each in the failing **Alliance Airlines (African Joint Air Service)**, with DAS also bidding \$5 million to take over the 40% stake held by Transnet. The deal is conditional in that DAS must also be given traffic rights to the Alliance routes and the Alliance debt must be satisfied.

The DAS rescue effort collapses on October 10. With both Uganda and Tanzania having failed to pay their part of expenses, **South African Airways (Pty.), Ltd.** refuses to continue operating its Boeings for the partnership airline. Without lift, the company is forced to suspend all operations the same day.

On December 22, the company is licensed by the Ugandan Civil Aviation Authority to offer scheduled regional services from Entebbe. Although it is reported that flights will soon begin employing a single Douglas DC-9-41, no other details are available.

DAS DIRGANTARA AIR SERVICES: Jalan Angkasa, Kemayoran, P.O. Box 3308, Jakarta Pusat, Indonesia; Phone 62 (2) 180 93372; Fax 62 (2) 189 94348; Code DIR; Year Founded 1978. Based at

Jakarta, Dirgantara inaugurates nonscheduled charter flights in **1978** while awaiting receipt of a scheduled operating permit, which is forthcoming in **1979**. Scheduled services are started during the year in the West Kalimantan province on the island of Borneo. Many of the flights represent replacement services undertaken on behalf of **Merpati Nusantara Airlines**.

During the early **1980s**, the fleet grows to comprise 1 Fokker F-27J, 2 IPTN (CASA) NC-212-100 Aviocars, 2 Douglas DC-3s, 8 Britten-Norman BN-2 Islanders, plus 1 Bell 206B JetRanger helicopter. Destinations visited include Pontianak, Putusibau, Singkawang, and Sintang. As before, ad hoc charter and contract service flights are also made. Although Kalimantan services are maintained through the remainder of the decade, the fleet of President Makki Perdana Kusama's airline, the smallest in Indonesia, is altered.

Gone in **1990** are the Fokker and Douglas transports, replaced by two more Islanders and two more Aviocars. Standardization is still not arrived at as another F-27J is leased in **1991**.

While returning to Jakarta on June 25, **1992**, after being overhauled at Singapore, a IPTN (CASA) NC-212-100 Aviocar with three crew experiences engine problems and crashes at Kalimantan; there are no survivors. An Islander is retired later in the year.

Operations continue apace during **1993–1994** as the fleet is slightly changed to include 3 IPTN (CASA) NC-212-100s, 2 NC-212-200s, and 9 Islanders. During the latter year, employment totals 198 and a total of 200,000 passengers are flown.

Services continue in **1995–1996**. Just after takeoff from Banjarmasin on December 7 of the latter year, an IPTN (CASA) C-212-A4 Aviocar with 2 crew and 15 passengers develops engine problems. While attempting to return to its point of origin, the turboprop hits a gas factory 2 km. from the runway and crashes (16 dead).

President Kusama's fleet is increased in **1997** by 1 replacement Aviocar, 1 Douglas DC-3, and 8 Islanders. Numerous destinations throughout West Kalimantan are visited.

The national currency and economic problems that begin during the second half of the latter year in Southeast Asia have a devastating impact on the carrier. Traffic plunges, personnel are laid off, and aircraft are withdrawn. In the weeks after President Suharto's resignation on May 21, **1998**, it is reported that the airline is near collapse.

The company is able to avoid failure. It is, however, reorganized, with Makki Perdanakusuma becoming president.

The fleet in **1999–2000** includes 4 Aviocars. Scheduled destinations visited under Merpati's flight numbers include Balikpapan, Banjarmasin, Berau, Datadawai, Ketapang, Long Apung, Long Bawan, Nunukan, Pangkajene, Pontianak, Putussibau, Samarinda, Sampit, Sintang, Tanjung Setor, and Tarakan.

DASH AIR: United States (1983–1984). The Irvine-based **Air Irvine** is sold to new ownership in the spring of **1983**. It is reformed it given it a new name: Dash Air. From a base at Orange County's John Wayne Airport, the company inaugurates revenue services on June 1 employing a fleet of 3 Embraer EMB-110P Bandeirantes, 2 Shorts 360s, and 3 Piper PA-31 Navajo Chieftains. Destinations served include Fresno, Los Angeles, Monterey, Ontario, Orange County (Santa Ana), Palm Springs, San Francisco, and Santa Barbara.

A total of 48,465 passengers are flown on the year.

Early in **1984**, officials optimistically place an order for two Avions de Transport Regional ATR42s, with options on two more. Start-up and expansion costs in the tough California commuter market, however, lead the carrier into a bankruptcy filing on September 13.

DAT BELGIAN REGIONAL AIRLINE, S.A. See **DELTA AIR TRANSPORT, N.V.**

DAT WALLONIE, S.A.: Belgium (1991–1992). DAT Wallonie, also known as **Air Meuse, S.A.**, is established at Brussels National Airport in January **1991** to offer scheduled passenger and cargo services to the

French-speaking southern half of the nation. Ownership is divided between **Sabena Belgian World Airlines, S.A.** (49%), Meusinvest (25%), the Sabena subsidiary **Delta Air Transport, N.V.** (16%), and SMAP (10%). Delta's route network is divided in two in order to provide a market area. Feeder flights for the flag carrier begin in the spring with one each British Aerospace BAe 146-200 and Embraer EMB-120 Brasilia.

Operations continue for a year.

DAVEY AIR SERVICE (PTY.), LTD.: Australia (1958–1982). Davey Air Services (Pty.), Ltd. is formed at Dubbo, New South Wales, in 1958 to offer charter flights from Dubbo to Nyngan and Sydney. In the late 1960s, the company begins to offer scheduled services from Sydney to Nyngan, Bourke, Brewarrina, and Cobar and from Dubbo to Nyngan and Cobar.

The fleet by 1981 comprises 2 Embraer EMB-110 Bandeirantes, 1 de Havilland DH 114 Heron, 1 Piper PA-31-310 Navajo, 1 Piper PA-31-350 Navajo Chieftain, and 1 Piper PA-30 Twin Comanche. In 1982, the small commuter airline is purchased by Mascot and merged into New South Wales-based **Adved Airlines of Australia (Pty.), Ltd.**

DAVIS AIR: 56 Allegheny County Airport, Pittsburgh, Pennsylvania, 15122, United States; Phone (412) 469-1700; Fax (412) 469-3156; <http://www.flydavis.com>; Year Founded 1989. Davis Air is established at Pittsburgh's Allegheny County Airport in 1989 to offer passenger charters to regional and international destinations. By 1994, Vice President Greg Wagner employs 10 full-time and 2 part-time pilots who operate 1 Beech 90 King Air and 2 each Gates Learjet 25Ds and Learjet 35As.

Six years later, the Pittsburgh fleet is altered to include 1 Learjet 25D and Learjet 35A, 1 Cessna 550 Citation II, and 1 Beech Super King Air 200. Davis also stations 1 Piper PA-31-350 Navajo Chieftain at Du Bois–Jefferson County Airport.

DAVIS AIR LINES: United States (1930). Another new entrant formed during the Great Depression, Davis is set up at Atlanta in early 1930 to offer regularly scheduled passenger service to Birmingham, Alabama. Employing a Travel Air 4000, the carrier inaugurates flights in February. Traffic between the two southern cities is insufficient to justify continuing the operation beyond June.

DAVIS AIRLINES: United States (1949–1977). Davis Airlines is formed at College Station and Bryan, Texas, in late fall 1965 as the scheduled air transport division of Davis Aviation, which had been founded by L. Thomas Davis in 1949. Piper PA-32 Cherokee Sixes and Beech 18s are acquired and regularly scheduled daily roundtrip commuter flights to Dallas and Houston begin on December 15.

Operations are maintained until the carrier is purchased by and merged into **Rio Airways** on December 1, 1977.

DAWN AIR: United States (1991–1992). Dawn Air is established at Manteo, North Carolina, in early spring 1991 to fly charter and scheduled services employing a single Piper PA-31-310 Navajo. On May 1, scheduled flights begin to Norfolk, Virginia; later in the summer, two additional flights are added on Friday and one on Sunday.

Unable to achieve economic viability, the tiny commuter folds before its first birthday.

DAY AIRWAYS, LTD.: P.O. Box 965, Haliburton, Ontario, K0M 1S0, Canada; Phone (705) 201-2840; <http://www.inter-pc.com/user/wjdrivers/day-air/welcome.htm>; Year Founded 1980. Barry Day establishes this small nonscheduled operation at Mountain Lake, near Minden, in 1980. Employing a float-equipped Cessna 180, Day operates passenger and cargo charters to Toronto Harbor—occasionally flying all the way to the U.S.—flight-seeing, air ambulance, and aerial photography flights, as well as fishing, canoeing, and remote camping services.

Operations continue without change over the next 20 years.

DAYAJASA TRANSINDO PRATAMA: Halim Perdana Kusuma Airport, Jakarta, 13610, Indonesia; Phone 62 (21) 800-2427; Fax 62 (21) 8-0-7227; <http://www.guides.com/acg/transindo>; Year Founded 1990. Transindo is set up at Jakarta in 1990 to provide executive and small group passenger charters throughout the nation and Southeast Asia. Revenue flights begin, and continue, with a fleet of 2 Grumman G-1159 Gulfstreams and 3 British Aerospace BAe (HS) 125 Hawkers.

DB AVIATION: 3800 N. McAree Road, Waukegan, Illinois, 60087, United States; Phone (847) 263-5600; Fax (847) 263-6486; <http://www.privatejet.com>; Year Founded 1989. DB Aviation is established as an FBO at Waukegan in 1989. Over the next decade, it also becomes a major worldwide corporate, executive, and small group passenger charter operator. In 1999–2000, the company employs 20 pilots (more than some small scheduled airlines) and operates from 4 Midwestern bases.

From the company's home field, DB operates 2 each Dassault Falcon 20s and Cessna 550 Citation IIs and 1 each C-525 Citation I, C-650 Citation III, Learjet 55 Longhorn, Dassault Falcon 900B, British Aerospace BAe (HS) 125-700 Hawker, Cessna 208 Caravan I, and Grumman 690 Turbo Commander.

A Citation III is stationed at Palwaukee Municipal Airport at Wheeling, Illinois; a Falcon 20 is operated from Chicago (MDW); and a Citation I is flown from Milwaukee.

DC AIR. See POTOMAC AIR; UNITED AIRLINES; USAIRWAYS

DDL DANISH AIRLINES (DET DANSKE LUFTFARTSELSKAP, A.S.): Denmark (1918–1951). This Danish airline is formed at Copenhagen on October 6, 1918; however, flight operations do not immediately commence. Nevertheless, on August 25, 1919, the pioneer is invited to participate in the organizational meeting of the International Air Traffic Association (IATA) at The Hague.

With a government concession in hand to operate over foreign routes, initial Friedrichshafen FF 49 floatplane service is inaugurated from Copenhagen on August 7, 1920, across the Baltic to Warnemünde.

Meanwhile, on August 3, the company joins with **KLM (Royal Dutch Airlines, N.V.)** and **Deutsche Luft Reederei, GmbH.** to form the world's first airline pooling arrangement. This "Europa Nord-West Flug" coordinates the northwestern European schedules of the three airlines and allows flights, beginning on September 1, from Rotterdam–Copenhagen via Amsterdam and Hamburg. The service will end in 1921.

In 1923, the airline receives a mail contract for the route and, thus subsidized, is able to provide daily flights (carrying 414 passengers) until October 17.

Summer-only flights continue throughout the decade, some of which are provided by four Farman F-121 Jabirus delivered between May and August 1926, including two license-built by Orlogsværftet. The French-made or licensed aircraft are placed into service on a Copenhagen to Cologne via Hamburg frequency.

Three surviving F-121s are withdrawn and broken up in March 1931; DDL's fleet comprises four Fokker F-VIIs.

Two years later, on May 11, 1933, a Fokker F-XII, license-built by Orlogsværftet, is delivered and christened *Merkur*. Nine days later it enters service on the Copenhagen to Berlin frequency. A second F-XII, the *Kronprinsesse Ingrid*, is purchased directly from Fokker and is received on May 13, 1935. The two F-XIIs are employed to initiate two new frequencies out of Copenhagen, one to Berlin and one to Hamburg. They are also employed on a Copenhagen to Hanover night mail run.

On June 17, 1936, an F-VIIa slams into the cliffs of Sognefjord in dense fog (seven dead). On August 30, an F-VIIa crashes near Bergen; all seven aboard are hurt.

Late in the year, the subsidiary **Provins Luftfartsselskap, A.S. (PLS)** is organized to initiate domestic operations; the initial route, begun in June 1937, is from Copenhagen to Esbjerg, with Aalborg later added.

Local service traffic proving thin, the domestic exercise is cut before year's end.

In the spring of 1938, the carrier prepares to receive a pair of Focke Wulf Fw-200 Condors ordered from Germany the previous year. The first is delivered to Copenhagen by Kurt Tank on July 14 and is christened *Dania* and is employed to launch international service. Indeed, when the *Dania* first lands at London (Croydon Airport) on July 28, the arrival marks the first flight of a Danish transport to the U.K.

Regularly scheduled Copenhagen–London via Hamburg service begins on September 1 in cooperation with **Deutsche Lufthansa, A.G. (DLH)**.

The second Fw-200 Condor is received in November; christened *Jutlandia*, it is placed on a route from Copenhagen–Vienna via Berlin.

Meanwhile, representatives from the governments of Sweden, Norway, and Denmark and their national airlines agree to pursue the idea of joint Bergen–New York flying-boat service in cooperation with **Pan American Airways (PAA)**.

This pooled Condor route is extended to Goteborg and Oslo in April 1939. As the European crisis deepens, the Danish airline's 5 Fokkers, 1 Ju-52/3m, and 2 Condors maintain domestic and international services, but upon the outbreak of war in September, DDL briefly suspends international services. As the "Phony War" progresses however, it elects to resume operations to Berlin and Vienna in early November.

On November 13 and in cooperation with **KLM Royal Dutch Airlines, N.V.**, Capt. Harald Hansen's Fw-200 *Dania* is tasked to resume daily Copenhagen–Shoreham (Sussex) service via Amsterdam.

Passenger boardings systemwide this year exceed 20,000.

When Germany occupies Denmark on April 9, 1940, British troops at Shoreham seize the *Dania*—which had flown in the previous day—and turn her over to **British Overseas Airways Corporation (BOAC)**, which rechristens her *Wolf*.

The Copenhagen–Vienna service is maintained until December 17, 1941, when the *Jutlandia* crashes at the latter destination; repaired, she remains in service throughout the war.

Meanwhile, Nazi occupation authorities do not completely shut DDL down. Rather, it is stripped of its domestic network and ordered to maintain a route to Malmo and to the Baltic Sea island of Bornholm. Even so, the Danes promptly smuggle out funds to pay for their share of Swedish airline official Per Norlin's efforts to create a Scandinavian joint airline.

Following the collapse of Germany in May 1945, DDL resumes both domestic and international flights almost immediately. Employing Douglas DC-3s, the old Malmo route is stretched to Stockholm on May 28. Flights depart Copenhagen for Goteborg via Aalborg beginning on June 29 and to London (Croydon) on November 3. During this period, the national carriers of Sweden, Norway, and Denmark restart their 1938 negotiations for the actual establishment of a joint consortium.

In late 1946, the war-weary Fw-200 *Jutlandia* is badly damaged in a crash landing at London (Northolt) that destroys its tailwheel. Meanwhile, the first Vickers Viking is received; christened *Tor Viking*, it is employed to inaugurate Copenhagen–London (Northolt) flights on April 21.

On July 31, **SAS (Scandinavian Airlines System)** is formally established with Prince Axel of Denmark and Per Kampmann signing the consortium constitution on behalf of DDL.

Capital shareholding in the new organization is divided by ratio between the companies with the Danish portion representing two-sevenths. The agreement establishes Overseas SAS for the operation of international flights; however, each partner will initially continue to provide domestic services. Those for Denmark are provided by Douglas DC-3s that replace the old Fokker F-XIIs *Merkur* and *Kronprinsesse Ingrid*, now discarded.

Having decided not to repair *Jutlandia*, officials scrap the Fw-200 in early 1947.

A DC-3 freighter with four crew crashes near Malmo, Sweden, on February 17; there are no survivors. On December 29, a Vickers 628 Viking 1B with 4 crew and 20 passengers is lost on final approach near

Copenhagen's Kastrup Airport; although the aircraft must be written off, there are no fatalities.

A DC-3, en route from Copenhagen to Zurich crashes at Glessen, Germany, on February 13, 1948 (11 dead).

On April 18, the regional operations of DNL and its two partners are combined into an SAS European Division.

A Vickers 628 Viking 1B with 4 crew and 23 passengers is lost off Oresund, Denmark, on February 8, 1949; there are no survivors.

Flights continue in 1950.

On February 8, 1951, in a move made retroactive to October 1, 1950, the Overseas and European divisions are merged in a final consortium agreement. **SAS (Scandinavian Airlines System)** becomes the flag carrier of Denmark, Norway, and Sweden with the partner airlines now becoming the nonflying national holding companies.

DE HAVILLAND AIRCRAFT CO. AEROPLANE HIRE SERVICE: United Kingdom; (1922–1924). In early summer 1922, the aircraft manufacturer de Havilland forms an air transport subsidiary, Aeroplane Hire Service. Service is inaugurated on July 3 when a DH 9C piloted by C. D. Barnard begins regularly scheduled Lympe–Ostend newspaper flights; return service allows passenger transport and as more are flown during the summer season, two DH 16s are added.

With C. H. Biddlescombe of the Air Ministry as passenger, Hubert Broad, flying a DH 9C, makes the first successful series of night London–Paris flights, beginning on February 9, 1923. On behalf of the Air Ministry and Post Office, a month-long series of real and practice airmail runs are made over a route from Plymouth to Belfast via Birmingham and Manchester. The initial service, carrying four passengers, is flown on September 15 by Alan Cobham in a DH 50.

When **Imperial Airways, Ltd.** is formed on March 31, 1924, the Aeroplane Hire Service is closed down in England; however, the experimental airmail service is revived as **Northern Air Lines, Ltd.** with AHS DH 50s from a Belfast base.

DEBONAIR AIRWAYS, LTD.: United Kingdom (1995–1999). Debonair is established by Franco Mancassola, founder and owner of the defunct Hawaiian carrier **Discovery Airways**, at Crawley, West Sussex, on October 1, 1995. Chairman/CEO Mancassola, two major partners, and 400 individual investors, primarily from the U.S., supply capitalization of \$23.5 million. With an ownership requirement of 51% European, however, the carrier is required to raise \$44.5 million from British and Continental sources.

Debonair is the first contract customer for **British World Airlines, Ltd.**'s new Air Operators' Certificate (AOC) program under which the veteran U.K. carrier will offer its management, business, and engineering expertise plus its AOC to assist the start-up as it seeks viability. The program is similar to one offered to fellow start-up **easyJet Airlines, Ltd.** by **Air Foyle, Ltd.** When prepared, Europe's newest entrant will offer regional scheduled and charter passenger services to domestic and regional destinations from London (LGW).

After reviewing the growing new hub operations of **British Airways, Ltd. (2)** at Gatwick Airport, an operating base is, instead, established at another London site, Luton Airport, where takeoff and landing slots are more readily available. Airport officials build the company a small headquarters building and a dedicated check-in facility at Luton.

A fleet of 5 leased British Aerospace BAe 146-200s, formerly owned by **Pacific Southwest Airlines (PSA)** and **USAir**, is assembled. **Jersey European Airways, Ltd.** is contracted to provide their maintenance and **Servisair** is retained to handle check-in and boarding.

Plans are announced for the inauguration of revenue services on May 1, 1996. The low-cost, no-frills company will also offer ticketless travel, a simplified fare structure based on one-way rates, and simplified passenger check-in. Unlike the casual clothing allowed aboard competing **easyJet Airlines, Ltd.**—modeled after **Southwest Airlines** in the U.S.—Debonair pilots wear grey suits and flight attendants wear royal blue uniforms with magenta accessories.

The start-up date is pushed back to June 19, when daily BAe 146-200 frequencies start from London (CTN) to Munich, Barcelona, and Dusseldorf Express Airport (Munchengladbach). All flights the first day are free.

Madrid joins the route network on July 10, along with the domestic destination of Newcastle. Frequencies from Munich to Dusseldorf and Barcelona commence on July 24 while flights to Copenhagen commence on August 7. The Copenhagen route is expanded in October and, in November, frequencies are inaugurated to Rome (Ciampino Airport). All flights are nonsmoking and duty-free cigarettes are not sold.

Enplanements during the year's remaining months total 354,000.

As 1997 begins, orders remain outstanding for three BAe 146-200s; however, one will be received during the last week of April, followed by another in June and the third in October. Five BAe 146-300s, to be withdrawn from service by **Thai Airways International, Ltd. (THAI)**, will be received at the end of the year.

Low yields require service to be discontinued to Newcastle in January. When the new Dusseldorf Express Airport (Moenchengladbach) opens at the end of March, flights are switched to it from Dusseldorf.

New Interactive Flight Technology in-flight entertainment systems are installed on the carrier's aircraft during late spring and summer, which include facilities for movies, children's games, and (adult-only) gambling. Debonair is floated on the new pan-European EASDAQ stock exchange in July.

In September, the company receives its own AOC and the contract with **British World Airlines, Ltd.** is renegotiated into a maintenance support package. Debonair inaugurates its own 24-hour operations center at London (CTN).

In late October, a strategic alliance is entered into with the Italian carrier **Azzur Air, S.p.A.** Under its terms, the two agree to share codes on routes between Britain and Italy, with Debonair providing services to its partner at London (CTN). Daily dual-designator roundtrips begin during the second week of November from London to Milan's Bergamo Airport, with a through service available to Ciampino Airport at Rome. The service is flown by an Azzur Avro RJ85. A route to Cote d'Azur Airport at Nice begins at year's end.

When **Thai Airways International, Ltd. (THAI)** experiences a delay in the delivery of new Boeing 737-400s at the end of the year, it retains its five BAe 146-300s in service.

Enplanements for the year total 600,000.

Early in 1998, the company, one of the few start-ups anywhere to attempt serious business far from home, ratifies a L 100-million (\$5.6-million), 5-year contract won from the government of Calabria, in southern Italy, for cabotage services. Scheduled BAe 146-200 passenger flights will be inaugurated linking Reggio de Calabria and Lamezia with Rome, Florence, Bologna, and Turin. Unhappily, there is a hitch. The arrangement violates European Union public-procurement rules and is therefore attacked by potential competitors.

The **Thai Airways International, Ltd. (THAI)** BAe 146-300s are withdrawn in February and returned to British Aerospace for refurbishment; they are scheduled to be turned over to Debonair during the second and third quarters.

When fiscal figures are released, they show a loss of £16.6 million on turnover of £31.3 million in the 12 months through March.

In April, **British Airways, Ltd. (2)** announces the schedule of its new low-cost division GO. The new entrant will make a concerted effort not to operate in direct competition with its discount rivals; however, it will operate from London (STN) to Rome. Debonair's London (CTN) to Rome route is the only one that conflicts with GO's new services. Like competing **easyJet, Ltd.**, Debonair seeks legal redress, appealing to the Competition Committee of the European Commission.

With none of the ex-THAI BAe 146-300s delivered as yet, the carrier's letter of intent to purchase them is allowed to lapse in April.

Also during the month, **Azzura Air, S.p.A.** ends its code-sharing pact with Debonair and becomes a franchise partner of **Alitalia, S.p.A.**, reporting to **Alitalia Express, S.p.A.**

With all of the pieces in place, GO launches services from London (STN) to Milan and Rome on May 22 with three B-737-200s.

In the stuff that will create airline legend (akin to the actions of C. R. Smith at **American Airlines** or Herb Kelleher at **Southwest Airlines**), Chairman Mancassola literally stumbles upon a new service opportunity in France during the month. Lost while touring outside Paris with his wife, the Debonair chief comes upon nearly deserted Pontoise-Cormeilles Airport, a general aviation facility just 22 mi. NW of the city center. Eventually locating the appropriate authorities, Mancassola begins negotiations that will result in Debonair's receiving permission to begin hubbing from this alternative to Charles De Gaulle International Airport.

While **easyJet, Ltd.** and Debonair attempt to limit GO via legal and regulatory means, an even stronger competitor threatens to take it head-on in the marketplace. In a speech before the Aviation Club at London on June 1, Michael O'Leary, CEO of Dublin-based **Ryanair, Ltd.** pledges that his concern "will compete with lower fares rather than wait for the bureaucrats in Brussels to rescue us."

In mid-June, the company opens discussion with Boeing concerning the possible acquisition of up to 10 B-717s (MD-95s) and with several other carriers and concerns for the addition of more BAe 146-200s. A code-sharing arrangement is now concluded with **AB Airlines, Ltd.**

Following the introduction of AB's new Cote d'Azur service on July 9, Debonair shares its designator on AB flights from London (LGW) to Lisbon and Berlin.

During the fall, Debonair adds complimentary light meals for its passengers. It also accepts a contract to operate two aircraft on replacement services for **Air France** between Paris (CDG) and Brussels, Brest, and Biarritz.

Daily roundtrip BAe 146-200 service, postponed from August, is inaugurated in October between London (LGW) and Barcelona employing the first of the newly refurbished THAI BAes.

On November 1, a £22-million agreement is signed with **Lufthansa CityLine, GmbH.** Under its terms, the British line will operate replacement services from Munich, committing five of its BAe 146-200/300s to the "Team Lufthansa" operation beginning in March when the arrangement with **Air France** ends. Although the BAes will wear Lufthansa colors, Debonair flight and cabin crews will continue to wear their own company's uniforms.

Under a contract signed with **Swissair, A.G.**, Debonair begins to operate "Swissair Express" BAe 146-200 replacement service for the major from Zurich to Venice and Bologna beginning on November 5. The flights, operated as a code-share with the Italian carrier **Air One, S.p.A.** replace those previously operated with a SAAB 2000 wet-leased by Swissair from **Crossair, Ltd.**

Chairman Mancassola announces new services on November 12. Beginning in February, the company will fly charters from Catania, Innsbruck, Munich, Naples, Nuremberg, Palermo, and Turin to Tarbes-Ossun Airport at Lourdes, France, in conjunction with the Jubilee Celebration for the shrine ordered by Pope John-Paul II.

Starting on March 26, scheduled daily return service will be flown between Rome and Lourdes. Leases are now taken on three more BAe 146-200s and a BAe 146-100.

The company also announces that it has earned its fourth monthly profit in a row. The second quarter results, now released, are also most encouraging and, indeed, represent the carrier's first profitable quarter. For the three months ending on September 30, a net £700,000 gain is earned on turnover of £13.8 million.

With plans begun in May to create a new French hub now bearing fruit, Debonair, on November 16, inaugurates twice-weekly roundtrips from London (CTN) to Pontoise-Cormeilles Airport.

Enplanements during the 12 months total 463,000. Airline employment grows 18% to 350.

During January 1999, **AB Airlines, Ltd.** flights from London (STN) to Lisbon are terminated and the Boeing 737-300 displaced is wet-leased to Debonair for the next nine months.

The last former **Air Atlantic, Ltd.** BAe 146-200, which had been purchased after the Canadian airline shut its doors, is delivered on February 6. By the end of the month, three of five BAe 146 200/300s have been repainted in the all-white (blue tail) livery of "Team Lufthansa." The aircraft begin flights under the German contract on March 1.

During the month, a BAe 146-200 is chartered to **Air One, S.p.A.** for use on its "Swissair Express" contract. Additionally, a B-737-3L9 is leased from **Deutsche BA Luftfahrtgesellschaft, GmbH.** and employed to increase capacity on its routes to Lisbon from London (CTN and LGW).

On March 31, the company purchases its first owned aircraft, the former **Pacific Southwest Airlines (PSA)** Bae 146-200, which it has been operating under lease from **USAirways** since 1995. The next day, it is revealed that the company has suffered a £13-million (\$21.45-million) loss during the first quarter.

Debonair begins operating five BAe 146-200s from Munich on behalf of **Lufthansa CityLine, GmbH.** on March 28 as scheduled. Twice-daily "Team Lufthansa" flights are offered by four aircraft to Birmingham, Helsinki, Manchester, and Toulouse. The fifth, which had previously operated "Air France Express" service, flies one roundtrip every weekday to both Brussels and Marseilles, followed by weekend flights to Amsterdam, Marseilles, Vienna, Milan (twice), and Manchester.

In need of short-term extra capacity, Debonair wet-leases a BAe 146-100 from **Lufthansa CityLine, GmbH.** The German aircraft will be operated over the British line's routes from Moenchengladbach to London (CTN) and Barcelona through May 6.

Two BAe-146-200s, repainted in "Swissair Express" colors, enter service on May 1. They are employed to operate thrice-daily flights to Bologna as well as four times a day to both Venice and Turin.

Continuing high costs and tough competition in the European air travel market force the airline into administration on September 30, as trading in its shares is suspended. The accounting firm of Deloitte & Touche is brought in to act as receivers and feelers are put out to see if a buyer(s) might want to quickly take the airline over. Flights are cancelled and all operations are shut down on October 1; most of the company's aircraft are parked at London (LTN).

The commercial director of **Ryanair, Ltd.** suggests to Reuters, Ltd. that because of its food service, choice of airports, and frequent flyer program, Debonair was a "flawed model" for a European low-fare airline. His airline and others knew it was in trouble long before its failure because "it never made a profit." Ryanair is not interested "in taking them over."

With no buyers stepping forward to speedily purchase the carrier as a whole, the low-fare operation will now be liquidated in pieces. Several other airlines do express interest in obtaining all or part of its assets.

Virgin Express, S.A. announces on October 5 that it has no further interest in the defunct carrier's assets.

It is reported on October 13 that the German company **European Air Express, GmbH.** has purchased a portion of the carrier and will use the assets to inaugurate thrice-weekday roundtrips between London (LTN) and Dusseldorf Express Airport (Moenchengladbach). The next day, a 25% stake (including several BAe 146s) is sold to **Flightline, Ltd.**, with 100 Debonair jobs also transferred.

DECATUR COMMUTER AIRLINES: United States (1966–1981). Robert E. Brown, owner of the Decatur, Illinois-based FBO Decatur Aviation, establishes an airline subsidiary in 1966 to undertake scheduled daily passenger service to Chicago (Meigs Field) and St. Louis. Operations continue apace for the next four years with a fleet comprising 1 Piper PA-31-350 Navajo Chieftain, 2 PA-31-310 Navajos, and 2 PA-34 Senecas.

In association with **Verco Air Service**, K. J. Paul purchases the company in 1980, continuing flights as before. On December 1, 1981 in the wake of the PATCO air traffic controllers' strike and attendant ATC problems at Chicago, Paul sells his commuter to **Air Illinois.**

DECCAN AIRWAYS, LTD.: India (1945–1953). Deccan Airways, Ltd. is founded in Hyderabad State on September 21, 1945, and owned by Hyderabad State (71%) and Tata Sons, Ltd. (29%). Equipped with 12 Douglas DC-3s, the carrier on July 1, 1946 begins flying Hyderabad–Bangalore and Madras–Delhi via Hyderabad, Nagpur, Bhopal, and Gwalior. Hyderabad–Bombay flights commence on February 10, 1947.

Due to a police action to quash political disturbances in Hyderabad State, services are suspended between July 2 and October 15, 1948. Hyderabad, which had not originally been taken into the Indian union (Bharat) upon the nation's independence the previous year, is now incorporated.

When **Indian Overseas Airlines, Ltd.** suspends operations in June 1949, the carrier joins **Dalmia-Jain, Ltd.** in taking over the revolutionary night-airmail service started from Delhi to Madras and Bombay to Calcutta. Monsoon rains cause the operation to be suspended on June 30. **Himalayan Aviation, Ltd.** assumes the service on October 15, but will give it up in May 1951.

An overloaded DC-3 with 3 crew suffers an in-flight engine failure and crashes at Hatiara on April 5, 1950; there are no survivors.

On June 1, 1951, Deccan resumes night-airmail flights. Having missed its approach to Dum Dum Airport at Calcutta in fog and darkness on November 21, a DC-3 with 4 crew and 13 passengers smashes into trees while going around and crashes (16 dead).

Coming in for a landing at Sonegaon Airport at Nagpur on February 19, 1952, a DC-3 with 4 crew and 12 passengers strikes trees just prior to its touchdown and crashes (3 dead). A DC-3, with 4 crew and 5 passengers, experiences engine failure and crashes at Safdarjung on April 30; there are no survivors. Among the casualties is an American woman missionary.

Thrice-weekly flights between Bombay and Aurangabad are inaugurated on November 20 to serve the Ellora and Ajanta Caves.

As the result of parliamentary study and debate, the decision is taken to nationalize the Indian air transport industry. An Air Corporation Bill receives presidential assent on May 28, 1953, resulting in creation of **Indian Airlines Corporation** on August 1; the state enterprise now assumes control of Deccan Airways and many of its competitors.

DECCAN AVIATION (PTY.), LTD.: 53 Infantry Road, 2nd Floor, Bangalore, 560001, India; Phone 91 (80) 85613378; Fax 91 (80) 2862873; <http://www.deccan-air.com>; Year Founded 1998. Conceived by a group of former Indian army and air force officers, Deccan is established at Jakkur Airfield, outside Bangalore, in 1998 to provide rotary-wing charters and aerial work in the southern part of the nation. Capt. G. R. Gopinath is managing director, with Capt. K. J. Samuel as executive director and Capt. Jayanth Poovaiah as vice president. Bases are also established at New Delhi, Hyderabad, Bombay, and Chennai.

Employing a fleet of Bell 206B JetRangers, Bell 206L LongRangers, and Bell 407s, the company begins the following services: reconnaissance and aerial photography, corporate charters, offshore flights, underslung operations, electronic news gathering, tourism packages, temple tours, overnight getaways, Bangalore heli-rides, medical evacuation and rescue, and motion picture services.

DEERJET COMPANY, LTD.: 5/F Jing Chao Building, #5 Nong Zhan Nan Lu, Chao Yang District, Beijing, 100026, China; Phone 86 10-65068300; Fax 86 10-65068221; <http://www.deerjet.com>; Year Founded 1999. The VIP division of **China Hainan Airlines Company, Ltd.** is reformed at Beijing in 1999. The sole charter operator in the PRC, Deerjet specializes in providing nonscheduled flights throughout the country and Asia.

Airline employment at the beginning of 2000 stands at 64, including 12 pilots and 14 mechanics drawn from the parent airline. The fleet includes 1 Bombardier Learjet 60, 2 Raytheon HS-125-800XP Hawker bizjets, and 1 Bell 206B JetRanger. The company Web page proudly details its list of customers, including GE, Ford, Fiat, Volvo, Motorola,

Airbus Industrie, Shell, and a number of VIPs transported, including former U.S. Secretaries of State Kissinger and Haig.

DEL AIR CARGO (DELAWARE AIR FREIGHT): United States (1967–1974). Founded at Wilmington as **Delaware Air Freight**, initial Cessna 172 services of this small carrier, flown as Del Air Cargo, are launched on August 2, 1967 over a route from Milville, New Jersey, to Philadelphia. The carrier begins to acquire Beech 18s and Cessna 206s shortly thereafter, discarding them in favor of Douglas DC-3s in 1971.

Three years later, Del Air Cargo is renamed **Summit Airlines**.

DEL AIRWAYS: United States (1971). Short-lived Del Airways is set up at Valdosta, Georgia, in 1971 to offer scheduled daily roundtrip shuttles to Jacksonville, Florida. Beech 18 revenue frequencies are duly inaugurated, but can only be maintained for a few months.

DELTA AIR (PTY.), LTD. See **DESERT & DELTA AIR (PTY.), LTD.**

DELTA AIR LINES: P.O. Box 20706, Atlanta International Airport, Hartsfield, Atlanta, Georgia 30320, United States; Phone (404) 715-5876; Fax (404) 715-7202; <http://www.delta-air.com>; Code DL; Year Founded 1929. In the fall of 1928, Collett Everman (C.E.) Woolman, returns to Monroe, Louisiana, from **Peruvian Airways** to find **Huff-Daland Dusters** in decay. He persuades a group of local investors to provide \$40,000 backing with which to purchase the crop-dusting operation from Keystone Aircraft Corporation, a move executed on November 12. Three days later, the new purchase is chartered under the name—suggested in honor of the local Mississippi Delta area by secretary, later treasurer, Catherine Fitzgerald—**Delta Air Service**.

To get around the problem of unsuitable equipment posed by his Petrel 31 Dusters, Woolman, now general manager under President D. Y. Smith, purchases **Fox Flying Service** in early 1929, primarily for its two Travel Air 6000Bs cabin monoplanes and Stinson SM-1 Detroiters. One of the Travel Airs, piloted by Johnny Howe, is employed at 8 a.m. on June 17 to inaugurate a scheduled service from Dallas, Texas to Jackson, Mississippi, via Terrell, Longview, Marshall, Shreveport, Ruston, Monroe, Tallulah, and Vicksburg. A restored Travel Air will reenact the flight on the same day, 70 years later.

Despite the absence of a mail contract (the usual subsidy of airlines starting up during this period), the route is extended in both directions on September 1, Dallas–Fort Worth and Jackson–Birmingham. A third Travel Air is acquired later in the year.

Early in 1930, Woolman and officials of **Eastern Air Transport** discuss a plan to expand Delta flights to Atlanta and for EAT, assuming its ability to obtain a mail contract, to subcontract the Dallas mail run to Delta. Accordingly on June 18, the Birmingham terminus is extended on to the Georgia capital.

The mail contract is not, however, forthcoming, being awarded instead to **American Airways** on September 16. Without subsidy, Delta's operation cannot be continued and thus its route is suspended on October 1 and the company's nondusting aircraft are sold to **Southern Air Fast Express (SAFEway)**. Delta returns to the crop-spraying work performed originally.

As a result of the new air mail regulations enacted into law in the Black–McKellar Act of 1934, Delta, reformed as Delta Air Corporation, places a bid in the spring for an airmail contract covering the route flown previously and receives the award for AM-24 on June 8. Without suitable aircraft, the renewed entrant, now using the marketing title Delta Air Lines, purchases a Curtiss 4C-2 Robin with which to survey its prospective route, in addition to six Stinson SM-6000B trimotors (at \$5,400 each) from **American Airlines** on June 23.

Also acquired are two Stinson Model A trimotors, which are placed on the Dallas to Atlanta frequency on July 1. A Stinson SM-6000B initiates mail service on July 4, flying Dallas–Birmingham via Tyler, Shreveport, Monroe, Jackson, and Meridian. The Birmingham end is stretched to Atlanta on July 5 and to Charleston, South Carolina, via Augusta and Columbia, on July 7.

After a one-month probationary period, the Department of Commerce allows passenger enplanements to begin on August 4. Late in the year, sympathetic Monroe, Louisiana, banker and newspaperman Clarence E. Faulk purchases control of Delta, becomes president, and retains Woolman as general manager.

The third new \$34,000 Stinson Model A trimotor is purchased in late June 1935, and one of them begins night service on July 15.

Meanwhile, beginning July 2, Delta's day routes are christened "Georgian" and "Texan" (depending on direction). On August 14, a Stinson Model A en route to Shreveport from Dallas literally loses its left engine when a propeller flange cuts through the fuselage and disables pilot Andy Dixon. With the plane ablaze, copilot Herbert Bulkely manages a controlled descent but crashes near Gilmer, Texas (four dead).

During the busy summer season, the carrier also operates two Lockheed Model 5C Vegas and a Model 8A Sirius, leased from **Bowen Air Lines**, as mailplanes while awaiting the fulfillment of an order for Model 10 Electras. The first Model 10Bs are delivered in late December. Although the Vegas are now returned, the Sirius must be written off following a crash at Birmingham on December 24.

A third Stinson Model A arrives on January 8, 1936, joining the two new Lockheeds in entering service late in the month. A third Electra arrives in February, allowing the company to begin an orderly retirement of the Stinsons, beginning with a Dash-6000B in June.

A second Model A is lost, this one during takeoff from Atlanta on August 27, leaving the pilot, Charles Dolson, with a broken back. Another Dash-6000B is sold in December.

Two more Electras join the fleet in January 1937, allowing the sale of a third Stinson SM-6000B, the Stearman C3B, and all of the remaining Model As in March.

Late in the decade, orders are placed for Douglas transports and until they begin to arrive, the company, in December 1939, leases a Model 10A Electra from **Braniff Airways**.

The first four Douglas products received are DC-2s obtained from **American Airlines** between February 4 and March 20, 1940. Readied, the initial unit is placed into service on March 15, carrying a fifth crew member, a registered nurse named Laura Wizark—Delta's first flight attendant. That day, **Braniff Airways'** Electra is returned.

When the new CAB now begins to provide "grandfathered" operating certificates for carriers at least six months old, Delta receives the first document.

Simultaneously, in an effort to allow the airline to participate in the economic development of its region, a number of new routes are permitted by the regulators, including a five-hour flight segment from Atlanta to Fort Worth. With most of Delta's passengers on these new services having to pass through Atlanta, the Georgia city becomes the first "hub," with its routes what will later be called "spokes."

In need of additional capacity, during the summer the board of directors orders six DC-3s at \$115,000 per copy. During the early fall another DC-2 is acquired while, in November and December, four DC-3s are received from their manufacturer and the first into service is christened *City of Atlanta*.

After a fifth DC-3 is delivered on January 4, 1941, the British Purchasing Commission is allowed to buy four of the company's five DC-2s over the next month.

Meanwhile, in late winter, the CAB grants significant north–south route concessions. The northern route is inaugurated on April 15, as a DC-3 flies from Atlanta to Cincinnati via Knoxville and Lexington. On May 1, Atlanta to Savannah via Augusta flights begin.

The corporate headquarters are moved to Atlanta from Monroe during the summer. The Japanese attack on Pearl Harbor on December 7 halts any further expansion for the immediate future.

The fleet now comprises 4 Lockheed Model 10B Electras and 5 DC-3s.

Enplanements for the year are 79,154.

Delta, like other U.S. airlines, is required to turn over a portion of its fleet to the government for the war effort. Consequently, its five Lockheed Model 10Bs are all retired in the spring of 1942 and turned over to the U.S. Army Air Forces along with a DC-3 by June. Meanwhile, an aircraft modification center is established at Atlanta in May, where, during the war, more than 100,000 planes will be upgraded and overhauled under government contract.

Also during May, the company, employing C-47s modified at its center to carry litters, begins a domestic medical airlift. For the remainder of the war, these aircraft will shuttle patients from Atlanta hospitals to health facilities in Miami, Dayton, Oklahoma City, San Francisco, and Seattle.

During June and July, Delta takes part in the Alaskan airlift, in which over 100 transports from 11 airlines are directly involved flying men and supplies to Dutch Harbor by way of Edmonton. Company aircraft fly needed items from the southeast via Atlanta, Mobile, and Memphis, to Dayton, where they are transferred to **United Air Lines** DC-3s for flights north.

The company forms a Military Transport Division and is allowed to operate its returned Douglas, along with several others, under contract to the government beginning on July 25. The four DC-3s remaining under Delta control ferry much of the southeast region's wartime air traffic. By summer, however, all senior company pilots with any military experience are in uniform.

The military DC-3 is sold to **Pennsylvania-Central Airlines** in February 1943.

In August, a former military DC-3 is added to the fleet.

In the fall, two route extensions are inaugurated: Shreveport to New Orleans via Alexandria and Baton Rouge on October 15 and Dallas to Fort Worth on November 1.

The Atlanta modification center provides "crop dusting" capability to several C-47s that are then sent to the South Pacific to spray for insects known to cause tropical disease.

Four more DC-3s are delivered in July and September 1944 and Delta is among the last airlines to turn over its services when the Air Transport Command assumes exclusive control over domestic military logistic frequencies in September. In just over two years, the carrier has flown over 2.5 million miles, flying 4.89 billion pound-miles of cargo.

The company's Atlanta aircraft modification facility is closed in November.

By the year's end, the route network stretches 2,915 miles and enplanements have hit 164,287.

During 1945, Delta receives no less than seven DC-3s, three of which are ex-military planes. Also, a Lockheed Model 12 Electra Junior (a military C-40A) is delivered in late January for route survey work; it will be disposed of within 18 months.

President Faulk now becomes board chairman.

In July, the CAB authorizes a new route from Chicago to Miami that will be inaugurated via Jacksonville. It is the longest new route so far granted by the government regulatory body.

A new four-times-per-day return service to Chicago, started in December, allows passengers from Illinois to reach Florida with only six stops en route. Late in the year, the company acquires seven Douglas C-54Bs from the military, which are immediately returned to the manufacturer at Santa Monica for modification into civilian DC-4s. On December 18, Delta Air Corporation is officially renamed Delta Air Lines.

Passenger boardings swell to 274,823.

Two additional modified DC-3s are received in January 1946, followed on February 12 by the first DC-4, which on March 6 is placed into service on the Chicago-Miami run, now called the Rocket route. The

service is the first nonstop offering in this market and its inauguration brings the company into a long competition for Florida bookings with **Eastern Air Lines**.

Two additional DC-4s are received in March and the first is placed on the Atlanta-Dallas service on April 1; incidentally, this route is also re-labeled, becoming the Comet.

In April and May, four more DC-4s join the fleet. A DC-3 must be written off following an accident at Meridian, Mississippi, on November 10. Additional destinations added to the route network in the last year include Brunswick, Macon, Hattiesburg, Meridian, Selma, Montgomery, Longview, Columbia, Greenville, Asheville, Richmond, Anderson, and Kokomo. CAB permission is received in November to fly the DC-4 Chicago-Miami route nonstop.

Yet another modified DC-3 is received in mid-February 1947.

While on approach to Columbus, Georgia, on April 22, a private aircraft lands atop a company DC-3, with one crew and seven passengers. When the DC-3's tail is forced down, the pilot applies power and both aircraft rise from 10 ft. to 150 ft. before crashing in flames. All involved (nine people) are killed, including eight of the airline's top officials.

The last modified DC-3 is delivered in May; two unmodified C-47 freighters are yet to be accepted. Dedicated all-cargo services commence with the C-47s in July over the Atlanta-Cincinnati-Chicago route. Late in the year, an order for 10 Martin 2-0-2s is cancelled.

The first DC-3 to be sold since 1943 is disposed of in January 1948 while, in February, orders are placed for five DC-6s.

Flight 700, a DC-4 with 4 crew and 9 passengers, fails its initial climb away from Chicago on a service to Miami on March 10 and crashes (12 dead). Witnesses on the ground report hearing an explosion before impact. The lost Douglas is replaced by another purchased from **Braniff Airways** on April 14.

An interchange agreement with **Transcontinental and Western Air Lines (TWA)** is put into effect on June 1 between Detroit and Atlanta via a turnover point at Cincinnati.

A DC-6, the company's first pressurized airliner, christened *The Flying D*, is delivered on October 1, followed by five more by Christmas Eve. These Deltaliners will each offer a Skylounge at the back of their cabins and benefit from a new advertising campaign: "None Faster, None Finer to and thru' the South!" Meanwhile, wearing the slogan "The Airline of the South" on its fuselage, *The Flying D* is placed into nonstop Chicago-Miami service on December 1.

The last C-47 freighter is delivered on January 17, 1949, 15 days before the DC-4 acquired the previous April is sold to **Chicago & Southern Airlines**. An interchange agreement is implemented with **American Airlines** on September 25 on a route from Atlanta to Los Angeles.

A DC-4 is leased to **Northwest Airlines** in June 1950 and a seventh DC-6, which is, in fact, the prototype for the one and only purpose-planned DC-6A passenger plane, is delivered on January 4, 1951.

Another interchange agreement is effected with **National Airlines** and **American Airlines** on May 1, for a variety of routes to the Northeast and West.

In June, orders are placed for 10 Convair CV-340 Convairliners. Board Chairman Faulk dies on August 31.

Orders are placed for 10 DC-7s in April 1952 and the leased DC-4 is purchased by **Northwest Airlines** in August. The first CV-340 is delivered on December 18.

Eighteen additional CV-340s are delivered in 1953, beginning with two on January 20; the first enters service on March 1. Between February and June, five DC-4s are sold, including two to **Pacific Northern Airlines**, one to Irving Herman, owner of **Super Coach**, and the last, on June 16, to **North American Airlines**.

Meanwhile, the company's first DC-3, *City of Atlanta*, is sold to **Mohawk Airlines** in April and on May 1, Carleton Putnam's **Chicago & Southern Airlines** is acquired.

In order to introduce Delta into C & S's markets, the combined carrier, now the fifth largest U.S. airline, will be known as **Delta-C & S** until September 1955.

On May 17, a DC-3, with 3 crew and 17 passengers and on landing approach to Shreveport, Louisiana, crashes in a thunderstorm at Waskom, 13 mi. E of Marshall, Texas; there are no survivors.

The last CV-340 is delivered on February 18, 1954 while the first DC-7, complete with a five-seat Skylounge, an eight-seat Sky Room, and painted in an attractive "Royal Crown" livery, is delivered on March 3, followed by two more at the end of the month.

The four-engine Douglas upgrades are employed to inaugurate three Chicago–Miami nonstop services on April 1: the *Royal Biscayne*, the *Royal Poinciana*, and the nighttime *Owl Comet*. As part of an interchange service with **American Airlines** and **National Airlines**, Delta DC-7s now begin flying from Miami to Los Angeles.

A DC-3 freighter with two crew fails its takeoff from Atlanta on June 15 and makes a forced landing that damages the aircraft beyond economical repair; there are no fatalities.

The first DC-7B makes its maiden flight in October and four more DC-7s are introduced during the remainder of the year.

The last four DC-7s are delivered between January 25 and December 10, 1955.

On April 1, a Royal Caribe route is opened from Miami to San Juan and Caracas. The plush new service allows the Atlanta-based carrier to claim provision of the first intercontinental DC-7 service.

The **Delta-C & S** title reverts to Delta Air Lines in September as the acquisition is fully integrated. The DC-7B prototype, reconfigured as a DC-7, is delivered to the airline on December 10.

The CAB grants Delta permission to begin service New York City on January 20, 1956; a new DC-7B is delivered five days later.

On February 1, the carrier happily starts three daily DC-7 Golden Crown and DC-6 Daycoach flights—the latter offered at lower-cost coach fares—from Newark (serving New York City) to Miami via a new stop at Washington, D.C., plus New Orleans, and Dallas–Fort Worth over the older network. In anticipation of a need for additional capacity, four Lockheed 049 Constellations (two of which will later be converted to L-149s) are also purchased from **Pan American World Airways (1)**. Also on February 1, a DC-3 begins the first multistop Houston–Atlanta service.

On April 1, stops are added at Philadelphia, Baltimore, and Charlotte along with nonstop flights while, on May 15, the New York terminus is switched from Newark to Idlewild International Airport.

Ten Convair CV-880s are ordered on June 21. The first L-049 is delivered on August 2 with the remainder introduced by mid-September. Meanwhile, the first of five new CV-440 Metropolitans to be delivered by December 7 arrives on August 28 while, on September 10, orders are placed for 10 CV-880 jetliners. Tampa becomes a Florida destination in early October.

Three more CV-440s are received during the first quarter of 1957. A DC-3 is sold to **North Central Airlines** in April and a total of eight DC-7Bs join the fleet between June 14 and December 29.

A group of five ex-Chinese **Civil Air Transport** Curtiss C-46s are acquired during September–October and enter freighter service during the latter month on routes out of Atlanta. During the year, all of the carriers CV-340s are converted to CV-440 standard.

The final two DC-7Bs are received in January 1958 and three DC-3s are sold in the spring. In addition, two CV-240s are sold, one each in February and June.

A CAB ruling in March allows Delta to consolidate a number of short-haul routes into longer runs and to upgrade its Atlanta hub.

A long adherent to prohibition, the company, during the spring, begins to sell liquor on its flights. Although the local religious press and some employees will protest, the new policy will be maintained.

The Constellations are withdrawn from service on July 1 and placed in storage.

On September 22, new Royal Service catering, complete with selected premium mealtime entrees, complimentary champagne, reserved seating, and no-cost baggage handling, is introduced aboard the "Sevens."

Two DC-6s are leased from **United Air Lines** in December.

Orders are now placed for Douglas DC-8-11 jetliners that begin to join the fleet beginning on July 21, 1959. The next day, the premier jetliner sets a speed record for a flight between Miami and Atlanta of 1 hr., 28 min. The second DC-8-11 arrives on September 14.

One of the two new aircraft, Flight 823, is employed to inaugurate (by two hours over **Eastern Air Lines**) the world's first DC-8 service on September 18, over the route from New York (IDL) to Atlanta. A C-47 freighter is sold in September and a DC-3 in October.

During the year, two more DC-6s are leased from **United Air Lines**. A DC-7B crashes into the Gulf of Mexico on November 15. One of the leased DC-6Bs, the *Mainliner Iowa*, is purchased in December.

A C-46 Commando crash-lands at Tampa on January 13, 1960, and a second is substantially damaged when it hits ice while landing at Chicago on February 6.

The first CV-880 is turned over by the manufacturer on February 10, and, in a ceremony involving President Woolman, is christened *Delta Queen*. The next day, it makes its delivery flight from San Diego to Atlanta via Miami in a record 3 hrs., 31 min.

A CV-440 makes a hard landing at Chicago on February 25 that causes minor injuries to all 24 people aboard.

On April 1, the two L-049s and two L-149s are sold to **American Flyers Airlines**. The first CV-880 is followed by two more, one each on May 4 and 6. The three commence Royal Jet Service on May 15 on nonstop flights from New York to Atlanta, Houston, and New Orleans.

On May 12, all 51 aboard a DC-8-11 suffer minor injuries when it encounters severe turbulence while on landing approach to Miami. A DC-3 freighter is badly damaged while being parked at Columbia, S.C. on May 21. Flight 1903, a CV-880 with four crew, stalls during takeoff from Hartsfield Airport, Atlanta, on a May 23 training flight, and crashes; there are no survivors.

The first 20 DC-8-11s now begin upgrade to Dash-12 standard; later, they will be modified into Dash-51s. The remainder of the original CV-880 order will be completed by December 13, although three more are ordered in June.

Dallas to Atlanta and Houston to New Orleans CV-880 service is inaugurated on July 1, followed by two services (one nonstop and one via Memphis) from Chicago to New Orleans and another from Chicago to Atlanta on August 1.

Philadelphia–Houston CV-880 flights via Baltimore and New Orleans commence on October 15. Upon the completion of the Knoxville–Atlanta service on October 29, the last DC-3 is retired. Additionally, another CV-240 is sold. Houston to Chicago via St. Louis CV-880 service is initiated the next day. CV-880 flights are started in December to Miami from both Chicago and Cincinnati.

Although no one is injured, a DC-8-11 is severely damaged as the result of a hard landing at Dallas on February 6, 1961; eight days later, the landing gear of a C-46 fails during the plane's Atlanta landing. As a result of the CAB's Southern Transcontinental Route decision of March 11, Delta is awarded a Los Angeles to Miami concession.

Another DC-8-11 is damaged in a bad landing, this time at Chicago on April 12. Four days later a third DC-8-11 incurs substantial damage in the same sort of put down at Detroit. On May 17, the failure of No. 2 engine's starter results in damage to a CV-880.

With the route interchange agreements now no longer needed by the company, those in effect with **American Airlines**, **Trans World Airlines (TWA)**, and **National Airlines** all cease on June 10. The next day, DC-8s open routes from Atlanta to Los Angeles, from Miami to L.A. via Dallas, and from New Orleans to L.A. via Dallas.

A DC-8-11 is damaged during a training mission at Jacksonville, Florida, on June 16 when its nose gear fails on landing.

On July 1, an Atlanta–Dallas–Las Vegas–San Francisco service is launched.

A new Convair 880 is received on September 9 and a CV-340, with nine aboard, makes a hard landing at Kansas City, Missouri, on September 23.

Direct Atlanta–San Francisco flights begin on October 13. Also in October, Orlando is opened as a market.

A DC-7 with 20 aboard crashes at Jacksonville on December 2 while another DC-7 must be written off after a ground accident in Chicago on December 16.

During the year, seven CV-340s are sold to **North Central Airlines**, four CV-240s are sold to various purchasers, and the four DC-6s leased from **United Air Lines** are purchased.

Between April and December 1962, four DC-8-51s are delivered. Meanwhile, on May 1, Las Vegas–San Francisco service is initiated. After the DC-7 damaged at Chicago the previous December is dismantled, it will be turned into a restaurant.

Four more CV-880s, representing fulfillment of the order, are all delivered in July.

While taxiing at Memphis on January 13, 1963, a DC-7 with a five-man crew collides with a parked U.S.A.F. Fairchild C-123 Provider (one dead); the airliner will later be repaired and returned to duty. The next day, the left landing gear of a DC-8-12 with 53 aboard collapses during the aircraft's Tampa landing; no injuries are reported.

Following a meeting between Donald Douglas and Delta founder C. E. Woolman in Atlanta, Delta, on March 13, launches the DC-9, placing the first order for 15 of the new shorthaul jetliners at \$3 million per copy.

With CAB permission, the carrier begins Los Angeles–Caribbean service on May 1.

A DC-6 with 24 aboard undershoots its Indianapolis landing on August 13 while a CV-440 with 38 aboard crashes at Atlanta on November 1 after its left landing gear fails on landing; no injuries are reported from either accident.

Two DC-8-51s are delivered, one in November and the other in December. Also in December, the government approves a new interchange agreement between Delta and **Pan American World Airways (1)**.

Enplanements for the year total 4,648,000 and profits are \$1,766 million.

Airline employment in 1964 stands at 10,462 and the fleet includes 84 aircraft.

Early in the spring, Atlanta to San Francisco DC-8-51 nonstop flights are introduced.

A CV-880 with 93 aboard encounters clear-air turbulence near Tampa on March 26; one passenger is badly hurt.

On April 28, the company orders three of the Boeing SSTs then under development; none will be delivered.

The first one-plane daily service from the southeastern U.S. to Europe begins in May as the result of the interchange agreement signed with **Pan American World Airways (1)**. A Pan Am DC-8-33 is able to operate over Delta's route from New Orleans to Washington, D.C. (IAD) via Atlanta and on to London and Frankfurt.

Three more DC-8-51s now join the fleet, one each in May, October, and November.

On November 24, a C-46R with two crew, having hydroplaned after landing, is totaled in the resulting crash at Baton Rouge and cannot be repaired.

During the year two CV-440s are sold, one each to **North Central Airlines** and **Allegheny Airlines (1)**.

Passenger boardings climb 17% to 5.6 million and freight traffic is up by 24%. Revenues advance 13% to a record \$240 million and the net profit jumps 41% to \$18.4 million.

The workforce in 1965 is 11,560.

The first DC-9-14 makes its maiden flight at Long Beach on February 15 while, after 40 years as president and general manager, C. E. Woolman becomes chairman/CEO; a 31-year company veteran, Charles H. Dolson, becomes president. The board of directors votes a two-for-one stock split, which increases the number of outstanding common shares to 6.37 million.

Between March and December, four more DC-8-51s are delivered and the initial DC-9-14 is accepted in a ceremony at Long Beach on September 8.

Christened *Delta Prince*, the DC-9-14 makes its delivery flight to Atlanta via Dallas (DFW) transporting a bottle of water from each of its forthcoming service cities and arriving to the strains of *Dixie*, as played by a Georgia high school band. The first of its type in the world employed on scheduled revenue operations by a large carrier, the *Delta Prince*, Flight 791 under Capt. C. J. Williams, enters service on November 29 on a run from Atlanta to Kansas City via Memphis. The second DC-9-14 service is operated from Atlanta to Detroit via Dayton and Columbus. Nineteen cities on the company network are served by the first four DC-9-14s by December 19.

On the last day of the year, the fleet totals 92 aircraft: 16 CV-880s, 19 CV-340/440s, 4 Curtiss C-46Ds, 19 DC-8-51s, 4 DC-9-14s, 19 DC-7s, and 11 DC-6s. A total of 6,542,919 passengers are originated during the year. Revenues climb 18% to \$282.42 million while net earnings jump 51% to \$27.79 million.

The final two DC-8-51s are delivered in January and August 1966 while the remainder of the DC-9-14 order begins delivery in July. Meanwhile, a DC-7B is sold in June and a two-year sell-off of the DC-7s to Ontario, California-based BMR now begins while a CV-440 is sold to **North Central Airlines**.

In August, September, and October three Lockheed L-100s join the cargo division, one per month, replacing the C-46s, which are now retired.

Founder/Chairman Woolman dies on September 11 from complications surrounding heart surgery and is succeeded as chairman by President Dolson.

The first L-100 is placed into service on September 15, making Delta one of the first commercial operators of the Hercules freighter. Orders are placed for 13 DC-8-61s.

Enplanements for the year are 8,750,560.

BMR continues receiving ex-Delta DC-7s during 1967. They are joined by the first of seven DC-7Bs to be received from Delta during the next year.

The workforce is now 15,972.

On January 31, the four remaining C-46s are sold to the Aviation Association of Georgia. Also in January, the last of 17 DC-9-14s is delivered.

On a March 30 training flight, Flight 9877, a DC-8-12 with a six-man crew is in the process of executing a simulated two-engine-out landing at Moisant Airport, Kenner, Louisiana. The aircraft crashes into a motel and home at New Orleans, killing all aboard, plus 18 in the hotel (9 of whom are high school students from Juda, Wisconsin) and 2 in the house.

The first DC-8-61 is received on April 10 and enters service on April 18. Two days later, the first 12 of 63 DC-9-32s begin service. Two more DC-8-61s are received, one each in June and July.

A CV-880, with 59 aboard, turns around and lands safely at Newark on June 24 after losing an engine shortly after takeoff.

In August, a DC-9-15 is leased for four years and an L-100 for two. Company officials now announce the arrangement of a \$175-million bank loan to finance the equipment expansion.

Passenger boardings jump 9% to 9,616,000 and freight traffic is up by 15%. Overall revenue advances by 7%.

The employee population in 1968 is 17,483.

A DC-6's nose gear collapses at Chattanooga on February 15.

On February 21, Flight 843, a DC-8-61 with 7 crew and 109 passengers and en route from Chicago to Miami via West Palm Beach, is hijacked and diverted to Havana; the craft, crew, and passengers are allowed to return after the pistol-wielding pirate deplanes. Feeling unwelcome in Cuba, the skyjacker will move to Spain two years later and be extradited back to the U.S., where he will end up in a mental institution.

The 11 oldest aircraft are now all withdrawn and sold by year's end and the sale of DC-7s and DC-7Bs to BMR is completed. Another Hercules freighter is chartered.

After losing an engine in bad weather, a CV-340 with 3 crew and 39 passengers crash-lands while going around for another try at a

single-engine landing at Evansville, Indiana, on March 20; although the plane must be written off, there are no fatalities.

On April 2, orders are placed for two dozen Lockheed L-1011 TriStar 1s. Between May and December, three more DC-8-61s are received along with 26 DC-9-32s.

On July 12, O. D. Richards is subdued at Miami—talked into surrender by the plane's first officer—after attempting to hijack Flight 977, a DC-9-32 with 48 aboard and en route from Baltimore to Houston, and force it to Havana. One passenger, U.S. Senator Eastland, reports that the pirate threatened him before entering the cockpit. Following a mental examination, Richards will be committed to a psychiatric hospital.

In other non-fleet oriented activities during the year, the company expands its general maintenance facilities by 90%, having almost 17 acres under one Atlanta roof. At the same city, a new computer center is opened, featuring an IBM 360/65 Deltamatic reservations computer, and a \$7-million expansion program is completed, including two terminal rotundas with 12 jet gates.

The company's first DC-6, *The Flying D*, is sold to Aero Tech on October 16 while five DC-8-33s are purchased from **Pan American World Airways (1)** on December 31.

Customer bookings jump 16.8% to 11,232,789 and cargo traffic climbs by 33%. Revenues advance by 17% to \$467,286,144.

On January 13, 1969, passenger K. E. McPeck, wielding a shotgun, is foiled in his attempt to force Flight 297, a CV-880 with 77 aboard and en route from Detroit to Miami, to fly to Cuba. The pilot is able to land at Miami because McPeck, after threatening a stewardess, returns to his seat with his ailing 3-year-old son and is seized by fellow passengers.

On March 17, Flight 518, a DC-9-32 with 63 passengers and en route from Dallas to Charleston, is taken over between Atlanta and Augusta, Georgia, and diverted to Havana. There the hijacker meets and eats with the pirates of a **Faucett Peruvian Airlines, S.A.** DC-4 stolen the same day. The pirate will return to the U.S. via Canada later in the year, captured, and confined in a mental facility for three years.

Two days later, on March 19, the FBI foils the attempt of gunman D. A. Dickey to seize Flight 918, a CV-880, with 97 passengers and en route from Dallas to New Orleans. Criminal charges against Dickey will be dismissed when he agrees to confinement in a psychiatric hospital in Arizona.

Federal agents are unable to prevent the capture of Flight 821, a CV-880 with 114 passengers and en route from San Diego to New Jersey on March 25, just after takeoff from Dallas; the Convair is diverted to Cuba.

The nosegear of a CV-440 collapses at Macon on June 10.

Two more ex-Pan Am DC-8-33s are acquired in August.

With the delivery through the remainder of the year of 15 DC-9-32s and 16 DC-8-61s, Delta's fleet total grows to 161.

During the summer, four new buildings that will house the Atlanta Reservations Center, plus associated operations, are completed.

During the remainder of the year, 11 CV-340s are sold to Ransome Associates; the last of 6 DC-8-61s to be delivered on the year joins the fleet on November 6.

Destined for high company posts later on, Allison Johnson and Jenny Poole are hired as stewardesses during the year.

Fourteen-year-old David L. Booth attempts to hijack Flight 670, a DC-9-32 with 75 passengers boarded at Cincinnati and preparing for a service to Chicago on November 10, by holding an 18-year-old girl, G. J. House, at knifepoint. He is persuaded to surrender before takeoff and the FBI turns him over to juvenile authorities after deciding not to press air piracy charges. Upon examination, the youth will be declared mentally ill and will be held in a juvenile psychiatric institution for almost two years.

Enplanements total 12,788,000. Revenues are \$573.03 million and with expenses in check, profits are high: \$90.17 million (operating) and \$41.48 million (net).

The Ransome purchase of CV-340s is completed in early 1970; during the remainder of the year, that company also purchases three CV-440s.

W. Thomas Beebe succeeds Charles Dolson as president.

On January 6, three passengers overpower a man holding a stewardess at knifepoint in an effort to force Flight 274, a DC-9-32 with 65 passengers and en route from Orlando to Columbus, to fly to Switzerland. Upon his arrest, the man is identified as A. Funjak, who had been arrested in May 1969 for threatening the life of President Nixon. Funjak will be tried and receive a five-year prison term.

L. M. Rhodes surrenders to U.S. authorities in Madrid on February 9, claiming to be the hijacker who forced a Delta craft to Cuba the previous February.

On March 30, a DC-8-51 is lost in an accident at New Orleans.

Flight 199, a CV-880 with 102 passengers and en route from Chicago to Miami on May 25 is taken over just after takeoff from an intermediate stop at Atlanta by a Spanish-speaking woman. Her 12-year-old son serves as translator and demands, on her behalf, that the aircraft be flown to Cuba. In 1980, the woman will attempt to sneak back into the U.S. via the Cuban boatlift. During immigration processing, she will be found out, put on trial and, upon conviction, sentenced to prison for 20 years.

An L-100 is leased for the first week of June and also during the month a DC-9-14 is leased from **Eastern Air Lines** for a year.

En route from Atlanta to Savannah on August 20, Flight 435, a DC-9-32 with 82 aboard, is diverted to Cuba by a man allegedly carrying a bomb. Foolish enough to travel to San Juan in 1975, the man will be arrested and returned to the continental U.S. for trial; upon conviction, he will receive a 20-year prison sentence.

Another DC-9-32 is involved in an accident at Louisville, Kentucky, on September 8.

The carrier's first Boeing 747-132 is delivered on October 2, and is followed by a second on October 22. Jumbojet service from Atlanta-Los Angeles via Dallas begins on October 25 while receipt of a third B-747-132 on November 22 allows service to also start to Chicago, Detroit, and Miami.

The employee population is 20,943 and the addition of 5 more jetliners brings the fleet total to 136. Passenger boardings accelerate 8% to 13.9 million and freight-ton miles increase by 11% to 125.8 million. Revenues total \$684.37 million and expenses are \$569.29; operating profits of \$79.08 million are earned along with net income of \$41.35 million.

En route from Chicago to Nashville on February 4, 1971, Flight 379, a DC-9-32 with 27 passengers, is diverted to Cuba by a pirate who shows what he alleges is a nitroglycerin bomb. The assailant will be captured four years later when he returns to the U.S. and given a 20-year prison term.

Pan American World Airways (1) and Delta B-747 Jumbojets now begins to alternate on the European (London and Frankfurt) segments of the interchange agreement, which has been in force between the two carriers since 1964. On March 18, Delta orders five Douglas DC-10-10s. David Garrett succeeds Thomas Beebe as president as Beebe becomes board chairman.

While on the ground at Birmingham, Alabama, on March 31, Flight 400, a DC-9-32 with 22 persons aboard, becomes the subject of a failed hijacking by a 14-year-old boy; overpowered, the youth will be put on probation for three years.

On April 21, a merger is announced with **Northeast Airlines**; the boards of both airlines agree to the arrangement in May. Also in April, the leased **Eastern Air Lines** DC-9-14 is returned.

The last of 63 DC-9-32s is delivered in July and the fourth B-747-132 arrives on September 30. In October, the leased DC-9-15 is returned while the fifth and final B-747-132 is delivered on November 11.

The year's enplanements are 15,234,720. Revenues are \$661.2 million; the operating gain is \$128.9 million and net profit totals \$29.99 million.

Fourteen Boeing 727-232As jetliners are ordered on March 29, 1972, at which time the Seattle-based manufacturer announces that its trimotor is the first jet-powered airliner in history to reach a sales total of

1,000. As part of the arrangement, Boeing agrees to take Delta's last 15 CV-880s in trade.

En route from West Palm Beach to Chicago (ORD) on April 17, Flight 952, a CV-880 with 78 passengers, is taken over by a lone assailant claiming to have a pistol, but who is, in fact, unarmed. Upon the aircraft's arrival at its destination, the man surrenders to police. He will be tried and sentenced to prison for 20 years.

President Nixon approves the Delta and Northeast merger on May 19. **Northeast Airlines** will be absorbed into Delta on August 1, along with 3,500 employees, bringing the company total to 26,421. The number of cities served increases to 99 and unduplicated route mileage increases to 33,000. Prize destinations include the Florida market (from New York, Boston, and Philadelphia), routes to the Bahamas and Bermuda from Boston and New York, and numerous New England communities now available for service from the south. At this point, Delta begins to sell off most of the fleet acquired from **Northeast Airlines**, except for 13 B-727-295s, which are given new livery.

During a May 30 training flight, Flight 9570 with four crew is caught in wake turbulence from an **American Airlines** wide-body while going around. The DC-9-14 *Delta Prince*—the first DC-9 to enter commercial service—strikes the runway with its right wing at Great Southwest International Airport and crashes in flames; there are no survivors.

En route from Detroit to Miami on July 31, Flight 841, a DC-8-51 with 101 passengers, is commandeered by three Black Panther Party members, Melvin and Jean McNair and George Brown, as well as Joyce Tillerson Burgess, accompanied by two children. At Miami, the pirates allow the passengers to go free after collecting a \$1-million ransom from FBI agents, the largest payoff ever made to hijackers. The Douglas is forced to fly to Algiers via Barcelona, where Algerian officials, upon its August 1 arrival, briefly take the skyjackers into custody and confiscate their extorted cash and the children. On August 23, the Algerian government agrees to return the ransom to the U.S. Delta officials pick it up, along with the children, at Paris (ORY) the next day. The pirates will be arrested by French police in May 1976. All will be tried and given prison terms of between three and five years.

Late in the year, Delta begins selling all of its DC-9-14 fleet, with the first 13 aircraft going to **Southern Airways**. Sold before delivery to **United Airlines**, the 5 DC-10-10s are leased for 2.5 years, beginning in November. Simultaneously, the L-1011 order is increased to 30 machines.

On December 20, **North Central Airlines** Flight 575, a DC-9-31 with 4 crew and 41 passengers is taking off in heavy fog from Runway 27L at Chicago (ORD), while Delta Flight 954, a CV-880 with 7 crew and 81 passengers, taxis across Runway 27L. The two aircraft collide, snapping off the Delta plane's vertical stabilizer. Ten aboard the local service airliner are killed and lack of speedy medical aid immediately following the accident raises new issues about airport emergency readiness. The Convair is judged too badly damaged to be economically repaired and will be scrapped the following summer.

Passenger boardings jump 32% to 22,404,000 and freight traffic rises by 14%. Income is \$878,167,000 (\$960 million when combined with pre-August earnings from **Northeast Airlines**) and the net profit is the highest for any of the trunk carriers this year: \$51.09 million.

The employee population in 1973 numbers 28,160. The first Boeing 727-232A is delivered in January; 22 more of the 42-plane order will arrive before December.

While on final approach to Boston after a July 31 service from Burlington and Manchester, New Hampshire, Flight 723, a DC-9-31 with 6 crew and 83 passengers, strikes a seawall 3,000-ft. short of Runway 04, crashes while on instrument approach, and catches fire; there are no survivors. The accident is the first fatal Delta revenue service crash in 20 years. On the same day, another ex-**Northeast Airlines** DC-9-31, with 55 aboard, skids off the runway during its landing at Chattanooga, Tennessee; passengers evacuate the craft through its emergency chutes and no injuries are reported.

The Hercules freighter service ends on September 1 and the first of 24 TriStar 1s is delivered in October. On October 12, the government an-

nounces that, in light of the energy crisis, a mandatory jet-fuel allocation plan will take effect on November 1.

Arriving at Chattanooga at an excessive rate of descent onto final approach on November 27, Flight 516, a DC-9-32 with 5 crew and 74 passengers, hits approach lights 1,600-ft. short of the runway. The aircraft hits a dyke 785-ft. short of the runway, and then skids 1,200 ft. to a stop. Although 9 are injured there are no fatalities.

The next day, company officials reveal that, because of the energy crisis, an estimated 10% of the company's 1,400 daily departures have been eliminated.

Also during November, the company begins turning over its 15 CV-880s and 7 DC-8-33s to Boeing (as part of the B-727 deal) and, along with a second sold in December, withdraws an L-100 in October.

Lockheed L-1011 service begins in December and the sale of DC-9-14s to **Southern Airways** is completed during the year. Largely unnoticed during the year is the appointment of Joy Walker to the right seat of a DC-9-32; she is the company's first female pilot.

Customer bookings advance by 9.8% to 24,620,000 and freight traffic climbs 10.6%. On revenues of \$1.12 billion, expenses are \$99.9 million. The operating profit is \$123.6 million and net income is \$74.99 million, once again the highest profit by a U.S. trunk carrier.

A total of 701 employees are hired in 1974. The sale of CV-880s to Boeing is completed on January 14 when the last two aircraft are turned over at Wichita. Also during the month, all seven DC-8-33s are withdrawn and sold to Boeing.

On February 22, Samuel Joseph Byck murders airport security policeman George N. Ramsburg and DC-9-32 copilot Fred Jones and wounds pilot Reese Douglas Lofton during an unsuccessful attempt to hijack Flight 523 from Baltimore (BWI) to Atlanta; foiled, Byck commits suicide. Columnist Jack Anderson reports on February 26 that he has received a tape from Byck, mailed before the incident, on which he discloses his plans to fly the jetliner into the White House in an effort to kill President Nixon.

The last L-100 Hercules is sold on March 30. The remaining FH-227s are all disposed of during the rest of the year as 28 new jetliners are received: 14 B-727-232s and 14 L-1011 TriStar 1s. The Fairchild, together with most of the DC-9-31s acquired from **Northeast Airlines**, are sold to **Ozark Airlines**. A total of \$400 million is committed to the purchase of 11 additional B-727-232s and a B-747-132 is returned to its manufacturer.

Enplanements grow 7.2% this year to 26,403,000 while cargo is up 1.1% to 260.3 million FTKs. For the second straight year, income exceeds a billion dollars, up 21% to \$1.36 billion. Expenses are in hand, at \$1.2 billion, and the operating profit is \$164.62 million. Net income accelerates 16% to \$87.34 million and gives the carrier its 27th consecutive profitable year.

The workforce in 1975 is 28,273.

In January, the company receives the "Financial Management Award" from *Air Transport World* magazine.

A B-747-132 is sold back to Boeing in March and when a CV-880 is withdrawn on April 18, it is sold to Elvis Presley for use as a VIP transport. Christened *Lisa Marie*, it will be placed on permanent exhibit at Graceland Museum at Memphis on February 6, 1984.

The **United Airlines** DC-10-10 lease expires in May and is not renewed.

On July 20 the carrier dispenses with its requirement that its 4,250 flight attendants wear red, white, and blue uniforms, despite their suitability for the Bicentennial of the U.S.

Five passengers are injured after a DC-9-32 is buffeted by turbulence and hail during a flight from Cleveland-Burlington, Vermont, on August 3.

The last of 20 (from a 1972 order for 43) B-727-232 jetliners is delivered in September. That month a supplemental order for 21 more begins to arrive.

Passenger boardings rise only a miniscule 0.5% to 26,530,000. Cargo is down, by 6.2%. Revenues accelerate to a record \$1.42 billion, but

expenses are kept in check at \$1.35 billion. The operating profit is \$70.86 million and while down from the previous year, the \$37.38-million net gain is the 28th consecutive profit.

The number of employees grows by 2% in 1976 to 29,091. Security officers in New Orleans detain St. Louis Cardinals' running back Terry Metcalf on January 19 for threatening to blow up a company jetliner with firecrackers found in his baggage.

Orderly withdrawal and sale of the DC-8-51 fleet, along with 30 DC-9-32s, begins, while the European interchange agreement with **Pan American World Airways (1)** is allowed to end.

Final arrangements are completed for the sale of the remaining Jumbos to their manufacturer while four more DC-9-32s will pass to **Ozark Air Lines**.

A new and costly cargo terminal is occupied at Atlanta and in July, Storer Leasing is acquired.

Applications are placed before the CAB seeking nonstop authority from Atlanta to Boston, continuing on to London. The Atlanta to Boston segment is started late in the year. The extension to London, although awarded by the regulators, is remanded by President Gerald Ford.

Three more L-1011s are delivered during the fourth quarter.

Customer bookings grow by 6.8% to 28,332,000 while freight increases by 13.1%. Operating revenues are \$1.69 billion and expenses are \$1.5 billion. The operating profit is \$127.74 million and the 19th consecutive net profit skyrockets 88% to \$84.14 million.

A supplemental order for 21 B-727-232A jetliners is delivered to Boeing in February 1977. Meanwhile, the last DC-8-51s are simultaneously retired.

Between March and April, the three remaining B-747-132s are traded back to Boeing and, in May, another group of Boeing trijets begins to arrive, some as the result of the Storer acquisition.

On December 21, the CAB and President Jimmy Carter award Delta a transatlantic route from Atlanta to London (LGW).

During the year, the carrier's L-1011 fleet is fitted with nine-abreast coach seating.

Enplanements for the year total 29,635,000. On operating income of \$1.88 billion, net income is \$116.56 million.

The number of workers is increased 4.2% in 1978 to 32,281.

To operate the new London service, the company orders 11 long-haul TriStar 500s in January.

Also during the month, the company receives the 1977 "Airline of the Year" award from *Air Transport World* magazine.

During the spring, CEO Beebe makes several visits to the White House to attempt to win President Carter's support for his antiregulation position; the former Georgia governor is not interested.

The London route is inaugurated with much publicity on April 30, employing two TriStar 200s leased from **Trans World Airlines (TWA)** for a two-year period.

Additional orders are now placed for 42 B-767-200s and 8 B-727-232As. In September, the carrier receives its 100th B-727-232, making it the world's largest operator of the type.

Following the arrival of airline deregulation in October, the carrier assumes several new routes and improves frequencies on a number of older ones. Meanwhile, Delta files several unsuccessful suits in federal court in an effort to block the implementation of deregulation.

Passenger boardings jump 19% to 36,586,000 while freight traffic grows a modest 1.3% to 293.17 million FTKs. Revenues advance by 18.93% to \$2.24 billion and expenses are held to \$2.02 billion. The operating profit is \$216.16 million while net profit climbs 17.9% to a record \$137.4 million.

Airline employment is increased by 9.1% in 1979 to 36,000.

On February 16, just after landing at Chicago (ORD), a **The Flying Tigers Line** B-747F is forced to run into a snowbank to avoid a Delta B-727-232 taxiing in its path across the runway; the near-collision costs \$17 million in Jumbojet repairs.

Atlanta-Amsterdam flights begin on May 5 and other domestic markets now entered include the Florida cities of Sarasota, Bradenton, Day-

tona Beach, and Fort Myers, plus the Texas towns of Austin and San Antonio. The first L-1011-500 is received in May and undergoes a month of trials.

On June 11, gunman Eduardo Guerra, who had defected from Cuba with a MIG-17 fighter plane in 1969, commandeers Flight 1061, an L-1011 with 209 passengers and en route from New York to Fort Lauderdale. He diverts it to Cuba, where Premier Castro agrees to offer the one-time traitor political asylum.

L-1011-500 service over the North Atlantic begins on June 17 to Frankfurt and Hamburg and the fiftieth anniversary is celebrated in June.

On July 16 dozens suffer minor injuries during the evacuation of an L-1011 after a bomb threat causes an aborted takeoff from Fort Lauderdale.

The failure of an air traffic controller leads to a near-collision between a DC-9-32 and an **Air Florida** B-737-2T4C over North Carolina in November.

During the year, additional progress is made on the company's fleet modernization. Six DC-9-32s and two DC-8-51s are sold as four more L-1011 TriStar 1s and another L-1011-500, in addition to eight B-727-232As, join the fleet. A contract is signed to reengine its remaining 13 DC-8-61s with GE/Snecma CFM-56 engines, thereby turning them into DC-8-71s.

Customer bookings swell 10.7% to 40,495,000 while freight climbs 8.2% to 317 million FTKs. Revenues advance 19% to \$2.67 billion as expenses (led by a \$225-million fuel price increase) leap 26% to \$2.55 billion. Although the operating profit is \$123.7 million, the net profit declines by 24.58% to \$103.6 million. Although the net is down, it is still highest among trunk lines; indeed, \$16 million ahead of second place **American Airlines**.

The employee population increases 1.4% in 1980 to 36,500.

Samuel Aldon Ingram Jr., traveling with his wife and two children on January 25, hijacks Flight 1116, an L-1011 with 63 passengers on a flight from Miami to New York, and forces it to Cuba, where he is seized while negotiating for a flight to Iran.

David Garrett succeeds W. Thomas Beebe as board chairman and lack of demand forces discontinuance on April 27 of nonstop flights between New York and Miami. Also in April, the two leased TriStar 200s are returned to **Trans World Airlines (TWA)**.

Daily flights from Atlanta to Seattle and Portland commence on June 1 and service is also started to Dallas (DFW), where an effort is undertaken to turn that Texas point into a major hub.

After a decade-long manhunt, the FBI arrests Cuban refugee Graciela Quesada Zamora at Fort Chafee, Arkansas, on June 7 for the May 25, 1970 skyjacking of a company aircraft to Cuba.

A pilot, who overshoots Tampa and safely lands a B-727-232 and its 90 passengers at MacDill AFB, is suspended on June 22.

En route from Miami to San Juan on July 22, Flight 1135, an L-1011 with 158 passengers, is captured by a lone gunman who orders the wide-body flown to Havana. Bad weather forces the pilot to put down at Camaguey, instead. The pirate is taken in hand by Cuban police and receives a three-year prison term.

Flight 1065, an L-1011 with 193 passengers and en route from San Juan to Miami, is diverted to Cuba on August 16 by a person carrying what appear to be containers of gasoline. The assailant is taken in hand by Cuban police and will be sent to jail for several years.

Having returned from Cuba, Samuel Ingram Jr. surrenders to the FBI at New York on August 20. He will be indicted, tried, convicted, and sentenced to prison for a term of 40 years.

Also in August, the third of three L-1011-500s to be received new from the manufacturer arrives.

En route from New Orleans to Atlanta on September 13, Flight 334, a B-727-232 with 88 passengers is captured by 2 hijackers who threaten to blow up the aircraft unless it is diverted to Havana. In Cuba, the men receive prison sentences of three and four years, respectively.

Cuban refugees Crecencio Perez-Perez and Juan Adegá Fresneda hijack Flight 470, a B-727-232 with 111 passengers and en route from

Atlanta to Colombia, South Carolina, on September 17 and divert it to Havana, where they are led away in handcuffs. In the first instance where Cuba promptly returns hijackers, the two men are turned over to U.S. Marshals the next day and sent to Charleston aboard an FAA transport. They will be indicted, tried, convicted, and sentenced to 40-year prison terms.

Following an apparent error in ATC instructions radioed from the ground, a B-727-232 nearly collides with a **Piedmont Airlines (1)** B-737-201 as both are incoming, west of New York (LGA) on December 10.

Two days later on December 12, Delta becomes launch customer for the B-757-200, ordering 60 machines with which to begin replacing its B-727-232s and DC-9-32s. During the year, fuel efficiency of the 212-unit fleet is increased to a point where 3% less fuel is consumed.

As is the case throughout the industry, traffic is down. Passenger enplanements slip 5% to 38 million; however, cargo is up a minor 0.3% to 453.19 million FTKs. Both revenues and expenses are up by 23%; the former by 23.58% to \$3.3 billion and the latter by 23.23% to \$3.13 billion. The operating profit is \$164.17 million and net gain is \$130.46 million. Delta's net profit line is the highest for any major U.S. carrier; indeed, \$50 million better than that of second-place **Pan American World Airways (1)**.

The number of employees grows by 2.9% in **1981** to 36,101.

The carrier, in January, receives the 1980 "Financial Management Award" from *Air Transport World* magazine.

Sale of the DC-8-51 fleet and the last of 30 DC-9-32s is completed.

Fort Lauderdale, Tampa, Tulsa, and Colombia, South Carolina, are added to the route system from Dallas (DFW) on March 18 as the company adds more frequencies between the Texas airport and Baton Rouge, Monroe, and San Antonio. Cincinnati also becomes a significant hub as new services are inaugurated between that Ohio metropolis and Phoenix, Denver, Washington, D.C., and Raleigh/Durham.

Other new routes are Denver to Las Vegas and Atlanta to Pittsburgh. Ground is broken for a new technical facility at Tampa and capacity is increased at the Dallas (DFW) and Atlanta technical centers.

A new passenger terminal is started at New York (LGA) and the computerized marketing subsidiary Epsilon Trading Corporation is formed.

Katharine Louis "Kathy" Hargan is arrested by the FBI while trying to stow away in a trunk aboard a New York to Atlanta flight on June 8, allegedly to ransack valuables from the jetliner's baggage compartment.

The company joins with **Eastern Air Lines** on August 19 in an effort to collect from the city of Atlanta over \$15 million in taxes they claim have been collected on equipment and other property.

On October 7, the Chicago Circuit Court awards Thomas and Melanie Klucynski \$208,000 for being bumped from a company flight; the award is the largest ever made to passengers denied confirmed seats.

The carrier adds four daily roundtrips from Atlanta to Pittsburgh, beginning on October 25.

In November, the last of a 1977 supplemental order for B-727-232A jetliners is completed with the delivery of the 129th and final unit.

In December, a comprehensive marketing and code-sharing agreement is arranged with Cincinnati-based **Comair**; frequent flyer programs are also combined.

Customer bookings decline 9.9% to 34,777,000, while cargo is up by an equal percentage to 318.89 million FTKs. Operating income jumps 10.37% to \$3.64 billion while expenses, although up by 12.31%, are still held to \$3.55 billion. The operating profit is \$86.5 million and the \$91.64 million net profit is the 34th in a row, making the carrier the best-earning airline in the world.

The employee population is cut 0.3% in **1982** to 36,500.

Three persons hijack Flight 591, a B-727-232 with 103 passengers and en route from Chicago to Miami, to Cuba on April 5. One stewardess is injured when the hijackers, using gasoline as their weapon, splash the eyes of the flight attendant. The pirates are taken into custody by Havana officials and are given 20-year prison terms.

The first of 13 DC-8-61s to be reengined with GE/SNECMA CFM56-2-1C turbofans and redesignated DC-8-71s is delivered in early April and enters service on the Atlanta-Savannah route on April 24.

Delta now begins to compete with **American Airlines** at the latter's Dallas (DFW) hub. Initially resisting the challenge of entering the discount fare wars started by others as a way of generating traffic in a time of recession, Delta finds itself drawn in beginning in October.

Led by 3 flight attendants, 7,000 company employees, in a show of faith toward a company unwilling to lay off workers during a period of traffic decline, pledges \$30 million at \$1,000 per head through payroll deductions for the purchase of the first B-767-232. Upon its arrival in late November, it is christened *The Spirit of Delta* and is placed into revenue service on December 15.

Fourth-quarter arrangements are made to trade 11 L-1011 TriStar 1s to Boeing as part of a deal for the 15-year lease of 33 new B-737-232s. Additionally, several B-727-232s are sold and another computerized marketing subsidiary, Datas Incorporated, is established.

Passenger boardings for the year fall 3.1% to 33,678,000 and cargo grows only 1% to 322.6 million FTKs. Revenues dip 0.35% to \$3.63 billion while expenses jump 4.49% to \$3.71 billion. An operating loss of \$85.94 million is suffered and the net loss—the first in 35 years—totals \$17.05 million.

The payroll is increased by 2.4% in **1983** to 37,368 and, in January, Delta receives the 1982 "Technology Management Award" from *Air Transport World* magazine.

Former stewardess Allison Johnson is now named manager of the Atlanta flight-attendant base.

While en route from Portland, Maine, to Boston on January 7, Flight 177, a B-727-232 with 30 passengers, is suddenly taken over by a passenger, claiming to have a bomb, and demands to be flown to Las Vegas. On the ground at Boston, the man is overpowered by crew members. Upon examination, the man will be found mentally unstable and sent to a psychiatric institution.

The second of 15 B-767-232s is delivered in March; deliveries will continue apace for two years. The last of 24 TriStar 1s joins the fleet in May.

En route from Miami to Tampa on July 17, Flight 722, a B-737-232 with 107 persons aboard, is hijacked by 3 men armed with knives and an aerosol can, who divert it to Havana. Upon arrival, Cuban police board the Boeing and arrest the pirates.

Flight 784, a B-727-232 with 79 passengers and en route from Miami to Tampa, is hijacked from Miami to Havana on August 18 after a man threatens to set fire to himself and to the airplane; the hijacker is seized by Cuban authorities upon landing.

In the fall, 11 TriStar 1s are traded to Boeing for 33 more B-727-232As and a new passenger terminal is opened at New York (LGA) in October.

The last of 13 DC-8-61s to be reengined into DC-8-71s joins the fleet in November and, in December as part of the 33 aircraft lease arrangement, Delta receives the 1,000th B-737 constructed.

David Garrett steps down as chairman/CEO at the end of the year and is succeeded by Ronald W. Allen. The changeover is caused largely by poor financial return as a result of offering too many discount flights to too few passengers.

Bookings rise 9.4% to 36,801,000 and cargo climbs 6.1% to 342.37 million FTKs. Operating income advances 7.53% to \$3.90 billion and costs jump 6.58% to \$3.92 billion. The operating loss is \$57.2 million and the net loss deepens to \$13.93 million.

In January **1984**, the company receives the "Labor Relations Award" from *Air Transport World* magazine.

Daily flights are started between Atlanta and Houston (HOU) on March 1.

In the second U.S. hijacking incident in two days, Flight 357, a B-737-232 with 26 aboard and en route from New Orleans to Dallas (DFW) on March 28, is diverted to Cuba by a man threatening to ignite a bottle of liquid he is holding against a flight attendant.

In an effort to better ensure feed to its hubs, the 37,000-employee company now establishes the "Delta Connection" commuter network. The first company to join the major in this code-sharing arrangement is Philadelphia-based **Ransome Airlines** on May 1. In June, Dallas (DFW)-based **Rio Airways** is recruited, followed by **ComAir** of Cincinnati in September, a company that already has a relationship with the major. As is the case with the more famous "Allegheny Commuter" network, small partner companies will come and go as members over the next decade.

Meanwhile on June 15, Atlanta-Frankfurt service is inaugurated. Also in June, a dedicated terminal is completed at Chicago (ORD) as part of a hub-strengthening plan that also sees 25% expansion at Dallas (DFW) and the opening of a new administrative headquarters at Atlanta. Other new services initiated include Dallas (DFW) to Atlanta, Ontario, California, and Nassau; and Atlanta to Richmond, Ontario, and Minneapolis (MSP) via Chicago.

FBI agents arrest two Delta passengers on a July 23 bound for Newark from Miami on charges of attacking a 74-year-old passenger on a B-727-232A over a seat; the senior citizen is so severely injured that he requires plastic surgery. The next day, a DC-8-71 takes evasive action and by less than 300 feet avoids colliding with a small private plane that has just taken off from MacArthur Airport on Long Island, 20 mi. SE of New York; two stewardesses are slightly injured.

Two L-1011-500s are purchased from **Pan American World Airways (1)** in September and join 27 additional B-737-200s accepted since the first of the year.

The first B-757-232 is delivered in early November and is placed into revenue service on the 28th of the month. By the year's end, three other B-75-232s and two B-767-232s join the fleet. On December 14, TriStar 500s launch transpacific service from Atlanta to Honolulu via Dallas (DFW).

Passenger boardings rise a scant 1.4% to 37,341,000 as cargo climbs 8.1% to 370.17 million FTKs. Operating revenues swell 15.2% to \$4.49 billion while costs grow only 9% to \$4.2 billion. The previous year's operating loss is changed into a \$291.5-million gain while the tradition of net profits is resumed with a company record \$258.6-million income.

The payroll grows a slight 3.2% in **1985** to 39,406 and the next 8 of 60 ordered B-757-232s begin delivery in February.

In March, an agreement is signed with **Air Atlanta** for full joint ticketing and baggage handling between the two airlines.

Nonstop L-1011-500 flights to Paris from Atlanta begin four times per week on April 1; B-737-232 daily service is inaugurated from the Georgia capital to Greenville and Spartanburg, South Carolina, the same day.

Nonstop service is initiated from Atlanta and Houston to Honolulu on June 1 with a third long-range TriStar received from **Pan American World Airways (1)**.

Coming in from Fort Lauderdale to land at Dallas (DFW) during a thunderstorm on August 2, Flight 191, an L-1011 TriStar 1 with 11 crew and 152 passengers, is caught in a microburst 6,300-ft. short of the runway. The aircraft nosedives and slams into cars on a highway, strikes a pair of water towers, and breaks up, crashing in flames (136 dead). The tragedy is the subject of Jerome G. Chandler's *Fire and Rain: A Tragedy in American Aviation* (Austin: Texas Monthly Press, 1986).

Emerging from clouds near Chicago on September 20, a jetliner must dive and bank sharply to avoid collision with a private lightplane.

Delta management now refuses to comment on speculation that it is negotiating a merger with **Western Airlines** and places orders for nine B-767-300s.

Customer bookings ascend by 6.6% during the 12 months to 39,804,000 and freight is up 2.4% to 547.1 million FTKs. The cost of operation in the face of stiffening competition and an atmosphere of heavy fare wars has a financial impact. Revenues climb 5.4% to \$4.73 billion and costs rise 7.1% to \$4.5 billion. The operating profit slips to \$231.2 million and net gain falls to \$156.77 million.

The workforce is cut 1.3% in **1986** to 38,901.

A B-727-232A crash-lands at Memphis on January 9 when its landing gear collapses; no injuries are reported.

On January 23, a \$2-billion launch order is placed for 30 McDonnell Douglas MD-88s, with 50 options. Plans are also announced for an \$18.7-million takeover of Los Angeles-based **Jet America**, but the deal will not be consummated.

On February 5 Ralph A. Hughes, wielding a knife, holds a steward hostage on Flight 139, an L-1011 with 232 aboard and arriving at Dallas (DFW) from Fort Lauderdale on a service to Los Angeles. The man is arrested two hours later. Upon examination, he will be found mentally unstable and will be sent to a psychiatric facility.

Just after arrival at Daytona Beach on March 16 and after the deplanement of its passengers, a B-737-332 is taken over by a lone gunman, who demands that the aircraft take off for a destination he will announce later. The aircraft begins to move out, but is idled when police shoot out its tires. The skyjacker will surrender.

On April 27, Atlanta-Stuttgart and Munich service is initiated and Atlanta-Shannon flights begin on May 8, while Cincinnati to London authority is sought.

A strike by the company's only union, the Air Line Pilots Association (ALPA), is averted by settlement and 20% interest is taken in both "Delta Connection" carriers **Comair** and **Atlantic Southeast Airlines**.

In September, both the industry and the public are surprised when it is announced that pioneer **Western Airlines** will be taken over before year's end.

The first of 15 B-767-332s begins delivery in November and, on December 15, the carrier introduces 55 new daily frequencies to and from Cincinnati.

On December 19, **Western Airlines**, with DOT approval, becomes a Delta subsidiary, purchased for \$860 million, and Delta becomes the fourth largest U.S. airline. The acquisition allows the Atlanta-based major a ready-made route network in the American West, along with big hubs at Salt Lake City and Los Angeles. The family-oriented Delta attempts to preserve as many **Western Airlines** jobs as possible by offering transfers for almost 1,500 people from Los Angeles to Atlanta. Western CEO Gerald Grinstein becomes a Delta board member; Thomas Roeck, who will later become Delta's Chief Financial Officer, also moves over.

Also in December, the 13 DC-8-71s are sold to **United Parcel Service**, but are then leased back for three years; three B-727-232s are sold to **Federal Express**.

Passenger boardings swell 3.1% this year to 41,062,000, but cargo is down 3.5% to 351.69 million FTKs. Revenues for the year dip 5.12% to \$4.49 billion and costs fall 5.23% to \$4.27 billion. Although the operating profit falls by almost \$12 million to \$143.21 million, net gain jumps to \$193.7 million.

Airline employment grows 28.5% in **1987** to 50,000.

All former Western employees are given jobs and wage raises to match the higher rates paid by Delta.

During the first quarter, daily departures from the Atlanta hub are increased to 385, while the number of those from Dallas (DFW) reach 187 and 104 from Cincinnati.

Nonstop Atlanta to Tokyo flights begin on March 2, employing extended range TriStar 500s; two days later, one-stop flights are initiated via Portland, Oregon.

At Cincinnati on March 9, an SF-340 of "Delta Connection" partner **Comair**, just after discharging its passengers, loses hydraulic power and crashes into a fuel truck and a B-767-232; although both aircraft are substantially damaged, there is no explosion.

Between March and May, eight MD-82s are delivered, the first being placed into service on April 1, the day Western is submerged into Delta. An option is exercised to obtain a 20% interest in "Delta Connection" partner **SkyWest Airlines**. At the same time, the airline signs a major marketing and code-sharing alliance with this commuter partner.

Just in time for the summer tourist season, Delta replaces **Eastern Air Lines** as "The Official Airline of Walt Disney World" in Florida.

The amalgamation of the two majors is completed despite a last minute attempt by lawyers representing **Western Airlines'** pilots and flight dispatchers unions to thwart the marriage and convert their troubled airline into an independent, high-paying, one-union carrier modeled on Delta. With all other **Western Airlines** hires having abandoned their unions, the effort is unsupported and fails. By now, many of **Western Airlines'** 34 B-737-247As and 13 B-737-347s have been reliveried. Arrangements are made to sell the 10 DC-10s obtained in the merger and orders are placed for 50 B-737-332s.

Confused by thunderstorms and look-alike runways, a company pilot sets his jetliner down in Frankfurt, Kentucky, on June 7, when he means to land at Lexington, 19 miles away.

Also in June, Cincinnati to London L-1011-500 flights commence, along with six-times-per-week roundtrip service from Atlanta to Portland, Oregon, and the carrier receives a one-year exemption from the DOT to stretch its L-1011 Atlanta to Shannon route on to Dublin.

When the pilot of a B-767-332, with 205 persons aboard, mistakenly pushes a wrong button shutting down both engines during a July 1 flight, the plane plunges 25,000 feet to within 1,500 feet of the Pacific Ocean before the engines are restarted and control is regained. A Delta TriStar and a **Continental Airlines** DC-10-30 come extremely close to colliding over the Atlantic Ocean on July 8, missing one another by as little as 100 feet. A B-727-232A, with 151 aboard, lands on the wrong runway at Boston on July 13 as another jetliner is preparing to taxi across it; there is no collision. While making its final landing approach to Sacramento on July 21, a B-737-232A is forced to turn sharply to avoid a small, single-engine private plane.

Also during July, 21 new flights are added to 7 new destinations: Hartford, Norfolk, Richmond, Dayton, Kansas City, Raleigh/Durham, and Knoxville.

The Delta and **Western Airlines** route networks are integrated late in the year.

The first of 22 MD-88s begin arriving in December while thrice-weekly Atlanta-Seoul via Portland and Tokyo L-1011-500 flights commence on December 15.

Customer bookings rise 6.9% to 56,958,000, the best showing for all U.S. airlines; freight, meanwhile, climbs 14.1% to 576.44 million FTKs. Revenues grow 6.33% to \$6.09 billion, expenses are elevated only 2.92% to \$5.65 billion, and the operating profit of \$434.24 million is second only to that of **American Airlines**. The company's net gain leads the industry at \$233.29 million.

The workforce is increased by 13.8% in 1988 to 56,901.

A January 26 computer mistake allows 700 people free or reduced fare tickets. Also in January, the carrier joins **Thai Airways International, Ltd.** and ProTrav, Inc. to offer a new, \$1,295 vacation package to the Orient; Delta flies travelers to Tokyo where they transfer to Thai. Simultaneously, \$238 Atlanta-Bermuda "dream vacations" are offered for a two-month period.

Setting off a frequent flyer war with **American Airlines**, **Continental Airlines**, **Eastern Air Lines**, and **United Airlines**, Delta, in early February, offers to provide its frequent flyers triple mileage credit when American Express (Amex) cards are used to order tickets. Also, on February 16, DatasLink, a wholly owned subsidiary, is merged into the company.

An L-1011 TriStar 1, en route from Boston to Salt Lake City, makes an emergency landing at Chicago (ORD) on February 24 after the crew shuts down an engine because of low oil pressure.

In March, the carrier is named the official airline of the summer's Republican National Convention at New Orleans. It also takes 30% shareholding in SkyWest, Inc. Also by March, over half a million passengers have taken advantage of the airline's triple mileage credit arrangement with American Express.

During the first quarter, Delta becomes first to place MD-88s into service and three L-1011-500s are purchased from **United Airlines**.

Beginning in May, Delta starts to sell off the DC-10-10 fleet acquired with **Western Airlines** the previous year. Over the next five months, six

are turned over to United Aviation Services, which will lease them to other carriers.

Nonstop flights to Mexico City begin on June 1 from Atlanta and Dallas (DFW), while Orlando-Frankfurt service begins on June 3. Also in June, the company begins twice daily roundtrips between Dallas (DFW) and Colorado Springs and, under temporary authority, the Atlanta-Shannon service is extended to Dublin.

The Seoul route is stretched down to Taipei on July 1 and later in the month a new 372,000-sq.-ft. terminal is opened at Los Angeles (LAX); the redesign of the satellite building was overseen by the local architectural firm of Gensler and Associates.

On August 5, an MD-82 with 47 passengers preparing to land at Greenville-Spartanburg Airport is hijacked by a lone passenger who throws a flight attendant to the floor during his attack. The pirate is subsequently overpowered by other crew members and is turned over to police when the jetliner lands.

While taking off from Dallas (DFW) on August 31 for a service to Salt Lake City, Flight 1141, a B-727-232 with 7 crew and 101 passengers, rolls violently, causing the right wingtip to hit the runway, bringing about a crash in which the plane bursts into flames (14 dead). Media reaction to the accident is covered in Thomas Fensch's *Associated Press Coverage of a Major Air Disaster: The Crash of Delta Flight 1141* (Hillsdale, N.J.: Erlbaum Associates, 1989).

Also in August, the five MD-82s acquired in 1987 are upgraded into MD-88s and the carrier joins with Odyssey Tours (of Santa Monica, California) to begin offering package tours to Seoul and Taipei.

On September 22, orders are placed for 9 (later 11) MD-11s, options are taken on 29 more. In addition, orders and options are taken at month's end on 25 B-767-332ERs.

Nonstop Dallas to Acapulco roundtrips commence on December 1 while daily nonstops are introduced on December 15 from Dallas (DFW) to Knoxville and Tucson and from Chicago to Mexico City and Acapulco.

Ski season B-727-232A flights on Saturday mornings, from Salt Lake City to Gunnison/Crested Butte, Colorado, begin on December 17. Also in December, daily nonstop service is initiated to Mexico City from Dallas (DFW) and Atlanta, as well as from Acapulco to Dallas-Fort Worth.

Passenger boardings jump 5.4% to 60,010,000, but the airline is now second in enplanements to **American Airlines**. Cargo rises another 10.7% to 695.58 million FTKs. Revenues swell 21.33% to \$7.39 billion, costs are up by 21.37% to \$6.86 billion, and the \$524.63 million operating profit is a company record. So, too, is the net gain of \$344.52 million.

The employee population rises 6.2% in 1989 to 60,413.

Actress Zsa Zsa Gabor files a \$10-million lawsuit against Delta on January 20 over an incident in which she was escorted off a company plane for refusing to cage her two dogs.

Early in the year, Delta agrees to pay \$650 million for a 50% interest in **American Airlines'** SABRE computer reservations system. Also in January and February, two more ex-**Western Airlines** DC-10-10s are passed to United Aviation Services.

In mid-March, a cooperative "Global Excellence" agreement is signed with **Singapore Airlines, Ltd.** Terms of the arrangement call for the partners to code-share between Singapore and Los Angeles via Tokyo and between Los Angeles and Dallas or New York. Joint and reciprocal ground handling, frequent flyer program coordination, and schedule integration are also features of the deal. The agreement now allows introduction of daily service from Singapore to Newark via Dallas (DFW).

While preparing for the delivery of their MD-11s, Delta and **Swissair, A.G.** make plans to cooperate their technical support for the new McDonnell Douglas jetliners. The last **Western Airlines** DC-10-10 is sold to GATX leasing at the end of the month.

The Gunnison/Crested Butte ski service ends on April 1. Later in the month, flights are initiated from Atlanta to Rochester and Syracuse and from Orlando to Nassau.

When it arrives at Atlanta following its final flight, the last DC-8-71 is retired on May 1. Four days later, on May 5, Atlanta to Hamburg Lockheed service begins via London and the company's Dreamflight attraction is opened at Disney's Orlando theme park, Walt Disney World.

Five-times-per-week Cincinnati-Frankfurt via London flights begin on June 1, along with five-times-per-day service from Atlanta to Huntsville and thrice daily from Atlanta to Milwaukee. In addition, one Huntsville to Dallas (DFW) roundtrip and one Huntsville to Memphis roundtrip, with continuing service to Dallas (DFW), is also provided, along with three daily nonstops each from Dallas (DFW) to Sacramento and Miami. A daily nonstop is also laid on from Orlando to Nassau.

A jetliner hits a pocket of turbulence over Alabama on June 16 that injures 22 passengers who are taken to hospital when the plane lands in Atlanta.

Nonstop Los Angeles to San Juan flights commence four times per week on July 1; in addition, the carrier also starts daily service from Salt Lake City to Sioux Falls, South Dakota, and twice-daily frequencies from the Utah capital to Long Beach. From Atlanta, flights begin to Albany and Buffalo while service to Shannon and Dublin is increased to five frequencies per week. A Dallas (DFW) to Wichita schedule is opened late in the month.

Also in July, the carrier sells 5% equity to **Swissair, A.G.**, a total of 2.5 million shares of stock for \$193.4 million, and takes 100,000 shares or 5% interest in its European partner.

On August 1, three daily nonstops are added from Dallas (DFW) to San Jose, California. An employee stock-ownership program is established by management during the year as part of its defense against takeover attempts.

In September, a marketing agreement is signed with **Swissair, A.G.**, which now also becomes a member of the "Global Excellence" partnership with Delta and **Singapore Airlines, Ltd.** Under terms of this arrangement, the two airlines agree to code-share on daily flights from Zurich to New York, Atlanta, and Cincinnati, as well as coordinate their schedules, frequent flyer programs, and ground handling.

While preparing for departure from Salt Lake City on October 14 on a service to Edmonton with 7 crew and 12 passengers, a muffled explosion is experienced and flame is noticed coming from a vent near seat 3D of a B-727-232A. The Boeing is quickly evacuated as smoke fills the cabin. The incident will be blamed on a leaking oxygen generator, and a nearly severed fuselage will be written off.

In November, Delta becomes launch customer for the MD-90, ordering 50. Simultaneously, the order book reaches 519 requests when Boeing is asked to provide 50 more B-737-332s, with 50 more on option.

The Portland-Seoul-Taipei route is expanded southward to Bangkok on December 15, the same day twice-daily nonstop service is started from Cincinnati to Denver and to Greensboro, Highpoint, and Winston-Salem, North Carolina, and daily nonstops commence to Sarasota and Bradenton. Also added in the month are flights from Portland, Oregon, to Bangkok (as a continuation of the Seoul service) and daily nonstops from San Francisco to Portland, continuing to Vancouver.

With 17,300 employees concentrated at Atlanta, Delta is now Georgia's second largest private employer.

The primary domestic beneficiary of the strike at rival **Eastern Air Lines**, the Atlanta-based major enjoys a 13.7% increase in its enplanements to 68,258,000. Freight climbs 8.9% to 757.43 million FTKs. Revenues jump 16.98% to \$8.64 billion, expenses rise only 7.12% to \$4.78 billion, and the operating profit is nearly doubled to \$156.21 million. Net profit ascends to \$473.17 million. Both profit lines are new company milestones. Since 1980, Delta has earned \$1.6 billion, more than any other U.S. major except **American Airlines**.

The number of employees is cut by 9.8% in 1990 to 55,000 and the fleet includes 444 jetliners, including five newly delivered B-767-332ERs. Delta now also operates the largest fleet of B-757-232s in the world. The company is in a most enviable position with its shareholders; a share of common stock purchased for \$1,000 in 1980 is now worth \$4,389.

Security is increased as of January 4 after company representatives in Dublin, Ireland, receive a general threat against Delta's 66 weekly flights to Europe; passengers are given the option to change flights without penalty. Intra-Asian service begins in January with the introduction of flights from Seoul to Bangkok via Taipei.

In February, the company joins with **Northwest Airlines** and **Trans World Airlines (TWA)** to announce that the three have finalized an agreement to create a new computerized reservations system company that combines Delta's DATA II with the NWA/TWA Pars system. The new entity, which will operate independently of its airline owners, is known as Worldspan and employs Delta's former vice president-marketing automation, Calvin L. Rader, as CEO.

Thrice-daily roundtrips from Cincinnati to Grand Rapids and from Atlanta to Providence, Rhode Island, begin on March 2.

When the smaller **Eastern Air Lines** returns to service in the spring, it unsuccessfully attempts to engage its larger rival in an Atlanta fare war.

Following the eruption of Mount Redoubt on the evening of April 6, Delta, early the following morning, cancels two flights to Anchorage from Seattle and one each to the Alaska community from Salt Lake City and Portland. Four flights south from Anchorage are also cut.

Hourly summer service is begun on June 1 between Los Angeles and San Francisco and daily service to Dallas (DFW) begins for continuing **Singapore Airlines** passengers arriving at Los Angeles.

Weekly Orlando and Cincinnati to Paris B-767-332 flights begin on July 1, with frequencies increased to six per week on July 28. Also in July, one nonstop flight is added from Atlanta to Portland and San Antonio.

On August 1, daily nonstop L-1011-500 Atlanta to Amsterdam frequencies, continuing on to Stuttgart, commence and Chairman/CEO Allen is given the additional title of interim acting president as President Hollis L. Harris moves to **Continental Airlines**, where he assumes the same position.

Meanwhile, in early August, just before Iraq invades Kuwait and sets off a rash of higher fuel costs, a new contract is signed with ALPA making Delta's pilots the highest paid in the industry. The arrangement is not warmly greeted by the other majors, particularly as recession and fuel prices take big bites out of their ledgers later in the year.

In December, B-737-232 flights commence from Atlanta to Asheville, North Carolina, and Tri-City Regional Airport, Tennessee. During the month, the company becomes the second customer, after **Finnair O/Y**, to receive the MD-11, accepting delivery of two units.

At year's end, some 100 weekly flights are operated between 3 U.S. gateway cities and Europe.

Passenger boardings for the year dip 3.6%, largely because of competition with ruined **Eastern Air Lines**, to 65,789,000. Still, that figure ranks the major as America's second largest airline and the world's third biggest.

Freight rises 10.5% to 837.22 million FTKs, 25th highest among world carriers. Revenues for the year ascend a slight 1.13% to \$8.74 billion and expenses, led by labor and fuel costs, swell 12.66% to \$8.98 billion. The operating loss is \$235.12 million and net loss is \$154.03 million. The latter figure is the first such bad news reported since 1983 and only the second since 1947. Indeed, the fourth-quarter operating loss of \$235.1 million and net loss of \$154 million are new all-time records.

The workforce is increased by 18.8% in 1991 to 77,000 and the fleet now includes 537 aircraft.

To assist with their maintenance, former flight attendant Allison Johnson is temporarily assigned to the technical operations department.

An additional frequency is added from Dallas (DFW) to Fort Myers in January, along with twice daily flights to Reno.

Following the demise of **Eastern Air Lines**, Delta purchases many of its assets, including 18 gates at Concourse B, Hartsfield International Airport (\$41.4 million); 9 slots at Washington, D.C. (DCA) (\$5.4 million); 7 slots at New York (LGA) (\$3.5 million); the Buffalo-Toronto route; and certain Toronto facilities (\$1.5 million).

Additional service from Cincinnati to Fort Myers and Jacksonville starts on February 1 while L-1011-500 flights are inaugurated from Portland to Nagoya on February 7, followed by MD-11 service from Orlando to Tokyo (NRT) via Los Angeles on February 9. Later in the month, a second daily service is added from Atlanta to Buffalo and Toronto.

In a "steal," the company purchases 10 former **Eastern Air Lines** L-1011 TriStar 1s for \$67.5 million or just \$6.7 million a copy.

Nonstop thrice-daily B-727-232A service is inaugurated in March from Atlanta to Newburgh, New York; also launched, with the new MD-11s, is a service from Orlando to Los Angeles via Atlanta and Dallas (DFW). Later in the month, a \$400-million expansion and modernization program is undertaken for maintenance and support operations.

At the end of the first quarter, Executive Vice President Whitney "Whit" Hawkins is promoted president/chief operating officer. His previous post is abolished with marketing turned over to the senior vice president-marketing, Al Kolakowski, and stations to the senior vice president-stations, Tommy Thompson.

During the second week of April, Chairman/CEO Allen is named the fourth "Aerospace Laureate" in the area of commercial air transport by *Aviation Week and Space Technology*. Also in April, nonstop MD-88 service is started from Atlanta to Gainesville and Panama City while B-737-232A flights commence from Baltimore (BWI) to Dayton Beach, Melbourne, Sarasota, and Ottawa, Ontario, and from Boston to Baltimore (BWI) and Orlando.

Nonstop service is launched from Cincinnati to Lexington, Kentucky, and Seattle; from Dallas (DFW) to Reno; from New Orleans to Tampa; and from Indianapolis to Orlando. Frequencies are increased from Dallas (DFW) to Fort Myers, Sarasota, and Jacksonville.

During the month, \$476 million is raised for overseas expansion through a stock offering.

L-1011-500 daily service from Atlanta to Berlin via London and Hamburg begins on May 2. At the same time, it engages in a deep discount fare war with **American Airlines**, which has introduced a new four-tier fare structure, and adds another B-727-232A nonstop from Atlanta to Newburgh, New York.

Just after landing at Atlanta on May 5 after a service from Savannah and while taxiing to the gate, an MD-87 with 7 crew and 91 passengers collides with an airport van, which catches fire. The aircraft is halted and all aboard are evacuated down emergency chutes; 5 customers are slightly hurt.

MD-11 flights commence on May 7 from Portland to Nagoya, while Hong Kong is added to the L.A. to Tokyo run on May 14. Approximately \$120 million is spent late in the month to acquire six L-1011-500s from **Air Canada, Ltd.** and, on May 30, Atlanta to Copenhagen service is inaugurated via London (LGW).

On June 1, thrice-daily MD-88 flights commence from Atlanta to Gainesville while daily L-1011 frequencies are introduced on June 26 from Atlanta to Copenhagen via London and daily B-767-332ER flights begin the same day from Atlanta to Manchester, England.

On July 1, four-times-per-day nonstop B-737-232A service is added from Atlanta to Harrisburg and Gainesville and twice-daily roundtrips to the three Pennsylvania communities of Allentown, Bethlehem, and Easton. Later in the month, thrice-weekly L-1011-500 roundtrips begin from Los Angeles to Hong Kong via Anchorage.

The airline now makes an initial offer of \$310 million for bankrupt **Pan American World Airways (1)** and joins in a bidding war against **Trans World Airlines (TWA)/American Airlines** (\$1.3 billion), and **United Airlines** (\$465 million). Chairman Allen is unsuccessfully opposed in this move by Chief Financial Officer Roeck; the two men will henceforth reportedly enjoy, at best, a rocky relationship until Allen's retirement in 1997.

On August 7, the Federal District Court in Atlanta converts an antitrust lawsuit against nine airlines into a class action claim that could benefit many consumers and cost the carriers millions of dollars. The antitrust suit charges that this company and the others conspired to keep ticket prices high at 23 hub airports.

On August 12, the U.S. bankruptcy court, on behalf of creditors, accepts Delta's refigured \$1.776-billion offer for the Boston-New York-Washington shuttle of **Pan American World Airways (1)**, as well as its transatlantic authority from New York (JFK) to Europe, its Frankfurt hub, and 52 jetliners. Officials of the Atlanta-based major agree to prop up the faltering 64-year-old pioneer with a \$455-million investment, a \$140-million line of credit, and to direct its operations (almost as a subsidiary) exclusively toward its traditional South American services.

Also in August, daily roundtrip service is initiated from New Orleans to Atlanta and, with the ex-Pan Am aircraft repainted and the on-board beverage changed from Pepsi to Coca-Cola, the "Delta Shuttle" takes off on September 1.

Before receiving its approval for the Pan Am acquisition, the DOT requires Delta to address the Civil Reserve Air Fleet (CRAF) concerns of the USAF. The carrier agrees to pay the USAF \$5 million in cash and \$20 million in travel credits, while also pledging to commit 42 ER aircraft, including B-767s and L-1011s, to the reserve fleet. The 7 remaining Pan Am Jumbojet combis, from a total of 19 for which the USAF had paid modification costs, are to remain available. Government approval is forthcoming on October 18.

On November 1, Delta assumes Pan Am's routes to the Pacific and Far East, along with 6,000 employees (promising sufficient investment in the carrier to save the jobs of 13,000 more) and 21 Airbus A310-222s/324s plus 24 B-727-235s. Overnight, the Atlanta-based carrier expands its network from 34 to 57 nations served. In addition, transatlantic flights are increased from 92 to 195 per week.

The 21 new destinations now initially visited are Athens, Bombay, Brussels, Bucharest, Budapest, Delhi, Geneva, Helsinki, Istanbul, Lisbon, Milan, Moscow, Nice, Oslo, Prague, Rome, Stockholm, Tel Aviv, Vienna, Warsaw, and Zurich. They join the 12 European cities of Amsterdam, Berlin, Copenhagen, Dublin, Frankfurt, Hamburg, London, Manchester, Munich, Paris, Shannon, and Stuttgart already served.

An agreement in principle is announced with the USAF, under which Delta increases its commitment to the CRAF, replacing much of the lift formerly provided by troubled **Pan American World Airways (1)**.

Meanwhile, the once-proud international founded by Juan Trippe continues to spew red ink. Of the initial Delta credit, \$115 million is gone by December 1 and **Pan American World Airways (1)** is losing \$3 million per day. Alarmed at the fiscal drain, officials in Atlanta realize the point has come where Delta must, for its own sake, withdraw its financial pledge, which forces Pan Am under in December. The withdrawal of Delta's backing closes Trippe's creation. **Pan American World Airways (1)**, with 35 minutes of available funds, ceases operations at 9 a.m. on December 4 and orders its crews aloft to continue their scheduled flights back to New York (JFK). A number of lawsuits are filed as a result of this corporate decision.

During the year the airline earns \$93.96 million from charter services, of which 50% comes from professional sports team flights.

A block-space and code-sharing agreement is signed with **Aeroflot Soviet Airlines** for flights from New York (JFK) to Moscow.

Customer bookings jump 12.8% to 74,282,222 and cargo climbs 17.1% to 1.41 billion FTKs. Although revenues rise 15.05% to \$10.06 billion, expenses shoot up 15.01% to \$10.32 billion and force an operating loss of \$226.35 million, which is actually an improvement over the previous year. The net loss, in fact, worsens to \$239.47 million. Despite the poor financial showing, Delta is now, depending upon which statistic is read, the second or third largest U.S. airline.

Company employment is cut 5.1% in 1992 to 74,907, as attrition—encouraged and natural—removes 5,000 workers. On the plus side, former flight attendant and mid-level manager Jenny Poole is appointed vice president for in-flight services.

Early in the year, flights begin from Atlanta to Madrid via Barcelona. In January, Mexico City service is expanded with new B-757-232 nonstop roundtrips from Orlando and New York (JFK).

A corporate reorganization is announced in February under which two new divisions—Administrative Services and Marketing Development and Planning—are created and three others are renamed.

In early spring, Chief Operating Officer Hawkins agrees to a board request that he remain as president for another year.

On April 9, the carrier files suit in the Israeli Supreme Court against the government of Israel, which has refused to allow the company to operate into or from the country on the Jewish Sabbath. Also in April, the carrier begins live in-flight radio broadcasts as the result of an arrangement with *U.S.A Today Sky Radio*.

St. Petersburg, Russia, joins the route network in May, at which time the carrier orders nine A310-324s.

Meanwhile, Chairman Allen's airline engages in a costly half-price fare sale and other promotions designed to counter the Value Pricing scheme put forward by **American Airlines**.

Especially at Dallas (DFW), more and more short-haul flights are turned over to "Delta Connection" partners while improved long-haul services are inaugurated from Frankfurt to Newark, Los Angeles, and San Francisco. Other new routes include Orlando to Paris, St. Thomas to St. Croix, New York (JFK) and Budapest, Chicago, Copenhagen, Helsinki, and Vienna.

The first of nine Delta-configured (not leased) MD-11s join the fleet and are assigned to the carrier's Pacific routes. Meanwhile, the remainder of the DC-9-32 fleet is gradually dispatched to storage in Arizona and much of the former **Pan American World Airways (1)** fleet is sold.

Losing money, the major in July announces layoffs for all but a few of its 3,500 part-time and temporary staffers as part of a new cost-cutting program designed to save \$700 million by 1995.

In August, the company reveals that it is postponing a planned expansion from Orlando into such South American markets as Guatemala City, San Jose, and Caracas while cutting the number of its Los Angeles to San Francisco frequencies by two-thirds. Also in August, the airline contracts with the National Football League (NFL) to fly the Miami Dolphins and Denver Broncos to Berlin for an exhibition game; it also transports the Washington Redskins to London for a game with the San Francisco 49ers.

On September 1, CEO Allen and other top managers take significant pay cuts.

Retaining its exclusive charter contracts with major league baseball's Atlanta Braves and Los Angeles Dodgers, the airline also regularly flies the third largest number of NFL teams, including the Atlanta Falcons, Cincinnati Bengals, Miami Dolphins, and New Orleans Saints. Over the next two months, the company expects to fly an average of 100 sports charters per month.

Also in September, a new 65,000-sq.-ft. domestic and international cargo facility is opened at Portland.

Efforts are made during the fall to negotiate a pay-cut agreement with company pilots, but the flyers refuse the request; consequently, the first pilot layoff in 35 years—103 men—is announced for December 1. When, in November, the ALPA pilots agree to reduce the number of minimum monthly flying hours for its members, the layoffs are cancelled.

In mid-month, it is announced that 19 reservations centers will be closed beginning the following summer.

At the same time, twice-daily B-737-232 nonstops commence from Wilkes-Barre to Atlanta while daily nonstop Cincinnati-Albuquerque MD-88 service is launched.

In December, 5% salary cuts are announced for all noncontract employees, compensation for the board of directors is scaled back by 20%, the quarterly common stock dividend is reduced from 30 cents to 5 cents, and another \$400-million postponement brings to \$1.8 billion the amount aircraft orders deferred on the year.

Although the new 116,000-sq.-ft. cargo facility is opened at Dallas (DFW), spending for new facilities and ground equipment is reduced by \$600 million over the next 3 years.

Passenger boardings ascend 11.9% to 83,117,228 and freight jumps 24.7% to 1.76 billion FTKs. Although revenues swell 15.6% to \$11.57 billion, expenses rocket up 20.5% to \$12.4 billion and guarantee a quad-

rupling of the operating loss to \$886.6 million. Net loss skyrockets to an almost unbelievable \$1.18 billion.

The workforce is cut 11.2% in 1993 to 66,539, fourth largest in the world. The fleet, second largest behind **American Airlines**, includes 541 aircraft: 138 B-727-200s, 100 20 MD-88s, 84 B-757-232s, 58 B-737-200s, 56 L-1011s, 26 B-767-332s, 15 each B-737-332s and B-767-232s, 10 MD-11s, and 5 A310-222s. Orders are outstanding for 31 MD-91s, 30 B-737-332s, 6 B-757-232s, 5 each MD-11s and B-767-332ERs, and 2 B-767-332s.

The last DC-9-32 flight is operated on New Year's Day as Flight 542 from Dallas (DFW) to Atlanta via Memphis over the inaugural DC-9 route of 1965.

Early in January, the company begins a plan to reallocate its aircraft from "strategic markets" to routes that may bring near-term profits and specifically cancels services due to start to Latin America during the month. At the same time, the airline's "Delta Shuttle" division engages in a costly fare war with **USAir** in the Boston-New York-Washington shuttle market, cutting its weekday tariff by 34%.

In mid-month, the company is hit with a \$2-million civil penalty by the FAA, primarily in the area of aircraft maintenance.

Nonstop flights between the U.S. and Greece commence on January 22 and, in February, another \$500-million deferral in aircraft orders is announced.

Later in the month, pilots reject a management request for a 5% pay cut, claiming it is unnecessary.

Unable to reach accommodation with its pilots, Delta, in March, announces its first layoffs in 36 years—the termination of 601 cockpit-crew slots by June 1. Other cost-cutting measures are put into place, including the removal of 28 jetliners, the abandonment of some unprofitable routes, and the continued transfer of others to "Delta Connection." For example, on February 22, the number of flights to and from Dallas (DFW) is reduced and many of those continued are taken over by **Atlanta Southeast Airlines**.

MD-11 proving flights from Portland, Oregon, to Seoul commence; employing routes over former Soviet-controlled airspace saves 1.5 hrs. flying time.

Late in the month, it is announced that the 1989 code-sharing agreement with **Swissair, A.G.** will be extended.

President/Chief Operating Officer Hawkins retires on March 1 and his titles are given to Chairman Allen. A severe winter storm over the eastern U.S. during the weekend of March 12–14 has a particularly harsh impact upon the company, which must cancel over 2,000 flights, including 1,300 on Saturday alone.

Federal Judge Marvin H. Shoob approves a \$458-million settlement of a class action antitrust lawsuit on March 22 that charges the airline and five others with price fixing. Travelers will now be able to receive discount airfare coupons to compensate for overcharges by the carriers on flights between January 1988 and June 1992.

A new daily nonstop is inaugurated on April 4 between Atlanta and Little Rock. On April 30, daily nonstop flights begin from San Francisco to Frankfurt and Munich.

It is also announced in April that the 21 A310-222s/324s acquired from **Pan American World Airways (1)** will be sold and, by next January, 16 "Delta Shuttle"-dedicated B-727-235s, including the 14 obtained with its purchase, will be retired.

Also during the month, former British Tourist Authority CEO Michael G. Medicott is appointed vice president-Europe.

The first of nine A310-324s purchased new arrives at Atlanta in May from Toulouse, France.

Sleeping on airport benches for 5 nights and flying on 17 red-eyes, travel agent Keith George of Perth, Australia, obtains maximum usage, during the spring, of his \$449, 30-day stand-by unlimited air pass, logging 231 domestic flights (383 flying hours) covering 165,314 miles between 70 airports in 35 states.

The upgraded **Swissair, A.G.** arrangement becomes effective on June 1. Daily nonstop flights commence from Cincinnati to Zurich, with **Swissair**,

A.G. reserving blocks of seats in all three classes aboard Delta aircraft. Delta next reserves the same number of seats on **Swissair, A.G.** flights from Zurich to Atlanta and New York and from Geneva to New York. The two also begin to share terminal facilities in their jointly served cities.

On the same day the Swiss deal begins, a block-space and code-sharing agreement is reached with **Sabena Belgian World Airlines, S.A.** In addition to cooperation on ground services, frequent flyer programs, cargo, sales and reservations, and information systems, this accord covers frequencies from Brussels to Boston, New York, Atlanta, and Chicago and to Germany via Brussels.

Also at the first of the month, daily nonstops are initiated from St. Louis to JFK and to Atlanta; B-757-232 service is added in the morning between Cincinnati and Atlanta as morning and afternoon B-757-232 departures are added to Atlanta from San Francisco.

On the same day, daily roundtrips are reinstated from Juneau to Los Angeles via Seattle and Delta replaces its one-stop service with new nonstop roundtrip service between Los Angeles and Hong Kong, reducing travel time on the 7,249-mile flight by more than 2 hours in each direction. The first 136 pilots are laid off the same day.

On June 3, daily Cincinnati to Munich service is initiated. The carrier agrees on June 28 to distribute \$4.6 million in cash and 20,000 free tickets to 529 former **Pan American World Airways (1)** flight attendants as settlement of a class action suit.

The closure of 19 reservations centers announced the previous November now commences; through the fall of 1994, facilities will be phased out at Detroit, Houston, Jacksonville, Knoxville, Memphis, New Orleans, San Francisco, and Seattle; however, affected personnel will be transferred.

On August 2, Delta is one of seven carriers to win a USAF contract to provide long- and short-range international airlift services under the Civil Reserve Air Fleet program; the pact is valued at \$22 million.

Preliminary agreement is reached with **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** on August 3 for the implementation of a strategic alliance; under its terms, the two majors agree to share flight information, reservations data, frequent flyer and vacation programs, and to coordinate training, maintenance, schedules, and passenger bookings.

Flights from Dallas (DFW) to Wichita end on September 13.

A pact similar to the recent Mexican deal is signed on September 20 with **Air New Zealand, Ltd.** giving access to the South Pacific.

On October 1, the company stops flying between Dallas (DFW) and Tulsa; however, a daily roundtrip nonstop jetliner service is added from the latter city to Atlanta.

The U.S. Department of Justice begins an investigation on October 8 of whether the carrier's agreements with Salt Lake City travel agencies gives it an unfair advantage over fledgling **Morris Air**.

Also in October, the megacrier signs a three-year sponsorship with the British Olympic Team to provide air transport to training and competition sites in the U.S. for the upcoming 1996 Atlanta Olympic Games.

One-stop service is inaugurated on the last day of the month from Detroit to Frankfurt via London.

On November 15, it is announced that the line will close its New York reservations office and expand its Boston sales office as part of a plan to save \$28 million a year. The 400 permanent employees at New York are offered jobs with Delta's 10 remaining reservations offices around the country.

Thirty more pilots are laid off on November 30, bringing the total since June to 448.

In December, Chairman/CEO Allen announces that the New York reservations facility will be transferred to Boston. At the same time, it is noted that the JFK hub will be reconfigured; more domestic feed to the New York airport will be added and transatlantic operations will be split into two flight complexes. Yet, with 250 weekly transatlantic flights—more than any other carrier—Delta remains one of the least-recognized airlines by European travelers.

Hence, *In Search of Excellence* coauthor Tom Peters begins testing a new marketing campaign in Germany, France, and the U.K.; it will

prove unsuccessful, largely because that spokesman is also unknown to Europeans.

The first nonstop roundtrip service to Knoxville, Tennessee, is inaugurated on December 15 from New York (LGA).

Customer bookings for the year rise 2.3% to 85,031,570, the highest number sold by any air transportation company on earth. Cargo swells 8.3% to 1.91 billion FTKs, 14th best. Revenues boom upward by 6.2% to \$12.29 billion, third highest behind American and United. Expenses slide up only 0.3%, but still register \$12.5 billion. The operating loss is cut to \$212.2 million and net loss to \$225.9 million.

Airline employment declines another 6.8% in 1994 to 68,000, but among the year's promotions is that of Allison Johnson to director of fleet management and reliability. The carrier joins with **American Airlines, Northwest Airlines, and United Airlines** on January 18 in agreeing to pay \$30 million in \$5 fare coupons and lawyers fees to settle a class action suit over tax-related surcharges on jet fuel attached to passenger fares at Chicago's airports.

Later in the month, the megacrier asks the DOT not to grant additional code-sharing authority to **Deutsche Lufthansa, A.G.** until the German government allows Delta to provide its own ground handling for its flights landing at Frankfurt.

On March 17, the U.S. government settles another antitrust suit against the company and five other airlines that, it is alleged, fix airfares. Without admitting or denying the accusation, all agree to end the practice of communicating proposed fare increases through the reservations system maintained by the Airline Tariff Publishing Company. Finding no further pursuit warranted, both the DOT and DOJ end investigations of complaints made earlier by **ValuJet Airlines**.

The megacrier realigns and reduces its transatlantic services in an effort to increase their profitability. Also in March, a letter of intent is signed with **Korean Airlines/Korean Air (KAL)** for the establishment of a comprehensive marketing agreement. Atlanta–Dublin nonstops commence on April 5, but San Francisco–Frankfurt service ends on April 27.

D-Day Remembrance Fares are offered to World War II veterans and their families for eight months, beginning on April 1, on flights between New York and Paris or Nice.

A code-sharing agreement is signed with **Virgin Atlantic Airways, Ltd.** on April 12, giving the American major its first access to Heathrow Airport. Unable to fly directly in by itself, the major plans to buy seats on VA flights to London. The two carriers will also share frequent flyer miles on flights from New York, Newark, Los Angeles, San Francisco, and Orlando. The services, beginning on November 1, are to be listed as Delta in U.S. reservations systems and Virgin is guaranteed at least \$150 million under the agreement. Later in the month, a letter of intent is signed with **Austrian Airlines, A.G.** for a similar code-sharing, block-seat alliance on the New York–Vienna route, effective July 1.

With several other carriers, Delta gives consideration to establishment of a low-fare division to compete with **Southwest Airlines (2)**.

Citing lack of customers, the daily nonstop San Francisco to Frankfurt roundtrip is withdrawn on April 27.

The next day, the drastic "Leadership 7.5" recovery plan is announced and is unlike any proposed by its unionized rivals. Among the approaches chosen are the aforementioned elimination of 12,000–15,000 nonunion jobs (about 15% of the workforce) and an enormous reduction of costs by mid-1997.

A whole new group of immediate improvement steps are simultaneously begun aimed primarily at upgrading service to Europe. Capacity is reduced on the North Atlantic by cutting 12% of the company's flights. MD-11s are assigned to additional transatlantic frequencies on May 1 and the nonstop route is terminated between Atlanta to Dublin. This is part of a plan, announced six months earlier, whereby departures from New York (JFK) are split into 2 banks and 10 additional domestic flights are added to feed those banks. The move reduces connecting times in 50% of the carrier's North Atlantic markets.

On May 1, frequencies from New York to Helsinki are extended on to St. Petersburg. At the same time, a letter of intent is signed with

Vietnam Airlines covering a study to be made for possible joint cooperation and marketing. A B-727-232A now begins three months of tests with Valsan winglets.

The next day, May 2, the carrier halts its daily nonstop roundtrip between New York (JFK) and Budapest and begins block-seat, code-sharing with **MALEV Hungarian Airlines, Ltd.** as the Hungarian carrier takes over the route (Delta retains its Budapest–Frankfurt roundtrip service). In Europe, A310-222s replace B-727-232As feeding Frankfurt and, on May 11, the British government approves of the marketing alliance with **Virgin Atlantic Airways, Ltd.**

The number of weekly, nonstop, roundtrips from Los Angeles to Hong Kong is increased on June 15 to six. A full code-sharing and block-space partnership is entered into with **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** on June 24. This accord provides for frequent flyer program coordination and code-share or block-space arrangements on several frequencies: from Mexico City to six U.S. destinations; from Mexico City to five Mexican destinations; from Cancún to Atlanta and Dallas-Fort Worth; from Dallas (DFW) to Ixtapa; from Los Angeles to four Mexican destinations; and on flights beyond Atlanta, Dallas (DFW), and Los Angeles to several major U.S. cities.

At month's end, the joint operation with **Austrian Airlines, A.G.** begins.

When **Trans World Airlines (TWA)** ceases its service to Berlin on July 1, Delta is left as the only U.S. carrier serving Germany's once and future capital.

Also in July, 1,200 jobs in the technical operations division are cut as part of 2,500 from that area that will go under the "Leadership 7.5" program; it is announced that 4,500 jobs in the North American Airport Customer Service Division will also be eliminated.

It is also made known that all 13 A310-324s will be phased out and that services on 4 European routes will be suspended, including those from Cincinnati to Munich, Miami to London, and New York to Oslo and Stockholm.

A new \$375-million terminal expansion project is opened at Cincinnati.

In mid-month, Delta secures a \$300-million asset-backed facility under agreement with NationsBanc Capital Markets and Capital Markets Assurance Corporation. Under the arrangement, the airline is able to sell receivables such as ticket receipts in return for investment-grade commercial paper or medium-term notes.

In negotiation for over three years, a commercial alliance with **VARIG Brazilian Airlines (Viacao Aerea Rio Grandense, S.A.)** is now finally implemented with the first Brazil to Atlanta service. Operating under the code-sharing phase of their arrangement, Delta acquires 30% block-seat capacity on the South American's daily B-767-341ER flights to Georgia from Rio de Janeiro and São Paulo. Similar capacity arrangements are made for services to Miami, New York, and Los Angeles.

Late in the month, a memorandum of understanding is signed with **All-Nippon Airways Company, Ltd.** under which negotiations will be conducted for the creation of a strategic and code-sharing alliance and reciprocal ground handling in Tokyo, Los Angeles, and New York (JFK).

A mechanic and customer service agent are dismissed and arrested on August 7 after taking a B-737-232A for an unauthorized mile-long run along the taxiway at Tucson Airport.

It is announced on August 24 that the company is divesting its non-computerized reservations system information technology functions into a fifty-fifty joint venture with AT & T Global Information Solutions to develop a computer and communications system for the travel industry. Delta transfers 1,200 employees to the new company and signs itself up as the first customer for the new, unnamed business, pledging to purchase \$2.8 billion of equipment and services over the next decade.

At the month's end, some 1,800 former **Pan American World Airways (1)** flight attendants at Miami sue the company claiming they lost millions of dollars in pay and benefits in 1991 when the Atlanta-based major took over Pan Am's North Atlantic routes and cut their seniority.

Beginning in September, four unprofitable transatlantic routes are dropped: Cincinnati–Munich, Miami–London, New York–Oslo, and New York–Stockholm. At the same time, Delta begins to remove all 13 A310-324s from service and put them up for sale.

After operating in Europe for 16 years, Delta, under the leadership of Vice President-Europe Medlicott, begins its first marketing campaign on that continent. Reworked by the London ad agency of Abbot, Mead & Vickers, the promotion, employing three pan-European satellite channels, appears on 34 television stations in 12 countries; print ads appear in over 200 publications in 20 nations.

With the DOT's failure to offer approval, implementation of the block-seat, code-sharing agreement with **Virgin Atlantic Airways, Ltd.** is delayed.

As part of its effort to reduce operating costs, the carrier, on October 25, reduces travel agent commissions on full-fare international tickets from 10% to 8%.

Sales offices are closed on November 1 at Charleston, Columbia, and Greenville, South Carolina. The same day, a code-sharing, block-seat agreement is signed with **TAP Air Portugal, S.A.** covering flights to Lisbon from Newark and New York (JFK).

A previous arrangement with **Sabena Belgian World Airlines, S.A.** is simultaneously expanded to five times per week from Brussels to Boston and six per week from Brussels to Chicago. The pact also allows for code-sharing on Sabena routes from Brussels to the German cities of Berlin, Dusseldorf, Frankfurt, Hamburg, Munich, and Stuttgart.

On November 2, the company joins with **Singapore Airlines, Ltd.** to announce a joint plan that allows passengers from each air carrier to use one ticket to fly on either airline.

The initial production MD-90, complete with a design on the engine nacelles naming Delta the official airline for the 1996 Olympic Games, wins FAA type certification on November 4; the first of 31 machines is scheduled for delivery the following February.

Six days later, on November 10, New York (JFK) receives \$150 million to fix up the Delta terminals; the funds are part of a projected \$5 billion in improvements scheduled for the next several years. Wearing Delta colors, the MD-90, for which the carrier is launch customer, receives FAA type certification on November 14.

Under terms of the compact signed 15 days earlier, **TAP Air Portugal** purchases blocks of seats on Delta's A310-324 flights from New York to Lisbon, beginning on November 16.

Ronald Prince, an 85-year-old resident of London, England, achieves his long-held goal of entry into the *Guinness Book of World Records* on Thanksgiving Day. Over the past two months, employing a Delta Stand by America pass, he has taken 237 flights and traveled a record 275,441 miles.

A total of 42 passengers are evacuated from a company airliner at New York (LGA) on November 27 following a bomb threat and are asked to claim their luggage; their flight later continues on to Montreal after no bomb is found.

The \$375-million Terminal 3/Concourse B expansion at Cincinnati–Northern Kentucky International Airport is opened on December 1.

In mid-month, the joint venture with AT & T is renamed TransQuest Information Solutions.

On December 24, a federal judge clears the airline of allegations that it drove **Pan American World Airways (1)** out of business three years earlier. The court orders the creditors of Pan Am to repay Delta more than \$145 million, including \$115 million that it received as a loan, plus interest.

While landing at Dallas (DFW) on December 28 in rain, the wiper motor on the cockpit windshield short circuits, causing smoke to fill the cockpit; the plane lands safely.

Also on December 28, it is announced that Delta has employed the money received from its legal victory to pay off the pioneer's debt.

Passenger boardings advance by 4.7% to 89,053,640, once again leading U.S. carriers; freight climbs 13.1% to 2.16 billion FTKs. Revenues slip by 1.9% to \$12.06 billion and, even though down by 3.4%,

expenses still total \$12.27 billion. Consequently, the pretax loss advances to \$217 million, even as the net loss is cut to \$159 million.

The workforce is decreased by 13.1% in 1995 to 59,104.

Smoking is banned on all flights worldwide at the beginning of January.

After Russia and China jointly open a new route from North America via Siberia to China on January 4, Delta plans to begin a series of seven proving flights from Los Angeles to Hong Kong via Beijing during the spring.

While climbing out of Monroe, Louisiana, on January 6, an MD-88 with 70 passengers, encounters clear-air turbulence; one flight attendant is badly injured and the jetliner diverts to another airport to obtain medical treatment for her.

On January 16, NTSB veteran John K. Lauber is appointed vice president-safety and compliance; he will oversee implementation over the next year of a safety standardization program for "Delta Connection" partners.

Also during the month, arrangements are made to acquire 46 "Heavyweight" hush kits from **Federal Express** over the next four years and to begin installing them later this year and next in the carrier's aging fleet of B-727-200s.

Just after landing at Nashville on January 30, an MD-88 experiences a fuel leak that causes extensive smoke in an engine; all aboard are safely evacuated.

On February 1, the DOT approves the company's alliance with **Virgin Atlantic Airways, Ltd.**, under which the Atlanta-based major will acquire \$150-million worth of block-seating with the U.K. airline as a way of gaining access to London (LHR). Code-sharing will occur on VA frequencies to London from Los Angeles, San Francisco, New York (JFK), and Newark and between Miami and London (LGW), plus Delta services between Boston and Orlando.

On February 7, the engine under the right wing of an L-1011 catches fire as the plane is in line for takeoff at New York (LGA); the aircraft stands down and no injuries are reported.

In a "shot heard 'round the world," on February 9 Delta, which has been paying 10% commission for the 20% of the sale of its local service fares that are brokered, sets a limit on the commissions that travel agents can receive on the sale of domestic tickets. Effective immediately, it will pay a maximum of \$50 for any roundtrip domestic ticket with a base fare above \$500 and \$25 for any one-way domestic ticket with a base fare above \$250. The dramatic action emphasizes just how serious the company is concerning its cost-cutting measures.

On the same day, an MD-88 aborts its takeoff from New York (JFK) when a bomb on the runway knocks out altitude-based navigational instruments.

Within days, four other majors join Delta in limiting commissions and on February 15 Travel Network, Ltd., franchiser of 350 travel agencies, files suit to block the action. On February 26, the carrier quickly matches a fare increase, mainly involving business travelers, announced the same day by **United Airlines**.

The company inaugurates its first nonstop service to Canada from its Georgia hub on March 2 when daily B-757-232 roundtrips are started to Toronto and daily B-727-232A flights begin to Montreal (YUL).

A near miss is registered over St. Anthony, Newfoundland, on March 8, when Flight 49, a company L-1011 TriStar 1 en route to Cincinnati from Europe, comes within 1,800 ft. above and 1 mi. S of **British Airways, Ltd.** (2) Flight 92X, a B-747-436 eastbound to London. Canadian air traffic control is blamed for the error in the required separation of 2,000 vertical feet.

En route from the Bahamas to Atlanta on March 16, a B-727-232A with 138 passengers encounters clear-air turbulence at 37,000 ft. over Alma, Georgia; five persons are hurt, one seriously.

Following a ceremony, the first MD-90-30 is turned over to the company at Long Beach during the week of March 20. Two more will be acquired by month's end. Each wears decals on its engine nacelles in recognition of Delta's status as the official airline of the upcoming 1996 Olympics in Atlanta, Georgia.

Aviation Week & Space Technology reports on March 27 that the musical theme for the carrier's European television advertisement has proven so popular that it has been released to the public as part of an album from the group **Adiemus**, reaching No.13 on the pop charts in Germany. The music label is that of EMI, founded by Richard Branson, chairman of Delta's new marketing partner, **Virgin Atlantic Airways, Ltd.**

Although the travel agent cap remains officially in place, the carrier joins with **Continental Airlines** on March 27 in breaking the majors' February collective stand by offering financial incentives that will reward larger travel agencies for exceeding their sales goals.

On March 31, a three-way block-space code-sharing service is launched with **Austrian Airlines, A.G.** and **Swissair, A.G.** by Austrian A310-324s flying from Vienna to Washington, D.C. via Geneva. Flight attendants from all three carriers provide in-flight services.

The first three MD-90s enter service on April 2 flying from Dallas (DFW) to Reno, Newark, Atlanta, and Jackson, Mississippi.

The next day, code-sharing flights commence with **Virgin Atlantic Airways, Ltd.** *Business Travel News* reports that the airline is considering giving discounts to big corporations in return for the elimination by them of their collection of frequent flyer miles; Delta denies this rumor on April 11.

Delta joins with **All Nippon Airways Company, Ltd.** in April to announce the inauguration of code-sharing on weekly transpacific flights between Tokyo and Los Angeles. Under terms of their agreement, All Nippon will offer seven flights per week and Delta six.

The same freak hailstorm which so severely damages **American Airlines** and "American Eagle" aircraft at Dallas (DFW) on April 29 also pounds 15 Delta aircraft to a point where they must be taken out of service. Most are repaired by the second week of May.

Also during the spring, discussions are held with **Aer Lingus Irish Airlines, Ltd.** concerning code-sharing flights from New York to Dublin.

On May 1, when **Continental Airlines** opens what has become an annual airfare competition, Delta quickly matches that carrier's discounts of up to 35% for off-peak summer travel on certain days.

The same day, a hub-shuffling operation is completed that emphasizes long-haul service and the number of daily domestic departures is cut from 2,715 to 2,650, with the slack taken up by "Delta Connection" affiliates.

The largest hub cutback occurs at Los Angeles (LAX) with a reduction from 87 to 65 daily departures; **Skywest Airlines** increases its flights from 106 to 115 per day. Connections are increased from Orlando to New York (LGA), Atlanta, and Dallas-Fort Worth, but are cut between those hubs and Fort Myers, Sarasota, Detroit, Cleveland, and New Orleans. **Comair** is called upon to expand out of Orlando, **Atlantic Southeast Airlines** grows from Dallas (DFW), and the major adds service from Texas to Cincinnati, New York (JFK), Cincinnati, Nashville, Mobile, Tampa, and Seattle.

On May 1, daily departures from Boston are reduced from 63 to 50.

Having outdistanced Dallas (DFW), Cincinnati, which completes a \$375-million expansion that doubles its size, now becomes the company's No. 2 hub behind Atlanta. Daily departures from the "Queen City" are increased from 170 to 203, including new nonstop frequencies to 9 markets and expansion of flights to 18 others. Fifteen flights are also added from Atlanta while 12 new departures are started from Salt Lake City.

Through the first week of May, Delta has completed seven proving flights over a new route from Los Angeles via Siberia and Beijing to Hong Kong.

On May 12, **Swissair, A.G.**, which was just the day before dropped from its strategic relationship with **SAS (Scandinavian Airlines System)**, joins with Delta to announce a new joint service from Atlanta to Tel Aviv via Zurich.

Also during the month, the company begins a phased implementation of its "Reservations of the Future" system, designed to speed data entry and retrieval by 15% and reduce training time.

A substantial portion of the carrier's inventory of accessories, avionics and engine components, and other spare parts, with a reported value of \$400 million, is sold to **Avatar Alliance LP** on May 30.

A block-space and code-sharing arrangement with **Korean Airlines/Korea Air (KAL)** is inaugurated in July. In addition to reciprocal frequent flyer participation, the two majors share codes on flights from Atlanta, New York (JFK), Orlando, Boston, Portland, Newark, and Washington, D.C. (IAD) to Seoul and from Los Angeles to Honolulu.

When **Air Jamaica, Ltd. (2)** leases six of the carrier's former A310-324s from their manufacturer in midyear, Delta agrees to provide flight crews under contract. The two carriers also sign a letter of intent to pursue cooperation in marketing and other activities.

Before 7,000 assembled company workers at Atlanta on July 29, the B-767-232 *Spirit of Delta* (first given to the company by its employees on December 15, 1982) is unveiled in a striking new Atlanta 1996 Olympics color scheme in honor of the international games that will begin the next year. Only one aircraft receives the striking livery; the remainder will have relatively small commemorative decals.

The Delta Skymiles Optima credit card, a joint promotion with American Express that gives users frequent flyer miles, is unveiled on August 1. On August 3, it is announced that up to 60 daily flights will be cut from Dallas (DFW) in a further move to eliminate unprofitable routes; no layoffs will accompany the move.

In August, a B-747-2L5B of **VARIG Brazilian Airlines (Viacao Aerea Rio Grandense, S.A.)** is damaged in a ground accident at New York (JFK). The Jumbojet, being taxied to the gate by two Delta Air Lines engineers under a June 1994 taxi service contract, crashes into a parked service truck, dragging it 75 feet across the tarmac, and damaging a jet engine when the truck is wedged underneath.

While en route from Los Angeles to Honolulu on August 23, an L-1011 TriStar 1 with 10 crew and 226 passengers suffers sudden decompression at 33,000-ft. over the Pacific Ocean, 450 mi. W of the California coast. The aircraft makes a rapid descent to 14,000 ft. and returns to Los Angeles (LAX), where a safe emergency landing is made. Although no injuries are reported, the Lockheed is thereafter withdrawn from service.

Following the breakdown in the bilateral air agreement negotiations between the U.S. and Japan, **All Nippon Airways Company, Ltd.** abandons the plan for joint dual-designator or block-space flights with Delta on August 29. The flights were due to commence on September 1 from Osaka to Honolulu and New York (ANA) and to Portland, Oregon (Delta).

A code-sharing agreement is signed with **Finnair O/Y** on September 7.

While preparing to take off from Hamburg on September 16, Flight 69, a B-767-332ER with 234 people aboard, suffers the collapse of its right landing gear; the plane, which had not yet started its roll, is evacuated and no injuries are reported.

In addition to joint frequent flyer programs, the Finnish and American majors begin their joint return services on October 1 on routes from Helsinki to New York and San Francisco and on the Delta route from New York to Boston.

Having decided to fly the route through April when the winds are favorable, the company the same day inaugurates weekly return flights from Los Angeles to Hong Kong via Anchorage, Magadan, Khabarovsk, Haiqag, Beijing, and Shanghai. Passengers to China save an hour over the previous service flown by way of Tokyo's Narita Airport.

Painted in a bright new multicolor scheme, the first **Air Jamaica, Ltd. (2)** A310-324 with a Delta flight crew arrives at Kingston in early October; it will be followed by two more in December.

On October 14, Leif Wassermann, commercial attaché at the Danish Consulate in New York City, informs Delta that he has been able to pass unchecked to the Delta gate at New York (JFK) and provides details on the security lapse.

The company's daily MD-11 frequencies between New York and Helsinki end on October 29.

The next day, the new pact with **Finnair O/Y** begins as Delta purchases blocks of seats for its passengers on the Finnish airline's MD-11 services from JFK International to Helsinki, as well as on its regional routes from Helsinki to Frankfurt and Helsinki to Zurich. The Finnish company returns the service, offering seats on Delta flights between New York (JFK) and Atlanta, Chicago, Miami, and Washington, D.C.

In the Pacific, service is withdrawn from Bangkok, Hong Kong, and Taipei on November 1.

While descending to Pensacola on November 7, a B-737-232A with 59 passengers encounters a short incidence of turbulence. A man standing in the aisle near the rear lavatory is thrown into the rear galley, breaking his leg.

The Atlanta-based major is sued, along with **Trans World Airlines (TWA)**, by fellow Atlanta-headquartered **Valujet Airlines** on November 9 over landing slots at New York (LGA). Eight days later, U.S. Federal Judge G. Ernest Tidwell clears the way for Delta to lease 10 of TWA's New York (LGA) slots by rejecting Valujet's request for an injunction.

Also in November, Delta concludes an advertising arrangement that it has had for some time with the National Football League.

Flights to Columbus, Georgia, end on December 1. The same day, a sixth service is initiated between Atlanta and Denver.

On December 6, a tentative agreement is reached with the pilots' union that will allow the airline to provide lower-cost flights to smaller markets with a discount operation. The same day, nonstop return service begins on a daily basis between Cincinnati and Frankfurt.

The union agrees to support the carrier's low-cost operation on December 11, hoping that it will give it the ability to compete head-on with the no-frills airlines.

The next day, the company announces that it will fight "menu fatigue" by offering more and diverse entrees on its long-haul domestic segments.

On December 13, Delta announces that it has halted its planned layoffs for full-time employees, except pilots; the cost-cutting labor reduction program launched 18 months earlier has trimmed 11,000 jobs from the payroll.

Also in December, the company's domestic schedule from Cincinnati is further enhanced by the addition of new frequencies to Ontario (California), Wilkes-Barre, Scranton, and San Antonio. Additional flights are laid on from Cincinnati to Albany, Buffalo, Chicago, Columbus, Hartford, Las Vegas, Los Angeles, Louisville, Miami, Nashville, New Orleans, New York (LGA), Newark, Orlando, Philadelphia, Phoenix, Providence, Raleigh/Durham, Salt Lake City, San Diego, San Francisco, Seattle, Tampa, and Washington, D.C. (IAD).

Special ski-season services are inaugurated on December 16 between Atlanta and the Colorado mountain resort communities of Gunnison/Crested Butte, and Vail.

On December 27, Delta fires the first shot in a new airfare war, challenging its competitors to join it in cutting 30% to 50% from its regular advance-purchase prices on winter travel in the U.S., Mexico, and Canada. The invitation is quickly accepted.

Also during the last week of the year, an agreement is signed with Lockheed Martin to provide comprehensive maintenance for the airline's L-1011 fleet.

On December 31, the carrier begins to scale back its relationship with the Walt Disney Company, for which it has been the official airline for Disneyland, in Anaheim, and Walt Disney World, in Orlando. It will also end its affiliation with a Dream Flight ride at the latter's theme park, which it had helped to renovate. On the other hand, it agrees to continue its promotion of Disney Dream Vacations and to serve as the official sponsor of the Walt Disney World twenty-fifth anniversary in 1997.

As is the case at both **American Airlines** and **Continental Airlines**, traffic declines slightly for Delta as it, like the other two majors, implements its cost-cutting plans.

Enplanements dip 2.3% to 87,040,659 and cargo falls 5.9% to 1.48 billion FTKs. Operating revenue inches up 1.6% to 12.25 billion and expenses fall a relatively huge 8.7% to \$11.2 billion. Profits are made this

year: operating gain skyrockets to \$1.04 billion while a \$510 million net profit is reported.

Airline employment in 1996 rises 6.5% to 61,872. On January 3, Delta joins with **Northwest Airlines** in signing an exclusive five-year agreement with the private operators of Vail-Beaver Creek Jet Center terminal at the Vail-Eagle County Airport in Colorado.

A major winter storm cripples East Coast airline operations between January 7 and 11. On the first day of the crisis, the company must cancel almost 2,000 flights. When New York (JFK) and Boston close on January 8, incoming Delta international flights are diverted to Orlando, Cincinnati, or Atlanta. Also at Atlanta, the carrier's new Operations Control Center swings into action, attempting to operate the company network so as to minimize disruption for diverted passengers.

During the third week of January, Capt. Bill Brown, chairman of the ALPA Master Executive Council at Delta, calls upon union members to authorize a strike if the 15-month-old bargaining effort for a new contract breaks down.

Urgency will be added to the need for labor peace when **Southwest Airlines** (2) inaugurates Florida service on January 22 in direct competition with Delta, the largest operator of scheduled flights in the state. Still, discussions fail on January 12 when Delta rejects as "dangerous" a pilot request for a 5% pay increase. Before a strike is voted, however, negotiators from Delta and its pilots union meet in Washington, D.C. during the last week of the month for discussions that are held under the auspices of the U.S. National Mediation Board's (NMB) executive, Kenneth B. Hipp.

A B-727-232A with 65 passengers experiences an uncontained failure of its No. 1 engine while taking off from Memphis on January 30; no injuries are reported in the safe return landing.

An MD-88 with 120 passengers makes a hard landing at Denver on February 4; although the aircraft is badly damaged, only one person sustains a minor injury.

Also during the first week of February, **ANA (All-Nippon Airways Co., Ltd.)** joins with Delta, **American Airlines**, and **Continental Airlines** in calling for renewed bilateral discussions between the U.S. and Japan. Hopes are expressed by ANA President/CEO Seiji Fukatsu, during a Washington, D.C. visit, that operations originally authorized in 1952 will be liberalized for those airlines not original partners to the first bilateral.

Also at mid-month, the carrier announces that it is trading an excess B-737-300 simulator to U.K.-based Hughes Flight Training for a second MD-11 simulator.

At the same time, it is announced that, over the next three years, all L-1011s on transatlantic service will be replaced with 10 new B-767-332ERs and MD-11s. The decision will not have an impact upon the recent agreement with Lockheed Martin.

In addition, between now and July, a total of 685 laid off employees will be recalled, including 485 airport and customer service personnel in Atlanta.

While departing the gate at Fairbanks on February 20, the left wing of a Delta B-757-232 with 91 passengers, accidentally strikes the left wing of a **United Airlines** B-757-222 parked at the adjacent gate. The Delta crew, which had not noticed the ramp marshal's signals, is recalled before their aircraft can depart the taxiway. The same day, smoke and flame is reported coming from the auxiliary power unit (APU) exhaust of a B-767-332, with 143 passengers, as it taxis for departure from Portland, Oregon. The plane is directed to stop and evacuate, during which 4 passengers are injured (1 seriously).

After a month of mediation, ALPA representatives report on February 21 that their Delta chapter has tentatively agreed to a new four-year contract that includes a 2% pay cut in exchange for stock options in the airline, a seat on the board of directors, and the recall of all 472 laid off pilots.

On February 23, Chairman Allen indicates that as a result of the company's strong 1995 financial results, Delta will restore to its nonunion employees the 5% in their pay cut three years earlier and a 5% lump-sum profit-sharing payment will be made immediately.

Recognizing that it may have gone a bit too far in restructuring its hubs, Delta announces that it will add staff at Atlanta and 41 other stations.

Also in February, the code-sharing pact with **Virgin Atlantic Airways, Ltd.** is renewed for another two years.

In March, the carrier begins to monitor advance bookings to Atlanta for the mid-July Olympic Games. The carrier begins to make preparations, if necessary, to increase from 570 the number of daily frequencies offered to and from its principal hub.

In a reflection of the competition for new business and leisure travelers, the company during the month elects to seek a new advertising agency.

Ski-season roundtrips from Atlanta to Vail and Gunnison/Crested Butte are suspended on March 31.

One of two MD-11s with a special Olympic Games livery, the *Centennial Spirit*, is chosen on April 4 to transport the Olympic Flame from Athens to Los Angeles on April 27; from California, the flame will be taken by runners to Atlanta.

While en route from Washington, D.C. (DCA) to Atlanta on April 23, Flight 1593, an MD-88 with 37 passengers, suffers the failure of No. 2 engine over Raleigh, North Carolina. A safe emergency landing is made at Raleigh/Durham.

When the rank-and-file vote to accept the ALPA-negotiated contract at the end of April, Delta is able to announce, on May 2, that the collective-bargaining deal will save the airline some \$760 million.

On May 31, due to a medical emergency, **Virgin Atlantic Airways, Ltd.** Flight 007, a B-747-238B with 15 crew and 396 passengers, is forced to make an emergency landing on tiny Baffin Island, in the Canadian Arctic. A Delta L-1011 TriStar 1 is sent to that remote location on June 1 to transport the personnel under charter to New York (JFK).

On June 1, code-sharing with **Sabena Belgian World Airlines, S.A.** is expanded via a block-seat arrangement when Delta launches a second daily L-1011 frequency between New York and Brussels.

Reflecting its growth, the airline proudly announces the recall of the last laid off pilot on June 7. Many of the flyers will be employed as frequencies are increased out of Atlanta to replace those lost by the grounded **Valujet Airlines** and to bring travelers in for the Olympic Games.

Also in June, the pact between Delta and **Austrian Airlines, A.G.** receives U.S. antitrust immunity. Block-seat, code-sharing flights commence immediately, with the Austrian carrier purchasing reserved seats six days per week on Delta flights between Atlanta and Vienna. Austrian, in return, provides the A310-324s with which Delta might code-share between Vienna and Frankfurt.

Discussions begin between officials of the two airlines and **Swissair, A.G.** concerning possible closer relationships. These are almost immediately translated into additional dual-designator services. The arrangement takes the form of block-seat purchases: Delta and **Swissair, A.G.** purchase seats six times per week on the Austrian service while Austrian sells seats from Vienna to Washington and Geneva. In addition, Delta sells its partners seats for flights from Washington to Vienna and Geneva and Swissair sells seats from Geneva to Vienna and Washington.

After nine months of planning, the company's 14 reservation and sales offices in Western Europe are combined during the month into two: one at London and one at Frankfurt. The move is expected to save \$37 million over five years.

Daily dual-designator flights with **Virgin Atlantic Airways, Ltd.** commence on June 26 between London (LHR) and Washington, D.C. (IAD); the American major purchases block-seats on the British line's A340-311s. VA Chairman Richard Branson arrives on the inaugural flight to protest the proposed agreement between **American Airlines** and **British Airways, Ltd. (2)**.

During the first week of July, Delta joins in the VA lobbying effort against the BA-AA alliance announced on June 11.

While preparing for takeoff from Pensacola on July 7, one of the two JT8D-219 engines of Flight 1288, an MD-88 with five crew and 144

passengers, explodes. Pieces of the engine rotor pierce the fuselage at Row 37 and kill Anita S. Saxon and her 12-year-old son, Nolan; five other passengers are hurt during the plane's emergency evacuation.

On July 8, the U.S. Justice Department begins an antimonopoly probe of the alliance between **British Airways, Ltd. (2)** and **American Airlines**.

To compete with its deep-discount rivals such as **Southwest Airlines**, Delta, on August 8, announces the creation of its own low-cost division, "Delta Express," which will begin flight operations in October, under the direction of Vice President W. E. "Skip" Barnette, from a hub at Orlando. It will be outfitted with 25 B-737-200s drawn from Delta's regular fleet and differentiated from the other "Baby Boeings" only in the matter of "Delta Express" titles.

Just after takeoff from New York (LGA) six days later, Flight 801, a B-727-232A with 132 passengers, makes a safe emergency landing at New York (JFK) after its center Pratt & Whitney JT8D-15 engine loses power. A small piece of the turbine with blades intact is ejected from the engine's tailpipe and lands in Flushing, Queens, but no injuries are reported.

On September 3, following the lead of **Continental Airlines**, Delta and three other majors agree in principle to settle a suit by the American Society of Travel Agents charging the carriers illegally conspired to cap travel agent commissions on domestic airline tickets. The five companies will reportedly pay a total of \$87 million, but will be able to retain the controversial \$50 commission cap. The implementation of electronic ticketing begins.

With one-way fares ranging from \$19 to \$159, 62 daily "Delta Express" services are inaugurated on October 1 linking Orlando with Fort Lauderdale, Fort Myers, Tampa, and West Palm Beach plus Boston, Hartford, Springfield, Providence, Philadelphia, Newark, Louisville, Indianapolis, and Nashville. The launch comes just one day after **Valujet Airlines** resumes limited services following a 3 1/2-month shutdown.

As in the days when **Eastern Air Lines** committed a fleet of Constellations to the New York-Washington shuttle, Delta, without the hourly promise, dedicates specific aircraft to this enterprise: 25 B-737-232As and B-737-247As. In an effort to avoid the disaster suffered by **Continental Airlines** with its CALite program, Delta Vice President Barnette operates his new division as a separate unit. Parent Delta will not compete on "Delta Express" routes.

After two months of negotiations, Delta is able to participate in something of a first in the rapidly growing world of international airline alliances. On October 16, it signs major marketing and code-sharing agreements with **Air France**, which simultaneously signs the same kind of accord with **Continental Airlines**. The arrangements will allow **Air France** to tap into the huge U.S. travel market to feed its growing global market, while the American carriers will have a ready-made group of French customers to carry within the U.S.

Just before touchdown at New York (LGA) on October 19 after a service from Atlanta, the right wing of Flight 554, an MD-88 with 5 crew and 58 passengers that has come in too low in heavy rain, hits approach lights. The main landing gear breaks off when the plane hits a pier supporting the end of Runway 13 and the aircraft fuselage skids 2,700 ft. down the runway before sliding over into a muddy patch of grass. Although the aircraft is damaged beyond repair, everyone aboard is safely evacuated and there are no injuries. The NTSB will point out the following June 17 that the pilot, Capt. Joseph G. Broker, was wearing monovision contact lenses at the time of the incident, visual aids prohibited by the FAA because they limit depth perception.

"Delta Express" inaugurates services to Columbus on November 1 and adds frequencies on its routes to Philadelphia, Newark, Hartford, Boston, and West Palm Beach. Simultaneously, weekly MD-11 roundtrips are inaugurated from Portland, Oregon, to Frankfurt, Germany, via Cincinnati. Both passengers and freight are flown.

After landing at Cleveland on November 11 following a flight from Atlanta, an MD-88 with 5 crew and 118 passengers skids off the departure end of an icy runway; no injuries are reported.

The U.S. Department of State and Delta, together with six other majors, reach an agreement on November 19 to provide speedier notification of the families of U.S. victims in the event of air disasters abroad. The arrangement, lobbied for by groups representing crash victims' families, puts into effect the provisions of a 1990 federal law calling upon the carrier's to provide the Department of State with a passenger list within 3 hours of a crash.

Also during the month, the existing dual-designator pact with **Sabena Belgian World Airlines, S.A.** is expanded. Ten new U.S. cities are added: Fort Lauderdale, New Orleans, Cincinnati, Washington, D.C. (IAD), Dallas-Fort Worth, Houston, Denver, Salt Lake City, Los Angeles, and San Francisco.

On December 1, six daily frequencies are added to Washington, D.C. (IAD) by "Delta Express"; the number of flights over other routes is also increased.

Press reports leak out on December 3 concerning talks between company representatives and those of **Continental Airlines** concerning a possible merger.

The next day, a company jetliner with landing gear problems is stranded on a runway at New York (LGA) for over six hours. The incident leaves the airport with only one working runway and thus forces the delay of hundreds of flights, some of which must land at other airports.

On December 10 and after 51-year relationship, the carrier unexpectedly begins an overall review with its advertising firm, BBDO Worldwide.

Continental Airlines CEO Gordon Bethune announces on December 15 that his company has ended merger talks with other airlines and has no immediate plans to resume them. No explanation is offered and no "other" airlines are identified. Delta says nothing.

A yearlong continuing lobbying campaign by Delta, with **American Airlines**, fails to gain either company additional services to Japan during a period marked by an acrimonious U.S.-Japan dispute over air cargo rights.

Customer bookings soar 11.8% to 97,345,417 and 1.72 billion FTKs are operated, a 16.2% increase. Operating revenues accelerate 5.7% to \$12.95 billion and expenses move up 10.5% to \$12.37 billion. Due largely to \$829 million in restructuring costs, operating profit falls to \$573 million and net gain drops to \$248 million.

The employee population is increased by 5.8% in 1997 to 65,454. On January 1, "Delta Express" adds three daily roundtrips between Tampa and Boston and increases its services from Boston to Orlando. The low-cost division now offers a total of 128 daily nonstops between 15 markets.

A state appellate court in New York rules on January 2 that Delta is not guilty of discrimination by refusing to hire 10 flight attendants deemed overweight. The court agrees with the carrier's contention that an employer has a right to impose appearance requirements.

Two days later, the carrier signs a 7-year, \$341-million contract with AT & T for worldwide long-distance voice and data communications services.

Also during the first week of January, dual-designator flights are launched with **Virgin Atlantic Airways, Ltd.** between New York (JFK) and Manchester.

Chairman Allen now announces that the company will shift attention from its previous plan to build Frankfurt into a European hub and concentrate instead upon strengthening its transatlantic positions at New York (JFK) and Atlanta.

This revamping, designed to improve the balance sheet by \$62 million, will provide for the cessation of nonstop flights to Frankfurt from Orlando, Los Angeles, and Washington, D.C. (IAD). In addition, the former **Pan American World Airways (1)** intra-European network that the carrier inherited in 1991 and has been operating from Frankfurt will also end. Some 800 workers there will be laid off and B-727-225A roundtrips to Athens, Bucharest, Istanbul, Moscow, St. Petersburg, and Warsaw will stop. The three former Pan Am trijets will be rotated back to the U.S.

The code-sharing agreement between **Virgin Atlantic Airways, Ltd.** and its Atlanta-based partner is now renegotiated in light of Delta's Frankfurt restructuring and the possibility that the alliance between **British Airways, Ltd. (2)** and **American Airlines** might open additional slots at London (LHR).

On January 7, airline executives announce that the company will cut back on its European services while increasing flights into New York City by more than a third. Although the revamped service will mean the loss of 600 to 800 employee positions, Delta will have a \$60 million pre-tax charge this quarter, but will ultimately save \$62 million per year.

Officials in Geneva announce the next day that **Swissair, A.G.**, together with its European partners **Austrian Airlines, A.G.** and **Sabena Belgian World Airlines, S.A.**, will be deepening their relationships with Delta in an effort to increase everyone's share in the North Atlantic air travel market. The alliance is known as "Atlantic Excellence."

On January 10, Delta joins **Continental Airlines, United Airlines, USAir, and Trans-World Airlines (TWA)** in submitting requested comments to the U.K. Office of Fair Trading (OFT) concerning the proposed strategic alliance between **American Airlines** and **British Airways, Ltd. (2)**. All five protest that such a pact would give the British and American giants the dominant positions in transatlantic and other markets and that the OFT's proposal to require them to relinquish 168 weekly slots at London (LHR) is insufficient to counterbalance the alliance.

By January 21, the carrier has narrowed its review for its worldwide advertising account; contenders for the \$100-million account include Omnicom Group, WPP Group, Interpublic Group of Companies, and Cordiani PLC.

Astoria, Queens, New York-resident Thomas F. Casella is arrested by the FBI on January 24 and charged with making 185 threatening telephone calls to the New York offices of Delta and **Swissair, A.G.** since March 1995, 107 of which include claims about bombs.

After over 100 Landor Associates-created livery designs have been culled to three, Chairman Allen chooses the winning combination in February. Meanwhile, the June 1994 marketing and service contract with **VARIG Brazilian Airlines (Viacao Aerea Rio Grandense, S.A.)** is ended and the nine B-727-200s that the company has been leasing from Citicorp are purchased. At this point, **Valujet Airlines** accuses Delta of "aggressive predatory pricing" as a result of its January traffic downturn. Delta rejects the claim.

BBDO Worldwide, the nation's second largest advertising firm, which has had an account with the carrier since 1945, angrily withdraws it on March 6, charging the review has been rigged simply to ensure this action. This corporate maneuvering is not noticed by the public as the carrier celebrates the boarding of the one-millionth "Delta Express" passenger.

An extensive code-sharing and marketing deal is signed between **Virgin Atlantic Airways, Ltd.** and **Continental Airlines** on March 13 that gives the American major access to London (LHR). The arrangement will replace one between VA and Delta, which will be left without a British partner when its VA arrangement ends in August.

At mid-month, the World Partners relationship with **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** is expanded with additional dual-designator flights between Los Angeles and Guadalajara and Mexico City. The American major now begins to code-share on Aeromexico flights five times per week from Cancún to Atlanta and four times per week from Cancún to Dallas (DFW).

On March 20 the company follows in the footsteps of **American Airlines** by announcing a commitment to Boeing through the year 2006 for 106 aircraft worth \$6.7 billion; it also takes options on 124 more jetliners valued at \$8.3 billion. Additionally, the company takes 414 "rolling options" through the year 2018 and becomes launch customer, with 12 firm and 49 option orders, for the B-767-400.

A small electrical fire causes cabin smoke aboard an MD-88 with 140 passengers en route from Washington, D.C. to Orlando on March 21. The aircraft is diverted to Seymour Johnson AFB, where, once the plane

is on the ground, an emergency evacuation is carried out in just seven minutes with no injuries reported.

While descending for a landing at Dallas (DFW) from a March 27 service from Orlando, Flight 691, a B-767-232 with 9 crew and 189 passengers, loses a section of the right wing's outboard flap that crashes to the ground in a field not far from a major road outside Carrollton; no injuries are reported. The FAA orders all B-767 operators to check their flaps for weakened bolts. The same day, a wing-walking ground employee is killed on the tarmac at New York (JFK) when he falls under the wheels of Flight 82, an L-1011 with 13 crew and 189 passengers, as it is pushing back from its gate for departure.

On April 1, Delta joins with **China Southern Airlines Company, Ltd.** to offer a block-seat, code-sharing services on CSA aircraft operating on the four-times-a-week Guangzhou to Los Angeles route. The Chinese company agrees to purchase seats on Delta's flights from Los Angeles on to 13 U.S. destinations.

Ophthalmologist Thomas C. Black Jr. allegedly slaps an Afro-American passenger who is changing her baby's diapers in a first-class bathroom on board a company flight from Kansas City to Atlanta; upon arrival in Atlanta, Dr. Black is detained by the FBI and charged with misdemeanor assault. Aboard Flight 2022, en route from Tucson to Atlanta on April 5, passenger Lisa Vaughn attacks flight attendant Pepper Toohey, allegedly for not providing additional alcoholic drinks. The ensuing wrestling match is broken up by three male passengers, who restrain Vaughn with seat belt extensions and headset cords. At Atlanta, the disruptive passenger is turned over to the FBI for prosecution.

On April 7, as part of its commercial agreement with **Air France**, the carrier shifts its Paris service from Orly Airport to Charles de Gaulle International Airport. At the same time, the French line is added to its SkyMiles frequent flyer program. Members of the Delta program flying first-class on **Air France** will receive 150% of actual mileage flown while business-class passengers will receive 125% of actual mileage flown.

The **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** pact is expanded further in April, with additional services from Los Angeles to Leon, New York, to Cancún, and Los Angeles to Puerto Vallarta.

A B-767-332ER is unveiled on April 10 in the company's new livery; the previous red, white, and blue colors are retained, but are brighter. In addition, the effect of the color scheme is heightened with a dark blue fuselage stripe and red highlights on nose, tail, and engine nacelles. The familiar triangular logo is gone and titles on the sides of aircraft are changed from "Delta" to "Delta Air Lines."

Nonunion employees receive pay increases of 2% to 5% on April 18, their first raise in five years. The company suffers its third air rage incident of the month on April 20 when passenger Nathan T. Stanley allegedly attacks a flight attendant during a flight from Daytona Beach to Atlanta. Also in April, the new strategic alliance with **Air France** begins from Paris (CDG) with frequent flyer program reciprocity. Code-sharing on transatlantic services must await the signing of a new bilateral agreement between the U.S. and France. Seeking to reduce heavy losses, **Gulf Air, Ltd.** of the United Arab Emirates now sells Delta three of its A310-3P6ERs.

On May 1, Saatchi & Saatchi Advertising Worldwide is chosen as the carrier's new advertising agency. Its first campaign, "Delta on Top of the World" will consist of ads designed to increase Delta's share of the transatlantic business-class market. Nonstop flights commence on May 6 from New York (JFK) to Istanbul, Turkey.

Just after takeoff from Atlanta on May 9, Flight 251, a B-727-232A en route to Nashville, suffers the failure of a fan blade which is ingested into the No. 1 engine; a safe emergency landing is made at Atlanta and no injuries are reported.

Chairman Allen announces on May 12 that he will retire at the end of July. It is suggested in the next day's *USA Today* that certain operational problems, including a conflict with Chief Financial Officer Roeck, the failed merger talks with **Continental Airlines**, declines in customer service, and weak employee morale due to cost-cutting measures, have caused the Delta board to force the issue.

While parked and boarding 106 passengers at Gate 3 of New York (LGA) on May 13 for a service to Dallas (DFW), Flight 363, an MD-88 with 5 crew, is struck by an 18-wheel truck that is moving away from Gate 5. The blow moves the jetway 4 1/2 ft. and a passenger falls 8 ft. to the ground, receiving serious injuries.

In a further effort to improve services, **Air Ukraine** on May 14 forges interline agreements with Delta, **Continental Airlines**, and **Pan American World Airways (2)**. In an exclusive arrangement, Delta provides Air Ukraine passengers with continuing service out of New York to all of its domestic destinations.

On May 15, new joint Atlantic service begins when European colleague **Sabena Belgian World Airlines, S.A.** begins Brussels-Cincinnati return service five times per week with Belgian A340-311s. The DOT now approves the carrier's plans to expand its block-space, code-share agreements with Sabena, **Swissair, A.G.**, and **Austrian Airlines, A.G.** to 30 U.S. cities beyond Atlanta, New York, and Cincinnati. In return, Delta will purchase seats on the alliance partners' flights to eight cities beyond Brussels, Zurich, and Vienna.

While on the matter of code-sharing, Delta now signs an enhanced memorandum of understanding with **Korean Air/Korean Airlines (KAL)** that will expand the partnership the two began in 1995.

The pay of noncontract workers is raised \$137 million per year in compensation and benefits. Thus stimulated to seek a pay hike, company pilots immediately demand an amendment to their new four-year labor pact. A reservations center is also opened during the month on the campus of Northern Kentucky University at Highland.

On June 9, the carrier unveils a "living billboard" (designed by its new ad agency, Saatchi & Saatchi) in New York's Times Square to promote business-class on its North Atlantic services. Attended to by Delta flight attendants, 10 selected guests at a time are able to dine in the full-size, 44-ft. cutout of a jetliner fuselage to full public view below. "Passengers" will be served in three, two-hour shifts daily for a week.

A preliminary partnership agreement is reached on June 10 with **Transbrasil, S.A. (Linha Aerea)**; a more formal document will be signed later in the summer. Delta undertakes new transatlantic flights of its own in June when an Atlanta-Zurich route is inaugurated. Also in June, code-sharing begins with **MALEV Hungarian Airlines, Ltd.** on the Frankfurt-Budapest and Stuttgart-Budapest sections of Delta's service from Atlanta. During the month, a B-767-332ER route is stretched to Rio de Janeiro.

Westin Hotels and Resorts joins in the carrier's frequent flyer program on June 21; visitors can obtain mileage credits without ever buying a ticket. Electronic ticketing is extended on June 24 to flights in San Juan and the Virgin Islands; in St. Thomas and St. Croix, passengers must pre-clear customs.

During preparation for departure from Covington, Kentucky, on June 26 for a service to Delta, a flight attendant aboard Flight 1885, an L-1011-385 TriStar 1 with 10 other crew and 85 passengers, is hurt in an accident with the left-side elevator. While on its landing roll at Albuquerque after a flight from Dallas (DFW) on July 6, Flight 1470, a B-727-247 with 154 passengers, is substantially damaged when its right main landing gear collapses. A report of smoke in the cabin causes the captain to order an evacuation, during which four persons are injured.

A B-727-232A, bound for Boston from New York as Flight 1830 on July 11, is the first aircraft to reveal the new "Delta Shuttle" livery, the first change in the shuttle's color scheme since the concern was acquired from **Pan American World Airways (1)** six years earlier. It is announced on July 15 that the company's "Delta Shuttle" B-727s are receiving a new livery with brighter reds and blues than those applied to other company aircraft. On July 21, Delta begins to offer \$99 companion fares to customers who book their flights via the Internet.

On July 30, nine ramp, cargo, and gate-agent employees are among 12 persons arrested by the Drug Enforcement Administration at San Juan's Luis Munoz Marin International Airport on charges of smuggling heroin and cocaine for the Cali cartel. The nearly \$1 billion in illegal narcotics involved were allegedly hidden in Delta cargo shipments.

A \$629,000 legal claim is placed against Delta by **VARIG Brazilian Airlines (Viacao Aerea Rio Grandense, S.A.)** in U.S. District Court in Atlanta on July 30, seeking to recover damages from the August 1995 Jumbojet incident. Also on this day, at the Brazilian capital of Brasilia, Executive Vice President Robert W. Coggins signs a commercial agreement with **Transbrasil, S.A. (Linha Aerea)** Chairman Dr. Omar Fontana. Chairman Allen retires on July 31 as his 10-year contract expires. He will not, however, just disappear, having concluded a 7-year consulting arrangement valued at \$500,000 per year.

On August 1, Maurice W. Worth, executive vice president-customer services, is named acting CEO with long-time board member Mary Johnson Evans as acting nonexecutive chairman. Within days, Leo F. Mullin, executive vice chairman of Unicom Corp. and its principal subsidiary Commonwealth Edison of Chicago, is named president/CEO and board member and Gerald Grinstein, the presidential search committee chairman, becomes nonexecutive chairman. Acting CEO Worth now becomes chief executive officer with Mrs. Evans taking over as chairperson of the board's executive committee.

Also on August 1, the company places its code on **Swissair, A.G.'s** four weekly nonstop roundtrips from Zurich to St. Petersburg and twice-daily flights to Moscow.

The FAA, during the third week of August, grants the company a supplemental type certificate (STC) for installation of new Walter Kidde Aerospace smoke detection gear in the bellies of its B-737, B-727, L-1011, and MD-88 fleets over the next four years during their regular maintenance. Delta also signs a memorandum of understanding with **Airborne Express** to maintain that cargo carrier's 12 B-767-200s.

The company is able to continue its dominance of the Atlanta to Orlando route from which competing **Kiwi International Airlines** withdraws at month's end. Also, the company orders four simulators from CAE Inc. for 1998 delivery.

A B-727-232A is depicted bringing reporter Kevin Spacey to Savannah, Georgia, in the opening scene of the motion picture *Midnight in the Garden of Good and Evil*, which also stars John Cusack and is directed by Clint Eastwood.

Company pilots, dissatisfied with Delta's handling of their contract and after 62 grievances filed so far this year, authorize their union leadership to place informational pickets at New York, Atlanta, and Los Angeles on September 1 to call public and management attention to their concerns.

On September 4, **Northwest Airlines** raises its domestic fares by 5% and, over the weekend, most other U.S. majors, except **Southwest Airlines (2)**, join in. On September 8, **American Airlines**, Delta, and **Trans-World Airlines (TWA)** abandon the fare boost, but when **United Airlines** does not go along, the three majors reinstate the higher tariffs the next day.

Also on September 8, the Atlanta hub is enlarged to 617 daily movements. At the same time, new flights are added from it to Daytona Beach, Hartford, Norfolk, Melbourne, Greensboro, and Winston-Salem. Later in the day, daily, nonstop, roundtrip B-757-232 frequencies are introduced from California's John Wayne-Orange County Airport to Cincinnati.

The First Annual Chairman's Club Awards Ceremony is held at the Georgian Terrace Hotel in Atlanta on September 9; a number of employees are recognized for their extraordinary service to the company.

Late in the month, ground is broken at Atlanta for the \$28.7-million state-of-the-art Operations Center III. The facility is expected to be completed within a year and will house 10 simulators, plus ancillary functions.

Although the majors disagree over routing and other issues, they band together behind **United Airlines** on October 1 when the Chicago-based giant cuts commissions paid to travel agencies for writing tickets. Although commissions on roundtrip domestic flights remain at \$50 and there is no cap on international flights, rates are reduced from 10% to 8% for domestic and international ticketing. Delta, **American Airlines**, **Continental Airlines**, **USAirways**, and **Northwest Airlines** immedi-

ately match the payment initiative. **Southwest Airlines** and **Kiwi International Air Lines** announce that they will maintain the 10% scale. Despite ticketless travel, the travel agency industry still writes 80% of all tickets sold and protests the action.

Also on the month's first day, "Delta Express" unveils a new jetliner livery and launches low-cost, twice-daily roundtrip service from Orlando to Islip, New York, and Raleigh/Durham, North Carolina.

To mark its first anniversary, the carrier also offers two-for-one companion fares from 5 Florida cities to 10 communities elsewhere. The same day passengers on "Delta Shuttle" flights are offered a new in-flight magazine, *The Shuttle Sheet*.

Twice-daily B-737-347 roundtrips are also inaugurated on October 1 from Philadelphia to Salt Lake City.

Meanwhile, James Dent, president of Aviation Employee Placement Service, places an open letter in the October issue of *Air Transport World* promising free assistance with the airline's recruitment process.

Simultaneously, the carrier's marketing agreement with **Skywest Airlines** is reaffirmed when the commuter signs a "Delta Connection" contract. Skywest will provide feed for Delta at both Los Angeles and Salt Lake City.

On October 3, the important relationship with **Air France** still cannot be implemented; French Transport Minister Jean-Claude Gaysot in a statement this Friday stresses his absolute opposition to the U.S. "open skies" approach.

The three-year-old code-sharing agreement with **VARIG Brazilian Airlines (Viacao Aerea Rio Grandense, S.A.)** is terminated in October as that major airline joins the "Star Alliance." The lawsuit against Delta by VARIG is withdrawn and the previously limited marketing agreement between the two companies is subsumed into the more comprehensive pact that provides not only for coordinated frequent flyer programs, but code-share on all return services the two companies fly between Brazil and the U.S.

The code-sharing pact with **Finnair O/Y** is expanded on October 26. Finnair sells seats on Delta flights from New York (JFK) to Washington, D.C., Chicago, Atlanta, and Miami. Delta returns the favor for passengers flying Finnair from Helsinki to Frankfurt or Zurich.

Also on October 26, dual-designator service begins with **Transbrasil, S.A. (Linhas Aereas)** over routes from Miami, Orlando, and Washington, D.C. (IAD) to Brasilia, Rio de Janeiro, and São Paulo. In addition, code-sharing is begun on Transbrasil connecting service to the Brazilian cities of Porto Alegre, Florianopolis, Curitiba, Belo Horizonte, Fortaleza, Manaus, and Salvador and on Delta flights from Cincinnati and Atlanta to Denver, Los Angeles, Chicago, Boston, Dallas (DFW), Las Vegas, and Detroit. At Zurich later in the day, Delta is able to place its code on **Swissair, A.G.'s** daily return services to Hanover. The next day, dual-designator service is begun on **Swissair, A.G.'s** daily flights from Zurich to Bangkok.

On November 4, **TAP-Air Portugal, S.A.** joins the company's SkyMiles frequent flyer program. During the first week of November, the company announces plans to revamp its transatlantic services. Flights to Berlin and Copenhagen will end, while new service from New York will be started to Stockholm, Stuttgart, and Warsaw. Also during the month's first week, DOT approval is received for inauguration of the company's block-space, code-sharing agreement with **Transbrasil, S.A. (Linhas Aereas)**.

Spa Cuisine is started on flights between the U.S. and Europe on November 8; menus are chosen from such getaways as Switzerland's Victoria-Jungfrau and California's Golden Door.

On November 20, immigration officials inform 28 of the company's flight attendants from Poland that they, and any family members they have brought with them, have two weeks to leave the U.S. due to mistakes on their work visas; most have no jobs or homes to return to. Delta officials unsuccessfully attempt to overturn the demand. Five days later, the flight attendants are told that they, together with their families, may remain in New York while Delta fights the deportation in court.

Also during the third week of November, the company, by exercising an option to purchase 10 B-777-232s for \$1.42 billion, boosts its order-

book with Boeing this year to 106 aircraft valued at \$6.7 billion. The first new wide-body twin-jet will arrive in August 1999.

On November 28, **Singapore Airlines, Ltd. (SIA)** withdraws from the "Global Excellence" alliance in order to sign a bilateral strategic agreement with **Deutsche Lufthansa, A.G.** Cancellation of the pact, which leaves partner **Swissair, A.G.** without an Asian partner, also frees Delta to seek additional Asian affiliations as well. The 5% equity stake each of the three still holds in the other two is not immediately impacted.

At month's end, Senior Vice President/Chief Financial Officer Thomas Roeck resigns; Vice President-Financial Planning/Analysis Edward West is named his successor on an acting basis. At the same time, Paulette Corbin is appointed managing director of "Delta Express."

The European and American "Atlantic Excellence" program is deepened on December 1 when Delta starts to code-share on **Swissair, A.G.'s** daily flights from Zurich to Cairo.

On December 6, jet service is halted between Atlanta and Gainesville, Florida. "Delta Connection" partner **Atlanta Southeast Airlines** moves in to replace the route with eight daily roundtrips of its own.

Daily nonstop B-757-232 roundtrips commence on December 7 between Cincinnati and San Juan, Puerto Rico. The service will be continued through April 30. The next day, B-757-232 roundtrips begin between Atlanta and Grand Cayman. Promising a larger presence in Latin America, the carrier, on December 10, reveals plans to seek authority to inaugurate service in the new year to cities in Argentina, Belize, Bolivia, Colombia, Ecuador, Paraguay, and Uruguay.

Also on December 10, *USA Today* reports the newly released DOT 10-year report of on-time percentages for the nation's 10 major airlines, with a note that the airlines, themselves, began reporting mechanical delays in 1995. The industry average since record keeping was begun in September 1987 is 79.3%; Delta demonstrates a 77.4% achievement, good for 9th place.

It is announced on December 11 that, effective January 8, Delta will also begin to share codes on **Swissair, A.G.'s** daily flights between Zurich and Singapore.

The longest nonstop route from Tucson is inaugurated on December 14 when the carrier launches jet service from the Arizona community to Atlanta.

On December 15, **Austrian Airlines, A.G.** begins to code-share on flights from Daytona Beach to Vienna via Atlanta. At Vienna, passengers are able to make seamless connections aboard Austrian flights.

Three days later, the New York State Appeals Court rules that the airline did not violate a state law when it earlier refused to hire job applicants who exceeded Delta's flight attendant weight limitations.

Delta, on December 20, begins to code-share on **Sabena Belgian World Airlines, S.A.** A340-311 flights from Brussels to Kampala. The service, the first for the American carrier into sub-Saharan Africa, will also allow passengers through service from Uganda via Brussels to Atlanta, New York (JFK), Cincinnati, Chicago (ORD), and Boston.

On December 22 the company becomes the first airline to transport 100 million passengers in a year; the lucky party wins free travel for two years and all of those on his flight receive a coach-class ticket and a \$100 gift certificate.

Options are confirmed toward month's end for 10 B-777-232s, valued at \$1.4 billion, plus 20 options. Deliveries are set to begin in August 1999. At year's end, a contract is signed with **Airborne Express** to maintain the engines of that company's B-767-200Fs; the 10-year contract is valued at \$130 million.

On December 29, snow sweeps across Atlanta, causing Delta to cancel or delay 82 flights from its Georgia hub. Further north at Newburgh, New York, Flight 716, an MD-80 with 140 passengers, blows two tires on its main landing gear as it lands in heavy winds. Pushed by the breeze, the aircraft's nosegear becomes stuck in about 2 ft. of mud at the side of the airport runway.

Passenger boardings climb 6.1% to a record 103,300,653 passengers flown; freight jumps 18.6% to 2.44 billion FTKs. Operating revenues ascend 7.7% to \$13.94 billion, while expenses are down 0.5% to \$12.31

billion. The operating profit triples to \$1.62 billion, while a huge \$934-million net profit is celebrated.

At the beginning of 1998, Delta is the largest airline in the world in terms of passenger boardings and operating profit, 14th in terms of freight, 4th in employees, fleet size, and operating income, and 6th in net profit. The workforce stands at 68,000 and the fleet, 73.4% of which is Stage III-certified, includes 560 airplanes: 131 B-727-200s, 67 B-737s, 91 B-757s, 74 B-767s, 48 L-1011s, 14 MD-11s, 119 MD-80s, and 16 MD-90s.

Daily nonstop roundtrips commence on January 4 between Tampa and New York (LGA). On January 6, a passenger aboard Flight 1402, a B-757-232 with 7 crew and 181 passengers and en route from Atlanta to Orlando, is badly injured when, because of turbulence, a pot of hot coffee falls in his lap. At Orlando, the passenger is treated for second degree burns. Also this day, daily nonstop B-757-232 seasonal (through April 4) roundtrips are inaugurated between New York (LGA) and Tampa and Fort Myers; an extra frequency is also laid on between Atlanta and Fort Myers.

The **Swissair, A.G.** code-share begins on schedule on January 8. While on final approach to New York (JFK) on January 10, a Delta MD-88, given the wrong ATC clearance, comes within 10 seconds of a collision with an **American Airlines** B-767-223ER that is taking off.

As a result of enhanced airport security measures, the carrier is now allowed to cut some costs and to make last-minute plane changes for passengers by halting, as of January 13, the issuance of advance boarding passes for international flights. Unable to agree on a method for the integration of pilot seniority lists, the company cannot come to an equity agreement with **Continental Airlines**; Continental later signs on with **Northwest Airlines**.

It is announced during the last week of the month that the company will equip its 558 aircraft with automatic external defibrillators with heart monitoring capability beginning in July. In March, company flight attendants will begin training on the new equipment.

Not having complied with ATC instructions, the pilot of Air Force One, carrying President Clinton to political rallies in Illinois and Wisconsin on January 28, comes within 3.7 km. of a Delta MD-88, which is on final approach, 15 km. out from Washington, D.C. (DCA). The near miss is not considered serious enough to prompt formal investigation.

A new bilateral between the U.S. and Japan is announced on January 30. Under its terms, the company will be allowed to add 90 weekly roundtrips to the 46 already flown. "Delta Express" roundtrips commence on January 31 from Orlando to Boston and from Orlando to Islip, New York. The same day, jet service ends between Vancouver and Atlanta. During the month, in-flight menus are reborn as Menu/Destination Guides, in order to accommodate ads that detail city maps, restaurants, theaters, and various other features.

At the beginning of February, a Federal District Court awards the airline \$9 million; the airline had sued two ticket broker companies that had purchased frequent flyer tickets and awards and resold them.

Also during the month, a code-sharing agreement is signed with **Trans States Airlines**, which will replace **Business Express** feeder operations at New York (JFK). The Association of Flight Attendants (AFA) begins a campaign to organize the carrier's flight attendants.

Beginning on March 3, new nonstop service from New York is added to Stockholm, Warsaw, and Stuttgart, but Delta stops flying to Berlin and Copenhagen.

Following a bidding match with **Continental Airlines**, Delta Air Lines is able, on March 10, to acquire a 35% stake in the **AeroPeru (Empresa de Transportes Aereos de Peru, S.A.)**. Additionally, the two sign a memorandum of understanding under which the two will enter into a 10-year marketing agreement. Delta will also be represented on the Aero Peru board of directors.

Also on March 10, plans are announced for an expanded 5-year strategic marketing agreement with **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)**; the new pact will include code-sharing on additional flights between the U.S. and Mexico. At the same time, Delta is able to

complete a marketing and code-sharing agreement with **LAV (Linea Aeropostal Venezolana, S.A.)**.

On March 13, Delta begins to place its code on **Swissair, A.G.** daily flights between Zurich and Oslo. Simultaneously, the company begins to code-share on the daily B-737 roundtrips operated by **Sabena Belgian World Airlines, S.A.** between Brussels and Oslo.

U.S. Secretary of Transportation Rodney E. Slater and Japanese Transport Minister Takao Fujii are the principals for the formal signing of the new U.S.-Japan bilateral air agreement in ceremonies at Washington, D.C. (IAD) on March 14.

The same day, Flight 2158, an MD-88 with 5 crew and 141 passengers overruns the end of the runway while landing in snow and fog at Portland, Maine, following a flight from Cincinnati. After clipping a localizer antenna, the plane continues on for 400 ft. and comes to rest straddling the airport perimeter road. No injuries are reported.

A third daily "Delta Express" service is started on March 15 between Columbus and Orlando.

Two days later, the DOT authorizes 64 weekly flights to Japan for carriers that in the past have had their services severely limited. Delta is permitted 22 weekly flights, which will translate into daily services from Atlanta to Tokyo and from Portland to Osaka and to Fukuoka. Additionally, the current six-times-a-week frequencies from Los Angeles to Tokyo are increased to daily. The government also grants new code-sharing authority. **Trans-World Airlines (TWA)**, one of two U.S. passenger carriers allowed to begin initial Japan service, is permitted to offer dual-designator services with Delta on any 14 weekly flights over the Atlanta-based major's U.S.-Japan routes.

On March 20, an MD-88 from Atlanta skids off the runway after landing at Washington, D.C. (DCA) in bad weather; no injuries are reported as passengers evacuate through the tail exit.

Delta, on March 29, places its code on the **Swissair, A.G.** A310-322 service between Zurich and Muscat. Jet service between Vancouver, British Columbia, and Portland, Oregon, and Salt Lake City ends on March 31.

On April 1, the number of nonstop roundtrips is increased between Atlanta and Seattle, San Francisco, and Sarasota. In addition to two daily flights to Montreal (YUL) and two to Toronto, Delta now also doubles to four the number of daily departures between Cincinnati and Toronto. Flights are also added from Cincinnati to Birmingham, Seattle, and New York (JFK). From New York (JFK) on April 1 a daily roundtrip is initiated to Barcelona. From the New York terminus, Delta now offers 18 daily flights to 17 European destinations; it also offers service via its code-share partners on 11 flights to 8 more destinations.

Delta is able to provide a report on April 1 concerning its assistance to Georgian communities during crises that occur in the first quarter. The carrier donates 300 blankets from in-flight services and \$10,000 to The Metropolitan Atlanta American Red Cross to aid flood victims in the southern part of the state. An additional \$10,000 is donated to The Georgia Salvation Army headquarters to aid tornado victims in the northern part. The \$10,000 gifts are matching funds, half are raised by Delta employees and half from the airline.

Delta and **LAV (Linea Aeropostal Venezolana, S.A.)** begin to code-share on Delta's new Atlanta to Caracas B-757-232 return service, which starts on April 2. The same day, "Delta Express" launches service from Orlando to Cleveland, Houston (HOU), and Kansas City. Additionally, Delta joins with **Swissair, A.G.** to form a global cargo alliance. When the arrangement takes effect during the summer, both companies will see their cargo networks marketed as a single network, using the cargo sales forces of both carriers in common cities to offer joint pricing.

A third daily roundtrip flight is added on April 6 between Atlanta and Mexico City. The schedule is designed for business travelers needing to reach the Mexican capital in time for a luncheon meeting and to return the same day. On the same day, daily roundtrip B-757-232 frequencies commence from Atlanta to Costa Rica, El Salvador, Guatemala, and Panama. A new daily nonstop roundtrip is also inaugurated between Portland and Las Vegas.

Under terms of a March 12 code-sharing agreement, Delta, also on April 6, begins to purchase block-seats on **Air Jamaica, Ltd. (2)**'s service from Atlanta, Miami, and New York to Montego Bay and Kingston, Jamaica, Barbados, and St. Lucia.

The company, at the beginning of the month, offers guides to 31 U.S. and foreign cities in 13 languages, claiming that they are the first city-specific in-flight guides made available to airline passengers on a complimentary basis.

A new "open skies" bilateral agreement is signed between the U.S. and France on April 8. The arrangement will allow the company to strengthen its alliance with **Air France**.

During the month, former National Broadcasting Corporation Chief Financial Officer Warren Jenson is named to replace the departed officer, Thomas Roeck. Simultaneously, the retirements of Executive Vice President-Marketing Robert Coggin and Senior Vice President-Personnel Robert Adams are announced.

City Bird, S.A. and **Sabena Belgian World Airlines, S.A.** begin to code-share, with Delta, on April 15, on **City Bird**'s daily roundtrip route from Newark to Brussels, where passengers are able to connect with Sabena flights elsewhere. One each **City Bird, S.A.** MD-11 and B-767-33A painted in **Sabena Belgian World Airlines, S.A.** colors and reconfigured to include business and economy cabins for Sabena passengers and a separate City Bird cabin are employed for the service.

Also on April 15, Delta and "Delta Express" begin to count laptop computers as carry-ons as it tightens its two-bag rule.

Delta reaffirms its position as the official airline of the Winter Olympics and transfers the Olympic flag from Nagano to Salt Lake City, site of the 2002 games. Additionally, options are exercised for two more B-777-232 IGWs.

The daily roundtrips from Cincinnati to San Juan end on April 30.

On May 1, a week after a marketing agreement is signed between **USAirways** and **American Airlines**, the carrier joins with **United Airlines** in an even grander alliance. In addition to the shared frequent flyer programs, lounges, and other activities agreed to by their rivals, UAL and Delta, while agreeing to remain independent, also agree to "engage in code-sharing arrangements" as soon as permissions can be won from their respective pilot unions. Full voting status for its board representative is now sought by the Delta ALPA chapter as its price for approving the contract revision necessary to complete the UAL code-sharing pact.

This pact will be implemented in the U.S. first, followed by the rest of the world, save Europe, where the regulatory environment is too uncertain. Contending that their agreement does not require U.S. government approval, this position on consolidation is countered by both the DOT and the Subcommittee on Aviation of the U.S. House of Representatives, which indicate concern.

Also on May 1, "Delta Express" launches its largest service expansion since its inception in 1996, employing five additional B-737-200s. Daily nonstop return service is inaugurated from Orlando to Houston (HOU), Cleveland, and Kansas City, while twice-daily roundtrips begin from Boston to Fort Lauderdale and from Tampa to Washington, D.C. (IAD) and to Columbus, Ohio.

Beginning on May 2, the company places its code on the daily roundtrip Avroliner service that **Swissair, A.G.** subsidiary **Crossair, Ltd.** operates between Zurich and Riga, Latvia. Also in early May, nonstops are launched from New York to Barcelona and Warsaw. Delta joins with **Finnair O/Y** on May 8 in extending their code-sharing arrangement, effective later in the month and in June.

The code-share arrangement with **Sabena Belgian World Airlines, S.A.** is expanded with Sabena aircraft on May 15 at three of its five U.S. gateways. A second daily A340-311 dual-designator service begins from Atlanta to Brussels. At the same time, A340-311s increase their flights from Cincinnati to Brussels from five times a week to daily. Capacity on the route from Chicago to Brussels is boosted from an A340-311 to a B-747-329C.

The same day, Delta begins daily roundtrip flights to Hamburg from Atlanta. Additional seasonal service is simultaneously launched from

the Georgia Worldport, the world's largest single airline hub, to Zurich, Madrid, Barcelona, Dublin, and Shannon.

Also in May, an agreement is signed with **Swissair, A.G.** that will see the inauguration of dual-designator flights on July 4 from Zurich to Karachi. Another document commits the partners to market their cargo operations as a single network.

Seasonal roundtrip code-sharing begins on May 21 on **Finnair O/Y** MD-11 services from Helsinki to San Francisco.

At month's end, the company, without fanfare, joins **Northwest Airlines** in doubling the fee charged to escort unaccompanied children on connecting flights from \$30 to \$60 for each flight leg.

Under terms of their March 12 agreement, **Air Jamaica, Ltd. (2)** purchases seats on Delta's daily service from Atlanta to Boston, Cincinnati, Hartford, Memphis, and San Francisco, beginning on June 1. Additionally, Delta launches twice-daily MD-88 nonstop roundtrips from Portland, Maine to Atlanta.

On June 1, "Delta Express" increases the number of daily nonstop roundtrips from Orlando to Fort Lauderdale from six to seven and from Orlando to Kansas City from two to three. Simultaneously, the carrier launches twice-daily B-737-347 roundtrips from Salt Lake City to Newark (EWR) and to Detroit (DTT). "Delta Connection" partner **Comair** takes over the carrier's service between Newburgh, New York, and Atlanta and Cincinnati.

Delta, also on June 1, places its code aboard **Sabena Belgian World Airlines, S.A.** flights from Brussels to Conakry, Guinea. It also begins nonstop block-seat, dual-designator return service with **Aer Lingus Irish Airlines, Ltd.** between Newark and Shannon, employing the Irish line's A330-301s.

Expanded code-sharing also begins on June 1 with **Finnair O/Y**. The Helsinki-based flag carrier purchases seats on Delta's daily, nonstop B-767-332ER services from New York to Helsinki via Stockholm. The same day, the Atlanta-based major purchases seats on Finnair's daily MD-80 and DC-9-51 return services from Helsinki to Stockholm.

Meals from prestige steakhouses are offered in all classes aboard long-haul U.S. and foreign flights beginning on June 1; the airline expects to serve 450,000 steak dinners per month.

Daily nonstop Atlanta to Tokyo MD-11 return flights begin on June 3. President/CEO Mullin and Georgia and Atlanta officials issue statements praising the new service.

Dual-designator flights begin with **Sabena Belgian World Airlines, S.A.** on June 6 from Brussels to Banjul, Gambia, employing Sabena equipment.

Two days later, **Deutsche Lufthansa, A.G.** President/Chief Operating Officer Frederick W. Reid is named Delta's executive vice president/chief operating officer. Simultaneously, daily nonstops begin from Portland, Maine, to Atlanta.

A mistake by an air traffic controller nearly causes a midair collision on June 11. While coming in for a landing at Nashville a B-727-232A is instructed to descend from 10,000 ft. to 3,000 ft, crossing the path of a private Beech 58 Baron as it flies past at a steady 5,000 ft. Although the two aircraft are not on a path to collide head-on, the degree of separation is still just 200 ft.

The U.S.-France bilateral accord reached on April 8 is formally signed on June 18 in a ceremony by French Foreign Minister Hubert Vedrine and U.S. Secretaries Madeleine K. Albright (State) and Rodney E. Slater (Transportation). The pact opens the way for new transatlantic code-sharing, full implementation of the agreement with **Air France**, and additional frequencies.

Like **Continental Airlines**, Delta, on June 19, begins dual-designator service with **Air France**. The Atlanta-based major applies its code to the French flag carrier's flights from Paris to New York (JFK), Boston, Chicago, Los Angeles, San Francisco, Washington, D.C. (IAD) and a new daily roundtrip begun today to Atlanta.

The carrier's Las Vegas gates are moved to the new Concourse D on June 22. On June 26, the carrier seeks authority from DOT to launch daily B-767-332 roundtrips between Boston and New York (JFK) and

São Paulo and Montevideo on October 1. During the last 90 days, the carrier has launched frequencies from Atlanta to Caracas, Guatemala City, Panama City, San Jose, and San Salvador. Daily nonstop B-757-232 roundtrips commence on July 1 between Atlanta and Lima, Peru.

At the beginning of the year's second half, Delta and its affiliates operate 4,881 daily flights to 324 cities in 45 countries.

Also at the beginning of July, the company joins with **United Airlines** to announce that the two carriers will merge their domestic frequent flyer programs on September 1 as a prelude to the larger alliance outlined in April.

Atlanta Mayor Bill Campbell announces on July 14 that, thanks largely to new services introduced by Delta and its commuter associate **Atlantic Southeast Airlines**, Hartsfield International Airport had achieved the first quarter distinction of being the busiest airport in the world.

In July, nearly a year after its Guam disaster, **Korean Air Lines/Korean Air (KAL)** contracts with code-share partner Delta for the performance of a detailed safety survey. Completed by month's end, the audit includes recommendations and an implementation plan designed to upgrade the safety of the company's cockpit procedures and pilot training program.

During the heat wave that impacts the U.S. in the period between July 29 and September 15, the company refuses to carry animals as checked baggage if the temperature rises above 85°F. The time the pets spend in the hold waiting for takeoff and after landing is the period when heat can cause their deaths.

Nonstop B-757-232 daily roundtrips begin on August 1 between Portland, Oregon, and Boston.

While on approach to Detroit (DTT) the next day, a fully loaded B-737-232A must take violent evasive action to avoid a small Cessna that comes within 200 ft. of the little Boeing at a point 12 mi. NW of the airport.

Union leaders from Delta and **United Airlines** meet at Herndon, Virginia, on the weekend of August 1-2 to discuss the proposed alliance between their airlines and its potential impact on pilot jobs. They also adopt resolutions in support for the **Northwest Airlines** pilots, who have reached an impasse in their negotiations for a new contract.

When the new winter schedule is announced on August 6, it is noted that the company will operate 16 daily roundtrips between Atlanta and Newark as of January 15. The same day, a new global marketing pact is entered into with **Korean Airlines/Korean Air (KAL)**.

Executive Vice President-Operations Alger announces on August 14 that the last of the company's B-727s will be replaced in 2005, three years earlier than previously planned. They will be replaced by Next Generation B-737-832s. The same day it is announced that the start of Portland to Osaka flights, planned for October 28, are being rescheduled to June 1999.

On August 17, after three months of consideration, the company's board of directors rejects an ALPA demand that its board representative be given full voting privileges.

Two days later, the "Delta Shuttle" division begins electronic ticketing on flights from New York (LGA) to Boston and Washington, D.C. (DCA).

As the result of arrangements made earlier in the week, Delta, like other carriers, is prepared to assist in handling the customers of **Northwest Airlines** on August 29 when that company's pilots go out on strike. Although reservations are encouraged, stand-by accommodations are provided and NWA ticket holders are allowed to transfer to Delta flights without penalty or restriction. To help move travelers in and out of the NWA fortress hubs of Minneapolis (MSP) and Detroit (DTT), Delta, on August 30, lays on three additional daily roundtrip services to Detroit from Cincinnati and two to Minneapolis. In addition and as they become available, Delta operates larger aircraft into Detroit from Atlanta. For example, wherever possible, B-767-332s replace B-757-232s.

As the result of an ATC error, an **Alaska Airlines** MD-83, Flight 257 en route from Mazatlan, Mexico, to Los Angeles, flies within 2.5 mi. of

a Delta plane on August 30. The L-1011, Flight 550, is inbound to Los Angeles (LAX) from Atlanta at 25,000-ft. some 30 mi. SE of Julian, California. The Traffic Alert and Collision Avoidance System (TCAS) aboard the Alaskan aircraft warns its crew of the Lockheed's presence and both aircraft are able to maneuver away, by just 8 seconds, from a potential collision.

As a result of its failure to win voting status, Delta's ALPA pilots refuse to allow the necessary change in their contract needed to implement the code-sharing portion of the carrier's alliance with **United Airlines**. President/CEO Mullin informs United of the pilots' refusal on September 1 and although he indicates that Delta will move forward where it can on the alliance, it will stop pursuing an agreement for joint ticket sales. The company joins the MileagePlus frequent flyer program of **United Airlines** on September 1 as an initial step toward alliance. Domestic passengers can earn miles in the other airline's program; international flights may be included at a later date.

Under the March pact, dual-designator service begins with **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)**, also on September 1, aboard Aeromexico's daily MD-80 roundtrips between Monterrey and Atlanta.

Additionally, domestic boarding passes are now issued only on the day of departure. They are available up to six hours before flight time, but must be claimed at least 20 minutes before departure.

Although Delta agrees to employ the same penalty-free and stand-by procedures during the pilots strike at **Air Canada, Ltd.** that begins on September 2, it has no immediate plans to increase capacity with larger aircraft as it has on the route between Atlanta and Detroit.

The company will win significant praise for the manner in which it assists grieving relatives and others associated with the disaster that befalls Flight 111 of code-share partner **Swissair, A.G.** on September 3. The carrier issues a statement of direction for friends, relatives, and the media following the disaster, providing telephone numbers and other information.

The code-sharing pact with **Sabena Belgian World Airlines, S.A.** grows again on September 6 as Delta places its designator aboard Sabena's twice-weekly A340-311 roundtrips between Brussels and Lome, Togo.

The seasonal code-sharing service with **Finnair, O/Y** ends on September 12.

The code-sharing agreement with **Korean Airlines/Korean Air (KAL)** is expanded on September 15. Under the arrangement, new dual-designator daily services are inaugurated to Seoul, via New York or Los Angeles, from Las Vegas, New York, Orlando, Philadelphia, and Portland. Flights are also added from Atlanta, Boston, Dallas (DFW), New York, and San Francisco.

Flights in and out of New Orleans are cancelled on September 27 in the face of Hurricane Georges. By the end of the month, Delta is offering catered meal service to meetings in 55 of its Crown Room Club conference rooms.

One daily flight is added on October 1 between Salt Lake City and Boston and another between Salt Lake City and Washington, D.C. (IAD), bringing to three the total number of roundtrips on those routes. Hourly service is simultaneously launched between Atlanta to Boston; 15 flights are operated daily between Georgia and Massachusetts, with 14 returns.

On the same day, four additional peak period roundtrips are started between Atlanta and New York (LGA); new thrice-daily B-737-322 roundtrips are initiated from Atlanta to Chicago (MDW). With the new schedule, Delta now offers a total of 18 daily roundtrips between Georgia and Chicago's two airports. One more daily roundtrip is offered between Atlanta and Baltimore (BWI) and three new roundtrips are also launched to Washington, D.C. (IAD).

Also on October 1, the carrier's thrice-daily nonstop MD-88 roundtrips from Houston (IAD) to Dallas (DFW) are closed down, as are the thrice-daily MD-88 return service to Atlanta from Toledo, Ohio. The regional airport at Toledo is hurt by the move and plans to hire a consultant to advise it where to turn next.

Deep-discount "Delta Express" inaugurates twice-daily B-737-200 roundtrips between Washington, D.C. (IAD) to Fort Lauderdale. "Delta Express" launches daily B-737-200 nonstop roundtrips from Orlando to Albany and Syracuse. On October 2, daily nonstop roundtrips from Orlando to Buffalo and Rochester begin.

As part of the fiftieth anniversary celebrations surrounding the international airport at New York (JFK), Delta flies a restored 1929 Travel Air monoplane from Atlanta to New York on October 1-3. The voyage is made via Greenville/Spartanburg, Greensboro, Norfolk, Washington, D.C. (IAD), and Philadelphia.

While on approach to São Paulo, Brazil, on an October 4 service from Atlanta, Flight 105, a B-767-332ER with 9 crew and 136 passengers encounters clear-air turbulence. One flight attendant sustains a fractured ankle while returning to her seat.

Also on October 4, daily nonstop B-737-322 roundtrips are launched between Atlanta and Chicago (MDW).

Over the Atlantic Ocean 2 hrs. W of Ireland on October 8, en route from Manchester to Atlanta, an electrical odor is experienced in the cockpit of an MD-11. The flight, carrying 13 crew and 213 passengers, is diverted to Shannon, Ireland, where an uneventful landing is made and no injuries are reported.

It is announced, also on October 8, that the company will launch hourly roundtrip service between Atlanta and Newark on January 15. Three days later it is learned that company pilots are to vote on a contract supplement that will give those who fly Next Generation B-737-832s the highest industry wage.

Just after takeoff from Boston on an October 15 service to Atlanta, Flight 915, an MD-88 with 6 crew and 128 passengers, loses power to its right engine. An emergency is declared and the aircraft returns to its point of origin, where a safe emergency landing is made. No injuries are reported, but an examination of the damaged engine reveals that the lower cowling has separated.

The carrier's existing code-share service with **Aeromexico (2) (Aerovías de Mexico, S.A. de C.V.)** connecting Atlanta and Cancún, is increased on October 25 from four times a week to daily, nonstop flights on Aeromexico's B-757-2Q8s. Daily MD-11 nonstop roundtrips from Portland (originating in Atlanta) to Fukuoka commence on October 29. **Trans-World Airlines (TWA)** purchases seats on the flights under a code-share arrangement.

Joint flights with **Air France** commence on November 1 between Paris and Johannesburg, South Africa. Simultaneously, the daily "Delta Express" roundtrip frequency between Orlando and Albany, Buffalo, and Rochester is doubled from one service to two.

While the 5 crew and 107 passengers of the MD-88 Flight 1889 are deplaning at Cincinnati on November 3, their aircraft is struck by a company baggage loader vehicle, whose driver is seriously injured in the incident. An insulation fire breaks out aboard an MD-11 at Atlanta on November 8 as it is being loaded for a flight to London; the blaze quickly burns itself out.

Seasonal mainline service is introduced on November 15 between Atlanta and Fort Lauderdale. Twice-daily dual-designator service with **Aeromexico (2) (Aerovías de Mexico, S.A. de C.V.)** between Dallas (DFW) and Cancún is introduced on November 17. During the month, the company announces plans to seek authority, as soon as a new bilateral agreement is in place, to initiate service from Atlanta to Rome and Venice.

Seasonal B-757-232 service, which will end on January 9, is begun on December 1 from Cincinnati to San Juan. The same day, Delta attaches its code to the daily SAAB 2000 flights of **Swissair, A.G.** affiliate **Crossair, Ltd.** between Zurich and Krakow, Poland.

Twice-daily "Delta Express" roundtrips commence between Newark and Fort Lauderdale on December 2.

The same day, at a news conference in Paris, **Air France** President Spinetta informs journalists that his company will make a decision by the end of 1999 on whether to invite Delta or **Continental Airlines** to join it in building a global alliance.

Later in the day, the company indicates that it will eliminate its mainline jet service to Bangor, Maine, on March 2. It will, however, be replaced by "Delta Connection" partner **Comair**, flying Canadair CRJ regional jets.

On December 3, the discount division initiates twice-daily return flights to Fort Lauderdale from Hartford, Connecticut.

At the same time, it is announced in the media that company lawyers will appear in court on January 26 to review a tentative settlement for a lawsuit that has challenged changes its frequent flyer program.

Having decided to eliminate first-class seating on many of its foreign long-hauls in favor of an upgraded business-class product, the company, in December, stops selling first-class tickets and begins to reconfigure its 42 B-767s and 15 MD-11s with new business-class seating. For the transition period, which will extend through the spring, the carrier replaces its first-class product with its current business-class offering.

On December 6 a flight nearly ends in tragedy. As the result of ATC confusion, Flight 5199, a **Caledonian Airways, Ltd. (2)** L-1011 must, following a TCAS alarm, quickly climb to avoid Flight 66, a Delta B-767-332 that has received a similar prompt to descend. The two airplanes pass each other with 1.5-mi. horizontal and 900-ft. vertical separation.

A comprehensive strategic marketing alliance is entered into with **China Southern Airlines Company, Ltd.** on December 10. Under its terms, the two will link their frequent flyer programs in the new year. In addition, CSA will purchase blocks of seats for sale under its code on Delta flights from Los Angeles to Atlanta, Boston, Dallas (DFW), Chicago (ORD), Honolulu, Las Vegas, Miami, Minneapolis (MSP), New York (JFK), Philadelphia, Portland, San Francisco, and Washington, D.C. (DCA). Delta, meanwhile, will place its code on CSA's thrice-weekly Los Angeles to Guangzhou B-777-21B roundtrips.

On December 11, the carrier's dual-designator pact with **Austrian Airlines, A.G.** is expanded as the Austrian flag carrier places its code on Delta's daily, nonstop B-757-232 return service between Atlanta and Guatemala City. After lengthy discussions, Delta and **SkyWest Airlines** announce, also on December 11, that they will end the Los Angeles portion of their "Delta Connection" code-sharing agreement on April 4, 1999.

Delta announces on December 14 that it will add four flights over the two-day January 5-6 period to its normal schedule of 23 daily roundtrips between Atlanta and Phoenix. This is in anticipation of the first "national collegiate championship" football bowl game between the University of Tennessee and Florida State University to be held in Phoenix at the Tostitos Fiesta Bowl on January 5. In addition to the extra flights, normally scheduled flights will be upgraded to feature larger aircraft, and a flight from Atlanta that normally continues to Tucson will serve only Phoenix on January 4-5. A total of 1,100 extra seats are thus added for the event.

Delta on December 17 begins to code-share on **Swissair, A.G.** A310-325 roundtrip flights from Newark to Basel, six times a week. Simultaneously, the Swiss partner is able to place its code on Delta services to several new U.S. destinations: Albuquerque, Austin, Greensboro (N.C.), Greenville/Spartanburg, Kansas City, West Palm Beach, Raleigh/Durham, San Antonio, Sarasota, and Tulsa.

Two days later, Delta resumes seasonal daily B-757-232 roundtrips between Atlanta and both Gunnison/Crested Butte and Vail, Colorado. Simultaneously, a third daily roundtrip is started from Salt Lake City to Colorado Springs, as well as a sixth daily return service from Salt Lake City to Las Vegas.

On December 22, Boeing announces that it has established firm delivery dates for 25 aircraft in 1999 and 2000 to support Delta's ongoing plans for fleet modernization and modest growth.

While taxiing for departure from Dallas (DFW) for Cincinnati on December 26, Flight 1922, an MD-88 with 5 crew and 45 passengers, suffers a "hot start" in its No. 2 engine, which catches fire. The aircraft is stopped and all aboard are evacuated down chutes from the left side, during which one passenger is seriously injured. Airport fire trucks contain the blaze.

During the month, Executive Vice President Reid begins to reorganize the company's international divisions, decentralizing management into three regional organizations (Atlantic, Pacific, and Latin America) each with a vice president reporting directly to him.

Passenger boardings for the year ascend 2% to 105,390,145 and cargo traffic increases by 6% to 1.92 billion FTKs. Revenues total \$14.4 billion, a 3% boost. Operating income of \$1.79 billion is recorded, together with a record net gain of \$1.07 billion.

Delta's summer European schedule is announced on January 5, 1999. Plans are in hand to introduce Atlanta's first nonstop service to Athens, Barcelona, and Istanbul. In addition, flights will commence from New York (JFK) to Dublin, Shannon, and Venice. Daily nonstop roundtrips will also be started from Atlanta to Rome and Milan. Exact timetables will be released later. It is announced on January 8, that the carrier will begin a second daily roundtrip service on June 1 between Cincinnati and Frankfurt.

In one of the great mistakes of airline marketing, one implemented before its time, Delta announces on January 12 that it will charge passengers a \$1-per-flight segment surcharge on all tickets not purchased through its homepage on the Internet's World Wide Web.

The first five B-737-832s, received at the end of the previous year, enter service on January 15 between Atlanta and Newark and on other medium-haul routes.

In response to a request by the union representing the carrier's 8,000 pilots, management agrees, on January 19, to open contract talks on September 8, six months earlier than scheduled.

The Peruvian business daily *El Comercio* reports on January 20 that both Delta and **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** have decided against investing in a restructuring of **AeroPeru (Empresa Transportes de Aereos de Peru, S.A.)**. The plan would require a capital injection of \$10 million within the next 10 days to keep the Peruvian line's operations going without interruption. The two North American majors end the consortium they had established to operate AeroPeru and begin an effort to unload their shares.

On January 25, Delta receives the 1998 "Airline of the Year Award" from *Air Transport World* magazine.

Having proved wildly unpopular with airline agents and customers alike, the Internet surcharge is abandoned on January 26. Consumer advocates believe that the step back by the major will dissuade other U.S. airlines from adopting similar web-oriented fees.

A contract is signed with Turner In-flight Services on January 28; the airline will begin showing *Horizon* films from the firm on its flights beginning in February.

When Delta on January 29 raises business ticket prices by 2% and leisure ticket costs by 4%, four other majors quickly follow suit. The move, the first fare increase for U.S. airlines in 18 months, is seen as the opening salvo in an upcoming series of across-the-board fare hikes.

An L-1011-500 is sold to AAR Aircraft Corporation on January 31 and is the first of its type in the world to be retired just for spare parts.

On February 1, Delta becomes the official sponsor of the John F. Kennedy Center for the Performing Arts and the National Symphony Orchestra in Washington, D.C. On the same day, electronic ticketing is extended to European services, beginning with Amsterdam. Seventeen additional European cities will be added by April 5.

An Illinois court, on February 2, approves a company settlement for those passengers filing a class-action suit against the carrier's frequent flyer program in 1988. The court's award comes in the form of discounts and extra mileage awards to the plaintiffs.

Also on February 2, "Delta Shuttle" introduces airport-to-downtown sedan service in Boston, New York (LGA), and Washington, D.C. (DCA). Fares for the automobile trips run \$41 to \$75 one-way.

It is announced on February 3 that Delta and **Air France** have jointly filed an application with the DOT that will allow them to extend their existing code-sharing agreement to Johannesburg, South Africa. With anticipated approval, the Atlanta-based major will place its code on the French line's daily A340-311 roundtrips to Johannesburg from Paris

(CDG) on November 1. It is simultaneously noted that the two will grow their code-share pact to additional third-world countries in the near future.

In a major development announced on February 12, **American Airlines** signs a letter of intention with **AeroPeru (Empresa de Transportes Aereos de Peru, S.A.)** that will allow it to acquire a major stake in the airline. The U.S. major begins due diligence to establish AeroPeru's financial situation preparatory to determining actual shareholding. AeroPeru's current shareholders, CINTRA of Mexico (35%), the parent of **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** and Delta (35%) will, if the arrangement proceeds, divest themselves of their shares.

The *London Sunday Times* reports on February 14 that the airline is in discussions with **Continental Airlines**, **Alitalia, S.p.A.**, **Air France**, and **Northwest Airlines** concerning the possible forging of a global alliance to rival the existing multinational airline pacts "OneWorld" and the "Star Alliance."

On the same day, unable to sustain the negative finances of remaining, since last fall, the only U.S. major still flying to Seoul, Delta suspends its daily nonstop roundtrips from Portland, Oregon. The code-share with **Korean Airlines/Korean Air (KAL)** on the route thus ends; however, Delta continues to provide service between 11 other U.S. cities and Seoul via its dual-designator flights with the South Korean major. At the same time, the connecting service from Boston to Portland is also scrubbed. Delta will restrain further expansion into Asia until regional economies improve and turn its attention, instead, to Europe and Latin America.

On February 15, the "Delta Shuttle" relocates to Terminal A at Boston's Logan International Airport.

On February 16, it is announced that ASA Holdings, parent of **Atlantic Southeast Airlines**, will be purchased outright by Delta for \$700,000 (\$34-per-share) in cash. ASA will operate as a fully owned subsidiary. The transition of ASA into a subsidiary will be coordinated on an interim basis by Delta's senior vice president-airport customer service, John N. Selvaggio.

The Italian news agency Ansa reports on February 21 that **Air France** is in discussions with **KLM (Royal Dutch Airlines, N.V.)**, **Northwest Airlines**, and **Alitalia, S.p.A.** concerning the possibility of Air France joining their global alliance. Northwest and KLM are also alliance partners of **Continental Airlines**, which, with Delta, is one of two U.S. airlines seeking a partnership with the French line. None of the suggested participants will confirm the story. **Air France** Chairman Spinetta, basking in the success of his carrier's February 22 initial public offering (IPO), reaffirms to radio interviewers his intention to choose, before the end of the year, either Delta or **Continental Airlines** as the carrier's major global alliance partner. Simultaneously, a spokesman for Delta expresses a hope that it will be chosen as the global affiliate.

On February 23, breaking ranks with its partners, **Alitalia, S.p.A.**, through an unidentified spokesman, confirms that the carrier, along with **Northwest Airlines** and **KLM (Royal Dutch Airlines, N.V.)** are at the "very beginning" of alliance talks with **Air France**. Also on February 23, the DOT grants Delta authority to operate from the U.S. to Rome. **American Airlines** and **USAirways** had also submitted applications for the route.

Chairman of the group's Accident Investigation Board, Capt. Paul McCarthy becomes ALPA's executive air safety chairman on March 1.

Having violated government rules concerning code-sharing announcements, Delta is fined \$25,000 by the DOT on March 3 for failing to inform passengers that their tickets will require them to switch airlines.

A B-757-232, with 150 passengers, is forced to make an emergency landing at Greenville/Spartanburg on March 6 after smoke is reported in the cabin. No injuries are reported.

On March 8, two shareholders of ASA Holdings file suit in Georgia to block Delta's takeover. Meanwhile, the parent of **Atlantic Southeast Airlines** hires Morgan Stanley Dean Witter to identify other possibilities for the company and its stockholders other than buyout by the major.

Having completed its review of **AeroPeru's** finances, **American Airlines** informs the airline, also on March 8, that it will not, after all, take an equity stake or provide fresh capital. The news is catastrophic as the airline, caught by increased regional competition amidst a regional financial crisis, is left without sufficient cash to continue paying for fuel and other services. Although a handover to Indecopi, a government agency that handles bankruptcies, does not occur as suggested, **AeroPeru**, on March 10, does cease international operations, but indicates it will continue domestic flights until March 14. While on a tour in the north of the country, Peru's president, Alberto Fujimori, indicates that his government may help refloat the flagship airline and inject capital into it, but only if AeroPeru can reach a deal to reschedule its debts.

As the crisis unfolds, neither CINTRA nor Delta, which continue as shareholders, offer comment. An ultimately unsuccessful effort will also be made over the next two months to recruit **Continental Airlines** as an equity partner. Meanwhile, on March 11, the president of AeroPeru informs Dow Jones that, during the 60+ days it is down, international air tickets already purchased will be honored by Delta.

Following the christening ceremony for the Chinese B-777-21B *The Pearl of the South* and a media presentation by senior executives, a pre-service code-sharing flight with **China Southern Airlines Company, Ltd.** is flown on March 12 from Los Angeles to Guangzhou.

On March 15, **Northwest Airlines**, which has been recalcitrant in the past, joins Delta, **American Airlines**, **Southwest Airlines (2)**, **United Airlines**, and **USAirways** in raising business fares by 1% and imposing another 3% hike on leisure tickets. United had begun this second round of ticket price increases on March 12.

Due to strong cross winds at the Maine airport, the company cancels all operations in and out of Portland between 7 p.m. on March 15 and the arrival of the first flight from Albany at 10:47 a.m. on March 16.

While landing at Santa Ana-Orange County Airport on March 25, following a service from Salt Lake City, an MD-90-30 blows several tires and suffers damage to its flaps; no injuries are reported.

Also on March 25, the company reaches agreement in principle with the Pratt & Whitney division of United Technologies on terms under which the carrier will sell 119 P&W-powered B-727-200s and up to 39 associated spare engines over the next 6 years as they are retired from the fleet. P&W will finance the arrangement with Republic Financial Corporation of Denver and market the aircraft after converting them into freighters.

The first of 13 custom-designed B-777-232s from an order valued at more than \$1.4 billion arrives at Delta's Atlanta home base on March 26, following its delivery flight from Seattle. A second advanced twin-jet will be received on March 30.

Thrice-weekly nonstop B-777-21B block-seat, dual-designator service with **China Southern Airlines Company, Ltd.** begins on March 28 from Los Angeles to Guangzhou. In addition to the seats the American major has purchased on the Chinese line's transpacific flights, CSA is able to book space on Delta flights from Los Angeles to Atlanta, Las Vegas, Honolulu, Dallas (DFW), New York (JFK), Portland (Oregon), and San Francisco.

Crew members aboard a B-767-332, en route from New York (JFK) to Amsterdam on March 31, notice an electrical odor; unable to determine the cause, the pilot diverts his flight to St. John's, Newfoundland. Once on the ground, maintenance workers are unable to detect the source of the smell and thus the crew and all 194 passengers are put up in local hotels while Delta sends up another aircraft. The stranded Newfoundland service departs for Europe the next day.

On April 1, Delta places its code aboard **Swissair, A.G.** flights from Zurich to Bucharest.

After lengthy discussions, Delta and **SkyWest Airlines** announce an end the Los Angeles portion of their "Delta Connection" code-sharing agreement on April 4.

On the same day, the company introduces nonstop hourly B-757-232 roundtrips between Atlanta and Philadelphia. A total of 16 flights from Philadelphia are operated at 40 min. after the hour between 5:40 a.m.

and 8:40 p.m. and 15 flights from Atlanta are flown between 6:40 a.m. and 9:40 p.m.

Delta also begins daily nonstop B-757-232 roundtrips between Las Vegas and Tampa. Also on April 4, Delta adds one new daily roundtrip flight from Atlanta to Austin (raising the total from five to six); one new flight to Greensboro, High Point, Winston-Salem (from eight to nine); and one to Norfolk (from six to seven). It also flies its new Next Generation B-737-832 for the first time on the Atlanta to Guatemala route.

En route from Atlanta to Tokyo (NRT) on April 7, an MD-11 with 110 passengers and piloted by Capt. Roscoe McMillan is diverted to Portland, Oregon, where the customers are put on another flight to Japan. The flight has been cut short because the aircraft's two relief pilots are unable to sleep in the cramped bunk area, a confined space that the airline had cut into its MD-11s five months earlier in order to expand first-class seating. Both the airline and ALPA, which has filed a grievance about the sleep module, open an investigation.

A new advertising campaign is launched on April 12 in the U.S., Europe, Japan, and Brazil promoting a new BusinessElite intercontinental service that is offered at business class fares.

Twice-daily "Delta Express" roundtrips are started on April 15 from Tampa to Newark.

After considerable deliberation, the carrier, which is unable to agree with ALPA on a B-777 pay scale, agrees with The Boeing Company, also on April 15, to indefinitely defer deliveries of four B-777-232 IGWs due for delivery between December and April. Arrangements are made to replace the deferred wide-bodies with four B-767-332ERs.

As the result of several recent KAL accidents, Delta, on April 16, suspends its code-sharing arrangements with **Korean Airlines/Korean Air (KAL)**. The suspension will remain in effect until Delta completes a thorough review of its partner's operations.

At a meeting of the Swiss-American Chamber of Commerce on April 21, the CEO of **Swissair, A.G.** indicates that moves by Delta to form a code-sharing alliance with **Air France** have placed the status of its current dual-designator pact with Swissair in grave doubt.

Piloted by Capt. Isaac Wells, a fully loaded B-767-332ER on April 22 makes the first commercial landing on the new northern runway at Cote d'Azur Airport, Nice, France.

The company's program of electronic ticketing is expanded, beginning on April 26, to include flights to and from many Latin American destinations; the first destination available, as of today, is San Jose, Costa Rica.

On April 27, lawyers for members of the ALPA chapter at Delta file suit against management in an effort to block a move by the parent to employ **Comair** CRJs on "Delta Shuttle" flights between Boston and Washington, D.C. (DCA) starting on June 1. In order to take advantage of Comair's Washington, D.C., slots, the current plan features five daily roundtrips by Delta B-727s and three with Comair Canadairs. The issue is certain to figure in negotiations, set to begin in September, on a new Delta pilots agreement.

It is announced in London on April 30 that, given the decision of **Aer Lingus Irish Airlines, Ltd.** to join the "OneWorld" alliance, the Irish line and Delta, a member of the "Star Alliance" (a "OneWorld" rival), are ending their code-sharing relationship.

Daily nonstop "Delta Express" roundtrips begin on May 1 between Orlando and Lehigh Valley Airport, near Allentown, Pennsylvania. Simultaneously, B-777-232 return service is started from Atlanta to London (LGW) and, for training purposes, from Atlanta to Orlando.

In Europe, Delta places its code on the daily roundtrips made by **Swissair, A.G.** between Zurich and Bucharest. Electronic ticketing to Caracas begins on May 3.

On May 8, Delta, having completed its investigation, agrees that more room is needed for sleep modules aboard its MD-11 fleet and publicly backs Capt. McMillan's decision to divert to Portland on April 7.

Electronic ticketing begins on services to Mexico City and Guadalajara on May 10. Following a special meeting of the directors of ASA

Holdings on May 11, that concern and its **Atlantic Southeast Airlines** subsidiary officially become a fully owned subsidiary of Delta.

Just after takeoff from El Paso on a May 14 service to Atlanta, popping noises are heard aboard Flight 256, an MD-80 with 141 passengers. It is determined that a tire has exploded and pieces of debris have been sucked into an engine. A safe emergency landing is made back at the point of origin, although the nosegear suffers some damage upon touchdown. No injuries are reported.

Following on the heels of the May 13 Department of Justice antitrust suit against **American Airlines**, **AirTran Airlines**, on May 26, charges Delta with matching its fares and adding flights in an effort to drive AirTran out of the major's markets and thereafter raise fares. AirTran executives, who claim to have been working on their brief before the May 13 American suit, cite a number of instances to back up their claims, but indicate they are not going to file a lawsuit or seek specific remedy. Rather, the discount carrier's leaders ask that the DOJ and DOT review Delta's practices. In a strongly worded response, Delta indicates that the AirTran charges are "insulting and untrue."

Word is leaked on May 27 that *Aviation Week & Space Technology* will name Delta as the "Best Managed Major Airline" for 1999 in its May 31 issue.

On May 28, the carrier joins with **Swissair, A.G.** to offer a code-sharing service between Atlanta and Lima, Peru. Electronic ticketing to Rio de Janeiro and São Paulo begins on May 31.

Daily nonstop MD-11 roundtrips begin on June 1 between Atlanta and Rome. This is the first service from the Georgian airport to the Italian capital city. Simultaneously, a second daily roundtrip is launched between Cincinnati and Frankfurt; the seasonal flights will be maintained until October 2, when the schedule reverts to one service daily.

Also on June 1, twice-daily nonstop B-767-332ER roundtrips are started from Atlanta to Barcelona for the summer season. Simultaneously, the summer season flights from New York (JFK) to Barcelona become year-round. B-757-232 roundtrips are increased by one on June 1 from Atlanta to Denver (6 to 7); to San Antonio (6 to 7); to San Diego (4 to 5); and San Francisco (6 to 7). On the same day, "Delta Shuttle" launches nonstop every-other-hour business-day roundtrips between Boston and Washington, D.C. (DCA).

Both "Delta Shuttle" and its "USAirways Shuttle" competitor face a new challenge from the ground as Amtrak begins testing its 150-mph. *Acela* trains between Boston and New York and between New York and Washington, D.C.

Flight 491, a B-757-232 with 8 crew and 119 passengers, makes a hard landing at Phoenix on June 2 following a service from New York (JFK); although no injuries are reported, the aircraft is badly damaged. Electronic ticketing to San Salvador is started on June 7; electronic ticketing will follow on June 14 and 21 respectively for Guatemala City and Panama City.

Meanwhile, because it must soon commit to its winter schedule and the aircraft to fly it, Delta, lacking accord with ALPA, is forced to notify Boeing on June 11 that it will not fly the B-777, that it cannot accept any more on order, and will sell those delivered.

Celebrating 70 years of service from Dallas (DAL), a company jetliner departs that airport at 8 a.m. on June 17 and retraces the original route to Jackson, Mississippi, via Shreveport and Monroe, Louisiana. Several smaller communities visited the first time must be omitted from this commemorative flight.

Also on June 17, the *Les Echos* business newspaper reports that **Air France** has chosen Delta as its new U.S. strategic partner. The flag carrier offers no comment. The scoop is, however, confirmed on June 22 when both majors announce that they will align their passenger and cargo services as part of a long-term effort to forge another global airline alliance.

Daily nonstop B-757-232 roundtrips begin on July 1 from Atlanta to Guadalajara. It will continue to code-share on three services between the two cities offered by **Aeromexico (2)** (**Aerovias de Mexico, S.A. de C.V.**). On the same day, service from Atlanta to Mexico City is expanded to five nonstop daily roundtrips by the addition of a third com-

pany flight, in addition to the two dual-designator flights operated daily by Aeromexico (2). Employing B-767-332ERs, Delta, on July 15, inaugurates nonstop service from New York (JFK) to Dublin, continuing to Shannon, four days a week and nonstop to Shannon, continuing to Dublin, on the other days.

The code-share pact with **Air France** is expanded on July 30 to include a reciprocal air mail agreement. Under its terms, the U.S. company will extend the number of destinations it can reach on behalf of the U.S. Postal Service while Air France will be able to do likewise on behalf of the French Post Office.

It is announced on August 13 that the daily MD-11 nonstop service between Portland and Fukuoka, Japan, will be suspended on October 1. The next day, the carrier begins a code-share with **Air Jamaica, Ltd. (2)** on the island carrier's twice-weekly A320-211 roundtrips from Montego Bay to the islands of Grenada and St. Lucia.

A gala celebration is held at Everett, Washington, on August 26 when the first B-767-400ER is rolled out.

Delta and its pilot union begin contract talks on September 8, six months before the current agreement's amendable date of May 2000. Senior Vice President Edward H. West is named chief financial officer the next day.

To replace the B-727-200s currently employed by the "Delta Shuttle" in the Northeast, the company, on September 15, orders 16 Next Generation B-737-832s that will begin delivery next July. Also in September, Chief Financial Officer Warren Jenson becomes chief financial officer of Amazon.com and is succeeded at Delta by Senior Vice President Edward H. West.

On October 1, less than a year after the route was started, daily nonstop MD-11 flights from Portland to Fukuoka cease. The same day, one new frequency is added by the main line to its services from Atlanta to Los Angeles and Orange County. "Delta Express" introduces two daily roundtrips from Hartford to West Palm Beach and adds a seventh frequency from Newark to Orlando.

Also on the first day of the month, the massive Next Generation B-737-832 order is confirmed, along with a request for three more B-737-200s, which will bring the "Delta Express" fleet to 40 aircraft. The latter order is announced as part of the official third birthday for "Delta Express."

Simultaneously, it is revealed that the carrier has signed a major marketing and code-sharing agreement with **South African Airways (Pty.), Ltd.** Under the terms of the agreement, Delta agrees to purchase block seats on the daily SAA B-747-444 direct nonstop return service from Johannesburg to both Atlanta and New York (JFK). The service from Johannesburg and the Georgia city will be the first nonstop direct link between the city pair.

It is announced by the participants on October 13 that the "Atlantic Excellence" alliance is being dissolved in order that its members might join other world airline groupings. Delta, **Swissair, A.G.**, **Austrian Airlines, A.G.**, and **Sabena Belgian World Airlines, S.A.** will honor existing travel agency and corporate sales agreements through December 31 and end their code-sharing arrangements on or before August 5, 2000.

Delta begins to code-share with **Tyrolean Airways (Tyrolean Airways Luftfahrtgesellschaft, GmbH.)** on October 15, placing its code on the Austrian line's flights from Vienna to Bremen, Graz, Katowice, Klagenfurt, Krakow, Linz, Nuremberg, and Salzburg.

The official airline of the 2002 Olympic Winter Games, Delta launches its sponsorship on October 23 when it accepts delivery of its 100th B-757, a Dash-232 with an Olympic-theme livery, in ceremonies at Salt Lake City. The plane makes a special transcontinental promotional tour between October 25 and 29, visiting, in order, Atlanta, Washington, D.C. (DCA), Cincinnati, New York (LGA), DFW, Los Angeles, Orlando, and Boston. It joins the B-777-232 *Soaring Spirit II* already in service with a special livery.

As the October 31 date for renewal of the carrier's "Delta Connection" contract nears, negotiations over a new pro rata agreement with **Comair** intensify during the summer. Unable to come to terms, Delta,

which already holds a 22% stake and believes itself to be inadequately compensated, in early October, makes a \$23.50 per share/\$1.8 billion cash offer to purchase outright the remainder of its Cincinnati-based affiliate. Comair's board agrees to the transaction on October 16 and it is announced two days later. The new wholly owned "Delta Connection" subsidiary will join **Atlantic Southeast Airlines**, taken over earlier in the year, as a Delta division, with the entire commuter network falling under the direction of Comair President/CEO David A. Siebenburgen.

Beginning on November 1, Delta adds one new frequency to its services from Atlanta to Las Vegas, Little Rock, Norfolk, and Seattle. Also in November, a number of **Comair** shareholders file two class-action lawsuits (one each in Kentucky and New York) against the airline and its board charging that the takeover price is inadequate and seeking to halt the sale.

After a six-year restoration program, a renovated DC-3 takes off from Atlanta on its first passenger flight. The aircraft, first delivered new to Delta on December 23, 1940, had been sold in 1958 and operated by others until repurchased in 1993 for use as a public relations vehicle.

During November, it is announced that President/CEO Mullin will become chairman upon the imminent retirement of Gerald Grinstein, the nonexecutive chairman, who will remain a director. At the same time, it is noted that Delta will invest \$335 million of the total \$386 million required for a rebuilding of Terminal A at Boston's Logan International Airport. When the improvements are completed in the fall of 2004, Delta will move into the facility.

Delta greatly expands its French code-share on December 1, placing its designator on **Air France** European services from Paris (CDG) to Brussels, Zurich, Vienna, Geneva, and Basel. It also places its designator on AF flights from Paris (CDG) to Ouagadougou, Burkina Faso, and Abidjan.

Also on December 1, the company ends its flights to St. Croix in order to concentrate its capacity on St. Thomas. Daily Next Generation B-737-832 roundtrips begin from Atlanta to Aruba, while B-757-232 return flights are started from the Georgia hub to St. Martin. "Delta Express" launches a new daily B-737-200 return service from Islip to Tampa; three days later, a fourth daily roundtrip begins from Islip to Orlando.

The last five of seven B-777-232ERs to be received during the year are delivered on December 7, 10, 13, 17, and 21, respectively. At this point, the carrier's pilots ratify, effective January 1, an agreement on pay rates for cockpit crews of the new twin-engine wide-bodies, clearing the way for their entry into service.

An original airline participant and major shareholder, Delta sells 2.1 million shares of Priceline.com to its chairman/CEO Richard Braddock and Vice Chairman Jay Walker in December for \$125 million.

Passenger boardings inch up 0.2% to 105,534,000 while cargo climbs 3.4% to 1.98 billion FTKs. Revenues advance 4.5% to \$15.05 billion, while expenses jump 8.7% to \$13.69 billion. Although the operating profit falls to \$1.35 billion, net gain ascends to \$1.28 billion.

Airline employment at the beginning of 2000 stands at 72,000, a 0.9% increase over the previous 12 months. Among the world's top 25 airlines, Delta is the leader in total passengers and net profit, 2nd in operating profit, 5th in employees, 4th in fleet size and operating revenue, and 19th in FTKs.

On January 7, the DOT approves the block-seat, code-sharing alliance with **South African Airways (Pty.), Ltd.**, clearing the way for it to begin from New York (JFK) on January 30 and from Atlanta on January 31. The next day, Delta is allowed to place its designator on the weekend return service from Cozumel to Atlanta provided by MD-87s of **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)**.

All work on establishment of the new "Delta Connection" subsidiary is completed on January 12; the new unit will manage and coordinate the Connection-contracted activities of the **Atlantic Coast Airlines** subsidiary **Atlantic Coast Jet**, as well as **Atlantic Southeast Airlines**, **Business Express (BEX)**, **Comair**, **SkyWest**, and **Trans States Airlines**. When President/CEO Siebenburgen launches his revamped "Delta

Connection" network on January 18, he is succeeded as Comair Holdings president by Randy D. Rademacher.

Daily nonstop B-757-232 roundtrip seasonal service is inaugurated between Atlanta and Cancun on January 31.

The first of three additional Boeing 737-200s contracted for the previous October arrives at Atlanta on February 1 and is assigned to the "Delta Express" fleet. Also in February, Delta announces a 3% pay increase for its nonunionized workers and a new early retirement medical option for senior employees. The airline is also the first to make home personal computers available to all of its workers, together with software and Internet hookups.

On February 29, Delta comes in second to **Air France** in a survey of North Atlantic business class cuisine published by the London financial weekly *Sunday Business*.

On March 1, Delta begins to code-share on AF flights from Paris (CDG) to Lisbon and Porto. The same day, the New York (JFK) to Paris (CDG) service is enhanced by the substitution of an MD-11 for the B-737-332ER currently employed. On March 4, employing its B-737-200s, "Delta Express" increases the number of its Boston to Fort Lauderdale daily roundtrips from four to six.

Designed by the Leo Burnett Company, a new advertising campaign begins on American television on March 11 highlighting company service and benefits. The next day, a new aircraft color scheme, designed by Landor Associates to emphasize an increased awareness of passenger services, is unveiled on a B-777-232ER. With its ribbon-like tail design and a title now shortened to just "Delta," the new livery replaces a blue-and-red dash livery introduced in 1997. As painting of the new scheme on all of the aircraft will take time, Delta is now one of the few airlines in the world to have three different liveries in the air at the same time.

Just after takeoff from San Francisco on a March 14 service to Salt Lake City, Flight 1972, a B-737-232 with 7 crew and 78 passengers is unable to lower its right main landing gear. After dumping fuel, a safe emergency landing is made back at the point of landing, during which no one is injured. Damages to the right wing are major and will lead to the write-off of the aging airliner.

In a heartfelt and well-received effort supported by Delta, **Air France**, Scott Company, the Georgia Forestry Association, and the American Forests conservation group, over 5,000 seedlings are transported to Versailles and planted by French and American students on March 20. One hundred of them were taken from the grounds of homes of American presidents and other historic sites. **Air France** flies the trees to France, while Delta transports the students.

The dual-designator flights previously operated with **Sabena Belgian World Airlines, S. A.** between Brussels and New York (JFK) end on March 25.

Daily nonstop **Air France** A310-304 roundtrips are launched on March 26 between Paris (CDG) and Philadelphia. Delta code-shares on the service as well as on the Dakar frequency and an increased number of AF flights from Paris (CDG) to Atlanta and Cincinnati and from Lyon to New York (JFK). Daily nonstop B-767-332ER roundtrips are simultaneously started from New York (JFK) to Zurich, replacing those previously operated under the **Swissair, A.G.** dual-designator arrangement. Code-sharing with both **Swissair** and **Sabena Belgian World Airlines, S.A.** ended the previous day.

The return service between New York (JFK) and Stuttgart ends on March 27, as Daimler-Chrysler, the largest customer on the route, begins flying its own corporate Airbus A319CJ between the Badden-Werttemberg company headquarters and Detroit. The Atlanta to Stuttgart service continues. A landing gear door falls from Flight 1827, a "Delta Shuttle" B-727-232A, as it departs Boston, also on March 27, and falls harmlessly on a street in a residential neighborhood.

The largest regional jet order in airline history is placed on March 29 when "Delta Connection" CEO Siebenburgen, acting on behalf of **Comair** and **Atlantic Southeast Airlines**, signs a \$10-billion, 4-year order with Bombardier Aerospace for a mix of 94 CRJ100, CRJ200s, and CRJ700s.

The next day, Delta places a firm order for two more Next Generation B-737-832s; the carrier now has a total of 18, with 113 to come.

Also in March, the company's ramp workers, including baggage and cargo handlers, reject, by a wide margin, an effort by the Transport Workers Union to unionize them, with only 17% voting in favor. The National Mediation Board will, however, invalidate these results and order a new election.

On April 2, the number of CRJ100s roundtrips offered between Cincinnati and Atlanta doubles to eight, thereby replacing all four of **Delta Air Line's** daily roundtrips in this market. It also replaces the twice-daily return service from Cincinnati to Colorado Springs. Service is increased from Cincinnati to Orlando (5 to 6), from Atlanta to Dayton (5 to 6), and Atlanta to Ontario (1 to 2). Twice-daily B-767-332ER transcontinental service is begun from Boston to Los Angeles and from New York (JFK) to San Diego, with another Dash-332ER frequency added, in the morning, from New York (JFK) to Los Angeles. The night B-757-232 service from New York (JFK) to Los Angeles (LAX) is matched with a B-767-332ER, while a fourth daily, one-way, service is started from Cincinnati to Portland.

At the same time, B-737-200 "Delta Express" twice-daily roundtrips are initiated from Fort Lauderdale to New York (JFK) and increase, from four to six, the number of daily frequencies completed between Fort Lauderdale and Boston. "Delta Express" Fort Lauderdale service is in direct competition with the new entrant carrier **JetBlue Airways**.

Also on April 2, daily nonstop B-767-332ER roundtrips are inaugurated from New York (JFK) to Zurich, while new daily seasonal service is initiated from Atlanta to Anchorage. Daily nonstop B-767-332ER return flights begin on April 14 from New York (JFK) to Lyon, France. Two new B-767-332ERs are delivered on April 21; a third will follow five days later.

On April 23, Delta begins to code-share on the new twice-weekly MD-87 service flown by **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** from Los Angeles to La Paz via Guaymas. The next day, Delta begins to code-share on **Air France** services between Paris (CDG) and Boston. These B-767-332ER frequencies are now increased from 7 per week to 12. The Atlanta-Cançun service ends on April 30.

MD-11s replace B-767-332ERs on the New York (JFK) to Paris (CDG) run on May 1. The same day, block-seat, code-sharing begins aboard **South African Airways (Pty.), Ltd.** services from Johannesburg to Windhoek, Namibia. Also on May 1, daily return service is launched from Atlanta to Ontario, CA and from New York (JFK) to San Diego. The former is operated with a B-757-232 and the latter with a B-767-332ER. A third daily nonstop B-767-332ER roundtrip is added between New York (JFK) and Salt Lake City.

Daily nonstop roundtrip B-767-332ER flights commence on May 9 between New York (JFK) and Venice.

It is learned on May 11 that the strike at Boeing will force a delay in the delivery of the carrier's first new B-767-432 from the end of May until at least the end of July. A number of other aircraft, including Next Generation B-737-832s, are also delayed, forcing the company to continue using its oldest B-727-232As longer than expected.

On May 15, Delta begins to code-share on **Air France** flights from Paris (CDG) to Cincinnati. Also on May 15, the company accepts delivery of its fourth new B-767-332ER.

Beginning on May 18, and continuing through the end of September, the company operates its new B-777-232ERs on pilot-familiarization flights between Atlanta and Orlando. As many as 5 per day of the large aircraft replace the smaller jetliners normally employed on the 14-times-a-day roundtrips.

Air Canada, Ltd. and **Canadian Airlines, Ltd.**, which the former has purchased, announce on May 19 that the two will end their code-sharing arrangements with **American Airlines** on or before October 1. Canadian and American had been partners for a decade. The final B-767-332ER to be delivered this year—and the last of three early B-767 types that first began joining the fleet in 1983—is accepted on May 23.

On May 24, **Air Canada, Ltd.** signs a code-sharing pact with Delta that will come into effect on October 29. Despite Delta's membership in

the **Air France**-led "SkyTrek" alliance, the new arrangement will not impact Air Canada's "Star Alliance" affiliation.

Also in May, Carolyn Ezzell is named managing director of the "Delta Shuttle" subsidiary.

Delta also places its "DL" code on **Air France** flights between Paris (CDG) and Lome, Togo, beginning on June 1. The same day, thrice-weekly B-767-332ER roundtrips are inaugurated from Atlanta to Rio de Janeiro and a third daily return service, using an MD-11, is begun from Atlanta to London (LGW). The B-767-332ER previously flown to England is used to begin a second daily seasonal return frequency from Cincinnati to Frankfurt. Two of eight daily return flights from Atlanta to Norfolk, Virginia, are simultaneously upgraded to B-757-232s. Seasonal daily B-767-332ER roundtrips, running through September 30, are also inaugurated from Atlanta to Anchorage and from New York (JFK) to Rome.

"Delta Shuttle" customers at New York (LGA), Boston, and Washington, D.C. (DCA) are served birthday cake on June 1 in honor of the first anniversary of the unit's Boston to Washington shuttle flights.

The B-777-232ER *Soaring Spirit II* joins the fleet on June 14, wearing its Olympic livery with depictions of athletes Bonnie Blair, Duncan Kennedy, and Ryan Heckman. The plane will be employed to transport the Olympic flame from Athens to North America.

The next day, Delta begins to code-share on the daily MD-87 roundtrip service flown from Hermosillo, Mexico, to Las Vegas by **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)**.

On June 21, Delta is allowed to place its "DL" code on the **Air France** B-737 Kiev service. A marketing and code-sharing agreement is signed with **Royal Air Maroc** on June 28. Under its terms, Delta places its code on RAM frequencies from Casablanca to New York (JFK), Agadir, Marrakesh, and Tangiers. RAM places its code on Delta services from New York (JFK) to Atlanta, Boston, Chicago (ORD), Los Angeles (LAX), Miami, San Francisco, Tampa, and Washington, D.C. (DCA). The next day, it is announced that the carrier is teaming up with **Air France** to place a bid for the 10% equity stake available in **Thai Airways International, Ltd. (THAI)**.

A year after **Air France** and Delta announce plans to create a global alliance, the new group, which also includes **Aeromexico (2) (Aerovias de Mexico, S.A. de C. V.)** and **Korean Airlines**, is officially named "SkyTeam" on July 1. Together, the partners offer 6,402 daily flights to 451 cities in 98 nations. At the same time, the company's previous close relationship with **Continental Airlines** ends as the Houston-based major remains in the competing "Wings" alliance. Also on July 1, twice-daily nonstop B-767-332ER roundtrips are inaugurated from Boston to Los Angeles.

Delta is named third best-managed company among privately owned, major-sized airlines in the "2000 Index of Competitiveness" published by *Aviation Week and Space Technology* on July 10. In a July 17 Boston Logan International Airport ceremony, a "Delta Express" B-737 is unveiled wearing a special livery depicting The Cartoon Network's characters *The Powerpuff Girls*.

Also in July, Richard Nixon, the air logistics-cargo senior vice president who came to Delta from **Federal Express (FedEx)** 15 months ago, resigns for personal reasons. He will be succeeded within two weeks by Anthony Charaf, who has been with Delta since 1996.

Delta starts or renews its code-share on August 1, placing its "DL" designator on **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** flights from Mexico City to Ciudad Obregon, Durango, Los Mochis, Torreon, and Acapulco. The last code-shared flights by Delta, **Swissair, A.G.**, and **Austrian Airlines, A.G.**, acting as partners under the now-disbanded "Atlantic Excellence" alliance occur on August 5. Dual-designator service previously operated with **Sabena Belgian World Airlines, S.A.** from Brussels to Atlanta ends on August 5 as Sabena moves its terminus from Hartsfield International Airport to Dallas (DFW).

"Delta Shuttle" introduces a new Next Generation B-737-832 into service on August 7; the increased legroom is welcomed by passengers.

The same day, a memorandum of understanding is signed with **El Al Israel Airlines, Ltd.** concerning the intended outcomes of marketing coordination discussions currently under way. It is hoped that code-sharing between the two carriers can be implemented by next April.

On August 15, code-sharing with Delta, **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** begins two new MD-87 roundtrips to Atlanta from Mexico City and one new return service from Puebla to Dallas (DFW).

On August 16, Delta begins to code-share on six-times-a-week **Air France** return services from Paris (CDG) to Douala and continuing to Yaounde thrice weekly.

A preliminary agreement is signed with **TunisAir, S.A.** on August 22 under which the two carriers will examine possibilities for increased cooperation, including the possibility of first-time flights by Delta to Tunisia, either as charters or later as scheduled service.

Also on August 22, *Flight International*, in its annual commercial airline survey, reports that Delta is the largest airline in the world in terms of actual passenger boardings and third largest in terms of RPKs.

A proposal to merge the pilot unions of the "Delta Connection" partners **Comair** and **Atlantic Southeast Airlines** with that of their Delta parent is rejected by the ALPA executive council in late August. Also in August, the last of eight daily roundtrips from Atlanta to Norfolk is upgraded to Next Generation B-737-832.

In ceremonies at the William J. Hughes Technical Center, operated by the FAA at Atlantic City, the company, on August 28, officially donates a retired L-1011 to the federal sky marshal program. Other agencies, such as the FBI, the Drug Enforcement Agency, and the DOT, will also conduct training exercises on the wide-body.

The next day, the company takes delivery at Seattle of its first B-767-432ER; its delivery flight to Atlanta occurs on August 30.

The "Delta Connection" CRJ200ER twice-daily return service between Atlanta and Manchester, New Hampshire, is taken over by the main line on September 1 and operated with MD-88s.

The head of the investment bank Lazard India reports on September 8 that Delta and **Air France** will make a joint bid for a 26% (later 40%) stake in **Air India, Ltd.** The anticipated sale process is to begin on September 11 by a formal invitation from the Indian government to potential bidders. Reuters, Ltd. confirms the tender on the opening bid day. In late February 2001, Delta and its partner will withdraw from the running.

Also on September 8, ALPA-represented pilots in Atlanta hold a rally noting that only one more year remains on their current contract. The flyers are looking for big raises in light of recent pilot gains at **United Airlines**.

On September 15, the carrier announces that it will launch daily non-stop roundtrips from Boston to London (LGW) beginning in June 2000, while on September 25, it begins to code-share on the **Air France** A310-304 service from Paris (CDG) to Nouakchott, Mauritania. Delta, on September 29, begins dual-designator service aboard **Air France** B-737-528s flying from Paris (CDG) to Moscow and St. Petersburg.

Also during September, an "e-Delta business unit" is formed under Senior Vice President Vince Caminiti.

Four-times-a-day B-737-200 "Delta Express" return service is launched on October 1 from New York (JFK) to Orlando. Also on October 1, B-767-432ER service begins from Atlanta to Fort Lauderdale, Miami, Orlando, and Tampa. Next Generation B-737-832 roundtrips are inaugurated daily between Atlanta and Leon, Mexico.

On October 2, B-727-232A roundtrips from Atlanta to Buffalo are increased from thrice daily to four times a day. The same day it is announced that the carrier's dual-designator agreement with **MALEV Hungarian Airlines** on the New York (JFK) to Budapest route will end on the following March 25. On October 3, a code-sharing agreement is signed with **El Al Israel Airlines, Ltd.**, also effective March 25. Under its terms, Delta will sell tickets for El Al's New York (JFK) to Tel Aviv service while El Al will place its code on Delta frequencies from New York (JFK) to Atlanta, Boston, Dallas (DFW), Denver, Phoenix, Salt Lake City, San Francisco, Seattle, and Washington, D.C.

During the first round of contract talks between management and the carrier's ALPA-represented pilots on October 13, the flyers oppose the use of 70-passenger aircraft, such as the Canadair CRJ700, which the "Delta Connection" partners **Comair** and **Atlantic Southeast Airlines** have on order for late 2001 delivery.

"Delta Shuttle" introduces the Next Generation B-737-832 on the Boston-New York (LGA) segment of its Northeast U.S. shuttle operation on October 18. The next day, the administration of the main line submits a plan to the Port Authority of New York and New Jersey for a \$1.6-million terminal expansion at JFK International Airport.

The *London Sunday Times* reports on October 22 that "Oneworld" partner **British Airways, Ltd. (2)** has begun talks with **Air France** and **Delta Air Lines** concerning its possible membership in their "SkyTeam" alliance. "Delta Shuttle" now inaugurates Next Generation B-737-832 hourly departures from New York (LGA), Boston, and Washington, D.C. (DCA).

The sixth B-767-432ER is delivered on October 24; the aircraft is also the 100th B-767 accepted by Delta, which is now the largest operator of the type in the world. The next day, the main line begins to transfer another 10 B-737-200s to "Delta Express"; when the last is turned over by September 2001, the Express fleet will be operating 52 Dash-200 "Baby Boeings."

On October 27, Delta files an application with the DOT seeking its approval to begin code-sharing flights with **CSA Czech Airlines** on March 25.

The code-sharing arrangement begins with **Air Canada, Ltd.** on October 29; the two share designators on each other's transborder flights from Canadian points to the U.S. hubs at Atlanta, Cincinnati, Dallas (DFW), and Salt Lake City. The same day, Delta also places its "DL" code on **Air France** flights between Paris (CDG) and Budapest, Abu Dhabi, and Dubai.

Also during October, the company's 9,900 ramp workers, for the second time in 2000, reject union representation. Working with Softnet Systems subsidiary Aerozone, the airline and **United Airlines** both begin to offer customers wireless Internet access in their airport lounges and gate areas.

Daily B-767-332ER return service is inaugurated on November 1 from Atlanta to Santiago de Chile, while B-757-232s begin flying daily roundtrips from Atlanta to Los Cabos, Mexico. The same day, "Delta Express" frequencies between Albany and Orlando end, even as Timothy W. Mapes becomes the "Delta Express" managing director. On the first day of the month, Tampa also receives new return service. From New York (JFK), the main line inaugurates twice-daily MD-88 trips, while "Delta Express" begins twice-daily B-737-200 flights from New York (LGA).

"Delta Shuttle," also on the first day of the month, offers itself as replacement on the eight daily return services operated by both the main line and "Delta Connection" on the Boston to Washington (DCA) route. One new B-727-232A roundtrip is added, along with three B-727-232A frequencies that replace the three earlier flown by **Comair** with CRJ100ERs, for a new total of nine daily roundtrips. All of these flights will be operated with Next Generation B-737-832s come January 1.

On November 2, twice-daily B-737-200 "Delta Express" frequencies are initiated from Washington, D.C. (DCA) to Fort Lauderdale. On November 6, twice-daily B-737-200 "Delta Express" roundtrips are begun from Boston to West Palm Beach.

On November 17, both company and ALPA negotiators ask for federal mediation and seek a 90-day timeline to complete their talks by February 17. If a proffer of arbitration is declined and both sides are released by the National Mediation Board, a 30-day cooling off period would ensue, followed by a possible pilots' strike as early as April 1.

A number of delays and other problems are experienced over the November 22-27 Thanksgiving holiday period as a number of pilots, frustrated with lack of progress in contract negotiations, refuse to fly extra overtime.

The number of daily MD-88 frequencies from Cincinnati to Tampa is increased on December 1 from four to five. Also on December 1, daily

B-757-232 return service is launched from Cincinnati to San Juan. The company also begins to code-share on **South African Airways (Pty.), Ltd.** services from Johannesburg to Dar es Salaam.

Frustrated pilots, seeking a contract as generous as that won by their colleagues at **United Airlines**, refuse to fly overtime on the weekend of December 2–3, forcing Delta to cancel 300 flights.

As the result of a spring law allowing an increase in traffic, New York (LGA) has, by early December, added more than 200 new daily flights and requests have been made that will increase the daily total by almost 600. In an effort to handle an increase that is certain to exacerbate existing delays and congestion, the FAA and the Port Authority of New York and New Jersey begin coordinating planning while imposing a September moratorium on new La Guardia flights. On December 4, the FAA holds an action to distribute the available takeoff and landing slots. Each carrier serving the airport draws a certain number, with each then choosing lots for first choice of times for those slots. "Delta Connection," including both **Atlantic Southeast Airlines** and **Comair**, receives 20 of the new positions. In a supplemental auction for the slots previously assigned to defunct **Legend Airlines**, "Delta Connection" receives two more.

Daily B-757-232 roundtrips are launched, also on December 4, from Atlanta to Bogota, Colombia. The next day, the carrier appeals to the U.S. District Court in Atlanta for a temporary restraining order against ALPA and seeks an emergency injunction to force its pilots to accept additional overtime. The airline believes that its flyers, in a concerted effort to avoid extra hours in order to gain leverage in contract talks, are causing it to cancel hundreds of flights, including 300 on this date alone.

The Boston to West Palm Beach "Delta Express" service becomes thrice daily on December 6, the same day a third roundtrip is added to the "Delta Express" route from Newark to Fort Lauderdale.

In Los Angeles Superior Court on December 8, Edward Forrest Ingram is charged with three counts of grand theft and one count of receiving stolen property. Before his apprehension, the 43-year old Venice, California, resident would allegedly dress in a Delta captain's uniform and travel to Los Angeles (LAX). There he would casually pick up the most expensive-looking pieces of baggage and walk out past baggage checkers without being stopped. At home, he would sell the contents on eBay, the Internet auction site.

Also on December 8, an MD-90-30 blows three tires while landing at Santa Ana–Orange County Airport; although no injuries are reported in the rough put down, the plane blocks the runway for 4 hours, causing 33 other flights to be diverted to other airports. Delta is the only major U.S. airline operator of this aircraft type.

On December 12, **Aeromexico (2) (Aerovias de Mexico, S.A. de C.V.)** begins to place its code on Delta's daily return service from Los Angeles to Tokyo (NRT). The Mexican carrier feeds passengers onto the Los Angeles (LAX) service from Guadalajara, Leon, Mexico City, and Puerto Vallarta.

On December 13, the court rejects the application for a temporary restraining order; Delta appeals the ruling.

Thrice-weekly B-767-332ER roundtrips commence on December 14 from Atlanta to Rio de Janeiro. Seasonal daily B-757-232 return service, which will be operated through April 30, begin on December 15, from Atlanta to Montego Bay.

Also on December 15, the company begins to sell shared-code tickets on **Air France** flights from Paris (CDG) to Cairo, as well as on **Air France** A320-211 service from Paris (CDG) to Istanbul.

The eruption of the Popocatepetl Volcano 40 mi. NW of Mexico City on December 20 forces the carrier to cancel all of its flights into the Mexican capital. The airport at Puebla is closed due to the fear of mudslides. The last of 12 B-767-432ERs delivered since August is accepted, also on December 20.

Seasonal daily B-757-232 roundtrips, to be flown through March 1, begin on December 22 from Atlanta to Vail, Colorado. Beginning on December 28, Delta places its code on **Air France** B-737-528 services from Paris (CDG) to Bucharest.

The next day, Delta announces that it will launch a second daily non-stop B-777-232ER return service from Atlanta to Paris (CDG) on January 26.

At the end of the year, the company announces that it will cut its first quarter flight schedule by 3% because of ongoing pilot shortages, which are seen by the airline as an attempt to force it to sign a new contract favorable to the flyers. Also, arrangements are completed under which SAirGroup will sell its 4.6% stake in Delta for an unspecified amount to an unnamed buyer so that it can concentrate on its growing relationship with **American Airlines**.

The anticipated retirement of the last L-1011-385-3 TriStar 500 is put off until January 8, when it will operate flight 1886 from Los Angeles to Atlanta.

Enplanements during the 12-month period total 120 million. A total of 2.5 million tickets are sold online during the year (5% of total sales), generating \$775 million in revenues. Overall operating revenues for the year rise 12.5% to \$16.74 billion, while expenses grow 11.3% to \$15.1 billion. Operating gain climbs 24.2% to \$1.64 billion, but net gain drops 32% to \$815 million.

DELTA AIR REGIONALFLUGVERKKEHR, GmbH.: Germany (1974–1992). This regional carrier is formed in April 1974 as a subsidiary of **Pleuger Flugdienst GmbH.** to operate commuter services on behalf of the Lake Constance Chamber of Commerce. Revenue services, employing a Piper PA-31T Cheyenne, begin on a triangle-shaped route in and out of the Friederichshafen area and middle Schussen Valley, Friederichshafen (Lowenthal Airport) to Stuttgart and Zurich on April 2. Subsidies are provided for the scheduled services, which are separated from Pleuger's charter operation.

Having determined in March 1978 to run an airline, Alfred Schlopp, chairman of Stuttgart-based Schlopp & Co., names Wolfgang Bierbach as general manager and, together, the two approach Pueger Flugdienst, which, after four years of financial losses on its scheduled service, is looking for relief. On April 1, Pueger Flugdienst sells its commuter airline to Schlopp & Co., which already has the Cheyenne based at Friederichshafen for the operation of business charters.

A workforce of 18 is recruited and for a month, while equipment is being obtained, replacement service is offered on behalf of the new entrant by Hamburg-based **Hadag Air (Hafendampfschiffahrts Actien, GmbH.)**. A second Cheyenne, a Beech King Air, and an ex-**Gronlandsfly, A.S./Greenlandair, A.S.** de Havilland Canada DHC-6-200 launch scheduled flights in May.

A former **Crossair, Ltd.** Fairchild Metro II is added to the fleet and, in cooperation with that Swiss regional, a route is opened from Zurich to Bremen in 1979; enplanements reach 14,754.

Boardings fall to 12,681 in 1980, due to scheduling problems caused by Switzerland's failure to adopt Summer Time, thereby causing connecting times to Zurich to deteriorate.

When the time change is adopted in 1981, bookings rise to 13,496.

Due to the ripple effect of the world's economic woes, enplanements drop to 11,800 in 1982 and the parent takes financial losses. **Crossair, Ltd.** takes a 25% interest.

In 1983, Schlopp & Co. sells its commuter operation to Munich-based Bayern Druck und Verlag, GmbH. and the airline transfers its headquarters to Friederichshafen. Another Metro II is purchased that year and a Dornier 228-100 is leased from its manufacturer, while an improved version is placed on order. A significant rise in passenger traffic is seen, up to 18,173.

Routes are extended twice daily to Stuttgart, Basel, and Geneva and a virtually private route is started from Friederichshafen to Munich (Oberpfaffenhofen Airport, owned by Dornier) in 1984. The latter service is introduced on behalf of such industrial concerns as Dornier, MTU, and Siemens, although noncompany travelers are welcomed. A Dornier 228-212, delivered at the Farnborough Air Show, replaces the leased Dash-100.

Passenger boardings soar to 33,670.

Due to low traffic, the Stuttgart to Basel service is suspended in **1985**; however, bookings still rise to 46,644. During the year, the carrier becomes a GmbH. limited company and **Crossair, Ltd.** takes additional shareholding.

In **1986**, frequencies of certain flights are increased and replacement service is inaugurated on behalf of **Swissair, A.G.** from Augsburg to Zurich. Managing Director Bierbach and his staff plan for the acquisition of two SAAB 340As, the first of which is received in November. Scheduled replacement services are now offered on behalf of **Deutsche Lufthansa, A.G.** to Bremen, Friedrichshafen, Geneva, Munich, Stuttgart, and Zurich. The employee population reaches 30.

Operations continue apace in **1987** and, in May, Delta is given scheduled airline status. To finance further expansion, capitalization is increased from DM 8 million (\$5.7 million) to DM 20 million (\$14.3 million), with the **Crossair, Ltd.** stake rising to 40%.

The Metros are withdrawn in **1988** as a new Frankfurt to Friedrichshafen service is initiated during the summer.

The Dornier is withdrawn in **1989** as two additional SAAB-340As are acquired.

Enplanements reach 140,302. Company employment grows by 6.2% in **1990** to 139. Three additional 340As are delivered, allowing Lufthansa replacement service to be opened to Cologne.

In October and November, in cooperation with the Italian regional **Avianova, S.p.A.**, five-times-per-week service is inaugurated between Stuttgart and Florence.

Passenger boardings jump 31.2% to 183,890 and revenues increase by 25.4% to \$25.1 million.

Two more SAAB-340s arrive in **1991**. In December, orders are placed for five SAAB 2000s.

Passenger boardings this year increase 49% to 275,000 and revenues reach \$37.6 million.

Early in **1992**, the carrier loses a profitable replacement contract with **Deutsche Lufthansa, A.G.**, an action that forces the company to idle four of its nine SAABs. Discussions are held with **Crossair, Ltd.** on the possibility of its taking a larger interest; however, the talks fail when the regional's parent, **Swissair, A.G.**, indicates its lack of interest in German expansion. Salvation will come from across the English Channel.

In order to maintain its access to the German domestic scene, due to expire this year with termination of the German internal service begun under a 1945 grant from the Allies, **British Airways, Ltd. (2)** is warmly receptive of an approach from Delta's Managing Director Bierbach. On March 29, the U.K. major purchases 49% shareholding in the airline, including the 40% original interest acquired from the Swiss founder **Crossair, Ltd.**, with an option to acquire all shareholding following full European deregulation on April 1, 1997. In accordance with German law, three German banks take 51% majority interest in the joint venture: Commerzbank, 19%, and Berliner Bank and Bayerische Vereinsbank, 16% each. Delta is renamed **Deutsche BA Luftfahrtgesellschaft, GmbH** on May 5.

DELTA AIR SERVICE: Emmonak Airstrip, Emmonak, Alaska, United States; Year Founded 1979. DAS is established by Mark Hiekel at Emmonak, Alaska, in **1979** to provide nonscheduled passenger and cargo flights linking the company's base with Sheldons Point and Kotik.

The carrier, flying primarily Cessna and Piper lightplanes, functions as a feeder affiliate of **Wien Air Alaska** in **1980-1984**, but continues on its own during the decade thereafter. Part 135 charters continue into the early **1990s**.

DELTA AIR TRANSPORT, N.V. (DAT): Antwerp Airport, P.O. Box 4, Deurne, Antwerp, B-2100, Belgium; Phone 32 (3) 285-1811; Fax 32 (3) 285-7615; Code SN; Year Founded 1966. Compagnie Maritime Belge, a property developer, forms Delta Air at Antwerp Airport in **1966** to offer passenger and cargo charters and air taxi services throughout the country. Revenue flights commence with Douglas DC-3s. A DC-6 is

added in **1971**, followed by two more in **1972**. An ex-**United Airlines** Boeing 720-022 is operated between May **1974** and November 1975. Within eight years, the operation is all but bankrupt.

In July **1975** the FBO Sotramat, S.A., acquires a 66.6% majority interest; Sabena Belgian World Airlines, S.A., purchase the remaining shares.

L. Feron is named president, but in early **1976** the new owners propose their subsidiary's liquidation. Having watched developments from Antwerp, where he is managing director of a flying school, Anthony "Tony" Vangrieken persuades the owners to name him managing director and to give him six months to reorganize the airline before they close it.

Beginning in July, President Feron and Managing Director Vangrieken solve management difficulties, cut staff, and win new charter contracts, making the airline profitable by fall. In the process, Delta's two Douglas DC-6Bs, five Convair CV-440s, and single Boeing 720 undertake scheduled replacement services, on behalf of **KLM (Royal Dutch Airlines, N.V.)** and **Sabena Belgian World Airlines, A.S.**, linking Brussels and Antwerp with Amsterdam and Dusseldorf. Charter flights continue to be offered.

Early in **1977**, the decision is taken to revise the fleet. The earlier aircraft begin orderly removal and are replaced by four Fairchild Hiller FH-227s, previously owned by **Ozark Airlines**. These begin scheduled replacement services in April and July, respectively. Meanwhile, four (later five) CV-440s are sold to **American Airlines** in the spring for use by that U.S. major's subsidiary, **American Inter-Island**, on routes between St. Thomas and St. Croix.

Replacement flights are continued throughout the remainder of the decade and into the **1980s**. By **1981**, the last Douglas has been replaced by another FH-227 and replacement service contracts are signed with **Air France** and **Deutsche Lufthansa, A.G.**

Ownership changes as 79% majority interest is taken by **Sabena Belgian World Airlines, S.A.** in **1986** and orders are placed for two Embraer EMB-120 Brasiliats. The company is now also known as **DAT Belgian Regional Airline, S.A.**

In **1987-1988**, a Fokker F.28-3000 jetliner is acquired and flights begin to London (LHR) and Zurich. Orders are placed for 10 Embraer EMB-120 Brasiliats in mid-1987 and two are received during March and April of 1988.

Two additional EMB-120s are received in **1989**. All four are employed in support of its parent on routes from Brussels to Lyon, Marseilles, Toulouse, and Bordeaux.

Managing Director Vangrieken's fleet is altered in **1990**; gone are the FH-227s, replaced by an F.28-4000, an Embraer EMB-120 Brasilia, and four British Aerospace BAe-146-200s. Operations are divided into southern and northern Belgium as Sabena elects to form a new subsidiary, **DAT Wallonie, S.A.**, to serve the nation's French-speaking southern half.

Delta acquires 16% interest in the new regional.

The route network is now significantly enlarged with the introduction of service to Leeds, Newcastle, Manchester, Bristol, Edinburgh, Glasgow, Dusseldorf, Stuttgart, Hanover, Munich, Turin, Naples, Florence, Venice, Bordeaux, Marseilles, Lyon, Porto, Oslo, Stockholm, Helsinki, Bilbao, Prague, and Luxembourg.

Enplanements total 140,250.

Vangrieken becomes chairman/managing director in **1991** and adds two more 146-200s and eight Brasiliats. The increased number of 146s results in a strike by DAT pilots for higher wages. While the job action continues, the aircraft are operated with pilots seconded over under contract from the manufacturer. As part of the settlement, it is agreed that these and all future 146s will be operated in **Sabena Belgian World Airlines, N.V.** colors and paid at the same rate as Sabena's main line pilots.

Enplanements total 517,149 and with income higher than expenses, profits are earned: \$18.37 million (operating) and \$686,001 (net).

Airline employment is increased by 23.5% in **1992** to 362 and the fleet comprises 7 BAe 146-200s (2 of which are leased to **Air U.K.**,

Ltd.), 9 Brasílias, and 1 each F.28-3000 and F.28-4000. The 10th and final Brasília from the 1987 order is received in May.

Passenger boardings increase 25.1% to 690,452, but freight plunges 45.4% to 148.83 million FTKs. Revenues ascend 10.7% to \$66.93 million and expenses decline 11.4% to \$50.12 million. The operating profit is \$16.8 million and net gain totals \$581,955.

The workforce is increased by 16% in 1993 to 420 and the fleet is increased by a second F.28-4000 and a 10th EMB-120. Destinations now visited from Brussels include Amsterdam, Basel, Berlin, Bristol, Hanover, Leeds, Newcastle, London, Dusseldorf, Hamburg, Marseilles, Stuttgart, Florence, Turin, Munich, Zurich, Lyon, Edinburgh, Glasgow, Bilbao, Lyon, Porto, and Bordeaux.

Customer bookings advance 22% to 842,493 while cargo climbs 7.1% to 159.4 million FTKs. Revenues increase by 11.4% to \$72.39 million while expenses are up 18.3% to \$57.59 million. The operating surplus is down to \$14.8 million while a \$49,558 loss is taken.

The fleet in 1994 is reduced by one BAe 146-200, which is leased to **Air U.K., Ltd.** A third F.28-4000 is placed into service, replacing the F.28-3000.

Passenger boardings are ahead by 8.5% to 922,600. The operating profit is \$15.48 million while the net gain of \$1.26 million is recorded.

Airline employment grows 24.7% in 1995 to 546. Following intense competition between the Fokker 70 and Avro RJ85, **Sabena Belgian World Airlines, S.A.**, during the first week of September, places an order for 23 of the latter type. The jetliners will be operated by DAT following delivery of the first four units in November and December.

Enplanements increase 46.6% to 1,346,531. Although revenues shoot up 29% to \$109 million, costs outpace them, jumping 41.1% to \$97.43 million. Thus the operating gain dips to \$11.59 million and only a \$205,333 net profit can be reported.

The Avro RJ85 delivery rate continues at the rate of one per month throughout 1996. Orders are placed for the larger RJ100s.

Enplanements for the year total 1.51 million.

By the end of 1997, the workforce has grown to 608 and the company is one of the world's largest Avro operators, with 14 RJ85s, plus 6 RJ100s and 6 BAe 146-200s. Traffic information is not available.

At the beginning of 1998, Chairman P. Reutlinger and Director General Willy Buysse oversee the flights of 14 RJ85s, 7 RJ100s, and 8 BAe 146-200s.

To help celebrate the seventy-fifth anniversary of parent **Sabena Belgian World Airlines, S.A.**, an RJ100 arrives during the spring wearing a multicolored ribbon livery made up from Sabena's "S" logo. It also wears seventy-fifth anniversary stickers on its engine nacelles.

Flight continue in 1999. The last of 12 RJ100s is delivered on November 3. All of them, together with the remaining 146s and RJ85s, are leased to DAT from Sabena, on whose behalf they are operated. When Sabena introduces a new livery during the year, the DAT fleet is repainted as well.

DENIM AIR, B.V.: Luchthavenweg 15d, Eindhoven, 5657EA, The Netherlands; Phone 31 (40) 251-7013; Fax 31 (40) 251-1638; <http://www.denimair.nl>; Code 2D; Year Founded 1996. Denim Air is established by Capt. Hamid Kerbous at Eindhoven in early April 1996, with the equity stake shared with a major local bank. Two Fokker 50s are

leased and thrice-daily roundtrips are inaugurated to London (LCY). Traffic and financial figures are not released.

Early in the first quarter of 1997, L. P. Jansson joins the carrier as a consultant. The Eindhoven-London service is shut down in March, not only because of heavy competition, but because The Netherlands government wishes Denim's aircraft reequipped with GPWS equipment.

At Jansson's suggestion, the company now changes its focus and begins to emphasize aircraft, crew, management, and insurance (ACMI) wet-lease charter contract operations. A complete infrastructure is established, including an in-house maintenance organization and flight training department. Six additional Fokker 50s are ordered for delivery during the following two years.

In April 1998, Denim becomes a fully approved JAR OPS 1 operator. Four Fokker 50s now join the fleet and charters are inaugurated to numerous Continental destinations. Additional plans are made for expansion and, at the end of the year, a homepage is opened on the Internet's World Wide Web.

In January 1999, founder Kerbous and consultant Jansson switch positions. Shortly thereafter, the Spanish regional **Air Nostrum, S.A.** purchases 100% shareholding to become Denim's new parent. The last two Fokker 50s of the 1997 order are received, as six more are requested.

The carrier confirms on February 18, 2000, that it will add two Fokker 50s to its fleet. The following month, **Air Nostrum, S.A.** places a new order with Bombardier Canada to replace its own fleet elements, as well as those of Denim Air. Among the 44 aircraft to be delivered in future years are 15 Canadair CRJ200s and 29 de Havilland Canada DHC 8-Q300 turboprops.

By fall, Denim is operating 14 ACMI Fokkers, with four more to be commissioned by the end of the year. In December, airline employment stands at 150, excluding cabin crews.

DENVER PORTS OF CALL. See **PORTS OF CALL**

DERAYA AIR TAXI: Terminal Building, 1/F, Room 150/HT, Halim Perdanakusuma Airport, Jakarta, 13610; Phone 62 (21) 809-3627; Fax 62 (21) 809-5770; Code DRY; Year Founded 1990. DAT is formed at Jakarta's Halim Perdanakusuma Airport in 1990 to operate a flying school and provide both charter and scheduled flights. Ms. Siti Rahayu Sumadi is president with Capt. Budhi Wisuhutomo as general manager. The initial fleet comprises 1 British Aerospace BAe 125-B3, 2 Cessna 402s, 2 Shorts SC-7 Skyvans, 1 Piper PA-23 Aztec, and 3 IPTN (CASA) NC-212-100 Aviocars. Revenue flights to island destinations throughout the nation commence in late summer.

The fleet in 1991 is increased by the addition of a third Skyvan, a Piper PA-31T Cheyenne II, and a Bell 206B JetRanger helicopter.

Another 402 arrives in 1992. Orders are placed for 10 Airtech CN-235s. In 1993-1994, one of the Skyvans is placed in storage.

Flights continue in 1995-1998, during which years a fifth 402 is acquired. Markets in the outlying areas of the nation continue to be served. Airline employment stands at 150 at the beginning of 1999.

DERBY AIRWAYS, LTD.: United States (1938-1964). Derby Air Schools, Ltd. is formed in October 1938 by N. Roy Harben and E. W. Phillips at a grass field at Burnaston, in Derby, which later becomes Derby Municipal Airport and, much later, site of the Toyota U.K. production plant. The company is established to provide charters, aerial instruction, and serve as an FBO.

Having resumed postwar service as a flying school in 1945, the company is reformed in 1946 into the holding company **Derby Aviation, Ltd.** Following the death of Capt. Harben on February 14, 1947, former RAF Group Capt. C. A. B. Wilcock becomes chairman and Derby begins flying lightplane charters on August 21, beginning with a Miles Messenger I roundtrip from Derby to the Isle of Man.

On February 16, 1948, the subsidiary flying operation is registered as an airline under the Derby Aviation, Ltd. name. A de Havilland DH-89A Dragon Rapide is purchased from Kenning Aviation, Ltd. in June.

Local Dragon Rapide and Miles M.57 Aerovan 4 nonscheduled cargo and personnel flights are launched on February 16, 1949. On June 29, affiliated Wolverhampton Flying School is reformed as the subsidiary **Wolverhampton Aviation, Ltd.** During this summer and the next three, ad hoc flights are made by Wolverhampton in the Midlands locale while Derby Aviation concentrates on ground business.

Wolverhampton's DH-89A is lost at Lympe in a crash on March 6, 1950. A replacement Dragon Rapide is acquired from **Inner City Air Services, Ltd.** in August.

The Aerovan is replaced by another DH-89A in June 1951.

During 1952, the staff totals 50, the fleet includes 2 Dragon Rapides and several single-engine planes; 46,000 revenue miles are flown.

Early in 1953, Derby Aviation is granted scheduled authority for flights to Jersey and, in June, another Dragon Rapide is obtained, from **Hunting Air Surveys, Ltd.** Scheduled DH-89A flights from Derby and Wolverhampton via Birmingham to the island are launched on July 18. When the season ends on September 30, passenger boardings total 1,227.

Another Dragon Rapide is purchased in June 1954 and the route network is enhanced. Frequencies are extended to Guernsey and Jersey from Birmingham, Derby, Nottingham, and Wolverhampton.

After the summer season and the final closure of the Volunteer Reserve air training schools, Derby Aviation merges with Wolverhampton Aviation and continues business under the former name.

A DH-89A is sold in February 1955 and the amalgamated carrier's first Douglas DC-3 is delivered on April 18; christened *Dove Dale*, it is placed in service on May 6 to Jersey from Birmingham and Burnaston. Between May 31 and June 15, the new Douglas transport is employed to operate newspaper flights to Exeter and Cardiff during a rail strike.

In July, an Avro 652 Anson I is acquired to undertake survey work throughout the Midlands on behalf of a new survey division. In October, two Miles M.60 Marathons are purchased from **West African Airways Corporation** and named *Millers Dale* and *Monsal Dale*.

The new aircraft enter service in the spring of 1956 on routes to Jersey, Glasgow, the Isle of Man and, beginning on May 7, to Ostend via Birmingham. In June, a C-47 (formerly the personal transport of Field Marshal Bernard Law Montgomery) is purchased from the RAF; converted to DC-3 civil standard, it is named *Darley Dale*. At the close of the summer season, the Wolverhampton and Nottingham services are halted.

In November and December, the carrier's two Douglas transports participate in the Austria-Britain airlift of refugees from the Hungarian Revolution, bringing out 600 people in 18 roundtrips.

On December 11, the *Dove Dale* is dispatched to Malta to assist in the return of troops following the Suez debacle.

At the end of the year, three of the four Dragon Rapides are withdrawn, leaving the survivor and the Marathons to fly scheduled services while the DC-3s undertake charters.

During 1957, the aerial survey division set up in 1955 is upgraded and renamed Derby Aero Survey. Equipped with two Ansons, the subsidiary is moved to Elstree.

In March, the last Dragon Rapide is sold and, on March 22, Glasgow becomes a destination.

The first DC-3 inclusive-tour service is initiated on May 18 from Birmingham to Palma on behalf of the Midland Air Tour Operators. The Wolverhampton-Jersey service is discontinued.

A third DC-3 is acquired, from **Transair, Ltd.**, in May 1958. Christened *Derwent Dale*, it joins the other two in providing summer inclusive-tour services to such destinations as Majorca, Italy, Switzerland, France, and Italy. Weekend DC-3 ski charters to Munich are introduced. Meanwhile, scheduled frequencies are undertaken from Derby to Antwerp via Birmingham and from Derby to the Isle of Man, Glasgow, Ostend, and Glasgow.

A third Miles Marathon, purchased from the RAF, rebuilt, and christened *Monsal Dale*, is delivered in June and joins its predecessors in initiating Jersey flights from Oxford and Northampton on July 7.

Derby Aero Survey receives another Anson I in August. During the summer, the company offers pilgrims eight-day tours to Lourdes to participate in celebrations surrounding the centennial.

On March 12, 1959, Derby Aviation is reregistered as **Derby Airways, Ltd.**

In April, two additional DC-3s are acquired from **Cambrian Airways, Ltd.** and christened *Fern Dale* and *Peak Dale*. Marathons begin flying from the Channel Islands to Staverton in May. On the 29th of that month, a feeder arrangement is signed with **KLM (Royal Dutch Airlines, N.V.)** allowing the British carrier to coordinate its Derby to Glasgow service with the departure of the Dutch line's DC-7C service from Prestwick to New York.

The scheduled network is expanded during the summer; new stops include Birmingham, Cambridge, London (CTN), and Oxford. The number of inclusive-tours increases significantly and are flown to such markets as Paris, Amsterdam, Copenhagen, Le Mans; cargo flights reach as far as Karachi.

On the first occasion in which a British independent airline flies into an Iron Curtain country, a DC-3, on August 11, flies members of the Esperanto Speaking Union to Warsaw via Helsinki.

During the year, chief hostess Hilary Laverick-Steeple sets up a stewardess school.

Enplanements for the year total 16,200.

In February 1960, a sixth DC-3, acquired from **Hunting Clan African Airways, Ltd.**, is delivered and named *High Dale*.

Employing nonunion and management pilots, the company, in March, flies the Glasgow and Liverpool roundtrips to Dublin on behalf of strike-bound **Aer Lingus Irish Airlines, Ltd.**

Early in the spring, DC-3s begin hauling Rolls Royce Avon turbojet engines from Castle Donington to Toulouse for installation on Sud-Est Caravelles. Before the contract is concluded, a total of 254 engines will be transported in over 100 freight flights.

An Anson is withdrawn in April. On May 28, DC-3 services are inaugurated Cardiff-Ostend; two days later, a route is started Cardiff-Bristol and Palma. Cardiff-Luxembourg via Bristol flights begin on June 5, followed by Cardiff-Perpignan operations on June 10. In October and December, all three of the Miles Marathons are withdrawn.

Enplanements for the year almost double, climbing to 32,015.

On behalf of **British European Airways Corporation (BEA)**, a six-month freight contract is flown, beginning on February 2, 1961, over a route from London (LHR) to Amsterdam.

In March, a seventh DC-3 is delivered and christened *Millers Dale*; it is followed in May by an eighth, the *Monsal Dale*.

Regularly scheduled services to Luxembourg commence on May 21 as inclusive-tour operations are resumed to the previous year's destinations. Meanwhile, in April and July, respectively, the Miles Marathons *Millers Dale* and *Monsal Dale* are withdrawn.

The millionth passenger (cumulative) is boarded on July 14.

The company's first fatal accident occurs on October 6-7 when the DC-3 *Fern Dale*, en route to Perpignan from London (LGW) with 3 crew and 31 passengers, crashes into Mount Canigou in the eastern Pyrenees; the wreck is discovered the next day.

Later in the month, three flyable former **British Overseas Airways Corporation (BOAC)** Canadair C4 Argonauts, including the Aurora and Avion, are purchased from the assets of the bankrupt aircraft broker Overseas Aviation, Ltd., along with three aircraft to be used for spare parts. Derby-Cork via Birmingham scheduled flights commence on December 22.

Chairman Wilcock dies suddenly on January 14, 1962; he is succeeded by Wing Commander Roxburgh.

Argonaut crew training begins on February 27 while the DC-3 *Darley Dale* launches scheduled Carlisle-Jersey frequencies on March 14, followed by Derby-Belfast roundtrips that start on April 18.

The first C-4 Argonaut begins revenue services in May with a scheduled flight Cardiff-Bristol-Palma. Argonaut inclusive tours are

undertaken to Italy, Spain, France, Austria, and the Canary Islands while the seven DC-3s maintain earlier scheduled and nonscheduled routes.

The last Anson is sold in December.

Thrice weekly Derby–Birmingham–Newcastle DC-3 scheduled service acquired from **Executive Air Transport, Ltd.** begins on April 2, 1963. Meanwhile, Derby–London (LGW) and Belfast flights are undertaken as is the Manchester–Newcastle route in association with **Mercury Airlines, Ltd.**

En route from Cardiff to Barcelona on April 5 with 59 passengers, a C-4 Argonaut loses two engines before departing the U.K. A safe emergency landing is completed at Bournemouth's Hurn Airport and no injuries are reported.

On May 1, a company C-4 Argonaut is the largest aircraft yet to land at Staverton Airport.

In what has proved to be a failure, the Carlisle to London (LGW) service launched on April 5 is withdrawn on May 8. During the spring, a new "Business Services" approach is taken on certain scheduled domestic routes.

Direct Swansea to Ostend DC-3 flights begin and the company finally gets around to opening an airline office in Derby on July 1.

Summer inclusive tours, flown by both DC-3s and C-4 Argonauts in their new livery, include these new destinations: Genoa, Klagenfurt, Alicante, Barcelona, Cork, Tarbes, and Venice. Derby–Belfast all-freight frequencies are flown during the winter months.

A sixth C-4 Argonaut is acquired from **Aden Airways, Ltd.**; painted in the new two-tone blue color scheme with a large "DA" on its tail, it enters service in December.

Company headquarters are moved to Donington Hall, Castle Donington, in April 1964. On May 1, all-cargo operations are started to Amsterdam from four English cities. In early summer, operations are transferred to the newly renovated East Midlands Airport.

On July 30 it is announced that the corporate identity is to be changed to **British Midland Airways, Ltd.**

On August 17, a C-4 Argonaut is sent to RAF Northolt where it is employed in the filming of the Dirk Bogard and Denholm Elliot motion picture *The High Bright Sun*.

Following a September 9 order for two Handley Page Heralds, the changeover to the new BMA name takes effect on October 1. As in 1963, there are fleet changes prior to re-registration.

DERBY AVIATION, LTD. See **DERBY AIRWAYS, LTD.**

DERULUFT. See **DEUTSCHE-RUSSISCHE LUFTVERKEHRS-GESELLSCHAFT, GmbH.**

DES MOINES FLYING SERVICE: United States (1960–1968). One of the first scheduled carriers to be based in Iowa, DMFS is set up at Des Moines early in the first quarter of 1960. Employing Piper lightplanes, the company inaugurates scheduled air taxi flights to local destinations on March 14.

These are maintained until the commuter goes out of business in 1968.

DESERT AIR SERVICE. See **DESERT AIRLINES (1)**

DESERT AIRLINES (1): United States (1979–1981). Desert Airlines is set up as a scheduled division of **Desert Air Service** at Mesa, Arizona, in the early fall of 1979. Employing a Piper PA-31-310 Navajo, the operator launches scheduled passenger and cargo flights on October 8 linking its base with Phoenix, Winslow, Gallup, and Flagstaff.

Flights continue until mid-1981.

DESERT AIRLINES (2): United States (1985). Hemet, California-based **Air Hornet** becomes the second Desert Airlines in early 1985 when it is reformed and renamed. Piper lightplane flights continue to Los Angeles, Bullhead City, and Lake Havasu City, but cannot be maintained beyond summer.

DESERT AIRWAYS BOTSWANA (PTY.), LTD.: Botswana (1973–1982). Formed in 1973 to provide feeder services for **Air Botswana (Pty.), Ltd.**, Desert Airways is originally known as **Esquire Airways (Botswana), Ltd.** Employing 1 Piper PA-23 Aztec and 2 Rockwell Commander 500s, the company provides scheduled services from Gaborone to Selebi-Pikwa and Maun and particularly Johannesburg. Additionally, charter flights are undertaken to various wildlife preserves and such destinations as Santawani Camp, Khwai River Lodge, and Savuti.

Unable to maintain economic viability, the carrier is forced to cease operations in 1982. Its assets are merged with another small operator, Delta Air (Pty.), Ltd. to form **Desert & Delta Air (Pty.), Ltd.**

DESERT & DELTA AIR (PTY.), LTD.: Botswana (1982–1996). The assets of bankrupt **Desert Airways Botswana (Pty.), Ltd.** are combined with those of the charter operator Delta Air (Pty.), Ltd. in 1982 to form this Maun-based nonscheduled carrier. D&D continues to provide game park flights, employing a Cessna 206, for the next 14 years.

DESERT COMMUTER AIRLINES: United States (1968–1978). During the first quarter of 1968, the owners of **Los Angeles Air Taxi** elect to establish a scheduled air transport division. Employing a Beech 18 and a de Havilland DH 104 Dove, the new unit inaugurates flights on April 1 linking the company's Santa Monica base with Palm Springs. Operations continue until 1970.

DESERT PACIFIC AIRLINES: United States (1979–1981). Desert Pacific Airlines is founded at Sedona, Arizona, and begins scheduled Piper PA-31 Navajo commuter flights late in 1979. Destinations visited include Flagstaff, Prescott, Phoenix, and San Diego. Services are maintained until suspended in February 1981, following the crash of the company aircraft.

DESERT PACIFIC AIRWAYS: United States (1979–1980). DPA is set up during the first quarter of 1979 to provide scheduled passenger and cargo flights linking the company's Oxnard, California, base with Los Angeles, Sacramento, and Las Vegas. Employing a pair of Piper PA-31-310 Navajos, the company launches revenue flights on April 15, maintaining them until it goes out of business on March 1, 1980.

DESERT SUN AIRLINES (1): United States (1982–1984). Desert Sun is founded at Long Beach in the summer of 1982. Sixty-one employees are hired and a fleet is assembled comprising 2 Beech 99s and 5 Piper PA-31-350 Navajo Chieftains. These are employed to initiate revenue flights from Blythe to Los Angeles via Riversdie on August 25. At year's end, a total of 1,000 passengers have been flown.

Service is inaugurated to Inyokern, Palmdale, and Lancaster in 1983 as bookings rise to 3,200. Although plans are made to expand to the Arizona communities of Havasu City and Bullhead City in the fall of 1984, these cannot be fulfilled because the company ceases operations in September.

DESERT SUN AIRLINES (2): United States (1995–1997). Established at Phoenix as a new **Mesa Air Group** division in 1995, Desert Sun, under the direction of President George Lippemeier, is equipped in April with a pair of Fokker 70 jetliners, the first to be flown by a North American carrier. As part of a code-sharing agreement with **America West Airlines**, the first machine begins "America West Express" service from its base to Des Moines on June 12.

With both aircraft available, daily frequencies link the Arizona base with Spokane beginning on July 10 and Des Moines with Las Vegas four times per week as of July 13. Fresno will join the Fokker network in August. Traffic figures are, like other Mesa subsidiaries, reported with those of the parent.

In early 1996, plans are made to return the two Dutch-made jetliners and replace them with up to eight Canadair RJ's. Seattle joins the route network.

Early in **1997**, **Mesa Air Group** is reorganized into four new divisions: "America West Express," Independent, "United Express," and "USAirways Express." The new arrangement also merges the marketing and customer-service departments of **Air Midwest** and **WestAir Commuter Airlines**. Desert Sun is absorbed into the new **America West Express** division.

DESTINAIR AIRLINES, LTD.: Canada (1993–1995). Destinair Airlines is established at Ottawa late in **1993** to provide nonscheduled passenger and cargo services to Canadian destinations. Operations commence in early **1994** with a single leased Boeing 727-200, but cease within a year.

DETA MOZAMBIQUE AIRLINES, S.A.: Mozambique (1936–1980). Early in **1937**, the Mozambique Railway Administration establishes an aerial section, **Divisao de Exploracao dos Transportes Aereos (DETA)** to carry out the company's previous air charter work on a scheduled basis. Once a fleet of two each de Havilland DH 87 Hornet Moths and DH 89 Dragon Rapides is assembled, airmail service is inaugurated on December 22 over a Lourenco Marques to Johannesburg route. Passenger flights follow shortly thereafter.

An agreement is signed in early **1938** with **Imperial Airways, Ltd.** whereby passengers flying into and within the Portuguese colony from Lourenco Marques will be carried by DETA.

An additional Hornet Moth is delivered in March, followed by two DH 89As in April, and the summer arrival of another DH 87, two more DH 89As, and three Junkers Ju-52/3ms. The "Iron Annies" are among the last propeller-driven trimotors to serve in any scheduled airline operation, not being retired until the mid-to-late **1950s**. Also during the summer, a Lourenco Marques to Quelimane route is started via Inhambane and Beira. In October, the Quelimane service is extended to Mozambique town and Porto Amelia.

Operations continue apace in **1939–1940** and, on June 2–3 of the latter year, three new Lockheed Model 14H Super Electras, including the last manufactured, are placed into service. Routes and frequencies are improved, but not significantly increased. Service is largely suspended during World War II.

In November **1946**, the suspended route from Lourenco Marques to Johannesburg is restarted under the leadership of new the general manager, Lt. Col. Pinho da Cunha.

At the beginning of **1947**, the Ju-52/3ms start a new service from Beira to Salisbury, Rhodesia. In February, flights are also launched to Durban and Madagascar.

The fleet is changed little during the end of the decade and into the early **1950s**; DH-89A Dragon Rapides replace the Hornet Moths and are in turn succeeded by six Douglas DC-3s, a de Havilland DH 104 Dove, and a de Havilland Canada DHC-2 Beaver.

Service is inaugurated during **1954** from Mozambique town and Vila Cabral via Nampula and three bush stops. The Nampula to Vila Cabral segment of this new route is dropped a couple of years later, but will be reinstated before decade's end as a destination on a new service from Beira with stops at Vila Pery, Tete, and Vila Coutinho. During these years, three more DH 104 Doves are added to the fleet. Three Fokker F.27-200 Friendships are ordered in July **1961** and begin to enter service in September **1962**. Service continues apace in **1963**.

Airline employment stands at 682 in **1964**. In cooperation with **Air Malawi, Ltd.**, a service is inaugurated from Blantyre to Beira. Air Malawi DC-3s operate the route on Saturdays and DETA flies it on Wednesdays.

Enplanements for the year total 58,000 and operating revenues of \$2.6 million are generated.

Nova Freixo joins the route network in **1965** as a stop on the Nampula to Vila Cabral run. Twice-daily flights commence in November between Lourenco Marques and Beira, where a new DC-3 maintenance base is opened.

Passenger boardings this year climb to 62,005.

Service is launched to Matasapa, Swaziland, in **1966** and the fleet now comprises 1 DHC-2 Beaver, 6 DC-3s, 1 DH-104 Dove, and 3 F.27-200s. In late **1967**, a third F.27-200 is ordered, as bookings for the year reach 90,749.

Airline employment is 811 in **1968** as Fernando A. Seares-Seixas becomes director general. Orders are placed for four Boeing 727-2B1Cs.

Passenger boardings climb 16.9% to 109,205 and operating revenues of \$4.91 million are earned.

During **1969–1977**, additional F.27-200s completely replace the DC-3s (which are converted to freighters) on domestic passenger services. The first of four Boeing 727-2B1Cs is received in 1970.

An F.27-200 with three crew crashes while on a training flight from Gago Coutinho on March 27, also in 1970; there are no survivors.

Substantial route expansion occurs following Mozambique independence in June 1975, particularly to neighboring African states.

In **1978**, Director General Antonio Oriente-Barone's company employs 2,078 workers. Three more B-727-2B1Cs have arrived in the years since the first.

Enplanements in **1979** are 284,686 and another Boeing jetliner is ordered. On June 14, **1980**, DETA is renamed **LAM (Linhae Aereae de Mocambique)**.

DETROIT-CLEVELAND AIRLINE. See **STOUT AIR SERVICES**

DETROIT NORTHERN AIRLINES: United States (1964–1975). DNA is set up by Robert C. Welch at Alpena, Michigan, in the early spring of **1964** as the scheduled air taxi division of Alpena Flying Services. Employing Piper and Cessna lightplanes and, later, a Beech 18 and Douglas DC-3, the company inaugurates daily roundtrip flights to Detroit on May 18.

Operations continue for until **1975**.

DEUTSCHE BA LUFTHARTGESELLSCHAFT, GmbH.: Wartungsallee 13, Flughafen Munchen, Munich, D-85356, Germany; Phone 49 (89) 975 91 500; Fax 49 (89) 975 91 503; http://www.deutsche-ba.de; Code DI; Year Founded 1992. Early in **1992**, **Delta Air Regionalflugverkehr, GmbH.** loses a profitable replacement contract with **Deutsche Lufthansa, A.G.**, an action that forces the company to idle four of its nine SAABs. Discussions are held with its chief investor, the Swiss regional **Crossair, Ltd.**, on the possibility of its taking a larger interest. However, the talks fail when the regional's parent, **Swissair, A.G.**, indicates its lack of interest in German expansion. Salvation will come from across the English Channel.

In order to maintain its access to the German domestic scene, due to expire this year with termination of the German internal service begun under a 1945 grant from the Allies, **British Airways, Ltd. (2)** is warmly receptive of an approach from Delta's Managing Director Wolfgang Bierbach. On March 29, the U.K. major purchases 49% shareholding in the airline, including the 40% original interest acquired from the Swiss founder **Crossair, Ltd.**, with an option to acquire all shareholding following full European deregulation on April 1, 1997. In accordance with German law, 51% majority interest in the joint venture is taken by three German banks: Commerzbank, 19%, and Berliner Bank and Bayerische Vereinsbank, 16% each. The company, headquartered at Friedrichshafen, is renamed Deutsche BA Luftfahrtgesellschaft, GmbH. on May 5.

Airline employment is 415 and the fleet comprises 3 Boeing 737-3L9s leased from **Maersk Air, A.S.**, a Dornier 228-212, and 9 SAAB 340s, the turboprops taken over from Delta and the jetliners assigned by British Airways. Orders are reconfirmed for five SAAB 2000s requested the previous December.

A comprehensive alliance is signed with the British flag carrier and, under terms of the pact, the subsidiary will cooperate with its parent on engineering, purchasing, and information technology. The two will also offer a joint frequent flyer program, and BA will act as the German airline's worldwide marketing and sales representative.

The first flights, made by the "Baby Boeings" painted in a new Deutsche BA livery, are made from Berlin to Stuttgart and Munich on June 29. Revenue operations in direct competition with **Deutsche Lufthansa, A.G.** begin on July 1.

In addition to maintaining the Delta regional network, flights are undertaken on the one-time German Internal Service route network. Destinations now served from Flughafen Friedrichshafen include Berlin, Brussels, Budapest, Bremen, Dusseldorf, Dresden, Ghent, Koln, Bonn, Hamburg, Lyon, Leipzig, Munster, Munich, Stuttgart, Zurich, Prague, and Osnabruck.

Four more B-737-3L9s are chartered from Maersk through the remainder of the year and, in late fall, charter service begins from Berlin to holiday locations in the Mediterranean. Unhappily, national disillusion with reunification brings a downturn in the Berlin's new market at year's end.

Enplanements this year total 690,000 and \$109 million in revenues are earned.

Airline employment stands at 486 in 1993 as the first of three ordered Fokker 100s is acquired. In January, service is inaugurated from Berlin's Tegel Airport to Moscow, Oslo, St. Petersburg, and Stockholm.

On March 10, an **Air France** B-747F delivers the company's SAAB 2000 flight simulator to the company hangar at Basel. It is unloaded and lowered through a floor to the company's subterranean training center.

Director Richard Heideker succeeds Wolfgang Bierbach (who remains a board member) as managing director and begins planning, during the summer, a closer union with the airline's U.K. sister, **BA Regional, Ltd.**

Excluding domestic services in Germany and flights to Eastern Europe, Deutsche BA takes its parent's code on all other European routes, beginning in November. Also, a night postal route, flown under contract with the German post office, is opened from Munich to Leipzig.

Passenger boardings for the year double to 1,550,872 and income totals \$155.25 million.

Airline employment is increased by 32.4% in 1994 to 630 and orders are reconfirmed for 5 delayed SAAB 2000s that will enter service in the spring of the following year, as two more Fokker 100s join the fleet.

In April, the main operating base and corporate headquarters begin transfer to the new Munich Flughafen. Fokker 100 flights begin from Frankfurt to Madrid and to Paris' Charles de Gaulle International Airport; plans are laid for the inauguration of service to Riga, Latvia, and Vilnius, Lithuania, in 1995.

An unconditional one-way fare is introduced on June 1 for passengers traveling in business- or economy-class seating from Berlin to Cologne, Bonn, Dusseldorf, Munich, and Stuttgart as well as between Dusseldorf and Stuttgart. Fares are 10% less than those of **Deutsche Lufthansa, A.G.**

To combat the success of the new British concern, the German flag carrier, **Deutsche Lufthansa, A.G.**, begins to fight back in July, introducing service by its "Lufthansa Express, GmbH." subsidiary over the five low-fare routes started by Deutsche BA the previous month. The move results in a highly publicized price war.

Customer bookings accelerate 63.6% to 1.8 million and revenues double to \$310.5 million.

The workforce grows another 15.9% in 1995, up to 730, and the owned fleet now includes 3 SAAB 340As. Also operated under charter are 7 SAAB 340As, 5 Fokker 100s leased from **TAT European Airlines, S.A.**, and 7 B-737-3L9s from **Maersk Air, A.S.**

The Munich headquarters transfer is completed early in the year's first week. Unable to obtain sufficient slots to maintain four daily roundtrips to Paris (CDG), a minimum considered necessary in the face of strong competition from **Air France** and **Deutsche Lufthansa, A.G.**, Deutsche BA ends its service to the French capital.

The first of five SAAB 2000s is delivered to the company at Berlin's Tegel Airport on March 20. It replaces a SAAB 340A service from that destination to Friedrichshafen, where the new type will hub. Daily Munich to London (LGW) B-737-319 service begins on March 26. At

month's end, the turboprop inaugurates flights from Friedrichshafen and Berlin to Riga and Vilnius. The nonstop return service to Latvia is offered four times a week and that to Lithuania twice.

Following the delivery of a second SAAB 2000, Deutsche BA in May begins thrice-daily nonstop roundtrips from Friedrichshafen via Zurich to Bremen. The third machine launches roundtrip nonstops in June from Friedrichshafen to Dusseldorf and Stuttgart. A fourth SAAB 2000 will honor weekend May-October charter commitments for vacation flights from Friedrichshafen to Ibiza, Mallorca, Corfu, Thessaloniki, and Naples.

During the summer and fall, five SAAB 340As are returned to their lessor.

When the main runway at Stuttgart Airport is closed for repairs during July 31-October 4, a BAe 146-200 is leased from **Crossair, Ltd.** with which to maintain frequencies to the cross-runway of the German airport.

The year's final service highlight is the introduction of daily Fokker 100 return service from Bremen and Munich to London (LGW) on October 29. The same day, **Deutsche Lufthansa, A.G.** scraps its "Lufthansa Express, GmbH." competition on the Deutsche BA domestic routes, electing instead to offer discounts on the routes it must contest and raise them on routes over which it holds a monopoly.

Enplanements swell 13.5% to 2,122,300 and revenues jump 8.4% to \$325.42 million.

A fifth SAAB 2000 arrives in early 1996 and on January 8, twice-daily flights commence from Berlin's Tegel Airport to Gatwick Airport at London.

USAir now becomes a code-sharing partner on flights from Munich to Cologne, Berlin (Tegel), Dusseldorf, and Hamburg. During the spring, the Riga route is increased from four to six flights per week; however, the Vilnius service is halted due to lack of traffic. Additional flights are also added on the schedules to St. Petersburg, Nice, Geneva, and Dresden.

On October 7, a memorandum of understanding, effective in November, is signed with **Regional Airlines, S.A.** for the sale of its international and domestic turboprop operations originating from Bremen, Stuttgart, and Friedrichshafen to the French company.

It is announced on October 17 that the **British Airways, Ltd. (2)** parent will revamp this struggling German subsidiary by reshuffling the management, changing fleet composition, and focusing on domestic flights at the expense of unprofitable international regional service.

On October 31, frequencies from Berlin to Oslo are halted, along with those from Munich to Paris and Madrid.

The arrangement with **Regional Airlines, S.A.** is concluded in November as Deutsche BA turns over its turboprop domestic and international operations originating from Bremen, Stuttgart, and Friedrichshafen. The BA subsidiary is now free to concentrate on its core 100-seat markets in Germany and Europe and to compete with **Deutsche Lufthansa, A.G.**; the move will have an impact on the company's balance sheet.

Two senior BA officials are now tasked to assist in implementation of the changes. Adrian Hunt, the commercial director for BA Engineering, is named operations director while the German area manager, Paul Giblin, becomes commercial director. Giblin is, in fact, the carrier's interim chief executive officer. He is assisted by Carl Michel, an assistant to Robert Ayling, BA's CEO.

By the end of the year, 900 flights are offered weekly to 27 cities in 12 countries.

Passenger boardings still manage to accelerate 10.8% to 2,352,000. Revenues increase 6% to DM 520 million. To some extent, as a result of the restructuring undertaken after the sale of its turboprop domestic and international operations, the carrier suffers a DM 59-million (U.S.\$34.3-million) loss.

Airline employment is increased by 9.6% in 1997 to 800. In keeping with its previous October pledge, BA begins to revamp its Munich-based subsidiary in January. It will be reported in the German press six

months later that only the arrangement by **British Airways, Ltd. (2)** of a DM 340-million interest-free credit line allows the carrier to refinance its debts and avert bankruptcy. Carl Michel succeeds interim director Giblin as permanent CEO.

Eight daily deep-discount roundtrips are inaugurated on January 20 from Munich to Hamburg and Cologne with nine **Maersk Air, A.S.** Boeing 737-3L9s. The number of frequencies is increased at the same time over all remaining German domestic routes as concentration is placed upon building up high-frequency domestic trunk routes. With a DM 60 return fare, the British-owned competitor quickly grabs 20% of the market share on the Hamburg-Munich route.

On February 14, the company offers German sweethearts a Valentine's Day gift of DM 99 return fares to any of its destinations in Germany. The promotion is an obvious attempt to lure passengers from the German flag carrier through price as well as quality.

Before the month is over, competing **Deutsche Lufthansa, A.G.** is issued a nonbinding warning from Germany's federal cartel office. The document suggests that the major may be guilty of overcharging on its near-monopoly of the Frankfurt-Berlin routes, charging upwards of 30% more from 16 cities to the former capital than on comparable routes in the remainder of Germany—where it faces Deutsche BA. The matter is turned over to the judicial system for resolution.

In March, the Federal Cartel Office orders **Deutsche Lufthansa, A.G.** to reduce its prices on the Frankfurt-Berlin route to a point consistent with fares on other domestic routes. The major refuses and indicates that it will maintain its current pricing while the ruling is contested in court.

At the end of March, a \$287-million order is placed with Boeing for seven more B-737-300s with which to replace the Fokker fleet. Meanwhile, the B-737-3L9s begin to appear in an "interim livery," which will be replaced after **British Airways, Ltd. (2)** unveils its new ethnic color schemes on June 10.

During the second quarter, the airline is able to field its own sales force; 12 locally recruited representatives replace BA sales personnel seconded to Germany. BA increases its stake in Deutsche BA from 49% to 65% on July 7 when it purchases the 16% shareholding of Munich-based Bayerische Vereinsbank, A.G. for an undisclosed sum.

By August 1, the carrier is operating 59 daily flights on 7 routes from Berlin and Munich and 9-times-per-day roundtrips from Berlin, Hamburg, and Munich to London (LGW).

The first new B-737-3L9, christened *Wolkenschreiber*, is delivered in August. In keeping with the parent's new "World Image" marketing and livery makeover, the new aircraft arrives wearing a blue-bottom and white-top fuselage, with the new "Speedmarque" on its side and a *Stern-taler* (Fairy Tale) tail design, created by German artist Antje Bruggemann. Plans are underway for a total of 18 of these aircraft in the fleet.

Having proven to be technically unreliable and prone to cause many flight delays, the last four of five wet-leased Fokker 100s are withdrawn in the fall and returned to **TAT European Airlines, S.A.** BA's European regional customer-services manager, Sabine Forest, is appointed DBA's director of customer services on October 1.

On November 24, the carrier directly challenges **Deutsche Lufthansa, A.G.** by introducing eight-times-daily roundtrips between Frankfurt and Munich. DLH responds by lowering its prices on the trunk route.

For use on German domestic routes, six more B-737-300s are ordered on December 2. Deliveries will begin during the first quarter of 1998 and continue through 1999.

Passenger boardings jump 19.1% to 2.8 million while operating revenues move up 6% to \$297 million.

The final Fokker 100 service is operated between Munich and London (LGW) on January 20, 1998, after which the machine is withdrawn and returned to its French owner.

When parent **British Airways, Ltd. (2)** enters into a strategic alliance with **Finnair O/Y** in February, the arrangement includes Deutsche BA.

The response of **Deutsche Lufthansa, A.G.** to the Deutsche BA invasion of the Munich-Frankfurt trunk route pays off in March when

Deutsche BA, which has failed in its bid to win additional slots at Frankfurt, elects to quit the highly competitive route after only five months. The last 35% stake in Deutsche BA is purchased in April, making the German airline a 100% wholly owned **British Airways, Ltd. (2)** subsidiary.

By May, Deutsche BA and **Finnair, O/Y** are, together, accounting for 64 weekly services to Helsinki from the German communities of Berlin, Dusseldorf, Frankfurt, Hamburg, Munich, and Stuttgart. Flights continue apace during the remainder of the year.

Passenger boardings accelerate 10.7% to 3.1 million.

Under terms of an agreement signed on March 8, 1999, the company begins to code-share with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)** over a route from Munich to Madrid on June 17.

On March 28, **Finnair O/Y's** twice-daily MD-87 return flights from Helsinki to Hamburg are replaced by B-737-3L9s operated by Deutsche BA. Also during the month, a B-737-3L9 is leased to **Debonair, Ltd.**, which employs the Boeing to increase capacity on its routes to Lisbon from London (CTN and LGW).

On June 14, arrangements are completed with Bouillon for the lease of three B-737-36Qs, which are scheduled for delivery before the end of the year.

In November, the company enters into a code-sharing agreement with the Italian start-up **Gandalf Airlines, S.p.A.** It also elects Adrian Hunt to be CEO.

Customer bookings leap upward 11.8% to 2,897,000. The B-737-300 fleet now includes 3 Dash-36Qs, 2 Dash-3L9s, and 13 Dash-31Ss.

The workforce at the beginning of 2000 totals 800.

Daily B-737-300 roundtrips are inaugurated on March 26 between Munich and Barcelona.

Following a 24-hour job action on August 31, company pilots threaten a longer strike in early September. The flyers seek enhanced wages and working conditions.

Beginning on September 29, the airline affixes BA codes, as well as its own "DI" code, to all of its flights.

Protesting that the move will allow the major to control 80% of Germany's domestic market, Deutsche BA Managing Director Adrian Hunt petitions the European Union and German antitrust authorities on October 3. Hunt seeks to have these bodies disallow the announced 24.9% share **Deutsche Lufthansa, A.G.** will take in **Eurowings Luftverkehr, A.G.** come January. When Deutsche BA issues a press release attacking the Lufthansa and Eurowings arrangement with what it considers to be "untruthful and disparaging" comments, DLH files suit in a Dusseldorf court seeking a temporary injunction against what it terms as a "smear campaign."

The BBC reports on October 17 that, in keeping with company-wide policy, all staff will now be tested for drug and alcohol abuse.

On October 24, the Dusseldorf court grants **Deutsche Lufthansa, A.G.** the restraining order it had sought against Deutsche BA, ruling that the British-owned regional had, in fact, breached Germany's strict laws on competitive advertising and public relations activities.

A British Aerospace BAe 146-200 is wet-leased from **WDL Aviation (Koln), GmbH.** on November 1 and is employed to offer scheduled frequencies from Koln to Munich, Dusseldorf, and Berlin (Tegel). Two more planes, also wearing Deutsche BA stickers, will follow.

Just after takeoff from Munich for Berlin on November 10, a B-737-31S is forced to return because it is unable to raise its landing gear. On the ground, maintenance workers find a 27-year-old Romanian asylum seeker in the wheel well, unconscious and suffering from hypothermia.

Deutsche BA and **Emirates Airlines** sign and begin a code-sharing pact on December 15. The German line is able to sell tickets for the Mideast carrier's return services from Dubai to Munich, while Emirates is able to place its designator on Deutsche BA flights from Munich to Berlin, Cologne, and Dusseldorf.

Company officials will be pleased when Germany's federal cartel office announces on March 7 that it will block **Deutsche Lufthansa, A.G.** plans to take a 24.9% stake in **Eurowings Luftverkehr, A.G.**

DEUTSCHE FLUGDIENST, GmbH.: Germany (1955–1961). Equipped with three Vickers Vikings, the charter carrier **Deutsche Flugdienst GmbH.** is formed at Hamburg by Norddeutscher Lloyd, Hamburg-Amerika Line, the German National Railways, and **Deutsche Lufthansa, A.G.** on December 12, 1955. The first Viking charter is flown to Palma de Mallorca on March 29, 1956; later, the three Vickers Vikings transport pilgrims to the Holy Land. Additional destinations are developed in 1957–1959 and two leased Convair CV-240s are added to the fleet.

One of the chartered CV-240s with 4 crew and 30 passengers develops engine problems while on final approach to Rimini, Italy, on July 31, 1960, and makes an emergency landing 1000 m.-short of the airport runway (one dead). Late in the year, **Deutsche Lufthansa, A.G.** purchases full control.

In 1961, the new owners elect to form a large German passenger charter and inclusive-tour operation by combining this subsidiary with **Condor Luftreedereie, GmbH.** to form **Condor Flugdienst, GmbH.**

DEUTSCHE LUFT HANSA, A.G. (DLH): Germany (1926–1951). As the result of Dr. Kurt Weigelt's study *Fusion in the Field of Air Traffic*, the Weimar government on January 6, 1926, acts to create the state airline **Deutsche Luft Hansa Aktiengesellschaft (A.G.).** The earlier private carriers **Deutscher Aero Lloyd, A.G.** and **Junkers Luftverkehr, A.G.,** plus the **Condor Syndicate**, and the German interest in the Russo-German airline **Deutsche-Russische Luftverkehrs-Gesellschaft, GmbH. (Deruluft)** are merged.

The new entrant adopts **Deutscher Aero Lloyd, A.G.**'s flying crane logo and Junkers' blue and yellow colors and has inherited 162 aircraft of 19 different types from its merger partners. A process of fleet rationalization is begun and the first aircraft retired is an ex-**Deutscher Aero Lloyd, A.G.** AEG J II K. Airline employment stands at 1,527 as 18 new Junkers G-24s are delivered. The first commercial flight is made on April 6 as a Komet II wings over a route from Berlin to Zurich via Halle, Erfurt, and Stuttgart. Among the seven passengers are one woman and two teen-aged boys.

The world's first night passenger service is launched by a Junkers G-24 on May 1–2 over a Berlin–Königsberg "lighted airway" route via Stettin and Danzig. The Berlin–Stockholm route is inaugurated on May 3, as are two other G-24 services from Berlin—to Warsaw and to Vienna via Dresden and Prague. In cooperation with **Lignes Farman, S.A.,** service is started Berlin and Cologne–Paris on May 25, this being the first "pool" arrangement between international airlines.

Five four-seat A-16s are acquired during the third week of July and are christened *Wangerooe*, *Baden*, *Hansa*, *Borkum*, and *Westerland*; the new aircraft, the first type produced by Focke Wulf Flugzeugbau, A.G., enter service on three routes out of Bremen: to Wangerooe and Norderney, Borkum, and Karlsruhe via Hamburg and Frankfurt. Additionally, from Karlsruhe a frequency is maintained to Stuttgart. DLH sponsors Dr. Robert Knauss' 10-stop proving expedition of 2 Junkers G-24s, the *Tyr* and *Hera*, Berlin–Peking via Siberia, July 24–August 30.

The German press, on August 7, reports that Pilot First Class Hans Baur has flown 300,000 km. (186,408 mi.) as a commercial pilot since joining **Junkers Luftverkehr, A.G.** in 1922. He has transported a number of famous passengers and made several successful emergency landings from which all have walked away. While continuing to fly his old scheduled route from Berlin–Munich–Vienna, he has also operated a number of company charters, including one this year in which a motion picture company films the sport plane *Trans-German Air Rally*, which circles the Zugspitze in the Bavarian Alps, Germany's highest mountain.

Two Albatros L-73s are received in late summer and are christened *Brandenburg* and *Preussen*. The two enter service on a route from Berlin to Malmo via Lubeck and Copenhagen.

The *Tyr* and *Hera*, having departed China's capital on September 8, are able to reach Berlin on October 26.

Meanwhile, with the **Deruluft** arrangement approaching the end of its five-year run, Director Erich Milch and several associates fly to

Moscow late in month aboard an Albatross L-73. There they meet with **Deruluft** Managing Director A. S. Davydov and his colleagues, reaching a new agreement that is ratified by the German and Soviet governments.

At this point, it is decided that, henceforth, half of the joint airline's fleet will wear German registration and half Russian and five of the Fokker F-IIIs are re-registered.

During the first year, the new state carrier's aircraft transport 56,268 passengers and 946 tons of mail and freight.

A Berlin to Vienna route via Dresden and Prague is opened on March 31, 1927. The first flight across the Alps by a commercial airliner is made by Willi Polte's Rohrbach Roland on April 13, Munich–Milan. Also in April, an F-13 floatplane examines the possibilities of mid-ocean operations with experimental flights from the Nord Deutscher Lloyd steamer *Lutzwow*.

Later in the month, the German carrier arranges for the transfer to **Deruluft** of seven Dornier Merkurs. Pilots of the joint carrier report to Königsberg for training on the new aircraft in April, prior to the opening of the annual flying season on May 2.

An air traffic agreement is reached between Germany and Italy on June 20, with regularly scheduled Munich–Venice service beginning on August 5.

Meanwhile, on July 11, Berlin–Oslo service via Copenhagen and Göteborg commences.

The German government signs an agreement with DLH on August 13 for the development and mutual operation of an air-rail freight service (*Flei-Verkehr*).

On September 24, an unidentified aircraft crashes near Schleiz, killing Baron A. Von Maltzan and five others.

The Brazilian subsidiary **Syndicato Condor, S.A. (Condor Syndicate)** is established at Rio de Janeiro on October 1.

During the year, the airline completes acceptance of the first six high-wing, 9–10 passenger Rohrbach Ro-VIII Roland Is. Featuring cabin heating and a lavatory, these aircraft are named *Zugspitze*, *Watzmann*, *Schneekoppe*, *Feldberg*, *Brocken*, and *Wasserkuppe*. They are introduced on the Geneva to Vienna via Zurich and Munich route. The carrier now retires a Rumpler C 1 and an Albatross L.58. Late in the year, **Luftverkehr Pomern, GmbH.** turns over seven LFG V 130 Strela-Lands—the *Greifswald*, *Franzburg*, *Kalberg*, *Randow*, *Stettin*, *Stolp*, and *Stralsund*.

The final section of a Berlin–Madrid through route, the Marseilles–Barcelona sector, is opened on January 5, 1928 becoming (for that time) Europe's longest segment.

The first Junkers G-31 is delivered in February; christened *Hermann Kohl*, it is employed, beginning in early March, on a Berlin to London via Amsterdam frequency. Others received during the month are put on three other routes out of Berlin: to Paris, Vienna, and Königsberg via Danzig, plus a Hamburg to London service.

DLH's director of night flights, Hermann Kohl, with his Irish copilot James Fitzmaurice and the Baron Gunther von Hunefeld, depart Berlin on March 27 in a Junkers W.33 (the *Bremen*). They fly via Baldonnel's Irish Air Corps airfield, near Dublin, Ireland, to Greenley Island, Labrador, and down to New York.

Beginning in March and continuing through July, all of the Dornier Merkurs supplied to **Deruluft** the previous year are returned for modifications. Six newer units are supplied to the joint airline.

Successful on his actual 37-hour April 12–13 transatlantic flight, Director Kohl becomes the first person to fly the Atlantic east to west against the prevailing wind. The intrepid flyers receive a ticker-tape parade down Broadway in honor of their accomplishment.

In early spring, a special air freight service is inaugurated Berlin–London via Paris; further routing is soon offered to Hanover, Essen, Cologne, and Amsterdam. The LFG V 130s are placed into service on routes from Halle and Leipzig to Gera, from Hanover to Osnabrück, from Hanover to Brunswick, from Breslau to Neisse, and from Danzig to Allenstein via Marienburg and Elbing. On April 29, the carrier as-

sumes control of the Sunday-only flights Berlin–Paris; aboard these frequencies are the airline's first stewards.

Nonstop Berlin–Zürich operations commence on May 14.

Pooling with Austria's **Osterreichische Luftverkehrs A.G. (OLAG)**, the German flag line opens a fast Berlin–Vienna and Rome route on June 1. Employing two Albatros L-72s leased from Ullstein, A.G., publishers of the *Berliner Zeitung am Mittag*, DLH begins two all-cargo routes out of Berlin late in the month: to Cologne via Essen and to Paris via Essen and Cologne.

During May and June, the Rohrbach Ro V Rocco twin-engine flying boat is employed experimentally on the company's Lubeck to Oslo via Copenhagen and Göteborg service.

Also in June, DLH official Erhard Milch employs newly elected Reichstag member Hermann Goering on a DM 1000 per month retainer to represent the airline's interests in the German legislature. At the same time, two Junkers F-13s are leased to **Deruluft** for a year.

In cooperation with the Italian carrier **Avio Lines, S.p.A.**, pilot first class Hans Baur, flying the Rohrbach Ro VIII *Hohentwiel* inaugurates scheduled mail and freight service on July 9, Munich–Milan via the Brenner Pass. Two other Rolands, the *Inselberg* and *Zugspitze* are also assigned to operate over the dangerous Alpine route. Baur is promoted to *Flugkapitän* (flight captain) on July 20.

In cooperation with **Dobrolet**, the DLH Junkers W.33 *Ural* flies Berlin–Irkutsk via Moscow, and back between August 27 and September 2; this proving flight is repeated a week later.

Meanwhile, in July and August, six four-engine Dornier Do R Super Wals are received and christened *Pottwal* (*Sperm Whale*), *Graf Zeppelin*, *Blauwal* (*Blue Whale*) later *Eckener*, *Rugen*, and *Farmarn*. These are placed into service between Lubeck and Oslo via Copenhagen and Göteborg at the end of the latter month and from Berlin to Stockholm via Stettin and Kalmar in September.

Also between July and September, the Albatros L-73s *Preussen* and *Brandenburg* are shifted to work Berlin to Vienna frequencies via Breslau, Gleiwitz, and Brno; the *Brandenburg* is destroyed while on this service.

Also in August, the first of nine converted (from G-24s) F-24s enter service on two routes out of Frankfurt: to Amsterdam via Cologne, Düsseldorf, and Essen and to Geneva via Mannheim and Basel. The same month the lone Caspar C-35 *Rostock* begins two all-cargo frequencies: from Berlin to Paris via Essen and Cologne; and from Cologne to Berlin via Essen.

The Junkers G.24 *Prometheus* is damaged beyond repair in September. Frankfurt–Saarbrücken flights are inaugurated on September 15. The W.33 *Europa* flies Berlin–Tokyo between September 18 and October 18.

Two of the carrier's seven Junkers G.31s are destroyed by fire in September and December, respectively.

Also in September, the LVG V 130s are withdrawn from regular service and the last Dornier II services are flown over the route from Hamburg to Norderney via Bremerhaven and Wangerooze; the surviving aircraft are thereafter withdrawn. The same occurs with the Focke Wulf A-16s, which spend the summer on their last services from Hamburg to Norderney via Bremerhaven and Wangerooze as well as three routes out of Hanover: to Brunswick, Osnabruck, and to Halle and Leipzig via Magdeburg and Kottbus.

Flights between Munich and Milan via the Alps cease for the winter at the beginning of October, the same month in which the Caspar C-35 *Rostock* is shifted to two new freight routes from Berlin: to Breslau via Kottbus, Górlitz, and Hirschberg and to Gleiwitz via Breslau.

Also during the month, the giant airship *Graf Zeppelin*, manned by 37 crewmen and transporting 20 passengers and hundreds of pounds of mail, flies from Friedrichshafen to Lakehurst, New Jersey, via Barcelona, Madeira, Chesapeake Bay, and Washington, D.C. A year from now, DLH will participate in the formation of a new company to exploit the airship's range and lift.

On November 7, the proposals of DLH official Wilhelm Schmidt for a German-affiliated airline in China are presented by Foreign Ministry

executive Li Ching Tung to the cabinet of Generalissimo Chiang Kai-shek. As the result of opposition from Army Minister Feng Yu Liang, the plans are dropped on December 19.

During the year, 10 additional aircraft are retired: 1 LVG C V, 2 Rumpler C 1s, 1 LFG V.130, 1 Albatross L.58, 2 Udet U.8s, 2 Rohrbach Roland Is, and 2 AEG J II Ks. Not to be forgotten with the flight operations of these 12 months is the airline's pioneering of the concept of the airport motor bus, the first of which is regularly driven between Berlin's Kurfurstendamm and Tempelhof Airport.

The Junkers G-24 *Juno* is lost in a February 1929 crash. During the winter, the Caspar C-35 *Rostock* is converted into a windowless freighter and at the conclusion of the winter schedule, is placed on an all-cargo frequency from Berlin to London via Hanover, Essen, and Amsterdam. It is joined by a number of Junkers W.33s.

Minister Li Ching Tung again approaches the Chinese cabinet on April 27 with the idea of a DLH-affiliate company in China; this time, Gen. Feng Yu Liang resigns.

Due to a nearly 50% cut in government subsidies, which unexpectedly become effective in April, DLH is compelled to dismiss some 2,700 employees, cancel a number of services and frequencies, and extend winter schedules until May 18.

The carrier now takes delivery of 11 Focke Wulf A-17 Mowes (Seagulls), which are named *Bremen*, *Emden*, *Aurich*, *Leer*, *Oldenburg*, *Stade*, *Lineburg*, *Osnabruck*, *Hannover*, *Munster*, and *Bielefeld*. Most are employed on domestic or light international services. Four more F-13s are sent to **Deruluft** in April; later in the month and through May, the Dornier Merkurs supplied the previous year are all returned, even as four refurbished units are turned over.

At the same time, nine Rohrbach Ro VIII Roland IIs are received; these are named *Stolzenfels*, *Rheinstein*, *Schonburg*, *Niderwald*, *Frienfels*, *Drachensfels*, *Marksburg*, *Siegburg*, and *Rolandseck*. They begin to share operations over seven domestic routes. Special airmail services throughout Europe are begun by the carrier in conjunction with Reichpost, with flights beginning over a Berlin–London route on May 21. Other routes are quickly added: Berlin to Malo on May 30, Stuttgart to Basel on June 1, and Stratsund to Stockholm on July 1.

Also at this time, Roland I flights are resumed between Munich and Milan via the Brenner Pass. At this point, passengers are transported over this scenic route for the first time. Supplemental oxygen is available for customers from flasks attached to their seats; crew members, who are believed to be accustomed to high altitude flying, are not given this backup.

Meanwhile, three new Rohrbach Romar flying boats, the *Bremen*, *Hamburg*, and *Lubeck*, are based at Travemünde, not far from Lubeck, to be employed on trans-Baltic services and the two F-13s leased to **Deruluft** the previous June are returned.

The first airmail-advance flight to New York occurs on July 22 when the Heinkel He.12 *New York*, piloted by Baron Jobst von Studnitz, with engineer Karl Kirchoff as crew, is supposedly catapulted from the Norddeutscher Lloyd steamer *Bremen* 400 miles out in the Atlantic while on her maiden voyage. Nautical historian Edwin Dreschel, who photographs the arrival of the *New York* at the Brooklyn Army base, later reports that, contrary to contemporary accounts, the He.12 was not launched until after it had passed the Ambrose Lightship.

On August 1, the *Bremen*'s He.12 is launched five miles west of Cherbourg and flies to Bremerhaven, where another plane takes the U.S.-originated mail on to Berlin.

The *New York* makes a total of seven one-way flights to its namesake city during the year.

The carrier now begins to receive the first of 12 Messerschmitt M-20s; these will be christened *Franken*, *Schwaben*, *Rheinpfalz*, *Odenwald*, *Spessart*, *Schwarzwald*, *Sauerland*, *Flaming*, *Harz*, *Rhon*, *Eifel*, and *Hunsruck*. They enter service on the Stuttgart to Barcelona via Geneva and Marseilles route and on a route from Basel to Amsterdam via Mannheim, Frankfurt, Cologne, and Essen.

On August 20 in an (unsuccessful) Atlantic proving flight, one of the two Rohrbach Romer flying boats cruises nonstop along the coasts of

Germany, England, Holland, Norway, Sweden, and Denmark. Unsuitable for open-sea operations, the Romers are based at Travemünde and assigned Baltic routes.

A DLH Arado V-1 between October 25–28 makes a Berlin–Istanbul proving flight over the Balkans.

On December 5, the Arado V-1 mailplane, now christened *Teneriffa*, flies nonstop Seville–Tenerife, Canary Islands; on the December 19 return flight, the aircraft is lost in a crash at Neuruppin, northwest of Berlin.

At the Berlin IATA meeting on December 18, a DLH suggestion that all member airlines standardize their schedules is adopted.

During the year, eight additional aircraft are retired: a Udet U.11, an LFG V.130, a Focke-Wulf GL.18, two Focke-Wulf A-16s, a Junkers K.16, and two Dornier Komet IIs.

Having acquired the necessary government permissions, the first Vienna–Istanbul airmail flight lands in the Turkish city on April 25, 1930.

The first New York catapult launching of the year from the *Bremen* occurs on April 29. Also in April, the last Junkers F-13, the *Sokol*, is transferred to **Deruluft**. The *Bremen* is supplemented this season by the steamer *Europea*, equipped with the Heinkel He-58 *Atlantik*, and together the two vessels launch 22 one-way flights, 18 by the former ship.

Regularly scheduled Vienna–Istanbul airmail flights commence on May 5.

In June, the world's largest landplane, the Junkers G.38a *Deutschland* is provided to DLH for route-proving trials. The aircraft, the largest landplane of its time, is outfitted with six seats with windows in the inner wing giving one of the most spectacular forward views ever provided customers aboard a fixed-wing commercial aircraft.

Between August 18 and 26, Wolfgang von Gronau, Eduard Zimmer, Franz Hack, and Fritz Albrecht make a sensational Warnemünde–New York harbor transatlantic crossing via the Faroes, Iceland, Greenland, Labrador, and Nova Scotia in the Dornier *Wal Amundsen-Wal*. The achievement is the first staged east to west crossing of the North Atlantic with a flying boat. An unidentified aircraft crashes at Dresden on October 7 (eight dead).

A week later, on October 13, the first Junkers Ju-52 single-engine cargo aircraft, designed by Ernst Zindel, makes its maiden flight. With a crew including two DLH pilots, the huge single-copy Dornier X flying boat departs Friedrichshafen for New York via Amsterdam and Calshot, England on November 2. Eleven additional aircraft are sold or retired on the year: a Caspar C.35, a Dornier Komet II, two Junkers K.16s, four LFG V.130s, an AEG J II K, and two Focke-Wulf A-16s.

Commencing on February 1, 1931, passengers on the Berlin–Vienna service are able to send private in-flight telegrams—the first such service in Europe.

The Messerschmitt M.20 *Rheinplatz* is destroyed by fire in April, but, during the spring, four Focke Wulf A-38 Mowes (Seagulls) are acquired and christened *Buckeburg*, *Thuringen*, *Hessen*, and *Lipper*. They enter service on many services out of Berlin, including to Vienna via Dresden and Prague; to Munich via Halle, Leipzig and Nuremberg; to Paris via Cologne; to Berne via Halle, Leipzig and Stuttgart; to Paris via Halle, Leipzig, Frankfurt, and Saarbrücken. Additionally, they fly from Munich to Saarbrücken via Mannheim, Ludwigshafen, and Heidelberg and from Berlin to Oslo via Lubeck, Copenhagen, and Göteborg.

Piloted by Capt. Hans Baur, the first scheduled trans-Alps passenger service is inaugurated on May 1 over the 800-km. (497-mi.) route from Munich to Rome via Milan. At Rome, the Roland II's crew and passengers, which includes a number of high-ranking DLH and German government officials, are feted by Italian aviation minister Air Marshal Italo Balbo.

A new German–Italian bilateral air treaty is now signed and another prepositioned German aircraft and crew undertakes the first return flight over the route later in the day. The same day, the northern end of the Vienna–Istanbul airmail route is shifted to Breslau in order to take advantage of new route beacons that allow night flights.

The first of 30 advance-airmail catapult flights for the year is launched from the *Bremen*, off New York, on May 4.

Low fare Aerobus service begins five-times-daily testing on June 1 on the Cologne–Frankfurt route. During the month, the carrier's four former Deutsche Verkehrsfliegerschule GmbH. (German Air Transport School) Focke Wulf A-29 old series Mowes (Seagulls) *Friesland*, *Jeverland*, *Westfalen*, and *Saarland* are transferred to operations.

Routes flown during summer and fall include three from Berlin: to Paris via Halle and Leipzig and Saarbrücken; to Berne via Halle, Leipzig, Stuttgart, and Zurich; and to Marienbad via Chemnitz.

On July 1, the 22-passenger Junkers G.38a *Deutschland* is briefly placed on the Berlin–London via Hanover and Amsterdam, route along with Junkers G. 31s; these replace the Rohrbach Rolands previously flown.

Employing the Dornier *Wal Gronland Wal*, Wolfgang von Gronau and his 1930 crew fly from List-an-Sylt, Germany, to New York on July 22–August 2, via the Faroes, Iceland, Greenland, Baffinland, Hudson Bay, Western Ontario, and Chicago.

The Focke-Wulf A-29 *Mowe Jeverland* is destroyed in an August accident.

Having flown via Amsterdam, Calshot, Lisbon, the Canary Islands, Bolama, Cape Verde Islands, Fernando de Noronha, Natal, Rio de Janeiro, Antigua and Miami, the often broken-down Dornier X reaches New York on August 27. The modified G.38ce *Hindenburg* enters DLH inventory on September 1.

While flying off the *Bremen* on October 6, the He-12 *New York* is destroyed in a crash.

In November, a Junkers W.33 flies an experimental airmail operation from Istanbul to Baghdad. Also in November, Junkers G-31s start Berlin to Malmo via Copenhagen flights.

During the year, the surviving old Fokker F-IIIs fly from Hamburg to Amsterdam via Bremen and in late December, the surviving Focke-Wulf A-29 Mowes are transferred to serve a route from Berlin to Königsberg, via Stettin and Danzig.

The fleet on January 1, 1932 comprises 173 aircraft of 24 different types, 126 of which are single-engine.

Two Albatross L.73s are sold to the Bulgarian Air Traffic Management as the company asks the Heinkel concern in February to design a fast aircraft to compete with **Swissair, A.G.**, which is now using a Lockheed Model 9 Orion on a service from Zurich to Vienna via Munich.

To replace the He-12 *New York* lost the previous October, the He-58 *Atlantik* is rechristened *Bremen* and is transferred to the steamship *Bremen* from the *Europa*, being replaced by the new Junkers Ju-46 *Europa*. Between them, the two vessels will launch 34 New York advance mail flights during the year.

On March 1, the Rohrbach Ro VIII Roland II *Niederwald* is leased to the National Socialist German Workers Party (NSDAP or Nazi) for use by its leader, Adolf Hitler, as a campaign plane during his national election effort to unseat President Paul von Hindenburg. Hitler is aware that the government controls the radio and that the only way he can overcome this advantage is to speak in as many locations as possible before as many people as possible. To do this, he is convinced he must travel by air. To make certain that nice crowds turn out, a Junkers F-13 is also chartered from DLH. Carrying Hitler confidant Josef "Sepp" Dietrich, an aide, and two friendly newspaper reporters, this advance plane will be sent ahead to handle rally arrangements.

Two days later the *Niederwald*, piloted by Capt. Hans Baur with two other crew, transports Hitler, Dr. Putzi Hanfstaengl, SS Maj. Gen. Julius Schaub, SS Lt. Gen. Wilhelm Brueckner, and official photographer Heinrich Hoffmann on the first campaign tour, flying from Munich to Dresden. Following a speech, the party reboards the aircraft and flies on to Leipzig, Chemnitz, and Plausen during the remainder of the day. Speeches are also given at these stops as well, after which Hitler motorcades to Zwickau for yet another rally.

Hitler's air campaign continues right up to election day on March 13, when he wins 30% of the vote and forces a runoff election. The *Niederwald* once again provides transport for a tough speaking schedule. Also in March, the Rohrbach Rolands *Storch* and *Pelikan* are transferred to Deruluft.

The German national runoff election is held on April 10. Despite Hitler's intense effort, which includes the first major use of campaign aircraft, President von Hindenburg is reelected.

Storch and *Pelikan* are transferred to **Deruluft**. The first two Junkers Ju-52/3ms, *Boelcke* and *Richthofen*, are accepted in late April; given a third engine and outfitted as a 15–17 passenger airliner, the Ju-52 will become one of history's most famous airliners.

A daily Berlin to Rome via Munich and Venice express service is started on May 1. This service is followed by the introduction of Junker trimotor flights from the national capital to London via Hanover and Amsterdam.

Built by its Swiss subsidiary, the first Dornier DoF makes its maiden flight on May 7; the production variant will be designated the Do-11C.

Under the command of Capt. Friedrich Christiansen and with a crew of 14, the giant Dornier Do-X returns from New York to Berlin's Muggelsee Lake on May 19–24 via Newfoundland, the Azores, Vigo in Spain, and Calshot, England.

The 410-ft., 5,100-ton steamer *Westfalen* is chartered on July 1 to provide catapult mail service on the South Atlantic.

By now Hitler's preferred pilot, Capt. Baur and the *Niederwald* are obtained from DLH for the July Reichstag election campaign. Once again, between July 15 and 30, the Nazi party leader barnstorms the nation, this time drumming up support for NSDAP candidates. When in the end the ballots are counted, the NSDAP has won 230 seats in the German parliament and becomes the largest political party in the country.

Meanwhile, between July 22 and August 2, Wolfgang von Gronau, piloting the *Gronland Wal* with a three-man crew, flies from List-an-Sylt, Germany, to Chicago via Iceland, Greenland, Labrador, Montreal, Ottawa, and Detroit. On August 30, the new Junkers Ju-52/3m *Boelcke* performs the return Geneva–Zürich frequency in 3 hrs. 43 min.

Named for Germany's top World War I ace, the second Ju-52/3m *Richthofen* is delivered in September. Before the end of the month, Reichstag President Hermann Goering, with the assistance of DLH head Milch, has arranged for the aircraft and its pilot, Capt. Hans Baur, to be chartered by the NSDAP.

Beginning on October 13, the *Richthofen* is employed to transverse the country during a new round of campaigning for parliamentary elections. Again, many cities and towns are visited on any given day and hundreds of Hitler speeches are delivered. In voting on November 5, the number of NSDAP seats drops to 196, while the Communists claim 100. These results set off an intense period of civil unrest.

Having flown to the west from Chicago via Canada, Alaska, the Aleutians, China, the Philippines, Singapore, India, the Middle East, and Italy, the *Gronland Wal* returns to Germany on November 9, completing an around-the-world flight, the first by flying boat.

Piloted by Capt. Werner Junk, the first low-wing, monoplane, four-passenger Heinkel He-70 makes its maiden flight on December 1 from the airfield at Warnemünde to Travenmünde.

During the year, the old Fokker F-IIIs perform their last services on the Baltic coastal resort frequencies.

Hermann Goering is named head of the Reich Commission for Aviation (including Air Transport) or Reichskommissariat für die Luftfahrt in the new Hitler government in January 1933. Having decided to create a "Black Luft Hansa" as a cover for creation of a German Luftwaffe or Air Force, Goering, on January 30, persuades his old employer, Milch, to become its day-to-day chief with the title Secretary of State for Air.

The Focke-Wulf A-17 Mowe *Oldenburg* is destroyed in a February accident and also during the month the Rohrbach Roland *Kranich* is sent to **Deruluft**.

In February, DLH assigns the Ju-52/3ms *Boelcke* and *Richthofen* to the Reich Chancellery for the personal use of the new German leader and his ministers. Crews and maintenance personnel for the *Regierungsflugzeug* (government planes), which remain in main line passenger configuration under the leadership of Capt. Baur, are also stationed at Berlin's Tempelhof Airport.

On March 27, German President Paul von Hindenburg replaces the Reichskommissariat für die Luftfahrt with a new Reich Air Ministry or Reichluftfahrtministerium (RLM), with Reichstag President Goering as Air Minister and DLH CEO Milch continuing to oversee the civil side as state secretary.

In April, the *Richthofen* flies Goering and Milch to Rome for a meeting with Italy's aviation minister Air Marshal Italo Balbo. The flight reveals that Goering is too fat to sit in a standard Ju-52/3m seat and must use the upholstered bench provided at the rear of the passenger cabin.

In a Tempelhof Airport ceremony on April 29, the G.38ce *Hindenburg* is rechristened *Generalfeldmarschall von Hindenburg* by Aviation Minister Goering. It is now placed into commercial service on three routes from Berlin: to Malmö via Copenhagen, to Munich via Halle, Leipzig, and Nuremberg, and to Rome via Munich and Venice.

A Dornier *Wal*, christened *Monsun* and piloted by Capt. Baron von Studnitz, from the *Westfalen* completes the first advance-airmail flight to Natal, Brazil, on June 1; the *Wal* returns to her mothership on June 3.

Meanwhile, with the He-58 *Bremen* retired, the chartered steamer by that name is reequipped with the Junkers Ju-46 *Hamburg*; the *Bremen* and *Europa* will launch 36 advance-airmail flights to New York on the year.

Also during the month, the new Ju-52/3m *Immelmann* is assigned to the Reich Chancellery. Outfitted with U.S.-built Pratt & Whitney A-2 Hornet engines, the trimotor's cabin contains both standard DLH seats and a folding table at the right front.

At a regularly scheduled company board meeting on June 30, the decision is made to change the official name of the firm from Deutsche Luft Hansa, A.G. (DLH) to **Deutsche Lufthansa, A.G. (DLH)**.

Also during the summer, the lone Junkers Ju-60 *Pfeil* (*Arrow*) undertakes cargo flights between Berlin and Athens via Vienna, Budapest, Sofia, and Salonica.

On September 1, authority for both military and civil aviation is assumed by Air Minister Goering's RLM; previously concerned only with civil operations, Secretary Milch now also assumes a military portfolio.

On behalf of the German railway system Deutsche Reichsbahn-gesellschaft, DLH begins operation of a Berlin–Königsburg via Danzig night cargo and mail service with seven Dornier Do-11Cs and Do-11Ds on November 1–2. The aircraft later open mail and all-freight flights from Berlin to Stuttgart via Breslau, Münster, and Munich.

An accident claims the Focke-Wulf A-17 Mowe *Stade* in December. During the year, the fleet is upgraded through the introduction of 11 Ju-52/3ms.

The new name **Deutsche Lufthansa, A.G.** comes into effect on January 1, 1934, but the familiar DLH initials are retained. The company's pre-1945 story will be told here under the old moniker.

Early in the year, the carrier begins to take delivery of the first of 14 Heinkel He-70 fast, single-engine transports. These will be christened *Blitz* (*Lightning*), *Sperber* (*Sparrowhawk*), *Falke* (*Falcon*), *Geier* (*Vulture*), *Habicht* (*Hawk*), *Schwalbe* (*Swallow*), *Bussard*, *Amsel* (*Blackbird*), *Albatros*, *Condor*, *Adler* (*Eagle*), *Rabe* (*Raven*), *Buntspecht* (*Spotted Woodpecker*), and *Drossel* (*Thrush*).

The *Blitz* now makes a proving flight to Seville and Las Palmas; the 2,609-mile flight from Berlin requires 13 hrs. 25 min.

Employing He-70s, Ju-52/3ms, and catapult aircraft, the first Germany–South America—and the world's first scheduled transoceanic mail flight—commence on February 3. An He-70 begins the process by flying 107 lbs. of mail from Berlin via Stuttgart and Marseilles to Seville. There it is met by a Ju-52/3m, which flies the cargo on to Las Palmas and, after refueling, on to Bathurst, in British Gambia. The mail sacks are then loaded into the Dornier *Wal* that is aboard the catapult ship *Westfalen*; the ship then steams 940 miles into the South Atlantic. At a calm point, the *Wal*, with Capt. Baron von Studnitz as pilot, is shot off over the ship's stern and flies to Natal. The plane is met at that Brazilian city by another DLH unit, which carries the European mail south to Rio de Janeiro and Buenos Aires. The entire operation is completed within four days.

In April, the Junkers G-24 *Rotterdam* is destroyed. Also in Europe on May 1, a route is opened to Warsaw. During the month, the first of 34 Ju-52/3ms to be delivered on the year enters service.

On June 14, the Ju-52/3m *Immelmann*, piloted by Capt. Baur, flies Adolf Hitler and his party from Berlin to Venice for his first meeting with the Italian Fascist dictator Benito Mussolini. The trip marks the Fuehrer's first foreign diplomatic trip—to say nothing of his first flight over the Alps. During the visit, Mussolini is given his first tour of a Ju-52/3m.

With the new Heinkel He-70 *Habicht* (*Hawk*), a Berlin-Hamburg-Cologne-Frankfurt *Blitz* (*Lightning*) passenger service is established on June 15, replacing the *Aerobus* flights launched in 1931. Originally built two years earlier as the Ju-60 to compete with the Lockheed Orions of **Swissair, A.G.**, the first Ju-160 is test flown in late June.

Following the death of President von Hindenburg on August 2, a plebiscite held on August 19 gives the Hitler administration German popular approval for a reorganization of the government. At this point, without an official German Air Force or Luftwaffe, a permanent government air transport unit is established as a Flugbereitschaft RLM or divisional unit of the air ministry. Often referred to as the Regierungsstaffel or government squadron, it is led by the former DLH captain, now SS Standartenfuehrer Hans Baur, and is outfitted with four Ju-52/3ms.

Berlin-Hamburg-Bremen Junkers G-31 flights commence during the summer. Also, two Focke-Wulf A-32 Bussards are acquired from **Deutsche Verkehrsflug** and enter service on a route from Bremen to Nuremberg via Hanover and Erfurt. The Junkers Ju-60 *Pfeil* (*Arrow*) is now assigned to fly a passenger service from Berlin to Breslau.

On September 28, the millionth passenger, Wilhelm Steinsburg, is showered with gifts after deplaning from a G.38.

Two Boeing Model 247s are delivered for evaluation late in the year while at the same time, He-70s commence operations on the Berlin to Salonica route via Vienna, Budapest, Belgrade, and Sofia.

For the year, the *Bremen* and *Europa* complete 36 advance-airmail flights to New York; both ships receive new Junkers Ju-46s, the *Sirius* and *Europa*.

The twin-engine Junkers Ju-86 10-passenger monoplane makes its maiden flight on November 4. Orders are placed for 25 aircraft, most of which will, prior to the creation of the Luftwaffe in early 1936, perform military duties while masquerading as civilian airliners. It is remembered as the first transport design to have diesel engines—600 hp Junkers Jumo 205Cs.

During the year, the fleet is upgraded through the addition of 24 Ju-52/3ms, 1 Junkers Ju-60, and 4 Heinkel He-70s; meanwhile, the 3 surviving Focke Wulf A-29 Mowes are withdrawn.

A Junkers G-31 crashes into a hill at Poderjuck, Germany, on February 2, 1935 (11 dead). The next day, the death of pioneer airliner designer and manufacturer Dr. Hugo Junkers is announced.

A Hamburg-Las Palmas proving flight is made by a Dornier *Wal* on February 13 and, between February 14 and 20, a Ju-52/3m makes a Berlin-Cairo return proving flight, completing the return leg in one 16½-hr. day.

The B-247s evaluated earlier are placed in service while a Douglas DC-2, christened *Taurus*, is received through Fokker—the American manufacturer's European distributor—in late February and tested at Staaken airfield near Berlin.

Piloted by Capt. Gerhard Nitschke, the prototype Heinkel He-111a medium bomber and transport makes its maiden flight at Marienehe on February 24.

Beginning in February and continuing through May, the Ju-52/3ms *Kondor*, *Milan*, *Kormoran*, and *Flamingo* are transferred in this one per month order to the joint airline **Deruluft**. Beginning in February and continuing through May, the Ju-52/3ms *Kondor*, *Milan*, *Kormoran*, and *Flamingo* are transferred, one per month respectively, to the joint airline **Deruluft**.

Also in February, the Fuehrermaschine *Immelmann* is taken into DLH main line service, being reregistered and christened *H. J. Buddecke*. The

aircraft has been exchanged for a slightly newer Lufthansa aircraft, which had also been named *H. J. Buddecke*.

The first commercial He-111C is rolled out on March 12. Where the bomb bay would be in the military version is a passenger smoking cabin.

Three days later on March 15 the Dornier Do-18, a replacement for the *Wal* flying boat, makes its maiden flight; the initial unit is christened *Monsun*.

Night-airmail service begins on the overland segments of the South Atlantic route on March 30.

The carrier now begins to receive the first of a 20-ship fleet of Junkers Ju-160s. These are christened *Silberfuchs* (*Silver Fox*), *Jaguar*, *Luchs* (*Lynx*), *Illis* (*Polecat*), *Hermelin* (*Ermine*), *Kreuzfuchs* (*Cross Fox*), *Blaufuchs* (*Blue Fox*), *Nerz* (*Mink*), *Marder* (*Marten*), *Gepard* (*Hunting Leopard*), *Panther*, *Luchs II* (*Lynx*), *Wolf*, *Puma*, *Schakal* (*Jackal*), *Lowe* (*Lion*), *Tiger*, *Weissfuchs* (*White Fox*), *Rotfuchs* (*Red Fox*), and *Wiesel* (*Weasel*). They enter service on 11 domestic routes.

When Aviation Minister Goering remarries in April, DLH presents him with a private aircraft, valued at DM 100,000 and upholstered in morocco leather.

A purely civil version of the Ju-86 is test flown for the first time later in the month.

One of the two B-247s, christened *Feldberg*, is destroyed on May 24 when another aircraft taxis into it at Nuremberg.

A pool with **Air France** for twice-weekly South Atlantic flights comes into effect on July 1 and the lone Junkers Ju-60 *Pfeil* (*Arrow*) is switched to two new routes: Berlin to Gleiwitz via Breslau and from Essen to Munich via Dusseldorf, Cologne, Frankfurt, and Nuremberg.

The 100th scheduled airmail flight over the South Atlantic is made on August 25.

Following the completion of 34 advance-airmail flights, the chartered steamers *Bremen* and *Europa* are returned to Norddeutscher Lloyd.

The last two Focke Wulf A-17s are employed on two all-cargo routes from Cologne: to Berlin and to Nuremberg via Frankfurt and Munich. They are withdrawn and scrapped at year's end.

Designed to a company request for a fast mailplane, the existence of the first Dornier Do-17 *Flying Pencil* is confirmed in October; the type is taken over by the Luftwaffe as a medium bomber and never enters airline service.

The joint airline **Deruluft** returns a Dornier Merkur before month's end.

During the year, the fleet is upgraded by the addition of 16 Junkers Ju-52/3ms (bringing the total of this type to 51), 1 Heinkel He-111, 3 Junkers Ju-160s, and 10 Heinkel He-70s.

Mail routes over the South Atlantic and the full integration of the Ju-52/3ms allows the company at year's end to show that more than half of its operating expenses are, for the first time, covered by flight revenues.

The new civil Heinkel He-111C *Dresden* is demonstrated for the press at Tempelhof Airport on January 10, 1936 and on February 13 a Dornier *Wal* makes a survey flight from Hamburg-Azores via Las Palmas.

The next day, the Dornier *Wal Tornado*, having departed from Natal, Brazil, to Bathurst, Gambia, disappears without a trace. Once known as the *Kranich* and *Pelikan*, the two previously owned Rohrbach Rolands are reacquired from **Deruluft** in January.

Via a February 26 decree, Adolf Hitler creates the new German Air Force or Luftwaffe, which will come into existence on March 1. Auxiliary bombing units will be established under DLH authority.

The number of Junkers Ju-160 domestic routes is increased to 15 in March, the highest number of services the type will perform.

During the spring, a decision is made to cancel the **Deutsche-Russische Luftverkehrs, A.G. (Deruluft)** arrangement, but negotiations with Russia over the dissolution drag on; meanwhile, the evaluated DC-2 *Taurus* begins flights on the European routes.

At the same time, the Junkers G-38 *Generalfeldmarschall von Hindenburg* begins three new services from Berlin: to Frankfurt via Halle and Leipzig; to Konigsburg via Danzig; and to Stockholm via Copen-

hagen and Malmo. The G-38 represents DLH at the opening of Stockholm's Bromma Airport on May 23.

In early summer, DLH begins taking delivery of the remaining 11 He-111C civil transports, which are christened *Königsberg*, *Augsburg*, *Halle*, *Dresden II*, *Rostock*, *Nuremberg*, *Breslau*, *Leipzig*, *Karlsruhe*, *Köln*, and *Magdeburg*. These begin to replace the He-70s and start by providing flights between Berlin and Amsterdam via Hanover; Berlin and Munich via Nuremberg, and Cologne and Berlin via Dortmund.

The 246-ft., 2,000-ton motorship *Ostmark* joins the ocean catapult service.

Company pilot Capt. Alfred Henke transports Spanish Nationalist leader Capt. Francisco Arranz and his party aboard a Ju-52/3m to a meeting with Adolf Hitler at Bayreuth on July 25. Capt. Arranz requests and receives military assistance for his cause from Hitler and, two days later, Henke's aircraft is the first of 20 trimotors to be sent from Berlin's Tempelhof Airport to Tetuan in Spanish Morocco. When Arranz brings 24 Moroccan soldiers back to Spain on July 29, his flight represents the beginning of direct German military involvement in the Spanish Civil War.

Also in July, five new Junkers Ju-86s are placed in service on the frequencies from Berlin to Gleiwitz, Bremen, and Cologne and Cologne-Breslau.

During August, DLH Junkers Ju-52/3ms, flying on behalf of the Luftwaffe, transport a total of 7,350 Nationalist troops to Spain from Africa in 461 flights.

Also during the summer, intrepid Capt. Drechsel conducts Ju-52/3m proving flights over Afghanistan's Hindu Kush and Pamir Mountains.

From September 5 to October 20, two Dornier Do-18s, the *Aeolus* and *Zephyr*, from the 468-ft., 8,200-ton depot ship *Schwabenland* explore two southern routes over the North Atlantic. In September, the pair makes separate newsworthy flights. The *Aeolus*, with Capt. Hans Werner von Engel, Baron Friedrich von Buddenbrock, H. J. Stein, and Otto Gruschwitz, is catapulted off her carrier, making it to Bermuda in a nonstop flight of 18 hrs. 15 min., before flying on to New York. Meanwhile, the *Zephyr*, with Capt. Joachim von Blankenberg, Baron Karl August von Gabienz, Wilhelm Ehlberg, and Adolf Eger, following its launch proceeds directly to New York, arriving 22 hrs. 12 min. after liftoff and alights on the Hudson River with over 10 hours worth of fuel in her tanks. During the year, eight advance-airmail flights are made off of the ship from the Azores-New York and four each via Bermuda and Sydney, Nova Scotia.

Company Ju-52/3ms, flying under Luftwaffe control, bring 5,455 troops from Africa to Spain during September in 324 flights. During the following month, the trimotors transport another 1,157 soldiers in 83 flights before the airlift is terminated on October 11. During these two months, 285 tons of supplies are also flown.

The G.38a *Deutschland* is destroyed in a takeoff crash at Dessau on November 2 (10 dead) and the last LVG 130, the *Stettin*, is soon thereafter retired and scrapped.

During the month, the government signs an Anti-Comintern Pact with Japan.

The concession for the joint airline **Deutsche-Russische Luftverkehrs-Gesellschaft, GmbH**, expires in December. Given a demand for less air transport between Berlin and Moscow, the pact is not renewed. Services will be maintained for another quarter with a leased fleet.

Inspired by the plan and leadership of Saburo Nagabuchi, a senior executive from **Manchukuo Air Transport, Ltd. (Manshu Koko Kabushiki Kaisha, MKKK)**, DLH signs an agreement with the Manchukuo carrier on December 18. Together, the two airlines will develop an air route between Germany and Japan via Afghanistan, Mongolia, and Manchukuo.

At year's end, the fleet comprises 144 aircraft: 59 Junkers Ju-52/3ms—which are carrying 85% of the airline's total traffic—8 Heinkel He-111s, 6 Junkers Ju-86s, and 10 Junkers Ju-160s. Orders are placed for the Blohm and Voss BV-222 *Wiking* flying boat.

During January 1937, the joint airline **Deruluft** returns the Junkers Ju-52/3ms *Kondor*, *Milan*, *Kormoran*, and *Flamingo* and the F-13 once known as *Lerche*.

During the month, Italy joins the Anti-Comintern Pact.

The experimental DC-2 *Taunus* is sold to **LOT Polish Airlines, S.A.** in February and a mailplane is lost in a crash at Bathurst, West Africa, on March 13 (four dead). **Deruluft** ends its flights on March 31; however, DLH now assumes responsibility for all route sectors outside of the U.S.S.R.

New He-111 civil transports are placed on the Berlin to Königsburg via Danzig service in late spring.

During the summer, the five remaining He-70s are placed on the Berlin to Bremen, Cologne to Hamburg via Essen and Mulheim, and Karlsruhe to Munich via Mannheim and Stuttgart routes.

The Ecuadorian subsidiary **SEDTA (Sociedad Ecuatoriana de Transportes Aereos, S.A.)** is established on July 14.

The last Boeing 247 in DLH service is lost in a Hanover crash on August 13 (eight dead).

The newly chartered 452-ft., 6,500-ton steamer *Friesenland*, with 2 Blom and Voss Ha.139s, the *Nordwind* and *Nordmeer*, completes 14 advance-airmail Horta, Azores-New York proving flights between August 13 and November 23.

As part of their successful pooling arrangement, DLH and **Air France** now begin technical and economic cooperation on the South Atlantic.

The number of Junkers Ju-86s available this summer rises to 13 and the number of their routes climb to 18.

Germany and Russia agree on August 23 (effective August 31) to dissolve their 15-year-old joint concern **Deruluft**; formal liquidation is postponed and will never be officially completed.

A Ju-52/3m flown by the previous year's proving flight pilot, Capt. Drechsel, and a second flown by noted pilot Karl August Freiherr von Gablenz, undertake another Central Asian proving expedition on August 24–26, flying from Russiata India via Kabul to Sian in northern China. Drechsel returns via the Wakhan Pass in northeast Afghanistan. Von Ganblenz, however, makes a forced landing at Sinkiang and is held hostage for several weeks before his release is secured.

On September 1, DLH takes over **Deruluft's** Berlin-Helsinki route; Berlin to Istanbul to Baghdad multistop airmail service is inaugurated on October 31.

A Ju-52/3m crashes near Mannheim on November 12 (10 dead). During the year, the fleet is upgraded by the addition of 12 Junkers Ju-52/3ms, 2 Focke-Wulf Fw-200s, 1 Heinkel He-116, and 7 Junkers Ju-86s.

At year's end, the company operates 31,900-mile air route, the fourth highest in the world.

A Ju-86 crashes while landing at Frankfurt on January 5, 1938 (six dead) and another goes down at Paris on February 23 (three dead).

Meanwhile, on January 15, the new He-116, the first of just three built to enter service, departs Hamburg on the first landplane flight over the mail route to South America; the four-engine aircraft will arrive at Natal after a flight via Paris, Marseilles, Oran, Las Palmas, and Dakar.

A DLH subsidiary, **Deutsche Lufthansa Sucursal en Peru**, is established in February, beginning Lima-La Paz scheduled service on May 24.

Catapulted from the *Westphalen* off the English coast on March 27, an unnamed Dornier Do-18 establishes a long-distance record flying nonstop to Caravelles, Brazil. The aircraft covers the 5,214-mi. trip in 43 hrs., smashing the previous world's straight-line distance record of 4,447 miles held by the Japanese.

On April 10, Berlin to Tehran via Istanbul and Baghdad multistop Ju-52/3m passenger service is inaugurated. With Japanese crews trained by DLH, two He-116s are sent to Tokyo on April 23; upon their arrival, they are christened *Nogi* and *Tokyo*.

In the spring, a barter agreement is signed with the government of Manchukuo; DLH will provide MKKK with 10 Ju-86s, which will be paid for in soybeans.

The company's longest route is initiated on April 30, Berlin to Kabul in Afghanistan via Istanbul, Baghdad, Tehran, and Herat.

Coming as the result of a carrier request for four units capable of non-stop flights from Lisbon to New York, the last production Dornier flying boat, the Do-26, makes its maiden flight on May 21; it will be christened *Seeadler* (*Sea Eagle*). The first Focke-Wulf Fw-200S-1 *Condor* is delivered, also in May, and is christened *Brandenburg*.

The premier Junkers Ju-90, *Der Grosse Dessauer*, makes its maiden flight on June 7. Orders are placed by DLH for 10 with the first, *Preussen*, joining the fleet at the end of the month.

A South American regional directorate is set up in Rio de Janeiro in July and the *Brandenburg* begins service on June 27 with a long-distance flight to Salonika via Cairo.

Three B. and V. Ha-159s, including the B model *Nordstern*, from the *Schwabenland*, stationed at Horta, Azores, and *Friesenland*, stationed at Port Washington, New York, make 26 one-way advance-airmail flights between July 21 and October 21.

The first Ju-86 provided to MKKK under the spring soybean exchange arrives in October. Although Emperor Pu Yi's puppet airline will receive additional Ju-86s, there is no record of Germany ever receiving any soybeans in return.

Piloted by Flugkapitan Henke, on August 10–11 the Fw-200S-1 *Brandenburg* proceeds roundtrip to Floyd Bennett Field, New York, from Berlin's Staaken Airport in 24 hrs. 36 min. The aircraft returns to Berlin on August 13–14 in 19 hrs. 55 min. The flight establishes a new nonstop distance record for transatlantic flight.

During the late summer, the Ju-90 *Bayern* enters service on a Berlin to Vienna frequency. In addition, Ju-52/3m service is inaugurated from Stuttgart to the Spanish island of Palma de Mallorca via Zaragoza.

While flying from the *Westphalen* on October 1, the Dornier Do-18 *Pampero* is lost between Natal and Bathurst.

The **Imperial Airways, Ltd.** Short Mayo composite aircraft is able to break the *Brandenburg's* record on October 6.

On November 28–30, the *Brandenburg* flies one-way via Basra, Karachi, and Hanoi from Berlin to Tokyo in 46 hrs. 18 min. flying time. Also in November, the new Junkers Ju-90 *Preussen* is lost in a Bathurst crash.

In December, the air ministry orders that two new Fw-200s, the *Grenzmark* and *Ostmark*, be turned over by the airline to the Regierungsstaffel or government squadron.

In the last year before war breaks out in Europe, DLH carries 254,716 passengers in European and international service and 26,471 in China and South America. The fleet is upgraded by the addition of 14 Junkers Ju-52/3ms, 3 Focke-Wulf Fw-200s, 4 Focke-Wulf Fw-58 Weihses, 2 Junkers Ju-90s, 2 Heinkel He-116s, and 2 Heinkel He-111s; meanwhile, the last He-70s are withdrawn.

While returning to Berlin on January 6, 1939, the Focke-Wulf Fw-200 *Condor Brandenburg* is forced to ditch at sea off Manila and is lost.

From January 19 to February 5, two Dornier *Wals* and the *Schwabenland* play a significant role in the German Antarctic expedition. Also in February, the Dornier Do-26 flying boat *Seeadler* (*Sea Eagle*) makes a 12,800-mile roundtrip to carry relief supplies to victims of a Chilean earthquake.

Three new Focke-Wulf Fw-200 *Condors*, the *Grenzmark*, *Ostmark*, and *Kurmark*, are delivered; however, the first two are transferred to the RLM, which assigns the first to the Foreign Ministry and renames the second *Immelmann*, making it Adolph Hitler's personal transport.

Following the final dissolution of Czechoslovakia at the end of March, all of the remaining airliners held by **CLS (Czechoslovak Airlines)** are acquired and handed over to DLH, including three DC-3s.

On April 1, DLH takes direct control of the Brazil–Chile connecting route. From April 22 to May 22, the first Ju-52/3m on the route flies to Tokyo via Bangkok, Hanoi, and Taipei, linking with a flight to Manchukuo.

An Fw-200 on June 27–29 flies Bathurst–Natal, becoming the first European landplane to cross the South Atlantic.

Regular five-stop Berlin–Tokyo goodwill flights begin on July 25, the last flight being completed in August. During early August, the Junkers Ju-90s *Baden* and *Mecklenburg* begin flying to London.

In late August, the Fw-200 *Grenzmark* flies Foreign Minister Joachim von Ribbentrop to Moscow where a Russo-German nonaggression pact is signed on the 23rd.

During the year, company headquarters are transferred to the magnificent new Tempelhof Airport; close to Berlin's center, the facility's columns and facades rise skyward toward a great golden eagle monument to air power.

Meanwhile, the fleet reaches its final prewar number of 145 aircraft, including the addition of 26 Junkers Ju-52/3ms, 3 Focke-Wulf Fw-200s, 5 Junkers Ju-90s, 1 Junkers Ju-86, 1 Heinkel He-116, and 3 Focke-Wulf Fw-58 Weihses.

World War II erupts on September 1, and all regularly scheduled services in Europe are progressively halted, except to neutral countries. By year's end, 22 DLH Ju-86s and He-111s are requisitioned for the Luftwaffe, as are all forthcoming Ju-90s.

As a result of the previous August's pact between Ribbentrop and Molotov, DLH and **Aeroflot Soviet Airlines** open a Berlin–Moscow route on January 21, 1940.

Following the conclusion of the "Phony War" in the spring, military demands are made on DLH to a much greater extent than ever before.

The Focke-Wulf Fw-200 *Kurmark* crashes on April 22 while supporting the Norwegian invasion. Also in April, the Junkers G-38 *Generalfeldmarschall von Hindenburg* transports a Wehrmacht band to Oslo's captured Fornebu Airport.

The German advance into Western Europe begins on May 10. That day, Luftwaffe bombers assault Amsterdam's Schiphol Airport (among other points) and destroy five **KLM (Royal Dutch Airlines, N.V.)** DC-2s on the ground—*Koetlang*, *Nachtegal*, *Oeverzwaluw*, *Perkoetoet*, and *Djalak*. In addition, four DC-3s, *Tapuit*, *Xema*, *Uil*, and *Patrijs*, are also reduced to hulks. When German troops occupy Schiphol five days later, they also capture the DC-2s *Kievit*, *Jan Van Gent*, *Kwak*, *Rievink*, *Sperwer*, and *Toekan*, plus the DC-3s *Hop*, *Mees*, *Valk*, and *Roek*.

An "agreement" of July 19 concerning "special duties of Lufthansa relating to the war effort" specifies, among other undertakings, the supply of aircraft to the Ministry of Air Traffic. Thus a number of planes and crews come under Luftwaffe control, beginning the following week with one of the former Czech DC-2s and all six of the captured **KLM (Royal Dutch Airlines, N.V.)** DC-2s and four DC-3s. One of the latter, the *Toekan*, is repainted in camouflage and becomes the personal transport of Netherlands-based Wehrmacht commander, General Christiansen, whose name is painted on the airplane's nose. The ship will crash near Lammershagen on August 9.

Minority shareholding is taken in the Spanish carrier **Iberia Spanish Airlines (1) (Lineas Areas de Espana, S.A.)**. Consequently, Berlin–Madrid services begin on August 12 and extend on to Lisbon as of October 7.

Meanwhile, the first Blohm und Voss BV-222 *Wiking* flying boat, piloted by DLH Capt. Helmut Wasa Roda, is test flown on September 7 from the Elbe River at Finkenwerder. With no transatlantic commercial possibilities now available, the largest flying boat to enter service during the war becomes a war machine and neither the giant ship nor its 13 sisters will ever be delivered to DLH.

During the year, the fleet is upgraded by the addition of three Junkers Ju-52/3ms, four Junkers Ju-90s, a Junkers Ju-86, and four Focke-Wulf Fw-200 *Condors*. An order is placed with Dornier for a giant flying boat, the Do-214.

On December 31, the carrier's inventory shows 78 Ju-52/3ms, its highest count of the famous trimotor. Conversely, it also shows that 12 of the last 13 Ju-86s to be received have been withdrawn.

In early 1941, two DLH stewardesses become "half-millionaires of the sky," each having clocked 500,000 km. on regular duty since 1938.

The final vestige of the international **Deutsche-Russische Luftverkehrs-Gesellschaft, GmbH. (Deruluft)** carrier is finally termi-

nated on March 22 when the joint service with **Aeroflot Soviet Airlines** between Berlin and Moscow is ended. Also in March, two of the DC-2s taken over from Czechoslovakia in March 1939 are handed over to the Finnish line **Aero O/Y**, which christens them *Voima* and *Sisu*.

British RAF bombers destroy the Junkers G-38 *Generalfeldmarschall von Hindenburg* at Athens Airport in the spring. Additional aircraft and crews join the war effort, particularly after the July invasion of the Soviet Union. Despite increased war demands that see its numbers decreased to 59 aircraft, to say nothing of fuel shortages, the fleet is upgraded by the addition of five new Junkers Ju-52/3ms. Germany declares war on the U.S. on December 8.

As a result of hostilities with America, the **Syndicato Condor, S.A. (Condor Syndicate)** ceases Brazilian operations in late winter 1942 due to U.S.-inspired fuel shortages.

Of the total number of DLH aircraft chartered to the German government, 23 are destroyed or damaged during the year, including 4 Messerschmitt M.20s and 18 Ju-52/3ms. Two trimotors are chartered from the Finnish carrier **Aero O/Y**. Numerous DLH personnel in Luftwaffe service are killed and the Do-214 flying boat project is also a casualty of war, cancelled before production.

Brazil nationalizes **Syndicato Condor, S.A.** in 1943 and renames it **Servicos Aereos Cruzeiro do Sul, S.A.**

Named in honor of the longtime board chairman, von Strauss, the DLH Personnel Services Organization is created on February 27. Broadening the scope of the services provided by the Public Assistance Fund for German Aviation, this organization undertakes to guarantee adequate payment of retirement and survivor benefits to company employees and survivors.

Allied forces launch Operation Flax on April 5, aimed at destroying the Axis air transport service between Italy and Tunisia via Sicily. On April 10, 18–19, a total of 88 Ju-52/3ms, many manned by DLH crews in Luftwaffe uniforms, are shot down.

Bloch 220s are chartered from France and when Italy surrenders on July 25, two Junkers Ju-52/3ms and several Savoia Marchetti S.73s are taken over from **Ala Littoria, S.p.A.**

Also during the summer, the German Army captures a Douglas DC-3 operated by **Sabena Belgian World Airlines, S.A.** in exile. It, too, is turned over to the civil flag carrier and enters commercial service on August 6.

Impressed from DLH in July 1940, a former Czech DC-2 crashes near Plotzig, West Prussia, on January 5, 1944. Known as the *Sperwer* while in Dutch service, another commandeered DC-2 is written off following an accident at Berlin's Tempelhof Airport on February 11.

On June 20, DLH takes over the traffic of **ABA Swedish Airlines, A.B.** to prevent leaks by passengers concerning Allied bombing damage and the mood of the German people. Resistance to the Nazi leadership is organized within the company under the direction of the head of the legal department, Dr. Klaus Bonhoeffer (brother of Dietrich Bonhoeffer, the theologian) and corporate lawyer Dr. Otto John. Following the unsuccessful coup attempt against Hitler on July 20, Bonhoeffer is imprisoned and John flees the country. On July 21, the Berlin-Barcelona passenger and mailplane's flight is cancelled to bar the escape of suspects in the Hitler murder plot.

A Berlin-Lisbon run is made by a Ju-52/3m on September 1, the first DLH service to the Iberian Peninsula since late July; it returns to the Reich the next day.

Increasing numbers of ex-DLH personnel and aircraft are lost in the war, including the Ju-90 *Bayern*, destroyed on the ground during a bombing attack on Stuttgart, also in September. Although the official fleet list at year's end comprises 3 Focke-Wulf Fw-58s and 31 Junkers Ju-52/3ms, all but 3 *Tante Jus* are "chartered" to the Luftwaffe.

As April 1945 begins, imprisoned resistance leader Klaus Bonhoeffer is executed. The Focke-Wulf Fw-200 *Hessen* departs Berlin for Barcelona on April 14 in the final completed DLH international service. The same aircraft will depart for Madrid on April 21 in the last DLH international flight but will disappear, never reaching its destination. Al-

lied records will later show the aircraft shot down near Piesenkofen, although information on the number of possible casualties is not available.

Spain now bars company aircraft from landing, cutting the last Iberian link with Germany. The action is taken as the result of the government's new relationship with the United States.

Meanwhile, on April 18, German passenger aircraft departing for Malmo, Sweden, are delayed by an Allied air raid against Berlin's Tempelhof Airport. Company headquarters are moved from Berlin to Warnemunde on April 22–23. The Berlin-Stockholm plane arrives in Sweden on time; however, the crew has been sworn to secrecy on the name of its Berlin departure hub. Several days later, the airline is moved to Flensburg. The last two Ju-52/3ms arrives at Malmo, Sweden, on April 28.

On May 5, the Fw-200 *Thuingen* flies the final DLH route, Aalborg-Flensburg. All Lufthansa operations now cease. Canadian troops capture Flensburg on May 6 and the remaining elements of the once-proud carrier: the *Thuingen*, two Junkers Ju-52/3ms, the former **Sabena Belgian World Airlines, S.A.** DC-3 captured in 1943, and the ex-**KLM (Royal Dutch Airlines, N.V.)** DC-2 *Kwak* taken in 1940.

Although no operations are flown, the carrier is not formally liquidated until January 1, 1951.

DEUTSCHE LUFT LLOYD, GmbH.: Germany (1921–1923). When Hamburg-Amerikanische Packetfahrt (HAPAG) establishes its Aero-Union holding group in early 1921 (in cooperation with AEG and Zepelin), its shipping rival Norddeutscher Lloyd (NDL) elects to move into the airline business so as not to lose ground in the new air travel business. On March 8, it creates Lloyd Luftdienst GmbH. as a coordinating umbrella body (primarily booking and promotion) for several smaller companies that can now be nurtured, especially by Lloyd associate Deutsche Petroleum A.G.

As a result, **Deutsche Luft Lloyd, GmbH. (DLL)** is created to link the NDL port of Bremen with Berlin. At the former capital, company aircraft can connect their flights with those of **Lloyd Luftverkehr Sablatnig, GmbH.** so as to provide an integrated route system to the Rhur, the Baltic, and west of Berlin. As the Lloyd Luftdienst system grows, it becomes possible for DLL to connect with **Lloyd Ostflug/Danziger Lloyd Luftdienst, GmbH.** operations and offer its passengers through passage from Berlin as far as Riga. Other connections offer trips between Munich and Lake Constance on **Bayrischer Luft Lloyd, GmbH.** aircraft and, in Poland, F-13 service from Danzig to Lemberg and Warsaw courtesy of **Aero Lloyd Warschau, GmbH.**

On February 6, 1923, HAPAG and NDL merge their airline groups, **Deutscher Aero Union, A.G.** and **Lloyd Luftdienst** to form **Deutscher Aero Lloyd, A.G.**

DEUTSCHE LUFT REEDEREI, GmbH. (DLR): Germany (1918–1923). Prewar pilot Walter Mackenthun, with support from Algemeine Elektrizitäts-Gesellschaft (AEG) CEO Walter Rathenau, initiates reorganization of AEG affiliate Gummiwerke Oberspree, GmbH. in Berlin on December 13, 1917.

On May 28, 1918, DLR is registered as a new transport company.

Following the Armistice, AEG JIIs and LVG C IVs and Vs are acquired and, on January 8, 1919, the German Air Ministry (Reichsluftamt) authorizes the beginning of airline operations.

On February 5, DLR initiates service from Berlin's Johannistal landing field; an AEG JII flies 4,000 newspapers to Weimar, the postwar German capital, where the new National Assembly is scheduled to meet. The following day, airmail service, organized by the Reichsport, is started as Otto Konnecke's LVG CIV takes 40 letters over the route.

The first passenger (Reich Minister Albertz) is transported by the JII to Weimar with mail on February 10; the flight requires 2 hrs. 18 min.

To be flown twice every 24 hours, this is the inaugural of the world's first sustained daily passenger service. Within 4 weeks, 120 scheduled flights to Weimar are completed; only 18 trips cannot be finished, although there are no accidents. Among the first passengers are the Reich President Friedrich Ebert and the film star Hans Albers.

The company is officially certified by the Reichsluftamt on February 21. At the end of the month, a flying crane insignia created in 1918 is adopted; it will become the permanent identification for the nation's state airline.

Additional routes are opened and services provided during the spring and summer. An LVG flight is started Berlin–Hamburg on March 1, followed by services from the old capital to Geisenkirchen via Brunswick and Hanover and to Warnemunde on April 15. Official airmail services are, meanwhile, underway as the Reichspost, on April 4, requires all German post offices to accept airborne letters and express. A daily Berlin–Frankfurt mail run is also initiated.

Special flights to the Leipzig Fair are laid on beginning in June and on July 5, holiday operations are started Hamburg–Westerland and Berlin–Swinemunde.

A fuel shortage crisis forces the company to suspend operations on August 1; during the first half-year of service, a total of 1,574 passengers are carried.

On August 28, DLR representatives meet in The Hague with representatives of five other European companies to establish the International Air Traffic Association (IATA).

The Danzig-based subsidiary **Danziger Luft Reederei, GmbH** is created in October.

With a mixed fleet now comprising upwards of 56 LVG C VIs, 13 C Vs, 17 AEG JIIs, 3 Friedrichshafen Fr. FF45s, 2 Fr. FF49s, 3 Staaken RXIVs, and 1 AEG N1, DLR is able to resume services during the summer of 1920. The company primarily employs the smaller aircraft allowed under a rigid enforcement of Versailles Treaty terms that began on January 10 and sees most of the larger types, such as the FF45s, confiscated by mid-May.

On August 3, the company joins with **KLM (Royal Dutch Airlines, N.V.)** and **DDL Danish Airlines, A.S.** to form the world's first airline pooling arrangement. This Europa Nord-West Flug coordinates the northwest Europe schedules of the three companies and allows flights, beginning on September 1, from Rotterdam–Copenhagen via Amsterdam and Hamburg.

Domestic services within Germany are resumed on October 18 as seaplanes initiate flights from Warnemunde to Riga via Königsberg, Memel, and Libau.

The 1919 Berlin–Gelsenkirchen frequency is restarted as a mail route on November 15.

DLR further extends its domestic operations in 1921 while ending its pool arrangement with the Dutch and Danish carriers.

On January 4, Berlin–Munich flights are inaugurated; also during the month, the carrier establishes a motorcycle unit to speed mail deliveries from Gelsenkirchen to other Rhur cities. On February 1 and 28, respectively, services are initiated from Berlin to Dresden and Leipzig.

To more effectively compete with other new airlines, a need for reorganization and additional capitalization is now realized. A syndicate comprising AEG (40% shareholding), Hamburg–Amerikanische Packetfahrt A.G., known as HAPAG (40%), and the Luftschiffbau Zeppelin GmbH. works (20%) put together the holding company **Deutscher Aero-Union A.G.** on April 27 to operate DLR and two other carriers as an amalgamated enterprise.

Between 1919 and 1921, this pioneer has flown 625,000 miles and carried 5,500 passengers and a million pounds of cargo. Its fleet is upgraded to include at least 19 modified Fokker F-IIIs (Fokker-Grulich F-IIIs) and an uncertain number of Dornier Komets IIs and IIIs.

DLR continues to fly through the 1922 summer season.

On January 1, 1923, one of the carrier's Dornier Komets flies to Lympne airfield in Kent with company officials prepared to discuss opening of a London–Berlin service with owners of **The Daimler Airway, Ltd.**; this is the first postwar landing of a German civil aircraft in the U.K.

On February 6, the airline is acquired by **Deutscher Aero Lloyd A.G.** At this point, AEG retires from the partnership to be replaced by the Deutsche Bank and DLR joint managers Mackenthun and von Rieben (the latter an AEG man) resign.

DEUTSCHE LUFTHANSA A.G. (LUFTHANSA GERMAN AIRLINES): Von Gablenz Strasse 2-6, Cologne, D-50879, Germany; Phone 49 (221) 8260; Fax 49 (221) 826-3818; <http://www.lufthansa.de>; <http://www.lufthansa.com>; Code LH; Year Founded 1953. Following the liquidation of the old **Deutsche Lufthansa, A.G. (DLH)** on January 1, 1951, the West German Transport Ministry establishes a working group (Buro Bongers) in Cologne on March 29 to study the requirements necessary for the creation of a new airline. The initiative is undertaken with Allied approval and is placed under the direction of DLH's former traffic manager, Hans M. Bongers.

The federal cabinet in nearby Bonn on September 26, 1952 resolves to found a company in preparation for the planned resumption of state-sponsored air transport. The Buro Bongers report on requirements is issued in October.

Per the Bonn resolution of the previous September, the provisional airline stock company **Aktiengesellschaft für Luftverkehrsbedarf, A.G. (Luftag)** is formed at Cologne on January 1, 1953. The federal government, the state of North Rhine-Westphalia, and the national railways subscribe DM 6 million in capital. Announcement of the move is made on January 3, at which time it is noted that the new enterprise will serve as an equipment company until the principal company can be established following the ratification of West Germany's pacts with the western Allies. During the interim, **Luftag** will negotiate for aircraft and initiate pilot training. Dr. Kurt Weigelt is named chairman of a three-man supervisory board on January 6.

On January 25, it is announced that 48 veterans of the prewar **Deutsche Luft Hansa** have been chosen to make up the carrier's first flight crews. In February, the London Debt Treaty takes effect, allowing German institutions to obtain loans from foreign sources.

On June 6, a contract is signed with Lockheed for four L-1049G Super Constellations and, a month later, four CV-340s are requested of Convair.

In mid-November, capitalization is raised to DM 25 million as 125 private shareholders are allowed to invest. Under the leadership of Karl Schiller, Senator of Commerce, a long-term arrangement for maintenance facilities is reached with Hamburg Airport on December 2 and at year's end, three Douglas DC-3s are purchased to fill the gap until the ordered aircraft arrive.

On August 6, 1954, the shareholders raise capitalization to DM 50 million and vote to change the carrier's name from Luftag to Deutsche Lufthansa A.G.; the company will trade under the marketing name **Lufthansa German Airlines**.

The first Convair CV-340 is received on August 20 and is followed by three more in October.

The first group of pilots and engineers graduate from **Trans-Ocean Air Lines'** TOAL Academy at Oakland, California; 11 more pilots and 35 engineers are awaited. The pilots lack sufficient flight time, but will be allowed to act as copilots under U.S. or British captains. By December 23, the carrier employs just under 600 personnel.

Airline employment in 1955 stands at 2,040. On January 15, nine **British European Airways Corporation (BEA)** flyers are seconded to the company to command its liners. With these British pilots and German copilots, CV-340 domestic flights begin on March 1. Berlin, reserved to the wartime Allies, will be off limits for the next 40 years.

On March 29, the first L-1049G is delivered to Hamburg; under a contract signed the previous day with the U.S. carrier **Trans World Airlines (TWA)**, 11 American pilots are provided for the Super Connies, with 20 available by 1957.

At Hamburg's Fuhlsbüttel Airport on March 31, ceremonies mark the inauguration of Lufthansa's scheduled domestic service. Following the ritual raising of the blue and yellow company flag, CV-340 flights are launched Hamburg–Munich and return. Other cities on the first postwar route network include Düsseldorf, Cologne, Bonn, and Frankfurt.

Two more Connies are received on April 19 and 29.

Following enactment of the Paris treaties on May 5 returning sovereignty to the Federal Republic, Lockheed trial flights are quickly inau-

gured from London and Madrid on April 15, Paris on April 19, and Shannon on May 25; regional flights of the CV-340 are also made.

Regularly scheduled CV-340 Hamburg and Munich to Madrid and London services begin on May 15 and 16, respectively. Paris becomes a destination the next day. The fourth L-1049G is delivered on May 28.

The carrier becomes an IATA member on June 6 and the first scheduled Hamburg–New York L-1049G transatlantic frequency is flown via Dusseldorf, Shannon, and Gander (technical stop), on June 9, with the 100th flight being made on August 8. On August 30, Hamburg to New York frequencies are doubled to six per week.

Two specially equipped L-1049Gs fly Chancellor Konrad Adenauer and his party to Moscow on September 8. At an October 4 shareholders meeting at Bonn, capitalization is raised to DM 80 million.

Lisbon becomes an international stop on October 2, Stuttgart joins the domestic route net on October 3, and DC-3s are placed on several domestic operations shortly thereafter.

On December 12, minority interest is taken in the charter carrier **Deutsche Flugdienst, GmbH**.

The fleet at year's end includes 4 L-1049Gs, 4 CV-340s, and 3 DC-3s. Enplanements total 74,100 and revenues are DM 23.6 million; there is, however, a DM 20.5 million loss.

A sales office is opened in Washington, D.C. on January 10, **1956**.

Four more L-1049Gs are delivered during the year: February 20, March 28, July 25, and August 7.

Meanwhile, the first L-1049G piloted entirely by a German crew flies service to London on March 6 and to New York on March 31.

During the month, the company orders four L-1049A Starliners and the March 31 balance sheet shows that during its first year, the airline actually carried 104,000 passengers and 1,500 tons of mail and freight.

L-1049G Manchester Mid-Western service is extended to Montreal and Chicago on April 22–23 and, on April 24 orders are placed for four Boeing 707 jetliners. Four Lockheed L-1649A Starliners are ordered a month later on May 24.

On June 15, orders are placed for nine Vickers Viscount 814Ds. Lufthansa returns to the South American scene on August 15–16, flying a seven-stop inaugural L-1049G Hamburg–Rio de Janeiro route in cooperation with **Air France**. On August 18–19, the Buenos Aires stop is extended on to São Paulo and Buenos Aires. Hamburg–Tehran flights via Istanbul, Beirut, and Baghdad, begin on September 12.

On October 7 and November 1, respectively, Nuremberg and Hanover are included in the domestic net. The 100th scheduled transatlantic crossing is made in October. Newly introduced services to the Mideast are interrupted during the first week of November by the Suez Crisis; flights resume to Beirut and Baghdad on November 7.

Enplanements for the year total 228,680 and revenues surge to DM 80.6 million. The loss is cut to DM 20.1 million.

The carrier orders five Boeing 707-430s on January 23, **1957** while the first two of five CV-440 Metropolitans to be delivered on the year arrives in Hamburg on March 31, and are placed on the Zurich and Vienna frequencies on April 14 and 28, respectively. Two chartered Vickers Viscounts are also received from England and on April 10, service is started Hamburg–Montevideo.

Lufthansa and **Air France** agree to a cost and revenue sharing South Atlantic pool on July 1. The first German aircraft to land at newly returned Cologne–Bonn Airport on July 18 is a company Super Constellation.

Two more CV-440s arrive on August 8 and 16 and one on September 17.

The first Lockheed L-1649A flies 7,000 miles from Los Angeles in a record 17 hrs. 19 min. and arrives at Hamburg on October 31; three more will be delivered by year's end.

On October 7, a Munich–Copenhagen route is opened.

While en route to New York on November 3, an L-1049G with 13 passengers hits a building in Dusseldorf and crashes (7 dead).

Orders are placed for nine Vickers Viscount 814s and twice-weekly Germany–Boston DC-4 cargo services begin on December 4, with an aircraft chartered from **Trans Ocean Air Lines**.

During the year, the German Railways begin a Trans Europa Express service aimed at drawing passengers away from Lufthansa.

The fleet at the end of the year includes 8 L-1049Gs, 2 L-1649As, 4 CV-340s, 5 CV-440s, and 3 DC-3s. The workforce totals 4,940. Passenger traffic climbs to 386,000 and revenues jump to DM 128.8 million. The loss advances to DM 27.1 million.

The first L-1649A nonstop Germany–New York proving flight departs Dusseldorf on February 28, **1958**; regularly scheduled service with the Lockheed begins on April 1, the same day Belgium and Italy join the European regional network.

The South American route is extended to Buenos Aires on April 9.

The 100,000th North Atlantic passenger is honored on July 1 and the one-millionth passenger (overall) is boarded on July 31.

An L-1049G, transporting the economics minister, becomes the first "new" Lufthansa aircraft to fly to the Far East, visiting points in India and Japan between October 3 and November 8; the first Lufthansa landing at Tokyo since late 1938 is made on October 25. Meanwhile, the first Vickers Viscount 814D is received at Hamburg on October 5.

Luxury First Class Senator service is initiated on the North Atlantic run on November 6 and a Cairo service is opened at month's end.

A second Viscount 814D is accepted on December 19. During the month, a declaration by the International Monetary Fund makes the German mark freely convertible with foreign currencies.

Some 1,100 workers are hired during the year and enplanements climb to 622,500. Revenues accelerate to DM 178.2 million while the loss climbs to DM 35.2 million.

The second postwar Lufthansa aircraft lost is an L-1049G with 10 crew and 29 passengers that crashes at Tubiacanga Beach, on approach to Rio de Janeiro, on January 11, **1959** (36 dead).

On March 31, L-1049G Frankfurt–New York all-cargo services commence.

Newly received Viscount 814s begin service to Milan on April 1, Stockholm on April 20, Athens on May 10, Geneva and Nice on May 24, and Barcelona on May 24. Meanwhile, on April 3, flights begin to New York from Manchester, England.

The carrier enters into the ultimately unsuccessful pool Air Union with **Air France**, **Alitalia, S.p.A.**, and **Sabena Belgian World Airlines, S.A.** on May 21.

On November 1, in cooperation with **Air France**, an L-1049G inaugurates service via Cairo, Karachi, and Calcutta to Bangkok.

In late fall, full control of **Deutsche Flugdienst, GmbH** is assumed.

Seven Viscount 814Ds are delivered in the year and the fleet, in addition to the British-made turboprops, now comprises 4 L-1649As, 7 L-1049Gs, and 9 CV-440s.

Enplanements for the year are 786,600 and revenues reach DM 230.7 million. The company loss advances to DM 42.1 million.

On January 30, **1960**, four Boeing 720Bs are ordered; Lufthansa is thus the first non-U.S. carrier to order the shorter 707 variant.

The first B-707-430 jetliner is delivered on February 24; christened *Hamburg*, it begins Frankfurt–New York operations on March 17. Three more jetliners are accepted during the year and replace L-1049Gs—*Berlin* on March 10, *Frankfurt* on April 24, and *Munich* on October 1.

The maintenance base at Hamburg now employs 3,550 people.

The Pacific Ocean is crossed by the carrier in both directions for the first time between March 12 and April 2 when an L-1649A flies Chancellor Adenauer to Japan. Also in April, two L-1049As are converted to freighters.

Flying via Paris and Montreal, B-707-430 service is launched to Chicago on May 18 and San Francisco on August 1. Also on August 1, a Viscount frequency is opened to Dhahran, Saudi Arabia.

The millionth passenger of the year is boarded on November 30. For the year, bookings are 1,237,629. Revenues are DM 351.6 million and the loss is cut to DM 4.3 million.

Herman J. Abe becomes chairman on January 1, **1961** and B-707-430 service is inaugurated Frankfurt–Bangkok via Hong Kong and on to Tokyo on January 31.

On February 28, orders are placed for 12 B-727-30 Europa medium-haul jetliners.

The first B-720-030B is delivered on March 8 and is christened *Koln*.

Three more B-720-030Bs are delivered during the year—*Dusseldorf* on April 28, *Stuttgart* on May 3, and *Nuremberg* on June 3. The last B-707-430 is delivered on March 17 and is christened *Bonn*.

Scheduled L-1649A Cologne and Bonn to New York flights commence on April 30 and nonstop Hamburg to New York flights on May 20.

Following their workup, four new B-720-030Bs replace the Viscount 814Ds on the Middle East routes on July 1.

Beginning on September 1, four CV-440s and a Viscount 814D undertake domestic night-airmail operations for the German postal authority.

In the fall, **Deutsche Flugdienst, GmbH** is renamed **Condor Flugdienst, GmbH**. Simultaneously, cargo space is leased aboard the Canadair CL-44s of **Seaboard World Airlines**.

On October 31, the airline orders the first of 18 B-707-330B/Cs. The last two of seven Convair CV-440s are delivered on November 1 and the final two of 11 Viscount 814Ds on November 30.

On December 1, in cooperation with **Seaboard World Airlines**, six-times-per-week Frankfurt–New York Canadair CL-44D all-cargo services are started.

While on a training flight, the B-720-030B *Dusseldorf*, with three crew, crashes near Ebersheim on December 4; there are no survivors.

The workforce during the year reaches 11,981 and enplanements ascend to 1,553,400. Revenues total DM 453.2 million, but the loss surges to DM 109.1 million.

As more B-720-030Bs become available, they are employed to inaugurate the carrier's first African service on March 4, 1962, flying non-stop Frankfurt–Lagos, Nigeria, twice weekly.

On May 14, the Boeings commence a Frankfurt–Johannesburg route via Athens, Khartoum, Nairobi, and Salisbury.

During late summer, all of the L-1049Gs are grounded for repair of cracks in some engine nacelles.

Four more B-720-030Bs are delivered during the year—*Hannover* on January 5, *Bremen* on January 12, *Essen* on March 23, and *Dortmund* on February 27.

When returned to service, the seven remaining L-1049Gs are all leased to **Alitalia, S.p.A.** for two years.

All four L-1649As are leased, in July and October, to **World Airways** and two are transferred to **Condor Flugdienst, GmbH**.

Enplanements total 1,859,000 and revenues are DM 529.1 million. The loss is cut to DM 46.4 million.

Due to difficulties over traffic rights in East Africa, the Johannesburg route is rechartered in February 1963 via Lagos.

On February 28, the first "Intercontinental" Boeing 707-330B is delivered; it is christened *Duisburg*.

During the first quarter, removal of the First Class sections on all of the L-1049Gs and their replacement by 86-seat economy interiors is completed.

Lufthansa on April 1 responds to the Trans Europa Express program of the German Railways by introducing Air Bus fares between major German cities. Super Gs are employed thrice daily to begin Europe's first large-scale walk-on shuttle service between Frankfurt and Hamburg. These flights, priced less than a first-class rail cabin, prove an effective counter to the trains. During the summer, routes are extended to Palma de Mallorca and New Delhi.

Enplanements reach 2,073,600. During the year, financial results are issued showing that revenues are DM 622.6 million. For the first time in the history of either the "old" DLH or the "new" Lufthansa, the company is now operating in the black. The profit is all of DM 1.8 million (\$25,000).

Airline employment in 1964 is 12,963.

When the **World Airways** lease on the first three Starliners expires, two are sold to the South African independent **Trek Airways (Pty.), Ltd.** in February and March and the third is returned to Germany.

The B-720B *Koln* is sold to **Pan American World Airways (1)** on March 12.

The first of 12 new Boeing 727-30 Europa Jets is delivered on March 31, and is placed on an Amsterdam route in April; as the aircraft are delivered, they are assigned to European and Near Eastern frequencies. One of the new trijets is employed on April 5 to launch weekly roundtrips between Frankfurt and Tripoli.

On May 28, a polar Frankfurt–Tokyo route is opened by the second B-707-330B *Dusseldorf*, which had been received on March 5.

On June 30, the 10-millionth passenger is welcomed aboard a New York–Stuttgart flight.

The B-720-030B *Bremen* with three crew is lost near Ansbach during a July 15 training flight; there are no survivors. It will later be revealed that the crew had executed one complete roll and were attempting a second when the over-stressed aircraft disintegrated.

During the year, operations to Khartoum and Cairo are rerouted via Tripoli instead of Athens. In addition, five Curtiss C-46 Commandos are wet-leased from **Capitol Air** in the U.S. to operate night cargo flights around Northwest Europe.

At year's end, Managing Directors Kittel and Bongers retire and are replaced on the board of management by Dr. Herbert Culmann, an attorney, who joins Gerhard Hoeltje and Hans Sussegueth.

Boardings increase 19% to 2.56 million and, on the North Atlantic, Lufthansa becomes the world's No. 5 airline in terms of passengers carried, passing **Air France**. Revenues for the year total \$191.7 million and mark the first time the company has posted a positive annual fiscal result.

Airline employment reaches 14,900 in 1965.

The first of five B-707-330Bs to be received on the year is delivered on January 10; christened *Koln*, it is followed by the *Stuttgart* on August 4, *Bremen* on October 5, *Nuremberg* on November 24, and *Hannover* on December 28.

Orders are placed in February for 21 Boeing 737-130s, making DLH the first foreign airline to place a firm order and become launch customer for a new U.S. civil airliner.

On April 1, a pooling agreement is signed with **Alitalia, S.p.A.**, **Air France**, and **Japan Air Lines Company, Ltd. (2)**. The arrangement provides for joint maintenance and technical support and is actually a preliminary pact to the larger ATLAS group accords signed later.

On April 3–5, the *Koln* makes Sydney a destination and Australia the last continent added to the route network.

In summer, twice-weekly service is started Frankfurt–Boston and Philadelphia.

As result of complaints from the German Railways concerning its fare dumping, Lufthansa is forced, by the Transport Ministry, to abandon its Air Bus fares.

The first B-707-330C is received on November 10; christened *Europa*, it is placed on the transatlantic cargo route.

The last active L-1649A Starliner freighter is withdrawn on December 1. The same day, a B-720-030B is sold to **Pan American World Airways (1)**.

The fleet is enlarged by year's end by receipt of five B-727-30s and the carrier advances to sixth place in Western international aviation.

Passenger boardings pass the three million mark for the first time (3,010,634) and a net profit of DM 43 million is posted atop revenues of DM 940.3 million.

During 1966, routes are extended to Tunis, New York, via the Caribbean and cities along the west coast of South America. The first of three B-707-330Bs to be received on the year arrives on January 7; christened *Essen*, it is followed by the *Dortmund* on January 19 and *Bochum* on March 27.

On January 28, a fire breaks out in the cockpit of Flight 005, a CV-440 with four crew and 42 passengers, while landing at Bremen after a service from Frankfurt. The aircraft overshoots the runway and stalls and crashes while going around; there are no survivors.

When the **World Airways** charter of the last Starliner expires at the end of February, the aircraft is sold on March 3 to the U.S.-based travel

club **Air Venturers**. The second combi Boeing, the B-707-330C to be named *America*, is delivered on March 11.

In April, Prague becomes the first city behind the Iron Curtain to be added to the regional route network. During the same month, the final B-727-30s are accepted.

During the spring, company shares are traded on the stock exchange for the first time.

In August, the company receives protests against an ad campaign that stresses the Germanic characteristics of the airline's mechanics and flight crews.

Service is resumed to Oslo in November and routes are opened to Khartoum, Entebbe, and Dar Es Salaam in late December.

Enplanements total 3,446,000, revenues are DM 1.16 billion, and the net profit is DM 47.9 million.

The last two B-707-330Bs and the third B-707-330C are delivered during 1967; they are christened *Duisburg* on January 20, *Bremen* on January 30, and *Asia* on March 6.

A new computerized reservations system comes on line on March 1 and on March 30 a B-707-330B, carrying the West German president, becomes the first airliner ever to land at the Nepalese capital of Kathmandu.

A BAC 1-11-414 is subleased from **Bavaria Fluggesellschaft, mbH. & Co. K.G.** on April 1; it begins six months of flights which link Munich and Frankfurt with Geneva, Vienna, and Hamburg. The previous *Bremen*, a B-707-328B, is sold to **LANChile Airlines, S.A.** on April 5. The first B-737-130 makes its maiden flight on April 9 and daily Hamburg to New York Stratoliner services are opened on May 3.

In July, service is extended to Jakarta; Belgrade, Zagreb, Bucharest, and Budapest come into the European net at the end of August.

A Lockheed L-1049G is presented to Hamburg Airport as a memorial on September 7; the last three Super Constellations are retired on October 6, replaced by 14 B-727-30Cs.

Passenger boardings rise 15.2% to 3,981,237 and freight traffic jumps 19.5%. Revenues reach DM 1.38 billion and the gain is DM 39.4 million.

The charter carrier **Sudflug, GmbH.** is acquired on January 1, 1968 and the workforce at the beginning of the year is 18,261.

The first of 14 Boeing 737-130s to be delivered in the year arrives on February 4; christened *Coburg*, it enters service on February 10. New routes are extended to Helsinki in April, Genoa and Naples in July, and Tel Aviv in November.

Snack service is inaugurated on all domestic B-737-130 flights after June 1 and during the year's second half, all seven remaining L-1049Gs are retired.

On November 20, Frankfurt to Tel Aviv services are begun.

Passenger boardings rise 11.5% to 4,003,672 and cargo traffic is up by 34.4%. Revenues are DM 1.52 billion and net income is level.

On the polar route in 1969, one of the three weekly Tokyo flights is extended to Osaka while in Africa, Addis Ababa becomes the 12th city on that continent added to the itinerary. Other destinations inaugurated during the year are Jeddah, Los Angeles, and La Paz.

Two more B-707-330Cs, *Africa* and *Australia*, are added and eight more B-737-130s join the fleet; four Viscount 814Ds are retired; and preparations for the arrival of the first Boeing 747-130 Jumbojet are put in high gear.

The carrier joins the maintenance pool ATLAS, beginning a long-standing cooperation with **Air France, Alitalia, S.p.A., Iberia Spanish Airlines (2) (Lineas Areas de Espana, S.A.), and Sabena Belgian World Airlines, S.A.** in the maintenance and repair of aircraft and associated equipment.

The wet-leased C-46s are returned to **Capitol International Airways** (as **Capitol Air** has been renamed) when their contract to fly night cargo services is completed.

Passenger enplanements are 5,670,998 and a net profit of DM 12.3 million is recorded on revenues of DM 1.77 billion. Lufthansa is now in second place among IATA members.

On March 10, 1970, the German flag line becomes the first European carrier to receive the Boeing 747-100; between that date and the start of wide-body service, the B-747-130s *Nordrhein-Westfalen* and *Hessen* arrive.

The first Jumbojet service is flown on April 26, Frankfurt–New York.

The third B-747-130, *Bayern*, is delivered on May 23 and, during the summer, routes are started to Chicago, Sofia, and Mauritius.

On September 23, four Douglas DC-10-30s are ordered. The final B-707-330C is delivered on October 16 and is christened *Essen*.

The year's passenger bookings leap 18.5% to 6,958,280 and cargo tonnage climbs by 14.5%. Revenues reach DM 2.03 billion and there is a DM 12.9 million profit. In terms of passenger boardings, Lufthansa is now the 11th largest airline in the world; it ranks 7th in freight carriage, 9th in airline employment, and with 72 aircraft has the 14 largest fleet.

In January 1971, the carrier begins receiving the first of 37 B-727-230s to be added by March 1982.

On March 22, the first B-747-130 flight is made to South America and the last Vickers Viscount 814D is retired on March 31.

The first of two upgraded B-747-230Bs, the *Baden-Wuerttemberg*, is delivered on May 5. Routes are extended during the year to Casablanca, Warsaw, Bombay (the financial center replacing Calcutta), Asuncion, Caracas, Kinshasa, Tenerife, and Salonika.

On November 11, the government signs an air traffic agreement with the Soviet Union.

Traffic totals 7,406,487 and although revenues are DM 2.39 billion, there is a DM 34-million loss.

The employee population reaches 22,888 in 1972.

Longtime Director Hoeltje retires from the executive board. CEO-Technical Services Reinhard Abraham follows him onto the board, which is expanded to five members with the additional appointment of chief pilot Capt. Werner Utter.

Twice-weekly nonstop service is inaugurated Frankfurt–Moscow on February 1.

En route from New Delhi to Athens on February 22, Flight 649, a B-747-130 with 172 passengers, including Joseph P. Kennedy III, is hijacked by 3 Arab guerrillas of the Zionist Occupation Victims Organization, espousing the cause of a "victorious Jidda," and demanding a \$5-million ransom. The Jumbojet is diverted to Aden, South Yemen, where the passengers are released, but the 16-member crew is held until the surrender of the hijackers to Yemini officials on February 23. The next day, it is reported by West German transportation minister Leber that the \$5-million ransom to the guerrillas has been paid.

The last pure passenger Jumbojet to be obtained for over a decade, the B-747-230B *Niedersachsen*, arrives on February 25.

In March, new routes are opened to Toronto, Nassau, and Quito; a B-747-230F (the world's first Jumbojet freighter) is delivered and christened *Cargonaut*; in April, it begins six-times-per-week Frankfurt–New York, Philadelphia and Boston all-cargo flights. A new unit load device is unveiled for the Jumbojet freighter.

An Algerian hijacker, N. Bachali, takes over a July 10 B-727-30 Cologne to Munich flight. Upon landing at the latter destination, he allows half of the passengers to disembark and demands a ransom of \$400,000 for the remainder, plus a parachute. His extortion attempt is foiled by West German police, who take him to jail where he spends several years.

On October 11, Franz Schuelz, brandishing a fake bomb, hijacks a B-707-330B on a Lisbon to Frankfurt flight; after the plane lands at Frankfurt he is shot by a West German police marksman.

Two Palestinian guerrillas hijack Flight 615, a B-727-230 en route from Beirut to Ankara with 20 passengers on October 29, and win release of three Arab commandos held in Munich for the slaying of the 11 Israelis at the Olympic Games on September 5. The craft is flown to Nicosia and Zagreb for refueling and lands in Munich to take on the freed prisoners, but takes off again when police cars and other vehicles at the airport frighten the pirates. The aircraft returns to Zagreb, where the released guerrillas arrive by lightplane, and are taken aboard for a flight to Benghazi. The jetliner is released at the Libyan city.

On December 20, orders are placed for three Airbus Industrie A300B2-1Cs, five more DC-10-30s, and three B-727-200s.

Passenger boardings climb 13.1% to 8,523,000, and freight traffic is up 22.3%. Revenues are DM 2.53 billion and a profit of DM 56.8 million is reported.

The first DC-10-30 is delivered in 1973 and is christened *Dusseldorf*. The mid-February arrival of a B-727-230 at Hamburg marks the delivery of the 100th Boeing jetliner to the carrier.

On May 7, the Airbus order is increased and, in early August, a Trans-Siberian Frankfurt-Tokyo route is opened.

Following their terrorist attack on the **Pan American World Airways** (1) B-707-321B Flight 110 at Rome on December 17, the five Palestinian guerrillas herd five Italian hostages aboard a Lufthansa B-737-130, killing a sixth, a customs agent, as he tries to escape. A second man, shot outside the plane during the takeover, dies en route to hospital. The Boeing is forced to take off for Beirut, where it is denied permission to land, and continues on to Athens, where it alights next day. During unsuccessful negotiations with Greek authorities for the release of two Palestinians being held for a previous terrorist act, the gunmen execute an Italian hostage and drop his body on the tarmac. Next, the hijackers play a hoax on Capt. Joe Kroese, pretending to kill four other hostages, which Kroese reports to authorities as fact. The plane now wings its way, via Lebanon and Cyprus, which deny landing permission, to Damascus where, during a two-hour layover, it takes on fuel and food before flying on to Kuwait. There the terrorists free their captives in return for "free passage" to an unknown destination. They will, however, be held for 11 months until released as ransom in another skyjacking case.

Coming in from Bangkok on December 20, a B-707-330B with 11 crew and 98 passengers overshoots the runway at Delhi and collides with the middle marker building; although the plane is damaged beyond repair and 10 people are injured, there are no fatalities.

A May-November slowdown by air traffic controllers in West Germany results in the first decline in passenger traffic in 20 years; domestic service is off nearly two-thirds at the height of the job action. Total enplanements fall 6.3% to 7,652,794 while cargo is down by 14.1%. During the seven-month controller job action, Deutsche Lufthansa, A.G. loses \$71 million in flight cancellations. Operating revenues are DM 2.77 billion, while a DM 45.7 million overall loss is reported.

Airline employment within West Germany reaches 24,441 in 1974.

As the DC-10-30s join the fleet, they are assigned to the Rio de Janeiro route from January into the spring and, during the summer, to Southeast Asia and Australia as well. The first of nine B-727-30s to be exchanged for B-727-230s departs for Germany from Seattle in July and a fifth DC-10-30 is received in late autumn.

En route from Frankfurt to Johannesburg via Nairobi on November 20, Flight 540, the B-747-130 *Hessen* with 17 crew and 140 passengers, takes off from Nairobi under a partially stalled condition, the result of improperly deployed wing flaps. The Jumbojet hits the ground 1,120 m. from the end of the runway, skids into an elevated road 114 m. further on, and catches fire when it comes to a stop 454 m. beyond that (59 dead). The tragedy is the first fatal crash of a Jumbojet and the first for its type in almost five years of airline service and 2.45 million flight hours. A survivor, Earl Moorhouse, recounts the story in his *Wake Up, It's a Crash: The Story of the First 747 Jet Disaster* (London: Corgi, 1980).

Passenger boardings rebound from the 1973 ATC slowdown, up 20% to 9.6 million; freight traffic moves ahead 15.2%. Revenues climb to DM 3.44 billion and a net DM 64.5 million profit is recorded.

In January 1975 the company receives the 1974 "Cargo Development Award" from *Air Transport World* magazine.

In late winter, a B-707-130B, in operation since 1960, establishes a world record for its type of 25,000+ flying hours and 20,000+ landings.

An order is placed on April 9 for a B-747-230B and, during the spring, five additional DC-10-30s are received.

On June 9, the B-747F is diverted from the New York run to fly a load of machinery to Johannesburg, followed by a September 1 trip to Melbourne with auto parts.

Two chartered B-707-320C flights take display items to Peking for the September 5-18 TechnoGerma, the nation's largest-ever foreign exhibition. Meanwhile, on September 2, a special flight takes Economics Minister Friederichs and other VIPs to the show.

Share capital is raised by DM 200 million to DM 600 million at the fall board meeting.

On December 10, the carrier receives most of the DM 2.5-million prize awarded by Frankfurt Airport to the airline with the quietest aircraft following a yearlong competition.

Passenger boardings pass the 10-million mark for the first time, up 5.7% to 10,147,900. The company shows a record DM 33.5-million net profit on revenues of DM 3.76 billion.

Airline employment is 26,451 in 1976.

With many veterans present, the fiftieth anniversary of the 1926 founding of **Deutsche Luft Hansa, A.G.**—the "old" DLH—is celebrated on January 6.

The first Airbus Industrie A300B2-1C is delivered on February 9; christened *Gamisch-Partenkirchen*, it conducts demonstration flights to nine German cities and London between March 22 and 26. The aircraft, together with a second, the *Rudesheim am Rhein*, is employed to inaugurate services to Algiers and Dubai on April 1. The third A300B2-1C, *Luneburg*, enters domestic operations in late May. First Class service is resumed on selected domestic and European routes.

On August 1, the company introduces a recorded physical exercise program to relieve the fatigue of long-distance travel; the exercises are based on the isometric fitness program used by astronauts.

In September and October, orders are placed for a B-747SL, a DC-10-30, and two A300B4-2Cs.

In November, 25.3% interest is taken in the Munster-based aerial survey company Hansa Luftsbild GmbH.

The first combi Jumbojet is delivered on November 23 to the carrier's Hamburg base; on December 14, this new B-747-230C, christened *Hessen*, is placed in service on the longest run, the 17,000-km. route to Sydney. The second B-747-230C, *Rheinland-Pfalz*, arrives on December 15; it is placed on the New York route at year's end.

Bookings pass the 11-million mark, up 10.6% to 11,223,404 and freight climbs 13%. Revenues increase 14% to DM 4.3 billion, producing a DM 112.3 million net profit.

The charter subsidiary **German Cargo Airlines, GmbH**, is established on March 10, 1977. On April 1, the fourth A300B2-1C, *Westerland-Sylt*, enters service. On April 3, A300B2-1C flights commence to Nuremberg, Vienna, Istanbul, and a new stop, Linz, Austria.

Piloted by board member Capt. Werner Utter, a new B-747SL on May 13 departs Hamburg on the first nonstop flight to Los Angeles by the German flag line; the 9,300-km. distance is flown in 11 hrs. 45 min.

On July 14, a \$1-billion order is placed for five B-747SLs and six B-727-230s; the first A300B4-2C is received on September 29 and christened *Rothenburg o.d. Tauber*.

The carrier's most terrifying hijack begins on October 13 as Flight 181, the B-737-230QC *Landshut* en route to Frankfurt from Palma de Mallorca with 92 aboard, is seized by 5 terrorists over Elba; refueling stops are made at Rome, Cyprus, Bahrain, and Dubai. At Dubai, the pirates demand the release of 11 colleagues from jail and reject the request of the West German and Turkish governments for a hostage release. Pope Paul VI's offer of himself as a captive in place of the others is likewise turned down.

The Boeing is flown to Aden, where Capt. Jurgen Schumann is murdered and his body is thrown off the aircraft. The copilot is forced to fly on to Mogadishu, Somalia, arriving on October 17. One skyjacker, a woman, leaves the aircraft. During the following night, a commando unit of the antiterrorist GSC-9 assaults the airliner and liberates 82 passengers and 4 crew members, killing all but one of the terrorists in the process. A stewardess, the surviving terrorist, and a commando are wounded in the attack.

Upon hearing of the plot's failure, three of the pirates awaiting release from prison will commit suicide. The alleged woman hijacker will move

to Norway in 1991. On October 21, the day of Capt. Schumann's funeral, the last six hostages arrive at Frankfurt from Somalia. Peter Koch and Kai Hermann relive the incident in their *Assault at Mogadishu* (London, Eng.: Corgi, 1977) while Barry Davies reviews the hijack later in his *Fire Magic* (London, Eng.: Bloomsbury, 1994).

On November 1, Melbourne is added as a stop on the Sydney route. Three days later, Baader-Meinhof terrorists announce plans to blow up three Lufthansa jetliners in retaliation for the deaths of the three imprisoned colleagues, who allegedly committed suicide after learning of the failure of the Somalia raid.

All roundtrip Frankfurt-Algeria flights are halted between November 9 and 11 because of the refusal of the Algerian government to allow West German guards to conduct searches of passengers boarding at Algiers; in the U.S., the FBI tightens its protective net over those airports served by Lufthansa. On November 19, the Baader-Meinhof gang calls off its threat against the carrier.

Orders are placed for four more A300B4-2Cs in November and the fleet now includes 111 aircraft: 93 for the parent, 16 for **Condor Flugdienst, GmbH**, and 2 for **German Cargo Airlines, GmbH**.

Enplanements rise slightly to 11,704,485. Revenues are DM 4.56 billion, and the net increase dips to DM 39.7 million.

The workforce is 29,400 in 1978 and the B-747-230C *Saarland* arrives on March 16.

The 114th destination is added on April 1—Abidjan, Ivory Coast; the same day, A300B2-1C flights are started Frankfurt to Jeddah via Athens, and a direct flight from Munich to Cairo.

Retroactive to January 31, the board of directors on June 29 authorizes purchase of 26% interest in **Deutsche Luftverkehrsgesellschaft, mbH. (DLT)**.

The fourth B-747-230C, *Schleswig-Holstein*, is received on October 20.

On November 1, service is extended to Graz and Basel and reduced fare Skyblue Weekend Trips are initiated to 14 European cities. The B-747-230Bs *Nordhein-Westfalen* and *Baden-Wuerttemberg*, purchased in 1970–1971 and sold on November 2, are replaced on November 10 by an up-engined unit of the same type and with the same name as the latter unit.

The new B-747-230B *Bremen* arrives on December 13 and, also in December, the freighter *Cargonaut* is replaced by a newer all-cargo Jumbojet, the *America*.

Passenger boardings rise 7.5% on the year to 12,576,185 (plus 2.1 million for Condor) and freight is up 11%. Revenues exceed DM 5 billion for the first time (DM 5.01 billion) and DM 42.5 million in profits are reported.

New hostess uniforms are introduced on January 1, 1979, the same day Business Class service is initiated on the North Atlantic route; smoking sections are also introduced aboard all aircraft.

The new B-747-230B *Niedersachsen* arrives on January 11 and the B-747-130 *Bayern* is sold later in the month. The B-747-230C *Bayern* is placed into service on February 9 and a jet fuel shortage causes a cancellation of 10 flights from West Germany to New York on March 9.

On March 22, orders are placed for 32 B-737-230s, followed on April 2 by a \$1.5-billion request for 25 A310-203s.

On April 1 new service is launched to Venice and Miami and the Los Angeles run is extended to San Francisco.

The B-747-230B *Niedersachsen*, acquired in 1972, is sold in May and replaced by an up-engined machine of the same type and with the same name.

DC-10-30 flights resume on June 19, following a 2-week suspension due to the Chicago **American Airlines** crash; U.S.-bound DC-10 operations are restarted without restrictions on July 13.

In July, capitalization is increased to DM 900 million.

Improperly monitored or warned by ATC, Flight 527, the B-707-330C freighter *Essen* with three crew, flies into a mountain just after takeoff from Florianopolis, Brazil, on July 26; there are no survivors.

To help offset rising fuel prices, fares are increased on September 1.

En route from Frankfurt to Cologne on September 12, a B-727-230 with 128 passengers is hijacked by a lone assailant, claiming to have a real pistol (it is a fake). After arriving at Cologne, the aircraft is kept in a corner of the airfield while the pirate negotiates for seven hours before reading a statement demanding better world conditions. After a few more hours of discussions, he finally surrenders, releasing all of the hostages.

Pope John Paul II arrives for a Federal Republic tour on November 19 aboard the A300B4-2C *Lindau-Bodensee*.

Passenger boardings accelerate 9.2% to 13,736,932, freight is up 12.1%, and revenues reach DM 5.64 billion. Profits climb to DM 68.8 million.

Airline employment is increased 2.8% in 1980 to 30,664.

In February, **Condor Flugdienst, GmbH** receives its second DC-10-30.

On April 1, weekly flights begin to Beijing, Atlanta, and Dallas (DFW); Ibiza is added to the night schedule and twice-weekly service to Sydney via Kuala Lumpur, is inaugurated. On the cargo marketing side, a change in emphasis is made with the company's worldwide services now being stressed over guaranteed rate incentive program (GRIP). The introduction of B-747SLs on the Rio route now allows elimination of the Dakar stop.

On May 20, orders are placed for four additional Jumbojets; a month later, on June 20, **Condor Flugdienst, GmbH** boards its 20 millionth passenger.

The 1,000th pilot educated under an agreement with **Pacific Southwest Airlines (PSA)** completes his training at Phoenix, Arizona, on October 30.

Fly and Save discount fares are introduced on November 1 and Business Class service is extended on the long-haul routes to South America, southern Asia, and the Far East.

The B-747-230C *Hamburg* enters service on November 19 and Leningrad and Seoul join the passenger network before year's end.

Enplanements rise a slight 1.2% to 13.9 million and cargo is up 1% to 1.5 billion FTKs; sharply increased expenses lead to a drop in profits to DM 5.6 million.

The employee population is reduced by 1.4% in 1981 to 30,229.

In January, a Univac SU 100/80 data processing system, the largest in the Federal Republic, begins operation at the Frankfurt facility. Also during the month, the carrier receives the 1980 "Technology Management Award" from *Air Transport World* magazine.

In late winter, two A300B4-2Cs are leased to **Air Algerie, S.A.** In April, frequencies to Miami, Atlanta, and Dallas (DFW) are increased (the latter two nonstop); San Juan is added to a Mexico City, Bogota, Lima, La Paz Andes route. Service to Manila via Karachi and Bangkok becomes twice weekly and Oporto and Tangier operations commence.

A new cargo facility is occupied at Miami.

A second B-747-230F, the *Asia*, is delivered on September 4, allowing upgraded cargo services to begin in October on routes to the U.S., South America, and the Far East. At the same time, an alliance is entered into with **Cathay Pacific Airlines (Pty.), Ltd.**, providing for cargo co-operation through Traxon Europe and Traxon Asia.

The last B-737-130 is now retired, replaced by the 32 B-737-230s ordered earlier, along with the B-747-230C *Berlin*, which arrives on December 23.

During the year, the company's marketing expert, Hemjo Klein, is hired on to oversee marketing and customer services for the German Railways. He will be instrumental in the development of the railroad's high-speed trains.

Effects of the world recession continue to be felt as passenger boardings dip 0.3% to 13,894,000 and freight is off 0.8% to 1.51 billion FTKs. Still, due primarily to the strength of diversified interests, a DM 5.6-million net profit is recorded, despite an operating loss of DM 177.5 million. Overall revenues are DM 7.73 billion.

The workforce is 30,712 in 1982.

The world's most modern freight terminal, Lufthansa Cargo Center, begins operations at Frankfurt on February 7, although it will not be officially dedicated until June.

Meanwhile, the B-747-230C *Köln* enters service on February 25.

A cost-cutting program is now effected and fuel consumption will be reduced 7% during the year.

The summer timetable starts on March 28; frequencies are increased and larger aircraft introduced on several international routes.

To help improve domestic feed, the Lufthansa Airport Express 122-passenger streamlined railway train is introduced from Frankfurt Airport to Bonn, Cologne, and Düsseldorf. It is the only airline-owned train in the world and is operated in cooperation with the German Railways.

In May, the carrier completes installation of sleeper seats in the first-class cabins of its B-747s and DC-10s.

Former Transport Ministry Undersecretary Heinz Ruhnau succeeds Herbert Culmann as board chairman on June 30; the popular Culmann has retired two years early to save Lufthansa any embarrassment over charges of travel agent kickbacks that have surfaced in the media. On July 14, the executive board is reorganized by the addition of a sixth member as CEO-Technical Services Abraham becomes deputy chairman.

On September 15-16, a B-747F flies 26 Spanish Riding School Lipizzaners from Vienna to New York for a month-long tour, returning them to Austria in late October.

In November, Düsseldorf is added as a stop on the polar route to Japan and, at year's end, Business Class service is extended to all foreign routes.

The B-747-230C *München* begins flying for the company on December 20.

Passenger boardings decline another 0.3% to 13,477,568, but freight is up 6.1% to 1.6 billion FTKs. Revenues ascend to DM 8.11 billion and the net profit is DM 19.8 million (\$18.4 million).

The workforce is increased in 1983 by 2.8% to 31,575.

The company, in January, receives the "Airline of the Year Award" from *Air Transport World* magazine.

In April, new service is started to Calgary, Vancouver, Djerba, and Heraklion. Domestic B-737-230 frequencies are also increased, including 18 daily Frankfurt-Munich and 13 daily Frankfurt-Hamburg; the Lufthansa Airport Express train begins stopping at Düsseldorf Airport.

In America, a cargo handling facility is opened at Dallas (DFW).

The first 8 of 22 A310-203s are delivered during the year, with the first, *Neustadt a.d. Weinstr.*, beginning Frankfurt-Stuttgart service on April 10. Vancouver, Calgary, Djerba, and Crete join the route network in May and June.

By summer, the **Condor Flugdienst, GmbH**, fleet includes 3 DC-10-30s, 8 B-727-230s, 4 B-737-230s, and 4 A300B4-2Cs. The last A300B2-1C is disposed of at the end of October as the A300B4-2Cs begin conversion for international services.

On December 23, a DM 250-million order is placed for 6 additional B-737-230s.

Passenger traffic rises 3.2% to 14,308,000 and cargo inclines upward by 21.3% to 1.94 billion FTKs; the fleet's 100 airliners fly a total of 183,000 flights. Revenues accelerate 8% to DM 8.82 billion (\$2.94 billion) and net profit doubles to DM 63 million (\$36 million).

In 1984, the employee population is increased 3% to 32,535.

Just after removing snow from the only operational runway during a blizzard at New York (JFK) on January 18, a B-747-230 with seven crew is granted permission for takeoff. Meanwhile, an automobile, with four passengers, approaches the runway, its driver thinking it closed. When the pilot of the Jumbojet spies the car, he aborts takeoff, while the auto driver applies his brakes. The car slides onto the runway and, although there is no collision, jet exhaust from the aircraft overturns the car and injures its occupants, one seriously.

New service is started to Malta and Seoul at the beginning of the second quarter; the reconfigured A300B4-2Cs are placed on routes to the Gulf States.

Meanwhile, board member Guenter Eser becomes IATA president and is succeeded as CEO-marketing and sales by Frank Beckmann.

In the fall, during the trade fair, the carrier begins scheduled service to Leipzig, the first regular flights into East Germany by the West German flag line.

A 10% interest is purchased in Kempinski Hotels, A.G., while 25% shareholding is acquired in the German subsidiary of Avis car rentals. Cargo facilities at Los Angeles, San Francisco, and Atlanta receive \$81-million worth of improvements. In November, a commercial agreement is signed with **Middle East Airlines, S.A.L.**

While on approach to New Orleans on December 20, a B-747-230 with 365 passengers must take violent evasive action in a right turn to avoid a midair collision with an unidentified light plane. The last Stratoliner is retired on December 31.

Enplanements are boosted 7.2% past the milestone 15-million mark (15,335,000) and freight advances 16.8% on the year to 2.27 billion FTKs. Operating revenue jumps 17% to DM 10.37 billion and expenses rise only 10%, leaving a whopping DM 162-million profit.

The workforce is increased 7.3% in 1985 to 34,905. Three B-747-330s and 6 B-737-230s are delivered, bringing the fleet totals to 19 B-747-230/330s, 11 DC-10-30s, 4 A300B4-2Cs, 8 A310-203s, 28 B-727-230s, and 38 B-737-230s.

Esam Fachr el-Din Agha Bdawi and Gamal Khaiaf, Syrians being deported from West Germany, seize a B-737-230, with 43 passengers on February 27 and force it to land in Vienna. On the ground in Austria, agents, posing as a reporter and a lawyer, persuade the pair to surrender after a five-hour standoff. The two will be tried and given prison terms.

A lone hijacker, armed with a knife and broken bottle, seizes a B-727-230 with 151 passengers and en route from Munich to Athens on March 27, and force it to fly to Istanbul for refueling, reportedly after being denied permission to land in Libya. On the ground in Turkey, the man frees his captives and surrenders to police. He will be tried in the Turkish capital and will receive an eight-year prison term.

On March 29, a B-737-230 flying between Hamburg and London with 114 passengers is taken over by a lone assailant, who demands to be flown to Hawaii. The aircraft arrives at London (LHR), where the man is captured.

New services are inaugurated to Houston, Bahrain, Lyon, Salzburg, and Muscat; the former city is the twelfth U.S. gateway. Passenger flights are operated to the spring Leipzig fair.

The new B-747-230C *Frankfurt* is delivered on May 24; it is followed into service by the B-747-230C *Düsseldorf* on June 28. A new cargo facility is opened at Atlanta, also in June.

The same month, a memorandum of understanding is signed with **CAAC (General Administration of Civil Aviation of China)** for a two-phase technical cooperation project. Phase 1, in which DLH executives consult on the technical improvement of Chinese workshops, begins on July 1; the second phase, which will begin later, is a joint venture for aircraft maintenance.

A broad-based marketing agreement is completed with **United Airlines** on July 3, calling for a meshing of the airlines' flight schedules at 10 American airports and enhancement of the automation features between the carriers' reservations systems.

Also in July, Dieter Uchtdorf becomes chief pilot and orders are placed for seven Airbus Industrie A300B4-603s.

The B-747-230F *Europa* enters service on October 25 and, also in October, a second weekly B-747-230C flight is offered to Beijing.

Upon his retirement from the board at year's end, Capt. Utter is succeeded as CEO-operations by Capt. Martin Gabel.

Enplanements for the year rise 3.6% to 15.9 million and freight shoots up 5.8% to 2.4 billion FTKs. For the first time in the airline's history, more cargo is carried (in terms of ton kilometers) than passengers. Revenues are up 3% to DM 10.68 billion and expenses 2% to 4.4 billion, producing profits of DM 106.9 million (operating) and DM 63 million (net). At year's end, the carrier ranks 13th among all world airlines in terms of passengers carried, 5th in cargo, 16th in fleet size, and 7th in the total number of employees.

The Boeing 747-230C *Hannover* joins the fleet on February 14, 1986 and on March 30 daily flights are inaugurated from New York to Stuttgart while the daily nonstop New York–Munich service becomes nonstop.

Also in March, an alliance is signed with **Korean Airlines/Korean Air (KAL)** providing for joint freight flights on the route from Frankfurt to Seoul.

In April, a B-747-230C is introduced on the Nairobi and Johannesburg route and a third weekly flight is inaugurated to Beijing. The B-747-230C *Kiel* arrives on April 10 and in June orders are placed for six advanced B-747-430s.

At midyear, Friedrichshafen-based **Delta Air Regionalflugverkehr, GmbH.**, under contract to the major, begins to offer SAAB 340A commuter flights to Frankfurt.

In September, the first of 20 B-737-330s is delivered while in mid-month, the board announces a reorganization, beginning with the creation of one airline division for sales and another for marketing.

Another B-747-230F, the *Africa*, arrives on October 24 and a bomb explodes at the main offices in Cologne on October 28; there are damages, but no injuries.

Two classes—Business and First—are introduced on European services on November 1.

The year's passenger boardings swell by 4.6% to 16,616,000 and cargo does better, rising 19% to 2.86 billion FTKs. Revenues are DM 10.19 billion and profits are DM 64 million.

Airline employment climbs 3.1% in 1987 to 39,088 and, on January 15, the company orders 15 A340-200s. The B-747-230C *Stuttgart* arrives on January 16, followed by the pure passenger B-747-230B *Bonn* on February 17.

Michele Jet, a 34-year-old American, is appointed in March as the carrier's first woman cockpit crew member, a B-727-230 flight engineer.

On April 1, DC-10-30s commence direct nonstop four-times-per-week flights Frankfurt–Washington, D.C., with a fifth weekly frequency following on April 26. Also in April, the first B300B4-603 enters service and a fifth weekly polar route flight to Japan is added.

Beginning in early May, Lufthansa offers four-times-per-week nonstop services from Chicago to Munich and daily flights from Chicago to Munich via Dusseldorf.

On June 1, in cooperation with **Alitalia, S.p.A.** and General Motors, company B-747-230Fs fly 56 Pininfarina car bodies each from Turin to the Cadillac Allante assembly line in Detroit, Michigan.

In cooperation with **Air New Zealand, Ltd.**, flights to Auckland begin on October 30. In November, flight begins to Luxor, Egypt, and Kathmandu, Nepal and, in Europe, to Eindhoven and Toulouse.

During December, a 24.5% interest is taken in the Luxembourg-based cargo charter operator **Cargolux Airlines International, S.A.**; as part of the arrangement, the two companies agree to coordinate their maintenance, marketing, and cargo handling. At the same time, 10% shareholding is acquired in the Hapag-Lloyd travel and shipping consortium. In addition, a new subsidiary is created to expand the carrier's hotel business.

Beginning on Christmas Day, a special fare, good through the following March, is introduced on flights from New York, Chicago, and Boston to Frankfurt, Dusseldorf, Hamburg, Stuttgart, Munich, Nuremberg, and Berlin.

Customer bookings jump 10.8% to 18,391,000 while freight zooms upward 17.9% to 3.32 billion FTKs. Revenues fall to DM 9.83 billion, while profit jumps to DM 86 million.

The workforce is reduced a slight 0.5% in 1988 to 38,910 and the fleet now includes 14 B-747-230Cs, 5 B-747-230Bs, 5 B-747-230Fs, 11 DC-10-30s, 7 A300B4-603s, 10 A310-203s, 24 B-727-230s, 38 B-737-230s, 11 B-737-330s, and 2 B-737-230Cs. Orders are outstanding for 10 B-747-430s, 2 B-737-330s, 3 A310-304s, 15 A320-211s, and 15 A340s.

On March 28, the number of frequencies from Frankfurt to Hong Kong is increased from five to seven weekly, including four nonstops. The first B-737-330 is placed into service, also in March, and represents

a milestone for Boeing: the first of the type to enter a third decade of service and the 1,500th manufactured. The installation of lighting strips on the cabin floors marking escape routes is completed for the entire fleet in April.

The Washington, D.C.–Frankfurt service becomes daily on May 2; simultaneously, nonstop service is initiated between Caracas and Frankfurt and between Bogota and Frankfurt. Also in May, the company adds its eighth and ninth flights to Los Angeles, at which international airport a new \$8-million cargo facility is officially opened on May 26.

In June, summer service is expanded to a total of 169 destinations in 83 countries, with new destinations added at Antigua, Valencia, Marseilles, and Friedrichshafen. During the month of July, Frankfurt to Tokyo flights commence over a route across the Soviet Union; requiring only 12 hours flying time, the service cuts five hours off the polar route.

A 49% interest is purchased in **EuroBerlin France, S.A.**, a regional airline set up in cooperation with **Air France** on September 9 to provide access to the former national capital. Work begins in September on expansion and improvement of the Hamburg engineering base; the \$270-million project will include at least two hangars and a warehouse.

The winter schedule features five new routes: Cologne to London (LGW), Frankfurt to Goteborg, Hamburg to Nice via Dusseldorf, Dusseldorf to Cairo via Munich, and Frankfurt to Tenerife.

The carrier inaugurates weekly DC-10-30 return service on October 7 from Frankfurt to Kathmandu via Karachi. The initial wide-body arrives with 198 passengers and departs with 34; it is anticipated that 9,000 West German travelers will visit Nepal in the next year.

Employing B-737-3T7s wet-leased, complete with crews and maintenance, from **Monarch Airlines, Ltd.**, **EuroBerlin France, S.A.** inaugurates regularly scheduled services on November 7 between Stuttgart, Munich, Frankfurt, Cologne, Bonn, and West Berlin's Tegel Airport. The start-up is protested by **Aeroflot Soviet Airlines**. Air traffic control delays over Munich and Frankfurt cost the carrier over 6,500 hours in holding and a similar amount in start-up lags.

Passenger boardings rise 5.4% to 19,400,000 and freight swells 6.5% to 3.5 billion FTKs. The year's net profit is DM 99 million (\$58 million) atop revenues of DM 10.6 billion.

The payroll grows by 11.9% in 1989 to 43,565 and service is provided to 174 destinations in 85 countries.

In January, service is increased from West Germany to Miami, Boston, and Toronto. In addition, the Frankfurt–Zurich–Bangkok service is expanded to six weekly flights.

During first quarter, plans are announced for the construction of a new \$33.7-million cargo terminal at Munich 2 Airport, itself now under construction.

In late March and in cooperation with **Aer Lingus Irish Airlines, Ltd.**, overnight B-737F all-cargo flights commence from Frankfurt to Birmingham, England. An interline agreement is signed with the Danish regional **Sun Air of Scandinavia, A.S.**, which begins flying dual-designator service on behalf of the German major from Cologne and Bonn to Billund.

A code-sharing and frequent flyer cooperative marketing agreement is signed with **Canadian Airlines International, Ltd.**; effective April 12, Lufthansa begins to purchase and market seats on Canadian, covering 19 flights a week from Germany to Canada. Also in April, the carrier wins a contract to overhaul the A300B4-620 fleet of **Saudia (Saudi Arabian Airlines)**.

A new color scheme is adopted for company aircraft in April that is designed to coincide with the creation of a "United Europe" four years hence. While the famous crane logo is retained along with tail fins in blue and yellow, the company drops the dark blue stripe on the window line of the upper fuselage of its planes. Aircraft are painted white from the wing line up and light gray below and the Lufthansa name is enlarged.

In May, a technical joint venture document is signed with **Air China International Corporation** for the development of a maintenance base at Beijing. Also at Beijing, a hotel and business center will be developed jointly with the City Council.

Plans are made with **Air France** for a strategic alliance that will include shared ownership of the Amadeus reservations system with **Iberia Spanish Airlines (2) (Lineas Aereas de Espana, S.A.)**.

The first B-747-430 arrives in midyear, but must begin service under a temporary certificate owing to a dispute between Boeing and European licensing authorities.

The first regularly scheduled postwar German flights between two points in West Germany and East Germany begin on August 10 when a DLH Boeing inaugurates a new twice-weekly roundtrip service from Frankfurt to Leipzig. The route chosen is through Czech airspace so as to avoid flying directly over the long-forbidden border. The next day, **Interflug DDR Airlines** launches twice-weekly service from Leipzig via Czechoslovakia to Dusseldorf.

During the month, the major, with 52% shareholding, becomes the primary owner of the regional **Deutsche Luftverkehrsgesellschaft, mbH. (DLT)**.

In September, a block-space agreement is entered into with **Singapore Airlines, Ltd.** that provides for four dual-designator freighter flights per week between Singapore and Australia.

The first A320-211 is received on October 16 and, using movable dividers between business and economy classes, is able during the following month to introduce a three-class configuration over European routes.

Beginning on November 1 and continuing for the next four months, free one-week automobile rental is offered international passengers to Europe under an arrangement with Avis. Also in November, twice-weekly service is inaugurated between Frankfurt and Leipzig, marking the first time that West and East Germany have been connected by the carrier's regularly scheduled flight service.

Deputy chairman and CEO-technical services Abraham retires at year's end.

In other activities during the year, the carrier, through Lufthansa Hotelgesellschaft, brings its shareholding in Kempinski Hotels, S.A. to 40%. In addition, it founds Lufthansa Design Center, GmbH., LUPEG Luftverkehrs-Personalgesellschaft, mbH., and Lufthansa AirPlus Servicekarten, GmbH. The company becomes a joint shareholder with **Swissair, A.G.** in the new Shannon Aerospace maintenance concern.

Customer bookings move ahead by 5.2% during the year to 20,400,000 and freight increases 10.2% to 3.9 billion FTKs. Revenues total DM 11.81 billion (\$6.7 billion) and allow a net profit of DM 124 million (\$72.9 million).

Company employment is increased by 10.3% in 1990 to 47,619 and the workforce is now the 7th largest among all of the airlines in the world. The 177-airliner fleet is the world's 11th biggest and as the year begins, the new deputy chairman and CEO-technical services, Juergen Weber, takes office.

Six-times-per-week B-747-430 service begins in January from Frankfurt to Hong Kong, along with twice-weekly flights to Singapore and weekly flights to Kuala Lumpur.

Also during the year's first month, Chairman Ruhnau engages **Interflug DDR Airlines** Director General Dr. Klaus Henkes in talks on co-operative projects between the two airlines. Undertaken in the philosophy of glasnost, the discussions result in an agreement for the joint use of training and other facilities, as well as the removal of all artificial barriers hindering air traffic between the two German states, including Berlin. In addition, Frankfurt to Leipzig frequencies are doubled to four a week, all via Czech airspace.

Also in January, the company announces a \$50-million investment to upgrade and improve domestic and European regional services, with emphasis upon seating renovations for all 107 of its short- and medium-range aircraft.

As a result of the Communist collapse and the previous month's discussions, the carrier and **Interflug DDR Airlines** announce their intentions in February to expand and intensify their cooperation under the marketing name Interhansa. Areas of joint activity now include scheduled passenger, freight and charter services and plans are made for a

joint Interhansa catering company, an Interhansa software company, a new Berlin airport, the establishment of an Interhansa A310 simulator center at Berlin's Schoenfeld Airport, and joint airport handling and engineering activities.

The West German carrier increases the number of its weekly flights into East Germany to 14. Eliminating the stopover at Rio de Janeiro and cutting the flight time to 2 hrs. 20 min., the carrier introduces weekly nonstop B-747-430 roundtrips between Frankfurt and São Paulo late in the month.

The first A310-304 is placed in transatlantic service in March and, on March 25, begins daily nonstop flights from Newark to Frankfurt and Hamburg. The same day, service is inaugurated from Frankfurt and Munich to Dresden, and is followed on March 31 with flights to Dresden from Stuttgart. The Cologne hub is now shut down and the interline agreement with **Sun Air of Scandinavia, A.S.** is cancelled.

In April, the subsidiary Lufthansa Airport Services is established to expand the carrier's participation in new airport projects, particularly in Eastern Europe. The first contract calls for the establishment of a joint company with **Aeroflot Soviet Airlines** to modernize and expand Moscow's Sheremetyevo 1 Airport. In addition, the new entity is given the responsibility of serving as a holding company for existing DLH operating and handling subsidiary companies in Berlin, Lagos, Cairo, Singapore, San Francisco, and Los Angeles.

At the same time, a contract is signed with **Aeroflot Soviet Airlines** for the post-delivery maintenance of that airline's new A310s.

Also in April, the airline announces that it will proceed with plans to acquire 26% shareholding in **Interflug DDR Airlines** after the latter's employees vote 92% acceptance of the new relationship with the West German carrier.

Meanwhile, in a switch that catches many observers by surprise, Lufthansa reverses its decision and places \$480 million in orders for IAE's V2500 engine for its A321s instead of the CFM-56. It also joins with **THY (Turkish Airlines, A.O.)** as a joint shareholder in the new charter operator **Sun Express, A.O.** On April 30, DLH opens a second nonstop Frankfurt to Chicago route.

Nonstop daily flights commence from Newark to Cologne on May 1, the same day nonstops begin from Cologne to Washington, D.C. (IAD). Simultaneously, twice-weekly frequencies are opened between Stuttgart and Leipzig.

Late in the month, **Pan American World Airways (1)** places its German service up for sale.

In June, five-times-per-week nonstop service is opened from Frankfurt to Atlanta and weekly flights begin from Dresden to Munich and Stuttgart. The weekly nonstop roundtrip service between Frankfurt and Houston now becomes a one-stop, as passengers are also boarded at Dallas (DFW).

Later in the month, the European Commission rules that DLH should give up its tactics designed to drive low-fare competitor **Air Europe, Ltd.** to abandon its London-Munich scheduled service.

Beginning in July, the number of flights on routes from West Germany to East Germany is increased from 31 to 56 per week. At the same time, and in conjunction with Olson-Travelworld, the airline offers 22-day inclusive-tour packages of the Soviet Union; the Classic Tour of Russia is operated from the Black Sea north to the Baltic.

Thrice-weekly nonstop frequencies are mounted on August 1 from Frankfurt to Charlotte, North Carolina, under a special six-month grant from the U.S. Department of Transportation.

On August 2, as the result of Iraq's invasion of Kuwait, the flag carrier in the weeks ahead suspends its daily service from Frankfurt to Tel Aviv, as well as other frequencies to Damascus, Bahrain, Riyadh, Abu Dhabi, and Luxor.

In September, the carrier signs a letter of agreement to purchase the German Internal Service of **Pan American World Airways (1)** for \$150 million. Following reunification in October, the sale is finalized and Lufthansa is at last, and officially after four decades, able to begin service to Berlin's Tegel and Schoenfeld Airports on October 3, employing

nine B-727-235s wet-leased with crews from the American pioneer. All 74 of Pan Am's daily flights are continued by DLH from the one-time capital of united Germany to Hamburg, Nuremberg, Frankfurt, Stuttgart, Dusseldorf, and Munich.

Plans to acquire a 26% stake in **Interflug DDR Airlines** are dropped on October 16 and an unsuccessful effort is now made to purchase the East German airline outright.

The first direct DLH flight from the U.S. to Berlin is routed from Newark to Schoenfeld Airport on October 28, just 25 days after German reunification.

Also during the fall, the number of weekly flights between West Germany and East Germany grow to 68 from 56.

The carrier joins with **THY Turkish Airlines (Turk Hava Yollari, A.O.)** in acquiring shareholding in the new charter carrier **Sun Express, A.O.** Daily Berlin-Newark A310-304 service begins in November, followed in December by daily flights from Berlin to Moscow.

Joint cargo flights commence with **Air China International Corporation** in December between Frankfurt and Beijing.

At home during the year's last month, frequencies between Berlin and major cities to the west are Dusseldorf, 38, Frankfurt, 102, Hamburg, 31, Munich, 32, and Stuttgart, 19.

At the end of the year, a cooperative agreement is signed with **Garuda Indonesia** covering a joint increase in frequencies and destinations with Germany and Indonesia, the strengthening of cargo operations, and the provision of Airbus training for Garuda engineers as well as support of that airline's new equipment.

Despite the Gulf Crisis and currency fluctuations, passenger boardings climb 9.8% to 22,400,000; as a result, the German carrier ranks 12th in the world in this category. Thanks to a 4.9% cargo increase to 4.1 billion FTKs, the airline is second in the world, behind **Federal Express**, in freight. Although revenues are up to DM 12.8 billion, profit falls to DM 9 million and will be the last enjoyed for several years.

The payroll is increased by 5% in **1991** to 50,000; however, no new aircraft are acquired.

With German reunification comes both opportunity and difficulty. In January, ski packages are offered through March, in cooperation with five tour operators, to Innsbruck, Salzburg, Kitzbuehel, St. Anton, Zell am See, and Garmisch-Partenkirchen. Also, weekly service is initiated from Frankfurt to Ho Chi Minh City via Singapore.

In order to avoid layoffs as the Iraq war-created fuel crisis deepens, the airline announces a hiring freeze, a ban on overtime, and unpaid leaves for some workers.

As the result of a February agreement, the carrier joins **Namib Air, Ltd.** in operating twice-weekly Jumbojet roundtrip service from Frankfurt to Windhoek, Namibia.

A DLH cargo consultant is sent out to Jakarta to coordinate the functioning of **Garuda Indonesia's** new cargo facility.

During the month, the carrier receives Boeing's 5,000th B-737, a Dash-530, and resumes its daily service from Frankfurt to Tel Aviv, following it with the renewal of flights to Damascus, Bahrain, Riyadh, Abu Dhabi, and Luxor.

On March 31, twice-weekly nonstop DC-10-30 services begin from Munich to Miami. During the second quarter, CEO-Marketing and Sales Ernst-Adrian von Dornberg is appointed to the supervisory board of directors. A marketing agreement is signed with the Austrian airline **Lauda Air Luftfahrtgesellschaft, A.G.**; under its terms, the two will share a Vienna to Miami via Munich roundtrip nonstop service, with the Austrians responsible for the Munich-Vienna segment.

In July, twice-weekly B-747-430 flights commence from Frankfurt to Nagoya via Hong Kong as part of a joint freight compact signed with **Japan Air Lines Co., Ltd. (2)**. In August, a second weekly flight is added to Ho Chi Minh City, while capacity is changed between Frankfurt and Washington, D.C. (IAD); a B-747-230B replaces a DC-10-30 on the run.

Ordered earlier, the first A340-211 makes its maiden flight from Toulouse on October 25. Thrice-weekly B-737-330 services start from

Frankfurt to Kiev on October 28, the same day thrice-weekly B-737-230 frequencies are undertaken from Frankfurt to St. Petersburg via Riga.

A \$414.58-million expansion of the Hamburg technical base is completed in December, the same month a second Jumbojet freighter is added on the company's all-cargo route from Frankfurt to Atlanta, continuing to Mexico City.

As the year ends, a new alliance is signed with **Finnair O/Y**. In addition to frequent flyer program linkage, block-seat passenger flights commence to Helsinki from Berlin and Munich and from Hamburg to Turku; meanwhile, block-space cargo service is initiated to Helsinki from Frankfurt via Cologne.

The domestic market increases more than 50% and with **Interflug DDR Airlines** out of business, passenger boardings for the year climb 12.1% to a record 25,070,900. Freight is also up, by 2%, to 4.17 billion FTKs. The financial picture darkens as a DM 444-million (\$267.5-million) net loss is reported atop revenues of DM 14.31 million.

Early in **1992**, Deputy Chairman Weber becomes chairman of the executive board with Deputy Chairman/CEO Klaus G. Schlede. As the two begin a restructuring process designed to improve the airline's financial status, CEO-Marketing and Sales Beckmann begins his planned retirement. The first move is to cut employment by 12% to 44,000. Just as the reduction in force will take the remainder of the year, so too will the retirement of 26 aircraft and the consolidation of several routes. Marketing and sales are reorganized into two groups in February, creating a separate cargo division under Chief Operating Officer Wilhelm Althen. In March, the subsidiary **Deutsche Luftverkehrsgesellschaft, mbH. (DLT)** is renamed **Lufthansa CityLine, mbH.** and is given responsibility for its parent's European nonstop services, employing aircraft with up to 100 seats.

A new in-flight service package is introduced in April that features new accommodations in both first- and economy-class, new food services, and upgraded in-flight entertainment.

In May, a one-day civil servant strike closes the airports at Frankfurt, Dusseldorf, Hamburg, Hanover, Munich, Nuremberg, Stuttgart, Cologne, Bonn, and Berlin's Tegel and Tempelhof Airports; the job action costs the flag carrier DM 40 million (\$24 million).

To combat this and other rising expenses, the carrier announces a major cost-cutting program. Having been acquired in May by a consortium of German banks and **British Airways, Ltd. (2)**, **Delta Air Regionalflugverkehr, GmbH.** is renamed **Deutsche BA, GmbH.** and begins competing with German flag carrier on routes out of Berlin. Plans are announced for the reduction in force of 1,000 workers by year's end.

Plans are revealed for the creation of a large luxury hotel group through the combination of Kempinski A.G., in which DLH holds 42.6% interest, and the Societe des Hotels Meridien, in which **Air France** controls 57% of shareholding.

Early in June, thrice-weekly roundtrips commence from Frankfurt to Minsk, Tallinn, and Vilnius. At the end of the month, the April plan to merge hotel operations with those of **Air France** are cancelled.

The megacARRIER's U.S. training center in Arizona is purchased from the PS Group in July for \$12 million; the transaction includes 60 aircraft. Also during the month, it is announced that first-class service will be ended on European flights.

In early September the supervisory board approves a broad-based reform package, supported by the major unions, to help the airline weather the most severe financial storm in its history. Under its terms, announced by Chairman Weber, the company will save DM 1 billion (\$717 million) in two years though the introduction of an austerity program that cuts another 6,000 workers, imposes a yearlong pay freeze, and introduces a two-tier wage structure. Additionally, 26 aircraft will be parked in the Arizona desert. Later in the month, cargo operations are reorganized into an independent operating division separate from passenger sales; as part of the changeover, four cargo centers are established in North and South America: Toronto, New York, Miami, and Rio de Janeiro.

Another subsidiary, "Lufthansa Express, GmbH." is created in October to take over the airline's domestic routes while a 26.5% interest is acquired in the Austrian airline **Lauda Air Luftfahrtgesellschaft, A.G.**

In a move designed to secure a strategic partner interested in geographic expansion and similar to that initially attempted between **British Airways, Ltd. (2)** and **USAir**, Lufthansa joins California financier Marvin Davis in making a bid for takeover of **Continental Airlines**. The German proposition, like the British, is withdrawn. Service to Charlotte, North Carolina, and Philadelphia is suspended on October 25.

Also in October, a B-747-230C en route to America is forced to divert to Keflavik when fire extinguishers twice go off, dousing 20 head of cattle in the cargo compartment.

Weekly roundtrips are inaugurated on October 31 between Frankfurt and Almaty, Kazakhstan.

Employing 28 A300B4s and B-737-330s, "Lufthansa Express, GmbH." begins operations in November, linking Hamburg, Berlin (Tegel Airport), Dusseldorf, Cologne, Bonn, Frankfurt, and Munich.

Also in November, an enhanced marketing relationship begins with **Lauda Air Luftfahrtgesellschaft, A.G.** as the Austrian partner, employing Canadair CRJ-100 Regional Jets, begins to offer code-sharing on flights to nine European destinations from Vienna and Salzburg. Joint European marketing and sales are also initiated.

Late in the year, workers take a pay cut, a fiscal action almost unprecedented in postwar Germany.

In December, 13% shareholding is taken in **Luxair, S.A.**, together with an option to acquire another 10% over the next three years, while the two begin code-sharing, through ticketing, and a joint frequent flyer plan.

Passenger boardings ascend 11.3% to 27,891,900 and freight climbs 5% to 4.4 billion FTKs. Revenues move ahead by 4.5% to DM 14.95 billion (\$9.3 billion), but expenses are higher. The operating loss is a staggering \$174.7 million while a net loss of DM 373 million (\$21.4 million) must also be absorbed.

Airline employment stands at 42,841 in **1993**, down 5.6% from the previous year.

The company headquarters along the Rhine at Cologne, as well as the Seeheim training center, are sold and leased back in January. To earn additional, if minor, income, the airline now allows members of the public to utilize its flight simulators in Bremen.

In mid-month, the carrier joins **Alitalia, S.p.A.** in replacing **British Airways, Ltd. (2)** as frequent flyer partner of **Ansett Australia (Pty.), Ltd.** The company also begins to share passenger lounges in Sydney, Melbourne, and Brisbane, becomes sales agency for Ansett's domestic sectors, and begins connecting service from Frankfurt via Sydney to Brisbane and Melbourne.

The first A340-211 is delivered in Frankfurt ceremonies on February 2 and is christened *Stuttgart*. It enters service on March 15; during the next three quarters, five more Dash-211s and three Dash-311s will join the fleet.

On February 11, having previously been denied entrance into the U.S. and with urgent family business there, Ethiopian gunman Nebiu Demeke, facing deportation from Europe back to his homeland, hijacks an A300B4-605R. He diverts the aircraft with 104 aboard and en route from Frankfurt to Cairo over Lofar, Austria, to New York (JFK), where he surrenders to police. Demeke will be tried in federal court for air piracy and will receive a 20-year prison sentence.

The Lufthansa Airport Express, run in cooperation with the German Railways, is discontinued in late February and replaced by one of the railroad's own high-speed trains. Hemo Klein, who had departed the airline over a decade earlier to work with the German Railroads, is rehired as sales manager.

The new relationship with **Luxair, S.A.** is inaugurated during the first quarter with shared passenger lounges, through ticketing, a linkage of frequent flyer programs, and dual-designator flights between Luxembourg and Germany. Weekly roundtrips are inaugurated on March 29 between Frankfurt and Tashkent, Uzbekistan.

During the spring, "Lufthansa Express, GmbH." gradually takes over all of the major's domestic services and is joined by the former independent **Lufthansa CityLine, GmbH.**, which is now folded into the LE subsidiary.

A cargo transshipment hub is established at Sharjah, U.A.E., specifically to handle an increase in the flow of air freight to India, Nepal, and Sri Lanka.

As the second quarter begins, the company joins in serious partnership and code-sharing discussions with **American Airlines**.

Marketing director and member of the board von Dornberg abruptly resigns in April. At the same time, the carrier signs an agreement with the Indian-based Modi Group to help it establish **Modiluft**, a new domestic airline. Three B-737-230As are leased to the carrier, which begins service in May, and an aircraft maintenance contract is signed.

A strategic alliance and code-sharing agreement is signed with **VARIG Brazilian Airlines (Viacao Area de Rio-Grandense, S.A.)** in June; under its terms, which will become effective in November, the two pledge to coordinate their schedules and other services.

In cooperation with **Lauda Air Luftfahrtgesellschaft, A.G.**, twice-weekly nonstops commence later in the month from Los Angeles to Vienna via Munich; the Austrian airline flies the Munich-Vienna segment.

During the summer, the leisure-travel subsidiary **Condor Flugdienst, GmbH.** takes over routes to Spain and the thrice-weekly service to Detroit. In July, it inaugurates twice-weekly flights on behalf of its parent from Frankfurt to Taipei via Bangkok.

The megacARRIER enters into code-sharing agreements with two European regionals during August. DLH markets the **Brymon Airways, Ltd./Air France** service from London (LCY) to Paris throughout Germany. It also joins with the Scottish company **Business Air, Ltd.** when it inaugurates twice-weekday roundtrips from London (LCY) to Frankfurt on August 31.

An arrangement is made with **Federal Express** on September 1 to lease its 13 A310-203Fs to the American freighter, which in turn will sublease, beginning in 1998, five B-747-245Fs to the German flag carrier; the Airbuses will maintain FedEx routes around the continent.

Negotiations now begin with the company's unions.

Although capacity is increased by 2.6%, flights over unprofitable routes are reduced by 2.1%.

As the result of separatist Serb threats to shell the Croatian airports of Zagreb, Pula, and Rijeka, DLH joins **Austrian Airlines, A.G.** on September 13 in suspending services into Zagreb. The German carrier elects to terminate its Frankfurt-Zagreb service in Graz, Austria.

Just after landing in poor weather at Warsaw on a September 14 service from Frankfurt, Flight 2904, an A320-211 with 6 crew and 64 passengers, runs off the right side of the runway and rolls 90 m. into an embankment (2 dead).

A GE CF6-50 on a B-747-230B sets a new world record for time-on-wing for large turbofan engines on September 16; removed after more than 62 months, it is shown to have accumulated 25,216 hours and 4,210 cycles.

Culminating a lengthy courtship, the company joins with **United Airlines** on October 2 to announce that the two are joining forces as marketing and code-sharing partners. Under the arrangement, which does not include the usual exchange of equity, passengers of either carrier may share in the other's frequent flyer program and use either one's airport lounges. There will be through check-in, advanced seat reservations, and shared terminal facilities. Additionally, the two will code-share, employing DLH for the German leg of transatlantic flights and UAL for the American portion. Over 3,100 weekly connections are involved in the U.S. and Germany.

A code-sharing agreement is also signed with **Adria Airways** during the month providing for joint flights from Frankfurt to Ljubljana. **CSA Czechoslovak Airlines, A.S.** signs a block-space agreement with DLH late in the month covering the Munich to Prague service. **Cargolux Airlines International, S.A.** begins to code-share with DLH on cargo frequencies from Frankfurt to Luxembourg and on flights from San Francisco to Los Angeles.

The company now visits 218 destinations in 93 countries around the world.

After a yearlong wage freeze, company employees receive a 2.5% pay raise in early November.

At the same time, the alliance with **VARIG Brazilian Airlines (Viaçao Area de Rio-Grandense, S.A.)** comes into effect. In addition to general sales and marketing cooperation, plus joint check-in and frequent flyer programs, code-sharing services are inaugurated on 28 weekly routes from Frankfurt to Rio de Janeiro and São Paulo.

To cut costs, Chairman Weber unveils a new program on November 27 that will eliminate 8,400 jobs, abolish unprofitable routes, and spin off air freight, catering, and some passenger services to independent subsidiaries.

Plans to create a low-fare, high-frequency Euroshuttle are shelved in December.

Meanwhile, **Air India, Ltd.** objects to a company request for a massive 67% increase of capacity to India; not exercising its own 10-flights-per-week quota, the Indian carrier does not wish to see competition increase and requests that DLH pay royalties.

Customer bookings advance a modest 2% to 28,438,500 while cargo rises 6.5% to 4.67 billion FTKs. Cost-cutting has a significant impact on the financial picture. Although revenues are DM 14.96 billion (\$8.8 billion) and expenses are \$8.82 billion, the operating loss is cut to \$29.4 million. The net loss is DM 111 million (\$34 million).

Airline employment is increased by 2.9% in 1994 to 44,100 and the fleet includes 243 aircraft.

Launch customer for the A321-121, Lufthansa receives its first unit, christened *Finkenwerder*, in Frankfurt ceremonies on January 27.

Later in the month, **Delta Air Lines** asks the U.S. DOT not to grant DLH new code-sharing authority until the German government allows the Atlanta-based major to provide its own ground handling for its own flights landing at Frankfurt.

In February, the company begins accepting cargo feed at Moscow delivered by the Russian freight line **Aviatrans** from destinations throughout the CIS.

Late in the first quarter, 38% shareholding is acquired in the Scottish regional **Business Air, Ltd.**; plans are made to acquire a larger presence in the U.K. through joint flights from Frankfurt to London (LCY) and schedule coordination for passengers connecting with DLH at Manchester.

A contract is signed with **Air China International Corporation** on March 30 for the training of 76 former Chinese Air Force pilots as commercial pilots at the German airline's U.S. flying school. The first former-military pilots arrive at the Phoenix, Arizona-based facility in April for a special 4 1/2-month course.

The same month, **Air India, Ltd.**, after concessions from the German carrier, abandons its objections to a 67% increase in DLH capacity to and in India. In exchange for the establishment of a joint Germany-based tourist fund to promote India in Europe, DLH is granted 15 new routes to the subcontinent. In addition, the German flag line promises to pay the new fund \$15 for every passenger above an agreed upon level who will fly over the routes.

Chairman Weber suggests that a further interest may be acquired in **Modiluft**, to which a fourth B-737-230A will be leased later in the year. At the same time, an alliance is signed with **Air India, Ltd.** under which DLH agrees to sell seats to the Indian major as it inaugurates a new twice-weekly A340-211 roundtrip route from Frankfurt to Madras. The new frequencies, flown in addition to 10 weekly B-747 frequencies from Germany to Bombay and Delhi, mark the entry of the long-range Airbus on Asian routes.

Twice-weekly A310-304 flights are inaugurated on April 10 linking Frankfurt with Ekaterinenburg in the Urals and Novosibirsk in Siberia; the airline is the first Western carrier to serve the cities.

German Transport Minister Matthias Wissman in May gives the green light for the company's privatization. With difficulties surrounding the impact on employee pensions solved, it is agreed that the whole of the government's 51.4% shareholding will be eventually sold; however, a \$1.2-billion share issue will soon be made without Berlin's participation, thereby reducing the national stake to but 38%.

An unconditional one-way fare is introduced by **Deutsche BA, GmbH.** on June 1 for passengers traveling in business- or economy-

class seating from Berlin to Cologne, Bonn, Dusseldorf, Munich, and Stuttgart as well as between Dusseldorf and Stuttgart. Fares are 10% less than those charged by Lufthansa.

The long-delayed code-sharing accord with United also begins on June 1 with two transatlantic flights from Frankfurt.

Also in June, the joint venture agreement with **Air Namibia, Ltd.**, covering operations between Windhoek and Frankfurt, comes to an end.

To combat the success of the new **Deutsche BA Luftfahrtgesellschaft, GmbH.** assault, the German flag carrier begins to fight back on July 1, introducing service by its "Lufthansa Express, GmbH." subsidiary over the five low-fare routes started by Deutsche BA the previous month. Deep-discount LE flights also commence from Munich to Cologne and Hamburg. The counterattack triggers a price war.

During July–September, 10 B-737-230As are sold to Indonesia's government-owned leasing agency, which will in turn distribute them to **Sempati Air, Merpati Nusantara Airlines, Mandala Airlines, and Bouraq Indonesia Airlines.**

As the result of talks successfully concluded during the first quarter, Lufthansa now becomes the first West European airline to serve Shanghai nonstop, offering thrice-weekly B-747-430 roundtrips to the city from Frankfurt via Beijing.

In early August, shareholding in **Lauda Air Luftfahrtgesellschaft, A.G.** is increased from 26.4% to 39.7%.

The company's privatization begins on September 20 with a three-weeks rights offering of 3.9 million shares to investors in Germany and abroad, excluding the U.S. By not participating, the German government reduces its stake from 51.4% to 41%, while the airline receives DM 1.2 billion (\$780 million) in capitalization. Within 10 days, 3.9 million shares are distributed. Commercial responsibility is assumed for **Business Air, Ltd.**'s Bank Express BAe 146-200 service from Frankfurt to London (LCY).

It is reported at month's end that, since the beginning of the alliance with **United Airlines** in June, an additional 130,000 transatlantic summer bookings have been recorded.

On October 10, the carrier enters into a strategic alliance with **Thai Airways International, Ltd. (THAI)** to expand its Asian passenger and cargo operations. Under the pact, the German flag carrier will increase its flights to Bangkok from 15 to 20 per week as both airlines operate as code-sharing partners. A total of 430 weekly passenger and cargo connections will eventually be shared, in addition to through check-in, advanced seat reservations, and terminal facilities. The frequent flyer programs of both carriers will be included.

Later in October, Chairman Weber announces a major restructuring that will come into effect on January 1. Three existing divisions, cargo, maintenance, and information technology services, will be divested into independent profit centers. Lufthansa Fracht, Lufthansa Technik, and Lufthansa Systems will each be launched with multiyear contracts with the parent that will be slimmed down to consist of just three central departments: managing directorship, finance and personnel, and passenger/operations.

The government of Indonesia purchases 10 B-727-230As from the carrier on November 9 for use by four local airlines. By year's end, government shareholding is just 35%.

Passenger boardings increase by 4.1% to 29,615,200 while freight soars 17.4% to 5.48 billion FTKs. In terms of cargo service, Deutsche Lufthansa, A.G. is the second largest airline in the world behind only **Federal Express.** Revenues jump 10% to \$10 billion and allow a \$197-million net profit.

Airline employment is increased by 44.4% in 1995 to 57,740.

Weekly roundtrips are launched on January 5 from Frankfurt to Baku, Azerbaijan. The company, in January, receives the 1994 "Airline of the Year" award from *Air Transport World* magazine.

In keeping with the plan of Chairman Weber announced the previous year, a major restructuring comes into effect on January 1.

As a result of EU pressure on France, DLH is able to commence flights into Paris (ORY) on January 2.

Following her discovery in Norway, Souhalla Sami Andrawes, sole survivor of the four Palestinian hijackers who took over the company plane recovered at Mogadishu, Somalia, in 1977, begins fighting her extradition back to Germany on January 8.

Also during the month, DLH begins a block-space agreement with **LOT Polish Airlines, S.A.** on frequencies between Berlin and Warsaw. The German terminus is moved from Berlin's Schoenfeld to the larger Tegel Airport. ATR 72s previously operated over the route are replaced with B-737s.

As the winter semester at the University of Bremen begins, an eight-semester course entitled International Study for Aviation Systems Technology and Management is inaugurated with Lufthansa Flight Training.

On March 27, the company begins discussions with **SAS (Scandinavian Airlines System)** aimed at mutual cooperation in a strategic alliance.

In April, a strategic alliance begins with **South African Airways (Pty.), Ltd.** Under terms of the pact, the two flag carriers will share frequent flyer mileage programs, lounges and terminal facilities, ground handling, and fly 86 joint connections per week between Germany and South Africa. Additionally, dual-designator cargo flights will be operated between Frankfurt and Johannesburg. Also during the first quarter, the company begins to code-share on those **Business Air, Ltd.** routes to and from Manchester that connect with the German major's flights.

A Transportation Ministry official announces on May 1 that the government hopes to dispose of its 36% stake in the airline by 1996 at the latest. He also points out that the carrier's cooperative agreement with **United Airlines** is adding thousands of bookings daily for the German carrier on the fiercely competitive North Atlantic routes.

A strategic alliance is entered into with **Canadian Airlines International, Ltd.** during the first week of May. In addition to joint marketing and promotions, ground handling, and frequent flyer program linkage, the two will code-share on an increasing number of flights between Germany and Canada.

On May 10, the European Commission elects not to object to the company receiving \$1.13 billion in pension subsidies from the German government, ruling that the move is not state aid, but rather a subsidy designed to help the carrier cut jobs as it moves from government to private ownership.

The next day, the carrier agrees to enter into an alliance with **SAS (Scandinavian Airlines System)** designed to combine the two carriers into the largest air transport system in Europe. Although the companies will remain independent and not merge, SAS will drop its ties with **Austrian Airlines, A.G., Swissair, A.G., and Continental Airlines**. Many other aspects of operation will be handled jointly, including passenger lounges and terminal facilities, frequent flyer programs, ground handling, check-in, cargo, inclusive tours, sales, and marketing. When fully implemented, over 2,500 weekly code-sharing connections will be offered in Europe and elsewhere.

The seventh of 10 Avro RJ85s arrives in early June, at which time it is announced that the remainder of the order will be completed by year's end.

Flight 436, an A340-211 with 5 crew and 65 passengers, violently reacts to a TCAS alert at 13,800 ft. just after takeoff from Dallas (DFW) on June 21 for a flight to Houston (IAH); 6 persons are injured, 4 seriously.

Thailand suspends its bilateral air agreement with the U.S. in early July because of Washington's requirement for greater access to Bangkok. **Thai Airways International, Ltd. (THAI)** makes it known that, although it also supports Japan in that country's discussions with the U.S. over beyond-flights for **Federal Express**, discussions for a proposed around-the-world pact with Lufthansa and **United Airlines** will not be disrupted.

On August 1, the EC, worried over its anticompetitive aspects, expresses serious reservations concerning the DLH-SAS alliance. A week later, officials of the continental union formally states its requirement that the two airlines must guarantee fair competition on routes between Germany and Scandinavia if it is to win the Commission's backing.

During the summer, a hub is established at Milan's Malpensa Airport with flights boosted from that point.

On August 31, Lufthansa announces that its "Lufthansa Express, GmbH." experiment will be folded in October, having lost its battle with **Deutsche BA Luftfahrtgesellschaft, GmbH.**

As a complement to the pact held with the German airline, **SAS (Scandinavian Airlines System)** on September 11 joins with **United Airlines** in a comprehensive pact that covers the ticketing, schedules, frequent flyer, club, lounge, and airport services of all three companies. Passengers will now be able to fly to any of these carriers' destinations in the U.S. and Europe with one ticket and collect frequent flyer mileage points for use in any of the companies' reward programs.

En route from Houston (IAH) to Dallas (DFW) on September 18, Flight 437, an A340-311 with 174 passengers encounters turbulence near San Antonio. Eight persons receive minor injuries, including three infants who are rushed to hospital as soon as the Airbus lands.

The eighth Avro RJ85 arrives at month's end, followed by the ninth early in October.

Norway agrees on October 18 to extradite alleged-hijacker Andrawes; she will be returned to Germany on November 25.

Also during the month, a trilateral around-the-world service is initiated with **United Airlines** and **Lauda Air, A.G.**, the latter replacing Lufthansa. The new thrice-weekly flights allow dual-designator code-sharing via Bangkok with **Thai Airways International, Ltd. (THAI)**, via Los Angeles or San Francisco with **United Airlines**, and via Vienna via **Lauda Air, A.G.** DLH is the big winner in this arrangement in that its pact with **Lauda Air Luftfahrtgesellschaft, A.G.** provides the German major with an alternative service from Frankfurt to Sydney, Australia, and allows it to halt its own thrice-weekly service from Frankfurt to Sydney.

On October 29, DLH scraps its "Lufthansa Express, GmbH." competition with **Deutsche BA Luftfahrtgesellschaft, GmbH.** over seven routes and announces a new nationwide pricing approach. It will offer discounts on routes over which it must compete and raise tariffs on those routes upon which it holds a monopoly.

DLH joins **Thai Airways International, Ltd. (THAI)** on October 31 in inaugurating new joint, weekly return flights from Frankfurt to Chiang Mai, Phuket, Phnom Penh, Yangon, and Auckland; additionally, the two will offer two weekly roundtrip frequencies between Munich and Bangkok and seven per week from Frankfurt to Bangkok.

Former Vice Chairman Abraham, 66, who had retired in 1989, dies on November 1 after a "severe illness." It is also noted during the month that the company's 44,000 employees in Germany will receive a 3% pay raise, backdated to October 1, under terms of a contract agreement with two major unions; the arrangement also includes a onetime DM 300 payment for each worker.

Former **American Airlines** official and San Francisco native Frederick Reid is named executive vice president-marketing at the beginning of December. Meanwhile, the supervisory board has voted to extend Chairman Weber's tenure for another five years.

The joint-venture alliance with **Canadian Airlines International, Ltd.** begins on December 20 with weekly nonstop roundtrips between Toronto and Frankfurt. Also in December, a marketing agreement is signed with **Adria Airways**. Under its terms, the two will offer shared passenger lounges, joint ground handling operations, and will code-share on flights from Frankfurt and Munich to Ljubljana.

During the year, leadership in the East European region is enhanced while service to Frankfurt from Boston and San Francisco is increased. A fourth B-737-23A is ordered from Germany by joint-venture partner **Modiluft, Ltd.** and that company's technical cooperation agreement with DLH is renewed. Simulator training for company pilots continues to be carried out at the German major's Frankfurt Training Center. The last Avro RJ85 is received at year's end.

Enplanements jump 8% to 31,960,000. Cargo figures are now reported only with the **Lufthansa Cargo Airline, A.G.** profit center. Revenues increase by 6% to \$13.56 billion and a \$339-million net profit is posted. The latter figure is later adjusted to read \$445 million.

There is no change in airline employment during 1996.

On January 1, DLH takes over handling of **SAS (Scandinavian Airlines System)** passengers and aircraft at all German stations; two days later, SAS takes over the handling of DLH passengers and aircraft at Scandinavian stations.

Weekly return service is initiated on January 4 from Frankfurt to Ashgabat, Turkmenistan.

A major winter storm disrupts airline operations on the U.S. East Coast during January 7–11; on the first three days of the crisis, DLH is forced to cancel 18 passenger flights.

On January 16, the European Commission agrees to the company's alliance with **SAS (Scandinavian Airlines System)** on condition that the two airlines act to ensure their union does not turn into a monopoly and that they agree to give up certain slots, flights, and accords held with other airlines. Both carriers have been moving for some time in the directions required by the EC.

On February 1, the flag carriers begin a total of 373 weekly dual-designator connections to five destinations in Scandinavia and seven in Germany.

Negotiations between the air ministries of Germany and the United States commence during the last two weeks in February. Germany and the U.S. agree on March 1 to drop restrictions on air travel between the two nations in support of the Lufthansa and **United Airlines** alliance. This "open skies" agreement becomes the subject of a legal action against Germany by the European Commission.

The same day the company introduces its domestic "chip card," a credit card-like high-tech device with an embedded electronic chip, as a substitute for paper tickets. Provided to 1,000 of its best customers, the experimental DLH cards are programmed to perform a number of functions, including those of credit card, frequent flyer card, and check-in and boarding card.

In remarks made during the first week of March that will come back to haunt them, officials at **British Airways, Ltd. (2)**, led by CEO Robert Ayling, strongly criticize the request made by **United Airlines** and DLH for U.S. antitrust immunity for their strategic alliance.

A code-sharing alliance is signed with **Air Canada, Ltd.** on March 22, which, when it takes effect, will also see the two national airlines share airport lounges and frequent flyer programs.

When the carrier begins its summer schedule during the second quarter, smoking is banned on all transatlantic flights.

DLH begins to suffer a significant decline in on-time performance during the second quarter. Much of the difficulties lie with slowdowns at the Munich and Frankfurt hubs and in line maintenance. In an effort to overcome these concerns, company officials will work to improve ground crew turnaround times and place greater emphasis on feeder operations.

The Indian joint-venture airline **Modiluft** faces collapse in May when Lufthansa pulls out and accuses its partner, India's Modi business group, of withholding DM 33 million (\$20.62 million) in dues.

A full schedule of 103 weekly flights begins on June 1 between Germany and the U.S. In addition to a new daily, nonstop dual-designator flight with **United Airlines** between Chicago and Dusseldorf, the company inaugurates its first direct roundtrip nonstops between Munich and San Francisco. Additional departures are initiated from Frankfurt to Boston and Los Angeles.

Upon his conviction on air piracy charges, Nebiu Demeke, who had hijacked a DLH jetliner to New York in 1993, is sentenced to 20 years in prison on June 11 by Federal Judge Sterling Johnson.

Transatlantic service under the new Canadian accord commences on June 15; a total of 84 code-sharing connections per week are flown across the Atlantic. Beyond-flights are offered through the DLH Frankfurt hub to Africa, the Mideast, and throughout Europe.

Sponsored by the airline, along with **Japan Air Lines Co., Ltd. (2)**, **Korean Air (KAL)**, and **Air France**, work begins the same day on a \$450-million Terminal One improvement project at New York (JFK).

With the demand for seats to the summer Olympic Games in Atlanta high, the company increases capacity by 72% on the Frankfurt–Atlanta route in early July by substituting a B-747-430 for the usual A340-311.

Flying in from the factory at Hamburg, the company's first A319-114 arrives at Frankfurt on July 25; in a ceremony attended by hundreds of the company's employees, the "Baby Bus," wearing a huge ceremonial American-style baseball cap over its cockpit, is christened *Frankfurt (Oder)*.

In a September 10 ceremony EC Transport Commissioner Neil Kinnock, Airlines of Britain Chairman Sir Michael Bishop, and DLH Chairman Weber preside over the opening of Superhub, a joint initiative between Manchester Airport, **Business Air, Ltd.**, and the German major. The project is designed to stimulate and speed transfer traffic growth for commercial flights operating from northern England and the Continent.

While en route to Dallas (DFW) from Houston (IAD) on September 18, Flight 437, an A340-311 with 174 passengers, encounters clear-air turbulence near San Antonio. Eight passengers receive minor injuries.

Also in September, **Lufthansa Cargo Airlines, A.G.**, a separate profit center, joins with the London-based Hinduja Group to establish the Indian cargo airline subsidiary **Hinduja Cargo Services, Ltd.** at New Delhi.

The joint-venture company **Modiluft** now fails, forcing its German partner to begin a long legal battle for the recovery of the three Boeing 737Fs that DLH has chartered to it. Meanwhile during the month, delivery is taken on the first of five A319-114s to be received by year's end.

On October 1, a franchise agreement is signed with **Augsburg Airways, GmbH**. One each of the regional carrier's de Havilland Canada DHC-8-100s and DHC-8-300s are painted white with the "Team Lufthansa" logo applied to their fuselages. Lufthansa's pilots are opposed to the major's franchise plans, fearing a loss of jobs. The same day, an accord is reached with the OeTV public sector workers union.

The **Augsburg Airways, GmbH** turboprops commence daily service on October 27 as "Team Lufthansa" under DLH flight codes from Munich to Leipzig, Dortmund, and Erfurt. The same day, DLH ceases its services to Bahrain and reduces the number of flights to Abu Dhabi and Karachi. **Lufthansa Cargo Airlines, A.G.** frequencies are not cut. Also in October, the company begins to code-share frequencies with **Austrian Airlines, A.G.** from Berlin, Hamburg, and Dusseldorf to Vienna.

Meanwhile, the company unveils its new World Wide Web service, Lufthansa InfoFlyaway.

In November, **Modiluft** countersues, claiming the German carrier owes it \$140 million in damages for loss of reputation and credibility. It also maintains that it has a valid claim on three of the chartered aircraft.

Also in November, the carrier launches breakfast flights as part of a two-year campaign to boost domestic Business Class fares by DM 60–120 (\$36–\$72). German business responds by requiring its executives to fly economy class, except on intercontinental long-haul flights.

Throughout the fall, the airline holds contract negotiations with the DAG Union representing its flight and ground personnel. These workers, unhappy with the lack of progress toward a satisfactory resolution, warn on December 10 that they will stage a one-day demonstration strike. Two days later, a series of two-hour strikes occur at all of Germany's principal airports, forcing DLH to cancel a total of 92 flights. A basic agreement is reached by month's end with flight personnel under which employees will receive a one-time payment of a third of a month's pay, plus a 1.7% pay increase the following April. Ground personnel represented by the Transport and Public Workers union reject the contract.

On December 16, DLH and its alliance partner **SAS (Scandinavian Airlines System)** simultaneously deny a Danish newspaper report that their partnership will lead to a merger or exchange of holdings.

In order to reduce the republic's budget deficit, the German government announces on December 23 that it will sell its 51.4% airline stake, valued at \$2.4 billion, to the state-owned bank Kreditanstalt für Wiederaufbau (Reconstruction Loan Corp.) by year's end. The sale marks the

first step in the final process of privatizing the airline. DLH and SAS both sign marketing agreements with the Spanish regional airline **Spanair, S.A.**

Due to stronger domestic competition and higher fuel costs, passenger boardings dip 0.6% to 31,760,000. Although revenues increase 4.8% to \$12.3 billion, various expenses force net gain to decline to \$300 million.

The flight-crew training division is spun off on January 1, 1997 into a wholly owned independent company, Lufthansa Flight Training, A.G.

On January 7, the first domestic French service is inaugurated; the Canadair CRJ-100 route from Munich to Bordeaux is extended on to Marseilles. Two new low-fare services are introduced by rival **Deutsche BA Luftfahrtgesellschaft, GmbH**, on January 20, including one over the Hamburg-Munich trunk route. With a DM 60 return fare, the British-owned competitor quickly grabs 20% of the market share.

Sydney Organizing Committee CEO Mal Hemerling and **Ansett Australia (Pty.), Ltd.** Chairman Rod Eddington announce on January 28 that DLH has been chosen one of seven carriers to receive the designation of official carrier for the Sydney 2000 Olympic Games.

An 18th A340-311 is ordered in January for 1998 delivery.

Agreement is reached with **Augsburg Airways, GmbH**, in early February that the franchise agreement should be deepened, with additional destinations added by the "Team Lufthansa" regional beginning on April 7.

Meanwhile, DLH begins to cooperate with **Spanair, S.A.** in the areas of frequent flyer programs and reservations. A319-114 service is inaugurated to Kazan on March 31. Lufthansa is the first foreign airline to provide service to the Tartarstan capital, making it a stop on its route from Frankfurt to Perm.

EU-wide liberalization occurs on April 1; foreign carriers from member states are able to fly German domestic routes without having to first establish German subsidiaries as **British Airways, Ltd. (2)** had done. New competition will come from **Debonair Airways, Ltd.** and **Virgin Express, S.A.** On April 10, a collective bargaining agreement is achieved with company unions. In addition to profit sharing, the 58,000 employees share in job security through the year 2001.

Also during the month, the company begins to enhance Munich Airport, which becomes its second major domestic hub after Frankfurt. Weekly flights from the south German city will be increased by 10% during the remainder of the year, up to 2,365.

DLH begins discussions with **British Midland Airways, Ltd.** concerning a possible strategic alliance and acquisition of a 40% equity stake in the British carrier, shareholding that would equal that held by **SAS (Scandinavian Airlines System)**. Lufthansa Technik now acquires majority interest in the former **Aer Lingus Irish Airlines, Ltd.** subsidiary Airmotive Ireland.

An agreement is signed with **Dragonair, Ltd.** that allows passengers arriving at Hong Kong to check through to their final destination.

At this time, an accord is signed with **SAS (Scandinavian Airlines System)** under which Lufthansa Cargo and SAS Cargo begin to market and transport each other's freight, both with aircraft and trucks.

DLH pilots, again dissatisfied, vote overwhelmingly on February 26 to strike over wages and contract duration; however, no immediate walkout is anticipated. Before the month is over, the company is issued a nonbinding warning from Germany's federal cartel office. The document suggests that the airline may be guilty of overpricing on its near-monopoly Frankfurt-Berlin routes, charging upwards of 30% more from 16 cities to the former capital than on comparable routes in the remainder of Germany. The matter is placed into the judicial system for resolution.

In March, the Federal Cartel Office orders DLH to reduce its prices on the Frankfurt-Berlin route to a point consistent with fares on other domestic routes. Again, DLH refuses and indicates that it will maintain its current levels until the matter can be settled in court.

Also during the month, the DAG-represented cabin and ground staff are unable to generate the 70% majority vote necessary to approve a strike.

The "Team Lufthansa" franchise arrangement with **Augsburg Airways, GmbH**, is deepened in March. The regional is required to turn over its London (CTY) to Frankfurt service, but, in return, is able to inaugurate four-times-a-day service from its base near Munich to Frankfurt. London-originating passengers for Augsburg are advised to fly DLH to Frankfurt from London (LHR) and connect with Augsburg at the German airport.

As a result of the company's previous year 10% drop in profits, DLH, during the last week of March, establishes a six-person management board to head the passenger business unit, which is now restructured. Former **American Airlines** executive Reid, currently EVP-marketing, is tapped to become the airline's president/chief operating officer and head of the new board.

On April 1, a new profit center, Lufthansa Passenger Airlines, is established by the DLH board to handle the company's scheduled passenger services. The new center has over 28,000 employees, almost half of all those employed by DLH, but will serve to reduce by 10% all of the airline's core administrative and management costs. Unlike **Lufthansa Cargo Airlines, A.G.**, the division is not spun off into an autonomous legal entity.

Capt. Juergen Raps is appointed the unit's chief pilot and he oversees three separate fleets: one for Airbus transports (98 aircraft), one for Jumbos (28 aircraft), and a third for B-737s (96 aircraft). New measures are put in place to significantly increase on-time performance.

Also on April 1, the major joins with the Italian regional **Air Dolomiti, S.p.A.** to inaugurate daily frequencies from Genoa to Paris; these will be followed, on April 30, with daily service to the French capital from Verona.

Meanwhile, on April 10, the personnel represented by Transport and Public Works accept the basic agreement offered the previous October. Additionally, management sweetens the offer for both these and flight personnel by agreeing to compromises on job guarantees and increased profit sharing.

Also in April, the Bombay High Court hands back the disputed **Modiluft** planes to the German airline, but DLH fails to take the jets out of India because of another case pending in the Supreme Court.

On May 1, a strategic alliance is entered into with **British Midland Airways, Ltd.** Under terms of the agreement, the companies link their frequent flyer programs and undertake joint marketing, customer, and ground support services.

The monopoly of DLH over the key Frankfurt to Berlin route is broken by **Eurowings Luftverkehrs, A.G.** on May 5.

With considerable fanfare on May 14, DLH joins with its marketing partners **SAS (Scandinavian Airlines System)**, **Air Canada, Ltd.**, **Thai Airways International, Ltd. (THAI)**, and **United Airlines** in an enhanced joint-venture marketing venture to be called "Star Alliance." The new alliance, seen in some quarters as a counter to the proposed **British Airways, Ltd. (2)-American Airlines** arrangement, will stitch together the operational and marketing efforts of all five airlines. DLH's 26 code-sharing agreements with other companies is more than any other carrier's.

Employees of the "Star Alliance" partners will be able to share ticket offices and airport services, purchase supplies, and contribute to promotional and advertising campaigns to be handled by the New York firm of Young & Rubicam Advertising, which is given a \$25-million budget to publicize unified efforts. Travelers on any of the carriers will be able to accumulate and cash in frequent flyer mileage from any of the five partners. **VARIG Brazilian Airlines (Viacao Area de Rio-Grandense, S.A.)** will join the group in October and negotiations are underway to bring in other airlines.

On May 16, the upper house of the German parliament passes the Aviation Compliance Documentation Act, which will make possible the sale of the last 35.7% of the government's DLH stake and ensure that majority ownership is retained in German hands. Following passage by the lower house, the privatization law will be sent to the president and Chancellor Helmut Kohl for signing before July 1.

On June 1, a strategic franchise alliance is entered into with **Air Littoral, S.A.** Under terms of the agreement, the companies link their frequent flyer programs and undertake joint marketing, customer, and ground support services. The regional will represent the German major in 29 French markets while DLH will become general sales agent for **Air Littoral, S.A.** in Germany, Italy, and Spain. The "Team Lufthansa" partnership also contains financing provisions that could allow Lufthansa to acquire up to a 15% stake and a clause under which the Germans become committed to assisting in the completion of the **Air Littoral, S.A.** hub begun at Nice a year earlier.

The company's annual shareholders' meeting is held on June 26. Stockholders vote a change in the articles of association that will allow a swap of ordinary bearer shares of DLH for registered shares. This procedure will make certain that the airline will, upon privatization, be retained in German hands.

On July 1, the carrier signs a code-sharing agreement with **VLM (Vlaamse Luchttransportmaatschappij, N.V.)**. In addition to shared marketing, sales, and customer service activities, the German major will purchase blocked seats on 104 weekly VLM flights from Dusseldorf Express Airport at Moenchengladbach and Rotterdam to London (CTY).

By this date, the code-sharing agreement with **Air Dolomiti, S.p.A.** accounts for 137 of the Italian regional's 156 daily departures.

According to an article by Dave English, DLH now operates one of the longest routes in the world. The 7,142 st.-mi.-distance from Frankfurt to Buenos Aires is flown in 13 hrs. 45 min. out and 13 hrs. 5 min. back (*Airways* [July-August 1997]: 21).

The Ministry of Transport in July begins to accelerate its efforts to privatize the remaining 35.7% of the carrier by year's end. At this point, seven international banks are invited to submit proposals. Dresdner Kleinwort Benson, the London-based investment unit of Dresdner Bank, is chosen as lead manager for the placement.

As a result of its deepening partnership with **SAS (Scandinavian Airlines System)**, DLH gives **Finnair O/Y** notice on August 1 of its intention to terminate next October the regional agreement signed with the Helsinki-based flag carrier in 1991.

Lufthansa and **Moduluft** announce on August 20 that they have agreed to a comprehensive settlement plan that resolves outstanding issues that have been the subject of litigation between the two organizations. A Modi group spokesman suggests the move will lead to an early relaunch of the joint venture Indian airline. Indeed, after a year of legal wrangling, in mid-September DLH will receive back the three Boeing aircraft it had leased to **Moduluft**, as well as a \$5-million damages award, which will be paid in 6 tranches beginning in the year 2000.

The strategic agreement with **British Midland Airways, Ltd.** becomes a full code-sharing partnership in August.

At the same time, customers with major credit cards are now able to book flights on the Lufthansa InfoFlyway website.

The compact with **VLM (Vlaamse Luchttransportmaatschappij, N.V.)** is expanded on September 1 to allow daily dual-designator frequencies between Antwerp and Munich.

All ordinary stock shares are converted to registered shares on September 5-8.

The strategic agreement with **Air Littoral, S.A.** becomes a full code-sharing partnership in September. Meanwhile, Air Littoral's previous arrangement with **Air France** withers during the summer as it comes to rely upon its new franchise partner **Brit Air, S.A.**, which, in effect, becomes the French flag carrier's regional feeder from Paris (CDG) in October.

In a Montreal ceremony, the carrier is the only airline to receive one of the environmental awards handed out by the U.S. Environmental Protection Agency (EPA). The plaque recognizes DLH's achievement as the first company worldwide to discontinue the use of halogenated hydrocarbons during the maintenance and overhaul of its aircraft.

On September 18, the German major announces that, effective January 1, its **Condor Flugdienst, GmbH** subsidiary will join with and provide capacity for Germany's second largest tour operator, Neckermann

Reisen, GmbH., in a fifty-fifty joint-venture company to be known as C&N Condor Neckermann Touristik, A.G. The new entity will also contain the DLH interest in the Turkish charter line **Sun Express, A.O.** and five German tour operations.

During the month, negotiations aimed at the possible conclusion of a code-sharing agreement are initiated with **Air New Zealand, Ltd.**

In a speech acknowledging loss of market share to aggressive competition from **Deutsche BA Luftfahrtgesellschaft, GmbH**, Chairman Weber announces that DLH will soon begin counterprogramming of its own. "For those who think they can squeeze out Lufthansa," he declares, "we will be able to find some measures to make life difficult."

Also in September, a major agreement is signed with **Mexicana Airlines, S.A. de C.V.** Under its terms, the German major will assist the Mexican line in improving its customer services. First a 12-month evaluation of Mexicana procedures will be undertaken, followed by a training program for its customer service personnel.

On October 1, DLH and **Spanair, S.A.** reach conclusion on a code-sharing agreement, but contrary to media reports, the German major takes no equity share. At the same time, a contract is placed for two more A340-300s, to be delivered one each in 1998 and 1999.

When **Lufthansa Cargo, A.G.** now determines that it no longer requires its 25.4% stake in **Cargolux Airlines International, S.A.**, that shareholding is sold by DLH to **Swissair, A.G.**'s **Swisscargo**, which is owned by SAirGroup's SAirLogistics subsidiary.

In a report picked up and distributed by the Agence France Presse English wire service on October 2, the Bangkok daily newspaper *Nation* is quoted as reporting that **Thai Airways International, Ltd. (THAI)** is under pressure to withdraw from the "Star Alliance." THAI officials are complaining that the airline has been unable to show adequate progress on an action plan for global cooperation because it is still under control of the Finance and Transportation Ministries. It is noted that "sources close to" Lufthansa have the German major suggesting that the more-efficient **Singapore Airlines, Ltd.** would make a preferable partner. German airline officials deny the contention.

Eleven days later, on October 13, the company is completely privatized when the German government sells its 37.5% stake. Initially, the stock market float is issued in 143 million 5-mark shares, but after a two-week subscription period, the stocks will be issued for 33.3 marks each. The sale income is approximately 4.7 billion marks.

On October 26, DLH and its alliance partner, **SAS (Scandinavian Airlines System)**, inaugurate dual-designator service to and from Finland: a total of 65 daily roundtrips are initiated from Finland to Scandinavia and Germany.

Also on October 26, DLH returns to Beirut after a 14-year absence, inaugurating thrice-weekly A310-304 return flights. A new daily service is started to Izmir while new domestic nonstop frequencies are introduced from Frankfurt to Dortmund and Hamburg to Leipzig.

On the same day, the existing code-share agreement with **Air U.K., Ltd.** is expanded; the route from London to Cologne and Bonn is extended to Dresden. At the same time, the current connection with Rome is discontinued for the winter season and in its place, DLH offers new services from Cologne and Bonn to Rome.

Under its arrangement with the German major, **British Midland Airways, Ltd.** inaugurates daily dual-designator services on October 27 from London (LHR) to Dresden via Cologne and Bonn.

On the last day of the month, officials state that the company will invest \$26 million and receive a 20% stake in Heico Corporation's Heico Aerospace engine subsidiary.

On November 1, ETIX electronic ticketing, which had previously been available on German domestic routes as well as flights to London (LHR) and Paris (CDG) is extended to 14 additional international airports: Amsterdam, Athens, Barcelona, Brussels, Rome (Fiumicino Airport), Istanbul, Milan (Linate Airport), Madrid, Manchester, New York (JFK and EWR), Prague, Vienna, and Warsaw.

Following a decision of the German Transportation Ministry to lift its ban on the placement of advertising on the sides of jetliners, it is

revealed, on November 20, that several schemes are under review by Lufthansa for use by its subsidiaries.

It is announced on November 24 that specific kerosene consumption of the aircraft in the Lufthansa group has been lowered 20.8% since 1991.

The same day, **Deutsche BA Luftfahrtgesellschaft, GmbH.** directly challenges the carrier by introducing eight-times-per-day roundtrips between Frankfurt and Munich. DLH responds by lowering its prices on the trunk route.

On November 28, **Singapore Airlines, Ltd.** withdraws from the "Global Excellence" alliance with **Swissair, A.G.** and **Delta Air Lines** and signs a memorandum of understanding for a strategic alliance with DLH. Under its terms, SIA will hub its European business at Frankfurt while Lufthansa will make Singapore its principal Southeast Asian center for activities from Japan to India. In addition, the two majors will coordinate frequent flyer programs, offer dual-designator flights, jointly develop marketing, scheduling, customer service activities, and information technology, and share ground handling.

A third weekly A300B4-605R roundtrip is inaugurated on December 1 between Frankfurt and Jeddah, Saudi Arabia.

On December 5, an order is placed for 10 A340-600s. During December, the carrier passes its 33% stake in Deutsches Reisebüro to Deutsche Bahn, A.G.

Simultaneously, Deutsche Bahn, A.G.'s 33% stake in START Holding, GmbH., the German marketing arm of the Amadeus reservations system, is acquired.

Passenger boardings increase 5% to 33.34 million, while operating revenue swells 11% to \$12.8 billion. Net gain reaches \$464 million.

At the beginning of 1998, Lufthansa is the 10th largest airline in the world in terms of passenger boardings and fleet size, 7th in employees with 44,728, and 5th in operating income. The company owns 210 airplanes, all of which are Stage III certified: 75 B-737s, 30 B-747s, 13 A300s, 8 A310s, 17 A319s, 33 A320s, 18 A321s, and 16 A340s.

Lufthansa Lan Technical Training Chile, S.A., a new maintenance-repair-overhaul (MRO) training operation jointly owned by Lufthansa Technik and **LanChile Airlines, S.A.**, opens at Santiago on January 1.

During February, the carrier joins with **United Airlines** and **Air Canada, Ltd.** to announce creation of a joint venture that will trade aircraft parts.

After a six-year court battle, a Miami travel agent, Leonard Krys, wins a \$3-million settlement against the airline on February 27 for attributable heart damages. A Lufthansa captain, en route from Miami to Frankfurt in 1992, had, even though off the U.S. East Coast and aware of Krys attack, pressed his flight on to Europe rather than turn back and, as a result, Krys suffered severe damage to the wall of his heart.

During the first two months, discussions concerning a strategic alliance are undertaken with **All Nippon Airways Company, Ltd.** On March 9, DLH and ANA signs code-sharing documents. The new arrangement includes frequent flyer programs and calls for development of a return dual-designator service from Frankfurt to Tokyo in the fall, as well as code-sharing on routes within Japan and Germany. At the same time as the ANA discussions are conducted, the carrier's board of directors considers the creation, à la **British Airways, Ltd. (2)**, of a low-cost subsidiary airline, at this point code-named Lufthansa Light. Feasibility studies do not initially demonstrate significant business advantage.

The response of DLH to the **Deutsche BA Luftfahrtgesellschaft, GmbH.** invasion of the Munich-Frankfurt trunk route the previous November 24 pays off in March. Deutsche BA, which has failed in its bid to win additional slots at Frankfurt, elects to quit the highly competitive route after only five months.

On March 29, four-times-a-week A340-311 roundtrips commence between Frankfurt and Houston (IAH); the nonstop service is the only one to be offered over the route. On the other three days of the week, Flight 437 is made with a stop at Dallas-Fort Worth. Weekly code-sharing flights with **Singapore Airlines, Ltd.** between Frankfurt and Singapore are increased from 7 to 10, also on March 29. The number of flights to

other North American gateway cities are, on this first day of the summer schedule, increased from 120 each week to 135.

At the beginning of April, DLH signs a memorandum of understanding to fund 40% of the DM 1.3 billion (\$725 million) required to construct a new terminal at Munich, which will be employed exclusively by the major and its partners.

The carrier, representing the "Star Alliance," undertakes negotiations with **Cathay Pacific Airways (Pty.), Ltd.** in mid-April concerning possible admittance of the Hong Kong-based major to the consortium. Lufthansa also unveils plans to float various company units in 1999, including ISG/Sky Chefs and the Amadeus reservations system.

At the end of April, EC Competition Commissioner Karel Van Miert asks both DLH and **United Airlines** to cede up to 100 slots at Frankfurt and Munich under a proposed new code affecting multinational alliances. The approach is the same one the EC is taking toward the troubled linkup between **American Airlines** and **British Airways, Ltd. (2)**.

As the "Star Alliance" nears its first anniversary, an **Air Canada, Ltd.** B-767-333ER is painted in the livery of all partners. The wide-body is employed, beginning on May 1, to initiate nonstop, daily dual-designator service with DLH between Montreal and Frankfurt. The German airline sells seats on the flight as part of a block-seat purchase arrangement.

Also on May 1, Lufthansa and **All Nippon Airways Company, Ltd.** announce plans to begin dual-designator services between Tokyo and Frankfurt on July 1. At this point, they begin to integrate their frequent flyer programs.

Joined by **Air France**, **Japan Air Lines Company, Ltd. (2)**, and **Korean Air (Korean Airlines, Ltd.)**, the carrier, in mid-May begins a two-week move into the newly opened \$434-million Terminal One at New York (JFK). The four carriers, having developed, financed, designed, and constructed the huge project will now operate it and sell space to other carriers.

Having completed over 200 flights to Kazan since the previous March, representatives of the German airline officially open an office in the Tartarstan capital on May 13. These executives note that direct flights to the city from Frankfurt may soon begin.

The European Academy for Aviation Safety is opened at Toulouse during the last week of May. It is jointly sponsored by the carrier, **Air France**, Airbus Industrie, Aero International (Regional), RAI-ENAC, and the College of Aeronautics, Cranfield (England) University.

Twice-weekly nonstop B-767-333ER roundtrips by **Air Canada, Ltd.** commence on June 5 between Halifax and Frankfurt. As with the weekly flights from Montreal, these are dual-designator services operated with **Deutsche Lufthansa, A.G.**

On June 8, President/Chief Operating Officer Reid is named executive vice president/chief management officer at **Delta Air Lines**. The appointment is considered a coup at the Atlanta-based carrier.

A code-sharing agreement is entered into with **Qatar Airways** on June 15.

An incident occurs on June 17 that will have a significant legal impact on the airline and on code-sharing legalities. A partially paralyzed passenger in a wheelchair travels from Seattle to New York on a **United Airlines** flight. He then attempts to seamlessly transfer to Flight 3516 to Frankfurt, operated as a dual-designator service by DLH, but employees of the German carrier refuse to let him board. The gentleman will make his case known to the U.S. DOT.

By the end of the month, Lufthansa has achieved the milestone of carrying more passengers worldwide than any other European airline; it serves nearly 300 cities in more than 90 countries.

Lufthansa and **All Nippon Airways Company, Ltd.** launch eight-times-per-week dual designator service on July 1 between Tokyo (NRT) and Frankfurt. Also on July 1, the carrier inaugurates a strategic alliance with **Singapore Airlines, Ltd.** Code-sharing is introduced on services of the two airlines from Singapore and Frankfurt and from Frankfurt to New York (JFK).

On September 1, thrice-daily dual-designator roundtrips commence in cooperation with **British Midland Airways, Ltd.** between Manches-

ter and Dusseldorf; the new schedule enables the carriers to offer an increase from two to three weekly flights.

The next day, the company announces that, beginning on March 28, it will offer new daily A340-311 nonstop return service from both Detroit (DTT) and Philadelphia to Frankfurt. In addition, during the first week of the month, **United Airlines** code-sharing is expanded on DLH routes thrice weekly from Frankfurt to Addis Ababa via Cairo, thrice weekly from Frankfurt to Amman, weekly from Frankfurt to Harare, Zimbabwe, via Johannesburg, weekly from Munich to Cairo, and twice weekly from Frankfurt to Johannesburg.

Given that the A310-304s employed on the route are to be phased out, DLH announces on September 11 that it will cease passenger flights from Nairobi on March 25.

It is announced on September 14 that the company will inaugurate daily nonstop A340-311 roundtrips from Frankfurt to both Philadelphia and Detroit (DTT) at the end of March.

At the same time, it becomes known that the supervisory board has approved \$2 billion in new aircraft orders for delivery between 2000 and 2001. Included for the main line are 10 more A340-311s and 6 A321-231s, while 6 MD-11Fs will be provided to **Lufthansa Cargo Airlines, A.G.**, which will then replace its B-747-400Fs.

Arrangements are completed on September 18 for the \$29.6-million acquisition of a 49% interest in the airport service provider Hudson General.

As a result of an appeal over the June 17 case concerning a partially paralyzed passenger denied boarding to a dual-designator DLH service to Frankfurt, U.S. Transportation Secretary Rodney Slater announces the DOT's finding on September 23. Both DLH and **United Air Lines** operate under a tariff provision requiring that passengers be carried unattended unless they have a mobility impairment so severe that it prevents them from assisting in their own evacuation. Transportation authorities find that, because the passenger had flown across country without assistance and had made it down the boarding ramp without help, he could, if necessary, have assisted in his evacuation from the German aircraft. This is the first time that the DOT finds a U.S. carrier has violated a disabled passenger's rights on a code-share flight operated by a foreign airline. United is required to pay a civil penalty of \$3,000 and Lufthansa \$1,000, but under terms of the settlement, neither carrier admits to any wrongdoing.

It is noted at the end of the month that the company will take a 40%, DM 520-million (\$287-million) stake in a joint venture with the Munich Airport authority; the consortium will build and operate a second terminal at the south German airport.

Chairman Weber, who is also serving as chair of the Association of European Airlines, meets with European Commission president Jacques Santer in October to fill him in on the European airline industry, with special attention to the necessity for their involvement in international alliances.

Displeased with the creation of a new Berlin unit devoted to industry, commerce, politics, and the environment, board member Hemjo Klein resigns during the month.

The code-share with **Air Littoral, S.A.** between Nice and six German destinations is threatened in late October when **Swissair, A.G.** purchases a 44% stake in the French airline. Swissair requests that Air Littoral, which maintains management control, abandon its DLH link, but the regional does not, at least initially, comply.

The code-sharing arrangement with **Singapore Airlines, Ltd.** is expanded on October 25, allowing the launch of dual-designator flights from Frankfurt to Singapore via Sydney.

The latest terrain avoidance equipment, an Enhanced Ground Proximity Warning System (EGPWS), will, according to an October 26 news release, be retrofitted to all 185 aircraft of the DLH fleet in the year 2000.

On November 1, DLH adds 27 cities from 14 countries to its list of ETIX electronic ticketing destinations. In all, Lufthansa passengers are now able to fly to 44 international destinations without using a paper ticket.

The German major begins initial services into London (STN) on November 23; B-737-530s launch flights to the new destination thrice daily. It is announced at the end of the month that, starting on March 28, the company will operate twice-daily roundtrips between Frankfurt and Edinburgh.

In an effort to compete head-to-head with the **British Airways, Ltd.** (2) division GO, DLH, on December 1, inaugurates thrice-daily roundtrips from Munich to London (STN). The introductory roundtrip tariff is just £80.

It is announced on December 7 that, beginning on January 16, **United Airlines** will expand its code-share agreement with DLH on the German major's thrice-weekly routes from Frankfurt to Sana'a, Yemen, via Cairo.

The "Star Alliance" carriers on December 8 form a six-member management board to carry out the group's five-year business plan. DLH Executive Vice President Friedel Roedig is named chairman, with **United Airlines** executive Bruce Harris as his deputy.

All domestic and European flights to and from Frankfurt and Stuttgart are cancelled on December 10 because of snow and icy rain, with traffic into and out of the airports at Munich and Berlin seriously affected by the bad weather. By noon alone, 125 flights have been halted.

On December 16, a joint venture is formed with KG Allgemeine Leasing, which will be known as German Operating Aircraft Leasing. The new concern, in which DLH will hold a 40% stake, will purchase the major's surplus aircraft and place them with other carriers. The first deal will be completed with an unnamed airline before the end of the year and will involve a pair of used Lufthansa B-737-330s.

Customer bookings for the year climb 8.2% to 36.05 million. Revenues of DM 22.6 billion (\$12.68 billion) are generated, leaving a pre-tax profit of DM 2.4 billion (\$1.59 billion).

By the beginning of 1999, airline employment has been boosted 21.5% to 54,695.

Following the retirement of Communications/Public Relations Director Josef Grendel, Gabriele Velte becomes that carrier's new publicity chief.

Harold Hahn, South Asian general manager for Lufthansa at New Delhi, indicates on January 19 that there are prospects of his company's assuming an equity stake in **Air India, Ltd.** as soon as the Indian government publishes its guidelines for its disinvestment. The executive also indicates that his carrier may increase its services to Delhi, Bombay, and Chennai from the existing 15 weekly flights, while also expanding them to such other cities as Bangalore, Hyderabad, and Calcutta.

It is also reported during the month that Lufthansa will code-share and jointly market flight and rail service with the national railroad of France. The effort is designed to boost ground transport into Paris (CDG) for international passengers.

The company is hired by **Garuda Indonesia** on February 1 to aid the Indonesian major in its restructuring process. The same day, Lufthansa places its "DL" code on five **Mexicana Airlines, S.A. de C.V.** services from Mexico City; the new dual-designator services aboard the Mexican major's aircraft are operated to Acapulco, Cancún, Guadalajara, Monterrey, and Merida.

Speaking before an aviation industry lunch in Brussels on February 23, **United Airlines** Vice President Michael Whitaker indicates his belief that the EU will impose no restrictions on the alliance between DLH, UAL, and SAS until it has reviewed a number of other transatlantic pacts.

A code-sharing and marketing agreement is signed with the French commuter **Regional Airlines, S.A.** on February 25. When it takes effect on March 28, Regional will become the latest "Team Lufthansa" carrier.

Stefan Pichler, the executive vice president-sales, holds a news conference at the International Tourism Exchange at Berlin on March 7 to review the airline's plans for the summer ahead. In addition to a number of Lufthansa Specials, reduced-price leisure fares, the carrier will add five new destinations to its route network—Detroit, Philadelphia,

Caracas, Edinburgh, and Bergamo—when the summer schedule begins on March 28.

The airline's supervisory board on March 10 approves the acquisition of Hudson General Corporation by its ground services subsidiary, GlobeGround, GmbH. On March 15, it selects VIAG Interkom, a joint venture between BT, Concert, and German telecomms, to put together the airline's new communications network. It is simultaneously announced that the German carrier will establish a new software development center in County Galway, in western Ireland, that will create 100 jobs over the next 3 years.

In anticipation of air strikes by NATO countries against Serbian military targets in a campaign for an independent Kosovo, Lufthansa, on March 23, halts all scheduled service into Belgrade from Frankfurt. A spokesman, in making the announcement, indicates that the situation will be evaluated further the next day. On March 24, service remains shut down to Belgrade and Sarajevo, Mostar, and Banja Luka are added to the list; that evening, Operation Allied Force, the bombing attack on targets in Serbia and Kosovo, begins.

Following the sale of the A310-304 employed on the route, the company halts its thrice-weekly roundtrip service from Frankfurt to Nairobi, Kenya, on March 25. Service to Belgrade, Sarajevo, and several other Balkan destinations remains halted on March 25 and for most of the duration of the NATO bombing campaign. Flights to south central and southeastern Europe experience delays of 30–60 min. due to airspace closure.

DLH and **British Midland Airways, Ltd.** further strengthen their code-sharing agreement on March 28 when they launch joint services between London (LHR) and both Stuttgart and Hanover. The twice-daily roundtrip flights offered by Lufthansa are increased to thrice daily by the addition of one BMA service into each German market.

With the opening of the summer schedule on March 28, Lufthansa now flies to 323 destinations in 88 countries. On this date, the company begins daily nonstop A340-311 roundtrips from Frankfurt to both Philadelphia and Detroit.

At the end of the month, thrice weekly and direct service is introduced between Frankfurt and Harare, Zimbabwe; the new route replaces a service previously operated via Johannesburg. At the same time, the number of weekly flights between Frankfurt and Shanghai grows from four to five.

As aircraft from the NATO nations pound Yugoslav targets in Operation Allied Force, hundreds of thousands of Kosovo refugees head to and cross borders into Albania and Macedonia. As aid workers struggle to provide relief, several governments step forward to provide sanctuary, agreeing to take various numbers of displaced persons.

Germany announces on April 7 that it will take an additional 10,000 refugees, on top of the 35,000 ethnic Albanians who have reached that country since Kosovo's problems started in February 1998. The Interior Ministry announces that 600 Kosovar Albanians, mostly women, children, and those needing medical attention, will be flown the next day from Skopje, Macedonia, to Nuremberg aboard two chartered Lufthansa jetliners. Lufthansa, which apparently has not been consulted, indicates that it will not be possible to make the flights as announced because the Balkan situation is not safe for private aircraft. The Interior Ministry admits as much during the evening as it indicates alternative transport possibilities are being examined.

Satisfactory arrangements being concluded, the airline begins to participate in the airlift, which, by April 9, has brought in around 2,000 refugees. Simultaneously, Sadako Ogata, the UN refugee chairman, recommends an end to the airlift. Authorities in Germany press on with the airlift on April 10. Several hundred ethnic Albanians are flown into airports in Baden-Wuerttemberg, with 200 arriving that evening at Dresden. From there they are taken to accommodations in the nearby town of Chemnitz. By April 12, almost half of the refugees in Bonn's 10,000-person commitment have reached German sanctuary. With the reopening of the airport at Sarajevo earlier in the week, the company, on April 21, resumes service to that Bosnian city from Frankfurt.

Following handover at the beginning of the month by Libya of the suspects in the Lockerbie bombing, the UN lifts its air sanctions against that North African nation. Five-times-a-week A310-304 roundtrips are resumed to Tripoli from Frankfurt on April 22.

On April 23, a fire damages the offices of Lufthansa, **Air France, British Airways, Ltd. (2), Japan Air Lines Company, Ltd. (2), and Indian Airlines, Ltd.** in the cargo terminal at New Delhi's Indira Gandhi International Airport.

In its April 24 issue, *Der Spiegel* reports that Lufthansa has, in the past five weeks, lost DM 10 million (\$5.4 million) each day in income. The Frankfurt Airport has been all but taken over for use by NATO as a refueling depot for its tankers that supply attack aircraft heading for Yugoslav targets. The airline itself, on April 26, calls the figures an exaggeration and admits that, while it has been affected, no quantifying figures are yet available. It notes that Chairman Weber, interviewed for the magazine article, was referring to delays and costs associated with recent bad weather, the installation of a new takeoff and landing system at Frankfurt Airport, and difficulties caused by European ATC.

Three days later, Chairman Weber calls a Frankfurt news conference to announce that a combination of factors have caused a 66% decline in net profit during the first quarter. Although the Kosovo crisis is hurting the quality of his airline's service, it is not having any financial impact. The claims of *Der Spiegel* are dismissed as "totally incorrect."

At the same time, a \$1.6-billion order is placed with Fairchild Aerospace for the delivery between 2002 and 2006 of 60 728JETS that will be employed on regional routes by **Lufthansa CityLine, A.G.**

Perfecto Yasay, chairman of the Philippines Securities and Exchange Commission, reports on May 5 that Lufthansa is conducting negotiations with **Philippine Air Lines (PAL)** concerning a purchase of the airline's maintenance and engineering division.

In an interview with Austria's *Format* magazine, Chairman Weber indicates that his company is willing to sell its stake in **Lauda Air Luftfahrtsgesellschaft, A.G.** if the price is right. Lufthansa confirms to Reuters, Ltd. on May 10 that the quote is accurate.

On May 12, German Interior Minister Otto Schilly refuses to rule out the possibility that Germany will take another 5,000–10,000 Kosovo refugees. The nation has already taken in 10,000 of the ethnic Albanians—more than any other Western country—while many neighbors have not fulfilled their relief pledges. Many of the displaced persons have arrived aboard chartered Lufthansa aircraft.

Chairman Weber scolds European air traffic controllers in a talk before the International Aviation Club at Washington, D.C. on May 20. The Lufthansa CEO holds the controllers responsible for causing a third of all annual flight delays and indicates that his company burns 26,000 tons of fuel every year in holding patterns.

Beginning on June 15, **Air Canada, Ltd.'s** code is placed on the Lufthansa daily flights between Frankfurt and Bucharest. The German major, through its Lufthansa Technik unit, agrees to purchase the engineering and maintenance divisions of **Philippine Air Lines (PAL)** on June 22.

Having managed to disappoint many, Communications/Public Relations Director Velte suddenly departs on July 26. Her predecessor, Josef Grendel, returns to his duties on a temporary basis until a successor can be located. The search is quickly completed and a new communications leader, Ruhrgas, A.G.'s public relations director, Klaus Walther, is named on August 16.

Due to commercial reasons, the thrice-weekly roundtrip service between Frankfurt and Kuala Lumpur, Malaysia, is suspended on September 1.

The cost-cutting plan started in 1996 is completed in May, having achieved its DM 1.5-billion target two years ahead of schedule.

On September 15, a joint-venture company formed between Lufthansa Flight Training, GmbH. and **LanChile Airlines, S.A.**, opens at Santiago. Designed to become the largest airline-run pedagogical academy in South America, the new facility will offer comprehensive pilot training, flight attendant emergency instruction, and other educational instruction.

During September, a 26% stake is purchased in the Italian carrier **Air Dolomiti, S.p.A.** Under terms of a code-sharing agreement signed with **Maersk Air, A.S.** on June 10, the German major is able to sell tickets on Maersk's return services from Billund to Frankfurt for those passengers flying beyond the DLH hub on October 1. In addition to increased profits for both parties, the pact improves connections from Billund.

The code-sharing pact with **Spanair, S.A.** is deepened during October to include all flights by the two airlines between Spain and Germany and to all Spanair flights to and between 10 Spanish regional airports. Simultaneously, Lufthansa agrees to maintain up to 45 new Airbus aircraft the Spanish line will purchase and train the pilots to fly them.

At Brussels National Airport on October 31, armed robbers halt a van carrying cash to a Lufthansa airliner, which is being prepared for departure to Germany. The Belgian newspaper *La Dernier Heure* will report on November 2 that the thieves had escaped with DM equivalent to between 200 million and 300 Belgian francs.

The code-sharing agreement with **Qatar Airways** is enhanced on November 1 to include Vienna, Zurich, and Manchester, England.

CEO Weber announces on November 6 that the carrier will launch six-times-a-week A340-313X return service on March 25 from Berlin to Washington, D.C. (IAD).

On November 9, the German major purchases half of the 40% stake in **British Midland Airways, Ltd.** formerly held by **SAS (Scandinavian Airlines System)** for €91.4 million. The equity purchase is criticized by a number of competitors, including **British Airways, Ltd. (2)**, but also all but guarantees the company's entry into the "Star Alliance."

It is announced on November 19 that SAirGroup, parent of **Swissair, A.G.**, has outbid both **British Airways, Ltd. (2)** and Lufthansa to purchase, by year's end, a 10% stake in **LOT Polish Airlines, S.A.** In making the award, Polish Treasury Minister Emil Wasacz indicates that the stake will be increased to 37.6% through a recapitalization of the airline.

With continuing support and assistance from the other "Star Alliance" carriers—especially financial help from DLH and **United Airlines—Air Canada, Ltd.** is able to put together its own \$760-million recapitalization plan for company stockholders and makes a successful C\$92 million (\$63 million) counteroffer against an **American Airlines**-backed plan for **Canadian Airlines, Ltd.** The drama reaches a high point on December 4 when the Canadian board of directors accepts the Air Canada tender.

The last of three A340-313Xs delivered during the year arrives on December 20.

Passenger boardings climb 7.8% to 38,872,000. Operating revenues for Lufthansa Group jump 9% to \$12,847,527,000, while expenses are up 14.6% to \$11,830,995,000. This year's operating profit falls to \$1.01 billion, while net gain drops to \$632.97 million.

Airline employment at the beginning of 2000 stands at 66,207, a 33.9% increase over the previous 12 months. Among the world's top 25 airlines, DLH is 9th in total passengers, 7th in employees, and 10th in fleet size, while Lufthansa Group is 7th in operating revenue, 4th in operating profit, and 5th in net profit. The first of five A321-231s to be received by July is delivered on January 19.

While seeking permission from Hanoi for a third weekly service from Frankfurt to Ho Chi Minh City, the carrier, on January 31, begins to fly its Frankfurt to Jakarta route on a daily basis.

Also during January, the B-747-430 *Hannover* returns to service after being given a special color scheme promoting the first world exposition to be held in Germany, the June 1–October 31 Hannover Expo 2000.

For the second time in five years, in February Lufthansa is named "Airline of the Year" for 1999 by *Air Transport World* magazine.

The first of six A340-313Xs to be delivered during the year is received on February 18. The carrier's 26 B-747-430s are grounded for inspection on February 22 after a routine maintenance check turns up cracks in lines that carry fire-fighting chemicals to the engines. They will remain out of service until all of the lines can be replaced.

On February 29, **The British Airways, Ltd. (2)** subsidiary GO announces that it will suspend service to Munich at the end of March. It

simultaneously files an official complaint with the European Commission complaining of the predatory practices of Lufthansa on the route over the past 15 months.

At the beginning of March, the new stand-alone subsidiary Lufthansa e-Commerce, A.G., is established to handle all of Lufthansa Group's Internet functions. The year's goal for on-line bookings and e-commerce activities is raised from the 100,000 realized in 1999 to 280,000 and revenues are to be increased to DM 100 million.

The company's 25th A340-211 arrives at Frankfurt from Toulouse on March 10.

An unusual event occurs at Baku, Azerbaijan, on March 15. While preparing for departure for Turkmenistan, the captain of the company's flight that day is informed by airport authorities that the plane will not be refueled because the airline is in arrears in payment of its fuel bill. Having just transferred \$10,000 to the AZALOIL account the day before, the DLH station manager, noting that his airline has always funded accounts in advance, refuses to pay and indicates to airport officials that the amount asked for was not owed. Still, the Baku airport leaders refuse to budge and the German flight crew is left to come up with a response. In order to conserve enough of their plane's fuel reserve to make it across the Caspian Sea to the next stop, the flight crew, with help from the flight attendants, unloads all of the cargo and baggage, the catering equipment, and even siphons off all of the water from the onboard lavatories. The plane taxis out and is cleared by ATC (which is neutral) to takeoff. The incident is later handled at the diplomatic level.

With \$1 million in incentives at his disposal, Denver Mayor Wellington Webb travels to Frankfurt on March 17 to persuade DLH officials to begin a year of flights into his city.

Just prior to the beginning of the summer schedule, a joint-venture agreement is signed between Lufthansa Technik, A.G. and **MALEV Hungarian Airlines, Rt.** Under its terms, a new maintenance, repair and overhaul (MRO) facility will be set up at Budapest to handle narrow-body jetliners, particularly the B-737s operated by the two airlines. When operations begin in early 2001, the concern will be the third joint venture of its type outside of Germany, after the ones in Beijing and Manila. At the same time, 55,000 workers in 3 German labor unions that work with Lufthansa win a 2.5% pay increase and a bonus in a new 12-month contract.

The carrier, on March 26, begins to code-share with **All Nippon Airways Company, Ltd. (ANA)** on all 16 weekly roundtrips between Tokyo (NRT) and Frankfurt—6 ANA and 10 DLH flights—while the German line places its designator on ANA's two weekly return flights between Osaka (KIX) and Frankfurt. Within Europe, ANA code-shares on DLH flights from Frankfurt to Amsterdam, Berlin, Dusseldorf, Munich, Hamburg, Geneva, and Vienna.

Elsewhere with the beginning of the summer schedule, a fourth flight, operated six times a week, is added between Frankfurt and New York (JFK). Return service to Manila is boosted to five flights a week and frequencies from Frankfurt to Boston, Chicago (ORD), Los Angeles, and Washington, D.C. (IAD) become twice daily. The route from Frankfurt to Bogota and Lima is split, with each city having three weekly roundtrips and A340-313Xs replace A300s on routes from Frankfurt to the Middle East and Africa, except the route to Damascus, which is terminated altogether. From Munich, B-747-430 roundtrip frequencies to San Francisco are boosted from three every week to seven; flights from the Bavarian capital to Barcelona, Nice, and Toulouse are also increased.

It is reported, also in March, that DHL Airways will soon be taken over by the combined forces of Deutsche Post World Net (DPWN) and **Deutsche Lufthansa, A.G.** Each has a 25%-plus-1-share stake in the company and its European counterpart DHL International. Although smaller than either **Federal Express (FedEx)** or **United Parcel Service (UPS)**, **DHL Worldwide Express**, parent of both DHL-A and DHL-I, leads both in cross-border mail and express deliveries—38% against 20% for the former and 15% for the latter. It has also made purchases in trucking, logistics, and air freight that rivals both of the American giants.

The story is part of a general revelation in the aviation media that Deutsche Post and Deutsche Lufthansa Group are reviewing several schemes for a joint-venture (code-named PELIKAN) merging of their logistic activities. PELIKAN would see the joining of DHL Worldwide with **Lufthansa Cargo Airlines, A.G.** and with Deutsche Post-owned Air Express International.

At this point, **United Parcel Service (UPS)** demands that the EU Commission require DPWN split up its commercial and public service activities. UPS had originally petitioned the EU Commission in 1994 alleging unfair competition in the parcel post sector. Now it emerges that DPWN has invested almost \$5 billion in the years since to build up its parcel post activities while recently engaging in alliance discussions with both DHL and **Deutsche Lufthansa, A.G.** It is anticipated that the Commission will respond by April, but it will not open its formal investigation until August.

On April 1, two of the carrier's five weekly frequencies from Frankfurt to Morocco are switched to Tripoli, Libya. For the month beginning on April 10, the company, in honor of its twentieth anniversary of China service, offers a 20% discount on all business- and economy-class tickets purchased for travel to Beijing from Frankfurt.

Also at the start of the month, the carrier joins **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** and **United Airlines** in moving into joint facilities at Rio de Janeiro International Airport. Rio becomes the fifth major airport (after Frankfurt, Copenhagen, Shanghai and Beijing) to house all "Star Alliance" partners in a single terminal. The membership's corporate leadership is currently discussing similar arrangements with the airports at London (LHR), Paris (CDG), Los Angeles, and Miami.

The company's 55,000 workers in Germany receive good news during the month. They are to receive a 2.5% salary increase, retroactive to February 1. Additionally, in a onetime action, the airline gives each of them a DM 950 payment in combination with stock options plus a bonus equivalent to 7% of each worker's March wage.

It is confirmed on April 19 that negotiations are underway between Lufthansa and SAirGroup, parent of **Swissair, A.G.**, concerning Lufthansa's possible purchase of SAirGroup's 10% stake in **Austrian Airlines, A.G.**

SAS (Scandinavian Airlines System), British Midland Airways Ltd., and Lufthansa intensify their partnership on May 2 by introducing coordinated sales and marketing, reciprocal frequent flyer programs, joint lounge use, and code-sharing on all services offered by any of the three from either London (LHR) or Manchester. The fortieth anniversary of Frankfurt to San Francisco service is celebrated on May 13.

Utilizing its B-767-233ERs, **Air Canada, Ltd.** launches daily block-seat, code-sharing flights with Lufthansa on June 5 between Toronto and Munich. On June 29, the company accepts delivery of the last of five A340-313Xs to arrive this year.

Also during June, the Irish low-fare carrier **Ryanair, Ltd.** files a complaint with the EU Commission charging Lufthansa with predatory pricing on the trunk route between Frankfurt and London. A review is promised.

On July 14, an interline agreement is signed with **Siberia Airlines (SIBIR)** that permits the two carriers to sell seats on each other's flights. The last of five A321-231s to be received since late January is delivered on July 18.

An internal study is launched in early September designed to provide recommendations on purchase of either the A3XX or Boeing 747X. A report is due by the end of the first quarter 2001. Also, the Lufthansa group supervisory board now extends group Chairman/CEO Weber's contract through 2003. It also indicates that, as of January 1, Lufthansa Technik Chairman Wolfgang Mayrhofer will become DLH chairman/chief operating officer, succeeding Karl-Friedrich Rausch, who is to become executive vice president-group infrastructure.

On September 15 the company heralds the launch of daily nonstop roundtrips from Frankfurt to Phoenix beginning the following March 25. It is announced on September 22 that Lufthansa will, assuming car-

tel authorities agree, take a 24.9% stake in **Eurowings Luftverkehrs, A.G.**, effective January 1. The shareholding may later be increased. Protesting that the move will allow the major to control 80% of Germany's domestic market, **Deutsche BA Luftfahrtgesellschaft, GmbH.** Managing Director Adrian Hunt petitions EU and German antitrust authorities on October 3 seeking to have them disallow the announced 24.9% share. Deutsche Lufthansa will soon take in **Eurowings Luftverkehr, A.G.** The effort will not succeed.

The 30th A340-311 is delivered on October 6; it is flown from Toulouse to Munich, where a special ceremony is held. Also on October 6, a code-sharing agreement is signed with the Italian airline **Air One, S.p.A.** Effective October 29, it covers all Air One domestic flights and the DLH routes from Germany to Rome.

A new code-sharing agreement is signed with **Air China International Corporation** on October 9; it becomes effective 20 days later on the routes from Shanghai and Beijing to Frankfurt. Air China is also able to place its designator on DLH flights beyond Frankfurt to Hamburg, Berlin, and Munich.

On December 10, Chairman Weber, reacting to Frankfurt's scheduled 2006 ban on night flights, indicates that DLH will develop Munich as its secondary hub. Beginning in spring 2001, the flag carrier will boost its international flights from the Bavarian capital and will also introduce an additional 130-140 weekly domestic and European regional services.

The EU Commission informs Lufthansa on October 13 that it has serious concerns about its cooperation with **SAS (Scandinavian Airlines System)** and **Austrian Airlines, A.G.**, both within the "Star Alliance," upon competition over the large number of routes from Austria to Germany and the Nordic countries.

On October 18, the business daily *Handelsblatt* reports that the carrier and Air China have fallen out over their aircraft maintenance joint venture, Ameco. The disagreement centers around long-term expansion strategy, with the Chinese said to be less interested in growth in services to foreign carriers and more concerned with the upkeep of its own fleet.

When **Deutsche BA Luftfahrtgesellschaft, GmbH.** issues a press release attacking the Lufthansa and **Eurowings Luftverkehr, A.G.** arrangement with what it considers to be "untruthful and disparaging" comments, DLH files suit in a Dusseldorf court seeking a temporary injunction against what it terms a "smear campaign." On October 24, the Dusseldorf court grants Lufthansa the restraining order it had sought against Deutsche BA, ruling that the British-owned regional had, in fact, breached Germany's strict laws on competitive advertising and public relations activities.

Service from Frankfurt to Harare, Zimbabwe, and Windhoek, Namibia, ends on October 29. Weekly roundtrip A340-311 service from Frankfurt to Nagoya is expanded from three flights to five, while capacity on the daily Frankfurt to Seoul return flight is increased when a B-747-430 replaces the previously used A340-311. The same day, **United Airlines** begins to code-share on Lufthansa flights from Frankfurt to Abidjan, Accra, and Lagos.

It is announced on October 31 that twice-daily A340-311 roundtrips will begin from Berlin (Tegel) to Washington, D.C. (IAD) on March 25. It is also noted that three-times-per-week A340-311 return flights will start on April 1 from Munich to São Paulo, Brazil.

At Brussels Airport on October 31, four gunmen rob a company A319 being loaded for Frankfurt, making off with five of seven cases of valuables being placed into the cargo hold. Although police do not reveal the contents of the cases, the media speculates that the haul consists of diamonds.

In November, a B-757-330 is leased from **Condor Flugdienst, GmbH.** for a month of domestic service trials. The first of three A320-211s to be received in the next month arrives on November 17.

It is rumored in the German press during November that **Swissair, A.G.**, because of its reportedly weakened financial situation, has become a takeover target for Lufthansa. In an interview with the magazine *Wirtschafts Woche* published on November 23, Chairman Weber categorically rules out buying the Swiss flag carrier.

Even as DLH and its partners **SAS (Scandinavian Airlines System)** and **British Midland Airways, Ltd.** await the outcome of a European Commission review of a joint venture with Austrian Airlines Group, on December 12 the three carriers note that they are also awaiting word from EU on their joint-venture proposal put forward in early May. This move, which they have since been operating on assumption of approval, would allow them to harmonize pricing and share revenues on European routes and to share routes from London (LHR), including British Midland's new destinations of Milan, Rome, and Madrid.

Chairman Weber admits on December 13 that his airline will participate in bidding for a stake in **Thai Airways International, Ltd. (THAI)**.

The B-747-430 delivered on December 15 is the 375th Boeing jetliner received by the German national carrier, which has received more planes from the Seattle manufacturer than any other airline outside of the U.S.

On December 15, a new program that offers Chinese-language air services via 100 Mandarin-speaking flight attendants on the carrier's 23 weekly flights from Germany to Shanghai, Hong Kong, and Beijing begins. On that date, the first four Chinese flight attendants are aboard the day's service from Frankfurt to Shanghai.

The third A320-211 received since November is delivered on December 22. On December 23, the \$135.6-million purchase from **SAS (Scandinavian Airlines System)** of a 20% stake in **British Midland Airways, Ltd.** is formally completed.

Overall enplanements for the year climb 6.1% to 41.3 million. As the year ends, employees look forward to the January celebration of the seventy-fifth anniversary of the founding of the first Lufthansa. They will be displeased when Germany's federal cartel office announces on March 7 that it will block **Deutsche Lufthansa, A.G.** plans to take a 24.9% stake in **Eurowings Luftverkehr, A.G.**

DEUTSCHE LUFTHANSA SUCURSAL EN PERU, S.A.: Peru (1938–1941). To continue a transcontinental air route northward and supplement the work of its associates **Syndicato Condor, S.A.** in Brazil and **LAB (Lloyd Aero Boliviano, S.A.)** in Bolivia, **Deutsche Luft Hansa, A.G. (DLH)** forms this subsidiary at Lima in the spring of 1938. Employing two Junkers Ju-52/3ms, the company inaugurates services to the southern city of Arequipa on May 24.

Operations continue apace for almost three years; however, the carrier is unable to effect a linkup with the Ecuadorian airline **SEDTA (Sociedad Ecuatoriana de Transportes Aereos, S.A.)**, largely because of American concern with German encroachment toward the Panama Canal.

On February 23, 1941, a Ju-52/3m is forced down in the Sechura Desert; four aboard are rescued and four walk out, finding aid at Morrope. Under U.S. pressure, Peru cancels DLH Sucursal en Peru's permits on February 28, giving the airline until March 31 to cease operations. The Lima–Arequipa service is assumed by **Pan American-Grace Airways (Panagra)** the next day.

DEUTSCHE LUFTSCHIFFFAHRTS, A.G. (DELAG): Germany (1909–1919). This pioneer airship line, the first commercial air transport company, is formed by Count Ferdinand von Zeppelin at Friedrichshafen on November 16, 1909. With the mission of proving the viability of rigid airships, the company's initial DM 3-million capitalization is subscribed in part by several German cities as well as the shipping firm Hamburg-Amerikanische Packetfahrt A.G. (HAPAG).

Zeppelin works CEO Alfred Colsman is named general manager and even Hugo Eckener, a journalist and converted early critic of airships, is invited to join the company. Commercial headquarters are established at Frankfurt with airship sheds at Baden-Baden and Dusseldorf, in addition to the main Friedrichshafen base.

On June 27, 1910 the airship LZ-7 *Deutschland*, with chief commander Capt. Kahlenburg in charge, initiates DELAG flights from its Dusseldorf base. Twenty passengers fly on the premier service, paying DM 200 each for the honor of becoming the world's first fare-paying

passengers. Seven flights are completed before the dirigible crashes at Wallendorf on June 28.

An unnamed airship, LZ-6A, is pressed into service on August 21, under new chief commander Capt. Hugo Eckener, and manages to complete 34 flights before it is destroyed in a hanger fire at its Baden-Baden base. Undaunted, Count Zeppelin orders additional airships while Eckener employs his considerable talents as a publicity agent.

LZ-8, *Ersatz-Deutschland*, begins 1911's operations from its Frankfurt base on April 11; also unlucky, she completes only 22 flights before she is, despite the efforts of 250 ground handlers, caught by high winds while emerging from her hanger on May 16 and wrecked. Fortunately, the DELAG board elects to go on.

An order is placed for a new airship and sheds are completed at Gotha and at Johannisthal, near Berlin. LZ-10, *Schwaben*, first flown on June 21, begins service from her Baden-Baden facility only five days later; a lucky ship, she will complete 218 flights before her loss in a June 28, 1912 storm. Meanwhile, in March 1912, Oberkellner Heinrich Kubis is assigned to serve meals aboard the *Schwaben*, becoming the world's first flight attendant.

Three other dirigibles are employed by DELAG prior to the outbreak of World War I. LZ-11, *Viktoria Luise*, based at Frankfurt, where a new shed has just been built (along with one at Potsdam) begins operations on March 4 and completes the most flights of any DELAG ship—489. She is followed by the Hamburg-based LZ-13, *Hansa*, in August, a vessel that will finish 399 ascents.

The LZ-17 *Sachsen* is put into service from Leipzig in July 1913 and will complete 419 trips. During the year, sheds are completed at Dresden, Leipzig, and Hamburg. The company publishes a brochure showing a circular route network from Friedrichshafen and back via Baden-Baden, Frankfurt, Dusseldorf, Hamburg, Potsdam, Leipzig, and Gotha.

All three of the latter-built airships are turned over to the German army on July 31, 1914. After 1,588 flights over 107,205 miles in 3,139 flight hours, during which 34,028 passengers are carried and none ever injured, DELAG operations are now suspended. Although many flights have been excursion charters, many other flights are conducted in a regular fashion and will defy the criticisms of some who will put forward the claims of other heavier-than-air firms to the title of world's first airline.

Two final DELAG airships of improved design are completed: LZ-120 *Bodensee (Lake Constance)* and LZ-121 *Nordstern*. Only the first sees service, putting in 103 flights (78 commercial) in 104 days over a three-stop route network between August 24 and December 5, 1919. During her service, *Bodensee* transports 4,050 passengers, 727 pounds of cargo, and 5.2 tons of mail from her Friedrichshafen base to the Berlin Zeppelin station at Staaken. The trips are made via Munich, with one trip as far as Stockholm. In 103 total flights, the *Bodensee* covers 31,850 miles in a total of 531 hrs. 30 min. flying time. All flights are made without incident, except that of November 3, when a snowstorm causes the airship to make a forced landing near Magdeburg; no damage occurs and the flight is completed. The last passenger flight is made on December 5 and the airship is laid up for the winter six days later.

Before Christmas, French authorities, acting on behalf of the Allied Control Commission, seize LZ-120 and LZ-121, holding them until June–July 1921 when they are confiscated as war reparations. The *Nordstern* flies to St Cyr, near Paris, on June 8; she will serve for five years in the French navy as the *Mediterranee*. The *Bodensee*, meanwhile, is transferred to Rome's Ciampino Airport on July 3; rechristened *Esperia*, she will serve in the Italian Navy until 1927. Forbidden additional airships, DELAG ceases business.

DEUTSCHE LUFTVERKEHRSGESELLSCHAFT, GmbH. (DLT): Germany (1970–1992). The small air taxi service **Ostfriesische Luft-taxi GmbH. (OLT)** is formed at Emden on November 11, 1970 to provide Britten-Norman BN-2 Islander charter flights to resorts in the North Sea and Friesian area.

During 1972, it acquires and merges competing **Ostfriesischen Luft-taxi Dekker und Janssen OHG**. On December 29, the corporate name

is changed to **Ostfriesische Lufttransport GmbH**, and scheduled services commence over the previously on-demand routes.

In September 1974, company officials take the decision to become a regional air carrier and acquire a fleet of four de Havilland Canada DHC-6 Twin Otters. On October 17, the identity is changed again, to the current Deutsche Luftverkehrsgesellschaft GmbH., which is known by the initials DLT. At this point, ownership is taken by Aktiengesellschaft für Industrie und Verkehrswesen/ AGIV (74%) and **Deutsche Lufthansa, A.G.** (26%).

Within a year, the carrier's Twin Otters are operating scheduled regional services not only from Emden, but in Bavaria and from Friedrichshafen as well.

The Olympic city of Munich is moved to Innsbruck in 1976 and the fleet is expanded in 1977 by the addition of six Shorts 330s.

On June 29, 1978, the Frankfurt-based company is reformed again and becomes a regional associate of the national airline; **Deutsche Lufthansa, A.G.** takes a 40% interest while 60% remains with the industrial financing organization AGIV.

Chairman Konrad Liesemann and President Peter C. Orlovius employ a staff of 200 and, in 1979–1980, add three Shorts 330s. As over the previous three years, replacement services are flown on behalf of DLH over such thin routes as Bremen–Copenhagen and Hanover–Amsterdam.

In March 1981, the fleet is again expanded by the addition of three British Aerospace BAe (HS) 748-B2s.

Enplanements for the year total 255,824. The carrier's aircraft all receive new livery in 1982, but the new paint scheme cannot prevent an 8.4% dip in passenger boardings to 235,609 or the fiscal necessity to lay off 16 employees.

During 1983–1985, three more BAe (HS) 748-B2s are acquired, three F-27s are wet-leased, and the Shorts 330s are sold to **Command Airways** and **Pennsylvania Commuter Airlines** in the U.S.

Staff reaches a total of 206 and, in February of the latter year, orders are also placed for six Fokker 50s, followed by requests for five, later six, Embraer EMB-120s placed in April; DLT will be the European launch customer.

The domestic route network is now significantly expanded. New markets now visited include Bayreuth, Dusseldorf, Frankfurt, Hanover, Munster, Osnabruck, Nuremberg, Saarbrücken, and Stuttgart. Additionally, DLT undertakes replacement flights for Lufthansa to Amsterdam, Basel, Brussels, Cologne, Copenhagen, Dusseldorf, Frankfurt, Geneva, Hamburg, Hanover, Munich, Nuremberg, Paris, Stuttgart, Venice, Sylt, Westerland, and Zurich.

Passenger boardings for 1983 total 257,250; for 1984 they reach 235,609, and for 1985 the total is 256,620.

The workforce is increased a dramatic 34.4% in 1986 to 363.

On January 10, the fleet is upgraded by the addition of the first of six EMB-120 Brasilias to be delivered during the year. A Brazilian-registered aircraft on loan until DLT's can arrive, it enters four-times-per-day scheduled service on February 3 over a route from Frankfurt to Munster and Osnabruck.

Scheduled service from Dusseldorf to Guernsey begins on May 10 and, in July, the company applies for scheduled carrier status. During the fall, company BAe (HS) 748-B2s begin to replace **Deutsche Lufthansa, A.G.** on the Hamburg–Copenhagen service.

Enplanements jump 13.7% to 557,444 and revenues advance 30.6% to \$60.3 million.

The payroll grows by 28.1% in 1987 to 465 and the fleet includes 6 BAe (HS) 748-B2s and 3 Brasilias. The route network now includes 30 destinations and 44 city pairs.

New equipment arriving during the year includes seven EMB-120s and the first two of seven ordered Fokker 50s. Incidentally, the first is delivered in August at the biggest aerospace industry theatrical extravaganza to date, one which costs over \$200,000 and witnesses the singing of a song especially commissioned for the occasion.

During the summer, a BAe Jetstream 31 is leased from **Connectair, Ltd.** The new Fokker 50s are placed into service on routes from Ham-

burg and Hanover to Cologne and Stuttgart and to Brussels, Göteborg, Copenhagen, and Paris. Later in the year, Richard Heideker is appointed deputy chairman. During the year, a new engine overhaul subsidiary, DLT AERO, is founded at Alzey, southeast of Frankfurt.

Passenger boardings accelerate 23.3% to 687,577 and a \$1.29-million net gain is generated, atop an operating profit of \$3.28 million.

The employee population rises again in 1988 by 4.5% to 486; two more Brasilias are acquired along with five Fokker 50s.

Beginning in June, all flights are operated with **Deutsche Lufthansa, A.G.** flight numbers. Eighteen new nonstop routes are opened and the route network now comprises 43 destinations in 13 European nations. To help handle the system, two smaller commuters, Stuttgart-based **Contactair Flugdienst GmbH. & Co.** and Essen- and Mulheim-based **WDL Flugdienst (Westdeutsche Luftwerbung, GmbH.)**, are contracted to fly replacement services. In addition, the central maintenance base at Frankfurt is transferred to a new \$664,000 facility at Cologne; technical bases at Cologne and Hamburg are enlarged and lesser improvements are made at those existing at Hanover, Munster, Saarbrücken, Frankfurt, and Dusseldorf.

Customer bookings ascend another 29.5% to 550,923 and revenues reach \$69.7 million. Operating income is \$2.59 million and the net profit climbs to \$1.08 million.

Airline employment ascends 9.1% in 1989 to 549 and, at the beginning of the year, the last 5 BAe (HS) 748-B2s are retired and replaced with 3 more Fokker 50s. The fleet now includes 23 aircraft: 11 Fokker 50s and 12 Brasilias.

The regional passes 52% majority shareholding to **Deutsche Lufthansa, A.G.** in August.

During the fall, orders are placed for 6 Canadair CRJ Regional Jets at \$13.3 million per copy.

Passenger boardings increase by 40.6% to 592,159 and revenues are up, allowing an operating profit of \$3.66 million. Net gain totals \$1.23 million.

Gerhard Schmid is named general manager in 1990.

Company employment is cut back by 6% to 516 and all aircraft except the Fokker 50s are withdrawn and 4 more Fokker 50s are purchased.

In January, **Deutsche Lufthansa, A.G.** increases its shareholding from 40% to 50% and turns over its European regional system to this subsidiary. The network, flown by DLT with DLH flight numbers, includes not only domestic stops, but also several international routes too thin to support the major's Boeing 737-330s.

In May, the company, launch customer for the Canadair CRJ Regional Jet, places a firm order for 13 more. Customer bookings decline another 0.3% to 590,150; however, a \$1.3-million net profit is earned.

Schmid becomes managing director and the fleet stands at 17 Fokker 50s in 1991.

In August, weekday roundtrip service is inaugurated from Stuttgart to Birmingham and Manchester, England. One day during November, fog causes the cancellation of 64 nonstop flights; 15 aircraft must land at alternate airports.

Passenger boardings halt their fall and increase by 7% to 1,172,000 and freight increase 0.8% to 464,000 FTKs. Costs exceed income and the operating loss is \$3 million.

The carrier is renamed **Lufthansa CityLine, GmbH.** in March 1992, but becomes a wholly owned Lufthansa subsidiary on January 1, 1993.

DEUTSCHE REGIONAL AIRLINES, S.A. See **REGIONAL AIRLINES, S.A.**

DEUTSCHE-RUSSISCHE LUFTVERKEHRS-GESELLSCHAFT, GmbH. (DERULUFT): Germany/U.S.S.R. (1921–1941). The holding company **Deutscher Aero-Union A.G.** is formed in Berlin on April 4, 1921. A month later, on May 6, a trade agreement between Germany and the Soviet Union is signed, which, among other points, calls for the creation of a joint air transport concern. In August, German and Russian

representatives begin discussions on establishing an airline as a way to increase the speed of communications between Berlin and Moscow from the 65 hours required by rail and to substitute airmail for the expensive telegraph service currently operated between the two capitals.

In Berlin, **Deutscher Aero-Union, A.G.** and the Soviet government, through the local representative of the People's Commissariat for Foreign Trade, jointly form **Deutsche-Russische Luftverkehrs-Gesellschaft, GmbH.** or **Deruluft** on November 24. The Soviets invest 250,000 gold rubles (and promise to transfer diplomatic courier traffic to the company in lieu of regular subsidy) and the German half is contributed by **Deutscher Aero-Union, A.G. Deutsche Luft-Reederei, GmbH.** is appointed the German airline partner and A. S. Davydov is named managing director.

Orders are placed for 10 five-passenger Fokker F-IIIs, the standard type in service with the German carrier. Initially, plans are made to accomplish all routine maintenance and overhaul, as well as repair, work at Königsberg. Only emergency repairs will be accomplished at Moscow.

Piloted by Erich Just, the first Fokker arrives at Moscow on the evening of April 30, 1922. To help celebrate the important May 1 U.S.S.R. holiday, Just makes several demonstration flights throughout the day. A second F-III, flown by Joachim Stollbrock, arrives in the evening. Pilot Just launches **Deruluft's** express and mail service over a Königsburg-Kovno (Kaunas)-Smolensk-Moscow route on May 2.

One of the first airlines in the world to offer sustained scheduled services, this **Deruluft** route includes the world's longest nonstop section, the 820 km. from Smolensk to Königsberg's Devau Airport in East Prussia.

Passenger flights start on August 27, with scheduled services, both mail and human, ending because of adverse winter conditions on November 1.

During the six-month flying season, 300 scheduled flights have transported 286 passengers, 1,000 kg. of mail, and 18,000 kg. of cargo. Additionally, another 230 passengers are carried on 90 nonscheduled flights.

The first German-built aircraft, an LVG C VI, is acquired in December while the last flight of the year occurs on Christmas Eve when a pilot named Polte reaches Moscow in heavy snow and fog with presents and messages for the carrier's German employees stationed in the Russian capital.

Upon its creation on February 6, 1923, **Deutscher Aero Lloyd, A.G.** succeeds **Deutsche Luft-Reederei, GmbH.** as German airline partner. The route from Königsberg to Moscow now goes by way of Pillkallen, Kovno, Novo-Aleksandrovsk, Polotsk, Vitebsk, Smolensk, and Vyaz'ma. Frequencies over the route are increased to three times per week; however, due to airport conditions a scheduled stop at Kovno is often avoided, requiring aircraft to haul more fuel (and less cargo). A repair station is opened at Smolensk in May.

A second LVG C VI is acquired in June, the same month in which Fokker sends his only F-V to the company for evaluation. **Deruluft** officials are not impressed and, although the ship had flown all the way to Moscow without incident, it is returned to Amsterdam in early August.

During the year, weather information-gathering posts are established for the Moscow to Smolensk, Königsberg, and Kovno segments. The flying season again ends at the end of October.

Scheduled passenger bookings increase to 348 on the year, with mail reaching 1,589 kg. and cargo 20,626 kg.

June 1924 accords company statisticians a host of records: 500,000 km. of scheduled service without a major accident, a million km. logged by company pilots, and several business and diplomatic passengers with 50 flights under their belts.

Four-times-per-week roundtrips commence on July 1. The line's first accident occurs when bad weather forces an F-III to make a forced landing at Gzhatsk, near Smolensk, on September 9; no injuries are reported. Unhappily, a month later, on October 8, Capt. Otto Steger and mechanic Popenhagen crash the RR-1 in thick fog near Vyaz'ma. Steger is killed, becoming the line's first fatality, but the Fokker is later repaired at Moscow's new maintenance and repair center.

Having failed to pass its airworthiness tests, the second LVG C VI is withdrawn at month's end. The year's most unusual cargo is a Russian bear, dispatched to the Berlin Zoo just prior to the season's last flight on October 31.

Enplanements for the year advance slightly to 399, while mail doubles to 2,382 kg. and cargo climbs to 26,817 kg.

A chain of 16 meteorological observation posts is completed between Königsberg and Moscow on May 1, 1925.

A through service between Moscow and Berlin is completed on June 25 when the German **Deutscher Aero Lloyd, A.G.** starts scheduled services from the linkup point at Königsberg to the German capital. This one move increases the route network by half. At the same time, frequencies are increased to six per week.

During the month, the company has examined and chosen not to accept a Fokker F-VII.

Having completed its Moscow repairs, the RR-1 returns to service in July. Meanwhile, Karl Grulich, **Deutscher Aero Lloyd, A.G.'s** chief designer, modifies two F-IIIs into Grulich V-1s.

The first million kilometers of service are completed on August 7; one Russian and two German pilots also join this distinctive kilometer club.

Although four Fokkers are involved in accidents prior to the end of flights on October 31, there are no fatalities and all are repaired.

Passenger boardings increase to 1,064 while mail more than doubles to 5,410 kg; 38,543 kg of freight and baggage is transported.

Deutsche Luft Hansa, A.G. (DLH) is formed on January 6, 1926 and takes over the German portion of the **Deruluft** arrangement from **Deutscher Aero-Union, A.G.**

During the spring, night-flying aids are installed between Berlin and Königsberg and preliminary trials are held prior to the launch of the year's regular flying season.

On behalf of the Ukrainian carrier **Ukrvozdukhput**, a contract route is flown between Moscow and Kharkov in July-September employing two leased F-IIIs.

With the original 1921 agreement approaching lapse, DLH Director Erich Milch and several associates travel to Moscow aboard a DLH Albatros L-73 late in the year. A prolongation is successfully negotiated with Managing Director Davydov and his colleagues. The exclusive company concession to operate scheduled air services between Germany and the Soviet Union is again ratified by the Berlin and Moscow governments. At this point, it is decided that the five Fokkers owned by the Germans will be reregistered with German "D" marks and numbers; the remainder, owned by the Soviet government, continue to possess "RR" identity.

A Grulich V-1 must be written off following a nonfatal crash that occurs during a December charter flight.

The year's bookings are level at 1,098; however, the amount of mail doubles to 10,733 kg. Freight traffic, on the other hand, plunges to 17,991 kg.

In need of new flight equipment after several years of hard service by the original 10 Fokkers (some of which are now unserviceable), **Deruluft**, early in 1927, arranges with **Deutsche Luft Hansa, A.G. (DLH)** for the transfer of seven six-passenger Dornier Merkurs. Company pilots report to Königsberg in April for training on the new aircraft.

The year's flying season begins in dramatic fashion on May 2 when Soviet pilot I. F. Voedillo, a member of the company's million-kilometer club, departs Moscow for Berlin in the F-III RR-7. Simultaneously, the Merkur D-1081 lifts off from Berlin for Moscow.

The **Ukrvozdukhput** contract is also resumed in May with the two F-IIIs leased the previous year. One of these is sold to the Ukrainians, but crashes before month's end. A new Merkur is badly damaged in a landing accident.

Another Merkur, piloted by V. Melnikov for the second time, is badly damaged in a June 4 accident at Königsberg. Unable to stop after landing, the plane rolls into a hangar and crashes into three other company aircraft. The RR-7, which had opened the year's service, crashes in June; no injuries are reported, but the craft must be written off.

Heavy rains wash out the airport at Smolensk and, beginning on July 18, a Merkur inaugurates a revised Berlin–Konigsberg–Riga–Velikie Luki–Moscow route.

By August, two more Merkurs are involved in accidents, all of which have so far been caused by pilot error due to the Dornier's high landing speed.

In a cooperative effort between DLH, Dobroijet, and Deruluft, a Junkers W.33, the *Ural*, makes a 10-stage roundtrip flight Berlin–Irkutsk–Berlin between August 27 and September 2.

When flights cease for the year on October 31, ledgers reveal that passenger boardings have grown to 1,727. Both cargo (38,506 kg.) and mail (25,574 kg.) more than double in volume, with Deruluft now transporting more airmail than any other European carrier.

Beginning in March 1928 and continuing through July, all of the original Dornier Merkurs are returned to Germany for modifications.

In late spring, two Junkers F-13s are leased from **Deutsche Luft Hansa, A.G. (DLH)** for a year.

An F-III is lost in a May 16 crash while a Dornier Merkur is destroyed in a June 4 landing accident. One of the new Junkers monoplanes is employed on June 6 to open Berlin–Leningrad via Danzig, Konigsberg, Riga, and Reval service.

In October, three Fokker F-IIIs are transferred to the Voenno-Vozdushnaya-Sily, Russia's air force. The Soviet Union's First Five-Year Plan, announced during the year, calls for significant expansion of Deruluft operations.

The year's enplanements reach 2,510; 27,992 kg. of mail and 49,291 kg. of cargo are also flown.

Beginning in April 1929, four more Junkers F-13s join the Deruluft fleet. During the same month and in May, six Dornier Merkurs are returned to **Deutsche Luft Hansa, A.G. (DLH)**.

One of the new F-13s disappears on a Leningrad–Riga flight just before the end of the service season on October 31.

In the weeks after the devastating stock market crash in the U.S., company officials report that this year enplanements are down to 2,153 and mail kg. has fallen to 16,711. Freight, conversely, is up 10,000 kg. to 59,669 kg.

Airline employment stands at 11 pilots and 8 mechanics in 1930 and the fleet includes 7 Dornier Merkurs and 3 Junkers monoplanes.

To replace the F-13 lost the previous October, **Deutsche Luft Hansa, A.G. (DLH)** forwards a replacement Junkers, the *Sokol*, in April.

During the May 1–October 31 flying season, daily services are operated over the 2,640-km. route network; Sundays flights are offered for the first time.

The upward trend in bookings resumes, with enplanements totaling 2,396. Mail improves to 27,244 kg., but cargo falls to 49,933 kg.

In late winter 1931, an F-13 equipped with a combined wheel and ski undercarriage device is tested; the unit is unsuccessful.

During the May–October operational season, Velikie Luki comes to replace Smolensk as principal midway stop on the Kaunas to Moscow segment.

Operations continue apace and customer bookings pass the 3,000 mark (3,081) for the first time. Mail totals 29,060 kg. while freight increases to 70,146 kg.

A Dornier Merkur is sold to **Aeroflot Soviet Airlines** in January 1932 as plans are made to upgrade the joint-airline's fleet with trimotors.

The Russo-German Deruluft arrangement is renewed for another five years on February 24. During the month, **Aeroflot Soviet Airlines** receives two more Merkurs.

Fleet enhancement begins in March when **Deutsche Luft Hansa, A.G. (DLH)** provides a pair of previously operated 10-passenger Rohrbach Ro-VIII Rolands, the *Pelikan* and the *Storch*. While Russia makes plans for its fleet contribution, the company's four remaining German-registered Merkurs are modernized with new propellers and improved cabin heating.

Once known as the *Blaufuchs*, a Dornier Merkur is lost in a nonfatal July crash.

Three nine-passenger Tupolev ANT-9s are transferred over in September and enter service on the route from Konigsberg to Moscow via Kaunas and Velikiye Luki. All of the fleet's aircraft are now equipped with radio.

The year's enplanements rise to 3,610; mail is down to 24,243 kg., but cargo climbs to 78,183 kg.

A limited number of F-13 services are offered on an experimental basis during the winter of 1933, using aircraft equipped with wheels or skis. A third Rohrbach Ro-VIII Roland, the former *Kranich*, is acquired in February.

Following establishment of the Hitler government, Russian security concerns increase. Russian pilots are prohibited from flying the Konigsberg–Berlin segment, while German personnel in Moscow are closely monitored. Russian controllers are required on all flights into Soviet airspace to ensure border crossings at designated points and an absence of photography.

In time for this year's operations, beginning in May, a new headquarters and maintenance center is completed at Moscow.

ANT-9 flights commence during the summer from Konigsburg to Leningrad via Tilsit, Riga, and Tallin.

There are no other changes in services this year, but customer bookings jump to 5,857. Mail traffic reaches 31,611 kg. and cargo increases to 121,779 kg.

Regularly scheduled winter services commence in early 1934. In a concentrated effort to increase traffic, company officials coordinate their schedules with those of **Deutsche Luft Hansa, A.G. (DLH)**. Passengers coming in from Moscow or Leningrad are now able to make same-day connections to such European capitals as Vienna, Paris, Copenhagen, Amsterdam, and London, as well as to larger German cities, including Hamburg and Munich.

One of the ANT-9s crashes on October 22 while the last Dornier Merkur is returned to DLH.

During the first 12 months of year-round connecting service, Deruluft traffic skyrockets to 12,130 passengers flown, along with 56,952 kg. of mail and 204,620 kg. of cargo.

The German equipment commitment to Deruluft is dramatically increased in early 1935. Beginning just after the new year, 5 17-passenger Junkers Ju-52/3ms are delivered over the next 5 months: *Phoenix*, *Kondor*, *Milan*, *Kormoran*, and *Flamingo*. The former is barely in service before it is lost in a crash on January 31.

The Rohrbach Roland *Storch* is destroyed in a March 7 accident; however, the ANT-9 lost the previous fall is replaced by a unit from **Aeroflot Soviet Airlines**, which is christened *Korshun* upon its arrival in August.

In May, a new airport is opened at Leningrad, leading to an acceleration in the retirement of Junkers F-13s begun in January.

Passenger boardings move ahead to 14,185 for the year and mail rises to 73,615 kg. Cargo is up to a significant 366,228 kg. as 99.5% of the carrier's summer flights are completed without incident, the highest rate of regularity that the airline will accomplish.

The two surviving Rohrbach Rolands, the *Pelikan* and *Kranich*, are returned to **Deutsche Luft Hansa, A.G. (DLH)** in January 1936, followed by the F-13 *Lerche* in March. Another Junkers monoplane is lost in a crash on May 16, but a former **Aeroflot Soviet Airlines** ANT-9 is received in June and christened *Golub*. The ANT-9 *Yastreb* is destroyed in a November 6 accident.

Increased security concerns on the Russian side and a lack of traffic on the main Berlin–Moscow route, lead to a decision to end the 15-year-old Russo-German airline concession when it expires on December 31. Ironically, traffic on this last full year of joint service is at its peak.

Enplanements total 18,689 while 102,495 kg. of mail and 495,902 kg. of freight are flown.

Although the decision has been made to provide flights for one final quarter, all remaining aircraft are returned to their respective parents in January 1937. Along with a German Douglas DC-2, three Ju-52/3ms and the Soviet ANT-9s *Korshun* and *Golub* are chartered to keep up flights.

Deruluft flights end on March 31; however, **Deutsche Luft Hansa, A.G. (DLH)** now assumes responsibility for all route sectors outside of the U.S.S.R. New He-111 civil transports are placed on the Berlin to Königsburg via Danzig service in late spring.

German and Soviet officials agree on August 23 (effective August 31) to officially dissolve the carrier. Formal liquidation is delayed and never occurs.

Following promulgation of the Ribbentrop-Molotov pact in August 1939, DLH and **Aeroflot Soviet Airlines** open a new Berlin–Moscow route on January 21, 1940. It, together with all vestiges of the onetime transborder airline, is finally terminated on March 22, 1941.

DEUTSCHE VERKEHRSFLUG, A.G.: Germany (1926–1933). When **Deutsche Luft Hansa, A.G. (DLH)** is formed on January 6, 1926, a number of small **Junkers Luftverkehr, A.G.** affiliates in Bavaria are being flown by **Luftverkehr Thüringen, GmbH**. In February, these are taken over in a partnership of cities, the state, and certain manufacturers and are reformed on March 25 into the joint-stock company **Nordbayerischen Verkehrsflug, A.G.**

On July 25, the local system comes under control of the aircraft builder Messerschmitt Flugzeugwerke, which provides one of its few M.18s to renew services next day.

By 1930, a total of 17 small feeder routes are in operation; company Messerschmitt M.18s and M.20s transport some 13,000 passengers between 36 airports. On December 30, the carrier is renamed **Deutsche Verkehrsflug, A.G.** It will be absorbed by DLH early in the decade.

DEUTSCHER AERO LLOYD, A.G. (DAL): Germany (1923–1926). Bleeding financially from competition over similar routes, Hamburg–Amerikanische Packetfahrt (HAPAG) and Norddeutscher Lloyd (NDL) elect to merge their airline operations on February 6, 1923. **Deutscher Aero Union, A.G.** and **Lloyd Luftdienst, GmbH**, each take half interest (amounting to capitalization of 100 million reichmarks) in the new Deutscher Aero Lloyd, A.G. They contribute all of their equipment, facilities, personnel, and airline shares, including the former carriers **Deutsche Luft Reederei, GmbH**, **Lloyd Luftverkehr Sablatnig, GmbH**, **Deutscher Lloyd Luft, GmbH**, and **Lloyd Ostflug, GmbH**.

The two carriers also agree to merge their Danzig affiliates; **Danziger Lloyd Luftdienst, GmbH**, and **Danziger Luft Reederei, GmbH**, become **Danziger Aero Lloyd, A.G.** Although HAPAG and NDL remain as backers, AEG now withdraws and is replaced by the Deutsche Bank, whose representative, Dr. Kurt Weigelt, is a major force behind the amalgamation.

Employing some 19 modified Fokker F-IIIs (Fokker-Grulich F-II) and an uncertain number of Dornier Komet IIs and IIIs received from **Deutsche Luft Reederei, GmbH**, DAL resumes domestic flights over rationalized portions of the old routes, featuring operations to the Leipzig Trade Fair.

On April 23, the previously flown Rotterdam–Copenhagen service, pooled with **KLM (Royal Dutch Airlines, N.V.)** and **DDL Danish Airlines, A.S.**, is restarted. Seven days later, a joint London–Berlin via Amsterdam, Bremen, and Hamburg, weekly service is launched in cooperation with **The Daimler Airway, Ltd.**; DAL begins flying the service on May 21.

In March 1924, Dornier Komet IIs inaugurate Berlin–Vienna service via Dresden and Prague. Later, Dornier C-II Dolphins are employed to initiate a trans-Baltic night service from Wernemunde–Stockholm via Karlshamn. Three Udet U-8s are received and two (D-417 and D-483) are christened *Linde (Lime Tree)* and *Blindschleiche (Blind Worm)* is introduced on the Bremen to Hanover route, as well as on flights from Munich to Berchtesgaden, Hanover to Hamburg, and Munich to Partenkirchen via Garmisch.

On May 24, the **Condor Syndikat** is formed at Berlin; created to support the sale of German civil aircraft overseas, it has DAL backing.

On April 15, 1925, DAL becomes the first German airline to open service to Italy as a Komet III arrives at Milan from Berlin following a

Munich stop; the event also marks the first time a commercial airliner has flown over the Alps.

Competition between DAL and the **Junkers Luftverkehr, A.G.** is ferocious during these years and the drain on state, municipal, and private funds for subsidies become burdensome. On May 7, Junkers proposes the creation of a super-consortia, the Europa-Union, to unite both its Trans-Europa and Ost-Europa groups.

Scheduled service between Berlin and Moscow is realized on June 15 when DAL inaugurates a scheduled service from the German capital to the East Prussian city of Königsberg, where a connection is made with the **Deutsche-Russische Luftverkehrs, A.G. (Deruluft)** route into Russia.

A meeting of the 16 airlines to be involved in the Europa-Union takes place in Berlin on September 7. The aviation department of the German Transport Ministry disallows this move, viewing it as an attempt by the manufacturer to increase its power over the airline industry. This government bureau assumes 80% control of **Junkers Luftverkehr, A.G.** in October. At approximately the same time, Deutsche Bank/Deutsche Petroleum official Weigelt, who had assisted in the creation of DAL and with cooperation with Ernst Brandenburg, GTM aviation bureau chief, prepares a pamphlet entitled *Fusion in the Field of Air Traffic*, which recommends a Junkers/DAL merger.

Merger negotiations proceed and, on January 6, 1926, the two corporate carriers are merged into a new national airline, **Deutsche Luft Hansa, A.G. (DLH)**.

DEUTSCHER ZEPPELIN-REEDEREI, A.G.: Germany (1935–1937). Following an around-the-world voyage aboard the LZ-127 *Graf Zeppelin* during August 1929, the 5,996-mile, nonstop Japan to Los Angeles segment of which is flown in 79 hrs. 3 min., Dr. Hugo Eckener remains behind in September as Capt. Ernst Lehmann returns the giant airship from Lakehurst, New Jersey, to Friedrichshafen, Germany. In discussions with American financiers, Dr. Eckener lays plans for global Zeppelin services via the International Zeppelin Transport Company now established. His activities are greatly assisted by release of the government documentary film production *Around the World via Graf Zeppelin*, a compilation of newsreel footage.

Luftschiffbau Zeppelin, GmbH, begins business in 1930. Commencing on May 17, the airship *Graf Zeppelin*, under the sponsorship of the company plus **Deutsche Luft Hansa, A.G.**, Hamburg–Sudamerikanische Linie, A.G., and the **Syndicato Condor**, makes a roundtrip proving flight. The airship travels from Seville, Spain, to Recife, Brazil, and up to Lakehurst, New Jersey, and back to Friedrichshafen via Seville, arriving on June 6.

Similarly backed, three additional test flights are made during August, September, and October 1931.

Scheduled, revenue passenger service is inaugurated on March 20, 1932 Friedrichshafen to Rio de Janeiro via Seville and Recife and nine roundtrip flights are made between April and October.

Nine roundtrip voyages are made in 1933. The final visit of the *Graf Zeppelin* to the U.S. is concluded on October 28. Having arrived via Brazil and Opa Locka, Florida, the huge airship is temporarily based at Akron, Ohio, in order to make a visit to the Chicago World's Fair. While flying over the Windy City, Eckener, who has been ordered to show the Nazi swastika on the airship's tail, has it painted on the upper left-hand panel only and then circles in a clockwise rotation, which keeps it from view of those on the ground below. The maneuver infuriates many in the German government. From Akron, Capt. Lehmann, with two dozen passengers, departs for Friedrichshafen, via Seville, arriving on October 31.

Another dozen voyages are made in 1934. Without incident, 34 roundtrip summer crossings have been made in two years and convince the Nazi government that a state airship line should be formed, for propaganda value if nothing else.

On March 22, 1935, Hermann Goering, as head of the Reich Air Ministry, or Reichsluftfahrtministerium (RLM), joins the Zeppelin company with elements of **Deutsche Lufthansa, A.G.** to form Deutscher

Zeppelin-Reederei, A.G. Critics, then and now, suggest that the new concern has been founded simply to fly the Swastika around the world for propaganda purposes, with commercial aspects of its operation forming a secondary purpose. In any event, airship pioneer Eckener, who had incurred Goering's wrath over the Chicago incident two years earlier, is made chairman/CEO.

The *Graf Zeppelin* mounts 16 roundtrip South Atlantic crossings during the year, several of which terminate at the expensive new Santa Cruz terminal, near Rio de Janeiro. The airship's 100th ocean crossing comes on September 15 and its 500th flight a week later. The 50th South Atlantic flight and one-millionth km. (631,370 miles) are completed in December.

On March 4, 1936, LZ-129 *Hindenburg* makes its first flight and is joined by *Graf Zeppelin* in making several North Atlantic proving flights from Rhein-Main. The last great passenger-carrying airship, the *Hindenburg* makes its maiden transatlantic crossing on May 6 in a record 64 hrs. 53 min.

During the summer flying season, *Graf Zeppelin* completes 11 roundtrip South Atlantic crossings and *Hindenburg* makes 4, plus 10 over the North Atlantic.

In an effort to increase the passenger payload, the latter airship is re-configured during the winter of 1936 to permit a capacity of 72 passengers. It is hoped that this would pay off in a reduction of operational costs to those roughly incurred by **Imperial Airways, Ltd.** Empire flying boats. Unhappily, the balloon cells of the airships must still be filled with explosive hydrogen gas.

On May 4, 1937, the *Hindenburg*, with 61 crew and 36 passengers under the command of Capt. Max Pruss, departs Frankfurt on her first transatlantic crossing of the year. The dirigible passes over Manhattan's Empire State Building at 3:30 p.m. on May 6. While attempting to moor to a mast at Lakehurst, New Jersey, at 7:23 p.m., it explodes and burns (35 dead) in a spectacular incident caught on newsreel film and narrated by newsman Herb Morrison of the Chicago radio station WLS. Among the dead is Capt. Ernst Lehmann.

Over the years, various theories will be put forward in an attempt to explain the disaster, including lightning, static electricity, and sabotage; although the latter is boldly given as the cause in the 1975 Universal motion picture *The Hindenburg* (starring George C. Scott), the actual cause is not known. It is reported in the November 1997 issue of *Popular Science* that former NASA engineer Addison Bain, after years of research, has speculated that an electrical discharge touched off a fire in the flammable skin at the top of the dirigible. It was this fire that expanded, eventually being joined by escaping hydrogen from the gas cells. This theory is, however, challenged.

Although the *Graf Zeppelin* remains, the RLM abruptly shuts down its unique commercial experiment, having carried some 16,000 passengers without incident before the Lakehurst disaster. The *Graf Zeppelin*, meanwhile, completes two roundtrip flights to South America during the year, the second on May 8 when it returns to Friedrichshafen for the last time.

In light of the *Hindenburg* disaster, the surviving *Graf Zeppelin* and the new *Graf Zeppelin II* are taken out of service. The former completes its final service on June 19 when it is opened for display at Frankfurt Airport after having flown up from its Friedrichshafen base. In nine years of operation, the airship has made 144 ocean crossings and 590 flights over 1,053,395 miles, carrying a total of 13,100 passengers.

The *Graf Zeppelin's* captain, Hans Von Schiller, publishes his memoirs in 1938, *Kapitan Hans von Schiller's Zeppelinbuch* (Leipzig, Germany: Bibliographisches Institut, 1938). A crewman, Eugen Bentele, who has served on both the *Hindenburg* and the *Graf Zeppelin*, reveals his thoughts years later, in his *The Story of a Zeppelin Mechanic: My Flights, 1931-1938* (Friedrichshafen, Germany: Wolfgang Meighorner Schardt, 1992).

After completing radar espionage missions in British airspace during May and August 1939, the *Graf Zeppelin* is ordered dismantled by the German government early in May 1940.

The company's CEO, the great airshipman Hugo Eckener, publishes his reminiscences in *Im Zeppelin über Länder und Meere: Eribenisse und Erinnerungen* (Flensburg, Germany: Christian Wolff, 1949.). He will also be remembered by Rolf Italiaander in his *Hugo Eckener, Ein Moderner Columbus* (Konstanz, Germany: Stadler, 1979); a much expanded 562-page title by the same author, *Ein Deutscher Namens Eckener* (A German Named Eckener), is published by the same firm in 1981.

DEVOE AIRLINES: United States (1981-1983). Devoe is founded by Jack DeVoe at Opa Locka, Florida, in the fall of 1981. Employing a fleet of 4 Piper PA-31-350 Navajo Chieftains, 1 PA-31-310 Navajo, and 1 Cessna 402B, the small intrastate inaugurates daily roundtrip scheduled passenger flights on November 9 to Orlando, Jacksonville, Melbourne, and Tallahassee. Operations continue apace in 1982 as Fort Lauderdale and Key West join the route network. The company is renamed **Gulf Central Airlines** in 1983.

DHL AERO EXPRESS, S.A: P.O. Box 11491, Panama City 6, Panama; Phone (507) 238-4203; Fax (507) 238-4149; Code DS; Year Founded 1996. Felix Piardi establishes this small charter operation at Tocumen International Airport in the spring of 1996 to offer scheduled roundtrip all-cargo services to Miami on behalf of (49%) minority owner **DHL Worldwide Express**. Revenue flights commence in August employing a single Boeing 727-264F and except for the addition of two more Dash-264Fs, continues without change thereafter. Piardi's three freighters are all hush-kitted.

DHL AIR, U.K., LTD. See DHL AIRWAYS (DHL WORLDWIDE EXPRESS)

DHL AIRWAYS (DHL WORLDWIDE EXPRESS): P.O. Box 75122, Cincinnati, Ohio 45275, United States; Phone (606) 283-2232; Fax (606) 525-1998; <http://www.dhl.com>; Code ER; Year Founded 1969. Adrian Dalsye, Larry Hillblom, and Robert Lynn form this airline at San Bruno, California, in 1969 to transport bills of lading by air between San Francisco and Honolulu. Carrying these documents, a company official flies by commercial carrier from the origination port of a ship to its destination point; since the documents arrive before the ocean-going vessels, shipping officials are able to get an advance on paperwork completion, thereby speeding turnaround times.

This simple purpose grows during the 1970s into a major freight forwarding and courier express concern, DHL Corporation. Initially, DHL does not fly its own services, but instead continues to concentrate on document delivery for merchant shipping, sending couriers to various destinations aboard scheduled carriers. Each courier is, in turn, able to check upwards of 150 green canvas document bags (nicknamed "body bags") as excess baggage, banking on airlines to unload passenger belongings before cargo. The time and red tape saved brings great profit.

In 1971, the three partners enter the international arena when service is inaugurated to the Philippines; DHL is, in fact, the first international air express carrier to fly into the Pacific Rim.

DHL International, Ltd. is established at Hong Kong in 1972 under the direction of local entrepreneur Po Chung. Service is initiated to Japan, Singapore, and Australia.

The first flights are made to continental Europe in 1973, to the U.K. (LHR) in 1974, Latin and South America in 1976, to the Mideast in 1977, and to Africa in 1978.

The company office in Singapore moves into the new Changi International Airport Cargo Agents Complex in 1982.

DHL refrains from entering the air express market until 1983 when, in response to incursions into the document transport business, the carrier elects to take on **Federal Express, UPS (United Parcel Service)**, and others directly. The U.S. company is reformed with, initially, two operating subsidiaries. DHL Air Cargo is established at Honolulu to offer regularly scheduled freighter flights to Hilo, Kahului, Kona, and

Lihue employing a Lockheed L-188A or a Douglas DC-6A. DHL Worldwide Express, also known as DHL Airlines, is organized to fly express cargo and courier services throughout Canada and the U.S.

Two major sorting and consolidation hubs are established at Cincinnati and Salt Lake City, with branches at Atlanta, Chicago, Dallas, Houston, Miami, Los Angeles, New York City, Seattle, San Francisco, and Washington, D.C.

Beginning in March, overnight delivery service over longer routes is provided by the carrier's two Boeing 727-22Cs and three B-727-30Cs, while operations over shorter runs are handled by Learjets, Swearingen Merlins, Cessna 402s, Beech 18s, Falcon 20s, and miscellaneous chartered aircraft plus Bell 206B JetRanger helicopters, the latter providing courier service in the New York City area. Fiercely private, DHL refuses to release either traffic or financial data.

The DHL Corporation continues to expand overseas during the 1980s, where foreign carriers are contracted to undertake overnight delivery services of express freight on its behalf. Throughout the decade, the line between freight and air express blurs significantly.

A separate, wholly owned subsidiary, ELAN (European Land and Air Network) is established in 1981 to handle heavier weight express shipments. In 1982, work begins on a major 36-acre hub facility at Cincinnati.

The first air express flights into Eastern Europe begin in 1983. In the U.S., DHL Airlines prospers, even in competition with other similar operations. DHL Worldwide Express becomes, in fact, a network operated by two separate companies under common ownership.

Employing turboprops, the U.K. subsidiary **Elan Air, Ltd.** begins "Overnight Delivery System" flights in 1984 from East Midlands Airport to a number of major cities in central Europe.

In 1985, company headquarters are transferred to Redwood, California, to allow more expansion room. The major hub is opened at Cincinnati. From here, services will be provided to the U.S. and its territories. In March, the first two of four ordered Fairchild Expediter are delivered. Eighteen dedicated aircraft are sent to Brussels during the year, to begin operating from the company's new full service EC hub.

Cargo planes and helicopters shuttle express-cargo and documents between 12 regional hubs and 76 gateway cities in 1986. Without revealing exact figures, company officials report that traffic increases 34% during the year, including a 50% boost in international services. During the year, company officials join with those from **UPS (United Parcel Service)** to form **International Parcel Express (IPX)** as a joint venture vehicle to be used in bidding on the U.S. DOT's U.S.-Japan small package route.

The Belgian all-cargo commuter **European Air Transport, S.A.** is acquired during the year to assist in the transfer from a European documents carrier to a freight carrier. The aircraft dispatched to Brussels the previous year form the carrier's fleet, except for its original airplane. Expansion further into the U.K. market is made possible by the acquisition of the international business of the ground and air parcels delivery firm Securicor, Ltd.

In 1987, the fleet includes 12 B-727-100Cs, 10 Expeditors, and 1 Lockheed L-188AF. The Cincinnati hub is expanded further and IPX is wholly acquired by and absorbed into **UPS (United Parcel Service)**. The transition of **European Air Transport, S.A.** from a commuter carrier into a subsidiary of the first integrated express freight system in Europe starts with the delivery of the first Convair CV-580 freighter in August. Without providing specific statistics, the carrier reports its shipment volume up by 12%. A new hub is opened at London (LHR).

By September 1988, the **European Air Transport, S.A.** fleet at Brussels has been increased to 11 CV-580s, all wearing DHL colors. In October, Charles Lynch is succeeded as CEO by the former Hyatt Hotel and Braniff Airlines CEO, Patrick Foley.

During the year, service is initiated to the People's Republic of China and a new joint venture with Mideast investors, **DHL Aviation Services, Ltd.**, is set up in Bahrain. To provide fast delivery of express cargo and documents throughout the Mideast, the carrier begins revenue

operations with one each Fairchild-Swearingen Merlin IV, Merlin IVC, and Metro III.

At this time, the company estimates that it carries half of all U.S. outbound shipments in over 100,000 international shipments per day; it also has the largest market share in international air express, followed by TNT of Australia, the U.S. Postal Service, **Federal Express**, **UPS (United Parcel Service)**, and **Emery Worldwide**.

Two B-727-100s are withdrawn in early 1989 as six B-727-200s are acquired from **Air France**. The ELAN subsidiary is incorporated within the company.

In July 1990, **Japan Air Lines Company, Ltd.**, **Deutsche Lufthansa, A.G.**, and the Nissho Iwai Japanese Trading Company seek to invest \$500 million for a 12.5% shareholding. DHL International headquarters are now firmly established at Brussels, where that hub is expanded, and the international division launches services to Cuba and Mongolia. A Metro II is placed into service with DHL Aviation Services, Ltd.

To meet customer needs in a more formalized manner, a specific air freight division is established in January 1991. At this point, the company operates 1,350 worldwide stations (including 960 wholly owned), of which 1,100 are in 188 foreign countries. Operations are conducted through 46 gateways and shipping and distribution centers, including major distribution hubs at Cincinnati and Brussels. In addition to its own fleet of 125 aircraft, DHL also makes use of the cargo holds of 172 airlines.

Nissho Iwai Japanese Trading Company assists DHL in the creation of new logistic support centers in Brussels, Bahrain, and Singapore. A Douglas DC-8-73F is chartered from **Emery Worldwide** late in the year to operate five-nights-per-week services between the Ohio and Belgian cities. The **DHL Aviation Services, Ltd.** Merlin IV is replaced by a second Metro III and a Convair CV-580.

Richard F. Cozzi becomes vice president-airline operations in February 1992. An agreement signed with **Emery Worldwide** at the time of the aircraft lease permits DHL, beginning in March, to provide leased space to Emery on the New York to Brussels run. At the same time, two other arrangements are signed. The first provides for additional Saturday service on behalf of Emery between New York and Brussels and Manchester. Under the second, DHL initiates intra-European airlift on behalf of **Emery Worldwide** from the former's Brussels hub; the deal will allow Emery to discontinue its own European hub operation in Maastricht.

In April, DHL International becomes a British-registered company, shifting its headquarters from Hong Kong to Bermuda to avoid operating in the uncertain climate now swirling about the U.K.'s Asian crown colony. Also during the spring, the U.S. arm of the multinational air express company agrees to purchase five Douglas DC-8-73s from **Air Canada, Ltd.**

Japan Air Lines Company, Ltd. (2) and **Deutsche Lufthansa, A.G.** increase their shareholding in DHL International during July from 12.5% each to 25% and Nissho Iwai, a security firm, retains 7.5% for 57% majority control by the three partners; founder Larry Hillblom retains 42% minority interest. The agreement combines the flight capacity of the German and Japanese airlines with DHL's ground transportation network; the Rising Sun and German carriers each take a 1% stake in the American subsidiary and assist it in launching cargo deliveries in Scandinavia. Meanwhile, a third Metro III is provided to **DHL Aviation Services, Ltd.** in Bahrain.

DHL Air, U.K., Ltd. is established at East Midlands Airport in August 1992 as a joint venture between DHL Airways U.S.A. and **Hunting Cargo Airlines, Ltd.** J. D. Capstick is named chairman and his company employs, as required, freighters leased from Hunting. These undertake overnight express freight flights from the company's base and a companion field at Coventry to Brussels, Belfast, Cologne, Dublin, and Shannon.

A marketing agreement is signed with **Japan Air Lines Company, Ltd. (2)** under terms of which the new airline agrees to take over JAL's Scandinavian cargo operations.

The first Canadian Douglas arrives in September and begins operations from the DHL Airways hub at Greater Cincinnati Airport.

In 1993, President/CEO Foley oversees a workforce of 26,000 and an owned fleet comprising 1 DC-8-73, 6 B-727-200s, 5 B-727-100Fs, 3 B-727-100F(M)s, 10 Fairchild Expeditors, and 1 Bell 206B.

Under charter are a number of Convair CV-440s, Cessna 208 Caravan Is, and a Douglas DC-8-73. In February, it is announced that DHL Worldwide Express will embark upon a 4-year, \$1.25-billion capital improvement program, acquiring new automation, computers, handling systems, and ground facilities. The remaining four DC-8-73s are on hand by April, flying from Cincinnati.

In June, the company acquires the European sorting center and facilities of **Federal Express** at Brussels; the Belgian center becomes the largest automated hub outside of the U.S. Scheduled express-cargo and document-courier services continue to be flown between 12 hubs and 76 gateways.

For the first time, the company elects to report its statistics to the DOT, which in turn ranks the carrier as a national airline.

Freight traffic rises 46.3% on the year to 298.2 million FTKs.

A contract is signed in April 1994 with National Advanced Systems Company, of Saudi Arabia, for the transport, storage, and distribution of NASCO communications products.

Flights begin to Vietnam and by the end of December, a total of 84 flights are dispatched to various destinations nightly from the main Cincinnati hub; more than 40,000 U.S. and 80,000 global destinations are part of the company worldwide network, which stretches out of 19 hubs and 220 gateways.

Plans are made to open a \$1-million heavyweight building on the company's 36-acre Cincinnati location, the fourth expansion there in a decade. Services to Vietnam begin.

The year's cargo traffic advances 7% to 319.06 million FTKs as 95 million individual express shipments (weighing 225 million pounds) are flown. Revenues total approximately \$4 billion.

The workforce stands at 6,400 in 1995.

During the first half of the year, a \$2.2 million distribution center is opened at Sydney, Australia; the first of six B-727-31C/-35Fs to be introduced from that point before year's end begins flying trans-Tasman freighter services to Auckland. In addition, 16 distribution centers are opened in China.

In August, the heavyweight building is opened at Cincinnati. The company's first major hub now employs 1,000 workers who dispatch an average of 150,000 shipments per night on 84 flights. In addition, a logistics distribution center is established at Miami.

To enhance its Asian small package market, the company introduces the DHL Jumbo Box, the cargo version of an express mail document envelope. Additionally, a flat-rate Asian shipping charge for packages weighing 55 pounds or less is introduced.

Also during the summer, six B-727-223Fs, first flown as passenger aircraft by **American Airlines**, are sent to Brussels for use by **European Air Transport, S.A.**

As a supplement to its transshipment centers at Singapore and Hong Kong, in December DHL opens a new Asian hub at Manila, a 118,000-sq.-ft. facility valued at over \$60 million. A hush-kitted B-727F inaugurates regional cargo flights from the new base.

Traffic soars as 473.67 million FTKs are operated, a 48.5% increase. The average weight of shipments through the Cincinnati hub jump 20%. There are profits: \$17.35 million (operating) and \$16.78 million (net).

Airline employment is increased by 25% in 1996 to 8,000 as DHL Airways, the U.S. arm of DHL Worldwide Express, reaches the ranks of DOT-certified major airlines. The owned domestic fleet now includes 20 B-727Fs and 7 DC-8-73s; chartered are an additional 59 Convair 580s, Cessna 208 Caravan Is, and Fairchild SA-26 Expeditors. Another 159 freighters are operated by DHL overseas.

In late January, the company begins negotiations for several modules of the new cargo center that will open in Hong Kong's new Chek Lap Kok Airport in 1998. Ten more distribution centers will be opened in China this year.

Flights commence from Cincinnati to Montreal, from the U.S. West Coast to Japan, and from Miami to Panama City.

During the first quarter, four B-727-264s are purchased from **Mexicana Airlines, S.A. de C.V.** All are converted into freighters at Miami and are thereafter sent out to Guam to be operated under contract by **Continental Micronesia**.

Early in the second quarter, DHL forms a Panamanian subsidiary to develop an all-cargo hub in Panama. In late May, a new freight distribution center is opened in downtown Hong Kong.

Plans are made during the summer to establish a new hub at Entzheim Airport in Strasbourg. The concept is actively opposed by both local residents and environmentalists concerned over noise and pollution questions. During the third week of September, however, the French city's chamber of commerce asks the carrier to suspend its initiative. With the welcome mat withdrawn, DHL complies with the request.

By year's end, the company has expanded into 26 Chinese cities. Also during the 12 months, Chief Financial Officer Victor Guinasso is appointed president/chief operating officer.

A total of 549.22 million FTKs are operated, a 16% increase, and revenues increase 54.2% to \$1.08 billion. Expenses swell 53.6% to \$1.05 billion, leaving an operating gain of \$30.78 million and a net gain of \$27.5 million.

In April 1997, a memorandum of understanding is signed with Airbus Industrie for the purchase of seven A300B4-200s. The aircraft will be converted into freighters (Dash-200Fs) and delivered during the second half of 1998.

On July 1, the freight operator becomes the first to order Airbus Industrie A300B4Fs when it signs a memorandum of understanding with Pinnacle Aircraft Leasing. Three of the converted passenger planes will begin all-cargo service from the company's Brussels hub at the end of the year, with four others delivered during the second half of 1998.

On July 26, a marketing and operations agreement is concluded with **LOT Polish Airlines, S.A.**; at this point, the Polish line becomes general sales agent in the country for the Brussels-based cargo carrier. DHL Worldwide Express launches B-727F freight service on August 1 from Copenhagen to Katowice via Warsaw.

In what the media portrays as one of the last great labor-management clashes of this century, 200,000 members of the Teamsters strike **UPS (United Parcel Service)** on August 4. The job action is supported by company pilots; management flyers and contract aircraft are only able to provide a trickle of service.

Kiwi International Airlines recruits new business for its shipping services and **Emery Worldwide** attempts to accommodate customers sending packages in excess of 5 pounds. However, UPS's major competitors, **Federal Express** and DHL Worldwide Express, refuse most new business (the latter takes new international business), but do accept packages left in drop-off boxes. Talks between the Teamsters and UPS resume on August 7 and the job action is settled a little over a week later. Kiwi is able to retain some of the new business generated during the walkout.

An arrangement is reached during August with both **Air Koryo** and **China Northern Airlines Company, Ltd.** to provide all-cargo shipments between Beijing and P'yongyang, employing belly space aboard the airliners of those two companies. At the same time, a separate freight agreement is reached with **Air Koryo**. Under its terms, the North Korean airline will employ an Antonov An-26 to fly trading documents and light machinery between Japan and Europe on behalf of DHL.

Under terms of the July 26 agreement, a B-727F painted in DHL colors with **LOT Polish Airlines, S.A.** markings, introduces roundtrip service from Brussels to Warsaw on September 8. The B-727F, which had previously operated through Warsaw from Copenhagen to Katowice, is sent to Berlin to fly from the German city to Katowice.

It is reported on November 5 that DHL has opened its office and begun operating in the North Korean capital of P'yongyang. Asia Marketing Director Peter Tilby indicates that the move is an outgrowth of negotiations first begun in 1992. Plans are made to supplement **Air Koryo**

flights under the August arrangement with train service from Beijing. The first shipment, completed the previous day, comprises 12 tons of food and medical supplies.

In November and December, the company revitalizes its World Wide Web homepage with a series of "country specific" points of entry. Secondary pages describe DHL services in specific nations, such as the U.S. or Canada. It also expands its Cincinnati hub in order to meet a growing demand in the U.S.

To feed its growing Asian operation, the company also sets up a West Coast network based on its Los Angeles hub. Two DC-9Fs are acquired to operate daily flights to the California base from San Francisco, Seattle, Portland, Denver, and Salt Lake City. A number of smaller aircraft (largely Cessna 208 Caravan Is) are employed to connect those cities with smaller Western communities.

DHL Airways' FTKs inch up 1.8% to 558.8 million. Operating revenues ascend 12.9% to \$1.22 billion, while expenses jump 9.2% to \$1.14 billion. Although a \$77.38-million operating profit is earned, a net \$12.66-million loss is suffered. The company is the only American major, except for **Trans World Airlines (TWA)**, to suffer a fiscal loss this year.

In January 1998 a request is made to Airbus for an additional nine A300B4-200Fs to be operated by European carriers.

During the first quarter, work begins on a \$170-million hub and sorting facility at Cincinnati. When completed in 2001, it will replace the company's smaller operation there.

A DC-8F is leased to **SAS (Scandinavian Airlines System)**, permitting the consortium carrier's freight division, SAS Cargo, to launch weekend all-cargo roundtrips to New York in April. The service will be maintained through July.

In mid-month, the concern completes negotiations with **Air Koryo** for the lease of a Mil Mi-17-8P. The heavy-lift helicopter will be employed to run a daily all-cargo circuit between Yanji Airport in China, the Rajin-Sonbong free trade zone, and the nuclear reactor construction site at Sinpo (both of which have no airstrip), and P'yongyang. Connections will be made at Yanji and P'yongyang with **China Northern Airlines Company, Ltd.** or **Air Koryo**.

Also in April, Deutsche Post, the state-owned German postal service, agrees to take a 22.5%, \$500-million stake in the concern, with an option to increase to 25% its total investment. Although no operational changes are planned, the post office will add additional board members.

In early May, SAS Cargo takes 50% of the capacity of an **Air Koryo** Antonov An-26 leased by DHL; the two carriers will offer joint services from Copenhagen to destinations along the Baltic coast.

While en route from New York (JFK) to Portsmouth, New Hampshire, on August 31, a B-727-200F with three crew and two jump seat passengers, experiences the failure of its No. 2 engine. The aircraft returns to its point of origin and makes an emergency landing, just after which the right main landing gear collapses, causing the trijet to slide to a stop on the runway. No injuries are reported.

It is announced in September that DHL will make a major push into Latin America from the U.S. during the next year, spending \$30 million in the process. The expansion program includes improvements in the principal Panama City hub, as well as the development of an additional hub in Buenos Aires and the upgrading of operations in Venezuela, Peru, and Brazil. Three more B-727Fs will be acquired for the DHL Airways fleet and dedicated, as will additional warehouse and ground transport assets.

Also during the month, DHL opens a 50,000-sq.-ft. Express Logistics Center near Miami (MIA). An \$83.4-million contract is simultaneously signed with the U.S. General Services Administration under which the company will transport small packages to foreign destinations for various agencies over the next 36 months.

Freight traffic during the 12 months advances by 2.51% to 572.85 million FTKs. Revenues jump 10% to \$1.34 billion, while expenses are up 11.6% to \$1.25 billion. The operating profit totals \$92.62 million, while the net loss "improves" to \$5.16 million.

DHL Airways approves a new five-year labor contract in January 1999. At this point, corporate employment is increased by 13.8% to 9,100.

In order to compete with a growing **United Parcel (UPS)** presence, the company announces on March 17 that it will invest \$10 million during the remainder of the year in its operations in Brazil.

After suffering a big loss in 1998, the Japanese trading company Nissho Iwai Corp., Ltd. places its 5.2% stake in DHL up for sale. DHL Worldwide Express purchases back the shareholding for \$73 million, giving Nissho a badly needed \$42-million profit.

A strategic alliance is formed with the United States Postal Service (USPS) on May 5, in order to provide additional international air express options for U.S.-based shippers. The partners begin to offer two-day, traceable express documents as Priority Mail Global Guaranteed from Boston, Charlotte, Chicago, Houston, Miami, Minneapolis, New York, Philadelphia, Phoenix, San Francisco, Washington, D.C. Also served are destinations in 19 European nations: Australia, Belgium, Denmark, Finland, France, Germany, Gibraltar, Ireland, Italy, Liechtenstein, Luxembourg, Monaco, The Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the U.K.

President/Chief Operating Officer Guinasso is appointed chairman/CEO on July 15, effective at the end of the year. He succeeds the retiring chairman, Patrick Foley.

During the first week of August, discussions are held with **British Airways, Ltd.** (2) concerning the possible purchase by DHL of BA's B-757-236 fleet. It is confirmed on August 9 that DHL will acquire upwards of 40 to 45 aircraft, valued at \$1.3 billion, for use on its European and African routes. Simultaneously, \$200 million in expenditures is approved and will be employed on such infrastructure investments as new air express hubs in Germany, Singapore, and Japan.

Early in August, the board of directors approves the purchase of 40 to 45 aircraft, valued at \$1.3 billion, to upgrade equipment for its European and African networks and an investment of \$200 million in infrastructure improvements. An announcement on aircraft is to be made in October. The infrastructure enhancements will include new express hubs at Tokyo, Singapore, Cologne, and Frankfurt. In addition, DHL Airways President/Chief Operating Officer Vic Guinasso is named to succeed Chairman/CEO Patrick Foley.

On September 29, as part of its thirtieth anniversary commemoration, the concern unveils a new image, the graphics of which depict various worldwide destination names with their universal icons. A company-wide celebration is simultaneously held at DHL Airways's 290 U.S. facilities, while a time capsule filled with company memorabilia from 1969 to 1999 is buried at headquarters.

Also during September, DHL Airways accepts delivery of the first of seven A300B4-203Fs. In response to increased western Canadian demand, DHL adds Edmonton as its fifth Canadian gateway.

Also during the month, DHL announces that it will invest \$125 million over the next four years to expand its express operation in Japan, opening 38 service centers and hiring up to 1,000 employees.

On October 6, DHL Worldwide Express confirms that beginning in 2001, it will replace its European B-727F fleet with 44 converted B-757s obtained via Boeing, including 34 Dash-236s being withdrawn by **British Airways, Ltd.** (2).

Two more of the 44-plane total are secured on November 15 when arrangements are completed for the purchase of two Dash-277s from **Ansett Australia (Pty.), Ltd.**

Japan Air Lines Company, Ltd. (2) completes the sale of its 20% DHL equity stake on December 13 to two investment trusts. During the month, a new Central Asia hub is established at Hong Kong and a partnership is entered into with **Cathay Pacific Airways (Pty.), Ltd.** under which Cathay will operate overnight cargo flights on its behalf to four Asian destinations. Final completion of the new hub will not actually be completed for three years, during which period Cathay will undertake an additional 32 weekly flights for DHL to Seoul, Singapore, Taipei, and Osaka (KIX).

Freight traffic accelerates 8.9% to 623.9 million FTKs. Operating revenues fall 25.9% to \$999.22 million, while costs climb 21.8% to \$982.62 million. Operating profit drops to \$16.6 million, however, the previous year's net loss is turned into a \$19.17-million gain.

At the beginning of 2000, DHL Airways in the U.S. continues to operate a fleet of 7 DC-8-71Fs. On January 13, a DHL International spokesman confirms the company's position regarding a proposed new law to ban night flying from Brussels by mid-2003. If the ordinance is passed, DHL will leave the community.

DHL Airways receives its first B-757 on January 13; the former **Challenge Air Cargo** Dash-23APF will be operated out of Belgium. Also on January 13, President/Chief Operating Officer Guinasso officially becomes the new chairman/CEO of DHL Airways, the U.S. arm of DHL Worldwide Express. Chief Financial Officer William Smarti succeeds him as executive vice president/chief financial officer, while Senior Vice President Lawrence Hughes becomes executive vice president/chief operating officer.

During the year's first week, Vice Prime Minister/Transport Minister Isabelle Durant institutes a ban on overnight flights at Brussels Zaventem International Airport as a noise-control measure without consulting her cabinet colleagues. Minister Durant is embarrassed when the government, later in January, rescinds her announcement. DHL had warned that such a ban could cost the local economy 6,000 jobs, while secondary airports at Brussels South and Liege, where such traffic may have been diverted, had voiced strong protest.

In preparation for its move to Hong Kong, DHL shuts down its Manila cargo hub in February. Additionally, DHL Airways President/CEO Guinasso now becomes board chairman as well.

Pursuant to an announcement made in early December, DHL, in March, launches a new cargo partnership with **Cathay Pacific Airways (Pty.), Ltd.** Under terms of the deal, DHL establishes Hong Kong's Chek Lap Kok Airport as its central Asian hub while Cathay freighters, flying under contract, provide 32 weekly return flights to the DHL receiving points at Seoul, Osaka, Taipei, and Singapore.

It is reported, also in March, that DHL Airways will soon be taken over by the combined forces of Deutsche Post World Net (DPWN) and **Deutsche Lufthansa, A.G.** Each has a 25%-plus-1-share stake in the company and its European counterpart, DHL International. Although smaller than either **Federal Express (FedEx)** or **United Parcel Service (UPS)**, DHL Worldwide leads both in cross-border mail and express deliveries—38% against 20% for the former and 15% for the latter). It has also made purchases in trucking, logistics, and air freight that rival both of the American giants.

The story is part of a general revelation in the aviation media that DPWN and Deutsche Lufthansa Group are reviewing several schemes for a joint-venture (code-named PELIKAN) merging of their logistic activities. PELIKAN would see the joining of DHL Worldwide with **Lufthansa Cargo Airlines, A.G.** and with Deutsche Post-owned Air Express International.

At this point, **United Parcel Service (UPS)** demands that the EU Commission require DPWN split up its commercial and public service activities. UPS had originally petitioned the Commission in 1994 alleging unfair competition in the parcel post sector. It now emerges that Deutsche Post has invested almost \$5 billion in the years since to build up its parcel post activities while recently engaging in alliance discussions with both DHL and **Deutsche Lufthansa, A.G.** It is anticipated that the Commission will respond by April, but it will not open its formal investigation until August.

During the spring, DHL Airways enters into a new alliance with the U.S. Postal Service. Under terms of the Priority Mail Global Guaranteed (PMGG) system, documents are accepted at post offices in 11 U.S. markets for delivery in major cities in 19 West European countries.

AirlinersOnline.com reports on June 12 that the European branch will soon purchase the Cincinnati-based U.S. DHL Airways component. Because of U.S. 25% foreign ownership rules, the American unit would become an administrative and marketing-only entity, which will actually

contract its flying to former U.S. competitors. The alleged African carriers **DAS Air Cargo, Ltd.** of Uganda and **MK Airlines, Ltd.** of Ghana could serve as models, as both are registered in one nation and operated from another (the U.K.). At the moment, it also operates seven DC-8-73Fs.

Arrangements are completed with Boeing Airplane Services, under which it will purchase, convert, and maintain for DHL a fleet of 44 cargo aircraft. Under this plan, the first aircraft acquired is a B-757-200F, which arrives at Boeing Wichita on July 14 for conversion into a B-757SF (special freighter). Flight certification tests are planned for October with delivery of this first new derivative to DHL by year's end.

A B-727-200AHF (advanced hush-kitted freighter) is chartered by DHL International from Pegasus Aviation at the end of August. During late spring and summer, new DHL International agencies are opened in the Russian cities of Yakutsk, Achinsk, Kostroma, Magadan, Ivanov, and Smolensk, giving DHL International more than 100 representative offices in Russia, covering 450 cities. Cooperative agreements are also signed with Ukrpochta (Ukrainian Post) and Belpochta (Belarus Post), giving access to post offices in Belarus and the Ukraine under joint brand names.

Two Avions de Transport Aerien ATR42-320Fs are delivered, one each in September and December, and are operated across Africa under contract by **Rossair Executive Air Charter (Pty.), Ltd.** of South Africa.

At the end of September, an ownership change appears imminent. On the eve of its initial public offering—the largest in Europe this year with all proceeds going to the German government—DPWN announces that it has reached agreement with a group of investors, family members, and founders to purchase another 26% stake in DHL International, boosting its earlier 25% stake in DHL to a controlling 71%. It is estimated that such a move will cost between \$1.3 and \$2 billion. Under the plan, Brussels-based DHL International and California-based DHL Airways would be merged, with a separate company formed to handle the U.S. airline operation and get around foreign ownership rules. The new equity involvement will take effect on January 1. DHL will retain its airline identity and DHL International CEO Klaus Zumwinkel will retain his post.

On October 2, the company's alliance with the U.S. Postal Service is expanded and renamed Global Express Guaranteed (GXG). A boosted version of the PMGG, the GXG allows customers to drop off packages at any of 20,000 U.S. postal locations; DHL, in turn, transports, clears customs, and delivers the contents in more than 200 nations and territories around the world.

On October 8, new B-727-200F return cargo service is launched by DHL International between Bergamo and Catania. The old route between Bergamo and Treviso is simultaneously dropped. **Express One International** operates its final B-727F service for DHL on October 31.

An additional A300F arrives at the DHL Airways Cincinnati base on November 2 following a ferry flight from Brussels via Shannon and Gander. The same day, DHL International and **Lufthansa Cargo Airlines, A.G.** jointly announce the introduction of their first cooperation in Russia and the CIS, a daily return cargo service from Moscow to Cologne. As a result of the new route, DHL will be able to significantly reduce its delivery times, allowing 90% of deliveries to and from Moscow to be delivered the next day, with times to 30 cities in Russia and the CIS via Moscow to be reduced as well.

On November 30, DHL International and **Pulkovo Airlines** introduce same-day delivery service of priority-express packages from Moscow to St. Petersburg. The urgent cargo is transported aboard Pulkovo's regular passenger flights. The arrangement allows the partners to assist companies which, in the past, have had to dispatch members of their staff to act as couriers for urgent items.

Although the November 20 DPWN initial public offering is reported by the media as a lukewarm success, it is sufficient to allow the German organization to move ahead with its plans to control DHL International and to engineer a closer alliance with **Lufthansa Cargo Airlines, A.G.** In December, former DHL International Chairman Pat Lupo is sent to

the U.S. to begin the process of splitting the company's ground operations away from DHL Airways, leaving the latter to stand as a separate 25%-owned concern as required by U.S. law. This plan, like the others floated earlier, would require approval by the U.S. government, which would also most certainly listen to its American opponents, **Federal Express (FedEx)** and **United Parcel Service (UPS)**.

Just after the beginning of the new year, the two American operators will file complaints with the DOT charging that DHL Airways does not meet U.S. citizenship requirements and therefore should not be allowed to operate domestic U.S. service. In response, DHL Airways points out that its American investors do, in fact, have both management control and a majority of the equity.

DHL AVIATION SERVICES, LTD. *See* **DHL AIRWAYS (DHL WORLDWIDE EXPRESS)**

DHL WORLDWIDE EXPRESS. *See* **DHL AIRWAYS (DHL WORLDWIDE EXPRESS)**

DHY TURKISH STATE AIRLINES (DEVLET HAVA YOLLARI). *See* **THY THURKISH AIRLINES (TURK HAVA YOLLARI, A.O.)**

DIABLO AVIATION: United States (1991–1993). Dean Hanson establishes Diablo Aviation at Concord, California, in 1991 to offer charter and contract service flights. Revenue operations commence and continue with 5 Piper PA-31-310 Navajos.

Flights cease within two years.

DIAMOND RUSSIA SAKHA-MIRNY AVIATION ENTERPRISE (ALMAZY ROSSIYA SAKHA-MIRNINSKOE AP): Russia (1992–1996). The local air transport organization tasked to provide service for the Republic of Sakha Yukutiya, Diamond is the result of a 1992 reformation coming on the heels of the collapse of **Aeroflot Soviet Airlines**. With Nikolai N. Tereschenko as director general, it provides domestic services from Mirni Airport with a fleet that includes an unspecified number of Antonov An-2s, An-24s, An-26s, and Ilyushin Il-76s, plus a helicopter detachment made up of Mil Mi-8s and Mi-26s.

Operations continue apace in 1993–1995 and, in 1996, the company is renamed **Mirny Air Enterprise**.

DIAMOND SAKHA AIRLINES (AVIALINII ALMAZI SAKHA): Russia (1993–1998). Diamond Sakha, which is also based at Mirni Airport, is officially broken off from the local Aeroflot division in September 6, 1994 to provide commercial passenger and cargo services for those who would develop the region's noted diamond region. The divorce is not total as a marketing alliance is entered into with the state carrier.

Konstantin P. Sukhorebrik is appointed general director and he begins revenue services with 4 Tupolev Tu-134s and an unspecified number of Antonov turboprops. Revenue flights commence on October 18.

An Airbus Industrie A310-324, formerly operated by **Pan American World Airways (1)**, is acquired under lease from **Swissair, A.G.** late in the year and is followed into service by a second early in 1995. At this point, a marketing agreement is signed with the Swiss flag carrier and revenue flights commence from the Yakutiya region to Beijing, Berlin, and Zurich.

Flights continue in 1996–1998, during which years T. Tikhonov becomes chairman with A. Boubas as managing director. Under a national airline consolidation scheme, Diamond is merged into **Sakha Avia National Air Company** during the latter year.

CHARLES DICKENSON: United States (1926). When the U.S. Post Office puts up its Contract Air Mail Route No. 9 Chicago to Minneapolis (CAM-9) for competitive bidding in early 1926, the lowest offer is made by Minnesotan Charles Dickenson. A friend of aircraft designer Matty Laird, Dickenson persuades him to provide his new enterprise

with three OX-5 powered biplanes. In addition, a Curtiss Swallow and one other aircraft of unrecorded type are acquired. A deadly wind hampers service inauguration on June 7; three planes must return to Wold-Chamberlain Field before Elmer Partridge is able to depart for Chicago just after 3 p.m. Unfortunately, his aircraft crashes near Mendota, Minnesota, a short time later and he is killed.

Dismayed but persistent, Dickenson tries for two more months to make a go of his contract. By mid-August, however, all of his pilots have quit and all of his planes, save the Swallow, are lost. Without staff or equipment, he is forced to tell the Post Office that he will, according to their notification rules, quit and return the route 45 days later on September 30.

DIGEX AERO CARGO, S.A.: Aeroporto Internacional de Guarulhos, Remota Central, Lotes 1 E 3, Guarulhos, CEP-07141-970, Brazil; Phone 55 (11) 945-3601; Fax 55 (11) 945-3621; Year Founded 1991. Digex is established at Rio de Janeiro in 1991 to offer nonscheduled cargo charters and contract service flights to destinations throughout the nation and to regional destinations. Revenue operations commence and continue with a single leased Boeing 727-44C first flown by **South African Airways (Pty.), Ltd.**

Operations continue in 1992–1994. In 1995, with an improvement in the world airline economy and a rising demand for air cargo services, a Douglas DC-8-62F is chartered. There are no other changes in 1996–2000.

DILLINGHAM AIR SERVICE. *See* **KODIAK-WESTERN ALASKA AIRLINES**

DINAR LINEAS AEREAS, S.A.: San Martin 320, Buenos Aires, Argentina; Phone 54 (11) 4327 111; Fax 43 (11) 4325 3899; <http://www.dinair.com.ar>; Code D7; Year Founded 1994. DLA is set up at Buenos Aires in the fall of 1994 to offer long-haul nonscheduled passenger flights to vacation areas. A Boeing 757-236 is leased from the British charter operator **Air 2000, Ltd.** while a B-767-204ER is leased from **Britannia Airways, Ltd.** Both of the aircraft chartered in 1994 are replaced in 1995 with a single B-757-277 leased from **Monarch Airlines, Ltd.**

In 1996, the borrowed fleet is changed once more as the company begins to emphasize destinations rather closer to home. Chartered from **Crossair, Ltd.** is a McDonnell Douglas MD-82, while the Peruvian carrier **Aero Continente, S.A.**, beginning in July, leases to Dinar one each B-727-22, B-737-247, and B-737-281.

Unable to maintain viability, the operator briefly shuts down in 1997. Reorganized, the company resumes flying under new CEO Alberto Desimone. Three DC-9-41s join the previous fleet units in operating scheduled services to Comodoro Rivadavia, Cordoba, Jujuy, Mar del Plata, Mendoza, Puerto Madryn, Rio Gallegos, Salta, Santiago del Estero, and Tucuman.

A B-757-277 is wet-leased from **Monarch Airlines, Ltd.** on January 4, 2000. The Boeing, in Monarch colors with Dinar titles, will operate on behalf of the Argentine carrier through the end of March. On February 16, a McDonnell Douglas MD-82 is leased from **Safair (Pty.), Ltd.** Acquisition of the two aircraft allows frequencies on the Cordoba to Tucuman route to be increased.

An order is placed on October 6 for six Embraer ERJ-145 Amazons. Upon their arrival, they will be placed into service on the route from Salta to São Paulo via Tucuman.

A B-757-2Y0ER is leased from **Air 2000, Ltd.** on December 22. It will arrive four days later.

DIRECAO DOS TRANSPORTES AEREOS DE ANGOLA. *See* **DTA ANGOLA AIRLINES, S.A.**

DIRECT AIR: United States (1980–1993). Direct Air is established by Michael Pittard at Kokomo, Indiana, in December 1980 to provide

Essential Air Service (EAS) flights to Chicago, Peru, and Logansport. Operations begin with a single Piper PA-31-350 Navajo Chieftain on April 6, 1981 over a route from Kokomo to Chicago. During the 9 months of operation, the five-employee airline transports a total of 1,611 passengers.

Airline employment in 1982 stands at four. Customer bookings climb to 2,192 for the year and a total of 9,000 pounds of freight is hauled.

The workforce is increased 25% in 1983—to five. Passenger boardings climb 11% to 2,439 while cargo is up 25.8% to 11,000 pounds.

One more worker is hired in 1984 and the Piper T-1020, which has replaced the Chieftain, flies 2,593 passengers, a 6.3% boost. Freight climbs 85.6% to 20,000 pounds.

In 1985, passenger boardings jump 43.3% to 3,715, but cargo plunges 70% to 6,000 pounds.

The Hoosier carrier's upward progress stops in 1986 as the 6-worker company faces a major traffic reversal of 44% to 2,085 enplanements. Freight continues its freefall, dropping 65% to 2,000 pounds. The passenger traffic picture worsens in 1987 as customer boardings plunge 30.5% to 1,449. Cargo rallies and jumps by 50.1% to 3,000 pounds.

The company employs its single T-1020 to transport 1,273 passengers in 1988, a 12.1% decline. Cargo carried aboard the turboprop also falls, by 23.3%, to 2,300 pounds. Two additional workers are hired in 1989 and passenger boardings decline 19.1% to 1,030. Cargo is also down, by 18.9%, to 21,000 pounds. Revenues total \$381,477, but expenses are \$453,000. The operating loss is \$71,898 and net loss reaches \$25,192. At year's end, the carrier is purchased by new owners, who speak of expansion.

The payroll is increased a whopping 157.1% in 1990 to 18 and the fleet is altered to include 1 Piper PA-31-310 Navajo and 2 Beech 1300s. The corporate headquarters are transferred to Gary early in the year. Customer bookings skyrocket 214.5% to 3,242.

The fleet is increased in 1991 to include 5 aircraft: 3 Beech 1300s and 2 Beech 1900s. In January, a new Essential Air Service (EAS) route is inaugurated from Mount Vernon, Illinois, to Chicago (MDW). Late in the year, Pittard sells out to Will Davis.

Operations continue apace in 1992 as the number of weekday flights increase to 16. The year's enplanements skyrocket to 28,611.

In March 1993, the company enters into a code-sharing agreement with **MarkAir**. To complement the Anchorage-based airline's new services to nine cities in Indiana, Illinois, and Pennsylvania, Direct agrees to provide feed at Chicago (MDW) under the marketing name Markair Direct.

During the fall, Direct is taken over by a Chicago-based investment group, **Midway Connection**, and is relabeled with the new owner's name. Operations from Midway Airport as Midway Connection commence in November. During the year under both monikers, a total of 50,000 passengers are flown.

DIRECT AIR, GmbH.: Herdweg 20, Stuttgart, D-70174, Germany; Phone 49 (711) 163 874; Fax 49 (711) 291 655; <http://members.aol.com/directair>; Year Founded 1992. Direct Air is established at Stuttgart Airport in January 1992 to offer air taxi and small group passenger services. A secondary base is also opened at Cologne-Bonn Airport. Revenue flights begin, and continue, with a fleet that includes 3 Cessna 421 Golden Eagle IIIs, 1 C-340A, and 1 Piper PA-44.

DIRECTFLIGHT, LTD.: United Kingdom (1990–1994). Direct-flight, Ltd. is established at London in 1990 to offer all-cargo regional services on a nonscheduled basis on behalf of large corporations and the larger freight operators. Revenue flights commence with 4 leased Cessna 406 Caravan IIs.

Services continue with success in 1991 and a fifth Caravan II is leased in early 1992; however, a reversal in business causes two of the aircraft to be removed by 1993. The entire company shuts down in 1994.

DIRECTIONS DES TRANSPORTS AERIENS. See **AIR FRANCE**

DISCOVERY AIRLINES: United States (1999–2000). Robert Iverson II, founder of **Skytrek International Airlines**, resigns from his Richmond, Virginia-based carrier in October 1999. The board of directors selects a new president and reforms the carrier under this new name. Holiday charter flights to Florida and the Caribbean are continued with one each Boeing 727-276A and B-727-251A, repainted in a new navy blue and white color scheme.

Passenger boardings for the year, under both names, plunge 51% this year to 147,000.

A total of 169 workers are employed at the beginning of 2000. Having failed to earn a profit under either name, the company declares Chapter XI bankruptcy on April 13 and is liquidated.

DISCOVERY AIRWAYS: United States (1989–1991). Former **Mid-Pacific Airlines** executive Franco Mancassola establishes Discovery at Honolulu in July 1989 to offer intrastate service with British Aerospace BAe 146-200s. Start-up is delayed by a legal battle over citizenship requirements of the owners, Nansay Hawaii, as objections to the proposed carrier's certification application are filed by **Aloha Airlines** and the pilots and machinists unions.

In early March 1990, the DOT, pending a decision, grants temporary authority for the initiation of flights to Kauai and Maui. Beginning on March 25, the five available British-made jetliners operate scheduled services for five months. On July 6, DOT rules the carrier does not qualify to continue under the terms of its temporary permit. The issue is returned to court and, on September 14, 100% of ownership is purchased by Group Systems of Hawaii. The DOT is asked to drop its action against the airline. Meanwhile, a total of 103,103 passengers have been transported.

A year is spent attempting to clear up all legal questions; but the new owners who have acquired the regional cannot win authority. All remaining assets are finally liquidated in August 1991.

DIXIE AIR: United States (1969–1970). Dixie Air is established at Tuscaloosa, Alabama, in late 1969 to provide scheduled daily air taxi flights to local intrastate destinations. Although Cessna 310 frequencies are duly inaugurated, they cannot be maintained beyond 1970.

DIXIE AVIATION CORPORATION: United States (1968–1970). Established at St. George, Utah, in 1968, DAC, the outgrowth of an FBO, inaugurates scheduled daily commuter flights to Cedar City, Milford, Delta, Provo, and Salt Lake City. Aero Commander 500B and Piper PA-32 Cherokee Six operations over this route network continue until 1970.

DIXIE FLYING SERVICE: United States (1930–1932). DFS is organized at Charlottesville, Virginia, in the fall of 1930 to offer scheduled passenger flights to Washington, D.C., in association with **The New York, Philadelphia, and Washington Airway (The Ludington Line)**. Employing 2 Stinsons and 1 Fokker Model 8 Super Universal, the company inaugurates scheduled services on November 6. On December 31, records show that a total of 44 passengers and 6 pounds of air express have been carried since start-up.

Operations continue in 1931 but as the Great Depression deepens and traffic falls off, the company is forced to stop flying in May 1932.

DJIBOUTI AIRLINES, S.A.: Place Lagarde, Djibouti City, 2240, Djibouti; Phone 253 (35) 1006; Fax 253 (35) 2429; Code D8; Year Founded 1997. Director General Moses R. Waberi's **Puntavia Airline de Djibouti, S.A.** is renamed in early 1997. Both scheduled and charter

services are maintained during the remainder of the decade to regional destinations with a fleet of 4 Let L-401UVP-Es.

Destinations visited at the beginning of **2000** include Addis Ababa, Borama, Dire Dawa, Harpgeisa, Jeddah, Mogadishu, and Taiz.

DLT. See **DEUTSCHE LUFTVERKEHRSGELLSCHAFT mbH. (DLT)**

DM INTERNATIONAL AIRLINES: Vzlotnaya 11a-141, Seoul, Donetsk, 340007, Ukraine; Phone 380 (622) 515179; Fax 380 (622) 515179; Code DMI; Year Founded 1995. DMIA is set up in 1995 to offer international and regional passenger services, both scheduled and charter. Revenue flights begin and continue with a fleet that includes 7 each Antonov An-26s and Yakovlev Yak-42s, plus 5 Yak-40s.

Sergey A. Onis is director general in 1999. His fleet now includes 8 An-2s, 3 Let L-410UVPs, 16 Mil Mi-2s, and 2 Yak-40s.

DNEPRORAVIA AIRLINE: Dnepropetrovsk Airport, Dnepropetrovsk, 320042, Ukraine; Phone 380 (562) 914 034; Fax 380 (562) 391 494; Code Z6; Year Founded 1993. Dneproavia is established by Air Ukraine at Dnepropetrovsk Airport in the Ukraine in 1993 to offer scheduled and charter passenger and cargo feeder flights to regional destinations. Mikhail Demidenko is president and he begins revenue operations with 1 each Antonov An-2, Yakovlev Yak-40, and Yak-42D.

The fleet is significantly increased during 1994. Placed into service are 6 Yak-42Ds, four Yak-40s, 4 An-26s, and 3 An-26Bs.

Enplanements in 1995 total 134,233.

Airline employment stands at 1,300 in 1996 and the fleet is increased by the addition of one each Yak-42D and Yak-40.

Passenger boardings surge 10.7% to 150,316.

There is no change in the workforce during 1997. Customer bookings fall 9.8% to 135,646.

Flights continue in 1998. The fleet now includes 7 An-26s and Yak-42Ds, and 5 Yak-40s. Another bad traffic year is suffered as passenger boardings drop 24% to 97,000.

Bad times continue in 1999. Enplanements for the year total 46,000.

DNL NORWEGIAN AIRLINES: DET NORSKE LUFTFARTSREDERI, A.S.: Norway (1920–1951). Capt. Hjalmar Ruser-Larsen forms Det Norske Luftfartsrederi, A.S. in the spring of 1919 with the intent of providing a service between Norway and Scotland. Although initially nonflying, Ruser-Larsen's company is, nevertheless, invited to participate in the organizational meeting of the International Air Traffic Association at The Hague on August 25. Unsubsidized mail flights are undertaken Bergen–Stavanger between August 16–October 15, 1920; however, poor earnings and lack of government support force the company to cease operations.

Taking the name of Ruser-Larsen's unsuccessful enterprise, a new company is formed at Oslo on May 4, 1927. On April 15, 1928, international summer-only flights are started to Copenhagen and Warnemünde in cooperation with **Deutsche Lufthansa, A.G. (DLH)**. Junkers F-13s and G.24s are employed and the tiny fleet comprises one of each as late as 1931.

On October 16, 1933, shipping magnate Fred Olsen purchases a large block of stock; his capitalization is further augmented on January 25, 1935 when four other shipping companies buy in. Famed Norwegian aviator and naturalized U.S. citizen Bernt Balchen is appointed managing director. On April 5, the government's permission is obtained to operate flights between towns along the coast. Also, two ex-DLH Ju-52/3ms, the *William Langanke* and *Fritz Simon*, are delivered and placed in service.

In 1936, representatives from the Norwegian government and DNL meet with government and airline officials from Sweden and Denmark and agree to pursue the idea of joint Bergen–New York flying boat service in cooperation with **Pan American Airways (PAA)**. To extend the

route, a Sikorsky S-43 is purchased and delivered on July 29. Although PAA will withdraw its interest under British pressure, the Sikorsky is flown between Oslo and Stockholm until July 31. It is then sold to a French carrier.

Operations continue as before during 1937–1938 and, late in the decade and in cooperation with **DDL Danish Airlines, A.S.** and **KLM (Royal Dutch Airlines, N.V.)**, routes are extended to Copenhagen and Amsterdam. By 1939, the fleet comprises 2 each of Junkers Ju-52/3ms and Ju W.34s and 1 Lockheed L-14, the American transport being replaced by another Iron Annie late in the year.

Passenger boardings approach 10,000.

When German forces invade in April 1940, all of DNL's bases and equipment are captured, forcing the carrier to cease flying. Managing Director Balchen, in the U.S. at the time, becomes a leading Arctic operations leader for both the Royal Air Force and the U.S. Army Air Forces.

In London on November 19, 1943, the Norwegian government (in exile) creates a semi-military airline, charging its leadership with planning the development of postwar Norwegian civil aviation and with negotiating with Danish and Swedish airline officials on the revived consortium idea of 1938. The following year, Bernt Balchen organizes a clandestine air service to fly agents and supplies and rescue missions from Scotland to Scandinavia and personally executes 110 of his group's missions.

Talks for the actual establishment of a joint airline begin anew in 1945. Royal Norwegian Air Transport (Norges Luftfartstyre) is dissolved on March 8, 1946 and its personnel and equipment are given to a revived DNL, to which Balchen returns as managing director. Employing Douglas DC-3s, the carrier starts daily Oslo–London (Croydon) service on April 8, following this with flights to other European capitals.

Meanwhile, domestic operations are resumed in June by a Ju 52/3m floatplane, which stops at coastal towns all the way up to Hammerfest in the Arctic—the longest domestic route in Europe.

On July 31, the **SAS (Scandinavian Airlines System)** is formally established with Thomas S. Falck Jr. and Thomas Olsen signing the consortium constitution on behalf of DNL. Capital shareholding in the new organization is divided by ratio between the companies with the Norwegian portion representing two-sevenths. The agreement establishes Overseas SAS for operation of international flights; however, each partner will initially continue to provide domestic services.

On June 2, 1947, a Short S.25 Sandringham replaces the Junkers on the Hammerfest run.

A DC-3 crashes near Glessen, Germany, while en route from Copenhagen to Zurich on February 13, 1948 (11 dead). On April 18, the regional operations of DNL and its two partners are combined into an SAS European Division and, at this point, Managing Director Balchen resigns to accept a commission in the U.S. Air Force.

On February 8, 1951, in a move made retroactive to October 1, 1950, the Overseas and European divisions are merged in a final consortium agreement. **SAS (Scandinavian Airlines System)** becomes the flag carrier of Denmark, Norway, and Sweden, with the partner airlines now becoming the nonflying national holding companies.

DOBROFLOT (VSESOYUZNOE OBEDINENIE GRAZDANSKOGO VOZDUSHNOGO FLOTA): U.S.S.R. (1930–1932). On October 29, 1930, as a result of the Soviet government's 1928 First Five-Year Plan, **Dobrolet** is reformed into a new joint-stock airline, the All-Union Enterprise of the Civil Air Fleet or Vsesoyuznoe Obedinenie Grazdanskogo Vozdushnogo Flota, which is also known as Dobroflot. Like its predecessor, it comes under control of the Council for Labor and Defense, with A. Z. Goltsman appointed chairman. Simultaneously, again as a result of central planning, the new all-state carrier takes over the formerly independent Ukrainian carrier **Ukvrozduchput**. The Soviet–German international service **Deutsche-Russische Luftverkehrs, A.G. (Deruluft)** is not affected, but Dobroflot becomes the Russian partner in that particular multinational enterprise.

The routes and services of the previous organization are continued as additional Polikhar'kov U-2, Kalanin K-5, and Antonov ANT-9 transports enter service. Geographical subdivisions or directorates are established at Moscow, Kharkov, Tbilisi, Tashkent, Alma Ata, Novosibirsk, Irkutsk, and Khabarovsk and the transcontinental Moscow–Tashkent via Orenburg route is opened on June 1.

The fleet at year's end includes 1 each Tupolev ANT-9, ANT-3, Polikarpov K-5, SP and K-6, 2 each Dornier Komet IIs, Merkurs, 3 Dornier Wals, 5 Dornier Komet IIIs, 8 Junkers W.33s, 11 JuG-1s, 13 Polikarpov APs, 26 Fokker C.IVs, 27 Junkers F-13s, 41 Kalinin K-4s, and 51 Ju-21s.

On May 1, 1931, passengers are initially transported over the route from Moscow–Irkutsk via Sverdlovsk, Omsk, Novosibirsk and six smaller stops. About the same time, seven-stop passenger service is opened on the Kharkov–Tashkent route. As a result of the successful yearlong Moscow–Kharkov experimental daily transport of *Pravda's* type matrices, a special type matrices aerial delivery division is created on June 16. Thereafter, daily flights are made under contract to the newspaper from Moscow to Leningrad, Sevastopol, Groznyi, Kharkov, Pyatogorsk, Rostov-on-Don, Sverdlovsk, Tiflis, Odessa, and Kazan.

Although too large to be adopted by the company, the 36-passenger Antonov ANT-14 airliner, piloted by M. M. Gromov, makes its maiden flight on August 14. The aircraft will, however, be employed by the government for sightseeing and propaganda purposes and will transport 40,000 passengers without incident over the next decade.

As a result of decisions for air travel expansion reached at the 17th Congress of the All-Soviet Community Party in early in 1932, it is decided that Dobroflot should be reorganized, expanded, and enlarged. On February 25, all civilian aviation comes under the control of the Chief Directorate of the Civil Air Fleet, the Glavnoe Upravlenie Grazhdanskogo Vozdushnogo Flota. The state airline Dobroflot is renamed Airline Administration Aeroflot or Upravlenie Vozdushnykh Soobshchenii Aeroflot on March 25, becoming popularly known by its new trading name as **Aeroflot Soviet Airlines**.

DOBROLET (ROSSISKOYE OBSHESTVO DEBROVOLNOGO VOZDUZHNOGO FLOTA): U.S.S.R. (1923–1930). Following a March 17, 1923, meeting of interested persons in Moscow, the Russian Volunteer Air Fleet Company (Rossiiskoe Obschestvo Dobrovol'nogo Vozdushnogo Flota or Dobrolet), the first state airline of the Soviet Union, is organized by A. M. Krasnoshchekov, chairman of the Russian Mercantile Trading Bank (Prombank). The company charter, approved by the Council of People's Commissars on April 30, provides for initial share capitalization of two million gold rubles divided between the city councils of Moscow and Leningrad, Prombank, Gosbank, and several other governmental bodies.

During the company's organizational phase in March and early April, arrangements are made to lease 1 de Havilland DH 9, 1 Vickers Vimy, and 2 Junkers F-13s from the Red Air Fleet. Test and proving flights with these machines commence on April 22 and, 6 days later, orders are placed for 14, later 22, German-made, all-metal, 4-passenger Junkers F-13s. The premier passenger flight is made over Moscow on April 29 and, in early May, the DH-9 and Vimy make a proving flight to Leningrad and back via Tver' and Novgorod.

The German aircraft manufacturer Junkers, having earlier established a factory at Fili, begins the production of the limited run of F-13s (known in Russia as Ju-13s) for Dobrolet, the first of which is delivered on June 3. The next day, June 4, the series of test flights launched in April is concluded; since the tests began, a total of 426 flight-seeing Russian passengers have seen their capital from the sky.

The first company meeting occurs on June 29, at which point Krasnoshchekov is elected board chairman/managing director, with L. B. Kamenev as chairman of the Dobrolet soviet and K. V. Akashev as technical director. In ceremonies this day, the first F-13, which had received its airworthiness certificate on June 28, is christened *Mossovet* in honor of the Moscow City Council, which had subscribed funds for its purchase.

Four additional monoplanes are received on July 15 and are likewise named for their sponsors: *Prezidium VSNKh*, *ODVF*, *Chervonets*, and *Prombank*. While the first three named make sight-seeing flights over Moscow, the fourth, with Chairman Krasnoshchekov aboard, inaugurates the airline's new thrice-weekly scheduled service. The *Prombank*, piloted by Junkers pilot Alfred Gothe, flies from Moscow to Nizhni Novgorod via Ivanovo-Voznesensk.

Eleven former military pilots begin conversion training to civil status in early July. While making a training flight with a flight mechanic and passenger aboard the next day, one of these pilots, A. V. Pankrat'ev, experiences engine trouble and guides the *Prezidium VSNKh* toward an emergency landing; coming in to a field near the Khodynka Airport, the aircraft hits a pole and crashes. Although the F-13 will be rebuilt, Pankrat'ev is killed, becoming the first fatality in company history. The Moscow City Council presents a second F-13, the *Mossovet II*, on July 22.

Plans to send Chairman Krasnoshchekov and the Dobrolet to a Stockholm aviation exhibition in August fall through when the Swedish government fails to grant entry permits. The monoplane is, instead, equipped with floats and employed, beginning on August 29, to provide service from a temporary seaplane base for visitors to the Moscow Agricultural Fair.

Flown by Junkers Captains Georg Juterbock and P. Lozovsky, Dobrolet's first pilot, another F-13 is dispatched to western Siberia in early September on a propaganda tour. Stops are made at Omsk, Tomsk, and Novonikolaevsk. During a presentation ceremony at the latter point on September 15, the aircraft is christened *Sibrevkom*, after its sponsor, the Siberian Revolutionary Committee. The same day, scheduled services between Moscow and Nizhni Novgorod are closed down for the winter. Aside from the sight-seeing and fair services, 229 passengers are transported on scheduled flights during the inaugural year.

Also in September, the yet-to-be officially named *Nauka* makes a proving flight to Tiflis. Records show that, when the Moscow Agricultural Fair closes in early October, Dobrolet has offered a total of 253 flights and carried 778 passengers. As the result of government and business communications concerns, representatives from the republics of Bukhara and Khorezm, plus the Central Asian Economic Council, approach Dobrolet in the fall seeking air services.

Back from Siberia, Capt. Juterbock and Soviet pilot N. M. Ieske depart Moscow in the *Mossovet* during early November for a proving flight to Samara, Orenburg, and other destinations in Bashkiriya. With contract German pilot Otto Wieprich in charge, Dobrolet dispatches three unnamed F-13s to Tashkent by rail on November 23. Three more F-13s are presented to the fleet on November 25: *Krasnyi Kamvol'shchik*, *Nauka* (*Tsekubu*), and *Pravda*.

Capitalization is increased to five million gold rubles in 1924, although one million of that figure is provided to support the development of a Soviet aircraft industry. A major maintenance and repair facility is opened at Moscow, hangars are constructed at Tashkent and Alma-Ata, and airfields are built at Khiva, Dyushambe, and Bukhara.

Hardly have Wieprich and his aircraft arrived at Tashkent in early January than they are impressed into the Red Air Fleet to help combat a Basmachi uprising in Khorezm. Based at Khiva, the Junkers are converted into makeshift bomber and reconnaissance planes and sent into action. Fighting rages between February and April, but at its conclusion, the aircraft will not be handed back to Dobrolet.

Meanwhile, an unnamed new F-13 is dispatched by air to Naidenov in January for a propaganda tour around the Ural Mountain region and, on March 1, the company's aerial photography unit is established. On March 22, pilots Juterbock and Ieske crash the *Mossovet* during their Bashkiriya tour.

To replace the aircraft seized by the military in January, Dobrolet dispatches three more Junkers to Tashkent by rail on April 2. Simultaneously, a Central Asian Division is formed to operate thrice-weekly scheduled flights in the newly formed Peoples' republics which would, within a year, be taken into the U.S.S.R. Having arrived from Moscow,

the three German-made monoplanes are formally presented to Dobrolet in May 1 ceremonies and are christened *Dekhan-Khlopkorob*, *Tashkentskii Zheleznodorozhnik*, and *Irregator*. The same day at Naidenov, the F-13 there is presented as *Krasnyi Ural*.

On May 3, proving flights are made from Khiva to Dushanbe via Bokhara and from Tashkent northwest via Dzhabul and Pishpek to Alma Ata. Seven-hour service begins over the latter route on June 11. Also in June two more F-13s are presented, the *Belyakov* and the *Latyshskii Strelok*. The first production Alexandrov-Kalinin AK-1 initial Russian-designed airliner is assigned to the company's new Moscow-Nizhni Novgorod-Kazan route on June 15. Pilot A. N. Tomashevskaya makes the inaugural run between July 10 and 22. V. N. Ksan-drov succeeds A. M. Krasnoshchekov as company chairman on July 10, with A. I. Rykov becoming council chairman. Aerial photography trials commence in Tver' Province in July, while two Dornier Komet IIs are ordered.

The previously tested Khiva route to Bukhara via Chardzhui and Dargan Ata is opened on August 1. During the month and continuing into the fall, the *Nauka* and *Pravda* also make propaganda flights into the Ural region. On August 24, an F-13 delivered by ship to the Matochkin Shar Polar Station and flown by B. G. Chukhnovsky begins aiding ships navigating the polar seas. Flying a Polikarpov R-1 September 29-October 1, P. K. Mezheraup extends the carrier's presence down to Kabul, Afghanistan. Also on September 1, an infrequent freight route is inaugurated from Bukhara to Termez-Dyushambe via Karshi.

Also in September, the Red Air Fleet provides a B.E.2e, which is employed in crop-dusting tests over Khodynka and Tushino. The Junkers F-13s *Krasnaya Fergana* and *Pishchevik* arrive on September 21 and are dispatched to Central Asia. By the time Dobrolet ceases regular services for the winter in late September, the carrier, which has expended most of its energies in expansion this year, has undertaken 204 scheduled flights.

A total of 456 passengers and 5,096 kg. of mail and freight have been transported; a loss of 242,000 rubles is reported. The workforce now includes 19 pilots and 23 mechanics.

A new managing director, A. K. Anders, is appointed in early 1925. The Bukhara-Khiva route is extended from Khiva to Tashauz in January while the F-13 *Krasnyi Ural* makes propaganda flights in the Sverdlovsk region this month and in February. The *Mossoviet* and *Prombank* perform the same duties in the Caucasus area.

The weekly service is increased to twice weekly on March 15, later being boosted to four roundtrips per week. The Dornier IIs requested from Germany the previous summer arrive at Leningrad by ship later in the month. The irregular Bukhara-Termez-Dyushambe route started the previous September becomes a regular passenger, mail, and cargo run as of April 1. When services resume over the Tashkent route begun in the spring, only the Pishpek-Alma Ata section is operated, due primarily to insufficient traffic and attacks by Basmachi guerrillas. In May, the company's B.E. 2e is sent to the North Caucasus to spray malaria mosquito nests.

Together with two R-1s and an R-2, three Dobrolet aircraft participate in the year's great Moscow-Peking survey flight. Piloted by N. I. Naidenov, the *Krasnyi Kamvol'shchik*, together with the *Pravda* (flown by I. K. Polyakov) and the *Latyshskii Strelok* (piloted by A. I. Tomashevsky) depart Moscow on June 10. The entire Tashkent-Alma Ata route is closed on June 12. On June 24, the six aircraft arrive at Irkutsk, having stopped en route at Nizhni Novgorod, Kazan', Sarapul, Krasnoufimsk, Kurgan, Petropavlovsk, Omsk, Kainsk, Novonikolaevsk, Mariinsk, Krasnoyarsk, Kansk, and Nizhneudinsk.

The task force departs for Urga and on July 8 the *Krasnyi Kamvol'shchik* and *Pravda* depart that point into China. The same day, the Soviet government and Dobrolet sign a renewable one-year agreement with the Mongolian People's Republic for the establishment of airline service from Ulan Bator to Verkhneudinsk, the closest station on the Trans-Siberian Railroad. Having picked up pilot Naidenov following the crash of the *Krasnyi Kamvol'shchik* at Kalgan on July 9, the *Pravda* flies

on to Peking, arriving on July 13. From Peking, the Junkers flies on to visit Nanking and Shanghai.

Prior to its sale to **Ural Aviakhim**, the *Krasnyi Ural*, piloted by V. A. Romanov, makes a July tour to Kazan', Ufa, Ul'yanovsk, Voronezh, Rostov, and North Caucasia. Back at Peking on August 20, the F-13 *Pravda* is sent back to Vladivostok by ship. It will be acquired by the Red Air Fleet, which in turn will pass it to the Chinese government. Also in August, the new F-13 *Transportnaya Kooperatsiya* enters service.

The Dornier Komet II *Moskovskoe Uchetnoe Obshchestva Vzaimnogo Kredita* enters service on September 20, while, also in September, an aviation department is established. On October 1, a Sopwith 1 1/2 Strutter flown by Piotr Faddayev arrives at Yakutsk from Moscow via Irkutsk on a survey flight. The F-13 *Mossoviet* crashes at Aleksandrovsk on October 14 during a Caucasus region propaganda flight. Dobrolet services are extended during the year to Kiev, Odessa, and Rostov.

Dobrolet signs a special agreement with Gostorg on January 23, 1926 to transport furs to Krasnoyarsk from the Turukhansk and Dudinka communities in western Siberia. Flying the F-13 *Mossoviet*, V. L. Galyshev completes the first of 10 fur flights at the end of February. Simultaneously, A. I. Tomashevsky flies the *Prombank* to Arkhangel'sk to fly seal, ice, and ocean current reconnaissance for a Sovtorgflot-formed expedition in the White Sea region.

A Junkers F-13, *MSNKh-Mostorg*, which had crashed while in Aviakhim service the previous year, is purchased, repaired, and placed into Dobrolet service in March, while the new Dornier Komet II *Krasnaya Bashkiriya* is received on April 4 and the F-13 *Rusot* enters service on April 16. The new Kalinin K-1 is introduced on the Moscow-Nizhni Novgorod route and as an air ambulance, aerial survey aircraft in April.

Also during the spring, Manager G. Volobuev and several technical personnel arrive at Verkhneudinsk by rail to establish a company station from which to inaugurate the new route into Mongolia. The first aircraft to arrive is V. L. Galyshev's F-13 *Mossoviet*, flown in from Krasnoyarsk; it is followed by A. I. Tomashevsky's *Prombank* and the *MSNKh-Mostorg*.

On July 22, pilot Galyshev, flying the *Mossoviet*, begins the new 600-km. Mongolian service from Verkhneudinsk and Ulan Ude to Ulan Bator via Altan-Bulak. In order to connect the capital of Tajikistan with Moscow, a new Central Asian route is established during the summer from Dushanbe to Tashkent via Termez and Samarkand. Another F-13, the *Latyshskii Strelok No. 2*, is received on August 22.

Between August 31 and September 1, Mikhail Gromov, flying the ANT-3 *Proletarii*, visits Western Europe, flying from Moscow to Konigsberg, Berlin, Paris, Rome, Vienna, Prague, Warsaw, and back to Moscow. The carrier's first international service is inaugurated on September 14 when an air route is opened to Kabul from Tashkent via Samarkand and Termez. Dobrolet is the first airline, foreign or domestic, to service the Afghan capital.

The Gostekhbyuro Aerofloto'emka is formed on September 9 to share aerial photography work with Dobrolet. On September 21, by order of the Soviet Council of the People's Commissariat (Sovnarkomi), the company is reorganized. It will now be not just a Russian enterprise but an all-Soviet airline administered by the Council for Labor and Defense and known as the All-Union Company. The Bukhara to Karshi, Termez, and Dushanbe route is closed down at year's end.

The fleet in January 1927 includes the single Kalinin K-1 and B.E. 2e, 2 Dornier Komet IIs, 13 Konek-Gorbunok crop dusters, and 15 F-13s. The Red Air Force will turn over 19 crated DH-9s to the airline during the year; 11 will be assembled and used for aerial photography. The company's services are consolidated and, in Central Asia, extended to and through all of the republics, principally along the Trans-Siberian Railroad. Major cities now served include Tashkent, Sverdlovsk, Omsk, Novosibirsk, Irkutsk, Urga, Khabarovsk, and Vladivostok. Several route changes are made, including alteration of the Tashauz-Bukhara via Khiva run to end at Leninsk instead of Bukhara.

On July 27, the Council for Labor and Defense transfers to the Inspectorate for the Civil Aviation Fleet the responsibility for technical

support previously exercised by the Red Air Force. Plans are now made to complete the transcontinental route system and, in early October, the decision is taken to open a 4,700-km. airmail service between Moscow and Irkutsk via communities roughly along the route of the Trans-Siberian Railroad.

Ordered from Germany in April for a planned new route to Kabul, the Dornier Merkur *Pravda* No. 2 is presented by the party newspaper on October 9. Later in the month and in November, aircraft, pilots, and flight mechanics from the carrier's Central Asian detachment are transferred to the Red Air Force for service against Basmachi guerrillas in the Turkestan Military District. Several F-13s fly reconnaissance and bombing missions.

On November 28, a formal agreement is signed with the government of Afghanistan for the inauguration of air service under contract within a month. Before this launch, the Frunze to Alma Ata route is reopened on December 5 with a single F-13. Shortly thereafter, the F-13 *Pishchevik* departs for Kabul, flying via Samarkand and Termez. Over the next month, it will complete five additional roundtrips over this politically important route, transporting a total of 12 passengers.

On January 13, 1928, the Council of Work and Defense approves a Dobrolet plan to open a route from the Trans-Siberian Railroad station at Rukhlovo and Yakutsk.

The Siberian Airlines Directorate is established on May 17 and a seaplane station is ordered constructed on the Angara River. Employing Fokker C.IV aircraft, the first stage of the Moscow-Irkutsk mail route is tested on July 15, as far as Nizhni Novgorod and Kazan.

The route is extended to Ekaterinburg on July 22 and to Novosibirsk via Kurgan, Sverdlovsk, and Omsk, on August 2. Piloting the float-equipped F-13 *Mossoviet*, Aleksander S. Dyemchenko arrives at Bodaibo from Irkutsk on August 10. Yakutsk in Siberia is reached by the *Mossoviet* from Irkutsk on August 27, following a 6-day, 10-stop flight. Dyemchenko's return to Irkutsk on August 29 with a proven route will allow regularly scheduled service to commence as soon as seven Junkers W.33s now ordered can be obtained.

During the remainder of the year, a total of seven Irkutsk-Yakutsk flights will be completed, transporting nine passengers. Meanwhile, two more F-13s are sent out to Irkutsk to expand the route in the coming year.

On September 19, the proving of the Moscow-Irkutsk mail route is completed as a C.IV reaches the latter point from Novosibirsk via Krasnoyarsk.

A week later, on September 26, two F-13s collide in midair near Termez. Unhurt, both pilots, E. I. Shvarts and Ya. G. Paul, are able to land their aircraft safely.

Dobrolet, on September 29, asks the Red Air Force to supply 24 more Fokker C.IVs for the route; the military agrees, promising to first upgrade the aircraft at its Zavod No. 35 repair facility at Smolensk.

Also this fall, the icebreaker *Malygin* transports the F-13 *Krasnyi Ural* to a point where its pilot, M. S. Babushkin, is able to participate in the search for the explorer Nobile. A Polikarpov U-2AP crop duster is successfully evaluated on October 28 and leads Dobrolet to order 15 more to replace its aging Konek-Gorbunoks.

A prototype of the Tupolev ANT-9 airliner is ordered on November 28 while the first of the Junkers W.33s ordered for the Irkutsk-Yakutsk route arrive in crates at Irkutsk by rail during November and December and are assembled. During the year, all but one of the former military DH-9s are withdrawn.

In these 12 months, a total of 813 scheduled flights are made; enplanements total 3,728.

During the winter of 1929, low traffic causes the Frunze-Alma Ata service to be suspended again. As the result of the political upheaval in Afghanistan that leads to the abdication of King Ammanulla, the Dobrolet fleet assembled to provide commercial services is, instead, employed, at the request of the Soviet Foreign Ministry, to rescue Soviet and non-Afghan citizens from Kabul. Elsewhere, the spring and summer sees a burst of Dobrolet flight activity.

From Alma Ata, a new central Asian route to Semipalatinsk via Lepinsk and Sergiopol is proven on April 1 and opened for regularly scheduled flights a month later. Also in April, company pilots ferry arms and munitions from Dushanbe to Garm in support of the Red Army's fight against Tajikistan's Basmachi guerrilla uprising.

On May 8, the first Polikarpov U-2AP crop-dusting flights are made, spraying infected forest regions in Siberia's Kyitkystom district. On May 15, a long summer-only Moscow-Novosibirsk-Irkutsk mail and express route is opened by a Kalinin K-4. Outfitted as a mailplane, a single ANT-3 will later be evaluated over the route, but prove unacceptable. Night-flying ground equipment is installed on the Moscow-Novosibirsk via Nizhni Novgorod and Shadrinsk, and allows the overall Moscow-Irkutsk mail delivery time to be reduced from six days by rail to just 36 hours. Also in May and into June, pilot S. V. Lyalin employs the F-13 *Mossoviet* to dust forest pests in the Lake Baikal region.

During the year, additional Junkers W.33 and two F-13s, delivered to Irkutsk by rail and assembled, provide new Central Asian services. Four landplane models for the former are assigned to operate the Ulan Ude-Ulan Bator segment opened in 1926. Three W.33s, equipped with floats, will later inaugurate service to Yakutsk over the multistop route pioneered by pilot Dyemchenko the previous summer.

On June 15, a crated W.33 and its pilot, O. A. Kal'vitsa, is sent by rail from Irkutsk to Vladivostok; the aircraft and its flyer now progress by boat to Lawrence Bay, where the Junkers is assembled. On June 27, K-4s initiate flights from Moscow to Orenburg and Tashkent. On July 10, a common flag is adopted for all divisions of the Civil Aviation Fleet.

Between July 10 and August 8, Mikhail Gromov, flying the ANT-9 *Krylya Sovyetov* (*Wings of the Soviets*), revisits western Europe, leaving Moscow and proceeding to Berlin, Paris, Rome, Marseilles, Nevers, London, Paris, Berlin, Warsaw, and back to Moscow. Also in July, pilot Kal'vitsa and his W.33 make the first flight to Wrangel Island.

During August, the K-4 *Chervona Ukraina* (*Heart of the Ukraine*), flown by M. A. Chyegirev, makes a 6,700-mile round trip flight from Kharkov to Irkutsk via Moscow, and return.

The ANT-9 *Krylya Sovyetov* is officially accepted by Dobrolet on September 8.

In October, pilots M. T. Slepnev and V. L. Galyshev, with their W.33s, are dispatched by rail to Vladivostok. The floatplanes are loaded aboard the icebreaker *Litke* and sent north to participate in the rescue of crew and passengers from the ice-stranded steamer *Stavropol*.

While flying to help rescue survivors on November 9 from the U.S. schooner *Nanuk* stranded near Cape Severnyi, North Cape, the Hamilton Metalplane of famed American aviator Ben Eielson and his mechanic Earl Borland disappears. The mystery produces worldwide headlines as it continues in December; American officials approach the Soviet government and ask for its help. In mid-month, Alaskan bush pilots Joe Crosson and Harold Gillam, who find the schooner with the aid of local Siberians, are able to land and begin construction of a rescue base. Employing avgas from the ship, the two airmen are able to conduct five weeks worth of searches (eight flying days) but find nothing.

While the search for the lost U.S. aviators proceeds and the W.33s affect the rescue of personnel from the *Stavropol*, the Soviet government, on December 10, concludes that the Ukrainian airline **Ukrvozdukhput** should be merged into Dobrolet.

The fleet at year's end includes 1 each DH-9, ANT-3, U-2AP, Dornier Merkur, 2 Komet IIs, 4 W.33s, 4 K-4s, 5 Ju-21s, 9 Konek-Gorbunoks, 24 C.IVs, and 25 F-13s. Airline employment features 61 pilots, including 6 Red Air Force pilots seconded to perform U-2AP crop-dusting duties.

By 1930, Dobrolet's route network encompasses all of the major cities of European Russia, the Caucasus, many in Central Asia, and Irkutsk and Yakutsk in Siberia.

On January 9, Mikhail V. Vodopyanov, flying an F-13, departs Khabarovsk and 11 days and many stops later reaches Aleksandrovsk-Sakhalinskiy, the principal city on the Soviet half of Sakhalin Island.

On January 15, directors of **Ukrvozdukhput** formally vote to merge their airline into the Soviet state carrier; the Dobrolet approval comes

five days later. The merger, retroactive to January 1, creates the new Soviet Civil Air Fleet Company (Sovetskoe Obshchestvo Grazhdanskogo Vozdushnogo Flota-Dobrolet) joint-stock carrier, which is strengthened by the addition of 1 Dornier Merkur, 5 Komet IIs, 1 F-13, and 16 K-4. Among the routes acquired from the Ukrainian carrier is a service that runs from Moscow to Pekhlevi in Persia via Sochi, Baku, and Tiflis. At this time, the Joint Stock Company for Agricultural and Forest Pest Control is formed to take over the agricultural work previously performed by Dobrolet.

Dobrolet's two Komet IIs arrive at Arkhangel'sk from Moscow on January 25 and the next day the Hamilton Metalplane of lost American flyers Ben Eielson and Earl Borland is located by bush pilot Joe Crosson. Pilots M. T. Slepnev and V. L. Galyshev fly their W.33s to the site of the stricken U.S. trading vessel *Nanuk* on January 27, joining airmen and aircraft from Canada and Alaska in ferrying men and supplies to the Eielson-Borland crash site. The next day, two months of irregular flights commence between Khabarovsk and Aleksandrovsk.

On February 4, the Arkhangel'sk-based Dornier Komet IIs inaugurate a new service to Ust'-Sysol'sk via Bereznik and Kotlas. It requires 22 days to find the bodies of Eielson and Borland near their crashed aircraft. During this period, Slepnev and Galyshev continue to provide ferry flights for teams of Siberian Chukchi rescue workers who search the hard-packed snow for the bodies, which are located on February 16.

Significant administrative changes now begin to occur in Soviet civil aviation. On February 23, as a result of the Soviet government's 1928 First Five-Year Plan, the Council for Civil Aviation is abolished by the Soviet Council of the People's Commissariat (Sovnarkom) and its activities are transferred to the chief inspectorate of the civil air fleet or GVF.

Draped by muslin American flags stitched together by Eskimo women, the bodies of lost flyers Eielson and Borland are turned over to U.S. representatives by a Siberian Soviet official in a brief ceremony near the wreck of the *Nanuk* on March 4. Shortly after the Fairchild 71 departs with the heroes to Fairbanks, Dobrolet pilots Slepnev and Galyshev return their countrymen to the mainland.

A W.33 is lost in a March 7 crash north of Yakutsk (two dead).

During the spring, nonscheduled service is resumed to Kabul and the Alma Ata-Semipalatinsk route is altered to include stops at Taldy and Kurgan rather than Lepsinsk. Additionally, a former Red Air Force Dornier Wal, the *Komseverput*, is flown by B. G. Chukhnovsky on ice patrol over the Kara Sea, assisting the icebreaker *Krasin* to lead a convoy of merchantmen through the ice fields.

Service is inaugurated on May 1 from Dyushambe to Kulyab. Also in May, scheduled flights commence from Alma Ata to Dzharkent while pilots N. K. Polyakov and N. I. Ieske, with the F-13s *Latyshskii Strelak No. 2* and *Irregator*, respectively, transport herring spawn from the Caspian Sea to the Aral Sea in an experimental seeding program. Yu I. Redin simultaneously flies a Fokker C.IV on fish patrol over the Sea of Azov.

Pilots Slepnev and Galyshev, together with another flyer, begin scheduled W.33 services from Khabarovsk to Aleksandrovsk on June 1. The same day, two other major routes are initiated from Dyushambe to Garm and to Khorog. On June 3-4, the carrier begins a yearlong experimental transport of the type matrices of the newspaper *Pravda* to Kharkov, thereby ensuring early publication.

On June 27, a K-4 undertakes a proving flight from Moscow to Tashkent via Penza, Samara, Orenburg, Chelkar, Kazalinsk, and Kzyl Orda. Nonscheduled flights are launched in July from Semipalatinsk to Kustanai via Karkarlinsk, Akmolinsk, and Akbialar.

Proven at the end of June, the new Moscow to Tashkent becomes a regularly scheduled route on August 15 when pilot M. S. Babushkin makes the first passenger-carrying flight. Three days later, scheduled frequencies commence from Sverdlovsk to Magnitogorsk via Chelyabinsk.

On October 29, again as a result of the government's 1928 First Five-Year Plan, Dobrolet is reorganized from a joint-stock company into a state-owned airline. The GVF's chief inspectorate is abolished and is re-

placed by the All-Union Enterprise of the Civil Air Fleet or Vsesoyuznoe Ob'edinenie Grazhdansiy Vozdushnyi Flot, which is also known as **Dobroflot**. The new organization comes under the authority of the Council for Labor and Defense.

DOBROLET AIRLINE: Sheremetyevo Airport, GosNil GA K-340, Moscow, Moscow Zone, 103340, Russia; Phone 7 (095) 5780037; Fax 7 (095) 5784755; Code DOB; Year Founded 1996. Taking the name of the noted pre-Aeroflot Soviet Airlines carrier, DA is established at Sheremetyevo Airport in 1996 to offer domestic and international all-cargo charters. CEO Viktor Maksimovski acquires 1 Antonov An-26 and 4 Ilyushin Il-76TDs with which to begin revenue services.

Flights continue in 1997-2000, during which years the Antonov is replaced with an Il-76M.

DODGE AIR CHARTER: United States (1979-1980). DAC is set up at Miami in 1979 to provide scheduled daily roundtrips to Cape Haitien. Douglas DC-3 revenue frequencies are duly inaugurated but, with traffic low and fuel costs high, the company cannot maintain services beyond 1980.

DOLLAS AIR SERVICES, LTD. See **DOLLAR HELICOPTERS, LTD.**

DOLLAR HELICOPTERS, LTD.: United Kingdom (1970-1995). BEAS is formed at Coventry in 1970 to operate helicopters on agricultural duties, aerial crane work, flight training, executive charter, and passenger and cargo support services in support of the North Sea oil and gas industry.

In 1977, **Bristol Helicopters, Ltd.** purchases the carrier and operates it as a subsidiary for a year. In 1978, all but the agricultural division is merged into the new parent. Former BEAS Marketing Director David Dollar purchases that division, along with the subsidiary's fleet of 10 Aerospatiale Alouettes and Lamas and Bell Model 47Gs, reorganizing it into **Dollar Helicopters, Ltd.**

Forsaking the offshore market, Dollar begins to concentrate on the provision of onshore services. A domestic subsidiary, **Black Isle Helicopters, Ltd.**, is established and the company concentrates on both agricultural work and the transport of fish by air.

Between 1984 and 1994, the company diversifies and its fleet grows to include 22 helicopters by the latter year: 3 Aerospatiale AS-355 Twin Ecureuils, 1 each SA-315B Lama and AS-350B Ecureuil, 10 Bell 206B JetRangers IIs, 6 JetRanger IIIs, and 1 Robinson R-22. Bases are operated at Cumbernauld and Inverness. Although the fish-carrying flights continue from the Orkney Islands off Scotland to the Isle of Man, many other activities are also undertaken: air ambulance, executive charter, forestry, filming, construction, television, pipeline inspection, survey, police support, and load carrying.

In 1990-1993, Dollar accepts a number of foreign contracts, including commissions from the U.A.E., Zimbabwe, and Tanzania. In Pakistan, Bell 206B JetRangers handle liaison and emergency relief duties in the northwest province of Baluchistan on behalf of the UN High Commissioner. In Britain and on the Isle of Man, the carrier begins to provide emergency medical service (EMS) flights for motorcycle and automobile racing events and, at Coventry, air taxi flights for Ford, Jaguar, the Rover Group, and Rolls Royce. Revenues in the latter year total \$10 million.

The Lynton Group of Morristown, New Jersey, purchases Dollar in January 1994 for an undisclosed sum. It is reformed into **Dollar Air Services, Ltd.**

Flights continue until July 1995 when this subsidiary is joined with another Lynton subsidiary, Black Isle Helicopters, Ltd. in a merger with Inverness, Scotland-based PLM Helicopters, Ltd. The combined fleet of PLM-Dollar Group, Ltd.—now the largest onshore helicopter charter operator in the U.K.—includes a mix of 15 Eurocopter AS-315s, AS-350s, and AS-355s, plus Bell 206B JetRangers.

DOLPHIN AIRLINES: United States (1981–1984). A child of the airline industry's deregulation, this Florida commuter is established at Tampa as **Dolphin Airways** in the late fall of 1981. Employing 6 Embraer EMB-110 Bandeirantes, daily scheduled roundtrip flights are inaugurated on December 15, linking the company's base to 14 cities in Florida, 1 in Georgia, and 1 in South Carolina.

Early in 1982, President/General Manager Richard Derrindinger purchases the FBO Tampa Air Center. En route from Tampa to West Palm Beach on August 16, Flight 296, an EMB-110 with 2 crew and 15 passengers, is subjected to a diversion to Cuba by one of the customers, claiming to have a bomb in his briefcase. Unfortunately, Dolphin now runs into serious financial difficulty during this recessionary year and never really gets off the ground.

Enplanements for the first full accounting period are 101,928.

The corporate name is changed in May 1983. Despite an 84% increase in passenger boardings for the year to 187,246, the small regional is forced to cease operations and file for Chapter XI bankruptcy protection on January 18, 1984. All of Dolphin's assets, debts, and its 6 Embraer EMB-110 Bandeirantes are now acquired by **Provincetown-Boston Airline (PBA)**.

DOLPHIN AIRWAYS. See **DOLPHIN AIRLINES**

DOLPHIN AVIATION-GOLD AVIATION SERVICES: Fort Lauderdale International Airport, 1100 Lee Wagener Blvd., Fort Lauderdale, Florida 33315, United States; Phone (954) 359-9919; Fax (954) 359-9939; Year Founded 1994. Leonard Goldberg founds this small concern at Fort Lauderdale-Hollywood International Airport in 1994 to offer executive and small group passenger services throughout the southeastern U.S. and the Caribbean. Operations continue apace for the next six years with a single Piper PA-31-350 Navajo Chieftain.

DOLPHIN EXPRESS AIRLINES: 210 Cessna Blvd., Suite 8, Daytona Beach, Florida 32124, United States; Phone (904) 756-8308; Fax (904) 756-0138; Code 8U; Year Founded 1994. DEA is established at Daytona Beach, Florida, in the spring of 1994 to provide Caribbean area commuter services. Interline agreements are signed with a number of major carriers serving San Juan, including **Continental Airlines, United Airlines, Trans World Airlines (TWA), American Trans-Air, Kiwi International Air Lines, and Carnival Air Lines.** Two British Aerospace BAe Jetstream 31s are leased and employed, beginning in August, to provide scheduled frequencies from Puerto Rico and the U.S. Virgin Islands; the route had previously been flown by **Sunair Express**. In early 1995, flights commence to the British Virgin Islands.

On April 7, 1996, the pilot of a newly acquired de Havilland Canada DHC-6-300, with one other crew and nine passengers, loses control of her aircraft while on takeoff roll from Virgin Gorda Airport, British Virgin Islands. The aircraft is substantially damaged as it departs the runway and crashes through a fence, losing a wing in the process. One passenger receives a minor injury. The aircraft will be repaired and returned to service later in the year.

The BAes are replaced in 1997–2000 with the repaired Twin Otter. Destinations visited from Florida include Beef Island, San Juan, St. Thomas, St. Croix, and Virgin Gorda.

DOMINAIR (AEROLINEAS DOMINICANAS, S.A.): Apdo 202, Calle el Sol, No. 62, Santiago, Dominican Republic; Phone (809) 247-4010; Fax (809) 581-8882; Code YU; Year Founded 1982. In 1982, **ADSA (Aerolineas Dominicanas, S.A.)** is renamed Dominair. Employing two de Havilland DH 114 Herons, the carrier continues to maintain passenger and cargo charters from Santiago and Santo Domingo to various destinations throughout Central America and the Caribbean. Regularly scheduled commuter service is undertaken from Santo Domingo's Herrera Airport to Barahona, Cabo Rojo, La Romana, Puerto Plata, and Santiago.

In 1984 and in cooperation with the U.S. commuter **PRINAIR**, non-stop, daily weekday service is inaugurated from Santiago to San Juan, Puerto Rico. Remaining viable in the increasingly more difficult charter market of the middle 1980s proves extremely difficult. The company nearly shuts its doors in 1986. At this point, shareholding is assumed by **LIAT (1974), Ltd.** and **Trans World Airlines (TWA)**.

In 1987, the Herons are withdrawn. Employed since the renaming to fly only freight, the former ADSA Martin 404s, having been refurbished, are now employed exclusively on passenger charters. According to the company's report to ICAO, boardings are up 1.1% to 15,077 during the first six months of 1988.

Operations continue apace for the remainder of the decade and into the 1990s. In 1993–1994, President Armano J. Bermudez's fleet comprises just 1 de Havilland Canada DHC-8-300. Airline employment stands at 22.

Flights to San Juan continue into 1997–1999; however, as the result of a growth in traffic demand, the fleet is increased to include 4 DHC-8-300s. The Dash-8s are operated under contract by **LIAT (1974), Ltd.**

A total of 28 workers are employed at the beginning of 2000.

DOMINICANA (COMPANIA DOMINICANA DE AVIACION, C. por. A.): Apartado Postal 1415, Av. Jinenez Moya, Esq. Jose Conteras, Santo Domingo, Dominican Republic; Phone (809) 532-6269; Fax (809) 535-1656; Code DO; Year Founded 1957. In 1957, the Corporación Dominicana de Empresas Estatales (Dominican Corporation of State Enterprises) purchases the last 40% shareholding of **Pan American World Airways (1)** in **CDA (Compania Dominicana de Aviacion, S.A.)** and the carrier becomes a state-owned enterprise. In the decade between 1958–1968, domestic routes are integrated and schedules broadened; a regional route is opened to Haiti with the airline's two Douglas DC-6Bs.

A C-46A with two crew suffers an engine fire just after takeoff from Ciudad Trujillo, Haiti, on July 17, 1958, and crashes; there are no survivors. Early in 1968, a request is made to lease a BAC 1-11-408 from **Channel Airways, Ltd.** of the U.K. The aircraft is actually painted in the Caribbean carrier's colors before the decision is taken in June to cancel the project.

An order is placed for a Douglas DC-9-32 in early 1969; it will be received before the end of the year. Just after takeoff from Miami on June 23 for a flight to Santo Domingo, both engines of one of the company's two Aviation Traders ATL-98 Carvairs, with four crew, catch fire; the aircraft attempts to return, but crashes into buildings lining a Miami street a mile short of the runway. All aboard the plane are killed, along with six people on the ground.

The new DC-9-32 is placed into service on the Miami route in January 1970. Just two minutes after takeoff from Santo Domingo on February 15, the new jetliner with 5 crew and 97 passengers, loses power and attempts to return to the airport; the Douglas descends too fast and crashes into the sea. There are no survivors.

Dominicana orders two Boeing 727-1J1s in 1971; they join the fleet in 1972 wearing a livery that features a white fuselage top and red and blue cheatline. The Boeings commence international service in 1973 to New York, Curaçao, and in cooperation with **VIASA (Venezolana Internacional de Aviacion, S.A.)** to Caracas.

In 1974–1978, the fleet is increased by the addition of a B-707-320C, a B-727-2J1, and an all-cargo DC-6F, which replaces the last Curtiss C-46 Commando during the former year. New destinations added during the period include Aruba, Puerto Plata, and Port au Prince. Great consternation is caused on September 3, 1975, when a bar of gold is stolen from a B-727-1J1 at New York (JFK). A DC-3 with three crew experiences an onboard fire just after takeoff from Grand Turk Island on March 23, 1978, and crashes into the sea; there are no survivors.

Airline employment in 1979–1980 stands at 582. A DC-10-30 is ordered in 1981 and delivered late in 1983. As the B-727-2J1 with 155 passengers is departing San Juan on June 10, 1983, a bomb threat causes it to return to the airport, where it is parked in an isolated area for in-

spection. In the process of evacuation, several passengers open an over-wing emergency exit and jump out. Seven are injured in this manner, one seriously. No explosive is found upon inspection.

Early in **1984**, nonstop, daily Santo Domingo–New York flights commence. In March, twice-weekly Miami to Puerto Plata service begins.

Additional attention is paid to the charter market in **1985** and beginning in June a leased B-747-123, formerly flown by **American Airlines**, is placed into service for a year under the name *Volando en Grande* to fly charters from Santo Domingo to New York and Madrid. This effort intensifies in **1986**, especially following the near demise of **Dominair**.

During **1987–1988**, the carrier retires the DC-10-30, replacing it with a second B-727-2J1 and two B-727s, a Dash-1J1 and a Dash-173C. These introduce a metallic livery that retains the red and blue cheatline. Employment at Chairman Dr. Eudoro Sanchez y Sanchez's airline grows to 582. Enplanement figures filed for the first half of the latter year increase 38.8% to 161,594 while freight climbs 34.5% to 1.5 million FTKs.

The fleet in **1989** includes 1 each Boeing 707-399C, B-727-1J1, B-727-173C, and 2 B-727-2J1As. A code-sharing agreement is signed with **Iberia Spanish Airlines (2) (Lineas Areas de Espana, S.A.)** in August and provides for code-sharing on the routes from Rio de Janeiro, Bogota, Santo Domingo, and on to Madrid.

A B-727-247 is leased in **1991** and in **1992** officials welcome a B-727-281 and chartered B-727-225A as replacement for the withdrawn B-727-1J1.

In **1993**, Chairman Sanchez y Sanchez oversees a workforce of 582. In addition to domestic communities, international markets served from Santo Domingo include Curaçao, Caracas, Aruba, Port-au-Prince, Miami, San Juan, and New York.

Having arrived at Santo Domingo on a September 5 service from San Jose, a B-727-281 with 7 crew and 98 passengers and which had encountered a smoke alarm program en route, is able to disembark most of its passengers before the cabin suddenly fills with smoke from bad wiring. The remaining passengers are quickly evacuated, after which a major fire breaks out destroying the Boeing.

Declared an unsafe airline by the FAA due to its general safety record and procedures, the company is, during the fall, prohibited from flying into the U.S. (except for Puerto Rico).

During the spring **1994**, the chartered airliners are returned and the airline depends upon a leased B-737-5Y0 from **TAESA (Transportes Aereos Ejecutivos, S.A. de C.V.)** until a former **Skybus Airlines B-727-2J1A** can be leased. The dual-designator arrangement with **Iberia Spanish Airlines (2) (Lineas Areas de Espana, S.A.)** allows the company to continue flights to Miami and New York through the expedient of block-seat purchases.

The B-727-2J1A The B-727-2J1A is delivered at the beginning of **1995**. Growing business problems cause the company to temporarily suspend flights in April; however, sporadic service resumes toward the end of the year. The B-727-1J1 returns to service in **1996**.

Dr. Rodolfo Rincon is chairman in **1997**, with Marina Ginebra de Bonnelly as president/CEO and Capt. Eddy A. Tineo as operations director. Airline employment stands at 582 and the Boeing trimotors continue to fly to, from, and between Aruba, Caracas, Curaçao, Port-au-Prince, and San Juan.

Operations of the state-owned airline cease in **1998** as the company, while not dissolved, becomes moribund. Aircraft are parked and staff is largely discharged.

It is reported in *Caribbean Week* on May 2, **1999** that efforts are afoot to revive the carrier, with an eye toward having it operational before the end of the year. The lead in this project is taken by Eduardo Selman, director of the Dominican Corporation of State Enterprises, in cooperation with the Commission for the Reform of Public Enterprise. The possibility of complete privatization exists and equity partners, willing to infuse both cash and aircraft, may be quickly located.

To make investment attractive, the Dominican Aviation Board grants any future owners exclusive authority to operate to the U.S. for a period

of six years. This grant, which is all but worthless at the moment due to the carrier's Category III safety rating from the FAA, is added as assets to the carrier's Santo Domingo headquarters (and \$4-million debt). Bids are now sought for a 50% stake and operational control of the airline; despite opposition from the national airline and hotel trade associations, the government sets an \$11.5-million asking price for Dominicana.

Director Selman informs the *El Siglo* newspaper on December 20 that 14 companies have shown an interest in investing in Dominicana. He also reveals that the grounded carrier has assets of RD\$ 148 million and liabilities of RD\$ 1.8 billion, of which most is owed to the state Banco de Reservas. The matter of foreign debt, however, remains a potential deal breaker.

Antonio Isa Conde, director of the Commission for the Reform of Public Enterprises, warns on January 12, **2000** that privatization continues to hinge on the successful conclusion of the airline's foreign debt negotiations. If it turns out to cost more to settle the debt than the country will obtain from privatization, then the capitalization of Dominicana will be aborted.

The tendering of bids continues until March 15. At this point, the Dominican government closes the bidding process and selects four finalists: **Allegro (Lineas Aereas Allegro, S.A.)**, **Aserca (Aerolineas Regional de Centro, C.A.)**, Friedman Turby & Co., and **Lauda Air Luftfahrtgesellschaft, A.G.** The decision as to which concern to award the carrier is put off and the status of the bid from Lauda becomes uncertain in light of its economic and political problems later in the year.

DOMINICANA INTERNACIONAL, S.A.: Dominican Republic (1984–1988). Dominicana Internacional is established at Santo Domingo in **1984** to offer jetliner services to points in Central America. Revenue Douglas DC-8-54 flights commence linking the carrier's base with Guatemala City, San Salvador, and San Pedro Sula. Frequencies end in **1988**.

DOMINION AERIAL EXPLORATION COMPANY, LTD.: Canada (1922–1926). Formerly chief pilot for the Price Bros., Ltd. paper company, Harold S. Quigley forms this nonscheduled company at Roberval, in the Lac Saint-Jean region of Quebec, in the fall of **1922**. Outfitting his new entrant with a single Martinsyde Type A Mk. II seaplane, Quigley undertakes forest survey and protection flights on behalf of the Canadian Air Board during the summer of **1923**. The Air Board loans Dominion three Curtiss HS-2L flying boats, but one is lost in an accident.

Three Norman Thompson NT-2B flying boats enter service in **1924** as expansion plans are made. Three more Curtiss airplanes are received in **1925**. During this year, Quigley takes over the Trois-Rivieres facilities of **Laurentide Air Service, Ltd.** and undertakes exploration and transportation services in connection with a survey being made along the north shore of the St. Lawrence River.

The company is reorganized into **Canadian Airways, Ltd.** in **1926**.

DOMINION AIRWAYS, LTD.: New Zealand (1929–1931). Dominion Airways, Ltd. is formed at Wellington in late **1929** to begin flying between the nation's North and South Islands via Cook Strait. This service is not undertaken; however, by the end of **1930** sufficient capital has been raised to purchase a Desoutter and begin flights from Hastings to Gisborne.

Approximately 100 flights are made before the Desoutter crashes at Wairoa on February 8, **1931**; although no one is killed, the plane must be written off. There being no money to purchase a replacement aircraft, the company now ceases operations.

DOMINION SKYWAYS, LTD. See CANADIAN PACIFIC AIR LINES, LTD.

DOMODEDOVO CIVIL AVIATION UNITED ENTERPRISE (DOMODEDOVSKIE AIRLINES): 12 First Reisovays Street, Domodedovo Airport, Moscow, 103225, Russia; Phone 7 (095) 323-8507;

Fax 7 (095) 952-8651; <http://www.trasport.ru/domoded>; Code E3; Year Founded 1992. Originally established as an **Aeroflot Soviet Airlines** directorate in the early 1960s, this organization was engaged for over 30 years in the development of routes from the capital's Domodedovo Airport to Siberia and the Far East. Little change is seen operationally following the company's 1992 reformation, except that the carrier is also able to offer international charter flights to destinations in Asia, Australia, Africa, the Mideast, and Europe.

I. S. Sergeyev is general manager and his fleet includes 45 Ilyushin Il-62s, 3 Il-18s, and 4 Il-76s. Orders are outstanding for 4 Il-96-300s, which are to be employed on operational trials. The year's enplanements total 1,361,549.

The first Il-96-300 is delivered from the production factory in Voronezh (VASO) in early 1993, but has no impact on traffic. In fact, as the Russian economy sours, passenger boardings decline by 22.1% to 1,115,110 and freight plunges 25.2% to 707.5 million FTKs.

A second Il-96-300 enters service during 1994 and General Manager Sergeyev's company becomes one of the few based at Moscow to actually experience a traffic gain during the year. Customer bookings accelerate 4.3% to 1,163,000, but cargo declines again, falling 3.6% to 680 million FTKs.

Il-96-300 trial flights continue in 1995 and the type helps the carrier have another good year.

Enplanements climb 16.3% to 2,820,400 while cargo jumps 30.6% to 128.5 million FTKs.

In 1996, the carrier's 44 aircraft transport a total of 424,400 passengers through July, a 0.8% decline. At this point, the two Il-96-300s are grounded and their PS-90A engines are shipped to Perm for overhaul. The company's long-haul domestic services are now provided by Il-62s.

In early November, the Russian government announces that the Domodedovo air transport association has been split into two companies, Domodedovskie Airlines and a ground handling concern, both of which are privatized. The Domodedovo airport administration becomes a separate state-run organization that inherits the legal and financial responsibility of the association. The fiscal situation begins to deteriorate and there is no money to overhaul the PS-90 engines of the idle Il-96-300s.

Destinations visited by Domodedovskie in 1997 include Anadyr, Magadan, Moscow, Petropavlovsk, Tashkent, Vladivostok, and Yakutsk. With the airport separated from the airline by the end of the year and competing **Aeroflot Russian International Airlines (ARIA)** having had good success with the type, Domodedovo requests the idle Il-96-300s be readied to resume service. Customer bookings for the whole year decline 8% to 938,000, while cargo is off 2% to 75.4 million FTKs.

As several other airlines that have appeared after the collapse of the Soviet Union, Domodedovo has come to specialize in facilitating lift for the *chelnoki*, also known as shuttle or suitcase traders. Thousands of these small-time merchants, usually young men but sometimes even middle-aged housewives, have traveled to foreign lands, often in the Mideast, and China, Greece, and Africa as well, to find low-priced goods to sell for large profits at home.

With its engines refreshed, the premier Il-96-300 is delivered to Petropavlovsk in June 1998 and returns to service; it is joined by the second Il-96-300 within a month. The pair undertake scheduled flights from Moscow to Petropavlovsk, Vladivostok, and Khabarovsk.

Russian air transport, like other elements of the economy, encounter rocky times after the government devalues the ruble in mid-August. Airlines begin to fix their own rates, pegging tariffs to both rubles and U.S. dollars, even though the official Central Bank exchange rate is R7.86 to the dollar.

Almost immediately, many of the *chelnoki* must quit as they can no longer afford to pay for hard currency to make their acquisitions. Additionally, the devaluation impacts the Russian air cargo carriers engaged in this trade, forcing them to cut back on scheduled international flights and particularly on charters or significantly increase ticket prices. Although Domodedovskie does not raise its domestic rates, it now sells its

international flights at rates set and announced by the Transportation Clearing Chamber.

By September, the economic crisis has worsened, with the ruble now trading at 16 to the dollar instead of the 6 to 1 exchange rate of August. Still, Domodedovskie resists the temptation to raise its domestic rates and, on September 22, actually lowers its fare from Moscow to Khabarovsk from 1,750 rubles to 1,650.

Passenger boardings during the 12 months plunge 20% to 485,000.

Flights continue in 1999. While en route from Moscow via Abakan, to Tiensin, China, on April 5, the motor of an Il-76TD with 10 crew suddenly stops as the aircraft approaches the Russian and Mongolian border. An emergency is declared and the Ilyushin returns to Abakan. After circling for two hours dumping fuel, the aircraft makes a successful one-engine-out landing and no injuries are reported.

During the first quarter, arrangements are completed with Ilyushin for the lease-purchase of a third Il-96-300. As part of the arrangement, the airline agrees to pay off its remaining debts to the manufacturer within a period of 37 months from the sale of Il-96-300 passenger tickets. With the paperwork finished and financial matters resolved, the new aircraft is made ready and, in an impressive ceremony attended by Ilyushin's chief designer Genrikh Novozhilov, is handed over to the airline on April 16.

The Russian media reports on July 5 that the newly acquired Il-96-300s are being deployed on routes replacing Il-62s and that good operational reports have been received.

The high price of fuel forces the airline to postpone its planned October 14 inauguration of passenger service from Moscow to Macau. Many of the carrier's Far Eastern routes remain unprofitable, but the company is unable to cancel them. One of them, from Moscow to Magadan, will bring a loss this year of R15 million.

At the end of October, weekly Il-96-300 roundtrips are inaugurated between Moscow and Macau.

Passenger boardings accelerate 13.8% to 552,000 while 409 million FTKs are operated. Revenues of \$72.2 million are generated.

On January 1, 2000, Russian tax police arrest the carrier's bank accounts for the nonpayment of R30 million (\$1.51 million) in taxes. Director General Aleksandr Akimov counters that the defense ministry and the Federal Border Guard Service owes the airline more than R230 million (\$7 million) for the unpaid transport of their servicemen, dating back to 1997. Vovick Karnozov, who reports the story on February 7 for *AeroWorldNet*, marvels that the cause of this story, the first-ever in Russian civil aviation history involving such a large carrier, is not poor management "at the level of the airline."

Despite the tax case, Domodedovo continues flying for another two weeks until it is grounded on January 19 because its fuel debt at Domodedovo Airport and regional airports has risen to R15 million (\$759,000). The cancellation of all domestic and most CIS flights that follows has a potentially serious impact on Russian transportation, as the company provides nearly 70% of all services from Moscow to the Far Eastern cities of Vladivostok, Yuzhno-Sakhalinsk, and Khabarovsk. Also, it is the only carrier flying to such cities as Anadyr. An exception is allowed the next day in order that the regular service to Sakhalin may be completed.

The airline now appeals to President Vladimir Putin, asking him to personally intervene to resolve the impasse. Shortly thereafter, the defense ministry provides a R50-million loan, backed by state guarantees for commercial banks to loan the airline another R40 million. Simultaneously, the tax police unfreeze the carrier's bank accounts, which allows it to pay its debts. Much of the loan is used to pay passengers caught with unusable tickets. Unhappily, most, understandably wary, will use their funds to purchase tickets on other carriers, notably **Aeroflot Russian International Airlines (ARIA)**.

Domodedovo is allowed to resume regular flights to the Far East from Moscow on February 4. The two-week grounding has cost it an estimated R60 million in lost income—while the Russian government has lost an estimated R7 million in tax revenues that flights would have gen-

erated. By the time operations are resumed, the airline has only 20 operational aircraft.

In order to obtain additional funds with which to pay some of its remaining debts, the company, on May 31, leases its entire Il-76 freighter fleet to **East Line Airlines**, which is also based at Domodedovo Airport.

During the summer, the company's leadership has the foresight to purchase a fuel reserve available in Russia's northeastern Chukotsky region. The fuel is available because the local carrier **Chukotavia** has not properly planned its future needs, a mistake that will cause its grounding on December 1.

During the summer, **MATK RusAvia** contracts with a capital tour operator to fly travelers to Thailand, Indonesia, and other Southeast Asian points in nine flights late in the fourth quarter. Unhappily, the company does not have sufficient aircraft or funds to complete its obligation, leaving hundreds of people stranded. The civil aviation department of the Russian Ministry of Transport (GSGA) arranges for the repatriation of the defunct line's customers. Special return flights are operated under contract by **Aeroflot Russian International Airlines (ARIA)**, **Domodedovo Airlines**, and **Rossiya Air Company**. GSGA then suspends the operating certificate of **MATK RusAvia**.

Meeting at Domodedovo Airport in late November, the CEOs of Domodedovo Airlines, **Chelai-Chelyabinsk Airlines (Chelyabinsk Chief Aviation Enterprise)**, **Kras Air (Krasnoyarsk Avialinii-KrasAir)**, and **Avia Express Cruise** form a new strategic alliance to be based at this Moscow airport. Under terms of the pact, the four will share fleets, create a single-tariff policy, and adjust their schedules and sales systems for maximum joint benefit, while retaining individual identities. They will finalize arrangements during the winter in hopes of being ready to operate with the beginning of the summer schedule at the end of March.

On December 6, these leaders hold a news conference to announce and promote their pact and invite other Russian airlines to join. To demonstrate the feasibility and potential impact of their joint project, a chart is displayed comparing their assets with those of **Aeroflot Russian International Airlines (ARIA)**, the nation's leading carrier. Although Aeroflot is ahead in terms of aircraft (113 to 97) and passengers (4.6 million to 1.8 million), the alliance partners have more domestic routes (44 to 28).

In presenting this information, KrasAir Director General Boris Abramovich indicates that the partner's pact has not been established as a "counterbalance" to Aeroflot, which has itself recently been actively courting and bringing under its wing a number of smaller regional airlines. At a separate news conference across town, Aeroflot Director General Valery Okulov welcomes news of the alliance, brushing aside suggestions that it might become a domestic rival. Reporters note that, if actually launched, this would be Russia's first true private airline alliance.

Representatives from the four partners continue meeting over the next three weeks. In addition to drafting cooperation proposals to be offered to Western airlines, an application for aid is prepared for submission to the Russian government before the end of the year. The alliance does not seek cash, but rather, the sort of state privileges and tax exemptions currently enjoyed by Aeroflot. It is anticipated that the plan will have the backing of the Russian Aircraft Operator Association.

At the end of the year, the Russian Ministry of State Property reveals that as part of a package of 30 state holdings that are to be privatized, it intends to sell as much as 74.5% of its 100% stake in the carrier in the new year. It will first be necessary for the Duma to amend the current law prohibiting the sale of state holdings exceeding \$17 million in valuation.

DON AIRLINES (JOINT STOCK AVIATION COMPANY). See DONAVIA (DONSKIE AVIALINII)

DON EVERALL (AVIATION), LTD.: United Kingdom (1946–1961). Local Midlands businessman Don Everall purchases an Auster J/1 Autocrat in September 1946 and from his base at Wolver-

hampton begins an ad hoc charter operation, **Modern Transport (Wolverhampton), Ltd.** During the next five years, Modern Transport undertakes a variety of nonscheduled passenger and cargo services, including many from such other airports as those Leicester, Coventry, and Birmingham. Three additional Auster Autocrats, a Miles M.38 Messenger, and a DH-89A are purchased.

Lees-Hill Aviation (Birmingham), Ltd. and its Dragon Rapide are purchased and merged on September 5, 1951. The amalgamation results in the small, renamed carrier, Don Everall (Aviation), Ltd., and a new base at Birmingham. During the summer of 1952, ad hoc passenger charters are flown Wolverhampton and Birmingham to the Channel Islands and the Isle of Man. Bookings for the year total 1,087.

Another DH-89A is acquired in April 1953, along with several scheduled routes that are opened for the summer season: Birmingham to Jersey and Guernsey and to Weston-super-Mare via Cardiff and Wolverhampton to the Isle of Man. Coventry and Leicester join Birmingham in 1954 as departure points to the Channel Islands while Coventry is also a stop on the Isle of Man service.

Passenger boardings climb to 5,765.

Scheduled Birmingham–Isle of Man flights commence in May 1955 and another Auster Autocrat is purchased in August.

Another DH-89A joins the fleet in February 1956; however, the Dragon Rapide acquired from Lees-Hill Aviation in 1951 is destroyed in a Berkeswell crash on October 7. In April 1957, the first Douglas DC-3 is acquired and is assigned to the company's scheduled routes; the Douglas occasionally offers inclusive-tour charter flight to Switzerland, France, and Yugoslavia. The first DH-89A, purchased in 1949, is withdrawn in July 1958.

Another DC-3 is purchased in January 1959, allowing the company to further expand its inclusive-tour services. On July 7, a Dragon Rapide is lost at Leverstock, Herts.

The DH-89A portion of the fleet consists of but one machine in the first quarter of 1960.

The second DC-3, with 3 crew and 28 passengers, fails its initial climb away from Birmingham on March 5 and crashes; although the aircraft must be written off, there are no fatalities.

The need for additional equipment occasions Don Everall to purchase two Vickers 634 Viking 1Bs, the first of which arrives at Birmingham on May 18. One of the two new additions, with three crew, is lost off Heraklion, Greece, during an August 24 all-cargo charter; there are no survivors. A leased Viking from Maitland Drewery Aviation, Ltd. replaces it for a month. On November 21, the company is purchased by **Air Safaris, Ltd.** and merged under the new owner's name, Don Everall receiving a seat on the company board.

DONALDSON INTERNATIONAL AIRWAYS, LTD.: United Kingdom (1964–1974). Although formed in 1964 as a subsidiary of Glasgow-based Waverly Shipping Company, Donaldson International undertakes no flight activities for five years. Setting up at London (LGW) and equipped with three Bristol Britannia 312s, the company flies inclusive tours and charters to destinations in Europe and North America beginning in April 1969. At the conclusion of the summer tourist season, a total of 40,598 passengers have been booked.

Similar operations are undertaken during summer 1970. One Britannia is withdrawn in November. In December, two Boeing 707-321s are purchased from **Pan American World Airways (1).**

During the second quarter of 1971, the two American-made aircraft are received. For the summer season, these two jetliners and three turboprops are available, the former replacing the latter on North American flights.

The remaining Britannias are converted to freighter status, one of which is withdrawn in March 1972 followed by the other two in October and December, respectively. Meanwhile, the B-707-321s fly affinity group charters to Asia and in June, a third B-707-321 is delivered, followed by a fourth in October. At year's end, a Boeing is chartered to **Bangladesh Biman Airlines, Ltd.** to fly weekly London (LGW)–Dacca service.

In January and February 1973, the company is cited twice by the U.S. Civil Aeronautics Board (CAB) for abuse of its affinity group charter rights. In April, however, the U.K.'s Civil Aviation Authority (CAA) requires that additional funding be found to back the transatlantic charter operation. As a result, two Boeings are returned to **Pan American World Airways (1)**, cutting the fleet to just two jetliners. Transatlantic flights London (LGW) and Prestwick–New York and Toronto commence in June; however, the number is drastically reduced.

In early 1974, the B-707-321s returned in 1973 are reacquired and one is immediately converted to all-cargo configuration. On May 1, two of the carrier's aircraft begin flying **Iraqi Airways'** international services to Europe while the Mideast airline awaits its purchased equipment.

Although the contract is scheduled to run through October, it cannot be concluded as Donaldson International declares bankruptcy on August 8, and ceases operations. Its equipment is returned to **Pan American World Airways (1)** the next day.

DONAVIA (DONSKIE AVIALINII): Russia (1994–2000). Donavia is established at Rostov-on-Don on August 18, 1993 to offer passenger and cargo charters, primarily toward the Mideast. Shareholding is divided between company employees (51%), regional government (20%), and private investors (29%). Pavel D. Duznikov is appointed general director and he inaugurates revenue services with 15 Tupolev Tu-154Bs and an unspecified number of Antonov Yak-40s and An-12s.

En route from Ashkhabad to Rostov-on-Don via Makhachkala, on October 25, 1994, a Yak-40 with 27 passengers is taken over by a lone assailant, who requires that the plane put down back at Makhachkala, from which it has just taken off. The pirate demands a \$2-million ransom and negotiations continue for two days, during which time 26 passengers are released. Time runs out on October 27 and as police prepare to storm the Yak, the pirate sets off a homemade bomb, committing suicide. The two crewmen are able to escape the blast, which destroys the jetliner.

Enplanements for the first full year of service total 1,345,772. Donavia operates three dozen Russian-made airliners during 1995, but still has a mixed traffic year.

Passenger boardings drop 6.1% to 1,268,400, but cargo carriage is up 4.3% to 21.7 million FTKs.

Airline employment stands at 2,000 in 1996. The carrier's 34 aircraft transport a total of 1,180,880 passengers, a 6.9% decrease.

Domestic destinations visited in 1997 include Moscow's Vnukovo Airport, St. Petersburg, Kaliningrad, Minsk, Tashkent, Ashkhabad, Tyumen, Ufa, Irkutsk, Khabarovsk, Omsk, Tchita, Novosibirsk, Samara Bratsk, and Yenevan. The carrier also flies to Dusseldorf and Dubai under the marketing name Don Airlines. Customer bookings rise 3% to 1,216,000.

Flights continue in 1998 and passenger boardings plunge 20.2% to 399,000.

On July 1, 1999, the carrier's management is accused of financial irregularities. Company pilots, a week later, complain publicly about the slow speed of an investigation into the allegations.

In collaboration with **Avia Express Cruise**, 10 regularly scheduled return flights between Moscow and Donetsk open on July 13; seven of the flights are provided by Avia Express and three by Donavia.

As part of an equalization of tariffs with **Aeroflot Russian International Airlines (ARIA)**, Donavia increases its ticket prices on February 15, 2000. On July 26, a 51% stake is purchased by **Aeroflot Russian International Airlines (ARIA)**, which renames the carrier **Aeroflot-Don**.

DORADO WINGS: United States (1963–1981). Henry G. Wolf forms this dedicated carrier in late 1963 to provide passenger transport from San Juan, Puerto Rico to Virgin Gorda in the British Virgin Islands, St. Thomas in the U.S. Virgin Islands, and most importantly, to the Dorado Beach Hotel Airport. Employing nine Britten-Norman BN-2 Islanders and a Piper PA-31-310 Navajo, closed charters are inaugurated between the three destinations in October 1964.

The fleet in 1980 includes 3 new British Aerospace BAe Jetstream 31s, 2 Piper PA-28 Aztecs, 1 Navajo, and 10 Islanders. With these the company is able to initiate scheduled services open to the public from San Juan to Mayaguez, St. Thomas, and Tortola.

Enplanements rise 14% to 79,745.

On May 28, 1981, the entire operation is sold to Crownair System, which reforms the small regional and renames it **Crown Air** on November 2.

DORUK TOURISM TRADE & INDUSTRY, INC.: Antalya Airport, Antalya, Turkey; Phone 90 (242) 311-4316; Fax 90 (242) 321-0924; Year Founded 1994. As its name implies, the rotary-wing division of Doruk is established at Antalya in 1994 to transport tourists to historic sites in the local vicinity. Additional cargo and passenger charters are also undertaken as contracted.

By 2000, Managing Director Akcicek Oral oversees the work of 4 full-time and 14 part-time pilots. The fleet includes 8 Mil Mi-8 helicopters from Russia.

DORVAL AIR TRANSPORT, INC.: Canada (1954–1960). With a base at Dorval, Quebec, this concern is formed in 1954 to operate all-cargo services specifically in support of construction of the North American Air Defense Line (DEW) across Canada. Revenue operations commence with 5 Curtiss C-46 Commandos and continue until the carrier ceases operations in 1960.

DOUGLAS AIRWAYS (PTY.), LTD.: Papua New Guinea (1965–1990). This commuter line was originally known as **Aerial Tours (Pty.), Ltd.** and was formed by D. B. Douglas at Port Moresby on March 10, 1965. Later, in addition to charter and scenic tour flights, the company is reorganized, renamed, and receives an operating permit and concessions for scheduled services to more than 50 locations in the nation's Central, East Sepik, Gulf, Northern, Western, and West Sepik provinces.

A fatal accident occurs on December 23, 1979 when a lightplane crashes in the Owen Stanley Mountains (15 dead). Employing two Partenavia P-68Bs, three Beech B-55 Barons, and a Cessna 206, frequencies for these third-level revenue services are increased by 1981.

During the middle 1980s, the fleet is upgraded by the addition of two Australian-made Government Aircraft Factories GAF Nomad N-22Bs, nine Britten-Norman BN-2 Islanders, and two Beech B-80 Queen Airls. Facing stiff competition from larger operators, the company begins to fall on hard times as traffic falls and expenses rise.

In 1986, Managing Director Douglas' fleet comprises three Beech 55s, two Nomads, one P.68, and one Islander. Unable to maintain independent viability, Douglas allows significant shareholding to be taken by **Air Niugini** in 1987.

Operations continue apace in 1988–1989, during which years the fleet grows to include 22 aircraft: 2 Nomads, 9 Islanders, 3 BN-2A Trislanders, 2 Queen Airls, 1 Beech Baron, 3 Cessna 206s, and 2 Partenavia P-68Bs.

Financial woes become terminal in 1990 and the company is forced to cease operations in the fall.

DOVAIR: United States (1976–1977). Founded in 1976 and briefly operated as **Baltimore Airways**, Dovair undertakes daily Britten-Norman BN-2 Islander roundtrips linking its base of Dover, Delaware, with Philadelphia. Services cease in early 1977.

DOVAIR AIR TRANSPORT: United States (1967–1968). DAT is set up at Dover, Delaware, in late summer 1967 to provide air taxi flights to White Plains via Wilmington and New York (LGA). Daily Cessna lightplane roundtrips commence on September 12 and are continued into 1968.

DOWNEAST AIRLINES (1): United States (1968–1980). Mid-Coast Airways is established by Robert Stenger as an FBO at Rockland,

Maine, in 1960. Over the next few years, this support service also acquires an FAA Part 135 certificate to provide air taxi flights. Despite fog and miserable weather that continually plagues his location, Stenger develops a reputation for reliability in his charter work.

During the merger of **Northeast Airlines** and **Delta Air Lines** in early 1968, the former applies to the CAB for permission to drop its scheduled route between Boston and Rockland. Simultaneously, executives from the two big carriers seek a small operator to take over the discontinued service. Stenger volunteers and, in May, Mid-Coast is reformed and renamed. Employing the charter line's Piper PA-31-310 Navajo, a PA-28 Aztec, and a Cessna 182 painted in their new livery, Downeast begins scheduled daily roundtrips in June linking its Rockland base with Boston, Wiscasset, and Augusta.

Operations continue apace during the remainder of the year and into 1971. While on final approach to Augusta State Airport in Maine from Boston on August 19, the Navajo, piloted by Capt. Dwight French Jr., with seven passengers, misses its landing and begins to execute a missed approach maneuver. The aircraft crashes into a hill four miles short of the runway, killing French and a passenger. The other five aboard survive, but two are seriously injured.

Flights are maintained in 1972–1978. During the latter year, a de Havilland Canada DHC-6-200 Twin Otter is purchased from **Air Illinois**. The turboprop becomes fleet flagship and is usually flown by chief pilot Capt. James Merryman, who had joined the company in 1975.

While on final approach to Rockland on the evening of May 30, 1979 on flight from Boston, Flight 46, the DHC-6-200 piloted by Merryman and a copilot with 16 passengers, crashes into trees 80 ft. above the ground. The aircraft comes to rest 1.2 mi. SSW of the runway at Otter Point (17 dead). The story of the crash and of the little airline to this point is the subject of the first four chapters of John J. Nance's study *Blind Trust* (New York: William Morrow, 1986).

In May 1980, the company, unable to recoup its losses and acquire new flight equipment, is sold to **Bar Harbor Airlines**.

DOWNEAST AIRLINES (2): P.O. Box 410, Wiscasset, Maine 04578, United States; Phone (702) 882-6752; Fax (702) 882-9262; Code E7; Year Founded 1995. The new Downeast, also known as Downeast Flying Service doing business as Downeast Express, is established by Wayne Hazard in the spring of 1995 as an outgrowth of his FBO, originally set up in 1983. Richard Goodrich is named president of the new scheduled third-level division and revenue flights commence in June with a single Beech 1300 over the same route network as the company's predecessor. A Piper PA-31-310 Navajo is acquired in July.

The fleet is increased in 1996 by the addition of another Navajo and a PA-58 Aztec.

Enplanements for the first full year of service total 2,105. The Aztec is replaced by a third Navajo in 1997–2000.

DOWNEAST CHARTER FLIGHTS: Wiscasset Airport, Wiscasset, Maine 04578, United States; Phone (207) 882-6752; Fax (207) 882-9262; Year Founded 1983. This concern is established as the FBO at Wiscasset Airport in 1983. Over the next 15 years, the company also undertakes executive and small group passenger charters, including hunting and fishing expeditions, and all-cargo express flights.

In 1998–2000, the company operates 2 Piper PA-31-310 Navajos and an all-cargo configured PA-31-350 Navajo Chieftain.

DOWNEAST EXPRESS. See **DOWNEAST AIRLINES (2)**

DOWNEAST FLYING SERVICE. See **DOWNEAST AIRLINES (2)**

DOWNTOWN AIRLINES: United States (1972–1975). Downtown Airlines is established at New York City in the early summer of 1972 to provide the first scheduled floatplane services in the contiguous U.S. by a commuter airline. Employing float-equipped Piper PA-23 Aztecs and de Havilland Canada DHC-6-200 Twin Otters, Downtown inaugurates

daily roundtrips in July, linking the riverfront ramp at Wall Street Pier 8 with Penn's Landing in Philadelphia. Service is also extended to a Potomac River facility at Washington, D.C.

Operations are maintained until financial difficulty forces the company to shut its doors three years to the month later, on July 27, 1975.

DRAGON AIRWAYS, LTD.: United Kingdom (1953–1957). Dragon Airways, Ltd. is formed in early 1953 to operate ad hoc charter flights from Pwllheli airfield with a de Havilland DH 89A leased from Murray Chown Aviation; flights begin in June. The Dragon Rapide is lost in a crash at Pwllheli in July and the company suspends flight operations until delivery is taken of a purchased DH 89A, christened *Oboe Baker*, on September 10.

The company is registered as an airline on January 16, 1954 and moves its base to Liverpool Airport. During the month, a Miles M.65 Gemini 1A is acquired for light personnel charter, along with another DH 89A, which is named *Peter Tare*. Although scheduled routes are sought and obtained from the Air Transport Licensing Board (ATLB), summer work continues to be primarily nonscheduled.

In May 1955, a DH 114 Heron 1B is purchased and christened *The Commander*; it is followed by a Heron 2, *The Conqueror*, in June. These are employed to inaugurate scheduled flights during the summer, including Stoke to Isle of Man, Liverpool to Glasgow (Renfrew), Newcastle to Glasgow and Manchester, and a weekly flight from Newcastle to Copenhagen and twice weekly to Hamburg. The Newcastle flights are undertaken on behalf of **Hunting-Clan Air Transport, Ltd.** The operating base is transferred to Newcastle on November 1.

At this point, the *Oboe Baker* is sold and the carrier is purchased by **Hunting-Clan Air Transport, Ltd.**, Elder Dempster, and Tyne-Tees Steam Shipping Company and assigned to take over **Hunting-Clan Air Transport, Ltd.**'s Newcastle-based network as a Northern Division. A third Heron is purchased in December and named *The Centurian*.

The *Peter Tare* is sold in February 1956. In June a Vickers Viking is purchased from Field Aircraft Services. It is employed to fly twice weekly Newcastle to Paris via Liverpool, thrice weekly Newcastle to Belfast, thrice weekly Newcastle to London, and weekly Newcastle to Bergen. At the end of the summer, only the Paris run remains unsuspended.

Continuing financial losses lead to the carrier's acquisition by Britavia in February 1957; it is now assigned to continue serving as a northern division, for **Silver City Airways, Ltd.**

DRAGONAIR (HONG KONG DRAGON AIRLINES [PTY.], LTD.): 22/F Devon House, Taikoo Place, 979 Kings Road, Quarry Bay, Hong Kong; Phone 852 590-1328; Fax 852 590-1333; <http://www.dragonair.com>; Code KA; Year Founded 1985. On April 1, 1985, the Hong Kong-Macau International Investment (HKMII) forms this new entrant to provide nonscheduled service into the People's Republic of China; equity is also held by the Bank of China (via China Cheer, 22%) and China Resources (15%). A Boeing 737-2S3A, leased from Guinness Peat Aviation, arrives on June 19. Chao Kuang-plu is chairman, with Stephen Miller as president; scheduled routes are sought to Beijing and Shanghai. The company receives an Air Operator's Certificate on July 24 and initiates its first service, a charter, to Kota Kinabalu on July 26.

During the summer, a dispute arises with **Cathay Pacific Airways (Pty.), Ltd.** over routes and capacity into the PRC and in August and September, the Hong Kong Civil Aviation Department (CAD) refuses charter rights. Dragonair reapplies, requesting six additional destinations: Guangzhou, Haihou, Hanzhou, Xiamen, Xian, and Zhangjiang; the CAD allows the carrier to seek China's permission first, in October. Two additional points, Guilin and Tranjin, are added to the petition placed before the CAD.

Also in October, Sir Yue Kong Pao, owner of Worldwide Shipping, purchases a 30% share for \$7.69 million and names himself CEO. The new leader's sons-in-law, Peter Woo and Dr. Helmut Sohnen, are

appointed to the board of directors, with the latter also becoming managing director; former CEO Miller is named general manager.

The airline receives permission from the PRC for its first mainland charter flight and service is inaugurated to Xiamen on November 29. In December, the CAD grants permission for the carrier to begin scheduled flights to its requested PRC points (except Beijing and Shanghai); however, operations are delayed due to interpretations of the Hong Kong-U.K. and U.K.-PRC bilateral air treaties.

Scheduled and nonscheduled London and scheduled Thailand service rights are applied for in January 1986. Charters to Guangzhou commence on April 14. In May, scheduled rights to the U.S., Amsterdam, and Manchester are also petitioned. In the same month, permission is given for scheduled services to three Thai cities—pending Thai government approval. On June 26, additional charter services are started with a Boeing 737-2L9A, including a semi-regular frequency to Hangzhou. A July hearing on the airline's long-haul requests before the Hong Kong Air Transport Licensing Authority (ATLA) results in petition rejections.

In the fall, the application for routes to Honolulu, Los Angeles, and Houston are withdrawn and replaced by one seeking 14 additional routes to China and four to Japan. Charters are started to Guilin on October 6 and a second B-737-2L9A is delivered late in the month. Nanjing becomes a Chinese destination on December 12 and, on December 16 and 18 respectively, weekly B-737-2L9A frequencies commence from Hong Kong to the Thai cities of Chiangmai and Phuket.

Enplanements for the year total 60,000.

Early in 1987, orders are placed for two McDonnell Douglas MD-11s. On January 25, a sixth charter route is opened into China, to the city of Kunming. The next day, the Hong Kong ATLA grants the previous fall's application for routes to 14 Chinese communities, plus 4 in Japan, and 4 more in Thailand, Guam, and Kathmandu in Nepal.

In March, a third B-737-2L9A joins the fleet and on May 15 the company joins IATA, becoming the first Hong Kong-based airline admitted to this international industry organization. Former Northwest Airlines and MarkAir official James Foster becomes chief general manager in August and the MD-11 orders are cancelled in September.

In November, Dragonair applies to the U.S. DOT for permission to initiate flights from Hong Kong to Guam. Less than a week after the application is submitted, it is withdrawn, as the carrier elects to concentrate its efforts into the Chinese mainland and Asia. Charters are inaugurated in December to Kagoshima, Oita, Kumamoto, and Nagasaki, Japan.

Passenger boardings accelerate to 165,000. Revenues total HK\$4.5 million, but expenses are high, and a net HK\$7.3-million loss is suffered.

In 1988, flights to 10 PRC destinations continue, although service to Guangzhou is dropped because of low traffic loads. Stephen Miller, the founder and commercial general manager, resigns in March. To avoid restrictions on advertising, the carrier establishes an in-house tour packager that can mount its own publicity and, employing its B-737-2L9As, commences service from Hong Kong to Tianjin, China and Kagoshima, Japan, in May.

Weekly flights to Dalian begin in June with flights to Guangzhou restored at the same time. Hong Kong to Kathmandu flights are started in September, while thrice weekly, scheduled roundtrips are initiated to Pattaya, in Thailand.

Customer bookings for the year jump 54% to 250,000.

Airline employment is increased by 17% in 1989 to 344 and the fleet now includes five B-737-2L9As.

With permission from both the Chinese and Hong Kong civil aviation authorities, the company, in April, adds a third weekly frequency to its nonscheduled twice-weekly flights to both Beijing and Shanghai. During the same month, the company is successfully able to circumvent regulations preventing its charter flights from being publicly advertised by the simple expedient of creating its own Dragonair Holidays package tour subsidiary, which is allowed to announce the airline's flights.

Late in the year, the Swire Group, parent of local rival Cathay Pacific Airways (Pty.), Ltd., purchases a 33.3% shareholding that includes

contracts for management, administrative, and technical services. China Guangda International Trust and Investment Corporation, backed by the PRC, owns 55.7% of the remaining share capital. Involvement of the mainland government allows Dragonair to convert many of its "regularly chartered" routes into the mainland to "regularly scheduled" status.

As a result of the Chinese suppression of student pro-democracy demonstrations at Beijing in early June, the carrier's traffic into China declines dramatically. Consequently, the carrier in July and August must drop 16 of its 31 flights to the 10 points served in the PRC; only Tianjin is, however, actually deleted from the route network. To counter the loss, frequencies are added to the Thai holiday centers of Pattaya and Phuket.

Operations into China return to normal in the fall and, in November, Sir Yue K. Pao sells his 37.8% controlling interest back to the Chao family. Pao's son-in-law Dr. Helmut Sohmen resigns as managing director and is replaced by the new chairman, Ronald Chao, Chao Kuang-piu's son.

In December, Swire Group purchases 30% shareholding, ending forever the new entrant's chance of becoming a serious competitor. An additional 5% is also taken weeks later and the overall arrangement is valued at \$125 million, of which a third is invested in Dragonair's four B-737-200s. Simultaneously, Hong Kong-based CITIC, with backing from China, increases its shareholding to 38%, while founder Chao's investment drops to 22%.

Overall passenger boardings for the year advance by 32.8% to 340,350; 465,000 FTKs are also operated.

The workforce grows 54.9% in 1990 to 533 and the fleet is increased by the addition of a Lockheed L-1011 TriStar 1.

In January, Cathay Pacific Airways (Pty.), Ltd. assumes management control under a 15-year contract; its longtime Vice President Jerry Penwarden is seconded over to take control of day-to-day operations as chief operating officer. Although the two airlines remain separate, Dragonair concentrates fully on charter operations into mainland China and along other secondary routes in Asia. In March, the company is designated by the British government to provide scheduled services between Hong Kong and the Chinese mainland.

Three months later, the carrier employs a Lockheed L-1011 TriStar 1 leased from Cathay Pacific Airways (Pty.), Ltd., but painted in its own livery, to take over Cathay's scheduled services into China—four frequencies per week to Beijing and five to Shanghai. In addition, four of Dragonair's routes are switched from charter to scheduled: Dalian, Kunming, Hangzhou, and Xiamen. Chief Operating Officer Penwarden resigns in November and is succeeded by Cathay's general manager-cargo, Simon Heale. Customer bookings skyrocket 84.5% to 628,803 and FTKs reach 5.22 million.

The payroll is cut by 37.3% in 1991 to 334 and the fleet now includes 4 B-737-2L9As, 1 B-737-2S3, and 1 Lockheed L-1011 TriStar leased from Cathay Pacific Airways (Pty.), Ltd.

In February, Dragonair links with Cathay's CUPID reservations system. In April, it takes an equity stake in the flight kitchen operated by LSG Lufthansa Service Hong Kong (Pty.), Ltd., which will increase over the next nine years to 31.94% shareholding. During May, Phuket Unwinder Holiday packages, good through October 31, are introduced for Hong Kong residents.

Also during the spring, service is inaugurated to the PRC cities of Chengdu and Tianjin.

In December, the carrier commits to replacing its B-737-200A fleet with Airbus Industrie A320-232s.

Passenger boardings increase by 20.6% to 758,571 and freight rises 10.3% to 5.76 million FTKs.

Early in 1992, CITIC, the foreign investment division of the People's Republic of China, increases its shareholding to 48%, while Cathay Pacific Airways (Pty.), Ltd.'s interest declines to 35%.

In March, a 2.6% is taken in the Asian computerized reservations system consortium, Abacus. Frequencies are increased to daily on the routes to Beijing and Xiamen while service from Hong Kong to Shanghai grows to six per week.

A new logo and livery are introduced late in the year when the first Airbus Industrie A320-232 arrives.

Customer bookings increase another 24.5% to 944,647 and cargo rises 20.1% to 6.92 million FTKs.

In 1993, Chairman Kuang Pin Chao and Chief Operating Officer Heale oversee a workforce of 771 and fly 4 A320-232s, 1 B-737-2S3, and 2 TriStar 1s chartered from **Cathay Pacific Airways (Pty.), Ltd.** Flights begin to Phnom Penh and Ningbo, and follow the January 18 suspension of flights to Kathmandu. Other destinations served include Beijing, Changsa, Chengdu, Dalian, Guilin, Haikou, Hangzhou, Kunming, Nanjing, Ningbo, Shanghai, Tianjin, Xiamen, Xian, Phnom Penh, Phuket, Kota Kinabalu, Dhaka, Kagoshima, Hiroshima, and Sendai.

A second TriStar 1 is leased from Cathay in July and, in October, cost and revenue sharing is started with **Malaysia Airlines, Ltd. (MAS)** on routes from Hong Kong to Kuching and Kota Kinabalu. The fifth of seven A320-232s arrives in November and allows retirement of the B-737-2S3.

Statistics are reported through September and show passenger boardings up 32.4% to 911,415 and freight ahead 42.7% to 6.8 million FTKs.

Only one person leaves the company in 1994, with no replacement. Philip Chen succeeds Heale as chief operating officer on February 1. A total of 14 cities are served in China, including 7 under scheduled authority.

Two A330-342s are chartered from the International Lease Finance Corporation (ILFC) in May to replace the two L-1011s. In September, cost and revenue sharing begins with **Royal Brunei Airlines** on a route from Hong Kong to Bandar Seri Begawan.

Traffic figures are reported through November and show customer bookings up 25.9% to 1,447,395 and freight up 68.2% to 15.03 million FTKs.

Airline employment grows by 10.4% in 1995 to 850.

In March, the dormant **CAAC (The General Administration of Civil Aviation of China)** subsidiary China National Aviation Corporation (CNAC-2) announces that it will begin a rival airline in Hong Kong before the British colony is handed back to the PRC in 1997.

During the last week of April, CNAC applies for a scheduled license to operate service into Hong Kong as complement to the charter flights into Kai Tak Airport already made with aircraft leased from **China Southwest Airlines Company, Ltd. Cathay Pacific Airways (Pty.), Ltd.**, Dragonair's parent, bitterly opposes the PRC move, even though CNAC is a 10% shareholder in Cathay.

On May 22, the first of two A330-342s arrives at Hong Kong under charter from ILFC. While the company awaits clearance to employ it on routes to the Chinese mainland, the twin-engine aircraft is placed on the route to Kota Kinabalu. Meanwhile, two company pilots, under Dragonair's Cross Crew Qualification program, become the first to be triple-rated for the A320, A330, and A340.

A330-342 flights from Hong Kong to Shanghai and Beijing are finally allowed to begin on June 5. During the fall, the second A330-342s is delivered and the leased TriStars are returned to **Cathay Pacific Airways (Pty.), Ltd.**

Passenger boardings inch up 2.8% to 1,618,510 while cargo does much better, growing to 24.76 million FTKs.

The workforce is increased a huge 42% in 1996 to 1,207 and the leased fleet includes 7 A320-232s and 2 A330-342s.

The PRC expands its stake in Hong Kong's major airlines during the last week of April. Under a stock offering arrangement worked out between Swire Pacific (Pty.), Ltd. and China's foreign investment firm, CITIC, Swire sells out its majority stake in **Cathay Pacific Airways (Pty.), Ltd.**, while retaining its management contract. It turns over 35% controlling interest in **Dragonair (Pty.), Ltd.** along with the right for the Chinese to appoint their own management team.

At the same time it surrenders majority control Swire Pacific/Cathay loses its control of Dragonair (Pty.), Ltd. Under the same Cathay agreement, China National Aviation Corporation (CNAC-2) takes over the British company's subsidiary with a 35.86% majority stake. For this,

CNAC, the former flying-arm of **CAAC (The General Administration of Civil Aviation of China)**, pays HK\$1.97 billion (\$254.8 million), including HK\$971.1 million (\$125.6 million) each to Swire Pacific and CITIC and \$4 million to the founding Chao family. Swire Pacific's stake drops from 43.16% to 25.50%, that of CITIC falls from 46.15% to 28.50%, that of the Chao family from 5.57% to 5.02%; public interest of 5.12% remains unchanged.

A third A330-342 is chartered from ILFC in late May and is employed, beginning in June, to inaugurate the company's 15th PRC gateway, Qingdao. Also in June, Dragonair is granted authority by the Beijing government to operate from Hong Kong to five additional Chinese markets, including Tsingtao and Shantou.

Twice-weekly frequencies to Chengdu are also to be increased on July 1 when the new routes are initiated. Following the PRC's approval of the new Hong Kong-Taiwan air services agreement, Dragonair, on August 1, launches thrice-daily A330-342 roundtrips are initiated between Hong Kong and the port city of Kaohsiung in southern Taiwan.

During the first week of September, the company pleads guilty before a Hong Kong court to the illegal transport of missile parts and a launcher for the PRC's China National Aerotechnology Import & Export Corporation (CATIC). Claiming the components en route to Israel were mislabeled prior to their placement aboard a company aircraft, the company is, nevertheless, required to pay a HK\$10,360 fine.

The company joins with **Deutsche Lufthansa, A.G.** on October 16 to provide a new through check-in service for passengers taking a Lufthansa flight to Hong Kong and traveling on to any of Dragonair's destinations. On October 24, Dragonair confirms plans to acquire as many as eight more Airbus Industrie aircraft; details will be announced later.

Air Hong Kong, Ltd. Chief Operating Officer Stanley Hui is chosen by the board of directors on November 13 to become the new CEO on February 1. The next day, the company joins with **CAAC (The Civil Aviation Administration of China)** to offer through check-in services for passengers travelling into China from Hong Kong.

Enplanements surge 20.6% to 1,951,936 and 34.9 million FTKs are operated, a 40.9% boost.

The employee population is reduced by 2.2% in 1997 to 1,181.

A sixth A330-342 is ordered on January 15; it will be powered by Rolls Royce Trent 700s.

Stanley Hui, chief operating officer of **Air Hong Kong, Ltd.**, succeeds Philip Chen as CEO on February 1.

An agreement is signed in February with **Deutsche Lufthansa, A.G.** that allows passengers arriving at Hong Kong to check through to their final destination. Similar accords are reached during the first quarter with **Air France** and **Alitalia, S.p.A.**

On April 23, twice-weekly A320-232 roundtrips commence from Hong Kong to Chongqing, a commercial metropolis in the upper Yangtze region and the principal city of Sichuan; it is the company's 16th PRC market.

While en route from Hong Kong to the Malaysian tourist destination of Kota Kinabalu on May 23, a company A340-342 suffers an in-flight shutdown of one of its Rolls Royce Trent 700 engines; the flight is diverted to Subic Bay in the Philippines. All of the company's A340-342s, along with those of **Cathay Pacific Airways (Pty.), Ltd.** and **Garuda Indonesia Airways** are grounded on June 24 as a precautionary measure.

While its Trent 700s are repaired, Dragonair operates an Airbus A300B4-605R leased from **China Eastern Airlines Company, Ltd.** between May 26 and June 7. The borrowed aircraft allows the company to minimize disruptions and by employing it with the other units of its fleet, Dragonair is able to maintain 90% of its flights. Following reinstatement of the A330 fleet on June 5, the company is also able to restore its convenient passenger check-in services on June 8.

In a well-publicized media event, 13 giant turtles, 8 rescued from poachers by the Agriculture and Fisheries Department and 5 reared in Hong Kong, are flown back to the island of Borneo on June 10 via Flight 61 to Kota Kinabalu.

A fifth A330-342 is received on June 21; A330s now serve on the high density routes to Beijing, Shanghai, Xiamen, and Kaohsiung. Also on June 21, a drawing is announced in which 25 lucky winners and their companions will win free roundtrips to Beijing on July 1. The drawing is held on June 24.

This year, traffic figures are only available through June. They show customer bookings up 9.9% to 987,900 and cargo up 39.6% to 20.6 million FTKs. Bookings for the July 1 political handover of the British colony to the PRC are not affected. Following that event, final management control of the airline passes to China National Aviation Corporation (CNAC-2) and Dragonair's chief operating officer, Philip Chen, becomes deputy managing director of **Cathay Pacific Airways (Pty.), Ltd.**

As a result of the chaos following Hun Sen's coup in Cambodia and the fighting at and near Phnom Penh's Pochentong Airport, the company stops flying into the beleaguered capital from Hong Kong late in the second week of July. Also during July, an in-house cargo sales department is established.

Algernon Yau is appointed general manager-planning and international affairs on August 1 while Ronnie Choi becomes general manager-customer services.

During the first week of August, officials from CNAC-2 and Dragonair announce that they will jointly construct a \$6.9-million office building at Hong Kong's new Chek Lap Kok Airport, which is scheduled to open the following April.

Pains are taken to assure the world that CNAC-2 will not take over **Cathay Pacific Airways (Pty.), Ltd.**; however, Zhang Xianlin, CNAC-2's vice president does note that the possibility exists of leveraging its 35.86% interest in Dragonair (Pty.), Ltd. via a listing on the Hong Kong stock exchange.

An agreement is signed with the Hong Kong Airport Authority on August 7 for the construction of a new headquarters at Chek Lap Kok.

A major fleet expansion, potentially the largest investment in the airline's history, is announced on August 14. Under an agreement signed with ILFC, the company will replace its single-aisle A320 fleet with new, upgraded A320s over the next several years. The plan also confirms the purchase directly from Airbus Industrie of an additional A330-342 and two A320-232s.

Due to the reopening of Pochentong Airport at Phnom Penh, Dragonair is able to resume its twice-daily roundtrips to the Cambodian capital on September 16. Twice-weekly A320-232 return flights to Wuhan commence on October 2. Also in October, CNAC-2 plans to make a 30% initial public offering (IPO) on the Hong Kong Stock Exchange. Shareholding will be sold in Dragonair, Jarine Air Services, and a property investment company on the island.

The crash of regional stock markets at the end of the month forces CNAC to postpone its 30% initial public offering, which it had hoped to start trading in Hong Kong markets at the beginning of November.

It is reported at the end of the month that, since January, the carrier has transported 31,959 tons of cargo, a 43.3% increase over the same period a year earlier.

Lead manager Peregrine Capital, Ltd. is able to work its way around the former Crown Colony's fiscal problems and launch the IPO in early December. It is oversubscribed 17 times and brings in HK\$613 million (U.S.\$79 million).

In cooperation with the Salvation Army, an A330-342 delivers a 2,000-kg. "care" package to Beijing on January 15, 1998 for distribution to victims of the previous week's earthquake in Hebei Province.

Daily A320-232 roundtrips begin on February 25 from Hong Kong to Fuzhou, the capital of coastal Fujian Province, China. Fuzhou is the 27th destination added to the company's regional route network and the airline's 18th destination in mainland China.

A 10-year aviator with the company, Ms. Rosa Chak becomes Dragonair's first female captain on February 28; she will continue pilot duties, flying an A330-342.

A second new A320-232 is delivered on March 1. The carrier's first Beijing office opens on April 28.

The "First into the Future" drawing contest for young people is announced on May 25. The winners will be given complementary seats on the first departure in July from the new Chek Lap Kok Airport.

On May 27, Dragonair announces a special educational travel package to Beijing to be offered during the summer. The flights, which will depart to the Chinese capital on July 19, July 26, August 2, and August 9, will offer travelers a two-week opportunity to learn Mandarin (Putonghua) at Beijing University. The next day, a third new A320-231 is received.

Two A320-232s make their first takeoff and landing at the new Hong Kong International Airport at Chek Lap Kok on June 14 as part of the final, full-scale trial of the facility before its July opening. An agreement is signed with CAE Electronics, Ltd. on June 16 for the purchase of a technically advanced A320 Full Flight Simulator, which will be delivered during the year 2000.

On June 23, the company announces the winners of its "First into the Future" drawing contest, all of whom are 8-10 years of age. The first of six purchased A320-232s is received on June 24.

On July 7, 26 local young artists, winners of the "First into the Future" drawing competition, together with pop singer Leo Ku, are flown to Haikou aboard an A320-231 on the company's first service from the new Chek Lap Kok Airport.

A joint earth breaking ceremony is held with CNAC-2 on July 16 for the carrier's new headquarters building at the airport.

On August 18, Toshiaki Tanai is named general manager-marketing and sales.

A 759-sq.-m. passenger lounge is opened at the new Chek Lap Kok Airport on September 7.

An agreement is signed with the Philippines National Bank Holdings on September 29 for the wet-lease of an A320-231. The Dragonair aircraft, beginning on October 1, operates essential domestic routes from Manila to Bacolod and Cagayan three times a day. The service will continue for several weeks. On October 18, a fifth new A320-232 is received.

All Dragonair flights become nonsmoking on November 1. A new downtown office is opened in the COSCO Tower on December 9.

Enplanements for the 12 months decline 2.9% to 2.1 million.

Another leased A320-232 is received on February 1, 1999. The fleet now includes 11 of the type, together with 6 A330-342s. Thrice-weekly A330-342 roundtrips begin on March 4 between Hong Kong and Phnom Penh, Cambodia. A fourth daily A320-232 roundtrip is added on March 28. The same day, 3 additional weekly A330-342 roundtrips, for a total of 17, are added to Beijing schedule through October 30. Two additional A320-232 services are simultaneously provided to Kunming.

The first A321-231 arrives on April 9; it will be followed by a second on June 5. On May 1, weekly service from Hong Kong to Tianjin is temporarily suspended, as are twice-weekly flights to Ningbo. Also in May, a Dragonair flight from Shanghai becomes the first scheduled service to touch down on the new second runway at Hong Kong International Airport.

Weekly A320-232 return charters are launched on June 17 between Hong Kong and Da Nang, Vietnam.

In September, the carrier joins Asia Miles, the region's leading frequent flyer program. On September 16, the company's flight schedule is heavily affected by the passing of Typhoon York. One service is diverted to Kao-hsiung and eight flights are cancelled.

The company's booming air cargo business reports its best month ever in September with 6,000 tons flown during the 30-day period.

Dragonair donates HK\$750,000 on October 11 to support relief work in Taiwan following the recent devastating earthquake there.

During the fourth quarter, the nine-month-old cargo division establishes cargo service teams in Shanghai, Beijing, Xiamen, and Hangzhou.

Passenger boardings climb 6.8% to 2.21 million, while 83.54 million FTKs are operated.

Airline employment at the beginning of 2000 stands at 1,222, a 5% increase over the previous 12 months.

A tragedy 110 nm. E of Chek Lap Kok Airport is narrowly averted on January 22 when Dragonair Flight 437, an A330-342 preparing to land at the Hong Kong facility after a service from Kao-hsiung, narrowly avoids a collision with **Silk Air (Pty.), Ltd.** Flight 928, an A320-232 taking off for the continuation of a service from Singapore to Xiamen, in SE China. Before Traffic Alert and Collision Avoidance System (TCAS) alarms allow evasive action, the aircraft are apart by approximately 1.3 nm laterally and 900 ft. vertically.

Under terms of a new air service agreement between Hong Kong and Beijing, Dragonair's regular charter flights to Changsha, Guilin, Haikou, Nanjing, and Wuhan are converted into scheduled services on February 3. Also during the first two weeks of the month, extra services and capacity are added to meet the demand for travel over the Lunar New Year period. Firm orders are placed for five A320-232s and an A330-243 on February 23, while options are also taken on two more of the latter type.

Twice-weekly Airbus return service is inaugurated on April 6 from Hong Kong to the resort community of Sanya, in China's Hainan Province. The community is the airline's 17th mainland destination. All regular flights on Dragonair's network become scheduled as of March 26. A third dual-cabin A321-231 joins the fleet on May 15.

To accommodate rising summer demand for services to the mainland, weekly return frequencies on several routes from Hong Kong are increased on June 1: to Chengdu (3 to 4), to Fuzhou (4 to 5), to Qingdao (3 to 4), to Xian (2 to 3), to Beijing (21 to 25), and to Shanghai (28 to 32).

The company moves into its purpose-built headquarters at Chek Lap Kok on June 26. Dragonair House also features a fully equipped Flight Training Center. On July 28, employing a B-747-200F under an ACMI contract from **Atlas Air**, Dragonair inaugurates its first international freighter operation. Thrice-weekly return Jumbojet freighter flights link Hong Kong with Dubai, Amsterdam, and Manchester.

Another midair collision is avoided by 500 ft. vertical distance near Guangzhou on August 8, when the TCAS aboard a company A321-231, en route to Beijing from Hong Kong, alerts its crew to the nearby presence of a **China Southern Airlines Company, Ltd.** B-757-21B arriving at Guangzhou. No injuries are reported and both aircraft successfully complete their flights; two Chinese traffic controllers are, however, suspended over the incident.

On August 10, employing a B-747-200F under an ACMI contract from **Atlas Air**, the carrier inaugurates weekly all-cargo roundtrips between Hong Kong and Shanghai. Twice-weekly A320-232 roundtrips begin on October 29 from Hong Kong to Kathmandu, Nepal.

Yet another near miss is reported on October 20 when TCAS sounds aboard a Dragonair A330-342 on approach to Beijing with 320 passengers. The Airbus is able to pull up and avoid an unidentified B-737.

In early November, two B-747-312s are purchased from **Singapore Airlines, Ltd.** for conversion into freighters.

DRENAIR, S.A.: Spain (1991–1996). Drenair is established at Madrid in 1990 to offer nonscheduled executive passenger and express services throughout the nation and region. Revenue services commence with a fleet made up of 6 Grumman G-159 Gulfstream Is. A seventh Gulfstream I is added in 1994. Flights cease in 1996.

DRUK AIR (DRUK AIR CORPORATION/ROYAL BHUTAN AIRLINES): P.O. Box 209, Doybum Lam (Old Bhutan Hotel, Lower Metihang, Thimphu, Bhutan; Phone 974 (2) 22215; Fax 974 (2) 22775; <http://www.drukair.com>; Code KB; Year Founded 1981. King Jigme Singye Wangchuk's government establishes this national carrier on April 1, 1981. The airline is provided with a five-person board of directors, chaired by HRH Princess Ashi Sonam Wangchuk. With 50% assistance from the UN, a \$2-million Dornier Do-228-200 is ordered. Personnel are recruited, facilities prepared, and practice flights made with two Fokker F.27-100s leased from **Indian Airlines Corporation**. Initial nonscheduled services with the Dutch-made turboprops

commence late in the year, linking the capital of Thimphu with Bagdogra and Gauhati. The West German turboprop is delivered to Managing Director Ugyen Namgyel's carrier late in 1982.

Do-228-200 revenue flights commence on February 12, 1983 between Paro Airport and Calcutta.

During 1984–1986, charter and government service flights are added as a second Dornier joins the fleet.

Services are maintained in 1987 and 1988; during the latter year, a \$28.56-million British Aerospace BAe 146 is ordered (the largest contract ever concluded by the Kingdom of Bhutan) and Bangkok becomes a new destination.

In December 1989, the BAe-146-100 is acquired and the Dorniers are withdrawn. Druk Air becomes the only airline with a one-plane fleet flying international services.

Operations continue apace in 1990 and, in 1991, a total of 18,108 passengers are transported.

In December 1992, a second BAe-146-100 is added, allowing the Dorniers to be sold. Like its predecessor, the new aircraft is placed into service on international routes to Bangladesh, Nepal, India, and Thailand.

In 1993, the new chairman, HE Lyonpo T. Tobgyel, and the managing director, Dasho Sonam Tshering, oversee a workforce of 100. Their fleet comprises 2 BAe 146-100s and flights link Paro with Bangkok, Calcutta, Dhaka, Delhi, and Kathmandu. Charter services are also provided. One BAe 146-100 is withdrawn in 1994.

Enplanements total 28,812 in 1995.

Airline employment is increased by 30.9% in 1996 to 144 and both of the BAe 146-100s operated in 1993 are back in service.

Passenger boardings soar 17.6% to 34,966.

Destinations visited in 1997–2000 include Bangkok, Calcutta, Delhi, Dhaka, Kathmandu, Paro, and Yangon. On April 14 of the latter year, an order is placed for two Avro RJX85s, which will be delivered in November 2001 and January 2002. Druk is the first carrier to order the new BAe 146 derivative, which will be identifiable chiefly by its elongated engine nacelles. When they arrive, they will offer direct service between Bhutan and Hong Kong and Bangkok (currently served via Calcutta or Dhaka).

DRUMMOND ISLAND AIR: United States (1989–1991). With a base at Pellston, **Michigan Airways** is purchased by James C. Bailey and Bruce Barda on July 1, 1989, reformed, and renamed. Employing the de Havilland Canada DHC-6-300 Twin Otter acquired in the takeover, Drummond continues its services to Mackinac Island and a route from Alpena to Detroit via East Tawas and Saginaw.

Daily roundtrips are maintained until January 1991 when the commuter, in serious fiscal difficulty, goes out of business.

DRUSTVO ZA VAZDUSHI SAOBRAZAD. See AEROPUT

DTA ANGOLA AIRLINES, S.A.: Angola (1939–1973). Following the success of **Aero Club of Angola's** weekly DH 87 Hornet Moth experimental mail service from Luanda to Pointe Noire, the Portuguese Minister of Colonies, in September 1938, establishes the domestic carrier **Divisao de Exploracao dos Transportes Aereos de Angola (DTA)** at Nova Lisboa. It is established as a division of the Ports, Railways, and Transport Authority of Portuguese West Africa. Funds are made available to General Manager Joaquim de Almedia Baltazar for the purchase of 3 de Havilland DH 89A Dragon Rapides and 2 Junkers Ju-52/3ms.

While awaiting the arrival of its new flight equipment in 1939, DTA relies upon the DH 85 Leopard Moth and Piper J3 Cubs of the Aero Club of Angola to operate nonscheduled flights. With the outbreak of World War II, it is learned that the German transports will not be available.

The arrival of the Dragon Rapides allows regularly scheduled domestic services commence on July 7, 1940; the main route runs from Benguela to Pointe Noire in the French Congo via Lobito and Luanda, with a connection to Nova Lisboa. Travelers can transfer to other aircraft and reach the Portuguese capital of Lisbon within six days.

Cabinda becomes the northern terminus of service in **1941**; other destinations visited include Lobito, Luanda, Mocamedes, Nova Lisboa, and Pointe-Noire. Two Stinson SR Reliants arrive in **1944** and orders are placed for war surplus Douglas DC-3s (C-47s converted to civil standard) in **1945**.

Three DC-3s enter service in **1946**, allowing the launch of a route to Kinshasa. Four Beech 18s arrive before the end of the year, at which point all of the colony's major communities are served.

During **1947–1971**, the domestic network is maintained and expanded somewhat and services are started to several neighboring states in southwestern Africa; the system's overall network is increased to 7,000 unduplicated miles. Destinations visited from Luanda include Lobito, Leopoldville, Malange, Porto Amboim, Novo Redondo, Nova Lisboa, Benguela, Mocamedes, Santa de Bandiera, Porto Alexandre, Pointe-Noire, Ambriz, Ambrizette, Toto, Sozaire, Cabinda, Ponta Negra, Lourenco Marques, Kinshasa, and São Tome. During the 1960s as the situation in the Belgian Congo deteriorates, services to Pointe-Noire and Kinshasa are withdrawn.

Late in this period, the fleet grows to include 3 Fokker F.27-200 Friendships, 4 Beech 18s (sold to the Portuguese Air Force in 1963), and 6 DC-3s. One of the latter type had been involved in the company's first fatal accident when it was lost in a crash near Bocoio on July 18, 1950 (nine dead).

Enplanements gradually rise, passing 41,500 in 1960, to an average of 150,000 per year by the end of the decade.

Although little is recorded concerning the airline's operations, it is known that DTA is not immune to acts of aerial terrorism. On June 4, 1969, a DC-3 with 11 passengers and en route from Ambrizete to San Antonio is taken over by three armed hijackers, who divert the aircraft to Pointe-Noire. En route from Luanda to Sa da Bandera, with a stopover in Lobito, on May 1, **1972**, an F.27-200 with 6 crew and 19 passengers overshoots the runway at Lobito Airport and splashes into the sea 3 km. from the end of the runway (22 dead).

The carrier is reorganized on October 1, **1973** and is renamed **TAAG Angolan Airlines, S.A.**

DUCOR AIR TRANSPORT: Liberia (1964–1974). Ducor Air Transport is established at Monrovia in **1964** to offer air taxi and charter service to domestic destinations, as well as communities in bordering countries. Operations are begun and continue throughout the company's history with a single Dornier Do 27Q. **Liberia National Airlines** and Ducor Air Transport are merged in **1974** to form **Air Liberia**.

DUNCAN AVIATION: United States (1969–1972). Duncan Aviation, an aircraft leasing and brokerage firm based at Lincoln, Nebraska, establishes a scheduled air taxi division in **1969** with which to provide local services.

Beech 18 passenger and cargo flights are maintained until **1972**.

DURANGO AIR SERVICE: Durango-La Plata County Airport, 1340 Airport Road, Durango, Colorado 81301, United States; Phone (970) 247-5535; Fax (970) 247-5537; Year Founded 1990. Don Watkins establishes this FBO at Durango in **1990** to offer airframe and power plant (A&P) repair, flight training, and aircraft charter and rental. Operations begin and continue with a fleet of Cessnas.

There are no significant incidents until **1995**. While en route on a flight-seeing charter seeking elk in the Colorado mountains on October 10, the company's Cessna 172RG with a pilot and two passengers crashes into trees on Miller Mountain, and hits the earth about .5 mi. S, in the Carbonate Basin. There are no survivors.

Flights continue apace in **1996–1997**. The fleet comes to include a replacement Cessna 172RG, plus one each C-182RG, C-421, and Piper PA-34 Seneca, plus two each Cessna 404s and C-152s. During the latter year, revenues of \$1.5 million are generated.

President Watkins employs a workforce of 15 in **1998–2000**. On October 10 of the latter year, the C-182RG, while operating a cargo serv-

ice from Gallup to Grants, New Mexico, crashes near Mount Taylor, killing its pilot.

DUTCHBIRD, S.A.: Fokkerweg 300-Oude Meer, 1118 ZX Schiphol Airport, Amsterdam, The Netherlands; Phone 31 (0) 20 605 58 00; Fax 31 (0) 20 605 58 10; <http://www.dutchbird.nl>; Code 5D; Year Founded 2000. Hans Mosselman, founder/owner of Sud Tours, establishes this in-house airline at Amsterdam on August 16, **2000** to operate inclusive-tour charters to the Canary Islands. From offices previously occupied by Fokker Aircraft at Schiphol Airport, Managing Director Jan Heppener completes arrangements to acquire slots at the Dutch facility and at various holiday airports in the Spanish islands. Recruitment of staff begins and in early November deals are struck with **Condor Flugdienst, GmbH** for the lease of three B-757-230s and with Condor Cargo Technik for a package of technical support services.

Painted in a bright yellow, red, and blue livery, the premier B-757-230 arrives on November 15. On the evening of November 21, Dutchbird receives its air operator's certificate and license from an official of the Netherlands Civil Aviation Authority. After 100 days of preparation, revenue flights to Palma de Mallorca and Tenerife begin on November 22. Interestingly, the same day, the aircraft contracts are officially confirmed, as is the arrangement with Condor Cargo Technik.

Early in December, a homepage is opened on the World Wide Web. The company announces that it will inaugurate a program of charters in the spring, most on behalf of Sud Tours, to destinations in Spain, Portugal, Greece, Turkey, and Cyprus. The second and third B-757-230 will arrive in March and April, respectively.

W. T. DWYER (PTY.), LTD.: Australia (1946–1947). William T. Dwyer forms this single-plane operation at Melbourne in the fall of **1946** to fly charter services to St. Helens. Like several other postwar Australian operators, the traffic proves insufficient to allow continuance and the company folds in December **1947**.

DWYER AIR CHARTER: Mason City Municipal Airport, Mason City, Iowa 50401, United States; Phone (515) 423-6453; Fax (515) 357-5087; Year Founded 1952. Dwyer is established as the local FBO at Mason City, Iowa, in **1952**. Over the next 45 years, the company undertakes a wide variety of passenger and cargo charter services and also establishes a facility at Minneapolis, Minnesota.

By **2000**, Barbara Dwyer oversees the work of 12 pilots. From Mason City, the company flies two each Cessna 402Bs and Cessna 172 Skyhawks, plus one each C-421, C-210, Piper PA-34 Seneca, and Beech 18S freighter. A Seneca and a C-402B are flown from Minneapolis (MSP).

DYNAMIC AIRLINES, B.V.: Luchthavenweg 43, Eindhoven, NL-5657, The Netherlands; Phone 40 252-8955; Fax 40 251-3939; Year Founded 1990. Organized as an air taxi at Eindhoven in **1990**, Dynamic's board appoints H. J. van den Hout as managing director. Plans are made to begin twice-daily, third-level service from Eindhoven to Southend in England. A fleet is assembled comprising two Piper PA-31-350 Navajo Chieftains and two Cessna King Air 200s. Scheduled passenger and cargo services are initiated linking the company's base with Strasbourg.

The Pipers are withdrawn in **1992**. Operations continue without change during the remainder of the decade.

E. W. WIGGINS AIRWAYS. See **MOHAWK AIRLINES (1)**

EAF CHARTER: United States (1967–1988). Executive Air Fleet is established at Teterboro, New Jersey, in **1967** as an aircraft leasing concern. Late in the year, it is decided to undertake executive passenger charters and contract service flights with a division named EAF Charter.

Over the next decade, the company workforce exceeds 175 in number and the fleet is made up of business jets and executive turboprops, such as Dassault Falcons, Learjets, Fairchild-Swearingen Merlins, and Beech Super King Airs. Operations continue.

By 1988, the company is the largest aircraft management and charter company in the U.S. That year, it is taken over by the expanding Swiss-based **Jet Aviation Group**.

EAGLE AIR (1): United States (1976–1980). Eagle Air is established at Sitka, Alaska, in 1976 to provide scheduled passenger and cargo flights to Angoon, Baranof, Hoonah, Tenakee, and various bush destinations. Revenue flights commence with de Havilland Canada DHC-2 Beavers, Cessna 185s, and a Piper PA-31-310 Navajo.

The energy crisis forces the company out of business in 1979.

EAGLE AIR (2): United States (1993–1995). The FAA Part 121 operating certificate of **Viking International Airways** is purchased by Gene H. Yamagata, CEO of Yamagata Holdings, in December 1992.

In early 1993, the carrier is renamed **Eagle Air**, doing business as **Viking International Airlines** and inaugurates charter passenger operations from its Minneapolis (MSP) base with its fleet of 2 Convair CV-600s, 2 CV-640s, and 1 Douglas DC-9-14. Formerly operated by **Delta Air Lines**, a DC-9-32 is acquired, as VIA completes its upgrade from a public charter company to a fully certified supplemental airline.

A total of 47,686 passengers are flown and revenues total \$2.9 million. Expenses are high and losses are suffered: \$1.29 million (operating) and \$1.64 million (net).

In 1994, Chairman Yamagata oversees a workforce of 90 and expands his fleet by the addition of one leased McDonnell Douglas MD-87. The previously leased DC-9-32 is returned to its lessor.

Passenger boardings jump to 115,000, but freight traffic declines by 35.7% to 210 million FTKs. Revenues skyrocket a remarkable 354.1% to \$13.18 million, but expenses leap 328.2% to \$17.97 million. The resulting operating loss is \$4.78 million and the net downturn reaches \$4.74 million.

The MD-87 is returned in 1995 and replaced by another chartered DC-9-14. A continuing decline in financial fortune forces the company to file for Chapter XI bankruptcy by spring.

Through April, 37,000 passengers are carried.

The carrier disposes of its large jets and is reformed into **Eagle Canyon Airlines**.

EAGLE AIR ARNARFLUG, H.F.: Iceland (1976–1994). A group of former employees from the bankrupt charter airline **Air Viking** form Eagle Air at Reykjavik on April 10, 1976. Viljalmur Jonsson is appointed president with Magnus Gunnarsson as managing director. Passenger and cargo charters with a Boeing 720 begin between Keflavik and Malaga on June 5.

Airline employment over the next two years grows to 50 and by late 1978 the fleet has grown by two B-720-047Bs.

Charter and contract service flights are maintained to resort areas in the Mediterranean and Southern Europe until September 1979 when the government approves the application to add scheduled domestic services to 11 points as well. These begin on September 14 and within months serve markets at Bildudalur, Blonduos, Flateyri, Gjogur, Grindarfjordur, Holmavik, Reykholar, Reykjavik, Rif, Siglufjordur, Stykkisholmur, and Sudureyri.

In 1980, a de Havilland Canada DHC-6-100 Twin Otter, a Cessna 402, and a Piper PA-31-350 Navajo Chieftain join the fleet. In November 1981, the carrier is granted permission to inaugurate international scheduled service.

Over the next three years, flights are initiated to Amsterdam, Dusseldorf, and Zurich. Managing Director Gudmundur Hauksom's fleet is altered to comprise two B-707-320s and a B-737-205C in addition to the commuter equipment.

The 707s are replaced in 1987 by a second B-737-205C. Another Cessna 402 and a second Twin Otter are obtained for the local network.

Hauksom is succeeded as managing director by Agnar Fridrinsson in 1988. The 80-employee fleet remains unchanged.

Passenger boardings, however, increase 43.5% to 51,806 and freight traffic is up by a staggering 150% to 7.21 million FTKs.

The workforce is increased by 25% in 1989 to 100 and the fleet now includes 1 B-737-205C, 2 Cessna 402s, and 1 each Twin Otter and Piper PA-31-350 Navajo Chieftain.

Customer bookings fall by 6.2% to 65,973 and freight plunges 63.4% to 2.53 million FTKs.

The world economic downturn late in the decade has a negative impact on the carrier's traffic and finances and it must stop flying in October 1990.

Operations resume from Reykjavik Airport in 1993. Hordur Einarsson is managing director and his fleet includes 2 Cessna 402s, 1 de Havilland Canada DHC-6-300, and 1 Piper PA-31-350 Navajo Chieftain.

The company again shuts down in 1994, this time for good.

EAGLE AIR SERVICES, LTD.: Box 838, Castries, St. Lucia, British West Indies; Phone (758) 452-1900; Fax (758) 452-9683; <http://www.eagleairslu.com>; Year Founded 1970. EAS is established at Vigie in 1970 to offer executive and small group passenger charters throughout the West Indies. Operations begin with a single Britten-Norman BN-2 Islander.

EAGLE AIRLINE: United States (1985–1986). Eagle is set up at Auburn, Alabama, in 1985 to provide daily roundtrip shuttle flights to Atlanta. Although Piper PA-23 Aztec revenue services are duly inaugurated, they cannot be maintained through 1986.

EAGLE AIRLINES (1): United States (1930). Employing American Eagle biplanes, Eagle Airlines is established at Kansas City in the summer of 1930 to offer scheduled multistop service to Minneapolis. Revenue flights commence in August; however, traffic is so light in poor economic times that the operation fails after the first snow in November.

EAGLE AIRLINES (2): United States (1971). The second Eagle Airlines is formed at Port Angeles, Washington, in 1971 to provide scheduled passenger and cargo flights to Seattle. Although Aero Commander 680 services commence, the carrier cannot achieve viability and quickly shuts its doors.

EAGLE AIRLINES (3): United States (1978–1981). In the remainder of 1978's fourth quarter after President Carter signs the Airline Deregulation Act into law, a third Eagle Airlines is set up at Long Beach, California, this one as a division of Eagle Aviation, an FBO. Employing Cessna 402s, it inaugurates scheduled passenger and cargo commuter flights to Los Angeles, Paso Robles, and Santa Catalina.

Operations continue until ATC restrictions brought on by the PATCO air traffic controllers' strike in late 1981 force the company into such deep financial difficulty that it must shut its doors.

EAGLE AIRLINES (4). See **VIKING INTERNATIONAL AIRLINES; EAGLE AIR (2)**

EAGLE AIRWAYS, LTD. (1): United Kingdom (1953–1960). To further promote long-haul scheduled services, **Eagle Aviation, Ltd.**, owner Harold Bamberg changes the name of his company to Eagle Airways, Ltd., on July 1, 1953. The maintenance subsidiary, Aviation Servicing, is simultaneously relabeled Eagle Aircraft Services. In late summer, new services are opened from London (CTN) to Aalborg and Goteborg, complementing the Blackbushe–Belgrade flights begun by the old company on June 6.

A total of 357 passengers are flown in 6 months of international service and the fleet grows to comprise 7 Vickers Vikings and a number of Douglas DC-3s.

A Vickers 610 Viking 1B freighter with three crew is destroyed by a hard landing at Nuremberg, Germany, on December 20; there are no fatalities.

Scheduled and charter flights continue in 1954. Vikings, converted to freighters, participate in the contract shipment of various goods throughout Europe during a nationwide dock strike.

During the year, the fleet is increased by the addition of two Avro York Is, six Vikings, and three DC-3s, although two of the Douglas transports, a Viking, and the Yorks are sold within six months.

During 1955, additional "trooping" services are flown to Egypt, the Mediterranean, and West Africa and Bamberg takes over the travel agency of Sir Henry Lunn, together with that company's booked inclusive-tour packages. The government now permits Eagle to launch several scheduled routes: Manchester to Munich and Vienna and Blackbushe to Luxembourg and Innsbruck.

Throughout the year, 11 Vikings and 2 DH 89As are added and 1 York I, 4 Vikings, and 1 Dragon Rapide are sold.

A variety of scheduled and charter services are taken up in 1956, including a large number of inclusive-tours flown for several travel agencies. On November 16, Eagle is the second airline to reach Vienna to participate in the evacuation of refugees fleeing the Hungarian Revolution. When the operation ends on December 14, Eagle has, in 36 flights, flown 1,200 of the 7,000 airlifted refugees permitted into Britain from Austria.

During the year, three Vikings, three Bristol 170 Mk. 21 Freighters, an Airspeed AS.65 Consul, and a DC-3 are purchased while six Vikings, a DC-3, and a DH 89A are removed.

In 1957, as plans are made for expansion, two Vickers Viscount 805s are ordered, with options taken on three more. A chartered Viking 1B en route to France on May 1 with 5 crew and 30 servicemen and their dependents aboard, crashes at Star Hill, near Basingstoke, England (34 dead). Scheduled service to Copenhagen and Hamburg is inaugurated on June 3. The exploratory company **Eagle Overseas Airways, Ltd.** is established on December 11; this becomes the subsidiary **Eagle Airways (Bermuda), Ltd.**

The first Viscount is delivered to Blackbushe on December 23; christened *Enterprise*, it is placed on the Hamburg route the next day.

This year also sees the fleet increased by the addition of seven Vikings, a DC-3, and two Vickers Valettas (although the DC-3 and the Valettas do not enter service) and decreased by the removal of three Vikings, all three Bristol 170s, and three DC-3s.

A Vickers 657 Viking I is destroyed in a ground accident at El Adem, Libya, on February 26, 1958. In April, the *Enterprise* flies to Bermuda and upon receipt of the **Eagle Airways (Bermuda) Ltd.** authority to America, launches daily Bermuda-New York Viscount 805 service on June 2. During the next 6 months, almost 10,000 passengers are carried on this route.

In February, a de Havilland DH 104 Dove and a DH 114 are purchased. The second Viscount 805 is received in March and is christened *Good Fortune*. It is employed to open several new regional routes during the summer: Blackbushe to Pisa, Manchester to Brussels, Copenhagen, and Hamburg, and Birmingham to Palma. The Vikings begin flying regularly Manchester-Ostend and Blackbushe-Ostend, Jersey, Innsbruck, Dinard, and Luxembourg.

In August and September, three Douglas DC-6As are purchased. During the year, the company sells five Vikings.

A second Caribbean subsidiary, **Eagle Airways (Bahamas), Ltd.**, is formed in the winter of 1959. Although the new DC-6A freighters boost freight business during the year, the number of European scheduled services and frequencies are cut back and the *Good Fortune* is transferred to Bermuda. In April, Viscount 805 service is started by **Eagle Airways (Bermuda), Ltd.** from Bermuda to Baltimore. The Bermuda subsidiary acquires 10% of the traffic on its New York route, carrying 15,000 passengers by December.

A chartered Vickers 635 Viking 1B with 4 crew and 32 passengers makes a forced landing at Agadir, Morocco, on December 22; there are no fatalities, but the aircraft is damaged beyond repair.

For the first time, Bamberg's operation has purchased no new aircraft during the year; however, the surviving Viking is retired.

Eagle Airways (Bahamas), Ltd. inaugurates Nassau-Miami Viscount 805 flights on March 1, 1960. With a significant Caribbean operation and one of the largest European networks of any British independent airline, the carrier becomes ripe for acquisition.

On March 21, major shareholding is assumed by the Cunard Steamship Co., Ltd., and the airline is transformed into **Cunard-Eagle Airways, Ltd.**

EAGLE AIRWAYS, LTD. (2): Private Bag 3048, Hamilton 2020, New Zealand; Phone 64 (7) 838-95999; Fax 64 (7) 838-9505; Code 6Q; Year Founded 1969. Formed at Hamilton on the North Island in summer 1969 as a charter operator, Eagle inaugurates flights early in November linking the base with Wanganui. During the next eight years, the carrier maintains lightplane flights to various destinations on the North Island.

Early in 1977, the carrier obtains permission to inaugurate third-level commuter service and in April begins scheduled frequencies to Auckland, Palmerston North, and Wanganui.

During 1978, the company adds one Embraer EMB-110P1 Bandeirante to the earlier fleet of a Piper PA-31-350 Navajo Chieftain, one Piper PA-30 Twin Comanche, and a Beech B-58 Baron.

Flights continue apace during the remainder of the decade and into the 1980s. Passenger boardings reach 36,000 in 1981 and 43,000 in the following year.

After the collapse of **Air Central, Ltd.** late in 1982, the company takes over a number of its routes. New stops include Nelson, Plymouth, Napier, Gisborne, and Rotorua.

Passenger boardings are 72,000 in 1983.

In 1984, the fleet comprises 2 Bandeirantes, 5 Navajo Chieftains, and 1 Beech Baron. Managing Director D. Good adds another EMB-110P1 in 1987-1988, retiring the B-58 and a PA-31-350.

In the summer of 1989, the national flag carrier, **Air New Zealand, Ltd.**, establishes a commuter and regional feeder system, Air New Zealand Link, modeled upon that sponsored by **Delta Airlines** in the U.S. In November, the major acquires 50% ownership in the small airline.

The route network in 1990 includes nine points all on the North Island, with the principal destinations being Auckland, Gisborne, Napier, and Tauranga. Malcolm Campbell becomes managing director and the fleet is upgraded by the addition of four more Bandeirantes.

One EMB-110P1 is withdrawn in 1991-1992 and is superseded by two Fairchild Metro IIIs.

In 1993-1994, the workforce totals 155 and the fleet includes 2 Metro IIIs and 6 Bandeirantes. Services link Auckland International Airport with Gisborne, Hamilton, Kaitia, Napier, Hastings, New Plymouth, Palmerston North, Taupo, Tauranga, Wanganui, Whakatane, and Whangarei.

Frequencies to these markets are continued in 1995-1999, as the fleet is increased to 8 Bandeirantes and 4 Metro IIIs. During these years, significant shareholding is taken by **Air New Zealand, Ltd.** and the company becomes an Air New Zealand Link commuter partner. Airline employment grows to 233.

A ninth Bandeirante joins the fleet in early 2000.

EAGLE AIRWAYS (BAHAMAS), LTD. See **EAGLE AIRWAYS, LTD.**

EAGLE AIRWAYS (BERMUDA), LTD. See **EAGLE AIRWAYS, LTD.**

EAGLE AVIATION (1): 2861 Aviation Way, West Columbia, South Carolina 29170, United States; Phone (803) 822-5577; Fax (803) 822-5592; <http://www.uponair.com/eagle>; Year Founded 1970. The first Eagle Aviation is established as the FBO at Columbia Metropolitan Airport in 1970. Over the next 30 years, the company also undertakes executive and small group passenger charters throughout North America with a fleet that comes to comprise one each Learjet 25, Learjet 35A, and Beech King Air 90.

EAGLE AVIATION (2): United States (1982). Long Beach, California-based Eagle Aviation offers scheduled Cessna 402 passenger flights to Santa Catalina during the summer of 1982, but thereafter closes its doors.

EAGLE AVIATION (3): 9601 Gron Road, Grosse Isle, Michigan 48138, United States; Phone (313) 676-8880; Fax (313) 676-6501; Year Founded 1989. The third Eagle Aviation is established as the FBO at Grosse Isle Municipal Airport in 1989. Over the next decade, it also undertakes executive passenger charters, cargo, and aerial photography flights with a single Bell 222 helicopter.

EAGLE AVIATION, LTD. (1): United Kingdom (1948–1953). With £100 capital, 25-year-old Harold Bamberg establishes the charter company Eagle Aviation, Ltd. on April 14, 1948. Next, he acquires and integrates the 18-month-old cargo carrier **Air Freight, Ltd.** and its Percival Proctor 5 and two Handley Page Halifax 8 freighters. The latter two are sent to Wunsdorf to begin participation on August 26 in the Berlin Airlift. A third Halifax, christened *Red Eagle*, is purchased in October and also sent to West Germany, joining the first two when the base of operations is switched to Hamburg on November 20.

Another Halifax 8 is acquired in February 1949. Two aircraft are withdrawn from service in June and July; however, for the final month of the airlift, two additional machines are leased, one from **British American Air Services, Ltd.**

In August, the company headquarters are established at Aldermaston and the ex-**Blue-Line Airways, Ltd.** Auster J/1 Autocrat, Avro 652A Anson, and Percival Proctor 5 are purchased along with a DC-3 to supplement the former military bombers. In September, three Avro 685 York Is are acquired from **British Overseas Airways Corporation (BOAC)** to replace a Halifax 8 simultaneously sold; the first enters service with Eagle in November. Various European charters are undertaken, including the December 20 transport of an entire circus from Valencia to Liverpool.

The last Halifax 8 is sold in January 1950, but the DC-3 (actually an ex-military C-47 converted to civil standard) enters service in March. A West Country scheduled route is obtained under a **British European Airways Corporation (BEA)** associates agreement, but its economic prospect results in a decision not to fly it. On April 1, company headquarters are transferred to London (CTN). York passenger and cargo charters continue and in July, the DC-3 is leased out to **Air Malta, Ltd.**

On September 1, **Trent Valley Aviation, Ltd.**, a charter company working from Tollerton, is purchased, together with its DC-3, a de Havilland DH 89A Dragon Rapide, and a scheduled route from its base to the Channel Island of Jersey, which latter is confirmed for Eagle on October 26.

Meanwhile, the last Halifax 8 accepts several Far East cargo contracts from BOAC; on November 25, the aircraft is destroyed in a crash at Calcutta.

Three Yorks and a stockpile of spare parts are purchased from the Argentine Liquidation Commission in December for approximately £30,000. At year's end, the carrier is the largest operator of four-engine transports in Europe.

A Percival Proctor 1 is added to the fleet in January 1951 and in June, Trent Valley Aviation, allowed to fly under its previous name as a subsidiary, reopens its old Tollerton–Jersey scheduled route.

The first of many Air Ministry multiflight contracts is received in August for flights to Singapore. Charters are flown worldwide, including one York flight December 18–January 1 that covers 31,000 miles from Britain to Japan, Hong Kong, Brazil and back to Britain.

At year's end, capitalization is increased to £50,000 and the employee population numbers 100, including 12 pilots.

In January 1952, a two-year Air Ministry contract is received for the transport of servicemen between the U.K. and Rhodesia; the first York flight under the program departs on January 21. Additional Air Ministry flights during the year are made to Japan, Singapore, Egypt, and Malta.

Four ex-RAF C-47s are purchased in April and May and are converted to DC-3 civil standard. On June 30, the company's Yorks complete a year in which 8,450 civilian and 2,250 military personnel have been flown nearly a million miles.

Beginning on July 2, Eagle begins special flights for English students wishing to holiday in European cities. In August, the Turkish Olympic team is returned to Istanbul.

A York is destroyed in a Berlin crash on August 24. In September, the name of Air Freight, Ltd. is revived and assigned to three newly purchased Avro Yorks. Meanwhile, the DC-3s purchased during the summer enter service.

On October 3, a York departs London (CTN) on the first leg of the longest charter flight yet made by a British independent; 37,000 miles are covered by the time the Avro returns at month's end.

On November 25, the entire York fleet, along with the Air Ministry Rhodesian contract, is sold to **Skyways, Ltd.** for £160,000; two aircraft are turned over immediately and one in February plus two in July of the following year when the **Air Freight, Ltd.** title disappears forever.

Meanwhile during the month, Blackbushe-based Aviation Servicing is purchased and Harold Bamberg moves his company to the site of his new acquisition to continue as a short-haul operator. Three Vickers Vikings are purchased from failed Crewsair, Ltd.; the two operable machines fly newspapers Manchester–Dublin through year's end.

Newspaper and passenger charters continue into 1953. In March, the three old Crewsair, Ltd. Vikings are sold to **Airwork, Ltd.**; however, the same month, the carrier is granted a license to operate a scheduled service London–Munich–Belgrade. This new opportunity brings need for new aircraft and in late March through June, the company purchases eight Vikings from **British European Airways Corporation (BEA)**.

Simultaneously, the well-used Auster J/1 Autocrats are also disposed of. Meanwhile, the DC-3s continue their charter flights, including the March–May airlift of refugees out of Berlin.

On June 6, weekly London–Belgrade via Munich scheduled Viking service begins, the first international scheduled passenger service by a British independent since before World War II. In order to further develop long-haul scheduled possibilities, owner Bamberg renames his company **Eagle Airways, Ltd.**, on July 1.

EAGLE AVIATION, LTD. (2): P.O. Box 93926, Old Port Reltz Road, Mombasa, Kenya; Phone 254 (11) 434 502; Fax 254 (11) 434 249; Code Y4; Year Founded 1986. Eagle Aviation is set up at Mombasa in the fourth quarter of 1986 to offer passenger and cargo flights to regional destinations and domestic communities, as well as big game parks. Shareholding is divided between Capt. Gilbert Kibe, Capt. Charles Muthama, Capt. Kiran Patel, and T. Raja; Kibe serves as chairman with Muthama as managing director. The partners pool their funds and purchase a single Piper PA-31-310 Navajo, which is employed, beginning on December 18, to operate daily charters to Amboseli and Maasai Mara. The services are successful and a second Navajo is added in December 1987.

A Britten-Norman BN-2 Islander is acquired in early 1988 to operate charters from Mombasa to Lamu Island, where an offshore resort is being developed. The new enterprise is a big hit with tourists and, thus, a larger de Havilland DHC-6-300 Twin Otter is also acquired. It will prove expensive to operate and puts heavy pressure on company's coffers.

Flights continue apace in 1989–1991. During the latter year, tragedy strikes when a midair bird strike causes the loss of a Navajo, together with its pilot and eight passengers.

Capt. Patel, the driving force behind the airline's founding, is now in charge and he locates a Fairchild SA26-T Merlin III in the Congo that could be leased as a replacement for the Piper. Unfortunately, the Merlin comes with bad engines, so poor that Patel takes the plane back to the lessor, Satair, which agrees to turn over another SA26-T Merlin III, in exchange for the Twin Otter. A deal is struck.

A scheduled division is formed during the spring of **1992** and a second Fairchild, an SA227-AC Metro III, is also acquired. The new unit begins scheduled revenue operations during the summer flying from Mombasa to Nairobi. In addition, charter operations are flown into Somalia on behalf of the United Nations.

Both aircraft are soon lost. The first, an SA26-T Merlin III, is lost at Wilson Airport, Nairobi, on October 1 when its nosegear collapses; no injuries are reported.

On October 25 the SA227-AC Metro III runs off the airstrip while landing at Mogadishu, Somalia; although none of the 10 aboard is injured, the aircraft must be written off.

With cash flow now a significant problem, the Nairobi office is closed down and the fleet is moved back to Mombasa, where the original charter business of flying to game parks and Lamu Island is resumed. Plans for rebuilding are put in place.

The company takes the marketing name International African Eagle in **1993-1994** and continues operations with four Let L-410As, the first of which is delivered under charter from Skoda in August 1994. The lease for the other Czech-made turboprops is secured via the trade of a Navajo.

The second Let arrives in December and destinations visited from Mombasa grow to include Kilimanjaro, Kisumu, Lamu, Malindi, Masai Mara, Nairobi, and Zanzibar.

The second and third Czech turboprops arrive in February and March **1995**, respectively. An office is reopened in Nairobi and scheduled service from Wilson Airport to Mombasa is resumed.

The fleet is increased in July with the addition of an Aero International (Regional) ATR42-320. A second is delivered in December.

Service continues apace in **1996** as the 115-employee company gathers strength for a new enterprise. Still, there is discord over the ATR decision and founders Muthama and Kibe resign to start their own airline in Uganda.

During the spring of **1997**, Eagle elects to challenge **Air Kenya Aviation, Ltd.** on its established Nairobi to Mombasa trunk line. With heavy promotion, Eagle undertakes daily services employing the Czech equipment, as well as its ATR42-320s. Air Kenya Aviation elects to fight back, employing a new de Havilland Canada DHC-7-102. At the end of the year, a code-sharing agreement is signed with **Kenya Airways, Ltd.**

The pact with the flag carrier begins in early **1998**. One ATR, operating under Kenya Airways' "KQ" flight code, offers increased frequencies to Malindi, Kisumu, and Eldoret from both Nairobi and Mombasa.

During the spring and summer, plans are discussed for the initiation of additional services to the domestic communities of Garissa, Lodwar, Rudolf, and Lamu Island. Discussions are also held with the government of Tanzania concerning the introduction of additional services to that nation once a new bilateral air agreement is signed. Flights would be started with the second Eagle ATR to Arusha from Nairobi and to Mwanza on Lake Victoria from Kisumu.

Under the code-sharing agreement with **Kenya Airways, Ltd.**, an Eagle ATR42-320 initiates new twice-daily nonstop Interlink roundtrips on May 1, **1999**, between Nairobi and Lokichoggio. Interlink services are expanded on June 1 with new flights from Nairobi to Malindi, Lamu, Kisumu, and Eldoret.

Beginning on June 19, the company operates its three ATR42-300s on Kenya Interlink services on behalf of **Kenya Airways, Ltd.** The flights end on June 30 when **Kenya Flamingo, Ltd.** takes over the country's domestic feeder routes.

At the request of its owners and loaning partner PTA Bank, in order to safeguard their own stake and debenture, the carrier is placed into receivership (bankruptcy) on October 24. PriceWaterhouseCoopers is appointed by PTA Bank to manage the airline's assets. Some analysts suggest that the move has been made to prevent several creditors from closing in on the carrier's assets, including its aircraft. **Kenya Airways, Ltd.** had earlier threatened to seize Eagle's 4 Let L410UVPs and 3 ATR42-320s due to unpaid maintenance invoices.

EAGLE AVIATION (U), LTD.: P.O. Box 7392, Kampala, Uganda; Phone 256 (41) 344292; Fax 256 (41) 344501; <http://www.eagleuganda.com>; Code EGU; Year Founded 1994. Three professional pilots established EA (U) at Entebbe International Airport, near the national capital, in June **1994**. Employing a fleet of 3 Let L-410UVPs, the new company launches charter flights throughout Uganda and into Kenya, Tanzania, Zaire, Rwanda, Burundi, Sudan, and Ethiopia.

The company is granted a scheduled operators license in August **1995** and, starting in September, offers a domestic schedule of services to Arua, Adjumani, Gulu, Moyo, Pakuba (outside Murchison Falls National Park), Kisoro, Kaese, Mwera (near Queen Elizabeth National Park), Mbarara, and Ishasha. Plans are drawn up for international scheduled services and applications are placed with regional governments.

The government of Tanzania in **1996** authorizes Eagle to launch scheduled thrice-weekly return service from Entebbe to Mwanza.

With the beginning of the Zaire civil war, which continues in **1997**, flights to that nation are halted. The new government of the Democratic Republic of the Congo grants Eagle authority to operate thrice-weekly roundtrips from Entebbe to Goma and Bunia; however, with the resumption of fighting, this new schedule is not implemented.

Application is made in early **1999** for membership in IATA. Simultaneously, a homepage is opened on the Internet's World Wide Web.

EAGLE CANYON AIRLINES: 275 East Tropicana, Suite 220, Las Vegas, Nevada 89109, United States; Phone (702) 736-3333; Fax (782) 895-7824; <http://www.gcanyon.com/eagle>; Code FE; Year Founded 1995. Eagle Air (2) and Lang Aire are combined at Las Vegas in the spring of **1995** when Gene Yamagata, CEO of Yamagata Holdings, elects to quit the big-jet charter business and concentrate on the Grand Canyon aerial sight-seeing and charter business of Larry Siggelkow's Lang Aire. Mr. Siggelkow is named president of the new Eagle Canyon Airlines and Eagle Jet Charter is established as a subsidiary to offer executive flights with a Learjet 25B.

Siggelkow's previous fleet of 11 Cessna 207As and 402Cs grows dramatically and comes to include 4 each de Havilland Canada DHC-6-100 Twin Otters and Convair CV-580s and 2 each DHC-6-200s, DHC-6-300s, and DHC-8-100s. During the year, one each Fokker F.27-600 and F.27-200 are added, the latter acquired from **Mesaba Airlines**. The Friendships are employed to inaugurate scheduled services between Las Vegas and Grand Canyon Airport.

Another Fokker F.27-200 is purchased from **Mesaba Airlines** at the beginning of **1996**. One of the F.27-200s, under Eagle Jet Charter titles, is posted at Atlantic City to fly gambling and sports charters from that New Jersey community on behalf of Caprel Services. East Coast markets visited include Hartford, Albany, Philadelphia, Richmond, Norfolk, Raleigh-Durham, and Pittsburgh.

On June 7, a joint marketing, ticketing, and baggage agreement is signed with **TriStar Airlines** at Los Angeles. The two will also code-share on connecting services from Los Angeles or San Francisco to the Grand Canyon; through passengers are allowed a Las Vegas stopover at no additional cost. Passenger boardings reach 156,391 by December 31.

A new livery, designed by Elliot Epstein, vice president-operations, is unveiled on January 12, **1997**. Early in February, two more F.27s, both Dash-500Fs, are acquired, with one assigned to Atlantic City to replace the East Coast unit that now returns to Las Vegas.

While standing at the Atlantic City International Airport ramp on April 1 preparatory to departure on a charter, the F.27-500F with 3 crew and 34 passengers is struck and substantially damaged by a driverless **Nations Air** maintenance van. One passenger receives minor injuries and the flight is cancelled.

In May, the company launches hourly shuttle flights between McCarran International Airport and Grand Canyon.

A third F.27-200 is purchased for spare parts during the summer as Eagle becomes the last U.S. passenger airline regularly flying the Fokker Friendship. Cliff Evarts becomes Eagle Canyon's CEO in the fall, with Grant Murray as president.

Customer bookings this year accelerate 29.5% at Eagle Canyon to 202,468. Enplanements at the Eagle Jet subsidiary climb to 31,520.

Flights continue in 1998. On August 27, in order to concentrate on its core business of providing regional airline service, **Skywest Airlines** sells most of the assets of its **Scenic Airlines** subsidiary to Eagle Canyon. In making the announcement, Skywest's executive vice president, Bradford R. Rich, notes that the Page, Arizona-based tour division will be retained. The sale includes all 18 of Scenic's Twin Otter Vistaliners and other assets that Eagle hopes to eventually integrate. Overall passenger boardings for the year decline by 15% to 172,000.

The workforce stands at 190 at the beginning of 1999. Amalgamation of Scenic and a planned name change to Eagle Scenic Airlines is not reflected on the company's Internet homepage by late July. Passenger boardings skyrocket 194.7% to 506,000.

EAGLE COMMUTER AIRLINES: United States (1976–1986). Formed by Gerald James and George Day at Brownwood, Texas, in the fall of 1976, ECA begins scheduled passenger service on December 1 as replacement for **Texas International Airlines** on a route to Dallas (DFW), Waco, Houston, Austin, San Antonio, San Angelo, Eastland, and Lufkin. Flights are undertaken with a pair of Piper PA-31-350 Navajo Chieftains. The Oklahoma city of McAlester joins the route network late in the decade, along with several Britten-Norman BN-2 Islanders.

A Navajo Chieftain is lost in an accident at Houston (HOU), on March 21, 1980.

Operations continue apace during the remainder of the early 1980s and, by 1985, enplanements are 4,830.

In January 1986, the FAA lifts the carrier's operating certificate for various maintenance regulation violations. All efforts to win it back fail.

EAGLE EUROPEAN AIRWAYS, LTD.: United Kingdom (1993–1994). Following its December 1992 purchase by new owners, **Merrix Air, Ltd.** is reformed at its Exeter Airport base in January 1993. General Manager Martin G. Wild and Managing Director Richard Merrin oversee a workforce of 6 and acquire a Piper PA-31-310 Navajo and an Embraer EMB-110 Bandeirante, the latter by lease from David Martin Worldwide, Ltd.

Scheduled service is inaugurated in February from the company's base to Manchester. The fleet grows by a second chartered Embraer EMB-110 Bandeirante in October when a route is stretched to Morlaix and the carrier adopts its present corporate identity.

Operations continue apace during 1994, although one of the Bandeirantes is replaced by a British Aerospace BAe Jetstream 31. Operations are suspended in July.

EAGLE HELICOPTERS: 5311 E. Rutter Ave., Spokane, Washington, 92212, United States; Phone (509) 534-1285; Fax (509) 533-0468; Year Founded 1980. Eagle Helicopters is established at Spokane in 1980 to provide helicopter work services to the surrounding area, eventually venturing throughout the Northwest from the Rocky Mountains to the Pacific coast. During its first 18 years, the concern engages in personnel charters, timber surveys, photographic and motion picture support work, long-line environmental drill support, long-line seismic magnetometer surveys, external loads (particularly the lifting of air conditioners onto roofs) and, under contract to the U.S. Forest Service, fire suppression and crew support.

By 2000, the company employs 3 full-time pilots and operates 2 each Eurocopter AS-350B A-Stars, SA-315B Lamas, and SA-316B Alouette IIIs.

EAS AIRLINES, LTD. See **EXECUTIVE AIRLINE SERVICES, LTD. (EAS)**

EAS CARGO AIRLINES, LTD.: Nigeria (1986–1992). EAS Cargo Airlines, Ltd. is set up at Lagos, Nigeria, in 1986, to offer freight charters to African and European destinations. Revenue operations commence with a single Boeing 707-351C first flown by **Northwest Airlines**.

Flights continue until January 1992 when the concern quits the all-cargo business in favor of the establishment of an executive jet charter service, **Executive Airline Services, Ltd. (EAS)**.

EAS EUROPE AIRLINES, S.A. See **EUROPE AERO SERVICES, S.A.**

EAST AFRICAN AIRWAYS CORPORATION (EAA): Kenya, Uganda, Tanganyika, Zanzibar (1946–1977). Under provisions of an October 30, 1945 East African Territories (Air Transport) Order in Council, EAA is incorporated on January 1, 1946 by the governments of Kenya, Uganda, Tanganyika, and Zanzibar. Initial capitalization is £50,000 and ownership is divided between the governments on a basis of 68%, 23%, 9%, and 0.7%, respectively. Sir Charles Lockhart is appointed chairman.

British Overseas Airways Corporation (BOAC) provides technical support under contract for six de Havilland DH 89A Dragon Rapides leased from the Ministry of Civil Aviation and continues to operate long-haul services from the capital cities. A total of 12 pilots are recruited and proving flights, begun late the previous year, are completed by the end of the first quarter.

Regional services are initiated on April 3 as the Dragon Rapides commence 21 weekly services. These include five-times-a-week roundtrips from Nairobi to Dar es Salaam via Mombasa, Tanga, and Zanzibar and from Dar es Salaam to Tanga via Zanzibar. Thrice-weekly services are from Dar es Salaam to Nairobi via Zanzibar, Tanga, and Mombasa. Twice-weekly services are from Nairobi to Dar es Salaam via Moshi, from Nairobi to Entebbe via Kisumu, and from Dar es Salaam to Lindi. Weekly services are from Nairobi to Kitale via Eldoret and from Dar es Salaam to Mbeya via Morogoro, Nduli, Southern Highlands, and Chunya.

A DH 89A is lost in an accident on June 28 under unknown circumstances, but is soon replaced by another unit.

At the request of the government of Tanganyika, the company undergoes reorganization beginning on September 1, on which day the company's fleet is grounded for a month. Sir Reginald Robbins becomes the second chairman on October 1, with Malin Sorsbie as general manager. A £34,200 order is placed for six more Dragon Rapides.

A total of 9,403 passengers are carried in this inaugural year, but a £25,483 operating loss is suffered.

As the new aircraft become available in 1947, additional routes and frequencies are introduced. BOAC is approached for newer and larger aircraft.

Bookings climb to 13,580 and the operating loss falls to £19,617.

On February 22, 1948, the carrier receives five Lockheed L-18 Lodestars and spare parts for them from **British Overseas Airways Corporation (BOAC)**; costing £30,000, the five are christened *Lake Victoria*, *Lake Nyasa*, *Lake Albert*, *Lake George*, and *Lake Edward*.

The U.S.-made Lockheeds are followed on February 27 by the delivery of four DH 104 Doves; costing £53,200, the quartet receives the names *Masai*, *Buganda*, *Chagga*, and *Swahili*. The heat and high altitude of East Africa will result in poor performance by these de Havillands.

The Lockheeds are placed into service over the Nairobi–Dar Es Salaam route on March 21 and the Doves on the Nairobi–Entebbe run on April 14. L-18 Nairobi–Lindi flights via Mombasa begin on April 13. During the summer and fall, a cooperative route into the Belgian Congo is operated with **Sabena Belgian World Airlines, S.A.** employing the Belgian line's L-18s.

Bookings reach 23,000 and the operating loss is reduced to £11,931.

Sir Alfred Vincent becomes the third chairman, on January 1, 1949 and capitalization is increased to £221,500. Following closure of the

Congo joint venture at the end of the second quarter due to low ridership, the three L-18s employed on that service are purchased by EAAC; only one is named, the *Lake Naivasha*.

The first Douglas DC-3 is delivered on October 25; christened *Kongwa Pioneer*, it is placed on charter service to Uranbo on November 5. Meanwhile, a coastal Nairobi–Durban DH 89A route is opened on November 2. The second DC-3, *Iringa Pioneer*, arrives in December.

Enplanements total 36,132 and a £5 operating profit is cheered.

The third DC-3, *Mbeya Pioneer*, is acquired in the spring of 1950. Weekly Nairobi–Salisbury DC-3 flights via Mbeya begin in August. A new route is also started between Nairobi and Durban via Dar es Salaam and Blantyre. The first Dove is withdrawn late in the year.

Bookings accelerate to 49,000.

Two Macchi MB-320s are placed in service in 1951, but being found unsuitable, they are quickly withdrawn, as are the last three DH-104s, two DH 89As, and three Lodestars; a fourth Lodestar is withdrawn for parts cannibalization. At the same time, arrangements are completed for the purchase of Lodestars from **South African Airways (Pty.), Ltd.** EAAC had originally requested four, but SAA will only provide the planes if the company takes seven. Consequently, the seven arrive during the remainder of the year and are christened *Mtwara Safari*, *Tanga Safari*, *Uganda Safari*, *Kenya Safari*, *Tanganyika Safari*, *Mombasa Safari*, and *Zanzibar Safari*. They will receive new engines over the next 12 months.

The Durban service ends and overall passenger boardings advance to 63,594.

On February 6, 1952, Queen Elizabeth II, on the day of her accession, begins her return to London aboard the DC-3 *Kongwa Pioneer* from Nanyuki to Entebbe; the aircraft is the first of any airline ever to carry a reigning British monarch.

L-18s are employed to transport Muslim pilgrims on Hadj flights to Mecca beginning in May; the charters are operated in cooperation with **Aden Airways, Ltd.** Hadj flights will be flown every spring hereafter. Plans are made to replace the Lodestars as six more DC-3s join the fleet under the names *Seyyid Said Bin Sultan*, *Lord Delamere*, *Sir John Kirke*, *J. Hanning Speke*, *Joseph Thomson*, and *Sagana II*.

The uprising of the local Mau Mau rebels leads the colonial government to declare a state of emergency on October 20.

Withdrawal of the Lodestars accelerates during the fourth quarter and enplanements for the year are 94,216.

Airline employment stands at 900 in 1953. An ultimately unsuccessful new route is inaugurated in January from Mombasa to Victoria, Seychelles. The final scheduled L-18 service is completed in February; thereafter, the Lodestars become freighters. When all-cargo flights are launched in September, among the most noteworthy is the transport of fresh milk daily from Mombasa to Dar es Salaam and the return of the empty cans.

The original DC-3s *Kongwa Pioneer*, *Iringa Pioneer*, and *Mbeya Pioneer* are sold and are replaced by four newer units, *David Livingstone*, *Sir Richard Burton*, *James A. Grant*, and *Alexander M. Mackay*. In addition, a Consolidated PB5-5A Catalina is also purchased. Although the flying boat will represent the company in the motion picture *Mogambo* (directed by John Ford and starring Clark Gable and Grace Kelly), it will be gone within a year, sold to the small operator **Seychelles-Kilimanjaro Air Transport, Ltd.**

Passenger bookings are up to 108,783.

During a state visit to Uganda, Queen Elizabeth II and Prince Philip fly to their April 29–30, 1954 appointments aboard an EAA DC-3. The regional route from Nairobi and Dar es Salaam to Durban via Blantyre, closed in 1951, is now reopened. The first DC-3 cargo flights begin during the fourth quarter.

Customer boardings this year advance to 131,431.

On May 18, 1955, a DC-3 with 4 crew and 16 passengers crashes into Mt. Kilimanjaro, Tanganyika; the wreck is found three days later and there are no survivors.

In December, Nairobi–Salisbury DC-3 service via Abercorn and Lusaka is inaugurated.

Passenger traffic is 151,507 for the year.

The fleet in 1956 includes 10 DC-3s and 4 DH 89As; a DC-3 is chartered from **South African Airways (Pty.), Ltd.** to replace the one lost the previous year. Arrangements are made to charter three Canadair DC-4M Argonauts (known in the U.K. as C-4s) from the British flag carrier. Weekly Dar es Salaam–Ndola and Entebbe DC-3 operations are launched in March.

Bookings this year are up to 169,446.

In early winter 1957, arrangements are made to acquire a pair of wet-leased Argonauts from **British Overseas Airways Corporation (BOAC)**. The first unit is delivered on March 4 and, employing a BOAC crew, begins Dar es Salaam to London flights via Entebbe, Khartoum, Benghazi, and Rome, on April 2, followed later in the month by service Nairobi to Durban service via Dar es Salaam.

A second and third C-4 Argonaut arrive on August 24 and September 2 and EAA crews take over the roundtrip BOAC London to Nairobi and Dar es Salaam Argonaut service on September 3. Nairobi to Bombay via Aden and Kuwait Argonaut service begins on September 15, the first Indian service to be flown directly from East Africa.

The British name Argonaut is dropped for the DC-4M, which reverts to that of its manufacturer when the three planes are purchased toward year's end. As the marketing department has it in its advertisements, customers are encouraged to "Fly the Canadair!"

Passenger boardings this year swell to 174,991.

Another C-4 Argonaut is received, under lease, in April 1958. DC-3s replace DH 89As on the routes to Soroti, Musoma, and Tororo. When Wilson Airport opens at Nairobi, all of the airline's engineering facilities are transferred to it.

In August, an order is placed for two DH 106 Comet 4s for 1960 delivery, and the fourth C-4 Argonaut is returned to BOAC.

All three of the remaining ex-BOAC aircraft are transferred to the South African route when a Bristol Britannia 102, also chartered from **British Overseas Airways Corporation (BOAC)**, begins Nairobi–London service on October 8. Later in the month, a second weekly service to Bombay via Aden and Karachi is initiated.

In November, authority is received from Great Britain for the inauguration of a single, weekly Canadair coach-class service to England, beginning in the new year.

Jet service to London begins on December 2 under a block-seat agreement with **British Overseas Airways Corporation (BOAC)**, which grants EAAC the right to purchase a set number of reserved seats on each roundtrip. Enplanements for the year drop to 158,841.

Low-cost Colonial Coach-class DC-4M Canadair service is introduced between Nairobi and London during the first week of January 1959.

On January 6, Canadair service starts from Nairobi to Johannesburg. The number of destinations visited now approach 40, although Mombasa's airport still requires improvement before it can be employed by the Canadairs. A second leased Argonaut enters service in February. Toward the end of the year, the carrier again confirms its order for two Comet 4s of its own.

Boardings drop again, down to 153,717.

A DC-3 is lost under unknown circumstances in a crash at Entebbe on January 12, 1960.

During July, a pair of DH-89As are removed from service and provided to a new subsidiary company, the reactivated **Seychelles-Kilimanjaro Air Transport, Ltd.** It begins to operate them over a route from Zanzibar to Pemba via Tanga and Dar es Salaam. The two Dragon Rapides are replaced with DC-3s, while the last two remaining DH-89As are sold out of service for £6,000.

The two owned Comet 4s are delivered during July and August, while a third is ordered.

As the situation in the Belgian Congo deteriorates, the company provides sufficient airlift to evacuate 1,500 Western citizens from danger.

Captained by Peter Henn, the Comet 4 VP-KPJ inaugurates London–Nairobi twice-weekly service via Rome on September 17; Nairobi–

Rome–London return flights commence on September 19. On September 22, London–Nairobi and Dar Es Salaam Comet 4 flights via Rome and Khartoum are inaugurated. The London–Nairobi Comet 4 route is extended to Johannesburg on October 8.

This year, in which EAAC becomes the first Commonwealth airline to operate the Comet 4, enplanements soar to 191,741.

Although resources are knowingly stretched thin in serving three widely separated points, Comet 4 Bombay flights via Karachi are launched on January 2, 1961. These are the first jet services across the Arabian Sea.

A fourth de Havilland jetliner is ordered in March. Service to London is flown via Benghazi beginning in April, with the stops at Khartoum and Rome withdrawn. Arusha to Mwanza flights commence in April and in October DC-3 charter flights commence to the coastal city of Malindi.

An agreement for pooled services with **Aden Airways, Ltd.** is signed during the fourth quarter.

Customer boardings this year are level.

The fleet in 1962 includes 9 DC-3s, 3 Comet 4s, and 3 owned and 2 leased DC-4M Canadairs.

Having purchased a set number of seats and cargo space, the company's Comets begin stopping at Aden in early January. The route between Nairobi and Aden is offered four times a week: once each by EAAC Comet and Canadair and twice by Aden's own C-4 Argonauts.

A Canadair C-4 Argonaut with three crew and on a training flight crashes while landing at Nairobi on April 11; there are no fatalities.

The third Comet 4 is delivered on April 12, replacing the weekly Canadair service to Karachi with a twice-weekly service to and beyond the Pakistani city.

Patrick A. Travers becomes general manager on May 1, the same day roundtrip frequencies to London are made daily.

During the third quarter, £1.15-million order is placed for three Fokker F.27-100s; soon thereafter, a fourth is requested as well.

The new passenger terminal at Wilson Airport, Nairobi, is dedicated in September.

The first three Fokker Friendships are delivered in October and November and are employed on route proving and training flights for the remainder of the year. Traffic figures are unavailable.

In early 1963, the F.27-100s are placed in service over the short-haul and regional routes, replacing DC-3s on several, including the service to Durban.

The last Canadair is retired by the end of the first quarter. During April, planning starts for a pooled service, with **Aden Airways, Ltd.** and **Air India, Ltd.**, from East Africa to India. Details are worked out and an agreement between the three companies is signed on August 14, taking effect on September 1.

Meanwhile, in early August, a general ban against **South African Airways (Pty.), Ltd.** flights throughout Africa is begun.

A DC-3 being prepared for a charter to Bechuanaland to pick up and return 28 refugees is burnt out at Francistown, Kenya, on August 29.

Weekly DC-7CF all-cargo service between Nairobi and London begins on October 4. EAAC halts its F.27-100 service to Durban and Comet 4 flights to Johannesburg on October 12. The next day, Paris becomes a stop on the service from Nairobi via Benghazi to London.

A fourth F.27-100 is delivered in January 1964.

Three Vickers Super VC10s are ordered in the spring. Twice-weekly F.27-100 service is inaugurated on April 1 to Bujumbura, Burundi, from Nairobi and Entebbe. On April 2, Nairobi and Entebbe to Frankfurt Comet 4 flights commence. Service to the underdeveloped airports at Mafia and Kilwa now ends.

Improved services to India become the goal of the May operational start of a pooling arrangement entered into the previous fall with **Air India, Ltd.** and **Aden Airways, Ltd.**

Comet 4 flights are started from Nairobi to Bombay via Addis Ababa and Karachi during August.

On October 6, 1,500 workers strike at Nairobi to protest the delays seen in the "Africanization" of the carrier's senior administrative posi-

tions. Also in October, twice-weekly Nairobi–Cairo and weekly Nairobi–Addis Ababa Comet 4 operations are inaugurated.

Chairman Sir Alfred Vincent retires in December.

Chief A. S. Fundikira becomes chairman on January 31, 1965; Wilson Kyobe is appointed general manager as the "Africanization" process begins. A working committee examines the legal foundation of the consortium carrier and BOAC is requested to withdraw its ownership stake, in exchange for a buyout of its contract.

The workforce totals 3,117 and the fleet stands at 3 Comet 4s, 6 DC-3s, 1 DH 104, and 4 F.27-100s, divided among the registries of Kenya, Uganda, and Tanzania.

On March 31, a £11 order is placed for three Vickers Super VC10s. A Comet 4 is leased from BOAC in October, while all of the aircraft receive a new livery.

Revenue passenger miles for the year total 351,224.

Direct Comet 4 service is inaugurated on February 9, 1966 from Nairobi to Blantyre. The jet service is in addition to that provided with F.27-100s and is laid on to replace the loss of service that occurs when **Central African Airways Corporation** stops flying into Nairobi. BOAC receives a £250,000 buyout check during the first quarter.

A pool agreement is signed with **Ethiopian Airlines, S.C.** in March; under its terms, EAAC operates twice-weekly shared Comet 4 service from Nairobi to Addis Ababa while Ethiopian flies thrice-weekly B-720-060B roundtrips from Addis Ababa to Nairobi.

Twice-weekly Comet 4 roundtrip frequencies between Nairobi and Ndola start in May.

The first Super VC10 is delivered in October, beginning service to London; the second Super VC10 arrives in December.

The Comet 4 leased from BOAC in 1966 is returned in March 1967. Also during the first quarter, de Havilland DHC-6-100 service is inaugurated, with a leased machine, to Tsavo National Park for tourists wishing to visit Kilaguni Lodge. Orders are placed for the Canadian-made turboprops.

Comet 4 flights to Mauritius starts in April, followed by May frequencies from Nairobi to Lagos and Accra. Meanwhile, the third Super VC10 arrives in April, at which point a firm order and an option are placed, respectively, for fourth and fifth units.

Service to Cairo is suspended following the Six-Day War in June.

The first owned Twin Otter is received in July, having been flown from Downsview, Ontario, to Nairobi by an EAAC crew. A Super VC10 completes a roundtrip Bombay to Hong Kong proving flight in September.

The Super VC10s displace the Comet 4s in November from their services to Europe and India; the Comet 4s are, however, retained for regional and charter operations. Kenya, Uganda, and Tanzania sign a Treaty for East African Cooperation on December 1. Among its clauses is a requirement that certain public corporations, including EAAC, have their constitutions rewritten and their boards reshaped.

The last DH 89A is withdrawn in early 1968, while the number of DC-3s is reduced to just six. The displaced capacity is made up through the delivery of three more Twin Otters. Service to Athens begins on April 3.

The previous year's proving flight having been deemed a success, Super VC10 roundtrips between Bombay and Hong Kong commence in November.

Another Super VC10 is delivered in April 1969. As a result, frequencies to Frankfurt, Hong Kong, Paris, and Rome are increased in number and new stops are made at Bangkok and Copenhagen.

Two former **Swissair, A.G.** DC-9-15s are leased from their manufacturer in November; however, the charter on the second is cancelled before its arrival.

A Comet 4 is leased for a quarter from **Dan Air/Dan Air Services, Ltd.** on January 9, 1970 as partial replacement for two owned EAAC Comet 4s removed due to corrosion.

Dan Air sends another Comet 4 to the company on February 22. The last of five VC10s, a Super VC10, joins the fleet on February 28, and is the last of the just 54 VC10s built.

On May 19, orders are placed for three DC-9-32s.

The two corroded Comet 4s are sold to **Dan Air/Dan Air Services, Ltd.**, while the Comet 4 leased from that British carrier is returned in December, just as DC-9 crew training of the British and Australian pilots is being completed.

A new maintenance organization to handle the Douglas transports is set up in Africa.

Weekly Super VC10 service is inaugurated to New York (JFK) from Nairobi on December 10. The company's first owned DC-9-32 arrives during the month, while yet another **Dan Air/Dan Air Services, Ltd.** Comet 4 is chartered on December 28.

Two more DC-9-32s are delivered in February 1971. On February 22, the Dan Air Comet 4 chartered in December is returned.

Flights to Rwanda must, however, be suspended on July 8 because of a crisis between Uganda and Tanzania.

The unduplicated route mileage stretches 40,000 miles and passenger enplanements grow to 564,229.

Having sustained a flat tire while on its takeoff roll from Addis Ababa for Rome and London on April 18, 1972, Flight 720, a VC10 with 11 crew and 96 passengers, unsuccessfully attempts to abort. The jetliner overruns the runway, drops to a lower ground level, breaks up and explodes in flame (43 dead).

On September 16, a group of men dressed in police uniforms burst into the control tower at Dar es Salaam and hold the staff hostage. Minutes later, an EAAC DC-9-32 departs without authority, manned by an unknown crew and the intruders slip away. The plane is found abandoned next morning on an airfield at the foot of Mount Kilimanjaro. Although the government of Tanzania investigates, no one ever learns why the Douglas has been stolen or by whom. The plane is repaired on the spot and returned to service.

Enplanements in 1973 total 536,000.

The employee population reaches 4,674 by 1974.

Two gunmen take over an F.27-100 with 35 passengers and en route from Nairobi to Malindi on March 20 and fly it to Uganda, en route to the U.S.S.R.; at Entebbe, Ugandan President Amin personally persuades the two to surrender.

Routes are extended during the year to Lourenco Marques, Kinshasa, Cairo, and the Seychelles. The stop at the Egyptian capital comes after a three-year suspension.

A Boeing B-747-148 is wet-leased from **Aer Lingus Irish Airlines, Ltd.** during the summer to fly weekly roundtrip holiday service from Nairobi to London and Frankfurt. As necessary, immigration formalities can be completed aboard.

Passenger boardings jump 17% to 651,045.

The workforce in 1975 is 4,586. Three DC-9-30s replace the Comets and VC10s. The Irish Jumbojet is once again hired to fly weekend holiday traffic to and from Europe.

Passenger bookings rise 8% to 708,435.

Increasing financial, political, and diplomatic difficulties plague the carrier's operations during 1976. The **Aer Lingus Irish Airlines, Ltd.** B-747-148 is once again chartered in December and is employed to operate holiday tourist flights from Nairobi to Frankfurt and London.

Kenya Airways, Ltd. is established on January 22, 1977 to replace EAAC, which, without a political and financial base, suddenly ceases trading during February.

There is an unofficial website maintained by Mark Olweny at <http://escher.arch.adelaide.edu.au/%7Emolweny/Uganda/ea.html> and another maintained by Tony Edlind at <http://home8.swipenet.se/~w-8rr81/index3.htm>.

EAST AFRICAN SAFARI AIR, LTD.: P.O. Box 28321, Nairobi, Kenya; Phone 501408; Fax 500169; <http://www.africansafariair.com>; Year Founded 1989. CHS Aviation, Ltd. is established at Nairobi's Wilson Airport in 1989 as an FBO and general aviation concern. Over the next four years, passenger and small group charters are also offered into, around, and out of Kenya under the name East African

Safari Air, coupled with scheduled services to the nation's national parks.

The company enters the inclusive tour charter (ITC) business in 1993 in cooperation with Tour Africa Safaris and **Air Europe, S.p.A.** Offices are opened in Mombasa and Zanzibar that help the company emphasize services into the Italian, and later, French markets. Flights from Nairobi to Italy are launched with a wet-leased Boeing 767-35HER from Air Europe.

Flights continue in 1994-1996, with the company also chartering an Airbus Industrie A310-300 and Douglas DC-10-30 for additional capacity. During the latter year, the company brings 25,564 tourists into Kenya and another 8,590 to Zanzibar (Tanzania).

Service is maintained in 1997-1999, during which years the A310 and Douglas are replaced with an A320-212. During the latter year, a homepage is opened on the Internet's World Wide Web.

EAST AND WEST SCHEDULED AIR TRANSPORT SOCIETY. See TOZAI TEIKI KOKU-KAI (TTKK)

EAST ANGLIAN FLYING SERVICES, LTD.: United Kingdom (1946-1962). RAF Squadron Leader R. J. "Jack" Jones purchases three de Havilland DH 80A Puss Moths and an Airspeed AS.5A Courier in January 1946. On August 16, EAFS is registered as a nonscheduled airline and Puss Moth joyrides are provided during the summer.

On January 5, 1947, Jones's concern becomes the first tenant at the new Southend Airport. In February, a new Miles M.57 Aerovan 4 is delivered, allowing the new carrier to undertake ad hoc charter flights on June 1. Destinations flown include southern Italy, Greece, and Cyprus. A Percival Proctor 1 and an Auster J/1 Autocrat are added in July.

When the Courier is retired at year's end, four DH 89As are purchased surplus from the RAF in January 1948. One of these is employed to launch charter flights, beginning on March 25, for summer vacationers and joyriders. In July, Jones is granted a **British European Airways Corporation (BEA)** associate agreement to fly a scheduled Southend-Rochester route.

In the spring of 1949, the carrier opens service Southend-Ostend via Lympe. On May 3, the Aerovan is destroyed in a Lympe crash. It is replaced by the July purchase of a Percival Proctor 4. Meanwhile, two DH 89As are sold in June.

Another **British European Airways Corporation (BEA)** associate agreement is obtained in 1950, allowing start-up of scheduled Southend-Jersey operations.

Financial disaster strikes the company in 1951, leading to 90% layoffs and the suspension of all scheduled flights. The Proctor 1 is sold in August. Although new scheduled services are authorized, the cash flow situation allows only charter and joyride services.

The company is reformed, somewhat, in early 1952. Airline employment is six (three pilots) and services are opened from Southend to Jersey and Ostend in the spring. The Autocrat is sold in October. At the end of the summer season, the workforce totals 13.

In January 1953, the carrier receives approval to open flights from Ipswich to Jersey via Southend, Rochester, and Shoreham, from Southend, Shoreham, and Jersey to Paris, and Shoreham to Dieppe. These and various charters require the addition of another Dragon Rapide in May. Additional new routes, authorized in October, are Ipswich-Calais via Southend, and Southend-Antwerp. In December, four Percival Proctor 4s are purchased from the RAF (they will not enter service).

Passenger boardings for the year are 6,512 and the payroll is increased by 12 employees.

In the spring of 1954 the company leases Ipswich Airport from the Ipswich Corporation, which had held it privately. Ipswich-Southend flights begin during the summer, connecting with the company's previous scheduled services. New frequencies are offered Portsmouth-Sandown and Shoreham-Le Touquet.

To provide additional capacity, three de Havilland DH 104 Dove1Bs are purchased from **West African Airways Corporation**, the first arriving in November.

Bookings for the year are even; however, the staff is increased to 30.

The second two Doves enter service in May 1955 and new routes are opened Shoreham–Isle of Wight and from Ipswich–Calais via Southend. On October 1, a new scheduled de Havilland DH 104 Dove 1B route is opened from Southend to Rotterdam.

During the first quarter of 1957, four more Dove 1Bs are added. In addition, the first of two Bristol 170 Mk. 21 Freighters to be delivered during the year is acquired in April. In October, a Dove 1B is sold and the lone Percival Proctor 4 is withdrawn.

Airline employment grows to 60 and enplanements total 30,000.

On January 15, 1958, a Dove 1B is lost in a crash at Dungeness. In March and May, two Vickers Vikings join the fleet. In addition to the normal cross-Channel operations, the company begins, on April 2, a coach air service from London to Paris, with the flight segment being Southend to Le Touquet.

Another Viking is purchased in January 1959, expanding capacity for the summer routes. A weekly Manchester–Ostend inclusive-tour is started on May 19. During July, a DH 89A is sold.

A Vickers 614 Viking 1, with 3 crew and 36 passengers, is wrecked in a bad landing at Southend Airport on July 28; there are no fatalities.

Three Douglas DC-3s join the fleet during the first half of 1960. They join the Vikings on regular services, as well as inclusive-tour flights to Ostend and Basel. In July, freighter charters are inaugurated to Belfast. In cooperation with Southdown Motor Services, coach-air service is started from London to the Channel Islands, with the flight portion beginning at Shoreham or Portsmouth. In June, a DH 89A and a Dove 1B are sold.

During the second quarter of 1961, three more DC-3s are delivered and are placed on the Channel Islands runs. In August, another Dove 1B is sold.

In mid-April 1962, a DC-4 is purchased from the former U.S. freight line **Riddle Airlines**.

On May 6, a DC-3 with 3 crew and 15 passengers crashes at St. Boniface Down on the Isle of Wight (12 dead). In May and June, two additional DC-3s are acquired.

On October 25, the carrier is officially renamed **Channel Airways, Ltd.**

EAST ASIA AIRLINES (PTY.), LTD.: 13th Floor, V. Huen Building, 138 Queens Rd., C, Hong Kong; Phone 2-8152789; Fax 2-8430342; <http://www.helihongkong.com/eaahome.htm>; Year Founded 1989. East Asia Airlines (Pty), Ltd. is established at Hong Kong by local entrepreneur Dr. Stanley Ho in the fall of 1989 to offer scheduled, roundtrip rotary-wing passenger and light cargo flights between Hong Kong and Macau. Majority ownership in the new entrant is held by Shun Tak Enterprises, which operates a jetfoil and ferry service to Macau, and is part of the STDM group of companies. Minority owners include Japan's Chiyoda Trading Company, Ltd. and **Royal Japan Airlines, Ltd.**, which contracts with Royal Koku to operate flights when they commence. Paul Wakeford is named CEO, with Kenichi Miyagawa as chief pilot. Route authority is requested of the territory's government.

In January 1990, it is learned that scheduled service to the Hong Kong heliport, located on the ferry-terminal building, will not be possible because local authorities choose not to license the heliport for such flights. Charter frequencies to the heliport are, however, approved. In March, the Hong Kong government reverses itself and approves use of the heliport on the ferry terminal for scheduled flights. Plans are made, but later delayed, to launch service in June employing a Bell 222 acquired from **Royal Japan Airlines, Ltd.**

Following a traditional Chinese ribbon-cutting ceremony on November 21 on the eve of a traditional Macao festival, six-times-per-day roundtrip revenue flights commence across the mouth of the Pearl River Delta employing a pair of Bell 222s, the first ever aircraft registered in Macau. The price of a ticket for the 18 min., one-way flight from the downtown business district of Hong Kong to the Macau Marine Terminal is HK\$100.

A third Bell 222 is acquired in the spring of 1991.

Flights continue as before in 1992–1993. The relatively expensive tickets continue to be purchased as those who employ them usually are seeking entertainment at Macau's most popular tourist attraction, its gambling casinos.

In September 1994, in order to take advantage of the traveling patterns of Macau's gamblers, the company changes its schedule. The number of frequencies is increased to one per hour during daylight.

The helicopter line continues to provide its shuttle service between Hong Kong and Macau in 1995, placing orders for three Sikorsky S-76C+s to eventually replace its Bell 222s. In November, business and general aviation aircraft are banned from Hong Kong's Kai Tak Airport, being forced to land at Macau. As a result, the carrier's helicopters increase the number of charters from that destination to downtown Hong Kong and back.

In May 1996, the Hong Kong to Macau shuttle frequency becomes every-half-hour and night flights are added. Enplanements this year reach 40,000.

In 1997, 28 daily roundtrips are flown between the downtown business district of Hong Kong and Macau's Marine Terminal.

On July 1, the British colony of Hong Kong is turned over to the People's Republic of China. The three new S-76C+s arrive in October, decked out in new livery.

The workforce at year's end totals 80 and enplanements for the year again exceed 40,000.

The company continues to expand in 1998 and by year's end, EAA is the largest helicopter company in the Pearl River Delta region.

Airline employment at the beginning of 1999 stands at 110. Early in the year, the company is taken over by Hong Kong-based **Heli Hong Kong, Ltd.**, which operates the senior carrier as an affiliate and acquires one of its three S-76C+s.

A total of 110 workers are employed at the beginning of 2000. The company remains the largest helicopter operator in the Pearl River Delta region.

EAST COAST AIRWAYS, LTD.: New Zealand (1935–1938). Formed to save travelers a 100-mile drive around Hawkes Bay, East Coast Airways, Ltd. is founded at the North Island town of Gisborne in the early spring of 1935. Equipped with two de Havilland DH 84 Dragons christened *Huia* and *Tui*, the company begins twice-daily return flights to Napier on April 16.

Following completion of a railway between the two destinations in 1936, the carrier transfers its southern terminus to Palmerston North, connecting there with **Union Airways of New Zealand, Ltd.**

Service is maintained in 1937 and on January 11, 1938, the twice-weekly Gisborne–Napier–Palmerston North frequency to Wanganui. On July 1, the company is taken over by **Union Airways, Ltd.**

EAST COAST AVIATION SERVICES. See **EXECUTIVE AIRLINES (4)**

EAST COAST COMMUTER: United States (1963–1970). ECC is set up at Cambridge, Maryland, in the fall of 1963 to operate scheduled passenger and cargo services as a subsidiary of East Coast Air Taxi, Inc. Employing a Cessna 310, the commuter inaugurates daily roundtrips on November 12, linking its base with Baltimore, Washington, Salisbury, Wallops Station, and Ocean City.

Operations continue apace during the remainder of the decade and the fleet is enhanced by the addition of several additional Cessna 310s and a Cessna 402. Operations cease in 1970.

EAST COAST COMMUTER AIRLINES (PTY.), LTD.: Australia (1980–1986). In early 1980, two small regional airlines, **Air Eastland (Pty.), Ltd.** and **New England Airways (Pty.), Ltd.** are merged at Tamworth to form this new entrant. **FAST Airlines, Ltd.** is absorbed in July. The large regional carrier **East-West Airlines (Pty.), Ltd.** holds 26%

shareholding. The initial fleet comprises 1 Britten-Norman BN-2A Trislander, 4 Cessna 404s, 2 Cessna 402s, 1 Piper PA-31-350 Navajo Chieftain, 1 Britten-Norman BN-2 Islander, 2 Piper PA-23 Aztecs, 1 Piper PA-30 Twin Comanche, 2 Cessna 210s, and 2 Cessna 150s.

Scheduled passenger services are undertaken to a variety of destinations in New South Wales, Queensland, and southeastern Australia. The carrier shares 10 east to west services per week to Bathurst, Orange, Parkes, and Cowra in New South Wales.

Over the next three years, the company upgrades its fleet by adding three Embraer EMB-110P1 Bandeirantes and another Cessna 404. Additional destinations visited include Albury, Armidale, Bathurst, Coffs Harbour, Cootamundra, Cowra, Grafton, Lismore, Maitland, Newcastle, Port Macquarie, Sydney, Tamworth, Taree, Temora, West Wyalong, and Young in New South Wales; Brisbane and Coolangatta in Queensland; and Canberra in the Australian Capital Territory.

In 1986, Managing Director John C. Roworth's company is renamed **Eastern Australia Airlines (Pty.), Ltd.**

EAST COAST FLIGHT SERVICES: 9415 Jet Lane, Unit 5, Easton, Maryland 21601, United States; Phone (410) 820-6633; Fax (410) 820-7568; Year Founded 1990. East Coast Flight Services is established at Easton-Newman Field in Maryland during 1990 to operate executive and small group passenger charters to Baltimore (BWI), Washington, D.C. (IAD), Philadelphia, and New York (JFK).

By 2000, the company employs 14 pilots and operates 2 Dassault Falcon 10s and 1 each Falcon 20, Cessna 500 Citation I, C-550 Citation II, Beech Super King Air 200, and Piper PA-31-350 Navajo Chieftain.

EAST COAST FLYING SERVICE: United States (1965–1966). ECFS is set up at Jacksonville, Florida, during the late spring of 1965 to provide scheduled air taxi services to local intrastate destinations. Employing a Beech 18, the carrier inaugurates daily frequencies on June 25, but these cannot be maintained a year.

EAST HAMPTON AIRE: United States (1978–1991). Organized at East Hampton Airport at Wainscott, New York, in the spring of 1978, Frank Lavigna's small intrastate is equipped with a Piper PA-31-350 Navajo Chieftain and a PA-31-310 Navajo. These are employed to inaugurate daily roundtrip scheduled passenger services in July linking his base with Montauk Point and New York City (LGA).

Over the next eight years, service is initiated to Boston and the Connecticut town of New London. The fleet grows to include two Navajos and a Beech 99. The company adds a second Beech 99 in 1986 and carries a total of 16,000 passengers in 1987.

In early 1988, the company is briefly shut down by the FAA for maintenance violations of the FAR code. These are cleared up by midyear, allowing the privately owned carrier, which has now transferred to Westover Airport, in Springfield, Massachusetts, to resume flying scheduled services down to New York (LGA) via Hartford, Connecticut, with a single Beech 99. Additional Beech 99s and a Beech 1900 are acquired later in the year.

In mid-November, two of the Beech 99s and the Beech 1900 are wet-leased to **Mall Airways**. Traffic and financial figures are held in confidence.

In 1989, the carrier begins flying from Wilmington, Delaware, to Parkersburg, West Virginia. Ten peak-hour landing slots at New York (LGA) are sold in July to **Business Express** for an undisclosed sum. In September, when **Mall Airways** is acquired by **Business Express**, EHA's leased aircraft are returned.

In late spring 1990, an arrangement is made with **Continental Airlines** to purchase the route previously flown by **Britt Airways** from Springfield, Illinois, to Chicago (Meigs Field). EHA begins "Continental Express" service over that route on June 1. Late in the year, the regional is put up for sale.

The airline is again grounded by the FAA in January 1991, as it is charged with operating unsafe aircraft and inappropriate maintenance

records. The action leads to cancellation of East Hampton's "Continental Express" agreement. In July, the company files for Chapter XI bankruptcy. It cannot reorganize and does not emerge.

EAST HAMPTON AIRLINES: East Hampton Airport, Wainscott, New York 11975, United States; Phone (516) 537-3737; Fax (516) 537-3755; Year Founded 1993. Set up as the FBO at East Hampton Airport, Wainscott, New York, in 1993, East Hampton Airlines also operates a regional charter division under the direction of Audra Helstowski. Operations commence and continue with one each Beech Super King Air 200, a Beech 36 Bonanza, and a Piper PA-31-350 Navajo Chieftain.

Flights continue during the remainder of the decade, during which years a second Chieftain enters service.

EAST LINE AIRLINES: No. 5, Prospect 5/K12, Moscow Zone, 142045, Russia; Phone 7 (095) 427 2852; Fax 7 (095) 427 8311; <http://www.eastline.ru>; Code P7; Year Founded 1997. The aviation component of East Line Group, a large Moscow corporation that also operates Domodedovo Airport, **East Line Aviation**, is renamed in 1997. Amiran Kurtanidze remains director general and his concern continues to offer international passenger and cargo charter flights, plus domestic and regional scheduled services. Meanwhile, East Line Group continues to service the majority of imported cargo coming into Moscow by air from China, Turkey, and the United Arab Emirates.

Over the remainder of the decade, scheduled all-cargo services are flown to Belgium, China, Greece, India, Italy, Korea, Pakistan, and the United Arab Emirates. Scheduled passenger frequencies from Domodedovo Airport are operated to Irkutsk, Novosibirsk, Shenyang, Ust-Ilimsk, and Volgograd.

During these years, all of the Il-86s are withdrawn and the fleet is revamped to include 4 Antonov An-12s, 2 An-74s, 1 Il-62M, 8 Il-76Ms, 17 Il-76T/TDs, 5 Tupolev Tu-154Bs, 2 Tu-154Ms, and 1 Yakovlev Yak-42 that is employed to offer scheduled return flights to Germany.

During 1998, East Line gives consideration to the acquisition of several McDonnell Douglas DC-10-30Fs for its freight network and one or more Airbus Industrie A310-300s for its passenger services. High rental fees and heavy import taxes make the idea unappealing and the possibility dims as a result of the Russian currency crisis that begins in August.

By the beginning of 1999, East Line Airlines is the largest Russian cargo carrier, being responsible for nearly 50% of Russian freight flights made into China. Overall, over 200 routes are operated in Russia, the CIS, the Far East, China, and Western Europe. Sixty more will be added during the year.

During the spring, the carrier enters negotiation with Ilyushin regarding possible joint funding for the installation of Perm Motors PS-90A76 engines on its fleet of Il-76T/TDs. These would replace the old fuel-hungry Soloviev D-30KPs employed. East Line also begins negotiations for the acquisition of a stretched civil derivative of the Il-76MF military transport. Known as the Il-76TF, the aircraft would offer 15 tons more cargo space, but offer an hourly fuel burn 2.5 tons less than that of an Il-76T. Indeed, Ilyushin has nearly completed the construction of three stretched Il-76TFs, but requires additional money to bring this project to a point of commercial viability.

East Line also expresses interest in the development of a special cargo version of the Il-96-300 passenger plane. If built, this upgraded freighter, also powered with Perm PS-90A76 engines, would be capable of flying upwards of 70 tons of cargo. The company's interest in the project wanes after cost estimates are run for the project. Safety concerns over fuselage strength following the insertion of a cargo door are also considerations. Some possibility of acquiring the Il-96-300 as a replacement for Il-62M long-haul passenger aircraft continues.

Regularly scheduled An-74 freighter flights to Germany commence on April 16. Director General Amiran Kurtanidze informs a news conference in early July that plans are being made to open overseas offices in and eventually begin flights to India, Italy, and the U.S.

During early September, two special cargo flights are made from Luxembourg to Beijing transporting 30 tons of special lighting equipment designed for the 50th anniversary of the People's Republic of China.

On September 30, the UN charters an Il-76, which transports a 16-ton generator from Milhaus, France, to Amman, Jordan. From there it will be shipped to Baghdad to provide running water for the Iraqi capital. This is the first major outsized cargo ever handled by the airline.

On October 4, telecommunications equipment is shipped from Stockholm to Khabarovsk. Eight days later, the carrier delivers a 12-ton satellite dish from Moscow to Baku.

It is reported in November that, through the first nine months of the year, East Line has transported 37,000 passengers, as well as freight.

Beginning on December 20, the FSVT, Russia's aviation authority, undertakes a major crackdown on cargo overloading. The move follows revelations by East Line concerning overloading problems in China.

Freight traffic during the year climbs 30% to 280.6 million FTKs. In a combined total of nearly two thousand flights, a total of 80,000 tons of cargo are flown on chartered aircraft and another 60,000 aboard the carrier's own aircraft.

A total of 260 routes are operated at the beginning of 2000. The 42-unit all-Russian fleet includes 21 Il-76T/TD and a mix of An-12 and An-74 dedicated freighters, Mi-8 helicopters, and Il-86, Il-62M, Tu-154, Yak-42D, and Yak-40 passenger planes.

On February 19, in an effort to hedge its bets again rising fuel prices, the carrier agrees on an exclusive arrangement with the Tyumen Oil Company. The same day, East Line introduces the first Russian Internet on-line ticket booking.

The company considers its cargo and passenger fleet plans and pointedly rejects, on February 25, the possibility of upgrading its complement with Boeing or Airbus equipment. Director General Kurtanidze is particularly pleased with his decision having observed the heavy losses sustained by **Transaero Airlines**, which had been forced to return its DC-10s to their lessors at the end of 1998. For Western charter passenger flights, the company will continue, at least for the present, to employ non-Stage 3 noise compliant Il-62Ms and Tu-154s, gradually replacing them after April 2001 with hush-kitted Yak-42Ds. The Yaks will continue to fly scheduled services in Europe as the company, without hush-kitted Il-62Ms, is now forced to abandon a plan to fly from Moscow to New York (JFK).

An agreement concerning the construction and acquisition of the enhanced Il-76TF is concluded between East Line, Ilyushin, the leasing company Uzavializing, and TAPO factory, which will manufacture the aircraft. The first flight of an Il-76TF is expected before the end of 2001.

Remarking upon the previous year's operations, company officials reveal on February 29 that East Line had transported 25% of all Russian air freight.

With the beginning of the summer schedule at the end of March, new Yak-42D scheduled passenger routes are opened to Stuttgart and Nuremberg in Germany and Dubrovnik, Croatia. Additionally, Yak-42D frequencies are tripled on the current service to Cologne.

Weekly Il-76 freighter service is inaugurated on April 20 from Moscow to Stuttgart. At the end of April, Il-76 cargo service is inaugurated from Moscow to Tyantsin, Shitsyachzhuan, and Khokhkot. With the company already flying to Shenyang from Moscow, Khabarovsk, Novosibirsk, and Irkutsk, the new routes give East Line a total of seven Chinese routes. These complement cargo service to points in Russia, Turkey, and the United Arab Emirates.

The carrier signs a joint agreement with **Uzbekistan Airways** and the Chkalov Aircraft Company (TAPOiCH) on May 17 for the joint lease of two new Ilyushin Il-76TFs, the first of which will be delivered in the spring of 2001. East Line will be the first operator of this modernized version of the Ilyushin freighter.

In cooperation with **Uzbekistan Airways**, joint services are launched from Domodedovo Airport on May 25. On May 31, the company leases the entire Il-76 fleet of **Domodedovo Airlines**.

Beginning on June 3 and continuing through September 23, twice-monthly Tu-154M return charters are operated from Moscow to Naples

via Dubrovnik, Croatia. East Line Chairman Dmitry Kamenshchik informs a news conference at Moscow on June 21 that he expects that the paperwork will be completed by the end of the year for the establishment of a joint-venture airline in China. Although the final choice of a partner has not yet been made, it will most likely be **Air China International Corporation**.

By the start of July, East Line Airlines is operating 250 cargo flights from Russia to China monthly.

Veteran Il-76 commander Capt. Alexander A. Tsykov is named a "Distinguished Pilot of the Russian Federation" on the Air Fleet Day honors list signed by President Vladimir Putin on August 28.

A new weekly Il-76TD return cargo run is initiated on from Khabarovsk to Harbin, China, on September 1.

Masked domestic security officers raid the company's Domodedovo Airport offices on the morning of September 19, taking away documents and computers and sealing its cargo warehouse. The federal police also visit the other companies making up the East Line Group. The searches, which are said to be necessary to determine if contraband has been brought in from China, bring the freight portion of the airline's freight business to a standstill, but does not affect its passenger flights. Director General Kurtanidze quickly informs the press that his airline has never carried contraband and that this entire episode is a mistake that will, hopefully, soon be cleared up.

On September 26, Director General Kurtanidze appeals to various Russian aeronautical trade organizations for support in defending its interests and reputation in light of the raids. The carrier's cargo customers, unable to collect their goods from East Line warehouses or ship on the company's Il-76Ts, are now turning to **Aeroflot Russian International Airlines (ARIA)** and several Chinese carriers for transport of their freight. On September 29, the security agency formally accuses East Line of smuggling contraband consumer goods from China, noting that, in May, a leased Il-76 had been caught at Irkutsk with 22 tons more cargo than had been reported on customs documents. Director General Kurtanidze notes that the incident, which occurred after one of its freighters had made an emergency landing in the Siberian city, was acknowledged at the time, but that civil aviation officials had closed the case finding no wrongdoing. In rebuttal, the security agency reports that it had decided to file charges after the raid when it was learned that two of the airline's Ilyushins had been abandoned en route from China at airports in Siberia and central Russia. Inspections of the derelict aircraft have allegedly uncovered a total of 29 tons of illegal cargo.

The most flagrant case is reported to have occurred late on September 19, the same day as the security officers' visit to East Line's Moscow facility. An Il-76T en route from Shangyang to Moscow is diverted to Nizhni Novgorod by ATC at Domodedovo Airport. Upon landing, customs agents seize the aircraft, determined to weigh its cargo. They allow its crew to lock it up and take the keys with them to a local hotel for the night.

The next day, the crew has disappeared and the aircraft keys are gone with them. The delay, purposeful or not, allows East Line to fax the security agency, reporting that their Chinese customer had overloaded the aircraft and indicating that the customs declaration, when compared with the cargo weight, will be found to be in error. The crew returns to Nizhni Novgorod without the keys on September 25; an all-day search turns them up on the morning of September 26. While security agents question the captain, the plane is weighed and found to have 47 tons of cargo rather than the declared 36 tons. Meanwhile, the security agency learns that the declared customer for the shipment is fictitious. The cargo is off-loaded and held and the plane and crew are allowed to return to Moscow on September 27; the government deepens its investigation. The entire "mistake," as Director General Kurtanidze characterizes the matter, is now costing the airline significant lost revenue. On October 5, it is reported that only 60 of 112 scheduled flights to China in September were completed, while planned flights to Turkey during the same month were down from 30 to 15 and to Germany from 12 to 6. Overall tonnage carried during September plunges from 75,000 (the figure for

the same period a year earlier) to only 40,000. When the case is heard in a court at Lefortovo, the security agency's action is upheld.

Extremely bad weather forces delays in takeoffs from Moscow on November 3 for destinations in Germany and Kazakhstan.

On November 14, the Moscow City Court quashes the earlier judgement of a Lefortovo Court, which had declared the security agency's raids on East Line offices in September legal. The Moscow court agrees to rehear the case and render an option within two or three months. Meanwhile, East Line is allowed to resume its cargo activities.

Renovated at a cost of \$90 million over two years, the new East Line Group terminal at Domodedovo Airport is opened in December 8 ceremonies. No foreign airlines have yet agreed to move to the facility.

Regular operations resume on December 23. Beginning on December 25 and continuing through January 31, a Tu-154M operates return Saturday charters from Moscow to Salzburg.

East Line transports 140,107 passengers during the 12 months, as compared to 48,162 for the same period a year earlier. It has also increased the amount of FTKs flown on behalf of the UN, a major customer, by over 30% since January. Over 30 Il-76 humanitarian missions have been operated to Sierra Leone, North Korea, Indonesia, Yugoslavia, and in support of the East Timor effort, to Australia.

Despite the continuing security probe, which has so far cost the airline an estimated \$10 million, East Line remains the nation's largest dedicated all-cargo carrier. As the year ends, plans are in place to enhance cargo operations linking Europe (particularly Luxembourg and Finland) with Asia (especially Northern China and Korea). Flights to Asia will increasingly carry communications equipment while those to Europe will convey textile products. Scheduled passenger services will be started to five additional destinations in Europe, two in Kazakhstan, and one in Kirgizstan. Regular Il-86 roundtrips between Moscow and Dubai are also anticipated.

The Moscow government reports in February 2001 that the total number of Russian air carriers has fallen from 328 in January 2000 to a current 294. It also reveals that East Line Airlines, **Atlant Soyuz Airlines**, **Volga-Dnepr Airlines**, and **Aeroflot Russian International Airlines (ARIA)** have, between them, carried half of all Russian air freight traffic in 2000. The East Line share is 20%.

EAST LINE AVIATION: Russia (1995–1997). East Line is set up at Moscow's Domodedovo Airport in the fall of 1995 as the aviation component of a large corporation. Employing a fleet of 3 Ilyushin Il-86s, 5 Il-76Ms, and 2 Antonov An-12s, Director General Amiran Kurtanidze's concern begins international passenger and charter flights, plus domestic and regional scheduled services, on November 27. In 1997, the company is renamed **East Line Airlines**.

EASTWEST AIRLINES (PTY.), LTD.: Australia (1947–1994). John Rentell forms this small carrier at Tamworth, New South Wales early in 1947 to provide Grafton–Moree services; the lone Avro Anson owned inaugurates thrice-weekly Tamworth–Sydney flights on June 23—in an almost north to south direction. The company's second pilot is Archie J. Smith.

Frequency on the Sydney route becomes daily in 1948 as a weekly frequency is extended to Brisbane with a second Anson. In 1949, orders are placed for two Lockheed L-14s and the Hudsons enter service in 1950. During the latter year, Capt. Smith both becomes chief pilot and general manager.

During 1951–1952, New South Wales routes and schedules are developed so as not to interfere with those of rival **Butler Air Transport (Pty.), Ltd.** On February 29 of the latter year, the equipment of bankrupt **Curtis-Madsen Airlines (Pty.), Ltd.** is purchased.

DC-3s join the fleet in 1953. **South Coast Airways (Pty.), Ltd.** is purchased and merged and its Sydney–West Wyalong route is added to its new owner's network.

The last Anson is retired in 1955 followed by withdrawal of the final L-14 in 1956. Tasworth–Sydney service is inaugurated on August 26,

1959 with the F.27-100 *City of Tasworth*, leased from **Trans-Australia Airlines (Pty.), Ltd. (TAA)**; the Fokker is also employed on a new Grafton route beginning on September 22.

The *City of Tasworth* starts Armidale–Grafton flights on February 14, 1960. Later in the year, General Manager Smith retires. His recollections will be published nearly three decades later in *East West Eagles: The Story of East West Airlines, Australia's Decentralized Airline—The Turbulent Years, 1946–1961* (Cairns: Robert Brown & Assoc., 1989).

The fleet in 1961 comprises one F.27-100 and four DC-3s.

By 1963, enplanements have reached 129,782. Revenues total A\$1,902,100.

Airline employment in 1964 is 199.

A newly completed airport at Albury facilitates a Sydney–Albury route, which services 3,033 passengers in just its first 6½ months. A second F.27-100 is placed in service.

Passenger boardings increase 15.9% to 154,319 and the one millionth passenger (cumulative) is carried during the year; additionally, 25 tons of newspapers are delivered from Sydney to route stops. On revenues of A\$2.3 million (the highest in company history to date), an A\$84,100 net profit is realized.

The employee population grows to 274 in 1965. The fleet now includes 2 F.27-100s and 4 DC-3s with 2 more Fokkers on order. Despite drought conditions in New South Wales, passenger boardings grow 5% to 167,137.

The workforce in 1966 is 293. The carrier's new administration building is completed and another F.27 is placed in service. A total of 191,000 passengers are carried.

Airline employment in 1967 stands at 311. One more Fokker and a de Havilland Canada DHC-6 join the fleet, allowing all remaining DC-3s to be retired.

Bookings increase to 213,356.

The employee population in 1968 is 327. Enplanements climb to 218,313 and revenues of A\$4.1 million are earned.

In 1969, the workforce is increased 11.1% to 380. The fleet now includes 5 Fokker F.27-100s, 3 DC-3s, and 1 Twin Otter. Freight traffic rises 0.4% while passenger boardings jump 11% to 282,725.

In 1970, 338 employees service 249,081 travelers. Enplanements in 1971 rise to 307,248.

Fourteen employees are added in 1972, together with a Fokker F.27-200, which replaces the last three DC-3s. Cargo grows 2.9% and passenger boardings accelerate 11.2% to 346,220.

Services are inaugurated in 1973 between Sydney and Alice Springs (the world's longest F.27 route) and to Maroochydora and Hobart.

In April, the Adastra group of companies, which are engaged in aerial survey and resource exploration work, is purchased. One additional F.27-200 is acquired to help handle the increase in passenger traffic, which is up by 18.6% to 411,000.

The workforce is now 451.

Five new employees are added in 1974, bringing the total to 456.

While on final approach to Bathurst, Australia, on May 31, an F.27-100, with four crew and 30 passengers, is caught by a downdraft and crashes near Runway 35; there are no fatalities.

With an all-F.27 fleet that numbers seven aircraft, the carrier's passenger boardings increase 14% to 437,000, but freight dips 2% to 657,000 FTKs.

Only two new employees are hired in 1975.

The Sydney–Alice Springs and Maroochydora routes are further developed and inclusive-tour charters are offered for the first time from Sydney to Launceston, Tasmania.

Freight is up 1.9% and passenger bookings advance 0.5% to 470,000.

Employment in 1976 drops 7% to 450, passenger boardings drop 7.2% to 434,000, freight declines 3.8%, and Chairman Donald Shand dies. Late in the year, two F.27-500Rs are delivered and the six-millionth passenger (cumulative) is transported.

In January 1977, George Harrison becomes chairman and John G. Riley is named managing director.

A Sydney–Norfolk Island service, taken over from **Qantas Airways (Pty.), Ltd.**, is inaugurated by the new F.27-500Rs on March 1.

Traffic rises to 455,215 passengers and revenues total A\$18.02 million while the net profit is A\$827,000.

The workforce in **1978** is increased 12.7% to 507. In August, a Sydney–Oakey service is begun.

Cargo soars 31.5% and passenger boardings swell 9.5% to 502,583. Revenues are A\$24.8 million, expenses are A\$23.5 million, the operating profit is A\$1.3 million, and the net income is A\$1.17 million.

The world financial situation and the cost of fuel leads to three years of decline; bookings in **1980** are 466,000 and 465,432 in **1981**. As late as November of the latter year, the carrier remains an unlisted public company with 780 individual shareholders. Chairman/Managing Director Riley's fleet comprises 9 Fokker Friendships.

The employee population in **1982** drops 0.6% to 546. Six new F.27-500s replace six older models. Orders are placed for four F.28-4000s. Majority shareholding in the carrier is acquired by East-West Developments (Pty.), Ltd.; P. D. A. Wright becomes chairman and C. B. Grey becomes the managing director. A new green and gold livery and a logo comprising a stylized map of Australia are introduced, together with several new routes out of Melbourne.

Passenger boardings grow 1.6% to 473,198, but cargo falls a dramatic 12% to 610,000 FTKs.

Airline employment jumps 15.4% in **1983** to 630.

The carrier enters the jet age on April 15 with the delivery of the first of two F.28-4000s to be added during the year, the second arriving in December. New service is inaugurated Brisbane to Norfolk Island and Sydney to Alice Springs, Port Medland, and Karratha.

In December, owner Bryan Grey sells his airline, at a significant, if undisclosed, profit to Cloverdale-based **Skywest Airlines (Pty.), Ltd.**, a growing Western Australian regional, which had taken over two other airlines in the past year. East West is allowed to maintain its separate identity.

Passenger boardings soar 23.9% on the year to 580,706 and freight is up 2.7% to 774,000 FTKs. An operating profit of A\$108,000 is reported on revenues of A\$42.8 million.

Two additional F.28-4000s join the fleet in **1984** and service is extended to additional stops giving a route network now covering every state in Australia.

Operations continue apace in **1985–1986** with a fleet of 6 F.28s and 7 F.27s.

TNT and News, Ltd., which also owns **Ansett Airlines of Australia (Pty.), Ltd.**, purchases the carrier in July **1987** and renames it **Eastwest Airlines (Pty.), Ltd.** It begins to reorganize its route structure in accordance with a route divestiture ordered by the government's Trade Practices Commission. Alec Shand is named chairman, with Neil Berkett as general manager.

Orders are placed for six additional F.28-4000s. The major's new affiliate will offer no further traffic or financial figures.

The new Ansett subsidiary receives its Fokkers in **1988** and undertakes services on the reconstruction holiday-destination route network. Beginning in July, the five destinations of Inverell, Glen Innes, Taree, Grafton, and Kempsey are turned over to **Eastern Australian Airlines (Pty.), Ltd.** Simultaneously, North American marketing responsibilities are assumed by Ansett Airlines of Australia, Ltd. The 37% shareholding in Eastern is sold to **Australian Airlines (Pty.), Ltd.**

In October, F.28-4000 nonstops are initiated from Brisbane to Mackay, Rockhampton, Mt. Isa, and Prosperine. Emphasis is placed entirely upon leisure services.

In **1989**, Eastwest offers New Zealand Airpass to North American visitors and an order is placed for eight BAe 146-300s.

A participant in Ansett's Ansamatic computerized reservations system, the carrier introduces a unique four-tiered fare structure. The airline is the first in Australia to introduce one-way discount fares.

A total of 890,000 passengers are flown on the year and revenues are A\$99.3 million.

Already flying 14% of the leisure and the "visiting friends and relatives" market, Eastwest in **1990** lays plans to double that share. Weekly nonstop flights start in July from Sydney to Hamilton Island. The first two BAe 146-300s arrive in September and orderly retirement of the Fokkers begins.

Airline deregulation comes to the Australian air transport scene on November 1 and daily nonstop service commences from Melbourne to Hobart during the month, along with twice-daily nonstops from Sydney to Melbourne.

Passenger boardings leap upward 15% to 731,223 and revenues swell 11.9% to A\$111 million.

Company employment grows by 1.2% in **1991** to 860 and, in January, thrice-weekly nonstop service is opened from Sydney to Hamilton Island.

The eighth BAe arrives in July, during which month the final Fokker is withdrawn and sold to **Ansett Express (Pty.), Ltd.** In August, Cairns to Hamilton Island BAe 146-300 frequencies become daily.

Customer bookings swell 39.2% to 966,338. Expenses exceed income and the operating loss is A\$23.3 million.

Early in **1992**, a B-737-277A is leased from **Ansett Australia (Pty.), Ltd.** and placed into service.

Passenger boardings increase by 25.9% to 1,050,211 and the operating surplus is A\$10.9 million.

In **1993**, Chairman Shand and General Manager Berkett oversee a workforce of 610. A second B-737-277A is chartered from Ansett Australia, Ltd. and, together with the company's three BAe 146-300s, link Cairns, Prosperine, Hamilton Island, The Sunshine Coast, Brisbane, Gold Coast, Sydney, Melbourne, and Hobart.

In July, the company's aircraft are removed and, although it will remain in travel agency literature, Eastwest's flights are taken over by the parent.

Enplanements total 1,021,023 and 1.14 million FTKs are operated. Deregulation and lack of profitability having forced its parent to abandon plans to remake this subsidiary into a low-fare, no-frills sister operation, the 46-year-old regional is absorbed by **Ansett Australia (Pty.), Ltd.** on January 1, **1994**.

EAST WEST AIRLINES, LTD.: India (1992–1996). A subsidiary of East West Travel & Trade Links, Ltd., East West is established at Bombay on February 28, **1992**. All of the top officials are members of the Wahid family: Nastrudeen Abdul, chairman; Thakiyudeen Abdul, managing director; and Faisal Abdul and Thahakutty Abdul, directors.

After assembling a fleet of 1 each Boeing 737-2A9A, B-737-2E7A, and B-737-2U4A (the 3 are leased from GPA Group) and 2 Fokker F.27-500s, the 40-employee entrant inaugurates service to Ahmedabad, Aurangabad, Bhavnagar, Bangalore, Baroda, Calicut, Calcutta, Cochin, Coimbatore, Delhi, Goa, Hyderabad, Jaipur, Madras, Madurai, Mangalore, Pune, Rajkot, and Trivandrum. Seven additional short-haulers join the fleet by year's end. Enplanements reach 870,000 by December 31.

In **1993**, the fleet is almost completely altered. All of the previous aircraft except the Fokkers and B-737-2U4A are replaced by the addition of two each B-737-248As and B-737-2S3As and one each B-737-2E3A and B-737-2T5A; again, they are all chartered. Orders are outstanding for 10 B-737-400s.

By March, the company, which has profited significantly from a year of strikes at **Indian Airlines Corporation**, is offering service to 20 domestic destinations.

During the month, a series of bombings occur in Bombay tied, it will be alleged, to underworld figures connected to the airline. In August, however, a dispute occurs with the government over a claim for \$5.6 million in delinquent Internal Travel Tax and Passenger Service Fee funds.

A total of 1.1 million passengers are flown during the first full year of service while a profit of \$3.87 million is generated.

Two B-737-4H6s are wet-leased from **Malaysian Airlines, Ltd. (MAS)** in January **1994** and flown by Malaysian crews until their East

West crews can be trained. At the same time, the number of markets served grows to 27.

The tax dispute with the government is settled.

The Director General of Indian Civil Aviation bans alcohol service on all domestic flights in May.

In July, East West announces that it will raise \$17.8 million through a public stock offering in India, the funds from which will be supplemented by an overseas issue. Late in the year, three F.27s are obtained to work thinner routes; however, they will be grounded for a year in a financial dispute with Fokker over nonpayment of rent.

Enplanements during the 12 months climb 81.8% to 2 million.

In early February 1995, Indian customs authorities impound the airline's fleet for nonpayment of the inland air travel tax.

Later in the month, its Delhi regional manager, Sabu V. Chacko, is arrested under the Terrorist and Disruptive Activities (Prevention) Act for alleged ties to Dubai-based underworld figure Dawood Ibrahim. Amidst these charges of ties to the Bombay-Dubai underworld, the government in May steps in and asks the company to reveal its sources of foreign funding.

The Friendship grounding continues through the year and all seven of the short-haul Boeings are the subject of court battles with PCM Equipment and Transport, the U.S. leasing firm from which they have been chartered, which claims \$3.5 million in overdue lease payments. Three Boeings are grounded in June. East West, for its part, is owed \$1.5 million by Vineer Alaska of the U.S. and \$1.8 million by Kolding of Sweden, which the airline had paid as advances on the leases of two B-737-400s. Kolding has gone into liquidation and Vineer Alaska holds its payment.

While the legal maneuvering continues, the company, in September, begins to offer increased customer services, such as low-calorie health food menus.

During the fourth quarter, the company approaches the U.S. Export-Import Bank seeking a \$60 million loan guarantee to cover the cost of the B-737-400s, delivery of which has been put on hold. Commercial Manager C. Rama Chandran informs the aviation press that the Boeings will not arrive until after financing has been solidified.

Managing Director Wahid is shot 14 times near his Bombay office on November 13 in what police believe is a gangland murder committed by 11 members of the Chhota Rajan gang; his driver, Faruk Shaikh, is also injured but survives. Management of the airline is divided among his three surviving brothers, with Chairman Wahid also becoming the managing director.

The airline's situation continues to deteriorate and by January 1996, the company is forced by the Indian Supreme Court to ground half of its fleet when it cannot pay its current and back landing and parking fees (called dues) it owes the Airport Authority of India as well as lease payments. A legal wrangle ensues.

During March-May, the government requires the airline to suspend six services on trunk routes, excluding Madras, because it has failed to fly a required 10% of its capacity on secondary route frequencies in the northeast part of the country. On June 18, the carrier fails to pay the required installment of its premium due to United Insurance. As a result, the company's last three freighters are also taken out of service. Once the largest private sector player in the airline arena, East West is now reduced almost into a paper entity.

Toward the end of June, the company attempts to restructure and announces ambitious plans to find an equity partner and to restart full services. The process will prove difficult because of the airline's image problem and the many allegations that certain of its executives are tied to the underworld. It is reported in the press that **Deutsche Lufthansa, A.G.** has been contacted concerning a link-up in the wake of its difficulties with **Modiluft**. Having been stung by its experience in India, the German line is careful not to get involved with the airline.

On July 6, the Director General of Civil Aviation issues a show cause notice to East West for flying its aircraft without insurance during June. At midnight on July 7, the Airports Authority of India orders East West

grounded for nonpayment of dues. The company also owes a large sum to the National Airports Authority for route and navigational charges. In an effort to trim costs, the carrier, on July 24, announces that it will lay off 150 of its unskilled staff, e.g., drivers and baggage handlers. It is anticipated that this move will save the airline 35% of its annual wage bill.

In early August, finances force the company to suspend operations, although Chairman Wahid announces that flights will resume on August 26. An intense effort is made to get the company's planes back in the air, including negotiations with foreign investors for equity investment. Neither a rescue package nor a resumption of service is forthcoming and, at the end of the month, the airline's license is suspended. Two F.27s and four B-737s are parked at Bombay, two B-737s are at Madras, and one other is at Singapore receiving a "D" check. A number of pilots quit.

At the end of September, Airport Authority of India spokesmen suggest that the company will return to service in November. However, before this can happen, it will have to react to a legal notice now received from the authority for nonpayment of Rs 70 million (\$2 million) in bills. Realistic plans for a relaunch are all but abandoned in October, when the carrier's B-737s are repossessed. In November, one of the alleged gunmen wanted in connection with the Wahid murder is killed in a police encounter.

During the summer of 1997, the company's owners are able to get the carrier's license renewed and to draw up a strategic business and financial plan. With much of its infrastructure retained, it is reported in the September 3 issue of India's *Economic Times* that arrangements have been made to acquire several operations and resume operations "soon." The restart does not happen.

Two suspects apprehended in connection with the murder of Managing Director Wahid are acquitted by a Bombay sessions court on November 20, 1998. Eight other alleged participants remain at large.

EASTAIR, LTD. See **FLUGFELAG AUSTURLANDS, H.F.**

EASTERN AIR, LTD.: Zambia (1995-2000). Eastern Air is established at Lusaka by Eagle Travel in 1995 to offer scheduled domestic passenger service. Yoosuf Zumla is named managing director and 2 Let L-410UVPs are acquired with which revenue flights are launched to the country's various tourist destinations.

During the remainder of the decade, regional, as well, as local scheduled services are inaugurated. By 2000, the airline is flying into Chipata, Dar es Salaam, Johannesburg, Kasaba Bay, Kasama, Lilongwe, Livingstone, Lubumbashi, Mansa, Mfuwe, Mongu, and Ndola.

On April 1, the company changes its name to **Zambia Skyways, Ltd.**

EASTERN AIR CHARTER: 209 Access Road, Norwood Municipal Airport, Norwood, Massachusetts 02062, United States; Phone (781) 769-8680; Fax (781) 769-7743 Year Founded 1981. EAC is established at Norwood Municipal Airport in 1981 to provide executive and small group passenger charters to the Caribbean, Canada, and Latin America. By 2000, the company employs 16 pilots and operates 3 Piper PA-31T Cheyenne IIs and 1 each Cessna 500 Citation I and C-550 Citation II.

EASTERN AIR EXECUTIVE, LTD.: Sturgate Aerodrome, Upton, Lincolnshire, England, DN21 5PA, United Kingdom; Phone 01427 838280; Fax 01427 838416; Year Founded 1967. The air taxi EAE is established at Upton, near Gainsborough, in 1967 to provide passenger services to local destinations with a single Piper PA-23 Aztec.

Revenue operations continue apace for the next 32 years. In 2000, Capt. F. Hugh B. Stark is managing director and his fleet includes two Aztecs and a Piper PA-31-350 Navajo Chieftain.

EASTERN AIR LINES: United States (1934-1991). As a result of the airmail scandal of 1934 and the subsequent rebidding of all government mail contracts, **Eastern Air Transport (EAT)** is renamed Eastern Air Lines (EAL) on the last day of April. Under terms of the new contract that prohibits employment of anyone involved in the so-called "Spoils

Conference" of 1930, EAT's leader, Thomas D. Doe, is forced to retire and General Manager Ernest R. Breech becomes acting president. After EAL signs new mail contracts with the government for Air Mail Routes 5, 6, and 10 (the revised numbers for the original CAM 19) on May 10 and takes over two runs from the army on May 15.

On June 12, Congress passes a new airmail law that effectively removes manufacturers from the air transport business and gives them until December 31 to do so. An order is placed for 14 Douglas DC-2s, the first of which begin to arrive in September and October. Vice President Edward V. "Eddie" Rickenbacker will christen these aircraft, plus two transports, "The Great Silver Fleet."

On November 11, Rickenbacker sets a new transcontinental speed record and, three days later, carrying 15 passengers, he pilots a New York-Miami and return DC-2 VIP flight in 15 hours as initiation of regular 8-hour, one-way service. The first regularly scheduled Florida Flyer service on the New York to Miami route begins on November 19 via Washington, D.C., Charleston, and Jacksonville. The old EAT jingle "From Frost to Flowers in 14 Hours" can now be updated to "... 8 Hours." Rickenbacker, the "ace of aces," also inaugurates a new Chicago-Miami mail route on December 19, making a record Miami-Chicago return flight on December 20 to begin regular passenger, mail, and express service in that direction.

Displeased that his ticket is stamped "New York," but that his DC-2 has landed in Newark, New Jersey, also on December 20, Mayor Fiorello La Guardia demands in front of his fellow passengers—all newspapermen—that he be flown on to Floyd Bennet Field at New York City. Eastern, not wishing to be a pawn in a debate between La Guardia and U.S. Postmaster General James Farley over designation of the regional airmail airfield, complies with La Guardia's request.

On December 31, the North American Aviation (NAA) group divests itself through the expedient of merging the airline into the parent and operating both as Eastern Air Lines. President Breech turns operational control over to Vice President Rickenbacker, who claims credit for the airline's new logo, the duck hawk or falcon. The Curtiss I Condors are now withdrawn.

At the close of its first year as an independent, the company, which has flown 52,820 customers, shows a net loss of \$709,700.35. On January 4, 1935, NAA's vice president, Rickenbacker, who has been in charge of EAT for the holding company, officially becomes Eastern's general manager. He undertakes an inspection trip to visit every station, working with employees along the way.

A record 6 hr. 30 min. Miami-New York DC-2 flight is completed on January 15 while, following a nonfatal January 31 crash landing at Atlanta, a wrecked T-32 must be written off.

During the spring, frequencies on the New York to Washington route increase to six each way daily, one with T-32s and five DC-2s. Two Douglas services are run each way to Florida from New York daily and two from New York to New Orleans, one each DC-2 and T-32. Daily return services are offered by DC-2s from Chicago to New Orleans and to Miami.

In July, operations and maintenance quarters are transferred from Atlanta to Miami where they will stay throughout the remainder of Eastern's history, growing into a 150-acre base.

A stickler for detail, Rickenbacker also institutes immediate cost-cutting measures, which help turn the carrier around and allow it to post a \$90,000 net profit at the close of its second year (Eastern will record a profit every year from 1936 through 1959). In addition to rigid cost controls, fleet standardization is now begun.

Within months of his taking control as general manager, Rickenbacker begins to replace the company's patchwork collection of Mailwings, Fords, Kingbirds, and Stinsons with the remainder of the 14 new Douglas DC-2s. Five Lockheed Model 10Bs are obtained in September and are placed into service on shorter segments.

One of the new Lockheeds returns presidential candidate Sen. Huey P. Long to Baton Rouge, Louisiana, after a multistop flight from Washington, D.C. in early September; on September 10, "The Kingfish" is assassinated on the steps of the state capitol.

When pilot J. Shelly Charles lands his Pitcairn PA-6 at Atlanta from Chicago on October 16, his flight is logged as the last open cockpit bi-plane mail flight made in America; EAL withdraws all of its remaining Pitcairns thereafter.

Enplanements during the twelve months total 87,389 and revenue passenger miles flown reach 38.39 million. A \$38,000 profit is recorded.

Meeting in Chicago on January 14, 1936, Rickenbacker joins with **American Airlines** President C. R. Smith, **United Air Lines** President Patterson, and **Transcontinental and Western Air (TWA)**'s Jack Frye to announce creation of the Air Transport Association of America (ATA) and the appointment of its first president, Edgar S. Gorrell.

On March 23, Eastern joins with the other members of the "Big Four" and **Pan American Airways (PAA)** in signing an agreement with Douglas for development of a DC-4E; the company's share of cost for the arrangement is \$100,000.

The company's medical department, the first of its kind for a commercial airline, is established on April 1.

A connecting service with **Transcontinental and Western Air (TWA)** is announced on August 15 for cities between Indianapolis and Miami.

Joined by **American Airlines** President C. R. Smith, Vice President Rickenbacker travels to Nashville, Tennessee, on November 1 to participate in the formal dedication, witnessed by 40,000 people, of that city's new Municipal Airport.

The **Wedell-Williams Transport Corporation** is purchased for \$160,000 on December 1, together with its AM-20 New Orleans-Houston mail route.

Off course in bad weather, Henry T. "Dick" Merrill's Miami-Newark DC-2 makes a nonfatal crash landing near Milford, Pennsylvania, on December 19.

Also in December, the first 2 of a final total of 77 DC-3s are received and 5 Lockheed Model 5 Vegas are delivered; the surviving T-32 Condor IIs are retired.

A net profit of \$168,000 is reported for the year.

The first commercial EAL nonstop flight is made by one of the new DC-3s from Miami to Newark on January 16, 1937. When a deadly flood in the Louisville area later in the month requires rapid assistance, company aircraft joins those from **American Airlines** in providing dozens of flights bringing in food, clothing, and medical personnel. The Kentucky city will later honor the carrier with a bronze plaque.

On February 18, a DC-2, just after landing at Miami, hits an embankment; no one is badly hurt.

A DC-2, piloted by Dick Merrill, establishes a 5 hr. 26 min. record for the Newark-Miami run on April 12.

Nonstop New Orleans to New York service begins on May 16.

The first long-distance flight record established by the Lockheed Model 10 Electra is set by EAL pilots Dick Merrill and John S. Lambie who, later in the month, fly to London in a Model E christened *Daily Express*. In what is advertised as the first commercial transatlantic flight, they return to New York's Floyd Bennett Field with some 600 still photographs of the coronation of King George VI, many of which appear in the pages of the Sunday edition of *The New York Times*.

On August 1, company records show that, in 7 years of passenger service, a total of 178 million passenger miles have been flown without a customer fatality.

En route from Chicago to Miami on August 10, a DC-2 hits a power pole while taking off from Daytona Beach and crashes (four dead).

The five Electras are now retired. During the year, a special "Women's Department" is opened to assist female passengers with their problems and, in response to a need for frequent roundtrip New York-Washington service perceived by Rickenbacker, Eastern begins to offer 15 daily DC-2 "Merry-Go-Round" frequencies over the route.

Mechanics unsuccessfully strike in November.

During the year, five Electras are retired and eight DC-3s are purchased.

A total net profit of \$196,982 is banked; EAL is the only one of the "Big Four" domestic air carriers to show a profit this year.

Having convinced a skeptical U.S. Department of Commerce of the soundness of his previous May's record-breaking flight to England and having prevented the agency's considered ban on publicity-oriented transatlantic flights, company pilot Dick Merrill receives the Harmon Trophy in March 1938.

On April 2, M. L. Patterson becomes the 500,000th passenger transported. After a lengthy debate with the government, North American Aviation elects to divest itself of the airline on April 22.

General manager and chief executive, Alfred P. Sloan Jr., advises Rickenbacker that a group, potentially hostile to the carrier's future, will try to purchase it. Sloan will recall Eastern in his memoirs, *My Years with General Motors* (Garden City, N.Y.: Doubleday Anchor, 1963). Yellow Cab magnate John D. Hertz Sr. fails in his effort to acquire Eastern when it becomes available as a public stock offering following its incorporation in Delaware on March 29.

Rickenbacker and a group of associates from Smith, Barney & Co. and Kuhn, Leob & Co. are, however, able to obtain the entire shareholding for \$3.5 million; "Captain Eddie" becomes president as well as general manager after an acquisition campaign that can best be described as an 11th-hour effort.

Airline employment stands at 1,032 and the fleet comprises 22 aircraft; 34 daily flights are operated over a 4,518-mile route system. Eastern is the first major airline to operate at a profit without a federal subsidy and will be the only such American carrier for some years to come.

On May 26, a new mail route award, AM-40, is received from the U.S. Post Office. On September 21, a hurricane strikes the U.S. East Coast between Long Island and Boston, cutting all inland transportation. **American Airlines**, the principal operator in the Northeast, attempts to provide air-only communications, but is overwhelmed. At the request of ATA President Edgar Gorrell, Eastern, **United Air Lines**, and **Transcontinental & Western Air Lines (TWA)**, under special permission from Washington, are allowed to contribute aircraft and flight crews to fly emergency relief services over American's routes from New York to Boston. For the next week, two EAL DC-3s join transports from the other three carriers in providing shuttle flights between New York and Boston. During this period, the companies fly over 8,000 passengers (including refugees, relief, and construction workers) and 317,000 pounds of mail from New York to Massachusetts.

After making a successful landing at Montgomery, Alabama, with a burning engine on October 18, a DC-2 is evacuated just before it is consumed by flames.

The last two Lockheed Vegas are withdrawn by year's end, at which time it is reported that the annual profit has risen to \$354,249.

The U.S. Post Office on January 17, 1939, signs a contract with the company for operation of the world's first scheduled rotary-wing passenger service.

To help handle the traffic demand on the winter New York-Miami route, four DC-3As are leased from **United Air Lines**. Services begin to the Mexican border towns of San Antonio and Brownsville on April 15.

A scheduled rooftop service, the first of its kind anywhere and with any type of flying machine, is inaugurated by EAL on July 6 when its Kellett KD-1B autogyro inaugurates, as it says on the machine's fuselage, "AM 2001 First Scheduled Autogyro Air Mail Route in the World" between Camden Airport and the roof of the new Philadelphia Post Office building. During its construction, the latter point had been specially equipped for this five-times-a-day roundtrip service.

By August, 15 DC-3s are on line while portable radios are installed for passengers aboard company DC-2s on September 1. On October 1, orders are placed for three sleeper-configured DST/DC-3s.

On January 26, 1940, the company joins with **Pan American Airways (PAA)**, **American Airlines**, and **United Air Lines** in ordering 61 of the newer and smaller DC-4s; the giant order will be voluntarily terminated by all concerned as war approaches.

Three new Douglas DST sleepers are received in February and are introduced on the New York to Brownsville via Washington, Atlanta, Birmingham, New Orleans, and Houston route. On February 26-27, one

of the new aircraft on this route crashes into trees while landing at Atlanta in bad weather. The DST is destroyed and a number of passengers are injured, including EAL President Rickenbacker, who will spend four months in the city's Piedmont Hospital and walk with a limp for years thereafter.

Service is transferred from Newark to New York's La Guardia Field on April 2 and on May 4, orders are placed for 12 DC-3s.

The Philadelphia autogyro service ends toward the end of the second quarter.

On September 15, the company's last 10 DC-2s are sold to the British Purchasing Commission for \$500,000. Slated for No. 8 Squadron of the Royal Australian Air Force, the first five are delivered to Canada on September 26. Two additional DSTs are purchased in October.

The carrier transports a total of 368,436 passengers on the year and the annual report shows a profit of \$1.58 million.

On February 21, 1941, frequencies on the two-stop New York-Miami route have been increased to nine-a-day.

Too low on its approach to Atlanta's airport on February 26, the DST *Mexican Silver Sleeper* crashes into a hill five miles out (eight dead). On March 14, the "Big Four" form the research group Air Cargo, Inc. A significant rainstorm causes a DC-3 to crash-land in a marsh west of Vero Beach on April 3; all aboard are injured to some degree.

The final five DC-2s sold to the British are forwarded during the first five months, with the last arriving in Australia during May.

A new DST (the last built) is obtained in June to replace the *Mexican Silver Sleeper* and the Kellett KD-1B autogyro is sold on November 23.

At a director's meeting, it is revealed that the company has a \$4.7-million payroll covering 2,280 workers. A net profit of over \$1 million is recorded for the year as a total of 530,720 passengers are carried.

Following the Japanese attack on Pearl Harbor on December 7, Eastern, like all other U.S. airlines, gives up a portion of its fleet to government service, specifically 20 of its 39 DC-3s in early 1942. Painted in olive drab livery, they are no longer "The Great Silver Fleet" but become, instead, "The Great Chocolate Fleet."

At the request of ATA President Gorrell and the War Department, **American Airlines** executive M. P. "Rosie" Stallter is sent in January on a weeklong inspection tour of the U.S. Army Air Forces' Air Service Command bases in Pennsylvania, Ohio, Alabama, Utah, and California.

From this trip, Stallter and Gorrell devise and present the Army with a domestic military cargo service plan to be operated by the airlines under government contract. Under the plan, five geographical segments are created, each assigned to a specific carrier: American, the East Coast; **Northeast Airlines**, the Northeast; Eastern, the Southeast; **Northwest Airlines**, the Pacific Northwest; and **Braniff Airways**, the Southwest.

At the personal request of U.S. Army Air Forces' commanding general, Henry "Hap" Arnold, President Rickenbacker, together with Gen. Frank "Monk" Hunter, a colleague who had flown with Capt. Eddie in the 94th Aero Squadron during World War I, makes a morale-boosting nationwide tour of USAAF training bases during March.

On April 1, a survey flight is made to Trinidad from Miami via Cuba and Puerto Rico. On April 14, another survey flight is started from Miami to the African city of Accra on the Gold Coast (today's Ghana) via San Juan, Trinidad, Georgetown, Belem, Natal, and Ascension Island.

On May 1, Eastern becomes the fourth U.S. carrier to inaugurate scheduled service in support of the war effort when six of its DC-3s, on contract to the Army's Air Transport Command, begin thrice-daily flights from Miami to Middletown, Pennsylvania and daily flights from Miami to San Antonio. Daily Miami-Trinidad service begins on May 18.

As part of their campaign against Midway Island in the Pacific, Japanese naval forces attack the Aleutian Islands on June 3, capturing Attu and Kiska while grasping at underdefended Dutch Harbor. The mobilization foreseen and promised by ATA President Gorrell at the beginning of the year now becomes reality. The U.S. Army orders 11 airlines to halt their normal passenger and contract cargo activities and dispatch aircraft to Edmonton, Alberta, for participation in a massive contract air-

lift that is quickly organized for the defense of Alaska. Over 100 aircraft from Eastern and 10 other carriers execute daily roundtrips between Edmonton and Dutch Harbor through mid-July, transporting troops and supplies. Over 90% of the pilots involved had never flown to or from Alaska before and few had encountered such tough weather conditions.

On June 24, a survey flight is undertaken to the northeast Brazilian city of Natal. A week later, on July 1, scheduled operations are begun to Natal and on September 1 the carrier creates its Miami-based Military Transport Division (MTD). It is this unit which, employing the fifth production model, initially places the Curtiss C-46 Commando into civil contract service, on the Florida-Pennsylvania run in October. Those airliners not commandeered remain exceptionally busy; for instance, mileage flown in October advances 67% over 1941 using fewer planes.

Also in October, President Rickenbacker is asked by War Secretary Henry Stimson and Gen. Arnold to inspect the new 8th Air Force Bomber Command bases being established in England. In the U.K., Capt. Eddie visits with British officials, including Prime Minister Winston S. Churchill. He also reviews the Boeing B-17 (about which he will make 20 serious written recommendations for improvement) and returns to Washington as a special courier, carrying one of the five detailed sets of plans for the North African invasion sent to the U.S. from England.

Within six days of his return, Rickenbacker is sent off on another political and morale-boosting tour, this time on October 17 to the Southwest Pacific. Having arrived at Honolulu aboard a former **Pan American Airways (PAA)** Boeing 314, Capt. Eddie departs for the Port Moresby headquarters of Gen. Douglas MacArthur aboard a B-17. While en route, Rickenbacker's Flying Fortress misses its landing at Canton Island and ditches at sea. The Captain and the survivors are lost on a raft for 22 days, during which ordeal one airman dies.

Having drifted near Funafuti in the Ellise Islands (now the Tuvalu chain), the two life rafts are spotted by a USN PBY Catalina and a rescue is completed on November 12. The airline chief will remember the ordeal in his book *Seven Came Through* published the following year. Following his visit with MacArthur and the completion of his tour, Rickenbacker returns to Washington to report to Stimson and become a champion of aircraft survival equipment. Later in the year, he will begin a three-month tour of U.S. war plants.

A C-46 proving flight is made from Florida to Brazil on February 8, 1943. By March 8, the MTD has 15 Commandos flying roundtrip from Miami to Natal. In early April, senior captains conduct a return survey flight over the 6,500-mi. from Miami to Accra, in West Africa, via San Juan, Trinidad, Georgetown, Belem, Natal, and Ascension Island.

In May and June, President Rickenbacker undertakes a 55,000-mile inspection and morale-boosting tour on behalf of the War Department to North Africa, Iran, the Soviet Union, India, and China. During this trip, he is seen by over 300,000 American troops and returns with a large report on the Russian use of Lend-Lease equipment.

Frequencies are increased to thrice daily in July and night service on the route is started in September.

Only 20 DC-3s are available for domestic services at the start of 1944. In February, the CAB grants a Jacksonville to New York route to **National Airlines**, thereby setting in motion Eastern's hottest rivalry.

Beginning on June 1, C-46s, equipped with extra fuel tanks, stretch the day and night Natal service across the Atlantic via Ascension Island to Accra over the route surveyed in 1942.

Meanwhile, the CAB, on June 12, grants Eastern permission to service Boston from New York, thereby ending a long-held monopoly by **American Airlines** over the heavily traveled segment.

Orders are placed on October 4 for DC-4s and civil C-46s. Frequencies on the 1,424-mile long New York to Miami service are increased to 8 daily round trips on October 20. The C-46 Natal-Accra over-ocean flights end on November 10.

On November 29, Air Cargo, Inc., having submitted a number of reports on freighting possibilities to the "Big Four," is closed down. Also in November, New York-Boston service is initiated. Fourteen Lockheed L-049s are ordered on December 1.

During the fourth quarter, 14 of the 20 DC-3s given up in 1942 are returned.

The company begins flying citrus and vegetable products from Florida to New York City on April 12, 1945.

A total of 43 DC-3s are now in service or being modified from C-47 status. One of these aircraft crashes into a swamp near Florence, South Carolina, on September 7 and explodes (22 dead); the wreckage is found by a local boy.

The carrier receives another rival when the CAB grants **Delta Air Lines** a Chicago to Miami route. However, the government regulators do allow Capt. Rickenbacker's "Great Silver Fleet" to start flying roundtrips from Miami to Detroit.

On September 20, orders are placed for 14 Lockheed 049 Constellations, later upgraded to 649s equipped with an external Speedpak cargo and baggage container. Daily frequencies on the New York to Washington roundtrip service are increased to 27 on September 23 and 4 days later ground personnel are granted a 40-hour work week.

Frequencies to Natal are maintained until October 15, when they cease and the Military Transport Division is demobilized. Since its creation on September 1, 1942, the MTD has flown 45 million pounds of cargo and 130,000 passengers without ever cancelling a flight.

Fifty Martin 2-0-2s are ordered on November 23. A DC-3 with 15 passengers overruns New York (LGA) and crashes into Bowery Bay on December 31 (1 dead); the U.S. Coast Guard aids in the rescue.

Eastern Air Lines, on January 1, 1946, is the third largest of the "Big Four" domestic airlines, with a route network of 7,614 unduplicated miles.

A DC-3 with 17 aboard crashes near Cheshire, Connecticut, on January 19; there are no survivors. Participating in the postwar boom in commercial aviation, Eastern now begins flights from Miami to San Juan.

Converted to DC-4 civil standard and delivered in the company's livery as "Silverliners," 20 R5Ds (USN DC-4s) are leased from the government in the spring for a five-year period. Delivered between May and October, the aircraft are placed into service on the New York to Florida route.

On October 11, a C-54B with 4 crew and 22 passengers, crashes while on initial approach to the airport at Alexandria, Louisiana; although the aircraft must be written off, there are no fatalities. By late fall, the fleet also has 49 DC-3s available. One of these is damaged in a midair collision with a **Universal Airlines** plane over Aberdeen, Maryland, on December 20; 84 passengers on the two planes escape injury and the Eastern aircraft is able to continue its flight to Miami.

To counter **Delta Air Lines'** new Miami to Chicago via Cincinnati service, Eastern introduces DC-4s on the same route in January 1947.

A DC-3 with 3 crew and 16 passengers is lost near Galaxy, Virginia, on January 12 (18 dead). On May 30, Flight 605, a C-54B en route from Newark to Miami with 4 crew and 49 passengers and a damaged tail assembly, goes into a near-vertical dive from 4,000 ft. up, crashing into the ground near Port Deposit, Maryland, where it explodes (53 dead). The tragedy is the worst airliner disaster to date.

Newark to Houston via New Orleans DC-4 flights begin on June 10. The first of 14 Lockheed L-649 Constellations join the fleet on May 13 and, beginning on June 17, initiate 6-times-per-day New York to Miami flights. The Lockheeds are also placed into service on the Miami to Chicago route. Flights terminating in New York are assigned to the international routes of **Air France** on August 3. Newark-Miami nonstop service begins on September 29 and. Miami's Rickenbacker Causeway is opened on November 10. Multistop New York to Charleston, West Virginia, DC-3 frequencies begin on December 2.

En route from Houston to Boston on January 14, 1948, a DC-3 crashes near Washington, D.C. (five dead).

While flying from Boston to Miami on February 8, an L-649 piloted by Capt. Dick Merrill with 4 other crew and 20 passengers, loses an engine that crashes into the plane's fuselage, killing a steward. Capt. Merrill is able to land the aircraft at Bunnell, Florida, where no other injuries are reported and it is revealed that an eight-month-old baby has slept through the entire incident.

New York to Atlantic City DC-3 service begins on March 2, followed by flights to Wilmington, Delaware, which start on April 28.

As the result of structural difficulties with the Martin 2-0-2, Eastern redesigns the aircraft for the manufacturer and orders 35 of this improved Martin 4-0-4.

The carrier now becomes one of the first to advertise its routes and frequencies over the radio; many of the commercials are read by entertainer and aviation enthusiast Arthur Godfrey, who becomes a close Rickenbacker friend.

En route from Philadelphia to New Orleans on January 5, 1949, a DC-3 crashes while making a scheduled stop at Birmingham, Alabama; no injuries are reported.

During the spring, President Rickenbacker, radio personality Godfrey, and various newspapermen make a 31-day tour of Latin America aboard an L-649. The goodwill visit stops at 15 Caribbean and South American communities, which are also examined for their expansion possibilities.

On July 28, after a U.S. Navy F6F irresponsibly buzzes a DC-3 with 3 crew and 12 passengers en route from Boston to Memphis over Chesterfield, New Jersey, the Douglas hits the fighter plane. Both aircraft crash and there are no survivors from either aircraft.

On final approach to Washington, D.C. (DCA) on November 1 after completion of a service from Boston, Flight 537, a C-54B with 4 crew and 51 passengers, collides with a Bolivian Air Force Lockheed P-38, piloted by Capt. Rios Bridoux. The accident occurs over the Potomac River at an altitude of 300 ft., a mile short of Runway 3; all 56 persons involved are killed. Bridoux survives the worst U.S. air disaster to date, claiming he did not see the Douglas transport nor understand warnings from the control tower.

During the year, 7 L-749As join the fleet and orders are placed for 60 Martin 4-0-4s.

On February 11, 1950, steward M. Fisher-Galati falls out of the door of a DC-3 over Tampa Bay, but hangs on to the door chains for 20 minutes until the Douglas can land safely. Another DC-3 crashes at Lexington, Kentucky, five days later, but no injuries are reported to any of the 18 aboard.

On April 14, Eastern becomes launch customer when orders are placed for 14 L-1049A Super Constellations.

Between June 9–17, after the CAB bans flights by charter carriers, the carrier joins with **Pan American World Airways (1)** to fly 5,000 Puerto Rican migrant workers to Michigan.

Later in the year, a stock purchase plan is started for all employees with three or more years seniority and reversion to an all-male flight attendant staff is completed.

During the year, all of the L-749s complete conversion into L-749As.

The CAB grants a direct New York–Puerto Rico route on January 26, 1951 as a supplement to Eastern's existing Miami–San Juan service and the first nonstop test run is made on March 10.

Direct New York to San Juan service is inaugurated on March 26. New York City Mayor Vincent P. Impellitteri joins President Rickenbacker on the flight and participates in ceremonies marking the occasion with San Juan Mayor Rincon de Gautier the next day. On April 1, the carrier joins **Pan American World Airways (1)** in cutting New York–Puerto Rico tourist fares.

During the spring and summer, Miami to Houston authority is granted by the CAB. Eastern leases the Houston to Amarillo route of **Braniff International Airways** and enters into an interchange agreement with **Trans World Airlines (TWA)** for the remainder of the southern transcontinental route to California. The award is protested by **National Airlines** and upon CAB rehearing, EAL is denied the Miami to Houston route.

Following its maiden flight on October 15, the first of 60 Martin 4-0-4s is delivered, allowing the gradual return of the 20 leased USN R5Ds. Meanwhile, nine C-54 Skymasters are purchased from **American Airlines** and **Pan American World Airways (1)**.

The first L-1049A arrives on November 26.

At Ocala, Florida, on November 27, a DC-3 with 20 aboard lands safely after brushing wings with a Civil Air Patrol plane; the USAF auxiliary plane crashes and its pilot is killed.

L-1049A Newark–Miami flights commence on December 17, with a second Super Constellation assigned to that route six days later. EAL is the first to place the Super Constellation into service and also orders 16 L-1049Cs for delivery two years later.

Enplanements for the year total 3.5 million.

Eastern employs the 4-0-4 to launch its New York–Miami via Columbia, Atlanta, and Jacksonville Silver Falcon service on January 10, 1952; the falcon on aircraft tails is painted in red.

After three disastrous crashes by other airlines since December, authorities close down Newark Airport, home to 65% of EAL's New York operation. Improvised \$1.5 million-per-month arrangements are made to transfer operations to the new Idlewild Airport until the ban is lifted.

On March 23, the board of directors of **Colonial Airlines** votes to accept a merger offer; however, the arrangement is opposed before the CAB by **National Airlines**. Ownership of the Montreal-based carrier will be contested by the two East Coast rivals for four years.

In late spring, orders are placed for Lockheed L-1049C Super Constellations.

Daily roundtrip, nonstop New York–Puerto Rico flights begin on August 24 and a Constellation, with 54 aboard, noses over while taxiing at Atlanta on August 31; no injuries are reported.

On September 26, the one-millionth (cumulative) passenger is boarded. Despite a flight engineers strike begun on December 1, all 60 Martins are in service by year's end.

During the first half of 1953, orders are placed for 22 L-1049G Super Constellations. Meanwhile, on January 30, the final DC-3 flight is completed, Chicago to Miami, and the last Douglas is retired and given to the Smithsonian Institution. The last of 60 4-0-4s for the airline is completed at the Martin plant at Baltimore on February 3.

A Super Constellation, with 83 aboard, skids for a mile on its belly when its wheels collapse during a landing at Chicago Municipal Airport on March 3; only one passenger is hurt.

Ashland, Kentucky, and Huntington, West Virginia, join the route network on April 1. Super Constellation service to Nashville begins on April 26. Also in April, an interchange agreement begins with **Northwest Airlines** over a route from Miami to Seattle via Chicago (MDW). An EAL L-749A is employed on the route, with NWA cockpit and cabin crews operating the service from Chicago to Seattle and back.

On August 7, President Rickenbacker assumes the newly created post of company chairman and general manager; Secretary/Treasurer Thomas Anderson is appointed president.

The firm marks its twenty-fifth anniversary, profits are \$136.5 million, and the 25-millionth passenger (cumulative) is boarded on September 15.

A Constellation bound for Puerto Rico with 5 crew and 22 passengers, crashes and burns while taking off in fog from New York (IDL) on October 18 (2 dead).

The Miami–Seattle interchange with **Northwest Airlines** is terminated at the end of October. Late in the year, L-1049Cs are introduced on the main north to south corridor as well as on the Florida to Chicago run.

A March 24, 1954 fire in the building adjacent to the Atlanta reservations center forces EAL personnel to seek other quarters; fast response results in a return to full service within eight hours.

A Constellation flies the New York–San Juan service on June 9 in a record 4 hrs. 40 min.

While circling Washington, D.C. (DCA) for two hours on August 7, a damaged Constellation with 77 aboard is repaired aloft and thus can land safely.

The carrier wins a USN contract on June 13, 1955 to fly cargo coast to coast.

A Constellation, with 60 aboard including U.S. Representative Kenneth Keating, makes a safe crash landing at Washington, D.C. (DCA) on July 14; no injuries are reported.

An interline arrangement is made with **Braniff International Airways** at Miami on August 18, which allows the Texas-based carrier to continue its South American services on to Washington and New York. Beginning on August 28, Super Constellations are assigned to the New York–San Juan service. A letter of intent is signed on September 27 for 40 Lockheed L-188 Electra turboprops. Also in September, 10 L-1049Gs are ordered.

Also ordered are 40 DC-7Bs Golden Falcons at \$1 million per unit, each of which is complete with a passenger cabin interior designed by Cadillac's Harley Earl and a lounge at the cabin rear.

In the fall, two DC-6Bs are leased from **Pan American World Airways (1)** and all of the Super Constellations are altered to all-coach configuration.

An interchange service with **Northwest Airlines** begins on December 15 between Miami and Minneapolis-St. Paul via Chicago. The service is initially operated by NWA Stratocruisers during the winter and EAL Constellations during the summer season.

A Super Constellation, about to depart for Miami on December 18, is held up and searched when an ominous ticking noise is heard; a loud alarm clock is found. While making an instrument landing at Jacksonville, Florida, three days later, a Constellation with 5 crew and 17 passengers, crashes; there are no survivors. Late in the month, orders are placed for DC-8-10s.

The actual order contract for the Lockheed Electras is signed on February 9, **1956**. Options, which will never be exercised, are taken on 30 more.

The acquisition of **Colonial Airlines** is finally achieved on June 1 and gives Eastern routes to Canada, Bermuda, upstate New York, and New England. Unduplicated route mileage increases to 15,967. A total of 800 employees are added to the company's 13,500. The company, which will operate its prize as a division under its old name until integration can be completed, is now able to claim that it, and not **American Airlines**, is the world's largest airline in terms of passengers carried.

A Martin 4-0-4 with 3 crew and 20 passengers makes a forced landing near Owensboro, Kentucky, on February 17; although the aircraft must be written off, there are no fatalities.

Ten Lockheed L-1049Gs are now received and placed into "Night Owl" and first-class Montreal–Miami via New York service. Orders are placed for 40 Lockheed L-188 Electra turboprops at \$2.4 million per aircraft. Shortly thereafter, \$165 million is offered to Douglas for 16 DC-8-21s, an upgrade of the previous winter's order.

On August 18, eight more New York to Miami flights are added because of the partial shutdown of **National Airlines** due to an Air Line Pilots Association (ALPA) strike.

The company begins replacing the DC-4s used on **Colonial Airlines'** New York to Canada flights on October 15 with Constellations.

Through careful and stringent management, Chairman Rickenbacker is able to announce a \$14.7-million profit for the year.

In April **1957**, new Convair CV-440 Metropolitans are introduced as supplement to the Martin 4-0-4s.

A hard landing at Louisville on March 10 wrecks a Martin 4-0-4 with 3 crew and 31 passengers; there are no fatalities.

In significant difficulty with the CAB in the spring, **North American Airlines** leases its seven DC-6Bs to Eastern. Ground accidents claim an L-1049E and a DC-7B at Miami on June 28.

After 20 years of bilateral air agreement difficulties between the U.S. and Mexico, a resolution is achieved; Eastern begins DC-7B Golden Falcon flights from New York to Mexico City via New Orleans on July 23. Five days later, a DC-7B collides on the ground at Miami with one of the company's L-1049s; although there are no fatalities, the former catches fire and must thereafter be written off. Service to the Mexican capital from the U.S. capital at Washington, D.C. is started on September 23.

A Martin 4-0-4, with three crew and two passengers, must be written off following a hard landing at Massena, New York, on November 14; there are no fatalities.

During the year, the carrier employs a single L-1049E and five L-1049H Super Constellations, the latter as freighters. In the same period the first Pitcairn PA-5 Mailwing constructed is donated to the National Air and Space Museum, where it becomes the second EAL aircraft donated to the Smithsonian and a long-lasting exhibit.

Following retirement of the last DC-4, the fleet in **1958** comprises 187 aircraft: 7 DC-6Bs, 48 DC-7s, 18 L-749s, 38 L-1049s, 20 CV-440s, and 56 Martin 4-0-4s.

A DC-7B crashes at Santa Monica on March 10 prior to delivery and is not replaced. A hard landing wrecks a Martin 4-0-4 at Melbourne, Florida, on March 17; none of the three crew or seven passengers are injured.

The first L-188 is accepted on October 8; six more are on hand by year's end. No major or significant new route or unique operational activity occurs except for a strike by flight engineers at the end of November over a demand that they be pilot qualified. The issues debated are the same as those being simultaneously negotiated at **American Airlines**. When the CAB allows **Northwest Airlines** to begin direct service between Chicago and the metropolitan Florida markets of Miami and Tampa on December 6, its interchange agreement with Eastern is terminated.

The 38-day strike by flight engineers ends on January 1, **1959** as Eastern drops a company requirement that they have pilot training.

On January 12, the first 2 of 40 Lockheed L-188 Golden Falcon turboprops are placed in service between New York and Miami. At the same time, a third Electra commences Miami to Montreal via New York Electra flights. With nine additional turboprops available, the company initiates Electra service during the next two weeks to Atlanta, Chicago, Cleveland, Detroit, Newark, San Antonio, Tampa, and Washington, D.C. Miami–San Juan Electra flights are launched on February 22.

A DC-7B, en route from Miami to New York with 60 aboard on July 22, veers off the runway at Idlewild, damaging its left wing and engines after losing two wheels during the landing; two passengers are treated for shock.

Also during the month, the world's first no-reservation air shuttle, the Ponte Aerea, is started between São Paulo and Rio de Janeiro, Brazil, beating the Eastern concept into operation by two years.

Malcolm A. MacIntyre becomes president/CEO on October 1. Rickenbacker remains chairman and former Executive Vice President T. F. Armstrong becomes executive vice president-finance. Also in October, the last L-188 is delivered.

Late in the year, the company receives its first jetliner, a DC-8-21, carrying the title "Fly Eastern's Golden Falcon Jet DC-8B"; over the next 18 months, the new Douglas jetliners will carry 8 more major livery variations.

The fleet now comprises 228 aircraft serving 128 cities in 27 states; included are 5 L-1049Cs converted into freighters during the year. Airline employment is 18,000.

On the third and fourth days of **1960**, two L-749s crash, one each at Philadelphia and Washington, D.C.; although both Constellations are fully booked, no serious injuries result.

The carrier introduces its first pure jet, the Douglas DC-8-21, on the New York (IDL)–Miami run on January 24. An L-188A with 67 aboard crashes in fog at New Orleans on February 4; no serious injuries are reported. Nine days later, a fire alarm causes an L-1049C to abort its take-off from Washington, D.C. (DCA); the plane skids on slush and crashes, but no serious injuries are recorded.

As the result of hitting an air pocket during a February 26 St. Louis to New York flight, 25 passengers aboard a DC-7B are hurt.

As the result of a running-light failure at St. Louis on March 8, a DC-7B crashes while landing; the plane is badly damaged and all 51 aboard receive minor injuries. The next day, an L-749 crashes at New York (LGA); again, injuries are few. Also in March, a new customer services department is established and charged with holding and increasing ridership. At the same time a new advertising campaign is undertaken: "Dependability from the Ground Up."

During the second quarter, the company's service from Miami to Milwaukee via Chicago is extended on to Minneapolis-St. Paul, which has not seen an EAL service since the end of the interchange agreement with **Northwest Airlines** in late 1958.

Nonstop New York to New Orleans DC-8-21 service begins on April 12 followed, on June 1, by an all-cargo run from Newark to Atlanta. DC-8-21s are placed on the New York to Bermuda route on August 15. An October 1 Jacksonville-Miami Martin 4-0-4 service with 27 aboard lands safely at Orlando after colliding with a private Beechcraft; the latter crashes and its pilot is killed.

Three days later, on October 4, Flight 375, an Eastern L-188 with 72 aboard and just 150 ft. into the air after takeoff from Boston for Atlanta, passes through a large flight of starlings. The turboprop's left wing plunges down, while the nose ascends; the aircraft rolls over and plunges into Boston Harbor (71 dead). For five years the cause of the crash is believed to be have been the birds, but in a 1966 trial it is shown that faulty airline maintenance involving the copilot's seat caused the accident.

Pittsburgh to Miami economy flights begin on October 12; the next day, fully amortized Super Constellations stretch this \$40 Air Bus service to Miami from Cleveland, Pittsburgh, and St. Louis.

A Martin 4-0-4 is substantially damaged in a November 3 aborted takeoff from Wilmington, Delaware. On November 17, a DC-8-21 with 107 aboard aborts its takeoff from Boston after colliding with a flock of sandpipers; no injuries are reported.

Orders are placed in December for 40 Boeing 727-25s and 10 (later 15) B-720-025s. Ten of the latter are to be sold to Prudential Insurance Company and leased back; all are to be powered by Pratt & Whitney JT3C-12 turbojets and are the only B-720s so equipped.

Meanwhile, a St. Louis-Tampa Air Bus route is added. A 12-day wildcat pilots strike costs the company \$8 million in lost revenues.

By year's end, DC-8-21s have replaced Constellations and DC-7Bs on all New York services to Florida, Atlanta, Houston, and New Orleans. The last 12 remaining L-649 and L-749s are sold to the New York-based Transit Equipment Company for delivery before the new year.

Largely as the result of the recession and pilots' strike, EAL—for the first time in 26 years—suffers a net loss: \$3.6 million.

The Flight Engineers International Association (FEIA) strikes six carriers, including EAL, on February 18, 1961; the strike lasts six days and ends when President Kennedy appoints a special commission headed by Professor Nathan Feinsinger to recommend a solution. It costs the airline \$5.5 million in lost revenue.

A CV-440 with 45 aboard encounters clear-air turbulence over Jacksonville, Florida, on April 9 that results in severe injuries to one passenger and a flight attendant.

Employing fully amortized Super Constellations painted in red-and-white livery, Eastern begins what would become its world-famous Air Shuttle on April 30, linking Washington, D.C., New York, and Boston. The hourly, no-reservation, no-frills experiment, an extension of the Air Bus concept, will become a permanent fixture, even after Eastern's demise. In single-class seating configuration, jetliners become the most essential transportation medium between the three northeast cities. The shuttle service guarantees that all wanting to fly will be guaranteed a seat—even if a backup plane must be dispatched as an extra section for one passenger. The first one-passenger extra section flight is made on June 12—the same day EAL's shuttle terminal opens at New York (LGA)—and is attended with enormous press coverage.

While landing in a thunderstorm at Orlando on July 19, a DC-7 with 29 aboard crashes after its nose gear fails; although the propliner is badly damaged, no major injuries are reported. On July 24, Flight 202, an Electra with 38 passengers and en route from Miami to Tampa, is forced by an armed hijacker to fly to Cuba, despite the efforts of an intercepting USAF fighter plane to force it back to Florida. When the U.S. requests the return of the craft, crew, and passengers, Premier Fidel Castro indicates that the personnel may leave, but that the American government must negotiate for the aircraft by returning six **Cubana**

(**Empresa de Cubana de Aviacion, S.A.**) planes. Secretary of State Dean Rusk rejects the proposal. Cuba offers to return the L-188A on August 6 in exchange for a Cuban patrol boat brought to Key West by Cuban defectors; the arrangement is completed a week later. As events unfold during the remainder of the decade and into the 1970s, more Eastern aircraft will be hijacked to Cuba than any other airline.

Air Shuttle schedules on August 1 are doubled to every hour, on the hour, between New York and Boston. Two days later, an L-1049G freighter arriving in New York from an international flight is destroyed when the failure of its main landing gear causes it to crash; one of the three crewmen receives minor injuries.

During the month, 12 Constellations and 35 crews are assigned to the Air Shuttle service.

On August 25, the first of 15 new B-720-025s is received; the entire B-720 order when delivered will be valued at \$66 million. B-720-025 service on Florida routes starts by month's end. First-class passengers on the jetliners receive Golden Falcon Service, while those in economy have Deluxe Coach Service.

On September 3, the CAB approves a transfer of routes in Vermont and northern New York State to **Mohawk Airlines**, which will take them over on September 12. The next day, September 4, the main landing gear of a DC-7 collapses during the plane's San Antonio landing; none of the 25 people aboard is hurt. Two days later, four Martin 4-0-4s are assigned as shuttle backup aircraft.

By the end of October, Air Bus destinations include Miami, New York, Newark, Philadelphia, San Juan, Tampa, Pittsburgh, Cleveland, St. Louis, and Detroit.

A record seven Air Shuttle sections are flown on November 26 for one scheduled departure between New York (LGA) and Boston. At the year's end, Air Bus service is launched from Boston to Miami and Tampa.

As Boeing 720Bs enter inventory, the Lockheed L-649s and L-749s are now withdrawn from frontline service, and Capt. "Dick" Merrill, the company's most famous pilot after the chairman, is forced to retire under the FAA's new 60-year-old-and-out mandatory retirement rule.

The net loss this year grows to \$9.6 million.

Pilot error causes an L-188 to land wheels up at Birmingham, Alabama, on January 14, 1962; none of the 30 people aboard the plane is hurt.

Eastern and **American Airlines** make a joint request of the CAB on January 23 for permission to merge with American the surviving carrier. As the largest merger proposal since **United Air Lines/Capital Air Lines** in 1960, the application generates heated discussion and much opposition.

Employing five Douglas DC-7Bs, direct Boston-Washington Air Shuttle service is launched on February 1. A month later, on March 1, \$75 daytime/\$57 nighttime DC-8-21 shuttle flights are inaugurated between New York (IDL) and Miami; the service is shortly thereafter withdrawn.

A second New York departure point for the Air Shuttle, Newark, is offered, beginning on April 29. Also during the spring, the Air Bus network is expanded to include Chicago, Cincinnati, Columbus, Toledo, Minneapolis (MSP), and Fort Lauderdale. To relieve the Martinliners and expand capacity, 10 L-1049Gs are assigned to the Air Shuttle fleet in May. One of these suffers a nosewheel collapse after landing at New York on May 28.

A DC-7 is involved in an accident at Miami on June 8 while taxiing out for takeoff on a training mission.

On June 11, the one-millionth shuttle passenger is boarded and the Air Shuttle is publicly commended by the CAB Chairman Alan Boyd.

The **American Airlines** merger proposal is withdrawn in July.

A B-720-025 undershoots the runway while landing at New Orleans on August 30; none of the 43 people aboard is hurt.

A DC-7B crashes after control of it is lost on a wet runway during landing at Daytona Beach, Florida, on September 19. Two days later, a B-720-025 bounces on landing and crashes; none of the 20 people aboard are injured.

The last Martin 4-0-4s are now retired and seven DC-6Bs leased from **Trans-American Airlines** in 1957 are ordered returned.

A DC-7B is lost on November 30 while landing in heavy fog at New York (IDL) after a service from Charlotte; of the 6 crew and 45 passengers aboard, 25 are killed.

Unsatisfied with the airline's acceptance of the recommendations of the Feinsinger Commission, FEIA again strikes EAL, this time for 30 days and contributes significantly to the carrier's \$15-million loss for the year.

On February 15, 1963, a New York to Miami Air Shuttle is launched. With insufficient aircraft to handle the extra sections required, this Florida no-frills, walk-on experiment is terminated at the end of the winter tourist season.

While landing at Boston on March 12, a DC-7B with 20 aboard crashes after its right main landing gear collapses.

A renewed Eastern-American Airlines merger proposal is rejected by the CAB in April.

En route from New York to Florida on June 23, a DC-8-21 with 69 aboard encounters clear-air turbulence north of Norfolk, Virginia, which results in serious injury to three passengers.

A bomb hoax causes a flight recall at Newark on August 20, but the next day is worse. When the pilot misjudges the leveling-off of his CV-440 while landing at Wilkes-Barre-Scranton Airport, it crashes with 10 aboard. Improper extension of the landing gear prior to landing forces a DC-8-21 with 28 aboard to crash after touchdown at Orlando. No injuries are reported from either incident. Two more flights are recalled on September 4 for bomb threats.

A DC-7B, with 5 crew and 40 passengers, is destroyed as the result of a bad landing at Nashville on September 28; there are no fatalities.

A DC-7B with 29 aboard is hit by lightning near Atlanta on November 1; although the plane is damaged, it is able to make a safe landing. The No. 4 engine of a B-720-025 explodes in flame just after the plane's takeoff from Boston five days later; a fast emergency landing is made and none of the 38 people aboard are hurt.

En route from New York to Mexico on November 9, a DC-8-21 with 124 aboard falls 13,000 feet in a downdraft. The plane is able to land safely at Barksdale AFB, Louisiana; 17 are injured.

On December 1, a record 20,000 passengers are carried in one day on the Boston, New York, Washington shuttle. Two days later, a DC-8-21 with 70 aboard encounters clear-air turbulence near Lakeland, Florida; a stewardess and a passenger are both seriously injured.

A B-720-025 loses an engine before takeoff from New Orleans on December 13.

On December 15, Chairman Rickenbacker, at board insistence, relinquishes the reins of command as a new management team, headed by Floyd D. Hall, formerly of **Trans World Airlines (TWA)**, is brought in to take over. For the two days between the end of Malcolm MacIntyre's employment and the start of Hall's, the board votes Vice President Maurice "Lefty" Lethbridge president with all rights and privileges; his two-day, but official, presidency is the shortest in the history of any major American commercial aviation enterprise.

At this point, 20% of the company's total enplanements are Air Shuttle boardings and one more L-1049C is turned into a freighter. The loss for the year totals \$37.8 million on revenues of \$403 million.

The first regular flight of a Boeing 727-25—aptly named the "Whisperjet"—is over the Philadelphia-Miami via Washington, D.C. route, on February 1, 1964. On February 25 while en route to New York from Mexico City, Flight 304, a DC-8-21 with 7 crew and 51 passengers, fails its takeoff from Moisant Airport at the intermediate New Orleans stop and crashes into Lake Pontchartrain; there are no survivors.

New York-Miami B-727-25 service begins on March 1. President/CEO Hall institutes a company revival program labeled "Operation Bootstrap" at a Houston meeting in June.

Following an accident to an L-1049C on the ground at New York (LGA) on July 15 in which a stewardess is badly hurt, a DC-7B with 5 crew and 71 passengers undershoots its landing at Richmond, Vir-

ginia, the next day; no major injuries are reported. Four days later on July 20, another DC-7B with 5 crew and 52 passengers strikes a runway fault while landing at Charlotte, North Carolina, and crashes; again, no injuries are noted. On July 24, a passenger failing to heed the fasten seat belt sign is seriously hurt when a DC-8-21 with 137 aboard encounters turbulence near Gainesville, Florida. Much emphasis is placed on new equipment and 10 more B-727s are requested on August 1.

The successful Air Bus service is terminated on September 1.

On September 23, a ground crewman is sucked into the jet engine of a DC-8-21 with 99 aboard and killed as the aircraft is preparing for its San Juan gate departure. The DC-7B Boston-Washington shuttle service, upgraded with such amenities as beverage service and meals, is renamed the Executive Shuttle on October 1.

Airline employment is 19,532 and the fleet includes 174 aircraft.

During the year, an new two-tone blue and white color scheme and a simplified falcon logo is unveiled on one each B-720-025, L-1049G, L-188A, CV-440, and DC-8-21.

Enplanements for the year total 11,729,089 and 55.7 million freight ton-miles are flown. Revenues for the year reach \$417.7 million and the net loss is \$5.8 million.

A total of 2,639 employees are hired in 1965. While taxiing at San Juan on January 8, the right axle of a DC-8-21 with 19 aboard suddenly breaks; all aboard deplane.

A significant number of DC-9-10s are ordered in February; the remaining DC-7Bs are traded to Boeing as part of the earlier arrangement.

Flight 663, a DC-7B with 5 crew and 79 passengers, crashes into the Atlantic Ocean off Jones Beach, near New York (JFK), just after takeoff for Richmond on February 8. There are no survivors and witnesses report that the pilot had been attempting to avoid a midair collision with a smaller aircraft.

The "New Mark" or "Hockey Stick" livery introduced on an experimental basis the year before now becomes permanent.

A DC-8-21 with 84 aboard makes a hard landing at New York (JFK) on March 5, so hard, in fact, as to cause the No. 4 engine to fall off. Several of the 58 aboard are hurt when an L-188 encounters clear-air turbulence near Tallahassee on April 19.

The Boston-Washington Executive Shuttle, having proved unsuccessful, is discontinued on April 25.

Lockheed L-188A Electras are assigned to the New York-Boston sector of the Air Shuttle on August 1; in the fall, the new turboprops also begin flying the New York-Washington run.

A DC-7B with 5 crew and 57 passengers is destroyed as the result of a bad landing at Charlotte, North Carolina, on October 16; there are no fatalities.

During the fall, President Hall accepts an invitation from the Newcomen Society to address it at a New York City dinner; as is the Society's custom, Hall's remarks are published as a small pamphlet, *Sunrise at Eastern: Re-Birth of a Pioneer Airline*.

En route to Boston from Newark on December 4, a Lockheed L-1049 Super Constellation, an Air Shuttle section (Flight 653) with 5 crew and 54 passengers, makes an emergency pull-up to avoid a suspected collision with a **Trans World Airlines (TWA)** Boeing 707-131B near Danbury, Connecticut. The Stratoliner, meanwhile, rolls to the right and down to the left, ensuring the collision. Keeping his passengers calm during their ordeal, intrepid EAL Capt. J. Charles White is able to guide the heavily damaged propeller plane to a crash landing on a Salem, New Hampshire, hill. Coming down, the plane bursts into flames and three are killed exiting the plane; Capt. White dies helping others off. Meanwhile, the less-damaged jet airliner lands safely.

Eastern now becomes the first carrier to order the new DC-8-61. Following negotiations, company officials and those from **Mackey Airways** file a joint merger petition with the CAB.

Passenger boardings climb 23.7% to 13,381,191 and cargo traffic is up by 16.4%. Income reaches upward 22.5% to \$507.5 million and a record \$29.7-million net profit is posted.

The decade-old activist group WHEAL ("We Hate Eastern Air Lines") now burns its charter.

The first of 15 DC-9-14s is received in April 1966 and is placed into service on the Boston, New York, Washington shuttle. On April 24, the first B-727-25 Whisperjet is assigned to the New York–Washington sector of the shuttle route. As more become available, they also fly short segments between Washington, Atlanta, the Carolinas, and Miami.

The last of 50 DC-7Bs is withdrawn in June, when Whisperjets begin flying the New York–Boston leg of the Air Shuttle service.

Beginning on July 8, International Association of Machinists and Aerospace Workers (IAM) machinists strike and shut down the company, along with four other airlines; the combined effect is to halt 60% of U.S. passenger service and 70% of air mail operations. After several weeks of negotiations, President Lyndon Johnson announces a strike settlement on television on July 29. However, on August 1, the IAM membership votes 2½ to 1 to reject the proposed new contract. Talks resume and on August 15, tentative agreement is reached on a new 3-year contract, which, after 43 days, receives 2-1 acceptance. The job action had been the longest and costliest strike in American commercial aviation history to date.

The twin-jet DC-9-31 Whisperjet II joins the transport roster in late December and, by year's end, EAL officials note that 65 B-727s and DC-9s have entered service since April.

Enplanements are 13,373,190. The year's net profit is \$14.7 million. The employee population in 1967 is 28,738.

On January 8, Miami-based **Mackey Airways** is taken over, providing Eastern access to Nassau and Freeport in the Bahamas from several Florida gateways.

Eastern becomes the first to place the DC-9-31 into service when a unit commences regularly scheduled flights on the New York, Boston, Washington shuttle on February 1. The DASH-31 is tailored exclusively for the Shuttle with extra seats added in place of galleys; indeed, it is the first jetliner type refined downward to operate on segments of less than 200 miles.

The first 6 of 17 ordered DC-8-61s, "Super 61s," begin to enter service on March 3 between New York and Miami and San Juan.

The CAB gives the company a St. Louis to Seattle route in April, which is started from Miami on June 13 via Huntsville, Alabama, and is labeled the "Space Corridor."

President Hall becomes board chairman/CEO, with Arthur Lewis named president, and, in July, the airline begins transatlantic and transpacific troop ferry flights under contract to U.S. Air Force's Military Airlift Command (MAC).

On August 5, 86 African-American children, accompanied by Mayor Lindsay, are given one-hour sight-seeing flights over the New York City metropolitan area as part of the Big Apple's summer youth program.

Beginning on September 5, 18 weekly nonstop flights are added from New York to Montreal for last-minute visitors to Expo '67.

Thirty-two other new jetliners are received during the year, including 18 DC-9-31s and 14 B-727-25QCs. Orders remain outstanding for 65 others.

Also, former president Rickenbacker's insightful memoirs are published under the simple title *Rickenbacker* (Englewood Cliffs, N.J.: Prentice-Hall).

Passenger boardings jump 30.5% to 19,242,000 while freight traffic swells by 42.1%. Revenues advance 31.3% to \$657,804,000 and a \$24,114,000 net profit is reported.

On January 14, 1968, 32 lawsuits resulting from the October 1960 Electra crash are settled out of court for \$1,125,000.

The Air Shuttle route is operated, as of February 1, exclusively with DC-9-31s, with L-188As as backup. The last Super Constellation Air Shuttle section is flown New York–Washington on February 14; operated on Valentine's Day, company publicists announce the plane's retirement with the headline "Kiss Connie Goodbye."

Orders are placed on March 29 for 25 Lockheed L-1011 TriStar 1s, plus 25 options. In the next 10 months, the carrier will accept delivery

of 67 new jetliners: 49 DC-9-31s, 10 DC-8-61s, and 8 B-727-25QCs. In April, 11 L-1049As are sold to the Aviation Corporation of America.

As the result of a two-month pilot slowdown, CEO Hall enters lower-level contract negotiations and awards the flyers a 39% wage increase.

In May, the carrier joins with Laurence Rockefeller's Olohana Corp. and the Dillingham Development Corp. to form the Dilrock-Eastern Company, a subsidiary designed to further develop the Kohala Coast area on the island of Hawaii.

A feed arrangement is made with **Pennsylvania Commuter Airlines**.

The final L-1049 and L-1049G Super Constellations are withdrawn and when, on June 2, the scheduled **Capitol International Airways** craft fails to arrive at Freeport, Bahamas, leaving nearly 1,000 tourists delayed for 8½ hours, Eastern is able to bring back 537 unhappy area residents to New York (JFK).

The company now joins with McDonnell Douglas in a demonstration and evaluation of the second French-made Breguet 941S STOL aircraft, which the manufacturer proposes to sell under the designation MD-188. For two months, beginning on July 31, the aircraft flies passengers on the high-traffic Boston, New York, Washington shuttle, where it enjoys no success.

Meanwhile, the Rev. A. D. King, brother of the late Dr. Martin Luther King, is put off a plane in Atlanta on August 2 after making joking remarks about hijacking it.

Following a three-year competition with **Delta Airlines**, **National Airlines**, and **Air Florida**, Eastern is chosen as the "Official Airline of Walt Disney World." This Florida concession is for \$1 million per year for a decade, largely for the construction of an "If You Had Wings" attraction at the new Orlando park.

Other facilities are also expanded. New regional reservations centers are opened in Atlanta and Woodbridge, New Jersey, and 10 terminals are upgraded. Opened are three new hangars and other maintenance facilities, four office buildings, and seven ticket offices.

Flight 950, a B-720-025 with 53 passengers and en route from San Juan to Miami on September 20, is hijacked by an armed gunman over the Bahamas and diverted to Cuba. The crew is allowed to fly the Boeing back empty while the passengers, held overnight, return to Florida on a chartered EAL Electra next day.

After a year of disagreement with CEO Hall on a variety of issues, President Lewis resigns at the beginning of November. He is replaced by Samuel Higginbottom, the executive vice president and general manager.

While preparing to depart on a service to Chicago on November 2, Flight 224, a DC-9-31 with 54 passengers, is seized at Birmingham, Alabama, by a 17-year-old, shotgun-armed youth who demands to be flown to South Vietnam. Disarmed by the pilot, the young man will receive psychiatric assistance and probation.

On November 23, five armed men, a woman, and three children, all complaining of U.S. corruption, hijack Flight 73, a B-727-25QC with 90 passengers, and force it to fly to Cuba. A man who purchased the group's tickets, but did not participate in the skyjacking, is later arrested.

Seven days later, on November 30, a Cuban refugee hijacks Flight 532, a B-720-025 with 45 aboard and en route from Miami to Dallas, and forces it to take him to Havana.

In a promotional move, Jack Nicklaus is signed on December 6 as Eastern's flying golf pro.

Employing the French-built Breguet 941 under the direction of A. Scott Crossfield, famed test pilot and vice president, EAL begins eight weeks of experimental flight testing, also in early December, of the new STOL-ports at Boston, New York, and Washington.

On December 19, a man with his four-year-old daughter in tow pirates Flight 47, a DC-8-61 with 151 passengers and en route from Philadelphia to Miami, to Havana. After Cuba's guests have returned to the U.S., Radio Havana reports that the man's "weapons" had consisted of a toy gun and a fake nitroglycerine bomb. When the man returns to the U.S. from Canada a year later, he will be captured, tried, and sent to jail for 16 months.

Due to the increasing frequency of skyjackings, the carrier distributes a memo to all flight officers on December 21 outlining the steps to be taken when one occurs.

On the year, 18,809,000 passengers are originated and a total of 1,113,741,000 freight ton-miles are flown. A net loss of \$12 million is taken on overall income of \$744,777,000, a 13.2% increase.

En route from New York to Miami on January 2, 1969, Flight 401, a DC-8-61 with 146 aboard, is forced to divert to Cuba by a hijacker identified as T. G. Washington. He is accompanied by his 3-year-old daughter, who he has taken from his ex-wife in Philadelphia, and holds a 2-year-old boy hostage during the flight; the passengers return from Havana to Florida on a chartered aircraft the next day. The man will sneak back into New York two years later, but will be killed in a failed bank robbery.

Espousing his hatred for America and Eastern Air Lines, a youth with a knife forces Flight 831, a B-727-25QC with 79 passengers and en route from Miami to Nassau, to fly to Havana on January 9. The pirate will return to the U.S. via Canada later in the year, but will be captured in 1972, tried, and sentenced to prison for 20 years.

Ten days later, on January 19, a youth with a hand grenade forces Flight 9, a DC-8-61 en route from New York to Miami with 171 passengers, to fly to Havana; the plane and its passengers return to Miami the same day. The pirate will later receive a five-year prison term in the Dominican Republic.

Vice President Crossfield reports the results of the December STOL experiments the same day and notes that the airline will draft specifications for a short takeoff and landing aircraft.

The hijacking siege continues in February. On February 3, four armed Cubans seize a Newark-Miami B-727-25 service, Flight 7 with 94 passengers, and force it to Havana. As has become common practice, the passengers are allowed to return aboard a chartered flight, while the crew returns the jetliner.

Five days later, the company begins late-night shuttle service, Boston-New York-Washington, D.C. The next day, a gunman seizes a San Juan-Miami flight and rides it to Cuba.

Flight 950, a DC-8-61 with 119 passengers and en route from San Juan to Miami on February 10, is diverted to Havana by a lone gunman. On February 16, U.S. citizen S. Sperduto is held at Bermuda after his threat to force a DC-8-61 Boston-San Juan flight to Havana. Flight 955, a DC-8-61 with 67 passengers and en route from St. Louis to San Juan on February 25, is diverted to Havana by revolver-wielding Charles Green, just after takeoff from an intermediate stop at Atlanta. Green will surrender to U.S. authorities in Prague the following year; taken back to the U.S., he will be tried and sentenced to prison for life.

On May 1, DC-8-61 Sunrise Express service is inaugurated from New York to Miami.

Flight 7, a DC-8-61 with 89 passengers and en route from Newark to Miami on June 22, is hijacked to Cuba by a man with a knife who says his sick wife wants to see her family in Cuba. At Havana, the man, his wife, and daughter deplane before the Douglas returns to Miami.

On June 28, Flight 173, a B-727-25 with 104 passengers and en route from Baltimore to Tampa, is also forced to Cuba by a knife-wielding hijacker. The pirate will return to the U.S. via Canada five months later. He will be captured in 1970, tried, and sentenced to 15 years in prison.

The last piston-powered aircraft, a CV-440, is retired on July 1.

While en route from Philadelphia to Tampa on August 5, Flight 379, a DC-9-31 is subjected to an attempted hijacking by a 73-year-old knife-wielding passenger, who also shows a straight razor. The senior citizen is overwhelmed and handed over to police when the plane lands in Florida. Criminal charges will be dropped when he agrees to confinement in a mental facility.

As a result of the CAB's finding in the August Southern Tier case, the company receives transcontinental access to Los Angeles from Atlanta as well as a route from the Georgia capital to Dallas.

Flight 925, a DC-8-61 with 96 passengers and en route from New York to San Juan on September 7, is diverted to Havana by two armed

men; the plane returns to Miami and then continues its flight to Puerto Rico. One of the air pirates, Felix Rolando Peterson-Coplin will lead an open life as a fugitive for the next three decades before surrendering. After pleading guilty to one count of endangering the passengers and crew, he will be sentenced in Federal District Court in Manhattan on June 25, 1998 to a prison term of six-and-a-half years.

Three days later on September 10, J. L. Gonzalez-Medina, 19, is captured at San Juan before he can force Flight 929, a DC-8-61 with 202 passengers scheduled to takeoff for New York, to fly to Cuba. Gonzalez-Medina will be sent to a psychiatric hospital in January.

Nonstop B-727-25C return flights commence on September 27 between Atlanta and Los Angeles.

Having suffered 17 aircraft hijackings since September 1968, the company now institutes the industry's most extensive passenger screening program.

On December 22, the carrier places into operation at New York (JFK) the industry's first computerized system for issuing seat assignments and boarding passes to passengers as they check in. Late in the year, new DC-8-63s are acquired.

The fleet now includes 240 aircraft: 24 L-188s, 66 DC-9-31s, 15 DC-9-14s, 23 DC-8-61s, 17 DC-8-21s, 11 B-727-225s, 75 B-727-25s, and 9 B-720-025s. Of these, 5 DC-9-30s, 1 DC-8-61, 6 DC-8-63s, and 11 B-727-225s join the fleet during this year. Enplanements total 21,663,840 and revenues are \$869.55 million. Although the operating profit is \$23.84 million, another \$2.32 million net loss is suffered.

A man, accompanied by a woman and two children and carrying a gasoline bomb and gun, forces Flight 1, a B-727-225 with 104 passengers and en route from Newark to Miami on February 16, 1970, to fly to Cuba.

Beginning on March 8, the carrier joins with the Florida Hotel and Motor Hotel Association to offer military personnel reduced fares and hotel rates on weekends.

After telling a stewardess aboard Flight 1320, a DC-9-31 with 73 passengers and en route from Newark to Boston on March 17, that he does not have the fare, passenger John J. Divivo draws a pistol and demands to be taken to the cockpit. He orders the flight deck crew to "take me east." When told the plane would have to land at Boston first to refuel, Divivo opens fire, wounding Capt. Robert Wilbur Jr. and mortally wounding James E. Hartley Jr. in a struggle during which Divivo himself is shot and disarmed. Wilbur is able to land the plane safely at Boston, after which he, Hartley, and Divivo are rushed to hospital. Hartley dies and Divivo will commit suicide in prison in October.

U.S. Representative Scheuer of the Bronx is removed from a flight on March 20 and searched after a stewardess reports overhearing a part of his conversation with a fellow passenger on how easy it is to "kill copilots." A Suffolk County, New York, grand jury indicts pirate Divivo for murder on March 25.

Although Eastern had been one of the original B-747 Jumbojet customers, it elects to transfer its delivery positions to **Trans World Airlines (TWA)** in favor of Lockheed L-1011 TriStar 1s. However, until the smaller wide-bodies are available, the company, to maintain its market share, will lease three **Pan American World Airways (1)** B-747-121s. Meanwhile, as B-727-225s join the fleet, the older B-720-025s are leased out at a profit. Once the charters are completed, the aircraft are turned over to Boeing as partial payment on the B-727s.

On April 29, Roberto Cruz is held at New York after disrobing aboard a plane inbound from San Juan; another passenger on the same flight, A. Feliciano, is held for striking a stewardess.

On May 10, the airline announces that it will name its Miami training center in honor of slain copilot James E. Hartley.

During the year, special advisor Frank Borman is named a vice president for maintenance and two Lockheed L-1329 JetStars are acquired.

Despite a skyjacker's threat to set fire to Flight 945, a DC-8-61 en route from Boston to San Juan on September 22, the pilot maintains course and lands in Puerto Rico, where the assailant surrenders. The man is returned to Massachusetts where, instead of being tried for air

piracy, he is convicted on an outstanding warrant for robbery-homicide and is given a life prison term.

On October 27, officials of Eastern and **Caribbean-Atlantic Airlines (Caribair)** announce the \$10.4 takeover of the latter by the former, together with its routes and other assets, including three DC-9s.

Gunman George Jones takes over Richmond-Dallas via Atlanta scheduled Flight 257, a DC-9-31 with 78 passengers, on November 13 and orders it flown to Havana via a refueling stop at Jacksonville.

The first of three B-747-121s leased from **Pan American World Airways (1)**, the *Clipper Ocean Express*, arrives on November 26; it like the other two, will be painted in the usual EAL colors.

Also during the year, the carrier, working with Rockresorts and Laurence S. Rockefeller, undertakes the construction of the Cerromar Beach Hotel; the 508-room facility is adjacent to the Dorado Beach Hotel in Puerto Rico.

Passenger traffic increases 3.2% as 22.38 million passengers are carried; freight ton miles advance 1.9% to 150.5 million. With revenues of \$971 million, Eastern is just \$29 million off the billion-dollars annual income mark. Net earnings turn around from loss to a \$5.46-million gain.

The second of three B-747-121s leased from **Pan American World Airways (1)**, the *Clipper Spark of the Ocean*, arrives on January 1, 1971 and is followed by the *Clipper Ocean Herald*, on January 3. The company places these three Jumbojets into service at the end of the month on its New York and Chicago-Miami and New York-San Juan services.

Flight 939, a DC-8-61 with 82 passengers and en route from New York to San Juan on April 1, is hijacked to Havana by a lone gunman.

Seeking a trip to Italy, a lone assailant armed with a pistol that will turn out to be fake, attempts to hijack Flight 403, a DC-8-61 with 59 passengers and en route from Newark to Miami on April 21. The pirate is overpowered by the crew and turned over to police. Given a trial, he will be sentenced to a suspended three-year prison term.

J. O. Plimpton Jr. is named a vice president on May 5, becoming the highest-ranking African-American with any U.S. airline to date.

The CAB authorizes the **Caribbean-Atlantic Airlines (Caribair)** merger on May 21 and the final L-1049C Super Constellations are now retired along with the three DC-8-51s.

En route from Miami to New York on May 28, Flight 30, a B-727-225 with 138 passengers, is taken over by ex-policeman J. E. Bennett. After allowing the passengers to deplane at New York, Bennett orders the Boeing to fly to Nassau in the Bahamas, where the pilot takes a female hostage and demands a \$500,000 ransom. The next morning, Bahamian authorities seize Bennett. He will be deported back to the U.S. Upon examination, he will be found mentally unbalanced and will be sent to a psychiatric facility.

The first Lockheed L-1011 TriStar, destined to be delivered to the carrier the following spring, is exhibited at the Paris Air Show in June wearing full EAL colors.

On September 3, off-duty crewmen and several passengers of Flight 993, a DC-9-31 with 86 passengers and en route from Chicago to Miami, subdue J. M. B. Guerra, who has attempted to hijack them to Cuba by brandishing a screwdriver. Three passengers are slashed in the struggle and when the plane reaches Miami the FBI takes the would-be pirate into custody. He will receive a 20-year prison sentence.

Self-styled left-wing radical R. F. Dixon hijacks Flight 953, a B-727-225 with 46 passengers and en route from Detroit to Miami on October 9, and forces it to Cuba after brandishing a gun and holding a stewardess hostage; the craft and its people, less Dixon, return to Miami next morning. Dixon will be captured in Michigan in 1976 and is sentenced to 40 years in prison.

Windsor Locks, Connecticut, police thwart the November 27 attempt of W. J. Mingey to hijack a DC-8-51 to North Vietnam.

A DC-9-31, en route from Miami to New York via Raleigh/Durham and Richmond on December 4, collides with a Cessna 150 while both are on landing approach to Raleigh/Durham; both occupants of the light-plane are killed, but the jetliner is able to land safely.

Federal marshals and the FBI arrest B. Beresford at New York (JFK) on December 17 after he attempts to set fire to a B-747-121 during its flight from San Juan. Flight 9701, a B-727-25C, is involved in an accident at Atlanta on December 21.

The Cerromar Beach Hotel now opens for business.

Enplanements for the year total 22,638,930. A net profit of \$5.6 million is reported, atop an operating gain of \$115.2 million, with overall revenues of \$1.05 billion.

On April 17, 1972, Berea, Ohio resident W. H. Greene 3rd hijacks a DC-9-31 with 91 over Florida, and demands \$500,000 in ransom and a trip to the Bahamas. The pilot, instead, flies to Chicago, where Greene, not knowing where he is, is arrested by police as he leaves the plane.

The first of nine Lockheed L-1011 TriStar 1s to arrive on the year is delivered on April 5.

On April 26, Eastern becomes the first carrier to place the L-1011 into service, labeling it a "Whisperliner," and flying it from Miami to New York. The flight comes as something of a surprise as regularly scheduled TriStar flights are not advertised to begin for another four days. The L-1011 introduction allows return of the **Pan American World Airways (1)** Jumbojets in May.

New L-1011 service is introduced between Atlanta and Jamaica while scheduling changes on other routes allow aircraft utilization to be increased by 5.6%.

Boeing begins the systematic conversion of EAL's 116 B-727s to wide-body interiors.

A new computer center is occupied and, in seven big markets, computerized ticketing and seat selection is launched.

The Air Shuttle is briefly operated from New York to Montreal; it is marketed in French Canada as *L'Aeronavette*.

Armed with a pistol and claiming to possess dynamite, F. W. Hahneman hijacks Flight 175, a DC-9-31 with 55 aboard and en route from Allentown to Miami on May 5, and diverts it to Washington, D.C. (IAD), where he releases the passengers and receives parachutes and a \$303,000 ransom. The aircraft takes off, but is soon back because the pirate is dissatisfied with the denominations of the dollar bills in the bundle of ransom money. New bills are provided and the plane flies to New Orleans, tailed all the way by USAF interceptors and a propjet with armed law enforcement agents aboard.

On May 6, after an anxious night and refueling, the Douglas departs in the direction of Belize and Honduras, where Hahneman bails out near San Pedro Sula, 20 miles from the Caribbean coast in northwestern Honduras. The DC-9-31 returns to Merida, Mexico, and thence to the U.S. On May 11, searchers for the Honduran government report finding a parachute and jumpsuit believed to have been discarded after the skyjacker's descent. On May 3, Hahneman surrenders at the U.S. embassy in Tegucigalpa and is returned to Miami the next day to face charges. He proudly boasts on reaching Florida that none of the ransom money will ever be recovered.

Flight 346, a DC-9-31 with four crew and six passengers, suffers the collapse of its main landing gear after a heavy landing at Fort Lauderdale-Hollywood Airport on May 18; although the plane catches fire and must be withdrawn, there are no fatalities.

Acting on a June 13 tip, the FBI arrests four men and charges them with a conspiracy in the attempted theft of \$3 million in securities aboard a flight from Greensboro, North Carolina, to Atlanta. G. C. Cralley, hidden in a box in the cargo bay, allegedly planned to break out of the box and into the securities container sometime during the flight. Waiting FBI agents arrest B. R. Anthony, J. L. Baker, and Cralley when the plane arrives in Georgia; H. D. Sykes is picked up later.

Eighty persons aboard a DC-9-31 evacuate the craft at Charlotte Airport on August 28 after indication of a fire aboard; there is no fire.

An EAL TriStar 1 flies to England for the Farnborough Air Show wearing tail and fuselage markings of **British European Airways Corporation (BEA)**, which had ordered the L-1011 earlier in the year.

Following his trial, skyjacker F. W. Hahneman is sentenced to a life prison term in September. The money he had stolen and believed would never be found will be recovered a year later.

The company has six L-1011 TriStar 1s in service by October.

On October 29, former DOC official C. A. Tuller Jr. is sought in connection with a murder and attempted bank robbery in Arlington, Virginia. With his son and an 18-year-old accomplice armed with pistols and a shotgun, they kill a gate agent and wound another at Houston while hijacking Flight 496, a DC-9-31 with 47 aboard, to Cuba via a refueling stop at New Orleans. The father and son will return to the U.S., be captured in July 1975, and, upon conviction, will each be sentenced to prison terms of 50 years.

On approach to Miami (MIA) from New York (JFK) on December 29, Flight 401, an L-1011 TriStar 1 with 13 crew and 163 passengers, falls into the Everglades (99 dead). This is the first fatal crash of a wide-bodied jetliner and causes significant adverse press coverage. Some months later, it will be reported that the ghosts of the plane's pilot and flight engineer have appeared on sister ships carrying parts salvaged from the crash. Author John G. Fuller examines the accident and the ghost story in his 1976 paperback bestseller *The Ghost of Flight 401* (New York: Berkley Publishing) while, in 1977, Rob and Sarah Elder report on the tragedy in their *Crash* (New York: Atheneum). In 1978, John Fuller's daughter, Elizabeth Fuller, continues the story in her *My Search for the Ghost of Flight 401* (New York: Berkley Publishing). The same year, a television movie starring William Shatner will attempt to retell the story in *The Crash of Flight 401*.

Passenger boardings jump 11% to 25,437,000 and the carrier's systemwide load factor of 58.4% is the highest in the American trunk line industry. Cargo traffic is up an equally rewarding 11.9%. On revenues of \$1.16 billion, the net profit triples to \$19.93 million.

The workforce in 1973 is 36,531.

Laboratory technician H. C. Ballantine is arrested by police at New York (LGA) on January 8 and charged with attempted hijacking following his effort to board a jetliner with bottles containing cyanide gas.

A B-727-225, en route from New York to New Orleans, makes an emergency landing in Chattanooga on January 31 after passenger T. E. Sullivan claims he has a bomb; at the Tennessee airport, no bomb is found and Sullivan is arrested.

The Caribair integration is completed on March 29, allowing significant expansion of Eastern's services to 14 islands in the West Indies. Three ex-Caribair DC-9-30s are simultaneously purchased for \$7.3 million.

The company's route from Washington, D.C. (DCA) to Louisville is transferred to the local service carrier **Piedmont Airlines (1)**.

A Boeing 727-225 is involved in an accident at Toledo, Ohio, on April 10 and New York-Montreal shuttle flights begin on May 1.

The entire \$303,000 extorted by F. W. Hahneman the previous year is recovered by the FBI on May 9.

Eighty-two-year-old former chairman Rickenbacker dies at Zurich on July 23.

New maintenance facilities are opened at Miami and new passenger terminals at Newark, Miami, and San Juan.

President Higginbottom resigns on October 1; Chairman Hall resumes the presidency, with Frank Borman as executive vice president.

Boeing completes the task of converting the interiors of the company's B-727s to wide-body configuration while officials join with their counterparts from **Seaboard World Airlines** to petition the CAB for an interchange service that will provide the first through all-cargo service from Europe to the southwestern U.S.

The U.S. government announces on October 12 that, as a result of the energy crisis, a mandatory jet fuel allocation plan will take effect on November 1.

Two L-1011 TriStar 1s owned by Haas-Turner are in turn leased by EAL and **Air Canada, Ltd.** and are employed, beginning with the Canadian carrier in October, for additional capacity during the next five tourist seasons.

While en route from Miami to Pittsburgh on November 27, Flight 300, a DC-9-31 with 5 crew and 21 passengers, overruns the runway while landing at Akron-Canton Regional Airport on November 27. The

aircraft runs over another 110 ft. of unproved ground and plunges over a 38-ft. embankment; there are no fatalities, but 24 passengers are injured.

The last of 16 DC-8-21s and 17 DC-8-61s are sold (including three of the former and one of the latter to **Overseas National Airlines**) along with the two L-1329s as 16 more TriStar 1s join the fleet.

On November 29, company officials reveal that, during the first two weeks of December, they will cancel 8% of their schedule in hopes that heavy cuts during lighter travel periods will allow sufficient avgas reserves for service resumption during the holidays.

After instruments indicate there is a fire aboard, the pilot of a DC-9-31 with 86 aboard attempts to abort his takeoff from Greensboro, North Carolina, for Chicago on December 17, causing his plane to skid off the runway; one passenger is injured. Largely unnoticed during the year is the appointment of Barbara Barrett Smith to the right seat of a B-727-225; she is the company's first female pilot.

Customer bookings accelerate 4.4% on the year to 26,561,000 and cargo traffic gains by 11.7%. Although revenues total \$1.25 billion, expenses soar to \$1.27 billion. Consequently, operating income drops to minus \$19.5 million and the net loss of \$51.26 million is the largest reported by any U.S. major.

Airline employment is reduced 10.8% in 1974 to 34,057.

Because of cutbacks in the deliveries of jet fuel, eight daily shuttle services connecting Newark with Boston and Washington are terminated on January 7, along with shuttle flights to Montreal. The cutbacks do not affect the main Boston, New York, Washington shuttle. The Montreal and Newark shuttle stops are replaced with frequent reserved seat standard scheduled flights.

By May, the fleet includes just 13 L-188 Electras, all of which are employed as shuttle service backup aircraft.

A DC-3 first delivered on December 7, 1937 is sold to **Provincetown-Boston Airline (PBA)** on January 24; re-registered N136PB, it will gain fame as the highest-time unit of its type.

Retirement of the last 16 Electra turboprops begins and, on January 31, the layoff of 440 of 4,400 pilots brings company personnel cutbacks to some 4,000 (including 800 pilots) since the previous November. To help recover from the devastating 1973 performance, fares are increased.

On June 18, the U.S. Post Office orders the carrier to reinstate its night flight from Boston to New York and Atlanta in a move to ensure delivery of 500,000 pieces of mail daily.

Marshall Collins surrenders following his unsuccessful September 4 attempt to hijack Flight 1160, a B-727-225 after landing at Boston. Collins had permitted the rest of the crew and all of the passengers to deplane, but held the pilot hostage for three hours by menacing him with a razor, nail, and ax. Upon examination, Collins will be judged mentally unstable and will be sent to a psychiatric institution.

While en route from Charleston, South Carolina, to Chicago on September 11, Flight 212, a DC-9-31 with 4 crew and 78 passengers, comes in too low and too fast. It crashes into some woods 3.3 mi. short of the runway while on its final landing approach to Douglas Airport at Charlotte, North Carolina (71 dead). The accident is reported in William Stockton's *Final Approach: The Crash of Eastern 212* (Garden City, N.Y.: Doubleday, 1977).

Beginning on November 5, the carrier offers free alcoholic beverages to coach-class passengers on its New York to Miami and Fort Lauderdale flights while, on December 3, nonstop services are initiated from Pittsburgh to Toronto.

Based at both Miami and New York, the company sees enplanements advance by 5% to 27,354,000, but freight traffic is down by 10.7%. Although expenses jump 10.35% to \$1.45 billion, revenues are up a pleasing 17.4% to \$1.53 billion. The operating profit is \$70.7 million and a net profit of \$10.3 million is gained.

The workforce is further downsized in 1975, falling to 33,509.

In early January, the company receives the 1974 "Passenger Service Award" from *Air Transport World* magazine.

Laughlin Wright, who turns out to have been unarmed, commandeers Flight 140, a B-727-225 with 60 passengers during an Atlanta to Philadelphia flight on January 14 and demands to be flown to Puerto Rico. He is overpowered by crew members when the aircraft stops at Washington, D.C. (IAD) for refueling. Upon examination, Wright will be found mentally unstable and sent to a psychiatric facility.

New services are inaugurated from Fort Myers to Atlanta and from Miami to Montego Bay; meanwhile, on March 28, the policy of providing free alcoholic beverages to coach-class passengers ends.

In one of the more unusual reasons ever given for an airline work stoppage, flight attendants refuse to fly on a particular L-1011 Tri Star 1 on April 13 citing their fear that it is haunted.

Executive Vice President Borman becomes president on May 27.

Coming in to New York (JFK) from New Orleans on June 24, Flight 66, a B-727-225 with 8 crew and 116 passengers, strikes approach lights during a thunderstorm, crashes, breaks up, and catches fire (115 dead).

Another Boeing 727-225 is involved in a nonfatal crash at Raleigh, North Carolina, on November 12.

Meanwhile, throughout the year, the continuing fuel price crisis causes schedules to be cut back significantly; simultaneously, the experimental use of a TriStar on the Air Shuttle service proves uneconomical. The plane is now sold to **LTU (Lufttransport Unternehmen, K.G.)**.

The board on December 16 makes Borman both president and CEO.

On the year, passenger boardings grow a miniscule 0.1% to 27,686,000 but with 304.45 million FTKs flown, cargo is up a healthy 12%. Revenues total 1.62 billion and expenses are \$1.61 billion. Although an operating profit of \$6.4 million is realized, a net loss of \$53.9 million must be endured. The year's loss is \$88.7 million.

President/CEO Borman, to emphasize his identification with company workers, helps baggage handlers at Miami (MIA) deliver baggage on January 5, 1976. At the height of the company's financial difficulty in the winter, new president/CEO Borman takes immediate steps to cut costs. Contract and noncontract employees alike begin to take part in a wage freeze, as well as a profit-sharing program.

Four members of the Sam Melville-Jonathan Jackson unit, a radical prison-reform terrorist group, are indicted by grand juries in Boston and Portland for the nonfatal bombing destruction of an Eastern L-188A at Boston on July 2.

A psychiatric patient assaults a 6-year-old boy aboard a San Juan-New York flight on July 17; he later shoots a police officer with the latter's own gun upon the plane's return to San Juan.

With the help of the freeze and stringent cost controls, plus a reviving national economy, Eastern makes a turnaround. During the year, the carrier is able to increase its employment by 1.2% to 34,684; however, both the Dorado Beach Hotel and the Cerromar Beach Hotel in Puerto Rico are sold.

Chairman Hall retires in December and his post is given to President/CEO Borman.

Customer bookings grow 7.1% to 29,645,000, but freight is down again, by 9.2%. Although expenses are \$1.74 billion, they are covered by an operating income of \$1.82 billion. The operating profit is \$79.3 million and the net income of \$46.23 million represents a \$96 million reversal in fortune.

During the spring of 1977, Eastern agrees to lease four Airbus Industrie A300B4-103s, with manufacturer assistance, for test marketing flights. The R. Dixon Speas Associates management consulting firm is hired to provide reorganization recommendations.

A B-727-225, with 14 passengers aboard and en route from Miami to New York on May 12, makes a successful emergency landing at Tampa after its landing gear fails upon takeoff. Following an engine failure, another B-727-225 with 53 aboard aborts its takeoff from Washington, D.C. (DCA) on May 26 and slides off the runway; no injuries are reported.

In midyear, a new five-year Variable Earnings Program is established to help enhance the airline's profitability. Under this idea, employees pledge part of their salaries to support the company's overall profits in

poor years, while earning bonuses in profitable times. Such profitability would also help the company to buy newer, more productive aircraft.

The last propjet L-188A Air Shuttle service is flown on October 31 and the type is retired on November 1. The Lockheed Electras had been employed on the Air Shuttle, mostly as extra-section flights, in their latter years and despite the scares caused by accidents to some of the type earlier, the company flew the Electra longer than any other aircraft it ever owned.

On November 18, Airbus A300B4-103 test flights are undertaken from Newark to Miami. The European aircraft enter regularly scheduled service on December 13, flying from Newark and New York (LGA) to Tampa, Orlando, Miami, and Fort Lauderdale.

On Christmas Day, Pearl River, New York, resident Nikolai Wischnewsky, armed with a toy pistol and a transistor radio that he calls a bomb strapped to his leg, hijacks Flight 668, a B-727-225 with 31 aboard and en route from Jacksonville to Atlanta. At Atlanta, the pirate demands to be taken on to Miami and Havana, but is overpowered by two FBI agents and local police Lt. William Collier. Wischnewsky will be indicted on charges of air piracy, tried, convicted, and sentenced to 25 years in prison.

Late in the month under the FAA's 75-minute rule, the A300B4s commence service from New York to San Juan.

Enplanements for the year total 30,402,000. On revenues of \$2.03 billion, a \$34.73-million net profit is reported.

The number of employees is increased by 8.2% in 1978 to 37,100 and 8 DC-9-51s are purchased from **Allegheny Airlines (1)**.

Complaints against the carrier for poor service on the New York-Washington shuttle increase during January. On January 7, U.S. representative Joseph G. Minish urges the New York-New Jersey Port Authority to order the airline to restore the hourly shuttle between Newark and Washington discontinued four years earlier.

The carrier now engages in a new dual with **Pan American World Airways (1)**, **Air Florida**, and **Texas International Airlines** for the capture and merger of **National Airlines**; the case is put before the CAB.

A new advertising slogan "We Have to Win Our Wings Every Day" is introduced in television commercials starring Chairman Borman.

In addition, four Airbus Industrie A300B4-103s, under trial with assistance from the manufacturer, are purchased by the American major on April 6, giving the European short-hauler entry into the previously impenetrable U.S. market. During this Golden Anniversary year, the airline is able to order \$1.6 billion worth of these new aircraft (34 more) and serves with **British Airways, Ltd. (2)** as launch customer for the new Boeing 757-200 via an August 31 order for 21 Dash-225s.

In September, the 40-millionth visitor (cumulative) passes through the EAL "If You Had Wings" attraction at Walt Disney World in Florida. Eight DC-9-51s are delivered from **Allegheny Airlines (1)**.

During the year the Air Shuttle carries 2.7 million passengers, more than EAL carried during the entire decade 1930-1940.

Meanwhile, systemwide customer bookings accelerate 19.7% to 37,860,000 while FTKs are boosted 3.7% to 335 million. Overall income rises 16.88% to \$2.37 billion while expenses are held to \$2.28 billion. As a result, the operating profit is \$96.78 million. Eastern now completes its best profit year in history, chalking up net income of \$67.25 million, a 93.6% record leap. This comes on top of healthy showings in 1976-1977 and helps the carrier round out its first half-century in strong fashion.

Airline employment at the beginning of 1979 is 34,316. The fleet now includes 31 Lockheed L-1011-1 TriStars, 4 Airbus A300B4-103s, 53 B-727-225s, 46 B-727-100s, 24 B-727-25Cs, 9 DC-9-51s, 72 DC-9-31s, and 9 DC-9-14s. During the year, the company abandons its previous white livery and returns to an all-metal finish.

A DC-9-14 with four crew and one passenger is destroyed on takeoff from Miami on a February 9 training flight; there are no fatalities.

The Atlanta hub is strengthened during the year and used as a point from which to launch new services to Rochester, Norfolk, Tucson, Reno, Phoenix, Denver, and Albuquerque and flights to Guatemala are inaugurated from the Miami gateway.

Would-be hijacker Roberto Gonzalez Sanchez is overcome by passengers when, on June 30, he attempts to hijack Flight 932, an L-1011 with 306 passengers and en route from San Juan to Miami, and divert it to Cuba. Upon examination, Sanchez will be found mentally deficient and air piracy charges against him will be dropped. He is dispatched to a psychiatric hospital.

Seven B-727-225s and the nine DC-9-14s are assigned to the Air Shuttle fleet in July.

En route from Miami to Guatemala City on August 16, Flight 980, a B-727-225 with 91 passengers, is captured by a passenger who holds a penknife to the throat of a flight attendant and claims to have a bomb. The plane is diverted to Cuba, but as it approaches the airport at Varadero, Cuba, the pirate suddenly demands that it return to Key West. On the ground in Florida, the pirate is overpowered. Upon examination, the hijacker is found to be mentally unbalanced and is sent to a mental facility, as Roberto Gonzalez Sanchez was two months earlier.

A Boeing 727-25 crash-lands at Atlanta on August 22.

Recommended by a CAB law judge, a final positive ruling on a Miami-London route is sought from the regulators.

A B-727-225 with 101 aboard almost lands at a small Mecklenburg County, North Carolina, airport on December 1. The flight crew apparently mistook it for Douglas Municipal Airport, which is eight miles away.

En route from Washington, D.C. to New York City four days later, Capt. Larry Kinsey is forced to land his B-727-225 at Baltimore (BWI) because of an "insurrection" among passengers as the result of a seating dispute between smokers and nonsmokers.

Passenger boardings leap 12.9% to 42,745,000 while freight rises 2.9% to 344.8 million FTKs. Revenues jump 21.1% to \$2.88 billion, but expenses (led by increased fuel prices) rise 21.3% to \$2.77 billion. Consequently, the operating profit is \$111.06 million and the net is \$57.63 million, down 14.31% from the previous year.

The employee population is increased by 2.8% in 1980 to 40,000.

On January 31, the carrier's four A300B4-103s are placed on the New York-Boston shuttle; the 280-seat European jetliners are not allowed to fly into Washington, D.C. (DCA) due to safety concerns.

Four DC-9-51s are purchased from **Hawaiian Airlines**, while the fleet is also increased through the delivery of 15 B-727-225As and 7 A300B4-203s.

Plans are made to purchase a pair of **Qantas Airways (Pty.), Ltd.** Jumbojets for use on a new Miami to London service. However, when the route goes to **Pan American World Airways (1)** instead, the Australian arrangement is cancelled.

A B-727-225, with 114 aboard, avoids colliding in midair with a small private plane encountered just north of New York (LGA) on July 1 by a scant 300 feet.

Several newly arrived Cuban refugees, unhappy in the U.S., seize Flight 90, a B-727-225 with 53 passengers and en route from Miami to Orlando on August 16, and order it flown to Havana. The crew and passengers are allowed to return to Miami after a 3-hour wait at Jose Marti International Airport. The men are imprisoned in Cuba. The same day, four other Cuban men, carrying gasoline, are arrested by police officers as they attempt to board a jetliner at Tampa.

While on final approach to Atlanta on August 18, the pilot of Flight 348, a B-727-225 with 60 passengers, receives a note from a passenger, passed into the cockpit by a stewardess, who claims to have a bomb. The message demands a ransom of \$3.4 million, the release of two prisoners already in jail, and a trip to Cuba. The pilot proceeds to land at Hartsfield International Airport, where the assailant is taken in hand by police. Upon examination, he will be found to be mentally unstable.

On August 26, Flight 401, an L-1011 with 240 aboard and en route from New York to Miami, is hijacked to Havana by three men, who pour what they call a flammable liquid on the cabin floor and threaten to light it if their demands are not met. The three will be imprisoned in Cuba.

The FBI arrests Edmund Joseph Mahoney at Atlanta on August 30 for seizing a microphone on a jetliner and telling his fellow passengers that

the craft is "going to Cuba." Cuban refugee Juan Pedrosa hijacks Flight 161, a B-727-225 en route from New York to Miami on September 8 with 88 aboard, and threatens to set it afire unless he is taken to Cuba; from Havana, the jetliner returns to Tampa. Pedrosa will be jailed in Cuba for two years.

Another refugee, Guillermo Lima, is overpowered by two passengers when he attempts to hijack Flight 5, a B-727-225 with 85 aboard, on a flight from Newark to Miami on September 12. At Miami, Lima is turned over to the FBI. He will be convicted of air piracy and sentenced to prison for 20 years.

On September 14, another refugee, Carlos Jesus Figueroa, is arrested for attempting to skyjack Cuba Flight 115, a B-727-225 with 102 aboard and enroute from Tampa to Miami. The pilot had ignored his demand, judging the bomb displayed to be a hoax, and lands at Miami instead. Figueroa will be tried and receive a 15-year prison term.

Led by Charles Bryan, president of Eastern's district of the IAM, employees begin to react to the unsatisfactory Variable Earnings Plan.

Christopher Cotel, a passenger with a history of mental illness, threatens to kill a flight attendant and wreck a DC-9-31 on December 10. Subdued by crew members, Cotel is held as the plane makes an emergency landing at Jacksonville and taken to a psychiatric hospital by FBI agents.

An L-1011, with 293 passengers is forced to make an emergency landing at Washington, D.C. (IAD) on December 23 due to a bomb threat that turns out to be a hoax; nine suffer minor injuries during the plane's evacuation.

Also during the month, the nonunion **New York Air**, a subsidiary of Texas Air Corporation, begins to compete with the Shuttle.

Passenger enplanements drop by 7.5% to 39,052,000, but still outnumber those of any other airline except Aeroflot. Cargo, on the other hand, rises 6.1% to 507.37 million FTKs. Operating income is up by 19.8% to \$3,452,000,000, but expenses keep pace, rising 24.6% to \$3,450,000,000. The operating profit is, comparatively speaking, a tiny \$1.8 million while the net loss—the first in five years—is \$17.4 million and represents a negative \$75-million turnaround in just 12 months.

The number of employees is cut by 5.7% in 1981 to 37,700 and an equipment upgrade continues as the fleet is enhanced by the delivery of 6 Airbus Industrie A300B4-203s, 12 B-727-225As, and 3 DC-9-51s. To make room, 18 B-727-100s are withdrawn and sold.

Manuel Morales Torres is arrested at San Juan on February 5 after an unsuccessful attempt to hijack Flight 929, an L-1011 with 242 other passengers, arriving from New York City. Torres had, in an altercation after the landing, been knocked out the door and down the air stairs. Upon examination he will be found mentally unstable and sent to a psychiatric facility.

A new Air Shuttle terminal is opened at New York (LGA) on April 1 and, on April 4, a shuttle service extension is announced for Montreal.

A B-727-25 with 40 aboard is slightly damaged after striking a flock of birds over the Hudson River during its landing approach to New York (LGA) on April 8.

Cuban refugee Rafael Fredesvindo Pellerano-Albantosa attempts to hijack Flight 17, an A300B4-203 with 148 passengers, during a New York to Miami flight on April 10. He dies minutes after a scuffle with a passenger and airline employees, who overpower him and thwart his hijacking; the autopsy shows asphyxiation as the cause of death.

The twentieth anniversary of the Air Shuttle is celebrated on April 12. Since its inception, 51 million passengers have been flown on this service.

The Guerrilla Army of the Poor, a leftist organization, claims responsibility for a bomb in a suitcase that explodes and kills a baggage handler, who is about to place it aboard a Miami-bound jetliner at Guatemala City on July 2.

On July 10, two men divert Flight 71, an L-1011 en route from Chicago to Miami with 192 aboard, to Cuba. Both pirates are arrested in Havana, where two women and four girls also deplane before the flight returns to Miami. The hijackers will receive 10-year prison terms in Cuba.

In what will become a landmark case, pilot Karen F. Ulane sues the carrier on August 5, contending she was dismissed as a pilot after undergoing a sex-change operation; in her previous identity of Kenneth Ulane, she had flown for EAL for 12 years.

The same day, the carrier begins selling tickets for a Montreal extension of the Air Shuttle, but the inauguration must be postponed on August 18 due to the PATCO air traffic controller's strike.

The next day, the carrier joins with **Delta Air Lines** in an effort to collect from the City of Atlanta over \$15 million in taxes they claim have been illegally collected on equipment and other property.

The rear engine of Flight 935, an L-1011 TriStar 1 with 203 aboard, breaks into pieces over Colts Neck, New Jersey, shortly after the trijet's takeoff from Newark on September 22; no injuries are reported and the plane makes an emergency landing at New York (JFK).

During the year, flights are inaugurated from Miami to the Caribbean destinations of Curaçao, Aruba, and Barranquilla.

Also, Jack L. King publishes his biography of the carrier's most famous flyer, *Wings of Man: An Informal Biography of Captain H. D. "Dick" Merrill* (Glendale, Calif.: Aviation Book Company, 1981).

Customer enplanements decline by 9.8% to 35,702,000, but still leave the carrier as the largest passenger-carrying airline in the free world. Freight traffic climbs again, jumping 5.9% to 373.4 million FTKs. The financial picture is again far from bright. Although operating income is up by 7.95% to \$3.72 billion, costs are up 9.46%, to \$3.55 billion. The operating loss is \$49.94 million while the net reversal substantially higher at \$65.87 million.

The payroll jumps 4% in **1982** to 39,200.

The company agrees, on April 18, to pay \$65,000 in an out-of-court settlement to 23 women who charge they were not hired due to age discrimination.

Following the collapse of **Braniff International Airways**, Eastern purchases that company's authority to serve 11 major cities in Latin America, ranging from Panama City as far south as Buenos Aires, in Panama, Colombia, Ecuador, Bolivia, Peru, Chile, Paraguay, and Argentina. Operations commence via the Miami gateway in the summer.

A B-727-25QC is sold to **Federal Express** on August 31 and also during the month the company's lucrative Shuttle operation faces a new Newark to Washington (DCA) challenge from **PEOPLExpress**. In response, Air Shuttle Plus is offered, featuring refurbished terminals, "sequenced boarding" at New York (LGA), and remodeled aircraft. The first of the latter, a B-757-225, is delivered on December 22 with a second arriving a week later.

Passenger boardings dip 1.4% to 35,032,000. Despite the fact that 78% of these travelers employ one discount coupon or another, collectively they allow Eastern to retain its title of largest free-world passenger airline. Freight traffic is also down by 13.5%, to 323.17 million FTKs. Revenues inch upward 1.13% to \$3.76 billion as expenses grow to \$3.78 billion. The \$18.78-million operating loss is an improvement on the previous year's decline, but the net loss of \$74.92 million is greater.

The number of employees is cut again in **1983** by 5.4% to 37,100.

On January 1, Eastern becomes the first carrier to commence operations with the Boeing 757-200, placing its Dash-225 into service on the Atlanta-Miami and Tampa route. Originally painted in the famous "Hockey Stick" color scheme, units of the B-757-225 fleet will soon come to sport large "757" titles on their tails.

Also, as it begins its fifty-fifth year of operation, the airline must once again turn to its employees for financial assistance. It obtains broad support for an employee investment and profit-sharing program to replace the Variable Earnings Plan and to surmount financial hurdles affecting many in the deregulated air transportation industry. The arrangement calls for workers to participate in a stock program that will eventually grant them 25% ownership of the carrier. Included in the package is a 32.2% pay increase for workers.

On May 1, Eastern receives another 757-225, the 116th of 142 modern, fuel-efficient airliners ordered since 1975. Ten more will arrive during the year.

Descending 15,000 ft. toward Nassau on a May 5 service from Miami, an L-1011 TriStar 1 with 172 passengers is forced to shut down its No. 2 engine due to low oil pressure. The aircraft comes about for a return to Miami, at which point the No. 1 and 3 engines flame out and the plane begins a rapid descent without power. At 10,000 ft. the crew announces that a ditching will be required; however, at 4,000 ft. the No. 2 engine is restarted and the jetliner is able to make a single-engine landing at Miami. No injuries are reported.

On May 20, in the third hijacking of a U.S. airliner in 19 days, an unidentified man, who says he wants to see his wife and family and claiming to have a bomb, hijacks Flight 24, a Miami-New York B-727-225 service with 132 aboard, to Havana shortly after takeoff. After Cuban police arrest the pirate, the plane and its occupants are allowed to return to Florida. On May 27, an L-1011 is held for nine hours in Lima while its pilot is questioned for taking pictures of nearby Peruvian military installations.

En route from Miami to New York on June 14, Flight 414, an A300B4-203 with 95 aboard, is hijacked to Havana by a lone assailant displaying an alleged flammable bomb, but is allowed to return to Miami the next day.

The latest in a string of hijackings brings an announcement that Federal "sky marshals," since grounded, will return to U.S. commercial flights.

Flight 1, an L-1011 with 232 aboard and en route from New York to Miami, is diverted to Cuba on July 19 by a passenger who claims to have a bomb in a briefcase and passes out notes in broken English conveying that threat.

Also in midyear, union contracts are renegotiated, providing some additional financial relief. In the fall, corporate leaders must once more approach labor for fiscal help. This time the labor groups agree to forsake \$296 million in wages for stock and commit to work rule changes worth \$76 million. In return, each major group is allowed to nominate on board member.

Just after departing Miami (MIA) on November 11, the right No. 3 main landing gear tire of a B-727-225A with 159 passengers explodes and pieces of rubber damage hydraulic lines, causing a loss of A & B hydraulic systems. Unable to extend the right main landing gear, the trijet returns to Miami and lands on the left and nose gears, which promptly collapse. When the aircraft stops, all aboard are evacuated; one passenger is seriously injured in the process.

Because of the need to be certain that they do not interfere with sophisticated aircraft equipment, the use of personal computers by passengers is banned on all flights beginning on December 15.

Four roundtrips per day are launched the same day between New York (LGA) and Buffalo.

On December 28, Federal District Judge John F. Grady orders the company to reinstate a pilot who underwent a sex-change operation in 1980 and was dismissed in April 1981; Karen F. Ulane had flown for EAL for 12 years under the name Kenneth Ulane.

Also in December, a major hub is occupied at Kansas City, from which 34 daily flights are originated to 24 communities.

As a result of the long recession, plus the unbridled competition and unsound fare discounts sparked by the loosening of government controls, Eastern and other majors try to stanch the flow of red ink.

Passenger and freight traffic increases are too small to impact the airline's financial situation; customer bookings increase by 5% to 36,788,00 and cargo grows 3.9% to 510.83 million FTKs. In terms of enplanements, Eastern is now the third largest major, behind **United Airlines** and **Delta Air Lines**. Company losses would be worse except for certain advantages, including \$121-million income from the sale of certain tax benefits, a \$52.7-million drop in fuel costs, a \$123-million stock sale, and agreement by creditors to a postponement of payments on \$50 million in debts. Revenues advance 4.59% to \$3.94 billion, but costs jump 6.71% to \$4.04 billion. As a result, the operating loss increases to \$100.1 million and the net \$183.7 million loss represents a fourth consecutive reported reversal.

Employment climbs 10% in 1984 to 40,806.

Judge Grady, on February 14, awards former pilot Karen Ulane \$158,590 in back pay and expenses.

An engine falls off an Atlanta-bound jet upon its takeoff from Houston on April 20, forcing an immediate landing; no injuries are reported.

Also in the spring, the company establishes a commuter interline arrangement with **Metro Airlines**, known as Metro Express; employing British Aerospace BAe Jetstream 31s, feed service begins from Atlanta.

Given the success of the new Kansas City hub, EAL elects to lessen its Houston-oriented activities. A number of other small regionals will join the major's stable.

Eastern employees agree to accept 25% ownership in return for \$372 million worth of concessions sought by management in 1983. In addition, four representatives from the company's unions are given seats on the board of directors.

In addition to its service throughout the U.S., services are maintained along routes to Canada, Mexico, Bermuda, the Bahamas and various Caribbean Islands.

Customer bookings rise 3.1% to 37,927,000 as freight swell 15.9% to 391.71 million FTKs. Revenues jump 10.7% to \$4.36 billion as costs grow only 3.3% to \$4.17 billion. Although a net loss of \$37.9 million is taken, an operating profit of \$189.6 million is posted.

The payroll is boosted 8.5% in 1985 to 44,285.

On January 1, management attempts to renege on promised wage increases. The courts overrule this move and force the carrier into a technical default on its loans until late February. While descending from 25,000 ft. to 18,000 ft. during a service from La Paz to New York (JFK) via Asuncion, also on January 1, a B-727-225, with 10 crew and 19 passengers, is reported overdue, triggering a search. Twenty hours later, the plane's wreckage is sighted at the 19,600-ft. level of Mount Illimani, SE of La Paz.

A bag belonging to Transportation Secretary Elizabeth Dole is lost during a New Year's Day flight from Miami to Washington, D.C., but is recovered three days later.

On January 5, a team of Bolivian climbers, fighting high winds and snow, reaches the wreckage of the B-727-225 lost five days earlier on the side of a mountain at 20,000 feet elevation and report no survivors.

On January 18, Cuban refugee Lazaro Hernandez displays what will turn out to be a fake bomb and orders the crew of A300B4-203 Flight 403 to fly to Cuba. After convincing Hernandez that they have followed his orders, the crew lands their aircraft, with its 198 other passengers, safely at Orlando where the disoriented Hernandez is taken in hand by police and charged with air piracy.

By the beginning of March, all company unions have agreed to a new group of productivity requirements and wage and benefit reductions.

An agreement is signed in March with **CF Air Freight** under which EAL will transport that firm's night cargo in the bellies of its A300B4-203s. The move allows the company to also offer \$49 one-way overnight passenger segments, Moonlight Specials, beginning on April 1 from network legs connecting major East and West Coast cities and the Houston hub. Carry-on bags alone are free to customers on this service.

While en route off the U.S. East Coast on May 28, an A300B4-203 with 74 passengers encounters thunderstorms and air turbulence; the Airbus is shaken and 21 people are injured, 2 seriously. The flight continues to its destination and is met by medical personnel, who treat and evacuate the injured. A B-757-225, with engine trouble, lands safely at Miami on July 12 after raining about 100 bits of debris on a city neighborhood, hitting cars and homes, but causing no injuries.

On July 15, Eastern joins the ranks of the transatlantic operators when it inaugurates nonstop daily (except Wednesdays) service from Miami to London (LGW) with three Douglas DC-10-30s newly acquired from defunct **Air Florida**.

Another DC-10-30 is purchased from **Alitalia, S.p.A.**

During August, 2 shipments of cocaine totaling 1,700 pounds are seized from 2 airliners by the U.S. Drug Enforcement Administration (DEA).

En route near Charleston, South Carolina, on August 29, a B-727-225 with 125 passengers encounters turbulence, dropping and climbing 200 ft. rapidly; seven people are injured.

On October 21, passenger Gordon Ryan tries to open the door of a DC-9-51 en route to Philadelphia, but is stopped by a crewman, who suffers a broken jaw in the scuffle; Ryan is arrested by FBI agents when the plane lands.

Also in October, the original Moonlight Specials arrangement with **CF Air Freight** is expanded with Chicago (ORD) becoming the second hub after Houston. The upgrade provides a daily roundtrip between Newark and Los Angeles via Chicago.

Bound for Barbados on December 7, an A300B4-203 is forced to make an emergency landing in Miami when an engine spouts sparks and smoke.

Later in the month, the company implements a new security program to prevent employee theft and other crimes.

Enplanements advance by 9.9% to 41,662,000 (including 3 million plus or 7.2% of total on the Air Shuttle) and cargo swells 25% to 741.39 million FTKs. Revenues at the nation's third largest airline ascend by 10.3% to \$4.81 billion and costs jump 10% to \$4.59 billion, including a disappointing \$67.5-million fourth-quarter loss. The operating profit is up to \$221.61 million, but the cost of fighting fare wars during the summer and fall wring all but \$6.3 million from an upward swing in net profits.

The workforce is reduced 1.3% in 1986 to 43,685, which is still second highest among U.S. majors after **American Airlines**.

In January, the company receives the 1985 "Market Development Award" from *Air Transport World* magazine.

The DEA confirms on February 12 that indictments have been placed against 50 employees following an investigation into drug-smuggling activities begun the previous August. With labor contracts up for renewal early in the year, EAL resumes labor negotiations with Bryan and others who, pointing out that the company had made money in 1985, refuse to accept CEO Borman's call for a 20% reduction in labor costs. Last minute negotiations fail and, on February 24, the carrier—and its 87% debt-to-equity ratio—is sold to Frank Lorenzo's Texas Air Corporation (TAC), parent of **Continental Airlines**. Despite union opposition, the buyout approved by Eastern's directors at \$10 in shares and cash for each stock share will be approved by the DOT and create the largest U.S. airline system.

Frank Lorenzo now becomes chairman; former CAB chief counsel Philip J. Bakes Jr. is named president. Frank Borman, who remains a special consultant, now joins with Robert J. Serling to pen his memoirs, *Countdown: An Autobiography* (New York: Morrow, 1988).

Efforts are now made to return to profitability. The Charlotte facility is sold to **Piedmont Airlines (1)**, the unprofitable Miami to London service is discontinued, and the three DC-10-30s purchased exclusively for it are sold. A \$160-million cost-cutting program is introduced and in an effort to improve its own maintenance, the carrier stops its contract maintenance program for other carriers. This move is made largely to mollify safety critics in and outside of the airline after a \$9.5-million fine is paid to satisfy a FAA fine levied as the result of rules violations and noncompliance with many airworthiness directives.

On May 13, it is agreed that TAC will sell **Pan American World Airways (1)** sufficient slots at New York, Boston, and Washington, D.C. to allow start-up of a shuttle competition with **Eastern Air Lines**.

A passenger inaugurates the company's new air-to-ground passenger telephone system on June 4, but static on the line causes the recipient of the call to think that the caller is indicating a bomb on the plane. The situation is straightened out after the A300B4-203 lands in a remote part of New York (LGA) and is searched by police.

En route to Miami from New York on July 13, a B-757-225 encounters violent turbulence over Palm Beach that causes injury to 18 passengers.

An unidentified pilot, frustrated by long waits for takeoff from Atlanta, tells his stunned passengers on July 24 that he is "sick and tired" of such airport delays and walks off his airliner. In late August, the DOT

disapproves the TAC-Eastern merger, requiring that addition New York, Boston, and Washington, D.C. slots be sold to **Pan American World Airways (1)** in order to permit effective northeast air shuttle competition.

As part of its cost-cutting program, the carrier suspends its daily nonstop Miami to London service in September, and reduces its daily flights to Charlotte from 53 to 12.

A total of 46 La Guardia slots and 2 gates, 18 Washington, D.C., and 1 Boston gate are sold to **Pan American World Airways (1)** for \$46 million. The agreement includes a codicil that allows Eastern, for a two-year period, the right to buy them back should the Pacific pioneer give up its "airbus" operation.

To counter the **Pan American World Airways (1)** shuttle, Eastern upgrades its no-frills Washington, New York, Boston operation into "Air Shuttle Plus" service in late fall and the open seating policy in effect since the beginning is scrapped. Seat assignments are now made upon check-in. Snacks and other conveniences are now also made available to passengers and the interiors of the shuttle Boeings are upgraded.

William S. Bain, an EAL pilot, is killed when he misses the runway in fog at Tampa on November 6 and flies his private aircraft into a Pan Am B-727-225A with 23 aboard, injuring several passengers.

The legalities of the company's acquisition are completed on November 25 when TAC acquires all of the common stock equity. While EAL and **Continental Airlines**, the TAC flagship, remain separate, several divisions are consolidated. Among these are sales, which are reformed into Continental-Eastern Sales, Inc.; freight, which is lodged in a new Cargo Development Group; and computer reservations, which are combined into a single operation under the EAL title System One Direct Access.

Daily nonstop A300B4-203 service is inaugurated on December 15 from Miami to Caracas and daily nonstop B-757-225 flights commence from Newark to Caracas.

Passenger boardings swell 2.1% to 42,546,000, but freight is down 1.6% to 729.36 million FTKs. Revenues fall 6.08% to \$4.52 billion as costs fall 2.96% to \$4.45 billion. The operating profit declines to \$65.01 million and a \$130.16-million net loss is suffered.

Airline employment falls another 15.3% in **1987** to 37,000.

A B-757-225 is forced to land at Philadelphia on January 10 in response to a telephone bomb threat.

Also in January, the Philadelphia operation is expanded by more than 50% to form a hub linking cities in the northeast with Florida, the Bahamas, and the Caribbean. The Philadelphia schedule is increased by 21 departures, with new services to and from Albany, Rochester, and Hartford.

In February, EAL begins 14 flights each weekday from Washington, D.C. (DCA) to Boston, the "Eastern Expressway."

A DC-9-51 with 120 aboard collides with a U.S. Postal Service truck on the service road at New York (JFK) on March 11, causing minor damage to the truck and aircraft, but no injuries. On March 1 as the result of tough price competition, the Moonlight Specials service contract with **CF Air Freight** is cancelled.

Service to Peru, suspended in 1984, is resumed in April with six nonstop and three direct flights per week from Miami and New York.

As discussions with labor continue, the Bakes management team implies that it must obtain 30% cost reductions from wage and work rule concessions. If these are difficult to obtain, they may also be forced to transfer equipment to **Continental Airlines** or take other actions regarding the withdrawal of assets. To emphasize the point, six A300B4-203s are transferred to **Continental Airlines**. On April 10, SystemOne Direct Access and EAL Automation Systems are passed to TAC, which also assigns them to Continental. The militant unions, meanwhile, continue to seek raises rather than wage cuts and the battle continues.

In the spring, EAL is often mentioned during congressional hearings on proposed improvements on the quality of airline services.

During the year, a number of traditional EAL routes are suspended and transferred to the nonunion flagship carrier, as are additional aircraft and even airport gates. Additionally, TAC now begins to impose a vari-

ety of fees upon Eastern to pay for management services, computer reservations services, fuel purchases, and so forth. TAC management makes plans to sell the company's most profitable component, the Washington, New York, Boston shuttle, and contracts with **Orion Air** to provide passenger services should the pilots strike. The unions oppose most of these moves in court and succeed in blocking the latter two.

Meanwhile, in August, a marketing agreement is signed with **LIAT (Leeward Island Air Transport Services, Ltd.)** to feed traffic to and from the lower Caribbean into Eastern's hub at San Juan; LIAT/Eastern Express service begins from St. Kitts and Antigua to the Puerto Rican capital.

Henry Dempsey, the pilot of a DC-9-51, is sucked partway out of his plane on September 3, but survives, clinging to the rear stairs for 10 minutes as the copilot lands the craft at Portland, Maine.

Five persons are arrested at Miami (MIA) on September 27 as angry passengers of a cancelled flight besiege the company's ticket counter.

A B-757-225, headed from San Juan to New York on September 28, is rocked by turbulence over the Atlantic Ocean and is forced to land at Bermuda with 42 injured people.

Daily nonstop service is begun from Miami to Tegucigalpa, Honduras, in October, with continuation to San Salvador, El Salvador.

Also during the month, critical negotiations are opened between the carrier and Charles Bryan's IAM chapter. While Lorenzo and Bakes seek wage cuts, the militant union chief demands a 10% pay increase; the battle continues.

Also in October, the FAA launches an intensive program of airport screening. Over the next 18 months, FAA agents will be able to slip 734 test weapons or explosives through airline-run screening points and will, in turn, impose \$5.21 million in fines against some 50 airlines that fail the unannounced tests.

Meanwhile, U.S. National Mediation Board (NMB) member Walter C. Wallace arrives to make certain that negotiations continue.

Flight 573, a DC-9-31 cracks open upon landing at Pensacola on December 28 and drags its tail nearly 7,000 feet along the runway; 100 passengers and a crew of 5 are safely evacuated down chutes. The aircraft must be written off.

As the one-time "Big Four" airline continues to shrink and begins to prepare for an IAM strike, its traffic and financial situation worsens. Although passenger boardings are up by 5% to 44,568,000, the number is the smallest growth rate for any of the passenger-carrying majors. Freight traffic plunges 24% to 239.34 million FTKs. Revenues are up a scant 0.16% to \$4.52 billion, expenses rise 0.30% to \$4.47 billion, and the operating profit is \$58.98 million. The net loss, however, climbs by \$50 million to \$181.67 million.

Eastern management begins **1988** by preparing for a widely expected IAM strike.

Twice-weekly service is begun in January from San Juan to Panama City, with continuing flights to Bogota. The company also inaugurates flights from San Juan to Cleveland, Hartford, and Washington, D.C. (IAD).

Suspecting that personal animosity between Bryan and John J. Bavis Jr., president of Eastern's ALPA chapter, will prevent the pilots' cooperation with the IAM membership if it commits to a job action, president Bakes adopts an aggressive strategy, believing the airline can survive a strike. This position is communicated to Chairman Lorenzo, who is only too willing to maintain a tough TAC position.

A feature of the strategy is a four-page letter written by Bakes in February to all of the members of the company's OnePass frequent flyer program, blaming financial losses on labor costs. During the same month, the carrier introduces a month-long incentive program for OnePass customers who fly the Air Shuttle and stay at a Marriott Hotel in New York, Washington, or Boston.

The strategy of shuffling high-cost Eastern assets to low-cost **Continental Airlines** and other regional subsidiaries continues into the spring as TAC seeks to combat its \$5-billion debt. Eastern continues to bleed and in addition to transfers, it also shuts down its Kansas City hub. The

maneuvers, while perhaps appropriate from a corporate viewpoint, give the IAM members a chance to win public relations points.

In May, the company launches service to Belize City and San Pedro de Sula, Honduras, and resumes Ottawa service on a daily basis with a flight between the Canadian capital and Baltimore (BWI), continuing to Miami.

When several tires blow, a B-757-225 must abort its takeoff from San Jose, Costa Rica, on September 29; the nosegear collapses and the fuselage is severely damaged, and although the plane must be written off, injuries are few.

Although it remains on the market, executives in charge of the Air Shuttle continue to vigorously market it to the public. On October 1, a monthly *The Shuttle* newsletter is introduced offering "travel tips and news of interests to Guests and Employees of The Shuttle." Thrice-daily nonstop flights are initiated in October from Washington, D.C. (DCA) to Hartford and four of the six Miami-Ecuador route allocations formerly held by **Pan American World Airways (1)** are acquired and operated.

DEA agents at Miami on November 2 seize a shipment of cocaine from a company jetliner for the second time in two weeks.

Also in November, daily frequencies are opened from Birmingham, Alabama, to Atlanta.

Late in the year, Lorenzo approaches Wallace seeking a release from the stalled labor negotiations. The official refuses and continues to pressure both the airline and its union to reach an accord.

A B-727-225A loses cabin pressure from a 14-inch rupture in its fuselage during a December 16 flight from Rochester to Atlanta; the crew makes a safe, if unscheduled, landing at Charleston, West Virginia.

Also in December, John F. Peterpaul, IAM transportation division leader, makes it known from Washington, D.C. that, in the event of a strike, the entire union will call secondary boycotts around the country turning a one-company labor dispute into a major national problem.

With this possibility on the horizon, officials on both sides of the issues digest the year's statistics. Customer bookings drop 20.1% to 35,712,000 and cargo falls 32.3% to \$240.15 million FTKs. Revenues decline 14.15% to \$3.88 billion, expenses fall 8.34% to \$4.09 billion, and the operating loss is up to a huge \$209.42 million. The net loss worsens to \$335.35 million.

IAM President William Winpisinger officially notifies NMB official Wallace on January 6, 1989 that the national union will call secondary railroad and airline strikes nationwide in the event of an Eastern job action. The threat meets with a hostile public reaction and costs the local union membership much of the goodwill it had built through a year of Lorenzo-bashing.

In the final bit of equipment business to be reported for some time, the last of 50 B-727-25s begins withdrawal during the month as 7 DC-9-32s join the fleet.

About 47 pounds of cocaine are discovered on a jetliner that stops at Miami on January 27 while en route to New York from Colombia.

On January 31, the NMB proffers Eastern and the IAM a final settlement package and suggests binding arbitration if local agreement cannot be reached. When Eastern refuses, Wallace notifies both sides that a statutory 30-day cooling off period is in effect. Lorenzo and Bakes, fully expecting company pilots not to cross picket lines, are ready for the long-awaited final showdown.

On February 12, the company bans in-flight distribution of the latest issue of *Fortune* magazine because of its unflattering portrait of TAC Chairman Lorenzo. Just before the strike deadline, NMB's Wallace asks the new president of the United States, George Bush, to appoint an emergency board, under terms of the Railway Labor Act that governs national transportation labor relations. Bush refuses and his transportation secretary, Samuel K. Skinner, informs the parties that Congress will pass legislation to block any secondary strikes. Frank Lorenzo now approaches President Bavis and the local ALPA membership for their support and, contrary to what he has expected via Bakes, is rebuffed.

On March 3, Lorenzo makes one last offer to Bryan seeking \$125 million in wage concessions instead of \$150 million; the IAM leader, with

disaster staring him in the face, refuses. On Saturday, March 4, the job action begins; the carrier's pilots and flight attendants call sympathy strikes and refuse to cross picket lines. With the exception of a few Air Shuttle flights, the major is shut down by day's end. Eastern lasts only three days before Chapter XI bankruptcy protection is sought and granted by the U.S. Bankruptcy Court for the Southern District of New York. Its judge, Burton R. Lifland, now takes control of the airline and approves the appointment of Washington lawyer David I. Shapiro as examiner in the case; Shapiro is authorized to find a buyer.

On April 6, an investor group led by ex-baseball commissioner Peter V. Ueberroth, ex-**Hawaiian Airlines** President J. Thomas Talbot, and former **Continental Airlines** President Martin R. Shugrue Jr. agree to purchase the airline and several other TAC assets for \$464 million, provided agreement can be had from all Eastern unions by April 11. Significant progress is made and negotiations continue a week beyond the deadline. However, when the unions require that Lorenzo give up control of the airline *before* the deal is consummated, all possibility of accommodation evaporates.

On April 17, Lorenzo takes the airline off the market. Shapiro and several other groups continue attempts to interest TAC in a buyout, but the highest bid barely reaches \$400 million. Lorenzo and Bakes now attempt to convert Eastern into a smaller, nonunion operation based in Atlanta, proposing this to company creditors. Key to the plan, which is readily accepted, is the sale of certain assets to raise cash, including the South American system and the profitable Washington, New York, Boston route.

On May 25, the carrier's most profitable and recognized division, the Air Shuttle, along with 7 B-727-25Cs and 13 B-727-225s, is sold to New York real estate tycoon Donald Trump for \$365 million.

On June 1, the FAA assesses fines against those carriers failing its latest round of airport screening tests. Eastern, with 6 security breaches, is faced with \$51,000 in punishment.

The fleet is now cut from 160 to 148 aircraft, summer schedules are cut 12%, and contracts with both the pilots and flight attendants unions are abrogated.

While Lorenzo, assisted by **Continental Airlines** President Robert R. Ferguson, works on the reorganization plan, officially filed in July, the Master Executive Council of Eastern's unions meet in August. ALPA leader Bavis argues for an end to the job action and is replaced by the more militant Charles H. "Skip" Copeland. Eastern proposes a new business plan to the creditors, one that provides not only for an Atlanta hub, but also for a strengthened South American route network centered on Miami.

In September, \$210 million in cash is realized from the sale of an assets package to **Midway Airlines** that includes gates and facilities at Philadelphia, routes from Philadelphia to Montreal, and 16 DC-9-31s. **Midway Airlines** wins its prize after the DOT looks askance at a bid from the airport's primary operator, **USAir**.

Also during the month, the company undertakes its first-ever service into Brazil. Thrice-weekly DC-10-30 service is launched from Miami to Rio de Janeiro, which is added as a stop on the route to Buenos Aires.

Meanwhile, months of negotiations between Lorenzo and **American Airlines** CEO Robert Crandall fail in acrimony.

Attempts to sell the Latin American division to the Dallas (DFW)-based major for \$365 million are called off and the company is also forced to admit that it cannot find a buyer for its Miami maintenance base.

Consequently, the carrier revises its bankruptcy plan to demonstrate its emergence with \$400 million in working capital instead of the \$774 million in its previous estimate. To meet the new projection, the airline indicates it will not prepay, as hoped, \$52 million owed on aircraft or \$150 million to retire a \$200-million note and it would borrow \$100 million more to cover lease and training costs.

The total number of daily flights made on October 1 stands at 702.

During the fall, union supporters in the U.S. Congress pass legislation establishing a bipartisan commission to recommend a settlement. On

November 21, the bill is vetoed by President Bush and two days later, Copeland and his ALPA followers, out of work and watching as 1,800 nonunion pilots replace them, call off their sympathy strike.

On November 24, flight attendants vote to end their job action. Only the IAM and Bryan are still out. Meanwhile, as the pilots and flight attendants strikes are ending, the creditors force Lorenzo to reopen negotiations with Crandall and **American Airlines**.

Also in November, daily B-727-225A service is resumed from Atlanta to Montego Bay.

In mid-December, the two tough operators Crandall and Lorenzo agree that **American Airlines** will purchase the Eastern network south of the border, its routes from Miami to Madrid and Toronto and from Tampa to Toronto for \$349 million while **Continental Airlines** agrees to settle an outstanding reservation quarrel with American. In addition, \$121 million is gained by TAC for a variety of other Eastern assets, including slots at New York (JFK and LGA), Washington, D.C. (DCA), and Chicago (ORD), as well as the company's interest in four South American ground handling companies and property in Puerto Rico.

A 17-year-old boy, who has apparently stowed away on a B-727-225A flight from Barbados, is found dead at Miami (MIA) on December 28 in the plane's unpressurized and unheated rear stairway.

Although the company is nearly two-thirds rebuilt by year's end, customer bookings for the year are off by 59.2% to 14,465,000 and freight falls 58.6% to 99.5 million FTKs. Revenues plunge 60.09% to \$1.55 billion, costs are down 41.03% but still total \$4.78 billion, and the operating loss is \$864.72 million. The net loss is \$852.31 million. Both loss figures are the highest single-year losses in the history of commercial aviation to this date.

On January 2, 1990, EAL introduces fares up to 40% below the lowest discount fares in the industry, offering one-way fares of \$79 weekdays and \$99 weekdays New York to Florida. Also during the month, the company begins eliminating up to 600 positions and imposing temporary pay cuts on half of its employees, including executives, in an effort to save \$100 million.

Flight 111, a B-727-225A landing at Atlanta on January 18, collides with a twin-engine private plane owned by **EPPS Air Service**, killing one person aboard the smaller aircraft and injuring another. No one is hurt aboard the jetliner and reports will show that both planes had been given permission to come down at the same time.

At the end of January, Chairman Lorenzo returns to his original reorganization plan, under which the airline is to emerge from bankruptcy protection at about 65% of its former size, and approaches his creditors with this third plan showing Eastern operating as a smaller carrier out of Atlanta. A month later, the creditors are informed that the shrunken major's route system will only generate sufficient funds to pay them 50¢ on a dollar. Even this plan is conditional and based on the best legal and operating results. The hoped-for results are not achieved, as business travelers refuse to fly the airline and losses mount.

Immigration agents in Atlanta raid a company airliner for the second time in two days on March 15 and seize 53 more illegal aliens, including 3 Romanians and many Mexicans.

The creditors now inform Lorenzo that TAC must cover all of Eastern's losses until a suitable, moneymaking plan can be achieved. When the airline boss refuses, the creditors on April 10 file a motion with Judge Lifland to appoint a trustee and strip Lorenzo of his Eastern control. Following a spirited legal proceeding in Lifland's court April 13–19, Lorenzo is out and former **Continental Airlines** President Martin R. Shugrue Jr. is appointed trustee, taking the titles of president and CEO.

On April 20, former president Bakes resigns by request; Joseph B. Leonard, executive vice president/chief operating officer, is retained. Shugrue now announces a five-point plan for returning the airline to profitability, proclaiming that a "New Eastern" will rise from the ashes of the old. The plan backs away from the previous reorganization plan because that document does not have sufficient funds to make it work. Rather, an effort is started to cut costs by decreasing the planned sum-

mer schedule by 12%, selling additional jetliners, reducing the health benefits of retirees, and the imposition of new contract terms on its pilots and machinists.

The airline's fleet now includes 170 aircraft and the route system contains just 71 destinations.

Some progress appears to be made on Shugrue's agenda during late spring and summer. In July, Eastern achieves the dubious "first" of becoming the only U.S. airline to be criminally indicted on charges related to the falsification of its maintenance records. The 60-count indictment covers the period from July 1985 through October 1989; Edward Upton, the former vice president-maintenance and engineering and seven other maintenance management employees are specifically named.

In early August, Frank Lorenzo resigns as chairman of TAC while, on August 2, Iraq invades Kuwait.

A DC-10-30, first flown by **Alitalia, S.p.A.**, is sold to **Continental Airlines** in September.

Beginning on October 7, company officials hold what will ultimately be unsuccessful talks with **Aeroflot Soviet Airlines** concerning a possible \$150-million lease or purchase arrangement with the Russians for 13 wide-bodied aircraft, including all of the A300B4-203s.

By late fall, fuel prices are at their highest point in a decade and the steadily rising costs put an end to any hope that the once-proud carrier of "Captain Eddie" can be saved. Still, it continues to function, even beginning, in December, a new service from Huntsville, Alabama, to Roanoke and Harrisburg.

At the same time, a U.S. Appeals Court rules that the carrier must release some of the replacement pilots hired during the previous year's pilot walkout, substituting ALPA members instead.

Ironically, until fall, traffic has rebounded. Customer boardings increase 47.6% to 21,505,000 and freight rises by 17.8% to 117.2 million FTKs. Revenues are up by 40.61% to \$2.18 billion, expenses rise by 12.36% to \$2.71 billion, and the operating loss is \$533.35 million. The latter figure is actually an improvement over the previous year. The net loss, however, is the highest suffered by any airline anywhere to this time: \$1.12 billion.

During the first week of January 1991, flights commence from Dallas (DFW) to Huntsville.

One of the nation's 4 original trunk carriers, the 63-year-old airline, unable to find either a buyer or further financing, collapses at midnight on January 18–19, halting all flights and activities. All employees, loyal and strikers alike, are laid off and the company is now liquidated. After 2 years of operating while in bankruptcy, EAL now has debts of \$3.2 billion, despite \$600 million received since 1989 from financial institutions, and is losing \$2.5 million per day. The fleet has shrunk to 170 aircraft, 90 of which are leased, and the workforce totals 18,500.

There is an unofficial website maintained by Michael Moran at <http://ddi.digital.net/~gunnery/eastern/eastern.htm>.

EASTERN AIR TRANSPORT (1). See COLONIAL AIR TRANSPORT

EASTERN AIR TRANSPORT (2): United States (1930–1934). On June 12, 1929, Harold F. Pitcairn elects to sell his **Pitcairn Aviation** to airline and aircraft manufacturing magnate Clement Melville Keys for \$2.5 million. Pitcairn had previously established a 1,411-mile multistop mail route (Contract Air Mail or CAM Routes) from New Brunswick, New Jersey, to Miami and the largest line operated by any company east of the Mississippi River—indeed, the third largest in the U.S.

On July 10, Keys turns around and sells the carrier to his holding company, North American Aviation. The new purchase is merged with another acquisition, **Florida Airways Corporation**, to form the manufacturer's Eastern Air Lines Division; NAA Vice President Thomas A. Doe is placed in charge. The fleet acquired in the transaction includes 13 Pitcairn PA-5 Mailwings, 25 PA-6 Super Mailwings, and 3 Ford 4-ATs.

Six months later, on January 17, 1930, the subsidiary's name is changed to **Eastern Air Transport**.

On March 15, a fire destroys the old government hangar at Hadley Field, New Jersey; four EAT aircraft are destroyed and on April 29 Congress passes the McNary-Watres Act. During the May 15–June 9 “Spoils Conference” held in Washington between Postmaster General Walter F. Brown and the heads of the major air transport concerns (including Doe), the carrier seeks to obtain a mail route from Atlanta to New Orleans, planning to subcontract it to **Delta Air Service**. However, following Comptroller General John McCarl’s ruling that extensions longer than original routes cannot be granted, the route is awarded to **American Airways’** subsidiary **Southern Air Fast Express** on September 16.

Meanwhile, after a year of mail services under two company names, EAT introduces passenger services on August 18 between what is now La Guardia Airport at North Beach, Long Island, New York, and Richmond, Virginia. The first route includes stops at Camden (serving Philadelphia), Baltimore, and Washington, D.C. Flights are operated daily (except Sundays) over the 310-mile route employing the company’s first and only Ford 5-AT Tri-Motor plus the 4-ATs. The service is so successful that the carrier now adds six Curtiss Model 18 Condor Is, purchased from company shareholder Curtiss-Wright Company, to the fleet and beginning on December 10 initiates service with them to Washington. The first 10 of 14 Curtiss Model 55 Kingbirds simultaneously arrive and are placed on the Washington to Atlanta run. The 4-ATs are now sold.

Passenger service reaches Florida on January 1, **1931**, when Eastern’s 120-mph Curtiss Kingbirds begin flying to Miami and St. Petersburg.

Also in January, stewardesses are introduced on the Condor Is, making EAT the second U.S. carrier to employ female flight attendants.

En route to Washington from New York on March 15, a Pitcairn PA-6 piloted by Verne E. Treat encounters a snowstorm over Laurel, Maryland, which forces the aviator to bail out. Richmond to Jacksonville Kingbird flights commence on April 1 via Raleigh, Florence, Charleston, and Savannah; the same day, Condor Is fly from Washington down to Richmond.

The carrier is awarded the New York to Washington, D.C. CAM-25 route in July, even though **The New York, Philadelphia & Washington Airways Corporation (The Ludington Line)** has bid 64¢ less per mile to carry the mail.

The same month the former **Pan American Airways (PAA)** subsidiary **New York Airways** is acquired, giving EAT access to Atlantic City.

Two additional Condor Is are acquired in early October and allow EAT to stretch the Richmond terminus all the way down to Atlanta. Five new Pitcairn PA-8M Mailwings are placed on the postal services.

In July **1932**, the fleet is increased by the addition of a sixth Curtiss Condor I. Passengers are able to fly Eastern from New York to Miami in a single day. A transport plane departs New York City at 8 a.m., arriving at Miami at 9:50 p.m. The carrier promotes the feat with a radio jingle: “From Frost to Flowers in 14 Hours.” By today’s standards, however, the trip is grueling.

After departing New York, the Ford 5-AT, a notoriously noisy aircraft, stops at Philadelphia, Baltimore, Washington, and Richmond, where lunch is served. Passengers then get back aboard for stops at Raleigh, Florence, Charleston, Savannah, and Jacksonville, where they deplane for dinner. Then, after a final interim stop at Daytona Beach, the customers arrive at Miami. Total flying time is 13 hrs. 50 min. During the 1980s, the same trip takes just 2 hrs. 30 min. A Stinson Model U is acquired late in the year to supplement the 5-AT.

On January 7, **1933**, the overnight Jacksonville stop is removed as EAT initiates through service from New York to Miami. The entire route can now be flown in 13 hours.

While testing a new right engine over Newark on January 15, a Condor I crashes (two dead).

Despite the economic depression of the early 1930s, the air transport industry continues to expand routes and purchases better equipment as it becomes available. Companies expand through mergers and on Feb-

ruary 13, **The New York, Philadelphia, and Washington Airway (The Ludington Line)** is purchased outright and merged; although the new purchase stops flying immediately, seven of its Stinson SM-6000s and SM-6000Bs are kept in service.

During takeoff from Richmond on February 18, a Pitcairn PA-6 hits a truck, killing one of the men on it.

On February 28, Postmaster General Walter F. Brown requires the United group to divest itself of shares covertly acquired in EAT and its North American Aviation holding group. The shares are sold to General Motors, which now assumes control of EAT, along with **Northwest Airways** and **Western Air Transport**, through its new North American Aviation subsidiary led by Ernest R. Breech.

Edward V. “Eddie” Rickenbacker now becomes Doe’s vice-president.

Unable to exit his Pitcairn PA-6 when its engine fails over Upper Zion, Virginia, early on June 4, pilot W. L. Jamieson is killed when it crashes.

Five Curtiss T-32 Condor IIs are delivered late in the month and are placed into service 10-times-daily on the New York–Washington route plus the New York–Atlantic City frequency on July 1.

Four more are soon received; however, one is seriously damaged and its crew hurt when it crashes upon takeoff from Newark on September 21.

In a brief experiment, the interior of a single Condor is given two sleeping berths and on October 5–6, the first night passenger flight (7 hrs. 40 min.) is undertaken multistop between Atlanta and New York. Vice President Rickenbacker climbs from his berth at every stop to show himself, in pajamas, to waiting reporters and photographers. The concept is not followed up until it is taken over by **American Airways**.

The surviving Pitcairn PA-5s are now withdrawn and the company loses \$175,000 on the year.

On February 9, **1934**, as a result of the airmail scandal, the U.S. government cancels existing airmail contracts (effective on February 19) and calls upon the U.S. Army Air Corps to fly the mail. The next day, President Doe protests the move on behalf of the airline industry. Having learned of the government’s forthcoming airmail action, **Transcontinental and Western Air (T&WA)** President Jack Frye and EAT Vice President Rickenbacker, on February 18–19, fly the DC-1 from Los Angeles to Newark via Kansas City and Columbus in a cross-country record time of 13 hrs. 4 min.

On February 19, all company personnel are laid off and schedules are cut back. The loss of subsidy payment to Eastern is \$250,000.

The Army experiment ends on March 30 and the Post Office advertises for new contracts, which may be let to any company not participating in the May–June 1930 “Spoils Conference.”

By the time the new mail routes are awarded in late April, Eastern, like **American Airways, Transcontinental and Western Air (T&WA)**, and **United Air Lines**, has been slightly reformed and renamed, EAT becoming **Eastern Air Lines** on the last day of the month. Although Doe must be laid off because of his participation in the Spoils Conference, General Motors retains ownership.

EASTERN AIR TRANSPORT, LTD.: United Kingdom (1932–1934). Skegness pilot Michael Scott registers his EAT at London on February 27, **1932**; initial capitalization is £1,000. Flying a de Havilland DH 80A Puss Moth with the Lord Mayor of Nottingham as passenger, Scott begins daily summer-only Nottingham–Skegness roundtrip service on May 22. Operations cease in September.

Summer service is resumed over the inaugural route in June **1933**; flights are conducted with a DH 83 Fox Moth until September. In **1934**, the service is resumed on July 1, continuing until September 30 when, unable to continue financially, the company closes down.

EASTERN AIRWAYS, LTD.: Schiphol House, Schiphol Way, Humberside International Airport, Humberside, Lincolnshire, England, DN39 6YH, United Kingdom. Phone 44 (0) 1652 688886; Fax 44 (0) 1652 680606; <http://www.easternairways.com>; Code T3; Year Founded 1973. Lease Air, Ltd., employing the trading name Eastern

Airways, Ltd., is established at Humberside Airport by the Leighford Holdings Group in 1973 to offer air taxi and executive charter flights and cargo services throughout Europe.

Late in the decade, Managing Director Bryan A. Huxford's carrier elects to begin scheduled services. On July 2, 1979, the company joins the Royal Mail program known as "Spokes from Speke," flying a DC-3 each night from Bristol to the sorting hub at Liverpool (Speke Airport) and back to Bristol for distribution.

Airline employment reaches 60 and the fleet in 1980-1981 comprises 3 Douglas DC-3s, 1 Shorts 330, 3 Piper PA-31-350 Navajo Chieftains, 4 Piper PA-23 Aztecs, and 1 Hawker Siddeley HS 125. Services link the company base with Norwich, Glasgow, and London (LHR). Traffic levels cannot be built up sufficiently in a time of recession and high fuel prices and the financially troubled carrier is sold to **Genair, Ltd.** late in 1982.

Following the demise of Genair in 1984, Eastern is resurrected. Managing Director Huxford is the principal owner and the new chairman, with minority owner Richard J. Lake becoming managing director. Flights continue over the next 15 years; scheduled frequencies are maintained to Aberdeen, Glasgow, Humberside, and Norwich with 1 each Fairchild Metro III and Metro 23.

Ad hoc passenger and cargo charters within Europe and the U.K. are operated in association with **Air Kilroe, Ltd.** Twice-daily Metro 23 return service is inaugurated in November 1997 from Humberside to Aberdeen, replacing the service previously operated by **Air U.K., Ltd.**

In 1998, the Humberside to Aberdeen roundtrips become thrice weekly and Sunday night return flights are introduced.

Early in 1999, the company, following its amalgamation with **Air Kilroe, Ltd.**, creates a homepage on the Internet's World Wide Web.

The first two of four former **Air Botnia O/Y** Jetstream 32EPs are received on lease from their manufacturer in July and enter service on the Humberside to Aberdeen route. When the latter two J-32EPs arrive, they are employed to initiate twice-daily roundtrips from a new base at Norwich to Glasgow via Humberside, yet another abandoned **Air U.K., Ltd.** route.

Four-times-a-day frequencies are also offered from Manchester to Aberdeen over a route previously flown by **Suckling Airways, Ltd.**

Daily roundtrips are inaugurated on November 1 between Norwich and Aberdeen; these are later increased to thrice daily.

Enplanements for the year total 45,000.

Airline employment in 2000 stands at 85. During the first quarter, twice-daily Jetstream 32EP roundtrips are inaugurated from Norwich to Glasgow via Humberside. These frequencies, which do not enjoy particularly high load factors, are cut in half on May 3 in order that the Jetstream 32EP may be employed to offer four-times-a-day return service over the Aberdeen to East Midlands route, now taken over from **British Midland Airways, Ltd.** Managing Director Lake is on hand at East Midlands to present a bottle of Glen Garioch to Robert Carr, the first passenger to board on the new route.

Including a VIP-configured Jetstream 31, the BAe fleet totals 7 by summer. When **ScotAirways, Ltd.** withdraws from the Norwich to Edinburgh market, it is replaced on June 11 by Eastern, which adds another Jetstream for the purpose. The new roundtrip route is operated twice on weekdays and once on Sundays. In early August, Chairman Bryan Huxford lauds the carrier's July 96.5% on-time record.

On September 11, daily return frequencies from Norwich to both Edinburgh and Manchester are boosted from two to three.

New nonstop return service is introduced on November 20 between Teesside and Aberdeen. Flights are operated four times a day on Mondays and Tuesdays and thrice daily Wednesday, Thursday, and Friday, together with a single Sunday evening roundtrip.

Thrice-weekday roundtrips are continued between Humberside and Aberdeen; however, beginning on November 26, the time of the weekly Sunday evening return flight from Aberdeen is changed.

EASTERN ATLANTIS EXPRESS. See ATLANTIS AIRLINES

EASTERN AUSTRALIA AIRLINES (PTY.), LTD.: **Australia (1986-2001).** Partially owned by **Australian Airlines (Pty.), Ltd.**, this regional carrier, formerly known as **East Coast Commuter Airlines (Pty.), Ltd.**, is established at Tamworth Airport in Tamworth, New South Wales, in 1986. A new office is opened at Sydney with W. A. Horner as manager. Revenue services are inaugurated by Managing Director John C. Roworth's new entrant with 2 Cessna 404 Titans, 3 British Aerospace BAe Jetstream 31s, and 3 Embraer EMB-110P Bandeirantes. Traffic and revenue figures are not released. Two more Cessna 404s are acquired in 1987.

Operations continue apace in 1988 as the company is featured in the *New South Wales Service Review*.

The fleet is revised when two Cessna 404s are withdrawn in favor of three British Aerospace BAe Jetstream 31s and the first of two de Havilland Canada DHC-8-100s.

Beginning in July, the carrier replaces **East-West Airlines (Pty.), Ltd.** services on routes to Inverell, Glen Innes, Taree, Grafton, and Kempsey. Again, there are no traffic or financial statistics.

In 1989, the company revamps its route network in accordance with the previous year's *Service Review*. Another DHC-8-100 is delivered and orders are placed for two DHC-8-300s.

The Dash-300s are delivered in early 1990. When the Norfolk Airlines Group of carriers goes under, Eastern receives temporary permission to undertake scheduled service to their destinations. The two Cessnas and three Embraers are retired and replaced by a fourth Jetstream 31.

The carrier, largest of the nation's regional carriers in 1991, becomes fully owned by **Australian Airlines (Pty.), Ltd.** on August 1 when the larger airline purchases the remaining 42% stake held by Managing Director Roworth. Peter R. Ryan now becomes general manager and the company is made a unit in Australian's Regional Airline Division.

On August 3, the carrier, which has been allowed to retain its name, introduces new services from Brisbane to Darwin and from Cairns to Central Australia and Perth.

EAA now serves 20 destinations in New South Wales, plus Sydney, Canberra, Melbourne, Lord Howe Island, and the Tasmanian destinations of Launceston and Devonport.

A total of 342,087 passengers are flown on the year.

Ryan is followed into office by Neil Shea in 1992, the same year another Canadian Dash 8 turboprop is purchased and services are started to Coffs Harbor, New South Wales.

Those flights emanating out of Melbourne to Devonport and Launceston are turned over to **Southern Australia Airlines (Pty.), Ltd.** In September, parent Australian Airlines is acquired by **Qantas Airways (Pty.), Ltd.**

Passenger boardings increase 9% to 423,111.

In 1993, the fleet includes 3 BAe Jetstream 31s, 1 Super Jetstream 31, and 7 DHC-8-102s, including 2 acquired during the year. The nation's No. 1 regional adds Dubbo, New South Wales, to its route network. Enplanements for the year total 454,621.

Operations continue apace in 1994 as passenger boardings move ahead by 13.5% to 460,842.

The workforce stands at 290 in 1995, however, the fleet is reduced by one DHC-8-102. Customer bookings climb 5% to 483,886.

Ten new workers are hired in 1996. Passenger boardings for the nation's second largest regional carrier increase 4% to 506,657.

The employee population is cut 2.2% in 1997 to 290 while enplanements inch up 0.6% to 509,695.

Airline employment stands at 300 in 1998. Destinations visited include Armidale, Coffs Harbour, Dubbo, Grafton, Kempsey, Lord Howe Island, Moree, Narrabri, Port Macquarie, Tamworth, and Taree.

A near tragedy occurs on the evening of November 16 involving a Jetstream 31 just after its departure from the Williamtown Airport north of Newcastle. The aircraft, with 18 passengers and en route SW toward Mount McQuoid, is seen by air traffic control to be in the same airspace as an RAAF King Air approaching from the East Sale military base at Victoria, in the opposite direction. ATC instructs the airliner to level off

at 5,000 ft., while the RAAF pilot is asked to level off a thousand feet higher. The civil plane complies, but the military aircraft does not and, consequently, passes directly over top of the Jetstream 31 missing it by just 100 meters. Both military and civilian investigations are immediately thereafter launched.

Flights continue apace during the remainder of the year.

Customer bookings accelerate 4.9% to 535,000.

The workforce, by the start of 1999, has been increased by 12.1% to 325.

When the ATC radio frequency jams at Sydney Airport on March 3 because of the testing of a new Precision Radar Monitor, a catastrophe almost results. Arriving on a service from Auckland, an **Air New Zealand, Ltd.** B-747-419 with 220 passengers pulls up just 61 m. above the runway after the pilot follows emergency procedures for not receiving final landing clearance. The giant aircraft executes a go-around, by which time the jam has been cleared. Most aboard the Jumbojet are unaware—until later—that a de Havilland Canada DHC-8-102 from Eastern had been just below them preparing for departure or that they had nearly landed on top of it. Airservices Australia, in its report of the incident, refuses to label the go-around as a “near miss” because safety procedures had been appropriately followed by the Jumbojet’s pilots. It also states that the larger aircraft had passed safely over the smaller at a height of about 244 meters.

The carrier’s last Jetstream 31s are withdrawn over the Christmas period as new de Havilland Canada Dash-8s arrive.

Customer bookings for the year climb 9.9% to 587,000.

Airline employment at the beginning of 2000 stands at 344, a 5.8% increase over the previous 12 months. Employing newly received DHC-8-100s and DHC-8-200s, the carrier operates 17 daily roundtrips between Sydney and Canberra. Two DHC-8Q300s, valued at \$29 million, are delivered in September and October.

Eastern Australia will be merged into the super regional Qantas Link in June 2001.

EASTERN CARIBBEAN AIRWAYS: United States (1975–1980).

Bill Bohlke Jr. and Ruth Bohike form Virgin Island Flight School on St. Croix, U.S. Virgin Islands, in 1960. Fifteen years later in early 1975, they receive route authority to operate scheduled services to local destinations. Employing a Beech 18, daily roundtrip revenue flights commence in March to St. Thomas and Nevis.

The scheduled operation continues apace over the next five years and a de Havilland Canada DHC-6-100 Twin Otter is acquired. The Nevis route is purchased by **Coral Air** on May 12, 1980, while ECA continues to mount charters.

EASTERN CARIBBEAN EXPRESS, LTD. (EC XPRESS): British

West Indies (1999–2001). Partially owned by Gordon “Butch” Steward, chairman of **Air Jamaica, Ltd. (2)**, ECA is founded at St. Lucia in November 1999 to operate scheduled services throughout the eastern Caribbean. Paul Moreira is named president/CEO, with Eugene Pieterse as general manager of the new concern, which is also known as “EC Xpress.” The actual operating base is established at Barbados and orders are placed for three de Havilland Canada DHC-8-102s.

Arrangements are completed in mid-February 2000 to provide connecting flights at Barbados for **Air Jamaica, Ltd. (2)**, **Air Canada, Ltd.**, and **Virgin Atlantic Airways, Ltd.** Company officials inform the media that they hope to begin operations in April. On February 18, aviation ministers from the Organization of Eastern Caribbean States, meeting in Castries, offer a vote of support for the new carrier’s start-up.

On March 14, a provisional license is granted permitting the carrier to fly from St. Lucia to Tobago.

Dominica Aviation Minister Pierre Charles indicates on March 17 that he does not believe the new company, which now hopes to start flying on April 11, will adversely affect the revenues of debt-burdened **LIAT (1974), Ltd.** as some have worried. During this period, **Air Jamaica, Ltd. (2)** Marketing Director Allen Chastanet takes an increasingly pub-

lic role on behalf of the regional, often serving as its spokesman. It is he who announces, on March 23, that flights will begin on April 17 using a pair of de Havilland Canada DHC-8-102 3-crew, 37-passenger turbo-props that are due for delivery.

Plans to offer a shuttle service from the Hewanorra Airport in Vieux Fort to George Charles Airport in Vigie are scuttled on April 1 after members of the St. Lucia-based Southern Taxi Association protest.

Following delivery of the first Dash-8, which is christened *Spirit of Bridgetown*, the airline is officially launched in ceremonies at Castries, St. Lucia, on April 17 attended by government and private sector officials. The carrier’s new plane offers a series of scenic flights to St. Lucia and Dominica prior to the launch of scheduled service. With the EC Express aircraft registered in Jamaica, reports reach the International Civil Aviation Organization that these flights are, in fact, commercial services being operated with an aircraft not cleared to offer them. Although the flight-seeing trips were not commercial, the incident brings an end to plans for service inauguration on April 19. The de Havilland is grounded from April 19–20 until the matter can be sorted out. After an entire day of paper processing, the Jamaican inspectors sent to St. Lucia are satisfied by April 22 that all is in order and grant the *Spirit of Bridgetown* an air operator’s certificate (AOC) of **Air Jamaica Express, Ltd.**, from which the plane had been wet-leased.

The first real revenue service occurs later in the day as the Dash-8 flies from Barbados to St. Lucia and Dominica. The second de Havilland is received the next day and is named *Spirit of Castries*. Frequencies by the two turboprops, both of which operate in full Air Jamaica colors with EC Express titles, can now be expanded to St. Lucia (five flights) and Dominica (two).

Daily roundtrip frequencies to Grenada are launched on June 5 and to St. Vincent and the Grenadines the next day. Also in June, EC Express officials travel to Paris to discuss a code-sharing pact with **Air France** and to Atlanta to press the same idea with the chiefs of **Delta Air Lines**.

Delivery of the third Canadian-built turboprop, the *Spirit of St. George’s*, is delayed until August 1. On August 10, General Manager Pieterse informs *The St. Vincent Herald* that since its start-up, the new regional has transported 30,000 passengers on 1,900 flights. Plans are made to extend service to Martinique, San Juan, and Tobago by the end of the year.

In late summer, a homepage is opened on the World Wide Web. Although fuel prices begin to become a worry in the fall, Marketing Director Chastanet reports on November 7 that an application has been filed with the Transport Ministry of Trinidad & Tobago which, if approved, will allow the launch of service to that country by December.

During December, a DHC-8-102 arrives on lease from CIT Aerospace. On February 15, 2001, General Manager Pieterse will be succeeded by new President Keith F. Pope, formerly vice president at **Canadian Airlines, Ltd.** EC Express will cease operations on April 16.

EASTERN CAROLINA AVIATION: United States (1980–1981).

Eastern Carolina Aviation, the FBO at Rocklands, North Carolina, establishes an airline division in 1980 to provide scheduled air taxi flights to intrastate destinations. Employing Piper PA-23 Aztecs and PA-32 Cherokee Sixes, it duly inaugurates daily roundtrips from Wilmington to Jacksonville, Charlotte, and Raleigh. This service is only sustained for a year.

EASTERN EXPRESS COMMUTER NETWORK. See AIR MIDWEST; ATLANTIS AIRLINES; BAR HARBOR AIRLINES; METRO EXPRESS; PROVINCETOWN-BOSTON AIRLINE (PBA); PRECISION AIRLINES; SUNAIR

EASTERN FLYING SERVICE, LTD.: Canada (1956–1987). EFS is set up at Halifax, Nova Scotia, in 1956 to operate air courier and air taxi flights to small communities and bush destinations throughout Atlantic Canada.

Operations from this base and another, at Sydney, are maintained with light planes for two decades until the concern is purchased in 1987 by

the owners of **Atlantic Airways, Ltd.** and merged with it to create the larger **Provincial Airlines, Ltd.**

EASTERN METRO EXPRESS. See **METRO AIRLINES**

EASTERN PROVINCIAL AIRWAYS, LTD. (EPA): Canada (1949–1986). The Torbay, St. John's charter carrier **Newfoundland Aero Sales & Services, Ltd.** is purchased by Chester Crosbie in January 1949 and reorganized as Eastern Provincial Airways, Ltd. (EPA). A fleet is assembled comprising 1 Piper Cub, 1 Noorduyn Norseman Mk. V, 2 Cessna Cranes, and 1 Stinson 108-3. Air ambulance, forest fire patrol, survey, airmail, and passenger-cargo charter services commence in 1950.

Business grows during 1951–1952 to include work throughout Newfoundland. Equipment additions in those years include an Avro Anson, two Norseman Vs, a de Havilland Canada DHC-2 Beaver (the second production model), and a Consolidated PBY-5A Canso, acquired to fight forest fires.

In 1953 the head office is moved to Gander. The Cessna Cranes, Stinson 108-3s, the Anson and a Norseman are withdrawn and replaced by a Cessna 180, a Bell Model 47 helicopter, and a DHC-3 Otter.

Services continue without change in 1954.

During 1955–1956, contracts are also honored for flights over the Pine Tree Line, the DEW Line, and the Mid-Canada Line. During those years, one Bell 47 is replaced by another, the Piper Cub, Cessna 180, and three Norseman Vs are sold, and four Cansos, five Beavers, and two Lockheed Model 10A Electras are acquired (the latter being retired within a year).

Having lost both engines inland of Goose Bay, Labrador, on October 1, 1957, a Canso crashes in wooded countryside. The crew is rescued and the aircraft is written off and abandoned until removed by a Canadian Forces helicopter in 1987.

In 1958, EPA enters into a contract with **Gronlandsfly A.S./Greenlandair** and the Danish government for the provision of PBY-5A ice patrol and survey flights in and around Greenland.

Throughout 1959–1960, the fleet is expanded. Added are six Otters, a Canso, and two Sikorsky S-55 helicopters. In the latter year, the **Gronlandsfly A.S./Greenlandair** contract is upgraded to include passenger service. The Cansos connect Sondrestrom and Godthaab, leaving the DHC-3s to link smaller communities.

A Douglas DC-3 is acquired in early 1961 and scheduled services are inaugurated, from St. John's to Gander, Deer Lake, Twin Falls, and Wabush. Two Cessna 180s, two Piper Cubs, and a Canso join the fleet.

The DC-3 with 2 crew and 25 passengers fails its takeoff from St. Pierre on April 4; although the aircraft must be written off, there are no fatalities.

On August 29, a DHC-3 crashes north of Sondrestrom (one dead).

In April 1962, two Curtiss C-46A Commandos leased from **Nordair, Ltd.** are placed in service while a Handley Page Dart Herald 200 is purchased from the same carrier in November. These aircraft greatly improve passenger and all-cargo services.

Meanwhile, on May 12, a Consolidated PBY-5A Catalina crashes while landing at Godthaab, Greenland (15 dead).

Three additional Dart Herald 200s are acquired in March and May 1963. The Herald is employed to link Gander with Charlo, Saint John, Moncton, and Goose Bay.

In August, the four Cessna 185s are sold to **Gander Aviation, Ltd.** Two more CV-46As arrive in September and a DC-3 is sold to **Reindeer Air, Ltd.**

Also in September, larger **Maritime Central Airlines, Ltd.** is purchased and merged; the amalgamated carrier is renamed **Eastern Provincial Airlines, Ltd.** The MCA routes to Nova Scotia, New Brunswick, the Magdalen Islands, and St. Pierre are maintained with the merger partners' Vickers Viscount 700, Douglas DC-4, C-46s, PBY-5A Cansos, and DC-3s. A C-46A is sold to **Nordair, Ltd.** in December.

A second Curtiss C-46A is sold to **Nordair, Ltd.** in January 1964.

The workforce stands at 394 and the fleet numbers 29 aircraft. That number is lowered to 28 following the August sale of a DC-3.

Administrative and operational changes continue from the previous year's purchase of **Maritime Central Airlines, Ltd.**

A DC-3A with two crew crashes near Lourdes du Blanc Sablon, Quebec, on November 21; there are no fatalities.

Enplanements for the year are 98,000 and revenues of C\$5.4 million are earned.

Airline employment is increased to 430 in 1965.

En route to Sydney from Halifax, Flight 102, a Dart Herald with three crew and five passengers, is lost in a March 17 accident near Upper Musquodoboit, Nova Scotia; there are no survivors.

Less than a month later, on April 3, a DC-3 is written off at Saint-Pierre, Saint-Pierre and Miquelon; there are no fatalities.

Also in April and May, the last two C-46As are sold.

The Danish contract is concluded; passenger boardings on the Greenland internal runs since 1960 have averaged 13,000 per year. A total of 86,039 passengers are flown 22.4 million revenue passenger miles during these 12 months.

The Canadian National Air Policy of 1966 classifies the carrier as the regional airline for Newfoundland and the Maritimes. Its fleet now comprises 5 DHC-2s, 6 PBY-5A Cansos, 1 DC-4, 4 DC-3s, 3 Herald, 2 Piper PA-18s, 5 DHC-3s, and 3 Sikorsky S-55s. The Viscount is retired, but a Lockheed L-1040H Super Constellation is chartered for a year from **Nordair, Ltd.**

Another DC-4 is added in 1967 while airline employment stands at 517.

In January, a Sikorsky S-55 is written off following a crash at St. Georges; the second machine is sold to **Universal Helicopters, Ltd.** in March.

In April, five PBY-5As are transferred to the Newfoundland provincial government, to be followed by a sixth in July. A purchased DHC-6-100 Twin Otter joins the fleet, also in July. Bookings soar to 111,000 and revenues of C\$8.4 million are realized.

Montreal is added to the route network in 1968 and orders are placed for two Boeing 737-2E1s.

Formerly known as the *St. Albert*, *St. Jarlath*, and *St. Senan*, three former **Aer Lingus Irish Airlines, Ltd.** Aviation Traders ATL-98 Carvairs are purchased on January 10 for C\$500,000. After repainting and some modifications, all three are delivered in February. Meanwhile, a Lockheed L-1049H is leased from **Nordair, Ltd.** in March for a year and employed to fly charters and to inaugurate a route from Charlottetown to Montreal via Charlo. Two more Carvairs arrive in May.

Charter services decline as emphasis is now placed on scheduled operations; many of the smaller aircraft are sold and traffic generated by them declines.

The former Irish ATL-98 Carvail *St. Albert* with 5 crew and 33 passengers is destroyed as the result of a bad landing at Churchill Falls on September 28; there are no fatalities. The hulk is sold to **British Air Ferries, Ltd.** for spare parts.

A B-737-2E1 is leased from **Nordair, Ltd.**, in April 1969 to fill the gap until the carrier's Boeing jetliners are delivered.

A second "Baby Boeing" is leased from **United Air Lines** and jointly flown with **Nordair, Ltd.** Upon their arrival in November and December, the purchased short-haulers are christened *Halifax* and *St. John*, respectively.

Also in November, a second DHC-6-100 is received and joins the first in operations on behalf of the Newfoundland government. The Nordair and United Boeings are returned at year's end while overall enplanements decline to 74,285.

A DHC-3 is badly damaged in a Goose Bay accident on May 22, 1970. When the machine is repaired, it will be sold to **St. Austin Airways, Ltd.**

The bush operations of the carrier are sold in June, along with the five remaining DHC-2s and six DHC-3s, to an employee group that reorganizes them into **Labrador Airways, Ltd.** A pair of DHC-2 Turbo Beavers are simultaneously transferred to the Labrador government.

A third B-737-2E1 is received in July and named *Charlottetown*.

EPA's three Boeings largely account for a 69% jump in passenger boardings to 239,628; freight traffic falls by 1.9%.

In 1971, orders are placed for two additional B-737-2E1s. A DC-3 is turned over to a Gander trade school in October.

Enplanements soar to 324,220. The workforce in 1972 totals 525. The fleet now includes 3 B-737-2E1s, 4 DC-3s, 2 ATL-98s, 1 DHC-6, and 3 Dart Heralds.

The final DC-4 is withdrawn in May. Service is extended to St. John, New Brunswick.

Passenger boardings leap 14% to 377,000, cargo accelerates 16%, and revenues rise 14%.

Several routes dropped by **Air Canada, Ltd.** in 1973 are assumed, including one to Stephenville in Newfoundland. The number of destinations now served in the Atlantic Provinces is 18.

Two more B-737-2E1s, the *Fredericton* and *Sydney*, join the fleet in March and October, respectively.

Meanwhile, the last two ATL-98 Carvairs are sold to **British Air Ferries, Ltd.** in September.

Enplanements this year advance to 534,600, a huge 43% increase.

The workforce grows to 740 in 1974.

By contract, the carrier becomes part of the Air Canada computerized reservations system and the last DHC-6 is sold to **Labrador Airways, Ltd.** in January.

The B-737-2E1 *Labrador* is delivered in December.

Passenger boardings swell 10% to 594,000 and freight rises 6.2%.

A total of 49 new employees are hired in 1975.

Sold, the three remaining Heralds are delivered to their new British owner (BAF) between January and March.

A new service is inaugurated in April linking Halifax and Montreal via Moncton, Fredericton, or St. John.

Only three DC-3s remain from a once-large propeller fleet and these are employed, in association with **Air St. Pierre, Ltd.**, to operate daily scheduled flights from Sydney to the French islands of Saint-Pierre and Miquelon.

Preparing to upgrade its inclusive-tour business, the carrier also takes delivery of a seventh B-737-2E1, an unnamed unit received in October.

Although cargo is up by 17.6%, passenger bookings dip 3.7% to 585,000.

Airline employment is reduced 2% in 1976 to 787.

During the winter, company Boeings fly inclusive-tour weekend charters to Caribbean destinations. In need of additional commuter capacity, the carrier orders several Hawker Siddeley HS 748s, the first of which is received in March and placed in service a month later to the French islands.

In May, the unnamed B-737-2E1 received the previous October is leased to **Nordair, Ltd.** Three DC-3s are withdrawn in June, September, and December, respectively.

Passenger boardings fall another 2% to 583,099 and freight is off by 7%.

Winter weekend charters are continued while, from June–December 1977 the B-737-2E1 *Labrador* is leased to **Aloha Airlines** in Hawaii.

Negotiations are undertaken with **Air Canada, Ltd.** concerning route rationalization in the Atlantic Provinces.

In December, EPA joins with the state carrier to offer joint routes and fares; **Air Canada, Ltd.** also agrees to service Eastern's planes at Montreal.

Bookings soar to 714,868. Revenues total C\$33.7 million, but a loss of C\$763,000 is reported.

The workforce is increased in 1978 to 857.

The last DC-3 is sold in April as the *Labrador* begins a yearlong lease to **Aer Lingus Irish Airlines, Ltd.** In the face of continuing losses in 1977, the B-737-2E1 leased out to **Nordair, Ltd.** is now sold to that carrier.

Two more HS 748s are acquired in May.

Cargo jumps 28% and passenger boardings climb 15.6% to 846,800. On revenues of C\$40.4 million, a C\$2.6-million profit is earned.

The *Labrador* is returned to the fleet in April 1979, but bookings still fall to 840,000; freight is up a slight 1%.

Having won a direct Halifax–Toronto route in June, EPA's Boeings begin daily service between those two cities on July 7, 1980. The frequency is increased to twice-daily in September. The direct Halifax–Montreal service is allowed to continue for six months.

In November, the carrier becomes a subsidiary of the newly created, Gander-based Newfoundland Capital Corporation, Ltd.

Cargo declines 16%, but bookings advance 5% to 878,000. A C\$1-million profit is reported.

A fourth HS 748 is leased from **Dan-Air/Dan Air Services, Ltd.** for six months, before it is purchased in July 1981.

While taxiing after landing at Sydney on December 29, the nosegear and brakes of an HS 748-2A with 3 crew and 15 passengers, fail and the plane collides with the terminal building. There are no fatalities, although the aircraft must be written off and considerable damage is done to the facility.

Another **Dan-Air/Dan Air Services, Ltd.** HS 748 is now purchased.

Enplanements for the year, in the face of world recession, drop to 862,000. Costs climb as fuel prices rise.

The employee population totals 900 in 1982.

Employing the HS 748s, the new subsidiary **Air Maritime, Ltd.** is formed in January to fly scheduled commuter services in New Brunswick, Nova Scotia, Prince Edward Island, Saint-Pierre, and Quebec City. The routes of the two carriers are now integrated via the Air Canada reservations system.

In February (and later in April), a new HS 748 joins the fleet.

A third Boeing Halifax–Toronto frequency is added in April, with a fourth laid on for Thursday–Saturday. To meet the capacity needs of the new timing, a new B-737-2T5 is simultaneously chartered while a B-737-275C is leased for a year from **Pacific Western Airlines, Ltd.**

The association with **Air Canada, Ltd.** ends in October, as EPA lines up with **CP Air, Ltd.**, integrating operations at Toronto, Montreal, Halifax, and Ottawa. The larger carrier takes on the regional's reservation and overhaul requirements.

Freight is up 4% to 6.86 million FTKs, but overall enplanements fall 8% to 788,000.

The workforce is reduced in 1983 to 821.

The PWA B-737-275C is returned in April.

Interchange flights with **CP Air, Ltd.** begin on June 12; EPA Boeings (with small CP Air logos) maintain the Halifax–Montreal and Toronto segments of the arrangement.

Labor problems from January 7 to early June insure that sharp traffic declines continue. Passenger boardings drop 29% to 556,900 while cargo falls by an equal percentage. Revenues decline 19% to C \$59.1 million, but a slight C\$128,000 profit is taken.

The employee population grows 7.2% in 1984 to 880.

Owner Harry Steele early in the year announces that company headquarters will be transferred to Halifax. Another HS 748 is acquired in September.

As purchase negotiations open with **CP Air, Ltd.**, the carrier experiences a major turnaround. Passenger bookings soar 37% to 761,000 and freight gains by 23% to 6.6 million FTKs.

On April 17, 1985, newly renamed **Canadian Pacific Air Lines, Ltd. (CPAL)**, the nation's second largest carrier, purchases EPA, the fourth largest, and its **Air Maritime, Ltd.** subsidiary for C\$15.6 million, allowing it to maintain its separate identity during the amalgamation period. Steele remains as CEO during the transition and the workforce stands at 850. Services are restructured at the new Halifax hub and a new livery is adopted. Halifax–Ottawa flights commence in June with a Montreal stop added in October. Passenger boardings jump 25% to 951,000, but freight falls a huge 54.2% to 3.02 million FTKs.

On January 1, 1986, EPA ceases to exist as a separate airline when the carrier is fully absorbed into CPAL.

EASTLAND AIR (PTY.), LTD.: P.O. Box 6021, Toowoomba West, Queensland, 4350, Australia; Phone 76-347711; Fax 76-345215;

Code DK; Year Founded 1989. Eastland is established by Andrew and Cynthia Moore in 1989 to provide feeder flights on behalf of **Australian Airlines (Pty.), Ltd.** Equipped with a single Cessna 310, chief pilot Andrew Moore inaugurates scheduled services between Toowoomba and Brisbane, while Cynthia handles the duties of general manager.

The fleet is upgraded in 1990–1992 to include a Beech King Air 100 and a Piper PA-31-310 Navajo. The single route is maintained 13 times per week with the same equipment in 1993–1994. Although the frequencies are maintained as before in 1995, the fleet is altered to include just two PA-31-350 Navajo Chieftains.

A Swearingen Metro II is acquired in 1996 and the number of weekly return frequencies from Toowoomba to Brisbane increase to 15. The fleet is increased by the addition of two more Navajo Chieftains in 1997 as the 10-worker company takes over the operations of the failed **Sabair Airlines (Pty.), Ltd.** in December.

Flights continue in 1998–2000. During the former year, service is launched to Lizard Island.

EASTMAN AIRWAYS. See **AIRMARC AIRLINES**

EASTWAY AVIATION: Long Island MacArthur Airport, Ronkonkoma, New York 11779, United States; Phone (516) 737-9911; Fax (516) 737-4926; Year Founded 1979. This corporate carrier is established in 1979 to provide nonscheduled services for company executives in the New York and New England area. By 2000, the concern employs nine pilots and operates two Beech Super King Air 200s and a King Air 90.

EASTWIND AIRLINES (THE BEE LINE): United States (1994–1999). Low-fare Eastwind is conceived by former Price Waterhouse analyst Jim McNally and former **Eastern Air Lines** executive Richard R. Haller at Trenton-Mercer Airport in New Jersey in the summer of 1994. Eastwind Capital Partners provides initial capitalization and the DOT certification process is begun; it will take McNally and Haller two-and-a-half years from idea to first flight. Meanwhile, the new entrant chooses for itself the nickname “The Bee Line,” which is based on its slogan “Make a beeline for lower fares and fewer hassles.”

Purchased by UM Holdings, Ltd. of Haddonfield, New Jersey, in January 1995 before it can start-up, John Agliaforo becomes chairman, with Jim McNally as president, Gerry Albans as CEO, and Richard Haller as vice president-management. Plans are made in February for the lease of two Boeing 737-2H5s, formerly operated by **USAir**, from Shawmut Bank and the inauguration of revenue services to Boston and Greensboro. Government certificates are received in just 85 days from application.

A workforce of 80 is recruited and, following delivery of the first “Baby Boeing,” twice-daily roundtrips commence on August 16 to Boston and daily roundtrips to Greensboro, North Carolina. The one-way fare from New Jersey to Massachusetts is \$53 and from New Jersey to North Carolina, \$63. Through service is available from Boston to Greensboro via Trenton for a deep-discount, one-way fare of \$83.

The second B-737-2H5 is delivered on August 30. Like the first, it has a white fuselage decorated by a yellow wind-blown scarf; the solid green tail displays a large smiling bee above the title “The Bee Line.”

On October 18, winter holiday flights are started to and between Jacksonville and West Palm Beach in Florida. Indeed, Eastwind is the only airline providing scheduled jet service from Jacksonville to West Palm Beach. Simultaneously, the company introduces special fares, good through November 15. Travelers booking roundtrips from Florida to Trenton or Greensboro are permitted to take someone else along for a dollar.

A total of 44,000 passengers are flown by year’s end. Costs associated with start-up exceed operating income and there are losses: \$2.7 million (operating) and \$2.71 million (net).

There is no change in the employee population or fleet during 1996.

On March 9, executives announce that the carrier will substitute new routes to Providence and Richmond on April 16 for its Florida flights.

The change will give the new entrant four daily flights on the East Coast.

Although bookings slip almost 50% in the week following the May 11 **Valujet Airlines** disaster in Florida, they quickly rebound; on May 22, service is inaugurated to Atlanta, Valujet’s home base and site of the summer Olympic Games.

On June 6, two more daily roundtrips are inaugurated from Trenton to the Georgia metropolis, one via Greensboro and the other via Richmond.

For the fourth time in a month, one of the company’s aircraft on June 9 suffers a yaw anomaly. While descending to Richmond, a B-737-2H5 with 53 passengers rolls sharply to the right. Capt. Brian D. Bishop is able to oppose the roll, which brings an NTSB investigation and the grounding of the aircraft for two months. In its place, a B-737 is wet-leased from **Viscount Air Service**.

A maintenance contract is entered into with **USAirways**; each night, the company’s planes are flown to the major’s Greensboro maintenance base for preventive and scheduled upkeep.

Promotional fares, known as Bee Line Specials, commence on July 20. Good through August 24, the first promotion is for a \$25 one-way tariff between Atlanta and Trenton. Four-times-a-week roundtrips between Trenton and Orlando commence on August 29.

Passenger boardings soar to 169,647 and revenues reach \$13.02 million. Expenses, however, skyrocket to \$18 million and leave an operating loss of \$4.98 million; a net \$5.05-million loss is also reported.

President McNally departs in March 1997 to “pursue other endeavors,” and is succeeded by Capt. Herman F. Gillis 3rd.

Company headquarters are transferred from Trenton to Greensboro, North Carolina, and orders are placed for two Next Generation B-737-700s for delivery in April and June of 1998. Meanwhile, the route network is revised. Unprofitable markets at Richmond, Atlanta, Jacksonville, and West Palm Beach are dropped and frequencies from Greensboro to Tampa, Orlando, Trenton, and Boston are increased.

The company’s marketing direction is changed to rely more heavily on travel agents. On May 19, Eastwind switches to the Wings 2000 computerized reservations system software developed by Florida-based SSI and establishes a reservations center in Orlando. The previously reservations contract with Dakotah Reservation Services of Aurora, Colorado, will be terminated when the new system is turned on.

New emphasis is placed on on-time performance; in July, all departures are made 100% on time.

The new reservations center in Florida opens on November 19. The new connections to Apollo, SABRE, SystemOne, and Worldspan bring an immediate boost in agency business.

On December 1, the carrier launches twice-daily frequencies from Trenton to Washington, D.C. (IAD), with continuing service to Greensboro. A third B-737-2H5 is leased in December.

Customer bookings climb 14.1% to 194,000. Operating revenues jump 37.2% to \$17.87 million, while expenses rise 35.2% to \$24.34 million. The operating loss deepens to \$6.47 million, while a net \$6.55-million loss is suffered.

Early in January 1998, service is discontinued between Trenton and Boston.

Upon the arrival of the Boeing, new daily nonstop service is inaugurated on January 22 from Greensboro to Fort Lauderdale, together with one-stop flights from Trenton and connections from Washington, D.C. (IAD). The same day, the company begins to operate four daily roundtrips between Greensboro and Trenton and twice-dailies to Orlando from both Trenton and Greensboro.

As the result of a large number of petitions, the carrier, on April 6, reinstates its twice-daily roundtrips between Trenton and Boston.

The company’s first Next Generation B-737-700 is received in July.

Rochester becomes a company hub on August 1. From that New York community, Eastwind offers twice-daily nonstops to Boston and Washington, D.C. (IAD) and twice-daily direct flights to Trenton and Greensboro.

The company’s second Next Generation B-737-700 is received at the end of the first week in August. It is employed to increase frequencies from

Rochester to Boston and Washington on September 9 from two daily nonstops to three, with three direct services to Trenton and Greensboro.

Daily B-737-700 roundtrips are inaugurated on November 23 between Greensboro and New York (LGA).

Customer bookings accelerate 15% to 222,000. Revenues surge 55.4% to \$27.76 million, but costs jump by 67.5% to \$40.8 million. The operating loss also rises, to \$13.65 million, as does the net loss, to \$13.02 million.

On February 10, 1999, the company reservations system is switched over to SABRE. Simultaneously, an additional reservations center is established at the company's Greensboro headquarters.

Nonstop daily roundtrip service is inaugurated on March 4 from Philadelphia to Orlando, together with direct service to Orlando from Pittsburgh. New nonstops are begun on March 15 from Greensboro to Boston, bringing to three the number of daily roundtrips flown between Piedmont Triad International Airport and Logan International Airport.

Simultaneously, the company doubles its hub operation at Greensboro by doubling its daily scheduled flights from that point to Orlando, Philadelphia, Pittsburgh, and Trenton.

Eastwind is named the "official carrier" for the International Home Furnishing Center's "IHFC market weeks" to be held on April 15-23 and October 14-22.

The carrier is plagued by difficulties at the end of the first quarter and beginning of the second, many involving flight delays, cancellations, and re-routings. On April 10, passengers destined for Trenton refuse to get off a plane at Greensboro for fear they will be stranded. It becomes necessary to call airport security.

Daily B-737 nonstop roundtrips begin on April 15 from Greensboro, Philadelphia, and Orlando to Miami (MIA). Eastwind also offers one-stop service from New York (LGA) to Miami, as well as connecting service from Pittsburgh, Boston, and Trenton.

On April 16, passengers arriving at Greensboro are so irate that they begin screaming at company personnel. One aircraft, due to depart Boston at 6 a.m., had not departed until afternoon, arriving at 6:30 p.m. As delays continue, 120 passengers become unruly to a point where sheriff's deputies are summoned to backup airport security men attempting to restore order. The aircraft finally departs for Orlando at 8 p.m.

Also in April, the carrier comes under scrutiny of the New York State Attorney General's office for alleged double billing of passengers for the same flights. Company officials are called to Albany, where they promise to improve customer service, prevent overbilling, and reduce flight delays.

The situation does not seem to improve; by May 29, the state's top law official has received 114 more complaints. These and other unreported concerns lead the FAA to step up safety inspections in June. On the other hand, the federal government grants permission for a fleet expansion of from five aircraft to seven.

On June 21, Eastwind announces that although it will halt its New York (LGA) service, it will resume flights to Tampa by mid-July.

On July 23, the company reports a suspension of service to and from Boston, Pittsburgh, and St. Petersburg. The lapse, due to "unforeseen business circumstances," should end within six months.

Six days later, on July 29, a more terse announcement is made to the effect that President/CEO Hallcom has been "relieved of his duties" and that Vice Presidents Scott Glasser and Michael Kopay are no longer employed. The management consultants Mort Beyer & Agnew are brought in to restructure all levels of the airline.

The company is put up for sale on August 20. Potential buyers are advised that a minimum bid of \$10 million will be accepted by Morten Beyer & Agnew, who have been retained to handle the transaction.

On August 26, the New York based leasing concern C.I.S. sues the company for \$1.5 million, which has not been paid on the lease of a B-737 and six engines.

Service between Trenton, Greensboro, and Orlando are suspended on September 8, with the last flight, between Greensboro and Trenton, transporting just 10 passengers.

Revenues during the final year have dropped 52.2% to \$13,269,000 while expenses, despite their falling 53%, are still \$19,169,000. Losses have "improved," but still cannot be sustained, reaching \$5.9 million (operating) and \$5.88 million (net).

easyJET AIRLINES, LTD.: London Luton Airport, Easy Land, Luton, Bedfordshire, England, LU2 9LS, United Kingdom; Phone 44 (0152) 44 55 66; Fax 44 (0152) 44 33 55; <http://www.EasyJet.com>; Code EYZ; Year Founded 1995. This no-frills, low-fare carrier modeled on Southwest Airlines (2) in the U.S. is established at London (CTN) on October 18, 1995. Shareholding is divided between 30-year-old Chairman Stelios Haji-Ioannou, Polys Haji-Ioannou, and Clelia Haji-Ioannou. The chairman, son of a Greek Cypriot shipping tycoon who now owns his own shipping business, insists to the media that everyone refer to him only by his first name and requires that his employees paint everything, wherever possible, in his favorite color—orange. The new chairman, according to the December 18 issue of the London *Financial Times*, also faces a whispering campaign because of a four-year-old Mediterranean incident. Following the loss of the tanker *Haven* off Genoa in 1991 in which five crewmen die, Stelios and his father were indicted in Italy on manslaughter charges. Both will, eventually, be cleared.

Meanwhile, Raymond Webster is appointed managing director of the new airline and he recruits a workforce of 200. An arrangement is worked out with Herb Kelleher's company to send all new management employees to the Dallas headquarters of Southwest Airlines for three days of training. Unlike rival Debonair Airlines, Ltd., but like its Southwest Airlines model, easyJet encourages its cabin and flight crews to dress casually; jeans and orange sweatshirts are approved attire.

A wet-leased Boeing 737-204, first flown by Britannica Airways, Ltd., is acquired from GB Airways, Ltd. and painted in white livery with orange tail and engine nacelles. Reflecting its 100% direct-sale product, the company's U.K. telephone reservations number and the words "Call Us Direct in the U.K." are painted along all of its aircraft fuselages above the windows. No travel agents or reservations system will be employed—10% commissions are thus saved from not employing the agents along with another £2.5 per booking by skipping a reservations system. The GB Airways, Ltd. charter also covers maintenance and insurance while ground handling is also contracted out. Flying from Luton Airport rather than London (LHR) is expected to save easyJet £10 per passenger in landing fees.

Ticketless travel and open seating are also company features. There is no interlining and accounting is kept simple under the basic marketing concept of payment up front (cash or credit cards only, no checks) with no cancellations and no refunds. There will be no overbooking or backup aircraft. Passengers show up at the airport, present their money or credit cards, and are given a plastic boarding pass. Once on the Boeing, customers hand in their boarding passes, which are reused. It also becomes company policy to set its highest tariffs at half or less than its competitors full economy fares. Although drinks and snacks will be available, they are not complementary; peanuts, beer, or coffee must be purchased. On the other hand, the company will offer inexpensive deals on the Thameslink rail and coach service to Luton Airport.

Revenue flights commence on November 10 linking the carrier's base with Glasgow five times daily. Six-times-daily service to Edinburgh begins on November 24 following delivery of the second GB Airways, Ltd. B-737-204, which has a small Scottish flag painted next to its registration number.

Services are initiated thrice daily to Aberdeen and daily to Inverness on January 26, 1996. As part of the publicity preceding this route, a B-737-204 has a cartoon image of the Loch Ness monster painted along the side of the fuselage. "Nessie" is green with orange polka dots and swims along under the carrier's phone number.

A B-737-3M8, chartered from Monarch Airlines, Ltd., joins the fleet in mid-April and five-times-daily flights commence on April 24 to Amsterdam, the company's first Continental destination.

Since January, the carrier has sold 150,000 tickets. When the telephone number changes, the aircraft are repainted; the phone digits are painted billboard-size along the planes' sides. Twice-weekday and thrice-weekend Barcelona and Nice flights commence during June.

When **KLM (Royal Dutch Airlines, N.V.)** adds capacity in July and lowers roundtrip fares to just £70 to compete on the London (CTN) to Amsterdam route, easyJet finds itself engaged in a fierce price war with the Dutch flag carrier. The new Dutch fares are marketed to customers seeking to switch to a more traditional service; the promotion is titled "Easy Choice." The approach is the same taken simultaneously by KLM partner **Air U.K., Ltd.** in its contest with new entrant **World Airlines, Ltd.** on the route from London (LCY) to Amsterdam.

KLM makes a significant error in August when one of its officials grants an interview to the *Financial Times*. The executive is quoted as saying that the "Easy Choice" price cuts are necessary "to stop the growth and development of easyJet and to make sure that this newcomer will not be able to secure a solid position in the Dutch market." At this point, Chairman Haji-Ioannou directs the company's legal department to send KLM a letter that accuses it of abusing its market dominance and asking it to cease and desist from such practices as selling seats below their cost.

KLM does not make the requested changes and on October 9 Haji-Ioannou lodges a 22-page complaint (including the *Financial Times* article) with the Competition Directorate of the European Commission at Brussels, stating that the Dutch major is engaged in predatory pricing tactics designed to chase easyJet out of Schiphol. The EU investigates.

When Kevin and Jackie Freiberg publish their book *Nuts!: Southwest Airlines' Crazy Recipe for Business and Personal Success* late in the year, Chairman Haji-Ioannou makes it required reading for all employees.

A support and wet-lease contract is now signed with the charter division of **Air Foyle, Ltd.** easyJet is the first contract customer for its new air operators certificate program under which the veteran U.K. carrier, known for its outsized freighting with the Antonov An-124 Ruslan, will offer management, business, and engineering expertise plus its AOC to assist the start-up as it seeks viability. The program is similar to one instituted by **British World Airlines, Ltd.** for **Debonair, Ltd.**

Airline employment stands at 250 in 1997.

British Airways, Ltd. (2) Chairman Robert Ayling invites Chairman Haji-Ioannou and Managing Director Webster to discuss the major's possible investment or link-up. Although a meeting is held, BA soon indicates that it will not be able to receive CAA approval for any union.

Owner Haji-Ioannou again complains to the EU in April that **KLM (Royal Dutch Airlines, N.V.)** has employed predatory pricing techniques and dominant market position, in violation of EU competition rules, to drive his carrier out of the Netherlands. The EU issues a statement of objections against the major's alleged behavior and officials even go so far as to raid the Dutch line's offices seeking documents.

For the second time in a week, London (CTN) is subjected to a bomb threat on April 25. As in the earlier incident, easyJet is able to operate its flights in and out of the airport without using the terminal building.

The company's fourth "Baby Boeing," a Dash-3Y0 also previously flown by **Monarch Airlines, Ltd.**, is received and allows return of the two leased Dash-204s on April 30.

Weekly roundtrip flights from Amsterdam to Nice commence on May 3. Another B-737-300 will arrive in May and three more during the fall. Thrice-weekly flights from London (CTN) to Aberdeen commence on May 15, but because of a delay in the delivery of the new Boeings, these must be cut back to weekly service two weeks later.

The carrier, on June 12, announces that it will cut its weekday return flights between London (CTN) and Aberdeen to two per day on July 18 because it is having problems meeting the Aberdeen Airport curfew.

On June 13, Chairman Haji-Ioannou, speaking at the *Financial Times* press conference at the Paris Air Show, announces that he has placed a deposit with Boeing for 12 new B-737-300s, valued at \$500 million.

In July, the city council of the Borough of Luton announces that it is seeking a commercial partner. To win the stake and a management con-

tract, upwards of £170 million in equity investment will be required. Chairman Haji-Ioannou approaches the politicians with a plan that would see the airline buy in and the airport expanded through the addition of a new terminal and additional taxiway space. Competing **Debonair Airlines, Ltd.**, which also uses the airport, opposes the easyJet move.

The Aberdeen service from London (CTN) is cut to twice daily on July 18.

In mid-September, the company makes its first direct buy from Boeing, placing a \$500-million order for 12 new B-737-300s. The cost of the equity portion of the jetliner purchase will be covered by a CAA bond refund. When delivered in mid-1998, the aircraft will allow the carrier to spread its low-cost wings deeper over the Continent.

Also during the month, the EU Commission holds hearings into allegations that **KLM (Royal Dutch Airlines, N.V.)** has engaged in unfair practices.

On September 21, the order with Boeing for 12 new B-737-300s is confirmed.

At the beginning of October, **British Airways, Ltd. (2)** announces that it is switching the London terminus of its Inverness route from Heathrow Airport to Gatwick and franchising the service to its subsidiary **British Regional Airlines, Ltd.** At the same time, easyJet announces that it will start a morning B-737-300 roundtrip from Inverness to London (Luton) to fill the gap left by BA.

The CAA awards easyJet its own air operator's certificate on October 8.

Daily roundtrip flights commence on December 5 between London (CTN) and Palma de Mallorca.

When **British Airways, Ltd. (2)** announces plans in December for the creation of a low-fare, no-frills airline for the spring of 1998, Chairman Haji-Ioannou immediately protests and threatens to sue the major if it continues with its strategy. easyJet's chairman will now withdraw his claim against **KLM (Royal Dutch Airlines, N.V.)**, which he had a good change of winning, to allow the EU Commission's Competition Department to focus its attention on the new BA threat.

A seventh B-737-300 is delivered at Christmas.

Traffic figures are provided for the fourth quarter and show bookings of 301,482 passengers.

Late in January 1998, **British Airways, Ltd. (2)** announces that the name finally chosen for its low-cost unit will be GO. The new unit will be based at London (STN) and commence operations in May with eight B-737-300s leased from the parent. easyJet Chairman Haji-Ioannou calls for an investigation of the new entrant by the CAA, calling it a camouflaged ploy designed to drive the other British discount operators out of business before again raising ticket prices. He specifically seeks a court injunction against the new operation, pointing to BA's guarantee of leases on eight B-737-300s and claiming that the pledge will allow the new entrant to obtain the aircraft at below market value, a move which is against European Union law. **British Airways, Ltd. (2)** is not put off by easyJet's threats and throughout the first two quarters pursues its goal of launching the low-cost subsidiary. Plans are carefully laid not to compete on routes flown by its discount rivals.

Early in February, an \$11-million offer is made for the acquisition of **Air Holland, N.V.** Even after the tender is increased to \$12 million, shareholders in the Dutch airline reject the easyJet offer on February 10.

At the end of February, BA rejects easyJet's claims that it will abuse its dominant market position by cross-subsidizing GO through the guarantee of the new entrant's leases for eight B-737-200s.

On March 26, Haji-Ioannou's carrier purchases 40% shareholding in the Swiss charter line **TEA-Basel, A.G.** The U.K. airline has the option to increase its stake in the Basel-based line to 90% and to refocus the company as a discount company and franchise partner, easyJet Switzerland, A.G. The equity boost is dependent upon Switzerland's joining the European Union "open skies" arrangement. The company remains Swiss-registered, with the same Swiss staff and management. The franchise arrangement with **TEA-Basel, A.G.** physically begins on May 1 as

one of the TEA aircraft begins flying on the Geneva–London (CTN) route which easyJet already serves.

After hearings on May 11–12, a U.K. high court denies a request from easyJet for an immediate injunction to prevent **British Airways, Ltd. (2)** from guaranteeing the leases of “Baby Boeings” that will be employed by the low-cost GO division. It does, however, promise that, within two months, it will hear easyJet’s original complaint regarding the major’s unfair subsidization of GO through aircraft charter guarantees.

With all of the pieces in place, GO launches services from London (STN) to Milan and Rome on May 22 with three B-737-200s. Among the passengers on the inaugural Rome service aboard for a “bit of fun” is Chairman Haji-Ioannou, plus six colleagues, all dressed in bright orange company overalls.

While easyJet and **Debonair, Ltd.** attempt to limit GO via legal and regulatory means, an even stronger competitor threatens to take it on head-to-head in the marketplace. In a speech before the Aviation Club at London on June 1, Michael O’Leary, CEO of Dublin-based **Ryanair, Ltd.**, pledges that his concern “will compete with lower fares rather than wait for the bureaucrats in Brussels to rescue us.”

Leading aviation barrister Robert Webb, who had won the high court ruling for easyJet in May and had previously represented **Virgin Atlantic Airways, Ltd.** during the 1993 “dirty tricks” libel action, is recruited on June 30 to serve, effective September 1, as general counsel from **British Airways, Ltd. (2)**. The discount carrier announces its “regret” at the lawyer’s change of sides.

On July 1, the company begins advertising for its new deep-discount services between London and Athens, using the theme “Who needs travel agents?” to emphasize that travelers can book directly without tickets or agents. The Greek travel agents union promptly takes easyJet to court over this promotion and wins a temporary ban of such ads on July 9 from a judge who agrees that they offend the integrity of all travel agents. A trial is ordered.

Daily roundtrips between London (CTN) and Athens commence on July 10; the service is doubled to twice daily a week later.

Expecting to boost sales through a controversial surprise move, Chairman Haji-Ioannou promises to give out tickets to those who will come to the carrier’s Athens trial on July 21. As a result, hundreds pack the courtroom early that morning expressing their support for easyJet’s discount approach. At the end of the proceedings, the easyJet chief gives away 800 free tickets to the crowd that had backed him during the day.

On July 28, easyJet places a \$650-million order with Boeing for 15 Next Generation B-737-700s, with options for 15 more; deliveries are scheduled to begin in October 2000.

The first of 12 ordered B-737-300s arrives in August.

GO inaugurates thrice-daily service on September 8 between London (STN) and Edinburgh; the route is the first flown directly in competition with easyJet. Ten days later, Chairman Haji-Ioannou’s company begins twice-daily roundtrips between London (CTN) and Belfast.

Chairman Haji-Ioannou announces the **TEA-Basel, A.G.** franchise agreement to the British Swiss Chamber of Commerce meeting in Geneva on September 25. At this point, it is announced that TEA-Basel will transfer its headquarters from Basel to Geneva the following April.

On October 10, GO reduces all of its Tuesday, Wednesday, and Thursday midweek fares for the next two months. The promotion requires a minimum stay of two nights. The ticket price cuts include a reduction on the London (STN) return routes to Rome, Lisbon, and Bologna from £100 to £60; from London (STN) to Milan and Copenhagen from £100 to £50; and from London (STN) to Edinburgh from £70 to £40. The latter rate is carefully set as to remain £2 higher than that of competing easyJet.

Claiming that the GO £40 promotional fare on the London (STN) to Edinburgh route is designed to drive his London (CTN) to Edinburgh service out of business, easyJet Chairman Haji-Ioannou organizes a high-profile protest flight from London (CTN) to Brussels on October 27 to deliver a formal complaint to the EU Commission. In a statement,

the discount airline’s leader indicates that he has been forced to match the GO fare, which is believed to be predatory.

Repainted in easyJet colors, a **TEA-Basel, A.G.** Boeing, doing business as easyJet Switzerland, A.G., initiates twice-daily nonstop return service between London (LTN) and both Zurich and Geneva.

Chairman Haji-Ioannou on November 16 announces the formation of a new hub at Liverpool that will become its second British base after London (CTN).

In December, it is reported that for the first three quarters of the year, the airline has flown 1.7 million passengers and generated revenues of £77 million (\$126 million).

At the end of the year, two newly delivered B-737-33Vs, together with their ground staff and air crews, are stationed at the airport. In continuation of the on-going war over GO, both wear billboard-sized orange titles along both sides of their white fuselages that read “Stop BA Stop.”

Enplanements for the year total 1.66 million, while 7,000 FTKs are also operated. Additionally, as the chairman will note in early February, the company generates its first profit, £2.3 million (\$3.6 million).

Twice-daily roundtrips from Liverpool to Barcelona commence on January 7, 1999, with a daily return service beginning the next day to Geneva.

By the end of the month, **TEA-Basel, A.G.** doing business as easyJet Switzerland, Ltd., is operating thrice-daily nonstop roundtrips between London (LTN) and Zurich and four return flights every day from Luton Airport to Geneva.

In February, the airline joins with FLS Aerospace, Ltd. to form the joint-venture maintenance concern EasyTech, Ltd. Based at London (LTN), the operation is 80% owned by easyJet, cooperates closely with the airline, and adopts its corporate culture and practices. The new company supports the easyJet B-737 fleet in a highly integrated fashion.

In March, daily roundtrips start to Malaga along with twice-daily return flights to Belfast. During the month, Chairman Haji-Ioannou announces that a minority stake in the airline will be floated on the London Stock Exchange and New York’s Nasdaq in early 2000. Simultaneously, the complaint lodged with the EU Commission earlier concerning GO is dropped.

On the evening of March 1, Barbara Cassani, CEO of GO, delivers the annual Lindbergh Lecture before a London meeting of the Royal Aeronautical Society. Having agreed to take questions afterward, she and others are startled when the first question, concerning financial performance, is posed by none other than Stelios Haji-Ioannou, chairman of easyJet.

The number of daily roundtrips between London (CTN) and Aberdeen, Scotland, is doubled to two on March 28.

By the end of April, easyJet has received six B-737-300s, with six more to arrive by the end of the year. Having trumpeted the arrival of the new aircraft around Europe, company officials are somewhat surprised on May 5 to be served an injunction by **Olympic Airways, S.A.** regarding its advertising campaign in the Greek press.

On May 10, Chairman Haji-Ioannou informs the press that his no-frills carrier will employ some of the cash raised in its Y2K stock market flotation to upgrade services from London (CTN) to Amsterdam, Belfast, Edinburgh, and Glasgow.

Occupation of the new Geneva headquarters for **TEA-Basel, A.G.** doing business as easyJet Switzerland, A.G., is completed on May 21.

Plans are announced for the inauguration of new services on July 28 from Geneva to Amsterdam, Barcelona, and Nice.

The first easyEverything, a warehouse-sized Internet shop, opens in London’s Victoria Station in June.

In July, daily roundtrips are inaugurated from Liverpool to both Belfast and Malaga.

By the end of the first full week in July, easyJet Switzerland, A.G. has sold thousands of seats for the inauguration of service on its new route from Geneva to Barcelona.

On July 12, a spokesman for **Swissair, A.G.** holds a news conference to remind the discount operator that a national law enacted the previous

November grants the SAirGroup subsidiary a monopoly over the Barcelona route and any others that it has not abandoned. The combative easyJet Chairman Haji-Ioannou promises a court battle.

Thrice-daily return service from Liverpool to Belfast begins on July 15; simultaneously, daily roundtrips are inaugurated from London (LTN) to Malaga. The Swissair position is confirmed by Transport Minister Moritz Leuenberger on July 19.

The authority of easyJet Switzerland, A.G. to operate to Amsterdam and Nice is, however, confirmed as **Swissair, A.G.** had dropped those routes from its regular schedules before the November law had taken effect.

Beginning on July 29, 3,500 passengers with confirmed Barcelona tickets have their fares refunded in cash, are offered free roundtrips from Geneva to Barcelona, and are encouraged to contribute to a company fund set up "for the protection of consumer interests against Swissair."

As the latest airline to be subjected to the scrappy tactics of the British discount carrier, **Swissair, A.G.** and its executives must now stand by as easyJet Switzerland, A.G. begins to bypass the November law by offering daily "charter" flights from Geneva to Barcelona, using the TEA-Basel, A.G. tour operator license, which is still valid.

Formerly CEO of FLS Stansted, Wilhelm Hahn-Peterson is named chief operating officer on August 9.

The company and its chairman are profiled in the BBC-TV production *Traffic*, which is broadcast over BBC-2 on August 12.

Queen Elizabeth II opens the new terminal at Luton Airport on November 25. In something of a public relations gaff, Chairman Haji-Ioannou, who is in a dispute with the facility, fails to attend.

For the 12 days after December 1, easyJet operates additional flights from London (LTN) to both Glasgow and Edinburgh.

Daily B-737-33V roundtrips (through March) are inaugurated in mid-December between London (LGW) and Geneva.

A special hour-long episode of London Weekend Television's *Airline* is screened on December 27, showing the run up to Christmas by employees of easyJet.

Passenger boardings this year increase 68.9% to 2,982,000.

The workforce at the beginning of 2000 stands at 1,200. The B-737-300 fleet includes 2 Dash-3M8s, 1 each Dash-3Q8, Dash-3Q8-3Y0, and Dash-3Q8-375, and 12 Dash-33Vs. Also operated is a Dash-59D, leased from **British Midland Airways, Ltd.**

An additional weekend roundtrip is added on January 14 between Liverpool and Geneva to meet a growing demand from independent ski travelers.

On February 3, Chairman Haji-Ioannou presents the Greek embassy in London with a check for £10,000 collected since September for victims of the earthquake that hit his homeland.

In early February, the company becomes involved in a fiscal dispute with the management of Luton Airport over landing fees. Luton claims that it has given the discount operator a low rate; easyJet claims the charges are too high and threatens to take the matter to the CAA. The low-fare airline is expected to account for up to 60% of the airport's passengers this year.

Chairman Haji-Ioannou presents the 2000 Lindbergh Lecture before a large audience of the Royal Aeronautical Society on March 1. Two days later, his low-cost carrier begins to offer £5 discounts to passengers booking their flights over the Internet.

On March 10, a deal is completed with Daimler Chrysler for the lease of 5,000 Mercedes A-Class automobiles that will be booked via the company's brand new Internet-based car rental business. Coordinated with the airline's airport destinations, the service by easyRentacar will charge drivers a daily fee of £15.

Daily B-737-33V nonstop roundtrips are introduced on March 26 from Liverpool to Palma de Mallorca. Four days later, a firm order is placed for 17 Next Generation B-737-73Vs, to be delivered between October and May 2004.

The number of daily return frequencies between London (LTN) and Nice is doubled from three to six on April 28. The easyRentacar service

is introduced at the end of April; the initial fee is even less than earlier advertised: £9.

In a move to increase its online bookings to 70%–75% by the end of the year, the airline requires, beginning on May 1, that all bookings made more than two months in advance must be made online with a credit card. Two days later, the company reveals that has doubled the number of its flights in June and now operates almost 1,000 flights across its network of 28 services serving 18 popular business and leisure destinations.

On May 12, Donaldson, Lufkin & Jenrette, and UBS Warburg are appointed joint coordinators of the carriers' fall initial public offering, proceeds from which will cover expansion and aircraft acquisition costs. An additional weekday roundtrip between London (LTN) and Palma de Mallorca begins on May 26.

When **British Airways, Ltd. (2)** and **KLM (Royal Dutch Airlines, N.V.)** announced their merger discussions on June 7, easyJet Chairman Haji-Ioannou demands that the two turn over to his and other carriers sufficient slots to preserve competition on the U.K.–Amsterdam route.

An ATC computer failure on June 17 forces the company to cancel all of its flights from Luton Airport. At the end of the month, the London City public relations firm of Granfield is asked to handle news releases relating to the company's initial public offering.

When the fourth six-episode series of London Weekend Television's *Airline* series airs on June 23 on ITV 7.5 million viewers tune in. The program shows a behind-the-scenes look at easyJet and other operators.

On July 4, the company begins driving a bright orange double-decker bus around Glasgow to promote its service to that city.

To replace a Dash-3M8, a newer B-737-33V is sent over to **easyJet Switzerland, A.G.** on July 10, but, prior to its arrival, someone has forgotten to paint out the U.K. telephone reservation number that appears in large titles along the orange fuselage. The company boasts on July 14 that, for the first time in history, it has flown over a million passengers from Liverpool in a single year.

Chairman Haji-Ioannou bluntly denies media rumors on July 18 concerning a possible purchase of **Olympic Airways, S.A.** "I wouldn't take Olympic," he says, "not even as a gift!"

Also in July, the First Choice tour concern's in-house carrier **Air 2000, Ltd.** becomes the first charter airline to mount a serious challenge to the low-cost carriers easyJet, **Ryanair, Ltd.**, and GO, the discount brand of **British Airways, Ltd. (2)**.

Air 2000, Ltd., which has flown scheduled service to Cyprus since 1994, now launches scheduled leisure flights from eight U.K. airports to Alicante, Faro, Lanzarote, Malaga, Palma, and Tenerife. Unlike the no-frills airlines, passengers are offered free drinks and in-flight entertainment. easyJet now negotiates an exclusive discounted £8 rail fare package with Thameslink Trains for its passengers traveling between central London and Luton Airport.

On August 10, H. P. Howe of Nottingham is announced the winner of the first easyJet Gifts photographic competition. He will receive a pair of free flights every month.

It is reported on August 13 that the company had sold 132,371 seats online the previous week; this figure is 80% of all company tickets sold during the 7 days. At the end of the month, the company's achieves a market victory when **Air France** quits the lucrative Nice to Geneva route.

When French truck drivers protest fuel prices on September 7, easyJet is able to maintain its current schedule from Nice. Although similar protests and blockades in support of the campaign to reduce fuel costs cause a great deal of disruption throughout the U.K. over the next five days, the airline, nevertheless, flies there as usual. Also during September, a B-737-3Y0 is leased from **British World Airlines, Ltd.**

It is reported on October 2 that, for the first time, more passengers are flying to Amsterdam with easyJet from London (LTN) than with **KLM U.K., Ltd.** from London (STN).

A press release on October 9 reports that the company is now repainting its fleet, replacing the telephone number with "easyJet.com—the web's favourite airline."

On October 12, London Weekend Television confirms August media reports that it is filming another installment of its popular *Airline* series, featuring behind-the-scenes reviews of life at easyJet, for release in the spring. The next day, the carrier inaugurates an exclusive discounted £8 rail fare package with Thameslink Trains for its passengers traveling between central London and Luton Airport.

The company's first Next Generation B-737-73V is delivered on October 15. By this time, all of the units of the B-737-300 fleet have been repainted and given large "easyJet.com" titles.

Roundtrip frequencies between Liverpool and Belfast are boosted from three to four daily on October 29, while daily return flights from London (LGW) to Geneva are simultaneously doubled to two. The number of daily flights is also increased from London (LTN) to Edinburgh (5 to 6) and to Belfast (4 to 5). The next day, it is announced that direct services will begin on January 5 from Amsterdam to Edinburgh, Belfast, and Nice.

It is announced on October 31 that four new flights will be inaugurated from Amsterdam on January 5: one each to Belfast and Nice and two to Edinburgh. The same day, the BBC reports that the company will float approximately 25% of its estimated £564-million value on the London Stock Exchange. Conditional trade, before investors are given their certificates, will begin on November 15 and unconditional dealing a week later, on November 22. Funds earned will be employed to purchase 32 new Next Generation B-737-73Vs.

The company celebrates its fifth birthday on November 10, during which period easyJet has flown 12 million passengers.

As part of the continuing rationalization of the short-haul operations of **British Airways, Ltd. (2)**, CEO Eddington announces at the beginning of the second week of November that the low-cost subsidiary GO will be sold. Although London (STN)-based rival **Ryanair, Ltd.** immediately indicates that it is not interested in purchasing the operation, GO's most bitter rival, easyJet, indicates that it would "at the right price."

The Advertising Standards Association rules on November 15 that easyJet is entitled to call itself "the web's favorite airline." It rejects a complaint regarding the use of the phrase lodged by the **British Airways, Ltd. (2)** subsidiary GO.

Approximately 25% of the company (63,000,000 shares) is floated to large investors on the London Stock Exchange, also on November 15, with shares initially trading at 310p each, rising to 344.5p later in the day. With valuation already at £868 million, it is anticipated that the initial public offering will be 7 to 10 times over-subscribed. The company's staff has already been given an opportunity to buy shares ahead of the floatation, but most are tied to a one-year lock-in period. By the next day, value has increased by 11%. The second Next Generation B-737-73V is delivered on November 22, the same day unconditional dealing in easyJet shares begins on the London Stock Exchange. When the tally is finally in, easyJet will have raised over £190 million (\$275 million) in its offering.

The media reports on December 7 that former international rugby player Tony Underwood has joined easyJet as a pilot.

Chairman Haji-Ioannou is added to *The Guinness Book of World Records* on December 8 as the youngest person (age 28) to found an international scheduled airline.

The Liverpool to Belfast service is increased to six weekday and four weekend return flights on December 15, the same day frequencies are increased from thrice daily to four a day between Liverpool and Amsterdam. Also on December 15, the third new Next Generation B-737-73V is delivered.

On December 22, it is announced that daily nonstop flights from Amsterdam to Venice will start on January 1.

The same terrible winter weather that causes so many flight cancellations in the U.S. also impacts the U.K. Early in the new year, easyJet will seek damages from the airports at Liverpool and London (LTN) for the forced cancellation of 187 of its flights due to their alleged failure to promptly remove snow during the last four days of 2000. Indeed, police

must be summoned to both airports on the morning of December 30 to break up disturbances by over 200 stranded people.

Despite the weather, passenger boardings for December total 491,069, compared to 381,962 in December 1999.

At year's end, company employees look forward to the initiation of services from Amsterdam to Nice, Edinburgh, and Belfast on January 12. In the throes of rapid expansion, the company must also undertake a major pilot recruiting campaign. It will soon advertise for experienced captains offering not only high salaries, but a "golden hello" signing bonus of £30,000 (\$43,500) a head as well.

Enplanements for 2000 as a whole total 5.9 million.

easyJET SWITZERLAND, A.G.: 88 Ave. Louis Casai, Geneva, 1215, Switzerland; Phone 41 (22) 788 8820; Fax 41 (22) 788 2700; Code TSW; Year Founded 1998. On March 26, 1998, Stelio Haji-Ioannou's low cost carrier, **easyJet Airlines, Ltd.** purchases 40% shareholding in **TEA-Basel, A.G.** The U.K. airline has the option to increase its stake in the Basel-based line to 90% and to refocus the company as a discount company and franchise partner, easyJet Switzerland, A.G. The equity boost is dependent upon Switzerland's joining the European Union "open skies" arrangement. The company remains Swiss registered, with the same Swiss staff and management.

The franchise arrangement with **easyJet Airlines, Ltd.** physically begins on May 1 as one of the TEA aircraft begins flying on the Geneva-London (LTN) route, which easyJet already serves.

Two B-737-7Q8s arrive during late spring under charter from the International Lease Finance Corporation (ILFC). They are immediately placed into charter service to destinations in the Mediterranean. easyJet Chairman Haji-Ioannou announces the franchise agreement to the British Swiss Chamber of Commerce meeting in Geneva on September 25. At this point, it is reported that TEA-Basel will transfer its headquarters from Basel to Geneva next April 1.

Beginning on November 5, nonstop franchise scheduled return services are offered thrice daily between London (LTN) and Zurich and four times a day from Luton Airport to Geneva.

By the end of January 1999, TEA-Basel, doing business as easyJet Switzerland, Ltd., is operating thrice-daily nonstop roundtrips between London (LTN) and Zurich and four return flights every day from Luton Airport to Geneva.

Occupation of the new Geneva headquarters for TEA-Basel, doing business as easyJet Switzerland, A.G., is completed on May 21. Plans are announced for the inauguration of new services on July 28 from Geneva to Amsterdam, Barcelona, and Nice.

By the end of the first full week in July, easyJet Switzerland, A.G. has sold thousands of seats for the inauguration of service on its new route from Geneva to Barcelona. On July 12, a spokesman for **Swissair, A.G.** holds a news conference to remind the discount operator that a national law enacted the previous November grants the SAirGroup subsidiary a monopoly over the Barcelona route and any others that it has not abandoned. The combative **easyJet Airlines, Ltd.** Chairman Haji-Ioannou promises a court battle.

Transport Minister Moritz Leuenberger confirms the Swissair position on July 19. The authority of easyJet Switzerland, A.G. to operate to Amsterdam and Nice is, however, upheld as **Swissair, A.G.** had dropped those routes from its regular schedules before the November law had taken effect.

Beginning on July 29, 3,500 passengers with confirmed Barcelona tickets have their fares refunded in cash, are offered free roundtrips from Geneva to Barcelona, and are encouraged to contribute to a company fund set up "for the protection of consumer interests against Swissair."

The latest airline to be subjected to the scrappy tactics of the British discount carrier, **Swissair, A.G.** and its executives must now stand by as easyJet Switzerland, A.G. begins to bypass the November law. It offers daily easyJet Charter "charter" flights from Geneva to Barcelona using the **TEA-Basel, A.G.** tour operator license, which is still valid.

Regularly scheduled return service is inaugurated in December from Geneva and Zurich to London (STN/LGW). These complement flights already begun to London (LTN) and Liverpool.

With 220 employees at the beginning of 2000, the company is headed by Chairman Ernst Staehelin and Managing Director Markus Seiler. The fleet now comprises 3 B-737-33Vs and 1 B-737-3M8 transferred over from **easyJet, Ltd.**

At the beginning of April, the company uses a two-carriage city tram—painted in orange and white with the company's telephone numbers—to drive about Geneva, encouraging voters to vote in the May Swiss Referendum in favor of accords with the European Union. Whether or not this particular effort succeeds with voters is unknown; however, the vote, cast on May 21, is positive.

To replace an older unit, a newer B-737-33V is sent over from **easy-Jet Airlines, Ltd.** on July 10, but prior to its arrival, someone has forgotten to paint out the U.K. telephone reservation number that appears in large titles along the orange fuselage. At the end of August, the company achieves a market victory when **Air France** quits the lucrative Nice to Geneva route.

The load factor for October is 85.3%, as compared to 79.9% in October 1999.

On December 15, daily return frequencies between Geneva and Liverpool are increased from one to two, with three on weekends.

ECUATO GUINENANA DE AVIACION, S.A. See **EGA (ECUATO GUINENANA DE AVIACION, S.A.)**

ECUATORIANA AIRLINES (EMPRESA ECUATORIANA DE AVIACION, S.A.): Calle R Victoria Y Av Colon, Apartado 505, Torres de Almagro, Quito, Ecuador; Phone 593 (2) 563 003; Fax 593 (2) 563 920; <http://www.ecuatoriana.com>; Code EU; Year Founded 1970. In 1970, CEA (Compania Ecuatoriana de Aviacion, S.A.) is reorganized; a new livery and logo are adopted for the new name, Ecuatorian Airlines. The fleet comprises 8 Lockheed L-188A Electras, 7 Douglas DC-6s, 1 DC-6A, 1 DC-6B, and 4 DC-4 freighters.

A DC-4 with two crew fails its takeoff from Miami on April 14 for a flight to Quito via Panama City; the plane crashes beyond the runway and slides 890 ft. before hitting a concrete abutment. There are no survivors.

Although a second DC-6A is received, severe financial difficulties are encountered in 1971.

A route is opened to Bogota in January 1972 and a DC-3 crashes at Sangai on March 14; there is no other information on the accident.

While en route from Quito to Guayaquil on May 23, an L-188A is captured by a hijacker, who demands that it return to its point of origin in order that he might collect a \$40,000 ransom and a parachute. A military officer brings the demanded items aboard and, while pretending to show the pirate how to use the parachute, opens fire, killing the assailant and wounding the captain and a female passenger.

Santiago de Chile service is suspended on June 28 and, as the carrier's financial woes deepen, the Ecuatorian government, on August 13, acquires 52% controlling interest. An L-188C is leased for two months at the end of the year.

The airline is reorganized as a mixed-stock company in 1973. Capitalization is raised to 100 million pesos, of which the government share is 51%. Ecuatoriana is now the country's flag line.

As additional financial and managerial problems continue to plague the airline, it ceases trading on April 16, 1974. On July 31, it is nationalized, its shares being assigned to the Air Force's airline **TAME (Transportes Aereos Militares Ecuatorianos)** on behalf of the government.

Gen. Carlos Banderas is appointed president and CEO.

The Electras become part of the TAME fleet and in August, Ecuatoriana receives two former **Pan American World Airways (1)** Boeing B720-023Bs in compensation, employing them to restart Miami service on September 1. Meanwhile, a new logo and livery are introduced for the flag carrier, which is now described in marketing literature as "Le Linea Aereas en el Corazon del Mundo!"

In 1975–1976, the fleet is increased by the addition of another ex-Pan Am B-720-023B. It is at this time that the company introduces a striking livery designed to represent the jungles and wildlife of the country.

Additional overseas and regional routes are opened. By 1977, Ecuadorian jetliners are serving Buenos Aires, Caracas, Los Angeles, and New York.

Enplanements this year reach 150,926.

In 1978, an order is placed for two B-707-321C Stratoliners.

Passenger boardings jump 21.8% to 193,233 and freight traffic soars 28.8%. Revenues accelerate 28.2% to \$43.7 million, expenses are up 25.6% to 41 million, and the operating profit skyrockets 90.3% to \$2.55 million.

The B-707-321Cs enter service in 1979. Bookings rise 18.6% to 229,318.

Increased fuel costs and recession impact upon the carrier in 1980–1981. Traffic and profits decline. One B-720-023B is sold, but a Douglas DC-10-30 is ordered.

On February 29 of the former year, an armed assailant with four hostages attempts to take over a B-707-321C on the ground at Guayaquil. Unable to gain access, the pirate simply surrenders.

Enplanements climb back to 220,000 in 1982.

Weekly joint flights are inaugurated with **VARIG Brazilian Airlines (Viacao Aerea Rio-Grandense, S.A.)** in April 1983 over a route from Rio de Janeiro to San Jose via São Paulo, Guayaquil, and Quito.

While trying to land at the Andean city of Cuenca, a B-707-321B strikes a mountain on July 11 and explodes (119 dead).

The decade-old *St. Galen*, **Swissair, A.G.**'s first DC-10-30, is purchased and delivered in September.

A total of 161,640 passengers are carried on the year, a significant decline. The operating loss is \$3.87 million, but a small \$350,000 net profit is realized.

The employee population in 1984 is 1,010. A DC-8F clips a bus and explodes on a building site while trying to take off from Quito on September 18; the crew and 60 people on the ground are killed.

Passenger boardings climb 10.2% to 180,441 and cargo increases 34.5% to 34.56 million FTKs. Revenues jump 11.6% to \$61.9 million. The losses are \$5.6 million (operating) and \$3.8 million (net).

The workforce is cut 2.2% in 1985 to 988. Bookings jump 13.7% to 205,204 and freight accelerates 24.6% to 43.07 million FTKs. Revenues advance by 20.1% to \$74.7 million and expenses increase 7.9% to \$73.1 million. Profits are \$1.59 million (operating) and \$4.75 million (net).

Operations continue apace in 1986–1987 and by 1988 enplanements total 210,855. Income exceeds expenses during the latter year and generates an operating profit of \$28.29 million. There is, however, a \$7.18-million net loss.

Company employment is increased by a slight 0.7% in 1989 to 1,165 and the fleet now includes 1DC-10-30, 3 B-707-321Bs, and 1 B-707-321CF. Passenger boardings increase 17.9% to 256,826, but freight drops 8.5% to 60.04 million FTKs. Revenues increase 14.5% to \$89.67 million, expenses rise only 1.4% to \$50.7 million, and operating profit reaches \$169,350. The net loss is cut to \$70,461.

The number of workers grows by 2.3% in 1990 to 1,192. Customer bookings inch up 2.2% to 262,538, but cargo is off by 8.7% to 54.83 million FTKs. Revenues slide 0.3% to \$90.2 million and expenses are higher. Consequently, the operating loss is \$8.3 million and net loss totals \$4.8 million.

Operations continue apace in 1991.

Two Airbus Industrie A310-324s are purchased for \$120 million from the assets of **Pan American World Airways (1)**; christened *Ciudad de*

Guayaquil and *Ciudad de Quito*, the two enter service in October over the company's route from Miami to Los Angeles. The extended \$14 million-per-year lease-purchase arrangement for the aircraft has been set up by a group of European banks.

In **1992** the fleet includes 2 Airbus Industrie A310-324s, 3 leased B-707-321Bs, 1 B-707-321CF, and 1 chartered DC-10-30. Revenues in the latter year total \$98.4 million, but expenses are higher, forcing an operating loss of \$18.9 million and a net loss of \$4.7 million.

In **1993**, Chairman/President Eduardo Emmanuel oversees a workforce of 1,165.

In addition to an all-cargo service to Panama City, Miami, and New York, international passenger flights are made from Guayaquil and Quito to Bogota, Buenos Aires, Cali, Caracas, Chicago, Lima, Los Angeles, Mexico City, New York, Panama City, San Jose, and Santiago.

In February, the company is unable to make its lease payment on the two A310-324s. Both aircraft are seized in Los Angeles in early March; however, one is released back into service after Ecuatoriana makes a \$1.50-million payment.

In deep financial difficulty, the company returns *Ciudad de Guayaquil* and *Ciudad de Quito* in early April. It also arranges to return several chartered Stratoliners and sell its only B-707 freighter.

As the result of financial problems that lead to a lessor seizure of the DC-10-30—its last operational aircraft—in September, the company is forced to suspend operations in October. Its Ecuador–U.S. routes are assigned to **SAETA Air Ecuador, S.A.** At its closing, the airline has some \$50 million in assets plus all of its other route rights.

Continuing efforts will be made over the next three years to restart the dormant flag carrier. In October **1994**, the government of Ecuador selects Prudential Securities, SH&E, and Aviation Management Services, the latter based at Miami, as a consortium to which it can sell the company.

Legal and bureaucratic challenges to the Prudential-led consortium force Ecuador to postpone its March 1, **1995** 25% sale of shares on its domestic stock exchange. In August, a controlling 51.1% interest is acquired by **VASP (Viacao Aerea de Sao Paulo, S.A.)** Davidson Botelho is named commercial director.

A single Douglas DC-10-30 is wet-leased from VASP and employed to resume operations in mid-**1996**. In December, a Boeing 727-2M7 formerly operated by **Northwest Airlines**, is acquired. Like the Douglas wide-body, it is painted in a blue-and-white livery with "Ecuatoriana" spelled out in billboard-sized letters down the fuselage windowlines.

Destinations visited from Quito in **1997** include Bogota, Buenos Aires, Caracas, Guayaquil, Lima, Manaus, Miami, Santiago de Chile, and São Paulo. In January, the Douglas is employed to resume services to New York (JFK).

A B-727F is delivered in April, followed by a second passenger trijet during the fall.

On October 17, arrangements are completed under which the company will replace the VASP DC-10-30 with an Airbus Industrie A310-304 previously operated by **Sudan Airways Corporation**.

By year's end, the company flies to nine South American destinations, enplanements total 85,000, and the operating loss is \$16.11 million, while the net loss is \$13.55 million.

The company's fifth aircraft, the Airbus, is received in January **1998**. It is employed to initiate services to Madrid and Paris.

Passenger boardings increase 72% to 257,000, while freight traffic jumps 22.4% to 34.07 million FTKs. Revenues accelerate 46.3% to 62.08 million, while expenses rise 37.3% to \$80.36 million. The operating profit climbs to \$18.27 million, while the net loss declines to \$11.51 million.

By the beginning of **1999**, airline employment has been increased by 4.6% to 454.

Passenger boardings drop 36.7% to 157,000. Revenues plunge 50.2% to \$30.9 million and expenses fall 57.2% to \$34.4 million. The huge deficit in returns for the previous year improves as the operating loss totals \$18.27 million and the net loss is \$2.91 million.

A total of 410 workers are employed at the beginning of **2000**, a 9.7% decrease over the previous 12 months. Only two B-727-287As remain in the fleet.

At the end of January, the company signs a wet-lease agreement with **Air Jamaica, Ltd. (2)**. Honoring the commitment on February 1, an Air Jamaica A320-211 operates the first of 12 roundtrips from Guayaquil to New York (JFK).

On May 11, officials of the Brazilian carrier announce that they will soon sell all **VASP (Viacao Aerea de Sao Paulo, S.A.)** shareholding in **LAB (Lloyd Aero Boliviano, S.A.)** and Ecuatoriana to help meet its huge deficit problems.

On November 1, a two-year commercial agreement is signed with **LanChile Airlines, S.A.** to operate its aircraft on the Ecuadorian airline's international routes beginning in December. The initial wet-leased and code-shared services will be flown from Guayaquil and New York (JFK). Later, flights will be made from Guayaquil to Miami via Quito will be added. The B-767-3Y0ER roundtrips, flown by LanChile, commence between Guayaquil and New York (JFK) on December 15.

ECUAVIA C., S.A.: Ecuador (1949–1994). Carlos J. Estrada establishes Ecuavia at Guayaquil's airport in **1949** to offer passenger and cargo charters to surrounding communities and bush locations. Operations continue apace with little fanfare for the next 40 years.

In **1990**, Estrada's fleet includes 1 Piper PA-23 Aztec, 1 Piper PA-34 Seneca, 1 Piper PA-31-350 Navajo Chieftain, 1 Piper PA-31T Cheyenne, 1 Beech Super King Air 200, and 2 Cessna 188s. Enplanements total 3,600 and 78,000 pounds of cargo are flown. Revenues are \$156,000 and a \$28,000 net profit is generated.

Passenger boardings shrink to 2,100 in **1991** and cargo falls to 25,000 pounds. Revenues slide to \$122,000 and net gain falls to \$21,000.

In **1992**, bookings increase to 5,600. Operating revenues are \$546,000 and a \$98,200 profit is realized.

Operations continue in **1993**, but cease in **1994**.

EDAC (EMPRESA DE AEROTRANSPORTES COSTARRICENSES, S.A.): Costa Rica (1936–1938). A Costa Rican syndicate led by Guillermo Nunez and Clarence Ross Bonilla forms EDAC at San Juan on February 29, **1936**. With initial capitalization of 50,000 colones, the carrier purchases a Flamingo G-2W and leases Roman Macaya's Curtiss C-2 Robin *Espiritu Tico*.

The chartered Curtiss is destroyed in a crash on September 7, leaving the Flamingo to operate the company's nonscheduled services until the airplane is declared unsafe in **1938**.

EDE-AIRE: United States (1978–1981). The FBO Ede-Aire is set up by E. G. D. Domich at Detroit Lakes, Minnesota, in **1978**. Employing a Piper PA-34 Seneca, scheduled passenger and cargo services are inaugurated linking the company's base with Minneapolis via Alexandria.

Operations continue apace until April 27, **1981** when the company is sold to **Mesaba Airlines**.

EDELWEISS AIR, LTD.: Postfach, Zurich-Flughafen, Zurich, CH-8058, Switzerland; Phone 1-816-5060; Fax 1-816-5061; <http://www.edelweissair.ch>; Code EDW; Year Founded 1996. Edelweiss is founded at Zurich during the first quarter of **1996** to operate both charter and scheduled passenger services. Shareholding is divided between the tour operator Kuoni Holdings Switzerland, A.G. (33%), the Greek airline **Venus Air, S.A.** (40%), Emil Grotz (20%), and Niklaus Grob (7%). A management contract is signed with Venus and a workforce of 70 is recruited under the leadership of CEO Niklaus Grob.

Two McDonnell Douglas MD-83s are leased from GECAS and are employed, beginning on April 1, to inaugurate inclusive-tour flights to the Canary Islands, the Balearics, Cyprus, Tunisia, and Portugal and scheduled service from Zurich to London (CTN) via Vienna. Every effort is made to offer customers a Swiss atmosphere; flight attendants are

attired in "Heidi" uniforms and meals feature sausage, cheese salad, butter, milk, yogurt, and chocolates.

Flights continue in early 1997. In April 1998, orders are placed for three Airbus Industrie A320-214s, with delivery scheduled for early the following year.

Wearing a distinctive red-and-white livery with billboard titles, the first A320-214 is delivered on January 29, 1999. The other two are expected by mid-July.

During the last week of April, Kuoni Holdings Switzerland, A.G. concludes a merger with First Choice Holidays, Ltd.; the union will create the second largest tour operator, after Germany's TUI-Hapag Lloyd. The combined airline that will eventually result through a union with **Air 2000, Ltd.** will be the fifth largest charter carrier in Europe; together, the two transported 6.8 million passengers in 1998.

Plans for the phased-merger are however, put on hold. The third A320-214 is delivered on June 28.

The Kunoi Travel Group's carrier continues to offer charters during 2000. Under a 10-year lease from CIT Aerospace, an Airbus Industrie A330-243 is delivered to the company in Zurich ceremonies on November 17. The aircraft almost immediately begins long-haul vacation service.

EDGARTOWN AIR: United States (1989–1992). Michael and Nikki Madeiros, owners of the FBO at Katama airport at Martha's Vineyard, found Edgartown Air in late 1989 to provide scheduled passenger and cargo services to local destinations.

Employing a pair of Pilatus Britten-Norman PBN-2 Islanders, the Madeiros begins scheduled daily roundtrips in January 1990 over routes that link the company's base with Hyannis, New Bedford, and Nantucket. The Hyannis route is sold to **Cape Air** in November.

Operations continue apace in 1991 as a third Islander is acquired. Unable to maintain economic viability in a difficult recession, the company folds in 1992.

ED'S AIRCRAFT SERVICE: United States (1972–1973). For a year, this FBO based at Bartlesville, Oklahoma, offers daily Cessna lightplane scheduled air taxi roundtrips to Oklahoma City.

EFS AIRLINES: United States (1968–1969). EFS is set up at Bloomington, Indiana, in 1968 to provide scheduled air taxi shuttle flights to Indianapolis. Cessna lightplane frequencies from Bloomington are duly inaugurated, but are not maintained beyond 1969.

EFS CARGO, GmbH.: Germany (1975–1980). **Express Flug Service, GmbH.** is organized and registered at Hamburg in 1975 to offer worldwide, all-freight charters and contract air services. Flights are inaugurated from Ostend Airport with 2 Douglas DC-8-61CFs and 1 DC-8-50F leased from **Seaboard World Airlines**.

Following the purchase of Seaboard by **The Flying Tiger Line** in October 1980, the carrier is forced to cease operations.

EGA (ECUATO GUINEANA DE AVIACION, S.A.): Apartado-685, Malabo, Equatorial Guinea; Phone 224 (9) 2325; Fax 224 (9) 3313; Code 8Y; Year Founded 1989. EGA is formed at Malabo in 1989 and technical aid is provided by Sodetraf, the French firm largely owned (75%) by **UTA French Airlines, S.A.** Director Jerome Lowa begins scheduled service to Bata and Libreville with a British Aerospace BAe (HS) 748-B2F chartered from **Air Madagascar, S.A.** The Sodetraf assistance unexpectedly ends in August 1990.

The fleet is doubled in 1991 by the addition of an owned Fokker F.27-100. Pablo Mba Nzang replaces Lowa in 1992.

Operations continue in 1993–1994 as the Western aircraft are replaced with 10 Czech-made Letov Let 410As. Destinations visited include Bata, Douala, and Libreville.

Frequencies continue during in 1995–1998. In these years, the fleet grows to also include 1 each Aero International (Regional) ATR72-202, Antonov An-26V, and Tupolev Tu-134A.

On December 9, 1999, the An-26V with six crew aboard crashes off Turkey; there are no survivors.

The two remaining jetliners are replaced in 2000 with a single Yakovlev Yak-40.

EGLI AIR HAUL: P.O. Box 188, Naknek, Alaska 99633, United States; Code EAH; Year Founded 1979. Sam Egli founds this charter and contract, bush-oriented carrier at King Salmon, Alaska, in 1979. For the next 21 years, operations are conducted with a single Cessna U-206.

EGYPTAIR, S.A.E.: Cairo International Airport, Cairo, Heliopolis, Egypt; Phone 20 (2) 245-4400; Fax 20 (2) 244-9727; <http://www.egyptair.com.eg>; Code MS; Year Founded 1971. Previously the Egyptian division of **United Arab Airlines**, this carrier adopts its present name on October 10, 1971 after an amalgamation of the domestic airline **Misrair, S.A.E.** With a fleet of Soviet-made airliners, the new entity maintains its predecessor's routes.

Leased from **JAT (Yugoslav Airlines)**, a Douglas DC-9-32, Flight 763 with 9 crew and 21 passengers en route from Jeddah to Aden on March 20, 1972, crashes into the Shamsan Mountains 4 nm. from the end of the runway at the southern Yemen airport; there are no survivors.

An Il-62 with 12 crew and 47 passengers lands on the wrong runway at Cairo on June 16 and then runs off it; no serious injuries are reported.

A \$60-million order is sent to Aviaexport of the Soviet Union in July for 8 Tupolev Tu-154s; in October, a \$40-million request is made to Boeing for 4 B-707-366C Stratoliners, with which to complement the 4 Dash-336Cs already on hand.

A B-707-336C with six crew crashes at Beni Sueif during a December 5 training flight from Cairo; there are no survivors.

While on night approach to Nicosia from Cairo on January 29, 1973, an Il-18D with 7 crew and 30 passengers crashes into the Kyrenia Mountains of northern Cyprus; there are no survivors.

During a European flight on May 5, a Boeing 707-366C suffers severe air turbulence over the Alps (one dead). The company takes delivery of a new B-707-366C on June 29; it is christened *Mena*.

The first Tu-154 is delivered in late September, at which point the company begins to return its three Il-62s to the Soviets.

The Yom Kippur War in October impacts severely upon traffic and, on November 18, causes Tokyo service to be suspended.

The remainder of the Stratoliners, two of which are christened *Akhenaton* and *Tutakhamun*, and two more Tupolevs arrive before the end of the year.

Passenger boardings drop during the year to 715,000.

Efforts are made in 1974 to regroup after the recent Middle East conflict and management personnel are changed. Two more Tu-154s arrive in February. Service to Tokyo is resumed on March 15 via Bombay, Bangkok, and Manila, while an older route to Khartoum is extended weekly to Kinshasa.

After a 3 hr. 14 min. training flight from Cairo on July 10, a Tu-154 with 6 crew fails to recover from a practice overshoot and crashes; there are no survivors. All of the remaining Russian airliners on hand are grounded while safety inspectors seek a cause. Problems, primarily with the procedure for trimming the Russian aircraft's elevators, continue throughout the summer.

Following an extended period of negotiations and service delays and technical difficulties, the remaining seven Tupolev Tu-154s are ordered returned to the Soviet Union in September. The Russian equipment program was to have formed a major portion of the airline's future fleet and the grounding of the aircraft brings a severe capacity shortage. EgyptAir now has only its B-707-336Cs, 3 Il-18s, 4 de Havilland DH 106 Comet 4Cs, 3 Antonov An-24s, 2 Douglas DC-6s, and 2 Cessna 207As with which to cover its entire route network.

To replace the Tupolevs, six Douglas DC-9-50s are ordered in November.

En route from Jeddah to Cairo on a December 9 training flight, an Il-18D with nine crew crashes into the Red Sea; there are no survivors.

The shortage in capacity caused by the return of the Russian aircraft figures in the year's 1% decline in passenger boardings to 650,000.

The airline's request to Douglas is disallowed by the government in January 1975. Instead, orders are placed for six (later seven) Boeing 737-266As and four B-727-266As. Meanwhile, to help provide capacity, two Airbus Industrie A300B2-1Cs are wet-leased from a German carrier in February.

The Boeing request (which includes trade-in of the older B-707-336Cs) is confirmed in March, at which point Chairman Gamal Erfan becomes the subject of a police and parliamentary probe of kickbacks and bribery.

Meanwhile, on February 10, an official agreement is signed with Avia-export for the return of the Tu-154s; to cover the financing that had been provided on the original order by the Soviets, EgyptAir returns an An-24. Much of the cost of the new American order will be covered by the U.A.E.

Plans are made in September to sell the four Comet 4Cs; not only will their sale bring in valuable foreign currency, but will allow the carrier to standardize on a Boeing jetliner fleet.

The B-737-266As begin to enter service in October, following the earlier introduction of the B-727-266As. The remaining two Il-18s are withdrawn.

Service is initiated from Cairo to Milan on January 1, 1976 and Chairman Erfan, accused of bribery, resigns in February. He is succeeded by Gen. Mohammad Nabih Hashad.

The Milan route is extended to Vienna on April 1.

A B-727-266A with 102 passengers is seized by 3 Arab guerrillas on the morning of August 23, shortly after takeoff from Cairo on a scheduled service to Luxor. In the afternoon, government commandos recapture the aircraft on the ground at its destination; all of the hostages are released unharmed. The captured pirates will be tried and sentenced to life imprisonment. The four Comet 4Cs are sold to **Dan Air/Dan Air Services, Ltd.** on October 9.

Just after receiving clearance to land on Runway 21L at Bangkok on December 25, a B-707-366C with 9 crew and 43 passengers crashes into a local factory; all aboard the Stratoliner are killed, along with 19 persons on the ground.

All seven B-737-266As are on hand by year's end and four of them receive names—*Hapi*, *Ra*, *Osiris*, and *Hathor*.

After former pilot Hilmy Shams admits having received a \$100,000 bribe from Boeing as kickback for his part in securing the 1975 order, police move in during January 1977 to arrest a number of current and past EgyptAir executives.

Following their wet-lease for a year, two German Airbus Industrie A300B2-1Cs are purchased in February.

Service to Karachi and Abu Dhabi is inaugurated on April 1 and the first A300B2-1C arrives three days later. The second Airbus is delivered on May 14, with the first A300B2-1C service operated on June 1 between Cairo and Karachi.

Chairman Gen. Hashad's company employs 9,116 workers in 1978–1979 and the fleet comprises 2 A300B2-1Cs, 7 Boeing 707-366Cs, and 5 B-737-266As.

One of the Stratoliners is badly damaged on February 21, 1978 when it crashes into a flock of birds; fortunately, the B-707-366C is able to make a safe emergency landing at Sharjah Airport.

On April 5, 1979, President Sadat and Prime Minister Begin announce that reciprocal airline service will begin between their two nations. Ten days later, Iraq severs its air ties with Egypt.

Technical difficulties and a failure to complete arrangements prevent the inauguration of reciprocal airline services to Israel in January 1980. Egypt, meanwhile, under terms of the Camp David Agreement, forms a subsidiary for its national airline, **Nefertiti Aviation, S.A.E.**, to fly only between Cairo and Tel Aviv. Following the initiation of flights by **El Al Israel Airlines, Ltd.**, Nefertiti begins services in March hoping to avoid a loss of the few remaining routes EgyptAir, S.A.E. retains in the Mideast without additional offense to Arab sensibilities or outright sabotage.

In November, EgyptAir, S.A.E. is financially reorganized, with shareholding divided equally between the National Bank of Egypt and Misr Insurance.

During 1981–1983, the medium- and long-haul route network is expanded to include 16 points in Europe, 5 in southern and eastern Asia, 4 in West Africa, and 15 in the Middle East and North Africa.

When Austrian racing champion Niki Lauda gives up his attempt to inaugurate scheduled commuter services, he leases to EgyptAir, S.A.E. two F.27-500s acquired for his enterprise. Orders are also placed with Airbus for eight A300B4-203s and with Boeing for three B-767-266ERs.

During May of 1983, a B-747-130, formerly operated by **Deutsche Lufthansa, A.G.** and **Braniff International Airways**, is acquired under lease and is employed to operate a service from Cairo to Tokyo via Bangkok and Manila. Domestic service is meanwhile operated under the old name Misrair and Nefertiti Aviation is replaced in early 1982 by a new subsidiary, **Air Sinai, Ltd.**

On October 17, 1982, a B-707-366C with 10 crew and 172 passengers is destroyed as the result of a bad landing at Geneva, Switzerland; there are no fatalities.

During 1984, the chartered Jumbojet is returned and replaced by a B-747-257B leased from **Swissair, A.G.** Delivery of all eight of the new Airbus jetliners is completed during the year and four receive names—*Osiris*, *Nout*, *Hathor*, and *Aton*. The B-767-266ERs *Nefertiti*, *Nefertari*, and *Tiye* also arrive.

Enplanements total 2,712,000 and an operating profit of \$16.4 million is earned together with net income of \$4.36 million.

In 1985, the workforce totals 3,285, a 4.8% boost. The fleet now includes 6 B-707-366B/Cs, 7 B-737-266s, 3 B-767-266ERs, 8 A300B4-203s, and 3 F.27-500s, with a **Middle East Airlines, S.A.L.** B-747-2B4BC, the **Swissair, Ltd.** B-747-257B, and a DC-10-30 operated under contract.

Thrice-weekly nonstop Cairo–New York Jumbojet service is inaugurated on May 17.

On October 10, after being refused permission to land at Tunis and Tripoli, a B-737-266A, transporting the *Achille Lauro* hijackers, is forced by F-14 fighters from U.S.S. *Saratoga* to land at Signonella, Sicily, where the aerial pirates are arrested by Italian authorities. On November 23, the same aircraft, operating as Flight 648 with 6 crew, 4 security guards, and 88 passengers and en route from Cairo to Athens, is taken over by Omar Mohammed Ali Rezaq and 2 confederates just after its takeoff from the Egyptian metropolis. Following a gun battle in which one hijacker is killed, a security guard wounded, and bullets cause loss of pressurization, the Boeing lands at Valletta, Malta.

On the ground, the terrorists demand fuel and execute two women (one Israeli and one American) and wound an American man they believe dead. As Maltese authorities seek accommodation, they also allow Egyptian Force 777 to fly over from Cairo. During the afternoon, 11 female hostages are allowed to deplane. The commandos hastily attack the aircraft at about 8 p.m. and in the disaster that follows, 4 hijackers and 57 passengers are killed, nearly everyone else involved who is not military is wounded, and the aircraft is destroyed.

Wounded, a surviving American passenger, Jackie Nink Pflug, first tells her story as "Shot in the Head and Left to Die, a Hijack Victim Rebuilds Her Life," in *People Weekly* 26 (December 1, 1986): 167–170. With Peter Kizilos, she will relate her experience a decade later in the memoir *Miles to Go Before I Sleep: My Grateful Journey Back From the Hijacking of EgyptAir Flight 648* (New York: Hazelden, 1995), which is excerpted as "I Was a Hostage," in *Ladies Home Journal* 112 (November 1995): 183–187. One of those who did not survive, Valinda Leonard, will later be remembered by her mother, Gladys Taylor, in her *Valinda, Our Daughter* (Calgary, Alberta: Detselig Enterprises, 1993). The surviving terrorist, Omar Mohammed Ali Rezaq, will be tried in Malta and given a 25-year prison sentence; however, he will be released in a February 1993 general amnesty.

Passenger boardings for the year rise 4.2% to 2,833,000 and cargo traffic accelerates 4% to 504.51 million FTKs. Revenues are \$449 million, expenses jump 10.4% to \$475.74 million, and an operating loss of \$26.5 million is suffered. The net loss is \$6.02 million.

In March 1986, in the expectation of the receipt of traffic rights from Paris to New York, Paris is added as a stop on the Cairo to New York B-747 run.

Orders are placed for two B-747-366s and to help add capacity during their building time, a B-747-243B is leased from **Alitalia, S.p.A.** and christened *Cleopatra*.

Operations continue apace in 1987 and the *Cleopatra* is returned in June.

While practicing touch-and-go landings at Luxor on September 21, an A300B4-203 with five crew hits a runway light and veers into both an antenna and some fences; the aircraft is damaged beyond repair and all aboard are killed.

To tide the company over until delivery the next summer, a B-747-269BC is leased from **Kuwait Airways Corporation** in November.

The first of two B-747-366Cs is delivered in July 1988 and is also named *Cleopatra* after the queen of the Nile; it replaces the Kuwaiti machine, now returned. EgyptAir is now the first Arab airline to introduce this Jumbojet model.

The 17,000-employee state carrier now places orders for 9 Airbus Industrie A300B4-622Rs and 7 A320-231s. In September, the airline contracts with **Singapore Airlines, Ltd.** to provide training for 135 technicians in Singapore to service its new Jumbojets. When the second B-747-366C is delivered in the fall, it is named *Hatshepsut*.

Enplanements for the year reach 3,191,894. The 17,000-employee state carrier earns a net profit of \$24 million on the year.

Discussions begin in April 1989 with **Iraqi Airways, Kuwait Airways Corporation, and Royal Jordanian Airlines** designed to explore the possibility of forming an **Air Afrique, S.A.**-type consortium; the talks will lead nowhere. Also during the spring, the carrier takes over the duty free shop at Cairo Airport's Terminal 2 and turns it into an important national earner of foreign currency.

With the addition of the second B-747-366C Jumbojet, service is started to Riyadh and Los Angeles during August.

Additionally, weekly flights are initiated from Los Angeles to Paris and twice-weekly frequencies are opened from Cairo to New York.

To complement the three B-767-266ERs already in service, two B-767-366ERs, christened *Ramses II* and *Thutmosis III*, join the fleet in August and September. One of these, *Ramses II*, is placed on the route from Cairo to Los Angeles via Paris and New York. Three B-737-566s arrive before the end of the year and are named *Karnack*, *Abou Simbel*, and *Philae*.

A contract is signed in April 1990 with **British Airways, Ltd. (2)** under which the U.K. flag carrier will provide assistance in setting up an operations-control department.

Discussions are held with **Kuwait Airways Corporation** beginning in May concerning the establishment of a joint-charter subsidiary to operate holiday flights to Europe. Joint services, employing EgyptAir jetliners, begin in cooperation with **Philippine Airlines (PAL)** during June over a route from Cairo to Manila.

The talks with KAC and the PAL end when Iraq invades Kuwait at the beginning of August. An Airbus Industrie A300C4-620, wet-leased from the Kuwaiti carrier and displaying EgyptAir, S.A.E. colors (though a Kuwait registration), is captured on the ground at Kuwait on August 2, just after arrival. It will later be transferred to Baghdad and then, for safe keeping, to Tehran.

As a result of the Iraqi invasion, thousands of Egyptians leave Iraq and Kuwait and are ferried back to Cairo during the late summer. Additionally, foreign refugees are returned to other countries. When Operation Desert Shield is announced by the UN, EgyptAir, S.A.E. transports equipment to Saudi Arabia and the Gulf region from Europe.

The 13,000-employee flag carrier reports figures for the first 10 months show passenger boardings up 1.6% to 3,421,994 and freight traffic up 9.5% to 137.52 million FTKs. A net loss of \$36 million is suf-

fered. Also during the last quarter, five of seven A320-231s are delivered, replacing the B-737-266As; they are named *Aswan*, *Luwor*, *Hurghada*, *Taba*, and *El Alamein*.

Fleet modernization continues in 1991 and the fleet includes 4 leased and 8 owned A300B4s, 5 A320-231s, 6 B-707-366Cs, including one leased to **Air Sinai, Ltd.**, 1 B-737-2N7A, also leased to **Air Sinai, Ltd.**, 4 leased B-737-266As, 5 B-737-566s, including one chartered to **Air Sinai, Ltd.**, 2B-747-366Cs, 3B-767-266ERs, and 2-767-366ERs. Orders are placed for nine A300B4-622Rs.

Operation Desert Storm, the January and February assault on Iraqi positions in Kuwait and along the border, forces the airline to halt those services to those destinations in the Middle East and Persian Gulf area not suspended the previous fall. With the war's end, the company is able to restart its services and, for example, the Cairo to Los Angeles route, suspended during the Gulf Crisis, is reinstituted in May. When Iran returned the Kuwaiti A300C4-620 to **Kuwait Airways Corporation**, it re-enters EgyptAir, S.A.E. service.

Only partial traffic figures are again reported, through September. Customer bookings are down 35% to 1,759,000 and cargo is down 7.9% to 95.22 million FTKs. A net \$23.6 million profit is earned.

In October, a \$120-million order for A340-200s is announced. Simultaneously, service is restarted to Entebbe, Uganda.

The fleet is altered in 1992. The number of A300B4-203s is reduced to three while nine A300B4-622Rs are acquired. Aircraft in this group include *Zoser*, *Cheops*, *Chephren*, *Mycerinus*, *Menes*, *Ahmose*, *Tut-Ankh-Amun*, *Seti I*, and one unnamed. Two of the new jetliners are leased to **Libyan Arab Airlines** in February.

Managing Director Ismail Sherif announces on April 1 that his carrier will join **Kuwait Airways Corporation** in establishing a fifty-fifty joint venture cargo and charter airline subsidiary, **Shorouk** ("Sunrise"), with a tentative start-up date of September.

In May, a letter of intent is signed with Canadair for the purchase of three CRJ regional jets, which will be employed to replace the airline's F.27-500s. EgyptAir, on July 1, inaugurates direct charter flights from Johannesburg to Jeddah on behalf of **South African Airways (Pty.), Ltd.** and **Saudia (Saudi Arabian Airlines)**. Muslim militants frequently attack tourists in Egypt during summer and fall and force the airline's tourist bookings down by 50%.

Overall enplanements total 4,113,582. Freight traffic statistics are not reported; however, revenues total \$881 million. Expenses are higher and bring losses: \$1.51 million (operating) and \$1.94 million (net).

The workforce is increased by 2.7% in 1993 to 15,317 and the fleet grows by the addition of the last 2 ordered B-737-566s, *Kalabsha* and *Ramesseum*, and 2 A320-231s, *Sharm El Sheikh* and *Saint Catherine*. The original A340 order is cancelled. The F.27-500s are leased to **Air Sinai, Ltd.**

Chairman Eng Mohamed Fahim Rayan's 41 aircraft now visit the domestic communities of Alexandria, Abu Simbel, Aswan, Cairo and Hurghada, Luxor, Mersa Matrouh, New Valley, Saint Catherine, Sharm el Sheikh, and Taba.

International services are flown to the African cities of Abidjan, Accra, Asmara, Benghazi, Dar es Salaam, Entebbe, Johannesburg, Kano, Khartoum, Lagos, Nairobi, Tripoli, and Tunis. Flights are made to Athens, Barcelona, Brussels, Budapest, Copenhagen, Dusseldorf, Frankfurt, Geneva, Helsinki, Istanbul, Larnaca, London, Madrid, Milan, Moscow, Munich, Paris, Rome, Stockholm, Vienna, and Zurich in Europe and Los Angeles and New York in the U.S. In addition, frequencies are undertaken to the Middle and Far Eastern cities of Abu Dhabi, Aden, Amman, Bahrain, Bangkok, Beirut, Bombay, Damascus, Dhahran, Doha, Dubai, Jeddah, Karachi, Kuwait, Manila, Muscat, Ras El Khaimah, Sana'a, Sharjah, and Tokyo.

In June, a renewed marketing agreement is entered into with **Philippine Airlines (PAL)** that provides for joint services on a Cairo to Manila route using an EgyptAir, S.A.E. aircraft and crew.

Having been convicted in Malta but freed under a general amnesty, the infamous hijacker Omar Mohammed Ali Rezaq is captured by

American FBI agents at Lagos, Nigeria, on July 15 and is extradited to the U.S. to stand trial for the 1985 hijacking.

In October, code-sharing begins with **Gulf Air** over a route from Cairo to Casablanca. Civil unrest contributes to a 25.3% drop in passenger boardings to 3,282,987. Freight rises 30.8% to 139.2 million FTKs. Revenues decline 7.2% to \$601.01 million and expenses rise 0.6% to \$653.32 million. The operating loss increases to \$52.31 million and the net loss is \$32.07 million.

The employee population declines 15.1% in **1994** to 13,000. All of the B-707-366Cs have been withdrawn by February, except for two that are employed to fly charters.

In the fall, a B-737-266 is leased to the new flag carrier **Macedonian Airlines**.

Traffic figures are reported through September and show customer bookings recovering by 10.4% to 2,826,142 and cargo inching up 1.5% to 100.47 million FTKs.

There is no change in the size of the workforce in **1995**.

On April 19, the UN Security Council eases its three-year-old ban on flights from Libya; it will permit EgyptAir, S.A.E. and other Egyptian airlines to carry Muslim pilgrims to Mecca. The same day, Libyan leader Mu'ammarr al-Qaddafi says he will live within the confines of the UN-imposed sanctions for failure to turn over the suspects he harbors that are tied to the bombing of Pan Am 103 in 1988. He will not defy the international body's ban on foreign commercial flights by his nation's airline. EgyptAir, S.A.E. and **ZAS Airline of Egypt, Ltd.** commence the pilgrim airlift two days later.

While taking off from Cairo with 277 aboard at this time, an EgyptAir A300B4 suffers a left engine failure and must abort; no injuries are reported.

In July, an order is placed for three A340-200s and, at the beginning of August, a \$400-million request is sent to Boeing for three B-777-266s.

At the end of August, a bitter dispute arises between EgyptAir and a group of six international airlines over the operation of a small jointly owned ground-services handling company, Egyptian Aviation Services.

British Airways, Ltd. (2), Deutsche Lufthansa, A.G., KLM (Royal Dutch Airlines, N.V.), Alitalia, S.p.A., Swissair, A.G., and Kuwait Airways Corporation all insist that their Egyptian partners have outmaneuvered them in a management takeover. Now the company will be severely limited in its ability to compete with the ground services provided by EgyptAir. The dispute will drag on for some time.

In figures reported to ICAO in October, the company announces three good quarters. Enplanements are up by 14.6% to 4,014,231 while freight jumps 19.9% to 132.1 million FTKs.

Airline employment stands at 17,664 in **1996** and the owned fleet now includes 2 each B-767-366ERs, B-747-366Cs, and B-707-366Cs, one of which is out of service, plus 8 Airbus A300B4-203s, 7 A320-231s, 3 B-767-266ERs, 5 B-737-566s, one of which is leased to **Air Sinai**, and 1 B-737-266A, which is also chartered to **Air Sinai**. In addition, the company employs a number of leased aircraft, including 4 A300B4s, 2 B-737-566s, and 1 A340-312 borrowed from **Gulf Air, Ltd.**

With a request for four, EgyptAir becomes the first Mideast airline to order the A321. At a total cost of \$100 million, 8 jet engines are ordered from Pratt & Whitney on March 12.

On March 27, three hijackers commandeer an A300B4-203, en route from Jiddah to Cairo with 152 aboard, and force it to fly to Martubah, Libya, where they peacefully surrender to Libyan military officials.

Hijacker Omar Mohammed Ali Rezaq is convicted of air piracy by a U.S. Federal Court jury in July for the 1985 skyjacking in which 60 people, including two American women, died; he will be sentenced to life in prison on October 7.

Just after landing in heavy rain at Istanbul following an August 21 service from Cairo, Flight 837, a B-707-366C with 8 crew and 120 passengers, overshoots the runway, collides with an airport vehicle, and catches fire; all aboard are safely evacuated before the Stratoliner is burned out.

Enplanements total 4,538,477 through October, a 13.1% increase. Cargo traffic grows by 23.2% to 164.16 million FTKs.

The workforce is cut a significant 20.7% in **1997** to 14,000. EgyptAir now operates 39 aircraft and serves 76 cities in 49 nations.

Ticket prices for all airlines operating in Cairo are hiked 3% as of January 1. Tickets for travel to the U.S. are the sole exception.

The first of four A321-231s to be received arrives on May 1 and enters service on the company's nonstop routes to Europe, as well as on regional flights. The first of three A340-212s to be delivered during the year arrives at this time and is christened *Clio Express*.

On August 1, the carrier receives an \$85-million European Investment Bank loan to cover the purchase of the 4 A321-231s. A month later, the first B-777-266 IGW is received in the company's new aircraft livery; it is christened *Nefertiti* and enters service on the company's European routes. At this point, *Horus*, the falcon god of the sky, is depicted on the tail of every aircraft in the company fleet.

During the third week of November, EgyptAir agrees to become one of four launch customers for the new A340-622R, placing an order for two.

Full-year passenger boardings slip 2.4% to 5,152,911, but freight traffic rises 6.5% to 220.27 million FTKs.

Airline employment stands at 17,000 in **1998** and the fleet, 92.3% of which is Stage III certified, includes 1 B-707, 6 B-737s, 2 B-747s, 2 B-767s, 3 B-777s, 11 A300s, 7 A320s, 4 A321s, and 3 A340-212s.

The wing of an **Ethiopian Airlines, S.C.** B-767-260ER clips that of an EgyptAir aircraft while taxiing at Cairo on May 12; nevertheless, the wide-body takes off for Addis Ababa. After 20 minutes, it is determined that the damage is too significant to continue and the Boeing returns to Cairo, where it makes a safe emergency landing.

On June 25, a B-777-266 IGW preparing to depart from Cairo to London is subjected to a telephone bomb threat. All 160 passengers are evacuated from the wide-body and it is left on the runway while police conduct a search that turns up no explosives. Four hours later, the plane departs for London (LHR). Another B-777-266 IGW must return to Cairo 40 min. after departure on August 19 due to technical problems with its landing gear.

Flights continue without incident during the remainder of the year. But, during the fall, four female flight attendants sue the carrier in Cairo's Labor Court alleging that, because Egypt's laws are based on Islamic Sharia code, they and their fellow flight attendants aboard company aircraft have the right to refuse to serve alcohol. The women win the case, which is immediately appealed by EgyptAir.

Through October, passenger boardings are down 12.8% to 3,831,000, while cargo traffic is up 12.1% to 199.85 million.

Airline employment at the beginning of **1999** stands at 14,000.

Bad storms on January 8 force two company flights from Jeddah and Dharhma to divert to Cairo rather than land as scheduled at Alexandria. After deplaning, passengers are bussed to Alexandria.

On March 8, the country's high court finds in favor of the female flight attendants who had won a case the previous fall against serving alcohol. Analysts expect that the decision may have wide repercussions on the national tourism industry.

Following the lifting of UN air restrictions against Libya on April 5, EgyptAir sends an inaugural flight to Tripoli on April 18. The Egyptian parliamentarians and journalists who arrive aboard the A300B4-622R are warmly greeted.

Negotiations on an air service agreement are put on the fast track and it is announced that, upon their conclusion, the company will operate twice weekly from Cairo to Tripoli and weekly from Alexandria to Benghazi. With the beginning of the summer schedule, roundtrip service from Cairo to Beirut becomes daily.

On June 23, a new homepage is opened on the World Wide Web.

Tragedy strikes Flight 990, a B-767-366ER with 15 crew and 202 passengers, after it departs New York (JFK) on October 31 on the continuation of its service from Los Angeles to Cairo. While the jetliner is cruising at 33,000 ft., approximately 57 nm. S of Nantucket, ATC

witnesses the plane dive down to 16,700 ft. in just 40 seconds. With a ground track of about 70 degrees and ground speed of almost 600 kt., the plane suddenly climbs back up to 24,000 ft. and then descends to 10,000 ft. before apparently breaking up and crashing into the ocean. The wreckage sinks 270 ft. to the ocean floor and there are no survivors.

Over the coming months, NTSB and Egyptian officials will seek reasons for the disaster, with the latter steadfastly denying the widely suggested theory of copilot suicide.

Enplanements total 4.62 million and 268.9 million FTKs are operated.

Airline employment at the beginning of 2000 stands at 20,067, a 43.3% increase over the previous 12 months. Among the world's top 25 airlines, EgyptAir ranks 23th in the total number of workers.

By January 1, 70% of the wreckage of Flight 990 has been raised and brought to a hangar at Quonset Point, Rhode Island; recovered items include large portions of the fuselage, wing, tail, and one engine. Underwater photographs of the second engine indicate that it, like the first, had been operating under little or no thrust when it impacted the water. These findings confirm the information on the flight data recorder that the engines were shut off.

After landing at London (LHR) on February 4, company pilot Capt. Hamdi Hanafi Taha requests political asylum, telling British immigration officials that he has new information concerning the crash of Flight 990 in October.

On February 7, the carrier's Operations Director Capt. Hassan Misharfa orders the pilot suspended for failing to follow procedures, while Vice President Hassan Musharafa indicates that Taha is just one of 500 EgyptAir pilots and has no special information on the disaster. Nevertheless, the U.S. NTSB sends two people to London to see what the flyer has to say. Twelve days later, an NTSB official dismisses Misharfa's information as "unimportant."

Just after landing at Harare, Zimbabwe, in bad weather on the night of February 22, a B-767-366ER is caught in violent wind gusts. The crew temporarily loses control and the plane veers off the right of the runway, then back across the runway, and veers off the left side. After the crew regains control, the plane is brought to a safe stop; however, the left engine hits the ground and it, together with its pylon, are torn from the wing. Happily, no injuries are reported.

Orders are placed for a pair of B-777-366s on March 13; as part of the deal, EgyptAir will trade in its remaining B-767-366ER. An earlier order for three A318s is simultaneously increased to five; when the Airbus equipment arrives in 2003, it will be placed on the domestic routes from Cairo to Abu Simbel, Aswan, Hurgada, Luxor, and Sharm el Sheikh.

Making the first use of a new air corridor from Cairo to Gaza recently agreed to between Palestinian and Egyptian authorities on May 3, a company B-737-566 is refused landing permission by Israeli ATC and is turned back by Israel Air Force fighter planes. Israel's Civil Aviation Authority has yet to sign off on the Gaza accord and still requires EgyptAir to employ a previously agreed upon corridor north of el Arish.

Aboard Flight 233, an A321-100 with 165 passengers en route from Cairo to Aswan on May 11, Shaaban Ali approaches the chief flight attendant and asks to be taken into the cockpit, where he reportedly demands that the plane be flown to Afghanistan. Waving a jar of hair gel that he claims is a bomb, the man is overpowered by the crew, who turn him over to police upon landing.

Two more A318 orders are placed on June 22, atop those from July 1999. After eight years of UN embargo, twice-weekly return service between Cairo and Tripoli is resumed on July 13.

Although its investigation is not completed, the NTSB releases its "docket" findings on August 11 concerning the October 31, 1999 Flight 990 disaster. It is possible, the papers note, that the tragedy may have been caused by the failure of critical components of the Boeing's elevator control system. During this time of investigation, experts sent from Cairo by the airline and the Egyptian Civil Aviation Authority or hired elsewhere have been allowed to assist the NTSB in its work to determine the cause of the crash.

Just after takeoff from Cairo for Tunis on September 8, flight crew note a crack in the cockpit window of their A321-231. A safe emergency landing is made back at the point of origin and none of the 103 passengers are hurt.

An A300B4-203, being operated by the company under lease from **TransAer International Airlines, Ltd.**, is seized by EgyptAir on October 24, four days after the Irish line collapses. The aircraft is owned by GECAS.

The French news agency AFP quotes an EgyptAir official on December 19 as indicating that his carrier will launch weekly charter flights to Baghdad after the January 2 Eid al-Fitr holiday, which marks a formal end to Ramadan.

EILATA. See **ARKIA ISRAELI AIRLINES, LTD.**

EKSPARK AIRLINE: 81 Sheremetyevo 1 Airport, Moscow, 125190, Russia; Phone 7 (95) 348-3301; Fax 7 (95) 348-3300; Year Founded 1993. Ekspark is founded at Sheremetyevo Airport, Moscow, in 1993 to offer worldwide ad hoc cargo charters. A. E. Sidorenko is managing director and he inaugurates revenue services with a single Ilyushin Il-76.

One-plane flights continue apace in 1994-2000, including a number under contract to the UN.

EL AL ISRAEL AIRLINES, LTD.: P.O. Box 41, Ben-Gurion International Airport, Tel Aviv, 70100, Israel; Phone 972 (3) 971-6111; Fax 972 (3) 971-6040; <http://www.elal.co.il>; Code LY; Year Founded 1948. The Israeli Ministry of Transport officially authorizes creation of a state airline on August 18, 1948. Even before the carrier is registered, it is named El Al (To the Skies) Israel National Aviation Company and on September 27, it acquires its first aircraft, an ex-military Douglas C-54.

Flying from Ekron Air Base in the Negev, the plane is dispatched to Geneva two days later to return home Israel's first president, Chaim Weizmann. Meanwhile, in the U.S., former **Transcontinental and Western Air Lines (TWA)** flight engineer Al Schwimmer, owner of the Schwimmer Aviation Corporation, is attempting to obtain, in contravention of the arms embargo, additional aircraft for the infant carrier.

Having established the "paper" Panamanian carrier **Lineas Aereas de Panama, S.A.** and recruited contract pilots, Schwimmer acquires a total of 10 Curtiss C-46 Commandos and 4 Lockheed C-69 Constellations, which he begins to deliver to Lydda, along with cargos of arms. Although the Commandos make successful ferry flights, the U.S. government orders the Constellations, waiting their turn at Milville, New Jersey, to be impounded.

Pilot Sam Lewis is able to take off with one of the Lockheeds before it can be taken over and successfully delivers it to the Israelis. Although Lewis will be acquitted, Schwimmer is later convicted of violating the U.S. neutrality and export control law and is fined \$10,000. Under control of the Israeli Air Force Transport Command, the Lockheed and Commandos are employed to fly supplies to Israel from Prague, Czechoslovakia.

In October, France becomes the first West European country to grant Israel landing rights and nonscheduled charter flights are made between Tel Aviv and Paris. Capitalized at I£2 million, El Al is incorporated at Tel Aviv on November 15, with the Israeli government as the major shareholder (80%). Others contributing share capital are the national shipping line, ZIM, and labor interests.

Early in January 1949, Aryeh Pincus becomes first president. On January 31, a Curtiss C-46 Commando is borrowed from the Air Force to fly the national finance minister on a three-week mission to Europe.

Two Douglas DC-4s are acquired from **American Airlines**; christened *Rechovoth* and *Herzl*, they arrive at Tel Aviv in March and July, respectively.

Meanwhile, the C-69 smuggled out of the U.S. earlier has been converted to civil L-049 standard. On June 9, it damages its undercarriage in a bad landing at Prague; it is later repaired, only to crash on the seashore near Tel Aviv while attempting an emergency landing.

On July 15, El Al receives its formal Certificate to Commence Business and scheduled Douglas service is inaugurated by the *Herzl*, on July 31, over a Tel Aviv–Paris (ORY) route via Rome. The same aircraft is employed on August 16–17 to return to Israel the remains of Herzl, Zionism's founder, from Vienna.

To provide additional capacity on the Paris route, El Al charts DC-3s from South African-based **Universal Airways (Pty.), Ltd.**

Associate **Arkia Israel Inland Airlines, Ltd.** is formed to handle domestic flights while the flag carrier concentrates on international operations. Additional routes opened during the year are those to Rome and Zurich on December 18 and London via Rome on December 22.

At year's end, two offices are opened in New York and airline employment is 130. A total of 2,154 passengers and 300 tons of cargo are carried during the first 6 months; start-up costs lead to a net loss of \$435,000.

Two C-46s are transferred to the carrier from the Air Force on January 24, 1950 and are employed to inaugurate freight service to Europe, occasionally being employed as passenger transports to supplement the DC-4s.

The C-54A *Herzl*, with 4 crew and 56 passengers, fails its takeoff from Lydda Airport on February 5–6; although the aircraft must be written off, there are no fatalities.

Three additional DC-4s are purchased, two from **United Airlines** and one from **Trans-Caribbean Airways**, arriving in Israel in May and June.

A charter route is extended to Istanbul in March, and scheduled flights begin to Vienna in July, and Nicosia and Athens in October. DC-4s launch charter flights to New York via Rome, Paris, Shannon, and Gander in June.

Al Schwimmer is finally able to legally sell his remaining three Constellations to El Al on July 1. These are sent to Burbank for conversion to civil L-049 standard.

In September, **Universal Airways (Pty.), Ltd.**, the South African company that had been conducting Johannesburg–Tel Aviv DC-3 service, is acquired. DC-4s replace DC-3s on October 29, flying Tel Aviv–Khartoum–Nairobi–Livingstone–Johannesburg.

The first ex-U.S. Air Force C-69/L-049 Constellation arrives at Tel Aviv on December 22, where it is christened *Mazal Tov* (Good Luck). The new "Connie" flies its first service, a New York charter, on December 28–29.

Passenger boardings during the first full year of international services are 4,699, with 700 tons of cargo carried over 8 weekly European flights. The employee population is 375 and the net profit is \$265,000.

The first regularly scheduled El Al L-049 service to London and Paris begins in late January 1951.

Employing a borrowed Air Force C-47, scheduled service is started to Istanbul on March 1. The second Lockheed is delivered on March 25.

On April 29, El Al publishes its first comprehensive schedule and on May 16 opens a scheduled Constellation service from Tel Aviv to New York via London, becoming the first airline outside Europe or North America to fly the North Atlantic. One thousand passengers fly the carrier's transatlantic route this inaugural year.

A DC-4 is sold to **Trans-Caribbean Airways** on June 24 and the third L-049 is acquired on August 8.

During the fall Constellations assume the Johannesburg route and begin to replace DC-4s on the company's services to Europe.

While descending to Zurich on a November 21 cargo flight, a DC-4 crash-lands (six dead).

On December 13, a contract is signed that provides for the carrier's New York flights to be serviced at Idlewild Airport by Lockheed Aircraft.

Enplanements grow to 15,000, freight to 800 tons, employment to 592, and the net profit to \$722,000.

The last two DC-4s are sold in January and April, 1952, respectively. During the latter month, two passenger-configured C-46s are acquired from the Air Force and are placed on the Vienna and Istanbul services.

On May 1, the carrier initiates the first tourist-class transatlantic flights from New York (IDL) to London and Paris.

As the result of a new bilateral agreement with Italy, flights commence on May 25 to Athens, Rome, and Vienna.

North Atlantic enplanements reach 6,000, while systemwide, bookings total 21,904, although freight is level. Employment soars to 1,006 while the net profit drops to \$12,000.

A C-46 is sold in May 1953 while, in August, an Airspeed AS-65 Consul is acquired and begins four years as a crew trainer.

In October, a fourth L-049 is purchased for tourist-class services from **California Hawaiian Airlines** and is registered on December 24.

North Atlantic boardings climb to 8,000, a number that will remain level each year through 1957. Overall, 28,801 passengers are transported and 900 tons of freight flown; however, a \$492,000 net loss is suffered.

The new Constellation enters service in early spring 1954, allowing transatlantic flights to increase to thrice weekly in July.

Although passenger boardings increase to 30,277, freight is off by 100 tons and the net loss skyrockets to \$1,137,000.

On June 22, 1955, El Al follows **British Overseas Airways Corporation (BOAC)** as the second carrier to order the Bristol 175 Britannia turboprop, when three are requested from Britain.

While nearing the Bulgaria and Greece border on a London–Tel Aviv flight via Vienna on July 27, Flight 402/26, an L-049 with 7 crew and 51 passengers, mistakes Bulgaria's Struman Valley for the regular Vardar Valley route, is attacked by Bulgarian MIG-15s, and shot down. Although the Israeli government loudly protests, it will be years before a tiny sum in compensation is paid. Bulgaria does, however, express regret that its air force had exhibited "a certain haste" in closing with the Constellation. Later in the year, the Israeli Ministry of Communications will release the *Report of Commission of Inquiry on the Shooting Down of El Al Aircraft 4X-AKC on 27 July 1955* (Jerusalem: Government Printer).

In October, a temporary replacement L-049 is leased from **South African Airways (Pty.), Ltd.** for service on the Johannesburg–Tel Aviv route; it is joined by a DC-6B leased from **Alitalia, S.p.A.** for flights from Tel Aviv to London via Rome and Paris.

In November, two L-049s are purchased from **Cubana (Compania Cubana de Aviacion, S.A.)**.

The final purchased L-049 is registered on December 16 and, late in the month, a DC-6B is leased from **Union Aeromaritime de Transports, S.A. (UAT)** for service on the South African run.

Bookings increase to 34,462; however, cargo drops to only 500 tons and the net loss increases to \$1,989,000. Airline employment stands at 1,082.

The final L-049 enters scheduled service in February 1956 and is employed to start new routes to Amsterdam on March 5 and Brussels on March 8.

In March, a DC-6B leased from **Sabena Belgian World Airlines, S.A.** replaces that chartered from **Union Aeromaritime de Transports, S.A. (UAT)** on the Johannesburg route.

El Al Israel Airlines, Ltd. is the only airline to fly passengers to and from Israel during the October Suez War.

To get around landing prohibitions instituted by many African nations following the Suez War, the carrier rents a DC-6B and a DC-7C from **Sabena Belgian World Airlines, S.A.** and begins flying them Tel Aviv–Benghazi–Kano–Leopoldville and Tel Aviv–Tunis–Fort Lamy–Brazzaville–Johannesburg.

In November, Efraim Ben-Arzi succeeds Aryeh Pincus as president.

Passenger traffic accelerates to 36,671, cargo is up 100 tons, and the employee population is up to 1,136; the net loss, if not as large as that of 1955, is still huge at \$1,367,000.

Employed in training since July 1953, the carrier's Airspeed AS-65 Consul is withdrawn on February 18, 1957.

The long-awaited Bristol 175 Britannias, Britannia 313s, arrive at Tel Aviv on September 5, October 19, and November 29, respectively. The

first round trip Tel Aviv–New York proving flight is completed on October 30. On the return leg of another proving flight, New York–London, on December 8, a record journey time of 8 hrs. 3 min. is recorded.

In the longest nonstop flight by a commercial airliner to date, a Britannia 313 makes a direct 6,200-mile New York–Tel Aviv proving flight in just over 15 hours on December 18–19. The first scheduled Britannia service Tel Aviv–London–New York is launched on December 22; the return flight results in another speed record—this one for scheduled commercial transatlantic flight—once again, 8 hrs. 3 min.

During the year, bookings rise to 38,004, freight is level, employment drops to 1,084, and the net loss improves to \$733,000.

An El Al Britannia returning to Tel Aviv from New York on January 8, 1958, establishes a new speed record of 7 hrs. 44 min. New York frequencies are increased, with all three Britannias on the North Atlantic by January 16.

Displaced by the turboprops, company L-049s are assigned to European service, including the new destinations of Cologne on February 24 and Munich on March 25.

A fire at Lod Airport on April 2 badly damages an L-049, which is later repaired.

On July 17, Bristol rents a fourth Britannia to El Al.

Enplanements for the year are 46,384 (19,000 on the North Atlantic), cargo is up by 100 tons, and the employee population grows to 1,394; the net loss declines to \$684,000.

The lease for the fourth Britannia expires on March 6, 1959 and the aircraft is returned to its manufacturer. Britannias open a new route to Tehran in August.

Despite significant growth in passenger boardings to 69,879 (25,000 transatlantic), a 300-ton increase in cargo, and a boost in airline employment to 1,517, the net loss skyrockets again, up to \$1,136,000, as big invoices for the Britannias come due.

The carrier's first two Boeing 707-458s are ordered on March 25, 1960. As part of Operation Garibaldi, a company Britannia 313 lands at Buenos Aires on May 20 with Israel's unsuspecting UN ambassador Abba Eban and a delegation to participate in Argentina's independence day celebrations. Co-opted by the Mossad, a member of the delegation feigns illness and is taken to hospital. Meanwhile, an El Al Israel Airlines employee has spent weeks ingratiating himself with airport officials. Thus, on May 21, commandos are able to quickly smuggle aboard one Rikardo Klement in the faking delegate's place and take off at 12:05 a.m. for Israel with a man who is, in fact, the infamous Holocaust architect Adolph Eichmann.

In addition to their North Atlantic frequencies, the airline's Britannia 313s are, by summer, also flying all European services, except for two L-049 flights to Istanbul and Nicosia. The DC-6B leased from Sabena is returned and replaced on the South African run by a DC-7C chartered from the Belgians.

Arrangements are made with the Brazilian carrier **VARIG Brazilian Airlines (Viacao Area Rio Grandense, S.A.)** for a six-month lease of a B-707-441, which arrives at Tel Aviv in December.

Passenger traffic increases to 95,533 (32,000 on the North Atlantic); freight and employment remain level and for the first time since 1952, a net profit is reported—the same net profit as in 1952—\$12,000.

The leased Brazilian airliner allows El Al to offer its first pure-jet service Tel Aviv–New York on January 8, 1961. The frequency is increased to twice weekly on February 19. Also during this month, a third B-707-458 is ordered.

The first two purchased 707-458s are delivered to Tel Aviv on April 22 and June 7, respectively. The **VARIG Brazilian Airlines (Viacao Area Rio Grandense, S.A.)** plane is returned in May, the same month two B-720-058Bs (B-720Bs) are ordered.

On June 15, during the return leg of its maiden transatlantic flight, a company B-707-458 establishes three world records for speed, distance, and service. By summer, six weekly flights are offered by jet and two by turboprop.

Following conclusion of the annual tourist season, the last two Constellations are withdrawn on October 15.

North Atlantic enplanements soar to 43,000, as overall bookings climb to 116,502; freight doubles to 2,000 tons, the number of employees is boosted to 1,644, and the company's largest ever net profit (\$871,000) is recorded.

On February 6, 1962, the four surplus L-049s are sold to the new U.K. tour airline **Euravia, Ltd.** The third B-707-458 is delivered on February 13, the same day two more Constellations are sold. Additionally, the first of three Britannia 313s is leased to **British United Airways, Ltd. (BUA)**; the second and third turboprops are chartered to the same British independent in March.

The DC-7C lease with **Sabena Belgian World Airlines, S.A.** expires and the aircraft is returned to Brussels.

The company's thirteenth year is marked as its "Bar Mitzvah" year.

On March 23 and April 30, respectively, the two B-720-058Bs arrive. The first is placed on the route to London via Zurich on April 1 and on June 14 the second takes over the Johannesburg service via Tehran and Nairobi. The long-legged new jetliners allow Israel's flag carrier to avoid flying over the airspace of hostile Arab states.

During the summer, jets are introduced on several of the European routes.

Transatlantic bookings rise to 56,000, with systemwide enplanements up to 171,068. Freight grows by 1,000 tons and the number of employees increases by almost 400. A net profit of \$616,000 is recorded.

Wildcat strikes by flight crews between March 6 and September 15, 1963 cut the number of flights available. A Britannia leased to **British United Airways, Ltd. (BUA)** is operated by the British carrier on behalf of El Al at the beginning of the job action; the turboprop is returned to Israel on April 8.

Passenger traffic grows to 206,655 and freight doubles to 6,000 tons; 150 new employees are hired, but the labor actions force a \$946,000 net loss.

El Al's first Britannia 313 is sold to **Globe-Air, Ltd.** of Switzerland on April 3, 1964.

Jet service is inaugurated to Rhodes on June 30.

A second Britannia leased to **British United Airways, Ltd. (BUA)** is returned on September 27, even as El Al orders a fourth B-707, this time a Dash-358B.

Scheduled flights to Copenhagen begin on October 11.

Passenger boardings incline upward to 231,376, freight is level, and only 80 employees are added; increased traffic, labor peace, and lease payments bring the company a record \$1,096,000 net profit.

One of the three remaining Britannias is sold to **Globe-Air** of Switzerland on March 8, 1965. New offices are opened in various cities, including Jerusalem, and the head office at Lod Airport is refurbished.

On March 15, Greece approves a \$2.5-million charter deal that will allow El Al to fly about 7,000 AHEPA members from the U.S. to Athens for a convention; the operation will require 42 round trips and will be the largest and longest airlift in airline history to date.

A new seven-year development plan is unveiled. From May–November, a B-707-373C is leased to El Al from **World Airways** for use while the fourth purchased Boeing is awaited.

A total of 288,336 passengers are carried, cargo traffic is up by 1,000 tons, employment grows slightly, and the net profit falls to \$243,000.

On January 1, 1966, President Efraim Ben-Arzi succeeds Moshe Carmel as board chairman and Shlomo Lahat is named president.

The new B-707-358B is delivered on January 7; however, due to a crew strike, the plane is immediately chartered to **The Flying Tiger Line**, which in turn wet-leases the aircraft back to El Al with a Flying Tiger crew.

On April 22, a Britannia is sold to **British Eagle International Airlines, Ltd.** Another B-707-358B is ordered in July. On October 3, **The Flying Tiger Line** charter is concluded and the B-707-358B is re-registered with El Al.

Freight grows by 1,000 tons, 200 more workers are recruited, bookings rise to 298,206, and the net profit rises to \$602,000.

The last Britannia is disposed of to **Air Spain, S.A.** in February 1967, making the carrier the first pure-jet airline in the Middle East.

On February 2, the B-707-358B requested the previous year is delivered.

Between May 14–24, the airline transports 11,500 tourists from Israel.

Airline operations are significantly interrupted by the Arab–Israeli Six-Day War. When war erupts on June 5, El Al is the only carrier linking Israel with the rest of the world, including New York City. On June 12, a day after war's end, a B-720-058B makes a proving flight Tel Aviv–Nairobi. Five days later, on June 17, the carrier is able to report that its airliners are now flying over the Sinai for the first time, saving seven hours on flights to Johannesburg.

In mid-summer, Chairman Ben Arzi and President Lahat resign their posts following a charter debate with the Ministry of Tourism and are replaced by Moshe Carmel and Mordechai Ben-Ari.

In the fall, a Handley Page Herald 200 is wet-leased from **Arkia Israel Airlines, Ltd.** and placed on the Nicosia service.

Passenger boardings climb to 314,404 and cargo is up another 1,000 tons; the workforce is increased by 200 and the net profit is \$338,000.

The workforce in 1968 is 3,136.

A B-707-349C is wet-leased (with crew) from **The Flying Tiger Line** on April 1 and employed to open new services to Geneva on April 1 and Nice on April 5.

El Al becomes the first airline in the world to order the B-747B.

The wholly owned airline catering subsidiary Teshnet is formed.

Three Popular Front for the Liberation of Palestine (PFLP) gunmen hijack one of the carrier's B-707-458s, Flight 426 en route from Rome's Fiumicino Airport for Lod, Israel, with 10 crew and 38 passengers, to Algeria on July 23. Israel is asked to surrender 15 Palestinians and publicly vows to protect its airline by increasing security. Ten Israeli women and children are released on July 28, while the others will be held for another month. Israel refuses to meet the demand by releasing any Arabs. The Stratoliner will be returned to Lod on August 31 via Rome, where it is taken by a French crew provided by **Air France**.

The Flying Tiger Line jetliner leased in April is returned; however, a second is wet-leased in August to replace the one stolen. The new charter is employed to open August service to Bucharest, the carrier's 21st destination.

A B-720-048 leased from **Aer Lingus Irish Airlines, Ltd.** begins a six-month charter in September.

On December 26, two PFLP gunmen attack and set fire to Flight 253, a B-707-358B with 47 passengers, taxiing on the ground at Athens in preparation for takeoff and the continuation of a service that had originated in Tel Aviv and that is continuing on to Paris and New York. One passenger is killed and another is wounded; the Stratoliner suffers significant damage, including the loss of one engine. Although both terrorists are captured and will be imprisoned, Israeli heli-borne commandos will attack Beirut International Airport two days later and destroy a dozen Lebanese airliners in retaliation.

At year's end, **The Flying Tiger Line** lease expires.

Traffic climbs to 364,360 passengers and cargo is up 2,000 tons. Despite the terrorist incidents, this first complete year after the June War brings a record net profit of \$2,220,000 on revenues of \$52 million.

A B-707-358B is received on January 22, 1969.

On February 18, Flight 432, a B-720-058B, is attacked by four PFLP gunmen on the taxiway at Zurich as it is preparing to take off for the continuation of a service from Tel Aviv to Amsterdam. A trainee pilot is killed, while an armed passenger, standing in an open doorway, returns fire and kills one of the pirates. The aircraft is substantially damaged. The three surviving terrorists are all captured and will receive 12-year prison terms.

The first B-707-358C convertible passenger and cargo airliner is delivered on May 15.

On September 8, the PFLP attacks the Brussels office; similar assaults take place during the month at Athens, Istanbul, and Tehran.

The first all-cargo Tel Aviv–New York via Paris flight is made by the B-707-358C on September 28.

A total of 13,000 tons of cargo and 464,915 passengers are transported on the year and a net profit of \$1.9 million is banked.

A second B-707-358C is delivered on January 28, 1970.

An El Al passenger bus at Munich Airport is attacked by PFLP gunmen on February 10 (two dead).

In April, service is started to Addis Ababa.

On September 6, as part of a PFLP conspiracy to hijack several Western airliners, two terrorists attempt to capture Capt. Uri Bar-Lev's Flight 219, a B-707-458 with 158 passengers and en route from Tel Aviv to New York. In the ensuing gun battle, one hijacker is killed and his accomplice, a woman, is captured while a steward and two passengers are wounded. As she is being taken down, the female drops a hand grenade; only a faulty spring keeps the bomb from exploding. The plane diverts to London (LHR) for assistance. El Al facilities at Athens are strengthened two days later following the arrest by police of two Lebanese men after explosives are found in their hotel room.

Over 1,000 ground service personnel strike the company at Tel Aviv on September 20, with half returning to work the next day.

The crew of the B-707-458 that brings Prime Minister Golda Meir to the U.S. on October 25 reports a near miss with an Israeli fighter over Tel Aviv during takeoff.

The company settles with its Tel Aviv ground personnel on November 7, bringing an end to their work stoppages.

The employee population is now 3,883. Enplanements grow slightly during the year to 469,001 but cargo is up by 5,000 tons. The net profit is \$1.4 million.

Scheduled service to Montreal via Amsterdam is inaugurated on March 28, 1971; two days later, Marseilles becomes a destination, replacing Nice.

The first B-747-258B is delivered at Tel Aviv on June 2 and is inspected by Prime Minister Meir and other VIPs the next day. It is placed, five days later, on the Tel Aviv–London–New York route. On November 22, a second B-747-258B is received and it, too, is immediately assigned to the North Atlantic.

At year's end, the fleet comprises 2 Jumbojets, 8 B-707s, and 2 B-720-058Bs. A second Jumbojet is delivered later in the year.

Enplanements soar to 520,770 and cargo is up to 21,000 tons; the net profit falls to \$300,000.

A 24-hour strike by maintenance workers on January 16, 1972 halts some of the line's flights. The same personnel stage a two-day workout at Tel Aviv between April 10 and 12. Between August and September, a B-707-321 is leased from **British Midland Airways, Ltd.** while another B-747 is ordered.

Meanwhile, on August 16, two Arabs, A. Zaid and M. Ali Hasham, give a record player (with a concealed bomb inside) as a gift to two British women, R. Watkin and A. Walton, vacationing in Rome. The women board an El Al B-707-458 flight for Tel Aviv and, just after takeoff, the bomb explodes, injuring 4 of the 148 aboard. The aircraft returns safely to Fiumicino Airport; Zaid and Hasham are arrested by Rome police four days later.

En route from Tel Aviv to New York on September 15, a B-747-258B makes an emergency landing at Rome after experiencing engine trouble.

Company officials and French police report that a bomb alert will delay a Jumbojet at Paris for an hour on September 28; no explosive is found. The next day, El Al security officials reveal that passenger S. Lifavitzky had disclosed to them that, shortly before boarding, she had been approached by a girl at Paris (ORY) and offered \$100 to take a transistor radio to Tel Aviv. Passenger traffic rises to 678,920 and freight is up by 4,000 tons. The net profit falls to only \$3,000.

The employee population in the twenty-fifth anniversary year of 1973 is 4,900.

A strike at Tel Aviv by maintenance workers on February 19 forces the carrier to cancel all of its outgoing flights.

Between March 4 and March 7, Iraqi national N. D. Al-Jawari is sought by U.S. authorities on charges of attempting to blow up the El Al terminal at New York (JFK). Also on March 7, police defuse a bomb in the same terminal.

Two vehicles carrying National Arab Youth Organization gunmen smash through the gate at Cyprus's Nicosia International Airport on April 10 to attack an El Al airliner on the ground; Israeli security personnel return fire killing one commando and wounding two others. Boeing's 200th delivered Jumbojet is a B-747-258B provided to El Al on April 18. It is employed to launch the first scheduled nonstop service Tel Aviv–New York on April 29, at that time the world's longest duration nonstop civil route.

Unduplicated mileage flown by the airline is now 28,420.

Destined for New York, diamonds worth more than \$100,000 disappear from a company airliner during a July 18 flight between Tel Aviv and London.

Italian police, on September 5, raid an apartment that an Arab had rented for a month at Ostia, near Rome, and seize two Soviet-made, lightweight launchers for ground-to-air missiles. Italian security sources suggest that the missiles would have been fired at an El Al jetliner landing or taking off from nearby Fiumicino International Airport.

Prior to the Yom Kippur War, service is inaugurated to South America over a mid-Atlantic route to Buenos Aires via Paris and Monrovia. When the Yom Kippur War becomes one of attrition after October 9, the company's fleet is employed on airlift flights and, as in 1967, is the only air link to the outside world. Something over 5,500 tons of supplies are brought to Israel before the cease fire. In November, service to Addis Ababa is suspended.

Systemwide passenger traffic is up to 689,564 and 30,000 tons of cargo are carried; despite the conflict, the net profit climbs to \$243,000.

Airline employment is 4,850 in 1974.

Mechanics, members of the IAM, go out on strike against the carrier at New York (JFK) on January 5. The job action is settled by mediated agreement on January 15.

During the Cypriot–Turkish conflict of July, El Al is again the only airline flying in and out of Israel.

Transport Minister Gad Yacobi threatens to shutdown the carrier on December 27 if maintenance crews refuse to end their slowdown within 24 hours; the workers fail to comply and airline operations halt.

Passenger boardings swell to 756,887 this year and cargo climbs to 33,000 tons.

The workforce grows to 5,128 in 1975.

The nine-day-old slowdown by maintenance workers, which had caused suspension of operations the previous December 28, ends on January 4.

Two men fire bazooka rockets at a B-707-358B at Paris (ORY) on January 13; the projectiles miss the Boeing, but hit an **Inex-Adria** DC-9-32, causing minor damage. The attackers, members of the Mohammed Boudia Commando, escape by car.

On December 31, a fourth Jumbojet is delivered, a B-747-258C, the carrier's first combi. Strikes plague the carrier during the year, keeping freight traffic level and allowing enplanements to grow to only 759,943. A net loss of \$79,000 is suffered.

Employment in 1976 is reduced 5.5% to 4,845 and orders are placed for 5 additional Jumbojets. The new B-747-258C begins dedicated all-cargo service during the first week of January. On January 16, the first computerized reservations system, CARMEL, comes on line.

Just one hour before a B-707-358B with 110 passengers is scheduled to land at Nairobi Airport on January 18, Kenyan police arrest three Palestinians and the West German terrorists Brigitte Schultz and Thomas Reuter. They are hiding in wait with two Soviet-made SAM-7 shoulder-fire missile launchers, preparing to shoot it down. Covertly removed to Israel, the Germans are secretly tried, convicted, and imprisoned.

The Entebbe hijacking and rescue of passengers, largely Jewish, aboard an **Air France** airliner occurs in July, after which stringent new airline security measures are adopted atop those already in place.

The same month **Cargo Air Lines, Ltd. (CAL)** is registered; it is required to lease its aircraft from El Al.

Four die and 20 are wounded in the attempted hijacking of a B-707-358B by PFLP members at Yeslikoy Airport, Istanbul, on August 11. All of the would-be pirates are taken into custody by Turkish police.

B-707-358C service to Mexico City via Amsterdam and Montreal is initiated on November 9.

Passenger boardings climb to 767,745, while freight accelerates by 1,000 tons; the net loss skyrockets to \$1.2 million.

On January 13, 1977, a B-747-273C is leased for two months from **World Airways**.

Engineers and technicians strike, disrupting services on February 18 and May 1; meanwhile, on March 1, the Boeing B-720-025B *Aline* is chartered for six months from **Trans-European Airways**.

A B-747-124SF, formerly flown by **Continental Airlines** and the Iranian Air Force, is acquired on June 21 and a B-747-123F is leased for six months from **The Flying Tiger Line** on August 15.

During the year, a B-707-329 is leased from Israel Aircraft Industries.

Service is started to Lisbon in September and, on October 2, the wholly owned charter subsidiary **Sun d'Or, Ltd.** (originally El Al Charter Services) is formed.

Following Egyptian President Sadat's November visit, Prime Minister Menachem Begin flies to Cairo aboard a specially outfitted El Al B-707-358C.

Also in November, President Ben-Ari succeeds Moshe Carmel as chairman with Mordechai "Motti" Hod becoming president.

Former Israeli Air Force fighter pilot Capt. Hillel Alroy is chosen to fly the El Al press plane from Tel Aviv to Abu Suweir military air base at Ismailia, Egypt, for the Begin–Sadat summit meeting on December 15.

Enplanements rise to 964,507, freight is up 1,000 tons, airline employment grows to 5,260, and a net profit is registered, \$300,000.

The workforce in 1978 is 6,121.

A renewed U.S.–Israel bilateral air treaty is signed.

A new B-747-258C arrives at Tel Aviv on June 17, allowing the leased **The Flying Tiger Line** B-747-123F to be returned in July.

Eighteen members of an El Al crew, who survive an Arab terrorist attack in London while riding on a bus to their hotel, return to Tel Aviv on August 22. El Al's President Hod criticizes the U.K. for failing to provide armed escorts for his crews and for refusing to allow his security men to keep their weapons after arrival in the U.K.

The Boeing 720B leased from **Trans-European Airways** in 1977 is rechartered in September and October.

In December, El Al begins to evacuate Jews and others from Tehran.

Cargo swells 29.5% to 49,000 tons and passenger boardings jump 15.2% to pass the million mark for the first time (1,089,910). An operating loss of \$45 million is suffered, although \$10,000 in net gain is realized.

To assist in the Tehran evacuation, a DC-8-63CF is leased for three months from **Airlift International** on January 17, 1979.

El Al suspends service to Tehran on February 10.

A B-747-258F is accepted on March 19.

On April 1, service is inaugurated to Chicago and Miami and that to Mexico City is rerouted via Rome and New York.

President Sadat and Prime Minister Begin, in a joint April 5 statement, announce the establishment of reciprocal commercial air services between Egypt and Israel.

An order is placed for two B-767-200ERs.

Twelve persons are wounded in the abortive April 16 attempt by a Palestinian guerrilla group to take over a company jetliner at Brussels.

An unprofitable destination, Mexico City is dropped from the route network in October. As the result of continuing loss, Raphael "Rafi" Harlev, former deputy of the Israeli Air Force, becomes acting president on July 3; Chairman Ben-Ari is replaced by Avraham "Buma" Shavit on November 13.

New agreements are reached with company pilots and flight attendants in December and only 90 employees are laid off.

Another B-747-258B is delivered on December 21.

On the year, freight drops by 1,000 tons and passenger boardings rise to 1,126,510. Still, expenses led by fuel costs cause a net loss of \$23.9 million.

Technical difficulties and a failure to complete arrangements prevent the inauguration of reciprocal airline services to Egypt in January 1980. A substantial cost-cutting program is, however, undertaken; cost reductions, new marketing strategies, and nearly 600 staff cuts are effected.

Company officials receive loud protests on February 18 when they announce plans to change stewardess uniforms.

A B-707-458 is sold to **Zaire Aero Service, S.A.**, also in February.

On March 3, regularly scheduled, roundtrip service is inaugurated to Cairo, the only Arab nation into which El Al flies.

Also in March, the carrier terminates its association with **Arkia Israel Airlines, Ltd.**, the domestic airline.

Itzhak Shander is named acting president on April 1 and orders are placed for two more B-767-258s and two B-737-258As.

Maintenance workers take an "organized holiday" on May 25 over their wage dispute with the company, grounding all departing flights from Tel Aviv.

An October 15 consultant's report recommends additional layoffs, leading to additional unrest. In October, two B-737-2M8s are leased for two years from **Trans-European Airways, S.A.**

A new labor agreement is signed on December 23 resulting in many saved jobs. Freight traffic increases to 61,000 tons and passenger traffic increases to 1,250,602. This year's net loss is the worst yet, \$98.7 million.

Airline employment in 1981 stands at 4,928.

A bomb explodes in the carrier's Istanbul office on May 18, but no injuries are reported. In July, the carrier's B-747-124F is wet-leased to **AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.)**.

Among concessions made by Prime Minister Begin on August 4 to minority religious parties, whose support he needs to form a government, is the eventual cessation of El Al flights on the Jewish Sabbath, a move that will cost the airline as much as \$50 million per year.

In October, scheduled service is begun to Eilat. Cargo is up by 5,000 tons but enplanements drop to 1,178,350. On revenues of \$443 million, the loss is \$47.4 million.

The carrier suffers a year of turmoil in 1982.

On April 23, a B-707-331B purchased from **Trans World Airlines** is delivered.

On May 2, the Israeli cabinet decides, in principle, that El Al cannot operate in Israel on the Jewish Sabbath or other Jewish religious holidays.

The first **Trans-European Airways, S.A.** B-737-2M8 is returned in June, the same month in which Boston joins the route network.

The army's invasion of Lebanon in July hurts the tourist market. Also in July, the **AVIANCA Colombian Airlines (Aerovias Nacionales de Colombia, S.A.)** lease is fulfilled and the Jumbofreighter is returned.

Company employees and other labor groups demonstrate after a parliamentary committee approves by an 11-10 vote the cabinet's decision the previous May to ground the carrier on the Sabbath and holidays. Four demonstrators are hurt and eight arrested after August 25 scuffles with police. In solidarity with El Al employees actions against the government's grounding of flights on the holy day, General Labor Federation airport workers Chairman Shmuel Azulai announces on August 30 that his workers will strike Ben Gurion International Airport at Tel Aviv on the Sabbath. El Al employees now fear the loss of their jobs.

On September 2, the Supreme Court bars the government from carrying out its decision to ban El Al flights on the Sabbath and Jewish holidays. The ban will, however, be instituted. As the result of a steward's strike, the carrier is shut down on September 12 and placed into financial receivership; it will not fly passengers for the remainder of the year.

The second **Trans-European Airways, S.A.** B-737-2M8 is returned on September 30.

Israel's unions begin a 24-hour general strike on October 14 to protest the government's ultimatum that the carrier will be sold or liquidated unless its workers accept management's principles for restructuring the company. Five days later, on October 19, the airline's directors ask the government to liquidate the airline because its employees give only limited support to management's reorganization plan and refuse a contract with those terms, which include significant layoffs.

Government tourism officials on October 24 cite the carrier's strike as a major factor in a recent sharp decline in the number of visitors to Israel. However, on the very same day the Israeli cabinet backs El Al's directors in their decision to dissolve the airline. In protest of the government's decision to liquidate the airline unless the workers accept a reorganization under which many of them would be laid off, El Al employees force the closing of Ben Gurion International Airport on October 27 by blocking its runways with jetliners. The airport reopens the next day after the government agrees to talk with worker representatives.

El Al's shareholders, on November 25, vote to liquidate the strike-disrupted airline, now with a deficit of some \$300 million. Two days later, the employees obtain a temporary injunction barring management from putting the carrier into voluntary liquidation as a prelude to the establishment of a new airline.

On December 5, Jerusalem District Court Judge Yaakov Bazak appoints Amram Blum official receiver and provisional liquidator. The Histadrut Labor Federation, on December 28, signs a new labor agreement on behalf of El Al's employees, but legal obstacles prevent an immediate reversal of the liquidation order. Since 1979, the company has endured a total of 69 strikes.

Passenger bookings are still up, to 1,254,703 and freight climbs by 2,000 tons. This year the loss is \$32.6 million.

Following new labor agreements and with renewed government support, Judge Bazak reverses his liquidation order on January 12, 1983, and, under Acting President Harlev, preparations are made to resume passenger and cargo flights. As part of the arrangement, the workforce is reduced 20% during the year to 4,830. The government drops its plans to sell the airline to private concerns on January 17, the same day the carrier resumes flying after striking pilots return to work under court-sanctioned threats of dismissal.

The two purchased B-737-258s are delivered next day.

The first B-767-258ER is delivered on July 12.

A B-707-328B is leased for six months from TRATCO on July 15 and Madrid becomes a new destination in August.

The second B-767-258ER arrives at Tel Aviv on September 13.

By the end of September, the airline is operating 95 frequencies per week to 26 destinations.

Passenger boardings for the June 30 reporting period have declined to 1,017,000 and freight is off by 2,000 tons. The largest net loss in company history is recorded: \$123.3 million.

Airline employment falls in 1984 to 4,123 and a machinist's strike begins on March 16, with support from American labor.

Two B-767-258ERs are delivered (March 26 and June 1). On March 26, one of those received in 1983 flies the 5,800 miles from Montreal-Tel Aviv with 90 passengers aboard, becoming the first twin-engine aircraft to fly a North Atlantic commercial passenger service under the "60-minute Rule" Extended Range Twin-Engine Operations (ETOP) requirement of the U.S. FAA. The inaugural flight requires 10 hrs. 52 min.

On June 17, scheduled service is undertaken to Los Angeles and renewed to Chicago.

Passenger boardings this year jump 15.9% to 1,311,000, and freight skyrockets 42.8% to 616.2 million FTKs. Although expenses are \$448.9 million on revenues of \$434.6 million, the operating loss is down to \$14.3 million and a net profit of \$1.6 million is realized.

The workforce remains level in 1985. The fleet now comprises 6 B-707-320s, 2 B-737-258As, 8 B-747-258Bs, and 4 B-767-258ERs.

The B-767-258ERs are placed on the Los Angeles and New York runs in February. Twice-weekly service to Manchester, England, begins on April 22.

On May 15, the machinist union strike enters its 15th month. As the result of a growing strain between the Israeli and U.S. labor movements, Prime Minister Shimon Peres intervenes in an attempt to force a settlement.

Enplanements accelerate 5.3% to 1,515,000 and cargo jumps 10.2% to 678.93 million FTKs. The net loss is \$9.7 million.

In 1985, the carrier ranks as the 17th largest airline in the world in terms of freight haulage and 17th in terms of productivity.

Service is launched to Toronto on April 2, **1986** as an extension of the Montreal route.

On April 17, a carefully concealed bomb, made up of 10 pounds of plastic explosive, is discovered at London (LHR) by El Al security men in a bag carried by an Irish woman, Anne-Marie Murphy. She is about to board a Jumbojet scheduled to leave for Tel Aviv as Flight 16, with 340 passengers. The plane departs without her.

The next day, British police arrest Mrs. Murphy's fiancé, Jordanian Nezar Hindawi, after she tells them that it was he who took her to the airport and gave her the bag. Murphy is released on April 19 after two days of questioning, but Hindawi is held. On April 21, Hindawi's brother is arrested in West Germany in connection with an April 5 discotheque bombing, which triggers an American air raid on Libya.

A tentative agreement is reached between the machinists and the airline on May 30 after Prime Minister Peres and AFL-CIO President Lane Kirkland intervene to end the job action. Acceptance of the agreement is ratified by union membership on July 14.

As a conveyer belt is loading suitcases and other luggage into a B-747-258B being prepared at Madrid's Barajas Airport on June 26 for a service to Tel Aviv, a bomb in one of the pieces of baggage explodes; a total of 13 people are injured, three seriously.

Nezar Hindawi, the Jordanian involved in the April bombing plot, is convicted in London on October 14 and sentenced to 45 years in prison. The same day, the British government, charging there is evidence of Syrian complicity in the failed attempt, breaks off diplomatic relations with Syria, a move reciprocated the same day.

A B-707-458 is sold to **Deutsche Lufthansa, A.G.** for museum purposes on November 20.

Passenger boardings climb 4.7% this year to 1,511,500, but cargo is down by 1.3% to 670.1 million FTKs. The loss is \$6.7 million.

In terms of traffic and profit, **1987** is a good year for the carrier.

The company begins to target churchgoers in the U.S. for trips to the Holy Land, advertising tour packages on Pat Robertson's *The 700 Club*.

A B-747-238B, formerly flown by **Qantas Airways (Pty.), Ltd.**, is delivered to El Al on November 16 and the first B-757-258 arrives on November 25; it is placed in service to Brussels on December 20. Meanwhile, the second B-757-258 arrives at Tel Aviv from Seattle on December 17.

Passenger boardings for the year accelerate 13.3% to 1,707,366, freight soars to 139,000 tons, and, for the first time in a decade, a net profit is recorded: \$15.2 million atop a \$34.9-million operating gain. These figures are made on revenues of \$567 million.

After flying its last service between Madrid and Tel Aviv, a B-707-358B is sold to Jet Aviation Components and Aircraft on April 15, **1988**.

On May 7, a second B-747-238B is purchased from **Qantas Airways, (Pty.), Ltd.**; it will be leased back to its former owner for six months in September.

Also in May, the carrier records its longest nonstop flight, the 7,000-mi. Los Angeles-Tel Aviv service, traveled in 13 hrs. 41 min.

A third B-757-258 is delivered on July 19.

During the year, an agreement is signed with **LOT Polish Airlines, S.A.** for pooled service to Poland. Following the completion of an Israel-Hungary bilateral agreement, special nonstop flights to Budapest begin on November 12.

Airline employment is now 4,174. Freight grows to 146,000 tons, enplanements are level, and a second consecutive net profit (\$18.2 million) is reported.

Aeroflot Soviet Airlines and El Al officials secretly explore cooperation in January **1989**. Service is started to Stockholm on March 13, Bu-

dapest on March 27, and Warsaw on March 28. On April 11, operations are launched to Zagreb.

In late June, a B-757-258 brings injured to Israel from Yerevan, Armenia.

In August, the government announces plans for the airline's privatization.

Direct scheduled flights between Eilat and Europe, without an intermediate Tel Aviv stop, are expanded in October.

In the fall, an agreement is reached with the U.S. new entrant, **North American Airlines**, whereby the American carrier would act as an El Al feeder, employing two B-757s leased by the Israelis.

On November 18, the carrier closes off the transit route for thousands of Soviet Jews seeking to "vacation" in Israel because of a landing rights dispute with Cyprus.

In December, **Aeroflot Soviet Airlines** and El Al sign reciprocal authority agreements.

A total of 1.7 million passengers are flown on the year, along with 165,000 tons of cargo. Airline employment is 4,125 and the net profit is \$24.6 million.

On January 1, **1990**, with the Cyprus impasse resolved, the first charter flight is made to Moscow to begin airlifting Russian Jews to Israel in Operation Exodus.

On January 22, **North American Airlines** begins New York-Los Angeles B-757-230 flights pursuant to its agreement with El Al. In July, it is announced that El Al will purchase 24.9% shareholding of Daniel McKinnon's U.S. feeder, in a purchase worth \$400,000.

The airline is the major beneficiary of Mideast service suspensions by other carriers following Iraq's August 2 invasion of Kuwait.

On October 21, in the face of Mideast turmoil, the company introduces a television advertising campaign that relies on historical footage concerning the Zionist movement.

Tel Aviv to Prague and Berlin flights begin, also in October.

With the tourist season over, the company is able to shift some emphasis to cargo; two B-747-258s are converted to combis.

As a result of the crisis in Kuwait, the Israeli operator ends up the year with a huge 76% increase in passenger boardings to 3,109,357. Freight also does well, climbing 71.4% to 1.54 billion FTKs. A net \$14.1-million profit is earned.

Company employment inches downward by 0.4% in **1991** to 3,430 and the fleet now includes 4 B-747-258Bs, 3 B-757-258s, 2 each B-737-258As, B-747-258Cs, B-757-258ERs, B-767-258s, and B-767-258ERs, and 1 each B-707-358C, B-747-124F, B-747-238B, and B-747-258F. Orders are outstanding for two B-747-458s.

During Operation Desert Storm and the Iraqi Scud missile attacks of January and February, most of the fleet is kept away from its Tel Aviv base at night. With traffic down because of the Gulf War, President Harlev, long since confirmed in his post, again targets fundamentalist Christians in the southern U.S., offering them deep discount Holy Land tour packages.

During May 24-25, in Operation Solomon coordinated between the airline and the Jewish Agency for Israel, 14,200 Jews are airlifted to Israel from Ethiopia. Thirty-three company aircraft make a total of 10 flights each into besieged Addis Ababa after U.S. President George Bush personally obtains Ethiopian government permission for the evacuation. One B-747-258C, converted to a special "high density" seating configuration in 12 hrs., lands at Ben Gurion International Airport on the first day with 1,086 refugees aboard, a new world's record for passengers carried. During the flight, three babies are born aboard, with the births attended by cabin crew and doctors aboard.

Service is initiated to Moscow and St. Petersburg during the summer, while frequencies on other routes are increased. With the decades-old ban on flights over Soviet airspace lifted, El Al officials rush in their quest for routes to Beijing and other Far East destinations.

Business-class seating is increased. A frequent flyer program is established; however, a \$35 membership fee is charged and mileage awards must be accrued within a year.

A new 22,000-sq.-ft. cargo terminal is opened at Miami (MIA) in December that allows the carrier to expand its freight business into Latin America.

Customer bookings slip 0.9% to 1,750,670, but cargo is up by 5.8% to 991.48 million FTKs. Revenues increase 12% to \$877.6 million and a net profit of \$38.9 million is generated atop operating gain of \$30.7 million.

The workforce grows 3% in **1992** to 3,533.

It is revealed early in the year that, since 1989, over 400,000 Russian Jews have arrived at Tel Aviv; President Harlev now pledges that the airline will carry immigrants from any point in the world on 12-hr. notice.

Service from New York to Tel Aviv is expanded on March 29 from 8 to 11 weekly nonstops. Scheduled weekly flights begin to Riga (Latvia) and to the Anatolia region of Turkey in March, to Sofia (Bulgaria) in April.

On June 21 the number of frequencies between New York and Tel Aviv reaches 21 and, simultaneously, the route from Los Angeles to Tel Aviv is boosted from three weekly trips to four.

Weekly flights to Baltimore (BWI), Boston, Chicago, and Miami from Tel Aviv begin on June 22.

During the summer, the thrice-weekly roundtrip charter service to Nagoya is converted into scheduled frequencies.

In September, the company enters into a code-sharing agreement with **VASP (Viacao Aerea São Paulo, S.A.)**; the Brazilian carrier purchases blocks of seats on El Al return flights between Brazil and Israel.

While climbing away on an all-cargo service to Tel Aviv on October 4, Flight 1862, a B-747-258F with three crew and one passenger suffers the separation from its wing of the No. 3 engine and pylon. As the power plant is falling, it collides with the No. 4 engine, breaking it loose as well. Unable to recover and return to Schiphol Airport for an emergency landing, the Jumbojet crashes into a crowded 10-story apartment complex in the Bijlmermeer section of Amsterdam. All aboard the freighter are killed, along with 47 people on the ground. This is the first crash in the Israeli company's 44-year history (excluding the L-049 shot down in 1955) and the worst in The Netherlands history.

The British Broadcasting Corporation will report on October 1, 1998, that the freighter was transporting a shipment of the chemical dimethyl methylphosphonate (DMPP) used in building materials and, on a more sinister note, in the manufacture of the nerve gas, sarin. The chemicals, from a Pennsylvania concern, were headed for the Israel Institute for Biological Research in Ness Ziona, near Tel Aviv. Although Dutch government officials were told of the chemical in the shipment, Israeli officials will deny rumors of them. Denials will not be disproved until newspapers in The Netherlands publish the plane's documents six years later.

The U.S. southwestern market is opened on October 20 in cooperation with **North American Airlines**. Passengers checked in at Dallas (DFW) receive security and are flown to New York (JFK). There they transfer directly to an El Al flight at the next gate for a final leg to Tel Aviv. The return service operates similarly, in reverse.

Passenger boardings rise 11.8% to 1,950,319 as freight falls 6.1% to 928.15 million FTKs. Revenues swell 6.8% to \$937.8 million and the operating surplus is \$33.8 million. There is a net gain of \$31.5 million.

The employment gains made the previous year are all but lost in **1993** when the payroll is cut 2.9% to 3,430.

The fleet of President Harlev and Vice President-Operation Amos Amir now includes 5 B-757-258s, 3 each B-747-258Bs and B-757-258s, 2 each B-737-258As chartered to **Arkia Israel Airlines, Ltd.**, B-757-258ERs, B-767-258s, B-767-258ERs, and 1 each B-707-358C, B-757-147F, B-757-238B, and B-747-228F leased from **Cargolux Airlines International, S.A.** Everything having to do with passenger and customer services is combined into a single large department under the leadership of Vice President-Customer Services Daniel Kesten.

Destinations served in North America include New York, Los Angeles, Miami, Montreal, Boston, and Toronto. Flights are also made to the international markets of Amsterdam, Antalya, Athens, Bangkok,

Barcelona, Beijing, Berlin, Bombay, Brussels, Bucharest, Cairo, Cologne, Copenhagen, Johannesburg, Manchester, Marseilles, Moscow, Munich, Nairobi, Paris, Rome, Vienna, Warsaw, Zagreb, and Zurich. As in previous years, many of the regional destinations are offered as continuations from Tel Aviv.

On October 18, the carrier begins to mount special safety cameras on all of its aircraft.

Privatization fails to occur on schedule.

Customer bookings increase 10% to 1,874,000 while cargo jumps 5.4% to 790.93 million FTKs. Net profit falls to \$7.7 million.

The number of employees is increased by 3% in **1994** to 3,533 and the first B-747-458 is delivered in April, followed by the second at the end of May.

The U.S. DOT proposes, on June 2, the reduction in the number of El Al flights between New York and Israel in retaliation for the Israeli government's refusal to allow **World Airways** to fly the same route.

Transport Minister Yisrael Kessar announces on June 6 that, after the airline is removed from its 13-year-old receivership in October, the government will divest 51% of its stake, as shares will be sold on the Tel Aviv and overseas stock exchanges. The government itself will retain a "golden share" to protect vital state interests while special stock purchase rights will be offered to employees. This scheme is delayed by government bureaucracy.

Plans are also made to extend the route network to New Delhi, Seoul, and Milan and flights begin to Hong Kong.

Late in the year, the company joins with **Air Holland Charter, B.V.**, to form the joint venture charter airline **Starling Airlines**. Owned 52% by the Netherlands carrier and 48% by El Al, the new entrant will begin flying inclusive-tours to Mediterranean destinations with **Air Holland Charter, B.V.** aircraft early in the new year.

Passenger boardings jump 15.7% to 2,481,291 while freight rises by 7.8% to pass the one-billion mark at 1.03 billion-ton kilometers. Revenues swell 11.7% to \$1.05 billion and operating expenses jump just 10.3% to \$1.03 billion. Consequently, an operating gain of \$16 million is shown while net profit grows to \$14 million.

There is no change in the workforce during **1995**.

The receivership ends in February, when Yosei Ciechanover, former chief of the Israeli Discount Bank, is appointed to lead a new board. In addition to the company's two weekly roundtrips from Tel Aviv to Newark via London, El Al initiates a nonstop service from Tel Aviv to Newark on March 26.

On June 12, weekly nonstop roundtrips commence between Tel Aviv and Chicago (ORD) and Miami. Additional frequencies are initiated to Milan, St. Petersburg, and Los Angeles. The number of weekly B-747-258B flights to New Jersey is increased to four on June 18 with the addition of a second nonstop roundtrip.

During the winter holiday season, flights are offered to Tel Aviv from Atlanta, Dallas, and Orlando via New York (JFK).

Weekly service between Tel Aviv and Tashkent, Uzbekistan, begins on November 1.

Enplanements accelerate 18% to 2,928,804 and cargo continues its climb, up 13.7% to 1.17 billion FTKs. Operating income swells 17.5% to \$1.21 billion and a net \$15-million profit is recorded.

Airline employment is reduced by 3.6% in **1996** to 3,407.

The all-owned fleet includes 4 B-757-248ERs, 3 each B-747-258Bs, B-747-258Cs, B-747-458s, and B-757-258s, 1 of which is chartered to **Arkia Israel Airlines, Ltd.** Also operated are 2 each B-767-258ERs, B-747-245Fs, and B-737-258As, with Arkia also leasing one of the latter, plus 1 each B-727-147F, B-747-238B, and B-767-258.

On March 17, President Harlev resigns over the government's failure to privatize the carrier. Also in March, **Arkia Israel Airlines, Ltd.** DHC-7-102s take over El Al's scheduled flights to Cyprus.

Daily commercial service is inaugurated between Israel and Jordan on May 25 in cooperation with **Royal Jordanian Airlines**.

When the summer season begins on June 1, the company introduces new weekly nonstop roundtrip frequencies from Tel Aviv to Atlanta,

Orlando, and San Francisco. The company is now the only carrier offering nonstops from Tel Aviv to Miami, Chicago, and Los Angeles.

On July 10, the carrier inaugurates Tuesday over and Wednesday back nonstops between Tel Aviv and Atlanta, just in time for the Summer Olympic Games.

A block-seat and code-sharing agreement is signed with **Finnair O/Y** in July covering services on a route from Tel Aviv to Helsinki.

During October, Joel Feldschuh, Champion Motors CEO and close friend of the new prime minister, Benjamin Netanyahu, is named president.

On November 1, the company prepares to join with **American Airlines** in offering dual-designator flights from Tel Aviv to Newark and Chicago and domestic code-sharing on American frequencies beyond those gateways to Miami and Los Angeles. The alliance becomes embroiled in U.S.-Israel politics and is not effected.

Customer bookings dip 1.6% to 2,880,596 but 1.19 billion freight FTKs are operated, a 1.2% increase. On \$1.2-billion operating revenues, the previous year's net gain becomes an \$83-million loss. Much of the loss is laid to monetary problems and higher fuel costs.

The employee population is reduced by 2.3% in 1997 to 3,443.

In January, President Feldschuh announces that the airline is in a negative cash flow situation. Consequently, 150 permanent staff are laid off (the first staff cuts since 1982) and a 7% salary increment is postponed.

As the basis for a package tour from Histour-Altiv, El Al in February offers roundtrip fares of \$617 to the U.S., \$343 for night flights to London, Paris, Amsterdam and Rome, and \$409 for day flights to these and a host of other European destinations.

In the wake of the huge 1996 net loss, the board of directors on April 1 orders President Feldschuh to prepare a detailed strategic recovery plan. Components of the plan include improved customer service, a separate profit center for cargo, conclusion of the **American Airlines** alliance, fleet renewal, and a renewed effort to overturn the 15-year-old government ban on operations during the Jewish Sabbath. The principal arguments against the latter are financial; the company is losing \$50 million in profits per year by having a billion dollars worth of equipment idle for 2½ days per week.

While a government panel works to determine the best method and timing for privatization, the issue of flights on the Jewish Sabbath reemerges. Transport Minister and orthodox Jew Yitzhak Levy announces plans to find a way to limit Sabbath operations into and out of Israel by foreign carriers as a way of keeping El Al grounded from dusk on Fridays to dusk on Saturdays. No such action will be possible.

Also in April, the airline joins with the Indian travel agency JTB Travels to market El Al's holiday product "Top of Israel," throughout the subcontinent. The product offers a selection of packages that may be paid for in rupees.

A government panel recommends on June 2 that Israel sell off its entire shareholding in a 1998 offering; 10% shareholding would be allowed to company employees at a discount with the remainder sold to the public. Following privatization, the new shareholders would be allowed to vote on whether or not to retain the ban on Sabbath service.

On June 10, national aviation officials agree to allow **Tower Air** to begin new roundtrips from New York to Tel Aviv during the summer. In return, the U.S. DOT grants the Israeli carrier permission to operate up to eight monthly roundtrips from Tel Aviv to Baltimore (BWI).

At the end of July, President Feldschuh provides additional information on company privatization plans. Sometime within the next 18 months, the company will go private by trading all of its stock at one time on the Israeli stock exchange, with no limitation on international ownership. The only requirement seen is that company management must remain Israeli. In addition, plans for fleet modernization and service upgrades are also communicated.

Aimed at leisure travelers, The Loyal Traveler Club frequent flyer program is introduced during the fall. It complements the company's principal mileage award plan Matmid ("steady") already in place.

It is noted in a letter in the September-October 1997 issue of *Airways* that El Al now flies one of the longest routes in the world. Its weekly

eastbound-only, 7,575-st.-mi. nonstop from Los Angeles to Tel Aviv is flown during the northern summer season in 15 hrs. 35 min.

Company management in October issues a "vision statement" designed to excite employees to the possibility of vastly improved customer services. As part of the concept, all will attend "quality service" workshops. It also begins to upgrade its first-class and business-class seating. First-class passengers will receive complementary ground transport between Ben Gurion International Airport and Israel's major cities.

Having previously only hired male ex-Israeli Air Force pilots, the company on December 1 agrees to accept applications from both men and women, including those who have not served in the military.

On December 12, a large fire breaks out at Terminal One of London (LHR) causing cancellation of several company departures.

Passenger boardings total 2,896,000 while freight inches up 1.1% to 1.104 billion FTKs. Operating revenues accelerate 2.1% to \$1.22 billion, while expenses decline 3.7% to \$1.2 billion. Although a welcome \$13.5 million operating profit is generated, there remains a \$57-million net loss.

Airline employment stands at 3,417 in 1998 and the fleet, all of which is Stage III certified, includes 26 airplanes: 13 B-747s, 9 B-757s, and 4 B-767s.

Plans are announced in January for the possible purchase of up to five Next Generation B-737-700/800s.

During the first quarter, new Transport Minister Shaul Yahalom insists on maintenance of the revenue-crippling ban on Sabbath flights and kills another privatization proposal that does not contain it.

All El Al flights between Israel and the U.S. become nonsmoking on March 1. In March, the company, together with **Arkia Israeli Airlines, Ltd.**, begins discussions concerning the formulation of a joint low-fare company for charter services. Such an operation would offer the two carriers a chance to "get around" the government's Sabbath restrictions.

A previously announced order is confirmed in April for two Next Generation B-737-700s and three B-737-800s. At the same time, the company wet-leases a McDonnell Douglas MD-11 from **World Airways** to supplement its own fleet during the busy summer tourist season. In the United States, meanwhile, affiliate **North American Airlines** places its own B-737-8Q8, chartered from International Lease Finance Corporation (ILFC), into service on its regularly scheduled El Al sub-service flights.

On June 2, it is reported in the newspaper *Haaretz* that the government will privatize 49% of the state carrier and conduct a stock sale on the Tel Aviv Stock Exchange in the near future. Meanwhile, the Finance Committee of the Knesset, Israel's parliament, appoints a special sub-committee, chaired by Amnon Rubinstein, to review and track the process.

As of July 1, all El Al flights, worldwide, are smoke-free.

At a meeting of the Knesset Finance Committee's privatization sub-committee on July 22, Chairman Ciechanover reveals that the U.S. DOT is imposing difficulties on the company. It is withholding approval of El Al's planned strategic alliance with **American Airlines** unless Israel agrees to allow U.S. carriers to fly unrestricted into Israel, including on Saturdays. At the same time, the chairman notes that **Deutsche Lufthansa, A.G.** has also refused to enter into a code-sharing agreement because of El Al's Saturday flight ban.

In the *News*, the Internet news roundup from M2 Communications, reports on August 26 that the company will hire flight attendants aged over 30 "for the very first time."

To mark the Jewish Day of Atonement, all airports and businesses in Israel are closed on September 30.

Weekly B-767-258ER roundtrips from Tel Aviv to New Delhi commence on October 27.

Employing an ex-**Cargolux Airlines International, S.A.** B-747-271Cs, **Atlas Air**, with whom the El Al's cargo division has signed a long-term contract, begins to fly transatlantic air freight services at the end of the month on behalf of El Al.

On November 9, the carrier becomes the first in the world to provide money-changing services in-flight. The Fly&Change service, offered on select flights from Tel Aviv to Paris, London, Frankfurt, and Zurich, allows passengers to purchase up to \$500 worth of the local currency of their destination.

Enplanements for the year inch up 0.4% to 2.92 million, while freight traffic falls 1.2% to 1.22 billion FTKs. Revenues rise 1.9% to \$1.24 billion, while costs dip 0.2% to \$1.2 billion. The operating profit climbs to \$38.7 million, while a net \$22.7-million profit is reported.

On January 12, 1999, the U.S. Supreme Court, rules that international air passengers cannot force airlines to pay damages under local laws for injuries not covered by the Warsaw Convention's Montreal Protocol No. 4, ratified by the U.S. during the previous fall. The 8-1 decision in *El Al Israel Airlines v Tseng*, 97-475 throws out the \$5-million New York State case of clinical nutritionist Tsui Yuan Tseng against El Al. The litigant claims she was inappropriately touched by a female security officer during a May 1993 preflight body search at New York (JFK).

The continuing prohibition against flights on the Jewish Sabbath brings a government investigation of alleged violations early in February. El Al's lawyers ask Israeli Attorney General Elyakim Rubinstein on February 8, to begin legal steps to end the government ban on its flying on Shabbat, the Jewish Sabbath.

After El Al publishes advertisements claiming it is being discriminated against because of the no-fly rule, Israeli Transport Minister Yahalom receives complaints that the flag carrier has been transporting cargo to Europe on the Sabbath using flight numbers of the privately owned **CAL Cargo Air Lines, Ltd.** to which it leases aircraft. These charges come just days before Yahalom is to decide whether or not to follow an earlier special panel recommendation to grant CAL its own license to fly in competition with El Al. In an attempt to thwart El Al's efforts to block it from getting its own license to fly scheduled freight operations, **CAL Cargo Air Lines, Ltd.** offers a Shabbat compromise. In return for authority, it will respect the status quo and not launch new flights on the Jewish Sabbath.

A B-747-258B overshoots the runway while landing at Amsterdam on February 9; the accident occurs in slippery conditions and results in the Jumbojet's nose gear sinking into the ground off the pavement. The incident has a greater impact on **KLM (Royal Dutch Airlines, N.V.)**, forced to cancel 25 intra-European and 4 intercontinental flights before the runway can be reopened.

On February 10, the airline again asks the Israeli Attorney General to allow the airline to fly on the Sabbath. Given that non-Jewish carriers are able to operate on the Sabbath, El Al believes itself to be the victim of discrimination. Also, in light of the Transport Ministry's recent ruling that El Al is not Israel's sole international airline, the major requests that a three-year waiting period be granted before other Israeli carriers are allowed to compete with it on international routes.

With citizens having complained for years about chronic illnesses, the parliament of The Netherlands opens an investigation into the 1992 crash of an El Al freighter at Amsterdam. As a result of the hearings and constant local media attention to the disaster, the company's offices in The Netherlands have begun to receive an increasing number of anti-Semitic phone calls and slurs. On February 11-12, Israeli Transport Minister Yahalom and El Al President Feldschuh demand that Holland's government take immediate steps to halt the attacks on the carrier before something serious occurs. Feldschuh also indicates that the airline is considering a reduction in the number of its flights to The Netherlands because of the "anti-Semitic atmosphere" in that country.

Although the cutback does not occur, the airline has suffered a public relations disaster in Holland. To help improve its tarnished image, the carrier, on February 18, launches a massive media offensive of its own. It even has a name: "Facts and Fiction, October 04, 1992." The next day, *The Jerusalem Post* reports that the airline has found a cargo manifest supporting its account that the Boeing 747F that had crashed at Amsterdam six years earlier was not carrying any dangerous substances.

Workers from El Al petition the Israeli Supreme Court, also on February 19, to reverse the government's decision forbidding the airline from flying on Shabbat and Jewish holidays.

It is announced on February 22 that the carrier will inaugurate twice-weekly roundtrips on June 21 between Rome and New York (JFK).

The first of three B-737-858s is delivered on February 24 in ceremonies held at Seattle.

Two flights from Tel Aviv to New York (JFK) must be cancelled on March 7 when the aircraft crews call in sick.

On March 12, Dutch Deputy Prime Minister Annemarie Jorritsma publicly accuses Israel of attempting to block her government's investigation of the 1992 Jumbojet crash. It has been claimed that El Al has held back documents showing the Boeing freighter was flying components for poison gas in its cargo.

Having received warnings from security agencies of a possible terror attack by Kurdish separatists against the airline in Istanbul, El Al cancels its March 19 service to and from Tel Aviv. Approximately 80 passengers with tickets to board those flights are referred to other airlines.

The U.S. Customs Service, on March 22, approves the release of the house airway bills, a written contract between a New York consolidator and its client made without the airline's involvement, which, in fact, the airline did not have in its files. Tipped to this development, the Dutch parliament agrees to a committee request to postpone publication of its findings in the 1992 disaster from March 31 to April 22. On March 26, El Al holds a press conference to announce that it is turning the long-sought airway document over to authorities in The Netherlands. It is now expected to be completely cleared of any allegations of cover-up or wrongdoing in the 1992 Amsterdam disaster.

Israel offers support to NATO, which, on March 24, had begun an aerial assault on Yugoslavia designed to change Belgrade's policies toward the ethnic minorities in the province of Kosovo. As refugees stream into Macedonia and Albania following the start of Operation Allied Force, a field hospital is sent to Skopje.

The company now celebrates its fiftieth anniversary. A new color scheme is unveiled, with a former **Air France** B-767-27EER the first to wear the new livery.

The carrier is appointed by the Vatican as its "Official Airline to the Holyland" for the year 2000. Arrangements are made to commence bi-weekly nonstop service from Rome to New York this summer. For American tourists en route to Israel, a free stopover at Rome will be provided.

Under contract, a B-737-258A is dispatched to Skopje with supplies on April 12 and ferries back 112 ethnic Albanian refugees to Tel Aviv.

The April 19 issue of *Business Week* reports that The Boeing Company and Airbus Industrie are both intensely lobbying the airline, which will choose a Next Generation long-haul aircraft at month's end, either the B-777 or A330/340.

A fourth B-747-458 is delivered at Seattle on May 1; Executive Vice President Mensale Terem, accompanied by the first flight attendants to wear the airline's new uniform, presides over the christening of the *City of Jerusalem*. The Jumbojet will be dedicated to the nonstop transatlantic routes to New York (JFK/EWR) and Los Angeles.

Having already begun marketing its Rome stop, company officials are somewhat surprised when, at the beginning of May, the Italian civil aviation authority prohibits the carrier's flights between New York and Tel Aviv from unloading or picking up passengers at the Eternal City. Under the impression that the flights would be possible under a previous air agreement, El Al appeals to the Italian courts on May 13 to overturn the decision.

First announced on April 27, a reciprocal frequent flyer agreement with **American Airlines** takes effect on May 17.

On May 21, the Israeli government requests that the carrier delay its decision concerning a \$900-million purchase of new aircraft.

A block-seat code-sharing agreement is signed with **LOT Polish Airlines, S.A.** on August 30. Under its terms, the two will sell seat groupings on each other's scheduled services between Warsaw and Krakow and Tel Aviv beginning in mid-September.

During the fall, officials of the airline weave back and forth attempting to decide whether to purchase Airbus or Boeing equipment. In a meeting with Israeli Foreign Minister David Levy on December 8, U.S. Secretary of State Madeleine Albright is blunt. It will be difficult, she reports, to obtain additional congressional funding for Israel if El Al spends its reequipment money in Europe rather than America. The next day, El Al signs a recently offered proposal from Boeing under which the flag line will expend \$400 million for three B-777-285ERs, which will be delivered in 2001.

The last of five Next Generation B-737-858s to be received this year is delivered on December 14.

Passenger boardings climb 7.3% to 3,139,000 while freight traffic falls 8.5% to 1.09 billion FTKs. A steep rise in fuel costs forces the net profit down to \$10 million.

The workforce at the beginning of 2000 totals 3,539. In an effort to attract additional Arab customers, the carrier announces, on January 6, that it will name one of its three new B-777-285ERs *Nazareth* after the largest Arab city in Israel.

A code-sharing agreement is signed with **Swissair, A.G.** on February 4 covering frequencies by the two airlines between Switzerland and Israel. At the beginning of March, company officials meet with executives of **Tower Air** to discuss ways in which the Israeli carrier, through cooperation or investment, can help the financially distressed U.S. carrier, which was forced to file for Chapter XI bankruptcy on February 29. No decisions are immediately taken.

Operating as Flight 2000, the carrier's newest B-747-458, flown by Capt. Avraham Tirosh and Flight Officer Barak Reshef, transports Pope John Paul II back to Rome on March 24 following his Holy Land pilgrimage; the Pontiff had arrived in Israel, per tradition, via **Alitalia, S.p.A.** First- and business-class service on the flight is provided by an Italian-speaking El Al cabin crew of 19 Jewish, Christian, and Muslim flight attendants.

The code-sharing agreement with Swissair begins on March 26 and is implemented on the thrice-weekly Swissair roundtrips between Geneva and Tel Aviv and the 14 return flights made by the carrier from Zurich and Tel Aviv. Also included are the six-times-a-week El Al roundtrips between Tel Aviv and Zurich and the thrice-weekly return flights from Tel Aviv to Geneva.

The March 30 issue of the *Al-Itihad* newspaper reports that the Israeli government has begun subsidizing up to 50% of the cost of tour packages for those Israeli citizens wishing to visit various approved Arab countries, particularly Qatar and Oman, in cooperation with selected foreign tourist agencies. El Al and **Royal Jordanian Airlines** immediately begin to compete for this new Jewish business, with the former cutting its tariffs by up to a third.

To pick up the slack in Israel-U.S. frequencies caused by the termination of scheduled service by **Tower Air**, El Al, on June 18, boosts its weekly North American return service from 21 to 33, with 27 of the frequencies operated into either Newark or New York (JFK). Many are operated under contract by **World Airways**.

While en route from Newark to Tel Aviv on the evening of July 18, Flight 18, an MD-11 operated under contract by **World Airways**, is forced to divert to Gander after 19-year-old passenger Daniel Neuhaus becomes abusive toward other passengers and locks himself into a lavatory, where his smoking sets off an alarm. The crew and a doctor are unable to successfully calm the youth and rather than face a transatlantic flight with the unruly customer, the pilot puts down in Canada. RCMP board the plane and escort Neuhaus to jail, where he is charged with disorderly conduct and marijuana possession.

A marketing and code-sharing agreement is signed with **Austrian Airlines, A.G.** on July 14; dual designator services are scheduled to begin on November 1.

On August 7, a memorandum of understanding is signed with **Delta Air Lines** concerning the intended outcomes of marketing coordination discussions currently under way. It is hoped that code-sharing between the two carriers can be implemented by next April.

CEO Joel Feldschuh resigns on September 1 (effective November 1), criticizing the government of Prime Minister Ehud Barak for failing to follow through on its plans to privatize the airline. In response, Barak indicates that privatization will move forward and pledges to lift the ban on Sabbath flights. On September 10, Israeli Transport Minister Ammon Lipkin-Shahak hints that the carrier may soon receive government permission for the initiation of Sabbath flights. Ultraorthodox Jews threaten to boycott the carrier.

On September 26, **Thai Airways International, Ltd.** begins a block-seat, code-sharing agreement aboard El Al's four-times-a-week B-747-458 roundtrips between Bangkok and Tel Aviv.

Effective the following March 25, a code-sharing agreement is signed with **Delta Air Lines** on October 3. Under its terms, Delta will sell tickets for El Al's New York (JFK) to Tel Aviv service while El Al will place its code on Delta frequencies from New York (JFK) to Atlanta, Boston, Dallas (DFW), Denver, Phoenix, Salt Lake City, San Francisco, Seattle, and Washington, D.C. Service to Montreal ends on November 1.

In hopes of beginning B-777 flights in 2001, the carrier undertakes route proving flights to Japan in October.

The fall's long Palestinian uprising, which begins in October, has a fatal impact upon the nation's incoming tourist industry. Visitors stay away by the thousands during the holidays, causing devastating economic losses for all involved.

To make matters more confusing, David Hermesh, an executive with the Israeli Discount Bank chosen by the board of directors on October 20 to succeed CEO Feldschuh upon his November 1 departure, encounters political opposition. While the matter of his succession is sorted out, Arie Fruchter becomes acting CEO.

El Al is among the state concerns badly impacted by the Palestinian situation. At the end of the year, the company forecasts huge losses: \$120 million (operating) and \$50 million to \$70 million (net). To prevent the situation from eroding further, the board of directors approves a new business plan.

The board's new strategy envisions a more focused network strategy with fewer flights on thin routes and saved capacity placed on high-yield services. A few unnamed routes will be dropped and some 300 employees will be laid off under a special compensation program. As the new B-777-258ERs begin to arrive in January (the first is scheduled for delivery on January 29), three wide-bodies will be phased out early, two B-747-258Bs and the B-767-258.

There is also discussion of a plan to purchase up to 20% of Knafaim, the holding company for **Arkia Israel Airlines, Ltd.**, and the joint establishment of an airline group with Arkia as the low-cost arm and El Al the medium- to long-haul arm. No action on this concept will be taken until the new year.

ELAN AIR: United States (1981-1982). Elan Air is established by Milton Marshall and George Flavell at Boston's Logan Airport in July 1981 to operate charter passenger and freight services with a single Douglas DC-8-55 leased from **Overseas National Airways (2)**.

Start-up comes only a month or so before the PATCO air traffic controllers' strike and subsequent ATC restrictions. As a result, the company is only able to transport 4,000 passengers in three flying months of flights to the Caribbean. It sustains losses of \$929,000 on revenues of \$522,000.

Operations are suspended in December and Chapter XI bankruptcy reorganization is sought in March 1982. The company does not restart, even after founder Marshall makes a second attempt (in 1984) to do so.

ELBEE AIRLINES, LTD.: Lower Level, Airline Office Complex, Opposite 1A Terminal, Santacruz Airport, 75 Nehru Rd., E. Vile Parie, Bombay, Maharashtra, 400 099, India; Phone 91 (22) 823 7006; Fax 91 (22) 822 7201; Code LBE; Year Founded 1994. Having acquired an air taxi operator certificate, Elbee Services establishes an airline division at Santacruz Airport, Bombay, in December 1994 to offer domestic charter all-cargo services. Shareholding is divided between

Elbee Services (46%), CCLB Aviation Holdings (46%), and company employees. Ashis Nain is named CEO with Capt. R. A. Williams as head of operations; a workforce of 295 is recruited.

In May 1995, two Fokker F.27-200s are purchased from **Viking Air** and are employed, beginning in June, to fly freight to Ahmedabad, Bangalore, Calcutta, Delhi, and Madras.

Two more Friendships are purchased in the summer of 1996 and begin scheduled freight service in October. A total of 9,000 FTKs of cargo are flown during the year.

Destinations visited in 1997 include Bangalore, Chennai, Delhi, and Bombay.

Just after takeoff from Bombay on a July 3 all-cargo service to Bangalore, an F.27-200 with three crew crashes onto Madh Island; there are no survivors.

By 1998, the airline employs 198 workers and operates three Fokker F.27-200s. Plans are made to form a joint-venture operation with **UPS (United Parcel Service)**.

The two Dutch-made turboprops maintain services in 1999–2000.

ELDERS COLONIAL AIRWAYS, LTD.: Gold Coast (1935–1940). To provide a feeder service between its shipping docks at Takoradi and the Imperial terminal at Kano, the Elder-Dempster Steamship Lines, Ltd. and **Imperial Airways, Ltd.** form ECA at Takoradi on November 7, 1935. Shareholding is divided on a fifty-fifty basis.

Employing a de Havilland DH 86 provided by the British flag carrier, an experimental airmail service is operated between Lagos and Accra on August 13, 1937. The return flight is made the next day.

Regularly scheduled, twice-weekly DH 86 Lagos to Accra service is inaugurated on October 10, with the return flight completed the next day. These flights “feed” the **Imperial Airways, Ltd.** service to England and South Africa. The first acceptance of mail at London for this service occurs on October 14.

A Short Scion Senior flying boat is sent by sea to Bathurst in early 1938; reassembled, it is employed to launch Bathurst to Freetown service on June 24 via Conakry, Bolama, and Bissau. Return flights commence two days later. Designed to feed a proposed **British Airways, Ltd.** (1) South American route, which does not materialize, the frequency will actually support **Deutsche Luft Hansa, A.G.** instead.

An experimental Lagos–Takoradi service is started on April 4, 1939 and on July 15 the Bathurst–Freetown service, having proven a fiscal loss, is withdrawn.

The Shorts Scion Senior sinks at its Bathurst anchorage in August. With the advent of World War II on September 3, no effort is made to supply another flying boat or restart the service.

On June 14, 1940, Elders Colonial Airways suspends operations.

ELDORADO, LTDA.: Bolivia (1980–1994). This one-plane ad hoc freight operator is begun at La Paz in 1980. Employing a single Curtiss C-46 Commando, the company begins and continues hauling varied cargo for the next 17 years.

ELF AIR (ELF AIR TOO): Zhukovsky-5, Zhukovsky Lip, Moscow Region, 140160, Russia; Phone 7 (095) 556-2358; Fax 7 (095) 253-9285; Code E6; Year Founded 1993. Elf Air is established at Moscow in 1993 to provide regional and international passenger services. V. M. Byshouev is president and his single Tupolev Tu-134 is employed to initiate revenue flights linking the company’s base with Nikolaev, Sharjah, and Delhi.

Moscow and Vnukovo join the route network in 1994.

Flights continue in 1995–1999, and the fleet grows to include 3 Tu-134s, 4 Ilyushin Il-76s, and 1 each Il-18, Antonov An-12, An-26, and Yakovlev Yak-40.

While en route from China to Moscow via Irkutsk and Perm on July 26 of 1999, an Il-76TD with seven crew fails its takeoff from Perm and crashes into a forest four km. from the end of the runway. Two aboard receive serious injuries, while the remaining five are not badly hurt.

It will be reported in the Russian media on August 3 that the aircraft, which Elk had been flying on behalf of the Russian Defense Ministry was, according to specialists, carrying an extra 10 tons of cargo (confectionary items from Beijing) and 5 to 10 tons of extra fuel. That, and not the short field as claimed by the Ilyushin’s pilots, proves the cause of the accident.

ELICOTTERI TOSCANI (ELITOS), S.p.A.: Italy (1966–1996). Elitos, S.p.A. is established at Florence in 1966 by a group of aviation professionals led by Gian Blower and businessmen. Employing a Hiller, local charters to destinations in the Appenine Mountains are operated. Operations continue apace during the remainder of the decade.

In the early 1970s, the company leases an Aerospatiale SA-319 Alouette III through the French operator **Heli-Union, S.A.** At this time, Elitos begins to pursue offshore oil markets, which will come to make up 90% of its business. As the decade progresses, company officials elect to use only twin-engine helicopters in its work; to obtain them, the carrier is recapitalized and Heli-Union becomes a 29% shareholder. Forward operating bases are established along the Adriatic coast at Ancona-Falconara and Pescara and on the island of Sicily at Trapani and Syracuse.

As the 1980s dawn, Elitos undertakes offshore work for Agip, S.p.A., the Italian state oil company, off South Yemen and Somalia. The company also becomes the first commercial operator in Europe to fly the Aerospatiale SA-330J Puma. In addition, a leased BO-105CBS is chartered by the Italian tourist bureau between November and April to operate a heli-skiing operation; the remainder of the year, the helicopter is contracted for forest fire fighting in Sardinia.

In 1984, a total of 6,428 revenue hours are flown, bringing the 8-year total to 62,321. During 1985, a new operations center is opened at an airport outside of Florence. In addition, a new avionics lab is launched that will allow it to do third-party electronic repairs.

In 1986, the company employs 135 workers, including 39 pilots, and the fleet now features 6 SA-330J Pumas and 1 each BO-105CBS, Augusta A-109, Bell 222, and Bell 412.

Operations continue apace over the next decade. By 1994–1996, Managing Director Riccardo Bacichi’s fleet includes 2 Augusta 412s and 5 A109As.

Operations cease in 1996.

ELIIP FLIGHT TEST & RESEARCH CENTRE (ERMOLIN-SKOE LETNOE ISPITAELO-ISSLEDOVATESLSKOE PREO-PRIYATIV): Balabanovo, Kaluga Area, Borovski Region, Emolino, Central Regions Zone ATD, 249000, Russia; Phone 7 (095) 546-3493; Fax 7 (095) 546-2506; Year Founded 1994. A longtime Russian flight-test research center, Eliip is allowed to begin flying regional and domestic cargo charters in 1994 in order to earn income. General Director Sergi Sevastyanov commences revenue services with an all-Antonov fleet unspecified as to number.

Flights continue in 1995–2000, during which years flight equipment comes to comprise 4 An-12s and 1 each An-24 and An-26.

ELISTA UNITED AIR DETACHMENT (ELISTINSKY OAO): Russia (1993–1995). EUAD is established at Kalmykia’s Elista Airport in 1993 to offer third-level passenger and cargo services to regional destinations. Victor I. Buganko is CEO and he initiates revenue flights with a Yakovlev Yak-40 and an Antonov An-2. Services cease in 1995.

ELITE AVIATION: 7415 Hayvenhurst Place, Van Nuys, California 91406, United States; Phone (818) 988-5387, Year Founded (818) 988-2111; <http://www.eliteavn.com>; Year Founded 1994. Elite is founded at Van Nuys in 1994 to provide executive and small group passenger charters worldwide. By 2000, the company employs 20 pilots and flies 4 Grumman G-1159 Gulfstreams and 1 each Canadair 601 Challenger and British Aerospace BAe (HS) 125-800 Hawker.

ELITICINO, S.A. See HELI-SWISS, LTD.

ELK AIR (ESTONIAN AVIATION COMPANY, LTD.): Eesti Vabariik, Majaka Str. 26, Tallinn, EE0014, Estonia; Phone 372 22 11 929; Fax 372 62 11 978; <http://www/elk.ee>; Code S8; Year Founded 1991. Elk Air is established at Tallinn on October 23, 1991 to offer both passenger and cargo services to international, regional, and domestic destinations on both a charter and scheduled basis. Rita Lillepuu is chairman/CEO, with Alexander Belousov as board chairman/president.

A workforce of 103 is assembled, together with a fleet of 3 Tupolev Tu-154Ms and 2 Let L-410s. Revenue flights commence on May 19, 1992 and continue during 1993–1998. Scheduled destinations visited include Turku, Helsinki, Riga, and St. Petersburg, while charters are mounted throughout Europe and the CIS.

Enplanements during the latter year total 13,000.

Airline employment stands at 89 in 1999.

The company is now run by the husband-and-wife team of Rita Lillepuu, board chairman, and Alexander Belousov, president. The fleet, which Belousov defends as adequate for the carrier's present requirements, comprises 1 Antonov An-26, 2 Let L-410UVPs, 1 Tu-154M, and 1 Tu-134A. These aircraft are employed on scheduled services to Moscow and St. Petersburg, as well as charters.

During the spring, a British Aerospace BAe Jetstream 31 turboprop joins the fleet. By fall, Belousov has changed his mind and has begun to advocate the need for Western-made jetliners. Plans are also made to open new routes within a year from Tallinn to Kiev, Riga, and Prague.

To provide needed housing for a more-modern fleet, construction is begun on a new hangar at Tallinn Airport in mid-November. It will join a fuel terminal also due for completion shortly. In order that already laid access roads and established offices might be employed, the complex is being built on the site of a factory.

Enplanements for the year total 11,000.

The size of the workforce is unchanged at the beginning of 2000.

On March 29, **Estonian Air Corporation, A.S.** cancels Elk's permission to operate a competing service from Tallinn to Moscow. In retaliation, Russian aviation authorities order Estonian flights halted, as Elk Air is a partner of **Aeroflot Russian International Airlines (ARIA)**. The dispute over flights to Moscow leads both companies on April 6 to suspend all service to the Russian capital from Tallinn.

On December 14, Chairman Lillepuu arrives at the office of the airline's president, her husband Alexander Belousov, and informs him of the board's decision to fire him. She orders her bodyguards to physically remove him from the premises. When the ex-CEO and his bodyguards attempt to reenter the offices later in the day, they are prohibited. The local press, in revealing these developments, also notes that Ms. Lillepuu's lieutenants will not even allow her husband to reenter their joint home to retrieve his clothes, mobile phone, or other personal belongings.

J. V. ELLIOT AIR SERVICE, LTD.: Canada (1926–1928). Former **Laurentide Air Services, Ltd.** pilot J. V. "Jack" Elliot forms his own company at Toronto in early 1926 to operate services in the Rouyn area. On March 6, from a base at Rolling Portage, Ontario, he undertakes the first airmail flight to the Red Lake gold mining region.

During the remainder of the year, a total of 587 passengers, 800 pounds of mail, and a ton of freight are transported.

Customers, express, and mail operations continue until the company is taken over by **Canadian Airways, Ltd.** in January 1928.

ELLIOT-FAIRCHILD AIR SERVICE, LTD. See CENTRAL CANADA AIR LINES, LTD.

ELLIS AIR LINES: United States (1936–1962). Formed by Robert E. "Bob" Ellis at Ketchikan, initially as **Ellis Air Transport**, in July 1936, this southeastern Alaskan carrier begins service on a Bristol Bay fisheries contract in a WACO YKS-6 cabin floatplane. In late summer, regu-

larly scheduled flights commence to Prince of Wales Island. In 1938, a rough hangar is set up, supported on logs.

Owner/chief pilot Ellis enters a copartnership arrangement with **Alaska Coastal Airlines** on May 27, 1939.

In January 1940, Ellis incorporates his company, one of the few in the world to operate exclusively from the water. Later, Gerald "Bud" Bodding is hired as the first pilot besides Ellis himself.

After Pearl Harbor is bombed by the Japanese on December 7, 1941, Ellis Air Lines is quickly downsized, as most of its fleet—2 WACOs, 1 Bellanca, and 1 Stinson—is sold to the U.S. Navy, for which Ellis now serves as a consultant. What remains of the Ketchikan operation is run on a very reduced schedule by Ray Renshaw.

CAB certification finally comes through on December 5, 1942.

Free from his USN responsibilities in September 1945, Ellis purchases a Grumman G-21 Goose in November and flies it to Ketchikan from Georgia. The remainder of the year is spent in modifying the aircraft and rebuilding the prewar service.

Early in 1946, the company is reformed and renamed Ellis Air Lines. Meanwhile, the Ellis and Alaska-Coastal operation receives federal approval to provide joint service on the Juneau–Ketchikan route.

Primarily amphibious operations continue apace during the remainder of the decade and into the 1950s, often in competition with the larger **Alaska Coastal Airlines**.

By 1955, Ellis employs 100 workers and operates a fleet of 13 aircraft, including 9 Geese. Larger destinations visited include Juneau, Wrangell, Petersburg, Sitka, Edna Bay, Annette, and Prince Rupert, in British Columbia. Flights are also made to many smaller island communities, on both a scheduled and nonscheduled basis.

The fleet of the small carrier in 1958 shows 13 G-21As and a single large landplane, a war surplus Curtiss C-46 Commando.

In 1959, a Consolidated PB5Y-5A Catalina is acquired.

A G-21A is destroyed in a bad water-landing at Cape Pole on March 29, 1960; all three aboard are hurt.

A G-21A with six aboard is badly damaged in a hard landing at Prince of Wales Island on October 24, 1961.

Following negotiations, Ellis is formally merged into **Alaska Coastal Airlines** on April 1, 1962.

The reborn company is known as **Atlantic Coastal-Ellis Air Lines**. Bob Ellis will recall his airline's activities in his memoirs, *What . . . No Landing Field?* (Haines, Alaska: Lynn Canal Publishing Co., 1969).

ELLIS AIR TAXI: P.O. Box 106, Glenallen, Alaska 99588, United States; Phone (907) 822-3368; Fax (907) 822-3368; Year Founded 1983. Ellis Air Taxi is established at Glenallen, Alaska, in the fall of 1983 to provide scheduled passenger and cargo services. Equipped with Cessna lightplanes, revenue flights commence in November over a circular route from Gulkana to Gulkana via McCarthy, May Creek, and Chisana.

Operations continue apace for the next 17 years. In 2000, President Harry L. Ellis operates a fleet that includes a Cessna 185, Cessna C-206, and a Piper PA-31-310 Navajo.

ELROM AVIATION, LTD.: Beersheba, Israel; Year Founded 1968. Founded at Beersheba in 1968, Elrom undertakes charter and air taxi flights into the Negev and, with a fleet of 5 Piper PA-34 Senecas and 2 Cessna 172s, continues to offer scheduled services linking its base with Haifa and Elat.

EMBRY-RIDDLE COMPANY: United States (1925–1932). On December 17, 1925, John Paul Riddle and T. Higbee Embry form a Fixed-Base Operation (FBO) bearing their name at Cincinnati's Lunken "Sunken Lunken" Airport. Initial capitalization is \$10,000 and income is also received from the company's distribution contract with the Fairchild Aviation Corporation.

When the U.S. Post Office requests bids for Contract Air Mail Route No. 24, Cincinnati–Chicago via Indianapolis in July 1927, the partners

place an offer. The opportunity is duly won and the company's three WACO 10 biplanes are employed to inaugurate the route, complete with several passengers and some air express, on December 17, the twenty-fourth anniversary of the Wright Brothers' first flight.

Operation of the mail route proves more costly than had been anticipated and the partners are forced to seek additional investment in 1928. In late spring, local interests contribute \$90,000, but this is insufficient. Embry and Riddle seek outside help. Learning of the need, representatives from Curtiss approach the FBO; however, to head off this competitor, Sherman Fairchild convinces his board to make the needed investment. Indeed, not only would the manufacturer contribute but it would itself become a holding company for an airline system by financing (i.e., controlling) not only Embry-Riddle, but other operators as well.

Among other services provided by the Embry-Riddle partners from the beginning is a flying school that graduates an inaugural class of 27 students on July 29. Later in the year, Embry establishes a parachute division of the FBO to teach maintenance and jumping techniques.

With this idea firmly in mind, Fairchild and financial colleagues create The Aviation Corporation (AVCO) on March 3, 1929. Backed by Lehman Brothers and W. A. Harriman & Company, 10-million shares of stock are created; \$2 million is subscribed at \$17.50 per share, netting \$35 million in working capitalization.

The first subsidiary acquired in May and some would say AVCO's source of amalgamation inspiration, is Embry-Riddle, which is allowed to continue operations under its own name until a single operating subsidiary can be created for the holding firm.

The flight school is certified by the Aeronautical Section of the U.S. Department of Commerce in July, one of the first in the country to be so acknowledged.

On November 2, a WACO 10 piloted by Charles Vermilyea is en route from Chicago to Cincinnati when it unexplainably crashes at Indianapolis killing Vermilyea.

Upon the creation of **American Airways** in January 1930, Embry and Riddle balk, not wishing to sell their stock. Unable to halt AVCO's subsidiary creation or absorption of their assets, they, nevertheless, hold onto their stock.

On October 30, a Pitcairn PA-6 Super Mailwing en route to Chicago from Cincinnati crashes at Indianapolis (one dead).

Company financial conditions in 1932 force a sale. During the two years, no less than six subsidiaries are created; however, when the company is dissolved, it is discovered that these have never been formed or financed.

Founders Embry and Riddle now end their relationship; the former moves to California while, in 1934, Riddle moves to Miami, taking the flight school with him.

In 1939, Riddle purchases the Embry-Riddle name from **American Airlines** and establishes, with new partner John G. McKay, the Embry-Riddle Corporation, which undertakes pilot training on behalf of the University of Miami.

In 1944, Riddle sells out to McKay, who, while providing pilot training to the military in World War II, changes the company name to Embry-Riddle International School for Aviation. Later, the company name is again slightly altered, to Embry Riddle Aeronautical University.

The college celebrates its sixtieth anniversary on July 25–27, 1986; cofounder Riddle attends the celebration at Daytona Beach, Florida, to honor a 1928 graduate.

In 1998–2000 Embry Riddle is the nation's only fully accredited civilian college with an aviation theme. Courses are taught from campuses in Florida and also at Prescott, Arizona.

EMEKE WINGS, LTD.: Israel (1989–1995). The airline division of Kanfey-Ha'Emek Aviation is set up at Afula in 1989 to provide domestic passenger and cargo services throughout Israel and the Occupied Territories.

By 1994, the fleet includes 1 each Aero International (Regional) ATR72-320 and Shorts 360-300, plus 2 Shorts 330-200s.

In 1995, the corporate identity is changed to **Israil, Ltd.**

EMERALD AIR: United States (1978–1991). Privately owned Emerald is founded at Austin, Texas, in the summer of 1978 to offer scheduled cargo service to intrastate destinations. Revenue flights with two DC-9-15CF freighters commence in October.

During 1979, the first full year of service, a total of 3.43 million FTKs are operated by the firm's 3 DC-9-15CFs.

Contract flights are undertaken for **Purolator Courier** beginning in July 1980. As a result, the number of FTKs operated skyrockets by 77.1% to 6.08 million.

A year later, in June 1981, the company begins scheduled passenger services, some of which are coordinated to feed **Pan American World Airways (1)** at the major's Houston hub under the joint marketing arrangement Emerald/Pan Am Express. Three Fairchild Hiller FH-227s and a Grumman Gulfstream G-1C are employed on shorter segments and, on December 1, two DC-9-15CFs are diverted to begin passenger flights linking Austin with Houston, Corpus Christi, Dallas, Brownsville, San Antonio, and McAllen.

In addition to 36,157 passengers, the company also flies 2.9 million FTKs.

Emerald continues operations over a network which, in 1982–1983, comes to include not only its Texas destinations, but Omaha and Wichita as well. Aircraft employed include the original two freighters, plus four DC-9-14s, two Fairchild Hiller FH-227s, and a Grumman Gulfstream G-1.

Passenger boardings double during the former year to 87,362 as 17 million FTKs are also transported. Enplanements in the latter year balloon 203.2% to 264,905, while freight advances 15.8% to 19.79 million FTKs. Despite these traffic successes, stringent cost-cutting measures are taken after consecutive annual losses of \$1.57 million and \$297,000, respectively.

Service to Austin and San Antonio ends in June 1984, as does the relationship with **Pan American World Airways (1)**. To this point, passenger boardings for the year thus far total 196,205, a 162.5% boost.

A new arrangement is begun with **Braniff, Inc.**, in July, but cannot be exercised before Emerald, \$25 million in debt, stops flying its scheduled services and files for Chapter XI bankruptcy on August 21. Under terms of its court arrangement, the company must file a reorganization plan but need not report its traffic and fiscal figures.

While reforming, the company continues to operate DC-9-14 charters, many to gambling casinos in Las Vegas and the Caribbean, in 1985. Many of these are subcontracts operated on behalf of other airlines such as **Northeastern International Airlines** and **Resorts International Airlines**.

In April, Wallace H. Graner succeeds T. R. McCauley as president/CEO.

At year's end, Emerald chooses to announce that a total of 173,000 passengers have been flown.

A contract is signed with **Continental Airlines** in the summer of 1986 and employing a DC-9-15, the company begins Continental's Houston Proud Express shuttle service between International and Hobby Airports on August 18.

A DC-9-14 is wet-leased to the short-lived **Air Puerto Rico**.

Enplanements are level for the year and a \$2.9-million operating loss is suffered.

The fleet in 1987 includes 2 DC-9-15Fs and 3 DC-9-14 passenger aircraft.
